DEDICATION AND ACKNOWLEDGMENTS

This book is dedicated to the first generation of natural food and organic food pioneers in the United States; they were generally active during the years from 1960 to 1990.

Part of the enjoyment of writing a book lies in meeting people from around the world who share a common interest, and in learning from them what is often the knowledge or skills acquired during a lifetime of devoted research or practice. We wish to give deepest thanks...

Of the many libraries and librarians who have been of great help to our research over the years, several stand out:

University of California at Berkeley: John Creaser, Lois Farrell, Norma Kobzina, Ingrid Radkey.

Northern Regional Library Facility (NRLF), Richmond, California: Martha Lucero, Jutta Wiemhoff, Scott Miller, Virginia Moon, Kay Loughman.

Stanford University: Molly Molloy, who has been of special help on Slavic-language documents.

National Agricultural Library: Susan Chapman, Kay Derr, Carol Ditzler, John Forbes, Winnifred Gelenter, Henry Gilbert, Kim Hicks, Ellen Knollman, Patricia Krug, Sarah Lee, Veronica Lefebvre, Julie Mangin, Ellen Mann, Josephine McDowell, Wayne Olson, Mike Thompson, Tanner Wray.

Library of Congress: Ronald Jackson, Ronald Roache.

Lane Medical Library at Stanford University.

Contra Costa County Central Library and Lafayette Library: Carole Barksdale, Kristen Wick, Barbara Furgason, Sherry Cartmill, Linda Barbero.

Harvard University's Five Botanical Libraries (especially Arnold Arboretum Library): Jill Gelmers Thomas.

French translation: Martine Liguori of Lafayette, California, for ongoing, generous, and outstanding help since the early 1980s. Dutch translation: Sjon Welters. French translation Elise Kruidenier. German translation Philip Isenberg,

Japanese translation and maps: Akiko Aoyagi Shurtleff.

Loma Linda University, Del E. Webb Memorial Library (Seventh-day Adventist): Janice Little, Trish Chapman.

We would also like to thank our co-workers and friends at Soyinfo Center who, since 1984, have played a major role in collecting the documents, building the library, and producing the SoyaScan database from which this book is printed:

Irene Yen, Tony Jenkins, Sarah Chang, Laurie Wilmore, Alice Whealey, Simon Beaven, Elinor McCoy, Patricia McKelvey, Claire Wickens, Ron Perry, Walter Lin, Dana Scott, Jeremy Longinotti, John Edelen, Alex Lerman, Lydia Lam, Gretchen Muller, Joyce Mao, Luna Oxenberg, Joelle Bouchard, Justine Lam, Joey Shurtleff, Justin Hildebrandt, Michelle Chun, Olga Kochan, Loren Clive, Marina Li, Rowyn McDonald, Casey Brodsky, Hannah Woodman, Elizabeth Hawkins, Molly Howland, Jacqueline Tao, Lynn Hsu, Brooke Vittimberga, Tanya Kochan, Aanchal Singh.

Special thanks to: Tom and Linda Wolfe of Berwyn Park, Maryland; to Lorenz K. Schaller of Ojai, California; and to Wayne Dawson (genealogist) of Tucson, Arizona.

■ For outstanding help on this natural foods book we thank: Herman Aihara, Akasha, Nik Amartseff, Ruth Keene Anderson, Leila Bakkum, Bob Ballard, Chandri and Oak Barat, Hank Bednarz, John & Jan Belleme, Walter Benda, Gordon Bennett, Bill Bolduc, April Boswell, Billy Bramblett, Mark Brawerman, Larry Brucia, Ken Burns, Irwin Carasso, Greg Caton, Pat Carey, Joseph Carpenter, Judy Coates Deming, Mat Chait, Margy Coates, Michael Cohen, Annemarie Colbin, George Conquergood, Myron Cooper, Kevin Cross, Chr. Daems, Walter Daenzer, Cynthia Davis, Robert Davis, Chris Dawson, Don DeBona, Joel Dee, Jacques & Yvette Delangre, John W. Deming, Jr., Judy Coates Deming, Steve Demos, Leo Denby, Tom DeSilva, Robert Dolgin, Tanya Domurath, Bernd Drosihn, Ed Elkin, Barbara Elliott, Christian Elwell, Barry Evans, Louis Fellman, Eric C. Fehlberg, Nick Feldman, Carl Ferré, Steve Fiering, Bruno Fischer, Boyd M. Foster, John Goodbrad, Bob Gerner, Peter Golbitz, Adelle Shefferman Gomory, Greg Gonzales, Wallace Gorell, Martin Greenhut, Lorraine Guardino, Rob Hurlbut, Alex Jack, David Jackson, Gil Johnson, Dora Coates Hawken, Paul Hawken, Roger Hillyard, Norman Holland, Carol Ann Huang, Fern Israel, Dana Jacobi, Lenny Jacobs, John Jeavons, Kim Jenkins, Akiyoshi Kazama, Jocelyn Keene, Charles Kendall, J.

Gordon Kennedy, Robert Kennedy, Roger Kilburn, Takuji Tak Kimura, Ronald Kotsch, Michio & Aveline Kushi, Norio Kushi, Craig Landy, Leonardo Laudisio, Don Lazarro, Vic Leabu, Ken Lee, Thom Leonard, Peter Lesser, Richard Leviton, Bruce Macdonald, Philip Marshall, Jeanette B. McCay, Barclay McFadden, John Menzies, Steven Meyers, Peter Milbury, Jim Miller, Art Mio, Kiyoshi Mokutani, Jim Morano, Frank Murray, Larry Needleman, Robert Nissenbaum, Ted Nordquist, Bill Oates, Tim Ohlund, Anpetu Oihankesni, Teizo Okada, Yuko Okada, John Paino, Anthony A. Palermo, Danny Paolucci, John Perelman, Mike Peyton, Pascal Pinault, Tony Plotkin, Michael Potter, Yves Potvin, Sandy Pukel, Blake Rankin, Tim Redmond, Helen Reiser, John Reiser, Michael Richards, Al Richardson, Jean Richardson, Bill Richert, Akasha Richmond, Jeremiah Ridenour, Patricia Roberts, Peter Roberts, Fred Rohe / Fred Rohé, Evan Root, Ron Roller, Bruce Rose, Richard Rose, Martin Roth, Sandy Rothman, Allan Routh, Howard Rower, Noboru Sakaguchi, Gregory Sams, Avraham Sand, Pamela Sander, Matthew & Helen Sandler, Lorenz K. Schaller, Elmer Schettler, Royce Seeger, Corolyn Heidenry Sharp, Ann Shaw, Teruo Shimizu, James Silver, Patricia J. Smith, Murray Snyder, Steve Snyder, Panny Spence, Gary Stein, Arran Stephens, Bruce Sturgeon, Leonard Stuttman, Bill Tara, Ron Teeguarden, Robert Tepper, Bob Thorson, Seth Tibbott, William Tims, Minh Tsai, John Troy, Hilton Tsui, Tamara Uprichard, Casey Van Rysdam, June Wang, Howard Wainer, Manfred Warmuth, Howard Waxman, Robin Webster, Linda Weigel, Michael Weiner, John Weissman, Sjon Welters, Mel Williamson, Joel Wollner, Junsei Yamazaki, Yasuo Yoshihara, Jean Allison Young, Rich Young,

■ Finally our deepest thanks to Tony Cooper of San Ramon, California, who has kept our computers up and running since Sept. 1983. Without Tony, this series of books on the Web would not have been possible.

This book, no doubt and alas, has its share of errors. These, of course, are solely the responsibility of William Shurtleff.

■ This bibliography and sourcebook was written with the hope that someone will write a detailed and well-documented history of this subject.

INTRODUCTION

Erewhon was founded in April 1966 by Aveline and Michio Kushi as a tiny retail store in Cambridge, Massachusetts selling macrobiotic and natural foods. By 1968 it was importing foods from Japan. By 1969 it had grown into the first natural foods wholesale and distribution company in the United States. Its founders saw it as a macrobiotic company, but many of the young Americans who built it saw it as a natural foods company as well.

There have been three major reform movements, or waves, related to food and health in the United States. Each has had its own philosophy or theory of diet and health, its own periodicals, and, of course, its own founders, leaders, and teachers / lecturers. All three believed that there were certain natural laws of health and of the body which, if transgressed, would lead to sickness. The way to restore health was not (generally) to take medicines (which simply cover up the symptoms) but to stop the activity which was causing the sickness. All three believed in the healing power of nature, and advocated the return to a simpler, more natural way of living and eating. All three emphasized the importance of a good diet as the basis of good health, and (at least initially) all three advocated a vegetarian diet based on traditional, natural foods, and avoidance of refined, highly processed, or artificial foods. Each new wave was bigger than the one before it and had more influence on American food culture.

The first wave, which went from the 1820s to the 1890s, is generally called the health reform movement. Centered in Boston, it was started by Sylvester Graham and the American Physiological Society; good diet, water, exercise, and fresh air were considered the foundations of good health. Other pioneers and leaders included William Andrus Alcott (M.D.), Amos Bronson Alcott, James Caleb Jackson, Russell Thacher Trall, Ellen G. White and the Seventh-day Adventist Church. Most preached a return to whole-wheat bread, and avoidance of flesh foods and alcohol. Health reformers strongly opposed the use of patent medicines.

Important early periodicals were: Boston Medical Intelligencer (1823-1828), Journal of Health (1829-1833), Water-Cure Journal (1845-1862), American Vegetarian and Health Journal (1850-1854), Health Reformer (1866-1878, renamed Good Health (1879-1953, published by John Harvey Kellogg, M.D.).

Important books: Lectures on the Science of Human Life (2 vols.), by Sylvester Graham (1839).

The second wave, which went from the 1890s to the 1960s, is called the health foods movement. Many of its original ideas and some of its pioneers (especially in California and New York in the early 1900s) came from Germany and its Reformhaus and Lebensreform (“life reform”) movements.

These Naturmenschen (“natural men”) from Germany were California’s original hippies (see *Children of the Sun*, by Gordon Kennedy).

Its major early centers of activity were Southern California (especially Hollywood), Battle Creek, Michigan (Dr. John Harvey Kellogg, who coined the term “health foods” in 1892 and whose Sanitarium Health Food Co. made the first line of health foods), New York, and Boston (Benedict Lust of Germany, the leading naturopath and a major publisher). Pioneers in California included Otto Carque, Clark Irvine, Gayelord Hauser, Paul C. Bragg, Mildred Lager, Lelord Kordel, Adelle Davis, and Gypsy Boots. Vitamins and minerals were discovered during this period, and the movement emphasized (and overemphasized) their importance. Hundreds of health foods stores (many of them small, mom-and-pop operations) were started during this period (most after 1935); their owners believed deeply in their work.

Important early periodicals included: Good Health (1879-1953, still published in Michigan by John Harvey Kellogg, M.D.). California Health News (Jan. 1931, published by Clark Irvine in Hollywood, renamed Health News in Sept. 1937, then Let’s Live in May 1942), Health Foods Retailing (April 1936), Organic Farming and Gardening (May 1942, published by J. I. Rodale in Pennsylvania, renamed Organic Gardening and Farming, Jan. 1954). Rodale pioneered the organic foods movement in the United States. By the early 1950s foods labeled “organically grown” were being sold in the United States.

Important books: The Foundation of All Reform, by Otto Carque (1904). The Natural Diet of Man, by Dr. J.H. Kellogg (1923). Natural Foods: The Safe Way to Health, by Otto Carque (1925). Cure Yourself, by Paul Bragg (1929). You Can Stay Well, by Adelle Davis (1939). Let’s Cook it Right, by Adelle Davis (1947). Look Younger, Live Longer, by Gayelord Hauser (1950). Let’s Eat Right to Keep Fit, by Adelle Davis (1954). Silent Spring, by Rachel Carson (Sept. 1962). More than One Slingshot, by Frank Murray (1984).

Important early distributors included Kahan & Lessin (1932, Los Angeles), Landstrom Co. (1931, San Francisco), Balanced Foods (1939, New York City then New Jersey), Sherman Foods (1924, Bronx, New York), Health Foods, Inc. (1936, Des Plaines, Illinois).

Pioneers and leaders included the founders and heads of the major distributing companies and periodicals.

In 1937 Anthony Berhalter of Chicago organized the American Health Food Association, quickly renamed the National Health Foods Association. In 1970 it was renamed the National Nutritional Foods Association (NNFA), which is still the health food industry’s trade association.

The health foods movement started out emphasizing natural and specialty foods but, by the 1960s, had gradually

changed its focus to pills and protein powders – which is where the money was.

The third wave, which started in the mid-1960s and continued until the present, is called the natural foods movement. It was founded largely by young men and women who came of age during the period from 1960 to 1980. They discovered, to their surprise, that most food crops grown since the 1940s, were produced using chemical herbicides, pesticides, insecticides, and fertilizers. The safety of these agrichemicals had not been adequately tested. Moreover, many foods were then highly processed or refined, and contained added white sugar, preservatives, stabilizers, and other chemicals. It was quite difficult to obtain traditional, natural foods – even at health food stores. These young people, most of whom considered themselves part of the counterculture (they had fought against the Vietnam War and racial segregation, and for women to popularize a host of foods from Japan – foods that most Americans had never heard of or tasted – such as brown rice, tamari soy sauce, azuki beans, sesame seeds, sesame salt (gomashio), soba (buckwheat noodles), udon (special wheat noodles), amazake, miso, sea vegetables (hijiki, wakame, kombu, nori, etc.), umeboshi (salt plums), kuzu, kabocha pumpkins, burdock root, jinenjo (glutinous yam), bancha twig tea, seitan, rice cakes, and mu tea. Erewhon was the first company to distribute many of these foods, and many of them gradually made their way into the American diet and language. Macrobiotics taught that whole grains should be the center of the diet – something many Americans had once believed but had long forgotten. Substances unfit for normal human consumption were white sugar, alcohol, dairy products, and all kinds of drugs.

Important early periodicals were *East West Journal* (Jan. 1971, Boston, macrobiotic), *Vegetarian Times* (March 1974, Chicago), *Health Foods Business* (1973), *Whole Foods* (Jan. 1978, Berkeley), and *Natural Foods Merchandiser* (Feb. 1979).

Erewhon (Boston) was the first distributor of natural foods (fall 1969). Other early distributors were: Westbrae (July 1970, Berkeley, California), Erewhon – Los Angeles (summer 1970), Essene (Feb. 1971, Philadelphia), Laurelbrook (1971, Maryland), Eden Foods (June 1971, Ann Arbor, Michigan), Shadowfax (1971, New York), The Well (1971, San Jose, California), Janus (Jan. 1972, Seattle, Washington), Tree of Life (1972, St. Augustine, Florida).

Pioneers and leaders included the founders and heads of the major distributing companies and periodicals. Plus Sandy Gooch (Mrs. Gooch's), Tony Harnett (Bread and Circus), Peter Roy and John Mackey (Whole Foods).

By the mid- to late-1970s, most of the health food distributors mentioned above were carrying a complete line of natural foods and distributing them to both health food stores and natural food stores.

Surprisingly, the natural foods industry has never developed its own trade association. Therefore the company that owns *Natural Foods Merchandiser* has used this opportunity to organize very successful trade shows at Anaheim, California, and Washington, DC each year, and to publish the industry's most important periodical.

In those heady days of the late 1960s and early 1970s it looked like America was headed into a peaceful, nonviolent revolution. Young people, the revolutionaries (“Power to the people!” “Don’t trust anybody over 30”) would be in the vanguard. They needed to develop new models for the rapidly approaching future. The Erewhon retail store at 342 Newbury Street that opened in Nov. 1968 was developed as a model new food store. Wooden walls, food in bins, only healthy natural foods. Fred Rohe’s *New Age Natural Foods* in San Francisco was an early West Coast model retail store.

Erewhon was developed as a model wholesale distributor of the new foods. Many other new and successful companies modeled themselves after Erewhon.

The most recent natural foods movement began as a macrobiotic foods movement

Brief Chronology/Timeline of Natural and Organic Foods

1890 – A periodical titled *Natural Food* starts to be published in London. It ceases in 1896.

1900-1945 – During this time a number of writers deeply interested in good health and vegetarianism used the terms “natural food” or “natural foods” in their writings. These include Otto Carqué and Mildred Lager in Los Angeles. We have included selected works in this book.

An influential column titled “Care of the Body” ran in the *Los Angeles Times* from 1899 to 1939. It was edited by Harry Ellington Brook from 1908 to 1924, then by Philip M. Lovell (N.D. =Naturopathic Doctor) from 1924 to 1939. Like their employer, Harry Chandler, both believed in the “healing power of nature” and the importance of a good diet and plenty of exercise (Akasha).

1942 May – *Organic Farming and Gardening*, a magazine edited by Jerome I. Rodale, starts to be published by Rodale Press in Emmaus, Pennsylvania. Note that the initial emphasis was more on farming than on gardening. In Oct. 1942 it was renamed *Organic Gardening and Farming*. These are the single most important periodicals in launching and developing the organic foods movement and industry in the United States, and eventually the Western world.

1946 May 3 – The Soil Association is founded in the United Kingdom by Lady Eve Balfour, Jorian Jenks and Friend Sykes.

1946 May 18 – Paul and Betty Keene purchase Walnut Acres, 104 rocky acres plus some dilapidated buildings, near Penns Creek, Pennsylvania. In 1988 Paul recalled:

“Finally, penniless except for two hundred dollars, a team of horses, an old rusting horse plow and harrow, second-hand furniture, an ancient car, and two small daughters, we were able to get a long term loan [\$5,000] from government sources to purchase our very, very own farm of one hundred acres. Here our feet trod a portion of the earth leased for our lifetimes from the universe, to have and to hold precious and beloved until death do us part.”

“There was no furnace for central heating, no water heater except the kitchen range, no bathroom, no clothes-or-dish washers, no telephone, no refrigerator no freezer, no air conditioner, no T.V...”

1946 Dec. – Walnut Acres runs its first ad – in *Organic Gardening* magazine. In the classified ads section under “Organically-grown products” the only entry states: “Organically-Produced Foodstuffs. Our prime concern is the health of our soil, animals and produce. We use no sprays or chemical fertilizers. Several items now available. Your inquiry invited. Paul Keene. Walnut Acres. Penns Creek, Pa.” (p. 63).

1954 April – *Natural Food and Farming*, the magazine of the second U.S. natural foods movement, starts to be published by Joe D. Nichols, M.D., in Atlanta, Texas.

1954 – Paul Keene of Walnut Acres helps to found the Pennsylvania chapter of the Natural Food Associates, based in Atlanta, Texas.

1956 April – Walnut Acres runs a 1/6 page ad in *Natural Food and Farming* – a sign of growing prosperity.

1961 Oct. – An excellent feature (5-page) article, “The Story of Walnut Acres,” by Ethyl DeLoach, is published in *Natural Food and Farming*. At this time, Walnut Acres has 20 employees and seven mills. All of the grain sold is raised on the farm. Only one crop is harvested from any particular field every two years. More than 10,000 customers order Walnut Acres’ food by mail order.

1961 – *The Natural Foods Cookbook*, by Beatrice Trum Hunter, is published by Simon and Schuster (New York), with an introduction by Dr. Clive M. McCay (Prof. of Nutrition, Cornell University) and his wife, Jeanette. It is the first book of natural foods recipes.

1962 March – Chico-San in Chico, California, is officially incorporated as a manufacturer and importer (from Japan) of macrobiotic foods – such as Lima Tamari Soy Sauce, Black Soybeans, Azuki Beans and Barley Miso (first imported

in 1962). Chico-San has other companies distribute their products.

1965 April – Fred Rohe (pronounced Rohé) borrows \$5,000 and buys a health food store, Sunset Health Foods, at 1319 Ninth Ave, in San Francisco. But instead of stocking it with the usual health foods fare, he added fresh produce, animal products, baked goods, etc. During the first year business was slow, but then young people discovered him.

“His business doubled each year until 1970. Business was so good that he annexed a shop across the street and used it for a granary.”

In order to have uniform standards, Rohe organized a dozen retailers, growers and restaurateurs into a group named Organic Merchants. The group now (late 1970) has more than 50 members and ranges to Alaska and Hawaii (*San Francisco Examiner*. 1970. Dec. 25. p. 25).

1965 – Howard Rower starts the Infinity Food Co. in New York City as a distributor and importer of macrobiotic and natural foods.

1966 Jan. 13 – Erewhon opens as a small (10- by 20-foot) macrobiotic and natural foods retail store at 303-B Newbury Street (below street level) in Boston. Aveline and Michio Kushi are the founders, but Aveline is the sole owner. Evan Root is the first retail store manager. This is a key date in the origin of the natural foods industry and movement in America. Erewhon is the first store of its kind in America and it soon serves as a model for many other similar natural food stores across the nation.

1966 – Muso Shokuhin in Osaka, Japan is founded by Mr. Shuko Okada (Kotzsh 1984). Note: In 1982 Teizo Okada said that Muso was started in 1959.

1967 Aug. – Paul Hawken takes over the management of Erewhon (one small retail store) from Evan Root. He changes the name to Erewhon Trading Co. (from simply “Erewhon”) and starts to expand the business. In May 1968 Hawken incorporates Erewhon Trading Company.

1967 – The first Trader Joe’s store is started in Pasadena, California, by Joe Coulombe (pronounced COO-lomb). His store has a superb selection of wine and other alcoholic beverages. His philosophy is limited selection, high turnover.

1968 June – Hawken establishes his first supplier of organically grown grains, Ted Whitmer, a wheat farmer in Montana. By 1973 Erewhon had established and contracted with 57 farms in 35 states to provide the company directly with organically-grown foods. In Aug. 1968 Erewhon starts to import foods from Japan, initially from Muso Shokuhin, later from Mr. Kazama of Mitoku – which he founded in

about 1969.

1968 Nov. – On Thanksgiving Day, Erewhon moves up and across the street to a much bigger and nicer location at 342 Newbury St. in Boston. Paul had hired Bruce Macdonald, a carpenter, to remodel this store. The company now has 6 employees: Paul Hawken, Roger Hillyard, Bruce Macdonald, Bill Tara, Jim Docker, and Jean Allison. One day later, Bill Tara leaves to start a macrobiotic East West Center in Chicago.

1969 March – Paul Hawken and Evan Root leave for Japan. Bruce Macdonald takes over as general manager of Erewhon. Paul stays in Japan for 9 months, arranging for individual packaging of products that were formerly imported in bulk, and finding new items for Erewhon to import. He visits suppliers, works with Mitoku and Muso, and studies Japanese language and culture.

1969 spring – Erewhon starts wholesaling foods, under the direction of Bruce Macdonald. Their first wholesale product is natural sesame oil.

1969 – Jim Baker opens The Source restaurant at 8301 Sunset Blvd. in Hollywood. It is his first solo and first vegetarian restaurant. It serves only natural foods and “organic” is written on the calligraphed menu.

1970 Jan. 1 – Erewhon’s earliest existing catalogue seen (wholesale and retail) lists 7 pages of natural food products - most of them imported from Japan. By March 1970 Erewhon lists 96 products in its catalog.

1970 Oct. 8 – Erewhon Trading Co. Inc. opens in Los Angeles at 8003 Beverly Blvd. by signing a lease for a retail and wholesale grocery store (Tom DeSilva; Roger Hillyard).

1970 Dec. 25 – An article in the *San Francisco Examiner* (p. 25) titled “Natural Food Supermarket a Success,” begins: “Palo Alto – If there is any doubt that an organic food revolution is beginning it can be dispelled first by the appearance of the world’s only natural foods supermarket in nearby Palo Alto [near Stanford University] and second, by the success of the man who opened it.”

The article is about Fred Rohe, age 33, who is president and chairman of the board of New Age Natural Foods – also the name of the supermarket. He has a separate company that distributes organic produce.

1970 – Lifestream Natural Foods is founded in Vancouver, B.C., Canada by Arran and Ratana Stephens. It slowly evolves from a retail company to a distributor. It is later followed by Nature’s Path, Inc.

1970 is often said to be the year that natural foods “took off,” as sales and availability greatly increased.

1971 fall – Fred Rohe and Paul Hawken get together to write several leaflets describing why natural food store do not carry certain products: Titles of these include: “Lowdown on Edible Oils,” “The Oil Story,” “The Sugar Story,” “The NOT list,” etc.

1971 Jan. – *East West Journal* starts to be published in Boston, Massachusetts. It is one of the earliest and most important magazines of the U.S. macrobiotic and natural foods movement that started in the 1960s.

1971 Feb. – Westbrae Natural Foods, founded in late 1970 as a natural foods distributor, opens for business in Berkeley, California, as a natural foods retail store. Bob Gerner is the head.

1971 Feb. – Essene Traditional Foods begins operation as a macrobiotic natural foods distributor in Philadelphia, Pennsylvania (*East West Journal*).

1971 May – Tree of Life opens as a natural foods retail store in St. Augustine, Florida, founded by Irwin Carasso. In Feb. 1972 they start distributing natural foods and soon become the largest U.S. distributor.

1971 Sept. – *Diet for a Small Planet*, by Frances Moore Lappé, is published by Ballantine Books. A landmark book, it plays a major role in the rise of interest in meatless diets.

1971 Aug. 23 – Laurelbrook Foods begins operation as a macrobiotic natural foods distributor in Forest Hill, Maryland – founded by Rod and Margie Coates. They kept a post office box in nearby Bel Air.

1971 fall – Eden Foods in Ann Arbor, Michigan, begins distributing macrobiotic natural foods. In June 1971 they had begun wholesaling these foods out of the back of their retail store.

1971. Shadowfax begins operation as a natural food distributor, founded by Charlie Smail.

1972 Jan. – Janus begins operation as a macrobiotic natural foods distributor in Seattle, Washington. It is founded by George Gearhart and Blake Rankin.

1972 Nov. 21-24 – Meeting of natural foods distributors held at Pajaro Dunes, Watsonville, California. This was the third and most important meeting held by this group. The goal was to establish a natural foods trade association. A steering committee was appointed and issued a report. 14 companies

were in attendance including Mr. Kazama of Mitoku, in Japan.

Mitoku is Japan's natural foods pioneer (*East West Journal*, Jan. 1986, p. 18, 20-25).

1973 – Rainbow Grocery is started in Denver, Colorado by Mark Retzloff and David Rickard; it is a food co-op and natural food storefront. Rainbow quickly becomes a small distributor.

1974 March 7-8 – A meeting of natural foods distributors is held at the Janus conference room near Seattle, Washington. The meeting begins with a brief period of meditation. This meeting is a follow-up to the Dec. 1973 meeting in Toronto, Canada. Those in attendance are: Boyd Foster (Arrowhead Mills), Mike Potter (Eden), Bill Garrison (Erewhon / Boston), Loren Specter and Tom DeSilva (Erewhon / Los Angeles), Michael Pate (Erewhon / Toronto), Tom Swan (Food for Life), Rod & Margy Coates (Laurelbrook), Charlie Smail (Shadowfax), Irwin Carasso (Tree of Life), Roger Hillyard (The Well), Frank Calpeno (Ceres), George Gearhart (Janus), Tim Hartman (Janus), Blake Rankin (Janus).

George Gearhart is selected chairman. Each company presented a brief report about its current status (unpublished manuscript).

1975 May 1-5 – Meeting of 11 natural foods distributors held at 62 Buckminster Road, Brookline, Massachusetts, the residence of Michio and Aveline Kushi – teachers of macrobiotics. The group decides to form a new organization. At this meeting the goals of an association are discussed and the name Natural Food Distributors Association is first decided.

Note: This association was never founded because the potential members were unwilling to provide the \$25,000 collective funding deemed necessary.

1975 – Anthony and Susan Harnett buy an existing store named Bread & Circus in Brookline, Massachusetts for \$30,000 and transform it into their first natural food retail store - without changing the name. By July 1976 the company is a chain with six stores. Note: It is unclear exactly when the first store opened (*Whole Foods*. 1990. Aug, p. 36+).

1976 – Michael Funk begins selling organic produce out of the back of his Volkswagen van. Soon after, he creates Mountain People's Warehouse in Auburn, CA, vowing "To Boldly Go Where No Distributor Has Gone Before." It grew to become the largest full line natural foods distributor in the Western U.S. (www.UNFI.com/our-history).

1977 Feb. – Mrs. Gooch's has the grand opening of her first

one-stop natural-foods supermarket in Los Angeles (*Los Angeles Times*. Jan. 30, pp. 6). This store was "one-stop" because unlike most other natural food stores it carried meat.

She was a former kindergarten teacher who went on to build a successful chain of natural food supermarkets in Southern California. Gooch's rules – no sugar, white flour, chocolate, or coffee – were so stringent that any product she approved of became known as "Goochable," and set a standard for the entire natural foods industry.

1977 Nov. – Between 1968 and 1973 sales of natural foods in the USA multiplied tenfold, from \$60 million to almost \$600 million (*East West Journal*, p. 39)

1978 Jan. – *Whole Foods: The Natural Foods Business Journal* is founded in Berkeley, California. Steven Haines is publisher.

1978 – John Mackey and Renee Lawson borrow \$45,000 from family and friends to open a small vegetarian natural foods store called SaferWay in Austin, Texas (the name being a spoof of Safeway) (*Whole Foods Market website*).

1979 Feb. – *Natural Foods Merchandiser* begins publication. It is founded by Doug & Karen Greene in New Hope, Pennsylvania. This colorful, large-format magazine (11 by 15 inches) plays an increasingly important role in the growth of the natural food industry (*NFM*. Sept. 1995, p. 6).

1979 Aug. – Organic Merchants (OM) holds a meeting high (at 8,000 feet) on Mt. Shasta in Northern California, Fred Rohe, owner of New Age Natural Foods in San Francisco, calls the meeting to order. Sixty people, sitting on the ground, some in yoga postures, are gathered in a circle. 35 of them are organic food merchants mostly from California, and as far away as Portland, Oregon, and Los Angeles.

Fred Rohe says: "Let us have a few minutes of silence in gratitude for each other's presence here in the presence of this lovely mountain on this beautiful planet of ours."

1980 Sept. 20 – John Mackey and Renee Lawson partner with Craig Weller and Mark Skiles to merge SaferWay with their Clarksville Natural Grocery, resulting in the opening of the original Whole Foods Market in Austin, Texas. At 10,500 square feet and a staff of 19, this store was quite large in comparison to the standard health [sic, natural] food store of the time (Whole Foods website).

1981 – The first Natural Products Expo is held at Anaheim, California, by New Hope Communications; there are 234 booths and 3,000 attendees (*NFM*. Sept. 1995, p. 6).

1982 April – Tree of Life, the largest natural food wholesale company in the southeastern USA is sold to a Jacksonville,

Florida, businessman (*Natural Foods Merchandiser*, May)

1984 – Whole Foods expands inside Texas, first to nearby Houston and then to Dallas; that year it has 600 employees.

1984 – The largest natural food distributors in the USA are (with annual sales in millions of dollars):

1. Rainbow Distributing (Denver, Colorado) \$13.
2. Arrowhead Mills (Hereford, Texas) \$12.
3. Eden Foods (Clinton, Michigan) \$10.
4. Rock Island Foods (Ignacio, California) \$10.
5. Westbrae Natural Foods (Emeryville, California) \$9.
6. Pacific Rim (Seattle, Washington) \$7.
7. Cornucopia Natural Foods (Coventry, Rhode Island) \$7.

1985 Dec. – Tree of Life (St. Augustine, Florida) is purchased for \$15 million by Netherlands-based Royal Wessanen NV Co. [*Koninklijke Wessanen nv*, founded in 1765] (*Whole Foods*, Feb., p. 14).

1987 Feb. – Tree of Life buys Balanced Foods (formerly America's largest health foods distributor, founded in 1939 by Sam Reiser), to become a nationwide natural foods distributor (*Whole Foods*, p. 14).

1987 – Wild Oats is founded by Michael Gilliland and his wife, Elizabeth Cook, with the purchase of the Crystal Market vegetarian natural foods store in Boulder, Colorado. In 1992, Crystal Market was re-named Wild Oats Vegetarian Market, and in the ensuing years the company began opening and acquiring other, small natural foods stores.

1988 – The Whole Foods chain buys the Whole Food Company in New Orleans for its first expansion outside of Texas. From now on, much of Whole Foods growth would be through acquisitions and mergers.

1989 – *Appetite for Change: How the Counterculture Took on the Food Industry, 1966-1988*, by Warren J. Belasco, is published by Pantheon Books (New York). Colorful, well written and well documented, it is the first book to analyze the burgeoning new natural food and organic industries.

1990 Aug. – An article titled “The Making of Bread & Circus Wholefoods Supermarkets,” by Daniel McSweeney appears in *Whole Foods* magazine (p. 36-38, 40-42). It is the best history seen of Bread & Circus.

1991 Oct. – Whole Foods acquires Bread & Circus (Boston / New England) for \$26.7 million (\$20 million in cash, \$6.7 million in shares).

1992 Jan. 23 - Whole Foods goes public (IPO) at a price of

\$2.125 per share. The price of the shares rises after the IPO.

1993 Sept. – Whole Foods Markets acquires Mrs. Gooch's chain of natural foods supermarket (Los Angeles area) for \$2.97 million (shares only).

1994 – The Dietary Supplements Health and Education Act (DSHEA) is passed by Congress.

1995-1997 – According to Jim Morano, a transformation of the natural food industry took place during these years. There had been three ingredients that it was forbidden to use or sell (by common unwritten consensus) in natural foods prior to about 1995; sugar (especially white sugar), meat, and highly refined products such as white bread, white rice, white flour, white sugar, etc.

The crucial event in the transition came when white sugar was renamed “evaporated cane juice” (by Bruce Kirk, who was working with Florida Crystals) and allowed into a growing number of natural food products. The era of real food had changed into the era of the illusion of real food.

Jim was well positioned to witness this transition. He was selling natural brown rice syrup, which he had developed and which was sticky and tan. Evaporated cane juice (which Jim calls “minimally refined sugar” and which is only 1% less refined than pure white sugar) gradually took away much of his market and hurt his business.

The “standards” set by the natural food stores represent the “last line of defense” for product quality to the consumer (See Jim Morano. 2009 Feb. 22. Interview).

1996 Sept. – Whole Foods Market acquires the privately-owned Fresh Fields chain of natural food stores (Philadelphia, Washington, D.C., Chicago, New Jersey) for \$134.5 million.

1996 – United Natural Foods Inc. (UNFI), the parent company of Mountain People's Warehouse Inc. (founded in 1976; now an Auburn, California, distributor of natural foods and products), hopes to raise \$37 million in an initial public offering (IPO). The founder and president of Mountain People's Warehouse, Michael Funk, is now UNFI's president and vice chairman of the board.

1996 – Soymilk (White Wave's Silk) moves to the refrigerated case.

1997 – Whole Foods Markets' revenue passes \$1 billion per year, with 70 stores in 16 states.

1999 – UNFI contracts with Whole Foods Market, the largest natural food chain, to be their sole distributor (Ted Nordquist 2020).

2000 Dec. 20 – The USDA is now the main organic certifier. The process took 2 years – but issues remain.

2006 – UNFI (United Natural Foods, Inc.) has now passed Tree of Life / Royal Wessanen to become America's largest distributor of natural foods (James Silver).

2007 – *Organic Farming, An International History*, edited by William Lockeretz, is published in England. An excellent book.

2007 – Whole Foods Market merges with the natural food chain Wild Oats (Boulder, Colorado).

2010 early – The first products bearing the Non-GMO Project Verified seal (a butterfly) on their labeling hit the marketplace. As of Oct. 2010 nearly 900 food products have been verified Non-GMO (not genetically engineered).

2010 Oct. – This month is designated as Non-GMO Month, celebrating consumers' right to choose foods that do not contain genetically modified organisms. Oct. 10 (10.10.10) is designated as Non-GMO day (*The Organic & Non-GMO Report*, Oct. p. 4).

2013 – Whole Foods Market is said to become the first chain to label all foods produced by genetic engineering.

2017 Aug. 28 – Whole Foods Market is acquired by Amazon.com for \$13.7 billion.

ABOUT THIS BOOK

This is the most comprehensive book ever published about the history of natural and organic foods. It has been compiled, one record at a time over a period of 42 years, in an attempt to document the history of this important interesting subject. It is also the single most current and useful source of information on this subject.

This is one of more than 100 books compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyinfo Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features detailed information on:

- 78 different document types, both published and unpublished.
- 2143 published documents - extensively annotated bibliography. Every known publication on the subject in every language.
- 493 unpublished archival documents.
- 693 original Soyinfo Center interviews and overviews never before published, except perhaps in our books.
- 305 commercial products.

Thus, it is a powerful tool for understanding the development of this subject from its earliest beginnings to the present.

Each bibliographic record in this book contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English language publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given). For most books, we state if it is illustrated, whether or not it has an index, and the height in centimeters.

All of the graphics (labels, ads, leaflets, etc) displayed in this book are on file, organized by subject, chronologically, in the Soyinfo Center's Graphics Collection.

For commercial soy products (CSP), each record includes (if possible) the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as advertisements, articles, patents, etc.) are also given.

A complete subject/geographical index is also included.

ABBREVIATIONS USED IN THIS BOOK

A&M = Agricultural and Mechanical	mm = millimeter(s)
Agric. = Agricultural or Agriculture	N. = North
Agric. Exp. Station = Agricultural Experiment Station	No. = number or North
ARS = Agricultural Research Service	Nov. = November
ASA = American Soybean Association	Oct. = October
Assoc. = Association, Associate	oz = ounce(s)
Asst. = Assistant	p. = page(s)
Aug. = August	photo(s) = photograph(s)
Ave. = Avenue	P.O. Box = Post Office Box
Bld. = Boulevard	Prof. = Professor
bu = bushel(s)	psi = pounds per square inch
ca. = about (circa)	R&D = Research and Development
cc = cubic centimeter(s)	Rd. = Road
Chap. = Chapter	Rev. = Revised
cm = centimeter(s)	RPM = revolutions per minute
Co. = company	S. = South
Corp. = Corporation	SANA = Soyfoods Association of North America
Dec. = December	Sept. = September
Dep. or Dept. = Department	St. = Street
Depts. = Departments	tonnes = metric tons
Div. = Division	trans. = translator(s)
Dr. = Drive	Univ. = University
E. = East	USB = United Soybean Board
ed. = edition or editor	USDA = United States Department of Agriculture
e.g. = for example	Vol. = volume
Exp. = Experiment	V.P. = Vice President
Feb. = February	vs. = versus
fl oz = fluid ounce(s)	W. = West
ft = foot or feet	°C = degrees Celsius (Centigrade)
gm = gram(s)	°F = degrees Fahrenheit
ha = hectare(s)	> = greater than, more than
i.e. = in other words	< = less than
Inc. = Incorporated	
incl. = including	
Illust. = Illustrated or Illustration(s)	
Inst. = Institute	
J. = Journal	
J. of the American Oil Chemists' Soc. = Journal of the American Oil Chemists' Society	
Jan. = January	
kg = kilogram(s)	
km = kilometer(s)	
Lab. = Laboratory	
Labs. = Laboratories	
lb = pound(s)	
Ltd. = Limited	
mcg = microgram(s)	
mg = milligram(s)	
ml = milliliter(s)	

HOW TO MAKE THE BEST USE OF THIS DIGITAL BOOK - THREE KEYS

1. Read the Introduction and Chronology/Timeline located near the beginning of the book; it contains highlights and a summary of the book.

2. Search the book. The **KEY** to using this digital book, which is in PDF format, is to **SEARCH IT** using Adobe Acrobat Reader: For those few who do not have it, Google: **Acrobat Reader** - then select the **free** download for your type of computer.

Click on the link to this book and wait for the book to load completely and the hourglass by the cursor to disappear (4-6 minutes).

Type [Ctrl+F] to “Find.” A white search box will appear near the top right of your screen.

Type in your search term, such as Rodale or Whole Foods.

You will be told how many times this term appears, then the first one will be highlighted.

To go to the next occurrence, click the down arrow, etc.

3. Use the indexes, located at the end of the book. Suppose you are looking for all records about tofu. These can appear in the text under a variety of different names: bean curd, tahu, doufu, to-fu, etc. Yet all of these will appear (by record number) under the word “Tofu” in the index. See **“How to Use the Index,”** below. Also:

Chronological Order: The publications and products in this book are listed with the earliest first and the most recent last. Within each year, references are sorted alphabetically by author. If you are interested in only current information, start reading at the back, just before the indexes.

A Reference Book: Like an encyclopedia or any other reference book, this work is meant to be searched first - to find exactly the information you are looking for - and then to be read.

How to Use the Index: A subject and country index is located at the back of this book. It will help you to go directly to the specific information that interests you. Browse through it briefly to familiarize yourself with its contents and format.

Each record in the book has been assigned a sequential number, starting with 1 for the first/earliest reference. It is this number, not the page number, to which the indexes refer. A publication will typically be listed in each index in

more than one place, and major documents may have 30-40 subject index entries. Thus a publication about the nutritional value of tofu and soymilk in India would be indexed under at least four headings in the subject and country index: Nutrition, Tofu, Soymilk, and Asia, South: India.

Note the extensive use of cross references to help you: e.g. “Bean curd. See Tofu.”

Countries and States/Provinces: Every record contains a country keyword. Most USA and Canadian records also contain a state or province keyword, indexed at “U.S. States” or “Canadian Provinces and Territories” respectively. All countries are indexed under their region or continent. Thus for Egypt, look under Africa: Egypt, and not under Egypt. For Brazil, see the entry at Latin America, South America: Brazil. For India, see Asia, South: India. For Australia see Oceania: Australia.

Most Important Documents: Look in the Index under “Important Documents -.”

Organizations: Many of the larger, more innovative, or pioneering soy-related companies appear in the subject index – companies like ADM / Archer Daniels Midland Co., AGP, Cargill, DuPont, Kikkoman, Monsanto, Tofutti, etc. Worldwide, we index many major soybean crushers, tofu makers, soymilk and soymilk equipment manufacturers, soyfoods companies with various products, Seventh-day Adventist food companies, soy protein makers (including pioneers), soy sauce manufacturers, soy ice cream, tempeh, soynut, soy flour companies, etc.

Other key organizations include Society for Acclimatization (from 1855 in France), American Soybean Association, National Oilseed/Soybean Processors Association, Research & Development Centers (Peoria, Cornell), Meals for Millions Foundation, and International Soybean Programs (INTSOY, AVRDC, IITA, International Inst. of Agriculture, and United Nations). Pioneer soy protein companies include Borden, Drackett, Glidden, Griffith Labs., Gunther, Laucks, Protein Technologies International, and Rich Products.

Soyfoods: Look under the most common name: Tofu, Miso, Soymilk, Soy Ice Cream, Soy Cheese, Soy Yogurt, Soy Flour, Green Vegetable Soybeans, or Whole Dry Soybeans. But note: Soy Proteins: Isolates, Soy Proteins: Textured Products, etc.

Industrial (Non-Food) Uses of Soybeans: Look under “Industrial Uses ...” for more than 17 subject headings.

Pioneers - Individuals: Laszlo Berczeller, Henry Ford, Friedrich Haberlandt, Artemy A. Horvath, Englebert Kaempfer, Mildred Lager, William J. Morse, etc. Soy-Related Movements: Soyfoods Movement, Vegetarianism, Health and Dietary Reform Movements (esp. 1830-1930s), Health Foods Movement (1920s-1960s), Animal Welfare/Rights. These are indexed under the person's last name or movement name.

Nutrition: All subjects related to soybean nutrition (protein quality, minerals, antinutritional factors, etc.) are indexed under Nutrition, in one of more than 70 subcategories.

Soybean Production: All subjects related to growing, marketing, and trading soybeans are indexed under Soybean Production, e.g., Soybean Production: Nitrogen Fixation, or Soybean Production: Plant Protection, or Soybean Production: Variety Development.

Other Special Index Headings: Browsing through the subject index will show you many more interesting subject headings, such as Industry and Market Statistics, Information (incl. computers, databases, libraries), Standards, Bibliographies (works containing more than 50 references), and History (soy-related).

Commercial Soy Products (CSP): See "About This Book."

SoyaScan Notes: This is a term we have created exclusively for use with this database. A SoyaScan Notes Interview contains all the important material in short interviews conducted and transcribed by William Shurtleff. This material has not been published in any other source. Longer interviews are designated as such, and listed as unpublished manuscripts. A transcript of each can be ordered from Soyinfo Center Library. A SoyaScan Notes Summary is a summary by William Shurtleff of existing information on one subject.

"Note:" When this term is used in a record's summary, it indicates that the information which follows it has been added by the producer of this database.

Asterisks at End of Individual References:

1. An asterisk (*) at the end of a record means that Soyinfo Center does not own that document. Lack of an asterisk means that Soyinfo Center owns all or part of the document.
2. An asterisk after eng (eng*) means that Soyinfo Center has done a partial or complete translation into English of that document.
3. An asterisk in a listing of the number of references [23* ref] means that most of these references are **not** about

soybeans or soyfoods.

Documents Owned by Soyinfo Center: Lack of an * (asterisk) at the end of a reference indicates that the Soyinfo Center Library owns all or part of that document. We own roughly three fourths of the documents listed. Photocopies of hard-to-find documents or those without copyright protection can be ordered for a fee. Please contact us for details.

Document Types: The SoyaScan database contains 135+ different types of documents, both published (books, journal articles, patents, annual reports, theses, catalogs, news releases, videos, etc.) and unpublished (interviews, unpublished manuscripts, letters, summaries, etc.).

Customized Database Searches: This book was printed from SoyaScan, a large computerized database produced by the Soyinfo Center. Customized/personalized reports are "The Perfect Book," containing exactly the information you need on any subject you can define, and they are now just a phone call away. For example: Current statistics on tofu and soymilk production and sales in England, France, and Germany. Or soybean varietal development and genetic research in Third World countries before 1970. Or details on all tofu cheesecakes and dressings ever made. You name it, we've got it. For fast results, call us now!

BIBLIO: The software program used to produce this book and the SoyaScan database, and to computerize the Soyinfo Center Library is named BIBLIO. Based on Advanced Revelation, it was developed by Soyinfo Center, Tony Cooper and John Ladd.

History of Soybeans and Soyfoods: Many of our digital books have a corresponding chapter in our forthcoming scholarly work titled History of Soybeans and Soyfoods (4 volumes). Manuscript chapters from that book are now available, free of charge, on our website, www.soyinfocenter.com and many finished chapters are available free of charge in PDF format on our website and on Google Books.

About the Soyinfo Center: An overview of our publications, computerized databases, services, and history is given on our website.

The NOT List

By FRED ROHÉ

You, the consumer, will see many improvements in the quality of material goods during the coming decade due to the activities of the movement known as "consumerism." One such activity can already be seen in the efforts of Organic Merchants. True, Organic Merchants is an organization of businessmen; but in its purpose it is nothing less than "consumerism" come to life.

When a businessman inquires about Organic Merchants, he receives an application which, if he wants to join, he must read, sign and return with his check for a year's dues. This application is actually a no-nonsense commitment, reading as follows:

I recognize my kinship to the brotherhood known as Organic Merchants. I understand that the purpose of our brotherhood is to provide information to the public regarding agriculture, the food industry, and nutrition and that this information shall be provided without profit. I understand that the purpose of our brotherhood is to set quality control standards, making them in the form of a public contract that validly demonstrates a serious commitment. Therefore, I agree not to sell any food products containing:

white sugar – "raw" sugar – turbinado sugar – corn syrup – bleached white flour – hydrogenated fats – artificial flavor – artificial color – cottonseed products – monosodium glutamate – synthetic vitamins – synthetic sugar substitutes – synthetic salt substitutes – synthetic preservatives, emulsifiers, or other synthetic food chemicals

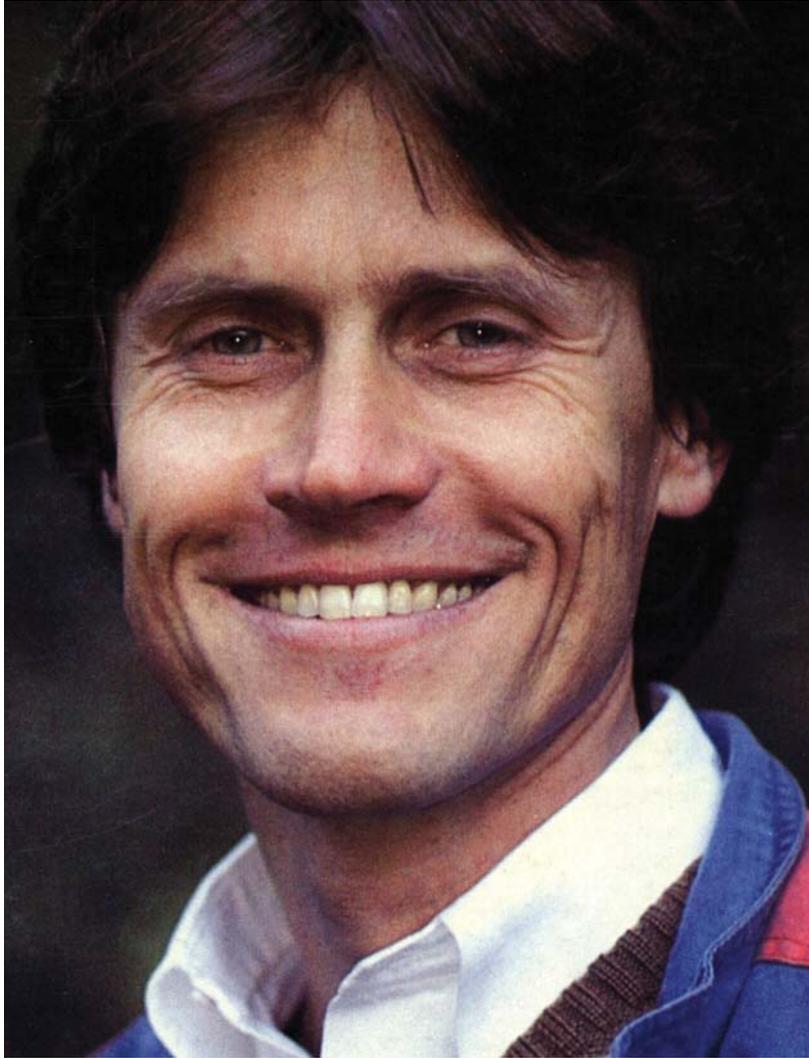

I also agree not to sell refined salt, refined oil, & refined flours (white flour, degerminated corn meal, gluten flour, white rice flour) and to begin gradual elimination of products containing these items.

The above promise represents a truly remarkable phenomenon. There has never been a stricter set of quality control standards. Organic Merchants can rightfully claim to be the guardian of food integrity.

But it is not enough to set standards, not even enough to live up to them. You, the consumer, must understand these standards, why they exist, their importance to the planet, to you, to everyone. So the principal duty of Organic Merchants is to inform. We must inform because ultimately quality control must be where it belongs: in the hands of the people. It will not suffice for one poor, small organization, even though it be of pure intentions as Organic Merchants, to be guardians of food integrity for this entire nation. That task requires a force and the only force available is the people, armed with the knowledge of what they want and why they want it.

Organic Merchants believes that when they are properly informed, the people will want natural foods in abundant supply convenient to everyone living anywhere in this country. The necessary awakening is already well underway. This brochure and other writings published by Organic Merchants are designed to further stimulate the consumer consciousness. But again, it is not enough for Organic Merchants to do what it does. So we hereby propose a working agreement between you and us: we will do our part by printing thousands of brochures and giving them away; you do your part by asking one of your fellow men to read it. By being sure the brochures are not thrown away, thousands will turn into millions and we will have become the ultimate effective tool – the people working for the people.

PAUL HAWKEN

SOYINFO CENTER

World's Most Complete Collection of Soy Information

Founded 1976

SoyaScan Databases

Publishing

Consulting

Research Library

INTRODUCING SOYINFO CENTER

Mission: To be the world's leading source of information about soyfoods and utilization of soybeans in both printed and electronic formats. Much of our information is **free!**

Founding: In October 1972 William Shurtleff and Akiko Aoyagi began full-time research on soyfoods in Japan while writing *The Book of Tofu*. In August 1976 they founded Soyinfo Center (named Soyfoods Center until 2006) in California. A 4-page chronology of Soyinfo Center's activities is available upon request.

Book in Print: 100+ books on soyfoods and soybeans by Shurtleff and Aoyagi are presently in print. These include three popular books, market studies, and 70 comprehensive histories & bibliographies.

Book Sales: These books have presently sold more than 830,000 copies. Our best-selling book is *The Book of Tofu*.

SoyaScan Database: SoyaScan is the world's most comprehensive computerized database on soybeans and soyfoods. It presently contains 104,500+ records from 1100 B.C. to the present. These include four basic types of records providing detailed information on: 89,000+ published documents, 16,700+ commercial soy products, 6,200+ original interviews and overviews, and 8,200+ unpublished archival documents. These records are unique, and have been added one at a time over many years; none have been downloaded from other databases. A *Thesaurus* of our database is available.

Free Books on Google Books: At least 75+ of our history books and biographies are available free in digital PDF format on Google Books. The same books are also available on our website (see dropdown upper right)

Focus of SoyaScan Database: In descending order of importance: Soybean utilization (for both food and industrial uses), history, market statistics, processing, nutrition, technology, marketing, and soybean production (agriculture).

How to Use the SoyaScan Database: This database is very easy to use. You do not need a computer or any special skills. Simply call the Soyinfo Center and discuss the information you need with our specialists.

Website: At www.soyinfocenter.com you will find basic information about us, entire free online reference books, a photo gallery, 1,500 pages of our manuscript history of soybeans and soyfoods (free), a thesaurus to subject headings in our database, information on ordering of all our popular printed books, etc.

Research Library: The Soyinfo Center Library owns about 94,500 documents, almost all of which have a record in the SoyaScan database. Available for use by researchers with an appointment.

Consulting Services: William Shurtleff has been serving as a consultant to the soyfoods industry for more than 25 years. He probably has more personal contacts in this field, worldwide, than anyone else in the world. He has helped to start more than 450 new companies.

HISTORY OF THE NATURAL AND ORGANIC FOODS MOVEMENT (1942-2020)

1. *Natural Food (London)*. 1890-1896. Serial/periodical. London, England. Published by L.N. Fowler. Frequency: Monthly. folio. *

• **Summary:** About natural foods and vegetarianism. Note: This is the earliest periodical seen (March 2020) with the term “Natural Food” (or “Natural Foods”) in the title. It is also the earliest document seen related to the natural foods movement, worldwide.

Densmore, Emmet. 1892. “How Nature Cures, Comprising a New System of Hygiene...” On p. 415-16 is an advertisement for *Natural Food*, a monthly journal devoted to health and the higher life, owned and edited by Emmet and Helen Densmore (both medical doctors), published by L.N. Fowler, Ludgate Circus, London. This magazine is the organ of the Natural Food Society and it advocates a vegetarian diet, based on fruits and nuts (no cereals or pulses/beans), supplemented with milk, dairy products, and eggs. Address: London, England.

2. Densmore, Emmet. 1892. How nature cures, comprising a new system of hygiene: Also the natural food of man: A statement of the principal arguments against the use of bread, cereals, pulses, potatoes, and all other starch foods. London: Swan Sonnenschein & Co.; New York: Stillman & Co. x + 12 + 413 p. Index. 21 cm.

• **Summary:** About vegetarianism. Chapter 17 (p. 178-82), “The immorality of flesh eating,” states: “In these days of vegetarianism and theosophy a physician is often met with objection on the part of patients to a diet of flesh, which objection will usually be found to be based on the conviction—a growing one throughout civilization—that it is wrong to slaughter animals, and therefore wrong to use their flesh as food. Whatever may be the ultimate decision of humanity in regard to this question, at the present time it is not infrequently a very serious one to the physician. A patient comes to him much out of health, earnestly desiring to follow the necessary course and practice the necessary self-denial to gain health, and the physician is fully impressed that the patient’s digestive apparatus and general system is in such condition that flesh is well-nigh indispensable in a dietary system that will restore the patient to health,—under such circumstances this question will be found of grave importance.

“What constitutes morality in diet? Manifestly, many animals are intended by nature to live upon other animals. To our apprehension the intention of nature, when it can be ascertained, authoritatively disposes of this matter. If it could be shown, as many physicians believe, that man is by nature

omnivorous, and designed to eat flesh among other foods, this would be a conclusive demonstration that it was right for him to eat flesh. If, as we believe, nature intended man should subsist upon sweet fruits and nuts, there is not only no license for flesh-eating, but the reverse,—there is presumptive evidence that it is wrong to eat flesh. Physiological law must be the court of last resort in which to try this question.

“Vegetarians and others scruple at the purchase of a beef-steak on the ground that the money so expended encourages the butcher in the slaughter of the animal, and thereby identifies the one who expends the money with the slaughter. If this reason be given in earnest it should be binding, and its logic followed under all circumstances. While it is true that the purchase of a pound of beef identifies the purchaser with the slaughter of the animal, the purchase of a dozen eggs or a quart of milk as clearly identifies the purchaser with the slaughter of animals; for the reason that the laws governing the production of agricultural products are such that the farmer cannot profitably produce milk or eggs except he sell for slaughter some of the cocks and male calves, as well as those animals that have passed the productive period. True, there is no particular animal slain to produce a given quart of milk or a dozen of eggs, as there is in the production of a pound of beef-steak; but the sin is not in the slaughter of a given animal, but in the slaughter of animals, and it must therefore be acknowledged that animals are as surely slaughtered for the production of milk and eggs as for the production of beef-steak. And hence, since this is a question of ethics, we may as well be honest while dealing with it; and if an ethical student honestly refrains from the purchase of flesh because it identifies him with the slaughter of animals, there is no escaping, if he be logical and ethical, from the obligation to refuse also to purchase milk and eggs. This law applies as well to wool and leather, and to everything made from these materials; because, as before shown, agriculture is at present so conducted that the farmer cannot profitably produce wool and leather unless he sells the flesh of animals to be used as food.

“Looking at the matter in this light, almost all of us will be found in a situation demanding compromise. If a delicate patient be allowed eggs, milk, and its products, and the patient is able to digest these foods, so far as physiological needs are concerned there is no serious difficulty in refraining from the use of flesh as food; but if these ethical students hew to the line, have the courage of their convictions, accept the logic of their position, and refrain from the use of animal products altogether, there will be a breakdown very soon. There are a few isolated cases where

individuals have lived upon bread and fruit to the exclusion of animal products, but such cases are rare, and usually end in disaster.

“We are, after all, in a practical world, and must bring common sense to bear upon the solution of practical problems. The subject of the natural food of man will be found treated somewhat at length in Part III. In this chapter it is designed only to point out some of the difficulties that inevitably supervene upon an attempt to live a consistent life, and at the same time refuse to use flesh on the ground that such use identifies the eater with the slaughter of animals. There seems to us good ground for the belief that fruit and nuts constituted the food of primitive man, and are the diet intended by nature for him. Remember, primitive man was not engaged in the competitive strife incident to modern life; the prolonged hours of labour and excessive toil that are necessary to success in competitive pursuits in these times were not incidental to that life. Undoubtedly an individual with robust digestive powers, who is not called upon to expend more vitality than is natural and healthful, will have no difficulty whatever in being adequately nourished on raw fruits and nuts. When, however, a denizen of a modern city, obliged to work long hours and perform excessive toil, can only succeed in such endeavors by a diet that will give him the greatest amount of nourishment for the least amount of digestive strain, it will be found that the flesh of animals usually constitutes a goodly portion of such diet. It may be said to be a pre-digested food, and one that requires the minimum expenditure of vital force for the production of the maximum amount of nutrition. However earnest a student of ethics may be, however such a student may desire to live an ideal life, if he finds himself so circumstanced that a wife and family are dependent upon his exertions for a livelihood, and if it be necessary, in order adequately to sustain him in his work, that he shall have resort to a diet in which the flesh of animals is an important factor, there is no escape, in our opinion, from the inevitable conclusion that it is his duty to adopt that diet which enables him to meet best the obligations resting upon him.

“An invalid with no family to support, and with independent means, may nevertheless find himself in a similar situation with regard to the problem of flesh-eating. We have found many persons whose inherited vitality was small at the outset, and whose course of life had been such as to greatly weaken the digestive powers, and who when they came to us were in such a state of prostration as to require, like the competitive worker, the greatest amount of nourishment for the least amount of digestive strain; and yet such persons have duties in life to perform, and are not privileged knowingly to pursue any course that necessarily abbreviates their life or diminishes their usefulness. The conviction is clear to us that the plain duty of persons so circumstanced is to use that diet which will best contribute to a restoration of their digestive powers and the development

of a fair share of vital energy. When this result has been reached, these persons may easily be able to dispense with flesh food and even animal products, and to obtain satisfactory results from a diet of fruit and nuts.

“A true physician must make every effort to overcome the illness of his patients, and to put them on the road to a recovery of health. To our mind there is, in the solution of this problem, a clear path for the ethical student to follow. We believe that health is man’s birthright, and that it becomes his bounden duty to use all efforts within his power to obtain and maintain it. We believe that sickness is a sin; that it unfits the victim for his duties in life; that through illness our life becomes a misery to ourselves, and a burden to our fellows; and where this result is voluntarily incurred it becomes a shame and a disgrace. Manifestly the body is intended for the use of the spirit, and its value depends upon its adaptability for such use. In the ratio that the body is liable to be invaded by disease is its usefulness impaired. The old saying, ‘a sound mind in a sound body,’ is the outcome of a perception of this truth. The saying that cleanliness is next to godliness is based upon the perception that cleanliness is necessary for the health of the body, and that the health of the body is necessary for the due expression of a godly life. When this truth is adequately understood it will be seen by the vegetarian, the theosophist, and the ethical student that health is the first requisite; that it becomes a religious duty to create and conserve this condition, and that whatever diet, exercise, vocation, or course in life is calculated to develop the greatest degree of health is the one that our highest duty commands us to follow. In short, the favorite maxim of one of Britain’s most famous statesmen might wisely be taken for the guiding principle of all: *Sanitas omnia sanitas* [Health is everything].

The author lived 1837-1911. At the end of this book (p. 415-16) is an advertisement for *Natural Food*, a monthly journal devoted to health and the higher life, owned and edited by Drs. Emmet and Helen Densmore, and published by L.N. Fowler, Ludgate Circus, London. This magazine is the organ of the Natural Food Society and it advocates a vegetarian diet, based on fruits and nuts (no cereals or pulses / beans), supplemented with milk, dairy products, and eggs.

Pages 278-79: Discusses “The macrobiotic art” with long quotations from Dr. De Lacy Evans’ book *How to Prolong Life*.

Note: This is the earliest document seen (March 2020) with the term “natural food” (or “natural foods”) in the title. Address: M.D.

3. Perky, Henry D. 1898. Experience proves the theory: Sickness is unnatural. Good health is in profusion and is every one’s birthright. Natural Food makes possible natural conditions—and there is no other way. *Chicago Vegetarian* 2(12):Inside back cover. Aug.

• **Summary:** A photo shows Henry D. Perky with quotation

dated April 2, 1898. Address: Worcester, Massachusetts.

4. Kellogg, John Harvey. 1904. Vegetarianism and endurance. *Good Health (Battle Creek, Michigan)* 39(6):285-86. June.

• **Summary:** Begins by discussing Karl Mann, a German vegetarian, and eight other vegetarians, who competed two years ago in a walking match from Dresden to Berlin. Karl Mann won the match and “five of the eight other vegetarians reached the goal before a single one of the meat eaters had arrived.”

Then talks about Mr. John Allen of England, a vegetarian who, at the age of 13 was a “poor, spindling, feeble, epileptic.” He started to exercise systematically and became a vegetarian. Two years ago, he won the great walking match in England. Last year “he beat the world’s record in long-distance walking, even coming out ahead of Karl Mann by a very little. This was the greatest walking feat ever performed. When Mr. Allen reached London after his hundred-mile walk, he walked twelve miles to see his mother. He then slept for a few hours, and awoke ready to walk another hundred miles. This marvelous endurance has been acquired by training and by living on pure food.”

This and several other similar stories are from a symposium on “Natural Food.” Address: M.D.

5. Carqué, Otto. 1904. An appeal to common-sense: The folly of meat-eating. A reply to an editorial of the New York and Chicago Evening American and San Francisco Examiner. 3rd ed. Chicago, Illinois: Kosmos Publishing Co.; London: L.N. Fowler & Co. 15 p. + ads on 4 unnumbered pages. 23 cm.

• **Summary:** Continued: “A diet of beef, white bread, potatoes, pie, coffee, which seems to be a favorite among the American people is therefore entirely inadequate. If vegetables are served at all, they are generally boiled in plenty of water, instead of being lightly steamed. The most valuable ingredients of vegetables, the organic salts which readily dissolve in water are in most instances lost.”

“The ignorance among American people regarding the preparation of foods is simply appalling. Indeed millions of people practically eat themselves sick. A glance into our newspapers and magazines will convince us that at least half of the American people are suffering from one physical ailment or another...” (p. 8).

Then come 2 full-page tables of food composition, including the composition of 9 important minerals in each food. These foods are divided into groups: Animal products, fruits, nuts, vegetables, and legumes and cereals. A human body of 160 lb consists of about 90 lb of oxygen, 45 lb of carbon, 15 lb of hydrogen, 1.75 lb of nitrogen, 3.75 lb of calcium, 1½ lb of phosphorus, 1½ lb of chlorine, 3½ oz of sulphur 3½ oz of fluorine, 3 oz of potassium, 2½ oz of sodium, 2 oz of magnesium, 1½ oz of iron, 1 oz of silicon,

and ½ oz of manganese. The ash constituents of plants [minerals] are generally combined with oxygen as oxides or acids; fluorine and manganese are found only in traces and no figures are therefore given in these tables; carbon passes in the form of carbonic acid into the air and is consequently not contained in the ash.

“Another point remains to be mentioned here which can never be too strongly emphasized. The mineral elements can only be assimilated by our system in an *organized* form, as they are contained in all the natural foods...” The body cannot assimilate the minerals in table salt (inorganic sodium chloride), in mineral waters, etc. The “presence of salt in all prepared animal foods, especially butter, cheese, lard, canned and smoked meats, dried fish, creates an unnatural thirst, because the tissues of the body are constantly deprived of a great amount of water, on account of the diuretic properties of the mineral. The increasing consumption of alcoholic beverages must be largely attributed to this circumstance; the use of alcohol and flesh foods generally go hand in hand” (p. 11).

“Milk is a nutritious food which is best suited for the newborn mammal. Only the infant’s digestive apparatus is adopted for the proper digestion of milk... In the stomach of an adult which secretes more gastric juice, milk forms large, tough curds which are not easily digested. Cow’s milk is a splendid food for calves, but it cannot be recommended very well for human beings.”

“It is often asserted that, while a vegetarian diet would be good in tropical and subtropical countries, it would be entirely insufficient in the colder climates. This, however, is an entirely mistaken view. Not only can our body derive a far greater amount of heat and energy from a proper selection of plantfoods, such as fruits, nuts and cereals, but they are also more conducive to health” (p. 12).

“But meat is also objectionable for more reasons. Even if taken under the most favorable conditions, from perfectly healthy animals, it is contaminated by the effete and poisonous matter (urea, uric acid, creatin, creatinin, leukomatin, etc.) which is constantly created in the tissues of the body. Animal life largely depends on the continuous removal of this worn-out material, and after killing the animal a large amount of these poisons naturally remains in the body, while during the further decomposition of the tissues still more waste matter is produced. With every piece of meat we therefore overtax our excretory organs, especially the liver and kidneys, by the additional poisons created in the tissues of the animal” (p. 13).

Compares the poor health of the people of Iceland (whose diet “consists almost exclusively of animal food”) with the excellent health of most Pacific Islanders (who eat mostly raw fruits and vegetables. Before the Spaniards discovered Ladrone in 1620, there were “no animals on the island except a few species of birds which were left wholly unmolested. They had never seen fire and at first they hardly

could imagine its effect and use”).

“Another important argument in favor of the vegetarian diet is that man can derive his nourishment from a much smaller area, when living on the products of the soil, receiving them direct from the hand of nature, instead of feeding them first to the cattle and living on their meat. The land which now serves as hunting-grounds or for cattle raising, can be much better utilized by the cultivation of fruits, nuts, and cereals. It has been estimated that a certain area of well-cultivated fruit land can sustain at least twenty times as many people by its crops than could be nourished by the meat of cattle which do but pasture on its spontaneous grasses; and recently it has been found in a large slaughter-house in Cincinnati [Ohio], that the oat-meal used in fattening the pigs would have gone at least six times as far as the pork produced went in feeding people. *How preposterous, then, to spend time and money in raising and butchering animals, when nature offers us in the products of the soil the very best food material in the purest state and in the greatest abundance!*” (p. 14-15).

On the one unnumbered page at the front of this booklet are ads for: (1) A book titled *Diagnosis from the Eye*. Also published in German. (2) A book titled *The Foundation of All Reform*, by Otto Carque. (3) A booklet titled *Medicinal Foods*, by Otto Carque (16 pages). (4) Kosmos Publishing Co. and Hygienic Institute, 765 N. Clark St., Chicago, Illinois. Phone Black 5981. “This is an institution for the prevention and permanent cure of all acute and chronic male, female and children’s diseases without drugs and operations, by the simple means of Nature Cure, as pure natural food, cold water treatments, sun and baths, physical culture, magnetism, etc.”

On the two unnumbered pages at the back of the book are ads for: (1) Naturopathic Institute, Sanatorium and College of California (Incorporated), 556 to 560 S. Hope Street, Los Angeles. Dr. Carl Schultz, President. (2) The book (novel) *The Jungle*, by Upton Sinclair. “A story of packingtown and the beef trust. The unforgettable book of 1906.” Includes 5 reviews of the book by well-known writers, including Jack London. Available from Kosmos Publishing Co., Chicago.

The author lived 1867-1935.

This booklet mentions that Carque has written a pamphlet titled “Medicinal Foods: How to get well and keep well by nature’s simple remedies.”

Note 1. Although this booklet is copyrighted 1904, the ad for *The Jungle* must have been inserted in a printing of 1906, the year the latter book was published. Carque’s book is advertised in *Naturopath and Herald of Health* (New York City) (April 1905, unnumbered page).

Note 2. This is the earliest English-language document seen (May 2004) that uses the term “natural food” to refer to specific foods that are not refined or adulterated. Otto Carque continued to use the terms “natural foods” and “natural food”

throughout his life, even though his colleagues preferred the terms “health foods” and “health food.” Starting in 1922, in advertisements in the *Los Angeles Times*, he referred to his line of products (mostly dried fruits and nuts) as “Natural Foods of California.” In 1925 he wrote and published a 359-page book titled *Natural Foods: The Safe Way to Health*. By 1931 he had renamed his company “Carque Natural Foods” and by 1935 a huge sign across the top of his food factory spelled out the company name. Address: 765 North Clark St., Chicago, Illinois.

6. *Naturopath and Herald of Health (The)* (New York City). 1908. Vegetarian restaurant. 9(6):194. June.

• **Summary:** Mr. W.D. McCurdy, an old adherent of the vegetarian and natural cause, has opened a vegetarian restaurant at No. 913-15 Fillmore St., San Francisco, California. He also operates a “natural food store,” which sells all the leading books “Return to Nature,” etc., as well as the “Naturopath.”

7. Roberts, W.K. 1914. Health from natural foods: An argument for the fruitarian diet. Sunnyvale, California. 2 + 90 p. No index. 18 cm. Self Culture Series.

• **Summary:** Contents: 1. Life growth from nutrition (p. 5-15). 2. Health dependent upon right food. 3. Disorders originating in foods. 4. Certain methods and treatments for restoring health.

Note: This is the 2nd earliest document seen (March 2020) with the term “natural foods” in the title. Address: Sunnyvale, California.

8. Lindlahr, Anna; Lindlahr, Henry. 1915. The nature cure cook book and A B C of natural dietetics. 1st ed. Chicago, Illinois: The Nature Cure Publishing Co. xii + 469 p. No index. 21 cm. On cover: Nature Cure Series, Vol. II.

• **Summary:** This book is divided into two parts. Part I “Nature Cure Cook Book,” is a vegetarian cookbook. Part II is “A B C of natural dietetics.” Contents: Part I. Key to our system of recipe marking. Examples of Combination salad, Our health bread, Milk. What constitutes a natural diet. Diet prescriptions made easy for the doctor. A timely warning. Uncooked food vs. cooked food. Cause and cure of beri-beri. Vitamines. Dangers of extreme raw food diet. Raw foods and their medicinal properties. Medicinal vegetables. Simple vegetable salads and dressings. Soups. Salads. Croquettes (baking or roasting is better than frying). Vegetables (the recipe for “Chop Suey (2),” p. 209, calls for 1 can protose. “Add Chinese sauce (Soy) if desired”). Desserts (many recipes use 1 cup sugar). Cereal foods (incl. Graham flour, whole wheat flour, Protose). Dr. Lindlahr’s health bread (p. 277-78). Leguminous foods (dangerous because they contain an abundance of “the negative, acid-forming proteid and starchy elements,” p. 284). Rice, macaroni, spaghetti. Dairy products (“There is something in animal food which,

we cannot secure from purely vegetable food,—and that is the animal (magnetic) life element, or, as we usually call it, the animal magnetism.” Dairy products are good, but meat is bad). Eggs (use in moderation; best eaten raw, soft boiled, or poached. “Prolonged boiling or frying coagulates the albumin, making it hard and tough and therefore less digestible”). Sandwiches (incl. “Peanut butter sandwiches”). Beverages. Sample menus.

Part II, titled “A B C of Natural Dietetics,” with 13 chapters, is about the benefits of a vegetarian diet and lifestyle. Chapters include: 1. Two sides to every question: Why we favor a vegetarian diet. Why we sometimes deviate from a strictly vegetarian diet. What are the indications of meat requirement? Why vegetarianism will triumph in the future. 2. Is it worth while to pay attention to diet? What is natural food? 3. For what do we eat and drink? Is vital force derived from food, medicines and tonics? “Vital force” active after death in spiritual body. 9. The magnetic properties of foods. 10. Polarity of foods and medicines. 11. Classification of foods according to the electro-magnetic qualities (animal foods are positive, legumes are very negative).

“This cookbook is based on the system of dietetics originated by the German School of Nature Cure. Drs. Lahmann, Hensel and others found a solution to the problem of scientific food selection which stands every test of theoretical inquiry and of practical application.” “We have divided all food materials into the following five groups: Group I (St.) Starches. Group II (S.) Sugars, dextrine. Group III (F.) Fats, oils. Group IV (P.) Proteins, albumin, gluten, myosin, hemoglobin, etc. Group V (M.) Positive mineral elements: Potassium, sodium, iron, lime, magnesium, manganese, lithium, etc.” (p. 5)

“Every recipe in this cook book, underneath its title, will be marked in such a way as to show the various food elements which it contains, in the order of their amount and importance.”

A natural diet “must conform in its component elements to the chemical composition of milk or red (arterial) blood.” Thus half of the food materials must be of Group V (Mineral Elements) and half from groups I through IV (p. 6).

“A timely warning:... Do not become finical or hypochondriacal over this matter of food selection and combination” (p. 9). The authors generally recommend uncooked or raw food—but not exclusively. “Nature did not create man with a cookstove by his side. Man existed on this planet for ages before he knew how to start a fire...” (p. 11).

“A mixed cooked and raw food diet, with liberal allowances of the dairy products, seems to agree best with the majority of our friends” [patients]. “We recommend, and serve in our Sanitarium regimen, one meal daily consisting of raw foods only. All the juicy fruits and vegetables that can be relished and digested in the natural state are not only excellent foods, but the best medicines for the human body” (p. 16-17).

Gluten flour and Protose are discussed on p. 272-733.

The red blood [in the arteries] carries into the body the various nutrients, and comes back laden with poisonous gases, broken down cell material, and devitalized food products (wastes). This debris is carried in the venous blood to the various organs of depuration and excreted in the form of feces, urine, mucus, perspiration, etc... The meat-eater, therefore, has to eliminate, in addition to his own morbid waste products those of the animal carcass” (p. 339). “The American suffers from uric acid and phosphoric acid poisoning...” (p. 347).

“What is natural food? We have endeavored to define this term as follows: “Natural” for animal and man is that food which appeals to the senses of sight, taste and smell in the natural condition, as it comes from Nature’s hands.’ Any food which needs disguising by cooking, spicing, pickling, etc. is not ‘natural’” (p. 359).

On the last pages of this book are five ads: (1) Nature cure by mail, from The Lindlahr Nature Cure Institutes, Inc., Chicago. (2) Lindlahr College of Nature Cure and Osteopathy (3 year course; also Nurses’ training course, six months’ condensed course, and quiz courses for State Board Health Exams), same address. (3) The Lindlahr Nature Cure Institutes, Inc.—one in Chicago and one in the country—the beautiful Elmhurst Health Resort, a 40-minute ride by Electric car from Chicago’s center. Two full page photos (on unnumbered pages near rear of book) show the sanitarium in Chicago and the resort at Elmhurst. “Some of our healing factors: Pure food diet, water cure treatment, open-air, light and air baths, massage, osteopathic and magnetic treatments, mud baths for rheumatism, corrective gymnastics and breathing exercises, mental therapeutics and normal suggestion (on a common-sense, scientific basis), scientific relaxation, homeopathic and simple non-poisonous herb remedies, diagnosis from the eye [iridology]. (4) Carqué Pure Food Co., Inc., 1603 So. Magnolia Ave., Los Angeles, California. “From California’s sunkissed orchards direct to your table... Black mission figs, Unsulphured white figs, Unsulphured calimyrna figs, Large prunes, Muscatel cluster raisins, Unsulphured apricots, Assorted dried fruits.” 10 pounds for \$1.50 to \$2.00 postpaid. Also nuts, olive oils, honey, unfermented grape juice, and books on hygiene and dietetics. (5) *Iridology: The diagnosis from the [iris of the] eye*, a book by Henry Lindlahr. 156 pages, 70 illustrations.

Henry Lindlahr was a physician (M.D.) who lived 1862-1924. The eleventh edition of this book was published in 1918 in Chicago by the same publisher. The 15th edition, published in 1922 in Chicago by the Lindlahr Publishing Co., was titled *The Lindlahr Vegetarian Cook Book and A B C of Natural Dietetics*. The 18th edition (535 pages) was published in 1926 with the same title and publisher. Address: 1. Mrs.; 2. M.D. Both: The Lindlahr Nature Cure Institutes, Inc., 525-29 Ashland Blvd., Chicago, Illinois.

9. Peel, Henry N. 1915. *Symbioses: Science of natural food*. Minneapolis? 32 p. 22 cm. *

10. Carqué, Otto. 1917. *The folly of meat-eating: How to conserve our food supply. A plea for saner living*. Chicago, Illinois: Kosmos Publishing Co. 18 p. Illust. 21 cm. 25th Thousand.

• **Summary:** The first 16 pages of this interesting book are as described by the author and title above. Copyright 1904 by Otto Carqué, this booklet is quite similar to the booklet titled *An appeal to common-sense: The folly of meat-eating. A reply to an editorial of the New York and Chicago Evening American and San Francisco Examiner. 3rd ed.*, by the same author, except for the following: (1) The first and last parts of the title have been omitted. (2) All the ads on the inside front cover are different (see below). (3) All the text on page 3 and the first 2 paragraphs on page 4 are different. Thereafter, all the text to the end of page 16 is different.

Page 17 is titled "Food preservation and fruitarianism: The social and economic aspects of the meatless diet," by Henry E. Lahn, M.D.

The top two-thirds of page 18 contains many circle charts showing the value (in dollars), supply and consumption of fruits, imported food, vegetables, meat foods [animal products] (incl. dairy products, honey, fish, oysters) and grain foods (incl. peas and beans). The bottom one-third contains two graphs: (1) Meat supply: 1850-1900. Animals per 100 persons. All have decreased—hogs from 118 to 43, sheep from 94 to 50, and cattle from 25 to 20. (2) Vegetable foods: 1850-1900. Bushels per 100 persons. All have increased—wheat from 430 to 600, potatoes from 283 to 356, corn from 252 to 333, and oats from 90 to 362. In short, just what a vegetarian would have hoped for.

The last three pages are titled "Books on natural life and rational cure." Book categories: Diagnosis. Diseases. The medical question. Fasting. Mental therapeutics and new thought. Naturopathy. Miscellaneous. Sexology. German-language publications (by F. Anlicker, Bilz, Bunge, A. Ehret, A. Erz, Dr. J. Heininger, Elbert Hubbard, Dr. K. Kabisch, A. Just, E. Koehler, Father Seb. Kneipp, Dr. Henry E. Lahn, Dr. B. Lust, R. Richter, Dr. F. Schoenberger and W. Siegert, D. Spohr, and A. Uhlig). All are available from The Nature Cure Publishing Co., Butler, New Jersey, Benedict Lust, N.D., M.D., Proprietor. Branches in New York City and Orange County, Florida.

The back cover is a full-page advertisement for Carqué's Pure Food Co., 1605-1607 South Magnolia Ave., Los Angeles, California. They specialize in sun-dried black mission figs, and have a complete line of selected California dried fruits, nuts, nut butters, fruit juices, olive oil, olives, honey, natural whole rice, etc. These foods "have been selected and prepared with especial care... to which Mr. Carqué has given years of study and research."

On the inside front cover are four more ads: (1) J.H.

Heisser, Minneapolis, Minnesota. Dealer in natural products, such as: "Natural brown rice." Natural brown rice polish. "Stone ground w.w. [whole wheat] flour. Stone ground corn meal. Unsulphured black figs, prunes, peaches, raisins, etc. Minnesota wild rice. Alfalfa products. Malt and banana coffee. Banana products... Nut oils. Grinding mills. Fruit presses. Shredders. Honey. Fruit driers. Bottle cappers. Water stills. Books on diet, health, salt, sugar. Vegetarian cook books, etc." (2) The book *Unfired Food and Trophotherapy*, by George L. Drews. (3) Hercules Hygienic Supply House, Chicago, Illinois. "General clearing house for health foods, books, appliances and apparatus." (4) Carqué Pure Food Co. (Inc.) "Carqué's pure natural food products" (1605-1607 South Magnolia Ave., Los Angeles). The company sells unsulphured fruits, black mission figs, white figs, calimyrna figs, almonds, nut butters, olive oil, honey, fruit juices, natural whole rice, whole wheat flour, nut and grain mills, literature on dietetics and hygiene. Otto Carqué lived 1867-1935.

Note 1. This is the earliest document seen (July 2004) that gives the address of Carqué's Pure Food Co. as 1605-1607 South Magnolia Ave. in Los Angeles.

Note 2. This is the earliest document seen (July 2005) that mentions a food product or products ("Alfalfa products") made from alfalfa. Unfortunately no details are given. Address: Los Angeles, California.

11. Rummel, Susan Harding (Mrs). 1919. *Natural food and care for child and mother, presentation of a system which makes safe and healthful the gratification of the natural appetite, including questions and answers for the aid of mothers and children's nurses*. Chicago: Rand, McNally & Co. xiv + 9-298 p. *

12. Carque Pure Food Company. 1920. Carque's natural pure foods (Ad). *Los Angeles Times*. June 27. p. IX19. Sunday magazine.

• **Summary:** "Unsulphured dried fruits, nuts, nut butter, sundried olives, olive oil, honey, fruit juices, whole rice (unpolished); Whole grain flour ground fresh daily by our own mill. Send for descriptive circular and price list."

Note: This is the earliest document seen (July 2004) which mentions that Carque now grinds flour using his own mill. It is also the earliest advertisement seen run by Carque, and the first showing that he has a line of products, described in a circular with price list. Address: Magnolia Ave., S.W. Corner 16th St., Los Angeles, California. Phone: 52269.

13. *Los Angeles Times*. 1921. Carque's natural pure foods (Ad). May 1. p. VIII20.

• **Summary:** This ad is identical to one that appeared in this newspaper on 27 June 1920, p. IX19 (Sunday Magazine), except that the address has changed to 2618 W. 7th St. in Los Angeles. Note: This is the earliest document seen (March

2020) in which Carque appears at this new address. Address: 2618 W. 7th St., Los Angeles, California. Phone: 52269.

14. Brook, Harry Ellington. 1921. Care of the body. *Los Angeles Times*. May 29. p. VIII18.

• **Summary:** The first section, titled “Milk substitutes,” argues that cow’s milk is not suited for human infants (who should use mother’s milk) or adults (for many reasons, including tuberculosis germs). “Recognizing the limitations of milk as a food, many have endeavored to introduce some form of synthetic or artificial milk. In France, for many years, the soya bean has been used for this purpose, in feeding infants. It is not well adapted thereto, because, like the peanut, it contains starch, and infants cannot digest starch.”

Dr. Elmer Lee of New York, recently developed a new synthetic milk made from oats and peanut meal. However these foods also have a high starch content. The best milk substitutes would be made from nuts, which contain no starch. The peanut is not a true nut. “The almond is the best nut to use for this purpose, blanched, ground into cream, but not heated, and mixed with distilled water.” An infant deprived of its mother’s milk will thrive much better on this nut milk, mixed with a little raw fruit juice, than on the milk of a cow, “while for adults it is greatly superior to milk.”

The section titled “Removal” states: “The Carque Pure Food Company has moved from Magnolia avenue to 2618 West Seventh street, two blocks west of Westlake Park.” Address: N.D. [Los Angeles, California].

15. *Los Angeles Times*. 1922. Course of lectures by Linda Burfield Hazzard and Otto Carque (Ad). Feb. 12. p. VIII18.

• **Summary:** The lectures will be at Metaphysical Hall, 512-13 Fay Building, Third and Hill Streets, Wednesday and Friday evening, Feb. 15 and 17, at 8 p.m. “No admission fee. Dr. Linda Burfield Hazzard, author of *Fasting for the Cure of Disease, Diet in Disease and Systematic Cleansing*, etc. is the greatest recognized authority on the fast and all natural curative methods. These will be fully explained.

“Mr. Otto Carque, food chemist and biologist, author of *Natural Foods of California, Curative Foods, Biological Chemistry*, etc. is California’s foremost purveyor of natural unfired foods. Mr. Carque will give a complete exposition of these and allied subjects.”

Dr. Hazzard, Chirothesian, can be reached at 6912 Sunset Boulevard, Hollywood. Phone: 577-382.

Note: A Google Internet search (March 2005) for “Chirothesia*” gets 499 hits, and for “Chirothesian Church” gets 23 hits. The Chirothesian Church of Euth and the Chirothesian Church of Faith are both said to have been founded in 1917.

16. Carqué, Otto. 1922. Natural foods of California. Los Angeles, California: Published by the author. *

• **Summary:** A review in the *Herald of Health and Naturopath* (March 1922, p. 148) states: “Mr. Carque, who is so well known to Naturopaths and Physical Culturists, has here given to his friends an interesting discussion of the relation of food to health. Mr. Carque, who did so much to educate the American public upon the importance of the positive organic mineral salts found in natural food has again placed due emphasis upon this phase of the food problem. He asserts that the body if fed natural foods can build its own vitamins and does not need to depend upon the artificially prepared foods, the commercial world is now exploiting.” Address: Los Angeles.

17. Carque Shop (The). 1922. “Natural Foods of California.” Have you read the headline? (Ad). *Los Angeles Times*. June 11. p. VIII18.

• **Summary:** “For ten years the Carque Pure Food Co. has been supplying them to a steadily increasing and appreciative mail-order trade. Our price list and descriptive booklet will be mailed upon request.

“For years it’s been the aim of the Carque Pure Food Co. to introduce fruit dried only in the sun or by a dehydrator, and without the use of chemicals. We manufacture nut butters which are a revelation in flavor and nutritive quality. We grind from whole wheat a wheat flour and a corn meal which bake breads of satisfying goodness, and our selection of whole grain crackers is unique. Natural whole brown rice, pure honey, and ‘Prunola’ and other fruit confections are all items of real food which are exceptional.

“We invite city customers to visit the Carque shop (Natural Foods of California) at 2618 West Seventh St., Los Angeles. Phone 52269.”

Note: This invitation shows a new openness. Address: 2618 W. Seventh St., Los Angeles, California. Phone: 52269.

18. McCarrison, Robert. 1922. Faulty food in relation to gastro-intestinal disorder. In: Mellon Lecture Series, University of Pittsburgh School of Medicine. p. 1-27. Lecture No. 6, delivered before the Society for Biological Research, Univ. of Pittsburgh School of Medicine, Nov. 18, 1921. [soy ref]

• **Summary:** Contents: Introduction. Scope of the lecture. Prevalence of gastro-intestinal disorders among civilized peoples. Freedom of uncivilized races from gastro-intestinal disturbances. Faulty food. Contrast between the food habits of primitive peoples and those of civilized communities. Effects of faulty food. Evidence of these effects. Applicability of experimental results to genesis of gastro-intestinal disorders. Extensive use of faulty food. Conclusion.

The author spent his medical career in northern India, where he noticed a striking absence of many diseases found in more developed and “civilized” nations. He attributed much of this good health to a good diet and active, healthy

lifestyle. In this interesting lecture he attributes the lack of gastro-intestinal disturbances among primitive peoples to their balanced diet of whole, natural foods, with none of the vitamins removed. Surprisingly, he makes little or no mention of the importance of fiber in primitive diets. Address: M.D., D.Sc., LL.D., Fellow of the Royal College of Physicians, London; Lieutenant-Colonel, Indian Medical Service, Oxford, England.

19. Vital Food Company of California. 1923. Consecrated to health: VPO makes for happiness (Ad). *Los Angeles Times*. Sept. 16. p. XI31. Sunday magazine.

• **Summary:** “Let’s talk less of disease. “Let’s talk more of health. “Let’s try a dose of VPO. “Let’s talk be Healthy and Happy.”

“Nature’s remedy for constipation and the ills arising from it. VPO is a compound of Natural herbs, based on a formula by Mrs. W.S. Wilke, natural food specialist. 50¢ per package, or 55¢ postpaid. Sample mailed for two-cent stamp. ‘Worth a dollar a dose.’

“For sale by Carque’s. 2618 W. 7th St. Eutropheon [Dr. J.T. Richter], 927½ W. 6th St., Vitamine, 713 S. Figueroa St.

“And at your favorite drug or ‘drugless’ store, or direct from the manufacturers.”

Note 1. This is the earliest document seen (July 2004) which states that Carque is located at 2618 W. 7th St.

Note 2. This is the earliest document seen (July 2006) in the *Los Angeles Times* that mentions Eutropheon, an early raw-food vegetarian (actually vegan) restaurant—probably the first in California and perhaps even the first in the United States. The last document in the *Times* that mentioned Eutropheon (actually *eutropheon*) was an article on 13 April 1932. “Eutropheon” is mentioned in at least 44 ads and articles between those two dates—so it was well publicized.

Note 3. This is the earliest document seen (March 2003) that contains the word “vitamine” (or “vitamin” or the plural of either) in connection with the health food movement in the USA. This is surprising, since the word was coined in 1912. Notice that here it is the name of a company. Address: 650 N. Mariposa Ave., Los Angeles, California. Phone: 596-861.

20. Healtheries Natural Foods Company (The). 1923. Welcomes mail orders for... (Ad). *Naturopath (New York City)* 28(9):492. Sept.

• **Summary:** “... 100% whole wheat bread (Maxwell’s 3V Bread, for Vim, Vigor and Vitality, has been used for extensive feeding tests at Westfield Laboratory and is highly endorsed by Professor Allyn after those tests. It is made of whole wheat, whole milk and further fortified with vegex [sic, Vegex], the wonderful vegetable extract and nerve nutrient, rich in vitamins and organic mineral salts.)

“Delicious sun-dried fruits (not chemically treated). Wild fruit juices,... Crackers, cookies, cakes; whole grain foods that are naturally laxative. Cereal drinks instead of

coffee. Nuts and nut meats in choice selection...”

“You must get acquainted with these two stores, just the kind a true Naturopath longs for. We need you. You need us.”

“No white denatured flour or refined sugar used in any of our products. John Maxwell, the President, hopes to meet you at the convention.” Address: (1) 23 E. Van Buren St.; (2) 2731 No. Clark St. Both: Chicago, Illinois.

21. Carque Shop (The). 1923. Our shop has been remodeled (Ad). *Los Angeles Times*. Oct. 14. p. IX24.

• **Summary:** “Come see us. The new fruits are here and we are daily adding many specialties for you. ‘Natural Foods of California’ are ‘The Finest Foods for Health.’

“And the new fall price list—more interesting than ever—is now ready. Write for your copy.”

“Western Ave. car to Coronado St.”

Note 1. This is the earliest document seen (May 2004) that contains the phrase “Natural Foods of California” or that uses the term “natural foods” to refer to specific foods that are unrefined and unadulterated.

Note 2. This is the earliest document seen (July 2004) that mentions the “Carque Shop” or that uses the word “shop” in connection with Carque. Address: 2618 West Seventh St., Los Angeles, California. Phone: 52269.

22. Vital Food Company of California. 1923. To Otto Carque—author, lecturer, scientist, purveyor of natural foods—VPO extends congratulations (Ad). *Los Angeles Times*. Nov. 11. p. IX25.

• **Summary:** Congratulations to Otto Carque “upon the publication of his new book, *Rational Diet*, in our estimation the most exhaustive scientific study of foods and their values.”

“VPO is a compound of Natural herbs, based on a formula by Mrs. W.S. Wilke, natural food specialist.” For sale at all Sun Drug Stores, Carque’s, Eutropheon, and Vitamine. The address of each is given. Address: 650 N. Mariposa Ave., Los Angeles, California. Phone: 596-861.

23. Kellogg, John Harvey. 1923. The natural diet of man. Battle Creek, Michigan: The Modern Medicine Publishing Co. 386 p. Illust. Index. 20 cm. [50+* ref]

• **Summary:** This classic of vegetarian literature contends that a vegetarian diet is the natural diet of man. Contents: 1. Man not naturally a flesh-eater: Modern civilized life unnatural and unbiologic, animal dietaries, lessons from the monkey, porcine wisdom in diet, animals classified by diet, the ancient family of primates, all mammals originally vegetable feeders, when germ diseases were unknown, kinship of higher apes and men, flesh-eating never a universal human custom.

2. Twenty popular delusions about flesh foods: D-1. That meat is superior as a blood-making food, and, hence, is needed in anemia. D-2. That meat is essential as a flesh-

building food. D-3. That a flesh diet is essential to support severe or prolonged activity; that is, promotes endurance. D-4. That flesh-eating is necessary to produce physical courage. D-5. That vegetarian races are inferior physically and mentally to races using a mixed diet. D-6. That flesh foods are more refined and more easily digested and, hence, more nutritious than are foods of vegetable origin. D-7. That man is naturally omnivorous. D-8. That flesh foods are stimulating and thus supply an element needed especially by brain workers. D-9. That beef tea is a useful nutrient. D-10. That a meat diet is required to prevent or cure gastric acidity. D-11. That a meat diet is desirable in tuberculosis. D-12. That a meat diet is necessary in diabetes. D-13. That a flesh diet is essential in the treatment of obesity. D-14. That meat is required in beri-beri. D-15. That meat is essential as a “building-up” or restorative food. D-16. That meat is needed by growing children. D-17. That meats are needed as a stimulus to appetite. D-18. That the beef industry is a necessary part of our national economic system. D-19. That a meat diet is necessary to insure reproductive activity. The law of diminishing returns versus flesh-eating. D-20. That meat is a harmless luxury.

3. Scientific objections to the use of meat: Human liver not adapted to meat diet; important differences between meat and milk; meat deficient in vitamins and food lime; Eskimos eagerly seek vegetable food; ill effects of meat diet on Arctic explorers; meat saturated with tissue poisons; meat readily putrefies, natural foods do not; the poisons of meat; meat extracts; why viscera are especially objectionable; bacteriology condemns meat as food; vast numbers of bacteria in meat; putrefactive products of meat; why physicians forbid meat in cases of kidney disease and high blood pressure; how flesh-eating causes constipation (“partly because the flesh diet is lacking in the roughage or indigestible material required to stimulate the intestine to action”).

4. Diseases due to flesh eating: Tuberculosis in animals, cancer from meat eating, cancer rare and appendicitis unknown among flesh abstainers, meat-eating causes disorders of nutrition, acidosis from a flesh diet, a meat diet and scurvy, meat eating and arteriosclerosis, pernicious effects of a meat diet experimentally proven, recognized meat contraindications, the peregrinations of a deadly parasite, typhoid germs in meat products, flesh poisoning, no protection for meat-eaters, oyster poisoning, converting sewage into food.

5. Experimental evidence against flesh eating: McCollum’s experiments, Dr. S. Weir Mitchell endorses the meatless regimen, an eminent scientist on meat diet, Fauvel’s observations, greater endurance of flesh-abstainers, the death rate reduced by meatless diet, flesh-eating does not develop intelligence, meat-eating and race degeneracy, meat-eating a city habit, non-meat diet best even for carnivorous animals, the Scotchman’s dog, the effects of a meat diet on rats, the

effects of a flesh diet on rabbits, flesh-eating animals short lived. 6. The ethical argument.

7. Historical facts and authoritative opinions: Biblical teaching about flesh eating, apostles who were flesh abstainers, the Essenes were flesh-abstainers, the diet of the ancient Greeks, King Cyrus a flesh-abstainer, Julius Caesar’s army ration, diet of Peruvian soldiers, diet of athletes of ancient Greece, ancient philosophers were flesh-abstainers, Plutarch’s essay on flesh-eating, fleshless diet of a Roman emperor, meatless diet endorsed by Gautier, views of Seneca, diet of the ancient Sumerians [today’s Iraq], eminent modern flesh abstainers, vegetarian monks, Thoreau on the fleshless diet, a Chinese statesman’s experience, the views of two great naturalists, the poet Shelley a food reformer, a child’s natural repugnance to meat, Liebig on the advantages of a non-flesh diet, Sylvester Graham’s diet reform movement.

8. Interesting facts concerning the dietary habits of various peoples. 9. The marvelous adaptation of the natural diet to human needs. 10. How to discard meats comfortably and safely.

11. Is the disuse of meat advisable from a practical standpoint? The U.S. Department of Agriculture shows the use of less meat to be safe and economic, the importance of planting nut trees, avoidance of meat is necessary to change the intestinal flora, vegetable substitutes for meat, the recent low protein movement in the United States, the half century experience of the Battle Creek Sanitarium with a fleshless diet.

12. Newspaper and magazine misinformation: An “eat-more-meat” campaign, Professor Fisher of Yale University [Connecticut] refuses to support the “eat-more-meat” campaign of the [Chicago, meat] packers, pernicious piffle.

Soy is mentioned in many places. The section titled “Flesh-eating never a universal custom” states (p. 33-34): “According to Mori, the Japanese peasant of the interior is almost an exclusive vegetarian. He eats fish once or twice a month and meat once or twice a year... The soy bean is held in high esteem and used largely in the form of *miso*, a purée prepared from the bean and fermented; also *to-fu*, a sort of cheese; and *cho-yu* [shoyu, soy sauce], which is prepared by mixing the pulverized beans with wheat flour, salt, and water and fermenting from one and a half to five years. The Chinese peasant lives on essentially the same diet, as do also the Siamese, the Koreans, and most other Oriental peoples. Three-fourths of the world’s population eat so little meat that it cannot be regarded as anything more than an incidental factor in their bill of fare.”

Page 45: Complete “proteins are found in milk and eggs as well as in most nuts, peanuts, and the soy bean...”

Page 73: “The protein of milk, of the soy bean, and of nuts is known to be superior to be as a source of body nitrogen.” Address: M.D., LL.D., F.A.C.S. [Fellow of the American College of Surgeons], Superintendent of the Battle Creek Sanitarium, Battle Creek, Michigan.

24. Kellogg, John Harvey. 1923. *The natural diet of man* (Continued). Battle Creek, Michigan: The Modern Medicine Publishing Co. 386 p. Illust. Index. 20 cm. [50+* ref]

• **Summary:** Continued: Page 74: “Vegetable extracts (yeast extracts and soy sauce) are now prepared which are finer in flavor than the best meat extracts...”

Page 191: “Complete proteins are found in the almond and also in the soy bean and the peanut, a fact which accounts for the large use of the soy bean and the peanut in China and other Oriental countries as a supplement to a diet of rice and green vegetables.”

Page 198: “The soy bean contains more protein than does beef, and 20 per cent of oil.”

Page 282: G. Yukawa reports that the diet of Japanese monks “consists exclusively of vegetable products, rice being the staple, supplemented with soy beans and vegetables. The diet contained an average of 70 grams of protein, 15 grams of fat, 514 grams of carbohydrates, an average energy intake of 2,500 calories. The experimenter concluded that the absolute vegetarian diet of the Buddhist monks of Japan is entirely adequate to maintain perfect health.”

Page 285: “Some years ago (1899) the Emperor of Japan appointed a commission to determine by investigation whether it was necessary to add meat to the national dietary to improve the physique of the race, especially to increase their stature. As regards the use of meat, the commission reported ‘that the Japanese had always managed to do without it, and that their powers of endurance and their athletic prowess exceeded that of any of the Caucasian races. Japan’s diet stands on a foundation of rice.’ The rice diet of the Japanese is supplemented by the free use of peanuts, soy beans, and greens, which supply all that rice lacks to constitute a wholly sufficient bill of fare.”

Page 306: “The experiments of McCollum and numerous others have in recent years demonstrated the entire feasibility of living exclusively upon a diet of purely vegetable origin. It is only necessary to make such a selection of foodstuffs as will supply the body with all the elements necessary for complete nutrition; and this may be easily done, as has already been indicated. It has also been shown that two widely used legumes, the soy bean and the peanut, as well as nuts, supply complete proteins and may be used in supplementing the incomplete proteins of cereals and vegetables. This fact explains the great rôle played by the soy bean in the bills of fare of the Orientals.”

Pages 313-14: “Certain proteins known as complete proteins, when taken into the body in proper quantities may be wholly utilized in tissue building, because they contain exactly the elements needed, no more and no less, for the building of muscles, nerves, glands, and other nitrogenous tissues.” “The protein of the soy bean, the peanut, the almond, and various other nuts has, however, been shown to

be of high quality, practically equal to the protein of flesh... When meat is discarded, it is evidently necessary that care be taken to supply in its place an adequate amount of protein derived from the soy bean, the peanut, the almond, or other nuts, or from milk or eggs. Four or five ounces of soy beans, peanuts, or almonds afford an abundance of protein for a day’s ration. See also p. 320.

Page 322: “But even in the absence of milk and eggs, an abundant supply of protein could be readily secured by the planting of peanuts and the soy bean, two remarkable legumes which, pound for pound, supply more nourishment than beef or pork and of finer quality.” “Nuts, together with the peanut and the soy bean, afford a protein which is equivalent to that of meat at a cost far below the cost of meat proteins. For example, an acre of very ordinary ground will produce twenty bushels, or twelve hundred pounds of soy beans, which contain 40 per cent, or four hundred and eighty pounds of excellent protein. It takes an acre of ground and two years to produce seventy-five pounds of dried protein in the form of beef. The same land will produce in the same length of time nearly one thousand pounds of soy bean protein. In other words, an acre of ground devoted to soy beans will produce more than thirteen times as much protein as the same ground used as a pasture for fattening steers...”

Page 338: The section titled “The recent low protein movement in the United States,” notes that the daily protein requirement for a person weighing 120 pounds could be “provided by 2½ pints of milk or by 6 ounces of almonds, 5 ounces of peanuts, 6 ounces porterhouse steak, 6 ounces navy beans, 4 ounces soy beans, 5 ounces lentils, 5 ounces black walnuts.”

Page 359: “Animals furnish us a good object lesson on this subject. Compare the agility, alertness, curiosity and intelligence of the fruit-eating chimpanzee with the dull stupidity of the lion and the tiger; or the vivacity and progressiveness of the rice- and soy-eating Japanese, with the dull-witted, decaying Eskimo.”

Nuts are discussed favorably on pages 56, 297, 327-31 but neither peanuts nor peanut butter are mentioned specifically.

Dr. Kellogg was a pioneer in promoting the importance of dietary fiber. The following terms appear: Bran or wheat bran (p. 40, 155, 157, 201, 301). Bulk, bulky, or bulky diet (referring to “roughage”) (p. 70, 135). Cellulose (p. 57, 70, 297, 303). Constipation (p. 10, 66, 135-138, 148, 157, 161, 332, 382). Roughage (p. 57, 135, 297, 301). But none of the following terms appears in the index: Laxative, laxatives.

The author lived 1852-1943.

Note: This is the earliest English-language document seen (June 2004) that contains the term “natural foods” and that also discusses soy. Address: Superintendent of the Battle Creek Sanitarium, Battle Creek, Michigan.

30. Volchert-Lietz, Helene (Frau). 1924. Billige naturkost, lebendige, an chemisch-elektrischer energie reiche, schmackhafte nahrung. 5. verbesserte Auflage [Inexpensive natural foods, tasty nutrition which is living and rich in chemical and electrical energy]. Petershagen bei Berlin: Published by the author. 24 cm. [Ger]*

31. Richter, Vera M. 1924?. Mrs. Richter’s cook-less book: With scientific food chart. Second ed. Los Angeles, California: Los Angeles Service and Supply Co. and Eutropheon (Published by the author). 53 p. Undated. No index. 19 cm.

• **Summary:** A book of raw food vegetarian recipes. Contents: Preface. Vegetable salads. Fruit salads. Dressings. Soups for the toothless. Beverages. Sun-dried breads. Cakes. Pies. Confections. Curative values of natural unfired foods (Food chart).

The chapter on “Confections” (p. 42-44) contains a number of natural-food confections in which the ingredients are rolled out, cut into squares, and served. these include: Carob confection (with pignolias and honey). Coconut-honey caramel. Coconut-raisin caramel. Peanut butter confection (with dates). Figola. Fig-almond confection, etc.

At the back of this book are many ads on unnumbered pages. One of these is titled “For a taste of sunshine try Dr. Richter’s Natur-Bits: Unfired confections made of high grade fruits, nuts, honey—Delicious and nourishing. Twelve kinds; \$0.70 a pound.” The first three are: Coconut-Honey Squares. Coconut-Raisin Squares. Walnut and Fig Squares. (The Eutropheon, 927½ W. Sixth St., Los Angeles). Note: These natural confections sound like the forerunners of today’s nutrition bars.

The previous ad, titled “The natural food diet courses,” shows that John T. Richter, N.D., A.I.D., gives a series of 7 free lectures at 927½ West Sixth St, Wednesday afternoons at 2:30 and Thursday evenings at 7:30. The public is invited and questions are answered. The 7th lecture includes an examination and certificate of endorsement.

The next ad, titled “What is health,” is by The Grist Mill, at Sanitary Market, 251 South Spring St., Los Angeles. Tel. MAin 4874. “Health follows the keeping of natural laws.” A few of the company’s many products are listed, including whole wheat flour, and soy bean flour.

Two pages later is a price list of 25 products made and sold by the package goods department of the Los Angeles Service and Supply Co. and Eutropheon. These include breads, nut butters, and 12 kinds of confections. Address: 927½ West Sixth St., Los Angeles, California. Phone: BRoadway 0643.

32. Carqué, Otto. 1925. Natural foods: The safe way to

health. Los Angeles, California: Carqué Pure Food Co., Inc. 359 p. Illust. Index. 20 cm.

• **Summary:** This book advocates a natural-food, vegetarian diet, but not necessarily a vegan diet.

Contents: Part I: Fundamental facts about food and health. 1. The old and new conceptions of the cause of disease. 2. Drug medication, vaccination, and serum therapy. 3. Nature's healing factors: Sunlight, fresh air, exercise, rest, water, the importance of natural foods for life and health, why denatured foods (white flour, refined sugar, candies, etc) are injurious. 4. The constituents of food considered in the light of modern physiology and biology: Proteins, carbohydrates, fats and oils, cellulose, fruit acids are organic acids, organic salts, the alkaline or base-forming elements (iron, sodium, calcium, magnesium, potassium, manganese, and aluminum), the acid-forming elements (phosphorus, sulphur, silicon, chlorine, fluorine, iodine, bromine, arsenic), the vitamins.

5. Rational soil culture essential for the production of superior foods. 6. The conservation of vital force (stimulants, narcotics, elimination of waste, quality of foods, prolongation of life, alkaline and acid-forming foods). 7. Why the calorie theory is misleading. 8. Fruit, man's best friend (the fruit of the tree, sulphured and unsulphured fruits). 9. Nuts—Nature's most concentrated foods.

10. Vegetables—Nature's blood purifiers (Great hygienic value of green leaves, proper soil fertilization most essential to vegetable culture, loss of organic salts in cooking, classification of vegetables—5 classes). 11. Cereals and legumes (Cereals falsely called "The staff of life," whole grain products are the best, the great waste of food elements by modern milling processes, legumes—an important food). 12. Milk and dairy products (Milk not a perfect food for adults). 13. Meat—the least essential and most expensive of all foods (the vegetarian alternative).

Part II: Practical dietetics. 14. How to live well on less food. 15. The feeding of infants and children (lactation, almond milk, soy bean milk). 16. The rational preparation of foods. 17. Rational food combinations (importance of simplicity of eating, the mono-diet and its advantages). 18. Simple and well balanced menus for all seasons.

Appendix: Tables and statistics. A1. Analyses showing the amount of sodium, calcium and iron in foods. A2. Amount of food materials necessary to supply one ounce of protein. A3. Amount of calories contained in one pound and one ounce of 200 food products. A4. Average time required for gastric digestion of foods. A5. Annual consumption of sugar, soft drinks, salt, spices, coffee, tobacco, drugs, alcohol, etc., in the United States. A6. Regulations for the enforcement of the Food and Drug Act. Important information about chemical preservatives and artificial colors.

The Preface (and the book) begins: "Two powerful superstitions are impeding the welfare and progress of

the human race. The one is the conviction that disease is an entity, a mysterious something that attacks us without warning from the outside, either in the form of germs or as inclemency of weather. The other—perhaps the more harmful of the two—is the belief that for each disease specific remedies must be found, such as drugs, serums, vaccines, glandular extracts, etc., and that, when we are afflicted, we have to submit to a specialist's treatment or even to the affected parts or organs."

The average individual tries "to shift the responsibility for his sins of omission or commission to some imaginary cause, rather than to hold himself accountable for the violation of nature's laws." There is "almost universal ignorance of the fact that disease is merely an effort on the part of nature or the universal life force to restore normal conditions in the organism. Our present system of commercialism has taken advantage of this situation by misleading people through clever advertising to persist in their errors in order to maintain the demand for drugs and serums, proprietary medicines,..."

Chapter 11, "Cereals and Legumes," briefly discusses many types of soyfoods—soy bean sprouts, milk, flour, tofu, soy sauce, and oil (p. 142). Page 196 discusses the use of soy bean milk and almond milk for feeding infants and children.

Chapter 16, titled "The Rational Preparation of Foods," contains a long and detailed section on soy beans (266-71), with subsections on boiled soy beans, soy bean milk, tofu, soy sauce, and soy bean sprouts. Home preparation of each is described. Miso, yuba, natto, and hamananatto are also mentioned (p. 268). Soy-related recipes include: Baked soy beans (p. 269). Soy bean loaf. Soy bean croquettes. Soy bean bread (p. 270).

The section titled "Home made cheese" begins: "Man can live well without milk and dairy products, if he makes judicious use of legumes and nuts in various forms, as has been explained in the preceding chapters, but under the present system of agriculture and production of foodstuffs, many people have to make occasional use of milk products... As the commercial cheese are generally heavily salted, preference should be given to home made cheese... Cottage cheese made without salt is the most wholesome of the cheeses."

Chapter 9 (p. 119-24), about nuts, states: "The making of nut butters is not a difficult process. At present peanuts and almonds are chiefly used for this purpose... The blanching of peanuts and almonds is now done on a large scale by special machinery, and the blanched nuts can be procured in nearly all the larger cities." Break the blanched nuts into small pieces by running them through the Climax Grater or a food chopper. Put them into a moderately hot oven for a few minutes to make them dry and crisp, then run them through a tightly adjusted nut mill to create a "smooth, palatable nut butter." A large table (p. 122) compares the composition of various nuts and nut butters (almond butter, peanut butter)

with meat, cheese, eggs, cow butter, and whole wheat bread. “The pecan contains the largest amount of fat, about 70%, closely followed by the hickory nut, brazil nut, filbert and pine nut, which all contain over 60% of fat. The pignolia imported from Spain ranks highest in the amount of protein, containing nearly 34%; the peanut comes next with 29.8%; the butter nut, almond, pistachio, all contain over 20% protein, excelling the best cuts of meat in that respect. The almond does not contain any starch as is, therefore, the nut best suitable for infants, especially in the form of almond milk.” Chufa contains 3.5% protein and 31.6% fat.

The section titled “Fruit and nut confections” (p. 212-15) discusses and has recipes for natural candies and confections.

The section titled “How the American people deplete their vitality by their favorite poisons: The tremendous waste of our material wealth” (p. 328-43) discusses (p. 338-43): The amount spent in 1924 on each of 15 “adulterated foods and drinks and of poisonous stimulants and narcotics” (\$5,040 million) compared with the amount spent on foods and vegetables (\$850 million, or 16.8% as much). Refined sugar. Coffee. Tobacco. Condiments, etc. Alcoholic beverages. Drugs. Regulations for the enforcement of the Food and Drug Act (due to untiring efforts of Dr. Harvey W. Wiley, former chief of the Bureau of Chemistry, USDA). Sodium benzoate and sulphur dioxide. Salt. Saltpeter. Boric acid and borax. Saccharine. Mineral and coal tar dyes. Laxity in enforcement of the Pure Food Law.

On pages 344-47 is information about the Carque Pure Food Company (incorporated 1912) and its founder and owner Otto Carque, including a brief biography of Otto, a list of leading Carque food products, and a full page photo of the company’s new home at 729 Seward St., on 1 Oct. 1925 (2 story brick building).

The food products are arranged by groups: Fruits: Sun-dried and dehydrated, without bleaches or preservatives (Black mission figs, white Smyrna-type figs, prunes, dates, olives, raisins, apricots, peaches, pears). Nuts: Fresh, selected and unroasted (almonds, walnuts, Brazil nuts, pecans, pignolias, pistachios, peanuts). Confections: Of assorted fruits, nuts and honey, without sugar, salt, glucose or preservatives (delectables, fruit nuggets, Kandy-Andy). Stamina and laxative foods (Nut-Fruto, Prunola {prunes and olives}, fruit laxative). Nut butters: Ground from whole nuts, uncooked and unsalted (almond, nut cream, peanut). Cereals and products: Made from re-cleaned whole grain (wheat flour, yellow corn meal, brown rice, breakfast food, crackers). Miscellaneous (olive oil, strained honey, raw sugar, fig-cereal breakfast drink {instead of coffee}). Price list and descriptive circulars on request.

Note: This is the earliest English-language document (or book) seen (June 2004) with the term “Natural foods” in the title that also discusses soy. Address: Los Angeles, California.

33. Carque Pure Food Company, Inc. 1925. Carqué products... (Ad). *Los Angeles Times*. Oct. 4. p. L2. Sunday magazine.

• **Summary:** “The gift of distinction is Catholic. All have it; it is evinced in many ways. Carqué products are different; they have always been so. And they are ‘naturally’ inseparable from *Health*.”

“For more than thirteen years [i.e. since about 1912] the Carque Pure Food Company has packed in Los Angeles and distributed throughout the United States fruits that are naturally dried, cereals from which no part is removed, unsalted nutbutters made from whole uncooked nuts, and many other food products of essential purity.

“The Natural Foods Building, Seward Street, Los Angeles, today is dedicated to your interests. Remember that a safe food protects its user and then rely upon a rational diet as your insurance against ill health.”

“Visit the Carqué Shops—Natural Foods of California—at 729 Seward St.: Main store—near Melrose Ave.—Hollywood Dist. (Moved from 2618 West Seventh Street), Los Angeles.

“Mail this coupon today—Kar-Kay—to the Carque Pure Food Company, Inc.” for a free “illustrated price list.”

Note 1. In the upper left corner of this ad is a small triangular map showing the location of Carque’s shop in relation to Seward St., Melrose Ave., Highland Ave., Santa Monica Blvd., and Vine St.

Note 2. This is the earliest document seen (March 2005) in connection with Carque which contains the term “Natural Foods Building” or which mentions Seward St.; the Building is located at 729 Seward St.

Note 3. This is the earliest English-language document seen (Dec. 2012) that contains the word “nutbutters” (or “nutbutter,” spelled as one word). However it appears to be a typographical error, since in the company’s next ad in this newspaper (and in all subsequent ads), it is spelled “nut butters” (two words). Address: The Natural Foods Building, 729 Seward St., Los Angeles, California.

34. Carque Pure Food Company, Inc. 1925. Food... (Ad). *Los Angeles Times*. Nov. 1. p. K2. Sunday magazine.

• **Summary:** “... should be sustaining, with no indigestible additions. It should be natural—not deprived of vital parts. It should please your palate without depressing your nervous system. It should leave nothing in the body to create disease.

“For more than thirteen years the Carque Pure Food Company, Inc. has sold such foods. They are distributed under this registered trade mark—‘Natural Foods of California’ and include:

“Fruits dried without chemicals. Unsalted nut butters made from whole uncooked nuts. Cereals from which no part is removed. Pure fragrant honey and olive oil. ‘Fig-Cereal’ breakfast drink and ‘Prunola’ sandwich filling. Pale-roasted coffee mellow with age. Fruit candies made with honey.

Laxative preparations—natural. Books on health and diet by Otto Carque. A safe food protects its user.”

“Visit the Carqué Shops—Natural Foods of California—at 729 Seward St.: Main store—near Melrose Ave.—Hollywood Dist. (Moved from 2618 West Seventh Street), Los Angeles.

“Mail this coupon today—Kar-Kay—to the Carque Pure Food Company, Inc.” for a free “illustrated price list.”

Note: In the upper left corner of this ad is a small triangular map showing the company’s location at 729 Seward St. Address: The Natural Foods Building, 729 Seward St., Los Angeles, California. Phone: GLadstone 4003.

35. Dyas Co. (B.H.)—Ville de Paris. 1925. Carque California Fruits and Nuts! (Ad). *Los Angeles Times*. Nov. 22. p. C10.

• **Summary:** This stylish, elegant display ad, with illustrations of Christmas trees, candles, and wreaths, also shows the cover and interior of two round metal gift canisters of Carque mixed fruits and nuts. “Again, for the Christmas season, the Ville de Paris introduces Carque California Fruits and Nuts!

“Typically Californian delicacies, packed in Los Angeles at the unique Carque factory, come to the Ville de Paris—for the holiday gifts one loves to send to friends in other parts of the country.

“Carque (pronounced ‘Car-kay’) Fruits are known for their purity in packaging and preparation—attractive gift packages—delicious combinations!

“Available at the Ville in colorful tins; redwood and pine boxes, baskets—even burlap bags of nuts!

“Fruit cakes. Plum puddings. Assorted fruits. Glace fruits. Walnuts in shells. Grapefruit cup. At the Ville—Second floor.” Address: Seventh at Olive, Los Angeles, California.

36. Richter, Vera. 1925. Mrs. Richter’s cook-less book: With scientific food chart. Third ed. Los Angeles, California: Los Angeles Service and Supply Co. and Eutropheon (Published by the author). 53 p. 19 cm.

• **Summary:** A book of raw food recipes. Contents: Preface. Vegetable salads. Fruit salads. Dressings. Soups for the toothless. Beverages. Sun-dried breads. Cakes. Pies. Confections. Curative values of natural unfired foods (Food chart).

The Preface states: “To the logical thinker it is plain that a sound body cannot be built of poor material. Of what does the right material for body-building consist? How shall we judge? We read many books, attend lectures, we hear divers theories expounded.

“We must judge by results. ‘By their fruits ye shall know them.’ A system of living which will take us through life without sickness and without fatigue is sought by all. Taking this as a criterion, the natural food system stands the test. *It gets results*—not only the negative results of freedom from sickness and fatigue, but creates a new feeling of well-

being and vigor. However, those who have built their bodies year after year of poor material and too much of it, must not expect to rejuvenate themselves quickly. There are no miracles in Nature. Results of a lifetime of indulgence in cooked food cannot be expected to be eradicated by just a few meals of natural food.

“People who have existed for years on devitalized food, when making the change to natural or uncooked food, sometimes complain of not feeling satisfied on their new diet. This is because their body cells are clamoring for the old stimulants, cooked foods, of which they are built. Such individuals usually do not realize that the artificial energy which they experience for a time on the cooked food diet is but due to a whipping or irritation of the nerves by the poisons with which the system is loaded.

“In cleansing a dirty house dust will arise and inconveniences must be endured. When one resolves to cleanse the physical temple after a long period of wrong living it must be remembered that the eliminations which will occur are preliminaries in the re-building process. Perseverance must be the watchword during these temporary conditions, in the knowledge that the disagreeable symptoms will soon give way to normal and healthy reactions. It will be found that the cleansing period will be shortened if, in addition to natural food, sun and air baths are indulged in, thus encouraging elimination through the skin, also deep breathing and exercising. Remember that ‘Nature cures, not the physician’, and once the question of the proper care of the body is settled, the natural life may be lived automatically. It isn’t necessary to talk and think food ad nauseam, but go about the real business of living, knowing that the body will not intrude upon our attention with the usual train of ills which mankind unnecessarily endures.

“These recipes you will find simple, economical and satisfying to the unperverted taste—more so with time. They are in use at our Dining Room, the Eutropheon.—Vera Richter.”

The chapter on “Confections” (p. 42-44) contains a number of natural-food confections in which the ingredients are rolled out, cut into squares, and served. these include: Carob confection (with pignolias and honey). Coconut-honey caramel. Coconut-raisin caramel. Peanut butter confection (with dates). Figola. Fig-almond confection, etc.

At the back of this book are many ads on unnumbered pages. One of these is titled “For a taste of sunshine try Dr. Richter’s Natur-Bits: Unfired confections made of high grade fruits, nuts, honey—Delicious and nourishing. Twelve kinds; \$0.70 a pound.” The first three are: Coconut-Honey Squares. Coconut-Raisin Squares. Walnut and Fig Squares. (The Eutropheon, 927½ W. Sixth St., Los Angeles). Note: These natural confections sound like the forerunners of today’s nutrition bars.

The previous ad, titled “The natural food diet courses,” shows that John T. Richter, N.D., A.I.D., gives a series of 7

free lectures at 927½ West Sixth St, Wednesday afternoons at 2:30 and Thursday evenings at 7:30. The public is invited and questions are answered. The 7th lecture includes an examination and certificate of endorsement.

The next ad, titled “What is health,” is by The Grist Mill, at Sanitary Market, 251 South Spring St., Los Angeles. Tel. MAin 4874. “Health follows the keeping of natural laws.” A few of the company’s many products are listed, including whole wheat flour, and soy bean flour.

Two pages later is a price list of 25 products made and sold by the package goods department of the Los Angeles Service and Supply Co. and Eutropheon. These include breads, nut butters, and 12 kinds of confections.

Note 1. Vera Richter’s life before coming to Los Angeles is a bit of a mystery. She was born in Pennsylvania in 1884. At some point, she married Dr. John T. Richter, a naturopathic physician, who was two decades her senior. By 1917, they had arrived in Los Angeles, and soon opened their first restaurant, the Raw Food Dining Room, at 640 South Olive St. Considered by many to be the first raw vegan restaurant in the world, it was an anomaly in a meat-and-cheese era, according to naturopath Phillip Lovell, who wrote the “Care of the Body” column in the Los Angeles Times. By the March 1926 the Richters had moved, opening several new restaurants, including ones at 833 South Olive St. and 209 South Hill St., Los Angeles

Note 2. A 13th ed. was published in 1925, and 18th ed. in 1945, and a 30th edition in 1948 (the latter by Hale publications). Address: 927½ West Sixth St., Los Angeles, California. Phone: BRoadway 0643.

37. UPI. 1926. Crime bills to face committees in legislature. *Delaware County Daily Times (Chester, Pennsylvania)*. Jan. 16. p. 1.

• **Summary:** “Friday the Public Health and Safety Committee took up bills that would prohibit fluoridation of public water supplies. Most health agencies, including the State Health Department, were opposed. Those in favor, led by Miss Lillian Van DeVere, contended tests indicated that fluoridated water would poison rats. The Health Department displayed two healthy white rats which it said had been fed fluoridated water since birth.

“The bills are expected to die in committee.”

Note: This is the earliest document seen (March 2020) that concerns fluoridation of public water supplies.

38. Carque Pure Food Company, Inc. 1926. Carqué, “Kar-Kay.” This name stands for the ideal in natural foods (Ad). *Los Angeles Times*. Oct. 31. p. K2. Sunday magazine.

• **Summary:** “For 20 years Carque Products have been sold to America. Otto Carque’s little store sowed the seed of Natural Foods in 1906.” Nationwide, “intent people have been eating their way to efficient health. Such people are nationally minded; when they find that California foods are

so good as Carque Products prove to be, their orders come in every mail, every day from everywhere... No Carque product has been depleted of natural elements, processed to improve looks at the expense of natural food-value, or treated to preserve it or alter its natural composition or taste.”

“Dried fruits: Unsulphured, unbleached, unburned, uncoated. Nut butters: unroasted, unsalted, unsugared. Whole grain products: Wheat flour, yellow cornmeal, cracked wheat, Crown crackers, kitchen cookies, natural brown rice, barley flour.” A sort of logo shows an acorn with the slogan: “Natural causes produce natural effects.”

Otto Carque now owns 3 Carqué Shops with 3 different addresses: 729 Seward St., 6411½ Hollywood Blvd. (right in the middle of everything), and 831 South Flower Street (which is now downtown).

“Write a one-cent postal card to our general offices for: New edition 1926-1927 illustrated free price list.”

Note: This is the earliest document seen (March 2005) showing Carque with a shop on Hollywood Blvd. (6411½). Address: General offices: The Natural Foods Building, 729 Seward St., Los Angeles, California.

39. Sommer, Walter. 1926. Die natuerliche Ernaehrung. 2. verbesserte Auflage [Natural foods. 2nd improved ed.]. Hamburg, Germany: Published by the author. 283 p. 23 cm. [13 ref. Ger]

• **Summary:** About vegetarianism, raw food, and nutrition, with vegetarian recipes. Address: Writer on nutrition, Rendsburg, Germany.

40. Natural Foods & Products Co. 1927. Sleep without drugs says L.A. drugless specialist (Ad). *Los Angeles Times*. Feb. 27. p. J31.

• **Summary:** Contains a long directory of the names and addresses of many stores (incl. many health food stores) in Los Angeles and vicinity that sell Flaxolyn, which relieves constipation and therefore aids sleep. Those which seem to be mainly health food stores (in Los Angeles unless otherwise indicated) are: California Health Food Co. Pure Food Market, 6th and Spring. Flaxolyn contains 12 herbs, which are listed and described. Address: 5341 (or 5311) Pasadena Ave., Los Angeles, California. Phone: GARfield 8523.

41. Carque Pure Food Co. 1927. Carque's natural foods at reduced prices (Ad). *Los Angeles Times*. June 26. p. L27.
 • **Summary:** "Otto Carque, the pioneer of pure natural foods in California and president of the Carque Pure Food Co., has adopted a new business policy whereby the numerous Carque products can be sold at greatly reduced prices. Mr. Carque's aim has always been to provide the finest and most wholesome foods for those who want to build up permanent health and vitality. Send for catalog, also tables of contents Mr. Carque's books, "Rational Diet" and "Natural Foods—The Safe Way to Health," with 200 recipes and menus. Mr. Carque, who has made the study of foods and dietetics his life work, can give you the safest and sanest advice pertaining to your health. Write today.

"Factory, store and main office, 729 Seward St., near Melrose Ave. Branch stores: 831 So. Flower St., 6411½ Hollywood Blvd."

A portrait photo shows Otto Carque.

Directly below this ad is a smaller ad for Mensana titled "Get well and keep well at Mensana... Hollywood Health Home." Address: 729 Seward St., Los Angeles, California.

42. Natural Foods & Products Co. 1927. L.A. stomach sufferers acclaim doctor who discovers Flaxolyn (Ad). *Los Angeles Times*. Dec. 4. p. L31.

• **Summary:** Contains a long directory of the names and addresses of many stores (incl. many health food stores) in Los Angeles and vicinity that sell Flaxolyn, which relieves constipation and therefore aids sleep. Companies appearing in this longer directory that did not appear in the ad of 27 Feb. 1927 (p. J31) run by this company in this newspaper include: Health Food Cafeteria, 216 W. 6th St., Los Angeles. Address: 5341 (or 5311) Pasadena Ave., Los Angeles, California. Phone: GARfield 8523.

43. Lovell, Philip M.; Press-Lovell, Leah. 1927. Diet for health by natural methods: Together with health menus and recipes. Complete instructions for the cure of the sick without the use of drugs. Los Angeles, California: The *Times-Mirror* Press. xiii + 428 + [7] p. No index. 21 cm.
 • **Summary:** Part I: Treatment and diet, by Dr. P.M. Lovell. Part II. The preparation of health foods, by Leah Press-Lovell (recipes, p. 129-428). Some of the recipes in this book first appeared in the "Care of the Body" section of the *Los Angeles Times*, which Dr. Lovell has edited for the

past few years. "This is the pioneer health department of any newspaper in the country, undoubtedly the most widely read and unique, in so far as it advocates drugless, natural therapy" (p. 4). "This book is based on vegetarian principles. Meat recipes... are not included." Many reasons for this are given. Meat includes fish and fowl (p. 8-9).

Soy-related: "Soy sauce or shoyu is made from soy beans and can be bought at Japanese stores. It gives a tasty flavor to gravies and to cereals" (p. 134). Chop suey (3 types), each served with "Soy bean sauce" (p. 290-91). Soy gravy (with soy—also called soy sauce or shoyu, p. 305). Chapter 14, "Legumes" (p. 366-70) discusses chick peas (Garvanza), lentils, peanuts, and "Soy beans: Best known in China and India. Rich in oil. Contain almost no starch. Require slow cooking to bring out flavors. Hulls are difficult to digest. Therefore remove them by rubbing through a colander." "About the soy bean: The soy bean is very important in the Orient. When three-fourths grown it makes a nutritious green vegetable [yes] known as 'bean sprouts' [no]. Products of soy beans are soy bean flour, soy bean milk, soy bean cheese (tofu), soy sauce, soy bean oil, sprouts, etc. Soy bean products can be bought at Japanese and Chinese grocery stores." Contains 3 recipes: Soy roll or bread (replace 25% of the whole wheat flour with soy flour in any whole wheat bread recipe). Soy bean porridge (cook 1 cup soy bean flour with 3 cups water for 2 hours in a double boiler. Cool, slice, roll in corn flour and bake with butter or oil to make croquettes). Soy bean croquettes (with "1 cup soy bean porridge"). Soy bean milk (made from soy bean flour, p. 420; also almond milk and cocoanut milk).

Also discusses: Of the general advice given to patients, "the subject of diet occupies the leading position" (p. viii). Agar flakes (vegetable gelatine) are better than animal gelatine (p. 135). Almonds—How to prepare almond milk, cream, and meal (p. 152). Cocoanut—To prepare cocoanut milk. Peanuts—How to prepare raw peanut butter (p. 153). Garvaza [garbanzo] beans and meal (p. 308-09). Nut loaf (Vegetable turkey) (with peanuts, p. 315). Carque's unfermented whole wheat bread (p. 351). Carque's unleavened fruit bread (p. 351). Recipes using Graham flour (different from whole wheat flour, p. 356-59).

Ads on the last 7 (unnumbered) pages are for: (1) Lovell Health Offices. (2-3) Lovell's drugless health library (39 titles on diseases and health problems; pocket edition size). (4) Health of the Child, by Dr. Philip M. Lovell. (5) Carqués California Pure Natural Food Products: Fruits—sun-dried and dehydrated without bleaches, fumigants or preservatives (incl. black mission figs), nuts, confections, stamina and laxative foods, nut butters, cereals and products (incl. soy bean flour), miscellaneous. And Carque Pure Food Co., Inc. (6) Cubbison's Cracker Co., 3419 Pasadena Ave., Los Angeles. And Cubbison's Whole Wheat Flaxseed Crackers. Cubbison's also sells Whole wheat crackers, and Whole wheat nut bread (See p. 32-33, 104). (7) The Cary Health

Cooker (for steaming and baking; Elmer E. Cary Co., Los Angeles).

Note: This is the earliest published document seen (April 2004) that gives the address of Cubbison's Cracker Co. as 3419 Pasadena Ave. Address: 1. Dr., drugless practitioner, Health Offices, 238 Chamber of Commerce Bldg., 1151 So. Broadway, Los Angeles, California; 2. His wife. Phone: WEStmore 8275.

44. Hain Health Foods. 1928. Happy New Year (Ad). *Los Angeles Times*. Jan. 1. p. J27.

• **Summary:** This tiny ad includes addresses for both the Hain Los Angeles shops: (1) 329 W. 3rd St. (2) 429 S. Hill St. Address: 329 W. 3rd St., Los Angeles, California.

• **Summary:** This tiny ad includes addresses for both the Hain shops in Los Angeles: (1) 329 W. 3rd St. (2) 429 So. Hill St. Address: Los Angeles, California.

46. Natural foods the highway to good health. 1928. Kansas City, Missouri: Miller Maid Cook Ware Company. 42 + [2] p. Illust. 23 cm. *

47. Carque Pure Food Co., Inc. 1929. Carque's new process Fig-Cereal: The world's best coffee substitute (Ad). *Los Angeles Times*. March 17. p. H26.

• **Summary:** "25¢ a package. A most wholesome drink for young and old. Sold all over the United States and Canada. For sales at Ralphs Stores and other leading groceries and health food stores. Also at the Carque Shops, 831 S. Flower St., 6411½ Hollywood Blvd. Factory and main office 729 Seward St. near Melrose Ave.—Sample package free.

An interesting logo to the left of the ad has the word "Carque" in a circle with a diagonal line through it. "Every day drink California Fig Cereal, coffee substitute: The unexcelled health beverage," Address: [Los Angeles].

48. Bragg, Paul Chappius. 1930. Professor Bragg's live food cook book and menus. Hollywood, California: National Diet and Health Association of America; and, Live Food Products. 170 p. No index. 24 cm.

• **Summary:** About raw food and vegetarianism. Contents: 1. Why I write this book. 2. Our daily food, is it nourishment or poison? 3. There are no meat recipes in this book. 4. Poisonous white sugar. 5. Dairy products not human food. 6. Coffee and tea are drugs. 7. Don't use condiments. 8. Salt—The enemy of life and health. 9. Pure food. 10. Don't use aluminum cooking ware. 11. Gas, indigestion and stomach trouble. 12. Acknowledgment of recipes and suggestions from other health food writers. 13. Salads. 14. Fruit salads. 15. Salad dressings. 16. Directions for making nut butter and nut milk. 17. Relishes. 18. Soups (incl. Carque's nut milk soups,

made with his nut milk). 19. Cooked vegetables. 20. Meat substitutes and main dishes. 21. Desserts. 22. Breads and bread foods. 23. Sauces and gravies. 24. Drinks. 25. Health confections. 26. Health sandwiches... 30. Baby's diet from birth to 18 months. 31. Diet schedule for the growing child.

Chapter 1 (p. 11) states: "The drug doctor has been a failure. After hundreds of years of his reign there is still universal sickness and suffering which, instead of abating, is unmistakably on the increase."

Chapter 12 (p. 26) acknowledges: "A few of the recipes in this book were taken from the works of some of the most prominent men in the field of Natural Living. I have considered, in giving a cook book to my people, that they should have, not only my own favorite recipes, but also the best of other men who have experimented along this line. I have therefore included recipes from the books of: Dr. John T. and Mrs. Vera Richter, the leaders of the Raw Food movement in the West. Dr. Philip M. Lovell, distinguished editor of the most widely read Health column in the world, the Care of The Body section of the *Los Angeles Times*. Dr. Henry Lindlahr, the great pioneer Nature Doctor. And Otto Carque, chemist, research worker and crusader in the fight for natural foods."

Chapter 16, "Directions for making nut butter and nut milk," begins with a long passage from *Natural Foods: The Safe Way to Health*, by Otto Carqué (1925). It contains recipes for: Coconut milk. Nut milk (made by mixing 1 level tablespoon nut butter with 1 cup warm water, plus a little honey or sweet fruit juice if desired). Almond milk for infants. Nut cream (made from unroasted nut butter, warm water, and honey). Combination nut butter (peanuts, pignolias, cocoanuts). Apple and almond butter. Nut meal.

Chapter 20, titled "Meat substitutes and main dishes" (p. 111-18), contains largely cooked dishes, and makes widespread use of the "Battle Creek Sanitarium product, Protose, being available at most fancy grocers." Vegex and Savita are also widely used in recipes. Soy sauce is used to season Vegetable chop suey (p. 114). It "may be purchased at a Chinese store or any fancy grocers."

The National Diet and Health Association of America is located at 1109 North Hudson, Hollywood, California.

Note: This is the earliest document seen (March 2007) by or about Paul C. Bragg that mentions soy. No juicer is mentioned in this book. A portrait photo (just after the title page, p. 5) shows handsome "Prof. Paul C. Bragg." Address: Professor, California [Los Angeles].

49. Howard, Albert; Wad, Yeshwant D. 1931. The waste products of agriculture: Their utilization as humus. London, New York, etc.: H. Milford, Oxford University Press. xiv + 167 p. Illust. 22 cm. *

• **Summary:** Sir Albert Howard (born in 1873) criticizes chemical farming methods that were taking emphasis away from humus, which he demonstrated to be the foundation

of fertile soil. This book was continued in 1940 by *An Agricultural Testament*. The two books founded the organic movement in the Western world. This book contains a detailed discussion of the Indore process for the manufacture of humus. The British Library Catalog lists the second author's name as Yasvant D. Vad [Wad].

About Albert Howard: "Albert Howard was born at Bishop's Castle, Shropshire. He was the son of Richard Howard, a farmer, and Ann Howard, née Kilvert. He was educated at Wrekin College, Royal College of Science, South Kensington, and as Foundation Scholar, at St. John's College, Cambridge. In 1896, he graduated in Natural Sciences at Cambridge, where he also obtained a Diploma of Agriculture in 1897. In 1899, he lectured in Agricultural Science at Harrison College, Barbados, and in 1899 and 1902, was a Mycologist and Agricultural Lecturer at the Imperial Department of Agriculture for the West Indies. From 1903-1905, he was Botanist to the South-Eastern Agricultural College, Wye; and from 1905-1924, he was Imperial Economic Botanist to the Government of India.

"In 1914, he was created a Companion of the Indian Empire (C.I.E.), and received a Silver Medal of the Royal Society of Arts in 1920. From 1924-1931, Howard was Director of the Institute of Plant Industry, Indore, and Agricultural Adviser to States in Central India and Rajputana. He was made a Fellow of the Royal Asiatic Society in 1928, and in 1930 received the Barclay Memorial Medal of that society. He was knighted in 1934, and made an Honourable Fellow of the Imperial College of Science in 1935.

Howard worked in India as agricultural adviser and was in charge of a government research farm at Indore. He worked together with Gabrielle Matthaei (1876-1930), and her sister Louise (1880-1969). He married Gabrielle in 1905. After her death, he married Louise in 1931. Gabrielle was herself a professionally trained and competent botanist, and indeed the contribution of both women to organic farming is said to be underestimated (Source: Wikipedia, at Albert Howard, Jan. 2015).

50. Anderson, Hans Steele. 1932. *Science of food and cookery*. 6th ed. Mountain View, California: Pacific Press Publishing Assoc. 298 p. Illust. Index. 23 cm. [7 ref]

• **Summary:** This book, by a Seventh-day Adventist, advocates a vegetarian, natural foods diet. "Natural foods, just as they come from the garden, field, and orchard, furnish the elements best suited to the harmonious development and functioning of all the tissues and organs of the body..." (p. 11). It discourages consumption of cane sugar (which is not digested by saliva, p. 14) and encourages consumption of cellulose and bran (p. 15).

Chapter 4, titled "The natural food of man" (p. 37-52) has sections on: True food satisfies hunger. Vegetarian diet and longevity. Vegetable and flesh foods contrasted.

Vegetarian diet and endurance. Flesh eating a cause of disease. Ethics of flesh eating. Cruelty of flesh eating.

Recipes include: Gluten bread (p. 112). Diabetic bread (strong in gluten, p. 112). Gluten biscuit (p. 112). Homemade Nuttose (incl. nut butter, flour, tomato pulp, p. 134). Stewed soy beans (p. 156). Rice and soy bean loaf (with soy bean purée, p. 156). Rice and soy bean patties (p. 156). Favorite soy bean coffee (p. 281).

In the chapter on "Diet and disease" is extensive information and tables about acid-forming and base-forming foods (p. 237-39).

A 5th edition (same publisher, number of pages, and size) was published in 1929, and a 7th edition in 1938.

Address: Dietitian.

51. *California Health News (Hollywood, California)*. 1933. Jones Grain Mill (Ad). 1(1):3. Jan. 30.

• **Summary:** "Listen in. Ann Warner Program, KFI, Monday, Tuesday and Thursday, 1:15 P.M. The New Health Program. Complete line of natural foods. Mail orders promptly attended to." Address: 322 South Hill St., Los Angeles, California. Phone: MUtual 0766.

52. *California Health News (Hollywood, California)*. 1933. Otto Carque works for finer, healthier race. 1(21):1, 14. Nov. 30.

• **Summary:** Editor and publisher Clarke Irvine writes: "I am indebted to Otto Carque. He helped me regain my health, along with McFadden, Hauser, Marden, Lindlahr, Bragg, Ehret, Richter, and teachers of this decade. It was the benign Mr. Carque who first awoke in my drowsy mind the necessity of eating natural foods; given in poignant but brief instructions with his un sulphured, sundried fruits. He has helped thousands of others. I salute!"

Carque, who is nearing age 67, popularized the black mission fig. "This season he celebrates 25 years of health-building business..." "Otto Carque's life story lacks drama." He never lost his good health and had to struggle to regain it. "On the other hand his story has the charm of intelligence, altruism, as well as a rare ability to apply to his being, nature's immutable laws. An idealist, a man of vision, science and practical training in commercial life, the quality and purity of the nation's food supply have always been his deepest concern.

"Otto Carque was a personal friend of the late Dr. Harvey W. Wiley, 'father of the pure food and drug act of 1906,' who often commended him for the good work he was doing. When on a lecture tour some years ago, he enjoyed the privilege of having Dr. Wiley introduce him to a large audience in Washington [DC] as one of the few men in America who practically carried out the spirit of the law.

"He attributes his health and endurance to a diet of simple, natural foods, mostly fresh fruits and vegetables, with some nuts, nut butters and occasionally legumes, whole

grain and dairy products. He believes that simplicity in diet is the key to health and longevity; moreover that the building of a sound and healthy body and mind should only be a means to an end.

“It enables us to more efficiently discharge our duties towards ourselves and our fellowmen,” he says.” A portrait photo shows Otto Carque.

53. *California Health News (Hollywood, California)*. 1933. Four valuable text books given health field by Carque. 1(21):2. Nov. 30. [4 ref]

• **Summary:** They are: (1) *Vital Facts about Foods* (1933), just published. (2) *Rational Diet* (1923), his master work. (3) *Natural Foods* (1925), teaches the new gospel of living well on less. (4) *The Key to Rational Dietetics* (1930), a small but monumental work.

In addition there is *Mrs. Carque's Recipe Book*, still in print.

54. *California Health News (Hollywood, California)*. 1933. Carque factory supplies quarter million customers. 1(21):6. Nov. 30.

• **Summary:** “Where does the United States get its health foods? Automobiles [come] from Michigan... but it remains for California to supply the major portion of health foods, and one of the chief sources is the new and modern plant of Otto Carque, 1315 South Maple, Los Angeles.

“This large plant fills a genuine place in the life of every health-seeker. Over 250,000 customers... known the country over for nearly a quarter of a century as a purveyor of nature's best, free from preservatives, and above all, untampered with.” Products include: Unsulphured dried fruits. Nut butters. Whole-grain flours. Carque Wheatose (ready-to-eat). Lax-a-Meal. Carque's Fig Cereal (coffee substitute made with figs and barley malt). Carque True Vita Sal (salt-free salt substitute with Pacific kelp). Carque's Colon Food (a blend of lactose and dextrin). Carque Laxative Tea (with alkalizing herbs). Carque Herbal Health Tea, Alfamin Tea, Peppermint Tea, and Strawberry Tea (all neutralizers of acidity). Carque Mayonnaise.

“On numerous tables adjoining the mill are poured huge batches of health candy, raw sugar and honey only, to be wrapped into bars; also bulk fruit, nut candy, chocolate covered, for the holiday trade.” “Beautiful Yuletide fancy fruit packs.” His company also warehouses and sells products made by other companies which he endorses, “such as Gud Fud Soy Bean line, Custo Agar Gelatines and Puddings,... and bulk foods such as agar, sea lettuce, Pacific kelp, unfermented and unsweetened fruit juices, raw sugar, whole brown rice...”

Photos show: (1) The front of the plant with employees standing below the large sign that reads “Otto Carque Natural Foods.” (2) Workers packing foods at tables inside the plant.

55. Howard, Albert. 1933. The waste products of agriculture: their utilization as humus. *J. of the Royal Society of Arts (London)* 82(4229):84-121. Dec. 8. [8 ref]

• **Summary:** A long and very interesting treatise about the Indore method of composting in India—a method developed by the author. Address: Sir, C.I.E., M.A., England. Formerly Director of the Inst. of Plant Industry, Indore, and Agriculture Adviser to States in Central India and Rajputana.

56. Carqué, Otto. 1933. Vital facts about foods: A guide to health and longevity with 200 wholesome recipes and menus and 250 complete analyses of foods. Los Angeles, California: Published by the author. 208 p. Index. 24 cm. [20+* ref]

• **Summary:** This manual of food reform discusses the importance of a simple vegetarian diet of natural foods, sunlight and sunbaths, fresh air, pure water, exercise and rest. Also talks about acid and alkaline foods, the influence of mind on health, the failure of synthetic foods, why refined sugar is injurious, the dietetic value of sea plants, table salt is unnecessary and harmful, fruit is man's best food, sulphured and unsulphured fruits, nut butters, food preparation, and the treatment of disease.

“Dedicated to my dear wife, Lillian, who through her sincere and earnest spirit of cooperation has greatly assisted the author in his work of food reform.”

The germ theory of disease has not been proven since potentially harmful germs are omnipresent yet often fail to harm healthy individuals (Pasteur was a chemist and laboratory worker, not a physician. Germ action is always secondary; “when germs invade a living organism it is a sign that the organism is enervated and its chemistry perverted.” p. 114-15).

The section titled “‘Meat substitutes’ not essential” (p. 130) states: “Those persons who want to adopt a meatless diet should not look for artificially prepared meat substitutes as a source of protein. A food constituent required in such a limited amount as protein is easily supplied by the various products of the vegetable kingdom. Such combinations as ‘roast vegetable turkey’ or ‘vegetarian steak’ seem to be the result of the belief that meat is a necessary food and must be replaced in some form. Indeed, vegetarians, who live largely on foods in which the protoplasmic cells have been more or less disorganized by prolonged cooking, have very little advantage over mixed eaters.

“All other factors being equal, a judiciously selected meatless diet is far more conducive to health than the usual mixed diet, consisting, for the most part, of animal and starch-bearing foods deficient in alkaline elements. We should understand that the proteins of fruits and vegetables, supplemented by a small amount of the proteins of nuts, legumes (especially soy beans), or dairy products, are fully able to maintain health and efficiency. It is entirely feasible to live on an exclusive diet of fresh ripe fruits and green-leaf

vegetables for many weeks and months, thereby purifying the blood and greatly improving the keenness of our senses. In fact, in many pathological conditions such a restricted diet is more helpful than an absolute fast.

“Among the legumes which contain a large amount of protein, the soy bean takes first place. Its protein content, nearly 40%, is higher than that of any other food. Moreover, this protein is of excellent quality, as valuable as the casein of milk; it contains all the essential amino acids. It contains a sufficiency of vitamins A and B, and in this respect it is superior to all seeds. It contains very little carbohydrate, only about 6%, and is practically free from starch. The soy bean fills the place of meat as well as milk in the dietary of many millions of sturdy Orientals; it is destined to become one of the great food staples, not only of this country, but of the world. A number of recipes for the preparation of the soy bean are given in Chapter XXI.”

The section titled “Fruit and nut confections” (p. 133-35) begins: “Fruit and nut confections made without refined sugar and glucose should take the place of candies.” These “sweet-meats”... “should be the only kind of confections allowed to growing children, which have a natural craving for sweets.” Recipes include stuffed dates, date caramels, nut fruitose, carob confection, raisin-nut balls, and honey cocoanut balls. For Nut fruitose: Mix dates, figs, raisins, almonds and walnuts. “Run through a food chopper twice. Press the mixture into a flat pan in a layer about 1 inch thick, let stand overnight, and cut into convenient sizes.” Note 1. Carque was a pioneer in the development of healthy, natural treats. The last recipe could be considered a forerunner of the less-healthy “nutrition bar” of the 1990s.

The next section, titled “Nuts and nut butters,” states that “salting and roasting greatly impair the nutritive value of nuts and prevent their proper assimilation. The proteins become coagulated by roasting, and the fats split into glycerine and free fatty acids, while the vitamins are destroyed. Nut butters made from salted nuts should, therefore, have no place in our dietary.” Rather, the peanuts or almonds should be blanched (scalded or parboiled in water or steam). “Since few people, on account of defective teeth, can masticate nuts well enough to be acted upon by the digestive juices, the mechanical emulsification of nuts by means of nut butter mills is quite dispensable.”

The section titled “Melba toast” and “Melbettes” (p. 156) states: “These are delicious dextrinized whole wheat products made by the Cubbison Cracker Co., Los Angeles.” Melbettes are also made from whole rye. “Calavo Melba Toast is another tasty whole wheat product; it contains the natural fruit fat of the California Avocado or Alligator Pear as shortening.”

The section titled “Natural whole rice” (p. 156) notes: “Whole rice, also called brown rice, contains the bran, cuticle, and germ of the cereal. In milling nothing has been removed but the husk and dirt.”

The section titled “The Soy Bean, a Remarkable Food” (p. 158-61) discusses boiled soy beans, soy bean milk, tofu (“it is called by the Chinese ‘the meat without a bone...’”

Note 2. This is the earliest English-language document seen (Aug. 2016) that refers to tofu as ‘the meat without a bone.’

“Other preparations of the soy bean, which are but little known in this country, are *natto*, *hamananatto* [*hamanatto*], *Yuba* and *Miso*. The principal use of miso, which is a slightly [sic] fermented mixture of soy beans and rice or barley, is for making soups and for cooking vegetables”), soy sauce, soy bean sprouts, and various recipes.

Under “Boiled soy beans” we read: “The dry beans are best soaked in soft water over night or for at least 20 hours and then cooked with sufficient water in a waterless cooker or Pressure cooker until tender. This may require as much as 2 hours or more, according to the variety of beans used. The best results are obtained if the beans are allowed to simmer rather than boil quickly. Onions, tomatoes, celery, parsley and other seasoning vegetables increase the palatability of the soy bean. A fireless cooker may also be used in preparing soy beans for the table.”

Under “Ready made soy bean products” (p. 161) we read: “As the preparation of the soy bean in the average household is often not convenient, the author has arranged to supply the following products at reasonable prices: Canned Soy Beans, Soy Bean Spread, Soy Bean Stew, Soy Bean Loaf, Soy Vegetable Onion Soup, Soy Bean Vegetable Bologna, Soy Bean Tasty Lunch, to which others will be added in the course of time. These products have met with ready approval, as they fill a long felt want for tasty, nutritious and wholesome vegetable protein foods to substitute meat and dairy products.”

The author’s signature appears at the end of the Preface. Address: Los Angeles, California.

57. Finkel, Harry. 1933. Seven day trial on natural food diet... containing a week’s recipes and menus for breakfast, lunch and dinner: Also natural food sandwiches and health drinks. 2nd ed. Los Angeles, California: The Society for Public Health Education. 182 p. Index. 23 cm.

• **Summary:** The author, a vegetarian, is now listed on the title page as “Dr. Harry Finkel, N.D., D.C., One of America’s well known drugless doctors and dietitians, author of *Health Via Nature* and *Diet and Cook Book*.” The Society is located at 425 North Larchmont Blvd. in Los Angeles.

The book contains a 4-page chapter titled “The Soya Bean” (p. 178-82), containing details on its nutritional benefits plus ten “Soya Bean Menus.” “Like many leading scientists who believe in the great food value of the Soya bean, so does this author share the same opinion. It is for this reason that he desired to familiarize the public with the many advantages of this nutritious and valuable food.”

for Gud Fud Soya Beans and 6 related soybean products, prepared in the laboratories of California Food Kitchens, Los Angeles, California.

Page 185 contains an ad for Hollywood Cup Coffee Substitute, made by Hollywood Cup, Inc., 823 Traction Ave., Los Angeles, California. It is "Made from figs, bran and barley." It is "different because it is not merely "Figs and Barley," but a scientific mixture of California figs and various grains skillfully blended." Address: N.D., D.C., Los Angeles, California.

58. Finkel, Harry. 1933. Seven day trial on natural food diet... containing a week's recipes and menus for breakfast, lunch and dinner. Also natural food sandwiches and health drinks. 1st ed. Los Angeles, California: Society for Public Health Education. 182 + [9] p. Recipe index.

• **Summary:** This "2nd ed." appears to be quite similar to the first edition, published the same year with the same number of pages. However some of the unnumbered pages at the rear are different.

A handwritten inscription on a blank page near the front reads: "March 22, 1934. To suffering humanity.

"Health is not an accident. Normal physiological conduct depends on the hygienic and dietetic habits of the individual.

"Nature's laws in relation to health and disease are infallible. Man abuses these laws and suffers disease.

"Natural foods only when properly prepared and combined hold the key to the solution of a healthy humanity.

"Hail-Hail-Hail-to a healthy and civilized humanity!!!

"With compliments from Dr. Harry Finkel, to the University of California at Berkeley."

Contents include: What is meant by natural foods (p. 154). The story of the health food store (p. 155-57). Explanation of general health foods catalog (p. 158-60; incl. Graham flour, soya bean flour, Carque's Wheatose, soy beans, Nut butters {almond, peanut, pecan, cashew, cocoanut}, Carque's mayonnaise, unsulphured dried fruits, meat substitutes {Protose, Nuttose, Nuttolene, Vita Meat, Savory Loaf, Nut Meat, Soya Loaf, Meatless bouillon cubes}, miscellaneous {health candies, carob meal, vegetable gelatine, agar-sea weed gelatine, St. John's bread, poppy seeds, sesame seeds}). How to prepare and cook natural foods (p. 161+; "It is said that because fruits and vegetables have been sprayed with poisons to destroy the insects which infest them, their outer coverings should be removed before eating... if one will wash and scrub them very thoroughly, the danger of being poisoned is removed,..."). The soya bean (p. 178-82).

Concerning the acid and alkaline reaction of the human body. Recently scientists concluded "that the normal or 'mean' of this condition should be fixed at the ratio of 80% alkaline and 20% acid. It is now definitely known that a deficiency in the alkaline reserve, or a marked increase in

the acid content leads to many serious diseases." Refer to "Finkelgram No. 26 (A short thesis on acidosis)" to become familiar with the acid and alkaline reactions of various foods.

It "is very fitting to introduce one of the best foods Nature grows for mankind—the Soya bean. Because the Soya bean is practically starch-free, it is not only acid-free but is also one of the greatest aids in neutralizing an existing acid condition of the body and in maintaining the 80-20 balance of the two physiological conditions known as acid and alkaline reactions.

"Of late, scientists have made an extensive study of this unusual type of natural food, and after making many experiments upon human beings in various stages of health and disease, pronounced the Soya bean one of the best foods of the vegetable kingdom. This they have concluded because of its very high percentage of protein which is by far superior to all animal protein, and also for the reason that it is in a form which is easy of digestion and assimilation. Besides being practically free from starch, they consider it one of the best foods for the human body, and find that it can very satisfactorily take the place of meat in the diet of man.

"The protein content of the Soya bean is nearly twice the amount of the average run of meat, and the remarkable feature of this unique food is that while it ranks extremely high in protein substance, yet its toxic properties are insignificant compared with the large amount of toxic properties all animal foods contain."

"Like many of the leading scientists who believe in the great food value of the Soya bean, so does this author share the same opinion. It is for this reason that he desires to familiarize the public with the many advantages of this nutritious and valuable food.

Health through eating lies mainly in three directions: First, in selecting natural, wholesome foods; second, in preparing them properly; and third, in arranging meals in which the foods are properly combined.

The following 10 menus are examples giving you an idea as to how to balance your meal using the various soya bean products. These menus are appropriate for either lunch or dinner as each of them is sufficient for a full course meal."

"Soya bean menus." These are not recipes, but menus for individual meals, each of which includes a soy recipe. The first, for example, reads: "Soya vegetable-onion soup. Finkel baked potatoes. Red cabbage, apple, and raisin salad with mayonnaise dressing. Sewed prunes. Cereal coffee. No bread."

"Soy beans are mentioned on page 74. Ads on unnumbered pages in the rear: Page 2. "Carque-Natural Foods of California: The symbol of trustworthy and unimpaired natural foods. Wheatose. Almond butter. Otto Carque. Established 1908. California's natural foods pioneer. 1315 S. Maple Ave., Los Angeles, Calif. Endorsed by the Society for Public Health Education."

Page 3: Hollywood Cup, Inc., The perfect coffee

substitute. 823 Traction Ave., Los Angeles, Calif. Four pages of ads for books by Dr. Harry Finkel. Address: N.D. [doctor of naturopathy], D.C. [doctor of chiropractic] [Los Angeles, California].

59. Soya Foods Ltd. 1933. Soyolk: The most highly concentrated natural food. Springwell Lane, Rickmansworth, Herts., England. 20 p. 18 x 12 cm.

• **Summary:** At the top center of the cover is a circular yin-yang symbol. Contents: Comparative analysis of principal flours in everyday use (% composition): Soyolk, finest wheat flour, rye flour, oat flour, maize flour, bean flour, pea flour. Note: Soyolk is by far the highest in calories, protein, and fat.

Soyolk (“It was only after years of research that the Soya Bean, thanks to the use of a special non-chemical process, yielded ‘Soyolk,’ a fine ivory coloured powder”).

Soyolk: An ideally balanced food (“It must be specially emphasized that ‘Soyolk’ contains far more of the most expensive form of nourishment, protein and fat, than such costly foods as beef and eggs themselves”): Vitamins, proteins, fat, carbohydrates, starch, ash, lecithin, analysis by H.B. Cronshaw, London.

The uses of “Soyolk.” Bread (as a yeast food and bread improver, 1½%). In brown bread and wholemeal breads (5-7½%). Soyolk bread (22%). Soyolk in cakes and confectionery (5-10%). Puddings. Porridge, oatmeal and breakfast foods (15-30%). Invalid and health foods. Baby foods. Vegetarian foods. Diabetic food. Tuberculosis. Minced meats, meat and fish pastes. Sausages. Chocolate. Cocoa. Hospitals, Sanatoria, etc. Competitive soya flours and meals. Table: Bar chart: Comparative table of cost of 1000 calories of the most current foodstuffs. Address: Rickmansworth, Herts. [Hertfordshire], England. Phone: Rickmansworth 468.

60. Claunch, B, Stanford (Mrs.). 1934? Natural food recipes. San Francisco, California: 47 p. 18 cm. *

• **Summary:** On the cover: “Gift A.W. Bitting Oct. 6, 1934.” Emphasizes raw foods.

61. Bragg, Paul C. 1935. A tribute to my teacher, Otto Carque. *California Health News (Hollywood, California)* 3(2):7. Jan. 25.

• **Summary:** “News of the death of Otto Carque fills me with a sense of great personal loss. I mourn his passing as I would that of a brother. He was my friend and teacher. He it was who inspired me to carry over the United States his rules for health and longevity. Any degree of success which has followed my efforts is due largely to his encouragement and instruction. He was the most distinguished pioneer in the field of ‘health promotion through the eating of natural foods only.’ He lived and worked for an ideal—that God’s foods should not be polluted, should not be profaned—and never once did he forsake that ideal for gold. He pointed

out to thousands of sick and discouraged people the road to buoyant health. He lived a noble life, gathered lasting friendships, and the respect of all with whom he came in contact. To his foresight, courage, and ability, all who are engaged in health work must acknowledge a debt of lasting gratitude.” Address: Burbank, California.

62. *California Health News (Hollywood, California)*. 1935. In memory of our beloved friend. 3(2):6. Jan. 25.

• **Summary:** In the center of this full page memorial is a large portrait photo of Otto Carque (1867-1935) titled “Auf Wiedersehen” [Goodbye]. Surrounding it are the names (and usually addresses) of 77 companies and individuals involved with health foods who wished to say goodbye. These include (listed alphabetically): Alvita Products, American Health Food Stores, Lima and Soya Bean Products (Mr. and Mrs. Bill Baker), California Food and Health Service (5 entries), California Health Food Store, California Health Hotel, Lillian Carque, Cubbison Cracker Co., Inc., Dr. Harry & Lucy Finkel, Defensive-Diet League of America, Health Cafeteria, Health Foundation of California, House of Better Living (Mildred Lager, 1207 West Sixth), Hygienic Food Co., Dr. Philip M. Lovell, Dr. Benedict Lust and staff, Oakland Health Food Store, The Old Mill, Paradise Health Resort, Martin W. Pretorius, Richter’s Live Food Cafeterias, Rosenberg’s Original Health Food Store (San Francisco), Santa Monica Health Food, Sexauer Natural Food, Vegetarian Cafeteria and Bakery (San Diego) [San Diego’s Health Food Center, C.A. Thompson, proprietor; 1125 Sixth St. Phone F. 2744 {see p. 15}].

Note: This is the earliest document seen (March 2020) that contains a directory of health food stores and individuals in the United States.

63. *California Health News (Hollywood, California)*. 1935. Natural foods saved Carque: But unnatural living took him off prematurely at only 68. 3(2):17. Jan. 25.

• **Summary:** “Like many healthmen, Otto Carque worked for the emancipation of man; sought his release from machines, stores, offices; worked always to help man back to the land, away from unnatural foods and modes of life, and strangely enough, although his life was preserved through natural foods and living habits, it was an unnatural death, a tragic accident, a violent death that ended his career of good work.

“In any company Carque was the healthiest individual around—yet he ate less, remained a vegetarian, used no liquor, tobacco, drugs or stimulants, and retained his buoyancy of mind and body until the very end.

“His boyish body was like a trim organic machine with few spare parts; usually bronzed, hard and enduring like the sturdy mountains that he so dearly loved to climb.

“Born in Germany near the French border, of French blood, Carque lived half his years with a smile on his face—no wonder he always beamed. Handicapped with a weak

physique, he early took up physical culture. It restored him, along with right living and natural foods, which he found remedied his acute constipation. When quite young his mother died—'because of the doctors,' he claimed, causing him to reflect upon health, disease and death, which in time wrought the mighty brainpower that carried him down through the years in his work for humanity.

"At 28 he was a vegetarian, lived 15 years on raw foods, then fresh fruits and vegetables, varied occasionally with eggs, cheese and nut butters, unroasted, sustained him in arduous endeavors."

64. Lager, Mildred. 1935. *Food facts*. Los Angeles, California: House of Better Living. 228 + 10 p. No index. 23 cm. [34 ref]

• **Summary:** Contents: 1. Purpose of food. 2. Classes of food. 3. Natural foods are best. 4. Acid-alkaline balance. 5. Minerals. 6. Vitamins. 7. Proteins. 8. Carbohydrates. 9. Fats. 10. Fruits. 11. Vegetables. 12. Beverages. 13. Better cooking. 14. Food combinations. 15. The mental side of health. 16. What is the "House of Better Living."

Pages 67-68 contain a very positive section on soy beans and foods made from them, including whole soybeans, "curd cheese, resembling cottage cheese [tofu], and soy bean milk... Other soy food products are soy butter [no description is given; this is probably soynut butter from T.A. Van Gundy's La Sierra Foods, but it could be margarine made from soy oil], soy loaf (combined with gluten), soy sandwich spread, soy bologna, soy oil, soy sauce, soy ready-to-serve breakfast foods, coffee substitute, as well as soy flour. Soy flour is yellow and fluffy, and can be used in all baking... Soy macaroni, noodles, spaghetti, bread, and pancake flour are also on the market. Soy beans are also sugar coated for candy and toasted as peanuts. They are a wonderful food for animals and have been used in that way in this country for years. Today the governments of Europe and America are devoting a great deal of attention to the soy bean as human food and the next few years will see an increased consumption, as well as many new soy products."

Page 75 contains a nutritional analysis of soy beans.

In the chapter on Acid-alkaline balance (p. 22-25), foods with the most acid ash are egg yolk and oysters, followed by eggs, most fish and meats. Foods with the most alkaline ash are lima beans, string beans, dried beans, spinach, raisins, figs, dates, and dried milk, followed by soy beans, soy bean tea, and most vegetables. The author believes that one should keep an alkaline balance in the body. Sleep is a great alkalizer.

The subsection titled "Lima beans: states: "Dr. Sansum of Santa Barbara was instrumental in having lima bean flour made, and Bill Baker of Ojai, California pioneered this field, developing the original lima bean bread and lima bean pancake flour."

This is not a vegetarian book. Meat and dairy products

are discussed at length, and their consumption is not discouraged. However this is the earliest book seen that uses the term "natural foods" prominently—in this case as a chapter title.

Also discusses (see index for page numbers): Acidophilus milk, alfalfa (alfalfa tea has alkaline ash, p. 35), almonds, almond oil, aluminum, avocado, bran, carob beans, chufas, cottonseed, cottonseed oil, garbanzas, kephir, lentils, lima beans, linseed, margarine / oleomargarine, olive oil, olives, palm oil, palm kernel oil, peanuts, peanut oil, rape seed oil, sago, sesame oil.

Note 1. This is the earliest document seen (Sept. 2009) concerning Mildred Lager and soy.

Note 2. This is the earliest document seen (Jan. 2014) that contains the term "soy food products."

Note 3. This is the 2nd earliest document seen (July 2005) that mentions a food or drink product ("alfalfa tea") made from alfalfa. This is also the earliest English-language document seen (July 2005) that contains the term "alfalfa tea." It was used for its alkaline ash. Address: House of Better Living, 1207 West 6th St., Los Angeles, California. Phone: Mutual 2085.

65. *California Health News (Hollywood, California)*. 1935. Mrs. Carque carries on work of late husband. 3(15):1-2. Aug. 2.

• **Summary:** "Last January a woman motorist plowed over Otto Carque..." After the funeral, his wife decided firmly to carry on his work. "And Lillian Carque, New York girl, former advertising writer, and competent assistant to the beloved Otto, is still bravely carrying on at the spacious Carque plant, 1315 Maple, Los Angeles." She and her staff are determined to stand behind "every item bearing the famous Carque label which for 25 years has stood for pure, safe, undenatured natural foods.

"Mrs. Carque, in the six months that her husband has been gone, has worked night and day to grasp his end of the work, and declares that no one will ever comprehend the tremendous amount of toil and study that he accomplished, often working long into the night, and very early in the mornings. He did research work, financial matters, was main buyer, and supervised the production, while she attended to the business end."

"The Carque line is complete, with a large number of items, ice cream powders, an unfrozen ice cream bar, vegetable salt and seasonings, wholewheat pie flour, unsulphured fruits, nuts and nut butters, an improved clarified health honey. His last book 'Vital Facts about Foods' is still enjoying a worldwide sale.

"This firm is operating wholesale only, but a complete Carque line is available at Jones' Grain Mill, 322 South Hill, and of course at other health food stores everywhere.

"Mrs. Carque sums up her seven years' marriage to Otto Carque merely as 'an apprenticeship to give me

the opportunity to carry on after his departure, hoping to perpetuate the hard pioneering work to maintain quality and purity in the nation's food supply." A large photo shows Lillian Carque.

66. *California Health News (Hollywood, California)*. 1935. Where famous Carque foods were once made (Photo caption). 3(15):4. Aug. 2.

• **Summary:** The lower caption reads: "This is the old Hollywood plant of the Otto Carque company, at 729 Seward, (now the Alberty Foods building), taken about 1929. The late Mr. Carque is seen with Mrs. Carque at the right of the group behind the radiator of the company truck. Some of this staff are still with the firm."

Across the top of the two-story brick building is written "The Natural Foods Building." About 14 people are standing by the curb and a driver is inside the delivery truck, which has wooden spoke wheels and the word "Carque" legible on one side.

67. *California Health News (Hollywood, California)*. 1935. Carque plant supplies quarter million users. 3(15):8-9. Aug. 2.

• **Summary:** Photos show: (1) The exterior of the Carque Natural Foods plant, with employees standing in front of the building and parts of two cars at each side. (2) People working at a tables inside the plant, packaging foods.

The text below the photo reads: California fruits and food products that are used in every state and many foreign lands are put up in this modern factory of the Otto Carque Company, 1315 Maple avenue, Los Angeles, managed by Lillian Carque, widow of the late beloved Otto Carque, killed last January by an automobile.

This is the last picture made at the place while Mr. Carque lived. In the upper photo he stands with his wife by the door; below he is seen behind a loaded table at the right where he loved to work with his faithful staff, who have carried on his work with Mrs. Carque, seen at the extreme left checking orders for shipment to distant lands. Others are at work making Carque nut-butters, health candies and other pure, natural foods that have borne the Carque label for a quarter of a century, bringing fame to California. It was Otto Carque who developed and made popular the black mission fig of this state.

68. Carque (Otto) Co. 1935. The symbol of trustworthy and unimpaired natural foods (Ad). *California Health News (Hollywood, California)* 3(15):16. Aug. 2.

• **Summary:** "California's natural foods pioneers." A large photo shows the full line of Carque products, about 37 in total. These include: Bottled olive oil. Black cherry juice. Grape Juice. Two samplers of fruits and nuts. Alfalfa flour. Wheatose. Fig cereal. Mint tea. The circular logo "Carque Natural Foods of California" appears in three places.

Note 1. This is the earliest document seen (Oct. 2004) that gives the company name as Otto Carque Co.

Note: This is also the earliest English-language document seen (July 2005) that contains the term "alfalfa flour." It was probably used for its alkaline ash. Address: 1315 So. Maple Ave. (Wholesale Only), Los Angeles, California. Phone: PRospect 1097.

69. Lager, Mildred. 1935. History of The House of Better Living. *House of Better Living (Newsletter, Los Angeles)* 1(1):1. Sept. 11.

• **Summary:** The House of Better Living will be two years old on 25 Oct. 1935. "It was started, and still is, owned and operated by Mildred Lager, whose sole purpose was to teach people about food and healthful cooking. Health is more than food, and that is why she called it *Better Living*. Miss Lager... started with free healthful cooking classes, then came radio..." [by Aug. 1935].

The House of Better Living "is not a health food store, it carries only natural foods minus the highly advertised "Health Food Products... Tune in to KFAC [radio] every Monday, Tuesday, Wednesday and Thursday A.M. at 7:45, and listen to Miss Lager. Come to the free educational class every Wednesday P.M. at 1:30. Address: 1207 West Sixth St., Los Angeles, California. Phone: MUTual 2085.

70. Lager, Mildred. 1935. Healthful and different recipes. *House of Better Living (Newsletter, Los Angeles)* 1(1):1. Sept. 11.

• **Summary:** Gives 5 recipes using natural foods. "Soy or lima bean waffles may be made with Bill Baker Waffle Flour." Ice box dessert calls for "24 Cubbison Melba wafers, or Whole Wheat Vanilla Wafers, as made by the Grist Mill."

Melba toast dressing and bacon calls for "2 cups Cubbison's Melba toast crumbs." Address: 1207 West Sixth St., Los Angeles, California.

71. Lager, Mildred. 1935. Why natural foods are best. *House of Better Living (Newsletter, Los Angeles)* 1(1):2. Sept. 11.

• **Summary:** "Natural Foods, as Nature provided them, supply all our needs. All food is good. Use the proper amounts, properly prepared and combined.

"Natural foods contain what Nature intended they should contain. They may not be as good looking, keep as well, or be as palate tickling as devitalized foods, but are better from a health standpoint. Refined foods have part or all of the minerals removed, and minerals are what we need. Vitamins go hand in hand with minerals and if one is destroyed the other is also. Natural foods contain both the minerals and vitamins.

"Many minerals are found in the outer layers of foods, such as seeds, cereals, etc., and should not be removed. That is why brown rice, whole grains, 100% whole grain meals and flours are the best to use.

“Natural foods are ‘live foods’ and do not keep well. Bugs leave devitalized foods alone. For this reason it is best to buy small quantities as needed.”

“Natural Foods do not have to be called Health Foods. To many it suggests sickness, diet, food fads, etc., and one does not have to be sick to use them. All natural foods are health foods.” Address: 1207 West Sixth St., Los Angeles, California.

72. Howard, Albert. 1935. The manufacture of humus by the Indore method. *J. of the Royal Society of Arts (London)* 84(4331):25-59. Nov. 22. [8 ref]
Address: Sir, C.I.E., M.A., England. Formerly Director of the Inst. of Plant Industry, Indore, and Agriculture Adviser to States in Central India and Rajputana.

73. Bragg, Paul C. 1935. Paul C. Bragg’s personal health food cook book and menus. Burbank, California: Published by the author. Printed by Aetna Printing Co., Los Angeles. 201 p. No index. 24 cm.

• **Summary:** The Introduction to Chapter 22, titled “Meat substitutes or main dishes” states (p. 112): “Variety is the spice of life... Many people can live a vigorous, active, healthful life on a strictly vegetable diet, particularly those who are not engaged in a hard mental occupation. Even then, vegetable proteins, such as soy beans and nuts, can be substituted for meat. To take the place of meat there are the vegetables rich in protein—peas, soy beans, lima beans, kidney beans, Mexican beans, and lentils, and there are on the market many meat substitutes made of nuts and grains. The Battle Creek Sanitarium [Michigan] product, ‘Protose,’ is available at most fancy grocers and health-food stores. ‘Savita’ is a seasoning which gives a delicious meat-like flavor to all vegetable cooking. ‘Vegex’ is a product similar to ‘Savita,’ ...

“The vegetable diet is a very alkaline diet, and should be used three or four times a week by everyone. Vegetable foods are porous, furnish bulking to the intestines, and enrich the body with valuable organic minerals that are very necessary to maintaining perfect health.

“Soy beans are a marvelous source of vegetable protein, and should be fed to the family several times a week, and they furnish a rich source of energy-building food. They can be soaked over night, and then baked in tomato sauce, with a small amount of onion and chopped mushrooms. The soy bean is a food that the American public has not yet cultivated.” Surprisingly, neither this chapter nor this book contains any soy bean recipes! However Vegetable shop suey (p. 116) is served with Savita Gravy or Soy sauce.

Bragg urges his readers to eat “real, natural, live food” (including whole wheat bread—the staff of life) to eat simply with a small number of foods at each meal, only when hungry. Do not worry about combining foods. Avoid white sugar, coffee and tea, salt, seasonings and spices, aluminum

cooking ware, alcohol, preservatives, dyes, and white flour. He believes that eating meat (rare and unfried), fish, and eggs are important for building perfect health. Note 1. The 1930 edition of this book contained no recipes using meat or dairy products.

Chapter 11 acknowledges the use of recipes and suggestions from several health food writers and men in the field of Natural Living: (1) Dr. John T. and Mrs. Vera Richter, the leaders of the Raw Food movement in the West. (2) Dr. Philip M. Lovell, distinguished editor of the most widely read health column in the world, the Care of the Body section of the Los Angeles Times [Sunday Magazine. Note 2. The section contained many fascinating ads]. (3) Dr. Henry Lindlahr, the great pioneer Nature Doctor. (4) Otto Carque, chemist, research worker and crusader in the fight for natural foods. (5) Fannie Merritt Farmer’s *The Boston Cooking School Cook Book*.

The last three pages each contain a full-page ad for mail-order products available from Bragg at Box 428, Burbank, California: (1) Bragg Dextrinized [sic, Dextrinized] (Toasted) Meal with Wheat Germ will keep your energy high and your weight right. 60 cents for a 2 lb. box. (2) “Drink health.” An illustration shows a hand-turned Live Food Juicer. Also mentions a large new book titled *Health Cocktails*, by Paul C. Bragg, “nationally famous Health Lecturer.” The book “is full of live juice treats.” Send \$5.95 for both, postpaid to Live Food Products Co., Box 428, Burbank, California. (3) O.K. Lax is a marvelous laxative for relief of constipation and cleansing agent for internal sanitation. 50 cents for one package. Address: P.O. Box 428, Burbank, California.

74. Pfeiffer, Ehrenfried. 1935. Short practical instructions in the use of the biological-dynamic methods of agriculture. London: Rudolf Steiner Pub. Co. 66 p. Illust. 21 cm. Reprinted in 1990 under the title *Using the Biodynamic Compost Preparations and Sprays*. *

• **Summary:** This is Pfeiffer’s first English-language book. “Written at the request of the General Circle of Anthroposophical Farmers and Gardeners.”

“This book is reserved for the use of those who are applying, or who wish to introduce, the biological-dynamic methods, and can only be obtained from one of the following offices:...” [a list of offices or individuals in Great Britain, the United States, Australia and New Zealand is given].

75. *California Health News (Hollywood, California)*. 1936. Sexauer store moves: Serves health meals. 4(4):9. Feb. 21.

• **Summary:** “Santa Barbara—Moving across the street to 14 West Anapamu, Sexauer’s Natural Food shop is in fine new quarters, is offering real health meals, served by Hoag and Baker. These people have served Montecito with vegetable juices for several months. Hoag became a health-minded vegetarian five years ago largely through the influence of

Sexauer, vegetarian for 30 years, who is doing a fine work here in educating people to the health regime. Lectures are to be held here soon.”

76. Lager, Mildred. 1936. *The House of Better Living Catalog*. Los Angeles, California: Published by the author. March. 14 p. March. 28 cm. Second expanded edition, March 1938.

• **Summary:** On the front cover is a large illustration of the exterior of the House of Better Living, and a 4-stanza poem about the House by Mildred Lager. Below the poem we read: “Catalog. The most unusual store in Southern California. Owned and operated by Mildred Lager, food economist, author, and radio lecturer.”

The first section, titled “The origin of the House of Better Living!” (p. 1) begins: “Is it fate? Often the handicaps and obstacles that we have to overcome lead us into our life work, help us to find ourselves. A few years ago a young school teacher was forced to give up her chosen profession because of arthritis deformans. It was a severe obstacle to overcome, but it was that experience that led Mildred Lager into the study of foods and their relation to health, and led to the founding of the House of Better Living. No one *has* gained recognition as rapidly as Miss Lager. In a little over two years she has won her place among the ‘leaders,’ has received both national and international recognition, and has established the House of Better Living as an institution in Southern California... Her perfect radio voice reaches thousands who cannot attend her classes.

“Miss Lager is teaching the ounce of prevention, the health insurance that pays dividends in years of health and happiness. Her slogan is that Pure Air, Pure Water, Pure Food and Constructive Thought plus exercise and sunshine build health.

“The House of Better Living is more than a Health Food Store. It is a bureau of food information and a place and means where Miss Lager can conduct her classes free of charge—and *that* is her goal. Two years ago it seemed an impossibility—very few thought it would ever succeed. They did not know the sincerity and the spirit behind it... It is but two and a half years old. We cannot predict its future nor that of its charming founder—we can only wait and see, knowing that achievement and not time is the measure of success.—By one who has watched the growth from the start.”

At the top of page 2 in large letters: “The House of Better Living offers you: 1. The best of natural foods at reasonable prices. 2. Free delivery of all \$3.00 orders in Los Angeles. 3. Free cooking classes every Wednesday afternoon at 1:30. 4. Food classes Monday and Thursday afternoon at 1:30 (except during June, July and August). 5. Miss Lager’s Radio talks every Monday, Tuesday, Wednesday and Thursday morning at 7:45 over KFAC.”

Product categories and products mentioned include: Coffee substitutes (Soyco, Hollywood Cup, Breakfast

Cup, Ficgo, Sipp). Broths (Vegebroth, Vegemineral Broth Concentrate, Hauser’s Meatless Bouillon). Nut butters—Freshly ground (Soy Bean Butter, Almond butter, Cashew butter, peanut butter—dextrinized). Whole grain flour, meal, etc. (Soy Bean Flour, Bill Baker’s Prepared Lima Bean Pancake or Waffle Flour, Bill Baker’s Prepared Soy Bean Pancake or Waffle Flour {2 lb for \$0.30}, whole wheat flour, wheat germ, bran, buckwheat flour, dextrinized flour, gluten flour, breakfast cereals—to cook {Cubbison’s cracked wheat}). Ready to serve cereals (Soy bean breakfast food, wheat germ). Macaroni, noodles, etc. (Soy bean macaroni, garbanza shells). Legumes (soy bean {imported}, garbanza peas, natural brown rice, sesame seeds). Melba toast, crackers, cookies, etc. (Bill Baker’s Soy Toast {\$0.30/lb}, Cubbison’s Melba Toast, Cubbison’s Melbetts, Soy bean gluten cracker, Cubbison’s whole wheat crackers, Cubbison’s Whole Wheat Dunkeretts, Cubbison’s wheat soda cracker, Cubbison’s honey wheat cookies, Cubbison’s Melba cookies, Soy bean wafers, soy bean macaroons, Bill Baker’s 100% Soy Bean Fruit Cookies {\$0.18/dozen}, Bill Baker’s 100% Lima Bean Fruit Cookies {\$0.18/dozen}, Olson’s soy bean bread, sliced {\$0.12}, Bill Baker’s soy bean bread—unsliced {\$0.16}, Bill Baker’s Lima Bean Bread, unsliced {\$0.16}). Natural aids (Agar, flaxseed, psyllium, Burbank kelp, kelp, Green kelp, Santay sea greens). Oils (Soy bean oil, sesame oil, Lindsay Cold Pressed California Oil). Meat substitutes (11 products, 5 with “Soy” in the name, such as Soyatose). Soy bean products (25 products! Makers incl. La Sierra, Loma Linda, etc.).

The 27 different soy products are: La Sierra Soy Beans, plain or with tomato sauce; Loma Linda Soy Beans, plain or with Proteena; Soy Beans, imported; Soy Beans, roasted; Soy Bean Loaf (meat substitute); Soy Bean Bologna; Soy Bean Spread; Soy Bean Butter (like peanut butter); Loma Linda Soy Mince Sandwich Spread; Soy Bean Sauce; Soy Bean Milk; Soy Bean Oil; Soy Bean Noodles, Macaroni, and Spaghetti; Soyco (Soy Coffee); Soy Bean Breakfast Food; Soy Bean Sprouts; Soy Bean Flour; Bill Baker’s Prepared Soy Bean Pancake or Waffle Flour; Bill Baker’s Soy Bean Bread; Olson Soy Bread (sliced); Bill Baker’s Soy Toast; Bill Baker’s Soy Bean Fruit Cookies; Soy Bean Macaroons; Soy Bean Wafers; Soy Bean Gluten Crackers.

Photos show: (1) A portrait of Mildred Lager smiling (p. 1). (2) Mildred conducting a free cooking class in her kitchen at The House of Better Living. Many men and women, all wearing hats, are seated around the perimeter of the kitchen (p. 6-7). (3) Packages of various “Bill Baker’s Soy & Lima Bean Products” including Lime Bean Wafers, Pancake Waffle & Biscuit Lima-Bean “Neat Flour,” Lima Bean Toast, Pancake Waffle & Biscuit Soya-Bean “Neat Flour,” Lima Bean Bread, and Soy Bean Bread” (p. 10).

A small ad (3½ by 2¼ inches, p. 6) by the Cubbison Cracker Co. (3417-19 Pasadena Ave., Los Angeles, California) states: “Dextrinized and whole wheat products:

Melba Toast, Melbetts, Cracked Wheat, Whole Wheat Crackers and Cookies.” Note 1. This is the earliest document seen (June 2004) concerning the work of Sophie Cubbison with soyfoods.

A ¼-page ad (p. 12) titled “Hain 100% pure foods,” describes Vege-Jell Puddings, Mal-Ba-Nuts (a powdered beverage), Potassium broth, and Col-Lax (whose ingredients are: Powdered psyllium, Powdered agar, and lactose).

Note 2. This is the earliest document seen (Aug. 2015) that contains the term “Soy bean gluten” or the term “Soy bean gluten cracker.” Address: 1207 West Sixth St., Los Angeles, California.

77. Carque (Otto) Co. 1936. The symbol of trustworthy natural foods (Ad). *California Health News (Hollywood, California)* 4(14):7. July 17.

• **Summary:** A logo at the top of the ad reads “Carque Natural Foods of California.” At the bottom we read: “Carqué foods are good!” Address: 1315 Maple, Los Angeles [California].

78. Carque, Lillian. 1936. Highlights on Carque teachings. *California Health News (Hollywood, California)* 4(14):7. July 17.

• **Summary:** An article about her husband, Otto Carque. “Otto Carque’s interest in the food question developed early in life, when he recognized the inadequacy of prevailing methods of cultivating food products, intensified by their artificial and irrational preparation. For 30 years, both in Europe and America, he was a close student of the laws of diet and health.

“His activity in the food industry was a protest against man’s foolish attempts to improve on nature—modern machinery that was constantly being devised to rob natural foods of their rugged strength by milling and refining, coupled with the use of adulterants and poisonous preservatives to disguise their inferior quality.”

“Mr. Carque was likewise a profound student of the soil—and its relation to food and health. He believed that as all our food comes directly or indirectly from the soil, its chemical composition is a most important factor in the production of healthy vegetation.” A photo, taken by his friend H.F. Sexauer (of Santa Barbara’s health food store), shows Otto Carque standing among tall plants. The caption reads: He inscribed it “‘Among the century plants,’ as he fully believed he would reach the 100 year mark. He will—in influence and spirit, but alas he was cut down at only 68 when in perfect health. If Carque’s simple teachings were followed today the world would be ideal.” Address: [Los Angeles, California].

79. Lust, Benedict. 1936. State news: New York. *Naturopath and Herald of Health (New York City)* 41(10):306-07. Oct.

• **Summary:** “Another visitor who graced our home and

table during August [1936] was the well-known editor of the California Health News, of Hollywood, California, Mr. Clarke Irvine, known to his intimates as the ‘skipper.’ It was a genuine pleasure to have this interesting and charming man with us...”

“Mr. Irvine is an advocate of natural foods and a believer in strict vegetarianism. He has to his credit the formation of the California Academy of Health and the Health Food Dealers Association. He is dead set against smoking and was particularly disgusted with the manner in which restaurants and theatres in New York and elsewhere have their air polluted with the smoking of men and women.”

80. Howard, Albert. 1936. The manufacture of humus by the Indore method. *J. of the Royal Society of Arts (London)* Vol. (no):x-147. Dec. 18.

Address: Sir, C.I.E., M.A., England. Formerly Director of the Inst. of Plant Industry, Indore, and Agriculture Adviser to States in Central India and Rajputana.

81. Irvine, Clarke. 1936? Health! With remedies and recipes: The book of the new race. Hollywood, California: Clarke Irvine. 78 p. Undated. No index. 18 cm. [1 ref]

• **Summary:** Filled with mostly wise and practical advice. On the title page of this 9th edition published in Hollywood we read: “Evolved from the author’s original card ‘Eleven Rules for Health,’ published in 1924. First edition was three years in writing; printed in Auckland, New Zealand, 1927. In loving dedication to all little children; also to our dear mothers and fathers—they did the best they knew. No copyright; please credit. Published by the author in an effort to help suffering humanity.” Facing the title page is a large portrait photo of “Skipper” Clarke Irvine. Above it: “Health is wealth.” Below: “This book has helped you; buy another and pass it on.”

Contents: Introduction. 1. Breathe. 2. Drink. 3. Sleep. 4. Eat (vegetarian natural foods, uncooked, in season, especially fresh fruits and juices). 5. Eliminate. 6. Exercise—work. 7. Play. 8. Think. 9. Improve. 10. Examine. 11. Love. Remedies. Recipes.

Concerning soy: “Soy bean milk is replacing animal milk” (p. 26). The last chapter, titled “Recipes,” mentions” Soy milk (p. 75) recommended as a “nightcap” or drink before bedtime. Raw peanut butter (p. 76, 77). Garbanzas (p. 76). Soy or lima bread (p. 77). A liquefier helps to make delicious drinks (p. 77).

All editions are undated. An early edition is listed in the Jones Grain Mill Natural foods catalog, probably published in 1933 (p. 49). The 4th edition was the most recent on sale in Jan. 1937. The 7th edition was published in about 1945. The 9th edition is 78 pages and bears the extra subtitle “The book of the new race.” It must have been published after Jan. 1935, the month that Otto Carque died (see p. 56).

Irvine, Clarke. 1964. Letter re: Irvine family genealogy

to Myra, his only sister. May 5. He wrote “one little book which I’ve sold 10,000 on my own by mail,…”

Talk with Alice Marks Irvine, Clarke Irvine’s wife. 2004. Feb. 23. Clarke wrote and began publishing this long before she met him, in 1941. It went into a 10th or 12th edition and was being sold during the 1940s and 1950s. One could probably determine when it was first published by looking through issues of *California Health News* from the 1930s. She does not have a copy. Address: Hollywood, California.

82. Jones Grain Mill. 1936? Natural foods: Catalog, recipes, information. Los Angeles, California. 74 p. Undated. 22 cm.
 • **Summary:** On the cover is a white mill behind a mill wheel (unrealistic) on a mill pond. Contents: Foreword. Health recipes: Cereals (incl. Soy bean or Mamenoke {Mamenoka, Mamenoko} breakfast cereal), breakfast cakes (incl. soy hot cakes with soy milk and Mamenoka flour, soy waffles, soy bean griddle cakes), desserts, breads (incl. soy bean flour gems, whole wheat bread), candies. Vital information: Vitamins and minerals essential to life.

Price list (prices are given for each item listed on pages 46-72): Alberty products, Alvita products, Battle Creek Sanitarium Health Foods [Michigan] (p. 47-48), beverages—coffee substitutes (Loma Linda Breakfast Cup, Soyco {soy bean coffee}, Javex {soy bean}, Carque’s Soy Bean Coffee), books (by Dr. Benjamin Gayelord Hauser, Paul C. Bragg, Mrs. Alberty, Martin W. Pretorius, Otto Carque, Clark Irvine, Dr. Harry Finkel), Dr. Paul Bragg products, Jones Grain Mill Bakery (operated by Alberty Specialty Bakers), Burbank products, Carque’s products, crackers and toast (Cubbison’s bulk or packaged), honey, jams & jellies, juices (fruit & vegetable), KAL products, kelp products (products of the sea, incl. sea lettuce, dulse, Parkelp), Kovac products, Loma Linda Foods (Soy products: Soy beans—plain, tomato, or tomato and Proteena, Soy milk—8½ oz, No. 1, or No. 2, Soy Mince sandwich spread), macaroni & noodles (incl. soy bean macaroni, soy bean noodles), meat substitutes (incl. Simoein [Smoein], Soy loaf, Alfa Soy Spread, Soy Mince) McCollum products, maple syrup and candies, Martin Pretorius products, nuts and butters, Nature Ade products, Nutro Links (Santay, Swiss, Hauser), oils, olives, Radiance products, salts (vegetable, vegetized, and vegetablized), salad dressing and mayonnaise (made with lemon and vegetable oil), health sugars and sugar substitutes, seeds, soya bean products, teas.

The price list of “Soya bean products” (p. 72) reads as follows: “Breakfast Cereal with Carob Flour ([and soya beans] tastes like Grape Nuts), pkg., 25¢. Breakfast Cereal (prepared [with soya beans]), pkg., 25¢. Soya bean flakes, pkg., 30¢. Soya bean grits, pkg., 25¢. Soya bean bread, lb. loaf, 14¢. Soya bean melba toast, lb., 30¢. Soya bean wafers, lb., 40¢. Soya bean cookies (sweetened with dextrose), doz., 15¢. Soya bean coffee cakes (sweetened with honey), each, 5¢. Soya beans cooked: Soya beans (plain cooked), No. 2

can, 13¢. Imported soya beans from Manchuria, lb., 10¢. Pre-cooked soya beans (easily prepared in 30 minutes), lb., 15¢. Soya beans with tomatoes (ready to serve), No. 2 can, 15¢. Cooked soya beans with Proteena, No. 2 can, 15¢. Other soya bean products: Non-fattening [sic] soya bean oil (for all cooking purposes), pint, 40¢. Soya bean coffee, lb., 25¢. Soya bean flour, lb., 10¢; 3 lbs., 25¢. Dextrinized soya bean flour, lb., 15¢. Soya bean milk flour, lb., 60¢. Soya bean candy (with pure chocolate and Dextrose), lb., 50¢. Soya bean sandwich spread, 25¢. Soy sauce, 20¢. Soya bean loaf, No. 2 can, 25¢. Soya bean milk, No. 2 can, 15¢. Soya bean cheese (made from soya bean milk), lb., 30¢. Soya bean mince, 8-oz. can, 25¢. Soya bean spaghetti, lb., 25¢. Soya bean macaroni, lb., 25¢. Soya bean noodles, lb., 25¢. Soy beverage (Cocoalette), 10¢.

Ads include: Hollywood Cup (p. 20). Otto Carque Co. (Glendale, California, p. 30). Loma Linda Foods (p. 33, sells soy wafers, three styles of soy beans, liquid soy milk, soy mince). Vita-Pekan (p. 46, formula includes soya bean as a major ingredient). Alberty dried brewers yeast (p. 50). Kovac Laboratories (p. 67). Cubbison (p. 73, incl. Soya Toast, Soya Cookies, Soya Gluten Crackers).

Note 1. This is the earliest English-language document seen (Jan. 2019) that contains the term “Soya bean grits.”
 Note 2. This catalog was probably published in 1933, since the company’s location in Beverly Hills is not mentioned; it opened in 1934. Moreover, the book titled *Vital Facts about Foods*, by Otto Carque was first published in 1933. Address: 322 So. Hill St. and 504 So. Broadway. Both: Los Angeles, California.

83. Carque (Otto) Co. 1937. The symbol of trustworthy & unimpaired natural foods (Ad). *California Health News (Hollywood, California)*. Jan. 8. p. 15.

• **Summary:** “Carque’s raw sugar and honey confections are deliciously wholesome. Safe for the kiddies. At all health food stores.” On the circular logo is written: “Carque Natural Foods of California.” Address: 4328 San Fernando Rd., Glendale, California. Phone: Omaha 34066.

84. Carque, Lillian. 1937. Nutritional research. *California Health News (Hollywood, California)*. Jan. 8. p. 15.

• **Summary:** “Natural foods are much more economical than unnatural ones—an important factor for one with a restricted budget.

“Those denatured and irrationally prepared foods rob us of 30% to 50% of organic salts and vitamins and make it necessary to consume much more to appease hunger than would be necessary if natural foods, rationally prepared, were consumed.

“These figures show tremendous unnecessary waste ‘in the usual preparation of our daily foods. Of the total expended,

“41% goes for meat, poultry, fish.

“15% for cereals, most of which are denatured and demineralized

“7% for refined sugar, refined sugar candies and ice cream.

“21% for milk and dairy products.

“5% for salt, spices, condiments, vinegar, etc.

“Only 4% goes for fruit (fresh, dried and canned); 3/4% for nuts and only 7% for vegetables (fresh and canned), most of which are badly prepared, making a total of not quite 12% only for nature’s best foods.

“On soft drinks alone (mostly artificially sweetened and colored) we spend \$250 millions. On drugs and patent medicines the American public spends \$500 millions to expel from the body waste poisons generated from inappropriate foods. On drugs sold illegally like cocaine and opiates, \$250 millions are spent.

“An insufficient intake of those alkaline elements found in fruits and vegetables renders it impossible for the body to neutralize fatigue and waste poisons. This causes craving for some stimulant to whip our declining vital forces into action. No intelligent person can maintain that the enormous consumption of meat, alcohol, coffee, tea, tobacco and other stimulants and cathartics indicates a true physiological requirement. As man learns to enjoy exquisite and inimitable flavors of natural foods, desire for stimulants, condiments and artificially prepared dishes to tempt the palate will vanish, and with it will go the appalling waste in appropriating funds for perverted needs and cravings.

“Not only does a simple, natural diet correct the evils of overeating and disease, but experience has shown that a meal composed of a few simple, natural and nutritious articles costs less money, requires much less labor to prepare and appeals to the highest sense of taste and enjoyment. There is another vast saving that makes the actual food cost most insignificant: that made in good health, higher efficiency, more capacity for doing things, longer life and keener enjoyment in living. Herein lies true economy—for Health is Wealth.” Address: [Los Angeles, California].

85. *California Health News (Hollywood, California)*. 1937. Leading U.S. health food stores. Where to buy *Health News*. 5(4):19. Feb. 19.

• **Summary:** The first half of this directory is organized alphabetically by cities and neighborhoods in Southern California—especially the greater Los Angeles area. There is one store in each area unless otherwise noted: Alhambra, Arcadia, Beverly Hills, Burbank, Compton, Glendale (2), Hollywood (6), Huntington Park (2), Inglewood, La Jolla, Long Beach (5), Los Angeles (14), Monrovia, Newhall, Ontario, Pasadena (2), Pomona, Riverside, San Bernardino, San Diego (2), San Pedro, Santa Barbara, Santa Cruz, Santa Monica (2), Van Nuys, West Los Angeles.

Then there are listings for Central California: Fresno, San Francisco (4), Oakland (2), and San Jose (2). The last

40% of the ad gives the same information for other states.

Note: This is the earliest document seen (March 2020) that contains a real directory of health food stores and individuals in the United States.

86. Lager, Mildred. 1938. *The House of Better Living Catalog: Finer natural foods*. Los Angeles, California: Published by the author. 36 p. March. 23 x 10 cm.

• **Summary:** The single most important document showing the creative development of commercial soyfoods in California in the late 1930s. This catalog contains a large section on Diabetic Foods, consisting mostly of soyfoods, and an even larger section titled “Soy Bean Products.”

The Foreword (p. 1) begins: “The House of Better Living is as unusual as its name. Its aim is to teach better living, and has made possible Mildred Lager’s free educational program by radio and class work. Become a member of our ever-growing family. Secure one of our creed cards—Realize life can be a game and not a battle, and if you give to the world the best you have, the best will come back to you.

“The House of Better Living has grown in four years from what was called a brain storm to an institution. It is outstanding, unique, and built on the ideals of sincerity and service. It is teaching the ounce of prevention—the health insurance that pays dividends in years of health and happiness. It carries for you, Finer Natural Foods, selected by Mildred Lager.”

A full page of delivery and order information (p. 2) shows that Mildred was shipping foods (such as California nuts and fruits, fresh and dried) all over the United States.

This catalog contains a total of 42 soyfood products, including 26 such products not found in the 1936 catalog. Soy (and other interesting) products are listed as follows (prices and weights are given for each): Beverages—Coffee substitutes: Radcliff’s soy bean, Soy-Co. Other beverages: Dr. Fearn’s Proteinized Cocoa, Radcliff’s Malted Soya Milk, Radcliff’s Soya Bean Cocolette, Soy-Malt (plain or chocolate). Sugars and syrups: Radcliff’s Golden Soya Honey Spread (4-oz. glass). Natural sweets—Candies: Carque’s health candies, bar, 5¢, Halvah bars, Sesame brittle, Soya candy sticks, 1¢ each, Soy milk “chocolate” bars, in Bavarian, cocoanut, mint, cherry, pineapple, and creme de mint flavors, Soy milk “chocolates,” ½-lb. box or 1-lb. box, Soy chocolate, 1¢ square, ½-lb, 1 lb, 60¢, or bulk.

Desserts: Agar—Parfait mix, Agar—Hain Vege-Jell, Agar—Sanitarium vegetable gelatin. Diabetic foods: Gluten flour, Soy bean flour, 10¢ lb, Soy Bean Pancake and Waffle Flour (Bill Baker’s Prepared; 2-lb. pkg. 30¢), Dr. Fearn’s Soya Cereal, Dietetic Soyrina Cereal, Dr. Fearn’s Soya-Date Breakfast Food, Battle Creek Dietetic Bran, Battle Creek toasted gluten bran flakes, Soy breakfast food, Cubbison’s soy-gluten crackers, Soy-gluten wafers, Loma Linda soy bean wafers, Bill Baker’s 100% soy-fruit slices,

Bill Baker's soy bean bread, Olson's soy bread, Soy bean macaroni, spaghetti and noodles, Soy beans—imported, Soy beans—cracked, Soy beans—red, Soy beverages (without sweetening), Bill Baker's soy melba toast, Cubbison's soy melba toast.

Nut butters: Almond butter, Almond meal, Cashew butter, Peanut butter (dextrinized or raw), Pecan butter, Soy bean butter (1b or 8-oz. can). Whole grain flours, meals, etc.: Lima bean flour, Soy bean flour (1 lb, 3 lbs, or 10 lb), Soy bean pancake and waffle flour (Bill Baker's prepared), Soy bean pancake and waffle flour (Mrs. Hauser's), Whole wheat flour, wheat germ. Breakfast cereals (to be cooked): Mildred Lager's quick cooking cracked soybeans, Dr. Fearn's soya cereal, Dietetic Soyrina Cereal. Breakfast cereals (ready to eat): Battle Creek Zo, Dr. Fearn's soya-date breakfast food, Soya breakfast food, Bill Baker's 10% soya cereal. Melba toast, crackers, cookies: Cubbison's soy toast, Bill Baker's soy toast, Cubbison's Soy-Gluten crackers, Soy-gluten crackers, Loma Linda soy bean wafers, Cookies: Cubbison's soy cookies, Bill Baker's 100% soy fruit slices. Bread: Olson's soy bean bread (sliced loaf), Bill Baker's soy bean bread (unsliced loaf 16¢). Macaroni noodles: Soy bean macaroni, spaghetti and noodles. Legumes: Soy beans—imported, Soy beans—cracked, Soy beans—red. Meat substitutes: Nuteena (7 oz. can 15¢), Nut Meat, Nuttose (Battle Creek), Proteena, Protose, Soy bean butter (30¢ lb.), Soy mince sandwich spread, Soy bean spread, Soy bean ravioli (12¢ and 20¢ can).

Soy bean products (40 products; those mentioned above may be omitted here): Loma Linda soy beans (plain or tomato flavored, No. 1 can), Loma Linda soy beans with Proteena (No. 1 can), Dry soy beans (quick cooking red), Soy bean spread, Soya bean honey spread, Loma Linda soy mince sandwich spread, Soy bean sauce (5 oz for 18¢ or 2 oz bottle for 10¢), Soy bean oil (45¢ pint bottle), Soyco (Soy coffee), Soya bean milk powder, Milk of soya bean (6 oz or 12 oz can), Soy-Malt, Proteinized cocoa, Radcliff's 100% soya bean beverage (1 lb package), Cubbison's soy bean cookies, Cubbison soy-gluten crackers, La Sierra Soy breakfast cereal, Diamel Soyarina cereal, Diamel breakfast cereal. Salad dressings: Imitation Worcestershire sauce (Carque's, 5 oz bottle for 25¢). Powdered dry vegetables: Dulse, Dulse leaf, Irish moss, Kelp, Kelp—fancy, Sea lettuce (leaf or powdered), Soy-banana powder. Laxative foods: Agar, Psyllium, Swiss Kriss, Sym, Tam (laxative jam). Natural aids: Savita yeast tablets, Sesame seeds, Theradophilus (4 oz bottle 75¢, 8 oz bottle \$1.25). Electric appliances: Electric juicers are not yet on the market. Index (p. 36).

There are ads for the following: Battle Creek Sanitarium Foods (p. 5; ask for literature). Ficgo coffee substitute (display ad, p. 6). Racliffe's Soya Products (p. 9, 21). Mildred Lager's quick cooking family (incl. cracked soy beans), Bill Baker's soy and lima bean products (photo

display, p. 16). Therapy, Ltd.—Foods for Better Living (Theradophilus, soy bean milk, p. 19, 29).

A photo (p. 1) shows Mildred Lager.

Note. This is the earliest English-language document seen (Aug. 2013) that contains the term “soya bean beverage,” which probably refers to powdered soya milk. Address: 1207 West Sixth St., Los Angeles, California.

87. Lager, Mildred. 1938. Five years ago... *House of Better Living (Newsletter, Los Angeles)* 8(34):1. Oct.

• **Summary:** “... the House of Better Living first opened its doors to the public.” “My aim was to teach and not merchandise, and to always make my classes free of charge.”

“The House of Better Living aims to be far more than a food store—as a store it has a policy of quality, service, and fair prices. Its aims are to teach Better Living—to teach you to help yourself—to help you to realize that sensible living pays big dividends and is the secret of a healthier, happier, and more prosperous life.” Recipes for October (p. 1) include: Soy bean loaf. Soy vegetable hash.

Sidebar: “Start your day with Mildred Lager's cheery philosophy. KFAC [radio]—8:45 A.M. Tuesday, Wednesday, Thursday, and Friday mornings.” Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

88. Pfeiffer, Ehrenfried. 1938. Bio-dynamic farming and gardening: soil fertility renewal and preservation. Translated from the German by Fred Heckel. New York, NY: Anthroposophic Press; London: Rudolf Steiner Publishing Co. vii + 220 p. Illust. (18). No Index. 22 cm. [42 ref]

• **Summary:** This is Pfeiffer's second English-language book. Summarizing research and techniques developed in Europe and the United States, it was to become the textbook of the biodynamic method in agriculture.

Contents: Preface. 1. The farmer of yesterday and today. 2. The world situation of agriculture. 3. The farm in its wider connection. 4. The soil, a living organism. 5. The treatment of manure and compost. 6. The maintenance of the living condition of the soil by cultivation and organic fertilizing. 7. How to convert an ordinary farm into a bio-dynamic farm. Comments on forestry. Comments on market gardening. 9. The dynamic activity of plant life—some unappreciated characteristics. 11. Scientific tests. 12. Fertilizing: its effects on health. 13. Practical results of the bio-dynamic method. 14. Man's responsibility. A summary.

Based on the idea of the farm, organized and managed as an organism, the book includes an important chapter on the importance of the family farm for the health and preservation of rural areas.

The last English-language edition published under Pfeiffer's guidance appeared in 1956. A sixth German edition was published in 1977.

Note 1. This is the 2nd earliest document seen (Feb. 2011) concerning bio-dynamic / biodynamic farming.

Note 2. This book is weakened by the lack of an index.

Note 3. In Jan. 1943 an ad in *Organic Gardening* magazine (p. 29) states that this book is sold by the publisher for: “cloth \$2.00; paper \$1.50; mailing 3¢ extra.”

Note 4. J.I. Rodale, founder, editor and publishing of *Organic Gardening* magazine, described this book as follows (Dec. 1946, p. 52): “The author asks his readers to look back to the agricultural practices of yesteryear when the farmers and gardeners followed the course of nature in tilling the soil, in planting, and in harvesting in an almost instinctive manner. Gradually emphasis was shifted from nature’s ways to the ways of man, from an economy based upon the soil to one based upon the dollar. In simply written but masterful style, the author surveys the world situation in agriculture, the farm in its wider connections, soil as a living thing, and proper feeding of the soil to maintain its fertility and productiveness. Comments are made on forestry, gardening, the dynamic activities of plant life, the relation of fertile soil to health, and practical results of the bio-dynamic method of farming, a method based upon the return of all plant and animal residues to the soil whence it comes. Cloth. 240 pages, 18 illus. \$2.50.” Address: Director of the Bio-chemical Research Lab. at the Goetheanum, Dornach, Switzerland.

89. Pfeiffer, Ehrenfried. 1938. Die Fruchtbarkeit der Erde: ihre Erhaltung und Erneuerung: das biologisch-dynamische Prinzip in der Natur [Bio-dynamic farming and gardening: soil fertility renewal and preservation]. Basel, Switzerland: Zbinden & Huegin. vii + 184 p. Translated into English in 1938 by Frederick Heckel. [Ger]*

• **Summary:** Note: This is the earliest book seen (March 2020) written by Ehrenfried Pfeiffer. Address: Director of the Bio-chemical Research Lab. at the Goetheanum, Dornach, Switzerland.

90. Lager, Mildred. 1939. The march of progress. *House of Better Living (Newsletter, Los Angeles)* 10(46):1. Oct.

• **Summary:** “I was one of the speakers at the recent Health Food Dealers convention in Chicago [Illinois]. I went back there and had my eyes opened. We are apt to think that California ranks tops as to interest in the food field, but I think others are right up there with us. There is a tremendous interest all over the United States. The East Coast is wide awake—so is Washington, DC; the mid-west and even parts of the south.” Address: 1207 West Sixth St., Los Angeles, California. Phone: MUtual 2085.

91. Natural Foods Institute. 1939. Know the joy of vigorous health: Vita-Mix, revolutionary new food liquefier (Ad). *Health News (Hollywood, California)*. Nov. 24. p. 6.

• **Summary:** “Stop over-taxing your digestive organs and poisoning your system with the wrong foods. Be alive, vibrant, vigorous. Drop carrots, lettuce, spinach, celery,

tomatoes peppers—all vegetables, into the quart-size bowl of the Vita-Mix and you’ll actually be drinking these same vegetables in less than three minutes. Vita-Mix makes the finest drinks, soups and raw apple sauce in three minutes.

“Vita-Mix is powerful and fast. It mixes, chops, whips, liquefies. Stainless steel blades. Two-speed motor. Chrome plated base. Heavy clear glass bowl. Guaranteed for one year.”

“Free: W.G. Barnard’s 40p. book, ‘Health Via the Carrot and Other Fruits and Vegetables’ [published ca. 1939 by Natural Foods Institute, Cleveland, Ohio]. Explains the therapeutic value of fruits and vegetables in the care of constipation, arthritis, kidney trouble, ulcers, hyper-acidity, high and low blood pressure, sinus trouble and other diseases.”

A photo shows the Vita-Mix and a lady drinking a glass of juice. Note 1. This is the earliest document seen (July 2006) that mentions the “Vita-Mix,” an early brand of electric blender.

Note 3. This is the earliest English-language document seen (July 2006) that uses the verb “to chop” (“it... chops”), or the verb “to whip” (“it... whips”) in connection with an electric blender. Address: 807-F St. Clair Ave., Cleveland, Ohio.

92. Weaver, Diana; Weaver, Purcell. 1939. Natural foods: their preparation and use. With dietetic tables by Edmond Székely. Victoria, B.C., Canada: Cosmovitalist Press. 253 p. *

• **Summary:** An early book on vegetarian cookery.

93. Weaver, Diana; Weaver, Purcell. 1939. Natural foods: their preparation and use. With dietetic tables by Edmond Székely. London: C.W. Daniel Co. 253 p. *

• **Summary:** An early book on vegetarian cookery.

94. *Eat For Health (Rosenberg’s, San Francisco)*. 1940. Here’s an easy way to balance your diet. Spring. p. 2-5.

• **Summary:** A table (p. 4) titled “Essential foods for a balanced diet” gives a good summary. One should eat foods from four groups: Foods containing—(1) Body-building proteins: Cheeses, eggs, milk, nuts, whole-grain breads, flours, pasta, soy beans, dried peas, peanuts, dried peas [no meats, poultry, or fish]. (2) Body-heating fats. (3) Energy carbohydrates: Butter, cream, olive oil, honey, fruits, etc. (4) Regulatory substances: Whole grain cereals and their products (for cellulose or roughage), foods rich in vitamins and minerals like fruits and vegetables, and “all natural foods.” Address: Rosenberg’s Original Health Food Store, 1120 Market St., San Francisco, California. Phone: MArket 3033.

95. Howard, Albert. 1940. An agricultural testament.

London, New York, and Toronto: Oxford University Press.

xv + 253 p. Illust. 23 cm. [5 ref]

• **Summary:** This book is the continuation of an earlier book by Sir Albert Howard titled *The Waste Products of Agriculture* (1931). The two books founded the organic movement in the Western world. The latter book inspired J.I. Rodale to start publishing *Organic Farming and Gardening* magazine in May 1942. This book contains a detailed discussion of the Indore process for the manufacture of humus through composting.

Sir Albert Howard (8th Dec. 1873–20th Oct. 1947) was an English botanist, an organic farming pioneer, and a principal figure in the early organic movement. He is considered by many in the English-speaking world as the father of modern organic agriculture. His knighthood was conferred in 1934, so in publications prior to that, he is not referred to as “Sir.”

“From 1903-1905, he was Botanist to the South-Eastern Agricultural College, Wye; and from 1905-1924, he was Imperial Economic Botanist to the Government of India. In 1914, he was created a Companion of the Indian Empire (C.I.E.), and received a Silver Medal of the Royal Society of Arts in 1920. From 1924-1931, Howard was Director of the Institute of Plant Industry, Indore, and Agricultural Adviser to States in Central India and Rajputana. He was made a Fellow of the Royal Asiatic Society in 1928, and in 1930 received the Barclay Memorial Medal of that society. He was knighted in 1934, and made an Honourable Fellow of the Imperial College of Science in 1935” (Source: Wikipedia at Albert Howard). Address: Sir, Formerly Director of the Inst. of Plant Industry, Indore and Agricultural Adviser to States in Central India and Rajputana.

96. *Land (The)* (Washington, DC). 1941-1954. Serial/periodical. Published by Friends of the Land (DC). Vol. 1, No. 1. Winter 1941. Quarterly. Last issue was Vol. 13, No. 2 (Nov. 1954).

• **Summary:** An early periodical within the environmental and natural foods movements in the United States. The succeeding titled was *Land and Water*. One of its major focuses was soil conservation, and protecting the soil from poisons and erosion. Issues for 1953 were titled “Land and Land News” and were published in Columbus, Ohio. Address: Washington, DC.

97. *Health News* (Hollywood, California). 1942. Leading U.S. health food stores selling *Health News*. 10(8):10. April 30.

• **Summary:** This directory is organized alphabetically by state. Within each state, the entries are arranged alphabetically by city; for each is given the name of the store, its address and phone number. A bold dot before the city means that the store also serves health meals. The states are: Arizona (4 stores). Arkansas (1). California (66). Colorado (2). District of Columbia (1). Florida (2). Georgia

(2). Hawaii (1). Illinois (10). Indiana (3). Iowa (1). Kansas (2). Michigan (10). Minnesota (2). Missouri (8). Nebraska (3). New Jersey (1). New York (18). Ohio (9). Oklahoma (1). Oregon (3). Pennsylvania (9). Texas (7). Utah (1). Washington state (11). Wisconsin (5).

Thus, the states with the most stores listed are: California (66). New York (18). Washington state (11). Michigan (10). Within California, there are 27 stores in the greater Los Angeles area (incl. Beverly Hills, Glendale, Hollywood, Huntington Park, Long Beach, Los Angeles, North Hollywood, Santa Monica, West Los Angeles), 7 in San Diego, 6 in San Francisco, and 1 in Berkeley.

Fifteen of the stores have the term “Natural Food(s)” in the store name; most of these are in California. Only one has the word “Vegetarian”—San Diego, California, Vegetarian Cafe & Bakery, 1125 6th St. Phone: Main 3159. Well-known stores include: House of Better Living, Los Angeles. Richter’s Cafeteria, Los Angeles. The Food Mill in Oakland. Sexauer Natural Foods in Santa Barbara. Huni Health Products and Lust’s Original Health Foods in New York City.

98. *Organic Farming and Gardening*. 1942-1942/10. Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Jerome I. Rodale, editor and publisher. Vol. 1, No. 1. May 1942.

• **Summary:** This title continued until Vol. 1, No. 6, Oct. 1942, when it became *Organic Gardening and Farming* with Vol. 2, No. 1, Dec. 1942. Merged with *Organic Farmer* in Jan. 1954 to become: *Organic Gardening and Farming*. The single most important periodicals in launching and developing the organic foods movement and industry in the United States, and eventually the Western world. At the time he started publishing this magazine, J.I. Rodale was already publishing two other magazines, one titled *Health Guide* and the other *Fact Digest*. In both of these he had been running articles about Sir Albert Howard and his organic method. During the first two years of publication the magazine changed titles several times, being called *Organic Gardening and Farming* (starting Dec. 1942) and simply *Organic Gardening* (Jan. 1943 to 1953). He published 6 issues under the title of *Organic Farming and Gardening*, but with Nov. 1944 it became *Organic Gardening and Farming*; “We decided to aim our sights at the gardener and catch an aggressive farmer here and there.”

Note 1. This is the earliest document seen (March 2020) concerning with work of J.I. Rodale and *Organic Farming and Gardening*. In the magazine’s many name changes between May 1942 and Jan. 1954 we see the difficulty of positioning a pioneering periodical in a completely new field.

Note 2. This is the earliest document seen (March 2020) that concerns organic farming or gardening.

Note 3. More specifically, this is the earliest document seen (March 2020) that contains the word “organic” in the title or that uses the word “organic” to refer to the production of food without application of pesticides / agrichemicals. J.I.

Rodale popularized the word “organic” in English to mean grown without pesticides and using practices that constantly build soil fertility. Address: Emmaus, Pennsylvania.

99. Rodale, J.I. 1942. Introduction to organic farming. *Organic Farming and Gardening*. May. p. 3-5.

• **Summary:** “Organic farming is new to the majority of farmers. In this country it has been taken up on a limited scale, only in the last few years. In Europe,—England, Denmark, Switzerland and Germany especially—it has been in use on a more extensive scale for many years and its advantages have been tested widely. There are two methods that have been used, the Bio-Dynamic system and the Indore method, the latter receiving its name from the city of Indore in India where it was first tried by Sir Albert Howard. They both have one thing in common, which is that they frown on the use of so-called chemical fertilizers.

“A detailed description of the Indore method of composting is given elsewhere in this magazine as is also the Bio-Dynamic system. What is claimed roughly for these organic methods of farming is that they increase the fertility of the soil, produce much better tasting crops, crops that are healthier for man and beast, reduce weeds, do away with the necessity of using poisonous sprays, improve the mechanical structure of the soil, enable it to retain moisture, and reduce soil erosion, etc.

“Sir Albert Howard, advocate of the Indore method of farming has said that ‘artificial manures (chemicals) lead inevitably to artificial nutrition, artificial animals, and finally to artificial men and women.’

“A few years ago in a English health magazine published in London there appeared a brief account of an experiment in the feeding of children which had a tremendous significance in connection with bodily resistance to disease. There were two groups of children. One group was fed on vegetables raised by ordinary methods with the liberal use of chemical fertilizers. The second ate vegetables grown by the use of compost fertilizer only, containing no chemicals.

“The latter children enjoyed a singular immunity to colds whereas the former suffered from the regular, normal condition as to colds, coughs, etc.

“Compost fertilizer is a purely organic material as distinguished from mineral fertilizers (chemicals). It is made by mixing manure with such plant materials as weeds, leaves, grass clippings, etc. By a natural process, decay takes place and the resultant material, which has a rich woody brown color, goes back into the land to enrich it in a manner that the roots of plants can appreciate and absorb, as against unnatural chemicals which the roots cannot as efficiently work with.

“This was the first time that I had ever heard a question raised as to the methods used in raising crops insofar as it affected our health. Having read, extensively over a long period of time in medical journals, health magazines and

books and never having seen this point discussed, it reacted as something of overwhelming importance.

“I have obtained and read several times over Sir Albert Howard’s book entitled ‘An agricultural testament’ which treats the entire subject in adequate detail. (Price \$4.50).

“The Bio-Dynamic method is described in a book called ‘Bio-Dynamic, Farming and Gardening’ by Dr. Ehrenfried Pfeiffer.

“Since July, 1941, we have been making compost heaps, using manure obtained from a herd of 20 steers. There is no question that the making of these heaps means extra labor, but it will be shown in the columns of this magazine that this extra work will be more than repaid by getting better crops and selling them at higher prices. The use of organic materials exclusively means greater profits for the farmer.

“Plant growth depends on a bacteriological process in the soil and in this process there is a certain relationship or cooperation between bacteria and certain fungi called *mycorrhiza*. These two work as a team in feeding the organic matter of the soil to the roots. In the presence of artificial chemical fertilizers the efficiency of these bacteria and *mycorrhiza* is greatly reduced and the resultant food products do not have the fine taste of those raised with natural organic fertilizer materials, also called humus. In other words not only would we be much healthier if we ate food grown under the above-mentioned correct methods, but our farm animals, if fed on them would be healthier and the income we get through them would be higher.

“Where much chemical fertilizers are used with insufficient application of organic substances the soil is gradually becoming hard-packed and the earthworms which nature put there for a well-defined purpose are being killed off. By boring in the earth these tiny creatures produce openings which help in getting oxygen into the soil. But their most important duty is actually to swallow earth, mix it with matter from their digestive process and excrete one of the finest natural fertilizer materials ever made. Many soils today are almost barren of worms because of the constant dumping into the soil of artificial chemical fertilizers. By the use of humus, or the natural organic fertilizers, the amount of earthworms in the soil is greatly increased because they can live and multiply in this element which is natural for them.

“It is rather paradoxical that the medical profession and its thousands of scientific workers are spending so much time measuring the amount of vitamins in various food products and formulating interesting principles regarding their application to health problems, yet disregarding the basis or foundation of the food products. Plants are not like money for example. A one dollar bill always means 100 cents. But two different pea-pods each representing the same weight do not have the same amount of vitamins.

“One of these fine days the public is going to wake up and will pay for eggs, meats, vegetables, etc., according to how they were produced. A substantial premium will

be paid for high quality products such as those raised by organic methods. It is possible that if you feed chickens on home raised feeds produced without the use of chemical fertilizers, instead of getting 30 or 40¢ a dozen your eggs will command 50 or 60¢ a dozen. The better-earning class of the public will pay a high price if they can be shown its value, and that they will save on doctor bills. Dr. Alexis Carrel, in his world-famous book 'Man the Unknown,' wrote: 'Chemical fertilizers, by increasing the abundance of crops without replacing the exhausted elements of the soils, have contributed indirectly to change the nutritive value of our cereal grains and our vegetables.'

"It has been proven that not only may food crops be grown without the aid of chemical fertilizers, but that when natural organic fertilizers are used, the food thus grown not only produces greater body resistance to disease when eaten by either man or animal, but the taste of the food is by far more delicious and natural.

"In New Zealand practically all the farms are treated with chemical fertilizers. A few years ago, the *Lancet*, famous London medical magazine said, 'In 1936 Dr. G. B. Chapman, of the Physical and Mental Welfare Society of New Zealand, persuaded the authorities of a boys' school hostel to grow their fruit and vegetables on soils treated with humus. This has since been done, and a striking improvement is reported in general health and physique, particularly as regards freedom from infections, alimentary upsets and dental caries.'

"In India, the Hunzas of the north have been found to have the best health and physique of the entire country. They are a 'hardy, agile, and vigorous people,' says Sir Albert Howard. 'They have marvelous agility and endurance, good temper and cheerfulness. These men think nothing of covering the 60 miles to Gilgit in one stretch, doing their business and then returning... health and physique enjoyed by the Hunza hillmen appears to be due to the efficiency of their ancient system of farming.' It was found that they return to the soil all human, animal, and vegetable wastes after being made into compost heaps as described earlier in this article. Chemicals do not enter into their farming formula.

"In overpopulated China, where the soil is literally 'worked to death,' and land is so precious, this method of using compost heaps has been in use for over five thousand years. The full advantage in China, however, cannot be secured on account of overpopulation in the first place and secondly because of frequent crop failures due to insufficient rainfall. Had chemical fertilizers been extensively used there over a period of not thousands, but only hundreds of years, China today would be a barren wasteland" (Continued). Address: Editor and founder, Emmaus, Pennsylvania.

100. Rodale, J.I. 1942. Introduction to organic farming (Continued—document part II). *Organic Farming and Gardening*. May. p. 3-5.

• **Summary:** Continued: "The dust storms in mid-western United States are partly due to the lack of organic humus in the soil. The humus that the farmer can make in the form of compost heaps, after being worked into the soil will improve the moisture retaining capacity of the earth. That is one of the very important aspects of this method of fertilization. The earth will retain moisture during long periods of drouth. Ground which is over-chemicalized, as in the dust-bowl regions, becomes hard packed and powdery, and is bound to become worthless eventually.

"Unless more organic material is returned to the soil, the future of this country looks somewhat disheartening, because industry and prosperity are closely bound to and dependent upon agriculture. It is said that the decline of Rome was due to a deterioration of its crop lands. There are many other examples in History where carelessness in the handling of the soil resulted in the practical extinction of races, or reduction to a low status.

"According to Sir Albert Howard in his *Agricultural Testament*: 'At Marden Park in Surrey; England, Sir Bernard Grenwell has found that a change over to a ration of fresh homegrown food (raised on soil manured with humus) fed to poultry and pigs has been followed by three important results: (1) the infantile mortality has to all intents and purposes disappeared; (2) the general health and well-being of the live stock has markedly improved; (3) a reduction of about 10 per cent in the ration has been obtained because such home-grown produce possesses an extra-satisfying power.

"At a large preparatory school near London, at which both boarders and day-boys are educated, the change over from vegetables, grown with artificial manures, to produce grown on the same land with Indore compost has been accompanied by results of considerable interest to parents and to the medical profession. Formerly, in the days when artificials (chemicals) were used, cases of colds, measles, and scarlet fever used to run through the school. Now they tend to be confined to the single case imported from outside. Further, the taste and quality of the vegetables have definitely improved since they were raised with humus.

"(Another article in this series will appear next month.)"

Note: The price of the magazine is 10 cents (\$0.10) per issue; \$1.00 a year. Address: Editor and founder, Emmaus, Pennsylvania.

101. Pfeiffer, Ehrenfried; Riese, Erika. 1942. Grow a garden and be self-sufficient. Done into English by Alice Heckel. New York, NY: Anthroposophic Press, Inc.; London: Rudolf Steiner Publishing Co. x + 118 p. Illust. Index. 21 cm. Reprinted in 1981 by Mercury Press. [5 ref]

• **Summary:** On the title page: "With a garden plan by Nikolaus Stoeklin and five illustrations in the text."

Contents: Index. Preface. 1. Successful gardening for the small landholder. 2. Basic considerations for the home

garden. 3. Home garden management. 4. Crop rotation and the significance of mixed cultures. 5. Vegetable production concentrated in the smallest possible area. 6. Practical cultural directions for the various vegetables. 7. Herbs in the farm and home garden. 8. A manifesto for the housewife.

This book is based on the "Bio-Dynamic Method," which the authors have applied with success for the last 16 years. It is based on humus-forming organic methods which are designed to maintain and increase the fertility and health of the soil, while also giving high yields.

Two tables (Plans A and B, p. 4-5) indicate that the authors believe that children and adults need milk, fats, sugars and meat. In Plan B, considered healthier and more advisable, an active boy, over age 11, should consume each year: 240-365 quarts of milk, 80 pounds of fats, 115 pounds of sugars, and 250 pounds of lean meat, poultry and fish. A moderately active man should consume each year: 182 quarts of milk, 65 pounds of fats, 75 pounds of sugars, and 220 pounds of lean meat, poultry and fish.

Note 1. This appears to be Pfeiffer's third English-language book. Advertised in *Organic Gardening* magazine (Jan. 1943, p. 29) it sold for "Paper \$1.25. Mailing 2¢ extra" from the publisher.

Note 4. J.I. Rodale, founder, editor and publishing of *Organic Gardening* magazine, described this book as follows (Dec. 1946, p. 52): "In this small book, Dr. Pfeiffer gives undivided attention to problems of the garden and is quite chatty with the gardener. In the first line he puts his finger on the essence of the good life, namely self-sufficiency. This involves careful planning and a full understanding of nature's ways. First consideration is given to the home garden and the planting of gardens and homesteads. The author discusses size and yield, digging and cultivation, watering and irrigation, the preparation of composts and fertilization, sprays and spraying, and hotbeds and coldframes. For tops in gardening one must understand the value of crop rotation, the significance of mixed culture. He concludes with practical cultural directions for various vegetables in the home garden and the importance of herbs in the home and on the farm. Paper: 118 pp., illus. \$1.40." Address: Kimberton Farms, Phoenixville, Pennsylvania.

102. Ratcliff, J.D. 1942. The town without a toothache. *Collier's*. Dec. 19. p. 58-59.

• **Summary:** About the remarkable lack of cavities in Hereford, Texas, and the role of fluoride (in a concentration of 3 parts per million) in creating this enviable situation.

The main who discovered Hereford was Dr. George W. Heard, age 75. Although he has almost no scientific training, he is very observant. Born on a farm in Alabama, he earned his way through dental college, and then married. Because of his wife's lung trouble, he decided to move to Hereford, the county seat of Deaf Smith County, Texas. "The county was named for Sam Houston's chief scout in the Texas

Revolution."

After he began practicing dentistry in Hereford, he noticed that among the people who had resided in the county for a long time, there was virtually no tooth decay. "New settlers needed an occasional filling." Even the aged horses and dogs had fine teeth.

Dr. Heard finally got Dr. Edward Taylor, the able, hard driving state dental officer, interested in the very interesting and unusual situation. Taylor went to Hereford County and did a systematic, large-scale examination of 810 youngsters who had been born and raised in the county. Well over half the group showed no decay at all. On average, there was one-half a decayed, missing or filled (DMF) tooth per child.

This finding called for an even bigger study. Analysis of the water at Hereford showed 2.5 parts of fluorides per million parts of water. A study of the foods grown in the area showed that they were "astonishingly high in phosphorus." In conclusion, Dr. Taylor tentatively ascribed the low rate of tooth decay in Deaf Smith County to a combination of factors. "He thinks that fluorides play a part; and sunshine, calcium and phosphorus as well." He believes a much larger research effort is needed.

Note 1. Because of the high concentration of fluoride in the local water, fluorosis (a mottling of the teeth) was endemic in the Hereford area. But this key fact was not mentioned in the *Collier's* article.

Note 2. A condensed version of this article was reprinted in the Feb. 1943 issue of *Reader's Digest* magazine.

103. *Organic Gardening and Farming*. 1942-- . Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Jerome I. Rodale, editor and publisher. Vol. 2, No. 1. Dec. 1942. *
• **Summary:** Previous title *Organic Farming and Gardening*. Subsequent title: *Organic Gardening*, from Vol. 2, No. 2, Jan. 1943 through Vol. 21, No. 12, December 1953. Address: Emmaus, Pennsylvania.

104. *Organic Gardening*. 1943-1953/05. Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Jerome I. Rodale, editor and publisher. Vol. 2, No. 2. Jan. 1943.
• **Summary:** This title continued through Vol. 21, No. 12, Dec. 1953. Previous title *Organic Gardening and Farming*. Subsequent title: *Organic Gardening and Farming*, from Vol. 1, No. 1, Jan. 1954. Address: Emmaus, Pennsylvania.

105. Allison, R.V.; Whitehead, Thomas, Jr. 1943. Know fertilizer materials better: trace elements in some organic fertilizers. *Florida Grower* 51(1):4, 19. Jan. [1 ref]
• **Summary:** A large table titled "Spectrographic analysis of organic and inorganic sources of fertilizer nitrogen" gives analyses of castor pomace, peanut meal, soybean meal and cottonseed meal. These can be considered by-products and even wastes.

This table is taken from page 6 of Florida Experiment

Station Bulletin No. 290.

106. *Organic Gardening*. 1943. With Sir Albert Howard. 2(2):24-25. Jan.

• **Summary:** This is a published letter: “To Sir Albert Howard, Windways, Heversham, Milnthorpe, Westmoreland, England.

“From J.I. Rodale, Editor. September 29, 1942.

“I am beginning to experiment with mechanical devices that would eliminate the turning of compost heaps and I am wondering if you have had any experience along such lines. Do you know of any equipment that might be used to turn over a heap?”

107. *Organic Gardening*. 1943. The beneficial earthworm. 2(2):27-28. Jan.

• **Summary:** “The vegetable mold, made by earth worms, is generally of a blackish color and a few inches in thickness. This mold is one of the best types of humus in existence. It is made by the worm, swallowing the earth, and throwing it out after it has passed through the little creature’s digestive system.

“Charles Darwin, the first scientist to really investigate the relation of the earthworm to agriculture, stated that it was his absolute conviction that without the earthworm all growing plants would eventually vanish from this earth. Later experiments seem to bear out these conclusions.

“Earthworms, through their incessant borings, help aerate the soil and aid the rain to seep into the lower strata. They bring up valuable minerals from the depths to serve as plant food and dying, in vast numbers, furnish the soil with essential protein elements—so necessary to plant growth. It has been estimated, that truly fertile soil should have approximately 1,000,000 earth worms to the acre. This number of worms, in a single year, would manufacture approximately 50 to 150 tons of humus.”

108. Ratcliff, J.D. 1943. The town without a toothache. *Reader’s Digest*. Feb. p. 87-88.

• **Summary:** About the lack of cavities in Hereford, Texas. Dr. George W. Heard moved to Hereford from Alabama 26 years ago and began to practice dentistry there. Almost from the beginning he noticed that there was essentially no tooth decay among the local people. For years he tried to interest others in this unusual situation, until finally Dr. Edward Taylor, the state dental officer, did take an interest—and was quite surprised at the very low rate of decayed, missing, or filled (DMF) teeth shown by a survey he conducted. To determine this happy situation he first had the drinking water analyzed. It was found to contain 2.5 parts of fluorides per million parts of water. Yet other towns in the area had similar fluorine levels but normal rates of DMF teeth. A second survey found that the foods were unusually high in phosphorus and high in calcium. Researchers have found that

animals and humans consuming diets high in phosphorus generally have little tooth decay. Clearly more research is needed.

109. Rodale, J.I. 1943. With the editor (Editorial). *Organic Gardening* 2(3):2-4. Feb.

• **Summary:** J.I. Rodale signs his name at the end of this editorial, which begins: “Bugs, worms, blights and rusts. A number of years ago I heard the statement that on a farm in New York State they were actually demonstrating that well-nourished vegetables were distasteful to insect pests. At the time the idea seemed illogical—so illogical that I would have wagered that the greener, the more leafy, the more luxuriant a plant, the more enticing it would appear to bugs, caterpillars, blights and rusts.

“However, today my opinions have changed. On our experimental farm here in Eastern Pennsylvania we have seen some things happen that have altered my point of view.”

While discussing similar observations by gardeners, farmers and soil scientists worldwide, he adds (p. 3):

“Frankly, it was the writings of Sir Albert Howard that started me investigating this seeming phenomenon of proper plant fertilization. The wonderful results that he had achieved in India, fighting insect pests and plant diseases merely through proper fertilization of the soil, astounded me. It was all so contrary to my logical deductions that I was intrigued and fascinated. I determined to go deeper into the subject.”
Address: Emmaus, Pennsylvania.

110. Anthroposophic Press, Inc. 1943. The Bio-Dynamic Method: The sure way to soil fertility (Ad). *Organic Gardening* 2(4):31. March.

• **Summary:** This small (1/10th page ad) states: “Details in Bio-Dynamic Farming and Gardening, by Dr. E. Pfeiffer.

“Cloth \$2.00; mailing 6¢ extra.

“Paper \$1.50; mailing 6¢ extra.

“For the small plot owner:

“Grow a Garden and Be Self-Sufficient, by E. Pfeiffer and Erika Riese.

“Paper \$1.25; mailing 3¢ extra.” Address: 225 West 57th St., New York, NY.

111. Howard, Albert. 1943. The control of plant diseases. *Organic Gardening* 2(4):3-4. March.

• **Summary:** This article begins: “As Great Britain and other parts of the empire become compost-minded and more and more attention is being paid to Nature’s law of return, an interesting sidelight on the control of plant diseases is developing.”

Most producers rely on three methods to control pests (including pesticides and pest-resistant plants), but the pests keep coming back. Obviously something is wrong.

A better approach begins with the “application to the soil of freshly prepared humus.” “The only sound method of

preventing plant diseases is the restoration of soil fertility.” People must learn how to make compost. Address: Sir, C.I.E [Companion of the Indian Empire].

112. Howard, Albert. 1943. The history of the Indore method of composting. *Organic Gardening* 2(4):9-12. March.
 • **Summary:** This article begins: “A little more than ten years have passed since a detailed account of the Indore method of composting appeared in book form under the title—*The Waste Products of Agriculture: Their Utilization as Humus*. This book was written to assist the cotton cultivators of India who provided a large portion of the funds needed for the foundation and maintenance of the Institute of Plant Industry at Indore in Central India at which this method of converting vegetable and animal wastes into humus was devised, tested on the local cotton crop and shown by large-scale trials to be the basis of any permanent and effective system of cotton growing.”

This was a method of maintaining soil fertility; the humus not only increased the yield but also improved the cotton fibre. Address: Sir, C.I.E. [Companion of the Indian Empire].

113. Keene, Paul. 1943. How did your garden grow? *Organic Gardening* 2(4):5-6. March.

• **Summary:** This article was reprinted from “The Decentralist,” a publication of the School for Living, Suffern, New York. This summer the School of Living laid out five gardens, all on the same 1/3 acre. In all of them they used the biodynamic method of organic gardening in which no chemical sprays or dusts are used, and the plants are grown in raised beds.

The first garden is the 30 by 30 small-family garden as described in *Grow a Garden*, by E. Pfeiffer and E. Riese. Dr. Pfeiffer is head of the Biodynamic Farming and Gardening Association of America. This garden is divided into 14 beds.

The second garden, described in the same book by Pfeiffer and Riese, is the “Chinese garden.”

Note: This is the earliest document seen (March 2020) concerning Paul Keene in *Organic Gardening*. Address: [Walnut Acres, Pennsylvania].

114. *Organic Gardening*. 1943. Table of contents: 2(5): April.

• **Summary:** The writing on the wall (inside front cover). With the editor. Hints for the Victory Gardener. Mulching garden crops with corn cobs. Compost and orchard. How solar energy is wasted. Speeding Indore compost by petty method. Spring notes on growing vegetables. The Japanese beetle ignores a bio-dynamic garden. Science makes the worm turn. To the rescue of the soil. Our daily bread. Health from properly raised food. Earthworm department. The earthworm. Reader’s correspondence. Help the war effort: Use only home-made organic fertilizers.

Price: 25¢. Subscription rate: 12 issues for \$2.00. Address: Emmaus, Pennsylvania.

115. Rodale, J.I. 1943. With the editor (Editorial). *Organic Gardening* 2(5):1-3. April.

• **Summary:** “Cautions—As the season begins, let me caution you in regard to a few of the pitfalls that are awaiting you in connection with your gardening plans.” Address: Emmaus, Pennsylvania.

116. Howard, Albert. 1943. The handwriting on the wall. *Organic Gardening* 2(5):Facing p. 1, and inside back cover. April.

• **Summary:** “What is the real status of chemical fertilizers in agriculture?” The writer tries to answer this question by looking at the sugar cane industry in Barbados, West Indies, where he served as a research officer for three years (1899-1902) in the newly-formed Imperial Department of Agriculture for the West Indies.

That was 40 years ago. As the internal combustion engine increasingly “provided a ‘cheaper’ form of road transport and a ‘cheaper power unit for cultivation, the number of animals on the sugar estates rapidly dwindled and the supplies of properly constituted humus almost vanished.” A host of problems, such a plant diseases, followed. Address: Sir, C.I.E. [Companion of the Indian Empire].

117. Balfour, E.B. (Evelyn Barbara, Lady). 1943. The living soil: evidence of the importance to human health of soil vitality, with special reference to national planning. London: Faber and Faber. 246 p. Illust. Plates. 23 cm. Reprinted in 1943 as *The Living Soil and the Haughley Experiment*, ¼ by Universe Books (NY, 383 p.). [20+ ref]*

• **Summary:** A classic in the history of the organic farming and gardening movement. Discusses: Soils. Compost. Soil microbiology. Nutrition. Evelyn Balfour was born in 1898. Address: England.

118. *Nature’s Path (New York City)*. 1944. Deaf Smith County wheat. Jan. p. 24.

• **Summary:** “Early this year [sic, on 19 Dec. 1942] the health-conscious world was startled by an article in *Collier’s* [magazine] regarding a ‘town without a toothache.’ Later this article was reprinted in part in *Reader’s Digest*” [Feb. 1943, p. 87-88].

The inhabitants of Hereford, in Deaf Smith County, Texas, had hardly any tooth decay. “Dr. George W. Smith, who came to Hereford from Alabama some 26 years ago, reported that while new settlers occasionally required fillings, there was virtually no practice of this kind among old residents, even those of advanced years.”

Researchers at Texas Technological College analyzed samples of meat, milk, wheat, and vegetables, which they found to be astonishingly rich in phosphorus. Wheat, the

chief food grown in the area, had more than 600% above normal. It is not known whether increased phosphorus intake can reduce cavities.

However, Great Valley Mills, of Paoli, Pennsylvania, is now milling flour from wheat grown in Deaf Smith County.

119. Natural Foods Institute. 1944. Carrot juice for health (Ad). *Nature's Path (New York City)*. Oct. p. 394.

• **Summary:** A small (2¼ inch square) ad. "All vitamins and minerals retained. Juice of California carrots. Nothing added. "48-8 oz. cans-\$4.80 a case. 24-12 oz. cans-\$3.60 a case. Free book-'Health Via the Carrot' with each order."

Note: This company was a pioneer in the electric kitchen blender industry. Their blender was eventually re-named "Vita-Mix." Address: 624 Prospect, Cleveland, Ohio.

120. Rodale, J.I. 1944. With the editor: legitimate means of checking insects and disease (Editorial). *Organic Gardening* 6(1):3. Dec.

• **Summary:** "The earthworm should be assiduously cultivated in the vegetable garden because he eats the larvae of destructive insects. There is definitely a connection between a large earthworm population and a small amount of disease and destructive insects."

121. *Sheboygan Press (The) (Sheboygan, Wisconsin)*. 1945. Fluorine in water lessens decay in teeth, probe shows. March 22. p. 4.

• **Summary:** "Investigation by Dr. H. Trendley Dean, senior dental surgeon of the United States Public Health Service, and by others, have shown that communities whose water supply contains fluorine experience less dental decay in children who have drunk this water during the period of tooth formation than communities whose water supply contains no fluorine. Other investigations in areas where water supplies contain up to 14 parts per million of fluorine have been unable to show any harmful effects to bone or other body tissue other than mottled tooth enamel.

"In a paper presented before the National Conference of the American Water Works association in Cleveland, Ohio, on June 17, 1943, Dr. Dean showed the difference between the number of decayed, missing and filled teeth in children twelve to fourteen years of age in Galesburg, Illinois, with water of 1.8 parts per million of fluorine, and Quincy, Illinois, with 0.1 parts per million to be well over a ratio of three to one in favor of the Galesburg children.

"A comparison of eight communities in the Chicago metropolitan and suburban area with waters varying from 0.0 to 1.8 parts per million of fluorine showed to similar comparative relationship.

"After discussing the results of the studies of this relationship between fluorine content of drinking water..."

122. *Business Week*. 1945. Is it oleo, or not? Soya butter

subject to a jumble of conflicting rulings. April 21. p. 95-96.

• **Summary:** "Soya butter is bringing lots of business and plenty of grief to W.G. Barnard of Cleveland [Ohio], whose vegetarian Natural Foods Institute has developed a thriving business distributing this butter substitute.

"Margarine or not?: The Bureau of Internal Revenue has ruled that soya butter is oleomargarine, that Barnard must have a \$480 wholesaler's license, a \$48 retail license, and must collect a 10¢-a-pint tax from his customers. But the U.S. Food & Drug Administration holds that soya butter is not oleomargarine and that to label it as such would be misbranding, inviting penalties." The sole manufacturer of this product is Butler Food Products Co. of Cedar Lake, Michigan.

123. Siegmeister, Walter. 1945. Seeds as a human food. *Organic Gardening* 6(5):18-19. April.

• **Summary:** Page 18: Left column: "Lecithin, which has recently entered therapeutics as a nerve reconstituent, is at present manufactured from the soya bean. However all seeds contain lecithin, which is intimately associated with the vital functions of the germ or embryo of seeds." Address: Ph.D.

124. *Soybean Digest*. 1945. "The Useful Soybean"... Health stores introduced it to the public. July. p. 14-15.

• **Summary:** This very favorable review of Mildred Lager's book titled *The Useful Soybean*, which contains 350 recipes, says of Miss Lager: "The author conducts a health food store in Hollywood, has had her own [radio] program on the air, is past president of the Health Food Dealers of Southern California and past vice president of the National Dietary Association... The author, who says that soybeans originally were 'thrust upon' her, has her own dietary philosophy. She gives little comfort to a public currently trying to solve all dietary problems by taking a few food pills daily. She says, 'Synthetic vitamins and minerals will never equal the intricate combinations of natural foods... We must go back to the use of more natural, unrefined foods with their known and unknown vitamins. We must replenish our soils and strive to produce foods that contain what nature intended them to contain.'"

125. *Let's Live*. 1945. Have you tasted the new formula? Kevo has amazing flavor-Gives more pep (Ad). Sept. p. 19.

• **Summary:** This 2¼ by 3½ inch ad states: "This hearty food beverage offers you something delightfully different—a smooth, chocolate-like flavor but contains no chocolate. Kevo powder makes a delicious drink hot or cold. Try it with your meals every day for a week. Carry Kevo Tablets (Enurgets) in your pocket or purse and eat like candy for more pep.

"You will keep coming back for more because Kevo tastes So Good and makes you feel so good.

"Kevo is made from the following natural foods that

give True Minerals and Vitamins: Whole soy bean, germ of whole wheat, dextrose, soy bean milk, deep sea kelp, mint leaves, rhubarb plant, spinach, carrot, celery, W.H.Y. Blended flavoring, Special calcium, phosphorus, iron, copper, iodine.

“Ask your Pure Food dealer for Kevo. If he is temporarily out, send his name, address and 10¢ to the factory. We shall mail you a generous trial size of Kevo and Enurgets, post paid. Kevo-L-2, Azusa, California.” Address: Azusa, California.

126. Bromfield, Louis. 1945. Pleasant valley. New York and London: Harper & Brothers. vii + 300 p. Illust. (by Kate Lord). 22 cm.

• **Summary:** A biography. His home was Malabar Farm near Lucas, Ohio. A conservationist, he believes that farmers need to return to more natural methods which do not destroy the soil.

127. Howard, Albert; Howard, Louise. 1945. Farming and gardening for health or disease. London: Faber & Faber, Ltd. 282 p. + 15 p. of plates. Illust. Index. 23 cm. Subsequently published as *The Soil and Health*. [5 ref]*

• **Summary:** Discusses: Soil fertility. Soils and nutrition. Plant-soil relationships. Sir Albert Howard lived 1873-1947. His wife, Louise Ernestine Howard was born in 1880. Address: Sir, C.I.E. [Companion of the Indian Empire], M.A., Formerly Director of the Inst. of Plant Industry, Indore and Agricultural Adviser to States in Central India and Rajputana.

128. Rodale, J.I. ed. 1945. The fruit orchard. Emmaus, Pennsylvania: Organic Gardening. 48 p. See p. 11. Illust. 21 cm. Organic Gardening Series, No. 6. [10* ref]

• **Summary:** In the first chapter, titled “Orchard practices,” by J.I. Rodale: “Recently a certain company, at my instigation, has been offering premiums of 50¢ a bushel for organically grown grains such as wheat, corn, buckwheat, etc. It has done this because it can sell them at higher prices to discriminating purchasers. There is a tremendous field waiting to be tapped. A large part of the population is not only health-conscious but has the money to pay a little more for quality food that will keep the doctor away.”

“The time is not far off when grocers will offer special grades of organically grown fruit, guaranteed to be unsprayed, at higher than regular prices and they will have difficulty meeting the demand. Think how important this type of food will be to growing children and to invalids. There is opportunity beckoning.”

Note: Contains chapters by various authors, some published previously. Address: Editor of Organic Gardening, Emmaus, Pennsylvania.

129. Rodale, J.I. 1945. Pay dirt: Farming & gardening with composts. Emmaus, Pennsylvania: Rodale Press; New York:

Devin-Adair. x + 245 p. Introduction by Sir Albert Howard (London). Frontispiece. No index. 23 cm. [45 ref]

• **Summary:** This is a book about the importance of fertile, healthy soil and the important role of compost in maintaining such soil.

The Introduction by Albert Howard begins: “A revolution in farming and in gardening is in progress all over the world. If I were asked to sum up in a few words the basis of this movement and the general results that are being obtained, I should reply that a fertile soil is the foundation of healthy crops, healthy live stock, and last but not least healthy human beings. By a fertile soil is meant one to which Nature’s law of return has been faithfully applied, so that it contains an adequate amount of freshly prepared humus made in the form of compost from both vegetable and animal wastes.” Healthy soil needs the “unpaid labor force of the soil”—microorganisms, earthworms, etc. And it needs good soil structure and aeration. Without these, soil erosion results.

This book opposes the use of chemical fertilizers.

Chapter 2, “The earthworm, notes that in about 1881 the book *Vegetable Mold and Earthworms*, by Charles Darwin was published. It explains the many remarkable and surprising benefits of earthworms. For example, they kill nematodes.

Jerome Irving Rodale lived 1898-1971. Address: Editor, *Organic Gardening* magazine, Emmaus, Pennsylvania.

130. Shepard, Ward. 1945. Food and famine: the challenge of erosion. New York: Macmillan Company. x + 225 p. Plus 16 black and white photos on 8 unnumbered leaves. Illust. Map. Index. 21 cm.

• **Summary:** Chapter 1, “Erosion and hunger,” begins with this question: “Can civilization conquer soil erosion before soil erosion destroys civilization?” This is “one of the most fundamental problems confronting mankind.” The enormous rise in population which resulted from the Industrial Revolution was nourished on the soil of new continents—North and South America, Africa, and Australia. But today there are no new continents to exploit. Although humans think they have conquered, such conquests are always short-lived.

Discusses: Soil conservation. Soil erosion. Ward Shepard lived 1887-1959. Address: Vienna, Virginia.

131. *Lebanon Daily News (Lebanon, Pennsylvania)*. 1946. Personals. July 17. p. 11.

• **Summary:** “Rev and Mrs. James E. Keene, of Avon, left today for Penns Creek, where they will spend a few weeks with their son, Paul K. Keene, and his family, who live on a farm there.”

Note: The farm is named “Walnut Acres.”

132. Keene, Paul. 1946. Re: Renovations at farm in Easton,

Pennsylvania. Letter to Betty Keene (his wife), Avon, Pennsylvania, Sept. 26. 1 p. Handwritten.

• **Summary:** This letter, addressed to “Dearest darling Betty,” discusses the health of their first daughter, Marjorie (referred to by her nickname “Dumper”), the necessity of getting a ration book, his return to Soleil Farm (the name of the farm at Kimberton Farms School?) to pack up their belongings on the previous day, buying fruit & nut trees for their new farm in Easton / Bethlehem, unloading their belongings in Easton, sleeping in the barn, the progress of rebuilding the house, and that he will pick her up when the house (at least the kitchen) is ready—expected to be in October. It is signed “Paul.”

Note 1. Letter (e-mail) from Jocelyn Keene. 2011. Feb. 24. “Though the year is not given explicitly anywhere, I deduce that is 1944 in two ways. (1) In 1945 my mother would have been about 8½ months pregnant. I suspect that this might have been mentioned in the letter somewhere. (2) I looked on a calendar for 1944 and Sept. 26 was a Tuesday and Sept. 28 was a Thursday. It could not have been 1945 which is the other possibility.

“I also deduce that my mother was staying with my father’s parents in Avon. Finally, I deduce that Soleil Farm might have been the name of the farm they lived at when they were at Kimberton Farms School. In fact, scrawled in the margin in shaky handwriting and in different pen is a note saying (Betty still at Soleil farm in Coventryville, near Kimberton). When my father was in his 80’s, he set about annotating letters and documents so as to write up some family history. I suspect this was written at that time. However, the annotation is probably not correct for two reasons: (1) the first letter refers to his trip to Soleil Farm on the previous day to pack up their belongings and (2) the text of the second letter says that my mother’s letter came from Avon and he sent greetings to his parents who were living in Avon.

“Re: Bethlehem vs. Easton. If you look at a map, you’ll see that Allentown and Bethlehem are side-by-side. They are often referred to as the same town. A little further to the east and slightly separate is Easton. I expect that the farm was between Easton and Bethlehem.” Address: Bethlehem or Easton, Pennsylvania.

133. Walnut Acres. 1946. Walnut Acres (Ad). *Organic Gardening* 10(1):63. Dec.

• **Summary:** In the classified ads section under “Organically-grown products” the only entry states: “Organically-Produced Foodstuffs. Our prime concern is the health of our soil, animals and produce. We use no sprays or chemical fertilizers. Several items now available. Your inquiry invited. Paul Keene. Walnut Acres. Penns Creek, Pa” [Pennsylvania].

Note: This is the earliest document seen (March 2020) that mentions Walnut Acres of Penns Creek, Pennsylvania. It is also the earliest ad seen (March 2020) for Walnut Acres

in *Organic Gardening* magazine. Address: Penns Creek, Pennsylvania.

134. Howard, Albert. 1946. *The soil and health*. London: Industrial Christian Fellowship. xi + 307 p. Illust. 22 cm. Reprinted in 1947 in paperback by: Emmaus, Pennsylvania: Rodale Press; New York: The Devin-Adair Co. *

• **Summary:** Agricultural autobiography of the world’s foremost scientist in the field of organic farming. Address: Sir, C.I.E. [Companion of the Indian Empire], M.A., Formerly Director of the Inst. of Plant Industry, Indore and Agricultural Adviser to States in Central India and Rajputana.

135. Sikinger, Maximilian. 1946. *Classical nutrition*. Calabasas, California: Published by the author. 34 p. No index. 19 cm. [Eng]

• **Summary:** This concise little book is about live vegetarian foods, meditation, breathing, sunshine, the creative powers of the universe, and the purpose of our existence. “Classical Nutrition embraces the laws of life and nature to reciprocate in harmony to the highest attainment of health.” On the cover is a photo of Sikinger kneeling on a rock by a stream.

Contents: The goal of civilization and the human race is the preservation of life; simplicity is the fact and staff of life (Eat mostly raw foods. Eat only natural foods. Eat simply, only 1-3 kinds of food at each meal. Eat foods in season. The four principal groups of foods). Protein foods (incl. Soy beans, raw peanuts, garvanza [garbanzo] beans). Carbohydrates. Natural sweets (esp. fruits; white sugar causes poisoning). Hydrocarbons or fats. Food combinations and food combining rules. Minerals: Magnesium, calcium, chlorine, fluorine, hydrogen, iodine, iron, manganese, nitrogen, oxygen, potassium, sodium, silicon, sulphur. Vitamines: Vitamin A, vitamin B complex, vitamine D, vitamine E, vitamine K, vitamine P. Summary. Soil deficiency is life deficiency. Therapeutic fasting.

Gordon Kennedy writes in *Children of the Sun* (198, p. 165): Maximilian was born in Augsburg, Germany, on 5 Feb. 1913. “This unique little book sold thousands of copies and helped to spread the *naturmensch* (natural men and women) ideas to many Americans. A trained masseur, physical therapist, dietary counselor and body builder, Maximilian has worked with the holistic community and continues to lead an active life on his ranch in the Santa Monica Mountains, where he lives with his beautiful wife, Carla.” Address: Calabasas, California.

136. *SoyaScan Notes*. 1946. Chronology of Paul and Betty Keene of Walnut Acres, Pennsylvania (1910-1946). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Chronology: 1910 Oct. 12—Paul Kershner Keene is born in Lititz, Lancaster County, Pennsylvania, the third son of James Edward Keen (1878-1966; formerly

Kühn, of German ancestry) and Nora Mary Kershner (1878-1957). James Keene was a minister in the United Brethren Church and, as a result, his family moved from town to town in southeastern Pennsylvania. Paul lived in Lancaster, Monte Clare and Pine Grove during his early years.

1928—Paul graduates from Pine Grove High School and enrolls in Lebanon Valley College (in Annville, Lebanon County, Pennsylvania) where he majored in math and physics.

1932—He earns a B.A. degree in mathematics.

1932—He enrolls in Yale University (New Haven, Connecticut).

1936—He earns a master's degree in mathematics from Yale, and plans an academic career. 1936-37—He teaches mathematics at Brothers College, Drew University (a private university in Madison, New Jersey, affiliated with the United Methodist Church), eventually becoming head of the mathematics department. Then wanderlust struck.

1938—Applying to the school's Methodist missionary board, he is assigned to the Woodstock School in Dehra Dun, northern India. Woodstock School in Landour, Mussoorie, India—with a two-year teaching contract. Woodstock was a boarding school started many years ago to educate children of all races whose parents were missionaries, business people and government officials. It was begun and run primarily by American and British citizens, and it prepared pupils for entrance to colleges in the United States, Great Britain and Canada.

This time in India (18 months) was pivotal in his life. He taught various subjects, traveled widely, and in 1938 met his wife to be, Enid Betty Morgan, also a teacher at Woodstock, and the daughter of Rev. David Thomas Morgan (1872-1953) and Edith Mannington Morgan (1871-1941), Welsh and English Baptist missionaries, respectively, in India.

During his two years in India, he discovered the work of Sir Albert Howard, founder of the worldwide organic farming movement, and he visited (for a few days) Mohandas K. Gandhi, who lived in a simple mud house at Wardha [in today's Maharashtra state], India. Strolling with Gandhi along a dusty road, Paul asked: "How can a young person best serve humanity and his world?" Gandhi replied: "Ah, my friend, when you return to your home in America, you must give away everything you have... Then you will be free to talk and act. Doors will open for you." Paul later wrote that his teaching work in the USA had come to seem "somehow flat and empty. At unreality about it gnawed at my spirit. Had I become too separated from life at the roots? It was Gandhi—his simple life, his powerful personality, and his philosophy—who inspired me upon return to the States to spend four years studying and learning homesteading and organic food production."

In addition to learning about rural living, agriculture, and nutrition, he also became involved in India's struggle to free itself of British rule. He even talked with Nehru in his

rooms after meetings of the Congress Party.

1940 Jan. 22—Paul and Betty are married in Bangalore, India, in the Ebenezer Baptist Church, where her father is pastor.

1940 March 23—Paul and his bride return to the United States, landing in San Pedro, California, on board the Japanese ship *Tatuta Maru*. He was a different person. The drive across country, sightseeing on the way for a few weeks, then stay with Paul's parents in Avon, Pennsylvania (PA), where Paul's father was pastor.

1940 summer—They live on the farm of a friend, Bill Simpson, in the Catskill Mountains of New York. There they encounter pamphlets by Ralph Borsodi discussing the School of Living.

1940 Sept.—Although mathematics no longer interested him, he taught math and physics for a year (until spring 1941) at Drew University in New Jersey. He tried unsuccessfully to write a doctoral thesis.

1941 spring—The couple (with friends recently returned from India) goes to live at economist Ralph Borsodi's School of Living near Suffern, New York—for almost two years. Paul later recalled: "There we learned organic gardening, flour grinding, bread baking, butter and cheese making, food preserving, weaving, homestead arts and crafts. With a marvelous library we had hundreds of thinkers and doers by our sides as we both theorized and practiced. Here we were paid five dollars a week, plus room and board." Here Paul ran a cooperative store and taught homesteading. Before long they learned about the Threefold Farm in Spring Valley, New York, based on the teachings of Rudolph Steiner. The Keene's began teaching Steiner's principles and composting to their students.

1942 July—Their first child, Marjorie Ann Keene is born in New York.

1943 early—The Keene family moves to Kimberton Farm School (now nonexistent), near Philadelphia where they had two wonderful years of work and study with Dr. Ehrenfried Pfeiffer who had come from Switzerland to direct the school. About 10-15 men and women managed 1,000 acres. Of Dr. Pfeiffer, who is one of the foremost authorities on natural and biodynamic farming, Paul later said, 'he helped bring all of life together for us in a definite coherent pattern.' He also later recalled: "For two more years, to learn full-time farming, we attended Kimberton Farms organic farm school near Philadelphia. Here we learned the use of both horses and tractors as power sources for field-scale growing of crops. Studying under Dr. Pfeiffer from Europe, these were days of revelation in which love of the soil grew into a deep, rewarding, abiding part of our lives. We learned by doing the work on this farm of over one thousand acres, where milk cows, beef cattle and grain and vegetable production were paramount. Of course no chemicals or poisons were ever used. We were paid fifty dollars a month for our labor, and lived rent free in the top story of an ancient,

freezing farmhouse. Nothing seemed really to matter, in our exuberance and sturdiness, as long as we continued to learn who we were!”

1944 Sept.—Paul goes to work on a farm in Easton, R.D. 4, Pennsylvania, to renovate the place so it will provide adequate shelter and a kitchen for Betty and baby Marjorie. The first night there he sleeps in the barn. Betty is about 8½ months pregnant with their next child. Betty and Marjorie stay with Paul’s parents in Avon, Pennsylvania.

1944 Oct.—Betty and Marjorie move to Easton, PA. Here the family lives for more than a year on a farm they rent. After tragic losses there from heavy hail- and rainstorms, they decide to try to locate a farm of their own which is relatively inexpensive.

1945 Oct.—Their second child, Ruth Carol Keene is born shortly after the move to Easton.

1946 May 18—Paul and Betty purchase the first of several farms (as the deed of sale shows). They borrow \$5,000 to buy slightly more than 104 rocky acres (142 acres and 142 perches) and some dilapidated buildings on the walnut-lined banks of Penns Creek, near the tiny crossroads village of Penns Creek, Pennsylvania, about 50 miles north of Harrisburg, PA—the capital of the Commonwealth of PA. The sign at the entrance to the lane said: “Long’s. Walnut Acres. Pigs for Sale.” The lettering was quickly abbreviated to “Walnut Acres.”

In 1988 Paul remembered: “Finally, penniless except for two hundred dollars, a team of horses, an old rusting horse plow and harrow, second-hand furniture, an ancient car, and two small daughters, we were able to get a long term loan [\$5,000] from government sources to purchase our very, very own farm of one hundred acres. Here our feet trod a portion of the earth leased for our lifetimes from the universe, to have and to hold precious and beloved until death do us part.”

“There was no furnace for central heating, no water heater except the kitchen range, no bathroom, no clothes-or-dish washers, no telephone, no refrigerator no freezer, no air conditioner, no T.V. For years we used a cast-iron kitchen range for heating both house and water.” During the winter, the bedroom was freezing cold.

In the Prelude to his book “Fear Not to Sow Because of the Birds,” Paul wrote (p. 3-4): “Since that beginning, things have always come as they were truly needed. A surprised observer, I have been swept along by life as in a miraculous stream.

“I have found that answers do not come by concentrating on one’s own desires or fancied wants or needs. Somehow, by seeking out the larger framework, as Gandhi did, one rises here and there above the choking limits of self into a freer, fresher atmosphere, to where one simply sees farther, through an expanded, more beautiful landscape.”

“In our chosen work we have been greatly upheld by life. Had we known beforehand what lay ahead we would

have been scared to death. But nature kindly keeps our destinies from us. One grows but gradually into one’s future.”

137. *SoyaScan Notes*. 1946. Chronology of Paul and Betty Keene of Walnut Acres, Pennsylvania (1946 to 2011). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Continued: 1947 fall.—Abundant apple harvest. They make Apple Essence in a big iron pot. A jar finds its way to food writer Clementine Paddleford, who sings its praises in both the *New York Herald Tribune* (1-3 Sept. 1947) and *Gourmet* magazine (Nov. 1947).

1949 Feb.—Their third child and last (and 3rd daughter) Jocelyn Betty Keene is born in Pennsylvania.

1949—The first stone mill is purchased and set up in a converted brooder house.

1950s—Interest in Walnut Acres increases and with it comes modest prosperity. Draft horses are replaced by a Ford 9N tractor.

1954—Paul helps to found the Pennsylvania chapter of the Natural Food Associates, based in Atlanta, Texas—the headquarters of America’s first natural foods movement.

1956 April—Walnut Acres runs a 1/6 page ad in *Natural Food and Farming*—a sign of growing prosperity.

1958—The huge old dairy barn is converted to a grinding mill and modern store.

1961 Oct.—An excellent feature (5-page) article, “The Story of Walnut Acres,” by Ethyl DeLoach, is published in *Natural Food and Farming*. At this time, Walnut Acres has 20 employees, seven mills, all of the grain sold is raised on the farm. Only one crop is harvested from any particular field every two years. More than 10,000 customers order Walnut Acres’ food by mail order.

1961 Nov.—Walnut Acres runs a full-page ad in *Natural Food and Farming*—a sign of even more prosperity.

1964-65—A new wing for a mill and refrigerated storage is added, along with a cannery, freezer room, office and new retail store.

1964—Paul and Betty Keene create the Walnut Acres Foundation to further their commitment to the community and the world. Over the years, many thousands of dollars were collected through the generosity of Walnut Acres customers and friends. Two projects became the foundation’s primary focus: the Walnut Acres Community Center and the Family Village Farm, an orphanage in South India, where the foundation built several dormitories and classrooms and finally, in 1990, a large auditorium dedicated to the memory of Betty Keene.

1971—Paul is awarded Susquehanna University’s first Distinguished Citizenship Award.

1972—More storage, a huge kitchen, and an even bigger retail outlet are added. The farmland now totals 360 acres. “Unbeknownst to the Keenes, their unassuming farm at Penns Creek was also producing a totally unexpected crop—

new organic farmers” (DeVault 2006).

1976–He is presented with an Honorary Doctor of Science degree from Lebanon Valley College.

1980s–Financially, Walnut Acres enjoys its best decade ever.

1980s mid–Paul begins to experience the initial symptoms of what would later be diagnosed as Alzheimer’s disease. He begins to withdraw from the business. His middle daughter, Ruth, and her husband Bob Anderson, increasingly manage the business. “Despite annual sales of \$10 million, Walnut Acres was not prospering and growing as other organic food companies were” (DeVault 2006). Betty’s health also began to deteriorate rapidly, from a genetic condition named Alpha 1 Anti-trypsin Enzyme Deficiency.

1984–He is awarded the Community Partnership Award from Gov. Richard Thornburgh.

1986–Paul receives a citation from the Pennsylvania House of Representatives.

1987 May 28–Betty Keene dies in Lewisburg, Pennsylvania. Paul is devastated by her death. He writes a long a very eloquent farewell tribute to her, which is published in the Walnut Acres catalog.

1987 June–The small farm has grown into a big business, according to a long article by Sally Moore in the *New York Times* (June 10). After 41 years Walnut Acres grosses (has sales of) \$4 million a year. Although there is a retail store on the premises, most sales are by mail via their catalog, which includes product descriptions, menus, recipes, and a folksy message from Paul–whose puckish good humor and boundless energy belie his 76 years.

1988–*Fear Not to Sow Because of the Birds: Essays on Country Living and Natural Farming from Walnut Acres*, a collection of essays written by Paul from 1949 through 1986 is published by Globe Pequot Press (Connecticut; viii + 151 pages + 16 pages of photos). These essays were first published in the popular Walnut Acres catalog sent to mail-order customers.

1990s–The demand for organic foods explodes in the United States, with sales climbing by 20% a year.

1995–Major article on Walnut Acres in *US News & World Report*, titled “Pure & Unadulterated,” by Kerry Hannon. By 1994 Walnut Acres was offering 350 products and had annual sales of almost \$8 million.

1998–The Organic Trade Association presents Paul with the Organic Leadership Award.

1999 March–David C. Cole, the former president of America Online’s internet services, buys a controlling interest in Walnut Acres. He soon invested \$4 million to increase Walnut Acres’ online presence.’

2000 March–David Cole buys the rest of Walnut Acres. That same month, the dot-com bubble peaks then quickly bursts (goes bust).

2000 April–Mark Rodriguez is made the new CEO of

Walnut Acres. That month Rodriguez establishes Acirca, Inc., a venture capital-financed packaged goods company targeting the rapidly growing world market for organic food and beverages.

2000 June 20–Cole sends out news releases announcing the end of Walnut Acres. Catalog operations are suspended June 23. Then he quickly (and ruthlessly) closes Walnut Acres, keeping only the brand name.

2000 Aug. 19–Walnut Acres’ facility at Penns Creek is officially closed. The entire workforce at Walnut Acres–more than 100 people–is thrown out of work by the new owner, David Cole. A sign on the farm reads: “America’s Original Organic Farm.” The shelves are filled with organic foods and crops are standing in the fields.

The sudden, tragic end of Walnut Acres was a traumatic time for the three Keene children, and particularly for Ruth (the middle daughter). She had to locate as many of the family’s personal belongings (papers, letters, catalogs, mementos, etc.) as she could, bundle them into boxes, and store them wherever she could find space–before everything was sold at auction or thrown out.

2001 Feb. 15–Walnut Acres and all its property is sold at auction–a very sad day; 40-50 former employees attend. 27-page auction catalogs break Walnut Acres into 681 lots to be sold to the highest bidder. The auctioneer begins by offering the entire business–land, building, contents–for one lump sum. No one will bid even \$200,000. For the real estate (land) alone, no one will pay \$100,000.

2003 June 17–The Hain-Celestial Group, Inc. buys Acirca, Inc., including the Walnut Acres “brand” soups and salsas, for an estimated \$13.5 million. It was a small price to pay (DeVault 1966).

2005 April 23–Paul Keene dies at the Messiah Village Nursing Home (100 Mt. Allen Drive, Mechanicsburg, Cumberland County, Pennsylvania; not far from Penns Creek), where he had resided for the last four years of his life. A service celebrating Paul’s life was held on April 29 Emmanuel United Church of Christ, Penns Creek. Private burial was in Penns Creek Union Cemetery.

138. *Food Industries*. 1947. Court reverses OPA [Office of Price Administration] on Deaf Smith flour. 19(2):211. Feb. • **Summary:** The United States Emergency Court of Appeals recently ruled that Vitamin Products Co. (Milwaukee, Wisconsin) had not violated OPA ceiling prices by selling whole wheat flour, made from wheat grown in Deaf Smith County, at prices higher than the prices established by OPA for ordinary whole wheat flour. The court based its ruling on the widespread opinion that Deaf Smith flour is more costly to produce, has always sold at higher prices than ordinary whole wheat flour, and is recognized by many physicians as beneficial in prescribed cases of malnutrition.

Note: Deaf Smith is a county in northwest Texas, known for its rich, fertile farmland. The county was named

for Erastus “Deaf” Smith (1787-1837), a partially-deaf scout and soldier who served in the Texas Revolution. In 1960 Frank Ford was one of the founders of Arrowhead Mills in Hereford, the capital of Deaf Smith County, Texas. Starting in the early 1970s, Arrowhead Mills became an important company in the Natural Foods and Organic Foods movements in the United States.

139. Rodale, J.I. 1947. With the editor: Cancer bill (Editorial). *Organic Gardening* 10(3):10-11. Feb. .

• **Summary:** “In the last Congress there was submitted a bill No. S. 1875 ‘to authorize and request the President to undertake to mobilize at some convenient place in the United States an adequate number of the world’s outstanding experts, and coordinate and utilize their services in a supreme endeavor to discover means of curing and preventing cancer.’ The bill provided for an appropriation of one hundred million dollars to enable the President to carry out the provisions of this act. It did not pass. But the hearings in reference to the proposed legislation conducted by Senator Claude Pepper brought to light the astounding fact that a Dr. Max Gerson of New York City had developed a cure for cancer by means of diet.

“Dr. Gerson brought five persons to the hearing; cases of advanced cancer that were abandoned by the medical profession, whom he cured by a special diet. If you are interested in it send 35¢ to the Government Printing Office, Washington, D.C. for a copy of the transcript of the hearings. The idea that cancer could be even remotely connected with food intake has always been repulsive to the medical profession. In fact their approach has been exclusively from the curative angle. To prevent cancer in the first place is relegated by them to the same classification as seeking perpetual motion. They just simply don’t think that way.

“If you get a copy of the Government booklet you will be amazed to see a statement by Dr. Gerson on page 98 in which he imputes part of the blame for cancer on the use of chemical fertilizers. He says: ‘The fundamental damage starts with the use of artificial fertilizer for vegetables and fruits as well as for fodder. Thus the chemically transformed vegetarian and meat nourishment increasing through generations, transforms the organs and functions of the human body in the wrong direction. Another basic defect lies in the waste of excrements of the cities. Instead of returning the natural manure to the fruit-bearing soil, it is led into the rivers, killing underwater life. The natural cycle is interrupted and mankind has to suffer dearly for the violation. Life in forest and wilderness should teach us the lesson.’ I am sure this sounds somewhat familiar to the average *Organic Gardening* reader. According to the facts brought out in the hearing, there are big people behind Dr. Gerson, including the famous radio commentator Raymond Gram Swing.” Address: Editor.

140. Pfeiffer, Ehrenfried. 1947. The living soil. *Organic Gardening* 11(1):16-19. July.

• **Summary:** “The soil on which we walk and which we plow and cultivate for food is full of life. Not only is its mineral matter mixed with organic matter deriving from roots, decomposing animal and plant bodies, but there is a perpetual process of life going on performed by the plant and animal microbes in between the particles of the mineral matter. The maintenance of this life process is the chief concern of the organic gardener.

“In fertile soil, for instance a good pasture or alfalfa field, one to two million earthworms per acre produce about 40,000 lbs. of neutral colloidal humus annually. To our readers it is a well-known fact that the earthworm castings are extremely rich in all nutriments, richer than the surrounding soil, especially in nitrates, phosphates and calcium. It is through the earthworm we know how to hunt up the hidden resources of the topsoil as well as of the deeper layers of the subsoil (down to 6 ft.) and make this storage available for plant growth. Earthworm castings also teem with bacteria.

“Bacteria in their turn support the humus forming process. There are manifold species with many tasks. Some are helpful, some not. Nitrogen-fixing bacteria, for instance, are most beneficial, for they transform other nitrogen compounds and atmospheric nitrogen into nitrates, the most stable form of nitrogen in the soil, humus or compost.” Address: Dr. (Honorary), USA.

141. Rodale, J.I. 1947. Organic matter inhibits plant disease (Editorial). *Organic Gardening* 11(1):12-15. July.

• **Summary:** “An intensely interesting booklet has been issued by the Connecticut Agricultural Experiment Station (Bulletin 500) dated November, 1946, called “Physiology of Fusarium Foot Rot of Squash,” written by George A. Gries. It proves irrefutably that there is a definite connection between disease in the plant and organic matter in the soil...” Address: Emmaus, Pennsylvania.

142. Rodale, J.I. 1947. Should the U.S. government go into the chemical fertilizer business? (Editorial). *Organic Gardening* 11(2):12-13. Aug.

• **Summary:** “The U.S. government already has a foot-hold in that business, but it wants to get into it deeper.” Bills are working their way through the Senate and the House. Address: Emmaus, Pennsylvania.

143. Paddleford, Clementine. 1947. 2 amateur wine makers send Maryland product to New York. *New York Herald Tribune*. Sept. 3.

• **Summary:** “Apple essence—Something good came our way from Walnut Acres, a 400-acre farm located in the beautiful Penns Creek Valley near Lewisburg, Pa. [Pennsylvania]. We mean a dark brown spread called apple essence, made by an

adaptation of an old Pennsylvania Dutch apple butter recipe.”

To make it: Carefully select 10 bushels of the finest unsprayed apples. Wash, then press them to make 27 gallons of sweet apple juice, and let it stand for one day.

During this time, select 4 more bushels of the finest unsprayed apples, slice them and remove any undesirable parts, but leave the skins on and the seeds in. Turn these into apple sauce, then strain by pressing through a colander (semi-mechanical) to remove the seeds.

At 6 a.m. on the cooking day build a wood fire under an old-fashioned 30-gallon cooking kettle. Pour in the cider, light the fire, and stoke it until it is roaring. Boil the apple juice down to half its original volume. Add the apple sauce and stir constantly for about six hours using a wooden stirrer with a ten-foot handle. Then add old-fashioned dark brown sugar, using one-half pound per gallon. Then sample to determine the proper consistency. By 5 p.m. (using a sterile spoon) have all the apple essence in pint or quart glass jars, in which it should keep indefinitely. The yield is 14 gallons from 14 bushels of apples.

“One quart weights approximately two and one-fourth pounds. Shipping weight is four pounds per quart and three pounds per pint. Into that quart has gone approximately one-fourth bushel of good organic apples and one man-hour of labor. Price per quart is \$1, and 55 cents for a pint. Four or more quarts are 90 cents a quart, postage pre-paid to the third zone.”

“Organic Farmers—The apple-butter makers are Paul and Betty Keene, who operate a diversified farm selling eggs, butter, cornmeal, wholewheat flour, other items too, by the long arm of the mail man. The essence is but one money maker on their selling program but an important one in good apple years. The Keenes use only natural farm practices such as contouring, strip cropping, letting the land lie under grass. They use no chemical fertilizer sprays or dust. It’s nature’s own balance they seek for the land and the product.

The Keenes produce most of their own foodstuffs and all the feed for their livestock. They grind their own wheat, make their own bread and butter, cure their own meats—a self-sufficient unit, composed of the Keenes, their two little girls and grandpa Morgan.”

Note 1. The title of this two-column article is unrelated to the section about “Apple essence,” which begins near the top of the right column.

Note 2. Clementine Paddleford lived 1920-1967. For an archive of her personal papers see: <http://www.lib.k-state.edu/depts/spec/findaids/pc1988-19.html>

144. Howard, Albert. 1947. The animal as our farming partner. *Organic Gardening* 11(3):17-19. Sept.

• **Summary:** “In Nature, animals and plants lead an interlocked existence. The connection could not be closer, more permanent, or more crucial.” Address: Sir.

145. Pfeiffer, Ehrenfried. 1947. Fermentation versus putrefaction and decay. *Organic Gardening* 11(3):22-26. Sept.

• **Summary:** The two processes are completely different. Address: Dr. (Honorary), USA.

146. Rodale, J.I. 1947. A visit to a famous physician [Max Gerson] (Editorial). *Organic Gardening* 11(3):14-16. Sept.

• **Summary:** “In the February, 1947 issue of this magazine there appeared an article regarding the sensational work of Dr. Max Gerson in curing cancer cases by diet.

“When this article appeared, one of our readers who had an advanced case of cancer went under the care of Dr. Gerson and was so impressed with what was going on in that office, that he wrote me a series of enthusiastic letters, urging me to come and talk with Dr. Gerson. In one of them he said that ‘Dr. Gerson is literally snatching people from the grave.’ He had many interesting conversations with cured cancer ‘cases’ that were coming back for check-ups. What finally impelled me to visit Dr. Gerson was a statement he had made in the cancer bill hearing at Washington [DC] that ‘the fundamental damage starts with the use of artificial fertilizer for vegetables and fruits as well as for fodder...’ Address: Emmaus, Pennsylvania.

147. Howard, Albert. 1947. Labour saving in compost manufacture. *Organic Gardening* 11(4):15-16. Oct.

• **Summary:** Describes in detail the method that has been developed at Iringa in Tanganyika by Mr. J.E. Macnarty-Snape. Address: Sir, C.I.E. [Companion of the Indian Empire].

148. Pfeiffer, Ehrenfried. 1947. A cry for natural food. *Organic Gardening* 11(4):21-25. Oct.

• **Summary:** “Biodynamic and organic gardeners have known, for more than 15 years, that diseases in soils and plants do not spread as much as they would otherwise if rotted and composted manure and plant material are applied. They have also known that malnutrition does not occur in a living soil fertilized with neutral humus and enriched with organic matter. In a balanced soil nematodes, for instance, are beneficial and do not become malignant and attack roots. Plants develop resistance. All future research ought to concentrate upon these questions of the natural health and resistance of a balanced soil. Then one would discover—which at present is known only by some practicing farmers and gardeners—that humus building organic methods are preventive medicines We should go out, not to kill, but to heal.”

“The pressure sprayer or tankwagon has become a ‘must’ in growing ‘healthy’ crops. Recently the chemical fight against weeds has been added.” Today the “really ‘advanced’ gardener and fruit grower has of necessity become a kind of chemist in the chemical warfare against

pests and diseases.”

But our soil, the foundation of plant growth, has become ill too. Address: Dr. (Honorary), USA.

149. Rodale, J.I. 1947. The Rodale diet (Part I) (Editorial). *Organic Gardening* 11(4):12-14. Oct.

• **Summary:** Despite Rodale’s ongoing campaign against the use of strong chemical fertilizers, it will be a long time before “appreciable amounts of organically-grown foods are available generally in the public markets.”

So here are some crops that do not require such fertilizers: Kelp, mushrooms, coconut, water-cress, Indian nuts (pinyon pine nuts), lychee nuts, berries, palm cabbage, wild rice, and the meat of wild game (such as deer). (To be continued). Address: Emmaus, Pennsylvania.

150. Rodale, Robert. 1947. Pesticides prove detrimental to plant health (Editorial). *Organic Gardening* 11(4):31. Oct.

• **Summary:** “In an article in the March-April issue of Farm and Home Research published by the Ohio Agricultural Experiment Station at Wooster, Ohio the detrimental effect of several of the newer pesticides on plants was shown by giving the results of experiments involving the use of both insecticides and fungicides. These experiments strengthened the case against poisonous sprays as destroyers of the fertility of the soil by showing that their application hinders plant growth. Cucumbers, potatoes, and tomatoes were experimented on in the greenhouses of the station.

“Of all the insecticides used on cucumbers, the inorganic ones such as DDT, Methoxy, and Rothane caused much stunting and even death of some of the treated plants while those prepared from plant sources such as Sebacide, Derris, Ryanex, and Pyrocyde, caused less injury in comparison.” Address: Emmaus, Pennsylvania.

151. Howard, Albert. 1947. How to avoid a famine of quality. *Organic Gardening* 11(5):15-19. Nov.

• **Summary:** Western Civilization is suffering from a new and subtle type of famine—a famine of poor quality food. This can be seen, in part, in the UK, with the steady growth of dental problems. We must realize that our most important crop is a race of healthy human beings—not so many bushels of low-quality wheat. Address: Sir. Editor of Soil and Health.

152. Keene (Paul). 1947. Foodstuffs (Ad). *Organic Gardening* 11(5):63. Nov.

• **Summary:** In the “The Trading Post” section of classified ads, under “For sale” (at far lower left) we read: “Foodstuffs—Root crops, acorn squash, tomato juice, apple juice, apple butter, honey, dressed chickens and goose. Organically raised on our own farm. Absolutely no sprays, dusts or chemicals used. Write for Information. Paul Keene...”

Note: Walnut Acres is not mentioned. Address: Penns Creek, Pennsylvania.

153. Paddleford, Clementine. 1947. Food flashes. *Gourmet*. Nov.

• **Summary:** “Blustering, warm-hearted November is a superior month in which to be thankful.” “Thanksgiving is the great day, the dinner its mainspring.”

“Thanksgiving turns thoughts to the foods stemming from old-fashioned kitchens. Such a one is apple essence, a dark-brown spread typical of the Pennsylvania Dutch apple butter known fifty years ago. The essence is made with freshly milled cider with the finest of apples. One cooking requires twenty-seven gallons of fresh cider pressed from ten bushels of apples. Four bushels of apples are sliced, these cooked with skin and seeds, then strained to make a purée which is added to the boiled cider; one bushel of apples is needed to make a gallon of spread.”

“Making a fourteen-gallon batch of the essence is a day-long job. By six in the morning a wood fire is roaring under the old-fashioned thirty-gallon kettle in which the cider is waiting. This is boiled down to half its original quantity, then the applesauce added and for six hours the mixture is stirred, and constantly, by means of an old-time wooden paddle with a ten-foot handle. After that the sugar is added, for this the dark-brown, a half pound per gallon. Then the sampling begins to determine the proper consistency. By late afternoon the essence is finished and packed into glass jars to keep indefinitely, if given the chance. The essence has a tart, spicy flavor, yet sweet enough too, made so by the natural sweetness of the cider. The price is \$1 a quart; 55 cents a pint. Buy four or more quarts and the price is 90 cents each, postage prepaid to the third zone. Make checks payable to Paul K. Keene, Walnut Acres, Penns Creek, Pennsylvania.

“The Apple Essence makers, Paul and Betty Keene, operate a diversified farm, selling their produce by the long arm of Uncle Sam’s mailman. Here’s their latest price list, in 5-pound packages: yellow corn meal, 80 cents; whole yellow soy beans, 75 cents; whole wheat, 75 cents; whole-wheat cereal, 80 cents; whole-wheat flour, 85 cents.”

154. Pfeiffer, Ehrenfried. 1947. Organic soils versus mineralized soils. *Organic Gardening* 11(5):20-23. Nov.

• **Summary:** “There is a little confusion in terminology that must be cleared up before entering our subject: ‘Why Are Fertilizers Fertile?’” Address: Dr. (Honorary), USA.

155. Rodale, J.I. 1947. The Rodale diet (Part II) (Editorial). *Organic Gardening* 11(5):11-13. Nov.

• **Summary:** “In the last issue of this magazine I began a preliminary discussion of the Rodale Diet, which is an attempt to find foods that are more or less available to the general public, and which are normally grown without the aid of the strong chemical fertilizers. I listed salt water fish, kelp, mushrooms, cocoanuts, water-cress, Indian nuts (of the pinyon pine), lychee nuts, mulberries, huckleberries,

sometimes raspberries and blackberries, palm cabbage in Florida, wild rice and wild game.”

In this issue Rodale adds cranberries, maple syrup, honey, nuts, and pecan. Address: Emmaus, Pennsylvania.

156. Rodale, J.I. 1947. Solicitation of members for The Soil and Health Foundation (Editorial). *Organic Gardening* 11(5):14. Nov.

• **Summary:** “For a long time it has been felt that a scientific study of the relationships between soil, farm practices, and health should be made. Although there are many indications that artificial fertilizers are detrimental to the soil and to human health, sufficient data to prove these claims to the satisfaction of soil scientists are not yet available. At last a non-profit Foundation has been organized to make scientific studies of soil and health interrelationships. It is called the “Soil and Health Foundation” with headquarters at 46 South West Street, Allentown, Pennsylvania. The announced purposes for which this Foundation has been organized and incorporated are:

“(a) To promote, foster and encourage the use of humus and other organic matter in order to maintain and improve soil fertility, to prevent soil erosion and improve the health of man.

“(b) To conduct, engage in, foster and encourage scientific research and study and teaching, training, informing and educating the public, on and concerning the soil, foods and health of man—and their relation to each other.

“(c) To study the effects of organic and artificial fertilizers on soil, plants, animals and man.

“(d) In order to accomplish the foregoing purposes to establish, use, maintain and operate farms, schools, laboratories, experimental stations, publishing houses and all other appropriate agencies, means and instrumentalities.” Address: Emmaus, Pennsylvania.

157. Pfeiffer, Ehrenfried. 1947. Trace elements—Boron, molybdenum, cobalt, iodine. *Organic Gardening* 11(6):24-27. Dec.

• **Summary:** “Of all the trace elements, boron is one of the most important and interesting.” Only tiny amounts are needed. Address: Dr. (Honorary), USA.

158. Rodale, J.I. 1947. Sir Albert Howard—In memoriam (Editorial). *Organic Gardening* 11(6):10-12. Dec.

• **Summary:** Sir Albert Howard, C.I.E., M.A. Died October 20, 1947. Honorary fellow of the Imperial College of Science. One-time Director of the Institute of Plant Industry, Indore. And Agricultural Adviser to States in Central India and Rajputana.

A large portrait illustration (p. 10) shows Sir Albert Howard.

“On October 20th the sad news came across the cables that Sir Albert Howard had quietly passed away that morning

of a heart attack suffered at his home in Blackheath, nine miles from London, at the age of 74.

“It is deeply distressing to think that the leader of the organic farming movement is no more, that he who has won international fame for his labors in the interests of the soil will soon be laid to rest in that same brown soil which was the passion of his life. It is still incredible that the man from whom we heard in every mail, whom we plied with a thousand questions and whose magnetic personality and deathless friendship were felt in every sheet and envelope he sent, has passed from the scene. Although he had continued to work unremittently until his last moments and had seemed to be in good health, it is certain that the trying conditions with which he, like all his fellow Britishers, had been coping in these recent years [World War II] had been insidiously undermining his vigor.

“Circumstances and conditions militated against the Howards’ acquisition of a place large enough to produce their own, food, which, had they been able to achieve, would undoubtedly have meant the prolongation of Sir Albert’s life. Food being scarce in England, friends on this side occasionally sent packages to the Howards, a mere token endeavor to help. Still, he lived beyond the Biblical allotment of three-score years and ten.

“It is one of the insolaceable regrets of my life that I never had the honor of meeting Sir Albert personally. Yet I feel that our relations have been as close as if we had had weekly meetings in the intimate sessions of personal friends. We needed only to ask a favor of each other to find it done. Sir Albert would search in the second-hand stalls of London bookshops in which to find some rare book of which I had need. Recently he undertook the task of obtaining some photographs from the Royal Geographical Society for a book which I am engaged in writing. On our side, we filled the need of Sir Albert for books and bulletins. We were like inseparable, inveterate friends.

“I was frequently delighted by Sir Albert’s copious use of American slang in his personal letters to me. Sir Albert’s honesty and flexibility always inspired in me the most profound respect and veneration. He had developed the Indore method of making compost over a period of thirty years in India and attained world-wide fame because of it. One would imagine that he would have ardently preserved and doggedly fought over its every tenet, every split hair of its principle. Yet, when we discovered on this side of the ocean that the two turnings of the compost could be eliminated by employing earthworms for that purpose, he applauded heartily, reprinting in his publication, *Soil and Health*, our article describing that method. On other occasions, too, he zealously exhibited the same totally dispassionate and altruistic interest in contributions by others to his own life’s purpose and project.

“With his scintillating spark of genius and that paramount ability of leadership in his field, he corresponded

with people all over the world, seeing the seeds of his work planted in New Zealand, Australia, Rhodesia, Palestine, India, Central America, Canada, the United States and many other countries where organic farming societies are now flourishing. He answered hundreds of letters every month, promptly and with exemplary thoroughness. Through my knowledge of him there were dozens of persons in the United States who maintained a steady correspondence with Sir Albert. It was a strenuous program for a man of 74, and demanded that he give unstintingly of his time, his energy, and his money.

“He fought the chemical companies, the college professors, and all the vested interests that placed considerations of financial profit ahead of the welfare of man and that of the soil. Fearing no one, he gave others the courage to fight, himself setting the example and the pattern. A strong and stalwart bulwark, defender of the soil, he tilted intrepidly with the chemical dragons. He had a kind of picturesque grandeur and strength that commanded the admiration and respect of friend and foe. From his own richly metaphor-laden language comes the opprobrious phrase, ‘devil’s dust,’ with which he dubbed chemical fertilizers.”

“Sir Albert Howard, the world salutes you! The world, both its great and its pitiable common men who must resign their sad lives to a long oblivion as they chant to Mother Earth their immemorably pathetic plaint, *te mori-turi salutamus*. Your memory, however, will be forever green. Your accomplishments will go down through the ages, your spirit haloed with un-dimming brilliance.” Address: Emmaus, Pennsylvania.

159. Rodale, J.I. 1947. The Soil and Health Foundation (Editorial). *Organic Gardening* 11(6):31. Dec.

• **Summary:** Sir Albert Howard’s death puts a big responsibility on *The Soil and Health Foundation*. Sir Albert unquestionably was the father of the organic agricultural movement. To him the world owes a big debt, for it was he who first detected the pathetic fallacy of present day chemical fertilization, and through sheer force of determination spread his philosophy far and wide.

“His death thrusts a new urgency upon the infant Soil and Health Foundation, for now we in America must take the lead. To us has fallen the task of finishing what Sir Albert so ably began, fighting to victory a battle against the unnatural methods that are ruining soil and begetting degenerative diseases.”

Note: In 1947, J.I. founded the Soil and Health Foundation, later to be renamed Rodale Institute. As of March 2020 it is still active. The Rodale Institute has been called “the birthplace of organic agriculture in North America. For more than 60 years it has scientifically researched, documented and shared the benefits of organic food for human and environmental health. Set on 333

acres in Kutztown, Pennsylvania, the nonprofit farm offers comprehensive programs serving a range of people, from farmers to educators to community leaders to gardeners to children.

“The Rodale Institute is a research farm, conducting carefully monitored experiments to determine the best growing practices for organic agriculture. It is an educational institution, sharing its findings with people around the globe.” Address: Emmaus, Pennsylvania.

160. Howard, Albert; Howard, Louise E. 1947. *The soil and health: Farming and gardening for health or disease*. Emmaus, Pennsylvania: Rodale Press; New York: The Devin-Adair Co. xi + 307 p. Illust. 22 cm. Previously published as *Farming and Gardening for Health and Disease* (1945).

• **Summary:** A classic in the field of farming, soil and disease. Contents: Preface (by Howard). 1. Introduction: An adventure in research.

Part I: The part played by soil fertility in agriculture. 2. The operations of nature: The life of the plant, the living soil, the significance of humus, the importance of minerals, summary. 3. Systems of agriculture: Primitive forms of agriculture, shifting cultivation, the harnessing of the Nile, staircase cultivation, the agriculture of China, the agriculture of Greece and Rome, farming in the Middle Ages. 4. The maintenance of soil fertility in Great Britain. 5. Industrialism and the profit motive. 6. The intrusion of science: The origin of artificial fertilizers, the advent of the laboratory hermit, the unsoundness of Rothamsted, artificials during the two world wars, the shortcomings of present-day agricultural research.

Part II: Disease in present-day farming and gardening. 7. Some diseases of the soil. 8. The diseases of crops. 9. Disease and health in livestock. 10. Soil fertility and human disease. 11. The nature of disease.

Part III: The problem of fertilizing. 12. The origins and scope of the problem. 13. The Indore Process and its reception by the farming and gardening worlds. 14. The reception of the Indore process by the scientists.

Part IV: Conclusions and suggestions. 15. A final survey. Appendices: A. Progress made on a tea estate in North Bengal. B. Compost making in Rhodesia. C. The utilization of municipal wastes in South Africa. D. Farming for profit on a 750-acre farm in Wiltshire with organic manures as the sole medium of fertilization.

Note: Great attention must be given to: Soil fertility, return of all agricultural wastes to the land, humus, mycorrhizae. The health of humans depends on the fertility of the soil.

Sir Albert Howard lived 1873-1947. The title page states: He is also author of *An Agricultural Testament*. “Honorary Fellow of the Imperial College of Science. Formerly Director of the Institute of Plant Industry, Indore,

and Agricultural Adviser to states in Central India and Rajputana.” His wife, Louise Ernestine Howard was born in 1880. Address: Sir, C.I.E. [Companion of the Indian Empire], M.A., Formerly Director of the Inst. of Plant Industry, Indore and Agricultural Adviser to States in Central India and Rajputana; 14 Liskeard Gardens, Blackheath, London S.E. 3, England.

161. Pfeiffer, Ehrenfried. 1947. *The earth’s face and human destiny: Landscape and its relation to the health of the soil.* Emmaus, Pennsylvania: Rodale Press. 183 p. Foreword by Sir John Stapledon. Illust. (61 black and white photos). Index. 23 cm. [85 ref]

• **Summary:** Contents: 1. An introduction. 2. Landscapes. 3. Problems of the plain. 4. Problems of the mountains. 5. Problems of the woods. 6. Urban civilization, industry and the landscape. 7. Park and garden, beauty and utility. 8. Some basic biological principles [fascinating!]. 9. Our past, present and future shaping of environment. 10. Landscape consciousness and man’s responsibility.

A brilliant book by a great biologist and soil scientist, as relevant in 2011 as it was in 1947.

J.I. Rodale, founder, editor and publishing of *Organic Gardening* magazine, described this book as follows (Dec. 1946, p. 52): “Nothing is so stimulating as a look at the earth’s surface as a whole. The total life of a region is commonly referred to as a landscape. Dr. Pfeiffer discusses the landscapes of the earth in relation to the geological and biological forces which have been responsible for them. Beauty may be defined as harmonious expression. A beautiful landscape is biologically sound. When we upset Nature’s balances and expose the earth’s face to destructive forces we destroy beautiful landscapes and convert them into something artificial and ugly. This book deals with healthy and diseased landscapes through all phases of their deterioration or improvement—problems of the plain, the mountains, the woodlands, and the parks and gardens. Man has been more destructive to the earth’s face than almost any geologic agent, and he must be constructive in shaping his environment or it may become a barren wasteland.”

Ehrenfried Pfeiffer lived 1899-1961. Address: M.D. (Honorary), Chester, New York; Director Bio-chemical Research Lab., Dornach, Switzerland.

162. Rorty, James; Norman, N. Phillip. 1947. *Tomorrow’s food: The coming revolution in nutrition.* New York, NY: Prentice-Hall, Inc. xiv + 258 p. Foreword by Stuart Chase. Index. 21 cm. 2nd ed. 1956. [19 ref]

• **Summary:** Contents: Part I: The quest for health. 1. Give us this day [our daily bread that brings health]. 2. The good doctors of Cheshire [and their revolutionary declaration linking diet and health]. 3. The healthy Hunzas. 4. Dentist’s holiday (Weston A. Price of Cleveland, Ohio).

Part II: What’s wrong with American food? 5. What

happened to the America diet? 6. The lesson of draft rejections. 7. Better food makes better babies. 8. Food and the aging process. 9. The broken staff. 10. American bread is “enriched.” 11. Sugar: Bottleneck of nutritional policy. 12. Can science resolve the sugar dilemma? 13. Milk, butter, and margarine. 14. Let ‘em eat pills. 15. Where do our food habits come from?

Part III: The tools of liberation. 16. Research magnificent. 17. Agricultural heretics and evangelists. 18. We can double our food production. 19. The revolution in food processing. 20. Streamlining distribution and labeling. 21. TVA: Pilot plant of plenty and health.

Part IV: The consumer’s job: Putting the tools to work. 22. Wanted: Another Harvey W. Wiley. 23. The advantages of being blitzed. 24. Food, planning, and the scientist. 25. Can the co-ops do the job? 26. How about free food? 27. Taking hunger out of history: The global task.

Appendix I: How to eat sensibly without vitamin charts. Appendix II: Bibliography of recommended books.

Chapter 17 discusses: Goethe, Rudolf Steiner, biodynamics, and Ehrenfried Pfeiffer. Address: 2. M.D.

163. Pfeiffer, Adelheid. 1948. *Homemade bread—the staff of Life.* *Organic Gardening* 13(1):28-31. July.

• **Summary:** Read this article! It is too beautiful and subtle to summarize. Why doesn’t someone start making this delicious and nourishing bread today? To learn more, see Baldwin Hill Bakery, 15 Baldwin Hill Rd., Phillipston, Massachusetts.

“The art of making good bread has been lost. In order to produce a good homemade bread the first thing, therefore, is to secure a whole wheat or whole rye flour. By ‘whole’ we mean that everything which has been in the original seed kernel of the wheat or rye is still in the flour, the bran and everything, nothing taken away from it. Only from such flour can we really obtain a nourishing bread. Proteins and the vitamins, for instance, stick to the inside of the outermost layer around the grain, if we remove the bran there is not much of anything left in the white flour...” The wheat should be organically grown, then ground slowly in a stone mill so the flour does not heat up too much.

Note: Adelheid Pfeiffer is the wife of Ehrenfried E. Pfeiffer—of biodynamic farming and gardening fame. They have a son Christoph and a daughter Wiltraud. At about this time they lived on their farm at Chester, New York. Address: USA.

164. Pfeiffer, Ehrenfried E. 1948. *Basic ideas of the Indore and biodynamic methods.* *Organic Gardening* 13(1):19-23. July.

• **Summary:** “Rudolf Steiner was the founder of Anthroposophy, a philosophy which acknowledges the primacy of spirit over matter.”

“Sir Albert Howard’s Indore Composting Method and the Biodynamic Method of Dr. Rudolf Steiner have

much in common. Both methods aim to improve the soil by increasing the organic matter content, by manufacturing humus from agricultural and other wastes. The biological concept that humus “holds” the soil, improves the state of health in plants, builds up resistance to diseases and pests and permits the growing of well balanced crops, or in other words plants with an increased health-giving nutritious value, form the basis of both methods. One should, therefore, never attempt to build up an antagonism between these two ways of composting. Both lend themselves to the purpose of transforming crude organic matter into humus. Both have from their very beginnings acknowledged the importance of the earthworm and soil building bacteria.

“The writer and Sir Albert Howard, in the course of a meeting some ten or eleven years ago, found they had many fundamental points of view in common. The observation of soils and of the inability of modern, especially of the chemical and one-sided agricultural methods to solve the problem of health and nutrition has led both Sir Albert Howard and Dr. Rudolf Steiner, to an organic concept. The approach and the historical development were, of course, different. Sir Albert Howard was stimulated by the study of Eastern composting methods in India (and China) which had evolved there as a result of thousands of years of agricultural necessity in overpopulated rural areas. He has brought to us the condensed extract of the striving for survival of Indian agriculture: not to waste anything at all but to conserve it and to transform all refuse into humus. Three decades of empirical study were at the basis of Sir Albert Howard’s message when he first spoke about the Indore Process at the Royal Academy of Arts in London and published the fundamental brochure with Y.D. Wad: ‘The Waste Products of Agriculture; their Utilization as Humus,’ in 1931; and also, with G. Howard in 1929: ‘The Application of Science to Crop Production.’

Wikipedia (March 2020) states “Sir Albert Howard worked together with Gabrielle Matthaei (1876-1930), and her sister Louise (1880-1969). He married Gabrielle in 1905. After her death, he married Louise in 1931. [2][6] Gabrielle was herself a professionally trained and competent botanist, [2] and indeed the contribution of both women to organic farming is said to be underestimated [6].” Address: Dr. (Honorary), USA.

165. Rodale, J.I. 1948. The place of protein in the organic method. *Organic Gardening* 13(1):12-16. July.

• **Summary:** This article begins: “There is more than sufficient evidence to show that people who eat food that is raised organically are healthier than those whose food comes from farms where the more concentrated chemical fertilizers are used. By organically raised crops we mean crops raised on land where none of the artificial fertilizers are used but instead composts, rotted animal manures, green manure crops, ground limestone, raw phosphate

rocks, and other ground-up rocks that do not contain certain elements in too high a concentration are applied to the land. We organiculturists have been held up to reproach and stigmatized as cultists because our opponent friends either are not well informed about what we stand for, or if they do know, distort the facts for various reasons.

“They are telling the public that we believe only in applying composts in gardens or on farms. This they say is wrong because if there is a deficiency in the soil, composts made from materials that stem from that soil will not correct the deficiency. We agree with them, although if leaves are used from deep-rooted trees and plants, they will bring up from inexhausted strata, minerals that are not present in the upper soil layers. These critics continue to accuse us of advocating the use of composts only, even though in every issue of this magazine we advise differently.” Address: Emmaus, Pennsylvania.

166. Ahearne, Daniel A. 1948. An agricultural Shangri-La: *The Healthy Hunzas* By J.I. Rodale. Rodale Press. Emmaus, Pa.; \$2.75. A review. *Hartford Daily Courant (Connecticut)*. Aug. 8. p. SM14.

• **Summary:** The Hunzas, whose population is about 22,000, are a superbly healthy people who dwell in the mountain valleys of northwest India [actually Pakistan as of April 2020]. The “author offers the results of experiments by many competent research authorities, here and abroad, to support his contention that organically grown food is more nutritious and more beneficial than food ‘forced’ by artificial and chemical fertilizers.”

Note: This is the earliest document seen (Sept. 2010) in the ProQuest family of major American newspapers that contains the term “organically grown” in the sense related to agriculture.

167. Pfeiffer, Ehrenfried E. 1948. The physical structure of the soil. *Organic Gardening* 13(2):23-27. Aug.

• **Summary:** “We hear so much about the elements necessary to the soil, potassium, calcium, magnesium, phosphates, nitrates, manganese and trace elements. We also have learned recently much about soil life and humus forming bacteria, about the work of the earthworm. To observe and maintain all these factors is most important if one wants to have a fertile, living soil. However, it is just as important to have a soil structure upon which the soil life can develop, that is, that there is access of air to the soil, the soil is in good drainage. In a soil with poor drainage, for instance, very few humus-forming bacteria can live and no nitrate fixing bacteria will exist, and the earthworms also get lost.” Address: Dr. (Honorary), USA.

168. Balfour, Eve (Lady). 1948. The late Sir Albert Howard. *Organic Gardening* 13(3):18-19. Sept.

• **Summary:** “So many tributes, from all over the world, have

been paid to the late Sir Albert Howard, so many accounts have appeared of his career and lifework, that it would almost seem that nothing more remained to be said. Yet this opportunity must not be allowed to pass without a few words from a personal friend, on behalf not only of herself but of the many men and women now banded together as the Soil Association. For though Sir Albert to the last remained independent of this or any other organization, it is doubtful whether the Association would have come into being save as a result of the seed which he had sowed. Sir Albert, like all outstanding pioneers, was a man of intense personality which he projected without reservation into the cause with which his name will always be identified.

“Yet because of this very gift of integrating life and work in one purposeful whole, it is far from easy, even for those who came into relatively frequent contact with him, to give an account of him as a man.

“Though he possessed both intellect and scientific qualifications of a high order, anyone less like the popular concept of a scientific intellectual would be hard to imagine. Stocky in build, broad and weather-beaten in countenance, direct in speech, he typified the man of action. And man of action he undoubtedly was, spending a crowded lifetime in accumulating in the fields of many lands the evidence which led him to his triumphant conclusions, and then devoting the years which for most men mean peaceful retirement to the propagation of those conclusions far and wide. Perhaps the dominant impression which one retains of him is that of, utter sincerity, associated with an unshakable faith in his convictions and complete fearlessness in propounding them.” Address: Organizing Secretary, Soil Association, Ltd. [UK], Author of “The Living Soil”.

169. Eyster, William H. 1948. Sir Albert Howard—Student of nature. *Organic Gardening* 13(3):23-24. Sept.

170. Haas, H.C. 1948. Sir Albert Howard—Respecter of all forms of life. *Organic Gardening* 13(3):41-42. Sept.

• **Summary:** Because of Sir Albert’s work, evolution will be allowed to continue. The writer considers Howard’s *An Agricultural Testament* to be as important a book as Adam Smith’s *Wealth of Nations*.

171. Howard, Albert. 1948. The progress of organic agricultural in the U.S.A. *Organic Gardening* 13(3):42-43. Sept.

• **Summary:** This article appears under the heading “Sir Albert Howard’s last editorial.”

“His personal interest in the organic movement in the United States is well expressed in his last editorial in *Soil and Health*, Winter, 1947, which follows:

“The Progress of Organic Agriculture in the U.S.A.

“Albert Howard

“The onward march of the organic farming and

gardening movement in the United States of America will be evident from a single example. In June 1942 a new journal—*Organic Gardening*—appeared which was dedicated from the beginning to the Indore Process of composting. I was asked by the Founder and Editor, Mr. Jerome I. Rodale, to assist in the capacity of Associate Editor.

“The history of *Organic Gardening* makes interesting reading. At the beginning there were no sales, but Mr. Rodale persisted and was soon rewarded by a growing roll of subscribers and by a steady rise in the revenue from advertisements. To-day the paper has over 60,000 subscribers and is well on its feet.” Address: Sir, United Kingdom.

172. Howard, Louise E. (Lady). 1948. The birth of the organic farming movement. *Organic Gardening* 13(3):15-18. Sept.

• **Summary:** Louise was Sir Albert Howard’s second wife; his first wife, Gabrielle Howard, had been his fellow worker for 25 years. He and Louise met in May 1931 at the seaside resort of Rimini [on the east coast of Italy]. He was correcting the proofs of his book *The Waste Products of Agriculture: their Utilization as Humus*.

“The integrity which was an abiding part of his character urged him to do more, to make one last gift of his genius to the peoples of India. This final gift was to be a book on the manurial future of a country which for four thousand years had used three-fourths of its dried animal dung as its sole domestic fuel, thereby reducing the potentialities of its agriculture to an enormous extent. Yet the fuel was a necessity and no substitute was possible over the area of this huge continent. It was a cruel problem only too well known—a solution had never yet been suggested.” Address: Second wife of Sir Albert Howard, United Kingdom.

173. Kirkham, Ellinor. 1948. Sir Albert Howard—Prophet and champion of the soil. *Organic Gardening* 13(3):25-27. Sept. Address: Private Secretary to Sir Albert Howard.

174. Lutman, B.F. 1948. The scientific work of Sir Albert Howard. *Organic Gardening* 13(3):29-33. Sept.

• **Summary:** “Sir Albert was fortunate in being born and raised in an English country home. No amount of book or laboratory training could have taken the place of boyhood years spent among the problems and uncertainties of a family whose livelihood depended on the soil. Those years gave him a practical touch with agriculture that he never lost.

“His education at London and Cambridge Universities does not seem to have made a deep impression upon him and still, someone in those impressionable years must have drawn his attention and stirred his enthusiasm for plants and plant diseases. That teacher seems to have been Marshall Ward, a professor at Cambridge University. Ward had one of those uncompartmented minds that could roam over the whole field of plant life and touch every branch of it from

the bacteria and fungi to the higher plants with the fingers of genius. Ward had been the student of some of the great botanists of his day and had served as an assistant to the zoologist, Huxley, the most noted biological teacher of his generation.

“In contact with such a mind as that of Marshall Ward, Sir Albert must have taken on some of those habits of thought and methods of approach to scientific problems, that made specialized technicians who knew only one small segment of their subject, almost as undesirable as investigators as those who were entirely ignorant of the subject. That Sir Albert Howard must have profited by Marshall Ward’s influence is shown by the fact that he won honors in botany and plant diseases and after his graduation was appointed as a lecturer in botany and especially in plant diseases to the West Indies. He was stationed at the agricultural college on Barbados. This was in 1899 when he was 25 years old. Again he was fortunate.” Address: Prof. Emeritus, Univ. of Vermont.

175. Martin-Leake, H. 1948. Sir Albert Howard—An appreciation. *Organic Gardening* 13(3):27-28. Sept. Address: Close intimate of Sir Albert Howard and authority on tropical agriculture.

176. Pfeiffer, Ehrenfried E. 1948. Sir Albert Howard’s deed for science. *Organic Gardening* 13(3):20-22. Sept. • **Summary:** “Sir Albert Howard’s life work has only just begun. It is the highest tribute one can make to a man...”

“At the same period when mineral fertilizers held the highest rank, his attention was directed to the very core of soils—the role which humus plays in their maintenance and improvement. it is true that the humus concept was not new. There was, to refer only to one, the humus theory of the German agriculturist Thaer, current early in the 19th century, long before Liebig.

“But Liebig had given the agricultural concept a turn towards the mineral theory, in fact, towards the very one-sided concept that only a few major elements are needed for plant growth, namely, nitrogen, potassium, and phosphate. The application of these three elements brought about a revolution in farming; an increase of crops was observed. As a consequence, agricultural science and practice still believe today that ‘this is it.’ Many other factors were neglected during the next hundred years as a result of Liebig’s discovery. One can objectively state that it led to the excessive use of soils and brought increases of crops at the expense of other factors in soil, all the other elements, including trace elements, the important biocatalysts, and organic matter. World agriculture, deceived by the NPK theory, demanded more from soils than they could give and a general depletion cycle began.” Address: Dr. (Honorary), USA.

177. Picton, L.J. 1948. Sir Albert Howard—Master farmer of India. *Organic Gardening* 13(3):39-41. Sept.

• **Summary:** His first field work on Barbados was short-lived; he had been given no land. So he returned to England to Wye College, in Kent, where he again faced the same problem: no land. Nevertheless he made a major discovery that left its mark on hop-growing practice.

“It was in India, at Pusa, that he first had, not only the problems of pests to solve, but land on which to solve them. The fertilization of the hops was an indirect method of disease prevention: at Pusa he was going to try others. As he quaintly put it, his plan was to regard the peasants and the pests as his professors of agriculture. He saw that the peasants, using no pest killers, grew crops practically free from pests. The pests, on their part, were pointers to the unsuitability of the variety of the plant which suffered or succumbed from their attack, or to the farming methods used being inappropriate to the locality. Survival proved the suitability of kind or culture.” Address: Dr., O.B.E. [Order of the British Empire], Member of Panel, Soil Association, Ltd.

178. Rodale, J.I. 1948. Sir Albert Howard: A tribute. *Organic Gardening* 13(3):12-14. Sept.

• **Summary:** “Almost a year has passed since the death of Sir Albert Howard, which took place on October 20, 1947. But in that year events have shown and evidence has demonstrated that the organic farming and gardening movement, which received its inception in his researches, will march forward and onward more triumphantly than ever, its dynamic impetus gaining legions of converts and including many of its former scoffers and strongest critics. The name of Sir Albert will always be at the head of the roster of people connected with this movement, regardless of changes and improvements in his methods.”

A full-page photo (p. 12) shows Sir Albert Howard wearing an overcoat and hat. Address: Editor, *Organic Gardening*.

179. Wad, Yeshwant D. 1948. The work at Indore. *Organic Gardening* 13(3):6, 8-9. Sept.

• **Summary:** “In 1928 I joined the staff of the Institute of Plant Industry just started at Indore by the late Sir Albert Howard and his wife for introducing improved agriculture in States of Central India and Rajputana and advising on their agricultural problems. Sir Albert’s previous work at Pusa had enabled him to arrive at reforms in agriculture supremely suitable to rural India and very largely meeting the current needs of the population.

“The principal features of his system were: improved implements and new labour-saving appliances, some improvised by the Howards themselves; adequate provision of food and fodders by suitable rotation of crops and grazing areas and the maintenance of grassed edges on field boundaries to prevent erosion; making of silage; systematic

care of cattle and implements; orderly harvesting, threshing, and storage; planning of field operations to reduce hours of work, make effort easier and distribute it more evenly; and, the most outstanding item of all, the conversion of wastes to humus and their systematic return to the fields.” Address: M.A., M.Sc., Formerly Chief Chemist and Agronomist, Inst. of Plant Industry, Indore, Central India.

180. Pfeiffer, Ehrenfried E. 1948. New standards of soil and health. *Organic Gardening* 13(4):15-19. Oct.

• **Summary:** “The other day a chemist came to our laboratory and told of a carrot that contained no carotene.” Housewives are taught by advertising to want big, good-looking carrots, not nutritious carrots—rich in carotene.

“Last year, the Chicago Medical Society sponsored a public conference on nutrition. During one of the sessions, Dr. Clive M. McCay (Cornell University) reported an interesting experiment. At the Naval Medical Center in Bethesda, Maryland, a study was made of the kinds of bread selected by naval officers and enlisted men. The officers chose dark breads much more frequently than they did the white, while the enlisted men reversed this ratio. Education and food habits play a leading role here. The dogma that ‘people just won’t eat dark bread’ is the result of badly educated food habits.” Address: Dr. (Honorary), USA.

181. Pfeiffer, Ehrenfried E. 1948. Protect birds. *Organic Gardening* 13(5):15-17. Nov.

• **Summary:** According to a report in the *Chicago Daily Tribune* (12 July 1948) officials of the National Audubon Society at Greenwich, Connecticut, “are concerned over the death of many birds apparently from eating insects killed by insecticides.”

Birds are the best of all insect destroyers. “Moreover, hundreds of species of valuable insects, such as bees, are likewise killed by those poisons.”

“Another and even more vital reason for our concern for the birds is that they are a part of the living balance of nature. Once this balance is distorted, there is no visible end of the consequences in the general household of animal and plant life, among the healthy as well as the diseased.

“Then, too, not only are birds ‘the best of all insect destroyers’, but they are the most harmless...” Address: Dr. (Honorary), USA.

182. Striegel, Joel V. 1948. Nature boys I know. *Vegetarian News Digest (Los Angeles)* 1(3):3-4, 18. Dec.

• **Summary:** “Ever since Eden Ahbez wrote America’s No. 1 hot tune, the song that has made him famous, the Nature Boy idea has spread epidemically... Several Los Angeles naturists who were already inclined that way began to live as Nature Boys.”

Another Nature Boy is Gene Mariani (“Gypsy Gene”), who often travels on his bicycle, and is frequently seen at

“Muscle Beach” in Santa Monica. “He keeps in physical fitness by following a regimen of rising at daybreak, retreating at sunset, avoiding not only meat, fish and fowl but coffee, tea, milk, dairy products and packaged foods, also any foods touched by fire. He sleeps on the ground in the open under the stars. He smiles often and maintains a jolly spirit in spite of the gibes he receives from jokesters.”

Buddy Rose, age 41, like Ahbez, came from Brooklyn, New York; he was attracted to California because of its varied topography, climate, and spiritual environment. Fifteen years ago he was very ill but more than a “decade of natural living has brought him health of body and peace of mind. Wherever he goes, Buddy Rose makes friends; he believes in upliftment, ‘in expanding someone’s joy in life.’”

“Robert Bootzin, about 30, known as ‘Boots,’ is one of Nature’s Boys who never drank or smoked. Bearded, rugged, athletic, Bootzin can play in professional football but does not prefer professional sports. He loves to sing, and shows his respect for Nature quite frequently. He works at fruit-picking in the summertime and eats only natural food.

“Emile Zimmerman, also about 30, who came to California from Michigan over a year ago, is the adonis type of Nature Boy. Blond, six foot tall, with a fine physique, Zimmerman is making great strides in developing his body toward perfection by exercise, outdoor living and proper food. Musical, quiet and contemplative, he, like Bootzin, speaks of Nature with great respect.

“A different type of Nature Boy who inclines strongly toward the religious life is that of Forrest Nannery, also known as Bob Wallace, and that of Sam Price. Both full-bearded, raw food vegetarians, they wear sackcloth robes as a symbol of simplicity, sleep outdoors, and walk barefooted. They eschew root vegetables and eat all their natural foods whole without cutting into them; thereby preventing oxidation and loss of vitamins. Both these naturists are said to come from rather wealthy parents.”

A small photo shows Robert Bootzin [“Gypsy Boots”], Forrest Nannery, and Emile Zimmerman.

183. Vitamin Products Co. 1948. Whole wheat flour (Ad). *Organic Gardening* 13(6):59. Dec.

• **Summary:** A small (2.75 by 1.75 inch ad). “From whole wheat grown in Deaf Smith County, Texas. Stone-ground to a fineness suitable for every baking purpose. No better or fresher flour anywhere in the world!

“5 lb bag. \$1.50 plus postage.

“Write for contract prices and literature.” Address: Milwaukee 3, Wisconsin.

184. Walnut Acres. 1948. Organic Foodstuffs (Ad). *Organic Gardening* 13(6):59. Dec.

• **Summary:** A small (2.75 by 1.5 inch ad). “Ever buy food by mail? Write for information on foods raised strictly organically. We raise, grind and process everything ourselves

on our family farm—Fresh, organically-raised, stone-ground whole wheat, corn meal and buckwheat—Marvellous cookies, made with our own whole wheat. No white flour—Organically raised, dressed chickens—Honey, strawberry jam, herb jellies.

“Paul Keene, Walnut Acres, Penns Creek, Pa.”

[Pennsylvania]. Address: Penns Creek, Pennsylvania.

185. Bromfield, Louis. 1948. *Malabar farm*. New York and London: Harper & Brothers. viii + 405 p. Illust. (by Kate Lord). 22 cm.

• **Summary:** This book is about Malabar Farm in Ohio, written from 1944 to 1945 while the author was living and working there. Much of this book is about the philosophy and practice of farming.

Chapter 13, “The organic-chemical fertilizer feud” begins: Justus Liebig was born in Darmstadt in 1803. At age 15 he decided to become a chemist. He was always trying to extend the boundaries of human knowledge, to penetrate into the unknown. At times he was unorthodox, speculating about things that other professors regarded as already settled and beyond dispute. “Eventually he became one of the world’s greatest scientists and he brought to world agriculture a revolution. He was the creator of the principle of chemical fertilizer.” He was a Renaissance man with many interests and deep curiosity, a man of broad culture and knowledge. He understood that “the content, implications, and potentialities of a cubic foot of soil reach far beyond the realms of purely inorganic chemistry.

“From Liebig there stemmed a whole school of false disciples (or rather narrow and limited fellows)” which he surely would have disavowed.

“On the other hand there has grown up during the past generation another school of thought, as fanatic as the pure specialist, inorganic chemists are limited and academic. They are the people who believe passionately that all chemical fertilizer is poison and that in decaying and decayed organic matter lies the salvation of the agriculture and of the world. They are perhaps a shade nearer the truth...”(p. 274-76).

“Louis Bromfield was born in Mansfield, Ohio in 1896 to Charles Brumfield, originally from New England, and Annette Marie Coulter Brumfield, the daughter of an Ohio pioneer. Bromfield decided to change the spelling of his name after it was misspelled on one of his early works.

One of Mansfield, Ohio’s most famous natives, his home was Malabar Farm, near Lucas, Ohio, from 1939 until his death in 1956.”

“Bromfield studied agriculture at Cornell University from 1914 to 1916, but transferred to Columbia University to study journalism.” He was married in 1921.

“In 1925, Bromfield and his family left for a vacation in France, a country he had come to love during the war. They stayed for thirteen years. Paris, between the wars was known for its expatriate community of American writers. Among the Bromfields’ friends were Edith Wharton, the poet Natalie

Barney, Sinclair Lewis, and Gertrude Stein.

“As World War II threatened Europe, the Bromfield family returned to the United States, where Bromfield bought 1,000 acres near his native Mansfield, Ohio. The farm, which he named “Malabar Farm” was to become his major work during his last 20 years. Bromfield was an early proponent of organic and self-sustaining gardening, and his farm was one of the first to ban pesticides. The farm was used as a government test site for soil conservation practices” (Source: Wikipedia, at Louis Bromfield).

186. Johnston, Eric A. 1948. *We’re all in it*. New York, NY: E.P. Dutton. 220 p. 22 cm. *

• **Summary:** Eric Allen Johnston lived 1895-1963.

187. Rodale, Jerome Irving. 1948. *The organic front*. Emmaus, Pennsylvania: Rodale Press. 199 p. 21 cm.

• **Summary:** This early book about organic gardening and farming is divided into three parts: I. On the organic front (17 chapters, incl. compost, and the work of Weston A. Price). II. Debates (3 chapters, incl. “Do chemical fertilizers kill earthworms?”). III. Foods (21. Raw foods. 22. Sunflower seeds—The forgotten food. 23. Seeds as human food. 24. The wonderful grape. 25. The Rodale diet). The author was born in 1898. Address: Emmaus, Pennsylvania.

188. Rodale, J.I. 1948. *The healthy Hunzas*. Emmaus, Pennsylvania: Rodale Press. 263 p. Illust. Map. No index. 21 cm. Popular edition. [46* ref]

• **Summary:** Contents: Introduction. 1. Sir Robert McCarrison. 2. Sir Albert Howard. 3. The organic doctrine. 4. Chemical fertilizers. 5. Manure. 6. Privies and goitre. 7. The husbandry of the Hunzas. 8. Hunza land practices. 9. Rock powders. 10. The blinks. 11. Who are the Hunzas? 12. Our kinesthetic sense. 13. The Nagyri. 14. The food of the Hunzas. 15. The health of the Hunzas. 16. The intelligent Hunzakuts. 17. Evidence of Hunzarization possibilities. Conclusion.

A map of India, including Afghanistan, Kashmir, Sinkian (China) and Thibet (Tibet), shows that the Hunzakuts live at the northwest border of India.

McCarrison, the great English physician, lived with the Hunzakuts for about a decade. They are light skinned and claim descent from three soldiers of Alexander the Great. McCarrison attributed their outstanding health to: (1) Infants are breast-fed, as Nature intended. (2) The people live on simple, natural foods: Milk, eggs, grains, fruits and vegetables. Almost no sugar or refined foods. (3) Their religion prohibits alcohol, and they consume little. (4) Their way of life requires vigorous exercise. In 1927 (at Conoor, India) he started a famous feeding experiment with albino rats. He was, at this time, director of Nutrition Research for the entire country of India. One group of rats was fed a diet similar to that enjoyed by the Hunza. A 2nd group of

rats was fed the poor diet of the Southern India rice eaters. A 3rd group was fed the diet of the lower classes of India. The trial went on for 2¼ years. The Hunza rats (1) were in excellent health. The Bengali rats (2) suffered from a variety of diseases and were in very poor health. (3) The English rats were in the worst physical and mental health of all. The dramatic findings “didn’t even produce a ripple in the pond of medical inertia” (p. 21-22).

“At the time McCarrison was working among the Hunzas, another great idealist, Sir Albert Howard, was engaged in agricultural research at Pusa, in southern India.” He was interested in the fertility of soil, and prevention of its loss. Howard “had an instinctive feeling that the use of chemical fertilizers was doing more harm than good, that it was destroying the life and vitality of the topsoil, that it was merely ‘a shot in the arm,’ which momentarily stimulated yield, but struck back viciously later in bringing about conditions that actually invited disease.” So he used natural fertilizers instead of chemical ones with great success. Later he developed the Indore method for making a compost fertilizer, based on three parts plant matter and one part animal matter. Howard summed up his work with this classic statementL “Artificial chemical fertilizers lead to artificial nutrition, artificial animals, and finally to artificial men and women.”

The term “organically grown” appears on 7 pages, including pages 236, 251, and 253.

Page 251: “In the early spring of 1946, my daughter and I went on a diet of organically grown fruits and vegetables—raw salads,... I was freed from rose fever and my daughter from hay fever, thanks to organically grown fruits and vegetables.” Address: Editor, *Organic Gardening*, Emmaus, Pennsylvania.

189. Walnut Acres. 1949. Classified ads: Walnut Acres. *Organic Gardening* 14(4):64. April.

• **Summary:** In the section under “Organic trading post”: “Organically Raised, Stoneground to order. Buckwheat flour and cornmeal—5 pounds, 75¢. Dark honey—5 pounds, \$1.50. Postage extra. *Cooking with Wholegrains*—64 page book. \$1.00—postpaid. Paul Keene, Penns Creek, Pa.” [Pennsylvania]. Address: Penns Creek, Pennsylvania.

190. Rodale, Jerome Irving. 1949. The organic method on the farm. Emmaus, Pennsylvania: Rodale Press. 128 p. July. Illust. No index. 21 cm. Series: The Organic Farmer No. 41. • **Summary:** “A tremendous change occurred in the organic method in September, 1949, as is outlined in the last chapter of this book” (see p. 120). It is indeed a new organic method, which is both revolutionary and labor-saving.

The “tremendous change” may eliminate the need for farmers to make compost in heaps or pits. “Many agriculturists have contemptuously referred to the organic method as the pitch-fork method of farming. It was that at

the beginning, but we have progressed considerably since then.”

Contents: Introduction. How to Make a Compost Heap. The Compost Process. The Organiculturist’s Creed. With Further Reference to Composting Pits. Filling the Compost Pit. A Suggestion for Compost Making. Labour Saving in Compost Manufacture. Large Scale Composting. Composting on a Farm Scale. A Trip to Alabama. Sheet Composting on the Farm. Manure Loader Equipment in the United States. Making Compost for the Farm is Practicable. Nitrogen. The Nitrogen Problem. Phosphate Rock. Potash Deficiency in Soils. Sources of Natural Potash in the United States. Subsoiling. The Control of Eelworm (Nematodes). Artificials and Sprays Are Not Used Here. Orchard Practices. The Chicken-Dropping Pit. The *New Organic Method*.

“Sir Albert Howard, who died a few years ago, was the father and developer of the organic method of farming. He had a background of experience with it over thirty years. He proved conclusively that it could give higher yields and healthier foods. I had the pleasure of introducing his method officially into the United States as his direct representative. Now we have about seven years of experience with it. We and many others have found it good.”

Rodale then describes the work of Mr. Charles Selvi more than ten years ago with manure on farms in Italy. He developed a new method for aging manure. “He suggested that instead of leaving the manure heaped in piles it be placed in covered pits” (p. 123). Mr. Selvi worked with Rodale’s Soil and Health Foundation for about two months. His method may eliminate the need to make compost.

The author was born in 1898. A revised edition was published in Oct. 1949. A 5th edition of this book was published in 1952 and a 6th edition in 1953. Address: Emmaus, Pennsylvania.

191. *Organic Farmer (The)*. 1949-1953. Serial/periodical. Emmaus, Pennsylvania: Organic Gardening. Jerome I. Rodale, editor and publisher. Vol. 1, No. 1. Aug. 1949.

• **Summary:** This title, starting in Aug. 1949, continued until Vol. 5, No. 5, Dec. 1953. Then in Jan. 1954 merged with *Organic Gardening* to become *Organic Gardening and Farming*. See also *Organic Farming and Gardening* (May 1942).

Note 1. Vol. 1, No. 1 (Aug. 1949) states: Editor: J.I. Rodale; Associate Editor: Dr. Wm. H. Eyster. Published monthly by Organic Gardening. Publication, Executive, Editorial, Subscription and Advertising Offices: 6th and Minor Streets, Emmaus, Pennsylvania.” This title lasted from Aug. 1949 through Vol. 5, No. 5, Dec. 1953.

Note 2. The launching of this publication was a milestone in the history of organic farming in the USA. The first year had many articles about composting, compost heaps, earthworms, the wisdom of not plowing (later generally called no-till), and Sir Albert Howard (the English

botanist, an organic farming pioneer, a principal figure in the early organic movement, and author of *An Agricultural Testament*; he worked for 25 years as an agricultural investigator in India).

Here is the table of contents of Vol. 1, No. 2, Sept. 1949. Editor: J.I. Rodale. Managing editor: Robert D. Rodale. Associate editor: Dr. Wm. H. Eyster. From readers. Editorial, by J.I. Rodale. Composting Corn Cobs, by J.I. Rodale. Sewage a National Resource. What about DDT? A Perfect Score Growing Chicks. Mexico Has Agricultural Troubles. Kale as a Cover Crop. Farm Compost in Production. Artificial Insemination Failure Sells More Bulls. Straw Gives Life to Soil. Hedges control soil. Harvesting sunflowers. Pasture your flock. Overtilling destroys fertility. Mulches. Memos to farmers. Killing the soil. Starland Farm goes organic. How lime paid off. Yarbs [herbs, medicinal plants] are organic. Livestock. Poultry. Scoop used to move manure. Address: 6th and Minor Streets, Emmaus, Pennsylvania.

192. Walnut Acres. 1949. Classified ads: Walnut Acres. *Organic Gardening* 15(6):63. Dec.

• **Summary:** In the section under “Organic trading post”: “Fourth Year for Walnut Acres home processed organic foodstuffs. Fresh stoneground wheat, rye, corn, buckwheat flours and cereals; honey, jam. Paul Keene, Penns Creek, Penna.” [Pennsylvania]. Address: Penns Creek, Pennsylvania.

193. Arthur, Julietta K. 1949. How to make a home business pay. New York, NY: Prentice-Hall, Inc. xviii + 330 p. See p. 46-47, 257. Index. 21 cm. [20* ref]

• **Summary:** In the chapter on “Kitchen products that sell,” the section titled “Choosing an appetizing name” contains eight rules. “Rule 5. If a product is to be sold on the basis of its homespun quality, the words ‘spicy,’ ‘nutty,’ ‘fruity,’ and the like will always have a homey sound.

“Paul and Betty Keene sell their ‘Apple Essence,’ made from freshly mulled cider, by direct mail from Penns Creek, Pennsylvania. Their business also includes a sizable list of home-ground flours which the alluring name of their farm, Walnut Acres, helps to promote.”

In the chapter titled “Selling what you produce,” the section on “Publicity: Sales asset” states, under “Regional and local magazines and newspapers”: “As an indication of what a good shopping editor’s favor means, Mrs. Gebhard Wuest reports that when her soya-bread was first praised in Clementine Paddleford’s food column in the *New York Herald-Tribune*, four hundred letters poured into the little Wuest bake-shop in twenty-four hours.”

194. Balfour, E.B. (Evelyn Barbara, Lady). 1949. The living soil: evidence of the importance to human health of soil vitality, with special reference to national planning. Rev. ed. London: Faber and Faber. 270 p. Plus 14 plats on

unnumbered pages. Illust. Index. 22 cm. 1st ed. 1943. [54 ref]

• **Summary:** Contents: Foreword to the Revised edition (dated Jan. 1948). Introduction. 1. Preliminary survey. 2. Medical evidence. 3. Humus. 4. Direct evidence. 5. Circumstantial evidence. 6. Indications: Plants, animals, man. 7. Whole diets. 8. The Haughley Research Trust and the Soil Association. 9. Facing the implications. 10. Postscript: Technical references, bibliography, glossary.

Evelyn Balfour was born in 1898.

The biological composition of the soil is more important than its chemical composition. Address: Haughley, England.

195. *SoyaScan Notes*. 1949. Chronology of the macrobiotic movement in North America, 1949-1966. 25 Jan. 1995.

Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1949 Nov. 24—Michio Kushi, a student of George Ohsawa, arrives in New York City from Japan, in connection with the World Federalist Movement. He writes letters back to Japan, and Ohsawa reads them to his students at his center (*Maison Ignoramus*) in Yokohama, near Tokyo, Japan.

1951—Aveline Tomoko Yokoyama falls in love with Michio’s letters, wins a trip to America by being the best seller of Ohsawa’s newspapers, and meets Michio in New York.

1952, early—Herman Aihara, age 31 (born Nobuo Nishiyama on 28 Sept. 1920), arrives in America, and settles in New York City. As early as March 1952 he was selling macrobiotic foods in New York; he imported them from Ohsawa in Japan.

1954—Michio Kushi and Aveline Tomoko Yokoyama are married in New York City. They had exchanged letters before she arrived.

1955 Dec.—Herman Aihara and Chiiko (Cornellia) Yokota are married in New York. Cornelia arrived in the United States from Japan in Oct. 1955. They had exchanged many letters before she arrived.

1960 Sept. 20—Zen Teahouse, the first macrobiotic restaurant in the USA, is started in New York City by Alcan Yamaguchi. It was located at 317 Second Ave. and consisted of a small (4-table) main room containing a kitchen. Miso and shoyu were served regularly. This restaurant was later renamed Paradox.

1959 Nov. or Dec.—George Ohsawa arrives in America for the first time, staying in New York City with Herman Aihara, his closest associate. After a week he flies to California to find a source of short-grain brown rice; he locates Koda Brothers (in Dos Palos), but also gives lectures in San Francisco and Los Angeles. After one week in California, he returns to New York City.

1960 Jan.—Ohsawa presents the first of three series of lectures designed to introduce macrobiotics, and the philosophy and medicine of the Orient, to America; each

for ten nights during January, February, and March of 1960 at the Buddhist Academy in New York City. During these lectures his first work in English is published, a mimeographed edition of *Zen Macrobiotics*. He and the Aiharas duplicated and bound these in the Aiharas' apartment, then sold them at the lectures for \$0.50. He also lectured at the Universalist Church, The New School for Social Research, Columbia University, and New York City College (See: *Macrobiotics: The Art of Longevity and Rejuvenation*, p. 188-89).

1960 May 10—Herman Aihara starts publishing *Macrobiotic News*, a magazine consisting mainly of Ohsawa's lectures, plus some current news.

1960 July—Ohsawa returns to America (after a trip to Europe) and lectures daily for two months at the first American macrobiotic summer camp at Southampton, Long Island, New York. Mrs. Lima Ohsawa, aided by Cornelia Aihara, gives macrobiotic cooking classes. Many people attend, especially writers, actors, artists, musicians, and intellectuals.

1960—To serve this growing interest, a tiny restaurant named Musubi is started in Greenwich Village and run by Alcan Yamaguchi, Romain Noboru Sato, Herman Aihara, and Michio Kushi. In late 1961 Musubi was moved to 55th Street.

1960—The first macrobiotic food store (combined with a gift shop), named Ginza, is started by Herman Aihara.

1961 Feb.—At a meeting of the Ohsawa Foundation, Inc. (New York City) Herman Aihara is elected president while he was traveling in Europe. He accepted the position when he returned later that month.

1961 summer—George and Lima Ohsawa come to America again for the second macrobiotic summer camp, this time in the Catskill Mountains at Wurtsboro, New York. Lima and Cornelia Aihara give cooking classes. After the camp, at the time of the Berlin Wall crisis (August 1961, before the Cuban missile crisis of Oct. 1962), Ohsawa feared that a nuclear war might be near. He urged his followers to leave New York and find a place that was safer from radioactive fallout and good for growing rice. After extensive research, they choose Chico, California.

1961 Oct. 1—Thirty four people (11 families) arrive in Chico from New York City in a caravan of vans, buses, and station wagons. Among the active people in the group are Bob Kennedy, Herman Aihara, Teal Ames, Lou Oles, and Dick Smith.

1961 Nov.—The first printed edition of *Zen Macrobiotics*, by G. Ohsawa is printed in Japan (218 pages). It has been edited and the parts rearranged.

1962 March 6—The group in Chico establishes a new food company named Chico-San as a retail store and an import and wholesale business. It was capitalized with \$10,000. In addition to a line of whole-grain products, they soon began to import a variety of macrobiotic foods from

Ohsawa in Japan. The first store and food plant (they made sesame salt or *gomashio* and repackaged foods) was in the basement of a small hearing aid shop in Chico. It became the first macrobiotic food production company in the USA.

1962 July 7—Third summer camp opens in Wurtsboro, New York, under the direction of Irma Paule and Sam Chapman; it continued until Labor Day.

1962 Christmas—George Ohsawa visits Chico and lectures on macrobiotics.

1963—Ohsawa lectures in Boston, New York City, and at the fourth macrobiotic summer camp (the first on the West Coast) at Chico. Lima Ohsawa and Cornelia Aihara give cooking classes. In Chico, Ohsawa suggests that the group try making rice cakes. He sends them a rice cake machine from Japan.

1963 May—Junsei Yamazaki arrives in the USA (in San Francisco) from Japan. He first goes (by bus) to Chico, California, to help with the installation of small rice cake machines. Production of rice cakes begin in the fall of 1963. They soon become Chico-San's first really popular and successful product. After the July 1963 summer camp in Chico, California, Yamazaki goes to New York, arriving in August.

1964 summer—Ohsawa lectures in California at the fifth macrobiotic summer camp (2nd on the West Coast) near Big Sur. Lima Ohsawa and Cornelia Aihara give cooking classes.

1964 Sept.—After the macrobiotic summer camp on Martha's Vineyard, the Kushi family moves from the island to Cambridge, Massachusetts (101 Walden St., on the outskirts of Boston to the northwest). Michio stops all his outside business activities and directs his full attention to teaching macrobiotics.

1964 Nov.—The first edition of *Zen Cookery*, edited by Teal Nichols, a book of macrobiotic recipes (83 p.), is published by The Ohsawa Foundation in Chico, California.

1965—The macrobiotic movement in America, though small, is growing rapidly. Ohsawa lectures again in California at Mayoro Lodge, near Pulga.

1965—Michio Kushi organizes the first East West Institute out of his home in Cambridge and begins teaching macrobiotics, cosmology, and cooking to mostly young people.

1965—The second edition of Ohsawa's *Zen Macrobiotics* is prepared and published by Lou Oles of the Ohsawa Foundation in Los Angeles. It contains much more information (including much more about soyfoods) than the original 1960 mimeographed edition.

1965—*You are All Sanpaku* by William Dufty is published.

1965 Nov. 9—Beth Ann Simon, a young heroin addict from New Jersey, dies while following a strict macrobiotic diet. This is the movement's first major setback. Ohsawa and the macrobiotic diet receive much adverse publicity, and the

incident brands macrobiotics among many in the medical and health professions as a dangerous and extreme form of food faddism. The image was hard to get rid of. The U.S. Food and Drug Administration closes the New York branch of the Ohsawa Foundation, run by Irma Paule.

1966 April 24—George Ohsawa dies unexpectedly in Tokyo, Japan, at age 72—just as his teaching is beginning to spread rapidly in the West. The cause of his death: a heart attack, perhaps caused by filarial parasites he had picked up at Lambarene, Gabon.

1966 April—Erewhon opens as a tiny (10 by 20 foot) retail store downstairs at 303-B Newbury Street in Boston.

1966 summer—Michio Kushi begins to lecture each Monday and Wednesday evening in a back room of the Arlington Street Church in Boston. These talks were supplemented by cooking classes with Aveline Kushi in Brookline.

196. Sykes, Frank/Friend. 1949. *Humus & the farmer*. Emmaus, Pennsylvania: Rodale Press. xxi + 392 p. Illust. First published in 1946 by Faber & Faber, London (xix + 298 p.).

• **Summary:** Biography of a 1,000 acre English farm where the organic method has proven its superiority over farming with chemicals.

Note: The word “organic” appears on 43 pages in this book.

“This edition... reproduces the third British edition of February 1934.”

197. Norman, Robert C., Jr. 1950. *Houses—Nassau—Suffolk*. *New York Times*. Feb. 10.

• **Summary:** “Northpoint—”C” Norman. The Future Belongs to Those Who Prepare for It... Wood-shingled, 20-year old house... Property about 3/4 acre, level, completely fenced to protect your fruit and vegetables organically grown for years by owner, who really enjoyed the hobby... Taxes \$200. Sick Owner. Sacrifice \$17,500. Price form. Free and clear. Terms within reason.” Address: Broker. Npt 1354.

198. *Vegetarian News Digest (Los Angeles)*. 1950. Organic vegetarian community started in southern California. 1(11):22. Jan/Feb.

• **Summary:** “In view of ever-increasing economic uncertainty and disturbed world condition, thinking vegetarians are planning to secure their future by settling on the land in subsistence homesteads.

“Such a group is attempting to do so in Southern California’s Morongo Valley, called the Valley of Destiny because it is believed to be the future home of New Age pioneers who will settle here away from a worried world.

“Morongo Valley is 17 miles above Palm Springs, situated in a secluded valley completely surrounded by mountains, at an elevation of 2650 feet, which provides it

with an ideal year-round climate.”

“A new vegetarian community along organic lines is now in development in Morongo Valley,” 17 miles above Palm Springs, completely surrounded by mountains at an elevation of 2,650 feet.

“Interested persons may write to Roy Sandsberry, P.O. Box 131, Morongo Valley, California, for further information.” Note: Morongo Valley is in today’s (March 2004) San Bernardino County, California.

199. Stuart, R.L. 1950. Classified ad: Gardening. *Scotsman (Edinburgh)*. May 17. p. 10.

• **Summary:** “Strawberry plants.—Auchencruive Climax, exceptionally fine plants, organically grown 2 years in complete isolation at high elevation. Dept. of Agric. Stock Runner certificate S.R. 3749. immediate delivery, £5 per 1000 (for 5000 and over), £5 10/- for 1000, £1 for 100,...; carriage paid” Address: Hopes, Gifford, East Lothian.

200. Stahr, Alden. 1950. Paul Keene of Penns Creek: For this man, the organic approach is the only rational one. *Organic Farmer (The)* 2(4):10-14. Nov. Cover story.

• **Summary:** A photo on the cover shows Paul Keene standing with a pitchfork in his barn. Printed above the magazine’s title: “Farming without chemicals.” A good, detailed article with many photos by the author.

The farm Paul bought five years ago had been in the same family for over a hundred years and until recently sustained a large dairy herd with careful management of manure and little if any commercial fertilizers. The first crops Paul planted and plowed under were buckwheat, rye and vetch, soybeans, and cowhorn turnips. He also raises millet, wheat, soybeans and rye. Early publicity included an article by Clementine Paddleford in the *New York Herald Tribune* and *Gourmet* magazine. Betty Keene’s mother practiced organic gardening in India when Sir Albert Howard first launched modern organic culture there. Paul and his wife have three young daughters—and no hired man.

Photos show: (1) Paul driving his Ferguson tractor. (2) Betty Keene, his wife, smiling and weighing organic flour for shipment to a customer. (3) Paul standing with his two horses beside a barn. He thinks they make better company than a tractor, but he found them impractical on a one-man 200-acre farm. (4) Four organic farm families in front of the Keene’s two-story home making short work of a hundred ears of organic sweet corn. Present are Keenes, Parkers, Stewarts and Stahrs—with many children. (5) A view of Walnut Acres (Penns Creek, Pennsylvania), showing houses and barn, with a clover pasture in the foreground. (6) “Some of the sheep at Walnut Acres, which provide a good means of turning organic pasture into good organic meat.”

201. Worth, Miklos. 1950. Soyabeans: The fabulous food that supplies meat, milk, cheese, proteins, amino acids,

vitamins, minerals. New York, NY: Ideal Health Books. 62 p. A MacRichard publication.

• **Summary:** This book consists of many short chapters. Contents: The bean that is not a bean. A therapeutic substance. Chemical requirements of life. Natural foods supply basic needs. Disease—A disturbance of mineral salt balance. Essentials in man’s diet. The big five. A balanced mineral supply. Soybean oil valuable to health. Carbohydrates in soybeans. A storehouse of vitamins. How vitamins are to be used. Soyabeans in Rheumatism. Nervous exhaustion. Rickets. Gastro-intestinal disorders. A perfect food for invalids. Constipation. Obesity—An easy way to reduce. Loss of weight. Dandruff and loss of hair. Eczema and other skin disorders. Sciatica. Hardening of the arteries. Excellent food for diabetics. An excellent blood builder. Soyabeans influenced civilization. The poor man’s meat. Introduction to America. Revolutionizing modern economy. Soyabeans could enrich the diet. How to make soya milk. Soyabean sprouts. Soyabean curds. Soyabean coffee. Soyabean oil. How to cook soyabeans. Soyabean flour in baked products. Its use in green salads. Soyabean sauce. Health through soyabeans.

Chapter 1 begins: “Soyabean, the wonder-plant of the Far East that has given sustenance to the peoples of the Orient since time immemorial, is not only a nourishing food, but plays a host of roles in natural health because of its medicinal and therapeutic properties... There is no other single plant known to man which yields such bounty of goodness. All the essential ingredients for health and long life are gathered and packaged in this singular food.”

Note 1. This is the earliest English-language document seen (April 2013) that uses the term “soyabean curds” to refer to tofu.

Note 2. This is the earliest English-language document seen (Jan. 2013) that uses the term “soyabean sprouts” to refer to soy sprouts.

Note 3. This is the earliest English-language document seen (Nov. 2012) that uses the term “soyabean coffee” to refer to soy coffee.

Note 4. This is the earliest English-language document seen (April 2012) that uses the term “soyabean sauce” to refer to soy sauce.

202. Foods for Life. 1950? Introducing Foods for Life! Incorporated (Leaflet). Glendale, California: Foods for Life, Inc. 4 panels each side. Each panel: 23 x 10.5 cm. Undated.
• **Summary:** On the front cover is a photo of a stand of peaches above the title. On the two inside pages is a statement with this title: “Dr. Jonathan Forman presents ‘Creative Medicine.’” The text, spread across two panels below a photo of Navel Oranges, reads: “It is no simplification to say that *our health comes from the soil*. No matter how many physicians and health officers we train and how much curative and preventive medicine they may

practice, we cannot attain optimum health until they and we have turned our attention to *creative* medicine, and thereby learn to keep and even improve our health.

“I challenge anyone to name a single infectious or parasitic disease in which the nutritive state of the tissues of the victim is not more decisive than the germ itself. People do not die of infectious diseases, as they are signed out, but really of *malnutrition* that allows the germ to gain its foothold. In the non-infectious fatal diseases, or degenerative diseases, as they are called, malnutrition, or under-nutrition, is the real cause in every instance.”

The text continues onto the back panel: “Glendale physicians accept Dr. Forman’s challenge... Dr. George Johnstone and his associates have formed the Foods for Life Corporation to implement this ‘Creative Medicine’ program so enthusiastically recommended by Dr. Forman.

“The Three-fold mission of Foods for Life, Inc. will be to grow, process, and market fruits and vegetables, grains and nuts of the highest nutritional value.

“Organic Farming methods will be used exclusively. All the products marketed by this organization will be grown with natural organic fertilizers, and none of their products will be contaminated by caustic artificial chemical fertilizers or poisonous sprays or insect powders.

“Keep your eyes on this important new development in the field of preventive medicine.

“For further information address...” Address: Behrens Memorial Hospital, Glendale, California.

203. Talbot (Leo). 1951. Display ad: Tibby’s. The home of Good Poultry. *Christian Science Monitor*. Jan. 19. p. 6.

• **Summary:** “Meat type poultry is our business. Our Only business. All our poultry is organically grown.” Address: Proprietor, Swansea, Massachusetts. Phone: 6-8189.

204. Gordon, Walter. 1951. Organic gardening co-operative planned in northern California. *Vegetarian News Digest (Los Angeles)* 2(5):22. Summer.

• **Summary:** “The Organic Gardens Cooperative, 1737–101st Ave., Oakland, California, is now being organized.” Its four main objectives are given.

205. *Vegetarian News Digest (Los Angeles)*. 1951. Organic gardening idea growing in New York. 2(5):24. Summer.

206. Rodale, J.I. 1951. With the editor: In defense of the organic method (Editorial). *Organic Farmer (The)* 3(2):17-19, 49. Sept.

• **Summary:** This editorial begins: “Of late there has been an increasing tempo of criticism leveled against the organic method by our opposition and I would like to run this series in answer to it.”

He cites numerous health benefits, to both humans and rats, of organically raised food. “Lady Eve Balfour in her

book *The Living Soil* states that she was cured of rheumatism by eating food organically raised.” Address: Emmaus, Pennsylvania.

207. Whole Grain Flour Mills. 1951. Deaf Smith health foods (Ad). *Organic Farmer (The)* 3(2):1. Sept.

• **Summary:** “Now! Enjoy a higher level of vigorous, disease resistant health with delicious flours, cereals, and unique, skillfully blended meals made from Deaf Smith County Wheat organically grown in the rich, fertile soil and healthful waters of Hereford, Texas, the famed ‘Town Without A Toothache.’ This wheat has an amazingly high percentage of calcium, phosphorus, from six to nine times the amounts found in the average flour. Bread baked from stoneground Deaf Smith Wheat has a flavor and health value superior to any other known. Free recipes and an interesting story on ‘The Most Expensive Bread in the World’ included with order. Order Today!”

The following products are available: Deaf Smith cracked wheat. Deaf Smith bread flour. Deaf Smith laxa-meal. Potato meal. Deaf Smith Vita-Meal. Deaf Smith wheat berries.

“Special selected natural foods.

Organic cake flour. Hulled millet seeds. Natural brown rice.

50-50 Sesame-sunflower meal. Soybean flour. Hulled sesame seeds

Whole rye flour. Organic sunflower seeds. Flaxseed meal.

Millet-ses-sun cereal. Yellow corn meal (Stoneground). Scotch steel-cut oats.

Pure raw wheat germ. Crude black molasses (“Delightful tasting, superior to Blackstrap”). Crude dark raw sugar (“A real raw sugar that is rich in natural un-fired molasses”).

How to eat safely in a poisoned world.” Right living series (“32 booklets, 1,024 pages, written from a unique Christian viewpoint”). Washed raw sugar.

Concerning the “Soybean flour–Starch-free alkaline reaction.–Richest in protein of all known foods. High in calcium, phosphorus and potassium. Use in making soymilk, bread, muffins, and cookery for added protein. 3 lbs. 85¢. 6 lbs. \$1.65.”

This ad also appeared in the next 3 issues of this magazine, right after the title page, and in the Jan. 1952 issue (Vol. 3, No. 6).

Note: A surprise to find foods grown in Deaf Smith County being sold as natural, whole health foods almost 20 years before Frank Ford and others founded Arrowhead Mills—for the same purpose. He too was a devout Christian. Is there any connection between this 1951 venture and Frank Ford? Address: 2611 N. Jones St., Chicago 47, Illinois.

208. Rodale, J.I. 1951. With the editor: In defense of the

organic method (Part II) (Editorial). *Organic Farmer (The)* 3(3):17-19, 56-59. Oct.

• **Summary:** Long subtitle: “Our critics often say that if everyone were to practice the organic method there would not be enough organic matter to go around. It is my purpose to show how untrue that statement is.” Address: Emmaus, Pennsylvania.

209. National Research Council (U.S.); Ad Hoc Committee on the Fluoridation of Water Supplies. 1951. Report: November 29, 1951. Washington, DC: National Academy of Sciences, National Research Council. 8 p. 25 cm. [27 ref]

• **Summary:** Foreword: “Fluoridation of public water supplies has been the subject of widespread controversy in recent years. Its advocates have supported it as a public health measure of considerable importance, while opponents have questioned its value and safety. In April, 1951, the National Research Council convened the Ad Hoc Committee on Fluoridation of Water Supplies to review the evidence and prepare an impartial report. The Committee’s conclusions are presented herewith as a service to those professional, governmental, and civic groups who must make decisions for their communities.

“M.C. Winternitz, M.D., Chairman, Division of Medical Sciences, National Research Council.

Page 1 states: “3. The caries-preventive effect of adequate fluoride intake is principally conferred when the dentine and enamel of the permanent dentition are being formed, i.e., from birth up to about the twelfth year. There is evidence that this increased resistance to dental caries is carried over to some extent into later life.

Conclusion (p. 6): This committee favors fluoridation of the water supply so long as: (1) It includes a child population of sufficient size; (2) It obtains its water supply from sources which are free from or extremely low in fluorides; (3) The adjustment is in accord with climatic factors and a constant chemical control should be maintained, conducted under expert dental and engineering supervision by the state board of health. Address: Washington, DC.

210. Old Mill Cereal. 1951. Old Mill cereal (Ad). *Organic Farmer (The)* 3(4):9. Nov.

• **Summary:** A 1/3 page ad. An illustration shows an old stone mill turned by a water wheel. “Guaranteed made from 100% organically grown grains. Natural. Nourishing. Delicious. Old-fashioned stoneground cereal. Contents: Whole wheat, flaxseed, wheat germ, bran, brewer’s yeast, sunflower seeds, dry skim milk.” Address: R.D. 3, West Chester, Pennsylvania.

211. Rodale, J.I. 1951. With the editor (Part III): Agriculture of olden times (Editorial). *Organic Farmer (The)* 3(4):15-17, 54-59. Nov.

• **Summary:** Indeed, as this magazine and related books

have often said, the organic method is thousands of years old. But: "I can safely make this statement, that for every race that conserved their organic matter there were fifty who were profligate with regard to it." Address: Emmaus, Pennsylvania.

212. Rodale, J.I. 1951. With the editor: Do chemicals give greater yields? (Editorial). *Organic Farmer (The)* 3(5):15-19, 59. Dec.

• **Summary:** Subtitle: "This is the fourth part of my series in answer to those who oppose the spread of organic farming. Part I dealt with the question of whether organically produced food will give better health to the eater. The second article covered the question of whether there will be enough green matter to go around if all farms would practice the organic method. Part III discussed the reasons for the decline of old civilizations."

Contents: Introduction (Prof. Ray Koon of the University of Massachusetts). Organic matter is essential. Farmers not taught how to use organic matter. Fight famine with organic method. Yields no higher (in the USA than they were 50 years ago). New varieties from agriculturally primitive countries.

A photo shows an aerial view of the "Organic Experimental Farm." "Yields here are way above those on neighboring farms." Address: Emmaus, Pennsylvania.

213. Day, Ray. 1952. My bees are dying: "Advanced" farming methods are killing the bees of one of California's best beekeepers. *Organic Farmer (The)* 3(6):24-28. Jan.

• **Summary:** C.F. Eitel, blue-ribbon beekeeper and honey producer, has a small farm west of Chico, California. But his future does not look bright. "In ten years I've watched production go from 120 pounds of honey per hive per year to somewhere between 20 and 50." The cause—poison chemicals used in agriculture. Last year alone one aerial spraying killed 100 hives of his bees.

214. **Product Name:** Dr. Bronner's Balanced Mineral Salt (Powdered).

Manufacturer's Name: Dr. Bronner & Associates.

Manufacturer's Address: 447 South Hope St., Los Angeles, California. Phone: 619-745-7069.

Date of Introduction: 1952 January.

New Product—Documentation: Talk with Dr. E.H. Bronner himself. 1990. Feb. 8. He is a rabbi and soap maker, age 82. He introduced this powdered product in Jan. 1949. He was born and raised in Germany, in a family of soap-makers. The first soap plant was started by his grandfather. He is a nephew of Albert Einstein. Neither a PhD nor an M.D. (physician), he has a German doctor of chemistry degree (SSMC: Seifensieder Meister Chemiker, or SMMC: Soap Maker Master Chemist, recognized by the American Chemical Society). He came to America in 1929 and became

superintendent of a large soap plant in Pennsylvania. From 1929 to 1944 he built 3 soap factories in America.

His discovery of this product went through at least 6 steps, but there were two main ones. First, in 1933-34, when Hitler came to power and German imports were unpopular in America, he began to look for potassium salts (potassium hydroxide) for soap making. The imported German potassium source made a better product. He found a natural mineralized dulse (that had been overlooked by others) which he used with good results in his soaps.

Second, in 1938, as a young man with 3 lovely children, he had dental plates—he had lost his teeth. His body had craved calcium since he was a young boy in Germany and he would eat eggs with the shells. In 1941 he read the front-page headlines about "The town without a toothache," Hereford, Deaf Smith County, Texas. The American Dental Association (83rd annual convention, Houston, TX) discovered that the high calcium, phosphorus, magnesium, vitamin D, and fluoride content of the food and water was instrumental in preventing tooth decay. That article plus his own personal experience led him to believe that there was a great need for a balanced mineral seasoning that contains calcium, phosphorus, magnesium, potassium, sodium, iodine, iron—all the minerals in the right proportion. He wanted to make both a seasoning and a mineral / vitamin supplement that was a balanced food. He started by using what the Romans called *sal digestivus* or "digestion salt," a red mineral salt containing potassium, sodium, iron, chloride, found in deposits on the surface of the earth, produced by Chief Chemist God from ocean dulse (a sea vegetable), i.e. mineralized dulse. He uses it to this day as the source of potassium in his mineral seasoning. The only ingredient listed on the original product was "mineralized dulse." This innovative ingredient became the key ingredient in his various products. In about 1952, to add more flavor, he first began to add a powdered HVP (made by hydrolysis of corn, whole wheat, and soybeans), which he bought as powdered HVP (from a company whose name he no longer remembers and which no longer exists) and blended it with the minerals and vitamins in the right proportions. HVP was developed in America in the 1930s and became commercially available in the 1940s. His present source of HVP is a "military secret." This powdered mineral seasoning was his first soy product. It got off to a very slow start. This product (which still exists) has remained basically unchanged since 1952. It and its liquid counterpart are doing well, especially considering the fact that he has no salesmen and no advertising. His original company was located on Hope Street (at 5th and Hope) in Los Angeles, in a 10-story building. In 1955 he got his current building at Box 28, Escondido, CA 92025. From 1955 to 1962 he commuted between the two locations and in 1962 moved everything to Escondido.

He became a rabbi in 1962-63 after a lecture in Watts, the black ghetto near Los Angeles. The 200 blacks applauded

but a white man shouted: “You stole that brilliant speech. You stole it from Rabbi Hillel’s 2,000 year old Torah. You stole it.” Hillel was a top man in the Dead Sea Scrolls. Hillel said that “A great teacher must first a self-supporting, creative handworker be.” Otherwise he can be bought and sold. In about 1963 he changed the name of his company from Dr. Bronner & Associates to All God One Faith, he changed the name of this product to Dr. Bronner’s Balanced Mineral Seasoning, and he began to add spiritual messages to the labels of his products. But only the quart sizes are large enough to contain his full message. The pint is too small to make sense.

From 1949 to about 1970, 90% of his sales were food products. From 1970 on, about 90% of his sales have been his soaps and the food is only 10%.

Today Dr. Bronner is totally blind. In 1944 he buried his wife in central Illinois. Weighing 71 pounds, her jaw bones broken, she had been beaten and starved to death by Jewish people. She was German Catholic and he is German Jewish. In 1941 he lived in Chicago as director of research for a soap and perfume company. A relative wired him for funds (which he did not have) to save their mother from the Nazis. His wife tried to commit suicide, so she was sent to a state hospital where Jewish refugees were in charge. The day before she was to go home, she was forced to do demeaning work by a Jewish doctor. She refused and said “No you damned Jew.” The doctor sent her to a ward where she was further starved and beaten. *Readers Digest* (Feb. 1962) did an article on the subject, titled “The progeny of the same people who get put away.” Now Dr. Bronner began to investigate what was going on and to speak on peace. At the University of Chicago he was captured as a Jew and for 3 months was unconscious and almost dead, having been given shock treatments that burned the back of his eyes. He escaped from that place in Central Illinois and fled to California to forget the whole thing. Between 1971 and 1973 he went blind from the electrical shock. He has two sons: A teacher in Milwaukee, and chemist in Glendale, California. They will continue his business. Though Hitler killed 6 million Jews, the Soviet Communists, especially Stalin, killed 66 million people, including 16 million Jews. Today there is a great danger of a nuclear warehouse exploding; it would destroy the world. Dr. Bronner says that no good, in-depth article has ever been published about his work with food.

Paul Bragg was a brilliant lecturer and personal friend of Dr. Bronner’s. His product was introduced after Dr. Bronner’s, in about 1955.

215. Powell, Thomas. 1952. Our vanishing bees: We don’t have half enough bees to do a good job of crop pollination. *Organic Farmer (The)* 3(6):20-23. Jan.

• **Summary:** At least 50 crops depend on bees for pollination. The number of bees has decreased because: (1) Farmers

have worked to get every acre into crop production, thereby destroying the habitat of wild bees. (2) Chemical pesticides such as DDT, parathion, the arsenicals (based on arsenic), pyrethrum, derris, rotenone, chlordane, and the nicotine compounds, even in very small amounts, can kill bees.

What can farmers do? (1) Set aside some wild land. (2) Do not use any chemicals on crops. (3) Plant crops like sweet clover on unused land. (4) Raise your own colonies of honeybees.

“The lowly bee is the most important insect in the world today.”

Note: As of 2018, vanishing bees is still a big problem in the United States.

216. Rodale, J.I. 1952. With the editor: Do chemicals give greater yields? (Part IV) (Editorial). *Organic Farmer (The)* 3(6):17-19, 55. Jan.

• **Summary:** Subtitle: This is a continuation of Part IV of my answer to those who oppose the spread of organic farming. The first half of Part IV in last month’s *Organic Farmer*.”

Contents: Shrinking crops and midget oranges. Nutrients from natural minerals. Rothamsted (the famous British experimental plot). Organic fertilizers come to the front. Bees and clover. Address: Emmaus, Pennsylvania.

217. *Organic Farmer (The)*. 1952. List your organic foods free in the *Organic Food Directory* (Ad). *Organic Farmer (The)* 3(7):43. Feb.

• **Summary:** “If you have organically grown foods for sale, you are invited to list them without charge in the Organic Food Directory over your name and address. Describe in detail what you have that is organically grown, mentioning how long and in what manner you have applied the method. We will also register overnight accommodations serving organic food. An up-to-date issue of the Organic Food Directory is yours for 25c. It lists producers of organically grown foods in all parts of the U.S. Write today to Organic Food Division, The Organic Farmer, Box 2-F, Emmaus, Pa.” [Pennsylvania].

Note: This is the earliest document seen (March 2020) with the term “organic foods” in the title.

218. *Organic Farmer (The)*. 1952. The chemicals-in-foods investigation: Northwest report. 3(7):58-59. Feb.

• **Summary:** About the cross-country survey of the House Select Committee to investigate the Use of Chemicals in Food Products (James J. Delaney, New York, Chairman). In a series of public hearings in Seattle and Spokane, Washington, they spoke to a wide variety of experts who know all about chemicals but almost nothing about their safety when used in foods. “Thus the final guinea pig will continue to be Mr. John Q. Public....”

219. *Vegetarian News Digest (Los Angeles)*. 1952. Organic

food market opens in New York City. 2(7):27. Winter.

• **Summary:** “Directed by and under the personal ownership of Alec Burleigh, and sponsored by the New York Natural Hygiene Society, an establishment offering organically-grown fruits, nuts and vegetables for the benefit of vegetarians and health-minded individuals has opened its doors at 236 West 10th Street, New York City.

“The new distributing center will be known as Guaranteed Organic Foods Market and will offer exclusively foods grown in this nature and certified as to their source to be authentically cultivated according to the best organic principles.

“Mr. Burleigh has made an intensive study of the subject and during the past few months has established personal contact with many farmers and growers who have dedicated themselves to this method of food growing.

“He will offer all fruits and vegetables in season and will specialize in whole grain products with bread that will be made from completely unrefined flour which has been stone-ground and slow-oven baked. Cookies of the same ingredients will also be on sale to cultivate the tastes of the young in the direction of organically-grown products.”

Note: This is the earliest document seen (March 2020) with the term “organic food” (or “organic foods”) in the title.

220. Pacific Vital Foods. 1952. Display ad: A smart new health food shop comes to 358 So. Broadway—near Fourth St. *Los Angeles Times*. May 12. p. B7.

• **Summary:** A large ad. “Finest unsulphured sun-dried fruits organically-grown. Meat substitutes. Vegetable juices. Pure fruit juices... Whole grains. Natural vitamins. Gayelord Hauser “Wonder Foods.” Health Books...” Address: 358 So. Broadway (near Fourth), Los Angeles.

221. Nichols, Joe D. 1952. A concept of totality. *Texas Bankers Record*. May. 4 p. Reprinted many times and widely distributed.

• **Summary:** This article is: “From an address before the 68th Annual Convention, Texas Bankers Association of Galveston, May 12.”

Contents: The six chief causes of disease (No. 1 is emotional; No. 2 is nutritional). “The greatest cause of disease is, without a doubt, emotional. Worry, fear, anxiety, hate, envy, jealousy—these are the great killers. When any of these emotions take hold of us, we get a conflict and that conflict leads to tension.

“Emotional causes of disease: Heart disease is the leading cause of death in America today... Conflict and tension cause the coronary vessels to constrict: the heart muscle itself does not get enough blood, and the heart cries out in pain. We call this symptom angina, which is functional or inorganic... All organic disease is made worse by emotional upset.” We should do our best to resolve conflicts. The example of an unfaithful husband and a jealous wife is

given. We can run away from a conflict, change the situation that caused it, or accept that situation. “But just saying you accept a situation is not enough. It must be completely accepted in order to stop the conflict and tension. But few people really know how to accept these conflicts. This is done by knowing and practicing the three A’s.”

The three A’s: They are acceptance, approval, adoration or love. One of the great natural laws is The Law of Love. “No man can ever violate any natural law. This is the central idea of our concept of totality... Natural law is simple, self-evident, universal, and inviolate... The law of love is divided into two parts. First, love of God, and second, love thy neighbor. You cannot hate your neighbor and get by with it. He will become a pain in your neck. And it makes no difference how much he may have mistreated you, you still cannot afford to hate him.” “The second great cause of disease is nutritional. But first let me give you something of my own family history.” Joe starts with his great-great-grandfather who lived in South Carolina. The basic idea is that each generation wore out the rich land they farmed, so they were basically forced to abandon (or sell) that land and to move on to new land. His great-grandfather moved to Tennessee, then his grandfather moved to Alabama (he bought 2,000 acres of very rich land in Maringo County, about 40 miles from Selma), “where he did the very same thing his father and grandfather had done.” So his father left the worn out farm and “moved to Ashley County, Arkansas, down in the Mississippi Delta. He bought a rich farm and the same old things started all over again.” But when Joe came of age, there was no place nearby with good soil, so he decided to become a doctor instead of a farmer. “I graduated from the University of Arkansas with an M.D. degree in June, 1932. In November, 1933, I started practicing medicine in Atlanta, Cass County, Texas. This was in the depths of the great depression and Cass County was one of the poorest places in Texas. The average production of corn was 8 bushels per acre. In 6 months I was making more money than the president of the bank who had been there a lifetime. You see, all the land was poor and all the people were *sick!* I did not average fifty cents per office call nor more than one dollar for house calls, but I had *volume*.

“Now I have a farm. I bought one thousand acres of the poorest land in America. Most of it cost only ten dollars an acre. It was as hard as concrete and would hardly grow weeds when I got it. My ambition is to restore the fertility to this worn-out land.”

“Nutritional cause of disease: We live in a country where we have more good doctors, more great medical schools, and more hospitals, more education, and more great scientists, and more money than any other place on earth... But despite all of this, everybody in the country is sick. I do not know anyone anywhere, who does not have some physical disability. Even my own son at the age of three had three bad teeth!... Lat year we had more cancer than

ever before. We had more heart disease. It is the leading cause of death, killing young people before the age of forty all over the land. We had much more high blood pressure, more stomach ulcers, more rheumatism, more diabetes, and more mental disease. Fifty per cent of the hospital beds in America are filled with mental patients... We had more polio last year than ever before. Perhaps we are not so smart after all. Maybe something is wrong here. There are places in the world where these degenerative diseases do not occur. There is a place in India, called Hunza, where a British physician, Sir Robert McCarrison, stayed seven years looking without success for a cancer. These people live to be one hundred and ten years of age and die with their own teeth in their mouths. Seventy year old men run 20 miles a day and think nothing of it. Sir Robert McCarrison said the reason these people have such excellent health is because they do three very simple things that we fail to do. They eat natural food grown on fertile soil, and they eat it fresh... The farmers of America have violated another one of God's Natural Laws—Nature's Law of Return. This states that if you take away from me then you must return something to me." Farmers have taken away from the soil much more than they returned. As a result, the soil has become poor. Poor land grows poor food—poor that is poor in vitamins, minerals, and enzymes, and has proteins of poor quality. "All this means sick people."

"About the time all the land became worn out, along came Science to the rescue. And in this country we have been taught to bow down and worship this word, science. In this instance, the scientist through the chemical trust using the United States Department of Agriculture, the A. & M. Colleges, and County Agents, gave to the farmers commercial fertilizer, N.K.P. [sic, N.P.K.], Nitrogen, Potash, and Phosphate. They said to the farmer, 'If you will put this on your land, we promise it will grow twice as much, and it will put money in the bank,' and of course it was true... This was true for a while; but then the farmer found it took more and more fertilizer and he got less and less in return. Unfortunately N.K.P. does not make land rich. It merely drives out what fertility is present and finally leaves a piece of dead, hard concrete."

"Chemical farming leads to disease: The end result of chemical farming is always disease, first in the land itself, then in the plant, then in the animal, and finally in us. Everywhere in the world where chemical farming is practiced, the people are sick."

"There is one way and only one way to make land rich, and that is just exactly like the good Lord does on the floor of the forest. He puts back into the land three parts of dead plant matter and one part of dead animal matter. That is what leaf mold contains." Natural food. Our daily bread. Grade A raw milk ("We drink raw milk at our home. I believe that pasteurization of milk kills the life of the milk." "The best meats are the internal organs—liver, brain, heart, and kidneys. Fish is good. Seafood is the best"). Fresh vegetables ("Turnip

greens for dinner should be cut after breakfast." Fruit should be ripened on the tree, not in a warehouse or during shipping. Of all the sweets, wild honey is the best).

Conclusion: "Natural food grown on fertile soil, eaten fresh, is the answer to the nutritional cause of disease. Science is no longer science when it attempts to violate God's natural law.

"The restoration of fertility of the soil would go a long way toward solving our health problems; it would also solve many other problems. The problem of floods and water shortages will never be solved until we restore the organic matter to the soil. One hundred pounds of humus holds like a sponge 195 pounds of water. The usual 100 lbs. of Cass County [Texas] soil won't hold 30 lbs. of water. The construction of dams on the rivers will never solve the water problem. This only treats the symptoms of the disease. The underground water level in Texas will continue to fall until we restore organic matter to the soil."

Note 1. Most of the basic themes (and many specifics) of Dr. Joe Nichols' life's work and work with Natural Food Associates is contained in this speech. One big thing changed: He came to view nutritional causes of disease as more important than emotional.

Note 2. This is the earliest document seen (March 2020) by or about Dr. Joe D. Nichols of Atlanta, Texas. Address: M.D., Chairman of the Board, Atlanta National Bank, Atlanta, Texas.

222. Rodale, J.I. 1952. With the editor: Our critics (Editorial). *Organic Farmer (The)* 3(11):11-13, 36. June.

• **Summary:** This editorial begins: "Something about us organiculturists must be annoying the chemical people, for they have suddenly drawn up heavy artillery and begun to pelt us with a vicious barrage, with murderous intent. Up to Up to this point it had been a vague, cold war, with an isolated burst, here or there, but now they are really fighting, and using any kind of ammunition on which they can lay their hands—anything which will go off with a loud bang. It is a war which must have been planned in the offices of a large firm of public relations counsel. It shows all the ear-marks of it." Address: Emmaus, Pennsylvania.

• **Summary:** One chapter is titled: Some technical aspects of fluoridation.

227. Heard, George W. 1952. Man versus toothache. Milwaukee, Wisconsin: Lee Foundation for Nutritional Research. 183 p. Illust. Portrait.

• **Summary:** Written by a dentist credited with the discovery of the ‘town without a toothache, Hereford, Smith County, Texas. An important book, full of useful information, sincerely written.

Page 64: “To begin with my natural-born curiosity has set me to searching out the reasons why so few people in Hereford country [sic, county] came in to get their teeth fixed and why so few ever had toothaches.”

Page 115: The author’s brief advice for building sound teeth is: “Drink plenty of pure, raw milk every day.”

Note: The words “fluoride,” “fluorides” or “fluoridation” appear rarely in this book. On page 83 we read: “How does fluorine get into the water in the first place? My theory is that it is dissolved from the soil by rainwater and carried down to the underground reservoirs by seepage—but that fluorine in inorganic.

“For the reasons stated, I question if the experiments which a great many cities are carrying out—adding sodium fluoride to their drinking water—will get results enough to avert tooth decay. We need not only to prevent caries...”
Address: D.D.S., Hereford, Deaf Smith County, Texas.

228. Forman, Jonathan. 1953. Fluorine on tap: The case against it. *Land (The) (Columbus, Ohio)* 12(1):38-44. Spring.

• **Summary:** Contents: Introduction. Chronic and rampant decay. More brains, less teeth? The “sweet tooth.” Recruits without teeth. To grow good faces. The jaw needs work. Is fluoridation foolproof? Long, smooth words evade the issue. The ethical aspect. Commercial angles (toxic fluorides from the manufacture of superphosphate for fertilizer and

of aluminum). What overdoses do (Fluorine and its salts are strong poisons). Limits of tolerance. (Fluorosis and other unfavorable effects on vitamins and enzymes). Factors of variation. What of the individual? The diabetic, the pregnant. Cooking and concentration. The uncalculated risk (Conclusion).

The article, written by a physician (M.D.), begins: “Fluorine has become a highly controversial element. One reason for this is the tendency, strongly backed by the U.S. Public Health Service, to slip a little of it to everybody in public water supplies, as if it were a cure-all for, or a universally safe preventive of, dental decay.

“Dental disease in terms of number of people involved is certainly the number one disease problem of our nation. Dental caries, as tooth decay is called, is only a phase of dental disease, and is essentially a problem of the children of the White man’s civilization. It takes an ever increasing toll, nevertheless, in terms of the total suffering and complicating diseases, irritations, inflammations, diseases of the soft tissue around the gums, or periodontal disease.

“Here good dental hygiene with its tooth brush and regular visits to the dentist pays big dividends in prevention of this condition, but dental hygiene has little, if any, effect on tooth decay. For a long time the Freshman class at the University of Minnesota has shown each year more D.M.F. (a dental abbreviation for decayed, missing, or filled teeth) in spite of the fact that as a class they came from homes where brushing the teeth and seeing the dentist twice a year is the rule.

“As for tooth decay, there are several factors to be considered, viz: inheritance, climate, sunshine, foods, nutrition, and medication—especially with fluorine.

“The fact that something like one-quarter of the inhabitants of the earth are not troubled by tooth decay makes it appear hopeful that those factors which contribute to dental caries can be so marshalled as to do away with it as a major health problem of the White race.

“Primitive peoples are not, as some say, constitutionally immune to tooth decay, for they succumb promptly when they change to the White man’s diet. They likewise escape dental caries as long as they follow the diet which their own people have evolved through centuries for themselves. The presence of so large a segment of the world’s population which remains free of tooth decay without the aid of any inherited immunity points out the need for an accurate evaluation of those factors provoking the deterioration of the teeth, and an elimination of them through the proper education of our young.”

The conclusion states: “In conclusion, then, fluorine so far as we know is not an essential trace element in the nutrition of either plants or animals. It is a highly toxic substance which, when, used in extremely dilute amounts, painted on the tooth and supplied in food or drinking water, reduces dental caries in the mouths of about one third of

the youngsters. We, however, know so little about its action on the other tissues, on old people, and sick people, that to compel all to drink a water fortified with it is to assume risks that cannot as yet be calculated.

“While willing to accept for the sake of the argument that our engineers can devise machines which will never fail and can never be tampered with by the malicious, the disgruntled, the ignorant, or the saboteur, I insist that it is a form of compulsory medication and not a public health measure.

“This type of medication can be given effectively by the dentist to the individual child who needs it, without saturating the tissues of young and old, sick and well, susceptible and resistant alike, and Without doing the least bit of harm to anyone.

“In the meantime, we can emphasize the most important factor of all in dental decay, that of adequate exercise for our jaws and teeth. We can teach our expectant mothers to get an adequate diet so that our babies may be born without dental deformities, and then with a good diet teeth of sound construction can be built into the mouths of our children. These can then be protected by a quarantine of sweets, by a diet rich in all the essential vitamins and minerals. With good oral hygiene and the application of fluorine to teeth that are soft by painting on directly, We can go a long way in controlling this disease without taking risks, calculated or otherwise.

“When and if any community decides to take the risk involved in fluoridating the public water supply, there should be an adequate preliminary survey of the amount of dental caries among the children, and an adequate yearly evaluation of what is happening to the teeth of the community and more important what is happening to the health of the community, especially as it relates to any increase in the degenerative diseases. Without the surveys and the evaluation, no one will know whether or not the community is getting its money’s worth in terms of the reduction of tooth decay, or whether or not the procedure is doing harm to general health of the community.

“It cannot be emphasized too strongly that if the people of the community accept fluoridation to the neglect of the restriction of sweets, the use of a diet containing all of the essential nutrients, and a sound program of oral hygiene, the community will no doubt be worse off than it is today without fluoridation.

“Adding a minute trace of fluorine is not a cure-all. To get the best results from fluoridation, it should be looked upon as a supplement to an over-all caries control program.” Address: M.D.

229. Hughes, Cyril. 1953. Diet and intelligence: An experiment with ‘difficult’ children. *Manchester Guardian (England)*. Aug. 14. p. B3.

• **Summary:** “Unfortunate heredity and unsuitable

environment are, it is generally agreed, major causes of backwardness in school-children. There is also the factor of food.”

“The Salvation Army has a good record in this respect. Following the success of the reformed diet introduced into The Haven, the Salvation Army children’s home in London, similar measures were adopted elsewhere.

“Fourteen months ago a new diet took the place of the old at Strawberry Fields, the Salvation Army home at Woolton, Liverpool, so that a reasonable time has now elapsed in which to observe results.”

The modified regimen, suggested by Dr. A.B. Cuning, consists of essentially a normal pattern of meals (to try to avoid interruptions), “composed entirely of natural, organically grown food, with plenty of raw salads and fruit, nuts, fresh meat and fish, and something raw, hard, and fibrous at the end of each meal. Canned and processed foods are banned, as are white bread and white sugar, which are particularly bad for the teeth.” The drinking of pasteurised milk is not banned but not encouraged.

Once their early prejudices had been overcome, the children took enthusiastically to the reformed diet. Within two years, the intelligence quotients of the children had gone up. An “equally convincing evidence of success is the observable improvement in the general outlook and behaviour of the girls. The duller ones have acquired much brighter and better attitudes and the formerly maladjusted, anti-social children are, without exception, much more reasonable and co-operative, much less sullen and pugnacious.”

“Since the diet was adopted, growth, general health and dental health have greatly improved.” More details are given.

230. *Let’s Live*. 1953. Pioneer organic roadside store (Photo caption). 21(9):17. Sept.

• **Summary:** This photo shows a roadside food store. “This one of Phil and Sylvia Arena’s near Escondido, California, supplies patrons with natural, spray-free foods.”

231. Organic Food Research Associates. 1953. Organic foods—The new way to health (Ad). *Let’s Live* 21(9):25. Sept.

• **Summary:** This ad (5 by 2½ inches) begins: “We are National Distributors of over 150 different Organic Foods, raised on organic farms and orchards in the U.S. and imported from Turkey, Egypt, Syria, etc.—all rich in health-giving vitamins and minerals.” Also publications: *How to eat safely in a poisoned world* (book), *Organic Foods for Health* (booklet), and *Organic Nutrition* (periodical).

A smaller ad appears in the October issue (p. 25). “Write for a free copy of *Organic Nutrition*.” It is a publication devoted to the Organic Way to Health, sent to members of Organic Food Research Associates. Membership: \$3.00 per year, entitles you also to a 56-page booklet on organic foods, “Organic Foods for Health.” Address: 215 Sixth St., Lorain,

Ohio.

232. Phil's Organic Products. 1953. Good food for good health (Ad). *Let's Live* 21(9):25. Sept.

• **Summary:** This ad (2¼ by 2½ inches) describes foods sold by Phil & Sylvia Arena at this roadside stand on Highway No. 395, 2½ miles south of Escondido. They are: (1) Escondido Valley's famous muscat grapes. (2) Organically grown fruits and vegetables. (3) Pure grape juice (no sugar, no preservatives, no water added). Address: Route 3, Box 786, Escondido, California. Phone: 652-J.

233. Vitamin Products Co. 1953. You can always count on Deaf Smith County wheat flour and wheat berries (Ad). *Let's Live* 21(9):15. Sept.

• **Summary:** This ad (4.75 by 4 inches) states: "We believe the finest wheat available is selected, hard, high protein wheat from Deaf Smith County, Texas."

"We buy this wheat at the farm in Texas, and carry our reserve stock in cold storage to insure against the need for fumigating with poison gas to protect against insects. Such poisons may be absorbed in the grain; without holding the wheat in our own possession between harvest seasons, we have found that such poison treating cannot be avoided with certainty. And we find only about 10% of the wheat grown in Deaf Smith County comes up to the quality of our requirements." Introductory price: 5 lb. of the wheat berries—\$1.00.

Note: Arrowhead Mills is not mentioned. Address: 1. 2023 West Wisconsin Ave., Milwaukee 3, Wisconsin; 2. 5015 West Pico Blvd., Los Angeles 19, California.

234. Gould, Symon. 1953. Vegetarian views and news. *Let's Live* 21(10):44. Oct.

• **Summary:** Discusses: "The latest proof of vegetarian stamina is the amazing feat of David Will Power, of California, a 61-year-old World War I veteran, who is the first to walk from the Pacific to the Atlantic Ocean. He started in the surf at Santa Monica, walked an average of 43½ miles per day for a total of 72½ days, consecutively, and ended up in the surf at Coney Island, New York. Power received his nutritional sustenance from rolled oats, raisins, raw salads of cabbage, lettuce, onions and greens, some whole wheat bread daily with oleomargarine; and depended for his protein on meat substitutes. When I was a guest at the Physical Culture Center in Dansville, New York, where I go each summer to deliver my annual lecture, I witnessed Power's extraordinary exercise demonstration for a full hour. Power lives at Hemet, California, where he conducts an organic farm."

Last month he was snowed under with requests for his publication on protein and meatless recipes. An excellent and popular book is *314 Meatless Recipes or Better Food at Less Cost*, by Dr. [Max] Warmbrand and his wife Ruth. They run

the Florida Health Conservatory.

"The New York Natural Hygiene Society has been in the forefront of those organizations campaigning for wider use of organic foods and has been the first to sponsor and establish an organic market in New York City and also a delivery service." The society "has just issued a Bulletin which lists 44 different sources of supply of organically-produced vegetables, fruits, cereals, nuts, etc." Address: 117 W. 48th St., New York City 36.

235. Miller, Fred D. 1953. The bread that went to college. *Oral Hygiene* 43(11):1508-10. Nov.

• **Summary:** "About three years ago the entire student body of Farleigh Dickinson College, Rutherford, N.J., was started upon a nutritional program by the faculty of its School of Dental Hygiene. Dean of the school is Doctor Roy Dufford Ribble."

The college took steps to remedy the lack of whole grains in the diet "by developing a 100 per cent whole-wheat bread" based on consultation with experts. I had been interested for some time in work done by the Soil Association in England through a campaign for organic farming and whole-wheat bread. The recipe for bread used at the New Jersey college was developed with the help of Lady Balfour, head of the Soil Association, and the recipe of an Altoona, Pennsylvania, housewife who for 28 years has baked this whole-wheat for her family.

"Wheat for the bread is grown by the organic farming method, and the grain relies upon natural organic matter rather than chemical fertilizers. Stone grinding is necessary because heat is not generated in the process, and heat can destroy essential nutrients in wheat. Freshly ground wheat is shipped weekly from Paul Keene's Walnut Acres Farm in Penns Creek, Pa., where it is grown. Whole-wheat flour is perishable and should not be stored."

"College Bread is available to the public in metropolitan New York through Hathaway Bakeries who pay a royalty to the college scholarship fund on each loaf sold." A recipe for the bread is given.

Note: Parts of this article also appeared in the Jan. 1954 issue of *Pennsylvania Dental Journal* (p. 39) and the *Altoona Mirror*. Address: D.D.S., 1808 Third Ave., Altoona, Pennsylvania.

236. National Research Council, Committee on Dental Health. 1953. The problem of providing optimum fluoride intake for prevention of dental caries: A report of the Committee on Dental Health of the Food and Nutrition Board. Prepared by the Subcommittee on Optimum Fluoride Levels. Washington, DC: National Research Council, Division of Biology and Agriculture. 15 p. 25 cm. Publication No. 294. [40 ref]

• **Summary:** Contents: 1. The magnitude of the caries problem versus conventional approaches to its prevention.

2. The efficacy and safety of fluoridation. 3. Vehicles for fluoridation. 4. Summary and conclusions. Literature references.

Foreword: In the spring of 1953 the Food and Nutrition Board appointed a subcommittee under the Committee on Dental Health to study this problem. The names titles, and affiliations of the committee members are given.

“During recent centuries the civilized world has seen an alarming increase in the prevalence of dental decay.” There is no indication that this upward trend has leveled off during the past few decades. The total annual personal expenditure for dental care in the United States is more than one billion dollars. “Although enrollment in the nation’s 42 dental schools has increased almost 50% during the last decade, it is generally estimated that only 25% of the actual dental needs are met through conventional care by the nation’s 80,000 dentists and, hence, that their number would have to be quadrupled if existing dental defects were to be remedied” (p. 1).

So another approach is needed. A remarkable table titled “Fluoride study projects” (p. 3) shows the results of such studies in five communities: Grand Rapids, Michigan; Brantford, Ontario, Canada; Newburgh, New York; Evanston, Illinois; Sheboygan, Wisconsin. The table shows the date each study started (from Jan. 1945 to Feb. 1946), the report period (6-8 years), the age groups studied (generally ages 6-13) and the percentage reduction in decay (range: 70.8% {in the youngest age groups} to 29.7% {in the oldest}).

Conclusion: Recommends fluoridation of the drinking water to a level of 1 part per million which gives maximal tooth health with minimal hazard. Address: Washington, DC.

237. *Organic Farmer (The)*. 1953. Memos to farmers: A new magazine. 5(5):2. Dec.

• **Summary:** “The next issue of *The Organic Farmer* will reach you in a different dress and will, in fact be a different magazine. Effective with the issue of January, 1954, *The Organic Farmer* and *Organic Gardening* are being combined into one larger—and better—magazine. (See the official notice of the merger on page 13 of this issue.) Now, you will be able to get the complete story of the organic method in one place and we here in Emmaus will be able to do a better and more conscientious job of supplying you with the information you need and want about the soil.”

238. El Molino Mills. 1953. El Molino best recipes: Tested in El Molino kitchens. Alhambra, California: El Molino Mills. 132 p. Illust. No index. 17 cm. [4 ref]

• **Summary:** This book is contained in a 13-ring loose-leaf binder “so that you can add your favorite recipes and new ones, too.” Thus the recipes (more than 900) and not the pages are numbered. This is largely, but not entirely, a vegetarian cookbook.

Contents: Equivalents. Products offered by El Molino Mills (specializing in whole grains, flours, and mixes; ask for them at all health food stores; incl. soya beans {whole}, soya grits, soya meal, soya flour, soya powder {for milk}, soy bean flour—raw, alfalfa seed—for sprouts or tea, carob powder, cottonseed flour, flaxseed {whole}, garbanza beans {chick peas, whole}, lentils, mung beans—for sprouting, rice—brown, short or long grain, sesame seed {hulled, whole}, sesame seed meal, seven grain cereal {incl. soybeans}, sunflower seed {hulled, whole}, gluten flour, wheat germ cookies).

Photo of outside of the mill. Brief history of El Molino (started in 1926 by Edward Allen Vandercook). El Molino distributors by state: California—Kahan & Lessin Co. (Los Angeles & San Francisco). Colorado—Health Food Sales Co. (Denver). Michigan—Health Food Distributors (Detroit). New York—Sherman Foods, Inc. and Balanced Foods Inc. (New York City). Oklahoma—Akin Distributors (Tulsa). Washington—Kahan & Lessin Co. and Vital Foods Distributors (Seattle). Illinois—Health Food Jobbers, Inc. (Chicago). Oregon—Nu Vita Foods (Portland). Massachusetts—Food, Inc. (Cambridge). Tennessee—Collegedale Distributors (Collegedale).

Guide to recipes: Breads and rolls (incl. soya flour 100A-C, Cornell triple rich bread with full fat soya flour 101, Whole wheat soya bread—sponge method 107, soya bread 107A), Biscuits. Coffee cake. Muffins. Wheat sticks. Cakes & pastries (incl. Spicy banana soy bars 202D). Cookies. Casseroles (incl. cost and nutritional value of soybeans vs. beef, Cooking soybeans 301, Soybean paste (cooked soybeans that have been drained then put through a food press or sieve, or mashed thoroughly) 302, Soy chile con carne 303, Meatless soy chile con carne 304, Baked soybeans 305). Cereals. Drinks (incl. Milk from soya powder 504, Soya-pineapple tonic 507). Gluten. Hot cakes & waffles. Soups and sprouts (incl. Soya soup 806, Sprouting, incl. alfalfa seed, hulled sunflower seed, radish seed, wheat, mung beans, soybeans, lentils 850-850A. A recipe for Alfalfa Sandwich mentions “alfalfa sprouts”). Allergy recipes and helpful hints (incl. Soya-rice flour banana bread 904, Soya muffins 905, Soya rice waffles 907, Soya-rice flour coffee cake 909, Soya, carob cup cakes 910, Soya cake 910A). Sifting. Skin cleanser. Sour milk. Glossary of products offered by El Molino Mills, with numbers of recipes in which each product is used. Recommended daily dietary allowances (Revised 1948, NRC). Approximate composition of foods—100 grams edible portion.

Note 1. This is the earliest document seen (July 2005) which states that alfalfa seeds can be sprouted for use as human food. This is also the earliest English-language document seen (July 2005) that contains the term “alfalfa sprouts.”

Note 2. This is the earliest document seen (March 2006) that mentions Balanced Foods Inc. (a health-food distributor in New York City).

Note 3. An ad for this book in *Natural Food and Farming* (April 1957, p. 13) states that El Molino Mills is now located at 3060 West Valley Blvd., Alhambra, California.

Note 4. This is the earliest English-language document seen (June 2013) that uses the term “soybean paste” to refer to cooked soybeans that have been drained then put through a food press or sieve, or mashed thoroughly. The term “soybean paste” is also widely used to refer to miso. Address: 3036 W. Valley Blvd., Alhambra, California. Phone: CUMberland 3-3764.

239. Spira, Leo. 1953. *The drama of fluorine: Arch enemy of mankind*. Milwaukee, Wisconsin: Lee Foundation for Nutritional Research. 142 p. 23 cm. [34 ref]

• **Summary:** Contents: 1. What is the matter with these people. 2. I turn into a research worker. 3. The culprit is cornered. 4. The aluminium industry turns vindictive. 5. I join the army. 6. Mottled teeth. 7. Plenty of harm caused by fluorine. 8. Fluorine in the Drinking Water. 9. I receive a Surprise. 10. The General Pays a Visit. 11. Ectodermal Lesions. 12. Brown Pigmentation of the Skin and The Man without Sweat Glands. 13. The Brown Girl. 14. My Desperate Endeavours to Obtain Facilities to Carry Out Animal Experiments. 15. Experimental Rats are Given Fluorine in Their Drinking Water. 16. The Life and Health of Fluoridated Rats are Saved by Pure Drinking Water and Calcium. 17. Gastric and Duodenal Ulcers and Bright's Disease Caused by Fluorine. 18. Actions of Fluorine and Arsenic Identical. Cases of Mental Illness Yield to Treatment Directed Against Chronic Fluorine Poisoning. 19. Case of Nerve-Leprosy is Associated with Chronic Fluorine Poisoning. 20. I Plan Further Research. 21. Fluoridators at Work in U.S.A. and Elsewhere. 22. Otosclerosis: Gradually Increasing Deafness. 23. Old Soldiers Never Die. 24. Postscript. List of author's publications in medical journals.

Leo Spira was a British physician and biochemist. Born 26 Dec. 1899. Died 30 June 1972. This is a typewritten treatise arguing against the fluoridation of drinking water. He summarizes his findings of over 30 years of pioneering research which he ultimately found to be related to fluoride intake. He also coined the term “Spira's syndrome” to refer to a chronic form of hypoplasia of the dental enamel characterized by mottling or brown discoloration of teeth. Other features include nausea, anorexia, vomiting and constipation.

Note: This is the earliest document seen (June 2011) concerning fluoridation of drinking water. Address: M.D., Ph.D. (Medicine), England.

240. *Year book of the American Baptist Convention*. 1953? Ordained ministers and chaplains—Pennsylvania. 1952. See p. 518. *

• **Summary:** In the section titled “Ordained ministers and

chaplains” (p. 473+) under “Pennsylvania—Continued,” and within Pennsylvania in the subsection on “Ministers not in active service” is an entry (p. 518) for: “Morgan, D.T., Walnut Acres, Penns Creek.”

241. *Organic Gardening and Farming*. 1954. The Organic Gardening Clubs of America. 1(1):88-91. Jan.

• **Summary:** This is basically a list of the name and address of each club, alphabetically by state, and within each state, alphabetically by club name. The states are: Alabama (1 club). California (19 clubs). Canada (2 clubs, one in British Columbia and one in Ontario). Colorado (3) Connecticut (1). Florida (4). Georgia (1). Illinois (4). Indiana (3). Massachusetts (2). Michigan (7). Minnesota (2). Missouri (1). Nebraska (1). Nevada (1). New Jersey (4) New Mexico (1). New York (4). North Carolina (1). Ohio (10). Oklahoma (1). Oregon (3). Pennsylvania (1). 242. *Organic Gardening and Farming*. 1954---. Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Jerome I. Rodale, editor and publisher. Vol. 1, No. 1. Jan. 1954.

• **Summary:** Formed by the merger of *Organic Gardening* and *Organic Farmer* in Jan. 1954. Numbering started over at Vol. 1, No. 1. Continued until Vol. 25, No. 6, June 1978, when the title changed to simply *Organic Gardening*. The single most important periodical in launching and developing the organic foods movement and industry in the United States, and eventually the Western world.

J.I. Rodale died on 9 June 1971 of a massive heart attack while taping a guest appearance on the Dick Cavett Show; prior to that he had been listed on the masthead as editor and chief, and his son, Bob Rodale, had been the editor. In Sept. 1971 J.I. was listed as founder, but Bob remained as simply editor until Nov. 1974, when he became editor and publisher. In the years that followed, Bob greatly expanded the magazine's circulation. Based on official audits, the number of paid subscribers for selected years was as follows:

1956–92,032

1960–249,378

1966–343,099

1970–554-385

1976–1,104,711 (the fastest increase in subscriptions took place from 1970 to 1976)

1980–1,335,699

1983–1,399,223 (peak)

1986–1,212,151

Note: Circulation leveled off starting in the late 1970s because (1) *The New Farm* was started in 1979 and it attracted organic farmers away from *Organic Gardening*, and (2) Rodale Press kept raising subscription rates to try to hold down circulation to keep advertising rates affordable for advertisers. As of Oct. 1993, the standard subscription was

\$25.00/year for 9 issues.

In July 1978 the title was shortened to *Organic Gardening*. After Bob Rodale was killed in a car crash in on 20 Sept. 1990, Mike McGrath took his place as editor in chief of *Organic Gardening* with the February 1992 issue. Bob Teufel took over as CEO of Rodale Press. An excellent 50th anniversary retrospective issue was published in May/June 1992. Address: Emmaus, Pennsylvania.

243. *Pennsylvania Dental Journal*. 1954. New bread developed. 21(1):39. Jan.

• **Summary:** This article is a summary of #87441.

244. Rodale, Robert. 1954. Who pays for agricultural research? *Organic Gardening and Farming* 1(1):16-20. Jan.

• **Summary:** Subtitle: "Upward surge of industrial grants to experiment stations must not be allowed to interfere with the tenets of independent agriculture."

"One of the most potentially dangerous chemicals that has appeared in recent years is Systox. It is an insecticide that is actually taken up into the bloodstream of the plant. The very sap of the plant becomes deadly poisonous.

"Systox has captured the imagination of many agronomists because it can't be washed off by rain, and because it is apparently one of the most effective insecticides. It is apparent that it must be tested under the most rigid conditions and over a long period of time—and before it is sold it should be approved by a completely impartial group.

"The record of the Maine Experiment Station shows that it has received a \$750 grant from the Chemagro Corporation 'for testing Systox on potatoes.' The New York State Experiment Station has also received \$750 from Chemagro 'for the evaluation of certain compounds as insecticides and acaricides on fruit and vegetable table crops.'"

Note: Acaricides are pesticides that kill members of the arachnid subclass Acari, which includes ticks and mites (Source: Wikipedia: Feb. 2015).

"I am not saying that anything is remiss in the giving or the handling those two grants. I have not investigated the program of research that has been set up. But I do maintain that Systox is such a dangerous item that its evaluation should not be made entirely at the expense of and under the control of the company that is going to market it."

Tables show: (1) Report on agricultural experiment stations. Sources of income, 1939-1952. The total federal funds available has grown from \$6.5 million in 1939 to \$13,200 million in 1952.

The total state appropriations has grown from \$9.2 million in 1939 to \$40,346 million in 1952. The Special endowments, industrial fellowships, etc. has grown from \$469,000 in 1939 to \$5.0 million in 1952. Growth in this latter category, largely from chemical companies, has been the fastest.

(2) Report on agricultural experiment stations, 1952.

Shows the amount of income from each of the three sources for each agricultural experiment station in the United States.

Note: Only two states have two agricultural experiment stations: Connecticut (state and Storrs) and New York (Cornell and state).

245. Powell, Thomas. 1954. Sir Albert Howard: A reappraisal. Fast-moving events in agriculture bring a new prominence to the work of its creator. Part I. *Organic Gardening and Farming* 1(2):24-27. Feb.

• **Summary:** This article begins: "The late great naturalist, Aldo Leopold, once remarked, 'The outstanding scientific discovery of the twentieth century is not television or radio, but rather the complexity of the land organism.'"

"We heartily echo those sentiments. The relationships between the soil and all that compose it and react with it are now being recognized, thanks to the organic movement, as the most vital consideration of modern times. Organics is spot-lighting the fact that the world's future, our best hope of building a healthy, happy human race, are inextricably interwoven with the well-being of the soil. Its ideas are spreading with astonishing speed—indisputable proof of how much they are needed.

"Its detractors are losing ground daily. But as their cause becomes weakened, they reiterate with increasing fervor the old argument: organics is unscientific. It has, they say, no basis in fact or in competent research.

"The more this argument is repeated, the more important it becomes to study the foundation on which organic gardening and farming rests."

Illustrations (line drawings) show: (1) A portrait of Sir Albert Howard. (2) A village in India with men at work in the fields. On the left are cattle and barns surrounded by a fence. On the right are 6-7 long, low uninclosed compost heaps.

Note: This is the earliest document seen (March 2020) that contains the word "Organics."

246. Cavin, Patty. 1954. Good looks are 'internal.' Beauty forever. *Washington Post, Times Herald*. March 25. p. 49.

• **Summary:** "Food plays an important part in Miss Swanson's beauty routine." For lunch she has a crisp green salad of raw vegetables, topped with a liberal portion of lemon and soya bean oil dressing. And she always has several pieces of organically grown wheat bread and butter; she makes her own bread. A photo shows Gloria Swanson smiling.

247. Powell, Thomas. 1954. Sir Albert Howard—A reappraisal: The problems that faced the Howards throughout their work were not unique, but their approach to them was. Part II. *Organic Gardening and Farming* 1(3):26-28. March.

• **Summary:** Part II of this article begins: "Every so often,

history tells us, a man appears on the world scene who is far ahead of his time. Blessed with the right opportunities—and the genius for taking full advantage of them—such a man can forge magnificent advances in the well-being of mankind.

“Sir Albert Howard was, more so than any other man in history, in tune with Nature. For this we may be everlastingly grateful. In the words of Lady Eve Balfour, ‘Always Sir Albert looked to Nature for guidance, appealed to her for a verdict, cited her as the authority.’

“It is perhaps hard for us to appreciate just how novel his ideas were. In his early days, all emphasis was being turned to chemical fertilizers, insecticides, the search for pathogenic organisms and the like. But Sir Albert directed his tireless energy toward the evolving and testing of an entirely new concept of soil, plant and animal health. More, his approach was all-embracing: he believed in following a crop from its seed through all the complexities of growth, harvesting and preparation for the table.”

248. *Natural Food and Farming (Atlanta, Texas)*. 1954-1995. Serial/periodical. Edited and published by Joe D. Nichols, M.D., of Natural Food Associates, Atlanta, Texas. Vol. 1, No. 1. April 1954. Monthly.

• **Summary:** The official publication of Natural Food Associates, Inc. (an advocacy and membership organization with chapters in many states), this was an early publication to advocate natural and organic foods (free of artificial ingredients / additives and unnecessary processing), organic farming, and biological pest control. They strongly opposed fluoridation, immunization, poisons in foods, and the use of agrichemicals such as pesticides (such as DDT and chlordane), herbicides, and chemical fertilizers, pasteurized milk, synthetic vitamins, etc. They do *not* advocate a vegetarian or meatless diet. Their logo shows a leaf going through the three stages of growth, decay, and rebirth. Across the bottom is printed: “Better foods from living soil.” Any important early contributor and supporter (with advertising) was Royal Lee, D.D.S., and his Lee Foundation for Nutritional Research (Milwaukee, Wisconsin, and Los Angeles, California).

The last issue published was Vol. 41, No. 2 (Aug. 1995).

On 10 June 1988 Natural Food Associates Newsletter began publication. Bill Francis was executive director. Each issue was 4 pages long. In the first issue, a financial statement of assets showed that NFA had \$1.429 million in assets.

On 31 Jan. 1990 Natural Food Associates Annual Newsletter began publication. Bill Francis was still executive director. NFA’s magazine was still being published.

Mergentime. 1992. *Natural Foods Merchandiser*. Dec. p. 30. In 1954 Joe M. Nichols, M.D., “unveiled *Natural Food & Farming* magazine as a forum for nutritional education and the fledgling organic industry. ‘We have truth on our side,’ he wrote in his first editorial, ‘and with God’s help we

will succeed in bringing the truth to the people.’”

Note 1. This is the earliest document seen (March 2020) that mentions “Natural Food Associates.” This periodical was the official organ of that group.

Note 2. This is the earliest periodical seen (March 2010), published in the USA, with the term “Natural Food” (or “Natural Foods”) in the title. The earliest worldwide was: *Natural Food* (London) (1890-1896).

Note 3. This is the earliest periodical seen (March 2020) that is part of the natural foods movement or industry in the United States (after about 1890). Address: Atlanta, Texas.

249. Lee Engineering Co. 1954. Stone grind your own flour (Ad). *Natural Food and Farming (Atlanta, Texas)* 1(1):16. April.

• **Summary:** A 1/6 page ad. “Enjoy finer flavor and greater nutrition of whole wheat grain—freshly ground!”

A photo shows the compact electric mill. With the mill, one can also order: “Deaf Smith Flour, 5-lb pkg. Postpaid, Only \$1.50.”

Note: This ad also appeared in the May 1954 issue (p. 12), and in the June 1954 issue of this magazine (p. 12). Address: 323 W. Wisconsin Ave., Milwaukee 3, Wisconsin.

250. Lee, Royal; Stolzoff, Jerome S. 1954. The special nutritional qualities of natural foods. *Natural Food and Farming (Atlanta, Texas)* 1(1):4-5, 7, 17. April.

Address: 1. D.D.S. Both: Lee Foundation for Nutritional Research [Milwaukee, Wisconsin].

251. *Natural Food and Farming (Atlanta, Texas)*. 1954. Letters to the editor. 1(1):2. April.

• **Summary:** “New directors: Could you please send me a list of the new NFA [Natural Food Associates] directors elected this year.” A.H.D., Blackwell, Oklahoma.

“Eastern Zone—John Pearmain of Boston and Gloria Swanson of New York City were re-elected and J. Anthony Barone of Detroit [Michigan] is a new director.

“Central Zone—Ernest Halbleib, McCabb, Illinois; Anthony Jackson, Assumption, Illinois; Dr. Royal Lee, Milwaukee, Wisconsin, and Robert Rowe, Mt. Zion, Illinois.

“Mountain-Pacific Zone—Re-elected: Dr. Joseph Feinberg, Portland, Oregon; Mrs. James Massie, Grants Pass, Oregon, and Dr. John Potts, Walla Walla, Washington. New directors are, Lee J. Anderson, Cozwhella, California; R.W. Dickenson, Anaheim, Calif., and Wayland Gilbert, Sultana, Calif.”

252. *Natural Food and Farming (Atlanta, Texas)*. 1954. Questions and answers about Natural Food Associates. 1(1):12. April.

• **Summary:** “What is NFA? N.F.A. is a non-profit educational organization of people who are interested in natural food grown on fertile soil.

“When was NFA organized? Jan. 1953.

“Who can belong to NFA? Anyone. There are no restrictions on membership.

“How can I become a member? By sending in an application blank, along with \$3.00, to NFA, Atlanta, Texas. Included with membership is a year’s subscription to the official publication *Natural Food and Farming*.

“What is the official publication of NFA? *Natural Food and Farming Magazine*. This name was adopted in Feb. 1954.

“What is the purpose of NFA? 1. To teach the value of natural food grown on fertile soil. 2. To tell the people how and where to get the food.

“Is there an annual meeting for NFA members? Yes. The conventions in 1953 and 1954 were held at the Normandy House Restaurant, Chicago, Illinois.

“Where can NFA members obtain better foods? From other NFA members. Consult the directory and advertisers in the monthly magazine.

“Where is the magazine published? The monthly magazine is published at Jonica Farms, Atlanta, Texas. The printing is by the Shreveport Journal, Shreveport, Louisiana.

“Where do NFA members live? NFA now has members in each of the 48 states, Canada, England, and Ireland.”

253. Natural Food Associates. 1954. Directory listing (Ad). *Natural Food and Farming (Atlanta, Texas)* 1(1):16. April.

• **Summary:** The Directory in this first issue of the magazine begins: “Rate: \$12 per year for four lines—additional lines \$3 per line—payable to Natural Food Associates.” Entries include:

“Organically grown citrus fruit in season. Normal season, Dec. thru June. Write for prices. L.P. DeWolf, Crescent City, Fla. [Florida].

“Send card for price list of organic whole grain flours, cereals, etc. Paul Keene, Walnut Acres, Penns Creek Pa. [Pennsylvania].

Note: this short entry / ad ran for the entire year. Walnut Acres did not run any other ads in volume 1 of this magazine.

“Azomite Soil-Ayd (Catalyst). A natural mineral rock soil conditioner. Mined and milled by AUMCO, Sterling, Utah.

“For a variety of naturally-grown foods, cereals, mixes, fruits, nuts, etc., write for free list. Ella Hanford, Hershey, Pa.

“Serving N.Y. City area with organic fruits, vegetables, nuts and bread. Organic Food Market, 236 W. 10th St., New York 24, N.Y.

“Wanted: Organic Farm Products, April to Nov., to sell at our roadside farm market. H.E. Abbott, Woodbury (phone 120) Conn. [Connecticut].

“Raisins: Sweet, seedless, grown without chemicals. Write for prices to grower. Gilberts Organic Farm, Sultana,

Ca. [California].

“Organically grown, whole grain flours, cereals, baked goods, etc.; shipped nation wide. Write for free catalog. Stone Mill Products, 1014 Franklin St., S.E., Grand Rapids, Michigan. Department NF.”

“Books lent. No obligation to buy. Postage only charge... Ask for list. Mildred Hatch, St. Johnsbury, Vermont.”

“Certified Organically Grown” produce, dates, pecans, grapefruit and grapes. Prices on request. Lee Anderson, Covalda Date Co., Hy 99 [Highway 99], Coachella, Calif.” These advertisements are divided into the following categories: Organic foods (listed alphabetically by state), juicers, books, miscellaneous, ladybugs, business opportunities, soil building. Within each category, they are organized by state. About two-thirds of the ads are for organic foods (especially fruits), with California (9 ads), New York (6), Illinois (4), Pennsylvania (4), and Wisconsin (4) having the most ads.

For example: Lee Anderson of the Covalda Date Co. (Highway 99, Coachella, California), is selling “‘Certified organically grown’ produce, dates, pecans, grapefruit and grapes. Prices on request.

Pacific Sunblest of Orange, California, is selling “Oranges—Organically grown by us for 25 years.”

Health Research, Mokelumne Hill, California, offers “25 lbs. assorted organically grown fruits and nuts—\$12.50. F.O.B. Health Book Catalogue free!”

“Barton Whole Foods, organically grown for 38 years. Naval oranges, cold-pressed olive oil, dried fruits and mountain apples in season... Porterville, California.

Walter Buschman of Juniper Farm, Sugarloaf, Orange Co., New York, is selling Bio-dynamic (BD) whole wheat flour and cereal, BD rye flour and cereal, BD cornmeal, BD white pastry flour, organic oatmeal and soybeans, and Cheddar cheese made from unpasteurized milk.

Helen and Scott Nearing of Harborside, Maine, are selling their book *Living the Good Life*, a “how-to-do-it book for Vegetarians and Organic Gardeners. 210 pages. Photographs. \$3.50.”

In Pennsylvania, Paul and Betty Keene of Walnut Acres Natural Foods in Penns Creek are “One of the first in the supplying of organic and other natural foods direct from the farm where grown and milled. One of the most complete lines in the country, conscientiously chosen.”

In Texas: “5 lbs. Deaf Smith County stone ground 100 per cent organic flour \$1.50 postpaid. Write for list of organic foods. Natural Organic Foods, Atlanta, Texas.”

Many of the ads are from individuals who grow and sell organic foods. One is from L.E. Schnoor (Comptonville, California), who sells ladybugs for natural insect control. There are ten ads for soil building materials. At the bottom right corner of p. 23 is a box that states: “Eat organic food.”

Note: This ad also appeared in the next issue (May 1956, p. 18-19).

254. Nichols, Joe D. 1954. President's page. *Natural Food and Farming (Atlanta, Texas)* 1(1):3. April.

• **Summary:**
 “God grant me the serenity to accept the things I can not change. The courage to change the things I can—and the wisdom to know the difference.

“We in Natural Food Associates have set out to change the eating habits of America. This my friends is a colossal task, and will not be done overnight. We recognize the magnitude of our

task. We think we know our friends and our foes. This latter group has great power in many high places. They have plenty of money to form ‘Foundations’ with slogans of ‘better nutrition’ with which to mislead the public. We do not underestimate their power. However, we are also convinced that we have the truth on our side, and with God’s help we will succeed in bringing the truth to the people.

“Our new magazine is our greatest weapon in disseminating the true facts about Natural Food and Farming. If we are to succeed, every member of Natural Food Associates must support this magazine to the utmost. What can you, as an individual do to help? We have many letters asking this very question. I want to suggest a few—you will think of many more:

“(1) Each of you must become a magazine salesman. We will do our utmost to give you a magazine that will be easy to sell.

“(2) If you can write, send us an article, a success story on organic farming.

“(3) We want short, interesting letters to the editor.

“(4) We want membership news items, do not make them too long.

“(5) We need organic advertising. Our financial solvency depends upon this. If you have organic food to sell, use our columns to tell the people about it. People write us every day asking the question, ‘Where can I get organic food?’

“(6) Form organic clubs. Try to interest the civic leaders, especially in the smaller towns. Ours must be an educational movement from the grass roots up.

“(7) Help us get advertising from legitimate farm

machinery manufacturers, and organic fertilizer firms. How can we teach farmers the organic way unless they know where to get organic materials?

“(8) Patronize the advertisers. Let them know you saw their ad in our magazine.

“Our membership is growing daily. If all of us, and that includes your president, can put aside personal ambitions, and work together for the success of Natural Food Associates—we can succeed.”

A portrait photo shows Joe Nichols, M.D. in a suit and tie. Address: M.D., President, Natural Food Associates.

255. Pearman, John D. 1954. A backyard salad garden. *Natural Food and Farming (Atlanta, Texas)* 1(1):8-11. April.

• **Summary:** “This is the story of Mr. Eddy’s back yard garden, Bio-Dynamically grown, a garden that can be duplicated by any city or suburban dweller who has a space 10 feet square where the sun shines the greater part of the day.”

“During the past five years the Eddys have consumed no sugar or commercial flour products. They have, however, used more than five pounds of honey each week.

“The Eddys were married in 1913 and became interested in gardening 3 years later. They chemically fertilized gardens for the next 30 years, then did organic, compost gardening for 2 years, and Bio-Dynamic gardening for the past 5 years, raising vegetables, herbs, and flours for themselves at their farm garden at Readsboro, Vermont, 2,200 feet above sea level.

“Last year, 1953, was the first year they lived all year at East Providence [Rhode Island], at their home at 51 Outlook Avenue.”

Mrs. Eddy makes all of her baked goods with Bio-Dynamic whole wheat flour and honey. The Eddys spray “BD (Bio-Dynamic) solutions directly in the foliage” of their plants and they apply BD compost.

“In planning your garden Eddy says that: ‘A compost pile should be constructed at least 3 months before planting time. One unit of Bio-Dynamic Starter with complete instructions sufficient for making a ton of compost, may be purchased from the Biochemical Research Laboratory, Three Fold Farm, Spring Valley, New York, for \$1.25.

Overhead photos show the Eddy’s garden on (1) 20 May 1953. (2) 21 June 1953. (3) 23 Aug. 1953.

256. Stahr, Alden. 1954. *The Web of Life*, by John H. Storer: A comprehensive review of the book. *Natural Food and Farming (Atlanta, Texas)* 1(1):6, 13-15. April.

• **Summary:** A long, excellent review, with many quotations, from this book on basic ecology, food and soil. The book is published by Devin-Adair, New York, NY.

How the land gets its water: “While the sun’s rays apparently have little effect direct on air temperature, they warm the surface of the earth and oceans very noticeably.

This heat is then radiated back to warm the air.

“The result is that air near the earth’s surface is usually much warmer than the air high overhead. This added warmth has two dramatic effects on air. It not only gives it greater power to absorb moisture, but under its influence air expands and becomes lighter. Light air rises through heavy cooler air above, while cool air sinks to replace it at the surface. So there is a steady circulation of air... As warm air rises from the ocean surface, it is laden with water vapor that it has absorbed. When it is cooled overhead its moisture-carrying power is reduced and some of this vapor condenses into tiny droplets of water or ice.”

Two factors control the movements of the earth’s blanket of air, higher temperature at the equator and the spinning of the earth on its axis. Our prevailing winds blow from west to east, laden with moisture from the Pacific Ocean. Each mountain range boosts the wet winds high, precipitating their moisture.

The amount of rain has a dramatic effect on the fertility of the soil. “When the land receives too much rain it tends to rob the soil... leaching away the dissolved minerals.”

257. Swanson, Gloria. 1954. Glorious living. *Natural Food and Farming (Atlanta, Texas)* 1(1):2. April.

• **Summary:** “My inquisitive mind has taken me into many worlds, up many paths; my interests are boundless and therefore I have never understood the word ‘bored’ or the phrase ‘killing time’ and, as a consequence, I live to the fullest—I have no time for anything from which I can’t learn something. My reading consists of philosophy, metaphysics, religious philosophy, avenues of parapsychology, technical books on soil conservation, synthetic foods versus organic foods, political controversies (not as much now as formerly) and non-fiction. I have no interest in novels (I’ve lived a thousand) nor in ‘whodunnits’—there is enough real tragedy without having to seek it; nor the funnies (because they don’t make me laugh), nor gossip columns (because I’m too busy with my own business and have no time for others).

“This pretty much takes care of the spiritual and the mental.

“And now for the physical, I believe that I am physically what I inherited from my forebears (fortunately healthy peasant stock—I claim no royalty), And What I Eat. I believe if my body is clean inside as well as outside—healthy, in other words—nothing can assail it, for it has the infinite capacity to throw off, and out, all things foreign to it and, given half a chance, will work miracles.

“Well, to get down to the practical—the business of daily living, I find it a real chore. When I was a little girl, this business of eating was simple. (I have a sneaking hunch that is why I have withstood the rigors of a very hectic life.) Milk was as the cow gave it—the cow’s diet was as nature made it. It was not a synthetic world—a banana was not gassed, nor an orange artificially colored—male birds were not castrated, nor

given female sex hormones. Natural food was the normal, not the exceptional article. (Now just try and find something to eat that isn’t dyed, bleached, preserved, gassed, sprayed, softened, etc., etc., etc., ad infinitum.)

“I read the Delaney Report of 1952 (a committee formed to investigate our antiquated food and cosmetic laws) and didn’t eat for three days. (Incidentally, not eating for a few days never hurt anyone. What does an animal do when it isn’t feeling well?)

“Once a year, for a week or ten days, I have a housecleaning. I house-clean Spring and Fall in my apartment—why shouldn’t I do the same for my most precious house in the world, my body, my temple? I can move out of my apartment if it becomes ramshackle, but I can’t move out of my body at will... as yet.

“As for exercise...”

Gloria is age 54. Address: New York City.

258. Forman, Jonathan. 1954. Fluorine on tap: The case against it. *Natural Food and Farming (Atlanta, Texas)* 1(2):8-15, 17. May.

• **Summary:** A closely reasoned argument, by a physician, against the use of fluorine in tap water. The U.S. Public Health Service favors the addition of fluorine to all drinking water to prevent dental decay.

Note: This is the earliest document seen (Sept. 2013) on fluoridation of drinking water in this periodical. Address: M.D., Secretary, Ohio State Medical Assoc.; Editor, Ohio State Medical Journal; Past President of Friends of the Land.

259. Lager, Mildred. 1954. Nutritional news and recipes: If you are smart. *Let’s Live* 22(5):14-15, 45. May.

• **Summary:** “There is no term as misunderstood as health foods. To most persons it is an oddity, a pill, something to stay away from until you are forced to use it. Health foods are our natural foods, those that have more nutritional value because they have not been refined, bleached, highly processed, etc... Health food stores are one step ahead in nutrition, and the person who knows the value of natural foods is also one step ahead.” Also discusses complete and incomplete proteins. Soybeans are “partially complete proteins.” They are “vegetable proteins and while they are complete some of the amino acids are inadequate in amounts.” The complete proteins are expensive animal proteins, while the incomplete are generally the inexpensive vegetable proteins. “An incomplete protein may be made more complete by the addition of a food high in the essential aminos: for instance, adding milk to cereals... It is very easy to get adequate amounts of essential amino acids if you know your proteins.

“One of the cheapest protein fortifying foods is the soybean and it may be added in many ways. If soy grits are added to a vegetable soup instead of barley you have a better protein dish.” Discusses the symptoms of protein

deficiencies, and gives recipes. Praises “Nut butters” as concentrated foods. “Health food stores carry almond [almond butter], cashew, pecan as well as peanut butter. Try eating them on apples, celery and salad vegetables. They are delicious.” A small portrait photo shows Mildred Lager. Address: Los Angeles, California.

260. Swanson, Gloria. 1954. Glorious living. *Natural Food and Farming (Atlanta, Texas)* 1(2):2. May.

• **Summary:** “Washington [DC]—Actress Gloria Swanson, still glamorous and enviable slim at 55, told a Washington audience that she believes beauty is strictly internal. ‘It comes from within, and concerns one’s circulation, and I don’t mean the newspaper kind,’ she said.

“You too may find good health if you start the day as does lovely Gloria, with a helping of Irish sea moss and with your own bread of organically grown wheat. The last is raised in good fertile soil without the use of chemical fertilizer or insecticide sprays.”

“Luncheons and dinners consist of about a dozen different raw green vegetables, doused with lemon juice and soya bean oil and accompanied with the wheat bread, sometimes a cooked vegetable, and lamb, liver, or fish. Fresh fruit makes up the dessert.” Address: New York City.

261. Trautmann, Henry. 1954. Food for thought. *Natural Food and Farming (Atlanta, Texas)* 1(2):2. May.

• **Summary:** “Foods are only as good as the soils on which they have been raised.” Address: M.D. [Madison, Wisconsin].

262. Trautmann, Henry. 1954. Basic concepts of health: A re-examination of man’s environmental and nutritional handicaps. *Natural Food and Farming (Atlanta, Texas)* 1(2):4-7. May. [23 ref]

• **Summary:** Contents: Introduction. New diseases on the march. The death of the soils. The harvest: malnutrition. Embalmed foodstuffs. Protein poverty. The doctrine of true fertility. Restoration of organic materials. The attack on human malnutrition. Nature’s chemistry—The guide to prevention. Multiple therapy for multiple deficiencies. Working in harmony with nature. To summarize.

“The importance of nutrition in preventive medicine is coming to the fore, although its application is little appreciated or understood by a large proportion of the medical and pharmaceutical professions.”

Some statistics show the health of people in the USA to be improving, while others show the opposite. “The difference can be reconciled only when we remember that the infectious and contagious diseases are under control. Against this positive gain must be placed the ascendancy of degenerative diseases which impair the prime of life—the cardio-vascular diseases, nervous ailments, rheumatism, arthritis, gastro-intestinal disturbances, cancer, mental

diseases, allergies, and others.”

We must seek the causes of our ailments in the destruction of the earth’s thin layer of topsoil and in the loss of her ground waters. “More hospitals, more surgery, more experts, more remedies, more chemicals are but weak defenses against Mother Earth in revolt. We cannot break the laws of nature.”

Contains an interesting bibliography of 23 books. Unfortunately this bibliography contains only the author and title of each book; the year of publication, publisher, and number of pages is missing. Moreover, the names of at least three authors are misspelled. Address: M.D. [Madison, Wisconsin].

263. *Natural Food and Farming (Atlanta, Texas)*. 1954. Protest use of DDT for gypsy moth: Organic gardeners oppose spray as being injurious to life. 1(3):7. June.

• **Summary:** This article is reprinted from the May 5, 1954, issue of *The New Milford Times* (New Milford, Connecticut). The U.S. Dept. of Agriculture (USDA) is the main federal agency using DDT.

1945—DDT was released against the advice of investigators who found that DDT was dangerous for all forms of life.

1950—More than 200 million pounds were used in agriculture alone.

1951—323 million pounds were used. Yet the U.S. Public Health Service pointed out: “DDT is a delayed action poison. Due to the fact that it accumulates in the body tissues, the repeated inhalation or ingestion of DDT constitutes a distinct health hazard.”

264. Swanson, Gloria. 1954. Glorious living. *Natural Food and Farming (Atlanta, Texas)* 1(3):2. June.

• **Summary:** “I have just returned from Detroit [Michigan] where I was on a health lecture tour with Paul Bragg.

“Michigan is right on its toes in the fight and they now have five more farms going in for organic methods this year in and around Detroit—they are organizing organic garden clubs too.”

“Foods for Life, in Glendale (California) are supplying quite a number of health foods as well as regular stores now, in and around Los Angeles, with year round fresh produce.

“It is Mr. Bragg’s intention and mine, to go to 20 cities, starting right after Labor Day and finishing around Thanksgiving. Our idea is to get as many big cities as possible to encourage organic farming and to establish a central market where the organic farmers can bring their produce.” Address: New York City.

265. Albrecht, W.A. 1954. Diseases as deficiencies via the soil. *Natural Food and Farming (Atlanta, Texas)* 1(4):6-7, 15.

• **Summary:** Contents: Introduction (“The word ‘disease’

like its counterpart the word 'health,' still challenges our definition of it"). Higher animals make higher demands for good nutrition. Protein services in nutrition are little known. Ample nutrition cure for tuberculosis, deficient nutrition its cause? Animal choices of grazing areas are according to soil differences. Knowledge comes slowly, that about the soil, more so ("Soil fertility is the foundation of the pyramid of all life").

Note: Dr. Albrecht earned his PhD degree from the University of Illinois. His research has focused on the soil's service in the nourishment of life. Address: PhD, Prof. of Soils and Chairman, Dep. of Soils, College of Agriculture, Univ. of Missouri.

266. Gould, Symon. 1954. Vegetarian views and news. *Let's Live* 22(7):44. July.

• **Summary:** The American Cancer Society emphasizes cure, not prevention. They seem to be little interested in the possible causes of cancer—such as nutritional deficiencies, devitalized foods, and chemical poisons in our food and environment. Of course, the society "would wave aside the example of the Hunza Tribes in Northern India who live on organically-grown foods, practically 95% vegetarian diet, and among whom there has never been found a case of cancer, according to one British doctor, Dr. Wrench, who lived among them for almost 30 years."

Tells the story of how in 1910 in London, Mahatma Gandhi, a young lawyer from India, came upon a small pamphlet, "A Plea for Vegetarianism," by Henry Salt. He states in his autobiography that he was much impressed by it. The eloquent Salt started a chain of events that resulted in Great Britain giving independence to India. Address: 117 W. 48th St., New York City 36.

267. *Let's Live*. 1954. Fluoridation facts. 22(7):4. July.

• **Summary:** "At Akron, Ohio, fluoridation was started and stopped within 90 days. At Sheridan, Wyoming, fluoridation was discontinued after two years' operation. At Fort Worth, Texas, fluoridation never got started because the city council rescinded its favorable action after the issue was degraded by the opposition to a level at which the dental society withdrew its active leadership."

268. *Let's Live*. 1954. Fluoridation loses in San Diego [California]. 22(8):45. Aug.

• **Summary:** "By a decisive vote June 8 this city has stopped fluoridation of its drinking water. The vote was 46,976 against fluoridation and 41,382 in favor of it."

269. Lee Foundation for Nutritional Research. 1954. Books that give you inside information on how to keep well (Ad). *Natural Food and Farming (Atlanta, Texas)* 1(6):2. Sept. [10 ref]

• **Summary:** A full-page ad. "These books show you how

to avoid many traps in the modern diet of Foodless Foods." Lists 10 books plus 4 portfolios of selected reprints: (1) For the housewife. (2) For the layman. (3) For the doctor. (4) For the agriculturist. Address: 2023 W. Wisconsin Ave., Milwaukee 3, Wisconsin; 4015 West Pico Boulevard., Los Angeles 19, California.

270. Kidson, Dick. 1954. Farmers Market today. *Los Angeles Times*. Oct. 26. p. 4.

• **Summary:** Crambamboli is a new type of strawberry topping which is "made at Oceano by a Danish couple of strawberry fanciers named John and Grudun Grell."

"It comes from organically grown strawberries. By that they mean that no commercial or synthetic fertilizers are used on their land. The soil is enriched only by organic materials."

271. Walnut Acres. 1954. Classified ad: Walnut Acres. *Organic Gardening and Farming* 1(10):96. Oct.

• **Summary:** In the section titled "Certified organically grown": "Stone Ground Flours and Cereals: Modestly speaking we've been at this longer than most! We have never used chemical fertilizers or poison sprays on Walnut Acres Organic Farm. We grind fresh daily, to your order only. 100% whole wheat flour, rye flour, cornmeal, muffin meal, wheat cereal or rye cereal—your choice. Trial order—5 lbs. 75¢. Postage Extra. Price list shows great variety of seeds, dried fruits, nuts, and other natural foods. Paul Keene, Penns Creek, Pa." [Pennsylvania]. Address: Penns Creek, Pennsylvania.

272. Ginns, Max. 1954. Open letter to publisher: This matter of fluoridation. *Let's Live* 22(12):5, 41, 43. Dec. [1 ref]

• **Summary:** "Please obtain a copy, through your congressman, of HR2341 entitled *Fluoridation of Water Supplies* (ADA calls it 'Best seller'—getting scarce), and you will get both sides of the story." The writer explains why he is strongly opposed to fluoridation. Address: D.M.D., 717 State Mutual Building, 340 Main Street, Worcester, Massachusetts.

273. Gould, Symon. 1954. Vegetarian views and news. *Let's Live* 22(12):40. Dec.

• **Summary:** Discusses: His opposition to the fluoridation of America's water supply. *The United States Dispensary* (24th ed.) states: "Fluorides are violent poisons to all living tissue because of their precipitation of calcium." The major dental associations are endorsing fluoridation. But they know that major causes of tooth decay are sugar and the phosphoric acid in many soft drinks.

Gloria Swanson, youthful and vivacious at age 55, and a devotee of organic foods. Tom Brown, age 85 and a strict vegetarian, who wins many walking contests. Address: 117 W. 48th St., New York City 36.

274. Rancho La Puerta. 1954. Renew your health in our year 'round health with organic grape cure under the personal supervision of Dr. Edmond Bordeaux Szekely (Ad). *Let's Live* 22(12):30. Dec.

• **Summary:** "Winter grape cure. Scientific diets and special reducing diets adapted to the individual. Medical care. All foods organically grown. Sun, air, water therapy. Classes, lectures, swimming, hiking. 2,000 ft. altitude. 340 sunny days per year in desert mountain area." The mailing address is: Essene School, Tecate (near San Diego), California. Note: Rancho La Puerta is actually in northern Mexico.

A similar ad appeared in the Nov. 1955 issue (p. 34) of this magazine. It adds: "950 acres for recreation, health building, and relaxation." "Weekly expense fee \$35 and up. Phone: Tecate, Mexico 2953."

275. Davis, Adelle. 1954. Let's eat right to keep fit. New York, NY: Harcourt, Brace & World. 322 p. Index. 21 cm. [14 ref]

• **Summary:** Advises Americans to eat more vitamins, minerals, and protein—as well as wheat germ and tiger's milk [Tiger's Milk]—to reduce their risks of possible deficiencies. Meats, fish, and fowl are considered excellent sources of protein. "Other superior sources are eggs, fresh milk, buttermilk, yogurt, powdered milk, cheese, soybeans, and powdered yeast" (p. 26). "Proteins from brewers' yeast, certain nuts, soybeans, cottonseed, and the germ of cereals are complete proteins (p. 29). A table (p. 32-33) lists good sources of protein including: Low fat soybean flour (1 cup has 60 gm of complete protein). Cooked soybeans (½ cup has 20 gm of complete protein).

"If milk, cheese, or eggs are disliked or unobtainable, getting adequate protein becomes a serious matter indeed. When the complete proteins of wheat germ, soybeans, brewers' yeast, and nuts are eaten, it is possible to obtain sufficient amounts of essential amino acids, provided the diet is planned with utmost care. Some of the world's leading athletes and scholars have been vegetarians. Unless a vegetarian is trained in nutrition, however, he usually becomes an unhealthy vegetarian."

Lecithin and its benefits are described on pages 38, 41, 78, 80, 115, and 219. "When oils are refined or hydrogenated, lecithin is discarded." Soybeans are a good source of pantothenic acid (p. 86) and vitamin B-1 (p. 101).

"If there is no health-food store in your community, you can purchase stone-ground flour from El Molino Mills, Alhambra, California; Paul Keene, Walnut Acres, Penns Creek, Pennsylvania; Great Valley Mills, Kellers Church, Bucks County, Pennsylvania; Elam Mills, Chicago, Illinois; Wight's Grist Mill, Old Sturbridge Village, Sturbridge, Massachusetts; Stone Buhr Milling Company, 3509 Evanston St., Seattle, Washington; Whole Grain Flour Mills, 2611 North Jones St., Chicago 47, Illinois; Huni Health Products,

207 East 87th St., New York City; The Vermont Country Store, Weston, Vermont" (p. 107).

"At first it may seem complicated to get your B vitamins from natural foods. Perhaps I can help you most by telling you how I have solved the problem in my family. I have had no white flour in the house for perhaps 20 years. All my flour is stone-ground whole wheat; [Sources of such flour, nationwide, are listed.] it is usually 'organically grown,' that is, grown on soil rich in humus, without commercial fertilizers. Such flour has a flavor infinitely more delicious than that of ordinary varieties... So-called 'enriched' flour is my idea of outright dishonesty... I rarely serve cereals because they contain so much starch... Soy flour, which supplies protein, cholin, inositol, and some anti-stress vitamins, I use in tiger's milk (p. 114) and the best hotcakes" (p. 109).

"Many authorities believe that the deficiency of calcium is more widespread than that of any other nutrient; milk is the only dependable source in the America diet... A certain amount of calcium can be obtained from mustard and turnip greens, soybeans, and blackstrap molasses, but these foods are rarely eaten daily... Certainly there are healthy people who do not drink milk, but each has a source of calcium; the Hawaiians' source is poi; the Orientals', soybean curds [tofu]."

"During hot weather, salty foods, such as salted nuts or soybeans, cheeses or potato chips, should be kept near the drinking water, and at least one well-salted food should be served with each meal." Address: Los Angeles, California.

276. Rodale, J.I.; Adams, Ruth. eds. 1954. The health finder: an encyclopedia of health information from the preventive point-of-view. Emmaus, Pennsylvania: Rodale Books, Inc. 928 p. See p. 122. 23 cm.

• **Summary:** A unique book about the prevention of disease, with many interesting entries. Bread (p. 122): "A recipe developed and used by the Farleigh Dickinson College in Rutherford, New Jersey follows. This college buys their flour from Paul Keene of Walnut Acres, one of the pioneer organic farmers, located at Penns Creek, Pennsylvania."

Also: Alcohol. Breast feeding. Cancer (Lung cancer and tobacco). Chemical fertilizers. Chemicals (Poisonous chemicals in foods, by Dr. Clive McCay). Cholesterol. Constipation. DDT. Deaf Smith County (Texas). Diet and disease. Fluoridation of water. Heart disease (first described in 1912). Insecticides. Natural vs. synthetic. Nutrition. Obesity. Old age. Organic movement (The). Overweight. Polio. Preventive medicine. Raw food. Salt. Sprouting vegetables (mentions soybeans, mung beans). Stilbestrol. Sugar. Sunflower seed.

Note: The Index contains no entries for soy, or biodynamic, or meat, or soil, or Steiner (Rudolf), or vegetarianism. Address: Emmaus, Pennsylvania.

277. Sakurazawa, Yukikazu [Ohsawa, George]. 1954. Eien no shōnen-tsuzuki: Gandhi no shōnen jidai [The eternal youth—continued: Gandhi's youth]. Tokyo: Nihon C.I. Kyokai. Reprinted in 1977 by Nippon C.I. Kyōkai (Shibuya, Tokyo). [Jap]*

278. *Land and Water (Columbus, Ohio)*. 1955-1959. Serial/periodical. Published by Friends of the Land (Zanesville, Ohio). Vol. 1, No. 1. Winter 1955. Quarterly. Last issue was Vol. 5 (Summer 1959).

• **Summary:** An early periodical within the environmental and natural foods movements in the United States. Its major focus was soil and water conservation, and protecting the soil from poisons and erosion.

One page in the first issue is a letter on "Friends of the Land" letterhead. Below the heading, "A Non-Profit Non-Partisan Society for the Conservation of Soil, Rain and Man.

"Hidden Acres, RFD #3, Zanesville, Ohio.

"March 7, 1955.

"Dear Friends,

"This is the first issue of our new Quarterly, *Land & Water*. We hope you like it. Through it our members will be kept informed about the four field projects of the Society: Home Watershed Management; The Relationship of Soil, Food, and Health; The Wise Use of Home Acres; and the Appraisal of the Progress Made in Soil and Water Conservation and the obstacles in its way.

"It is the hope of your officers that you will be moved to attend these national meetings and take an active part in helping with the educational program of the Society. Your help is needed in informing and activating your neighbors and friends to taking part in the movement to make better and wiser use of our renewable natural resources. In this way our nation can remain strong.

"We are proud of this issue. In it you will find a wealth of information about the behavior of water in the basin of a stream or river. You will have a compilation of information about floods, about our demands for water, and about the management and organization of a watershed. It is planned to make this issue into a manual on how to start a movement to utilize to the maximum every drop of water that falls in our home watersheds.

"It is our hope that you will find this issue of *Land & Water* of such merit that you will pass it around to your friends. The teachers in your schools, the ministers and other speakers, the editors, the radio and TV leaders, and others in the community who are helping to create the pattern of public opinion can read and will pass on these ideas and concepts, and thus assist the educational mission of Friends of the Land. You are cordially invited to come to our St. Louis meeting for the Second Annual Watershed Clinic and profit by this outstanding program. The program is published in this issue for you. We also hope that you will take a moment to inform us about your reaction to *Land & Water*.

This Quarterly replaces *The Land*, which we regret has suspended publication.

"We thank you for your continued interest and support to Friends of the Land."

Louis Bromfield, Chairman of the Board

Ollie E. Fink, Executive Secretary

Jonathan Forman, M.D., President

Also in the 1st issue is the program of the "Second Annual Watershed Clinic (St. Louis, Missouri)," and Editorial, and an article on "The problem of water conservation" that begins with a quotation from Benjamin Franklin: "When the well's dry, they know the worth of water." Address: Washington, DC.

279. Nichols, Joe D. 1955. President's page: 1955 national convention. *Natural Food and Farming (Atlanta, Texas)* 1(11):5, 14. Feb.

• **Summary:** "Natural Food Associates, Incorporated, not for profit, was organized in February, 1953. A very small group of people met at the home of Ham Noyes in Woodstock, Illinois, to plan the original organization. They arranged for a meeting at the Normandy House Restaurant in Chicago. About thirty (30) people from all sections of the country worked for two days to establish the new organization. A name was agreed upon, a constitution was adopted and officers were elected. Alden Stahr of Leyton, New Jersey, was publishing a small magazine called *Normal Agriculture*, and it was agreed that this would serve as our first official publication. The organization had no money and no paid officers. It struggled through the first year making slow, but steady progress. The second annual convention was held last February at the same place in Chicago. About two hundred (200) intensely interested people came from all over the country. Busy people left their businesses in New York, Florida, Alabama, Texas, California, Washington, and many states in between, because they were interested in the ideals of Natural Food Associates. It was decided at this meeting that we needed our own official publication. Bob Rowe of Mt. Zion, Illinois, was elected Executive Secretary with the responsibility of publishing the magazine. Alden Stahr was to continue as Editor. Both of these men were to be paid, provided we had the money. Upon returning home, Bob Rowe found that it would be impossible for him to serve as Executive Secretary and continue the management of his large farm. He resigned with sincere regrets. I found a man, Mr. Thomas Lavin of Atlanta, Texas, who agreed to take the job on the basis of being paid if he succeeded in the position. The Executive Committee had a hurried meeting by telephone and Mr. Lavin was employed. Headquarters was moved to Atlanta, Texas. After one month it was found that it was not practical to publish the magazine in Atlanta with the editor in New Jersey.

"In April the Executive Committee agreed to adopt the name of Natural Food and Farming for our official

publication and to have it edited and published in Atlanta. One thousand copies of the first issue were printed. During the last year the growth has again been steady, but if I may say so, entirely too slow to satisfy your president. Thirty-four hundred copies of the January issue were printed. Many of our original members failed to renew their membership. Some of our directors have done very little to help us grow during the past year. Many of our members have failed to recognize any responsibility whatever for the success of NFA, but there have been others who have worked with a zeal that insures our continued success. Some of you have made financial contributions over and above your three dollar membership. Most of these have sent in two, three, five, and ten dollar donations so that we are still solvent enough to at least pay the printer. The percentage of renewals is increasing every month, and new members are coming in every day. The interest of many old members and directors is becoming manifest, and let me tell you quite frankly—NFA is on the way—*We Will Succeed*. We now have members in 48 states and 11 foreign countries.

“We have powerful forces opposing us. Naturally we would have. Our objective is to teach the American people the values of natural food grown on fertile soil, and tell them how to get such food. We do not believe in the use of soluble commercial fertilizer and poison insecticides. We do not believe in degerminated, devitalized, lifeless food. We do not believe in artificial fluoridation of public drinking water with poison sodium fluoride. We believe that the end result of chemical farming is always disease, first in the land itself, then in the plant, in the animal and finally in us. We believe that the continued use of poison insecticides will not solve the insect problem; it will only make it worse. We believe that the insane promiscuous use of DDT, chlordane, parathion and all the other poison agricultural chemicals constitutes one of the gravest perils to our *national health*.

“We believe that unpoisoned food grown on fertile soil, eaten fresh, would do more to solve the problems of metabolic, or so called degenerative diseases, than all the chemicals in the country. We believe that the answer to the farm problem is the restoration of the fertility of the soil—and we believe the only way to restore the fertility is the organic way, and the organic way includes the use of ground limestone, and raw rock fertilizers when indicated. We are not against fertilizer—we are only against soluble commercial fertilizer.

“With these beliefs you can easily see why we have opposition.” Address: M.D., President, Natural Food Associates.

280. Trautmann, Henry. 1955. The influence of N.F.A. for healthful living. *Natural Food and Farming (Atlanta, Texas)* 1(11):7, 10. Feb.

• **Summary:** Address to Natural Food Associates Convention, Longview, Texas, Feb. 3, 1955. Address: M.D.

[Madison, Wisconsin].

281. *Natural Food and Farming (Atlanta, Texas)*. 1955. News from the Pennsylvania meeting. 1(12):4. March.

• **Summary:** In a small but growing number of states, NFA state associations have been established. One of the first to meet was in Pennsylvania. “As this issue goes to press we have the following news from the Pennsylvania meeting held in Centre Hall [town name, in Penns Valley, central Pennsylvania] on March 12.

“Over 100 NFA members and guests were present at the meeting held at the high school auditorium. The banquet was held at the Centre Hal American Legion Post No. 779.

“The program began at 12:00 p.m. and lasted until 9:00 p.m. Speakers were:

“Paul Keene, Penns Creek, Pennsylvania—‘Natural farming for better living.’

“Philip S. Wells, Wellsboro, Pennsylvania—‘Compost—the key.’

“Thomas Lavin, National Executive Secretary, Atlanta, Texas—‘What natural food associates can do for you.’”

282. *Natural Food and Farming (Atlanta, Texas)*. 1955. New officers: Natural Food Associates. 1(12):12. March.

• **Summary:** The following listings (a person’s name, city and state is given for each position) occupy ½ page: National officers (5). Board of directors (incl. Dr. E.E. Pfeiffer, Spring Valley, New York; Gloria Swanson, New York City). State officials for the following states: California, Michigan, Kentucky, Louisiana, Texas, Nebraska, Pennsylvania, Indiana, Ohio, Washington state, and Oregon.

Note: In this issue, the NFA paid Directory Listing (p. 15) fills about 75% of a page; it has grown dramatically over the past year.

283. Rodale, Jerome Irving. 1955. *Poison in your pots and pans: Aluminum and plastic kitchenware are dangerous*. Emmaus, Pennsylvania: Rodale Books. 63 p. March. 21 cm. [20+* ref]

• **Summary:** The book begins: “There is not the slightest doubt in my mind that aluminum utensils for cooking are dangerous to human health. One should ban them from the kitchen.” Address: Emmaus, Pennsylvania.

284. Ressor, Alice (Mrs.). 1955. Letters [to the editor]: Chicago has market. *Organic Gardening and Farming* 2:6. June.

• **Summary:** The writer, secretary of the South Side Organic Gardeners in Chicago, writes that one of the club’s members, Mrs. Rose Pfnister, “the first secretary of the club and the best one too... has opened a Natural Foods Store on the far south side of Chicago which is growing by leaps and bounds.”

“This natural foods store might also answer the plea

from Mr. Charles A. Humphrey of Chicago whose letter you published in the March issue.

Note: This may be the earliest modern use of the term “natural foods store.” Address: Chicago, Illinois.

285. Fearn Soya Foods. 1955. Invoice: Goods sold to Western Natural Foods Co., 1334 Second Ave., Seattle, Washington. Melrose Park, Illinois. 1 p. Sept. 9.

• **Summary:** The address printed on this invoice is “355 West Ontario Street, Chicago, Ill.” But over the top of that is stamped: “Our new address. 1206 North 31st Ave., Melrose Park, Illinois.” At the bottom of the invoice is a typed note: “We are sorry we have been so slow—We just moved into our own new building and in the future we should be able to give you excellent service.” The goods were shipped on Sept. 9, the same date as the invoice. This shows that the company moved to this new address in about 1955. The soy products listed on the invoice are: Soyo Pancake Flour Regular. Soya Whole Wheat Pancake Flour. Dr. Fearn’s Wheat Cereal and Soya. Dr. Fearn’s Pure Soy Bean Powder. Dr. Fearn’s Soya Granules. Address: 1206 North 31st Ave., Melrose Park, Illinois.

286. Gould, Symon. 1955. Vegetarian views and news. *Let’s Live* 23(11):50-51. Nov.

• **Summary:** “On September 27, the President of the United States convened 139 leaders in education, government, medicine and athletics to attend a Conference on the Fitness of American Youth... But, to my mind, the group was sadly lacking in representatives who could really make a fundamental contribution to the President’s objective” to help young people to become physically fit.

Dr. Leo Spira is “the accepted authority on the subject of poisoning our water supply through fluoridation.”

At the start of 1956 he will embark on a world tour for Peace. Address: 117 W. 48th St., New York City 36.

287. Wickenden, Leonard. 1955. Our daily poison: The effects of DDT, fluorides, hormones, and other chemicals on modern man. New York, NY: Devin-Adair Co. xiv + 189 p. Foreword by Morton S. Biskind, M.D. Preface by William Coda Martin, M.D. Introduction by Jonathan Forman, M.D. Index. 21 cm. [7* ref]

• **Summary:** This book, about the poisons in our daily foods, is carefully researched and documented, and written in a professional, balanced, and fair manner. This is the earliest document seen (Sept. 2009) that makes a strong and convincing case for the health dangers of fluorides.

Contents: Foreword by Morton S. Biskind, M.D. Preface by William Coda Martin, M.D. Introduction by Jonathan Forman, M.D. Before you read. 1. Our poisoned world: Hepatitis and DDT. 2. The more sprays, the more pests. 3. Fluorides on trial—The case stated. 4. Fluorides on trial—The case of the proponents. 5. Fluorides on trial—The verdict. 6.

The new cosmetics—The dangers of being beautiful. 7. The perils of hormones (such as diethylstilbestrol or stilbestrol [DES]).—Atomic radiation. 9. Poisoned soil. 10. Your doctored daily bread. 11. Postscript. 12. The choice facing us.

A great deal of interesting information comes from the hearings of the Delaney Committee (House Select Committee to Investigate the Use of Chemicals in Food Products) which met from Sept. 1950 to March 1952. The expert testimonies are shocking.

A table (p. 3) gives the quantity of various pesticides produced in the USA in 1951, as follows: Calcium arsenate 7.865 million lb. Lead arsenate 14.287 million lb. DDT 99.929 million lb. Benzene hexachloride 85.090 million lb. Parathion 2.365 million lb. TEPP 922,000 lb. Aldrin, chlordane, lindane, toxaphene and others 64.386 million lb. Total: 274.844 million lb. The total was sufficient to kill 15.2 billion human beings.

Chapter 7 tells the chilling story of artificial female hormones (such as diethylstilbestrol / stilbestrol [DES]) now implanted in pellet form into the upper necks more than 30 million U.S. chickens per year, and added to the feeds consumed by approximately half the beef cattle in the USA. The drug can cause reproductive problems, including sterility. The effects of residues often found in chicken meat are discussed in detail.

Chapter 10 praises the “Triple Rich bread,” made according to a formula developed by Dr. Clive McCay, professor of nutrition at Cornell University. It contains 6% soy flour, 2% wheat germ, and 8% dried milk. “Dr. McCay found that rats could grow healthily on a diet of Triple Rich bread alone, but pined and died when fed on ordinary white bread” (p. 165).

The last chapter urges that we should not submit cheerfully, but should protest against “our poisoned food, our poisoned water, and our poisoned air.” More than 300 communities have voted down fluoridation, including such cities as Cambridge (Massachusetts), Boulder (Colorado), Erie (Pennsylvania), Peekskill (New York), Saginaw (Michigan), Kenosha (Wisconsin), and many others. Insects cannot be eliminated by poison sprays (such as DDT); they develop resistance so that larger amounts of more toxic insecticides are needed in the future. Address: Author, USA.

288. *Let’s Live*. 1955. Flash! Fluoridation loses [in Sacramento, California]. 23(12):13. Dec.

• **Summary:** “Sacramento—This capital city of California has decisively defeated a proposal to fluoridate its drinking water. In a special election held November 8, a majority of the 137,572 population turned thumbs down on the proposal...”

289. Arthur, William Reed. 1955. The law of drugs and druggists: a treatise with text, cases, statutes, readings,

and digests for schools of pharmacy, retail, wholesale, and manufacturing druggists. 4th ed. St. Paul, Minnesota: West. Publ. Co. 399 p. See p. 300. *

• **Summary:** “The information charges that the false labels were shipped by appellant to the Natural Food Store at Kansas City, Missouri, on February 7, 1944, that is two months and eleven days before April 18, 1944,…”

290. Rodale, Jerome Irving. 1955. *Organic gardening: How to grow vegetables, fruits, and flowers using nature’s own methods*. Garden City, New York: Hanover House. 224 p. See p. 87, 197. Illust. Index. 24 cm.

• **Summary:** J.R. Rodale started the organic gardening and farming movement in America. Soybean hay is recommended as a high nitrogen fertilizer (p. 87). If soybeans are grown as a companion crop with corn, they shade the bases of the corn plants and this protects them from highly destructive chinch bugs.

Note: The Library of Congress catalogued this book under the main subject heading “Organiculture.” Other books by the author include: *Organic Gardening*. *Pay Dirt*. *The Healthy Hunzas*. *The Health Finder*. *The Word Finder*. *The Phrase Finder*.

Note: This is the earliest document seen (July 2001) concerning with work of J.I. Rodale with soy. Address: Rodale, Pennsylvania.

291. Springer, Gertrude Anders. 1955. *Natural food cookery: Nature’s sweets, herbs and wholegrain flours*. Milwaukee, Wisconsin: Lee Foundation for Nutritional Research. 71 p. No index. 23 cm.

• **Summary:** An early natural-foods cookbook. Contents: 1. Foreword. 2. Fundamental food concepts (“The way to build this vibrantly alive soil is by practicing the Science of Organiculture, or the organic method”). 3. Wholegrain flours. 4. Wholegrain meals and grits. 5. Other valuable foods. 6. Herb cookery. 7. Pies. 8. Cookies. 9. Cakes. 10. Cake frostings. 11. Doughnuts. 12. Confections. 13. Fruits. 14. Health beverages. 15. Salads. 16. Salad dressings. 17. Breads, rolls and muffins. 18. Meat, fish and eggs. 19. Vegetable dishes. 20. Soups and stews. 21. Pancakes and waffles. 22. Jams and preserves. 23. Quick desserts. 24. Article “Sesame seed—An important food.” 25. Practical methods in preparing health-building foods. Note 1. Chapters 24 and 25 (on unnumbered pages) are written by Royal Lee, D.D.S. [dentist].

Soy-related recipes: Chapter 3, “Wholegrain flours,” contains a photo of bags of five such flours, including “Soya flour.” A paragraph (p. 5) explains: “Soya flour can be a full fat flour (all of the fat left in) which many consider nutritionally superior, or it can be a low fat flour (part of the fat removed) for low calorie diets.” Note 2. This is the earliest English-language document seen (Nov. 2003) that uses the term “low calorie” or “low calorie diets” positively

in connection with soybeans for human diets. Throughout most of human history, people wanted calories, which provide energy.

Unleavened Indian chapatis (with ½ cup soy flour, p. 52). Basic muffin recipe—Soya muffins variation (“Substitute ½ cup soya flour for ½ cup of the pastry [flour]. Gradually increase the soya and decrease the pastry until you are using half and half after several batches have been made.” p. 54). Chinese chow mein (with up to ½ cup “Show You sauce,” p. 62). Japanese sukiyaki (with about ½ cup “Show You sauce,” p. 63). Egg white leavened waffles (with a bit of soya flour, p. 67). In Chapter 25, the section on “Vegetables” contains brief instructions for making soy bean milk, and using soaked, “liquefied beans direct from the blender” in making bread. The Chinese never eat soy bean products without first soaking the beans. “It is the secret of successful soy cookery.” The chapter on sesame seeds notes: “Sesame seed ground into a butter like peanut butter is used in some countries—Turkey in particular—like our dairy butter is here, and is used in almost every food in some degree. It makes first-class salad dressing when mixed with vinegar and prepared mustard. With honey and milk powder a very tasty cream candy can be made... In Roman times the emergency ration for soldiers was a candy made from sesame seed and honey. A very tasty and nutritious ice cream can be made from sesame butter, honey and milk powder. The sesame seed can be used for these purposes instead of the sesame butter if the seed is liquefied with the honey in a blender or Osterizer. Sesame butter is an ideal shortening for bread and cookies.” Note 3. This is the earliest English-language document seen (Aug. 2017) that contains the term “sesame butter”—a smooth paste of ground sesame seeds.

This book also discusses: Carob brownies, peanut butter, sunflower seeds, how to sprout mung beans, herbs, etc.

Note 4. This is the earliest English-language book seen (June 2003), published after World War II, with the term “natural food” in the title.

Note 5. This is not a vegetarian cookbook. Recipes (p. 55-58) call for steak, pork, ground beef, spare ribs, lamb chops, ham, chicken, tuna, and salmon.

292. Lee, Royal. 1956. What does “organic food” mean? *Natural Food and Farming (Atlanta, Texas)* 3(1):12, 20-21. April. [3 ref]

• **Summary:** “When applied to food, the term ‘organic’ means from a living source, and in its intact form without heat treatment or other destructive influence having reduced its value.”

“It means too, natural foods that were not fed upon artificial or synthetic substitutes for natural ones, whether these substitutes were in the form of plant or animal foods, soil additives or synthetic fertilizers.”

“When we heat foods, at the temperature of 140°F the enzymes are destroyed, at 187°F food proteins are damaged

so that the nutrition of bone and tendon is affected.”

“The cells in our bodies begin to be damaged as soon as the body temperature rises above 105°F. It has been well demonstrated that many of our commonest forms of disease arise from the use of pasteurized milk and cooked foods, in particular loss of teeth, arthritis, stomach ulcers and liver disease.” Address: D.D.S., Milwaukee, Wisconsin.

293. Natural Food Associates. 1956. Directory listing (Ad). *Natural Food and Farming (Atlanta, Texas)* 3(1):22-23. April.

• **Summary:** These advertisements are divided into the following categories: Organic foods (listed alphabetically by state), juicers, books, miscellaneous, ladybugs, business opportunities, soil building. Within each category, they are organized by state. About two-thirds of the ads are for organic foods (especially fruits), with California (9 ads), New York (6), Illinois (4), Pennsylvania (4), and Wisconsin (4) having the most ads.

For example: Lee Anderson of the Covalda Date Co. (Highway 99, Coachella, California), is selling “‘Certified organically grown’ produce, dates, pecans, grapefruit and grapes. Prices on request.

Pacific Sunblest of Orange, California, is selling “Oranges—Organically grown by us for 25 years.”

Health Research, Mokelumne Hill, California, offers “25 lbs. assorted organically grown fruits and nuts—\$12.50. F.O.B. Health Book Catalogue free!”

“Barton Whole Foods, organically grown for 38 years. Naval oranges, cold-pressed olive oil, dried fruits and mountain apples in season... Porterville, California.

Walter Buschman of Juniper Farm, Sugarloaf, Orange Co., New York, is selling Bio-dynamic (BD) whole wheat flour and cereal, BD rye flour and cereal, BD cornmeal, BD white pastry flour, organic oatmeal and soybeans, and Cheddar cheese made from unpasteurized milk.

Helen and Scott Nearing of Harborside, Maine, are selling their book *Living the Good Life*, a “how-to-do-it” book for Vegetarians and Organic Gardeners. 210 pages. Photographs. \$3.50.”

In Pennsylvania, Paul and Betty Keene of Walnut Acres Natural Foods in Penns Creek are “One of the first in the supplying of organic and other natural foods direct from the farm where grown and milled. One of the most complete lines in the country, conscientiously chosen.”

In Texas: “5 lbs. Deaf Smith County stone ground 100 per cent organic flour \$1.50 postpaid. Write for list of organic foods. Natural Organic Foods, Atlanta, Texas.”

Many of the ads are from individuals who grow and sell organic foods. One is from L.E. Schnoor (Comptonville, California), who sells ladybugs for natural insect control. There are ten ads for soil building materials. At the bottom right corner of p. 23 is a box that states: “Eat organic food.”

Note 1. This is the earliest document seen (Oct. 2006)

that mentions Walnut Acres Natural Foods of Penns Creek, Pennsylvania.

Note: This full-page ad also appeared in the next issue (May 1956, p. 18-19).

294. Natural Sales Co. 1956. Save money on natural organic foods (Ad). *Natural Food and Farming (Atlanta, Texas)* 3(1):18. April.

• **Summary:** This 1/6 page ad shows dollar coins falling from the sky onto a lady who is standing, hands up, on a pile of them. “Do as thousands of families have—Order your natural foods and vitamins from Natural Sales—Top quality and absolutely fresh at rock bottom prices.”

“Some sample values: 5 lb. wheat germ—raw \$0.69. 5 lb. wheat germ—toasted \$1.20. 3 lb. sesame seed—hulled \$1.65.” Address: P.O. Box 25, Pittsburgh 30, Pennsylvania.

295. Rorty, James. 1956. Fluorine—The case against: Despite intensive propaganda by sugar interests and fluorine suppliers, competent authorities see no evidence that the program cuts down tooth decay. *Natural Food and Farming (Atlanta, Texas)* 3(1):8-9, 16-18. April.

• **Summary:** Examples from Europe during World War II showed public-health workers that “wartime rationing of sugar had contributed importantly to a drop in the incidence of tooth decay in children.

“The war had barely ended when Schour and Massler reported that the relatively sugarless population of wartime Italy had from one-half to one-seventh as much tooth decay as the average for sugar-saturated America, which had reduced sugar consumption relatively little during the war. In hard-pinched Norway, tooth decay among school children dropped by half. Norwegian dentists agreed that this was due to the wartime shortage of refined carbohydrates, especially sugar.

“In America, the official press of the American Dental Association printed these findings. The same thing had happened during World War I, and the cause-and-effect relationship had been confirmed by many controlled studies, some of them sponsored by the ADA itself.”

“Thus, in 1950 the reduction of sugar intake, in the diet of children especially, was second only to toothbrushing in the credo of prevention-minded American dentists. Yet, it was in that year that the American Dental Association suddenly turned its face away from the admitted prime cause of tooth decay and chose instead to promote a program of mass medication of dubious effectiveness and even more dubious safety. The program, which was sanctioned by the United States Public Health Service after only five years of a scheduled ten-year tryout in the pilot plant cities of Grand Rapids, Michigan, and Newburgh, New York, was the fluoridation of municipal water supplies.

“In November, 1950, the American Dental Association led the procession of professional societies that endorsed the

program. It was quickly followed by the American Public Health Association, the National Research Council, and the American Medical Association (which, however, limited its approval to an endorsement of the ‘principle’ of fluoridation). Among the earliest advocates of the program was the Sugar Research Foundation, which is the research and propaganda arm of the sugar-refining industry.”

296. Walnut Acres Natural Foods. 1956. Paul and Betty Keene (Ad). *Natural Food and Farming* (Atlanta, Texas) 3(1):18. April.

• **Summary:** A 1/6 page ad. “They call us pioneers! We guess we were among the first, but there is no time to rest on one’s laurels! We are always seeking to improve our own soil and crops,...

“Home grown, strictly organic, freshly stone-ground flours and cereals. And hundreds of other natural food items, very carefully chosen. Drop us a line sometime!” Address: Penns Creek, Pennsylvania.

297. White, Herbert Clarence. 1956. California meeting impresses physicians: Display of organically-grown produce earns favorable comment from Los Angeles medical group. *Organic Gardening and Farming* 3(5):70-71. May.

• **Summary:** “January 3, 4, and 5 of 1956 were three great days in the annals of Organiculture out here on the West Coast, During the history-making event, nearly 7,000 members of the Los Angeles County Medical Association were brought face to face with the basic principles of natural farming and gardening under the most favorable environment possible.”

At the annual mid-winter convention, Foods for Life, Inc. presented a magnificent exhibit of organically-grown fruits, vegetables, nuts and grains. It was favorably received, and so far as the writer could tell, not one unfavorable or disparaging comment was heard from these distinguished physicians about the value or soundness of the Foods for Life enterprise, which involves the growing and distribution of all many kinds of organic foods; all are grown without the use of chemical fertilizers or poison sprays.

“It is heartening to know that Dr. Jonathan Forman’s basic concept of ‘Creative Medicine’ seems to be gaining ground among his fellow Allopathic practitioners. For the benefit of our readers it might be of interest to re-state Dr. Forman’s dynamic views on this subject. Here is a paragraph from *The Land*, of which Dr. Forman is editor.

“It is no oversimplification to say that *our health comes from the soil*. No matter how many physicians and health officers we train, and how much *curative or preventive medicine* they may practice, we cannot attain optimal health until they and we have turned our attention to creative medicine, and thereby learned to keep and even improve our health. To build and maintain good soil is the real fundamental service. Creative medicine must be founded

on growing the best foods. Thus alone can create real health for our people—through creating a sound and prosperous agriculture.”

“The most important single attraction of the Foods for Life booth was the display of succulent, garden-fresh organic produce.”

“But the biggest ‘hit’ of all was the bakery display. In front of the array of Foods for Life loaves, trays of delicious peanut-butter and creamed-cheese sandwiches were placed. These, of course, were made from the new 100% whole-grain loaf we have mentioned. A leaf or two of crisp bronze lettuce was also incorporated into each delightful sandwich. One of these dainty ‘delicacies’ was offered *free* to each visitor at the booth. The almost overwhelming popularity of this ‘sandwich feature’ is indicated by the simple fact that that nearly 3,000 of these tantalizing, titillating morsels ‘disappeared’ during the three day medical conclave.

Note: The founder and head of Food for Life, Inc. was Dr. George Johnstone, a Seventh-day Adventist physician, who also founded Behrens Memorial Hospital in Glendale, California. Address: Emmaus, Pennsylvania.

298. Golden Key Productions. 1956. Organic farming film! “Practical methods in Natural Farming.” Produced by Phil Arena (Ad). *Let’s Live*. June. p. 25.

• **Summary:** “In 16 mm, sound and color, shows basic principles of natural farming from compost making to cover crops, to planting trees, pruning vines. Photographed over a period of years on the Phil Arena Farm in Escondido, California. Narration by Phil Arena. Film runs 25 minutes. Available for rent or purchase.” Address: 1921 Hillhurst Ave., Hollywood 27, California.

299. Natural Foods Inc. 1956. Vita-Mix: America’s first heavy-duty, stainless-steel liquifier (Ad). *Let’s Live*. June. p. 25.

• **Summary:** This 2¼ by 5½ inch ad features an illustration of a Vita-Mix, with arrows pointing to and brief descriptions of its most important features—such as “New, more powerful motor with two speeds.” “Special: Only \$39.95, \$49.95 value. More speed. Greater power. Greater durability. Makes smaller blenders and glass bowl models obsolete. So powerful and durable it even makes soy beans into a low-calorie flour or cereal... Grinds wheat, grain, peas, beans, soy beans, coffee. Why just blend what you can actually liquefy! Save now, at your nearest health food store.”

Note: This is the second earliest English-language document seen (Nov. 2003) that uses the term “low-calorie” positively in connection with soybeans. Address: Olmsted Falls, Ohio.

300. Elwood, Catharyn. 1956. Feel like a million. New York, NY: The Devin-Adair Co. xiv + 332 p. Index. 21 cm. [79 ref]

• **Summary:** A section on soybeans (p. 34-35) discusses their

many nutritional benefits and the work of Dr. and Mrs. Clive McCay at Cornell University in Ithaca, New York. "Already over a million people are improving their health with the Cornell-formula bread." Soy sprouts are discussed as a rich source of vitamin C and other nutrients (p. 254-55, 260, 263).

"Dr. Joe Nichols [M.D.] of Atlanta, Texas, President of the nationwide Natural Food Associates, a nonprofit organization sponsoring only the best in natural whole foods, treats these deficiency cases every day" (p. 135).

Sprouted-wheat bread is delicious and has an antiscorbutic value not found in freshly milled whole wheat. "The Foods for Life group in Glendale, California, is making a wonderful loaf with this method" (p. 264). "The Chinese use sprouted soy and mung beans very generously in their cooking. They fry them quickly as a vegetable. They also add them with other vegetable and cook them gently in such specialty dishes as chop suey, chow mein, and subgum" (p. 265).

About the author: A photo of Kathryn Elwood and a brief biography appears on the inside rear dust jacket. Address: Washington, DC.

301. McCance, Robert Alexander; Widdowson, Elsie May. 1956. *Breads, white and brown: Their place in thought and social history*. London: Pitman Medical; Philadelphia and Montreal: J.B. Lippincott Co. xi + 174 p. Illust. Index. 22 cm. [720* ref]

• **Summary:** This is perhaps the most authoritative, interesting, and well documented book ever published on the history of bread, with emphasis on the differences between white and brown breads. Trowell (1979, p. 2) says of this important book: "In that prolonged controversy almost everyone argued in terms of value of the absorbed nutriment, for fibre, often called roughage, was considered to be a gastro-intestinal irritant."

Contents: Preface. 1. Early Mediterranean civilisations. 2. Mediaeval and early modern England (1200-1700). 3. The eighteenth century (1700-1820). 4. Peace and plenty (1820-1914). 5. Shortages and war (1914-1921). 6. Return to plenty (1921-1939). 7. The second war (1939-1946). 8. Progress by experiment (1947-1949). 9. Past, present, and future.

"Preface: This book is the outcome of investigations that were made in German orphanages in 1947-49 to compare the nutritive value of different kinds of bread. The results which we obtained surprised us very much at the time, for in spite of all that we had been led to believe, white turned out to be just as good as brown, and all kinds of wheaten bread to have a nutritional value far in excess of anything we had been led to suppose."

"Grinding and bolting [sifting] of cereals date from the earliest civilizations. In classical Greece and Italy [incl. Rome] both processes were directed by the baker; milling was not a separate trade. By classical times wheat had largely

displaced barley for breadmaking. White flour was produced and used for fancy baking but it was expensive and its use was a sign of wealth and position. Wholemeal bread had an appeal to some people, to whom it symbolised the simple life and the good old times, then as always gone beyond recall." During the period from 1200 to 1700 in England, a white wheaten loaf was produced largely for the rich, but the poor ate white bread whenever they could. Doctors considered, as Galen had, that white bread was more nutritious than brown.

"Peace and plenty (1820-1914): The laboring poor continued to demand white bread, and by 1860 the sale of the by-products enabled the millers to supply white flour at a price below that of brown. Under the influence of Graham, Carr and Allinson the intelligentsia came to believe that wholemeal bread was the great essential for those who wished to be simple, strong, temperate and healthy. Physiological work between 1870 and 1910 showed that the white flour provided more calories and protein than the same weight of wholemeal. Work on beriberi and the experiments prompted by the standard bread controversy of 1911, however, suggested once more that the wholemeal flour contained something of nutritional value absent from white flour, and most scientists interested in human nutrition reverted to the idea that brown bread was a more desirable than white. The loyalties of scientists associated with agriculture and milling tended to make them support the cause of white." Page 46 adds: "By 1865 the white loaf had become cheaper than the brown... Reducing the price of white flour below that of brown brought about a complete reversal of the status of white and brown bread. 'It (brown) has become a mark of luxury and not of poverty, and is the rich man's instead of, as formerly, the poor man's food (E. Smith 1865).'"

The introduction of silk bolting cloths and the replacement of mill-stones by steel rollers in about the year 1870 made a great difference to the mill products. These improvements in technique were first introduced into Hungary and the USA to cope with the "hard" wheats grown there. The new techniques also enabled the millers to separate the wheat "germ" from the flour, and to further improve the separation of the bran. Now they could make a whiter flour for human consumption with keeping qualities far superior to those of stone-ground flour. "The risk of wastage and loss of wholemeal flour on storage helped to maintain its price above that of white flour for the next 70 years..." (p. 47).

"Bread for health: As in earlier times the laxative properties of bran continued to be advanced as a reason for eating brown bread." "The great apostle of wholemeal bread as a natural food was Sylvester Graham." In 1837 he wrote and published his first important book on the subject. An ardent vegetarian, he believed that most human health problems were caused by a departure from natural conditions. In bread, he taught, mankind should not "put

asunder what God has joined together.” Much of Graham’s work with bread was sponsored by a society called the Bread Reform League. Graham’s counterpart in England during the last 20 years of the 1800s was Dr. T.R. Allison. Like Graham, he was a vegetarian, a strict teetotaler, and opposed to vaccination.

During World War I in England, importation of wheat was reduced by enemy action. By Government order, the extraction rate of wheat was raised from 70% to 76%, 81%, and finally 90%. By 1918 wheat was permitted to comprise no more than 80% of the flour used for bread-baking, the remainder being barley, oats, potato, or maize flour. The discovery of vitamins led nutritional experts to support the higher extraction rate and to advocate consumption of wholemeal bread. In 1941 all bread in England began to be fortified with vitamin B-1; the USA soon followed.

Chapter IX, “Past, present and future” notes that the “poor man of southern England has always made it one of his ambitions to have ‘white bread’ on his table, and by 1750 he had achieved this.” At present three groups are in favor of white bread: The common people, the millers and bakers, and the animal husbandmen who feed their pigs, poultry and horses the milling residues or “offals.” Address: 1. C.B.E., F.R.S., M.A., PhD., M.D., F.R.C.P., Prof. of Experimental Medicine, Univ. of Cambridge; 2. DSc, PhD.

302. Ohsawa, Georges. 1956. Guide pratique de la médecine macrobiotique d’Extrême-Orient: Pour ceux qui ont bien étudié la philosophie dialectique pratique [Practical guide to the macrobiotic medicine of the Far East: For those who have studied well the philosophy of practical dialectics]. Centre Ignoramus, 26 rue Lamartine, Paris 9^{ème}, France. 82 leaves. 28 cm. [Fre]

• **Summary:** After Ohsawa arrived in France (Feb. 1956) he published this work in a stenciled edition. It was only sold or given as a present to students who had obtained “the fifth level (dan) of practicing the U.P. (Universal Principle).”

On page 17, under the heading “Macrobiotic Pharmaceutical Preparations,” we find No. 9: Miso and fried miso. And on page 80 is a 1-page explanation about miso, plus the following specific macrobiotic miso preparations: (1) Miso fried in sesame oil. (2) Tekka. (3) Muso or mausoh (miso with tahini). (4) Nutritional composition of miso. It is therefore one of the most Yang vegetable foods.

Note 1. This book was translated into English and first published in August 1973 as a part of “Practical Guide to Far Eastern Macrobiotic Medicine.”

Note 2. This is the earliest document seen (Aug. 2017) in which Ohsawa uses the word “macrobiotics,” a word which apparently had been coined in 1805 by Hufeland in German (*Makrobiotik*).

Note 2. This is the earliest document seen (March 2011) in which George Ohsawa mentions miso—or any other soyfood product. Address: Paris.

303. Rorty, James; Norman, N. Phillip. 1956. Tomorrow’s food. Revised and enlarged ed. New York, NY: Devin-Adair Co. 297 p. Index. 21 cm. 1st ed. 1947. [19 ref]* Address: 2. M.D.

304. Sakurazawa, Nyoiti (George Ohsawa). 1956. La philosophie de la médecine de l’Extrême-Orient: Le livre de jugement suprême [The philosophy of East Asian medicine: The book of supreme judgment]. Paris: Librairie Philosophique J. Vrin. 208 p. 20 cm. [Fre]*

• **Summary:** The author’s name on the title page is given as “Nyoiti Sakurazawa (Ohsawa).” Address: France.

305. Lavin, Thomas. 1957. America’s organic farms: Royal Oak Farm. *Natural Food and Farming (Atlanta, Texas)* 3(9):11. Jan.

• **Summary:** “Royal Oak Farm is located in the beautiful rolling countryside of Maryland, just a few minutes drive from downtown Baltimore. This modern farm is operated by NFA [Natural Food Association] member J.A. Johnson. Mr. Johnson owns 80 acres and rents an additional 80 acres.

“Mr. Johnson obtained the farm and leased the land in 1952, for use as an experimental farm for the Organic Development Co. Before 1952 the land was worn out from many successive seasons of chemical farming and poor farm management. Needless to say the farm was losing money each year. Natural farming practices have restored the fertility to the land and now Royal Oak Farm is one of the showplaces of the entire area.

“The farm is divided into 78 experimental plots. Plant life is tested under all conditions by using innumerable combinations of natural soil building materials.

“Plots are provided for all farm crops of this area, as well as all vegetables.”

“The Organic Development Co. was organized in 1951. Mr. Johnson had been an earthworm dealer since 1944. He had shipped earthworms to almost every country in the world. Mr. Johnson became convinced that the addition of earthworms to poor soil was not the complete answer. At this time he began to experiment with various natural soil-building materials. To fill an ever growing demand for this type material, he blended by hand and sold 35 tons the first year.”

Note: This appears to be the first in a series of articles about America’s organic farms. Unfortunately only one other article in the series was ever published. Address: Executive Secretary, Natural Food Associates, Atlanta, Texas.

306. Natenberg, Maurice. 1957. The legacy of Harvey W. Wiley: The father of the pure food movement. *Natural Food and Farming (Atlanta, Texas)* 3(9):6-7, 10, 14-16. Jan.

• **Summary:** This is a chapter from a forthcoming biography of Dr. Harvey W. Wiley by Maurice Natenberg. The book,

titled *The Legacy of Doctor Wiley*, was published in 1957. The chapter begins:

“June 30, 1956, marks the fiftieth anniversary of the passage of the Pure Food Law. This measure, undoubtedly one of the finest and most inspired pieces of legislation ever enacted by Congress, rightfully should be considered Dr. Harvey W. Wiley’s gift to the world. He was the father of that law, the product of a life of unsurpassed devotion to the public’s interests and welfare. The law is great because the man was great: one of the greatest this country has ever produced.”

Unfortunately, “his food law has never been adequately enforced.”

“The health of our people would be vastly improved and their life greatly extended. The manufacturers of our food supply, and especially the millers, would devote their energies to improving the public health and promoting happiness in every home by the production of whole ground, unbolted cereal flours and meals.”

“The resistance of our people to infectious diseases would be greatly increased by a vastly improved and more wholesome diet. Our example would be followed by the civilized world and thus bring to the whole universe the benefits which our people had received.”

“We would have been spared the ignominy and disgrace of great scientific men bending their efforts to defeat the purpose of one of the greatest laws ever enacted for the protection of the public welfare. Eminent officials of our Government would have escaped the indignation of outraged public opinion because they permitted and encouraged these frauds on the public. The cause of a wholesome diet would not have been put back for fifty or a hundred years. And last but not least, this History of a Crime would never have been written.”

A review of the book is found in the December 1957 issue (p. 18-19) of this magazine.

307. Nichols, Joe D. 1957. President’s page. *Natural Food and Farming (Atlanta, Texas)* 3(9):5. Jan.

• **Summary:** Begins with this quotation in a box between the headline and the article itself: “Goethe on Truth and Error: The chief thing is to have a soul that loves the truth and harbors it where it finds it. And another thing: the truth requires constant repetition, because error is being preached about us all the time, and not only by isolated individuals but by the masses. In newspapers and encyclopedias, in schools and universities, everywhere error rides high and basks in the consciousness of having the majority on its side. (Conversations with Eckermann, 1828)” Address: M.D., Atlanta, Texas.

308. Lavin, Thomas. 1957. How to organize Natural Food Associates groups: State NFA chapters, District NFA chapters, Local NFA chapters. *Natural Food and Farming*

(Atlanta, Texas) 3(10):11, 19. Feb.

• **Summary:** Contents: Why to organize a Natural Food Associates chapter. The first meeting. Speakers for your meeting. Not always necessary to have a speaker. Dues. Things to remember. Address: Executive Secretary, Natural Food Associates, Atlanta, Texas.

309. Natural Food Associates. 1957. These retail outlets sell the NFA magazine *Natural Food and Farming (Ad)*. *Natural Food and Farming (Atlanta, Texas)* 3(10):15. Feb.

• **Summary:** The name and address of about 39 retail outlets are given. Address: M.D.

310. White, Herbert Clarence. 1957. Natural Food Associates in action. *Natural Food and Farming (Atlanta, Texas)* 3(10):12-14. Feb.

• **Summary:** See next 2 pages. Heroes of the Natural Foods Movement include Dr. Joe Nichols, Paul Pfund, Dr. Fred Miller, Earl Striplin, Leonard Wickenden, Dr. Royal Lee, and many others.

“But in this brief story I want to bring to our membership the thrilling story of another N.F.A. member from the medical profession who has gone ‘all the way’ in an effort to bring ‘Creative Medicine’—not only to his family, and to the patients in his 100 bed Behrens Memorial Hospital [Glendale, California], but to the *entire community*.”

The article then focuses on the story of Dr. George A. Johnstone of Glendale, California, the Glendale, California, founder and president of Foods for Life, Incorporated, and of its first Foods For Life market and lunch counter, which opened in the late spring of 1950 in Glendale, California (on South Verdugo Road).

Dr. Johnstone has three farms—one in North Dakota and two in Southern California. After hearing the writer speak, he said: “I want to get onto this organic program—and Fast! Will you help me?” And that is how Foods for Life was conceived. Three months later the Foods for Life enterprise was “born” as a legal corporation with nearly twenty of Dr. Johnstone’s medical associates.

“One of the first projects of the new corporation was to make Dr. Jonathan Forman’s concept of ‘Creative Medicine’ not merely a ‘dream’ but a ‘living reality’ in the lives of the Glendale community. Southern California organic farmers from Escondido to Santa Barbara were sought out and their garden-fresh, vitamin-packed, mineral-rich produce was made available to city dwellers in the greater Los Angeles Metropolitan area.”

The second step was to establish the Foods for Life store.

One photo shows the outside, and three show the inside of the huge, modern natural foods supermarket—the first of its kind in the United States.

Note 1. Dr. George A. Johnstone was a Seventh-day Adventist and graduate of the College of Medical

Evangelists (now Loma Linda University) School of Medicine Class of 1923.

Note 2. According to a small ad in *Modern Nutrition* magazine, in about 1961 Foods for Life was located at 821 E. Broadway, Glendale, California. It sold “Organically grown and unsprayed fruits and vegetables. Roger Jessup and Alta Dena certified Milk. Natural Vitamins and Minerals.”

Note 3. In 1968, Dr. Jonathan Forman established the Jonathan Forman Gold Medal Award, honoring those who had contributed to the field of clinical ecology. Dr. Forman was also president of Friends of the Land—and a professor of the history of medicine at Ohio State University.

Note 4. This is the earliest document seen (March 2020) that describes a natural foods supermarket.

311. El Molino Mills. 1957. Carob Candy: You asked for it—a confection without objections (Ad). *Natural Food and Farming* (Atlanta, Texas) 3(11):10. March.

• **Summary:** “Like chocolate—only better. Without highly refined sugars: Carob (St. John’s Bread) consists of over 50% natural sugars. Without chocolate or cocoa products. A natural, wholesome confection: Contains only carob powder, Kleen Raw Sugar, coconut butter, soya, soya lecithin, vanilla. Ask for it at all Dietary Food Stores or direct from El Molino Mills. Now in 10¢ bars.” An illustration shows a boy holding up a bar of Carob Candy. Address: Alhambra, California.

312. Lavin, Thomas. 1957. News from the secretary’s desk. *Natural Food and Farming* (Atlanta, Texas) 3(11):4. March.

• **Summary:** Gives the name and address of the president and the three vice-presidents, plus the name and address of each

of the 40 members of the national board of directors. Twelve of the 40 directors are either physicians or dentists, with either an M.D. or a D.D.S. degree. Two others have PhD degrees (both in soil science). Also gives a brief summary of the 1957 national convention; over 50 booths were in the exhibit hall. Town Food Co. (seller of Soy Lecithin) was one of ten companies that furnished foods for convention meals.

313. *Natural Food and Farming* (Atlanta, Texas). 1957.

The 1957 Natural Food Associates convention. Little Rock, Arkansas, Feb. 14-17, 1957. 3(11):11-14. March.

• **Summary:** The story is told by 22 black-and-white photos which include: (1) President Nichols standing behind the podium as he calls the convention to order. (2) National Director Joe Francis passing the money basket (to request contributions) at the All-State breakfast. (3) Janet Wright and the Town Food Company booth.

Other companies with booths mentioned in the photo story are: Fanning Soil Service and Hoosier Soil Service. Mountain Valley Mineral Water. Natural Organic Foods, Inc. (Atlanta, Texas). Deer Valley Farm. Friend of the Land. Eagle’s Nest Grove (L.P. DeWolf). Natural Food Supplement Co. D. Earl Striplin (organic grapes). Robertson Organic Empire. Vita-Green Farms. Lee Foundation for Nutritional Research (books and reprints). Krezin (Vincent and Violet Krezin grow organic natural foods on 16 acres). Activo. Adult Bee Farm. NFA Bookstore. Golden Key Productions. Aunt Anna’s Stonemill Bakery and Natural Foods. Lee Engineering. Stone Mill Health Foods. Specialty Foods & Feeds Exchange (Monroe, Wisconsin). Catharyn Elwood (author). Organic Gardening and Farming (Rodale).

Champion Brothers (Redlands, California; navel oranges).

314. Nichols, Joe. 1957. President's address, 1957 national convention. *Natural Food and Farming (Atlanta, Texas)* 3(11):5, 8-10. March.

• **Summary:** "Natural Food Associates was organized in January, 1953, at the Normandy House in Chicago, Illinois. A small group of men and women met together in an effort to effect a national organization which would have for its objective, the teaching of the advantages of natural, poison-free food and natural organic farming methods. This was not the beginning of the organic movement in America. Many people and a few organizations had practiced organic farming and had taught the values of natural foods for many years. Long before Sir Albert Howard's book, *An Agricultural Testament*, was published in this in this country in 1946, there were organic farmers scattered all over this nation. Some of the people at our first Chicago convention had been taught organic farming by their fathers. The publication of Sir Albert's book and the work of the Mr. J.I. Rodale of Emmaus, Pennsylvania, did much to increase the interest of thousands of American farmers. Books by Friend Sykes and Sir Lionel Picton in England, and the work of Lady Eve Balfour and her Soil Association, with members scattered all over the world increased interest in natural farming methods and emphasized the declining nutrition of both man and beast. Sir Robert McCarrison for years had tried to interest the medical profession in better nutrition. Our own Dr. Royal Lee, Dr. Henry Trautmann, Dr. Jonathan Forman, Dr. Fred Miller, Dr. Coda Martin, Dr. Ray Evers and many, many others have recognized the values of natural foods grown on fertile soils for years. Dr. James Asa Shields of Richmond, Virginia, has been writing about the relationship of soils to health for a long time. The American Academy of Nutrition, organized on the West Coast in 1936, was an attempt by a group of doctors and dentists to find and publicize the truth about nutrition in relation to metabolic disease. Dr. E.E. Pfeiffer, who is perhaps the world's greatest soil scientist, has proved the principles of organic farming, long before some of you were born."

"The Mormons and the 7th Day Adventists have known and practiced these principles for decades."

"Modern scientific agriculture and modern scientific nutrition have failed. The plight of our farmers and the illness of our people prove that statement... The real cause of our farm problem is poor soil and the hordes of insects that have resulted from chemical farming. Chemical farming has failed... All history teaches us that every great civilization has failed when the fertile soil was destroyed." Address: Atlanta, Texas.

315. Martin, W. Coda. 1957. Insecticides today and tomorrow. *Natural Food and Farming (Atlanta, Texas)* 4(1):6, 10-12. April.

• **Summary:** "From World War I in 1918, to the Korean War in 1950, a period of 32 years, there was an increase of rejections [after physical examinations, from military service] from 21.3% to 52%. This is an increase of 30.7% or approximately 1% per year. Even this marked increase of rejections is not a true picture of the health of the youth today as the physical standards for draftees in 1918 were very high, while in 1950 they were markedly lowered as the essential manpower could be obtained only by reducing the physical standards with respects to some defects and psychiatric conditions.

"If this appalling speed of degeneration continues at the rate of 1% per year for our young people, then within 25 years, and that is a short period of time, 75% of the youth of the nation will be physically or mentally unfit for active military service. These figures are hard to believe, but they are statistical facts obtained from the Selective Service reports." Address: M.D., 125 E. 72nd St., New York, NY.

316. Natural Food Associates. 1957. These retail outlets sell the NFA magazine *Natural Food and Farming (Ad)*. *Natural Food and Farming (Atlanta, Texas)* 4(1):14. April.

• **Summary:** The name and address of about 69 retail outlets are given. Of these, about 13 have the term "Natural Foods / Food" in the company name and 13 have the term "Health Foods / Food in the company name.

Note: An even larger list appears in the June 1957 issue (p. 14). Address: M.D.

317. Pfeiffer, Ehrenfried E. 1957. Commentary on definitions. *Natural Food and Farming (Atlanta, Texas)* 4(1):7, 12-16. April.

• **Summary:** Contents: 1. What is organic? 2. What is natural food? 3. What are natural fertilizers. 4. Are pesticides or insecticides natural aids in the production of crops? (Insects are a sign that the balance of nature has been disturbed. Killing the insects does not correct the imbalance). There are two types of insecticides: Chemical poisons (such as DDT), and organic natural poisons which leave no residue and do not build up immunities (such as Derris, Rotenone, Pyrethrum, Nicotine). 5. What is natural balance? (balance is the key concept in nature and in farming). 6. Is commercial fertilizer objectionable? 7. What is a fertile soil?

"To work with Nature and not against it is the aim of the N.F.A. affiliated grower."

"We have to differentiate between organic and mineral fertilizers. Lime, rock phosphate, green sand and potash rock are minerals. Nevertheless they can be used according to the concept of the organic movement for they are natural. To call rock phosphate or potash rock 'organic' is a misnomer. Superphosphate is a processed mineral fertilizer. Organic fertilizers are: manure of all kinds, compost, peat, guano... The aim of all composting processes is to produce finally, humus, that state of organic matter in soil which is

stabilized and maintains soil life. There are many degrees of breakdown between the raw offal [such as fresh manure, feces, or night soil] and the biologically digested end product. The nearer to the state of humus, the more valuable the compost is for the production of soil health. The cruder, the more the danger that undesirable by-products and by-effects will show up.”

“In mineral fertilizers [such as NPK] the availability of the contents decides their value... Organic matter and soil life are a must to maintain availability.”

“Finally a word about sewage sludge. This has to be completely broken down to be most beneficial. Nothing of the original nature of feces should be left; otherwise the danger of the presence of pathological organisms, as well as toxic by-products, exists” (p. 7).

“There are other factors besides soil chemistry which determine whether a soil is fertile or not. One important factor is the water absorption and water holding capacity of a soil. It is much too little realized that water is the limiting factor with regard to crop yield” (p. 14).

“A hardpan underneath prohibits the roots from growing deeper and contains a toxic accumulation of salts and acidity. The bacterial life in the soil decides the availability of minerals, the rate of nitrification and of useful nitrogen reserve. The most favorable bacteria life can only exist if the soil structure is friable, crumbly and well aerated. It can only exist if the drainage is well maintained.

“A root consumes its own weight by way of oxygen per day. Water-logged soil increases acidity and unfavorable reactions. Spectacular results can be seen by just improving the soil structure (so-called physical considerations versus chemical nutrients). A fertile soil is one which is well supplied with available minerals, humus or organic matter better than 2 per cent, water holding capacity, good drainage, good aeration, favorable structure conditions, good tith, proper cultivation, balance of rotation versus exhausting monoculture. It is a grave error, frequently encountered, to think that fertilizer alone can amend all problems of the soil.”

“Fertilizer is only a small item of a manifold pattern. Only the integration of all factors will secure health and nutritional value of crops.

“Under deficient and unbalanced conditions, pests will find an easy prey. The spraying of toxic materials alone does not solve the problem. Soil building practices have to support the combat against pests.”

Note 1. Healthy soil is essential for producing healthy organic foods.

Note 2. This is the earliest document seen (April 2019) that contains the word “monoculture.” Address: M.D.

318. *Los Angeles Times*. 1957. Sciences accused as cause of most illness. May 22. p. B2.

• **Summary:** Dr. Joe D. Nichols, a “small town Texas banker,

physician and nutritionist,” spoke yesterday before 75 physicians at a staff meeting in Behrens Memorial Hospital, Glendale, California. When he finished, he was applauded. Nichols is the spark plug behind “several organizations which are trying to change farming methods and the nation’s dietary habits.”

He said that we live in a country where we have more good physicians, more excellent medical schools and hospitals, more education, more outstanding scientists, and more money than any other country on earth.

“But despite all of this, everybody in the country is sick.” He said that he did not know anyone, anywhere, who did not have some physical disability. Even his own son, age 3, has three bad teeth!

Diseases such as heart disease, cancer, high blood pressure, stomach ulcers, rheumatism, diabetes, and mental diseases are all increasing in the USA. He believes that the basic cause of these problems is modern chemical farming—the way we mistreat our soil, with chemical fertilizers and sprays—and the effects of this on the crops and animals that consume the products of such farms. The plants are unhealthy, and so the animals (both human and non-human) are unhealthy.

He then discussed refined foods, such as white bread and white rice. He described white sugar as “the worst food in the American diet”—noting that not even a worm would eat it. By refining natural foods, American food processors are destroying their life-giving qualities. When people eat such foods, day after day, it is no surprise that they are poorly nourished.

Note 1. This is the earliest article seen (Aug. 2010) on “Joe D. Nichols” in the ProQuest suite of 15 digitized major American newspapers.

Note 2. Behrens Memorial Hospital was founded and is run by Seventh-day Adventist physicians.

319. Delaney, James J. 1957. Chemical additives in our food supply can cause cancer: Extension of remarks of Hon. James J. Delaney of New York in the House of Representatives—Thursday, February 21, 1957. *Natural Food and Farming (Atlanta, Texas)* 4(2):8-9. May.

• **Summary:** “Mr. Speaker, in 1950, 1951, and 1952, I was chairman of a select committee which investigated the use of chemical additives in foods and cosmetics.

“Testimony given in the hearings established the fact that the enormously expanded use of a constantly growing number of new chemical additives in food constitutes a definite hazard to public health and that new legislation is needed to bring the situation under control.

“For this purpose, in the 84th Congress I introduced H.R. 4475, a bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act so as to provide for the safety of chemical additives in food. No action was taken by the Congress, so on January 29 I reintroduced the bill,

which is now H.R. 4014.

“Mr. Speaker, although over five years have elapsed since the committee terminated its investigation, evidence continues to accumulate showing the urgent need of this legislation. The following letter, sent me by one of the noted cancer experts of the country emphasizes the urgency.”
Address: Congressman from New York.

320. *Natural Food and Farming (Atlanta, Texas)*. 1957. America’s organic farms: Brunson Farms. 4(2):19. May.
• **Summary:** Owned and operated by Doyle Brunson in Alexandria, Indiana. Photos show the barn and silo, and Mr. and Mrs. Brunson.

321. Natural Food Associates. 1957. Ready now: “Our Living Soil” (Ad). *Natural Food and Farming (Atlanta, Texas)* 4(2):19, 22. May.
• **Summary:** “The first color sound motion picture produced by Natural Food Associates in a fully professional manner.
“The film everyone should use in his community, church, P-TA, TV station. Excellent for companies in fields related to Natural Food and Farming. Place your order now! Price \$200.00.” Address: Film Div., 1921 Hillhurst Ave., Hollywood, California.

322. Nichols, Joe D. 1957. President’s page. *Natural Food and Farming (Atlanta, Texas)* 4(2):5. May.
• **Summary:** Discusses the dangers of organic phosphorus insecticides and safety precautions suggested in handling them, based on an article in a popular farm magazine. “These new powerful insecticides are causing horrible deaths.” The insecticides include Demeton / Systox, E.P.N., Guthion, Methyl Parathion, Parathion, TEPP, Thimet, Bayer 19639, Diozinon, Phordrin, and Trithion.

“These insecticides are dangerous because they destroy an enzyme in the body known as cholinesterase.” “A chemical developed during the war and called a nerve poison gas, which was too dangerous to use, is now termed an insecticide and sold to the American farmer to spray on his fields.” Gives a long list of the safety precautions for using insecticides. Address: M.D., Atlanta, Texas.

323. Nichols, Joe D. 1957. Book reviews: Soybeans for Health, Longevity and Economy, by Philip S. Chen, Ph.D., Professor of Chemistry, Atlantic Union College. Reviewed by Joe D. Nichols, M.D. *Natural Food and Farming (Atlanta, Texas)* 4(2):13, 22. May.
• **Summary:** “The soybean is a food that is as nearly perfect as cow’s milk, but at the same time is rich in iron and vitamin C (when sprouted). Its milk is used as a substitute for cow’s milk for individuals who are allergic to it.

“This little book by Dr. Chen comes at an opportune time. The increasing incidence of cardio-vascular disease has focused the attention of the medical profession on nutrition.

The possible relationship of ‘bad fats’ to cardio-vascular disease is in the news.”

“The book makes a good case for vegetarians. (So did the Symposium on fats at New Orleans last month sponsored by the American Medical Association Council on Food and Nutrition.)”

“Every doctor interested in nutrition should read this book. It is easy to read and can be ‘digested’ in an evening

“It is said that the future of medicine lies in the field of prevention. I believe the greatest part of prevention lies in the field of nutrition.” Address: M.D.

324. *Organic Gardening and Farming*. 1957. The beginning of our experimental farm: Editor’s review. 4(5):56, 58, 60-61, 64. May. [3 ref]

• **Summary:** Next month marks the 15th anniversary of this magazine [so it started in June 1942]. Mr. Rodale was inspired by the work of Sir Albert Howard and his book, *An Agricultural Testament* (1940, Oxford University Press).

“A powerful impetus surged over us, and within a few weeks my wife and I became the proud owners of one of the worst pieces of land in our county, sixty acres of the most refractory clay you would want to sink a disc into.” That was in 1941, and they set out “to prove the advantages of the organic method, and to show how a person with little agricultural experience need not fear to farm the most barren piece of land.” A photo shows J.I. Rodale. Address: Emmaus, Pennsylvania.

325. Pfeiffer, Ehrenfried E. 1957. Balanced nutrition of soils and plants: Part 1 of 2. *Natural Food and Farming (Atlanta, Texas)* 4(2):6-7, 14, 16-18. May.

• **Summary:** In general, the farmer is interested only in “top yields, for he is paid for the quantity of his products. Seed breeding, selection of varieties, any measured with regard to agriculture, soil fertilization, soil cultivation, are all geared to higher yields.

“The spreading of insect pests and plant diseases has brought a certain change in this quality production concept, namely, there is now a demand for resistant plants. This is probably the only beneficial aspect of pests—that their existence calls for a change in agricultural thinking.”

“The health-conscious consumer is not so much interested in yield per acre, but he demands a food of highest nutritional value, free from poison or irritating contamination. Biological control of pests is one answer to the demand. Biological control brings up one of the most important problems: that of *biological balance* in soil, in plants, in the environment of growing crops.

“To maintain and to create balance is therefore, the first step towards crop improvement with regard to quality. That we deal today with disturbed natural balances in the production of nutritional values is another conclusion which the facts press upon us.

“Here the problem of *food quality* enters. If anything goes wrong in agricultural production, the first question should never be, ‘Which and how much fertilizer should one use?’ but rather, ‘Which principle of balance has been violated?’ The fertilizer use is only a small fraction of the entire balanced pattern. There are many other factors involved.” Address: M.D.

326. Exner, Frederick Blythe; Rorty, James; Waldbott, George L. 1957. *The American fluoridation experiment*. New York, NY: Devin-Adair. viii + 277 p. Index. 21 cm. [262 ref]

• **Summary:** Written by doctors Exner and Waldbott, this book was edited by James Rorty, who also wrote the Introduction. Contents: Introduction: Twenty-eight million guinea pigs. Fluorine has a history, fluorine or calcium?, origin of the fluoridation thesis, too much sugar causes tooth decay, the fluoridation bandwagon, the “engineering of consent,” Congress warns “go slow,” Europe watches “the American experiment,” adverse findings accumulate, the spread of fluorine poisoning, is dental caries really being reduced in the fluoridated cities?, food, too, contains fluorine, the warning of the water engineers, fluoridation and the Fourteenth Amendment, the dilemma of the public health administration.

Part I: Fallacies of the fluoridation thesis (by Frederick B. Exner, M.D.). 1. The physiological action of fluorides. 2. Why fluoridating water supplies is dangerous. 3. Chronic fluorosis in animals and man. 4. Big Brother knows best: budding authoritarianism in our public health service.

Part II: Fluoride poisoning in the fluoridated cities (by G.L. Waldbott, M.D.). 5. Incipient fluorine intoxication from drinking water. 6. The great fluoridation promotion. 7. The fluoridation-resistance movement. 7. The water engineers know their subject. 8. Alternatives to fluoridation. 9. Revolt of the human test animals.

Appendixes: 1. How the public health service answers questions. 2. Communities discarding artificial fluoridation. 3. Fluoridation-the unbelievable blunder. 4. Organizations comprising the fluoridation-resistance movement.

Appendix 1 consists of 10 typewritten questions (dated 8 July 1956) that the author submitted to Dr. John W. Knutson, Assistant Surgeon General, Chief Dental Officer, Public Health Service, Washington, DC. He explained that he was preparing a book on the subject. The full answers (dated 9 Aug. 1956) and likewise published. These are followed by “A review and analysis of Dr. Knutson’s answers,” by Rorty.

Appendix 2 lists 75 communities that have discarded fluoridation, alphabetically by state, and within each state by city. Address: 1&3. M.D.

327. *Natural Food and Farming (Atlanta, Texas)*. 1957. Let experiences of others teach us: These 75 cities put fluorides in their water, but stopped when they learned the truth about fluoridation. 4(3):12-13. June.

• **Summary:** The 75 cities are listed and details on the population and date of vote to stop fluoridation in each are given. Below that is “A statement on fluoridation by the medical-dental ad hoc Committee on Evaluation of Fluoridation.” This consists of nine basic points, and is “signed by Jonathan Forman, M.D., National Chairman, Columbus, Ohio, and approximately 500 other doctors and dentists.”

This ad was printed in *The North Side News*, Atlanta, Georgia, April 25, 1957. Address: M.D.

328. *Organic Gardening and Farming*. 1957. Landmarks of the organic epic. 4(6):54-55. June. [3 ref]

• **Summary:** “1840–Justus von Liebig created the chemical school of agriculture by his classic experiment which used an analysis of the ash of burned plants as the basis for recommendations of artificial fertilizers.

“1931–Sir Albert Howard wrote his book, *Waste Products of Agriculture*, which expressed his rebellion against artificial farming methods.”

“1942–J.I. Rodale starts publication of *Organic Gardening and Farming* magazine.”

“1947–Publication of J.I. Rodale’s basic book on the practice and theory of organic gardening and farming.” It is titled *Pay Dirt* and 50,000 copies have been sold.

“1949–The Soil and Health Foundation was formed.” It is a non-profit organization “which has sponsored much significant research on plant, soil, and health relationships.

“1957–For the first time circulation of *Organic Gardening and Farming* magazine exceeds 100,000 copies. Paid circulation is now 135,000 copies monthly.” Address: Emmaus, Pennsylvania.

329. Pfeiffer, Ehrenfried E. 1957. Balanced nutrition of soils and plants: Part 2 of 2. *Natural Food and Farming (Atlanta, Texas)* 4(3):6, 11, 14-15. June.

• **Summary:** “The greatest disturbing factor in nature is man, because he creates conditions which are based on his limited knowledge and one-sided purpose of action.”

“The mineral fertilizer concept, which was geared to bigger quantity production and looked upon nitrogen, phosphate, potash and lime as the only means of producing crops, had neglected the role of trace minerals, of humus, of water preservation, of soil conservation, of quality and nutritious food production, of balanced protein, etc.” Address: M.D.

330. Evers, Ray. 1957. Position of N.F.A. in our national economy. *Natural Food and Farming (Atlanta, Texas)* 4(5):7, 12, 14-17. Aug.

• **Summary:** Begins with a sharp criticism of the basic philosophical ideas of Descartes and Locke, and their influence on modern food and farming. If we follow the ideas of Locke and Decartes to their natural conclusion, “family

life and human personality are sacrificed for production, while production and consumption in their turn are sacrificed for monetary profits.”

“Agriculture, which supplies men with food, is the first of all arts.” Next comes industry. Banking and the manipulation of money is an auxiliary art, meant to serve agriculture, the primary art, and then the secondary industrial arts. Because of Locke and Descartes, money has become the measure of all things, distorting the men’s minds and values. “The results have been disastrous for soil fertility, healthy foods, and human life” (p. 7).

“The materialistic philosophy of Descartes and Locke led to money as the standard value which brought on the Industrial Revolution and the Factory System. The worker became a cog in a machine. The same is now coming true of the farm. It is ceasing to be a personal matter and is succumbing to the factory idea. Large farms are replacing the family units and are owned by corporations. It is now known as the agricultural industry.” Now the challenge is to produce more food at less cost. This leads to chemical fertilizers and food additives and the abandonment of organic farming and high quality soil. Quantity has replaced quality. Self-reliance has replaced reliance on big government, and worship of the State. Reliance on God and religion are waning.

The NFA, though small, “can organize in every state, and by example and precept we can grow foods the natural way and live a natural life, and pray to God” that we can help to save our country. Address: M.D., Andalusia, Alabama.

331. Bonbrake, A.E. (Mrs.). 1957. City fathers study fluoridation issue: Board of Estimates listens 13 hours to proponents and opponents; Water department is opposed. *Natural Food and Farming (Atlanta, Texas)* 4(8):10-11, 20-22, 26. Nov.

• **Summary:** Reprinted from *The Tablet* (Brooklyn 17, New York, March 16, 1957): An excellent and balanced discussion of both sides of the debate over the safety of fluoridated drinking water.

Opponents of fluoridation are of two types: (1) “The Mental-Dental Ad Hoc Committee on Fluoridation” composed of health professionals. (2) Laymen and women. “The largest opposition lay group was the Greater New York Committee Opposed to Fluoridation, Inc., the chairman of which is Mrs. Emily Meher of Rockville Centre. This committee had 53 speakers listed, but not all were able to be heard by the board. Mrs. Meher gave the opening talk for her committee... [It was] factual, documented, informative and admirably dignified. She made some excellent points and when she had finished the Mayor [Robert F. Wagner, Jr., of New York City] said, ‘That was a fine presentation.’” Address: M.D.

332. Balfour, Eve (Lady). 1957. Converting a farm to an organic farm. *Natural Food and Farming (Atlanta, Texas)*

4(9):6, 12-14. Dec.

• **Summary:** This article is based on two articles by Lady Eve Balfour in *Mother Earth*, Journal of the Soil Association, Spring 1949 and Jan. 1954. Soluble inorganic fertilizer decreases “the number of vigour of the soil population.” The conversion make take 3 years, before yields are back to standard.

“Another vital principle to remember is that successful operation of the biological nutrition cycle depends upon right biological balance, and this means balance in the farm as a whole—balance as between arable and grass, balance as between crops and livestock; balance as between cash-crops and fodder crops, and in the insect and soil populations.”

Address: Soil Association, UK.

333. Forman, Jonathan. 1957. A statement on fluoridation. *Natural Food and Farming (Atlanta, Texas)* 4(9):16-17. Dec.

• **Summary:** A highly respected and experienced medical doctor, he makes seven excellent points. For example: (1) “I believe that all freedom loving Americans should be opposed to fluoridation on the grounds that it is totalitarian medicine of the worst sort in that this is the first in the history of medicine that the size and age of the individual has been disregarded in the prescribing of a poison to be taken internally as a medicine.” Address: M.D.

334. Hewitt, Edward R. 1957. Lecithin and health. San Francisco, California: Health Publishing Co. xvi + 238 p. Illust. Index. 24 cm.

• **Summary:** Contents: 1. How to get relief from pains and aches without drugs. 2. Conditioning the body permanently for beauty and health. 3. Aches and pains relieved with the fast [fasting]. 4. Food—Its relation to aches and pains. 5. The law of wholeness of foods. 6. The use of sea water for health. 7. What you should know about meat in your diet (... we should try to get along with as little flesh food as possible”). 8. The smoking problem. 9. The county without a toothache (fluoridation; calcium fluoride is probably beneficial, but sodium fluoride is an inorganic poison). 10. Cholesterol and lecithin. 11. The wonderful world of corrective foods and herbs. 12. The new diet for dynamic health. 13. Kruska and honey for new energy. Recipes and menus. 14. New menus for healthful living. 15. How to select healthful food combinations.

The section titled “Thirty daily menus for your health guidance” (p. 214-24) includes: “soy spread” (with many types of bread). Soy beans are mentioned as a good protein source (p. 226).

Note: A 16-page booklet, only 15.2 cm tall, was also published in 1957 by the same author with the same title. Address: D.C. [Doctor of Chiropractic].

335. Natural Food Associates. 1957. *Natural Food and Farming* digest: a selection of articles from the monthly

magazine. Atlanta, Texas: NFA 146 p. 22 cm. Includes bibliography. *

336. Cocannouer, Joseph A. 1958. Earthworm circulation. *Natural Food and Farming (Atlanta, Texas)* 4(10):10, 19. Jan.

• **Summary:** Discusses several of the many benefits of earthworms in the soil.

Note 1. Wikipedia, under “Earthworm,” lists many benefits:

Biological: Add organic matter to the soil. Convert large pieces of organic matter (e.g. dead leaves) into rich humus (worm feces = casts), and thus improving soil fertility. Once in the burrow, the worm will shred the leaf and partially digest it, then mingle it with the earth by saturating it with intestinal secretions. Worm casts (see below) can contain 40% more humus than the top 9” of soil in which the worm is living.

Chemical: Makes minerals more available to plants. When the worm excretes this in the form of casts which are deposited on the surface or deeper in the soil, minerals and plant nutrients are made available in an accessible form. Investigations in the US show that fresh earthworm casts are 5 times richer in available nitrogen, 7 times richer in available phosphates and 11 times richer in available potash than the surrounding upper 6 inches (150 mm) of soil. In conditions where there is plenty of available humus, the weight of casts produced may be greater than 4.5 kg (10 lb) per worm per year, in itself an indicator of why it pays the gardener or farmer to keep worm populations high.

Physical. Increase the porosity of the soil and enables the process of soil aeration, water holding, and soil drainage to occur. By sliding in their tunnels, earthworms “act as an innumerable army of pistons pumping air in and out of the soils on a 24 hour cycle (more rapidly at night). Earthworms excrete mucus into the soil that acts as a lubricant for easier movement of the worm. (See Bioturbation.) Move minerals from deep layers up to surface layers.

Note 2. Charles Darwin’s last book was about earthworms. At his time, worms were considered pests. Initially, his earthworm work drew as much, or more, attention as his evolution work. His book, *The Formation of Vegetable Mould Through the Action of Worms, With Observations on Their Habits*, published in 1881, sold even better than *On the Origin of Species* during Darwin’s lifetime.

337. Walnut Acres. 1958. Classified ad: Walnut Acres. *Organic Gardening and Farming* 5(1):103. Jan.

• **Summary:** In the classified ads section (left side about half way down): “Walnut Acres. Organic Farm and Mill. Stone ground products fresh from the farm. Grains never treated with fumigants—All grains refrigerated. Complete line of natural foods. Paul Keene. Walnut Acres. Penns Creek, Pa”

[Pennsylvania]. Address: Penns Creek, Pennsylvania.

338. Nichols, Joe D. 1958. Scientific suicide. *Natural Food and Farming (Atlanta, Texas)* 5(1):6-7, 13-17. April.

• **Summary:** “Doctors, dentists, farmers and the common man are becoming aware of the importance of nutrition. The question is, what is proper nutrition? Natural Food Associates believes that the answer to this question is simple. It means natural food grown on fertile soil eaten fresh and poison free. And, as far as I know, NFA is the only well organized national group that is trying to bring this simple truth to a diseased America. We are a national, non-profit, educational organization with only one objective. We are trying to bring the truth about proper nutrition to our people. We have nothing to sell but the truth about nutrition.

“Natural Food Associates was founded five years ago in Chicago, Illinois, at the Normandy House. We did practically nothing the first year. Some of you know that at the second annual convention held at the same place, we almost disbanded. But thanks to Dr. Ray Evers and a few other level headed people, catastrophe was averted. Tom Lavin dropped like manna from Heaven as our executive secretary, and our official journal, *Natural Food and Farming*, came from the press. Our progress since then has been slow, but it is growing. I am happy to report to you that our membership had doubled in the past year.”

“I can report to you that hydrogenated fats have been proved guilty by an increasing number of honest scientists. Only recently Dr. L.W. Kinsell of Oakland, California, has reported a careful three year study which places the chief blame on hydrogenated fats as a cause of atherosclerosis. He has also proved that natural oils, high in the essential fatty acids, will consistently lower the cholesterol level and aid in the treatment of cardiovascular disease. I can only repeat what I told you last year. Do not use hydrogenated fats. These include the ordinary vegetable shortenings in common use today, oleomargarine, mellorine ice cream and most peanut butter found in the average grocery store. Practically all commercial bakery products also contain hydrogenated fats. I talked to the medical director of one of our largest insurance companies recently and he told me that cardiovascular diseases accounted for 64 per cent of his death claims. I doubt if this figure will change much until the American people come to realize the dangers of hydrogenated fats.”

Note: This is the president’s address at the National NFA Convention, March 6-9, 1958, Memphis, Tennessee. Address: M.D., President, NFA, Atlanta, Texas.

339. McCay, Clive M. 1958. The use and abuse of nutrition research. *Natural Food and Farming (Atlanta, Texas)* 5(2):6-7, 14-17. May.

• **Summary:** “In 1915 at the ripe age of 88 died one of the most remarkable women that America had produced. Her

name was Ellen G. White. Although she had only a few months of formal schooling when a child, her list of books even today numbers about 60. Some of these are books about her or compilations from her lectures. Unfortunately these writings are buried in a few stores dealing with religious books and listed in a catalogue entitled *Spirit of Prophecy Volumes*. The chief book of Ellen G. White which deals with nutrition is entitled *Counsels on Diet and Foods*. This work consists of excerpts starting in 1863, at the time of our War Between the States and extending until 1909 or nearly until World War I.” Address: Ph.D., Prof. of Nutrition, Cornell Univ., Ithaca, New York.

340. Goldman, M.C. 1958. Why you should eat organically grown foods: Let’s face the facts about what we eat. Turning away from the truth doesn’t change it—nor does it lessen the dangers in today’s tampered foods. Here are the straight, fact-backed reasons for all of us to seek, demand and stick to natural nutrition. *Organic Gardening and Farming* 5(7):31-36. July.

Address: Emmaus, Pennsylvania.

341. Downs, Robert A.; Dunn, M.M.; Richie, E.L. 1958. Report of dental findings of Seventh Day Adventist students as compared to comparable students in other schools. *Bulletin of the American Association of Public Health Dentists* 18(3):19-21. Sept.

• **Summary:** In November 1956 a study of the dental effects of five years of fluoridation was conducted in Grand Junction, Colorado. “The students’ dental caries rate was found to be similar for all the Grand Junction schools with the exception of a statistically lower decay rate found in the students attending the Seventh Day Adventist school.” It was hypothesized that the reason for this difference, which was also found in studies of other groups of students, was that Seventh Day Adventists discourage the use of refined carbohydrates (such as white sugar) in their diet, and discourage snacking between meals.

342. *Natural Food and Farming (Atlanta, Texas)*. 1958. Personality of the month: Dr. Joe D. Nichols, president of the NFA. 5(5):9. Oct.

• **Summary:** This picture story contains a large illustration of Dr. Nichols and highlights of his life in the form of four cartoons—all by Ray Sawyer. (1) He was “Mr. Conservation of Texas” in 1956. “Very active in soil conservation, Dr. Nichols is secretary of the Marion-Cass Soil Conservation District.” (2) “A resident of Atlanta, Texas, Dr. Nichols is chairman of the board of the Atlanta National Bank and owner of a 1,000-acre organic farm. (3) A graduate of the University of Arkansas Medical School, he is a much sought public speaker. (4) Former president of the Tri-State Medical Society, Dr. Joe operates a 35-bed hospital.”

343. *Los Angeles Times*. 1958. Natural foods group opens 2-day meeting: Children falling victims to diseases formerly old-age ailments, says president. Nov. 17. p. 5.

• **Summary:** The Western States Conference of Natural Food Associates opened a two-day meeting yesterday at the Huntington Sheraton Hotel. The group’s message is simple: “Everyone who eats should join.”

One of the organization’s basic beliefs is that prevention of metabolic diseases can be found only in sound nutrition. “America is a sick nation” said Joe D. Nichols, M.D. and NFA’s national president. Heart disease, cancer, diabetes, arthritis, and dental caries are all increasing rapidly in the United States. “These are no longer diseases of old age. Our children are falling victim to them at an alarming rate.”

Dr. Nichols said that Americans should be eating natural foods, which are grown on fertile soil, eaten fresh, and “poison free”—which means free from food additives and synthetics, such as emulsifiers, softeners, synthetic dyes, bleaches, oil and fat substitutes, insecticides, antibiotics, hormones, and other substances which “contaminate” the American food supply.

Mrs. Eva Maloney is president of NFA’s regional

chapter in Southern California, and Stewart Reed is head of the chapter in Northern California.

Dr. Jonathan Forman, chairman of the board of Friends of the Land (which is carrying on the work of Louis Bromfield at Malabar Farm) delivered a speech titled “Fluoridation Must Go,” strongly opposing the compulsory fluoridation of our water supply.

Ross Lelansky, D.D.S. from La Canada, spoke about “Your Oral Health,” and deplored the inroads that sugar was making in the American diet. He emphasized that proper nutrition was the key to a healthy mouth, gums, and teeth.

Note: This is the earliest article seen (Aug. 2010) on “Natural Food Associates” in the ProQuest collection of 15 digitized major American newspapers. A total of 37 articles were found from 1958 to 1989.

344. Elwood, Catharyn. 1958. Tribute to a great leader [Congressman James J. Delaney of Queens, New York]. *Natural Food and Farming (Atlanta, Texas)* 5(6):12-13, 26. Nov.

• **Summary:** Tells the story of Delaney’s life and bill (H.R. 13254). Delaney is noted for his campaign to have cancer-causing agents banned from food, drugs and cosmetics. Passed in 1958, the Delaney Amendment was a clause in the 1938 Federal Food, Drug, and Cosmetic Act that outlawed cancer-causing additives in food and commenced the federal government’s role in protecting the public from cancer. His amendment required the Food and Drug Administration to monitor for any chemical additives in food that were found to induce cancer in man or animals.

345. Sakurazawa, Nyoiti [Ohsawa, George]. 1959. *La philosophie de la médecine de l’Extrême-Orient: Le livre de jugement suprême* [The philosophy of East Asian medicine: The book of supreme judgment]. Paris: Librairie Philosophique J. Vrin. 207 p. Feb. 16. No index. 20 cm. [Fre]

• **Summary:** The author’s name on the title page is given as “Nyoiti Sakurazawa (Ohsawa).” Contents: Foreword. Dedication: To my dear Dr. A. Schweitzer. Preface (written by G. Ohsawa on 18 Jan. 1956 at the station of the Protestant Mission at Andéndé, French Equatorial Africa (A.E.F.)). 1. Introduction: Medicine or faith? 2. A practical and dialectical classification. 3. The unique principal of science and the philosophy of East Asia. 4. The origin of man. 5. The medicine of East Asia. 6. The order of the universe and the constitution of man. 7. The supreme faculty of judgment. Appendixes: I and II. Practical guide to East Asian medicine: Gives addresses in France, Germany, Switzerland, Belgium, USA (Michio Kushi, 420 W. 119th St., New York 27, New York), Brazil (Tomio Kikuchi, rua Fugandes, 154, Liberdade Centro, Sao-Paulo), Japan (Nippon C.I., 8 Kasumi-cho, Minato-ku, Tokyo).

The word “macrobiotic” is mentioned in this book, for example on p. 20, No. 4.

On p. 46 Ohsawa mentions miso (*la pâte de soya, de blé ou de riz, pâte tout-à-fait végétale,...*).

Note 1. This is the earliest document seen (May 2019) concerning the soyfoods movement in South America; Tomio Kikuchi was a pioneer in Brazil.

Note 2. This is the 4th earliest document seen (June 2019) that mentions Michio Kushi.

346. Natural Food Associates, Inc. 1959. Announcing 1959 Summer Seminar (Ad). *Natural Food and Farming (Atlanta, Texas)* 6(1):23. June.

• **Summary:** A full page ad. “July 13-18. Classes will be held at the new NFA National Headquarters in Atlanta, Texas.” Who should attend? Men or women interested in better nutrition, better food, organic farming. Class limited to 100 students. 22 hours of class work. 9 hours of field work. “A practical course for everyone.

Outstanding faculty include: (1) E.E. Pfeiffer, Hon. M.D., Spring Valley, New York. (2) Jonathan Forman, M.D., Columbus, Ohio. (President, Friends of the Land). (3) W. Coda Martin, M.D., Hollywood, California. (4) Fred D. Miller, D.D.S., Altoona, Pennsylvania. (5) William A. Albrecht, Ph.D., University of Missouri. (6) Joe Francis, Terre Haute, Indiana. (7) Joe D. Nichols, M.D., Atlanta, Texas. (8) Royal Lee, D.D.S., Milwaukee, Wisconsin.

“Tuition: \$25.00. Entertainment every night. Write for class schedule and complete information. NFA Seminar, Atlanta, Texas.” Address: Atlanta, Texas.

347. Natural Food Associates, Inc. 1959. Southern Conference, Atlanta, Texas (Ad). *Natural Food and Farming (Atlanta, Texas)* 6(1):24. June.

• **Summary:** A 1/3 page ad. “July 18. A one-day program with the following speakers:” Note: This “Conference” is on the last day of the two-day Summer Seminar at the same place. Most of the speakers are the same. Yet this conference appears to be free of charge. “Write for program. Plan to come and bring your friends.” Address: Atlanta, Texas.

348. Nichols, Joe D. 1959. President’s page. *Natural Food and Farming (Atlanta, Texas)* 6(1):5, 24. June.

• **Summary:** “Time is running out. Physical degeneration in America is proceeding faster than it ever has in any civilization.” There is “a biological blight over America” and it is destroying our country.

“Tom Lavin and I have returned from a tour of the West. We had fine, wonderful NFA [Natural Food Association] state meetings and also attended the American Academy of Nutrition convention in Pasadena.”

“One of the speakers at the convention in Pasadena suggested that if Diabetes keeps increasing at the present rate, everybody will have it 25 years from now.” Address: M.D., Atlanta, Texas.

349. Akin Distributors, Inc. 1959. Akin's: Offering dealers in your community the most and best in health foods (Ad). *Natural Food and Farming (Atlanta, Texas)* 6(2):27. July.

- **Summary:** A full-page ad. The company's logo is a smiling sun. "If your community does not have a health food store, why not open one?" Let Akin Distributors tell you how. "Outstanding advantages for dealers: Distributors for over 150 leading manufacturers and brands. Fresh lines—Always. Central location. Fast shipments. Write for our complete catalog."

Note: This is earliest ad by Akin seen in this magazine. Address: 6947 East 13th St., Tulsa, Oklahoma. Phone: TEmple 6-2534.

350. *Natural Food and Farming (Atlanta, Texas)*. 1959. Worth quoting again. 6(2):23, 38. July.

- **Summary:** "It is easier, and more economical to maintain health than it is to restore it.—Henry Trautman, M.D."

"To maintain and create balance is the first step toward crop improvement with regard to quality.—E.E. Pfeiffer, *Balanced Nutrition of Soils and Plants*."

"Testimony given in the hearings establish the fact that the enormously expanded use of a constantly growing number of new chemical additives in food constitutes a definite hazard to public health and that new legislation is needed to bring the situation under control.—Congressman James J. Delaney, House of Representatives, 1959."

"The future health of our nation depends upon nutrition and the greatest factor in prevention of disease is proper nutrition. And proper nutrition begins only in fertile soil.—Joe D. Nichols, M.D., August, 1957."

"The over-eating of refined foods is the only form of suicide tolerated by our customs even though it is painful and tortuous.—Clive McCay, Ph.D., Cornell University" [Ithaca, New York]

"The miller in milling the wheat refines out 25 important food elements, amino acids, vitamins and minerals, some in part and others in entirety, when he makes white flour. Then he puts back 4 or 5 synthetics to call it enriched.—Agnes Fay Morgan, Ph.D. [nutritionist], University of California."

351. McCay, Clive M. 1959. A Swiss visitor brought me up to date: Use and abuse of foods. *Natural Food and Farming (Atlanta, Texas)* 6(3):6-7, 28, 30. July.

- **Summary:** The Swiss dislike stilbestrol implants in poultry, poultry bathed in an antibiotic such as Aureomycin, dyes in food. White flour is taxed to subsidize dark flours thus making dark flour breads less expensive. "The Swiss forbid the bleaching of flour by any chemical agent such as the chlorine dioxide used here."

They have a commission studying the question of putting fluoride in the water supply. Two American cities ran "campaigns stressing the bad condition of the teeth of their children only to discover that their water supply was already

above the recommended level in fluoride before they had added any."

Eli Lilly & Co. are purveyors of stilbestrol to the feed industry; it was sanctioned by the FDA for poultry in 1947 and for cattle in 1954. Address: Cornell Univ., Ithaca, New York.

352. *Natural Food and Farming (Atlanta, Texas)*. 1959. Worth quoting again. 6(4):15. Sept.

- **Summary:** "Our national strength lies in the fertility of our soil and our future survival in the wide management and utmost conservation of it—William A. Albrecht, PhD, *Soil Fertility and Plant Nutrition*."

353. *Washington Post*. 1959. Volunteers find ready takers: Anne's reader exchange. Oct. 9. p. C4.

- **Summary:** The section titled "Organic foods" notes that anyone interested in such foods deserves to know local sources. "First, contact all the health food stores listed in the telephone book." There is also an *Organic Food Directory*, available for only 10 cents from *Organic Gardening and Farming* magazine in Emmaus, Pennsylvania.

Other clubs in the "area concerned with organic or natural foods: Soilbuilders Club of Takoma Park; Natural Food Associates, with headquarters in Atlanta, Texas. I would be glad to hear from you through the Exchange—M.H.T."

354. *Washington Post*. 1959. Nutrition expert cancels speeches. Oct. 28. p. C8.

- **Summary:** "Dr. Clive McCay, professor of nutrition at Cornell University [Ithaca, New York], who was scheduled to speak today at the Natural Food Associates 8 p.m. meeting at the National Housing Center, will be unable to attend because of illness."

His speech, titled "The Use and Abuse of Food," will be read at the meeting by the local NHA president, Miles H. Robinson, M.D.

Dr. McCay's other scheduled appearance at the Piney Branch Co-Op food market also had to be cancelled.

355. McCay, Clive M. 1959. Fads and faddists: Use and abuse of foods. *Natural Food and Farming (Atlanta, Texas)* 6(5):6-7, 22. Oct.

- **Summary:** A nice example of Prof. Clive McCay's wisdom and humor. "1. If a person pressed his own vegetable juice he is a faddist but if he drinks the commercial 'V-8' he is normal."

"4. If a person has brown sugar on his table he is a faddist but if it is white than he is not.

"5. If a housewife makes skim milk into yogurt she is a faddist but if it goes into hot chocolate she is normal.

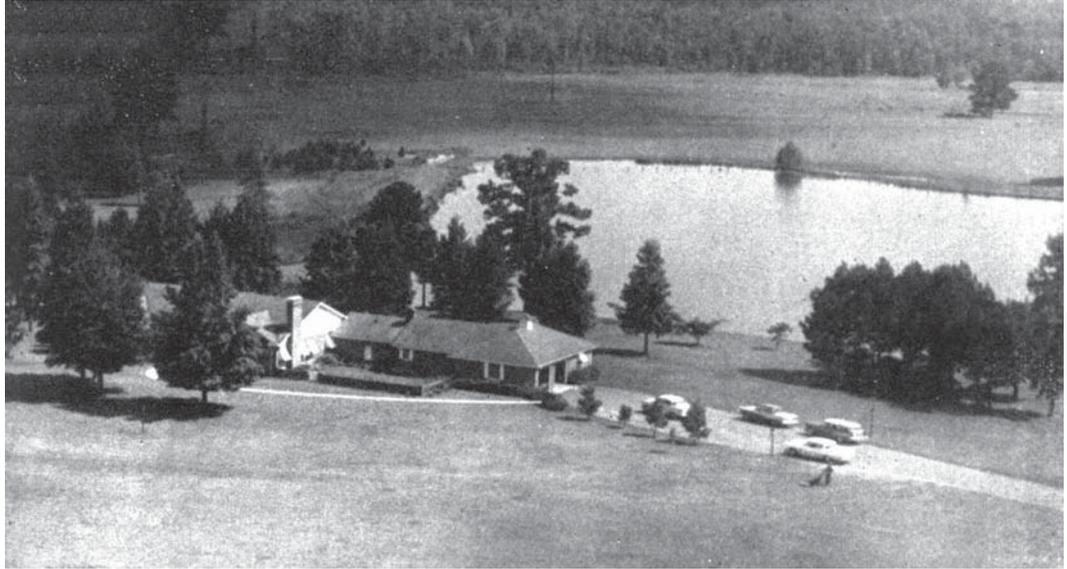

"6. If a person puts rose hips into his lemonade he is a faddist but if he merely adds rum he is normal.

“7. If a person eats whole grain bread he is probably a faddist and well ‘regulated,’ if he insists upon white flour products he is probably normally constipated.

“8. If one produces a garden with little or no spraying he is a faddist, but if he has no garden he is probably normal.”

“11. If one believes that food industries should constantly attempt to improve the nutritive value of their products he is a faddist but if he believes they should center attention upon fancy packages he is normal.

“12. If one believes that there are no deficiency diseases in America today he is normal but if he believes atherosclerosis is such a disease he is a faddist.” Address: Cornell Univ., Ithaca, New York.

356. *Natural Food and Farming* (Atlanta, Texas). 1959. Natural Food Associates: National headquarters, Atlanta, Texas. Photo story. 6(5):25-28. Oct.

• **Summary:** See also next page. Photos show: (1) NFA’s national headquarters on a large lake next to the demonstration farm. (2-6). The staff, which also produces the monthly magazine. Art dep., Advertising and circulation, two secretaries, mailing department.

(6) “The National NFA headquarters is located in a beautiful home that was built in 1959, This building was purchased, along with the 150-acre demonstration farm in March, 1959. The main building has 5,300 square feet of office space and was built at a cost of over \$100,000. The property is located on U.S. Highway 59, five miles west of Atlanta, Texas” [in Cass County, in the northeast corner of Texas, very near the border with Arkansas].

(7-8) Joe D. Nichols, M.D., national president, and Thomas Lavin, national secretary—each seated at his desk. (9) The mailing department in action.

(10) The mailing department in action. “All of the printing, with the exception of the magazine, is done at the national headquarters. NFA owns a Multilith offset printing press and a Gestetner Mimeograph machine.” (11) “A full-time caretaker [seated on his tractor / bulldozer] lives on the property the year around.”

“Natural Food Associates is a national non-profit educational organization with the following objectives: 1. To teach people the values of natural poison-free food, grown on fertile soil. 2. Tell them how and where to get this food.”

357. Strayer Seed Farms. 1959. Classified ad: Delicious, healthful, organically grown vegetable soybeans... *Organic Gardening and Farming* 6(10):92, col. 2.2. Oct.

• **Summary:** “... for cooking, baking or sprouting—5 lbs. \$2.00, 10 lbs. \$3.75 postpaid anywhere in the U.S.” Address: Hudson, Iowa.

358. *Los Angeles Times*. 1959. Natural food sessions open. Nov. 15. p. SG6.

• **Summary:** “Pasadena—The Western Conference of the Natural Food Associates will open a two-day convention today at the Huntington Sheraton Hotel.

“W. Coda Martin, M.D., vice president of NFA, will deliver the welcoming address at 9:45 a.m. today. In addition to a wide selection of lecture subjects, the conference will hear a ‘Forum on Standards’ at 3:15 p.m.

“Annual banquet tonight: Thomas Lavin, national NFA secretary, and Joe D. Nichols, M.D., national NFA president, will speak at the annual banquet tonight at 6:30.

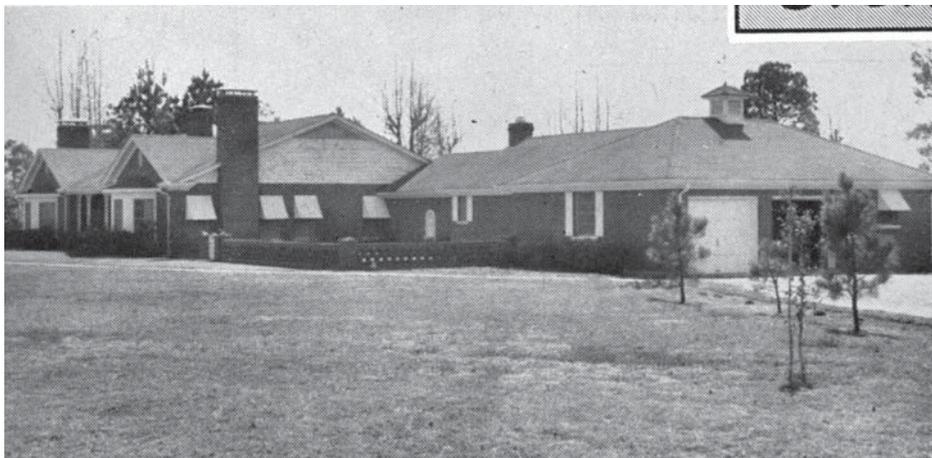

“The conference will end tomorrow afternoon following a tour of a local dairy” [probably Alta Dena, which sells raw / unpasteurized milk].

359. *Los Angeles Times*. 1959. Diet experts gather. Nov. 15. p. C4.

• **Summary:** “A western conference of Natural Food Associates will be held today and tomorrow at the Huntington-Sheraton in Pasadena.” Among the speakers are six physicians from various parts of the USA; they will talk about the relationship between diet and a variety of diseases.

360. *Los Angeles Times*. 1959. Cranberry furor seen causing attack on law: Amendment on cancer to Drug Act should be preserved, Health Food group told. Nov. 16. p. 4.

• **Summary:** Yesterday in Pasadena Dr. Jonathan Forman

drinking milk and consuming fluoridated water. There has been much recent concern about the strontium 90 content of milk as a result of fallout, and of the cholesterol content of milk. "Part of the public has turned from conventional [animal] fats to oils such as corn, cottonseed, olive, soybean, and safflower. New margarines are appearing on the market boasting of their content of unsaturated fatty acids."

"If these trends continue, revolutionary changes may be forced upon the dairy industry... Butter

may have to be mixed with corn oil in order to compete with special margarines..."

"The next great concerns of the public about milk are due to its content of spray residues and antibiotics. Mass spraying against such pests as the gypsy moth has caused much concern over the DDT that finds its way into milk." Address: Ph.D., Prof. of Nutrition, Cornell Univ., Ithaca, New York.

addressed 200 "health food disciples" at the Western Conference of Natural Food Associates. Forman is a physician in Ohio, is on the faculty of the Ohio State University medical school, and for 20 years was the editor of the *Ohio State Medical Journal*. He said that the current controversy that has arisen over contamination of a portion of the U.S. cranberry crop might lead to an attempt to dilute or eliminate the Delaney amendment to the Pure Food and Drug Act.

Dr. Forman explained that this amendment, which was made part of the act in 1958, "makes it unlawful to sell food that is contaminated with substances known to cause cancer in animals, regardless of their cancer-producing properties in humans." Dr. Forman said it is important to preserve this law at all costs.

"Some 400 health food followers are expected to attend the convention before it ends" this evening.

A large photo, titled "Health food meeting, shows (left to right): Drs. Jonathan Forman, Joe D. Nichols, and W. Coda Martin standing together.

Note: Although repeatedly called a "health food" group in this article, NFA is actually a "natural food" group—as its name clearly states.

361. McCay, Clive M. 1959. The use and abuse of food: The impact of current public opinion on the use of foods. *Natural Food and Farming (Atlanta, Texas)* 6(6):6, 29-30, 32. Nov.

• **Summary:** About the concerns of various groups of people

362. *Natural Food and Farming (Atlanta, Texas)*. 1959. New compost material: Chicken litter. A new product for organic farming. 6(6):25-28. Nov.

• **Summary:** "To help build a prosperous organic agriculture, and assist growers in the practice of real soil conservation, Dr. E.E. Pfeiffer, Director of Research, Biochemical Research Laboratory, Spring Valley, New York, together with leading businessmen such as Mr. Joe Francis, Jesse Jewell, Charles and Everett Davidson and George Van Giesen, have developed process of mineralizing chicken litter. The product, trade named Mineralized Poultry Compost, is now being made available to organic farmers as MPC."

"Production of MPC was first started in July of 1958 in Gainesville, Georgia. under the guidance of Dr. Pfeiffer. Recognized as one of the nation's leaders in the field of organic fertilization [fertilizers], Dr. Pfeiffer is a Professor of Biochemical Research, Farleigh-Dickinson University, Rutherford, New Jersey, and author, lecturer, and holds an honorary M.D. degree." He also operates a laboratory in Mexico City.

"It is a recognized fact that basic elements and minerals, together with organic matter in balance with water and air are needed for good soil fertility. MPC gives the organic or biological farmer the opportunity to work with these tools of nature—the use of only natural minerals. No highly soluble [chemical NPK] fertilizer, chemicals, synthetics or poisonous sprays are used in the manufacture of MPC.

"The MPC processing plant in Gainesville, Georgia, is the only one of its kind in the nation today." The 20-

acre processing plant produces 50-100 tons per day of an excellent, odorless product. "Under the proper conditions, the active bacteria remain indefinitely and under the proper environment continue to multiply." If the bacteria die, they can be restored by "adding applications of MPC at periodic intervals."

"With the number of large commercial farms using organic and biological methods ever increasing, MPC is providing a logical method of creating the vital biological activity for a living soil that provides non-toxic growth and balanced soil-mineralization."

Photos show: (1) First step in the MPC process is the gathering of the poultry litter. Below, a front end loader [tractor] cleans poultry house. Litter from broilers deposited on peanut shells is preferred. (2) Powered scoop shovels are used to load large dump trucks with the raw manure and litter used in the MPC process. (3) At the MPC plant bacteria is placed in solution and sprayed on the newly built piles to assure even distribution. (4) The newly built piles of MPC consisting of broiler litter, hen litter, Hybro-Tite [lithonia granite dust from Georgia], colloidal phosphate, soil, water and B.D. Compost starter are sprayed with a bacteria solution and then loaded into trucks by a continuous loader for delivery to the composting area. (5) MPC is delivered to the composting area and placed in many long parallel windrows called fermentation piles. Above, process is being checked for moisture content which is reduced to about 15% before further processing. (6) The continuous loader is used to turn piles of MPC undergoing fermentation in the composting area to insure thorough and complete processing. (7) When the MPC is dried to approximately 15% moisture, it is loaded on a conveyor belt preparatory to the screening process. (8) Close-up view of the screening process which segregates the fine and coarse particles of MPC. Fine particles are placed into a shed and are now ready for market. Coarse particles are gathered and placed in a new pile for additional processing. (9) The finished MPC is loaded directly into a Hoosier Soil Service truck for delivery to a plant where it will become a vital part of "Hoosier Blend."

363. Miller, Fred D.; Yost, Edna. 1959. Open door to health: A dentist looks at life and nutrition. New York, NY: Devin-Adair Co. x + 182 p. Introduction by Victor G. Heiser, M.D. Index. 21 cm.

• **Summary:** This book is by Dr. Fred D. Miller as told to Edna Yost. Chapter 1, "The mouth is the barometer of health," begins: "My patients often ask why I, their dentist, am so much more interested in helping them to learn to eat properly than are their physicians."

"The recipe [for whole wheat bread] selected, largely the one Peg Canan and her aunt had worked out and the Canans had been using for twenty-eight years, made use of fresh stone-ground wheat flour shipped weekly from Paul Keene's Walnut Acres Farm in Penns Creek. Today that loaf has

attained fame as Fairleigh Dickinson College Bread,... (p. 36).

The author is opposed to fluoridation (p. 102-15). He believes in consumption of whole, natural foods and to elimination from one's diet of highly refined foods such as white flour and white sugar. Address: 1. D.D.S., F.I.C.D; 2. A.B., Litt.D.

364. Sutton, Philip R. 1959. Fluoridation. Carlton, Victoria, Australia: Melbourne University Press. Nov. 2nd ed. 1960. *
• **Summary:** According to <http://fluoridationqueensland.com>: "Dr Sutton was the leading Australian dental researcher to question the alleged scientific basis for fluoridation. In 1959, as a Senior Research Fellow in the Department of Oral Medicine and Surgery, University of Melbourne, Dr. Sutton published a landmark monograph, 'Fluoridation: Errors and Omissions in Experimental Trials' (Melbourne University Press, Melbourne). This was a greatly expanded version of a paper published in 1958 by Dr Sutton and Sir Arthur Amies, then Dean of the Melbourne University Dental School. The monograph revealed in detail some of the serious deficiencies in the North American fluoridation 'trials' at Grand Rapids, Evanston, Brantford and Newburgh. In my view it is a substantial scientific analysis, carefully and rigorously done. It shows that the trials have major shortcomings, including limitations of data used, inconsistencies and errors in sampling, inadequacy of control populations, inappropriate 'weighting' of results, alterations to original results and misleading presentations and discussions of results.

"Soon after publication of the monograph, the pro-fluoridation Australian Dental Association (ADA) sent copies 'to all of the men who are in charge of the experiment', asking them for comments. Then three hostile reviews were published in the *Australian Dental Journal* (February 1960) and in the *New Zealand Dental Journal* (January 1960). Although the reviews contained serious and inaccurate accusations, it appears that Dr Sutton was not given the opportunity to reply in the journals concerned.

"So, Dr Sutton brought out a second edition of his monograph (Melbourne University Press, 1960) which included the hostile reviews in full, together with his responses.

"To do this, he first had to overcome the obstacle that the plates of the first edition had been destroyed, counter to normal practice and counter to his wishes.

"Dr Sutton's critique of the early fluoridation trials has stood the test of time. It is unfortunate that these inadequate trials are still cited in reports by pro-fluoridation health authorities and textbooks, without any citation of Dr Sutton's critique.

"In 1985, Dr Sutton and I convened a scientific symposium on fluoridation at the annual conference of the Australian and New Zealand Association for the

Advancement of Science (ANZAAS). This may well have been the first scientific symposium aiming to debate the issue of fluoridation in Australia. We invited two of the main proponents of fluoridation to participate: the ADA and the National Health and Medical Research Council. Both declined, and the ADA wrote to the organisers of the ANZAAS Conference questioning the motivations of the conveners of the symposium. Fortunately, this pressure was resisted and the symposium went ahead. As a result of the attempted suppression, the symposium gained very wide media coverage in Australia.

“Although he was ostracised by many of his dental colleagues for his position on fluoridation, Dr Sutton stood firm, while remaining calm and polite to those who saw themselves as his opponents.

“He was a gentleman and scholar of high moral courage. He will be missed.” Address: DDSc (Melbourne), FRACDS.

365. Anderson, Lee. 1960. Is it organically grown? *Natural Food and Farming (Atlanta, Texas)* 6(8):12-13, 33-34. Jan.
 • **Summary:** Discusses the lack of understanding of the meaning of the term “organically grown” and the need for organic standards. Address: Covalda.

366. Keene, Paul. 1960. Organic farming. In: Walnut Acres mail order catalog. Jan.

• **Summary:** “Nature understands no jesting; she is always true, always serious, always severe; she is always right, and the errors and faults are always those of man. The man incapable of appreciating her she despises, and only to the apt, the pure, and the true does she resign herself and reveal her secrets.—Goethe”

“Back in the hills, fifteen miles southwest of Lewisburg, lies the quiet little village of Penns Creek. The lovely stream bearing the same name flows gently by on its way to the Susquehanna River. Jack’s Mountain looms over the creek in a kindly way. Bears still visit the outlying fields. Stories and legends whisper among the trees—of William Penn, of Indians and buffalos and wild-and-woolly outlaws. We feel the strengths and the weaknesses of the frontier town that even today has not yet completely found its way into creative, meaningful living on the far side of the frontier. Yet perhaps we can be thankful for this and the thousands of other little Penns Creeks all over our country. They may yet have something of value to offer that our larger towns and cities have passed by.

“Less than a mile east of the village, reached only by a country road in middling repair, one finds a farm named Walnut Acres. Signs direct one there. From the outside the farm looks average, raising average crops in the usual way. This farm has few fences, however, for the last cow has long since bellowed her last bellow.

“You should see the barn. From a distance it looks like any other old Pennsylvania Dutch barn, big and reddish.

As one draws near, however, one hears the hum of motors. Entering, one sees painted interiors. Gone the horse stalls, the cow stanchions, the manure alleys. The gloom, the spiderwebs, the lowing, the munching—the sights and sounds that for generations tugged at the hearts of old and young have at last given way. This is not an average farm, however. These are not the usual synthetically fertilized local fields. Ever since we moved onto Walnut Acres, peculiar things have happened. No chemical fertilizers, no poisonous sprays have been applied in the fields, for we had studied a different method of farming known as organic farming or natural farming, and we were convinced of its merits.

“Briefly, in organic farming farmers give more than they take. (This is the basis for all sound living, isn’t it?) We feed the soil, trying to bring it to a high state of natural, well-balanced fertility. We want to be able to sow and then to sit back in calm assurance that a good harvest will follow, without our having to depend on the shot-in-the-arm effect of synthetic fertilizers. What an insult these so-called fertilizers must be to the life of the soil.

“And we believe that in good time, as the soil becomes healthy and independent, disease and insect infestation will lessen naturally. We do not say that the fields will be without insects, nor do we anticipate an easy road. This attitude does seem to make sense, doesn’t it?”

“Many people are looking for foods that they know have been raised naturally, without unbalancing synthetics. They want these foods to be as close to the original, natural form as possible. That desire makes sense, too. Why take apart a grain of wheat, remove the elements that everyone knows are the most valuable—the bran, the wheat germ, the middlings—and then use only the unbalanced white flour? Are we smarter than the Creator who gave us the whole grain? Can anyone really give a sound reason for altering the natural product?”

“And yet every day most people eat highly refined foods, which means foods greatly out of natural balance. And why? Well, it’s a habit—these products are cheap, easy, readily available, they keep forever and a day, the label on the container is so persuasive, and on and on. And often, to our detriment, we quicken and cheapen and submit to high-pressure advertising, and we find ourselves at the same time wondering why we degenerate as we do. Oh, some of us live long, yes, but so often it’s a dragging, nagging kind of living in imperfect health, a kind of living we would almost rather be without. Mere length of days without decent quality of living can be unspeakably empty and meaningless.” Address: Walnut Acres, Penns Creek, Pennsylvania.

367. Walnut Acres. 1960. Classified ad: Walnut Acres. *Organic Gardening and Farming* 7(1):111-12. Jan.

• **Summary:** In the classified ads section, under “Certified Organically Grown” (left side about 1 inch down on p. 112): “Walnut Acres—one of the oldest and best known producer-

to-consumer organic farms. We try sincerely to preserve the goodness that God breathed into the products originally. We offer many items. List awaits! Walnut Acres.” Address: Penns Creek, Pennsylvania.

368. Winchell, Joan. 1960. Tidbits on eating places: restaurant round-up: Aware Inn. *Los Angeles Times*. Feb. 25. p. 33 (Part II, p. 3).

• **Summary:** “Expansion... The Aware Inn on Sunset (home of organically grown food) has opened a branch in Studio City.”

Note: This is the earliest document seen (March 2020) that mentions the “Aware Inn.” It is also the earliest document seen (March 2020) that mentions a natural foods restaurant. No surprise that the restaurant is in California, and in Los Angeles.

369. Ohsawa, George S. 1960. *Zen macrobiotics*. New York, Paris, Brussels, Tokyo: Ohsawa Foundation. 103 p. Undated. 28 cm.

• **Summary:** Note: This is the earliest English-language document seen (Sept. 2017) that contains the word “macrobiotics” (or “macrobiotic”). This is also the earliest book known to macrobiotic recipes (Sept. 2017).

This bound, cloth cover book was owned by Herman Aihara, and is now (April 2011) in the library of the George Ohsawa Macrobiotic Foundation in Chico, California (President: Carl Ferre). The size is 8½ by 11 inches. The cloth cover is pea green and on it, near the top, is written (on two lines): “Zen macrobiotics” with the word “Zen” in large bold capital letters. In the middle: “George S. Ohsawa,” the author. And near the bottom (on two lines): “Ohsawa Foundation: New York–Paris–Brussels–Tokyo.”

The book consists of leaves and the text is typewritten. All of the leaves in this edition are edited, some heavily, in two colors of ink: red edits by George Ohsawa, and blue by Lou Oles (According to Herman Aihara). There is no table of contents or copyright page. On the first leaf, near the top, the title is typewritten again on two lines: “Zen Macrobiotics.” Then the book begins:

“Two ways to happiness through health. Happiness is the goal of everyone in the world. But what is happiness, in the West, and specially in the Far West, America? I do not know. In the Orient happiness was defined by sages some thousands of years ago as consisting of five factors, as follows:

“(1) The first fundamental factor of happiness is joyfulness, an amusing, interesting, brilliant and healthy longevity.

“(2) The second, not to be worried about money.

“(3) The third, instinctive capacity to avoid accidents and difficulties that would cause premature death.

“(4) A loving realization of the order of the infinite universe at all levels.

“(5) Not to become the first as you will become the last. But try to become the last so that you will become the first forever.

“All Oriental philosophy is the practical teaching of how to realize such happiness. It is biological, physiological, social, economical, and logical. It is prohibited for the teacher to explain the deep significance of the philosophy of the constitution of the infinite universe...”

“... School education is completely unnecessary, and even detested. All great men are autonomous and self-made...”

Note 1. This section (two leaves) becomes the Forward in the next edition, which was printed in Japan.

The third leaf is a title page: Like the cover, it has text on 3 levels, but is typewritten. Title: “Macrobiotics: The Biological and Physiological Foundation of Zen Buddhism.” Author: George Ohsawa. Publisher: Ohsawa Foundation: New York–Paris–Brussels–Tokyo.

Note 2. The relationship between this title page, the title page of the mimeographed edition, and the cover is unknown.

The next two leaves, are titled “Health to Peace” and numbered “i” and “ii.” Note 3. They become the Preface in the next edition, which was printed in Japan.

Next is “iii” which is the Foreword in this mimeograph edition but becomes Chapter 1 in the next edition, printed in Japan.

Next are leaves “iv” through “xxii” which are the Introduction in this edition, but become Chapter 1-3 in the next edition printed in Japan. After leave xxii, the leaves are numbered “8” through “86,” and after that is the back cover. The last section of the book is titled “The Case of Mr. E” (leaves 77-86). Note 4. It becomes the first appendix in next edition printed in Japan, which also contains a second appendix titled “The Pro-Forma Death Certificate...”

The mimeograph edition is thus missing pages 3-7. Moreover, all the pages are renumbered by Ohsawa by hand in the upper right corner. In Ohsawa’s numbering there are no pages numbered 1, 2, 5, 6, 7, 8, 10, 33 and 34 (a total of 9) and thus his page is numbered 112.

Because the mimeograph edition is bound, it appears that the pages were rearranged after typing but before publication and distribution.

Page 19: “With the conception of Principal Food and that of secondary food clearly distinguished, people of the Orient could live a happy, free and peaceful life from the beginning up to the importation of the brilliant Occidental civilization, more or less violent, with its industrial and scientific instruments... The Principal Food should occupy at least 60% of your eating.”

This bound, mimeograph book contains many recipes, all of which are numbered. Soy-related recipes include the following: In the section titled “Beans”: 117. Boiled soy beans with miso (the soy beans are first roasted until

they pop). 118. Boiled beans (“Boil soy beans until tender. Seasoned with soy sauce and salt. Boil until liquid is gone. Prepare black [soy] beans in the same way.”)

Note 5. Later writings by Ohsawa show that by “black beans” he meant black soy beans, *Kuro mame* in Japanese. This is the earliest macrobiotic document seen (April 2013) that gives a recipe for whole soybeans.

119. Gomoku beans (boiled soy beans with vegetables). 120. Goziru soup (Gôjiru; ground soaked soybeans with vegetables). 121 and 122. “Aduki” [azuki, adzuki] beans. 159. Hiziji [Hijiki] with age (seasoned with “soyu” [sic, shoyu]). 160. Hiziki and soybean (seasoned with syoyu [shoyu]).

In the section titled “Miso and syoyu preparation”:
 “Both miso and syoyu should be of traditional make.” 201. Sauce miso (miso-tahini sauce). 202. Miso cream. 203. “Muso” (miso and tahini with minced orange peel). 204. “Miso” soup (5 persons). 205. Carrot and onion au “miso” (15 persons). 206. Vegetable au miso. 207. “Oden” au miso. 208. Buckwheat “dango” au “miso.” 209. “Miso-ae.” 210. “Tekka” no. 1 (miso with minced yang vegetables—lotus root, burdock root, ginger—fried in sesame oil until very dry. Good for all yin diseases).

In the section titled “Syoyu”: Recipes 212-221 are seasoned with “syoyu” (shoyu, traditional fermented soy sauce). “Use the traditional syoyu in all cooking (vegetables and fish). Syoyu diluted with a little water is very good for ‘Sasimi’ [sashimi] and fried oyster, ‘Tempura’, fish ‘Sukiyaki’, ‘Tohu’ ([tofu] vegetable cheese of soya beans), etc.”

803. “‘Tohu’ plaster. Squeeze ‘tohu’ (white soya bean cheese) add 10% of flour; stretch this directly on the front or any part painful with inflammation. All pain or inflammation will go away soon.” Note 6. This book does not use tofu in any recipes, probably because Ohsawa considered it too yin. However Ohsawa was the one person most responsible for introducing the word “tofu” to popular American culture; his later writings and especially his students and admirers spread the word to the four corners of the United States.

Note 7. This is the earliest macrobiotic document seen (April 2013) that mentions tofu.

Note 8. This is the earliest English-language document seen (July 2000) that mentions “Tekka” (spelled that way, which is now the proper romanization) or that gives a recipe for making it.

Note 9. This is the earliest English-language document seen (March 2006) that uses the word “aduki” beans to refer to azuki beans. This spelling was subsequently widely used, but only in macrobiotic publications.

Also discusses: In the section on “Egyptian beans” (p. 30): Pois “chiche” (chickpeas, basic preparation by boiling). “Beignet” pois chiche (deep-fried balls of mashed chickpeas mixed with flour). Pois chiche croquette (chickpea croquettes).

Publication: “Published by Ohsawa Foundation, 331 Riverside Drive, New York City, U.S.A. (Secretary Aihara, 44 W. 96th St., New York City, U.S.A.).” Underneath this is “Printed in Japan.”

Note 11: Concerning the date of publication, we read: “My first two books in English will arrive beginning of November: *Zen Macrobiotics* and *The Philosophy of Oriental Medicine*.” (Source: G.O. [George Ohsawa]. 1960/09. “Letter from the editor.” *Macrobiotic News* (New York, NY). No. 6. Sept. p. [7]). Address: New York, USA.

370. Ohsawa, George. 1960. *Zen macrobiotics* [Continued, Part II]. New York, NY: Ohsawa Foundation. 103 p. Undated. 28 cm.

• **Summary:** This mimeograph bound book with the pea green cover, the only known copy of which is owned by the George Ohsawa Macrobiotic Foundation in Chico, California, raises many interesting questions about the publication history of this and closely related titles.

Carl Ferré, an expert on this subject, believes: (1) That there were several “printings” of mimeographed edition and that “printings” may vary. (2) There is a strong possibility that the first editions were sold in Jan., Feb., and March of 1960, before there was any editing on them. (3) It is unlikely that any books were sold with only Ohsawa’s red edits on them. (4) It is probable that no books were sold with both Lou Oles’ blue editing and George Ohsawa’s red editing on them.

Was there a printed edition prior to and different from this edition?

Does anyone own such a copy?

How many pages did it contain and how were the pages arranged? For example, did the original book start with the title page, followed by ages i, ii, iii, etc?

Were the original pages reshuffled to create this bound edition? In this edition, why are there xxi pages of front matter numbered in roman numerals followed by pages 8 through 86 in Arabic numerals.

Why do some pages seem to be missing from this edition. Carl Ferre believes that someone typed the entire book, then Ohsawa decided to move some of the pages around, which they did before they bound and sold the books (for \$0.50 each) at Ohsawa’s lectures.

How did they bind the books? Did they bind the books by themselves or send them out to a professional bookbinder? Or did a person (who attended the lectures) who was in the bookbinding business offer to bind the books free of charge so they could be sold for only \$0.50 each. Was it originally hardcover or paperback? Is the pea green book in Chico simply an example of all the books sold in 1960 at Ohsawa’s lectures? Or is it unique—one of a kind? When and where did Ohsawa make all this handwritten changes in red? Was someone suggesting the changes to him? If yes, who?

Why is the title on the cover different from the title on

the title page.

Why was the original title page numbered “9” in Ohsawa’s handwriting.

What do the Japanese characters under the handwritten “9” mean?

Why is there content before the title page?

We are told the original mimeograph edition was duplicated and bound in the Aihara’s apartment in New York City; how was it bound?

Carl Ferre reminds us (e-mail of 2 May 2011): Lou Oles took the recipes out of *Zen Macrobiotics* to create a separate book, *Zen Cookery*. “The problem that has always existed is that *Zen Macrobiotics* has numbers in it that refer to numbers in *Zen Cookery* and they have never corresponded. For example *Zen Macrobiotics* says “See *Zen Cookery* No. 103” and you go to *Zen Cookery*, find that number, and its something totally different—or even nonexistent.” Address: New York, USA.

371. Foods for Life, Inc. 1960. Classified ad: Have you tried Foods for Life, Inc. *Los Angeles Times*. April 24. p. GB_A12, col. 3.8. Sunday.

• **Summary:** In the section on “Beauty and health suggestions”: “Sprouted grain bread. Organically grown fruit, vegetables, nuts.”

Note 1. This 11-line ad appeared every Sunday in the *Times* for the rest of the year.

Note 2. This is the earliest document seen (Aug. 2010) that mentions “Foods for Life” in the *Los Angeles Times* or any other California newspaper or magazine.

Note 3. This company (Food For Life Baking Co., Inc.) later renamed its breads “Ezekiel 4:9”—however we are not sure when this designation started to be used. Address: 821 E. Broadway, Glendale [California]. Phone: Citrus 4-8601; Chapman 5-2231.

372. *Compost Science*. 1960--.. Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Jerome I. Rodale, editor and publisher. Vol. 1, No. 1. spring 1960.

• **Summary:** Published quarterly from 1960 to 1969, then bimonthly (once every 2 months) from 1970 until the last issue in Nov/Dec. 1977. Continued by *Compost Science / Land Utilization*. The contents of Vol. 1, No. 1 (Spring 1960) are:

Materials-Handling Methods for City Composting, by H.B. Gotaas, Dean, The Technology Institute, Northwestern University

Using Organic Wastes in Agriculture, by Stephen J. Toth, Professor of Soils, Rutgers University

Marketing of Large Amounts of Compost, by Robert Rodale, Editor, Organic Gardening and Farming

How One City Sells Its Sludge, by Clifford E. Irving, Superintendent, Bureau of Sewage Treatment, Schenectady; New York

Composting Municipal Garbage in Israel, by Hillel Shuval, chief Sanitary Engineer, Jerusalem

Composting Wood Wastes With Other Organic Materials, by Stanley P. Gessel, Associate Professor of Forest Soils, University, of Washington

Composting Around The World, by John R. Snell; Principal, Michigan Associates

Rate of Oxygen Consumption and Respiratory Quotients during the Aerobic Decomposition of a Synthetic Garbage, by K.L. Schulze, Assistant Professor, Dept. of Civil Engineering; Michigan State University

Cannery Waste Disposal by Spray Irrigation, by Helmer Monson, Manager, Civil Engineering, Green Giant Company

Composting Manure, by Anaerobic Methods
Compost News.

“*Compost Science* is a quarterly journal covering the entire field of large-scale composting. It will provide the technical, scientific and practical information that will enable the composting process to achieve its fullest state of development as a means for conversion of municipal and industrial wastes into useful products.” Address: Emmaus, Pennsylvania.

373. Sherman, Gene. 1960. Cityside: He wears a beard but shuns eye patch. *Los Angeles Times*. June 27. p. B5.

• **Summary:** “Jim Baker is the proprietor of the Aware Inn, a slightly avant-garde restaurant on the Sunset Strip.” A “modest man who slightly shuns commercialism,” he “owns a swimming pool and wears a beard.”

374. Grepke, Eva M. 1960. Soybean. *Natural Food and Farming (Atlanta, Texas)* 7(2):14-15, 34, 36. July. [4 ref]

• **Summary:** Contents: Introduction. High in protein and oil. Rich in vitamins and minerals. Most Orientals sprout eaters. Certain precautions required. Meat without a bone (Tofu or soy cheese, with homemade recipe). Proof of anti-enzyme factor.

The article begins: “The history of the soybean is a fascinating story. This little round bean has literally been a golden nugget to the oriental world. For centuries,... it has served as meat, cheese, bread, milk and oil to the people of Asia.”

375. *Natural Food and Farming (Atlanta, Texas)*. 1960. The farmer’s market. 7(2):40-44. July.

• **Summary:** This section of classified ads is divided into organic foods and other classified ads. The organic foods section, 3¼ pages, has entries listed alphabetically by state. The rates are \$24 per year for four lines—additional lines \$4 each per year. Payable to Natural Food Associates, Atlanta, Texas.

The other classified as, which are \$27.50 per year, are divided into these sections: Books, business opportunities, classified (juicers, earthworms, etc.), dairy goat,

miscellaneous, rabbits, soil building, soil test.

Soy related ads: (1) Arkansas: Soybeans, organically grown. No sprays. Paradise Valley Ranch, Box 396, Glenwood, Arkansas.

(2) Illinois: Organically grown. Stone-ground soybean flour and whole soybeans. Halbleib Orchards, Dept. N.F., McNabb, Illinois.

(3) Minnesota: Organically grown, high protein wheat,... soybeans... Seppden's Organic Farm, Rt. 3, Alexandria, Minnesota.

(4) New York: Bio-dynamic whole wheat flour,... Soybeanflour [sic],... Bio-Dynamic Whole Wheat Products, Walter Buschman, Sugar Loaf, Orange Co., New York.

Texas: Note—Many ads contain the term “Deaf Smith” or “Deaf Smith County.” For example: “Biggest stock natural foods in the South. Write for free catalog. 5 lbs. Deaf Smith Country Flour. \$1.50 postpaid. Natural Organic Foods, Inc., Atlanta, Texas.” However Arrowhead Mills is not listed or mentioned here or anywhere in this issue.

Note: This is the earliest document seen (March 2020) that contains a sort of directory of early natural food stores in the United States.

376. *British Vegetarian*. 1960. Vegetarian foods. Sept/Oct. p. 248-49.

• **Summary:** The main protein foods used by vegetarians are nuts, cheese and pulses. In addition, all Health Food Stores sell a wide variety of tinned nutmeats, including the following:

Granose Foods Ltd. makes: Nuttolene (peanuts and cashew nuts). Sausalene (wheat protein, mixed nuts, etc.). Saviand (Wheat gluten, ground nuts, etc.). Meatless steaks (wheat gluten, etc.). Savoury Pudding (wheat protein, wheatmeal flour, groundnuts, etc.). Nutmeat (wheat gluten, cashew nuts, wheat flour, etc.). Sausalatas (wheat protein, mixed nuts, etc.). Soya Beans (soya beans, tomato puree, brown sugar, vegetable shortening, onion, yeast extract, wholemeal flour, seasoning). Peanut Butter. Cashew Nut Cream. Granose was founded in 1898 under the name International Health Association Ltd. and is now at Stanborough Park, Watford. Note: This is the earliest document seen (July 2000) concerning the work of Granose Foods Ltd. with soya beans.

Mapleton's Nut Food Co. Ltd. makes: Maplemeat (cashew nuts, wheat risk, etc.). Savormix and Frittermix (incl. groundnuts); these are in packets for making savouries. They also make numerous tinned nutmeats, plus a wide range of nut and soya butters [probably margarines], savoury spreads and pastes, nut creams, fruit and Dundee cakes. Mapleton's was started in 1897 by the two Mapleton brothers who were processing cracked nuts in a large house on Dolphin Street, Manchester. By 1907 Mapleton's had become a public limited company and occupied a mill at Wardle, Lancashire, later moving to Garston, near Liverpool.

The company opened a second factory in Hamburg, Germany, which flourished until 1914, when it was confiscated. A fire gutted the their Garston mills in 1932 but in 1933 the factory and offices were rebuilt.

Many tons of organically grown produce are grown in the UK and overseas using compost.

377. Rodale, J.I. 1960. A pioneer in soil and health research: The ideas of Sir Robert McCarrison have been of immense value to both the health seekers and the farmers. *Organic Gardening and Farming* 7(10):48-50, 52. Oct.

• **Summary:** The article begins: “In May of this year there died a great man...” A portrait photo shows Sir Robert McCarrison (1878-1960). A physician (M.D.), he died at age 82 (see also *The Lancet*, 28 May 1960). In Nov. 1921 this great English physician visited the USA at the invitation of the University of Pittsburgh to deliver the sixth Mellon Lecture. He talked a lot about the Hunzas, who dwell on the northwestern border of India. This article is about his life and work.

378. Winchell, Joan. 1960. Around town. *Los Angeles Times*. Nov. 13. p. N22.

• **Summary:** In the section titled “Today”: “Natural Food Associates' annual Organic Food Banquet at Huntington-Sheraton.”

379. *Los Angeles Times*. 1960. Natural food group urges health drive. Nov. 14. p. B3.

• **Summary:** More than 1,000 members attended the Natural Foods Associates' Western Conference at the Huntington Sheraton Hotel in Pasadena. The educational theme of the first day of the conference was “the value of natural food grown in good soil.” Dr. Jonathan Forman, professor of the history of medicine at Ohio State University, spoke about the way to gain and maintain prime health through a diet of natural food properly grown, and through regular exercise. People must learn to eat for health, above all, and to insist on whole, natural foods.

Dr. Joe D. Nichols, national president of NFA (Atlanta, Texas), emphasized the two main goals of the non-profit organization: “To educate all people to the necessity of poison-free natural food grown on fertile soil and to tell them how and where to get this food.”

380. Winchell, Joan. 1960. Around town. *Los Angeles Times*. Nov. 27. p. B2, B20.

• **Summary:** The section titled “Did you know?” states: “Gloria Swanson buys all her organically grown fruits and vegetables at ‘Foods for Life’ in Glendale?”

381. Walnut Acres. 1960. Classified ad: Walnut Acres. *Organic Gardening and Farming* 7(11):92. Nov.

• **Summary:** In the classified ads section, under “Certified

Organically Grown” (left side about 70% of the way down): “Walnut Acres—one of the oldest and best known producer-to-consumer organic farms. We try sincerely to preserve the goodness that God breathed into the products originally. We offer many items. List awaits! Walnut Acres.” Address: Box 42, Penns Creek, Pennsylvania.

382. Cummings, Bob. 1960. Stay young and vital. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. xi + 208 p. Dec. Illust. No index. 22 cm. [18* ref]

• **Summary:** This well-known and good-looking movie star, who had his own TV show, was interested in healthy eating. The book includes many rules for good health and many black-and-white photos of the author. In the chapter titled “Sex and salad,” under sources of vitamin E (p. 169), cold-pressed vegetable oils (incl. soy oil) are mentioned.

Cummings liked: (1) Bernarr McFadden [Macfadden], who “crusaded for ‘making a fad of nature.’”

(2) Louis Bromfield (Pulitzer Prize winner) who “pioneered for a return to ‘natural farming’” (p. 202). Bromfield was interested in organic and sustainable farming. In 1939 he bought a 340-acre farm, which he named Malabar Farm; it still exists in Mansfield, Ohio. Address: Los Angeles, California.

383. Banik, Allen E.; Taylor, Renée. 1960. Hunza land: The fabulous health and youth wonderland of the world. Long Beach, California: Whitehorn Publishing Co. 239 p. Introduction by Art Linkletter. Undated. Illust. No index. 24 cm. [1 ref]

• **Summary:** Contents: Introduction, by Art Linkletter (host of the “People Are Funny” TV show). Preface. 1. Journey to a hidden land. 2. The road to Hunza. 3. Introduction to Hunza. 4. Hunza farming and food. 5. Hunza families and Hunza health. 6. Farewell to Hunza. 7. The Hunza lesson. 8. The inspiration of Hunza. Appendix: Questions and answers.

“This book is dedicated to my friend, Art Linkletter, in grateful appreciation for his generous support and sponsorship of my trip to Hunza.” The Hunzukuts, the citizens of Hunza, number about 25,000 and live in tiny autonomous region in high, remote mountain valleys near where the borders of China and Pakistan meet. They live in health and happiness, many past the age of 100. Fair skinned, they trace their lineage to soldiers of Alexander the Great, who took Persian wives. They are Muslims. Dr. Banik, an eye doctor, visited Hunza alone in the summer of 1958. There he confirmed a theory that he has long advocated, that people with good eyesight generally enjoy good health. He also found a better way of living through a balance of one’s physical, mental, and spiritual aspects. Dr. Banik came away convinced that the lifestyle (including diet, hard work, happy disposition) and environment (good soil, clean air and water) of these people was responsible for their good health. Renée Taylor of California helped Dr. Banik write the story of his

visit to Hunza.

A table (p. 193) listing of good calcium sources, soy flour is shown to contain 330 mg/cup. A list of protein-rich foods that contain phosphorus in quantity (p. 194) includes “bean, peas, legumes, soybeans, nuts.”

Notice in *Let’s Live*. 1962. April. p. 13. “Renee Taylor, journalist, lecturer, and author of the book ‘Hunza Land’ will speak for the Pasadena Chapter of the American Nutrition Society, Monday, April 16.” Miss Taylor, who recently returned from a trip to Hunza in the Himalayas, will show photos she took while there. Contains 19 black-and-white photos. Address: 1. M.D. (optometrist), Kearney, Nebraska; 2. Author, lecturer, and managing editor Whitehorn Publishing Co., Long Beach, California.

384. Jarvis, D.C. 1960. Arthritis and folk medicine. New York, NY: Holt, Rinehart and Winston. 179 p. See p. 151.

• **Summary:** “If a natural foods store or a health store is available I feel sure you will find in stock a full strength vinegar suitable for medicinal use” (p. 151).

The term “natural foods” is mentioned on 6 pages in this book: “We can help this process [of healing] by a wise selection of the foods we eat. We need to shun civilized foods, represented by white flour, white sugar, packaged cereals, and processed foods. We need to turn to natural foods that do not come out of a factory, and eat more of fruits, berries, edible leaves and roots, and honey...” (p. 9).

“We would avoid refined foods, like white flour and white sugar, and seek natural foods” (p. 49).

“Besides the vinegar-and-honey treatment, we must return to natural foods. White flour foods and white sugar must be removed from the daily food intake because they are highly refined, which removes the minerals the body depends on to rebuild and maintain body tissues” (p. 115).

“They told me, these old Vermonters, that natural foods gave them the strength to do farm work—strength they could not get from packaged cereals and other processed foods” (p. 128).

“Such a [bodily] condition simply means that you have lost your knowledge of nature’s plan, or have never heard of it. That is the time to examine your daily food intake and begin the biologic selection process, avoiding the civilized [refined] and substituting for them the natural foods that will give your body the acids and minerals nature intended it to have” (p. 145).

Note: This book is poorly written and highly repetitive. On page 151 the author appears to endorse certain makers of medicinal apple cider vinegar. The index is poor and inaccurate.

Note: DeForest Clinton Jarvis (March 15, 1881–Aug. 18, 1966) was an American physician from Vermont. He is best known for his writings on the subject of folk medicine. He recommended a mixture of whole apple cider vinegar and honey that have variously been called switchel or honegar, as

a health tonic. He graduated from the University of Vermont Medical College in 1904, and began practicing medicine in Barre, Vermont in 1909.

His obituary was published in the *New York Times* on 18 Aug. 1966; it states that his 1958 book, *Folk Medicine: A Vermont Doctor's Guide to Good Health*, sold over a million copies. An article about him, titled "Folk medicine." was published in *Time* magazine on 28 Dec. 1959. He died in South Barre, Vermont, at age 85. Address: M.D.

385. LaLanne, Jack. 1960. *The Jack LaLanne way to vibrant good health*. Englewood Cliffs, New Jersey: Prentice Hall, Inc. ix + 224 p. Illust. Index. 23 cm.

• **Summary:** In the section titled "The man who saved my life," LaLanne says that he was a "sickly child" who ate all manner of "treats" such as candy, milkshakes, pies, etc. "In short, I treated my pimples lavishly." One evening he went to hear Paul Bragg speak at a woman's club in Oakland, California. The hall was full when he arrived. "Paul Bragg was the most dynamic man and speaker I had ever heard. He soon convinced me that my condition was not incurable—he'd once been the same way. He spoke of natural laws and natural foods, and how we disobey God's laws by our eating habits. My eyes almost popped when he, a man in his fifties, did handstands across the stage. In that moment I made my decision... 'Dear God, give me fortitude to follow this course.' That night I foreswore the very things I craved most... I began a systematic program of body-building in our back yard.

"This was my conversion... Paul Bragg was a vegetarian and for seven years I followed that regime... I wanted to keep people well. After a time, too, I saw that vegetarianism wasn't the answer. I learned to balance my meals healthfully with meats and fish." He advocates natural foods and an abundance of raw foods (p. 80-83).

Chapter 14, titled "There are no 'miracle' foods," has a full-page, very positive section on "Soy beans" (p. 98-99). "Here is a source of protein higher even than eggs and meat. Soy beans are also a good source of lecithin which, with its ability to fight cholesterol, should be in every diet. You may have to go to Chinese stores to buy your soy beans, but that can be an adventure in shopping. Buy some soy bean sprouts while you're there... I recommend soya bean powder (available at all health food stores) to everyone with an electric blender..."

The section titled "Make the electric blender—Nutrition's miracle tool work for you" (p. 114-15) says that every home should be equipped with "an electric blender or liquifier." In moments you can produce a "health cocktail." "Children should be encouraged to drink the blender beverages." If a sweetener is needed, use honey. For vitamins, add skim milk, wheat germ, brewers yeast, and black strap molasses.

The section on "The fun of Oriental cookery" (p. 121-22) describes shopping for soy beans, bean sprouts, etc. in

San Francisco's Chinatown, and visiting Yamato Sukiyaki House, Trader Vic's, and Don the Beachcomber's. He gets brown rice from George Mardikian, the famous restaurateur. "I never eat the polished white rice." On p. 142 is a recipe for Soy bean bread (with soy bean flour).

Concerning supplements: He takes supplements with every meal, every day. "I take bone meal tablets, multi-mineral-vitamin tablets, Vitamin C and Vitamin E, one teaspoon of wheat germ, one tablespoon of brewer's yeast and two tablespoons of soy powder" (p. 145).

The section titled "Organic foods: Nutrition's next breakthrough" (p. 146-48) includes a long discussion of "One of the great success stories I know... a young man named Jim Baker and his discovery of organic products. I first met Jim during the latter days of World War II when I was stationed at the Navy's rehabilitation center at Sun Valley, Idaho. Jim, a big, handsome, lanky Marine sergeant, was in from the island war zones. He had been injured in an engagement for which he was to be recommended for the Marine Corps' top medal for heroism. But he didn't care to talk of that.

"As I worked with him, helping rebuild his body, we talked of exercise, nutrition and health. We became fast friends there and subsequently, when Jim went home to Ohio, he wrote for photos of my conditioning studio in California. He built a duplicate gym in Cincinnati and used the proceeds to go back to college, where he took advanced degrees in public health.

"The next thing I knew, he was in Hollywood. He had discovered the theory of organic gardening and was sold on it. In Hollywood he opened a restaurant, The Aware Inn, for people who wanted only *health* food, only vegetables grown by organic methods and meat from animals that had been fed the same way. Today Jim's restaurant on the glittering Sunset Strip is never empty. His clientele? People who are aware—who want to eat right. They range from Marlon Brando to Red Buttons to Jack LaLanne and all my friends.

"I foresee a future when millions of Americans will be aware of the need for the best foods that can be grown on God's green earth. On that day, Aware Inns will have sprung up from coast to coast. A healthier nation will be building from the ground up."

In 1956 Paul Bragg introduced LaLanne to the "rubber cord" which he used to develop more than 100 good exercises; he demonstrated some of these on his television show. He called it his "Glamour Stretcher" and sold 200,000 the first year. Today this is widely used in medical physical therapy.

Note: This is the earliest document seen (March 2020) that mentions the "Aware Inn." Address: [California].

386. Longgood, William. 1960. *The poisons in your food*. New York, NY: Simon & Schuster. vi + 277 p. No index. 22 cm. [19 ref]

• **Summary:** Contents: 1. The poisons you eat. 2. The nation's health—Hospitals, SRO [standing room only]. 3. A little poison. 4. Bug killers in every bite. 5. Cancer in human guinea pigs. 6. Dyes—the “innocent” carcinogens. 6. Test-tube meat. 7. Emulsifiers—Whose laboratory, which tests? 9. White bread—Enriched but still impoverished. 10. The sugar story. 11. You are what you eat. 12. 389. *Chicago Daily Tribune*. 1961. Natural food group will meet tomorrow. April 28. p. C11.

• **Summary:** Exhibits of organically grown foods and natural food products will be featured at the annual meeting of the Illinois chapter of Natural Food Associates, Inc., to be held tomorrow, starting at 9 a.m. in the Home Economics building at the Du Page county fair grounds, in Wheaton. Speakers will include Dr. W. Coda Martin of Hollywood, California.

390. Sun Circle Ranches. 1961. Organically grown fruits and vegetables: Without chemicals, sprays or dusts (Ad). *Let's Live* 29(8):43. Aug.

• **Summary:** This ad (5 by 3.75 inches) features the company's label / logo. Around the circle are many rays. Inside: “Partners with nature: Organic growers.” The text states: “Behind the Sun Circle label is a controlled and certified program. Under the Sun Circle label, up to 46 items are now available—with more added from time to time. Four certified representatives personally inspect all Sun Circle farms and groves... Customers in 31 states, including Hawaii, now being served.” Address: 4207 West 3rd St., Los Angeles 5, California. Phone: MA 2-6093 or DU 5-6361.

391. Associated Press (AP). 1961. 50 families ‘fleeing’ Long Island: Seeking nuclear safety. *Kentucky New Era*. Sept. 15. p. 1, 10.

• **Summary:** “Smithtown, N.Y. (AP)—The vanguard of about 50 families in this Long Island community, seeking a better chance of survival in case of nuclear warfare, leaves this weekend to take up residence in Chico, Calif.” [California].

Alvin Bauman, age 43, who is married and the father of two children, said the group had been considering the move for some time, but the present war scare had prompted them to action.

Bauman, spokesman for the group, said Chico had been chosen after exhaustive research, as one of the few areas in the USA that would remain habitable after atomic attacks. The group had also considered Montana (too cold), Oregon, and other locations in Northern California.

About 30 people, including several children, will comprise the initial contingent. A real estate firm in Chico has already leased 12 houses for the group.

Bauman said that many of those joining the exodus were, like himself, members of the Ohsawa Foundation, a philosophical group interested in increasing knowledge between the Orient and the West. George Ohsawa, a Japanese scientist and philosopher, was the founder of this society.

Note 1. The lead article on page 1 of this paper is “US fires underground nuclear test: First since 1958,” by the Associated Press. President Kennedy reassured the nation that today's nuclear explosion had “produced fallout.”

Note 2. This is the earliest document seen (July 2017) that describes the remarkable trip from New York to Chico, California, by the group that founded Chico-San soon after they arrived—in March 1962.

Note 3. This article also appeared in *The Sun* (Flagstaff, Arizona, Sept. 15, p. 2) under the title “Fifty families flee Long Island to ‘survive’ possible nuclear warfare: head for Chico, Calif.”

392. United Press International (UPI). 1961. War scare refugees on Chico trek. *Lodi News-Sentinel* (California). Sept. 16. p. 3.

• **Summary:** “Smithtown, N.Y. (UPI)—A group of nuclear war scare refugees from the New York metropolitan area will begin their journey to California Saturday as scheduled, despite the fact that their chosen small town sanctuary has been dubbed a ‘prime target’ by one civil defense official”—said Alvin Bauman, spokesman for the group of 20 families.

Bauman claims that they “knew all along” that a Titan intercontinental missile base was being built near Chico, California, the town picked by the group to escape the blast and fallout in case of a nuclear attack. He admitted that Chico would have been more attractive had their been no Titan base nearby.

The group is comprised of artists, teachers, and businessmen. A few of the refugees, according to Bauman, lean toward Zen Buddhism and have adopted a diet “prescribed by the Japanese scholar Dr. George Ohsawa, but he denied they composed any kind of a sect.”

Note: These stories by AP and UPI were picked up by newspapers across the United States.

393. Kaltwasser, Ray. 1961. Long Island group looks for

new life here. *Chico Enterprise-Record*. Oct. 2. p. 1A, 2A. Monday eve.

• **Summary:** The article begins: “Well, what are our mystery visitors from Sunken Meadow [a place on Long Island] like?” They are typical Americans “who also happen to be musicians, business people, artists and housewives.” They are generally young and intellectual people who have decided that their future belongs in Chico.

They look just like any group of tired travelers who have come to the end of a long journey. They pack up their belongings, camped their way across the United States, and arrived at Chico at exactly 8 p.m. last night [Oct. 1].

Their unofficial leader, Alvin Bauman, is a professional musician and a composer. While the group’s first reason for choosing Chico had to do with a nuclear attack and radioactive fallout, there was a second, more philosophical reason expressed by many in the group. They felt they had to take a new look at themselves, at the way their lives were going, and where they were headed. Sculptor Sanford Goodman said he wanted to get away from metropolitan New York. Teal Ames, a lovely television actress (“The Edge of Night”), wanted to pursue deeper, real values, far from the madding crowd. Many of the adults have expressed an interest in settling on small farms in the Chico area.

The group has been called “food faddists,” but Miss Ames says this is because they just happen to believe in a balanced diet and in eating only “organically grown food.”

The group did not come to Chico to escape or return to nature. They could have done that in the South Pacific. If they are escaping at all, it is “to a better and fuller life.”

Three of the men, Bob Kennedy, Irving Hirsch, and Dick Smith are outstanding professional musicians. William Salant is an economist. Miss Jo-Ann Hirsch is interested in teaching. Yesterday was Adam Bauman’s fourth birthday. Address: Enterprise-Record staff writer.

394. Robertson, Phil. 1961. Chico welcomes Eastern families: Friendship extended at City Plaza. *Chico Enterprise-Record*. Oct. 2. p. 1A, 2A. Monday eve.

• **Summary:** The article begins: “Chico’s most celebrated new residents completed their exodus from the East Coast last night and were officially welcomed in City Plaza by Chico officials this noon.”

The group chose Chico as one of the few places in the United States where they thought they would be relatively safe in case of a nuclear attack in the future. Their studies show that, due to geography and prevailing winds, the area would be comparatively free of nuclear fallout.

In New York, when they announced they were selling their homes and moving en masse to Chico, California, on the West Coast, the 12 families and 34 persons stepped into the national spotlight.

The members of the group share a common bond “of being associated with the Ohsawa Foundation, a dietary food

cult based on oriental philosophy.” They have been close friends on Long Island for a long time.

There were warm welcoming speeches at City Plaza by Mayor Ross Lawler, and Chamber of Commerce President Vernon Fish. After the speeches, the group broke up and went to the Hotel Oaks for a luncheon sponsored by the Chamber of Commerce. Don Wood, Chamber Manager, was master of ceremonies. Alvin Bauman, age 43, said 13 houses had been rented for the group three weeks ago through a local realty company.

The 34 weary travelers who made up the caravan had been on the road since Sept. 18, when they left Long Island. The last leg of their trip was from Reno, Nevada, to Chico. They arrived one day before they were expected, but last-minute adjustments were made in Chico and the welcoming and hospitality arrangements went well.

A large front-page photo shows the Mayor Ross Lawler and Vernon Fish welcoming two new residents—Mrs. Robert Kennedy, who is holding her daughter Gayle (age 11 months). Mrs. Kennedy came from New Shrewsbury, New Jersey, to avoid nuclear fallout. Another large photo (p. 2A) shows Alvin Bauman talking to the group about how to locate their new (rented) homes in Chico.

Note: CBS News was on hand to greet the travelers upon their arrival in Chico. Address: Enterprise-Record staff writer.

395. Robertson, Phil. 1961. Not strangers any longer: Exodus ends. *Chico Enterprise-Record*. Oct. 3. p. 1A, 2A. Tuesday eve.

• **Summary:** The article begins: “Yesterday they were strangers. Today they are part of the community...” They say they are determined to blend into Chico’s community life. While some were busy settling into their new homes, others were making arrangements for their children to enter Chico’s schools.

The J. Robert Kennedy family moved into 688 E. Eighth St. The Herman Aihara family moved into 667 E. Third Ave. And the Lou Oles family settled into 2538 White Ave.

Today the Exodus was over.

A large front-page photo shows four of Chico’s new residents (Mrs. Jane Andrews, her son Silas {age 10}, Teal Ames, and Joanne Hirsh) as they greet Charlie Mack (who is carrying a large white box), a trucker for Allied Van Lines, which carried their belongings across the United States. They had met him when they left Long Island two weeks ago. Address: Enterprise-Record staff writer.

396. DeLoach, Ethel. 1961. The story of Walnut Acres. *Natural Food and Farming (Atlanta, Texas)* 8(5):12-13, 34-36. Oct.

• **Summary:** “Here is the story of one of the nation’s most remarkable organic food businesses—Walnut Acres of Penns Creek, Pennsylvania.” The story began in 1946 “when Paul

and Betty Keene resolved to raise their family of three girls 'far from the maddening crowds and ignoble strife' and with firm faith that their duty was to learn and teach all they could concerning natural farming and nutrition." At last they found a 150-acre farm in the tiny village of Penns Creek about 50 miles north of Harrisburg, Pennsylvania. "The sign at the entrance to the lane said: 'Long's. Walnut Acres. Pigs for Sale.' The lettering was quickly abbreviated to 'Walnut Acres.' The old colonial farmhouse has been restored and the barn converted, but the black walnuts still thrive along the creek in the wooded areas." A pond in the creek serves for both swimming and fire protection.

"Studied under Dr. Pfeiffer: Paul and Betty started in, fresh from the Kimberton Farm School (now nonexistent) near Philadelphia where they had two wonderful years of work and study with Dr. Ehrenfried Pfeiffer who had come from Switzerland to direct the school. Of Dr. Pfeiffer, who is one of the foremost authorities on natural farming, Paul says, 'he helped bring all of life together for us in a definite coherent pattern.'

"The first stone mill was purchased in 1949 and set up in a converted brooder house. In 1958, the huge barn was transformed into a grinding mill and modern store. Today seven mills, all of the closed type to eliminate loss of flour, grind grain from the finest flour to coarse cereals."

"All of the grain sold is raised on the farm... No chemicals or poison sprays have ever been used." Only one crop is harvested from any particular field every two years. The usual practice is to put back more than was removed. Green manure crops include clovers and soy beans. Rest for the land is considered vital. Paul's yields exceed those of his neighbors. After the grains are harvested, they are cleaned, cured, and refrigerated in dry air to prevent insect infestation. The huge bins have a capacity of 300,000 pounds. The store is a natural foods supermarket, complete with shopping carts. More than 10,000 customers order these special foods by mail order. A total of 20 people are employed.

Photos show: (1) A distant view of the various buildings at Walnut Acres. (2) An employee filling an order in Walnut Acres' modern "supermarket-style natural foods store." (3) A man and a combine working in the rich fields of grain. "Only natural organic methods are used here." (4) A young lady looks in awe at 12 foot tall stalks of Krug open-pollinated corn at the side entrance of the Walnut Acres Mill.

Note: This is the 2nd earliest document seen (March 2020) that contains the term "natural foods store or "Supermarket-style natural foods store.

397. Pfeiffer Foundation (The). 1961. The B.D. compost starter (Ad). *Natural Food and Farming (Atlanta, Texas)* 8(5):35. Oct.

• **Summary:** A ¼-page ad. This "starter has proven its value to convert organic wastes, manures and garbage into valuable organic fertilizer.

"It is used to *activate* Hoosier Soil Blend, Hybrotite, Revita, N.P.C.

"It will produce valuable compost in your garden or on your farm. Rich humus and more available nutrients will be your reward.

"Single units (enough for one ton of compost) \$1.65 postpaid." Address: Threefold Farm, Spring Valley, New York.

398. Akin Distributors, Inc. 1961. America's health food distributors (Ad). *Natural Food and Farming (Atlanta, Texas)* 8(6):33. Nov.

• **Summary:** A full-page ad. The company's logo is a smiling sun. "Serving dealers across the nation. Akin Distributors offers outstanding advantages to dealers: (1) We represent over 150 leading manufacturers and brands. (2) Fresh, complete stocks—Always... "We invite dealers to write today for our complete catalog. Address: 6947 East 13th St., Tulsa, Oklahoma. Phone: TEmple 6-2534.

399. Walnut Acres. 1961. Organic Farming—Natural Foods (Ad). *Natural Food and Farming (Atlanta, Texas)* 8(6):37. Nov.

• **Summary:** A full-page ad. "Hello! May we tell you just a little about us? We've been raising our produce for 15 years with never a chemical or spray. Our Mill-and-Store is right here on the farm. Everything is raised and kept as carefully as we know how. No fumigants are used—we even refrigerate all our grain. We're probably the only ones anywhere doing this! Fresh, stone-grinding action every day.

"We carry hundreds of different items of honest, whole, unadulterated foods.

"We ship daily (except Sunday) to all parts of the country. Orders are sent with dispatch—and loving care!

"We're rather pleased to think we are one of the oldest and best-known sets of people engaged in this sort of thing. This is our life!" Address: Penns Creek, Pennsylvania.

400. Shumway, De Van L. 1961. 'Refugees' from N.Y. happy in N. California. *Deseret News (Salt Lake City, Utah)*. Dec. 8. p. 8A.

• **Summary:** A group of New Yorkers, seeking refuge from nuclear war, have found a welcoming home in Chico, northern California. Alvin Baumann, a concert pianist-composer, led the group from Smithtown, New York, across the USA, arriving in Chico in October 2. The 13 families, totaling 34 men, women and children, quickly settled into this city of 16,000. And they say they feel more welcome every day. Painter Joan Andrews is impressed that service station attendants wash the windows of her small foreign car each time she stops for gasoline.

Many in the group are members of the Ohsawa Foundation; they "follow the teaching of a 68-year old Japanese philosopher, George Ohsawa, who teaches an

orderly life based on natural foods.”

Baumann said the group’s own business is taking shape. Believers in eating “natural” foods, they have started the “Chico-San” Bakery and plan to share the profits. They will bake breads with no sugar and little yeast.

They also plan to start a restaurant where the menu will show the exact number of calories per serving, and where live music will be provided by group members. Once a week there will be a discussion on controversial or popular current events.

Note 1. This is the earliest document seen (May 2011) which states that Chico-San has started a bakery.

Note 3. There seems to be little chance of an atomic bomb being dropped on or near Chico. The nearest major city is San Francisco. Address: United Press International (UPI).

401. Albrecht, William A. 1961. Policies regarding agricultural chemicals. *Natural Food and Farming (Atlanta, Texas)* 8(7):20-25. Dec.

• **Summary:** “In this statement to the Governor’s Special Committee on Agricultural Chemicals, Sacramento, California, Nov. 15, 1960, Dr. Albrecht showed convincingly how we have gone astray by ignoring the Laws of Ecology, and what we must do to correct our errors.” Note: Edmund G. “Pat” Brown, Sr. was governor at this time.

Contents: Introduction: Our land is undergoing declining productivity. Price of exploitation (of the fertility of the soil for economic gain). Falsity of economic manipulation: Pasture plants, non-legume plants, sorghums, nitrate poisoning, some legumes synthesize hormones like the sex hormone of clover, sodium benzoate, aminotriazole, trees.

Use determines effects. Major weakness of management. Organic functions acknowledged (Dr. Francis Pottenger, Jr. of Monrovia, California). Indole synthesized. Better quality needed. Synthetic environment. Results of straying from ecology. “We need to see agriculture as our first concern, since it is the foundation of health of all life forms.”

“Man’s emphasis on economics, his assumption of control of natural life forms as management of them instead of studying the plant’s (or animal’s) requirements, have depleted and destroyed soils to bring synthetic environment for what we grow, including our own bodies. That disruption of living things in their place for healthy survival by self-preservation is the basis of man’s fighting other forms of life; his monocultures which upset natural balances of predators and pests; his present degenerations (called diseases)...” Address: Emeritus Prof. of Soils, Univ. of Missouri.

402. *U.P. [Unique Principle] (Chico, California)*. 1961. From East to West in the U.S. p. 2-7. Undated. Dec.?

• **Summary:** Tells the story (and group dynamics) of 34 people who traveled across the United States from the New York area to Chico, California, to escape the potential danger of nuclear war. “The word ‘group’ is the most difficult to handle in reporting this move.” “We began from N.Y. with an established rendezvous point at Shawnee Campgrounds, Pa. [Pennsylvania] on Monday, September 18th.” “Since George Ohsawa’s arrival in N.Y. in early summer [June 1961], discussions had ensued concerning the threat of disastrous, thermonuclear war.” “So we came to Shawnee Campgrounds in Sept. 18th! A festive celebration filled with the spirit of thankfulness and wonder at the unknown before us was interrupted by a few newsmen who had come to check that we were actually doing what had been publicized.”

During the trip: “Small groups of two or three families began to emerge, the organic progression from single unit to large oneness appeared in tentative ways. Only at the end of the trip did we realize that we had been all together. We had planted seeds of unity.

We arrived in Chico Sunday evening, Oct. 1st, after having spent two days at Lake Tahoe. The town welcomed us warmly; many had anticipated our arrival with pleasure. At the very least we had given Chico good publicity.”

“We arranged to hold weekly meetings beginning the first day in Chico. We had considered the dangers of let-down after the build-up of our trip. We had considered the need for mutual discussions and support in our new acclimatization. To some extent we felt ourselves to be a

group.”

“We are now preparing to go into business. Chico-San, Inc. is on its way to legal status. Our first business will have to do with food. Bread is already being baked [where?] and some is sold in the community as we experiment with formulas for our larger scale operation. We expect to open a Restaurant-Bakery, a Food and international crafts store, a food processing and distribution business and a mobile food unit serving hot meals to construction workers. We are considering other, more expanded businesses as our first enterprises grow. Farming is first amongst the expanded considerations.”

“Some of us have begun working at various jobs—musicians playing weekends, one of us working in a hearing aid center, another teacher, etc.”

“The Ohsawa Foundation has two large groups now, one on each coast. How shall we work together?... How can we apply the unique principle, bipolar oneness to the service of humanity that needs the understanding of lawful cosmic functioning in order to survive?”

Note 1. On the last page of this issue is a section titled “Useful addresses.” Addresses are given for one or more groups in Japan (2 groups), France (1), Belgium (2), Brazil (2) and the USA (4, including Ohsawa Foundation, Inc., Box 238, Chico, California. No address is given for Chico-San).

Note 2. Carl Ferré (e-mail dated 9 May 2011) says, concerning the date and author: “... articles indicate late in 1961 (my guess is December). Includes the first mention of Chico-San in an article, presumed to have been written by Lou Oles, but may have been written by Al Bauman.”

403. *U.P. [Universal Principle] (Ohsawa Foundation, Chico, California)*. 1961. From East to West in the U.S. Dec. p. 2-7.

• **Summary:** “Now the time for positive steps had come to hand. Our weekly meetings and the work of individuals and committees have prepared us quickly for early positive action. Weekly meetings have taken the form of a movement from inspirational, spiritual to study and practicality. At the start of our meetings one of the group reads a selection and then we listen to music. After this opening, we discuss our business. These weekly sessions have become, even in one month, a major source of strength and pleasure. In addition a weekly cooking class has been in session from the start.

“We are now preparing to go into business. Chico-San, Inc. is on its way to legal status. Our first business will have to do with food. Bread is already being baked and some is sold in the community as we experiment with formulas for our larger scale operation. We expect to open a Restaurant-Bakery, a Food and international crafts store, a food processing and distribution business and a mobile food unit serving hot meals to construction workers. We are considering other, more expanded businesses as our first enterprises grow. Farming is first amongst the expanded considerations.”

Note: This is the earliest document seen (March 2020) that mentions “Chico-San.” But the company is not yet in business. It was officially incorporated as Chico-San, Inc. in March 1962.

404. Hunter, Beatrice Trum. 1961. *The natural foods cookbook*. New York, NY: Simon and Schuster, and Pyramid Books. xvi + 296 p. Index. 22 cm. Pyramid Books pocketbook ed. published in 1967.

• **Summary:** This very early and important natural foods cookbook contains more than 2,000 recipes. The Introduction is written by Dr. Clive M. McCay, Professor of Nutrition, Cornell University, New York, and Dr. Jeanette B. McCay, nutritionist. The pages numbers are those in the original 1961 hardcover edition. The author calls tofu “soy cheese” and uses it in many recipes, including mashed in a recipe for “soy cheese sherbet” (p. 204). This book is not vegetarian (some recipes call for beef, chicken, fish, etc.), but was quite influential in the early days of the U.S. natural foods movement.

Soy-related recipes include: Soy spreads (p. 14-15): Soy flour spread. Soybean spread (in blender). Soy cheese [tofu] spread. Soy butter (made from soy flour, regular or roasted, and oil). Smoothies (p. 26-29). Soybean-cheese salad (p. 35). Soybean-vegetable salad. Soybean molded salad. Soy butter dressing (with soy butter, p. 41). Soy cheese dressing. Eggless mayonnaise (with soy flour). Soybean soup (p. 49). Cream of soy soup (with soybeans in blender). Soy-vegetable soup (with soy milk in blender, p. 54). Soy noodles (with soy flour, p. 59). Green soybeans in pods (p. 70). Steamed green soybeans. Soy grits stuffing (for fowl, p. 127). Homemade soy cheese (also known as soybean curd or *tofu*; from soy milk or soy flour, p. 137).

Soybeans (p. 142-44): Basic soybean filler. Broiled soyburgers. Soybean ring (in blender). Baked soybean croquettes. Soybean casserole. Baked soybeans. Soybean-lentil loaf. Stewed soybeans. Soybean soufflé. Soybean squares. Roasted soybeans (dry-roasted). Leftover soybeans. Soy-oatmeal porridge (with soy grits, p. 162). Soy-cornmeal porridge. Soy sprouts (p. 163). Soy breads (p. 179-80): Kneaded soy-wholewheat bread. No-knead soy-wholewheat bread. Soy spoon bread. Unraised soy biscuits (p. 184). Soy-gluten popovers (p. 189). All-soy pancakes (p. 192). Soy waffles (p. 195). Soy cheese sherbet (with tofu, honey, vanilla, and nutmeg, p. 204). Soy cookies (p. 238). Flourless soy cookies. Soy-wholewheat cookies. Soy-cheese piecrust (with soy flour). Spiced soybean pie (with boiled, pureed soybeans, p. 250).

The section titled “Smoothies” (p. 26-29) contains the following recipes (those followed by an asterisk { * } contain dairy products and no soy unless stated in recipe name; the directions for all recipes in this section is “Blend all ingredients”): Homemade soybean milk (from whole soybeans, or from soy flour). Spiced soy milk. Soy-fig

shake (with soy milk). Milk-soy smoothie (with soy flour)*. Almond milk. Peanut milk. Cashew milk. Milk-wholewheat shake*. Orange-coconut milk*. Coconut milk. Milk fruit shrub*. Strawberry smoothie.* Apricot shake*. Anise milk*. Milk smoothie*. Fruit milk shake*. Banana smoothie*. Lemon egg nog*. Honey egg nog*. Carob milk*. Carob smoothie. The recipes followed by an asterisk contain 2-4 cups cow's milk and no soy. Note 1. This is the earliest document seen (July 2013) that mentions "smoothie" or "smoothies" in connection with soy. All of the 22 recipes in the category titled "Smoothies" contain some kind of milk (either cow's milk or milk made from a seed-soy milk, almond milk, peanut milk, cashew milk, coconut milk, anise milk). About half of the smoothies contain fruits or fruit juices (orange juice, fresh berries, strawberries). None of the smoothies contain ice cream, frozen yogurt, or any other frozen dessert or frozen food. Therefore a smoothie seems to be like a milk shake but without the ice cream.

The recipe for "Milk-Soy Smoothie" (p. 27) reads: 4 cups milk. ½ cup soy flour. 4 tablespoons molasses. 2 eggs, raw. ½ teaspoon pure vanilla extract. 3 tablespoons nutritional yeast. Blend all ingredients. Serves 4-6.

The section titled "Nut butters (p. 29-30) gives a recipe for homemade peanut butter with "Variations: Homemade nut butter may be made from raw almonds, filberts, pignolias, walnuts (English and black), cashews, Brazil nuts, etc. Most of these nuts have enough oil so that no extra oil need be added." On p. 30 is a recipe for "Homemade peanut-sunflower seed butter."

By the time of the 19th printing, in Jan. 1974, this book had sold over one million copies.

Note 2. This is the earliest document or book seen (Dec. 2001) after 1960 with the term "natural foods" in the title.

Note 3. An advertisement for this book appeared in the July 1965 issue of *Natural Food and Farming* (p. 40). Address: White Mountains, New Hampshire [by July 1965: Hillsboro, NH 03244].

405. Rodale, J.I. ed. 1961. How to grow vegetables and fruits by the organic method. Emmaus, Pennsylvania: Rodale Books, Inc. 926 p. See p. 507-09. Illust. Index. 23 cm. Reprinted in 1974.

• **Summary:** In the large Section 2, "Organic vegetable culture: A complete listing," is a subsection titled "Soybean" (p. 507-09) with the following contents: Introduction, brief history [inaccurate], and nutritional value. Range and soil. Seed. Planting. Enemies. Harvest. Focuses on how to grow "vegetable soybeans" using the organic method.

"Two types of soybeans are now cultivated in this country, out of the hundred or more varieties of the Orient. Field soybeans are used to make hay, for seed, for green manure and in combination with sorghum, for silage. The seed is a rich source of oil which has industrial as well as culinary uses. Vegetable soybeans are used green like peas or

lima beans; dried, like navy beans, or are sprouted like Mung beans. Soybean protein is more complete than the protein found in any other vegetable. Soy flour is a valuable protein additive to baked products and is used for diabetics because it is low in carbohydrates. Soy milk and cheese [tofu] are useful for babies and children suffering from cow's milk allergies. Soy meal, like cottonseed meal, is a rich source of nitrogen when used as a fertilizer."

"Tests at Iowa State have shown that the best way to plant soybeans is to plant several varieties, maturing in different periods, at the same time. Judging by gustatory as well as horticultural standards, Iowa State recommends Sac, maturing in 9 weeks, Kanro, maturing in 10 weeks and Jogun, maturing in 12 weeks. These may be expected to supply green beans for the table during the late summer."

Photos show: (1) Wilbert Walker, a Pennsylvania organic gardener, with a sprawling vegetable soybean plant in his garden. (2) A close-up of soybean pods on a soybean plant. Address: Editor-in-Chief, Rodale Books Inc., Emmaus, Pennsylvania.

406. Rodale, J.I. ed. 1961. The complete book of food and nutrition. Emmaus, Pennsylvania: Rodale Books. 1054 p. Index. 23 cm.

• **Summary:** J.I. Rodale recommends the consumption of natural meat and eggs. He discourages humans from consuming or using milk, chemicalized meats, added salt, sugar, chocolate, aluminium utensils, and heated or hydrogenated fats. Throughout this book, he uses scientific sources and cites them carefully.

Chapters 30-40 (p. 116-56) are a critique of cow's milk. Man has made the cow into a milk machine, with ever larger udders, which can produce 75 times as much milk per year as in Biblical times. For adults, milk may cause lactose intolerance, allergies and excessive tallness, and may contain undesirable antibiotics.

Chapter 40, titled "Nutritive substitutes for milk" (p. 154-55), mentions "soybean milk and Tahini milk which is a milk made from ground sesame seeds. Tahini milk appears to us to be an excellent substitute for milk in the diet because of its extremely high content of calcium" (p. 155).

Dr. Stefansson (p. 69-72) lived for one year in good health on meat alone. The discovery of cereal culture 2,000 years ago was the beginning of civilization and human degeneration. The human digestive tract has not had time to adjust to this change. It took humans 2 million years to adapt to the diet of the primitive human hunter (consisting mainly of proteins and animal fats) from the largely vegetarian diet of the anthropoids. "It is extremely difficult to plan a vegetarian diet in which the essential amino acids will all be represented in their proper proportion."

Chapter 127, "How to sprout beans" (p. 472-74), discusses mainly how to sprout soybeans, and their nutritional value. A table compares the vitamin and mineral

content of soybean sprouts and mung bean sprouts; the former are much more nutritious.

Chapter 153, “Soybeans—The wonder food” (p. 536-41) has the following contents: Introduction. How nutritious are soybeans? (“Soybeans are one of the few non-animal proteins which are complete—that is, contain all of the essential amino acids in good proportion.”) Sprouting beans for vitamin C. Soybeans are economical (says the best book on soybeans is *Soybeans for Health, Longevity and Economy*, by Philip S. Chen, Ph.D.). Soybean milk for infants. “Soybeans are richer in potassium than any other food except brewer’s yeast which, of course, is eaten in much smaller quantities. They contain more pantothenic acid than any other food except egg yolk, brewer’s yeast, liver, rice bran, and wheat bran. The iron in soybeans is 96 per cent ‘available’—that is, digestible and used by the body.” Chapter 154, “Soya milk and soya curds” (p. 541-42), by Dr. W. Kring, of Dusseldorf discusses: Use of soybeans in East Asia. Fresh soya milk for every household. *Acidophilus* soya milk—Soya curds. Making soya cheese or tofu [at home].

Note 1. This is the earliest English-language document seen (April 2013) that uses the term “soya curds” in connection with tofu.

Note 2. This is the earliest English-language document seen (Sept. 2012) that contains the term “*Acidophilus* soya milk” (or “*Acidophilus* soymilk”) regardless of capitalization, hyphenation, or spaces.

Chapter 178, “Eggs, meat and soybeans” (p. 675-77) gives a nutritional comparison of these three high-protein foods. One section titled “Meat substitutes” begins: “Soybeans should be a part of your diet as a substitute for meat.” It continues: “Even though you include plenty of meat in your diet, make use of soybean protein, too. If your family does not know soybeans, get some and begin to introduce them to a wonder food.”

Chapter 169, “Are chemical fertilizers harming our food” (p. 618-24) is part of a statement made by J.I. Rodale on December 15, 1950, to a Congressional Committee formed to investigate chemical fertilizers. He argues that the organic method is “far superior to the present general practice with respect to fertilizer usage, not only from the human health standpoint but from the point of view of preventing soil erosion and giving higher yields at a lower cost.” Also discusses: History of the organic method. What is the organic method? What is a chemical fertilizer? The health aspect (experiments showing a much higher survival rate in mice fed organically grown food). More vitamins in “organic” food. Physicians praise the organic method. Rejection by our government (and request that agricultural experiment stations test and compare the two methods).

Chapter 173 titled “Investigating Primitive Diet” (p. 642-54) contains a detailed summary of the work of Weston A. Price, D.D.S., as described in his book *Nutrition and Physical Degeneration*. This book is available from the Lee

Foundation for Nutritional Research, 2023 W. Wisconsin Ave., Milwaukee, Wisconsin.

Chapter 182, titled “When you use fats and oils” (p. 682-83) discusses margarine, which is made from vegetable fats which have been hydrogenated. Soybean oil is one of the oils use to make margarine. “As you know, we do not recommend using margarine, mostly because of the many chemical substances used in it, of which the synthetic vitamin A is only one. Artificial coloring, preservatives and so forth are also used. But, in addition, hydrogenating the oils to make them solid destroys most of the essential fatty acids which are the chief reason for eating vegetable oil. So margarine is no better than butter as a spread, in spite of the fact that it is made from substances that do not contain cholesterol.” “Soybean oil is another popular vegetable oil.” Rodale especially recommends “our old friend, sunflower seed oil”—which is rich in vitamin E and linoleic acid.

Chapter 183 titled “Heated fats can cause cancer” (p. 686-90) summarizes several scientific studies and notes that “Hydrogenated fats are everywhere” in our food supply. “Finally, don’t buy hydrogenated shortenings (the solid kind)...”

Chapter 198 titled “Who pays for nutrition research?” (p. 741+) begins: “Dr. Stare’s Nutrition Department (at Harvard University, Massachusetts) received from Food Industries and Foundations representative of their interests between and including the fiscal year 1950 to 1956 gifts totaling approximately \$378,000, half of which was from the Sugar Research Foundation, supported by the sugar interests, and the Nutrition Foundation, supported largely by commercial food processors. A large portion of the other half was from the chemical and drug interests.

“This challenging statement sets the tone for a series of open letters from the Boston Nutrition Society, Incorporated, to Dr. Nathan M. Pusey, President of Harvard University. We think readers will find in these letters the answer to their puzzled query ‘Why?’ Why must we eat doctored up, chemicalized, refined, cheapened food and above all, why must some of our top food scientists, men like Dr. Stare of Harvard, call everyone a faddist and a crackpot who points out that the modern American food is not everything it should be?

“The open letters hit at the very heart of the problem. Much university research on nutrition is being financed by the very folks who profit from selling this worthless food.”

Chapter 199, “A British nutritionist takes stock,” summarizes an article titled “Food and Health,” by Dr. H.M. Sinclair (*British Medical Journal*, 14 Dec. 1957) about the dangers of feeding too much cow’s milk to infants and children. Another article on the same subject by Dr. Milton J.E. Senn, was published in *McCall’s* (Jan. 1958). Chapter 272 is “Kelp for trace minerals” (p. 1005-09) and Chapter 273 is “The value of seaweed nutrition” (p. 1010-12).

Chapter 274 is “Do you need lecithin?” (p. 1013-17;

Contents: Introduction. How can you avoid cholesterol deposits? Lecithin and cholesterol in natural foods. Experiments with lecithin prove its healthfulness. Why do we not get enough lecithin? Take lecithin as a food supplement {it is made chiefly from soybeans}).

Chapter 275 is “Why do you need lecithin?” (p. 1018-1021); Contents: Introduction. The what and how of lecithin. Processing at fault. Where can you get lecithin in your diet? (seeds and cold-pressed oils). Hydrogenation (which destroys all the lecithin, B vitamins, vitamin E, and essential fatty acids).

Chapter 39, “Miscellany on milk” (p. 146-54), documents many problems with cow’s milk. Its contents: Introduction, detergents in milk, antibiotics in milk, some infants can’t take milk at all, is milk the universal antidote?, an all-milk diet is hazardous, ulcer patients beware!, cavities caused by milk, DDT contamination, misuse of calcium, radioactive substances in milk, milk as a cause of goiter, a famous nutritionist speaks (Dr. Norman Jolliffe), milk’s value questioned (by McCance and Widdowson), allergies to milk sugar, dermatologist criticizes both bread and milk, and an old (1926) court decision on raw milk. Chapter 41: “Yogurt” (p. 156+). “Yogurt is probably the most popular of all so-called health foods”. In the 19th century, Metchnikoff was the first to investigate it scientifically. Chapter 96: “Sesame seed—An ancient and nutritious food” (p. 342-44; Tahini milk makes a good milk substitute). Address: Emmaus, Pennsylvania.

407. Shepard, William Peacey. 1961. Executives’ health secrets: how to lick tensions and pressures. Indianapolis, Indiana: Bobbs-Merrill. 268 p. See p. 113, 114. Index. 24 cm.
• **Summary:** “‘What You Eat Today Will Walk and Talk Tomorrow.’ This macabre sign in the window of a so-called ‘natural foods’ store did not exactly enhance my appetite” (p. 113).

The term “natural foods store” also appears on p. 114. Address: M.D.

408. *SoyaScan Notes*. 1961. Chronology of Chico-San, Inc. (Chico, California). 24 March 2011. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1955 Dec.—Herman Aihara and Chiiko (Cornellia) Yokota are married in New York. Cornellia arrived in the United States from Japan in Oct. 1955.

1961 summer—George Ohsawa, fearing that a nuclear war might be near, urges his followers to leave New York and find a place that was safer from radioactive fallout and good for growing rice. After extensive research, they chose Chico, California.

1961 Oct. 1—Thirty two people (11 families) arrive in Chico (in the Sacramento Valley of northern California) from New York City in a caravan of vans, buses, and station wagons. It is an area of fertile farmland where rice is already

being grown. Among the people in the group who remained active in work with macrobiotic foods were Bob Kennedy, Herman and Cornellia Aihara, Teal Ames, and Dick Smith.

1961 Dec. 8—The group in Chico has started a bakery named “Chico-San” (Shumway 1961).

1962 March 6—The group in Chico incorporates a new food company named Chico-San, Inc.; it consists of a retail store and an import and wholesale business. It is capitalized with \$10,000. In addition to a line of whole-grain products, they soon began to import a variety of macrobiotic foods from Ohsawa in Japan. The first store and food plant (they made sesame salt or *gomashio* and repackaged foods) was in the basement of a small hearing aid shop in Chico. The address was apparently 64, 5th Ave., Chico, California. It became the first macrobiotic food manufacturing company in the USA. Note: Infinity Foods in New York City was apparently the first macrobiotic import and wholesale company.

1962 Christmas—George Ohsawa visits Chico and lectures on macrobiotics.

1963—Ohsawa lectures in Boston (Massachusetts), New York City, and at the fourth macrobiotic summer camp in Chico. Lima Ohsawa and Cornellia Aihara give cooking classes. In Chico, Ohsawa suggests that the group try making rice cakes. He sends them a rice cake machine from Japan and production began in the fall of 1963. Rice cakes soon became Chico-San’s first really popular and successful product.

1963—Junsei Yamazaki emigrates to Chico, California, from Japan.

1964—Yamazaki starts to make miso and shoyu for Chico-San.

1966 April 24—George Ohsawa dies. The Ohsawa Foundation now has offices in Los Angeles, New York, Paris and Tokyo.

1968 fall—Bob Kennedy of Chico-San signs a contract with the Lundberg brothers of Wehah Farm (Richvale, California) to grow short-grain brown rice organically, exclusively for Chico-San. Chico-San agrees to buy all brown rice planted in 1969.

1969—Lundberg brothers plant 78 acres of brown rice, which is harvested in the fall. Because of Chico-San’s successful advertising campaign, one third of this crop as sold in advance and all was sold before the next year’s crop was available.

1969 fall—Wendell Lundberg visits Erewhon.

1970—Chico-San contracts for 200 acres of brown rice this year with Lundberg.

1970 fall—Spiral Foods Distributing Company is organized by Chico-San and Peter Milbury to distribute Chico-San products directly to retail stores in the greater San Francisco Bay Area. It is discontinued in about Aug. 1972.

1970—Herman Aihara and Bob Kennedy establish the George Ohsawa Macrobiotic Foundation (GOMF). Junsei

Yamazaki makes his first big batch of miso. First summer camp at French Meadows. Herman and Cornelia make their first nationwide teaching tour.

1971–Noboru [not Naboru] Muramoto sensei arrives.

1972–The book *Miso and Tamari*, by Herman Aihara published.

1972 Sept. 14.–Fire destroys the Chico-San plant. It started as a short in a rice-cake machine. Chico-San is out of business for several months. The company resumed business at another location across town. But Chico-San lost its exclusive right to distribute Lundberg organically grown brown rice as the company had been unable to package and ship rice and rice products for several key months during the peak sales season.

1973–Herman Aihara establishes the Vega Institute in San Francisco. Noboru Muramoto lectures and his first book, *Healing Ourselves*, is published.

1974–Herman Aihara moves GOMF to Oroville from San Francisco. *Soybean Diet*, by Herman published.

1976. Muramoto moves to Glen Ellen.

1984 Nov. 19–Heinz U.S.A. acquires Chico-San Inc. a manufacturer and marketer of rice cakes and related products. Privately held Chico-San (headquartered in Chico, California) operates rice-cake production facilities in California, Mississippi, and New Jersey. Founded in 1962, the company has about 340 employees.

1985 Jan.–The Quaker Oats Company acquires the Arden Rice Cakes business. The natural foods portion of the business is incorporated under the Mother's brand. Chico-San is based in Chico, California; Arden in North Carolina.

409. Balanced Foods, Inc. 1962. On the business of selling quality (Ad). *Natural Food and Farming (Atlanta, Texas)* 8(9):31. Feb.

• **Summary:** A full-page ad. “As major wholesale distributors of natural organic and health foods, we are proud that our ‘shingle’ is synonymous with quality.” Address: 700 Broadway, New York 3, NY. Phone: ORegon 4-2740.

410. Nichols, Joe D. 1962. President's page. *Natural Food and Farming (Atlanta, Texas)* 8(9):5, 46. Feb.

• **Summary:** “I am more optimistic about the future successes of NFA than I have ever been before. We have a growing group of dedicated, loyal, intelligent people who are assuming leadership of chapters all across the nation... In a small way we are becoming a mighty force for good in this country. It has been and it will continue to be a hard fight to bring the great truth about natural, poison-free food, grown on fertile soil to America. But the odds are in our favor. America is a sick nation, else why do we need so many new hospitals? The fact that five out of seven draftees are being rejected has shocked the nation.” A portrait photo shows Dr. Nichols. Address: M.D., Atlanta, Texas.

411. **Product Name:** Chico-San Soybean Puree (Barley Miso).

Manufacturer's Name: Chico-San Inc. (Importer). Made in Japan.

Manufacturer's Address: Chico, California.

Date of Introduction: 1962 March.

New Product–Documentation: *Health Food Business Review*. 1968. July. p. 44-45. “Soy bean puree: Miso.” Miso is repeatedly called “Soybean Puree” in this article. A table gives the nutritional composition of “Barley miso” (based on Yamada 1957, p. 44).

Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list. Nov. 1. Ann Arbor, Michigan. 58 p. See p. 7. “Miso Soybean Puree.” 8 oz or 16 oz.

Chico-San Products. 1973. July. p. 13. “Soybean puree (Miso).” This is barley miso. Same publication, 1981. Jan. p. 13. They now import and sell mugi, kome, and hacho miso.

Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 236. Chico-San was founded in March 1962, in Chico, California. One of their first products was traditional miso, imported from Japan and distributed widely under their label.

Chico-San Cracker Barrel. 1984. Oct. p. 1. Chico-San “was the first natural foods company to import miso into America.”

412. Nichols, Joe D. 1962. President's page. *Natural Food and Farming (Atlanta, Texas)* 8(11):5. April.

• **Summary:** “As I write this we [Natural Food Associates] are furiously trying to get ready for our Ninth Annual Convention in Cincinnati” [Ohio]. Address: M.D., Atlanta, Texas.

413. W.R. Laboratories. 1962. The Champion Juicer (Ad). *Natural Food and Farming (Atlanta, Texas)* 8(11):3. April.

• **Summary:** This full-page ad shows a photo of the patented Champion Juicer surrounded by vegetables. The F.O.B. factory price is only 149.95 including a five-year guarantee.

Note: This is the earliest document seen (Aug. 2010) that mentions the Champion Juicer—although it may have existed as early as the 1940s. Address: Factory Distributor, 639 E. Lockford St., Lodi, California.

414. *Los Angeles Times*. 1962. Sunday [TV program schedule]. May 20. p. B6.

• **Summary:** Evening: 9:30 p.m. Channel 13. “‘Shangri-La Today.’ Hosts Larry Moore, Ava Maloney & Top Stars! Sponsored by Foods for Life.”

Note: Shangri-La may refer to the former princely state of Hunza in the far north of today's Pakistan. In 1962 a book titled *Hunza, the Himalayan Shangri-la*, by Renée Taylor and Mulford J. Nobbs was published. The people living in the Hunza Valley were known for their good health, natural farming methods, natural foods, and long life.

415. Nichols, Joe D. 1962. President's page. *Natural Food and Farming (Atlanta, Texas)* 8(12):5. May.

• **Summary:** "Cincinnati, Ohio, the Queen City of the Ohio Valley, was the site of our most successful convention. More than one thousand people registered for the Ninth Annual NFA National Convention." "The spacious Netherland Hilton Hotel provided us with everything that could be desired for a successful meeting."

"As usual, every speaker drew a full house. Harold Peters of the National Audubon Society captivated our audience with his lecture depicting a robin dying from mass-sprayed DDT."

"We saw the premiere showing of the film made in Hunza by Renee Taylor."

"Regional conventions: I came home so excited and rededicated that I have not been able to sleep too much, making plans to bring this type of program to all of you. There is no reason why we cannot have regional conferences in each of your [five] areas just as good as our national convention." The areas are: Northeast, Midwest, South, Northwest, and Southwest. "We now have the organization."

"Pfeiffer memorial: The board of directors instructed us to proceed with the building of the Dr. Ehrenfried E. Pfeiffer Memorial Plant Laboratory just as quickly as we receive enough money for this project. The demonstration of Doctor Pfeiffer's great knowledge must be brought to everyone. A dying agriculture demands this demonstration. A diseased and dying civilization must have this knowledge transmitted to the farmers of this country."

Note: Dr. E.E. Pfeiffer died on 30 Nov. 1961. During 1938-39 Pfeiffer investigated a novel technique using crystallization for diagnosing cancer at Hahnemann Medical College in Philadelphia, Pennsylvania. This work earned him an honorary Doctor of Medicine [M.D.] degree from Hahnemann Medical College and Hospital of Philadelphia on 8 June 1939 at the 91st Commencement ceremony.

"Seal of approval: The board of directors also instructed us to go ahead with the plans for an NFA Seal of Approval. Our Standards Committee has developed a set of specifications which when met will entitle those engaged in the natural food movement to our NFA seal of approval." Address: M.D., Atlanta, Texas.

416. Nichols, Joe D. 1962. 'Caveat emptor!' Let the buyer beware! *Natural Food and Farming (Atlanta, Texas)* 8(12):23-27. May.

• **Summary:** "In this full text of the Annual President's Address at the 1962 NFA [Natural Food Associates] National Convention in Cincinnati, [Ohio], Doctor Nichols warns of the dangers the consumer faces as a result of the vast programs of the food industry designed to support and defend their adulterated products."

"Dr. Joe D. Nichols is a graduate of the University of Arkansas School of Medicine. He operates a 35-bed hospital

in Atlanta, Texas. He is a past President of the Tri-State Medical Association, Councilor of the Texas State Medical Association for nine years, a member of the American Association of Physicians and Surgeons, and Executive Director of the International Institute of Clinical Physiology. Dr. Nichols, a noted physician, lecturer and student of the science of nutrition owns a 1,000 acre organic farm."

Contents: Quotation from Goethe on truth and error. The medicine man. Mineral oil (once sold at a fancy price as a cure for all disease). Use radio and TV (to promote refined foods). Pretentious scientism ("Our agricultural schools have been 'convinced' that only a chemical agriculture is scientific... that only through the use of commercial fertilizers, insecticides, weedicides, defoliants, and other agricultural chemicals, can the nation avoid starvation and famine. They have been persuaded to look on organic farmers as ignorant people... They have destroyed the balance of nature in many places"). Public is awakening. Government agencies fall short. Must be a reason ("... why five out of seven draftees are now rejected by the military forces"). A sick nation ("Despite the great wealth of America, we are a sick nation"). Socialized medicine (a bad idea, run by government bureaucrats). What we can do (start with revitalization of our soil, organic agriculture, and natural foods). NFA determined ("to change the eating habits of America"). Potential of U.S. (to become a healthy nation and a leader in reforming food and nutrition). Cancer researcher's report (Dr. William E. Poel, head of Univ. of Pittsburgh's [Pennsylvania] laboratory of experimental carcinogenesis, says much cancer comes from our food). Enforced law needed (cancer-causing chemicals in foods). Doctors awakening. Predator research at USC. Later than you think. NFA must work religiously. American Cancer Society successful (in educating about pap smears). Famous doctors agree ("Dr. Albert Schweitzer is convinced that the modern devitalized processed diet of the civilized world is a major cause of cancer"). Check-up and check. Must not relax. Medical quackery (adding sodium fluoride to the water supply). Address: M.D., President, Natural Food Associates, Atlanta, Texas.

417. Sawyer, Ray. 1962. National convention report: 1962 convention rousing success. *Natural Food and Farming (Atlanta, Texas)* 8(12):7-9, 29-34, 36-39. May.

• **Summary:** See next page. "An outstanding program and an enthusiastic crowd of more than 1,000 combined to make the 1962 NFA National Convention the greatest and most successful ever."

A large photo (p. 7) shows the attendees in the main lecture hall, listening to an address by National President Joe D. Nichols. Contains many additional photos.

418. Lembke, Daryl. 1962. New Yorkers enjoying new lives in Chico: Artistically inclined 'Exodus group' adapting well

Department of Agriculture will have to listen to the growing force of the people... There are quite a few food stores in the United States where organically grown food is sold... Much of the food raised by modern chemical methods is very low in vitamins and minerals and reduces the resistance of individuals, making them the prey of dangerous germs and viruses... Every state experiment station should start an experiment comparing organic and chemical farming, side by side... As the quality of our food decreases, so does the quality of the mind.”

to small town's tempo. *Los Angeles Times*. June 17. p. F1.

• **Summary:** Bob Kennedy, age 42, was a former CBS trumpet player making \$20,000 a year. Lou Oles, age 38, was also a trumpet player who formerly performed with the NBC Symphony and with Benny Goodman and Buddy Rich. Herman Aihara operated a Japanese gift shop in New York City. In 1961 they were among 34 New Yorkers (22 adults and 12 children) who left their jobs and homes and drove west to the small town of Chico, California, to escape the threat of nuclear war and to spread the good word about the macrobiotic diet and foods. When they arrived on Oct. 1 the local people staged a big welcome.

The group's leader is Alvin Bauman, age 43. They are all disciples of George Ohsawa, and they meet once a week to discuss philosophy, world events, and how to earn a living. Jan Andrews, one of the group, “bakes bread two nights a week at Chico-San, a corporation formed by the Exodus group to produce, wholesale, and retail whole-grain foods.” The business is growing rapidly but is under-capitalized. The food store provided jobs for three in the group, including Aihara and Kennedy. Most of the group are very happy with their new home.

A photo shows Kennedy and Aihara baking bread.

419. Rodale, J.I. 1962. 20 years of Organic Gardening. *Organic Gardening and Farming* 9(6):17-19. June.

• **Summary:** The founder and Editor-in-Chief of this publication looks at the achievements of the past two decades—and points to the challenges of the future. “The fact that the magazine now has over 300,000 paid subscribers is a sign that the organic movement has established itself... The time is coming when our overly-conservative U.S.

420. Carson, Rachel. 1962. *Silent Spring*. Boston, Massachusetts: Houghton Mifflin Co. x [6] + 368 p. Illust. by Lois and Louis Darling. 22 cm. [550* ref]

• **Summary:** The author (lived 1907-1964), biologist and author, helped start today's environmental movement by scientifically documenting the devastating effects of chemical pesticides, especially DDT, on the earth's natural environment.

She stated our choice well in these words: “We now stand where two roads diverge. But unlike the roads in Robert Frost's familiar poem, they are not equally fair. The road we have long been traveling is deceptively easy, a smooth superhighway on which we progress with great speed, but at its end lies disaster. The other fork of the road—the one ‘less traveled by’—offers our last, our only chance to reach a destination that assures the preservation of our earth.

“The choice, after all, is ours to make. If, having endured much, we have at last asserted our ‘right to know,’ and if, knowing, we have concluded that we are being asked to take senseless and frightening risks, then we should no longer accept the counsel of those who tell us that we must fill our world with poisonous chemicals; we should look about and see what other course is open to us.”

Soybeans are mentioned on pages 79 and 315 of this edition.

Note: Prior to 1993 a group at Pennsylvania State University asked 235 environmental leaders worldwide to select the most influential environmental books. The top three were *Sand County Almanac* by Aldo Leopold, *Silent Spring* by Rachel Carson, and *State of the World* by Lester Brown and the Worldwatch Institute. Address: USA.

421. *Yin Yang: The Unifying Principle (Ohsawa Foundation, Chico, California)*. 1962. Useful addresses. p. 38. Sept.

• **Summary:** Chico-San's address is given as "1364 Mangrove Ave., Chico, California."

Other organizations whose addresses are given: Japan: Nippon (C.I.). Shinsei-Kai (C.I.). Anbara (C.I.).

U.S.A.: Ohsawa Foundation (Chico, Calif.). Mr. Michio Kushi (562 Fifth Ave., New York 36, N.Y.). Azuma Inc. Mr. Tommy Nakayama (2486 Silverlake Blvd., Los Angeles, Calif.). Musubi Restaurant (61 W. 56th St., N.Y.). South America: Casa Longavida (Liberdada, Sao Paulo, Brazil). India: Mr. R.T. Saklath (9 Grant Lane, Calcutta 12, India). France: "Sesam" (Paris). "Longue Vie" (Paris).

Note: This is the earliest document seen (March 2020) that shows Chico-San as being in business and as having an address on Mangrove Ave. in Chico, California.

422. *Hartford Courant (Connecticut)*. 1962. Bird Club schedules slide talk: Hampton. Oct. 20. p. 10C.

• **Summary:** The 2nd half of this column of local news begins: "The sixth annual convention of the New England Chapter of the Natural Food Associates is being held this weekend at the Harvard Ellis Technical School in Danielson" [Connecticut]. Local gardeners and farmers will exhibit foods grown by organic gardeners using the "organic method."

In the women's division, entries will include homemade natural foods such a natural breads baked with whole wheat flour.

During the convention a variety of lectures will be presented by well-known authorities on natural foods and their production. "A medal will be presented by the Associates to Rachel Carson, author of the present controversial book 'Silent Spring,' which lists harmful effects from using insect sprays [such as DDT].

"The exhibits are open to the public."

423. *Hartford Courant (Connecticut)*. 1962. Nature's own (Photo caption). Oct. 20. p. 10C.

• **Summary:** This large photo shows Mrs. Harold Stone of Hampton, Connecticut, standing next to some vegetables grown by her husband using "organic" gardening, in which no chemical fertilizers or poisonous sprays are utilized. Stone will exhibit this produce at the sixth annual convention of the New England Chapter of the Natural Food Associates in the Harvard Ellis Technical School in Danielson [Connecticut] this weekend. Photo by Pearl Scarpino.

424. Chico-San Inc. 1962. Chico-San: A new company with new products (Ad). *Yin Yang: The Unifying Principle (Ohsawa Foundation, Chico, California)* 2(2):30. Dec.

• **Summary:** A ¼-page ad. The Chico-San logo, in the upper left corner is the company name written with a large

"C" superimposed on an upward pointing triangle below a downward pointing triangle. The text, in mostly small letters, reads: "Cereals. Grains. Condiments.

"Unique Foods: Whole grain, yeast, & no yeast breads. Noodles and macaroni. Sea vegetables. Zen Cookery.

"Yin (before large downward pointing triangle)–(large upward pointing triangle) Yang.

"No chemicals or preservatives. Our products are processed from organically grown grains. Special attention to mail orders."

Note: On the last page of this issue (p. 31), Chico-San's address again appears: "1364 Mangrove Ave., Chico, California." Address: 1364 Mangrove, Chico, California.

425. Rodale, J.I. 1962. Looking back. *Organic Gardening and Farming* 9(11):59-60. Nov.; 9(12):47-49. Dec. [3 ref]

• **Summary:** Part I recalls the first issue of *Organic Farming and Gardening* (May 1942, 12 pages in all). Rodale printed 12,000 copies and sent them free to a list of farmers. 14 subscriptions resulted. At the time he started publishing OGF, Rodale was already publishing two magazines, one titled *Health Guide* and the other *Fact Digest*. In both of these he had been running articles about Sir Albert Howard and his organic method. "We published 6 issues under the title of *Organic Farming and Gardening*, but with Nov. 1944 it became *Organic Gardening and Farming*; we decided to aim our sights at the gardener and catch an aggressive farmer here and there." There were articles about Sir Albert Howard and his *Agricultural Testament*, about Rudolph Steiner and his Bio-Dynamic Techniques (including his Bio-Dynamic way of making compost, perfected by Dr. Ehrenfried Pfeiffer), and about Charles Darwin's observations on earthworms.

The second issue was 16 pages long. Mr. Rodale does not take vitamins but advocates increased consumption of organically grown vegetables and a "sharp reduction in such grain foods as bread, spaghetti, cereals, etc... The most important of the earth's resources is a fertile soil."

426. **Product Name:** Black Soybeans.

Manufacturer's Name: Chico-San Inc. (Importer). From Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1962.

Ingredients: Black soybeans.

New Product–Documentation: Chico-San, Inc. 1973. July. Chico-San Inc. products: A catalog of unique foods. p. 12. "Black Beans. A pleasant, sweet tasting source of proteins and mineral salts."

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 126. "A pleasant, sweet-tasting source of protein and minerals." A sidebar gives details on how Chico-San has brown rice grown

organically at Wehah Farms in Richvale, California.

Chico-San Products. 1981. Jan. p. 12. "Imported variety, which is an excellent source of proteins and minerals with a pleasant sweet taste."

Chico-San, Inc. 1982. June. Mail order–Price list. p. 2. "Since 1962 we have also been importing the very finest Japanese Azuki and Black Beans."

427. Product Name: Azuki Beans (Dainagon Red).

Manufacturer's Name: Chico-San Inc. (Importer). From Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1962.

Ingredients: Azuki beans.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list. Nov. 1. Ann Arbor, Michigan. 58 p. See p. 7. "Azuki Beans." 8 oz or 1 lb.

Chico-San, Inc. 1973. July. Chico-San Inc. products: A catalog of unique foods. p. 12. "Azuki Beans–Dainagon Red. From the coldest part of Japan–Hokkaido. They are organic–untainted by sprays, insecticides, or preservatives, and can be used as a basic food. They are rich in proteins and minerals."

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 126. "They can be used as a basic food. They are rich in protein and minerals."

Chico-San, Inc. 1982. June. Mail order–Price list. p. 2. "Since 1962 we have also been importing the very finest Japanese Azuki and Black Beans."

Note: Chico-San appears to be the first company to have sold azuki beans to Caucasian Americans.

428. Product Name: Lima Tamari Soy Sauce.

Manufacturer's Name: Chico-San Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1962.

New Product–Documentation: Note: This is the earliest known soyfood product imported to the USA from Japan by a Caucasian-run U.S. company. The product is actually shoyu, named after Lima Ohsawa.

Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list. Nov. 1. Ann Arbor, Michigan. 58 p. See p. 7. "Lima Tamari Soy Sauce." Sold in 8 fl. oz, pints, and quarts.

Chico-San Products. 1973. July. p. 4, 13. "Made in a little rustic factory in Northern Japan operated by the same family for more than ten generations. Aged for two years." Same publication, 1981. Jan. p. 13. Ad by Chico-San Inc. in *Macrobiotic Review* (Towson, Maryland). 1980. 2(2):2. "The soy sauce story. For almost twenty years Chico-San, Inc. has imported the very best natural, traditional soy sauce. Our Lima Soy Sauce is made with handcrafted techniques,

using only natural ingredients... It is aged through two yearly cycles of seasonal changes in large wooden casks." Leaflet. 8½ by 11 inches, color. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. "Taste the difference. Only Chico-San's Lima Soy and Tamari Sauces bring you the real taste of traditional Japanese preparation."

429. Herman Aihara rings up a sale of macrobiotic foods from the tailgate of his car near Chico, California (Photograph). 1962. Undated.

• **Summary:** Herman Aihara (left), the first elected president of the Macrobiotic Foundation of New York in 1961, rings up a sale of Chico-San products from the tailgate of his car in the Sacramento Valley of California in 1962. Chico-San, Inc. began operations in Chico, California in March of 1962, providing brown rice, beans, miso, soy sauce, sea vegetables, and other staple foods imported from Japan to the budding macrobiotic group and to the local community. Chico-San's first company-made product was unleavened "macrobiotic" bread. Herman Aihara and others went around the Sacramento valley selling this bread and Chico-San's other products out of the back of his car. Herman often joked that the bread was worth its weight in gold as it was as heavy as a gold brick!

Note: Photo and text from Carl Ferré, editor and publisher of *Macrobiotics Today*, Chico, California.

430. Product Name: [Seitan].

Foreign Name: Seitan.

Manufacturer's Name: Marushima Shoyu K.K.

Manufacturer's Address: Kamigata-dori Ko 881, Uchiuimicho, Shodo-gun, Kagawa-ken, Japan.

Date of Introduction: 1962.

Wt/Vol., Packaging, Price: 3.5 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Note: This is the world's earliest known commercial seitan product. It was first imported to the USA by Erewhon Trading Co. in 1969.

Talk with Aveline Kushi. 1992. April 9. The first seitan imported to America was made by Marushima Shoyu Co. on Shodoshima in Japan. George Ohsawa went to visit the company, talked with Mr. Mokutani (who is still the chairman, and a close friend of the Kushis, and a great admirer of Ohsawa), and showed him how to make it. Marushima began to make seitan commercially in the late 1960s. It was imported to America by Muso Shokuhin at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. This seitan probably started to be imported to America in about 1969.

Letter (fax) from Yuko Okada of Muso Co. Ltd., Japan. 1992. July 2. "I remember the term 'seitan' since I was a kid;

it was probably coined by George Ohsawa. *Sei* means 'is' and *tan* is the first character in the Japanese term *tanpaku*, which means 'protein.' So *seitan* means something like 'right protein substitute.' Marushima Shoyu Co. developed seitan commercially in Japan and Muso has carried their seitan since Feb. 1966 when we started. We shipped seitan to Erewhon on a regular basis from 1968. [Note: Kotzsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] We also exported it to Chico-San [in the USA]. In Europe, we exported seitan to Paris, France." This seitan went to Institut Tenryu, which had a little macrobiotic food shop in Paris run by Madame Françoise Riviere. The first seitan Muso exported to Australia went to Spiral Foods.

Muso Shokuhin. Pure Heart–Muso general catalogue. 1990 July. p. 41. A color photo shows a 180-gm jar of Seitan. The product name is written in English (i.e., in roman letters). Under that, it is written smaller in katakana. Above the company name and address is written: "Sakurazawa Nyoichi shido" which means, "Made under the guidance of George Ohsawa."

Talk with Mr. Kiyoshi Mokutani, president of Marushima Shoyu K.K. in Japan. 1992. July 12. "The invention and development of seitan in Japan." He invented seitan in 1961-62 and took a sample to George Ohsawa, who coined the term "seitan" upon seeing it. Commercial production began in 1962. For details, see interview.

431. Taylor, Renée; Nobbs, Mulford J. 1962. *Hunza, the Himalayan Shangri-La*. El Monte, California: Whitehorn Publishing Co. 56 p. Illust. 28 cm. *

• **Summary:** Photography by Zygmunt Sulistrowski and Wayne Mitchell. Notice in *Let's Live*. 1962. April. p. 13. "Renee Taylor, journalist, lecturer, and author of the book 'Hunza Land' will speak for the Pasadena Chapter of the American Nutrition Society, Monday, April 16." Miss Taylor, who recently from a trip to Hunza in the Himalayas, will show photos she took while there.

432. Ohsawa, G. 1962? *Zen macrobiotics: The art of longevity and rejuvenation*. New York, NY: Ohsawa Foundation. Printed in Japan. 218 p. Undated. Index. 17 cm.

• **Summary:** This is the second printed edition of *Zen Macrobiotics*. The cover is gray. The author is George Ohsawa. The content is basically the same as the first printed edition, except that (1) Typographical errors on pages 3, 7, and 62 have been corrected; (2) A folded, undated insert, titled "Dictionary of Macrobiotic Terms" was found in this printing between pages 216 and 217 (for details, see below). The insert is 17.0 cm / 6.69 inches high by 30.0 cm / 11.81 inches wide. Folded crosswise into thirds, it fits perfectly into these books; (3) The information on pages 217 and 218 is different and updated. The following appears on page 218: Brazil (Casa Longavida, Sao Paulo), Sweden (Miss

Ilse Clausnitzer, Stockholm), U.S.A. (Ohsawa Foundation, 61, W. 56th St., New York; Ohsawa Foundation, P.O. Box 238, Chico, California; Chico-San, Inc., 64, 5th Ave., Chico, California; Musubi, 61, W. 56th St., New York–Macrobiotic Restaurant).

Concerning the date of publication: Although the date is not given in or on the book, Carl Ferré (who owns an original of this 2nd Japan printing) notes (8 May 2011): "Chico-San is listed. This means it was after Nov. 1961 at the earliest and most likely very early in 1962. I say this because the address given is not the Mangrove Ave. one." "There is no 'Printed in Japan' in this book either but it is so similar to the earlier one that it has to be printed in Japan. It is also undated. It is not 'revised'..."

In the 3-column "Dictionary of Macrobiotic Terms" (insert), for each entry there is the word or term, its definition, and one page number on which that word appears. Because the page numbers refer to pages in this edition, the dictionary was probably published at about the same time as this book—or at the time of the previous edition in 1960. The following is a selection from the Dictionary, with pages given for soy-related words: Aduki: Japanese red bean. Ae: Dressing (vegetables) with soy bean paste [miso], orange juice, etc. (p. 96). Aemono: Japanese salad (p. 88). Age: Fried bean curd. An: Red [aduki] bean jam. Ankake: Pouring [aduki] jam. Bancha: Coarse green roasted a few minutes. Bansho: Bancha with soy sauce (p. 152). Daikon: Long, white Japanese radish. Dango: A dumpling. Dentie: Head of eggplant salted, kept, dried and then burned into a powder. Egoma: A type of sesame seed—most yang. Gobo: Burdock. Gomashio: Sesame salt. Goma Tofu: Sesame curds (p. 87). Goziru [gōjiru, gojiru]: Soup made of grated soy beans and vegetables ("Ziru" means soup in Japanese) (p. 84). Gyoza: A Chinese food—vegetable mixture wrapped in pieces of thin dough. Hako: A mold or box in Japanese. Haru Tea: A very yang herb beverage. Hiziki [Hijiki]: Spindle-shaped, small, black seaweed. Jinenjo: A wild potato or a Japanese yam. Karinto: A kind of deep-fried cookie. Kasha: Russian buckwheat grain preparation. Kayu: Thin rice preparation [porridge]. Kinpira: Burdock and carrots preparation. Kitune [Kitsune]: Boiled rice or noodles cooked with thin fried bean curds [*agē*] (p. 68). Kobu (or Konbu): A (sea) tangle coming from deep ocean waters. Kobu Maki: Kobu stuffed with vegetables. Koi-Koku: A special carp and miso soup (p. 109). Kokkoh: A creamed blended cereal. Konnyaku: A paste made from flour of this Japanese tuberose [tuber]. Kuzu: Powdered plant-gelatine obtained from kuzu plant. M.U. tea: A tea made of 15 blended herb's roots. Matuba [Matsuba]: Pine leaves. Miso: Soy bean paste (p. 65). Miso Ae: Boiled vegetables served with miso cream (p. 96). Misoni: Carrots and onions cooked with miso (p. 129). Mochigome: Glutinous rice. Moti [Mochi]: Rice cake. Musubi: A knot. Nisime [Nishime]: Same as Nituke. Nituke [Nitsuke]: Vegetables sauteed. Nori: Laver or sloke—a kind

of seaweed. Ogura: Aduki (red bean) preparation. Omedato: Dessert made of roasted rice and red beans. Originally Japanese word for congratulation. Oshitashi: Boiled vegetables, served with Tamari (p. 97). Ransho: Egg–Tamari preparation. Renkon: Lotus root. Sashimi: Sliced raw fish. Sarashina: A kind of buckwheat dish. Originally it means the name of a place famous for producing good buckwheat. Siitake [Shiitake]: A kind of Japanese mushroom. Sio [Shio]: Salt. Sio Kobu [Shio Kombu]: A kobu (seaweed) preparation. Soba: Buckwheat. Sukiyaki: Fish (or beef) and vegetables cooked a la japonaise. Sushi: A rice preparation. Syo-ban [Sho-ban]: Coarse green tea with soy sauce (p. 101). Tahini: Sesame butter. Tai: A red snapper [fish]. Tamari: Traditional soy sauce (p. 62). Tekka: A preparation of minced lotus root, burdock root, carrot, ginger, and miso (p. 96). Tempura: Japanese process of deep-frying in oil. Tofu: White soya bean cheese (p. 134). Tororo: Wild potato [wild yam]. Udon: Wheat vermicelli or noodle or macaroni. Umeboshi: Japanese plum salted and conserved for years. Ume-sho-ban: Medicinal beverage [containing umeboshi and shoyu] (p. 156). Yannoh (Ohsawa coffee): A cereal coffee made of roasted rice, wheat, aduki, chick peas and chicory. Yomogi: Mugwort (or wormwood). Yuba: Soybean protein prepared into transparent paper-like sheets (p. 77). Zosui: A rice preparation. Zaru: A bamboo basket. Address: Ohsawa Foundation: 331 Riverside Dr., New York City. Secretary Aihara, 44 W. 96th St., New York City, U.S.A.

433. Talese, Gay. 1963. One year later, still no bomb. *Esquire*. May. p. 76-77.

• **Summary:** The story of the Exodus from Long Island to Chico, California in the fall of 1961—prompted by the teachings of “Zen Buddhist philosopher” [sic] George Ohsawa. Full of interesting details. The Berlin Crisis [which ended with the city’s partition and the East German erection of the Berlin Wall] has worsened and many believed that New York City was the world’s leading target for an atomic bomb.

They chose Chico based on their interpretation of Atomic Energy Commission reports and data.

It was Mr. Alvin Baumann who gathered friends at his home one evening when they decided to leave the New York City area. These were not aging beatniks (as the press has implied) but a group of largely successful, professional people. Their names and professions are given. But they had had enough of the big city “rat race”—they were fed up and ready for a simpler life. A study of AEC reports showed Chico as a possible place to go. A few days after the meeting at his home, Bauman and two others flew to California to look at small towns north of San Francisco. They found Chico and liked it. It had a population of less than 37,000, an average temperature of 63 degrees, its own university (Chico State College) to give an intellectual flavor, and it was only 3 hours by car from San Francisco.

“The possibility of great doses of nuclear fallout being carried by rain into Chico is slight because the area has a light rainy season, and the surrounding mountain formation keeps away east-to-west winds that might be transporting atomic dust from other contaminated cities.”

They were given a big welcome, but some people in Chico were suspicious—and rumors began to fly when it was learned that the first baby born to Mr. and Mrs. Aihara in Chico had died. An inquest—rare in Chico—stated that the death was attributed to “abdominal abscesses.” But then the rumors stopped.

Note: Herman and Cornelia Aihara had two children born in New York—Mari / Marie and Jiro—who were part of the caravan trip to Chico.

The newcomers soon got jobs and also opened a “large health-food shop” named Chico-San. The business averaged sales of \$2,000 a month. Irv Hirsh [also spelled Hirsch] worked as a baker—of unleavened bread. Lou Oles, a former trumpeter with Benny Goodman, enrolled as a student of mathematics and physics at Chico State College. At a tavern frequented by college students, Teal Ames was introduced one evening by a friend to a California bachelor named Bill Nichols, who now also lived in Chico. Six weeks after he met Teal he converted to a macrobiotic diet; then they were married.

434. *Yin Yang: The Unifying Principle (Ohsawa Foundation, Chico, California)*. 1963. Summer camp—Chico, California. 3(3):5-6. Aug/Sept.

• **Summary:** “This summer, August 1-31, the Ohsawa Foundation sponsored its first Macrobiotic Summer Camp here in Chico. The camp was a complete success—an example of what people who work together can achieve. The guests, numbering more than 25 per day, from all parts of the United States, as well as Mexico, Brazil, Belgium, Hawaii and Japan, were delighted with the improvement in their health and well-being. The food, the accommodations (a lovely, rambling building with a spacious L-shaped swimming pool), the staff—all lived up to our fondest expectations. Daily lectures were given by Herman Aihara, Bill Nichols, Al Bauman and Lou Oles. The highlight of the last two weeks was the arrival of George and Lima Ohsawa. Mr. Ohsawa was more profoundly clear than ever and won many new friends for Macrobiotics. Dr. Kikuo Chishima lectured on his revolutionary theory of cell reproduction. Dr. Chikao Narita, director of a Macrobiotic clinic in Japan, held daily consultations. Dr. Moriyasu Ushio, director of a 100-bed hospital in Tokyo, also was in consultation. Mr. Kakujiro Hoshina, well-known entertainer in Japan, held the guests spellbound with folk songs. He sang and accompanied himself on the shamison (shamisen; Japanese stringed instrument) and the shakuhachi (Japanese end-blown bamboo flute).

“Report of the First International Conference on

Macrobiotics. During the last weeks of August, 1963 two meetings of international representatives to the First International Conference on Macrobiotics were held in Chico, California. There were people present from Belgium, Mexico, Brazil, Japan and the United States. The most urgent need of all countries is for communication with others. Dr. Narita, Japan, emphasized the value that exchanges of case histories could have in supporting and clarifying a new medicine. Eve Lasson, Brazil, revealed the hunger of doctors in Brazil to learn from the experiences of practitioners in other parts of the world.

“Communication on many subjects could be very helpful: (1) Food factories. (2) Clinics. (3) Children’s health and education in an unsympathetic society. (4) Advances in knowledge—Reports of research and experience.

“It was decided to begin publishing at once: (A) A list of macrobiotics doctors throughout the world. (B) An International Bulletin of Macrobiotics that would contain reports on the macrobiotics activities in each country and articles of general interest from each country. Though the need to work actively together was recognized, it was considered premature to attempt any such plans at this time.

“The 2nd International Conference will be held in France in 1964. Before adjourning, the representatives agreed that we had entered a very exciting, hopeful phase of our work. The seed of an international organization has been planted.

* Center Ignoramus—School of Macrobiotics. Address: P.O. Box 238, Chico, California.

435. *Yin Yang: The Unique Principle (Ohsawa Foundation, Chico, California)*. 1963. Center Ignoramus—School of Macrobiotics. 3(3):6-7. Aug/Sept.

• **Summary:** P.O. Box 181, Chico, California. Note: Herman got a separate P.O. Box for Center Ignoramus. That name had deep meaning for Herman, since it was the name of George Ohsawa’s school, Centre Ignoramus School (*Maison Ignoramus*), near Tokyo, Japan when Herman first met Ohsawa. The name reflects a concept with deep historical roots via Socrates, Krishnamurty, Suzuki roshi, etc. The Oracle of Delphi pronounced Socrates the wisest of Greeks; and Socrates took this as approval of his agnosticism which was the starting point of his philosophy: ‘One thing only I know’, he said, ‘and that is that I know nothing’. Philosophy begins when one begins to doubt—when one begins to question the accepted wisdom of tradition. Particularly the one’s cherished beliefs, one’s dogmas and one’s axioms.’ Krishnamurty wrote a book titled “Freedom from the Known.” Suzuki roshi wrote a book titled “Beginner’s Mind.

“September, 1963. The first International Summer Camp of Macrobiotics in the United States has just concluded its schedule for the summer.

“We are very happy to inform you that a year-round continuation of the summer camp program has been

organized. Under the direction of Herman and Cornelia Aihara, the Center Ignoramus School of Macrobiotics is beginning its activities.

“A program of macrobiotic meals and care, lodging and lectures is planned.

“The fee for attendance at the Center Ignoramus School of Macrobiotics is \$200 per month. A schedule of fees will be available for those who wish to attend for shorter periods. We shall attempt to meet your needs. For example, a request has been received for week-end classes and accommodations for beginners.

“Please contact us at the above address if you have any questions about attendance at the school. We will be very pleased to work out convenient arrangements.

“Why the Centre Ignoramus School of Macrobiotics? by Herman Aihara.

“The summer camp in Chico, 1963 has provided us with many interesting experiences. The most important one concerned a couple who had been observing macrobiotics for a year and a half through their own study of the book *Zen Macrobiotics*.

“Immediately after their arrival at the camp, the husband suffered a severe headache. We learned that he had had headaches for 20 years and had taken medication daily with no improvement. At camp there was no pain-killing medication: the pain was terribly severe. Mrs. Ohsawa comforted him with her hands and after an hour, he fell asleep. The next day was free from pain. Day by day improvement in his health continued with no further headaches.

“We had learned an important lesson. This couple thought that they had been practicing macrobiotics but in reality they had not. There was much that they did not understand.

“As a result, we decided to open a school of Macrobiotics. After having visited periodically with many people, having given numerous lectures and cooking classes in various communities, we have found that this is not enough for an understanding of Macrobiotics. The real understanding comes from concentrated study in daily life.

“A month of daily attendance at a school could eliminate many months of floundering [sic, foundering] in a sea of misunderstanding. We Japanese disciples of Macrobiotics have been fortunate to study at the Tokyo Centre Ignoramus School under the direction of George Ohsawa. We think that this period of study was a key point in our lives. Our sense of gratitude makes us want to give others the same opportunity we have had.

“Our school will be closely connected with Mr. Ohsawa wherever he may be and will be most precisely advised and supervised.” Address: P.O. Box 238, Chico, California.

436. *Chicago Tribune*. 1963. Food group to meet in Du Page County. Oct. 13. p. W4.

• **Summary:** The fall convention of Natural Food Associates will be held starting at 9 a.m. Saturday at the Du Page County fairgrounds. John H. Guill, Jr., formerly with the U.S. Food and Drug Administration, will speak at the all-day session.

437. Natural Food Associates. 1963. Classified ad: Startling. Provocative. Worthwhile. Challenging! *Chicago Tribune*. Oct. 17. p. W_A12.

• **Summary:** “Four outstanding talks on food and health. Delicious, hard-to-find unsprayed foods for sale. Wonderful natural food gourmet’s lunch. Directory tells where to buy healthful foods in Chicago area.

“The work of the Food and Drug Administration: 10:30 a.m. John Guill, director, Chicago district, FDA. Illustrated slide lecture.

“Natural foods—Fables and facts: 11:30 a.m. Is Rachel Carson’s book ‘Silent Spring’ highly exaggerated? Is unsprayed food foolish, inferior, too expensive as magazines claim?”

“What can one person do? 1:30 p.m. Hear Tom Edwards, newspaper editor, reveal the unused powers you have.

“What not to breathe: 2:45 p.m. Dr. Francis Silver, Chemical engineer from Martinsburg, West Virginia, tells how to protect your family from deadly unknown poisons found in every kitchen and bathroom.

“Fall convention, Natural Food Associates, Du Page County fairgrounds, Wheaton, Illinois, Saturday, Oct. 19, hours 9-5.

“Go 2 miles west of Wheaton to County Farm rd. and Manchester, midway between Roosevelt rd. & North ave. Adults \$1.50, Children free.

“The public is invited.”

438. Jacques DeLangre, Tommy Nakayama, Lou Oles, and Bob Kennedy (from left to right) relax during lectures in Los Angeles in 1963 (Photograph). 1963. Undated.

• **Summary:** Jacques DeLangre was a photographer in Los Angeles in the early 1960s who helped with many of the early publications. Later, he would found Happiness Press and the Grain and Salt Society in Magalia / Paradise Northern California. Jacques is the author of *Do-In 1* in 1971, *Do-In 2* in 1974, and *Seasalt’s Hidden Powers: How to Tell Its Integrity and Use it Correctly* in 1984 and 1987. Tommy Nakayama was the first of George Ohsawa’s students (founder of modern-day macrobiotics) to relocate to the West Coast of the United States in 1952. In 1963, Tommy and his family opened “Zen Restaurant” in Hollywood. Ohsawa attended the grand opening and was very pleased. Lou Oles translated and edited many of George Ohsawa’s writings, making them available to an English-speaking audience. J.

Robert (Bob) Kennedy was the president of Chico-San, Inc., the first macrobiotic food producer and distributor in the United States.

Note: Photo and text from Carl Ferré, editor and publisher of *Macrobiotics Today*, Chico, California.

439. Peters, Sidney C. 1964. Good insects too (Letter to the editor). *Chicago Tribune*. Aug. 28. p. 16.

• **Summary:** “Elgin, Aug. 22—Several days ago Walter Trohan (my favorite columnist) warned that food prices would go up if the anti-pesticide voices prevail. The anti-pesticide people have never been against all pesticides, only the deadly, long-lasting chlorinated hydro carbon poisons of the DDT variety.”

Actually, there are many safer pesticides available. New Zealand has now banned DDT plus a long list of American favorites including dieldrin, aldrin, lindane, etc.

A new book, ‘Gardening without Poisons,’ by Beatrice Trum Hunter, points out that over 3,000 plants have known insecticidal properties. Moreover, says Mrs. Hunter, there are 76,000 “good” insect species in the United States and only 10,000 “bad” ones. Address: Member, board of directors, Illinois Natural Food Associates.

440. Nelson, Harry. 1964. Quackery in nutrition field assailed by medical groups: Health food fad called ‘expensive nonsense’ by doctors, drug agency. *Los Angeles Times*. Nov. 8. p. B1, B4, B5.

• **Summary:** In the USA. the most widespread kind of quackery is in the field of nutrition, according to Kenneth L. Milstead of the bureau of enforcement of the U.S. Food and Drug Administration (FDA). The American Medical Association reports that every year about “10 million Americans spend \$500 million for nutritional nonsense in the form of ‘health’ foods, food supplements [vitamins, minerals], weight-reducing gimmicks and literature, fads and cults.”

“More people seem to believe more bunk about food and nutrition than any other single topic in the health field, and perhaps any other field,” according to Millstead in one of his many speeches around the country.

Martha F. Trulson, a nutritionist at the Harvard School of Public Health, agrees.

Southern California is seen as being “heavily infested with nutrition faddists.” An FDA publication states that three of the five organizations in America taking the lead in spreading nutritional fads are centered in the Los Angeles area. “These are the National Health Federation in Monrovia [membership 30,000], the American Nutrition Society and the Academy of Applied Nutrition, both of Pasadena.”

According to the FDA, the main objective of these three organizations is “the promotion of so-called natural or unprocessed foods.” They constantly tell Americans about the disadvantages of refined and processed foods.

The two other groups disliked by the FDA are the Boston Nutrition Society and Natural Food Associates of Atlanta, Texas. These groups counter that top officials in the FDA and AMA are “completely supported by the food industry.”

The five groups exist to perpetrate what the FDA calls the four myths of nutrition. These four myths, which are listed, are clearly a distortion of the groups’ real message.

Dr. Frederick J. Stare, a nutritionist at Harvard, is one of quackdom’s most vocal foes. He argues that iodine deficiency is the only known example of a relationship between soil composition and human nutritional status. Stare adds that an increase in soil fertility leads to increased crop yields but not to increased crop quality. Increasing soil fertility, says Stare, does not increase the vitamin or mineral content of the crops.

The FDA states the following authors and lecturers are the best-known propagandizers of the “four nutritional myths”: Lelord Kordel, Carlton Fredericks, Adolphus Hohensee, William L. Abt, Royal Lee, Gaylord Hauser, Dr. Herman Taller, Dr. D.C. Jarvis, Bob Cummins, Dr. Allen E. Banik, and Dr. H. Curtis Wood. There are many more.

Next Monday: “How the FDA plans to crack down on food faddists.” Address: Times Medical Writer.

441. Nichols, Teal. ed. 1964. *Zen cookery*. Chico, California: The Ohsawa Foundation. 83 p. Index. 22 cm. A second edition appeared in 1965.

• **Summary:** This is the earliest known macrobiotic cookbook written by an American, and its influence was profound.

Note 1. The Nov. 1964 edition of *Yin Yang* magazine, published in Chico, California, announced that the book had been published that month (Nov.).

“Acknowledgements: Our heartfelt gratitude goes to Lima Ohsawa, the foremost authority on Macrobiotic Cookery, without whose patient assistance and teaching this book would not have been possible. Many of the recipes appearing in *Zen Cookery* are from her collection in an earlier edition of *Zen Macrobiotics*. The Editor wishes further to thank the following people for recipes, suggestions, and invaluable comments: Joanne Hirsh, Dorothy Salant, Nina Bauman, Cornelia Aihara, Penny Smith, Shayne Oles, Betty Kennedy, and Jane Andrews.”

“*Zen Cookery* is a collection of recipes gleaned from the files of many people, all of whom have adjusted their salt intake to suit their own needs. Their recipes reflect this.”

Contents: 1. Grains. 2. Noodles. 3. Vegetables. 4. Soups. 5. Sauces. 6. Salads. 7. Inspirations from around the world. 8. Special dishes. 9. Miso soy bean paste. 10. Tamari soy sauce. 11. Breads. 12. Pancakes and crepes. 13. Pie doughs. 14. Desserts. 15. Beverages.

Note 2. This is the earliest English-language document seen (March 2012) that contains the term “tamari soy sauce.”

It is also the earliest English-language cook book seen that contains the word “tamari” or the term “tamari soy sauce.”

Each recipe is numbered. Recipes mentioning soy in recipe name (and a few other recipes introducing foods new to the USA): 2. Rice with tamari soy sauce. 3. Rice with aduki beans. 4. Rice & aduki pudding. 7. Sesame rice. 9. Rice with chick peas (garbanzo). 21-28. Buckwheat recipes. 34. Bulgur. 48. Buckwheat noodles in soup (Soba with kombu). 50. Buckwheat noodles with fried bean curds [tofu]. 54. Buckwheat noodles with miso sauce. 55-56. Buckwheat noodles in kuzu sauce. 61. Udon with aduki. 62. Carrot sesame nituke [nitsuke]. 75. Scallion nituke with miso (soybean paste). 76. Carrot and onion nituke with miso. 77. Onion nituke with miso. 78. Vegetable miso stew. 79. Boiled pumpkin with miso. 80. Vegetable sauces with kuzu arrowroot (and tamari soy sauce).

81. Vegetables with tamari soy sauce and tahini. 98. Jinenjo (5 recipes). 101. Miso-vegetable relish. 102. Aduki beans, black [soy] beans, chick peas. 105. Baked chick peas. 106. Buckwheat-aduki pancakes. 107. Udon with aduki beans. 108. Chestnut-aduki gelatine. 109. Chick pea party dip (with tahini and tamari). 110-118. Sea vegetables (kombu, nori, hiziki, wakame, most with tamari). 119. Clear broth (with tamari). 122. Tamari-vegetable broth. or stock. 123. Miso soup (2 types). 124. Creamed miso soup. 125. Root vegetable soup with miso. 131. Soybean soup. 134. Wakame soup (with miso). 149. Sesame sauce. 150. Miso sauce. 151. Miso salad dressing. 152. Thick tamari soy sauce. 153. Tahini tamari soy sauce. 154. Onion tahini sauce (with tamari). 172. Wakame salad.

189. Clam miso. 190. Scallop miso-lemon. 203 Miso spread [with tahini]. 204. Miso sauce [with tahini and orange rind]. 205. Sauce for vegetables [with black sesame and miso]. 206. Scallion miso. 207. Miso salad dressing. 208. Miso-vegetable relish. 209. Miso soup. 210. Udon with miso sauce. 211. Rice porridge with miso. 212. Deep fried miso balls. 213. Carrots and onions miso. 214. Vegetables miso. 215. Tekka (2 types). 216. Tea with tamari soy sauce. 217. Tamari broth. 218. Stringbeans. 219. Dried radish (daikon). 220. Shredded sea vegetables (hiziki). 221. Thick tamari soy sauce. 222. Tahini-tamari sauce. 223. Vegetables with tahini-tamari soy sauce. 234. Aduki muffins. 238. Miso spread (for sandwiches). 239. Tahini-tamari spread. 246. Buckwheat aduki pancakes. 272. Aduki pudding. 273. Chestnut-aduki gelatine. 274. Kanten jello (with agar).

291. Grain Milk (Kokkoh [Kokoh]; a finely ground combination of roasted rice, glutinous rice, oatmeal, soybeans, and sesame seeds). 294. Tea with tamari soy sauce (syo-ban).

Note 3. This is the earliest document seen (Feb. 2005) that mentions Kokkoh (or Kokoh), a grain milk introduced by macrobiotics.

Note 4. Tofu, amazake, and seitan are not mentioned in this book. 287 is Ohsawa Coffee (Yannoh) and 288 is

Dandelion Coffee.

Note 5. This is the earliest document seen (June 2000) that mentions the use of miso in a salad dressing (Nos. 151 and 207).

Note 6. In 1985, when writing a revised edition of this book titled *The First Macrobiotic Cookbook*, Herman Aihara wrote (p. v) that this 1964 edition, published by the Ohsawa Foundation of Chico, California, was first the edition of the various subsequent and very influential books with this title.

Note 7. This is the earliest document seen (March 2011) concerning Herman or Cornelia Aihara and macrobiotics (or soyfoods).

Note 8. Along with soyfoods, this cookbook (and its many successors) also introduced numerous other basic Japanese foods such as aduki [azuki] beans (3-4, 102, 106-08, 234, 272-73), sea vegetables of all types, and soba. Address: Chico, California.

442. Lou Oles (left), Shayne Oles, and Junsei Yamazaki pose for a photo at the 1964 summer camp at Big Sur, California (Photograph). 1964. Undated.

• **Summary:** Lou Oles translated and edited many of George Ohsawa's writings (founder of modern-day macrobiotics), making them available to an English-speaking audience. When Herman Aihara, the first elected president of the Ohsawa Foundation of New York and California, resigned to work exclusively with Chico-San, the first macrobiotic food producer and distributor in the United States, Lou became president of the Ohsawa Foundation and moved to Los Angeles with his wife Shayne. She was instrumental in presenting macrobiotic recipes and editing recipes of Cornelia and others with her work on *Zen Cookery*, the first macrobiotic cookbook in 1964. Junsei Yamazaki was sent by Ohsawa to help set up a rice cake machine for Chico-San in 1963. Junsei also was the first person [in many years] to make natural, traditional miso in America and produced some of the finest rice syrup and candies, toasted sesame butter, and traditional tamari shoyu.

Note: Photo and text from Carl Ferré, editor and publisher of *Macrobiotics Today*, Chico, California.

443. Hunter, Beatrice Trum. 1964. Gardening without poisons. Boston, Massachusetts: Houghton, Mifflin Co. xiv + 314 p. Illust. 22 cm. [150+* ref]

• **Summary:** This is the story of restoring a California citrus ranch to productivity using organiculture [organic agriculture]. Points out that over 3,000 plants are known to have insecticide properties.

Soybeans are used as a cover crop and for weed control—see p. 55, 72, 107, 112, 125, 159, 162, 205. Address: White Mountains, New Hampshire [by July 1965: Hillsboro, NH 03244].

444. Ohsawa, George. 1964. *Le Zen macrobiotique*; ou,

L'art du rajeunissement et de la longévité [Zen macrobiotics, or the art of rejuvenation and longevity]. Paris: Librairie Philosophique J. Vrin. 212 p. [Fre]*

• **Summary:** The author (lived 1893-1966) lists his name on the title page as “Georges Ohsawa (Nyoiti Sakurazawa).”

445. Taylor, Renee. 1964. *Hunza health secrets for long life and happiness*. Englewood Cliffs, New Jersey: Prentice-Hall; New Canaan, Connecticut: Keats Publishing. xv + 173 p. See p. 110, 112, 118. No index. 24 cm.

• **Summary:** Formerly Hunza was an independent kingdom. Today it is part of West Pakistan, functioning as an independent state with a king on the throne. The population is mostly Moslem.

Dr. Robert McCarrison lived with the Hunzas (also called Hunzakuts) for 7 years and studied their way of life, which he praised as being basically free of disease. He wrote of his findings in *Studies in Deficiency Disease* (1921). The mainstay of their diet is whole-grain chapatis, made from wheat, barley, buckwheat, or millet flour. They consume some milk and yogurt, plus apricots and their stones. Many of the people drink wine but the more orthodox Moslems don't drink any alcohol.

The author visited Hunza, landing by plane in Gilgit (p. vii-viii, 1-21). In chapter 10, “Recipes from the Rooftop of the World” (many of which contain meat), page 110 states: “Soy Beans: Soy beans are very high in nutritional value. The soy bean serves in many capacities such as providing protein for the making of cheese, milk, bakery goods, etc.”

Page 112 states: “The Hunza people sprout the following seeds, which convert starches into proteins: soybeans, alfalfa seeds, lentils, green peas, lima beans, whole wheat kernels, and barley.”

Pages 160-61 note that in 1950 a group of physicians, dentists, and laymen met in Chicago, Illinois, and formed “Natural Food Associates” as a nonprofit association under the leadership of Joe D. Nichols, a surgeon in Atlanta, Texas. “Their objectives are to educate all people to the value of poison-free natural food grown on fertile soil... They publish a monthly magazine *National Food and Farming* which contains articles on organic gardening.”

Note: G.J. Binding, in his book *About Soya Beans* (1980, p. 54-56) says (probably incorrectly): “Rene [sic, Renee] Taylor found that the soya bean played a vital and important part in the Hunza diet, providing protein for the making of cheese, milk, bakery foods, etc. She said they only ate meat on rare occasions such as holidays, weddings and so on... The little soya bean consumed extensively by this healthy race of people without doubt plays a vital part in keeping them not only strong, healthy and free from disease, but puts them on their own as one of the fittest races in the world.” Address: P.O. Box 995, Beverly Hills, California.

446. Ohsawa, G. 1964? *Macrobiotics: The art of longevity*

and rejuvenation. New York, Paris, Brussel [sic], Tokyo: Ohsawa Foundation. Printed in the U.S.A. by Eastern Technical Publications (Boston & New York). 218 p. Undated. Index. 17 cm.

• **Summary:** This is the earliest known American printing of “Zen Macrobiotics.” The word “Zen” was removed from the title at Michio Kushi’s suggestion. The cover is yellowish tan. The author is George Ohsawa.

Contents: Foreword: Two ways to happiness through health. Preface: Health to peace. Books by the same author (7 in French, 9 in Japanese, one in English, plus 4 periodicals). Table of contents. 1. Macrobiotics and Oriental medicine. Why I have written this book. What is the philosophy of the Far East? 2. What is my therapy? Unhappiness, illness, crime. Incurable disease. Three categories of cure. What we must not cure. Satori. Courage, honesty justice. Tolerance. 3. The six main conditions of health and happiness. 4. Nothing shall be impossible to you. You should have infinite freedom. You must be your own doctor. 5. Ohsawa’s macrobiotic cuisine. 6. Principal foods: Rice, buckwheat, udon etc., millet, raw rice etc. (p. 62-71, with recipes). 7. Secondary foods (p. 72-103, with recipes): Nituke, soup (lotus root ankake, kuzu gruel, cracknel yuba), pie, gyoza (piroshiki), chapati, jinenjo (wild potato, tororo). Egyptian beans (chick peas, *pois chiche*), beans (boiled soy beans with miso, gomoku beans, goziru [gojiru] soup, aduki beans), corn, aduki (ogura vermicelli), goma-tohu [sesame tofu], aemono (salads), varieties (chou farci, buckwheat crepe), wild vegetables, seaweeds (shi kobo [shio kombu], kobo maki, fried kobo, musubi kobo, kobo soup, matsuba kobo, salmon head kobo-maki, hiziki with lotus root, hiziki nitsuke, hiziki with “age,” hiziki and soyabean, gomoku hiziki, hiziki rice), wild plants (dandelion leaves or root, aozo {wild spinach}, fuki), miso and tamari preparation (sauce miso, miso cream, muso [miso with tahini and orange peel], miso soup, carrot and onion au miso, vegetable au miso, oden au miso, buckwheat dango au miso, miso ae, tekka no. 1 and 2), syoyu [shoyu] (sakura rice, sauce au shoyu, sauce au sesame, bouillon au shoyu, ositashi [ohitashi], oatmeal cream, potage oatmeal, sauce bechamel a la sauce shoyu, mayonnaise a la sauce shoyu, sauce Lyonnaise; “Shoyu diluted with a little water is very good for Sasimi [Sashimi = raw fish] and fried oyster, tempura, fish Sukiyaki, tofu {vegetable cheese of soya beans}, etc.”), beverages (rice tea, wheat tea, dandelion coffee, Ohsawa Coffee {Yannoh; incl. roasted and ground rice, wheat, aduki, chick peas, and chicory}, Kokkoh {incl. roasted rice, glutinous rice, oatmeal, soya beans, and sesame seeds}, Mu tea, syo-ban {coarse green tea with soy sauce}, kuzu [cream, with shoyu] {“A good drink for everyone”}, aduki juice, radish [daikon] drink no. 1 and 2, ransyo {one beaten egg + 50% of traditional Ohsawa shoyu}, soba tea, umeboshi juice, ume-syo-kuzu, special rice cream).

8. Special dishes. Desserts. 9. Yin and Yang. 10. Macrobiotic suggestions for various symptoms of disease

(p. 131-36, with recipes): General suggestions (by disease), macrobiotic external treatment (tofu plaster, soya bean plaster, Dentie). 11. Specific curative dietary suggestions: Examples of diseases and their macrobiotic treatments. 12. Kokkoh: Macrobiotic food for baby. 13. On cooking. Salt. Folk medicine. Your history. Appendix: The case of Mr. E. (Cure in 10 hours). “Pro-forma death certificate of the American World Empire and its Gold Dynasty.”

Ohsawa centers and friends (p. 217-18): England (Trustin Foods, London; Mrs. R. Takagi, London), France (Centre Ignoramus, Longue Vie, Guenmai [Genmai = brown rice], Yamato, Ohsawa-France; all in Paris). Germany (Miss M. Arnoldi, Heidelberg; Dr. P. Martin, Munich; Dr. Henning, Hamburg), Italy (Miss H. Onoda, Rome; Mrs. Baccolis, Rome), Japan (Nippon Centre Ignoramus, 8 Kasumi-cho, Minato-ku, Tokyo; Shinsekai, Osaka), Brazil (Casa Longavida, Sao Paulo), Sweden (Miss Ilse Clausnitzer, Stockholm), U.S.A. (Ohsawa Foundation, 61, W. 56th St., New York; Ohsawa Foundation, P.O. Box 238, Chico, California; Chico-San, Inc., 64, 5th Ave., Chico, California; Musubi, 61, W. 56th St., New York—Macrobiotic Restaurant).

This book is undated, but it contains clues as to when it was published. On page 190 is reference to an article in *Time* magazine dated 7 March 1960 about the sad state of health in the United States. Then on page 189, Ohsawa states: “Upon my arrival in the United States last November, I began my lectures on the philosophy and medicine of the Orient. I gave some in Los Angeles and San Francisco [California], but mostly in New York institutes and schools such as the Universalist Church, The New School for Social Research, Columbia University, New York City College, and the American Buddhist Academy. I have postponed my departure twice. But I am very happy as I have confirmed my assumption: marriage between paradoxical philosophy of the Orient and the materialistic techniques of precision of American science, which must be realized for the infinite freedom of Man and for world peace” (p. 189).

Concerning the date of publication, which is not given in or on the book. One guess is about 1964, because when you do a printing of a book, you want to print enough to last for at least two years. This $1962 + 2 = 1964$. A pretty weak reason! Carl Ferré (6 and 8 May 2011) states: I’ve done enough printing to know that the book printed in the USA uses the same plates as the second printing in Japan except for two changes. They added “Printed in the USA by...” (in a different type face) to the back side of the first page, which is blank; and, they whited out “Zen” and the smaller “Macrobiotics” on the cover and title page and replaced both with one word: “Macrobiotics” (again, in a different type face). The rest of the book appears to be exactly the same as the second printing from Japan.”

“My thinking is that 1964 is a pretty good guess because I believe it may have been arranged by the East Coast Group—thus, the word ‘Zen’ was off the title and it

was printed by a printer in Boston and New York. This would be about the time Michio Kushi was getting settled in Massachusetts.”

Note 1. These lines almost certainly describe Ohsawa’s first visit to the United States. He arrived in November 1959 and stayed well into 1960.

Note 2. All recipes in this book are numbered, from No. 1 (Unpolished rice, p. 162) to No. 816 (Rice plaster, p. 136). The recipe numbers are identical to those published in the mimeograph edition of *Zen Macrobiotics* (also titled *Macrobiotics—The Biological and Physiological Foundation of Zen Buddhism*), published in early 1960.

Note 3. The contents of this book is very similar to that of the earliest published edition of *Zen Macrobiotics*, which was printed in Japan and was 218 pages long.

447. *Natural Food and Farming (Atlanta, Texas)*. 1965. Health food store directory. 11(8):42-42. Jan.

• **Summary:** The directory is arranged alphabetically by state. The states with the most stores listed are: Texas 11, California 7, Ohio 6, Illinois 5, and Florida 3.

Note: This is the first issue of this magazine which contains a “Health Food Store Directory”; it is 1.5 pages long.

448. Ryon, Art. 1965. Roundabout: Aware Inn. *Los Angeles Times*. March 3. p. 70 (Part V, p. 10).

• **Summary:** “If you are impressed with blanket-size menus, visit the Aware Inn at 8828 Sunset Blvd. on The Strip. This, by the way, is a fine small Restaurant. It is open only from 6 p.m. to midnight. Long a favorite of business men in the Strip, it is becoming increasingly popular with the Up-and-Coming young film folk. And, oh, this Aware Inn has no connection with the Aware Inn in the valley.”

449. *Natural Food and Farming (Atlanta, Texas)*. 1965. The farmer’s market. 12(1):43-46. June.

• **Summary:** This section of classified ads is divided into natural organic foods and other classified ads. The natural organic foods section, 2.2 pages, has entries listed alphabetically by state. The rates are \$24 per year for four lines—additional lines \$4 each per year. Payable to Natural Food Associates, Atlanta, Texas.

Under “Texas” is this entry: “Deaf Smith County organically grown, thoroughly cleaned, hard winter wheat from our famous mineral-rich soils. 50 lbs., \$4.00: 100 lbs., \$7.50. F.O.B. Deaf Smith County. Write Box 866, Hereford, Texas.

Note: In the next issue, this company first advertised under the name “Arrowhead Mills” in this magazine.

450. *Natural Food and Farming (Atlanta, Texas)*. 1965. Health food store directory. 12(2):41-42. July.

• **Summary:** “This directory is printed six times each year as

a service to those who wish to buy good food. A free copy is available to anyone on request. Write NFA Health Food Directory, Box 210, Atlanta, Texas.”

The directory is arranged alphabetically by state. The states with the most stores listed are: Texas 9, California 7, Illinois 6, Ohio 6, and Florida 5. Stores with “Natural Foods” in their name are: (1) Chamberlain Natural Foods, Orlando, Florida. (2) Natural Food Center, Lakeland, Florida. (3) Hale’s Natural Foods, Alston, Illinois. (4) Walker and Westbrook Natural Foods, Belleville, Illinois. (5) A & B Natural Foods, Ft. Wayne, Indiana. (6) Beeler’s Natural Foods, 127 East Ohio St., Indianapolis, Indiana. Indiana’s largest and oldest natural food store—Serving our community since 1929. (7) Good Earth Natural Foods Supermarket, New York City, New York. (8) Massie’s Natural Foods, Grant’s Pass, Oregon. (9) Gigler’s Natural Foods, Klamath Falls, Oregon. (10) Natural Foods, Lancaster, Pennsylvania. (11) Mease’s Natural Foods, Schoeneck, Pennsylvania. (12) Natural Foods Center, Marshal, Texas. (13) Natural Food Center & Juice Bar, Houston, Texas. (14) Moore Natural Foods, San Antonio, Texas.

451. Natural Food Associates. 1965. Plan a week of study and fun at the 1965 NFA Summer Seminar (Ad). *Natural Food and Farming (Atlanta, Texas)* 12(2):3. July.

• **Summary:** “The Arlington Hotel, Hot Springs, Arkansas. August 2-6. Study subjects: Nutrition. What to eat and why. True prevention. You and your heart. Physical fitness. Meal planning. Ecology and you. And others.”

452. Natural Food Associates. 1965. The Farmer’s Market (Ad). *Natural Food and Farming (Atlanta, Texas)* 12(2):43-46. July.

• **Summary:** This section of classified ads is divided into natural organic foods and other classified ads. The natural organic foods section, 2.2 pages, has entries listed alphabetically by state. The rates are \$24 per year for four lines—additional lines \$4 each per year. Payable to Natural Food Associates, Atlanta, Texas.

Under “Texas” is this entry: “Deaf Smith County organically grown, high gluten, hard winter wheat from our mineral-rich soils, cleaned. \$7.50 / 100 lbs., \$60.00 / 1,000 lbs. F.O.B. Arrowhead Mills, Box 866, Hereford, Texas.

Note: This is the earliest document seen (March 2020) that mentions “Arrowhead Mills” of Hereford, Deaf Smith County, Texas.

453. Nichols, Joe D. 1965. President’s page. *Natural Food and Farming (Atlanta, Texas)* 12(2):5. July.

• **Summary:** “Another segment of agriculture is now in peril. Something is killing the valuable honeybee. According to newspaper reports, losses in five states have been more than fifty per cent. Mysterious deaths of entire hives have been reported in Texas and Louisiana.

“California, producing more than 29 million pounds of honey this year, is also in serious trouble.

“This summer the U.S.D.A. is to begin studies in an attempt to find the cause of the deaths. Beekeepers all over America already know that mass spraying with modern agriculture chemicals is the chief cause of the death of the bees.

“This is an emergency. We could get along without honey—I certainly would not want to lose this valuable food—but we certainly cannot get along without the honeybee. The bee is necessary for the pollination of our fruits, melons, and legumes. We cannot continue to feed our people without the bee.”

“Rachel Carson wrote *Silent Spring* and it became a best seller. Many of us thought this book would alert America and stem the tide. A few people were alerted but the tide of the poison chemicals was not checked. On the contrary, more and more are being used every year. The ‘system’ made an effective counterattack. They have made too many people in high places believe that we cannot feed our people without their poison chemicals.” Address: M.D., Atlanta, Texas.

454. Re: Early invoices from The Infinity Food Co. 1965. New York, New York. Typed, with signature on letterhead.
• Summary: On 15 Feb. 1995 Howard Rower wrote: “I enclose Xeroxes of a few invoices found in the back of a drawer.” There is no company name on these invoices, but they are dated and numbered, and contain interesting information:

No. 78. Aug. 14, 1965. Ship to: East West Institute, 101 Walden St., Cambridge [Massachusetts]. Buyer: [David] Levin. 10 bags Koda rice, \$150.00.

No. 79. Sept. 1, 1965. Ship to: Ohsawa Foundation Inc., 317 2nd Ave. [New York City]. Buyer: I. [Irma] Paule. 15 lbs. chestnut flour, \$7.50. Grind 30 lbs. chickpeas, \$1.50.

No. 78. Aug. 14, 1965. Ship to: East West Institute, 101 Walden St., Cambridge [Massachusetts]. Buyer: Levin. 10 bags Koda rice, \$150.00.

No. 81. Sept. 7, 1965. Ship to: East West Institute, 101 Walden St., Cambridge [Massachusetts]. Salesman: Rower. Buyer: Levin. 80 bags W.W.F. [whole wheat flour], \$32.00. 100 lbs WWF bulk, \$14.00. 20 lbs. RC [rice cream] coarse, \$12.00. 20 lbs. RC fine, \$8.00. 25 lbs. chestnut flour, \$12.50.

No. 82. Sept. 12, 1965. Ship to: Ohsawa Foundation, 317 2nd Ave. Buyer: I. Paule. 25 lb. WWF, \$3.50. 15 bags WWF, \$6.00, 14 bags RC, \$5.60.

No. 83. Sept. 13, 1965. Ohsawa Inc., 763? Lex. Ave. Salesman: Rower. Buyer: Mr. Sato. 12 rice cream, \$4.80. 6 WWF, \$2.40.

No. 84. Sept. 16, 1965. Ship to: Specialty Foods Corp., 116? Houston St. Buyer: Sid. 72 rice cream, \$25.20.

No. 85. Sept. 19, 1965. Ship to: Ohsawa Foundation, 317 2nd Ave. Buyer: I. Paule. 36 rice cream, \$14.40. 12 chestnut flour, \$6.00. 12 WWF, \$4.80.

No. 86. Sept. 23, 1965. Ohsawa Foundation, 317 2nd Ave. Buyer: I. Paule. 20 lbs. wheat berries, \$2.80. 12 rice cream, \$4.80. 36 rice cream \$14.40.

No. 87. Sept. 26, 1965. Ship to: Zara’s, 255 W. Newton St., Boston. 80 lbs. WWF bulk, \$11.20. 20 lbs WWF bulk, \$2.80.

In addition to the invoices, there are: (1) One business card (undated) belonging to Howard Rower. “Infinity Foods. Specialists in wholesale macrobiotic provisions. 84 macdougall st., new york, 12. YUkon 2-3620.”

(2) Three printed business cards (undated) belonging (separately) to Howard Rower, Jason Hammond, and John Hammond. They read: The Infinity Co., Written inside an infinity symbol: “Nothing added. Nothing removed.” Traditional foods. Importers, processors, distributors. 84 MacDougal Street, New York, New York 10012. Phone: 212 YUkon 2-3620. The same information is written on the back of Rower’s card in Japanese.

(3) A label (2¼ inches wide by 3½ inches high, black on white, self adhesive) for Dentie sold by The Infinity Co., Inc., New York, N.Y. 10012. 1½ oz. New Weight / Japan Import. Ingredients: Eggplant and salt. It contains a large, humorous illustration of dentures and pliers. (4) A typed letter (1 p.), with the signature of Howard Rower, on “Last Gasp Realty Ltd., 157 Hudson St., New York, NY 10013. Tel. 925-1145. Cable: Sansfin N.Y. Howard Rower: President.”

Note: The Aug. 1965 invoice is the earliest document seen (March 2020) concerning Infinity Foods of New York. Address: New York, New York.

455. *Hartford Courant (Connecticut)*. 1965. Natural foods convention set. Sept. 6. p. 16.

• Summary: “The ninth annual New England convention of the Natural Food Associates (NFA) will be held September 17-19 at the Griswold Hotel and Country Club in Groton” [Connecticut].

The mission of NFA, which was established 14 years ago, is to teach the value of natural foods. Dr. Thelma Ellis Arthur, an expert on the processes of aging, will deliver the keynote address titled: “Can Nutrition Alone Prevent or Cure Degenerative Disease in You?”

456. *Hartford Courant (Connecticut)*. 1965. Matikinus named star gardener. Sept. 23. p. 45B.

• Summary: Torrington (Special)—“At the ninth annual New England convention of Natural Food Associates this past weekend at Griswold Hotel and Country Club in Groton [Connecticut], Anthony J. Matikinus, of 129 Hawthorne Terrace, was designated ‘The 1965 Gardener of the Year.’” The award was won in competition with organic and bio-dynamic farmers from throughout New England. Bio-dynamic methods emphasize building up soils for long-term productivity and high nutrient quality. “No water-soluble

chemical fertilizers or toxic sprays are used.”

457. *Hartford Courant (Connecticut)*. 1965. Top baker. Sept. 23. p. 45E.

• **Summary:** At the ninth annual New England convention of Natural Food Associates this past weekend at Griswold Hotel and Country Club in Groton [Connecticut], Mrs. James W. Frost of Putnam was designated the ‘Baker of the Year.’ She was chosen from among 60 other bakers.

458. Sawyer, Ray. 1965. Seminar is great success: Photo story. *Natural Food and Farming (Atlanta, Texas)* 12(4):11. Sept.

• **Summary:** Four photos show the seminar, held Aug. 2-6, in Hot Springs, Arkansas.

459. *Natural Food and Farming (Atlanta, Texas)*. 1965.

A review of the new fluoride film: Through time-lapse photography the toxicity of fluoride to living cells has been dramatically proven once and for all. 12(5):19-20. Oct.

• **Summary:** A review of the chilling research film “Fluoridation Toxicity Research,” made in 1964. The narrator is Jonathan Forman, M.D., “a renowned practicing immunologist in Columbus, Ohio. He was trained as a pathologist. He is part president of the American College of Allergists, and was for twenty-three years Editor of the *Ohio State Medical Journal*, and presently is Editor-in-Chief of *Clinical Psychology* and... Dr. Forman has been interested in fluorine and its role as a trace element in biology since 1950 and publishes a bibliography of references in the literature dealing with fluorine, now grown to over 4,000 items.”

460. *Natural Food and Farming (Atlanta, Texas)*. 1965.

Health food store directory. 12(6):42-43. Nov.

• **Summary:** The directory, which is printed six times a year, is arranged alphabetically by state; it is 1.8 pages long.

461. Shannon, George W. 1965. A tribute to Albert Schweitzer. *Natural Food and Farming (Atlanta, Texas)* 12(6):24. Nov.

• **Summary:** “Last January 14, on his ninetieth birthday, Albert Schweitzer told his co-workers at the sprawling hospital he had built and operated in Lambarene, Gabon, Africa. ‘I feel at home here. I belong to you until my dying breath.’”

His words were prophetic. Not long thereafter he was buried next to his wife’s grave on the hospital grounds. “He had fashioned a simple cross, the only symbol of their death. Their lives had been an exemplification of Goethe’s theme, man’s redemption through beneficent activity.

“In this age of grubbing for money, Schweitzer was unique in that he advised that ‘you must give some time for your fellow man—something for which you get no pay but the privilege of doing it.’” Address: Editor, Shreveport Journal,

Shreveport, Louisiana.

462. **Product Name:** Mugi Miso.

Manufacturer’s Name: Infinity Foods (Importer). Made in Japan.

Manufacturer’s Address: New York.

Date of Introduction: 1965.

New Product–Documentation: Shurtleff & Aoyagi. 1983.

The Book of Miso. 2nd ed. p. 236-37. Howard Rower’s Infinity Foods, founded in the mid-1960s, was an early macrobiotic importer of miso. By April 1966 the company was selling it to Erewhon in Boston.

Ad in East West Journal. 1971. 1(16):10. For The Infinity Co. in New York City shows an infinity symbol, within which is written: “Nothing added, nothing removed.” The text for the ad reads: “We’ve been here since 1964, milling flour and selling Umeboshi. Now we have absolutely guaranteed organic produce. Contact us for more information: N.Y.C. 925-2082.”

463. Boots, Gypsy; Hopkins, Jerry. 1965. Bare feet and good things to eat. Los Angeles, California: Virg Nover, Printer. iii + 162 p. Illust. No index. 18 cm. Introduction by Steve Allen.

• **Summary:** This is the autobiography of Gypsy Books (born Robert Bootzin in 1911 in California) as told to Jerry Hopkins. Retail price: \$1.00. His father, Max, came to the USA from Europe without a penny and raised a happy family in San Francisco. They were raised on an organic, natural foods, vegetarian diet. His parents taught him to be happy, to love every person, to live a healthy but simple life, and to laugh a lot. Today he lives with his wife, Lois, and three kinds in a small cottage in Los Angeles.

In the 1940s he was one of the roughly 15 “Nature Boys” who lived in Southern California and shared a common desire to “abandon civilization and live a natural, healthy life.” He and Eden Ahbez were friends for two years. Eden wrote the words to “Nature Boy” which begins: “There was a boy / A very strange, enchanted boy; / They say he wandered very far, / Very far over land and sea.” Some 2-3 years later Nat King Cole recorded this song of Eden’s and shortly thereafter Eden became a celebrity, with his photo in *Life* magazine. The song he had written was at the top of the national Hit Parade, and the record sold a million copies. Today Eden lives in one of the canyons north of Los Angeles.

In 1958 Gypsy and his wife opened a “Back to Nature Health Hut” in Hollywood, not far from Beverly Hills (p. 50). A huge sign on top read “Organic Fruit, Produce & Juice.” There he served many fruits, nuts, vegetables and healthy foods. Many celebrities came. Among his biggest boosters were Gloria Swanson, Steve Allen, and Pat Boone. At his first luau he served a Baked soy bean casserole (using whole dried soy beans; recipe on p. 55). Other soy-related recipes: Soya-rice flour coffee cake (with soya flour and

brown rice flour, p. 64). Rye bread (with soy oil, p. 65).

There are chapters on fasting (5), health for growing children (13), salads (14), healthy drinks (15; he avoids alcohol and loves carrot juice and herb teas), vital foods (16-20, incl. soy beans, p. 111; and lecithin, p. 140), the Gypsy Boots Corporation (24; one of its products is the Gypsy Boots Energy Bar, p. 153-54; it contains malted milk crunch, vegetable oil, carob powder, brown sugar, skim milk, sunflower seeds, sesame seeds, and lecithin). Joe Weider is one of the people who have influenced him most in life (p. 157); others are Paul Bragg, Indra Devi (yoga teacher), Prof. [Edmond] Szekely (who lives at Rancho La Puerta in Mexico). The book contains 20 pages of photos, most showing Gypsy Boots with various celebrities, including: (1) Some of California's "nature boys." (2) Charlton Heston. (3) His health hut in Los Angeles. On the cover is a photo of Gypsy and Steve Allen.

Talk with Gypsy Boots. 2000. July 9. Gypsy does not remember exactly when his Energy Bar was first sold commercially, but it was probably in the late 1950s or early 1960s. As far as he knows, it was America's first "Energy Bar," made at first in small quantities by a Hungarian candy maker. For more information, visit his Web site at www.gypsyboots.com. He will be celebrating his 90th birthday on 19 Aug. 2000 at Paramount Studios in Hollywood. He now lives in Camarillo, California, and still has lots of energy.

Note: Talk with Chef Akasha Richmond. 2004. June 14. She was scheduled to meet Gypsy yesterday, on Sunday, June 13, to drive him to a book signing. He never showed up. She was worried, and quickly found out from his caretaker and close personal friend that he had to go to the hospital for surgery. The caretaker then told Akasha that he was not born in 1911, but on 14 Aug. 1916; his caretaker learned this from Gypsy's first wife. Years ago, he started to use the 1911 date to make him look older than he really was when he first appeared on the Steve Allen show. Address: Los Angeles, California.

464. Great Britain, Ministry of Health. 1965. Fluoridation. London: H.M.S.O. *

• **Summary:** A scientific study of the subject. An earlier edition was published in 1963.

465. *SoyaScan Notes*. 1965. Chronology of The Infinity Company (Originally named Perseverance Foods). 16 Jan. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1965?—This company was founded in New York City under the name Perseverance Foods by Howard Rower. 1964 or 1965—The company name was changed to The Infinity Co., but it was popularly known as Infinity Foods. In 196? it was incorporated as The Infinity Food Co. Inc.

After Herman Aihara and the Chico group left New York in 1961 and the Kushis left in 1963, something of a void was left—which Infinity filled. It was a macrobiotic and natural

foods warehouse, importer, and wholesale distribution company that was a prime source of food for many of the early macrobiotic and natural foods groups and students, including the Kushi Study Houses in Boston, Massachusetts. Infinity imported foods (including Mugi Miso by 1965) from Tokyo CI (Centre Ignoramus), which "guaranteed" the foods' quasi-medicinal effects. The food was of top quality. The owners (including Howard Rower and Jason Hammond) were involved with the Church of Scientology.

1971—Greenberg's Natural Foods in New York City and Mother Nature & Sons in New York City both advertise that they carry foods supplied by Infinity Food Co. which was located at 171 Duane Ave., New York City, New York 10013 [later 10005]. Phone: 212-925-2062. Infinity was located in the old produce district of New York, an area of town called Tribeca.

Bruce Macdonald (1992) remembers that for a while, in the late 1960s, Erewhon was Infinity's largest customer, even though Infinity was always a relatively small company. As Howard Rower moved up in the Scientology hierarchy, he gradually lost interest in Infinity. He married someone who was very wealthy, soon got in the "fast lane," was traveling to Europe, etc. Bruce doubts that the decline of Infinity was attributable to Erewhon in any way. Bruce thinks Infinity went out of business in about 1970 or 1971.

467. *Hartford Courant (Connecticut)*. 1966. Food Associated to hold meeting at Rocky Neck. April 10. p. 19A.

• **Summary:** A picnic meeting of the Connecticut Natural Food Associates will take place next Sunday at 12:30 p.m. at Rocky Neck State Park Pavilion. Those attending are asked to bring picnic lunches; raw milk will be served. “Natural Food Associates is a non-profit organization dedicated to the preservation of soil, water and health.”

Dr. Richard E. Goodwin, of the botany department at Connecticut College, will speak about gypsy moth control. Mr. and Mrs. Frederick W. Roberts, of West Hartford, will discuss “Nature’s Body Builders” and “Vitamin E and Your Heart.”

468. *SoyaScan Notes*. 1966. Chronology of Erewhon. Renamed Erewhon Trading Co. in 1967. 12 Dec. 1991. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1966 April 9—Erewhon opens as a small (10- by 20-foot) macrobiotic and natural foods retail store at 303-B Newbury Street (below street level) in Boston. Aveline and Michio Kushi are the founders, but Aveline is the sole owner. Evan Root is the first retail store manager. The origin of the natural foods industry and movement in America can be traced to this date. Erewhon is the first store of its kind in America and it soon serves as a model for many other similar natural food stores across the nation. Erewhon sells several soyfoods, mainly miso and shoyu purchased from Howard Rower’s Infinity Foods or Japan Foods Corp., both in New York.

1967 Aug.—Paul Hawken takes over the management of Erewhon (one small retail store) from Evan Root. He changes the name to Erewhon Trading Co. (from simply “Erewhon”) and starts to expand the business.

1968 May—Paul Hawken incorporates Erewhon Trading Company. Paul later states that he and Aveline Kushi each own 50% of the stock. However Aveline Kushi and her attorney, Morris Kirsner, agree that they offered him 50% of the Erewhon stock shortly before he left for Japan (in March 1969) but he did not accept it. To this day (Feb. 1999) Aveline has no idea why Paul did not accept such a generous offer.

1968 June—Hawken establishes his first supplier of organically grown grains, Ted Whitmer, a wheat farmer in

Montana. By 1973 Erewhon had established and contracted with 57 farms in 35 states to provide the company directly with organically-grown foods.

1968 Aug.—Erewhon starts to import foods from Japan, initially from Muso Shokuhin, later by correspondence with Mr. Akiyoshi Kazama, who worked for an import/export company named Mitoku, which sold no food at the time. The initial orders contained red miso (made by Sendai Miso Shoyu Co.) and natural shoyu (made by Marushima).

1968 Nov.—On Thanksgiving day, Erewhon moves up and across the street to a much bigger and nicer location at 342 Newbury St. Paul had hired Bruce Macdonald, a carpenter, to remodel this store. The company now has 6 employees: Paul Hawken, Roger Hillyard, Bruce Macdonald, Bill Tara, Jim Docker, and Jean Allison. One day later, Bill Tara leaves to start a macrobiotic East West Center in Chicago. The original downstairs room is taken over by Tao Books, then Redwing Books. Tofu, curdled with calcium sulfate and made by a Chinese company in Boston, starts to be sold.

1969 March—Paul Hawken and Evan Root leave for Japan. Bruce Macdonald takes over as general manager of Erewhon. Paul stays in Japan for 9 months, arranging for individual packaging of products that were formerly imported in bulk, and finding new items for Erewhon to import. He visits suppliers, works with Mitoku and Muso, and studies Japanese language and culture.

1969 spring—Erewhon starts wholesaling foods, under the direction of Bruce Macdonald. Their first wholesale product is natural sesame oil.

1969 Aug.—Aveline Kushi moves to Los Angeles where her youngest son, Hisao, undergoes traditional Japanese bone massage therapy. In Los Angeles, she establishes the first macrobiotic study house at 7511 Franklin Ave. Bill Tara arrives about a month later to set up a retail store, Erewhon West, which opens on 8001 Beverly Blvd. in about September.

1969 Oct. (early)—Bruce Macdonald leaves for Los Angeles with his new bride, Maureen Traill, to run the new Erewhon West retail store there. Roger Hillyard takes over as general manager of Erewhon in Boston.

1970 Jan. 1—Erewhon’s earliest existing catalogue seen (wholesale and retail) lists 7 pages of natural food products—most of them imported from Japan. By March 1970 Erewhon lists 96 products in its catalog.

1970 July—Erewhon’s rapidly expanding distribution business moves into a large (20,000 square feet) fifth-floor leased brick warehouse at 33 Farnsworth St., on the docks in South Boston. *East West Journal* and Tao Books soon move to the same area.

1970 fall—Erewhon receives its first shipment of brown rice from the Lundberg brothers in Richvale, California; it is “unsprayed” but not organic. Chico-San has exclusive rights to all Lundberg’s organic brown rice.

1971 Jan.–*East West Journal* begins publication in Boston, Massachusetts.

1971–Erewhon Trading Company of Los Angeles has expanded and is now at 8001 and 8003 Beverly Blvd., Los Angeles, CA 90048.

1971 March–Roger Hillyard is replaced as general manager of Erewhon–Boston.

1971 March–Paul Hawken finalizes a contract with Carl Garrich of Lone Pine, Arkansas, to grow short-grain brown rice organically and exclusively for Erewhon. 330 acres are planted in April. That fall, Erewhon starts to retail and wholesale its first organic brown rice.

1971 May–Bruce Macdonald leaves Erewhon in a dispute over ownership of the company.

1972–John W. Deming Jr. plans to invest \$150,000 in Erewhon in exchange for stock, and Advest Co. plans to conduct Erewhon's first public stock offering—but neither happens after Michio Kushi nixes the plans.

1972 fall–Erewhon first buys organic brown rice from Lundberg brothers of California; a fire that destroyed Chico-San's plant in early Aug. 1972 rendered their exclusive contract with the Lundbergs null and void.

1973 Aug.–Paul Hawken writes a critical history of Erewhon and its problems. Published in *East West Journal* it is titled “Erewhon: A Biography. The View Within.” Shortly thereafter Paul Hawken resigns, saying that running Erewhon was a nightmare. Some say he sells his 25% ownership back to the company, which was subsequently managed by Bill Garrison, Tyler Smith, Jeff Flasher, and Tom Williams, in that sequence.

1974 July to 1977–Erewhon becomes the exclusive representative and agent for both the Muso and Mitoku companies in North America. The labels of all products imported from these companies must bear the Erewhon label.

Starting in late 1969 a number of macrobiotic and/or natural foods companies grew into distributors following the models established by and with help from Erewhon: Eden Organic Foods in Ann Arbor (started by Bill Bolduc on 4 Nov. 1969), Food for Life (started in 1970 by Bill Tara as a retail store on the 10th floor of a Chicago office building), Janus in Seattle, Washington (Jan. 1972, by George Gearhart and Blake Rankin, formerly of Spiral Foods), Essene in Philadelphia, Pennsylvania (by Feb. 1971), Laurelbrook in Maryland (Aug. 1971), Ceres in Colorado Springs (1973), and The Well in San Jose, California (1973, by Phil Parenti). These macrobiotic distributors had a strong influence on the numerous other non-macrobiotic natural food distributors, such as Lifestream (started in 1969 as a retail store), Westbrae in Berkeley, California (wholesale distribution: July 1970, by Bob Gerner; retail: Feb. 1971, Gerner). Shadowfax (New York, 1971), and Tree of Life in St. Augustine, Florida (retail: May 1971; wholesale distribution: Feb. 1972, by Irwin Carasso).

1975 Aug. 1–Erewhon sells all of its West Coast

Division in California (Los Angeles and Culver City) to John Fountain and John Deming for cash and notes, realizing a net gain of \$86,872.

1977 March 23–Erewhon sues natural foods retail stores in several states for boycotting Erewhon for selling to co-ops. Erewhon eventually wins the case, but its legal bills are something like \$250,000. There was not enough money to pay these fees and Erewhon never recovered.

1978 (early)–Erewhon moves into a huge warehouse and office complex at 3 East St., Cambridge, Massachusetts 02141.

1979 April 27–The workers in Erewhon's production, trucking, shipping, and kitchen departments vote 42-19 to form a union affiliated with Local 925, the Service Employees International Union.

1979–John Deming steps in to liquidate all the assets of financially failing Erewhon–Los Angeles. Tom DeSilva, Tyler Smith, and Jeff Flasher buy the retail store at 8001 Beverly Blvd.

1981 Feb.–Erewhon currently lists 4,000 products in its catalog—in its bid to become a full-line distributor. It services 2,000 customers and provides jobs for 175 people in its warehouse and retail stores.

1981 Nov. 10–Erewhon files for bankruptcy protection under Chapter 11 of the Federal Bankruptcy Act because of debts totaling \$4.3 million. At this time, Aveline Kushi is the sole owner of Erewhon. Stow Mills picked up the lion's share of the Erewhon business, with Westbrae also getting a significant part of it.

1982 May–A \$1.3 million offer by Ronald Rossetti, president of Nature Food Centres, is accepted as the reorganization plan in the Erewhon, Inc. bankruptcy. Rossetti purchased Erewhon as an individual; it was never part of Nature Food Centres.

1986–Erewhon acquires U.S. Mills, which had been founded in 1908. In effect U.S. Mills and Erewhon were merged, and U.S. Mills was chosen as the corporate name, largely since it had been around longer.

1988 May–Chuck Verde (who was the president of Erewhon) and Cynthia Davis acquired the U.S. Mills / Erewhon business. They became the main joint shareholders. Address: 303-B Newbury St., Boston, Massachusetts.

10. I fast 7 to 10 days four times a year. 11. How to break a seven-day fast. 12. I do not believe in the enema during the fast. 13. Your tongue never lies [it is a mirror of your mucus membrane and of your health]. 14. Just grin and bear it. 15. Defeating mucus by rational fasting. 16. Fasting helps pounds melt away. 17. How to gain weight by a scientific fasting program. 18. Fight the sniffles and winter miseries with fasting. 19. Outwitting premature aging with fasting. 20. Fasting to keep arteries young.

You have nine doctors at your command: 21. Doctor sunshine. 22. Doctor fresh air. 23. Doctor pure water. 24. Doctor good natural food. 25. Doctor fasting. 26. Doctor exercise. 27. Doctor rest. 28. Doctor good posture. 29. Doctor human mind. 30. The science of eating for superior health. 31. Nature knows no mercy. 32. Food for thought.

Note 2. This is the earliest document seen (April 2010) in which Paul Bragg claims to have an “N.D.” [doctor of naturopathy] degree or a “Ph.T.” degree, or to be a “Life extension specialist.” When did he get these degrees and from what school or schools? When and how did Bragg become a “Life extension specialist”? Paul says that he was raised in Virginia, mostly on fried food (p. 28). Note: Actually, he was born in Indiana.

Paul has a sister named Louise, who lived at their home in Virginia. She was teaching high school, but was thin and often looked run-down and emaciated; after work she often felt exhausted. During the summers he helped her to gain weight by fasting and exercise. She became beautiful and charming, married and had a happy family with children (p. 102-03).

In Chapter 30 are lists of recommended foods. These include Legumes—Soya beans (p. 179), and vegetable oils—Soya oil (p. 180). Lean meats and unsalted fish are okay to eat 2-3 times a week as a protein source.

In Chapter 32, “Food for Thought,” are many superlatives. “The Best Play—Work. The Greatest Stumbling Block—Egotism.” “The Most Dangerous Man—The Liar.”

On the inside back cover is a list of 18 health books by Bragg, with the price of each. Most sell for \$1-2 and can be ordered from Health Science.

The back cover is about the author. “Paul C. Bragg, N.D., Ph.T. Life extension specialist. Physical therapist, Natural nutrition and health culture pioneer. Author. Lecturer. Dietary advisor to the stars of screen, stage, TV. Originator of health food stores.” “Here is a man—over three score and ten years of age [i.e., over age 70. True; he was born in Feb. 1895]—who still climbs mountains, plays vigorous tennis, swims for miles, and can out-walk, out-run and out-Live men who are half his age!

“Crippled by TB when in his teens, Bragg developed his own eating, breathing and exercise program to rebuild his diseased body into a citadel of glowing, radiant health and strength.

“Bragg teamed with Bernarr Macfadden to introduce America to the benefits of Physical Culture at the turn of the century. He was one of the first editors of the *Physical Culture Magazine*. He worked with Luther Burbank in California to produce healthful, organically grown fruits and vegetables. He opened the first Health Food Store in Los Angeles, California. Now over 2,500 such stores are open for business in almost every urban community in America.

“Bragg was the personal consultant on diet and exercise to Douglas Fairbanks, Sr., Tom Mix, Rudolph Valentino, Ethyl Barrymore, Ruth Roland and many other public performers. He has counseled kings, queens, politicians, sportsmen and statesmen.”

Photos show: (1) Paul Bragg, smiling and looking healthy (cover and p. 62). (2) Bernarr Macfadden and Paul Bragg, both looking strong, happy and healthy, standing side by side with their arms around each others shoulders, bare from the waist up. Of the two, Bragg looks younger and stronger (p. 4). (3) Paul Bragg standing behind a table of fruits. He is a “Specialist in nutrition and life extension” (p. 41). (4) Paul Bragg doing a head-stand, fully clothed and wearing shoes. “Bragg’s daughter, Patricia, hold’s father’s shirt so he can smile at the camera. Bragg stands on his head for five minutes every morning and five minutes every night” (p. 74). (5) Patricia Bragg (p. 83, 173). (6) Paul riding a horse, playing polo. “Bragg—Active sportsman today at 85 years young” (p. 108). Note 1. This is the earliest document seen (April 2010) in which Paul Bragg exaggerates his age. He says he is age 85. He was born on 6 Feb. 1895. Therefore in 1966 he would be about 71 years old.

(7) Paul Bragg and Bernarr Macfadden leading a thousand happy hikers, summer 1932, on the trail to Mt. Hollywood, California (p. 121). (8) Paul, bare from the waist up, with large chest and his “powerful body” (p. 126). (9) Paul, dressed in a white clinicians outfit, pointing to the colon in a transparent cross section of the human body. “Bragg shows danger area where poisons collect” (p. 146). (9) Bragg in a swim suit, laughing happily, riding

an aquaplane behind a speedboat. “Bragg—An active athlete—Loves all sports” (p. 153). (10) Bragg dressed up in a sheriff’s outfit, wearing a star, standing beside an old tree with a hanging noose rope, holding a pistol, which he is pointing at a sign that reads: “Wanted for Murder, Sheriff Bragg.” For example: “Killer—Saturated fat. Choker—Hydrogenated fat. Clogger—Salt. Deadeye—Devalitized food.” etc. (p. 172). Address: N.D., Ph.T., Life Extension Specialist, Box 310, Burbank, California 91503.

472. Photograph of Evan Root at the first Erewhon retail store at 303B Newbury St. in Boston, Massachusetts. 1966.
 • **Summary:** Evan Root wrote in Nov. 2010: This “one is me, circa 1966, at 303-B Newbury St., Boston, below street level, at the corner of Hereford Street, wearing a Japanese clerk’s coat, something like what is called a Happi Coat, hand made by Aveline [Kushi]. This picture was in Lilly Kushi’s marvelous photo album, which you may well have had a chance to see. She took it out and gave it to me near the end of her life.

“There are, to my knowledge, very few photo archives of that first little Erewhon store. You can’t see anything of the store or the shelves in the picture. I am sitting at the check-out desk, upon which there is a decorative bouquet of wheat grain in a vase.

“This store defied all business reason as so few people came through the doors to shop. It was principally a place where people came to talk and wonder about our place in

the universe, and how macrobiotic practice could align us with that order. It took about one year before we had our first \$100 day, and that was worth a celebration.”

Question: In those early days, which important macrobiotic addresses were in Boston and which were in Brookline (which was enclosed on three sides by Boston)?

Evan: “Before I left for Japan (spring 1969), in Brookline there was the Kushi’s house at 216 Gardner Road. This is the first house the Kushis rented when they moved from Wellesley in March of 1966 and was their home along with as many other people as could fit in, myself included. There were several apartments where groups of mb (macrobiotic) students lived, as well. Sometime later (I can’t recall the timing here) 29 University Road opened up as the first ‘study house’ outside of the Kushi’s home. I think another one opened on Washington Street before I left, though my memory is hazy on just when. These first ones were rented by Aveline and were all under the Kushi umbrella with ‘house leaders’ usually a couple whose studies of Macrobiotics qualified them as ‘senior students.’ There may have been one or two others.

“By the time I returned, there were numerous ‘study houses,’ more in Brookline and in various other locations such as Brighton, Cambridge, Boston, Jamaica Plain, and Wakefield as well. At this time, maybe 6 or 7 of them were in the Kushi study house system, and many were independent.

“Before I left for Japan, the important Boston addresses were: 303B Newbury Street (first as Erewhon retail store, then as Tao Books), 342 Newbury Street (Erewhon retail), 272A Newbury Street, and The Arlington Street Church, a Unitarian Universalist church at 351 Boylston Street where Michio’s lectures and large community events were held. I could say (only somewhat facetiously) that the Half Shell, a seafood restaurant on Boylston Street was important as well, as it was very near Erewhon, and served as a place for many a meeting with Michio and fish dinner for the working crew.

“When I returned from Japan, arriving in Boston in late October of 1972, added to the list above, the Seventh Inn restaurant, an outgrowth of Sanae was operating near the corner of Boylston and Arlington Street. Aveline had rented space in the building next to the Arlington Street Church on Boylston St. and had installed a Noh Stage there. This was referred to as the Noh Center, and most of the downtown classes were held there at this time. Erewhon’s warehouse at 33 Farnsworth Street in Boston had, of course, been up and running for some time.

“In an eight-block stretch, running from Erewhon on Newbury Street to Seventh Inn on Boylston, there were 5 (6 counting the Church) active Macrobiotic “hot spots.” During any given walk down Newbury or Boylston Street, a macrobiotic person of those days would encounter many friends just by virtue of walking down the street.”

Note: Evan helped the Kushis open the pioneering natural / macrobiotic food store, Erewhon, and was it’s first

manager. This first Erewhon retail store was located at 303B Newbury Street in Boston and opened for business on 9 April 1966. The business was registered in Aveline's name.

Evan continues: "Interesting side note: During a certain period of time, not too long after we opened the retail store, when the U.S. government was attempting to have the Kushis deported, the registration of the business was transferred to my name. For almost a year, I was the straw owner. After some time, the Kushis prevailed, and the ownership went back to Aveline.

"You may ask, why do I prefer the wording 'registered' rather than 'owned'? This is because questions, and even thoughts about ownership did not arise until later. The store was opened to serve a need, and the Kushis acted more like the custodians of a communal trust or mission. In essence, I believe they tried to act in this manner throughout Erewhon's existence, although many factors came into play to muddy that water."

This photo was sent by Evan Root to Patricia Smith (of Mill Valley, California) and by Patricia to Soyinfo Center (Nov. 2010).

473. Photograph of members of the San Francisco Calliope Co. 1966. San Francisco, California.

• **Summary:** This photograph appeared in *I.D.* magazine's *Band Book* (pages 16-17, unpaginated). Wally Gorell, who sent this photo, writes: "Deacon is at the left wearing an Indian block-printed cotton bed cover (his face is largely out of frame). I'm wearing the Liberty print shirt with the bow tie, Jean Allison is at the center rear wearing white glasses. Georgeanne Coffee (later known as Annapurna Broffman) is in front, just right of the fold, wearing a blouse with a white collar. Elias Romero, who invented the liquid light projections emblematic of the '60s, is in the rear, bearded [3rd person to right of centerfold]. Bill Tara is at the extreme right of the frame. Even at the time I didn't know most of the others who appear in the photograph."

Context (from Wally): Most or all people in this photo were members of San Francisco Calliope Co., which was a theater company that ended up putting more energy into producing rock and roll dances than to mounting theater productions. They found they could make money and have fun more easily by producing rock dances. The company was founded in late 1965 or early 1966 as the Firehouse Repertory Company. It changed its name to the San Francisco Calliope Company after we got kicked out of the firehouse on 2 April 1966. (Calliope was the eldest of the Muses, the goddesses of music, song and dance. She was the goddess of epic poetry and of eloquence.) The company worked with various San Francisco bands, including The Charlatans, the Sopwith Camel, Jefferson Airplane, Big Brother and the Holding Company, Quicksilver Messenger Service, and the Grateful Dead. The group was quite stable for its roughly two years of existence; few people came or

went. The members lived in many different places in San Francisco—rather than all in one place. Wally was one of three actors. He does not think he created the group's logo in the lower left corner of the photo, but he might have. Jean Allison was the only actress in the company. Bill Tara was the director. Elias Romero did the lights for the rock dances. So far as Wally knows, Paul Hawken continued his involvement under both company names. Paul probably coproduced some of the dance events with Bill Tara. To support themselves financially, Wally worked at the post office and Bill Tara earned money from producing the dances. Wally does not know about the others. Wally does not know how the money from the dances was divided, but the basic idea was that it would be used for future theater productions. The company lasted until (I believe) autumn of 1967.

Paul Hawken comments by e-mail (28 March 2011): "Who do you think took the picture? -: I took it. I was there at Calliope and yes, we worked together, Wally, Jean, Bill. It went on after the Firehouse, George [Ebey, not pictured] left early as I remember. And once it moved to Harriet St. it was pretty much Bill, Michael, Jean, Wally for awhile and myself in Calliope."

Bill Tara comments by e-mail (28 March 2011): "The reason that Paul is not in the picture is that he took it—Paul was a very talented photographer. Back row left in sunglasses Steve Tortoreci (musician), very back David Oliver (artist) (old friends of mine from Santa Cruz)—Next to me on far right Ken Connolly (Wally identifies occupation-street name 'Goldfinger' and says he was a drug dealer), Elias Romero is the bearded guy in the back row two to the right of Jean, guy kneeling to my right is Michael Layton (Actor). I cannot remember any of the other names. People came and went. Wally, Jean, George (not pictured) and I were the only holdovers from the Firehouse.

"The Firehouse opened in February 1966 and was open till April when the property was sold the last event was 'The Wreckers Ball', there were six events in all. Wally, Deacon, George, Jean and I were the only actors (I was also the Director) we were planning on producing several plays, I had rights to 'The Fire Bugs' and 'Endgame'. The sale of the place threw things off, Paul was interested in technical work such as lighting. We were the core. Michael Lawton and Goldfinger were also involved. Once we moved to the warehouse (summer of 1966 we started work again and got into producing concerts at California Hall with the Grateful Dead et al). Paul was designing Light Shows. The last event by the Calliope Company (rock wise) was our Halloween Dance opposite the Kesey Acid Test Graduation. We then had one theatre event at the Straight Theatre, the premier of Michael McClure's 'Blossom.' After Xmas that year I left for Boston." Address: San Francisco, California.

474. Arrowhead Mills. 1966? Arrowhead Mills (Ad). *Modern Nutrition* 19(19-21): Classified ads. *

• **Summary:** “Deaf Smith County organically grown wheat from our famous mineral rich soils \$7.50/cwt F.O.B. Arrowhead Mills, Box 866, Hereford, Texas.

Note: This periodical was published monthly from 1943 to 1947, 1952 to June 1968 by the American Academy of Applied Nutrition / American Nutrition Society (Pasadena, California). Address: Box 866, Hereford, Texas.

475. *Order of the Universe*. 1967. Serial/periodical. Order of the Universe Publications, Boston, Massachusetts. Editor: Jim Ledbetter. Frequency: Monthly.

• **Summary:** The initial subtitle of this magazine is: “The Way of Life in the Age of Humanity.” By vol. 1, no. 6 (about Oct. 1967) it has expanded to: “The Unifying Principle and the Way of Life in the Age of Humanity.”

Soyfoods Center owns (gifts of Evan Root in Oct. 2005) complete, original / real issues of the following: May 1967, July 1967, vol. 1, no. 4, vol. 1, no. 6, vol. 1, no. 7 (these latter three are undated). Also color photocopies of the covers of vol. 1, no. 2 (where does it fit?), and June 1967.

A clue as to the date of the first issue is found on the inside back cover of vol. 1, no. 2. Under “Editor’s Notes,” by Jim Ledbetter we read: The “first issue was printed in May of this year.” That year is not given, but was probably 1967.

Talk with Evan Root. 2005. Oct. 29. The first issue of *The Order of the Universe* was published in May 1967, and was dated. It has a plain (uncolored) cover, reflecting the shortage of money. The list of “Useful Names and Addresses” on the last page is shorter than in subsequent issues, again showing that it was the first. Address: Box 203 Prudential Center Station, Boston, Massachusetts 02199.

476. Rodale, J.I. 1967. Why I started *Organic Gardening*. *Organic Gardening and Farming* 14(5):30-34. May.

• **Summary:** Long subtitle: “A quarter of a century later, Editor J.I. Rodale recalls the events that launched the organic idea in America—and began his own exciting crusade.” He also points to the challenges of the future.

Worldwide, the organic movement had its inception in the experiments and research of Sir Albert Howard in India, over a period of 40 years, culminating in the publication of his ideas in 1940, Howard was a British government agronomist who was a very perceptive observer.

Howard’s basic idea was to endow the plant with the strength it needed to resist disease. He believed that chemical fertilizers were destroying the life and vitality of topsoil, giving a sort of “shot in the arm” resulting in a momentary spurt in yield. But in the longer term they brought about conditions that actually invited pests and disease.

He worked on a 75-acre experimental farm, carefully studied the methods of local Indian farmers, and observed how careful they were that all animal and plant residues (even weeds) were returned to the soil. Nature’s balance sheet was of great importance.

Note: A marvelous story. Unfortunately the writer omits many important dates. When did he first read about Sir Albert Howard’s work in a British health magazine? When did he buy a 60-acre farm halfway between Allentown and Emmaus, Pennsylvania, so he could try out Howard’s ideas for himself—and provide healthy food for his family?

“Among our readers, thousands upon thousands began to raise their own vegetables organically and many of them have written to us expressing the improvement of their health in glowing words.”

477. Rodale, Robert. 1967. The next 25 years: With the editor. *Organic Gardening and Farming* 14(5):25-29. May.

• **Summary:** “This May marks the 25th anniversary of the publication of *Organic Gardening and Farming*.”

The conditions which caused my father, J.I. Rodale, to start *Organic Gardening and Farming* back in 1942 still exist today. The humus in farm soil is still gradually being depleted by short-sighted farming methods. Much of the organic matter produced on our farms is still being wasted, through the destruction or burying of garbage. Too many chemicals are still being used in the production and processing of food crops. The health quality of our food is not as high as it should be. People are still too far separated, both physically and spiritually, from the land which supports them.”

“Our primary function as intelligent gardeners and farmers is to care for the soil in such fashion that we can pass it on to future generations in at least as good condition as we received it, or even better.”

Another basic challenge is to establish scientifically “the true relationship between the health of the soil and the health of the people being supported by that soil.”

An aerial photo shows the Rodale Farm; in 1960 more than 500 people came to an “open house” there.

The last two pages of this article show copies of the covers of various important issues (including the first issue, titled *Organic Farming and Gardening*, May 1942). The magazine apparently now has about 375,000 subscribers.

478. Chico-San Inc. 1967. Chico-San Inc.—Unique foods: Retail price list. P.O. Box 1004, Chico, California. 2 p. July 15. 35 cm.

• **Summary:** This single-sheet catalog and price list, printed front and back with dark brown ink on pink paper (8½ by 14 inches), begins:

“Dear retail customer: We encourage you to buy Chico-San products through your local health food store. When you buy directly from Chico-San you must add shipping costs to the cost of food.” Includes the following interesting items. Those followed by an asterisk (*) are marked “OEI” meaning “Our Exclusive Import.”

Specialties: Rice cakes, buckwheat cakes, millet cakes, wheat cakes, roasted rice, rice crackers*. Condiments: Tekka

CHICO-SAN INC. - Unique Foods

P.O. Box 1004 • Chico, California

RETAIL PRICE LIST

Dear Retail Customer:

We encourage you to buy Chico-San products through your local health food store. When you buy directly from Chico-San you must add shipping costs to the cost of food. Of course to meet your needs in areas where we have no retail outlets or where retail outlets are not meeting your needs properly, we want to bring you the service you deserve. We shall be pleased to send you the names of local retailers of Chico-San products. We are seeking the best means to serve you.

Items marked OEI - OUR EXCLUSIVE IMPORT - Through rigorous inspection, we can attest to the purity of these foods organic grains and complete absence of all chemical additives.

[miso], Tamari soy sauce*, soybean puree (miso)*, sesame salt, sesame spread, sesame butter, kuzu arrowroot*, salt plums, salt, sesame oil. Crude salt (1 lb to 10 lb). Cereals: Rice cream. Rice: Brown short grain (2 lb to 100 lb). Sesame seeds: White-brown. Black. Beverages: Ohsawa twig tea*, 16 herb tea*, Grain beverage–Koko, Grain beverage–Yano, Lotus root tea*, green tea. Noodles. Beans: Azuki red* (\$1.72/lb), Imported red, black beans [soy] (\$1.37/lb).

Note 1. This is the earliest English-language document seen (March 2009) that uses the term “Soybean Puree” to refer to miso. During the next decade, many macrobiotic publications referred to miso as a “Soybean puree.”

Sea vegetables: Shredded hijiki, kombu*, wakame–curly*, nori–thin sheet, kanten–sea veg gelatin. Dried foods: Lotus root, shrimp, dried fish, small fish–chirimen, tazukuri, shaved bonito [sic, bonito], dried radish [daikon], gourd strips [kampyo, kanpyo], mushrooms. Grain: Barley, buckwheat groats, corn meal, cracked wheat, millet, oat groats & oat meal, rolled oats, rye, wheat–hard red. Flour: One from each grain. Tooth powder jar. Cosmetics. Utensils.

Note 2. This is the earliest document seen (July 2017) that mentions Chico-San. It is also the earliest known Chico-San catalog and price list, and the earliest known Chico-San catalog and price that mentions “Rice cakes.”

Note 3. This is the earliest document seen (Sept. 2002) concerning the use of miso in second generation products (tekka).

Note 4. This is the earliest English-language document seen (Dec. 2006) that uses the term “salt plums” to refer umeboshi salt plums.

Note 5. This is the earliest English-language document seen (Jan. 2020) that mentions seitan, which it calls “seitan.” The entry for “Seitan” (actually misspelled as “Sietan”) is different from all other entries in this catalog, since no weight, no price, and no explanation is given—as if Chico-San has ordered the product, but it has not yet arrived. Moreover, no “OEI” (“Our exclusive import”) appears after the word “Sietan.” Address: P.O. Box 1004, Chico, California.

479. **Product Name:** Tekka [miso].

Manufacturer’s Name: Chico-San Inc. (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1967 July.

Ingredients: Incl. miso.

How Stored: Shelf stable.

New Product–Documentation: Unique foods: Retail price list. 1967. July. Tekka [miso] is one of the condiments listed in this catalog. Spiral Foods Inc. 1971. Price list of macrobiotic foods. Condiments: “Tekka (A traditional flavoring prepared from carrot, burdock, ginger, lotus root, Soybean Puree {Miso}, and sesame oil),...” Note: This is the earliest commercial product seen (Jan. 2009) in which miso

is used as an ingredient.

480. [Ledbetter, Jim]. 1967. Evan Root. *Order of the Universe* (Boston, Massachusetts). July. Inside back cover.
• **Summary:** This is “the first in a series of profiles of young people who are studying the Unifying Principle under the guidance of Michio Kushi in order to deepen their own understanding and to prepare themselves to become leaders and teachers of others.

“Evan is, in many ways, the dean of young Boston friends. For the past year he has been proprietor of Erewhon, where some food supplies are obtainable, and hundreds of people have become grateful to him for his attendance... His manner is quiet and thoughtful, punctuated by occasional bursts of hilarity which are apt to be accompanied by impromptu monologues or imitations.”

Evan was born on 12 June 1943 in New York. His earlier ambition was to become a director in the theater or the cinema. “A few weeks ago, Evan ‘graduated’ from Erewhon and began to make plans for the future. At present, he is considering a lecture tour, a restaurant, and perhaps supplementing his studies with Haikoryu jujitsu.”

Note: This is the earliest document seen (March 2020) that mentions Erewhon.

Talk with Evan Root. 1992. April 27. He notes that this “profile” was written by Jim Ledbetter, editor of this magazine, and the cartoon of Evan’s head was drawn by Michio Kushi. Address: Boston, Massachusetts.

481. *Hartford Courant* (Connecticut). 1967. Free for the asking. Sept. 16. p. 8.

• **Summary:** Includes: *Natural Food and Farming* magazine, published by Natural Food Associates, a national organization established to help you get the kind of food you must have to maintain good health.

For a free sample of this monthly magazine write: *Natural Food and Farming* magazine, Dept. 1F, Atlanta, Texas 75551.

482. McCay, Jeanette B. 1967. Re: Biography and obituary of Clive M. McCay–1898-1967. Letter to Ralph for Clive McCay’s memorial service at Cornell, Sept. 23. 13 p. Typed, with signature.

• **Summary:** This long, interesting typewritten letter is written to “Ralph,” whose surname is unknown. Later it formed the solid foundation of “Clive Maine McCay (1893-1967): A biographical sketch,” by J.K. Loosli, published in the prestigious *Journal of Nutrition* (Vol. 103, No. 1, Jan. 1973).

“During his first year in a study on fish blood and its relation to water pollution he wrote: “The mass of men (fail) to realize that their welfare is closely interwoven with the condition of everything that lives.”

“Clive was interested in everything that lives and during

his more than 40 years of scientific work he made studies of: Cold blooded animals (fish, eels, turtles), farm animals (such as dairy cows, calves, bulls, goat, sheep, pigs), laboratory animals (such as white rats, cotton rats, mice, guinea pigs, hamsters, rabbits, and monkeys), fur bearing animals (chinchillas, mink), insects (such as clothes moths, bean weevils, flour beetles, cockroaches), dogs (Cairn terriers, beagles, danes, dalmations, and old dogs over ten years of age)—and finally man [humans].

Some quotations of his: “A century ago, Sylvester Graham stumped the nation in attempts to impress upon housewives the importance of high-quality bread to their families’ health, Today, poor Sylvester would probably roll his lean bones over in his long grave if he realized how little attention the average housewife pays to the nutritive value of the bread she buys.”

“In addition to bread, Clive felt that other foods could also be improved. One might find him almost any day entertaining house guests... making chop suey with soy beans that he had sprouted. In the laboratory he developed a large scale bean sprouter [see illustration], and for a while he was taking down bushels of sprouted soy beans to sell at the Co-op.”

“Human experience has long shown the value of temperance in the consumption of food. Luigi Cornaro (1464-1655) stressed this in the series of essays written in the late years of his life. Francis Bacon stated: ‘It seems to be approved by experience that a spare diet, and almost a pythagorical,—such as is either prescribed by the strict rules of a monastical life, or practiced by hermits, which have necessity and poverty for this rule,—rendereth a man long-lived.’ Such statements as these comprise the content of many of the works written about diets for the aged.”

1951 in Empire State Jersey Journal: “Every pound of sugar that goes into an American home pushes off the table more than five pounds of wholesome natural foods such as milk, potatoes, and apples.”

In a 1950 hearing on Poisonous Chemicals in Foods before a Congressional Committee he stated: “We have made numerous studies of the effect of these cola beverages upon the teeth of rats, dogs and monkeys... We have published data indicating that the molar teeth of rats are dissolved down to the gum line if the rats are well fed but given nothing to drink except cola beverage for a period of six months.”

In 1953, in the Introduction to a paper on “Diet as a Factor in Aging he wrote: “The object of nutrition research is to discover diets that will preserve the best possible health and the greatest productivity throughout the life of man and his domestic animals. Research upon aging is not concerned with protracting the worthless years at the end of life when a senile body and a deteriorated brain make living nothing but a heavy burden.”

“Almost at the beginning of his research life, Clive began the famous series of studies on prolonging the span

of life through retardation of growth.” The following are quotations from some of his papers:

1928—in a paper titled “The nutritional requirements and growth rates brook trout”—“The growth of the animal body has occupied the attentions of students of natural science as long as we can have historical records. It remains the outstanding concern of all those engaged in animal industry, whether they be rearing swine or trout.” Yet is life span not as important as growth?

“Although Clive has been a loyal and enthusiastic Unitarian for years, he developed a great interest and respect for the dietary practices and teaching of the Seventh-Day Adventists and Jehovah’s Witnesses. This also carried over to other health groups such as Friends of the Land, Natural Food Associates and those that some of his academic friends called faddists or fringe fanatics. He spent a good deal of time writing and speaking to these groups, and was always ready to welcome them in his home or laboratory.

“In general he felt that their ideas were correct and he admired their sincerity and the tenacity in actually practicing what they believed to be good nutrition. He felt that they stand as a block against the steady erosion and deterioration of natural foods by the tampering of the food industries eager to make dollars without respect to nutritive value.

“He thought that learning about food and its health values was an excellent hobby for older people, and that gardening was a sure way to obtain pure and wholesome diets. ‘... gardens are stable investments for good nutrition and health. On our small home place we even produce our own meat by raising an occasional calf and keeping a small flock of sheep. We also produce our own apples, cherries, plums, strawberries, gooseberries and currants... plus vegetables.

“There was no sharp division between Clive’s professional life and his recreation and home life. His friends were his fellow workers and other scientists from near and far... He must have hiked hundreds of miles with Dr. Maynard and Dr. Sumner.”

“In the garden, he would include plants in which he happened to be interested at the moment such as soybeans,...”

Reading was Clive’s great delight, and if reading maketh a full man, he was very full indeed. Clive’s happiest hours at Cornell were spent in the libraries. He loved to study old book catalogs and browse in second hand book stores to find treasures for his own library or for the University.”

A long and very interesting section concerns four reasons for studying the history of any science. Plus several paragraphs of additional thoughts on that subject.

“When Clive was 22 years old [ca. 1920] and an instructor in Chemistry at Texas A. and M. College, he filled out an “Individual Analysis Card,” which I just found among his papers. I am amazed to see how well he knew his own characteristics at this age. He checked for himself:

Common sense; industry, persistence, moral courage, conscientiousness, self control and self respect—attributes that carried through his whole life.

“Likewise there were the following traits. Regularity in habits, purpose and coordination in work, ability to profit [learn] from experience, breadth of view, given to facts, lives at high tension.

“These are the same traits and characteristics that I would have checked after knowing him these 45 years. Perhaps most revealing of his personality was his answer to the questions of how he reacted to success and adversity. To the first he wrote ‘elation,’ to the second ‘renewed energy.’” Address: 39 Lakeview Lane, Englewood, Florida.

483. *Health Food Business Review*. 1967. Here’s a health food so old—it’s new. Sept. p. 27, 28, 43.

• **Summary:** Tamari soy sauce has a history that is centuries old. This article discusses it from the viewpoint of macrobiotics and Chico-San. “Only Chico-San produces this product by the old and patient (18 months) method which is 100% natural.”

484. de Langre, Jacques. 1967. Editor’s page: Macrobiotics is a free passport to the world and a carte blanche to new friends everywhere. *Macrobiotic Monthly (The) (Los Angeles, California)* 7(2):2. Sept/Oct.

• **Summary:** “The previous issue of the magazine (Vol. VII, No. 2) mentioned in the editors page, the surging activity and rapidly increasing interest in Macrobiotics. This was reflected in the letters, phone calls and visits to the Foundation in Los Angeles.

“My wife, Yvette [de Langre], and I, having traveled to Portland and Denver last month, will confirm this from the field. Our visit to one of the attractive health food stores in Portland and a casual conversation with the manager triggered a series of phone calls from three Macrobiotic persons, all beginners and all eager to study further.

“One of the callers, one of the town’s doctor of optometry, invited us to conduct a discussion group on the following Thursday. No less than forty people assembled there that night and the questions were most interesting.

“In Denver, the owner of an organic produce cooperative with a good understanding of the principle is also most eager to learn himself and report much interest among his patrons; he feels that the need is great for Macrobiotics and the necessity of a study group being organized in Denver (could be that some of the advanced students of G. Ohsawa in Golden, Colorado would offer their services?)

“Barbara Grace writes from Paris, where she now resides, and her latest letters show a radical improvement in clearness of thought and purpose. She has found Marshall a man transmuted by the application of the principle.

“We are eagerly awaiting the return from Chico of one of our most promising editor-idea man: Lawrence. A phone

conversation with Mitio [Michio Kushi] assures us that he will visit Los Angeles and lecture in the near future.

“How fortunate to be able to walk in the Zen Restaurant and meet so many friendly faces, have such good food served by smiling Toyo, soon to be Mrs. Furukawa. We know of New York with two restaurants and Paris with four: GuenMai, Yamato, Zen and “A la Bonne View,” we would like to list all Macrobiotic restaurants around the world. Please keep us informed.

“Sad News: We are greatly saddened by the death of our Ohsawa Foundation President, Lou Oles, in Japan on the 20th of August. His death was caused by heart failure.

“All of Mr. Oles’ efforts and activity were directed to the dissemination of Macrobiotic knowledge. The English speaking (and soon the Spanish speaking) countries owe to him all of the books now available at the Foundation. plus many more which he had managed to get ready and that we pledge to finish as soon as possible.

“Because of his dedicated work, and the help of his wife, Shayne, we are fortunate in having here in Los Angeles one of the best centers and library, organized and built by a man, unaided.

“His devotion to the cause cost him his life, for he would not stop long enough to recognize or take care of his long-standing illness.

“News from B.C. The Yoga Vendanta Book Store in downtown Vancouver B.C. has recently won their battle with import laws so they can import products from Chico-San.

“They have a Macrobiotic group of 150 people and meet regularly in the Yoga Vendanta Book Store

“News from Mexico: From Mexico City and points south, Warren Stagg brings news of much Macrobiotic activity down there, with two restaurants serving macrobiotic fare. Mr. Stagg will have Spanish versions of the Zen Macrobiotics book, the *Book of Judgment* and *Zen Cookery* available very shortly.

M-B Activities in California. Los Angeles Dinner lectures will start again in September and will be held at the studio, 7557 Sunset Boulevard.—First and third Thursdays of the month—7:30 P.M.

“Here at our house not one day goes by without the news of someone having found new happiness or regained health thru the practice of Macrobiotics. True, there are the detractors, the critics and the ignorants, the part-smarts and the persons influenced by advanced technology of many fields. A recent contributor to ‘Fact’ magazine expressed his opinion on Macrobiotics and his writing shows a lack of deep study of the subject, the article being only a poor parrot-like repeat of what the unenlightened press reported some years ago. From many corners, Macrobiotics are answering ‘Fact’ on that point and, because we are convinced that here is a magazine of great integrity, we know the answers will be acknowledged.

“Overheard in a Vitamin store; a customer with a Zen

Macrobiotic book in his hand, ready to buy, is coldly given the once over by the portly balding owner, 'Don't get mixed up with That!'

"Then, there was this new night club in the San Fernando Valley, with a rather yin name: 'Magic Mushroom' which briefly served brown rice dishes at the start of their operation, maybe the chef will follow the Macrobiotic cooking classes in the fall.

"Going to France with us?

"The International Macrobiotic Summer Camp will be held in France next year and the Los Angeles group will charter a plane for all those who wish to attend. The flight will be organized on the same pattern as our Japan trip last year and the round-trip price will cost between \$300 and \$360.

"To participate in either the flight above or the Summer Camp attendance, a member must have a current, paid-up membership in the Foundation. We hope to fill the plane for the trip and we will inform you of the exact date of the camp very soon.

"Magazine to Appear More Regularly: The decision to publish the Macrobiotic Monthly ourselves had been made prior to Lou's death, in order to ease his task. Now, with the kind offers of literary contributions received from all directions, we have an even better chance of catching up on the delay. We will gratefully accept your letters, reports, news and personal experiences in macrobiotics.

"Please address your correspondence to: Jacques de Langre, Editor pro tem, 7557 Sunset Blvd., Los Angeles, Calif. 90046." Address: The Ohsawa Foundation, Inc., 1434 No. Curson Ave., L.A., 90046.

485. *Prevention (Emmaus, Pennsylvania)*. 1967. The superior soybean: Delicious to eat and packed with good nutrition, this little-used vegetable belongs on every table. Oct. p. 60-62. [5 ref]

• **Summary:** This article begins: "A little girl suffering from asthma had attacks that were so severe, she could hardly breathe. Her pulse would beat rapidly, and she would turn very pale. When milk was eliminated from her diet, and soy milk was substituted, her breathing became normal.

"Mr. D., a man of 48, has already had one heart attack, and he does not want to go through the ordeal of another. Since his attack, he has, fortunately, been able to keep his cholesterol level under control, thanks to soya-lecithin tablets.

"The soybean, long one of the major food staples of the Orient, has gradually won worldwide recognition as a protective dietary factor against a host of illnesses. Doctors have been finding that patients with hardening of the arteries, respiratory ailments, and food allergies often improve after eating soy products.

"What is there in the soybean? Protein, vital to tissue growth and repair, composes almost 50 per cent of the bean.

Many vegetables contain some of the essential amino acids, but the soybean is the only vegetable that comes close in competing with meat, fish, and eggs, for a good supply of them. The protein value of the soybean is of such a high quality that nutritionists are seriously considering this food as the key to coping with meat shortages in underdeveloped nations. It is the easily assimilated protein in soya that makes it such a good substitute for the indigestible and allergenic protein of milk. While soybeans are a good source of protein, however, they are not perfect. They are low in methionine, an essential amino acid that is present in many other foods. Yet even this defect has made the soybean valuable for another reason: the soybean is the only food that has been found to be successful in treating a rare inherited disease called homocystinuria..." Address: Emmaus, Pennsylvania.

486. *SoyaScan Notes*. 1967. Chronology of soybeans, soyfoods and natural foods in the United States 1966-1967 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1966, April 9. Erewhon opens as a small (10- by 20-foot) macrobiotic and natural foods retail store downstairs at 303-B Newbury Street in Boston, Massachusetts. Aveline and Michio Kushi are the founders and Evan Root is the first retail store manager. Erewhon is the first food store of its kind in America, and it soon serves as a model for many other similar natural foods stores across America. Erewhon starts to grow in Oct. 1967 with the arrival of Paul Hawken.

The natural foods movement in America is in its infancy, advocating a return to traditional whole foods, naturally grown and processed. It's predecessor, the health foods movement (which started in the 1930s, based on the new public interest in vitamins), now largely sells vitamin, mineral, and protein supplements.

1966, Nov. America's first soybean checkoff program voted in by North Carolina soybean growers, who will pay half a cent per bushel checkoff on the 1966 crop. This new income source marks the start of a new era for the American Soybean Association.

1967. The All-India Coordinated Research Project on Soybean is founded in India, after about 4 years of pioneering soybean work there by American Land Grant Universities, funded largely by the Rockefeller Foundation. This story is well told in Carroll P. Streeter's book *A Partnership to Improve Food Production in India* (1969).

1967. Soy idli developed by Steinkraus and van Veen at Cornell University, New York. These small steamed cakes are the first traditional Indian fermented soyfood to be fortified with soy flour. The fortification of basic foods in Third World countries with soy flour becomes popular.

1967. Philsoy brand soymilk launched in Los Baños, Philippines, with aid from Cornell University food scientists Bourne and Steinkraus.

1967. Proceedings of International Conference on

Soybean Protein Foods published by USDA Agricultural Research Service. The conference was held 17-19 Oct. 1966 at Peoria, Illinois. Many of the 276 attendees were pioneers in the field. A similar conference on Soybean Products for Protein in Human Foods had been held in 1961 at the same location. A major theme at both is that protein malnutrition is now the world's most widespread deficiency disease.

1967. Soybean production in Latin America reaches 1 million metric tons (tonnes), up 10-fold since 1953.

487. Garten, Max Otto. 1967. *The health secrets of a naturopathic doctor*. West Nyack, New York: Parker Publishing Co., Inc. xvi + 238 p. Illust. Index. 24 cm.
 • **Summary:** Contents: 1. How to get relief from pains and aches without drugs. 2. Conditioning the body permanently for beauty and health. 3. Aches and pains relieved with the fast [fasting]. 4. Food—Its relation to aches and pains. 5. The law of wholeness of foods. 6. The use of sea water for health. 7. What you should know about meat in your diet (... we should try to get along with as little flesh food as possible"). 8. The smoking problem. 9. The county without a toothache (fluoridation; calcium fluoride is probably beneficial, but sodium fluoride is an inorganic poison). 10. Cholesterol and lecithin. 11. The wonderful world of corrective foods and herbs. 12. The new diet for dynamic health. 13. Kruska and honey for new energy. Recipes and menus. 14. New menus for healthful living. 15. How to select healthful food combinations.

The section titled "Thirty daily menus for your health guidance" (p. 214-24) includes: "soy spread" (with many types of bread). Soy beans are mentioned as a good protein source (p. 226). Address: D.C. [Doctor of Chiropractic].

488. Hunter, Beatrice Trum. 1967. *The natural foods cookbook*. New York, NY: Pyramid Books. 368 p. Index. 18 cm.

• **Summary:** The content of this paperback edition is almost identical to that of the original 1961 hardcover edition, but the pagination is different. The Introduction by Clive and Jeanette is missing. On the cover of the 19th printing (Jan. 1974) is written: "Over a million copies sold." Address: White Mountains, New Hampshire.

489. Marsh, Edward E. 1967. *How to be healthy with natural foods*. New York, NY: Gramercy Publishing Co. 157 p. No index. 21 cm. [23 ref]

• **Summary:** The message of this unusual, copycat book on "natural foods" is largely borrowed from Linda Clark, Adelle Davis, Carlton Fredericks, Gayelord Hauser, D.C. Jarvis, and other health-food authors of the 1950s and early 1960s. The book has no clear publication date, no index, and we are told nothing about the author. It advocates a diet based on fatty meats plus various "extraordinary foods" such as apple cider vinegar, honey, bone meal, brewer's yeast, lecithin, sea kelp,

sunflower seeds, and yogurt.

Soybeans are mentioned as follows: Most vegetable proteins (except soybeans, sunflower seeds, peanuts and a few other foods) do not contain all the essential amino acids in the correct amounts to be first-class or complete proteins. Be sure that at least two-thirds of your protein intake comes from animal protein; the other third can come from other complete proteins such as soya products (p. 22-23). Soybeans are listed as a good source of vitamin D (p. 43), B-complex vitamins (p. 44), vitamin B-1 (p. 47), choline (p. 51), folic acid (p. 51-52), niacin (p. 53-54), pantothenic acid (p. 54-55), vitamin C (p. 60), vitamin E (p. 66), vitamin F (soybean oil, p. 67-68, 71), calcium (p. 76), copper (soy flour, p. 78), magnesium (soy flour, p. 83), and phosphorus (p. 84).

Lecithin, one of the "extraordinary foods," is "not a drug, but a granular form of soybean lecithin, free from objectionable elements." It can help relieve stress, quiet nerves, promote good health, improve mental poise, and induce a renewed feeling of well-being. Lecithin is found only in natural foods, such as soybean oil (p. 95-97).

Note: Edward Marsh was born in 1900. This edition was published by Gramercy, a division of Crown Publishers, Inc., by arrangement with Arco Publishing Co., Inc. Copyright Arc Books Inc., 1963. Library of Congress Catalog Card No. 67-14909. On the back cover is a full-page ad for *The Soybean Cookbook*, by Dorothea Van Gundy Jones.

490. *SoyaScan Notes*. 1967. Chronology of Arran Stephens: Early years in preparation for work with natural foods, vegetarianism, and Lifestream Natural Foods Ltd. (Vancouver, then Richmond, BC, Canada). Part I (1944–1967). Compiled by William Shurtleff of Soyfoods Center.
 • **Summary:** The focus of Arran's life has been his spiritual practice; his work with food has taken an important supporting role as service to others. He has written his autobiography, published as *Journey to the Luminous: Encounters with Mystical Adepts of our Century* (Seattle, Washington: Elton Wolf Publishing, 1999. 380 p. with 70 black and white photos). An expanded version, titled *Moth & The Flame: Adventures with Spiritual Adepts of Our Time* is now available free of charge on the Web at www.ArranStephens.com.

1944 Jan. 6—Arran Blackburn Stephens is born in Duncan, on southeast Vancouver Island, British Columbia, Canada—at King's Daughter Hospital, about 10 miles from the family farm. He is the youngest of three brothers, the others being John Rutherford Jamieson (Gwen's son from her first marriage. John was born on 20 Sept. 1931 in New Zealand, the son of William John Jamieson, a New Zealand sheep farmer) and Godfrey (born on 28 Oct. 1939). Arran's father, Rupert Edward Cripps Stephens, was born on 4 April 1896 in or near Plymouth, UK. Arran's mother, Gwendolyn Minnie Elise Hopkins was born on 4 Nov.

1909 in Kent, King Co., Washington. Arran's parents run Mountain Valley Farm, the family farm of 89 acres of hard living they inherited from Rupert's father; there they grow field berries. Rupert had been a captain in World War I and saw some brutal action in Belgium and Germany; he would never talk about it. Rupert's father, "Surgeon Commander, Dr. Harold Frederick Dale Stephens," was in the Royal Navy and saw action in the Boer War in South Africa. Arran's paternal grandmother (his father's mother), Agnes Grace Cripps, daughter of Lieut.-General J.M. Cripps and Agnes Grace Cripps, had been born in about 1857 in Peshawar, in India's North-West Frontier (in today's Pakistan). Agnes married Lt. General J.M. Cripps, who had lived in colonial India from 1839 to 1878. General Cripps wrote a book titled *Recollections of My Indian Career*, illustrated with 25 exquisite original watercolors by his wife, Agnes. Aaron later wrote: "In my child's mind's eye, India's mystery beckoned, like a distant voice from a faded dream."

At Mountain Valley Farm, the Stephens family lives in a "hand-hewn log-house, overlooking the Goldstream Valley," surrounded by natural beauty, a waterfall, and wilderness.

1947—When Arran is age 3, the family sells Mountain Valley Farm and moves to Goldstream, about 40 miles south, closer to Victoria, where they wrest Goldstream Berry Paradise farm from the forest. Arran's parents have renounced modern chemicals and mechanization, finding simple, economical methods (such as sawdust mulch and earthworms) to strengthen soil fertility and the health of plants, Rupert's credo is: "Always leave the soil better than you found it." They establish a roadside "berry stand" from which to sell their berries and other produce directly.

1951—Rupert's treatise, *Sawdust is My Slave*, is published extolling the methods he had discovered. When not working the land, Rupert wrote the lyrics for hundreds of songs, poems, and articles.

1955—After attending a Christian Bible camp Arran's interest in God begins to awaken. He feels called to the ministry. His dad takes him to a pristine forest behind their farm and tells him: "Arra-boy, this is our church; this is our cathedral."

1957 Jan.—The family (with Arran age 13) sells the farm (Goldstream Berry Paradise) and moves from Vancouver Island to Southern California. "The songwriter in Rupert's heart was restless for fame and Hollywood." The family settled in a "rented palm-shaded hacienda in the Hollywood Hills." Arran quickly learned to his dismay that violent gangs controlled the schools and streets. This urban concrete jungle was a different world.

1959—At age 15, Arran's "secure, trusting world abruptly ended: mum and dad separated" (temporarily). Brother "Godfrey roared off on his Harley motorcycle for New Orleans [Louisiana] and high adventure;" he later became a renowned artist. Confused and desperate, Arran decided to become an artist and poet. He encountered the Beat

generation and the counterculture of the 1960s.

1961—Arran (now 17) has one of his poems published in the *Mendicant Poetry Journal*. He struggles to navigate the psychedelic 1960s, becomes a spiritual seeker, reads books of many spiritual traditions, meets Eden Ahbez, the first vegetarian he had ever met, "part of a handful of health and fitness devotees from the Hollywood Hills, including well-known Gypsy Boots and Al Jacobson. But every hope, each oasis, turned into an empty mirage." "Often broke, I slept on the beach, drunk or high on cheap wine or high on drugs, sometimes crawling into a cardboard box to mitigate the winter cold. When hungry, I ate discarded food or begged. When I could I painted. Misery was my companion,... a course which took but two years to break mind, body, and spirit." By age 17 he "was a haggard alcoholic and drug-dazed atheist railing against the Author of pain." One day he tried to end it all in the Ocean waves off Venice Beach in California. But after a momentary experience of serenity, he pulled back from the brink.

Then he heard of a monastic retreat named Fountain of the World in the hills above smoggy Los Angeles. One week after his arrival he had an experience that profoundly changed the course of his life. During an evening group Concentration, he experienced brilliant light and "intoxicating waves of Unconditional Love... This was my first taste of a state of Reality—something beyond the senses; something beyond intoxication; perhaps something I had always been blindly hoping and groping for." Similar experiences returned repeatedly but were not encouraged by his fellow monastics. After two months, and increasing pressure to "renounce the world and become a full-fledged monastic brother," he decides to leave.

1963—In San Francisco, Arran experiences how this spiritual light can miraculously save the life of a person about to be run over by a bus. He "never hesitated to investigate any teacher, religion or teaching." "From 1961 to 1964, with one or two exceptions, the springs of Divine Light all but dried up as this prodigal profligate wandered and squandered the spiritual capital we all come into the world with."

1964 April—Arran's parents, now back together, move back to British Columbia from southern California. They now live in Victoria on Vancouver Island.

1964—Arran (now 20) has several one-man shows of paintings under his belt. He leaves San Francisco for lovely Mendocino County, then, en route to Tangiers, he arrives in New York's Greenwich Village—almost broke. He paints and reads spiritual books. After a two-year lapse he starts daily sitting meditation again. Many brief and isolated inner experiences of light and peace lifted him "above an otherwise sordid existence." Craving discipline and order, he joins a group and for 9 months studies Gurdjieff whose "principal teaching was that we are all 'asleep,' and must awaken in a higher sense through various esoteric practices,

including self remembering and sacred dance.” He earns money at odd jobs, including as a waiter in a macrobiotic restaurant, the Paradox (owned by Richard Lane). Arran becomes interested in the vegetarian aspect of macrobiotics. He recalls (2006): I “largely ate macrobiotic for years at a stretch, but I also experimented with various diets, such as vegan, mucusless (Arnold Ehret), fruitarian, raw foods, and some fasting.” But increasingly he yearns to meet a living perfect master and experience mystical union with God. After reading about Sri Ramakrishna, he gives up his bad habits and returns to being a vegetarian.

“From 1964 to 1965 my life revolved around art and the inner quest. One day, when shown photos of Hazur Baba Sawan Singh (1858-1948) and his disciple, Kirpal Singh (both great Sikh masters), and given a book by the latter, he is deeply moved. When he learns that Kirpal Singh is alive, he knows has almost found what he has been looking for. Meeting the Master in person became his passion. He writes Kirpal Singh (in India) asking for initiation.

1965 March 28—Arran receives a written reply, with instructions. “I was accepted for initiation... My feet were on the Path at last.” He meditates, keeps a diary, and writes questions to his Master. Written answers return. He returns to Vancouver and opens the East West Gallery, eager to save enough money to go to India.

1967 Jan. 20—He departs for India, welcomed by his Master. He stays at the Master’s Sawan Ashram, in Shakti Nagar, near Delhi, and has many wonderful experiences, beautifully and humbly described in detail. Most important are love, attending satsang, practicing meditation, not creating either bad or good karma, and weeding out personal shortcomings. Part of the practice is to eat a vegetarian diet and avoid all intoxicants. After exactly 7 transforming months in India he returns home. “Before leaving India, the Master authorized me to begin work as his representative in Western Canada.” Continued. Address: Vancouver, BC, Canada.

491. *SoyaScan Notes*. 1967. Chronology of the work of Arran Stephens with natural foods, vegetarianism, and Lifestream Natural Foods Ltd. (Vancouver, then Richmond, BC, Canada). Part II (1967–1971). 24 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1967—Arran begins his first food business when he starts the Golden Lotus restaurant at 2936 West 4th Ave. (at Bayswater), Vancouver. Serving natural, vegetarian and macrobiotic foods, it is the city’s first vegetarian restaurant. Before he left India, his Master had encouraged him to take up this “right livelihood” and promised to extend “all feasible help, both inside and outside.” A place was found and the necessary money appeared as if by magic. Most of the workers were spiritual seekers. All lived upstairs, above the restaurant.

Arran was one of the cooks; he had learned how to cook

brown rice, veggies, hijiki, wakame and miso soup while working as a waiter at the Paradox Restaurant in New York City in 1964; he learned the rest by trial and error, including the use of macrobiotic and vegetarian cookbooks such as *Vegetarian Cookery*, by Pietro Rotondi, and (later) *Ten Talents* by Frank and Rosalie Hurd.

“Amazingly, the rather monastic rules—including regular meditation and celibacy—were accepted and enthusiastically followed. In the communal setting, all worked without pay for the first 9 months. “Before the year was out, bills and loans were entirely repaid and all began receiving hourly wages, benefits, room and board. The numbers attending our weekly satsangs outgrew the upstairs, and the venue shifted downtown to the YMCA.” One photo shows Arran standing in front of the Golden Lotus restaurant in 1968 and another standing inside in 1969.

1968 Oct.—Arran and three others return to India to be with Master Kirpal Singh, having received his written permission. On the way they visit Ram Das (the former Richard Alpert) who was in retreat at his father’s large New Hampshire estate. In India Arran lives close to Kirpal Singh. The Master will not initiate those who beg for food, only those who earn an honest living.

1969 March 4.—Arran, with the Master’s blessing, marries an Indian woman, Rattan Mala Bagga, age 22, in a traditional Sikh marriage. She comes from a good family, has an M.A. degree, and is a lecturer at a girls’ school in Moradabad. The Master, who changes her name to Ratana (“jewel”) encourages family life and the tender bonds of matrimonial love and responsibility.

1969 April—Arran and sari-clad Ratana return to Vancouver, Canada, after nearly 6 months in India. He has changed from ascetic to householder. They settle into a little room above the restaurant, sharing a bathroom with 14 others and working, on average, 12-16 hours a day to get the restaurant firmly established. In May and December, Kirpal Singh writes with wise advice. As a result: “In three months we saved \$1,000 to make a down payment on a little two-bedroom house with a garden. Ratana was already pregnant with our first child, and we had had our fill of communal living.”

“Considerable agitation began among the more left-leaning workers to turn the Golden Lotus into a commune. After a lot of soul-searching, we decided to make a clean break, and sold the restaurant to the group for a paltry \$3,000, wishing them all success.” Soon after the Golden Lotus restaurant became defunct.

1970 Jan.—Arran opens a little store named Jyoti Importers and Natural Foods at West 4th Ave., near Yew Street on the same street as the Golden Lotus, but on top of the hill. He sells “Indian bedspreads, clothing, classical musical instruments, and healthy and organic foods. Food soon edged out the other wares. It became obvious that my destined vocation was connected to organic foods and

wholistic living.” After several years of growth, the business moves into a much larger building at 1813-1817 West 4th Ave., a corner location and opens as Lifestream Natural Foods on 1 Jan. 1971. Then Lifestream expanded to a second store on Broadway at Traflagar (See: *Shared Vision* 1990, p. 9).

1970 April 4—Arran and Ratana’s first child is born at St. Paul’s hospital in Vancouver by natural childbirth. Master telegraphed. “You may name the baby Shanti” (the ancient Sanskrit word for “peace”). Note: All the Stephens’ children were born at this same hospital. Arran writes: “I was present at the miracle of each birth. On the birth of two of our children, Ratana was blessed with the vision of our Master, and she also experienced great light within.”

1970 spring—On an impulse, Arran gives half of his business, Jyoti, to Peter Harwood, his friend and fellow disciple of Kirpal Singh; Peter becomes a working partner.

1970 Aug.—Arran attends the founding meeting of Organic Merchants (OM), held outdoors on the side of Mt. Shasta. Lifestream becomes one of the founding members. OM was the first trade association for natural food retailers on the West Coast and the first organic trade association. Arran also remembers OM meetings at Blake Rankin’s, at Lifestream, and at Pajaro Dunes.

1971 (1990 *Shared Vision* article says Lifestream opened 1970 Jan. 1). Jan. 1—Arran opens Lifestream Natural Foods in Vancouver, British Columbia, Canada, just north of the U.S. border, at 1813-1817 West 4th Ave. (at Burrard). It is Canada’s first large natural foods retail store. His father suggests the name. “Free fresh carrot juice drew in crowds;

an electric powered 20-inch stone-buhr mill, visible through a window from the street, ground tons of fresh whole-grain flour every day; alfalfa sprouts were grown in our nearby warehouse / factory; fresh nut butters were roasted and milled to order; natural candy bars and cookies were extruded and baked; egg-free cakes and muffins popped from the ovens; pies, crunchy granola, bulk foods, and wholesome artisanal breads were baked and sold by the hundreds. These were all firsts in Canada.” The inspiration came from many sources, but was not macrobiotic. The Lifestream brand was represented by a woman gathering sheaves of wheat into a basket. “Teachers brought classes of school children on tours to see how wholesome foods were made. The store became so busy that it was often difficult to wade through the crowds of shoppers and hangers-on... Sales doubled every year for seven years, and the business quickly branched out into wholesale distribution.”

1971 or 1972—A separate small vegetarian restaurant, named Mother Nature’s Inn (MNI) was started as a *separate* business in the rear of the large retail store (on West 4th Ave.) by Victor Yankowich,...” But after about a year MNI was purchased from Victor (for a pittance) for Ratana, who showed her business skills by running it very successfully and profitably. The company’s best-known products are its line of Essene sprouted grain breads—moist, heavy, and delectable.

1972—Lifestream opens its own Bread of Life bakery (100% owned by Lifestream) in North Vancouver because of the area’s scarcity of organic and natural baked items. The original Lifestream Essene Bread, developed by Arran at that bakery, was one of the Lifestream’s first baked products. Essene Bread was always made with organic grain—from the Alvin Scheresky and David Orchard organic grain farms in Saskatchewan province.

A 1971 color photo shows Arran, smiling, holding a loaf of Essene Bread.

1971—At about this time Lifestream Natural Foods Ltd. moves to 724-26 W. 6th Ave., Vancouver 9, BC, Canada. This was a combination headquarters, warehouse, manufacturing and packaging facility. It housed a flour mill, alfalfa sprout operations, nut butter operation, tamari nut roasting and packaging, plus packaging a wide range of organic grains, beans, nuts, seeds, flours, etc. When this facility opened, the only other Lifestream operation was the retail store.

1971—Since there was a scarcity of natural and organic foods, Lifestream began to do wholesale distribution. Frank Ford, founder of Arrowhead Mills in Texas, appointed Lifestream as distributor in Canada for the entire Arrowhead Mills’ range of organic grains, beans, flakes, hot cereals, and

flours. Hundreds of products were developed and marketed under the Lifestream brand: Breads, other baked goods, fruit & nut-based energy bars, juices, trail mixes, tamari roasted nuts and seeds, preserves, yogurt, granolas, mueslis, sprouts, soyfoods, expeller-pressed oils, and a wide range of imported Japanese macrobiotic products. During the 1970s Lifestream's profits came from a blend of manufacturing, wholesaling, and retailing—but not even the accountants knew what percentage of the total came from each of these activities. Continued. Address: 724-26 W. 6th Ave., Vancouver 9, BC, Canada.

492. *SoyaScan Notes*. 1967. Chronology of the work of Arran Stephens with natural foods, vegetarianism, and Lifestream Natural Foods Ltd. (Vancouver, then Richmond, BC, Canada). Part III (1972–1980). 24 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1972—A third partner, Louis Kiraly, joins Lifestream; he, too, is a disciple of Kirpal Singh. Louis contributed part of his outside job wages to help support the business during the first year. The three partners become equal owners of the company, which was incorporated at about this time as Lifestream Natural Foods, Ltd.—a limited corporation.

1972 Nov.—Sant Kirpal Singh visits Vancouver on his third world tour. He visits Arran and Ratana's home, and encourages Arran to build Lifestream into a large, successful business. Doing such service need not interfere with his spiritual practice.

1972-73—Lifestream starts importing products from Muso Shokuhin (macrobiotic) in Japan. Blake Rankin and George Gearhart of Janus Foods in Washington state were good friends of Arran's. Their two companies did not compete. Canada had its own packaging regulations and Lifestream developed a complete line of Japanese products under the Lifestream brand for Canada.

1973 Feb. 1—The Stephens' 2nd child is born; the Master names her Gurdeep (Lamp of the Lord). Oct. Arran and Ratana, with both children, make another pilgrimage to India. One day "Yogi Bhajan, the founder of the 3HO Society, arrived at the ashram with a large retinue of Sikh followers. Yogi Ji was of gigantic stature, with a big black beard, flowing robes, jewelled rings, necklaces, and a commanding personality." The Stephens attend Kirpal Singh's 80th birthday on 6 Feb. 1974 then they return to Vancouver.

1974 Aug. 21—Sant Kirpal Singh returns to the Source, leaves his body (dies). Arran immediately flies to India, and arrives in time to see his Master's body cremated on a funeral pyre at Kirpal Bagh in Old Delhi, a few miles from the Yamuna River. Bereft, he stays for about a month, searching for the Master's successor, then finally returns home—the succession enigma unresolved. He tries to return to being "a successful businessman responsible for more than a hundred

employees, a devoted husband and father, etc." But for the next two years he is torn by the pangs of separation.

1974—Arran and Ratana buy 2 acres of land and a ranch house on Panorama Ridge, Surrey, BC, out in the country, about 15 miles southeast of Vancouver. They move there from their little house in Vancouver, work with others to build an ashram for those interested in Kirpal Singh's practice, and they live there for the next 5 years.

1974 Nov.—Lifestream is a member of the Natural Foods Distributors Assoc. (NFDA).

1974—A 4-page menu (black on yellowish-tan paper) from Mother Nature's Inn this year still exists, along with a black-and-white photo of Lisa serving food in the restaurant.

1974 or 1975—Lifestream starts to lease space at 12411 Vulcan Way, Richmond, BC; it was converted from a pet food factory to completely vegetarian use. Here Lifestream operates its bakery and wholesale distribution; this continues until 1981.

1976 Jan.—Lifestream is still distributing products imported from Muso Shokuhin in Japan.

1977 July 23—A third child and daughter, Jyoti, is born in Vancouver.

1977 July—*The Lifestream Cookbook* is published by Lifestream (58 p.).

1978 June—Lifestream is now located in Richmond, BC, Canada V6V 1J7.

1978 Oct.—Arran and his family (wife and 3 children) return to India; he is still torn by the succession question. At first he tentatively but sincerely comes to believe that the "Desert Baba" in western India was Kirpal Singh's true successor; he shares his belief with other Kirpal Singh initiates. On Nov. 5 and 6 he realizes (to his immense relief and embarrassment) that Darshan Singh, Kirpal's eldest son, is his true successor and mystically one with his father. "The successor will bind you to your Master and not to himself."

1978 Dec.—When Arran returns from India he receives a letter (which he still has) which basically excommunicates him from the community of initiates and from the Ashram in Surrey, BC, which he and Ratana had helped to motivate, build, and finance. One of his partners at Lifestream could not handle the fact that Arran was no longer a follower of the "Desert Baba" any more, and soon that partner left to go see him in India. The advice he received in India was not helpful for his relationship with Arran, and soon he began a program of systematic non-cooperation with Arran in the business. The third partner remained fairly neutral and would not take sides. Yet it is soon clear that the Lifestream partnership has become unworkable. Yet as president, Arran has most of the responsibility. He was the first to arrive at work each day and the last to leave. And there were other inequities. The bank had only Arran as a secured creditor, yet the three partners were paid equally. Lifestream was always profitable, but the rapid growth meant tight cash flow. With no clear leadership at the top of the company, the Lifestream partnership begins

to unravel.

1979 early—Arran and family move from their former community in Surrey, BC, in the “country back to the city, drawn to a gracious old house in a quiet neighborhood, surrounded by a high-hedged secluded garden.” They live and raise their family in this house for the next 23 years.

1979 April—Arran returns “alone to India for 3 weeks, to fortify and deepen my connection to the Divine working through Darshan, the poet-saint.”

1979 Sept.—Fourth printing of *The Lifestream Cookbook*; it eventually sells over 100,000 copies. The company is now at 12411 Vulcan Way.

1979—Lifestream opens a big Lifestream Natural Foods retail store (#2) at 2582 West Broadway in Vancouver. On the 2nd floor above this new store, Woodlands Natural Restaurant (vegetarian) opens. However the restaurant, owned by Ratana and Arran, is kept separate from Lifestream. The original Lifestream retail store at 1813-1817 West 4th Ave. continues to operate at its original location.

A photo shows the Lifestream crew in about 1980.

1980—“Annual sales of Lifestream brand products reach \$9 million, making the line one of Canada’s leading natural food brands.” Continued. Address: 724-26 W. 6th Ave., Vancouver 9, BC, Canada.

493. *SoyaScan Notes*. 1967. Chronology of the work of Arran Stephens with natural foods, vegetarianism, and Lifestream Natural Foods Ltd. (Vancouver, then Richmond, BC, Canada). Part IV (1981–1989). 24 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1981—Annual sales of Lifestream brand products jump to a record \$12 million, and there are about 100 employees. All the retail sales and sales of Lifestream’s distribution company are in Canada. However, the majority of Lifestream’s Manna Bread, natural energy bars, and organic baked goods are in the USA. An estimated 25% of Lifestream’s total sales were in the USA to wholesale distributors.

1981—Arran refuses to co-sign a bank loan for Lifestream, in an attempt to resolve partnership problems at Lifestream, by trying to force his disaffected partner to either buy his shares at a price for which Arran was willing to sell them, or to let Arran buy his shares at the same price. But the disaffected partner refuses to sell his shares to Arran, and he doesn’t have the means to buy Arran’s shares. The third partner wouldn’t decide one way or the other. Parshan Sahota, an Indian man, owns 8% of the shares; a hardworking, loyal employee, he had \$60,000 to invest, an amount calculated to equal 8% of Lifestream’s shares. Parshan is now operating a successful Lifestream distribution operation out of Ontario, is behind Arran all the way (he is not an initiate), however even with his support, Arran does not have the requisite 51% ownership or backing to gain control of the company. Despite the company’s success,

the only alternative at this point is to sell to an outsider. Arran and Ratana do not want to sell the Lifestream baby, as they felt very much identified with it. This is a painful but valuable lesson for them. A buyer is found.

1981 July or Aug.—Lifestream is reluctantly sold to a holding company controlled by investment bankers Gordon Byrne and David Mindell. They hire Arran to remain as president, but renege on a promise to give him back 10% of the company, so he resigns as president by the end of August. He recalls that they effectively cheated him out of approximately \$200,000 in the technicalities of the sale. Several months later, on the advice of a seasoned attorney, Hyma Altman, Arran decides to seek legal recourse for the recovery of the promised 10%; the defendant settles out of court. Gordon sells his shares to David Mindell and they hire an ex-executive of a large consumer goods firm to run the company. Under the new ownership, Lifestream has difficulties in the marketplace and labor problems at the stores, which they sell or close.

After Arran resigns from the company, he goes back to work at Woodlands Natural Foods (the family restaurant business), and abides by a 3-year non-compete agreement which restricts him from going into retail, wholesale, or manufacturing.

1981 Aug.—Nabob Foods (Canada’s #2 brand of coffee) buys (from David Mindell) the much weakened Lifestream manufacturing operation at 9100 Van Horne Way, Richmond, BC. Nabob invests heavily in the Lifestream brand.

1981 Oct. 11—Arjan, the Stephens’ fourth child and first son, is born—on Canada’s “Remembrance Day.” Arran recalls: “From early ages, our kids worked for hourly wages at our various enterprises, as they wanted spending money. We told them that if they wanted money, they needed to earn it, and learn valuable life skills along the way.”

1981 to 1985—During these three years when his non-compete agreement was in effect, Arran helped Ratana at the Woodlands vegetarian restaurant. He recalls: “She was the heart and smarts behind the restaurant operation. I was the builder, the Don Quixote, tilting at Windmills. I did wait on tables, chop vegetables, clean toilets, sweep the parking lot.” Using the initial large restaurant at 2582 West Broadway as a central bakery and commissary, they supply the old Mother Nature’s Inn—still there in the back of the original Lifestream store (it is a tenant of the store), convert it to a Woodlands, and open and supply two additional Woodlands restaurants and stores in Vancouver (permitted in the non-compete agreement). Arran continues: “But it was very difficult to keep it all organized and profitable, and the world load was excessive. Ratana had the three daughters and now out newborn son to look after, plus she helped out with the main restaurant. She was the real hero that kept it together. The various Woodlands satellites were becoming increasingly difficult to manage properly and cash flow was in a dangerous position We decided to sell off the two outlets

at a loss, and contracted back to the two original, profitable restaurants. But now we did have a nice bakery built in the back of Woodlands on Broadway, and it was out of this little bakery [in 1985] that we began Nature's Path Manna Bread."

1982 July—Lifestream is selling (and perhaps making) Vegi-Patties, which are meatless burgers made with textured soya flour and wheat gluten.

1985 Jan.—Arran Stephens founds Nature's Path, Ltd.—supported by Ratana and her restaurant—and launches the company's first product, Manna Bread, at Natural Products Expo West. As a limited corporation (an "Ltd."), Nature's Path takes in over 20 small investors, but this becomes unwieldy, and the investors have very high expectations. So Arran and Ratana buy back the shares at cost plus interest.

1985 end—Nature's Path soon outgrows the Woodlands and moves to a much larger leased building on Simpson Road in Richmond, BC. Ratana continues to profitably manage Woodlands, while Arran works very hard to establish the Nature's Path bakery. Arran would drive a truck each week, loaded with bakery products, all the way down to Portland, Oregon, making store deliveries. There were difficulties with the fresh bread, however, as most stores wanted guaranteed sales, and the stale bread returns were sometimes unbelievable. Yet Manna Bread was the staple seller. Arran then "shifted emphasis toward more shelf-stable organic bakery products, and introduced a line of sprouted, organic breakfast cereals under the Manna / Nature's Path banner."

1988 Feb.—Arran makes his tenth pilgrimage to India. "Weary of our ups and downs in business, Ratana urges me to ask Master [Sant Darshan Singh] for his advice to help set my feet firmly on the path to consistent profitability." Very humbly and graciously Darshan gives three basic principles: (1) "Keep to quality. Quality should never be sacrificed either for quantity or money. Be honest." (2) "We should expand our business to the extent that we can control it personally." No more. (3) "We should be progressive, do our best, and make the most of our business, but not be too ambitious. Be very cautious—expansion is very easy; retreating is very difficult. We should be contented with whatever the Master blesses us." Arran deeply appreciated the wisdom of this extemporaneous and free advice. He later recalled: "Sales began to take off. We then started effectively competing with Health Valley, Lifestream, Arrowhead Mills, Erewhon and others. It was a lot of fun, and the growth was explosive."

1988—"Multigrain, Multigrain 'n Raisin, and Millet Rice are the very first Nature's Path cereals. All are still for sale today." Continued. Address: 724-26 W. 6th Ave., Vancouver 9, BC, Canada.

494. *SoyaScan Notes*. 1967. Chronology of the work of Arran Stephens with natural foods, vegetarianism, and Lifestream Natural Foods Ltd. (Vancouver, then Richmond,

BC, Canada). Part V (1990 on). 24 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1989—The Lifestream store at Broadway is sold and becomes Kitsilano Natural Foods. But Arran and Ratana Stephens continue to own the Woodlands vegetarian restaurant upstairs at this location.

1990 Nov.—A nice article (with 3 portrait photos) about Arran and Ratana, Lifestream, Woodlands, and Nature's Path appears in *Shared Vision* magazine in Vancouver. Nature's Path is located at 7453 Progress Way, Delta, BC V4G 1E8. Ratana continues to run Woodlands vegetarian restaurant at 2582 West Broadway in Vancouver. Arran discusses the great importance of staying true to one's vision, spiritual practice, and principles.

1991—Arran now owns a company named Manna Milling, which is a very big purveyor of natural cereals in Canada and the USA; their brand name is Nature's Path. Lifestream had an eastern branch in Toronto, named Lifestream East, which then became LifeSource, which is now run by Parshan Sahota (see above), who now owns a remnant of what used to be Landstrom.

1992—Ratana leaves Woodlands vegetarian restaurant to help Nature's Path full time as chief operating officer (COO).

1993—Nabob Foods is purchased by Kraft Foods / Phillip Morris.

1994—Kraft approaches Arran and offers to sell him Lifestream, since Nature's Path was seriously trouncing Lifestream in every market. Lifestream had shrunk dramatically and was losing near \$2 million per year. Arran offered to pay Kraft the value of Lifestream's assets, but Kraft rejected this offer with the comment, "This company is worth three times what you are offering. Six months later the Kraft attorney called again, saying that they were prepared to accept Arran's offer. Arran replied, "My offer just dropped."

1995—Arran and Ratana finally purchase back the assets of Lifestream from Kraft—14 years after they were forced to sell it. Their objective was to restore the LifeStream (new spelling) brand and real estate, but not necessarily the manufacturing, as Nature's Path already had a state of the art cereal processing and baking facility at 7453 Progress Way, in nearby Delta, BC. So Nature's Path closed the old Lifestream facility (at 9100 Van Horne Way, Richmond, BC), consolidated its usable assets in their Delta plant, then leased out the building on Van Horne Way. It took nine months to reverse Lifestream's losses.

1995—Nature's Path opens up a large plant in Blaine, Washington state (USA).

1995—Ratana and Arran sell Woodlands (formerly Mother Nature's Inn) to Ratana's sister, in order to be able to devote their full attention to Nature's Path. Arran: "Woodlands was highly profitable and provided a much-needed service to the community. Sales from the West Broadway restaurant were over \$1,000,000 per year. It was common to experience line-ups at Woodlands for every

lunch and dinner. It had a wonderful atmosphere, but with the great growth and potential of Nature's Path, we couldn't handle the restaurant as well as Nature's Path, which led to the decision to sell it."

1996-2002—Arran serves on the board of the Organic Trade Association (OTA).

2002—Arran and Ratana purchase and move to their current house, named Shalimar, on 2.2 acres of land near the University of British Columbia, overlooking the water, the rain forest, and a canyon. There they developed a reflecting pond, a large and gorgeous organic garden (both foods and ornamentals) and a fully-equipped cabin for guests.

2004—Nature's Path is now North America's largest certified-organic cereal company.

2004 May. *Natural Foods Merchandiser* (p. 29), in an article titled "25 who championed a cleaner plate," one in a series of articles celebrating the magazine's 25th anniversary, honors Arran as a pioneer—and shows a nice color portrait photo. He has been in the natural foods industry for 37 years. At age 23, he owned Canada's first vegetarian restaurant, the Golden Lotus. One challenge was transforming himself from a recluse to a professional leader and entrepreneur. He would like his epitaph to read: "Nurturer of people, nature and spirit."

2006 Feb. 1—Nature's Path Baking Inc. opens in Mississauga, just east of Toronto, Ontario, Canada. Arjan Stephens (the son) is the overall manager of this leased 36,000 square foot organic toaster pastry plant. A very bright young man, also devoted to the spiritual path, he earned his MBA in 2005 from the Stuart School of Business, Chicago, Illinois. Before he could finish his law degree, Arran asked him to help with the family business. 2006 July—The great majority of Nature's Path production is from the facility at Blaine, Washington (USA), with this plant and the one in Delta, BC, operating 24 hours a day, 7 days a week (24/7). Arran adds: "Nature's Path currently owns and operates more than 400,000 square feet of buildings and leases the 36,000 square foot plant in Mississauga. We are now looking at a very interesting opportunity in the Midwest for a new plant and distribution center, that will significantly reduce miles traveled. For example, most of our production currently takes place in the Pacific Northwest, but half of our business is east of the Rockies. Much of our grain supply comes from east of the Rockies. By locating an additional plant in the Midwest, in the middle of the Grain Belt, we can more cost effectively produce and deliver for all markets east of the Rockies. The freight savings alone will be in the millions annually. With the soaring costs of the fossil fuel economy, we have to do everything to reduce energy consumption and move as quickly as possible to renewable, greener energy. Our goal as a company is to be zero waste by 2010 and climate neutral by 2020. Of course, this can only happen by creating significant carbon offsets. We already have been doing this to some extent by supporting sustainable, organic agriculture,

but we have a long way to go to create the offsets for fuel and energy consumption."

"My diet for decades now has consisted of whole grains, vegetables, fruits, nuts, seeds, beans, and small quantities of organic dairy. I haven't eaten meat, fish, fowl or eggs or anything containing them since 1964, and at 62 am quite healthy and vigorous."

Note: This is the earliest document seen (Feb. 2010) concerning Arran Stephens, Lifestream Natural Foods, or Nature's Path Foods, Inc. (British Columbia, Canada). Address: 724-26 W. 6th Ave., Vancouver 9, BC, Canada.

495. Stegner, Wallace Earle. 1967. *All the little live things*. New York, NY: Viking Press. 345 p. 22 cm.

• **Summary:** A disquieting and keenly observed novel about the engulfing chaos of the 1960s and early 1970s. The hero (Joe Allston) and his wife (both Easterners in their sixties) retire to California in search of peace after the death of their wayward son. Their little paradise in Los Altos Hills (which looks like Eden) "is invaded by various parasites, including a neighbor with a bulldozer bent on 'development.' Jim Peck, a bearded young cultist, builds a treehouse on their property [across the creek] and starts a University of the Free Mind, complete with yoga, marijuana, and free-wheeling sex. Most damaging of all, it is invaded by Marian Catlin, and attractive young wife and mother, affirming all the hope and love that the Allstons believe in..." (inside front dust jacket).

This book is about: "The cult of youth, the Hippy [sic] Revolution, and the excruciating conflict between the generations." Joe Allston represents the square older generation and Jim Peck the Hippy; their antagonism is presented in the most irreconcilable terms. If there is an answer, a way of bridging the chasm between them, "it is in Marian Catlin's openness to all experience and her affection for all life" (rear dust jacket).

One very interesting scene (p. 102-20), an evening party at the Catlins with invitations, is set around a barbecue in the California spring. The Allstons are there, as is Jim Peck, who sets forth his philosophy of life and worldview—which he considers sane and virtuous. He is an apostle, not of modernity, but of alienation, with his wild hair, wild beard and wild eyes. Joseph Allston says: "If he can stand me, I can stand him." Jim advocates a healthy vegetarian diet and the philosophy behind it (including a protest against the hypocrisies of eating meat). "All the largest and strongest animals were vegetarian. He himself wanted to be absolutely *harmless*. He believed in ahimsa, nonviolence, harmlessness."

He wanted to keep his mind crystal clear and expand its boundaries, and to expand his consciousness. He was writing a book about himself and his experiments. He did yoga. They asked him about "organically grown vegetables," the use of natural manure, and avoidance of chemical sprays. He smiled. Was "there a health store in town where they sold

soybean steaks and blackstrap molasses,...” He didn’t know. What hypocrisy to try to make honest soybeans taste like sirloin. Better to hold to simplicity. John opens another beer and Debby has a second soft drink. The men were hesitant to talk with him. All this “self-realization business, a mongrel cross between Socrates on the examined life and the Buddha on contemplation... that would begin in Huxley’s *Doors of Perception* and end in Leary’s LSD cult. There would be a lot of Zen passivism scrambled with a sanyasi withdrawal...”

John Allston wonders: “Could I stand to see human feelings and noble ideals come half-baked from the oven?” Jim Peck, no doubt “would have a smiling sneer for people who took aspirin and denounced drugs, and for incipient alcoholics who objected to other ways of getting high.” But John mostly conjectured; he rarely asked. In fact, much of the above is conjectured by the straight men (as they drink beer), rather than actually said by Peck.

A photo on the inside rear dust jacket shows Wallace Stegner, who is currently “a professor of English at Stanford University and head of the Creative Writing Center there.” A brief biography is given. Address: California.

496. **Product Name:** Tofu.

Manufacturer’s Name: Lung Kee.

Manufacturer’s Address: 2 Wharf, Fermoy Rd., Paddington, London, England.

Date of Introduction: 1967?

New Product–Documentation: Shurtleff & Aoyagi. 1975. *The Book of Tofu*. p. 314. Talk with Craig Sams. 1991. Aug. 24. Starting in late 1967 or early 1968, his macrobiotic natural foods restaurant named “Seed” purchased fresh tofu and [mung] bean sprouts from a Chinese company named Lung Kee on Fermoy Road, Paddington, London, right on the banks of the canal. It was run by one Chinese man who employed about 15 West Indian/Jamaican women who made the foods. Bean sprouts accounted for most of Lung Kee’s business. Craig has no idea when Lung Kee started making tofu. Call telephone operator in London. 1991. Aug. 26. Has no phone number listed for Lung Kee in London.

• **Summary:** You can buy a yoga head stand by contacting “Fred Rohe, owner of Sunset Health Foods at 1319 9th Ave., San Francisco.”

499. *Macrobiotic Monthly (The) (Chico, California)*. 1968. News: macrobiotic center opens. 8(2):7. Feb.

• **Summary:** “The Macrobiotic Center, ‘Ohsawa House’ located in Tokyo, heralded its grand opening November 20th. The center which includes the first Macrobiotic restaurant had one hundred eminent Japanese dignitaries present to celebrate its opening. The attractive and modern structure will also be used for other functions, namely, consultation for sick, lectures on Macrobiotics, cultural activities, teacher training and workshops, distribution of organic foods, living accommodations for teaching members and publication activities. Regular staff members of the house are veterans of thirty years or more of Macrobiotic study. Subjects include cooking, treatment and study of the Macrobiotic principle. The address is 2-36-12 Mejiro, Toshima-Ku, Tokyo.” Address: The Ohsawa Foundation, Inc., 1422 Almond St., Chico, CA 95926.

500. *Natural Food and Farming (Atlanta, Texas)*. 1968. Table of contents. 14(9):1. Feb.

501. Sanae Restaurant. 1968. Introducing Sanae Restaurant, 272A Newbury Street, Boston (Leaflet). Boston, Massachusetts. 1 p. Single sided. 28 cm.

• **Summary:** “Dear Patrons and Friends: Sanae Restaurant has been designed as a unique, friendly eating place where everyone can enjoy genuine quality food in a family atmosphere. Since the present trend towards artificial, unnatural food is becoming more prevalent, we are trying to present real home cooking, combining food that is as natural as possible with the soundest old-fashioned methods of preparation. Our menu is centered around whole grains, with fresh vegetables, fish and seasonal fruits as side dishes.”

“We use real sea salt, soy bean paste (miso) and soy sauce (tamari) that has been processed and aged by natural methods, and home-made sesame salt (gomasio)... ‘Sanae’ means a young spring cereal plant which has a hope for a bright future at harvest time.

Hours: 3-10 Sunday-Thursday, 3-11 Friday & Saturday. Closed Mondays.

A photo near the top shows (between two large hearts, left to right): Peggy Taylor, Evan Root, Connie Frank, and Martin Russell, each dressed in a white cook’s apron.

Note 1. This is the earliest document seen (March 2020) that mentions Sanae (“young rice plant” in Japanese), a macrobiotic natural foods restaurant in Boston. Sanae opened its doors to the public in Feb. 1968.

Note 2. Evan Root was the first storekeeper at the first Erewhon retail store (located below street level). Address: 272A Newbury St., Boston, Massachusetts. Phone: 247-

8434.

502. Stare, Fredrick J. 1968. 10 diets to stay away from: Some of them are merely foolish; others can prove fatal. *McCall's*. Feb. p. 100-01. Reprinted in *The Macrobiotic Monthly* Vol. 8, No. 2.

• **Summary:** In this article the author, a nutritional authority from Harvard University, warns primarily of the dangers of a macrobiotic diet, created by Georges Ohsawa. "Most such diets are relatively harmless, mainly because they are followed for such a short time. Others, however, can be killing. Of these, probably the most notorious recent example is the Zen Buddhist Macrobiotic Diet... It was tragedy that first brought the Macrobiotic Diet to the attention of the public and the medical profession, with the shocking news that a young woman had starved to death on a rigorous diet of brown rice, in an effort to reach satori, a phase of enlightenment on the ladder she was convinced stretched toward Nirvana. Evidence at the inquest following the girl's death revealed that similar fatalities had occurred as a result of devotees' unshakable confidence in the hypnotic theories of the then new 'philosophy medicine.'"

The author also criticizes organic foods and nutritional supplements. Address: M.D., Chairman, Dep. of Nutrition, Harvard Univ. [Massachusetts].

503. *Boston Globe*. 1968. John Pearmain, former Boston internationalist. March 9. p. 23.

• **Summary:** John D. Pearmain, age 77, of Charlottetown, Prince Edward Island, Canada, a former resident of Boston, died Friday after a long illness.

In the 1940s he was associated with Roger Baldwin in the International League of the Rights of Man.

"Mr. Pearmain later entered the U.S. Soil Conservation Service and was vice-president of the Natural Food Associates."

He leaves his wife, Gladys (MacLeod) Pearmain and various descendants who are listed.

504. Menu #1 at Britain's first macrobiotic restaurant in London. 1968. London, England.

• **Summary:** Britain's first macrobiotic restaurant opened in March 1968 in London. The entrepreneurs were Greg and Craig Sams. Their mother, Margaret, was the first chef.

"The restaurant rapidly grew in popularity, becoming the prime watering hole to London's psychedelic community, where minds were open to the radical concept that we could improve our physical and mental health by eating unrefined and organic foods. John and Yoko became regulars, as well as the less well heeled who came for the free food. I soon christened it Seed and named the menu Tomorrow's You."

Sent to Soyinfo Center by Gregory Sams 2017 April 6. Address: London.

505. Miller, Mairaine. 1968. Soybeans for young landscape. *Organic Gardening and Farming* 15(4):38-41. April.

• **Summary:** "These Minnesota gardeners use soybeans to rejuvenate sandy soil, fruit trees, flower beds and vegetable patches—and to eat! Soybeans have earned a place in my garden. I can't praise them enough for their services—they feed the soil and us besides." The author plants a ring of soybeans around trees and ornamental shrubs, and cucurbits to shade the root area, conserve soil moisture, add nitrogen to the soil, and (when the leaves fall) in the autumn, enrich the soil with humus. They also form a protective little fence.

"I never plant any soybeans just for harvesting, but so far we've always had plenty of ripe ones by fall for eating and for next year's seed. We've come to appreciate the beans, either alone or mixed with navy or lima beans. Shelled green, they can be prepared like peas. They can be sprouted and served as a tasty fresh winter vegetable, in Chinese recipes for example. They can be ground into meal or flour and used anywhere you would use wheat flour. They make an excellent source of protein and are low in starch—a much better meat stretcher than spaghetti—surpassing other beans in providing complete protein."

The author planted two soybean varieties: Bansei (sold by Burgess Seed and Plant Co., Nichols Nursery, W. Atlee Burpee Co., and Gill Bros. Seed Co.) and Giant Green (sold by Farmer Seed & Nursery Co.). The legume inoculant recommended is "Legume Aid" from Burpee's, or "Nitragin" from either Gill Bros. or Joseph Harris Seed Co. The address of each of the above companies is given. Contains 6 photos of the author's soybeans.

506. Chico-San Inc. 1968. Chico-San Inc.—Unique foods: Retail price list. P.O. Box 1004, Chico, California. 2 p. June 1. 35 cm.

• **Summary:** This single-sheet, dated catalog and price list, printed front and back with dark brown ink on pink paper is almost identical to the edition of 15 July 1967 in appearance, content, and pricing.

However two new condiments have been added: Dehydrated tamari, and Seitan. Address: P.O. Box 1004, Chico, California.

507. Rodale, J.I. 1968. Natural health, sugar and the criminal mind. New York, NY: Pyramid Books. 189 p. June. Index. 18 cm. [50+ ref]

• **Summary:** One the cover: "A startling, thought-provoking study of the life-and-death role of nutrition and how it may affect vital social problems."

J.I. Rodale and George Ohsawa (of macrobiotic fame) would agree: sugar is the #1 worst food you can put in your body. It is poison. If a child misbehaves or is hyperactive, take him or her off sugar for one week and watch what happens.

Page 6: "Rodale is particularly concerned about the

amount of sugar Americans ingest each year. 'In 1900, the average annual consumption of sugar per individual was ten pounds,' he said. 'Today the figure is one hundred ten pounds per person.'" Address: Founder, editor and publisher, Rodale Press, Emmaus, Pennsylvania.

508. *Health Food Business Review*. 1968. Soy bean puree: Miso. Ancient Oriental health food. Boost your profits with macrobiotics! July. p. 44-45.

• **Summary:** Chico-San Soybean Puree can be used to make delicious miso soup for breakfast. "Miso, or Soybean Puree, in particular Chico-San Soybean Puree, is a naturally fermented preparation of soybeans, barley, salt and water. It is devoid of chemicals, additives and processing that have made more modern foods such commercial triumphs. Using traditional methods employed centuries ago, Soybean Puree is fermented by the use of a delicately cultivated enzyme, *Aspergillus oryzae*, and aged for a period of at least eighteen months. During this time a very complex enzymatic action of molds, yeasts and bacteria are left to chemically interact." The nutritional composition of "Barley miso" is given (based on S. Yamada, editor. 1957. *Manual of the Fermented Food Industries of Japan*. Tokyo, p. 44).

"'Thy food shall be thy remedy'—Hippocrates."

Note: This is the earliest article seen in a new wave of popular articles on miso and the Americanization of miso.

509. **Product Name:** Mugi Miso, or Hacho Miso.

Manufacturer's Name: Erewhon Trading Co., Inc. (Importer). Made in Japan. Imported from Muso Shokuhin.
Manufacturer's Address: Newbury St., Boston, Massachusetts.

Date of Introduction: 1968 August.

Ingredients: Hacho miso: Soybeans, water, sea salt.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated preferably.

New Product—Documentation: Erewhon Trading Company Inc. 1970. Jan. 1. Wholesale-retail catalogue. Soy bean products: The following types of miso were imported from Japan: Hacho miso ("Soybean puree made from soybeans, salt & water. No chemicals used in fermentation. Aged at least 18 months"; 1 lb, 2 lb, 44 lb keg). Mugi miso ("Soybean puree. A lighter miso made with barley"; 1 lb, 2 lb, 44 lb keg).

Note 1. This is the earliest document seen (March 2020) that mentions Muso Shokuhin in connection with soyfoods.

Advest Co. 1972. Nov. "Private placement \$500,400. Erewhon Inc." On page 30 is a photocopy of the label for "hacho miso (soybean paste—soybeans only)." The text reads: "Hacho miso comes from one of the oldest manufacturers of miso in Japan. The company was originally established in 1362 and has been continuously processing miso since that time. In olden times boats would come up the Yahagi River near Nagoya bringing the raw materials for miso including

the big stones which were placed on the kegs during aging. The water used in Hacho Miso is drawn from artesian wells located along the same river. The fermentation storerooms and the large cedar wood kegs used in producing Hacho Miso are over one hundred years old. The miso during its two year aging process is placed and situated so that it can freely interact with the four changes of season. Hacho Miso is easily digested and absorbed because the proteins are in a free state due to aging and fermentation. It can be used in the preparation of soups, sauces, and vegetable dishes, adding a rich and hearty flavour to them. New weight: 32 oz. (2 lb). Ingredients: Well water, soybeans, and sea salt. Distributed by Erewhon Trading Company, Inc."

Label. 1977, undated. 3.5 by 4.75 inches. Paper. Olive green, greenish brown on white. Vine illustration (hacho miso). "Erewhon Miso is produced by enzymatic fermentation and aging of soybeans a minimum of twenty-four months in wooden kegs. Its concentrated flavor makes it an ideal seasoning for enriching the taste of soups, sauces, vegetable dishes, noodles, casseroles, and fish. Erewhon Miso is completely free of chemical preservatives. Store in a cool place." Note: In 1971 Erewhon was located at 342 Newbury Street, Boston. Phone: 262-3420.

Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 236. In 1968 Erewhon started to import miso and shoyu from Japan. "A wholesale and distribution company was started that year and soon it was trucking a line of fine Japanese imported red, barley, and Hacho misos to a growing number of natural food stores." By 1970 sesame miso and tekka [miso] were added to the Erewhon line. By 1976 brown rice (genmai) miso was added.

Ad (7.5 by 13 inches, full color) in *Natural Foods Merchandiser*. 1989. Feb. p. 25. "Erewhon... Macrobiotic foods you can recommend with confidence." There are now 4 varieties of miso under the Erewhon brand: Hacho (note new correct spelling), genmai, kome, and mugi.

At about this time, Erewhon also sold Short Grain Brown Rice, Whole Wheat Flour, and Corn Meal.

510. **Product Name:** Moromi.

Manufacturer's Name: Erewhon Trading Co., Inc. (Importer). Made in Japan. Imported from Muso Shokuhin.
Manufacturer's Address: Newbury St., Boston, Massachusetts.

Date of Introduction: 1968 August.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated preferably.

New Product—Documentation: Erewhon Trading Company Inc. 1970. Jan. 1. Wholesale-retail catalogue. Products imported from Japan include: "Moromi—A thick sauce removed from the bottom of the soy sauce kegs after fermentation. Its uses are unlimited in soups & sauces"; 7 oz.

511. *Organic Foods and Gardens*. 1968. Live foods from

living soil: Fall 1968–Summer 1969 (catalog and price list). Ojai, California. 8 p. 22 cm.

• **Summary:** This 8-page catalog and price list is printed front and back with black ink on white paper. All items are naturally grown, tree ripened, sundried, un sulphured. Fruits and honey. Nuts. Seeds (incl. sesame). Hi-Pro protein concentrate–delightful all-purpose food (25% protein, chocolate-like [carob] flavor, made from soy beans, wheat germ, brewer’s yeast, alfalfa, kelp, carob, date sugar, sunflower seeds, unhulled sesame seeds). Fruit juices. Sesame butter. Peanut butter. Olive oil. Pollen. Soy beans–small for sprouting. Brown rice. Powdered kelp, etc. Address: 1384 So. Rice Road, Ojai, California 93023. Phone: 805-646-1287.

512. *SoyaScan Notes*. 1968. Chronology of soybeans, soyfoods and natural foods in the United States 1968 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1968, March. Saci, a liquid soymilk in chocolate and caramel flavors, launched by Coca-Cola Industrias Ltda. in Brazil. Indicates growing interest in commercial soy beverages in Third World countries.

1968, April. First Workshop on Soybean held in New Delhi by the Indian Council of Agricultural Research.

1968, April. *Aerobics* by Dr. Kenneth Cooper published. The book soon becomes a major force in America’s new wave of interest in health, fitness, and jogging.

1968, May. Conference on Protein Rich Food Products from Oilseeds held by the USDA in New Orleans, Louisiana. Oilseed proteins are increasingly seen as the answer to the “protein crisis.”

1968, May. *Ten Talents* self-published by Frank and Rosalie Hurd of Chisolm, Minnesota. An early vegan cookbook (using no meat, eggs, or dairy products) with many innovative soy recipes.

1968. *International Action to Avert the Impending Protein Crisis*, a United Nations publication, recommends soybeans as the single most promising protein source to close the “protein gap.”

1968, Aug. Erewhon starts importing foods from Japan, initially from Muso Shokuhin (Osaka, Japan), then later by correspondence with Mr. Akiyoshi Kazama, who worked for an import/export company named Mitoku, which sold no food at that time. The initial orders include red miso (made by one of George Ohsawa’s cronies) and natural shoyu made by Marushima. These soon become high-volume items.

1968. *Plant Foods for Human Nutrition*, a scientific journal, starts publication from the Vegetarian Nutritional

Research Centre, Watford, Herts, England. Runs many articles on soy nutrition and on vegan diets.

513. Photographs of Erewhon retail store at 342 Newbury Street. 1968. Boston, Massachusetts.

• **Summary:** (1) Front of the store. (2) Back of the store. To the left is the door to the office. On the pallets stacks of both multiwall paper sacks (left) and burlap bags (rear). They arrived at the store by the truckload and the workers (including Jean) had to unload them by hand–sometimes hoisting them onto one shoulder. (3) Jean Allison seated at a desk in the Erewhon office.

These photos were sent to Soyinfo Center by Jean Allison Young of Chatham, Massachusetts, in Feb. 2011.

Letter (e-mail) from Norio Kushi. 2011. Feb. 8. These photos were “both taken at 342 Newbury Street, Boston, in 1968 soon after the move from 303-B Newbury to 342 Newbury, in Boston. I am guessing that both photos were taken within minutes of each other.

“The person behind the cash register, facing towards the right in the photo is Eric Utne, who later worked at *East West Journal*, eventually becoming the editor. He later left *East West Journal* and he, along with his then wife, Peggy Taylor, started *New Age Journal*. When Eric and Peggy split up, Peggy retained *New Age Journal*, with Eric Utne soon thereafter starting *The Utne Reader*. Eric Utne currently lives in Minneapolis [Minnesota] with his wife, Nina...

“The person facing Eric Utne, might be Jim Ledbetter,... or it could be a customer who I have never met. Jim Ledbetter and Jean Allison both lived at 216 Gardner Road. in Brookline with our family during this time. Eric Utne lived in one of the other study houses, 6 Ellery St, Cambridge, Massachusetts.

“The 2nd photo is of the stockroom in the rear half of

the store. The size of the stockroom and how the bags of rice and other commodities are stacked would indicate the photos were taken soon after the move. Shelf space in the retail section kept growing along with business, and the rear storage room, once half the square footage of the store began shrinking as the need to expand the retail space increased, eventually necessitating the opening of the warehouse at 33 Farnsworth St. in Boston. Other than brown rice being in the burlap or paper 100 lb sacks, I don't know what any of the other products would be in the other sacks or boxes.

"As I recall, we didn't start getting the 50 lb organic rice in the paper sacks till after the opening of the Erewhon warehouse. Up till that point I recall the brown rice came in the 100 lb burlap sacks. Therefore, I feel that what is in the paper sacks would be beans and grains other than brown rice.

"I was noticing on the selves to the left there are smaller sacks. All the rice, grains, beans, etc were all packaged from bulk into these bags by hand. The name of the item in these bags was rubber-stamped onto the front of each bag just prior to filling it.

"We also received many Japanese items, such as shoyu (which we called tamari), miso, and umeboshi in those bulk wooden kegs. They were hand poured or scooped into bottles and jars. I don't see any of these items in this photo. The store photo was also rather Spartan, which is what lead me to feel that these photos were taken soon after moving from 303-B Newbury St. to 342 Newbury St. "I would stop by the store regularly but didn't actually 'work' there during this time. I used to come in and just help out after school or on Saturdays just for the fun of it.

"At the prior location at 303-B Newbury St, I spent many full Saturdays helping out. I was there one Saturday when we had the very first day we did over \$100.00 in sales. The other person who was working on that day was Jean Mohan. At least during the 303-B Newbury Street days, people who lived in our house at 216 Gardner Rd, Brookline, MA, would take turns working at the store, although Evan Root was the manager."

Letter (e-mail) from Evan Root. 2011. Feb. 10. These two photos "are of the store at 342 Newbury St. This was the 'first edition.' It was, of course, remodeled from the shell that was rented. But it is before a bigger remodeling which yielded the whole first floor for the store, bins for grains and beans, and a walk-in refrigerator where the office was. The accounting office and storage moved to the basement and a winched lift to bring the goods up for stocking." Address: Boston, Massachusetts.

514. Abehsera, Michel. 1968. Zen macrobiotic cooking. New Hyde Park, New York: University Books/Avon. 224 p. Index. 18 cm. [15 ref]

• **Summary:** Abehsera's first macrobiotic cookbook contains a strict approach to macrobiotics. Includes many short stories by and about George Ohsawa.

In the Introduction, the author states (p. 13) that if he had been asked to write a cookbook 5 years ago, he would have been utterly amused, for he was in a precarious state of health and, for him, a cookbook was basically a collection of "recipes for stuffing one's belly.

"These five years have been an exhilarating adventure and happiness spent with my dear wife and children together with a 'thousand' friends. The anguished thoughts of a 28-year-old have been dissipated and he has been freed from the tortures and agony that previously pervaded his existence.

"This new and happy change has been due to the profound influence of George Ohsawa, who made it possible for me to recover my health so that I could leave France [Paris] and journey to New York, the city of my dreams. Now, I have decided to write a cookbook."

Contents: "Introduction. How the Author of This Book Became a Cook. A Simple Introduction to the Law of Opposites Before We Get to the Recipes. A Few Do's and Don'ts. Don't Worry About Essentials—They Are in Your Foods. The Vitamins. The Minerals. Recommendations. The Foods from Yang to Yin. A Quick Summary of What You Will Learn. Before You Dive into Your Pots. Grains—Cereals. Rice, the King of Kings. Couscous. Crepes and Pancakes. Millet. Breads. The Children of Grain. Secondary Foods [grains are the primary food]. Nituke [Nitsuke]. Seaweed. Tempura. About Eating Only Rice. Hors d'oeuvres and Accompaniments. About Balance. Soups. About Fasting. Fish and Seafood. The Wisdom in Grains. "Main Dishes." How About Cold Drinks? Gomasio [Gomashio]. Sesame Salt. About Chewing. The Worst Thing [with respect to food: overeating]. Sauces. About Salt. Desserts [without sugar]. Little Things to Know. Bibliography [12 books]. Monthly Publications [3]. Shopping Guide.

Glossary: Aduki or azuki beans. Bancha, Brown rice. Bulgur. Burdock. Cellophane noodles. Chapati. Couscous. Daikon. Ginseng tea. Gomasio [sesame salt]. Hiziki [Hijiki]. Japanese knife. Kasha. Kokkoh. Kuzu. Lotus tea or kohren tea. Miso. Mu tea ["A very yang beverage from Japan. An herb tea made with ginseng and 15 medicinal plants"]. Nituke [Nitsuke]. Nori. Sea salt. Semolina. Soba. Soy or soya sauce (see Tamari). Suribachi. Tahini. Tamari. Tempura. Tofu. Udon. Umeboshi plums [preserved in salt]. Vegetable brush or tawashi. Wok.

Contains the following soy-related recipes: Miso spread (with sesame butter, p. 105). Miso onion spread (p. 106). Miso in green (with green pepper and scallion, p. 106-07). Miso soup (p. 117). Chinese soup (with miso, p. 120). La belle jardiniere (with miso, p. 123). Koi-koku (with carp, burdock, and miso, p. 125-26). French onion soup (with tamari, p. 132). Soup stock made with miso paste (p. 137). There are no tofu or seitan recipes in this book. It is not a vegetarian cookbook, since many recipes call for fish and seafood.

Monthly publications (p. 208): (1) *Yin-Yang*, Centre International Ignoramus, 26 Rue Lamartine, Paris 9eme, France. (2) *The Macro-Biotic Monthly*, Ignoramus Press, Los Angeles, California. (3) *The Order of the Universe*, Order of the Universe Publications, Box 203, Prudential Center Station, Boston, Massachusetts.

Shopping guide (p. 209-10): Those marked with an asterisk (*) welcome mail orders. (1) Chinese products (incl. tofu, woks): Wo Fat Co., 16 Bowery, New York, N.Y. 10013. Mon Fong Wo Co., 36 Pell St., New York, N.Y. 10013. Yuit Hing Market Corp., 23 Pell St., New York, N.Y. 10013.

(2) Organic fruits, vegetables and whole grains. Also oil, sea salt and many other health foods. * Good Earth-Natural Foods, Inc., 1336 First Ave., New York, N.Y. * Nature's Cupboard, 80 E. Seventh St., New York, NY. Living Foods Coop, Inc., 165 Ninth St., New York, N.Y. * Greenberg's. 125 First Ave., New York, N.Y.

The next two stores are the same as above but no fruits and vegetables: * Brownie's Natural Food Stores, 21 E. 16th St., New York, N.Y. * Kalustyan Orient Export Trading Corp., 123 Lexington Ave., New York,

(3) Japanese food products: Bancha tea, seaweed, Japanese vegetables, Japanese knives, soba and udon noodles, dried lotus, burdock, tofu, sesame seeds, bonito and other dried fish, tawashi [vegetable scrubbing brush], daikon [giant white radish]: * Japan Mart Inc., 239 W. 105th St., New York, N.Y. Katagiri & Co., Inc., 224 E. 59th St., New York, N.Y. Tanaka (K.) Co., Inc., 326 Amsterdam Ave., New York, N.Y.

(4) Wholesale organic products and all macrobiotic products: Chico San, Inc., 1262 Humboldt, Chico, California. The Infinity Co., New York, N.Y., 10012. Balanced Foods, 2500 83 St., North Bergen, N.J. [New Jersey]. Specialty Food, 116 W. Houston St., New York, N.Y.

Glossary (p. 211-15): Aduki or azuki beans, bancha, bonito flakes, brown rice, bulgur, burdock, cellophane noodles, chapati, couscous, daikon, ginseng tea, gomasio [gomashio], hiziki [hijiki], Japanese knife, kasha, kokkoh [grain milk; weaning food for babies], kuzu, lotus tea or kohren tea, miso, mu tea, nituke [nitsuke], nori, sea salt, semolina, soba, soy or soya sauce (see tamari), suribachi, tahini, tamari, tempura, tofu, udon, umeboshi plums, vegetable brush or tawashi, wok.

A few glossary definitions: "Tamari: A pure soy sauce concentrate, a byproduct of miso. Commercial soy sauce is not recommended; macrobiotic stores have the right kind."

"Tofu: A curd made of the liquid in which crushed soybeans have been softened; it is solidified by boiling" [sic].

Note: This book was published in London in 1969 by Anchor Press, Ltd. (201 p.). Address: New York.

515. Guide to the Clive McCay papers, 1920-1967 (Archival collection). 1968. Division of Rare and Manuscript Collections, 2B Carol A. Kroch Library, Cornell Univ.,

Ithaca, NY 14853. 57 boxes, 52.1 cubic feet

• **Summary:** This is the single best source of information about the life and work of Clive McCay. For a finding aid Google: Clive McCay Papers Cornell University.

Collection No: 21-14-1097. Creator: Clive Maine McCay 1898-1967. Abstract: Includes notes, reprints, reports, clippings, photographs, and correspondence documenting McCay's research concerning the effects of nutrition on the aging process, dietary habits of naval personnel and the development of nutritionally-sound rations during World War II, canine nutrition, fluoride and its use in water treatment, parabiosis, and the development of a high-protein, low-carbohydrate bread ("Cornell Bread"). Also included are materials from his course on the History of Nutrition; printed reports from a U.S. Army research project on the effects of radiation on food; articles on medicine, nutrition, and animal science; slides used to illustrate lectures on nutrition and parabiosis; and an annotated bibliography of articles pertaining to the History of Nutrition. Also, letters and notes about the naming and designation of the McCay Reading Room in Mann Library. Address: Ithaca, New York. Phone: (607) 255-3530.

516. Kuriyama, Kiichi. 1968. *Shizen shoku no kôryoku* [The efficacy of natural foods]. Tokyo: Tokuma Shoten. 235 p. 18 cm. [Jap]*

• **Summary:** Discusses a natural foods, vegetarian diet. The author was born in 1889.

517. Student ID for Wallace Gorell at Erewhon in Boston. Massachusetts. 1968. Boston, Massachusetts.

• **Summary:** (1) Student identification, East-West Institute, Wakefield, Massachusetts 01880. Wallace Gorell. Date of birth: 21 Dec. 1944. With photo ID and signature.

Concerning the date of the card, Wallace writes: "The ID card says on it that it's valid for academic year '70-'71 which is confusing. I was in Japan on that first trip from August '69 through all of 1970. But I cut my hair just before I left so that photo pre-dates Aug. 1969. As I recall, we made up those ID cards as a way of getting student discounts on our air tickets to Japan. I don't think there ever was an East-West Institute where we actually took classes. So I guess I made up that card to use to get my air ticket and to take to Japan with me—having it show that it would be valid still for over a year—and then I decided to cut my hair."

This card was sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010. Address: Boston, Massachusetts.

518. Photographs of Paul Hawken and Evan Root inside the Great Buddha at Kamakura, Japan, looking out the rear window. 1969.

• **Summary:** This Buddha is hollow and there are windows in the rear and a staircase up through the inside. This photo

was taken shortly after Paul and Evan arrived in the spring of 1969.

Evan writes (Nov. 2010): “Paul and I went to Japan together, by boat from San Francisco to Yokohama. We took the *Brazil Maru* of the Mitsui OSK line. This was a combination passenger and freight vessel taking 15 days to cross with a one day stop in Honolulu, Hawaii.”

Q: Why did you go and why did Paul go? Was it Michio or Aveline Kushi’s idea? “In conversations with Michio, he often said, ‘when you go to Japan...’ such and such. He never said ‘if you go to Japan.’ I had been running Sanae Restaurant for about a year and a half (a long time in those youthful days). We had gone from a few loyal customers to lines down the block waiting to get in every night. I was starting to think about opening a second restaurant. Michio counseled me not to limit myself by getting tied down to business. At that time, the Boston Macrobiotic community was like a school, and people were coming from all over the country to study. Many of these people worked at Erewhon, Sanae or other macrobiotic enterprises. I wanted to take on a new adventure, and, at the same time make room for others to grow. I did not know exactly what to do, but Michio’s words ‘when you go to Japan’ filled that gap. Of course, I thought, the next step was to go to the country of origin of this movement.

“As far as the case with Paul, I cannot speak for him. My sense is that it was for cultural education plus business.

“Paul and I had been close friends since he arrived in Boston in the summer of ‘68. He hung out at the little Erewhon (303B), and picked my brain about everything. I wanted to start a restaurant and convinced Aveline that Paul was the best man to take over the store. When this was settled, Martin Russell and others filled in at Erewhon while Paul and I took a drive away car out to California so he could arrange to make the move to Boston. On the way, we stopped in all sorts of places to give classes in macrobiotic philosophy and cooking. We also visited Jacques and Yvette DeLangre, Reme’s ranch and Chico-San, places where food processing was going on (Reme’s tekka [miso] and onion concentrate were excellent).

“It seemed like Paul and I were both on the same timetable in terms of needing some new horizons, so it was convenient and natural that we went at the same time. Though Erewhon paid for his trip, and Sanae paid for mine, we both went on business visas connected to Erewhon.”

Q: Did you stay together or see each other often?

“Our arrival was celebrated by a big dinner party at Lima Ohsawa’s. Because we were Michio’s students, many people were there to welcome us. It was a testament to the esteem with which Michio was held in the Japanese *seishoku* [macrobiotic] community. Michio and Aveline themselves had not been back to Japan since leaving for the U.S.

“Note: *seishoku* is the word that was used for ‘macrobiotic’ in Japan when I was there. It is written

with the characters for correct / proper + food. The word ‘macrobiotic’ was not commonly used in Japan at that time.

“Paul and I were taken here and there for some sight-seeing including the trip to Kamakura. We also met Mr. Kazama [of Mitoku]. After a short time together in Tokyo, Paul went to Osaka to stay with the Okada family and connect into the food scene and make connections for Erewhon. We saw each other from time to time, once to visit some food production sources like shoyu, rice vinegar and sesame oil. Another time we went on an outing to meet Kôji Ogasawara, the noted proponent of *Kototama* (the word soul); he was the author of a book titled *Kototama: The Principle of One Hundred deities of the Kojiki*. This was something Michio had told us about, related to a kind of esoteric history of Japan. Mrs. Okada took us to Ogasawara’s and we listened to him tell us about the *Kototama* and the *Kojiki*, though due to the language difference and the esoteric nature of the subject, it went largely over my head.”

Q: What of importance did each of you accomplish? How long did each of you stay?

“I recollect that Paul stayed somewhere around 9 months. During that time he did a lot of relationship building for Erewhon, as well as learning about foods and processing. Certainly, the relationship with Muso Shokuhin was deepened.

“As for me, after a month or two, I realized that I didn’t really know what I was doing over there. I had begun to take lessons in Japanese at the Tokyo Nippongo Gakko in Shibuya, but this was no easy language that I could pick up without really applying myself. There quickly came the day that I had to decide to let it go or really dig in. I choose to dig in. That became the what that I was doing. To me that was probably the single most important decision because it affected everything else. After about two years of study, I serendipitously met a teacher who could actually teach the language to Westerners. This was a revelation, and I began to learn the language according to the Japanese way rather than the translated from English way. This deepened my ability to relate and opened many doors for me. My last year there, I worked for Muso Shokuhin as their translator / international correspondent.

“I stayed in Japan for 3 years and 7+ months. By agreement if I did not return within 18 months, I let go of my 50% ownership position in Sanae Restaurant at a prearranged figure (a modest sum) and used that money to support my living and education in Japan until I knew enough to utilize my Japanese in gainful ways.”

Note: This photo was sent by Evan Root to Patricia Smith and by Patricia to Soyinfo Center (Nov. 2010).

519. Photograph of Paul Hawken and Evan Root before the Shinto temple gate at Ogasawara. 1969.

• **Summary:** Paul Hawken (left) and Evan Root (summer 1969) in front of the gate of a Shinto shrine. This particular

shrine was said to house ancient historical documents regarding the esoteric meaning of the Japanese language, “word soul” or *Kototama*.

They had met Kōji Ogasawara, the author of *Kototama, The Principle of One Hundred Deities of the Kojiki*. He also founded Dai San Bunmei Kai (The Third Civilization Association).

Note: This photo was sent by Evan Root to Patricia Smith and by Patricia to Soyinfo Center (Nov. 2010).

520. Product Name: Erewhon Soy Sauce. Later renamed Tamari Soy Sauce.

Manufacturer’s Name: Erewhon Trading Co., Inc. (Importer). Made in Japan by Marushima Shoyu.

Manufacturer’s Address: 342 Newbury St., Boston, MA 02115. Phone: (617) 262-3420.

Date of Introduction: 1969 October.

Ingredients: Water, wheat, soybeans, salt.

Wt/Vol., Packaging, Price: 16 oz or 32 oz bottle, or 18 liter keg.

New Product–Documentation: Erewhon Trading Co. Inc., Wholesale Retail Catalogue. 1970. Jan. 1. “Soy Sauce (imported). Aged naturally in wooden kegs at least 18 months.” In 16 oz or 32 oz bottle, or 18 litre keg.

Ad in East West Journal. 1973. Jan. 15-30. p. 24 (back cover). “Erewhon visits a soy sauce factory [Marushima Shoyu].” Erewhon’s “Tamari soy sauce” [actually shoyu] is made by Marushima Shoyu, located on Shodoshima Island. It is aged in cypress wood tanks for about 3 years.

521. Bolduc, William T., Jr. 1969. Articles of incorporation (Non-profit): Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 3 p. Nov. 4. 26 cm.

• **Summary:** This is the document that created Eden Organic Foods, Inc. (later known as Eden Foods Inc.) on 4 Nov. 1969. The document was signed and received on 31 Oct. 1969. The purposes for which the corporation is formed: (1) to provide organic foods, cook books and printed matter relating thereto to the community at reasonable prices. (2) to promote the increased consumption of health foods. (3) to conduct these activities and achieve these objectives without pecuniary profit [i.e. not for profit].

Article III: Location of the first registered office is: 211 South State St. [225 Nickels Arcade is crossed out], Ann Arbor, Washtenaw County, Michigan 48104. Article IV: The name of the first resident agent is: William T. Bolduc, Jr.

Article V: “Said corporation is organized upon a non-stock basis. Real property: None. Personal property: Cash—\$170 approximately. Grains, condiments, and dry goods with a wholesale value of \$100 approximately. The corporation is to be financed by donations from the community and by the retail sale of organic foods, cook books, and materials relating thereto.

Article VI; Names and addresses of the residents:

William T. Bolduc, Jr., 6210 Bethel Church Road, Saline, Michigan. Judith Bolduc (same address). Ronald Teeguarden, 915 Oakland, Ann Arbor, Michigan. Gloria Dunn, General Store, 211 South State St., Ann Arbor, Michigan. One additional name under article VII is Linda Succop (at the same address as the Bolducs).

Note 1. The address given, 211 South State St., is the address of Gloria Dunn’s General Store. This was because on Oct. 31 Bill Bolduc had not completely finalized the rent agreement for 514 East William St. in Ann Arbor—which would be Eden’s address from the day the company opened in early Nov. 1969 until Nov. 1970 when they moved to 211 South State St. (a newly-decorated mini-mall on the main street of campus; the space previously occupied by Gloria Dunn). But by Nov. 1970 Gloria Dunn no longer had any connection with the building and Eden had just re-incorporated as a for-profit corporation. Thus (according to both Tim Redmond and Bill Bolduc, 30 Sept. 1998), it was a coincidence that Eden started business as a for-profit corporation at the main addresses listed on its non-profit articles of incorporation.

Note 2. A second document from the Michigan Department of Commerce (Lansing, Michigan, dated 19 July 1984) certifies that Eden Foods, Inc. was validly incorporated on 4 Nov. 1969.

Note 3. Both of these documents were kindly sent to Soyfoods Center on 24 Sept. 1998 by Michael Potter, President and CEO of Eden Foods.

Note 4. This is the earliest record seen (March 2020) concerning Eden Foods. Address: Saline, Michigan.

522. Product Name: Tamari Soy Sauce.

Manufacturer’s Name: Eden Organic Foods, Inc. (Marketer-Distributor). Purchased from Erewhon (Boston–Importer). Made in Japan.

Manufacturer’s Address: 514 East William St., Ann Arbor, MI 48104.

Date of Introduction: 1969 November.

Wt/Vol., Packaging, Price: Pint and quart bottles.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Inc. 1971. July 26. Wholesale pricelist. “Tamari Soy Sauce” is now sold in pints, quarts, or liters.

Eden Foods, Inc. 1974. Feb. 1. Wholesale prices, FOB. “Tamari Soy Sauce (Erewhon).” This is the first time the word “Erewhon” appears after Tamari. It looks like Erewhon was requiring Eden to add it—which may have caused bad feelings.

Eden Foods catalog. Winter 1975-76. Page 12 states: “Tamari Soy Sauce (Erewhon). Tamari Soy Sauce (Japan-Marushima). The latter was available only in 4.75 gallon sizes. Eden has found a way to go around Erewhon, by importing from Marushima, probably via Muso Shokuhin.

ARTICLES OF INCORPORATION

These Articles of Incorporation are signed and acknowledged by the incorporators for the purpose of forming a non-profit corporation under the provisions of Act No. 327 of the Public Acts of 1931, as amended, as follows:

ARTICLE I.

The name of the corporation is Eden Organic Foods, Inc. 11/2/69

(Please type or print corporate name)

ARTICLE II.

The purpose or purposes for which the corporation is formed are as follows:

- (1) to provide organic foods, cook books and printed matter relating thereto to the community at reasonable prices;
- (2) to promote the increased consumption of health foods;
- (3) to conduct these activities and achieve these objectives without pecuniary profit;
- (4) to borrow money and to make and issue notes and evidences of indebtedness whether secured by mortgage, pledge or otherwise;
- (5) to do any and all things necessary, useful, convenient or incidental to the foregoing.

ARTICLE III.

Location of the first registered office is:

211 South State Street
225 Nichols Arcade Ann Arbor Washtenaw Michigan 48104
(No.) (Street) (City) (County) (Zip Code)

Postoffice address of the first registered office is:

Same Michigan
(No. and Street or P. O. Box) (City) (Zip Code)

ARTICLE IV.

The name of the first resident agent is William Bolduc, Jr.

C-2002 (Non-Profit Articles of Incorporation)
(Formerly Form 2)

and past president of Eden Foods. 1991. Dec. 8.

Eden Organic Foods first began selling soyfoods commercially in November 1969, starting with their first order from Erewhon in Boston. They would buy “tamari” (actually shoyu) and miso (kome = rice, mugi = barley, and Hacho varieties) in bulk from Erewhon (which imported them from Japan). At their store, Linda Succop (Bill’s wife’s sister) would repackage the products, putting the shoyu into bottles and the miso into plastic bags. They were labeled using plain white self-adhesive gummed labels with a rubber stamp. One stamp contained the name and ingredients for each product, and another, that was stamped below it, gave the company name and address. They wrote in the weight or volume by hand near the bottom of the label.

523. Product Name: Hacho Miso (Soy Paste), Mugi Miso (Barley Soy Paste).

Manufacturer’s Name: Eden Organic Foods, Inc. (Marketer-Distributor). Purchased from Erewhon (Boston–Importer). Made in Japan.

Manufacturer’s Address: 514 East William St., Ann Arbor, MI 48104.

Date of Introduction: 1969 November.

Wt/Vol., Packaging, Price: 1 lb. plastic bags.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Inc. 1971. July 26. Wholesale pricelist. “Hacho Miso (Soy Paste), Mugi Miso (Barley Soy Paste).” 1 lb containers.

Eden Foods, Inc. 1974. Feb. 1. Wholesale prices, FOB. “Mugi Miso, barley-soy paste (Erewhon).” This is the first time the word “Erewhon” appears after miso. It looks like Erewhon was requiring Eden to add it—which may have caused bad feelings.

Eden Foods Fall and Winter Catalog. 1977-1978. “Hacho Miso (Eden) soy paste. Mugi Miso (Eden) barley soy paste. Kome Miso (Eden) rice soy paste. Each is available only in 14 oz, 8.8 lb, 22 lb, and 44 lb sizes. Eden has found a way to go around Erewhon, probably by importing via Muso Shokuhin.

Eden Foods Catalog. 1978. Page 18. Eden Foods has now (happily) started to write the names of its misos in English rather than Japanese as follows: Eden Soybean Miso (Hacho), Eden Barley Miso (Mugi), Eden Rice Miso (Kome), and Eden Brown Rice Miso (Kome). A photo shows Eden’s miso line with labels in 1 lb plastic bags and plastic kegs.

524. *SoyaScan Notes*. 1969. Chronology of Eden Organic Foods, Inc. Renamed Eden Foods, Inc. in April 1971. Part I. 1969 to 1972. 31 Jan. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1969 Nov. 4—Eden Organic Foods is named and incorporated as a non-profit corporation by Bill Bolduc. Other names on the articles of incorporation are Judith Bolduc, Ronald Teeguarden, Gloria Dunn, and Linda Succop. It is a natural foods co-op retail store at 514 East William St. in Ann Arbor, Michigan. Bill is president of the company and his wife, Judy, is part-time secretary. The date of incorporation, Nov. 4, was selected by an astrologer, Michael Erlewine, because it was astrologically propitious. Michael also designed the Eden logo of four sprouts in a circle. Also in Nov. 1969 Eden begins selling soyfoods, tamari and miso purchased from Erewhon.

Prior to this, starting in about the summer of 1969, Ronnie Teeguarden and Gloria Dunn had started a loosely-knit food buying co-op—which had no name, no assets, no formal structure, and no bank account. Original or very early members included Tim and Pattie Redmond, Mark and Nancy Retzloff, Linda Succop, Iona Teeguarden, and Bob Thorson. On about 3-5 different occasions they collectively ordered macrobiotic staples (including tamari and miso) from Erewhon in Boston, Massachusetts, using the Erewhon catalog. When the foods arrived, the members got together and divided them up at the Teeguarden-Leabu General Store, at 209 South State St. in Ann Arbor. This general store, located in the basement below Marshall’s Bookstore, carried mostly antique clothing and records, and the art of local artists. By September 1969, Bill and Judy Bolduc joined the food co-op. They also joined the Zen Macrobiotic Supper Club; all of its members were also members of the food co-op.

In the fall of 1969 the Teeguarden-Leabu second-hand store looked like it was about to close, which would leave the food co-op without a home. The group (especially Ronnie Teeguarden) convinced Bill Bolduc to take charge of the food co-op and find it a permanent home, which he did—in an upstairs apartment at 514 East William St. Members of the informal food-buying co-op who worked at Eden Organic Foods included Bill Bolduc, Gloria Dunn, and Tim Redmond. An environmental group named the Environmental Defense Education Network (EDEN) also operated out of the Teeguarden-Leabu General Store; it was from this group that Eden got its name. That fall, after

the Eden Organic Foods co-op was up and running, Tim Redmond went to Boston to work and study at Sanae, a macrobiotic restaurant on 272A Newbury St.

1970 summer—Bill Bolduc establishes Eden's first contact with an organic food grower (Bill Vreeland of Ypsilanti, Michigan, who grows organic wheat and soybeans). He soon makes Eden's first direct purchase of organically grown wheat, which the company mills and sells.

1970 July 6—Eden Organic Foods, Inc is reorganized upon a stock basis. Bill Bolduc (who resides at 6210 Bethel Church Rd., Saline, Michigan) owns all the shares (1,000). Other people listed on this document are Judith Bolduc, Ronald Teeguarden, and Gloria Dunn.

1970 Sept.—The fledgling company has an offer from Cynthia Shevel to move into a newly decorated mini-mall at 211 South State St. on the main street of campus. They need money to finance the move. Tim Redmond's father says he will help finance the expansion only if the business is reorganized as a for-profit corporation. So Eden is changed into a for-profit corporation, and Redmond invests the \$10,000 he borrowed from his father in Eden in exchange for 50% ownership. In Nov. 1970 Eden moves into the mini-mall (they register the new address on Nov. 17) and soon begins to mill flour and bake granola at the new store. Bolduc and Redmond are now equal partners.

1971 April 8—Bolduc registers a change in the company name to Eden Foods, Inc. from Eden Organic Foods, Inc. After the store was up and running, Redmond returns to Boston and Sanae restaurant, where he completed his studies.

1971 Jan.—Michael Potter is hired by Bill Bolduc. Mike had initially had a good-paying job at an art gallery in Royal Oak, Michigan. Then he began working for, and eventually became a partner in Joyous Revival, a macrobiotic and natural foods retail store in Birmingham, Michigan. At that time he and his wife, Carol Roller Potter (Ron Roller's sister), moved from Royal Oak to Walnut Lake, Michigan—to be nearer to Joyous Revival. In the fall of 1970 Michael Potter, while still working at Joyous Revival and at Bill Bolduc's request, had done volunteer work to try to help a failing new Eden retail store in downtown Detroit on the campus of Wayne State University. This store was owned jointly by Eden and two people named John and Darleen—two of the first people in the area interested in macrobiotics. By Jan. 1971 it had become evident that the store would not be able to survive financially, so Michael's first job after being hired was to make one last try to save it, then to help in shutting it down.

1971 May or June—Tim Redmond returns to Ann Arbor permanently, having finished his macrobiotic training in Boston. He planned to open a restaurant like Sanae in Ann Arbor but instead got increasingly involved with Eden Foods.

1971 June—Eden starts to wholesale natural foods out of the back of their retail store at 211 South State Street.

They buy increasingly from original sources instead of other wholesalers. Buying clubs and co-ops come to the retail store to pick up their bulk foods.

1971 July—Eden's wholesale pricelist, dated July 26, shows that Eden is selling bulk (50 and 100 lb) soybeans, corn, soft wheat, and rye, which are being grown organically in Michigan (by Tom Vreeland). Eden stone-ground a portion of them into flour—on order. Eden is also selling numerous bulk and packaged grains, cereals, flours, and beans from Arrowhead Mills in Deaf Smith County, Texas; some are organically grown.

1971 early summer—Bill Bolduc asks Mike Potter to manage the Eden retail store at 211 South State St. Mike and his pregnant wife, Carol, move to Ann Arbor from Walnut Lake. By this time the company name was Eden Foods, Inc.

1971 Aug.—Eden Foods starts to distribute its wholesale bulk products, especially in the Detroit area. The company starts to bring in small trailer loads of staples from Arrowhead Mills in Texas. Bolduc and Redmond, realizing that Eden is the only natural foods store in the area, borrow some money and rent a 4,000 square foot Quonset hut warehouse on North Main Street north of Ann Arbor near the Huron River. They expand their wholesale and distribution operations.

1971 Oct.—Mike Potter is given 13.5% of the common stock of Eden Foods, Inc. largely to compensate him for his many hours of unpaid volunteer work. According to Michael Potter (Dec. 1986), at this point the common stock ownership of Eden Foods is: Between Bill and Judy Bolduc 43.5%, Tim Redmond 43.5%, and Michael Potter 13.5%. Potter later says (Feb. 1993) that Bill Bolduc and Tim Redmond now own the same number of shares, but Judy Bolduc owned a small number of shares so the Bolducs owned the largest block.

1972 fall—Ron Roller starts to work part time for Eden Foods. Continued. Address: 514 East William St. in Ann Arbor, Michigan. Phone: 313-769-8444.

525. *SoyaScan Notes*. 1969. Chronology of Eden Foods, Inc. Part II. 1973 to Nov. 1981. 31 Jan. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: 1973 March—Eden moves into a larger warehouse at 310 West Ann Street in Ann Arbor, sharing it with Midwest Natural Foods, which initially was not a competitor. At about this time, Ron Roller starts working full-time for Eden. While at this warehouse, in late 1973 or early 1974, Eden receives its first shipments of imported Japanese natural foods from Mr. Kazama of Mitoku in Tokyo. Tim Redmond had ordered these foods from Mr. Kazama at a meeting of the Natural Foods Distributors Association in Florida. Initially Eden was forced to import Erewhon-branded products. Redmond recalls that at this time he was working at and managing the warehouse and Potter was working at and managing the retail store. Redmond was managing the corporation because he controlled it.

1973 summer.—The Eden retail store moves to a much larger location at 330 Maynard St. in Ann Arbor, on the University of Michigan campus. It now includes three operations under one roof in 6,000 square feet of leased space: A large natural foods retail store, a natural fast-food deli, and a natural foods bakery named Sun Bakery that had relocated itself from Kalamazoo, Michigan. This operation proved to be very profitable; it paid off all Eden's debts and paid for the new warehouse, offices, trucks, and equipment.

1973 July—Bill and Judy Bolduc leave Eden Foods, selling their stock to Mike Potter for \$2,500 cash. Tim Redmond becomes president. Redmond ends up owning 51% and Potter 49% of the shares in Eden Foods. Potter recalls that he bought the stock directly from the Bolducs, then gave a small amount to Redmond so that Redmond would have majority ownership. Redmond recalls that the Bolducs sold their stock back to the corporation, then Redmond sold enough shares to Potter so that he (Redmond) would keep control with 51% of the shares.

1973 late or 1974 early—Potter and Redmond become equal owners of Eden Foods after Potter loans the company \$44,000 (entrusted to him by his father), then converts the loan into an investment in the company in exchange for equal ownership.

1973 Sept.—Mike Potter becomes president of Eden Foods at the unanimous recommendation of an employee steering committee. At about this time Midwest Natural Foods starts to compete with Eden Foods, carrying many of the same products that Eden carries plus dairy products and frozen foods. Eden has never sold dairy products or frozen foods and, in the face of new competition from Midwest, Michael Potter reaffirms this position. This decision makes it impossible for Eden to become a full-line distributor like Midwest, and lays the groundwork for Eden's eventual decision in 1986 or 1987 to discontinue distribution to retail stores and focus on manufacturing of natural foods.

1974 spring—Eden moves from 310 West Ann St. into a larger warehouse at 4601 Platt Road. This move extricates Eden from what had become a "pathetic relationship" with Midwest Natural Foods. Redmond is sure that he and Potter became equal partners before this move.

1974 March 7-8—Michael Potter represents Eden at the meeting of Natural Foods Distributors at the Janus conference room in Seattle, Washington.

1974 Oct.—Potter makes the first of his eleven trips to the People's Republic of China. On the way back he visits Yuko Okada at the Muso Company in Osaka, Japan. Potter decides to import exclusively from Muso.

1977 Aug.—Eden Foods opens Turtle Island restaurant at 315 South State St. in Ann Arbor.

1979 spring—Cliff Adler, a painter renovating apartments in Ann Arbor, is hired by Michael Potter to work for Eden in Chicago, Illinois, to try to expand their sales to natural food retail stores. During that summer Cliff lends Eden

Foods \$100,000, for which he is paid bank interest rates. Tim Redmond, however, believes Cliff was hired as a salesman in 1976, and that on 15 March 1979 Cliff became a shareholder in Eden Foods, buying 10% of the stock.

1979 Nov. 26—The Eden warehouse at 4601 Platt Road, Ann Arbor, Michigan, is destroyed by a large fire. According to the *Ann Arbor News* (Nov. 27-29) total damages are estimated at \$650,000. Eden Foods, organized in 1970, employs some 100 persons in distribution and production, supplies about 500 natural food stores and restaurants, has annual sales of about \$5 million, and is said by its owners to be "the largest natural foods distributorship in the Midwest." This fire burned many of Eden's key records, including records that would have helped in determining dates and facts for this chronology. Eden has never kept a written chronology of key events in the company's history.

1979 Dec.—Within 10 days after the fire, the board of directors (Potter, Adler, and Redmond) meets, authorizes a large number of additional shares of common stock, and decides to give away (free of charge) shares of Eden Foods' common stock to six key employees/managers to try to motivate them to stay with the company and help try to rebuild it. They also decide to lay off 35 other people. Shortly thereafter Cliff Adler decides to convert his \$100,000 loan to stock (equity)

1980 Jan.—Tim Redmond decides to leave Eden Foods; he leaves in May, selling most of his stock (he kept 1,000 shares) in exchange for ownership of the Maynard Street Connection, Inc., which has a retail store and restaurant at 330 Maynard St., which are now separate companies.

1980 Feb.—Now Michael Potter and Cliff Adler each own 34% of Eden Foods shares, Frank Dietrich (of Natural Foods, Inc., Toledo, Ohio) owns 10% (which he bought for \$100,000), Ron Roller owns 5%, Michael Gordon 4%, Mark Cook 4%, Kathy Knor 3%, Bill Swaney 3%, and Bob Duha 3%. Michael Potter notes that four things saved Eden Foods (which now had a negative net worth of more than \$800,000) after the fire: (1) Cliff Adler's conversion of his \$100,000; (2) The incredible cooperation, generosity, and kindness that Eden received from its suppliers in the natural foods industry, and their trust that Eden would do its best to pay back they money at a time when interest rates were over 20%; (3) Frank Dietrick's investment of \$100,000 in the company; and (4) The great effort made by natural foods retail stores and consumers to go out of their way help Eden survive by purchasing more Eden products. Note that it was not until Feb. 1982 that Eden ended up receiving from its insurer (Hartford Insurance Company) \$400,000 net, or \$0.50 for each dollar Eden felt it was owed.

1980 Nov.—Eden Foods headquarters moves into a 20,000 square foot building at 701 Tecumseh Road in the tiny town of Clinton (population 2,000) about 60 miles southwest of Detroit.

1981 Nov.—Erewhon Trading Co. files for Chapter 11

bankruptcy protection. Trying to keep up with the super-distributors in their region (especially Balanced Foods) Erewhon had moved into an 80,000 square foot warehouse and added too many items to their product line too fast—which destroyed the company. Stow Mills picked up the bulk of their business, with Westbrae scooping up most of the business for their Japanese imports. Eden had not yet recovered enough financially to take advantage of this opportunity. Continued.

526. *SoyaScan Notes*. 1969. Chronology of Eden Foods, Inc. Part III. 1983 to present. 31 Jan. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1983 July—Eden Foods surprises the U.S. natural foods industry by introducing Edensoy, a long-life soymilk in plain, carob, or cranberry flavors, imported from Marusan-Ai Co. in Japan, and packaged in a stand-up foil retort pouch.

1984 Jan.—The Muso Company of Osaka, Japan, appoints Eden Foods its General Agent for North America.

1984 March 2—A series of calamities hit Eden Foods in quick succession. The FDA (U.S. Food and Drug Administration) informs Eden Foods, in a strongly worded letter, that it considers eleven claims in a promotional pamphlet for Edensoy to be erroneous. The FDA advised that the “Good for Babies” section of the pamphlet be deleted.

1985 June 14—The FDA informs Michael Potter that a six-month-old child in Canada had become seriously ill after being fed the company’s soymilk as an infant formula. The mother said her decision to forgo regular infant formula was inspired by Eden’s own literature—the promotional pamphlet cited above which said that Edensoy was “Good for Babies.” Eden took the position: “There’s a problem and we’re responsible for it.” To date some 18 million packs of Edensoy have been sold.

1985 June 23—Eden Foods voluntarily mails 10,686 requests for a recall of the pamphlet to its distributors and to individual retail stores.

1985 July—Eden Foods forms a joint venture partnership with four Japanese companies, and incorporates in the state of Michigan as American Soy Products, Inc.

1985—Eden opens a west coast sales office and warehouse in San Francisco, California.

1986 May—The Lima Company of Belgium appoints Eden Foods its General Agent for North America.

1986 Nov.—American Soy Products, Inc. launches a new generation of Edensoy soymilk products, in original, vanilla, and carob flavors. Made at a large, new factory in Saline, Michigan, they are packaged in Tetra Brik Aseptic cartons. This is the earliest known aseptic soymilk plant in the USA.

1987 Jan. 1—Eden Foods stops distributing products directly to retail stores (which comprised only 10% of Eden’s total sales), drops 150 products, and starts serving as a master distributor, selling only through other distributors.

This decision had a very positive effect on Eden’s growth; all the energy that was formerly required to attend to 10% of the business was now free to be focused on developing new products and the Eden brand.

1988 April 13—Cliff Adler and Michael Potter are in a serious car accident. Cliff is killed and Michael is seriously injured. Upon Cliff Adler’s death, Michael immediately and automatically acquires Cliff’s 34% share in the company—because Eden Foods Inc. and Michael and Cliff, jointly and severally, had a buy-sell contract that came into effect in the event that either Cliff or Michael should die. The value of Cliff’s stock was \$500,000. Michael pays this amount from his personal funds for the stock. Potter now owns a large majority of Eden Foods’ stock.

1988 May—While Eden Foods is still reeling from the effects of the car accident, the FDA files charges against Eden for publishing inaccurate information in a pamphlet which stated that Edensoy was “Good for Babies.” Eden’s previous major effort to recall all of these pamphlets from retail stores apparently had little or no effect on the FDA charges.

1988—Eden Foods joins OCIA, the Organic Crop Improvement Association, for independent certification of organically-grown crops.

1989 Jan. 20—Nearly 6 years after Eden Foods published its ill-fated Edensoy pamphlet, the company is fined \$110,000 by a federal judge in Detroit, and its president, Michael Potter, is fined \$25,000 and sentenced to 30 days imprisonment. On Feb. 24 he begins to serve out his sentence in Bay City, Michigan.

1989 Oct. 12—Michael Potter is convicted of manslaughter and sentenced at the circuit court in Ann Arbor to 8-15 years in jail for his role in the April 1988 automobile accident that caused Cliff Adler’s death. He begins to serve out his sentence in Oct. 1989 in Coldwater, Michigan. Ron Roller takes over as president of Eden Foods—the top position.

1989—Eden and OCIA establish standards for food processing as well as growing crops.

1991 mid-June—Ron Roller, president of Eden Foods, is asked to resign from his position. He chooses to leave and go to American Soy products to work full time. There he becomes CEO.

1992—Eden Foods now has 180 distributors, virtually all of whom distribute Edensoy. Owners of stock in Eden Foods include Mike Potter (who owns more than 50% of the shares), Tim Redmond, Mark Cook, Bill Swaney, and at least one other person.

1992 Aug.—Michael Potter returns to work at Eden Foods. He was re-sentenced and his sentence is changed to 60 months probation. 1993 Dec. 31—Potter purchases Tim Redmond’s remaining 1,000 shares of Eden Foods stock, which Tim has kept since 1980.

527. *SoyaScan Notes*. 1969. Chronology of soybeans, soyfoods and natural foods in the United States 1969 plus overview of the 1960s (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1969 Jan. Volume 1, Number 1 of *Food Science and Technology Abstracts* published; the earliest records in it go back to Jan. 1968. It is created from the world's first computerized database specializing in food.

1969 Jan. Richard M. Nixon inaugurated as President of the United States. Clifford M. Hardin of Indiana is Secretary of Agriculture.

1969 March. Paul Hawken leaves for a 9-month trip to Japan and arranges for Mitoku and Muso Shokuhin to export natural foods to Erewhon.

1969 March. Soybean yields in tests top 100 bushels/acre for the first time.

1969 March. Essene Macrobiotic Supply starts business in Philadelphia, Pennsylvania. Denny Waxman and Charles Smith are founders.

1969 June. A.E. Staley Manufacturing Co. acquires Gunther Products, a pioneer in the field of modified (enzyme hydrolyzed) soy whipping proteins. Gunther had been founded in 1948, incorporated in 1949.

1969 June—The Staley Co. closes its Painesville, Ohio, soybean crushing plant.

1969 Aug. Erewhon—Los Angeles opens as a small macrobiotic natural foods retail store at 8003 Beverly Blvd. Bill Tara is the first manager.

1969. USAID starts actively encouraging U.S. businesses to launch low-cost commercial protein products in Third World countries.

1969 fall. Erewhon Natural Foods in Boston, Massachusetts, starts to distribute macrobiotic and natural foods. They had begun to wholesale these foods out of the back of their retail store in the spring of 1969. They are America's first natural foods distributor, and remain the largest for many years.

1969 Oct. *Protein-Enriched Cereal Foods for World Needs*, edited by Max Milner, published by American Assoc. of Cereal Chemists.

1969 Nov. Bac-o-Bits, meatless bacon bits made from extruded soy flour, start to be sold nationwide by General Mills. Its forerunner, Bac*O's, made from spun soy protein fiber, had been introduced in May 1966. Frozen Bontrae meat analogs are sold to the foodservice trade. This pioneering work by one of America's largest food companies indicated to the U.S. food industry that the time for soy protein foods of the future had arrived.

1969 Nov. 4. Eden Organic Foods is incorporated in Ann Arbor, Michigan by Bill Bolduc, and their macrobiotic retail store begins operation, selling soyfoods including tamari and miso purchased from Erewhon. The company grew out of a loosely-knit food buying co-op which had started in about July 1967 but which had no name, no formal structure, and

no bank account. Bolduc was joined 9 months later by Tim Redmond.

1969 Nov. 17-21. United Nations Industrial Development Organization Expert Group Meeting on Soya Bean Processing and Use held at Peoria, Illinois.

1969. The first of the new wave of tempeh shops in the Western world, Handelsonderneming van Dappern (later renamed Tempeh production Inc.) started by Robert van Dappern in Kerkrade, The Netherlands. It soon becomes the world's largest tempeh manufacturer.

1969. The Program for International Research, Improvement, and Development of Soybeans (PIRIDS) established at the University of Illinois with funding from a Rockefeller Foundation grant. The forerunner of INTSOY, it is directed by Earl R. Leng.

1960s overview:

Oilseed Proteins and the Protein Gap. Worldwide, there is a growing consensus that Third World countries are facing a "protein crisis," that protein malnutrition is the world's most widespread deficiency disease, and that low-cost oilseed proteins (such as defatted soybean meal and flour) offer the most promising hope for remedying the problem. The leading architect and proponent of this view is Dr. Aaron Altschul of Georgetown University School of Medicine. The United Nations' FAO/WHO/UNICEF Protein Advisory Group, composed of the world's leading authorities in the field, is very active from the mid-1960s to the mid-1970s, supporting wider use of soy protein products and soyfoods.

Food for Peace Shipments of Soy Fortified Foods begin. The first shipment of such foods, CSM (corn-soy-milk), took place in 1966, when 28,000 metric tons (tonnes) were shipped. The next year 54,000 tonnes were shipped. Shipments increased dramatically during the 1970s.

Growing Interest in Modern Soy Protein Products. These new products, including soy protein isolates and concentrates, and textured soy protein products, now appear to have major potential in the food systems of all countries.

Leading Soyfoods Research Centers in America are the Northern Regional Research Laboratory at Peoria, Illinois (Hesseltine, Wang, Mustakas, Wolf), and the New York State Agricultural Experiment Station at Geneva, New York (Steinkraus and Bourne).

Vitasoy sales are booming in Southeast Asia. The introduction of Vitasoy by K.S. Lo in Hong Kong in the early 1940s brought soymilk into the modern era. Takeoff began in 1955 when Vitasoy began to be marketed like a soft drink. Sales grew from 8.4 million bottles that year to 42 million in 1960 and 100 million in 1970, a 2.4-fold increase during the 1960s. By 1962 Vitasoy had become Hong Kong's best-selling soft drink, ahead of such internationally known brands as Coca-Cola, Pepsi-Cola, and Seven-Up.

Shoyu (Soy Sauce) Becomes a World Class Seasoning, Thanks to Kikkoman. Shoyu has long been the world's most popular seasoning other than salt, and Kikkoman has

been the world's largest manufacturer since about 1918. During the 1960s Kikkoman internationalized its operations, developing new markets for shoyu throughout the world by exporting from Japan and promoting the products for use in Western-style recipes, largely with meat, fish, and poultry. Production climbed from 183,000 kiloliters in 1960 to 340,000 kl in 1970. During the same period its share of the Japanese shoyu market rose from 18% in 1960 to 30% in 1970.

Steady Rise in Soybean Production in Latin America and Africa. In Latin America production rose from 231,000 tonnes in 1960 to 1,535,000 tonnes in 1969, a 6.6-fold increase during the decade. Brazil accounted for 87% of that production in 1969, followed by Mexico and Colombia.

African soybean production rose from 27,000 tonnes in 1960 to 74,000 tonnes in 1969, a 2.7-fold increase. Nigeria accounted for 84% of that production in 1969, followed by South Africa and Ethiopia.

American Soybean Association Funding Increases Dramatically from Checkoff Programs. This was a decade of great growth for ASA. In 1962 the Minnesota Soybean Growers Assoc., the first affiliated state association, was founded. The ASA's biggest breakthrough to date came in 1966, when soybean growers began to support their own market development and research activities (previously funded by USDA's Foreign Agricultural Service) using funds provided by state checkoff programs. Typically ½ to 1 cent of funding was generated from each bushel of soybeans sold in states where a checkoff referendum had passed. By the early 1970s the checkoff programs had begun to generate large sums of money, which allowed ASA to expand its activities. Expanded market development activities overseas led to a steady, long-term increase in soybean exports.

Soybean Changes from an Oilseed to a Protein Seed. Prior to the mid-1940s the soybean, worldwide, had been crushed primarily for its oil. The meal was considered a by-product. But in the post-war period, with growing affluence driving increased demand for meat, the demand for meal outstripped that for oil, and the oil became the by-product. This trend, which started in America, was in full swing by the 1960s and expanded to other countries thereafter.

Soybean Digest and ASA Interest in Soyfoods. During the past two decades *Soybean Digest* has published a steady stream of articles on soyfoods worldwide. Soyfoods were given big play at many ASA annual conventions. This interest in the USA had largely stopped by the mid-1970s, focusing on soybean production instead.

528. Banks, Edward T. 1969. A vegetarian mecca. *British Vegetarian*. Nov/Dec. p. 578-79.

• **Summary:** The author describes his visit to the Lima Organic Farm at Latem, St. Martin, near Ghent. Almost everyone there is a "vegetarian wholefooder." Lima is a company with great integrity and experience in the field

of whole foods and health foods. Lima is run by Mr. Pierre Gevaert, whose wife is Annette. The Lima business developed from the organic farm of M. Edgar Gevaert, a distinguished and prolific Belgian painter who died a few years ago. Edgar's gentle widow, Mlle. Gevaert-Minne, and one of their daughters, Celine, still live in the ancient Gevaert home.

529. Shurtleff, William. 1969. The Tassajara food trip. Tassajara, California: Published by the author. 63 p. Dec. 28 cm. [8 ref]

• **Summary:** Each of the 167 recipes is numbered, all show a strong natural foods influence, and many show a macrobiotic influence. Soy-related recipes include: 60. Fresh daikon nitsuke with miso. 74. Squash in miso-tahini sauce. 76. Nori with tamari.

77. Basic soybean preparation. "Put 2 cups soybeans in a quart container and fill the container with water. Let soak overnight. Pour into a pressure cooker and cook at 15 lb. for 40-50 minutes. Allow pressure to go down naturally. If water remains, continue to simmer beans in open pot until it is gone. Add tamari [soy sauce] to taste 10 minutes before finishing. Note: It is very important that soybeans be well cooked. They should be boiled until they are very soft and easily crushed between the thumb and ring finger, otherwise they will cause digestive problems (to put it nicely!)." We enjoyed boiled whole soybeans for breakfast almost daily as an important source of protein in our vegetarian diet.

Note: Pressure cooking soybeans can be dangerous! The skins can come off, foam up, and clog the pressure regulator.

78. Soybeans with hijiki. 79. Soybeans with hijiki and tahini (with miso). 80. Soybeans sauteed in miso. 81. Soybeans with lentils and buckwheat flour. 82. Soybeans with carrots and lentil sprouts. 83. Soybeans with dried daikon. 84. Soybean stew. 85. Broiled soyburgers. 86. Roasted soybeans. 87. Tofu sauteed. 96. Miso soup with tofu, carrots, burdock and mushrooms. 97. Miso soup with wakame. 98. Wakame soup with tofu. 99. Soy sauce & lemon soup. 101. Thick lentil soup with miso. 102. Thick lentil soup with miso & vegetables sauteed. 103. Lentil soup with miso and parsley garnish. 105. Aduki/azuki bean soup with miso. 107. Thick split pea soup with miso & vegetables. 110. Navy bean soup with miso. 115. Mushroom soup with dried tofu.

119. Misozuke pickles. 120. Kombu pickled in miso. 122. Bancha with tamari. 123. Kuzu cream with tamari. 125. Ume-syo-kuzu (with umeboshi, tamari and kuzu). 131. Basic soybean spread. 133. Lentil miso spread. 135. Garbanzo and miso spread. 138. Muso (miso-tahini) spread. 139. Peanut butter & tamari spread. 142. Peanut butter, miso, apples, carrot and parsley spread. 161. Sesame tofu (no soy). 163. Nut and seed loaf with miso.

San Francisco's largest natural foods store is New Age Natural Foods, 1326 Ninth Ave. run by Fred Rohe [Rohé].

Also recommended are The Food Mill, 3033 MacArthur, Oakland [founded in 1933 by John Denis, Sr.]; and Chico-San, P.O. Box 1004, Chico, California. Selling Spiral Foods miso and tamari in bulk; The General Store, 5th and Junipero in Carmel.

Note 1. This is the 2nd earliest document seen (Nov. 2010) concerning the work of William Shurtleff with soyfoods. He wrote the book on a typewriter while practicing at Tassajara Zen Mountain Center, made about 30 photocopies, and sent them to friends as Christmas presents. He did not meet Akiko Aoyagi until 25 Dec. 1971 in Tokyo, Japan.

Note 2. This is the earliest document seen (Jan. 2014) in the SoyaScan database concerning or under the subject heading “Soyfoods Movement.”

Note 3. “The Tassajara Zen Mountain Center in the Ventana Wilderness area of the Los Padres National Forest, southeast of Carmel-by-the-Sea, California, is the oldest Japanese Buddhist Soto Zen monastery in the United States. The Center is very isolated, more than 16 miles (26 km) from the nearest paved road, and only accessible via a narrow, steep, one-lane dirt road. During the winter months, practitioners live alone on site. During the summer months, the Center is opened to day and overnight guests. The hot springs have been developed into Japanese-style baths. It is the first Zen monastery established outside Asia” (Source: Wikipedia). To get food especially perishables, for 40-60 students, we sent a truck on a “town trip” to Carmel and Monterey once a week. Among the foods we bought there were tofu (unpacked, in cans filled with water) and miso.

Note 4. This is the earliest document seen (March 2020) that mentions “New Age Natural Foods” run by Fred Rohe in San Francisco. Address: Zen Mountain Center, Carmel Valley, California.

530. Product Name: Seitan.

Manufacturer’s Name: Erewhon Trading Co., Inc. (Importer-Distributor). Made in Japan by Marushima Shoyu Co.

Manufacturer’s Address: 342 Newbury Street, Boston, MA 02115.

Date of Introduction: 1969.

Wt/Vol., Packaging, Price: 3.5 oz jar.

How Stored: Shelf stable.

New Product–Documentation: This is the earliest known commercial seitan product sold in the USA; it was imported from Japan. Erewhon Trading Co., Inc. 1970. Jan. 1. “Traditional foods: Importers, processors, distributors. Wholesale-retail catalog.” The company imports and sells “Seitan: Wheat and soy sauce cooked together for a long time. When used in soups or sauteed in vegetables it has a taste much like beef; 3½ oz.”

Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. “Flour power! Cooking with seitan, the

delicious natural food from grain.” “When I (Barbara) first tasted seitan, about sixteen years ago, I was fascinated by its flavor and texture. I had stopped eating meat for intellectual rather than sensory reasons, so the idea of using a grain-based product which had the texture of animal food was an appealing one. There were a few problems, however. The only seitan available at that time was expensive, and salty. And the pieces of seitan, as they came out of their jar from Japan, were tiny and hard. Perfect for beer-snacks but not really useful for other purposes.”

Talk with Lenny Jacobs. 1991. Nov. 14. Leonard first heard the term seitan in about 1969. Erewhon was importing a little package of dried, salty seitan from a macrobiotic exporter in Japan. Yuko Okada of Muso Shokuhin, or his assistant Julia Yamaguchi (daughter of Alcan Yamaguchi) might know details on this product.

Talk with Aveline Kushi. 1992. April 9. The first seitan imported to America was made by Marushima Shoyu Co. in Japan. George Ohsawa asked them to make it and showed them how. It was imported to America at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. She is not sure which Japanese company (Muso or Mitoku) exported this seitan to America, or which American company imported it, but it probably started to be imported in about 1969.

Letter (fax) from Yuko Okada of Muso Co. Ltd., Japan. 1992. July 2. “I remember the term ‘seitan’ since I was a kid; it was probably coined by George Ohsawa. *Sei* means ‘is’ and *tan* is the first character in the Japanese term *tanpaku*, which means ‘protein.’ So *seitan* means something like ‘right protein substitute.’ Marushima Shoyu Co. developed seitan commercially in Japan and Muso has carried their seitan since Feb. 1966 when we started. We shipped seitan to Erewhon on a regular basis from 1968. [Note: Kotzsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] We also exported it to Chico-San. In Europe, we exported seitan to Paris, France.”

Talk with Tom DeSilva, owner of Erewhon Natural Foods in Los Angeles. 1992. July 10. The first seitan sold at the Erewhon retail store in Los Angeles, by late 1969, was imported from Japan. “I used to eat that stuff with rice crackers like mad. It was just like jerky. I loved it. I could eat a whole package. But it was so salty that you had to keep eating rice crackers to cut the salt.” Originally it was sold in a plastic bag, then later in a jar immersed in a dark liquid. Tom liked the product in the bag better.

531. Product Name: Harmony Foods Miso, and Tamari.

Manufacturer’s Name: Harmony Foods (Importer-Distributor). Made in Japan. Imported from Muso Shokuhin.

Manufacturer’s Address: Ladbroke Rd., London, England.

Date of Introduction: 1969.

Wt/Vol., Packaging, Price: Imported nulk, in wooden kegs. Miso repacked in plastic bags. Tamari in glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Interview with Bill Tara. 1991. Aug. 18. Among the early Japanese foods imported by Harmony Foods were bulk miso and “tamari” (actually shoyu), imported from Muso in wooden kegs. They repackaged the miso in plastic bags and the shoyu in glass bottles under the Harmony Foods label in London. This was the first Japanese miso and shoyu sold in England.

Listing in *The Vegetarian Health Food Handbook (UK)*. 1974. p. 173. “Tamari Soya Sauce, and Miso (Soya Bean Sauce) by Harmony Foods.”

532. Photographs of Jean Allison in Kyoto, Japan. 1969.

• **Summary:** (1) Jean Allison near the Stiskin’s home shortly after her arrival in Tokyo. Photo by Beverly Stiskin.

(2) Jean Allison’s room at the Stiskin’s house in Kyoto.

(3) Left to right: Women in white kimono are Beverly Stiskin, Jean Allison. In the midst of a tea ceremony.

(4) Left to right–Top row: Wally Gorell, little Reuben Stiskin, and Nahum Stiskin. Front row: Jean Allison and Beverly Stiskin.

(5) Jim Docker and Jean Allison standing between two cars. At that time Jean had a very serious crush on Jim. “Obviously he’s the most handsome man in the world.”

Note: On 30 June 1970 Jean Allison married Andy Young. As of Feb. 2011 her name is Jean Allison Young. She and her husband live in Chatham, Massachusetts—at the “elbow” of Cape Cod, surrounded on three sides by the Atlantic Ocean.

Photos sent to Soyinfo Center by Jean Allison Young (10 Feb. 2011). Beverly Stiskin, now Beverly Sky, lives in Somerville, Massachusetts.

• **Summary:**

(a) Inside Ceres Grain Shop. They sold unusual foods such as organic brown rice, miso, sunflower seeds, chick peas, tahini and weirdest of all—seaweeds.

(b) Outside Ceres Grain Shop and Bakery. (3) Another outside view.

Sent to Soyinfo Center by Gregory Sams 2017 April 6. Address: London. Phone: 01 451 3111/2.

534. *Cooking good food*. 1969. Order of the Universe

Publications, Box 203, Prudential Center Station, Boston, MA 02199. 34 p. No index. 28 cm.

• **Summary:** A simple, concise source of the basic macrobiotic ideas adapted to the American way. Note 1. This booklet was written by Jim Ledbetter, a student of macrobiotic teacher Michio Kushi, although his name does not appear in it.

Contents: The traditional food of man. The way of eating. Salt and oil. Special foods. Useful kitchen items. Cooking brown rice. Cooking other grains. Cooking vegetables. Cooking sea vegetables. Cooking beans. Cooking soups. Cooking with flours (Cooking noodles, cooking creams, baking bread, variations with flour). Cooking animal food. Preparing salads. Preparing condiments. Preparing drinks. Cooking desserts. Plasters. Traveling and eating out. he manner of eating. The seven levels of cooking.

In Chapter 4, titled “Special Foods” is a section on “Soybean foods” (p. 6), which states: “The soybean has been called the ‘Vegetable Cow’ of the Orient. It is full of good vegetable quality protein (43%). It was not traditionally eaten without special preparation, because it is fairly yin, except by monks who wished to limit their sexual desires. When cured with salt, however, it was used as a daily food. You will find these traditional preparations very helpful in your kitchen.

“Tamari is the ancient form of soysauce, fermented for at least eighteen months from soybeans, salt, wheat or barley, and water, without chemicals or preservatives. It has a very distinctive, delicious taste. It is used mainly in cooking vegetables when it is added after salting and just before the end of cooking time, and in broths. It is rarely used directly on grains, but is often found on the table to use with deep-fried foods. Some women mix tamari with an equal amount of water to make it less strong.

“Miso is a paste made from the same ingredients as tamari. There are two varieties; one (Hacho) is a little harder and darker in texture than the other. It has many uses,

especially in soups, in which case it is added towards the end of cooking time so that the wonderful digestion-aiding bacteria it contains will not be destroyed. (All of these soybean condiments produce their best flavor when cooked slightly.) Miso soup has a deep, satisfying bouillon flavor, and is often taken every day as a delicious source of energy. It is helpful to thin miso in a little water before adding it to soups and sauces.

“Morromi [sic, moromi] is the pulp from which tamari has been made. It has a very special tangy flavor, and is used like miso.

“Seitan or ‘Protein X’ is made from the same ingredients as the above condiments. A slightly different process produces a strong jerky which, when boiled or sauteed, resembles beef in appearance and taste. It is very good in soups” (p. 6). Note 2. This is the earliest document seen (March 2011) that mentions “seitan.” It is also the earliest English-language document seen (March 2011) that contains the word “seitan.” By placing seitan in the category of “Soybean Foods,” the author is apparently emphasizing the importance of soy sauce as one of its two main ingredients. He seems to have tasted seitan, but it is not clear that he knows what its other main ingredients are (wheat gluten, ginger, sesame oil) or how it is prepared.

“Tofu is made from fresh soybeans. This curd or ‘cheese’ is a good quality, strong yin food which is very refreshing for occasional use in summer when it is cooked with tamari. It is helpful to store tofu in water. The more yang pulp, which is usually thrown away, can sometimes be obtained from the Oriental stores which make tofu, and used to make delicious casseroles or well-sauteed vegetable dishes.”

The section on “Condiments” (p. 6-7) discusses Gomasio (Sesame salt), umeboshi (salted plums), and Tekka. The section on “Oriental vegetables” (p. 7) discusses lotus root, daikon, ginger root, Chinese cabbage, jinenjo (Japanese potato), and kuzu arrowroot.

In the chapter titled “Cooking Beans” the author considers “Aduki Beans” to be the “King of Beans.”

“Black Beans: The imported Japanese black beans are higher nutritional quality and superior taste. They are very sweet, delicious beans. They should be soaked and boiled, because their skin can become loose and clog a pressure cooker spout.”

“Miso Soup: This hearty bouillon is the staple everyday soup. Prepare vegetables and boil for at least one-half hour (if you want a really good soup); thin miso with a little of the stock in a bowl and add it to the soup towards the end. Do not boil the soup after adding miso or the beneficial digestion-aiding bacteria will be harmed. If it is simmered very slowly, it can be cooked from 5 minutes to one hour.

“Tamari Soup: Prepare as above using tamari instead of miso for flavoring. A simple tamari broth with onions or carrots and onions is often served over dishes such as

noodles.”

In the chapter titled “Preparing Condiments” (p. 27) we read: “Vegetable Miso. Slice vegetables finely and saute. Add diluted miso and water and cook. Scallions, chives, carrot tops and many other vegetables are good prepared in this manner. ‘Tekka’ is made from lotus root, burdock root and carrots. ‘Sigure’ [Shigure] (‘November Rain’) is prepared with lotus roots, carrots, and onions. A little freshly grated ginger is often added towards the end of the cooking. A small amount of these condiments is usually sufficient.”

The chapter titled “Preparing drinks” (p. 28-29) discusses Mu tea, umeboshi tea, chicory, Yannoh [Ohsawa coffee], dandelion coffee, Bardan, Kokkoh, kuzu, ume-syo-kuzu, and daikon drink.

The chapter titled “Cooking Desserts” (p. 30) states: “Amasake (Homemade Rice Wine). For special occasions this drink is very smooth and sweet.”

Tofu is also mentioned in the chapter titled “Plasters” (p. 31). “Tofu Plaster. Squeeze tofu (soy bean curd, see *Special Foods*) and mix with 10% flour to make it more manageable. Apply this to any painful, feverish, or inflamed area. Alternating tofu plasters with ginger compresses often helps stubborn cases.”

Note 3 This is the earliest document seen (July 2000) that mentions “Hacho” miso (spelled that way). Subsequently, many macrobiotic publications used this word and spelled it that way.

The chapter titled “Cooking sea vegetables” briefly defines kombu, wakame, hiziki (the incorrect idea concerning “black rice” comes from a casual remark by Evan Root), arame, dulse, and nori (laver).

Note 4 One original edition of this booklet, sent to Soyfoods Center by Tim Redmond (a founder of Eden Foods), has one dark blue stalk of wheat against a light blue background. In the lower right corner of the cover the following has been stamped with a blue ink stamp: “Eden Organic Food Store, 514 E. William. Ann Arbor, Mich. [Michigan] 48104.” Address: [Massachusetts].

535. Ohsawa, Georges (Nyoi Sakurazawa). 1969. *Le Zen macrobiotique; ou, l’art du rajeunissement et de la longévité* [Zen macrobiotics, or the art of rejuvenation and longevity]. Paris: Librairie Philosophique J. Vrin. 212 p. Index. 19 cm. Preface by Cauvet-Duhamel. [Fre]

• **Summary:** Contents: Preface, by Cauvet-Duhamel. Foreword, by G. Ohsawa. 1. Macrobiotics and the medicine of the Orient. My therapeutics. 3. The seven conditions of health and happiness. 4. With faith, nothing is impossible. 5. Yin and yang. 6. My macrobiotic cuisine and the ten ways of eating properly. 7 Principal foods (*Les aliments principaux*). 8. Secondary foods. 9. Special dishes. 10. Suggestions for some illnesses / maladies. 11. Healing regimens. 12. Food for infants. 13. Some ideas.

Appendixes: A cure in 10 hours. Pro-forma death

certificate for the world empire of the American gold dynasty. My talks in the United States (starting in Nov. 1959, in New York, Los Angeles, and San Francisco). The despair of American doctors according to the *Times* of 7 March 1960 (listing of the number of people with 17 incurable diseases). How much does the death of a civilization cost? The real cause of sickness, unhappiness, and war. Professional education and religion. Medicine's last cry of despair. The medical revolution in the China of Mao Tse-tung. Medicine: God alone understands it. My prophecy.

The following foods are discussed: Rice, buckwheat, millet and other cereals (p. 67-77). Azuki beans (p. 98). Sesame tofu (p. 98). Sea vegetables (konbu, hijiki, p. 101-05). Miso and miso recipes (p. 105-08, incl. Tekka). Shoyu and shoyu recipes (p. 108-10). Ohsawa coffee (Yannoh, with azuki, p. 111-12). Syo-ban (Natural green tea with shoyu, p. 113-14). Kuzu (p. 114). Umeboshi juice (p. 116-17). Ume-syo-ban (umeboshi and tamari shoyu, p. 117). Ume syo-kuzu (with umeboshi, shoyu, and kuzu, p. 117). Miso fried in sesame oil (p. 118).

Note 2. The author, born in 1893, lists his name on the title page as "Georges Ohsawa (Nyoi Sakurazawa)."

Note 3. This is the earliest French-language document seen (April 2012) that uses the term *tamari* to refer to soy sauce.

536. Photographs of members of the macrobiotic community (1968-1969). 1969. Boston, Massachusetts.

• **Summary:** (1) Left to right: Bill Tara, unknown woman (perhaps Dora Coates) and Paul Hawken, seaside, probably summer of 1969.

(2) Wally Gorell and Jean Allison (left) teaching a cooking class in Providence (Rhode Island) or Boston (1968 or 1969). Wally taught a lot of cooking classes.

(3) Beverly Stiskin (back row, 3rd from right), Wallace Gorell (back row, far right), and Nahum Stiskin (2nd from right, tall, dressed in a formal black Japanese kimono with hakama {over trousers}). All at Ruben Stiskin's Shinto name-giving / naming ceremony in about late 1969 at a Shinto shrine in Japan. The four people on the left are Japanese friends of the Stiskins. Ruben (a baby at the time) is barely visible.

Letter (e-mail) from Beverly Stiskin Sky. 2011. Feb. 11. "Reuben's naming ceremony was held at the huge temple to the east of the center of Kyoto—not Kitano Shrine—The people around us are the Takeda family, oba- and oji-san, Reuben's Japanese Godparents. We lived above their house on the grounds of Higashiyama Sanso, a beautiful family estate on the scenic drive on the other side of Higashiyama—overlooking both Kyoto and Lake Biwa in the distance. Reuben Stiskin was born in Kyoto on August 24, 1969."

These three photos were sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010. Address: Boston, Massachusetts.

537. Winter, Ruth. 1969. Poisons in your food. New York, NY: Crown Publishers Inc. viii + 248 p. Introduction by Senator Walter F. Mondale. Index. 22 cm. Revised ed. 1971. [400* ref]

• **Summary:** Contents: 1. Have you have your poisons today? 2. How to kill insects—and people. 3. Your food—Plus what? 4. Meat and poultry hazards. 5. A fish story. 6. Salmonella Sam and ptomaine picnic. 7. Water: Unfit for drinking. 8. Eating out tonight? 9. Those convenient new foods. 10. Some questions and recommendations. 11. Home fires and freezers. Appendices. Address: M.S., Science Editor, Newark Star-Ledger, Health and science writer, Short Hills, New Jersey.

538. Muso Shokuhin. 1969? Tennen jōzō shōyu [Naturally fermented shoyu (Leaflet)]. Osaka, Japan. 1 p. Undated. [Jap]

• **Summary:** Large red and small black letters on a pink background. Address: Osaka, Japan. Phone: (06) 772-5340.

539. Erewhon Trading Co., Inc. 1970. Traditional foods: Importers, processors, distributors. Wholesale-retail catalogue. Boston, Massachusetts. 12 p. Jan. 1. 22 cm. [2 ref]

• **Summary:** On the cover is the silhouette of three heads of grain on the plant, by a Japanese crest. Prices are given for each item. The company sells the following types of foods: 1. Grains: Brown rice (short grain Kokuho Rose grown by Koda Brothers, in 2 lb, 5 lb., 10 lb., 25 lb., 50 lb., or 100 lb. quantities). Sweet brown rice (Koda Bros.; it is more glutinous than brown rice, in the same 6 quantities). Note: No claim is made, anywhere in the catalog, that this rice is organic, or unsprayed, or "natural" or anything other than regular brown rice.

2. Beans: Azuki beans (imported from Hokkaido), Black beans ("Kuromame, a black soy bean import"), Chickpeas (Garbanzo, imported from southern Europe).

3. Sea vegetables: Dulse (From Grand Manan Island, Canada), hiziki, kombu, nori (dried laver), wakame (the latter 4 imported from Japan).

4. Soy Bean Products: Soy sauce (Aged naturally in wooden kegs at least 18 months; 16 oz for \$1.20, 32 oz for \$2.25, ½ gallon for \$4.25, 1 gallon for \$8.00, 4.75 gallon keg {21.13 liters} for \$30.00). Hacho miso ("Soybean puree made from soybeans, salt & water. No chemicals used in fermentation. Aged at least 18 months"; 1 lb for \$1.20, 2 lb, 4 lb, 44 lb keg for \$36.00). Mugi miso ("Soybean puree. A lighter miso made with barley"; 1 lb, 2 lb, 44 lb keg). Moromi ("A thick sauce removed from the bottom of the soy sauce kegs after fermentation. Its uses are unlimited in soups & sauces"; 7 oz for \$1.20.). Seitan ("Wheat and soy sauce cooked together for a long time. When used in soups or sauteed in vegetables it has a taste much like beef"; 3½ oz for \$1.20). Note 1. This is the earliest document seen (July 2005) that mentions seitan and clearly understands what it is.

5. Condiments: *Furikake* (“A tangy sesame condiment made from Miso, sesame seeds, soy flour, nori and bonito [sic, bonito] flakes”; 3½ oz.), Daikon pickle, Sesame miso (“A hearty condiment for use on rice and other grains. Made from miso and unhulled sesame seeds”; 3½ oz). Tekka (“A strong dark condiment; famous for its medicinal qualities. Made from carrots, burdock, lotus, ginger, sesame oil, and miso”; 3½ oz), Sesame seeds, Sesame tahini.

6. Sea salt: Grey unrefined (from the Mediterranean Sea, unwashed and unground), White unrefined. 7. Oils: Corn germ oil (unrefined, pressed. No solvents, chemicals, or preservatives), Sesame oil. 8. Noodles: Ito soba, Kame soba, Udon. 9. Beverages: Kukicha, Kohren (Lotus root powder), Mu beverage (made from 16 different herbs), Yannoh (coffee-like drink made from grains and beans).

10. Miscellaneous: Dentie toothpowder (made from eggplant and salt), Kuzu arrowroot, Umeboshi & chiso [shiso, shisonoha, or beefsteak leaves], Umeboshi (“Salt plums aged in wooden kegs for at least 3 years”).

11. Cookbooks (written in America): *Cooking Good Food*, and *Cooking with Grains and Vegetables*.

The majority of the above products are imported, mostly from Japan.

The inside front cover states: “Due to the growth of our business and our belief that good quality food should be available at low cost, we have eliminated many items from our wholesale list. We have eliminated most grains because excellent quality grains are available from many sources at more reasonable prices than we are able to charge. Two excellent sources for grains are Arrowhead Mills, Box 866, Hereford, Texas, and Pioneer Specialty Foods, Box 427, Fargo, North Dakota. Also eliminated from our wholesale list is Chico-San products. For these please write directly to Chico-San, 1262 Humboldt Ave., Chico, California, or contact any health food distributor.”

Note 2. The products in this catalog do not require refrigeration; they contain no refined sugar / white sugar, no meat, and no dairy products—just like the catalogs of almost all subsequent natural food distributors during the 1970s and 1980s.

Note 3. This is the earliest existing Erewhon catalog seen (March 2011), and the earliest document seen (March 2011) concerning Erewhon and soy.

Note 4. This is the earliest document seen (March 2006) that mentions Arrowhead Mills, of Hereford, Texas. Address: 342 Newbury Street, Boston, Massachusetts 02115. Phone: 617-262-3420.

540. **Product Name:** Azuki Beans.

Manufacturer’s Name: Erewhon Trading Co., Inc. (Importer). From Japan.

Manufacturer’s Address: 342 Newbury St., Boston, MA 02115. Phone: (617) 262-3420.

Date of Introduction: 1970 January.

New Product–Documentation: Erewhon Trading Company Inc. 1970. Jan. 1. Wholesale-retail catalogue. “Azuki beans. Imported from the island of Hokkaido, Japan. Premium quality. Unlike the usual imported Azuki. Price: Due to foreign market fluctuations, prices on request.”

541. **Product Name:** Black [Soy] Beans.

Manufacturer’s Name: Erewhon Trading Co., Inc. (Importer). From Japan.

Manufacturer’s Address: 342 Newbury St., Boston, MA 02115. Phone: (617) 262-3420.

Date of Introduction: 1970 January.

New Product–Documentation: Erewhon Trading Company Inc. 1970. Jan. 1. Wholesale-retail catalogue. “Kuromame, a black soy bean import. Price: Due to foreign market fluctuations, prices on request.”

542. **Product Name:** Furikake, Sesame Miso, Tekka.

Manufacturer’s Name: Erewhon Trading Co., Inc. (Importer). Made in Japan. Imported from Muso Shokuhin.

Manufacturer’s Address: 342 Newbury St., Boston, MA 02115.

Date of Introduction: 1970 January.

How Stored: Shelf stable.

New Product–Documentation: Erewhon Trading Company Inc. 1970. Jan. 1. Wholesale-retail catalogue. Products imported from Japan include the following “Condiments,” each made with miso: *Furikake* (“A tangy sesame condiment made from Miso, sesame seeds, soy flour, nori and bonito [sic, bonito] flakes”; 3½ oz.), Sesame miso (“A hearty condiment for use on rice and other grains. Made from miso and unhulled sesame seeds”; 3½ oz). Tekka (“A strong dark condiment; famous for its medicinal qualities. Made from carrots, burdock, lotus, ginger, sesame oil, and miso”; 3½ oz).

Label sent to Lorenz Schaller, perhaps by Chico-San. 1973. Sept. Tekka vegetable condiment. Product of Japan. Distributed by Erewhon Trading Co., Boston and Los Angeles. 3.5 oz. 3.75 by 2.5 inches. Paper. Light green, yellow, and black on white. “Tekka is an iron rich condiment prepared by cooking several root vegetables for one day in sesame oil and miso.” Tekka “has a nutty taste and pleasing flavor. It is delicious as a seasoning on brown rice and rice cream.” Ingredients: Carrots, burdock root, lotus root, miso, sesame oil, ginger.

543. Hunter, Beatrice Trum. 1970. Vacation in beautiful hills of New Hampshire (Ad). *Natural Food and Farming (Atlanta, Texas)* 16(8):20. Jan.

• **Summary:** “Enjoy natural foods, good air and water. Adults only. Each room has private bath. Wildlife, trails, swimming, boating, fishing.

“All meals prepared by Beatrice Trum Hunter, author of *The Natural Foods Cookbook*. In continuous operation since

1952. We are now accepting reservations for 1970 season (mid-June to mid-October). Write:..." Address: RFD 1, Hillsboro, New Hampshire 03244.

544. *Natural Food and Farming (Atlanta, Texas)*. 1970. Health food store directory. 16(8):20-23. Jan.

• **Summary:** "This directory is printed six times each year as a service to those who wish to buy good food. A free copy is available to anyone on request. Write NFA Health Food Directory, Box 210, Atlanta, Texas."

The directory, arranged alphabetically by state, now part of the magazine's "yellow pages."

545. Bolduc, William T.; Succop, Linda S. 1970. Certificate of amendment to the articles of incorporation: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 2 p. Feb. 17. 26 cm.

• **Summary:** Eden Organic Foods, Inc. now has a new registered office located at 514 East William Street, Ann Arbor, Washtenaw County, Michigan 48104. At a meeting of the members, held on 17 Feb. 1970, Article IX was amended to read as follows: "In the event of any liquidation, dissolution or winding up of the corporation, the assets or proceeds thereof belonging to the corporation shall be distributed to similar non-profit tax-exempt charitable corporations."

Signed by William T. Bolduc, Jr. and Linda S. Succop on 17 Feb. 1970. Received by the Michigan Department of Treasury, Corporation Division, on 20 Feb. 1970. Filed on 19 March 1970. It is noted that the corporation has no corporate seal to affix to this document. Address: 1. President; 2. Secretary. Washtenaw Co., Michigan.

546. Erewhon Trading Co., Inc. 1970. Traditional foods: Importers, processors, distributors. Mail order catalogue. Boston, Massachusetts. 16 p. March 1. [2 ref]

• **Summary:** See next page. On the orange cover is the silhouette of three heads of grain on the plant, by a Japanese crest. The company sells the following types of foods: 1. Whole grains: Brown rice (short grain grown by Koda Brothers, in 6 weights from 2 lb. to 100 lb). "Not strictly organic, but the finest available in the U.S. today."

Note: The previous sentence, starting with "Not strictly organic" is deceptive and misleading. According to "Erewhon, A Biography," by Paul Hawken (*East West Journal*, Aug. 1973, p. 13) the short-grain brown rice being sold by Erewhon at this time was grown by the Lundberg brothers (Wehah Farm, Richvale, California) and harvested in the fall of 1969. But this rice was the result of a secret deal, so Koda Brothers is listed in the Catalog as the grower. According to the Koda website, Koda first started to convert some fields to organic in 2004. Moreover, this rice was not "the finest available in the U.S. today." The only organically grown brown rice in the USA in March 1970 was grown

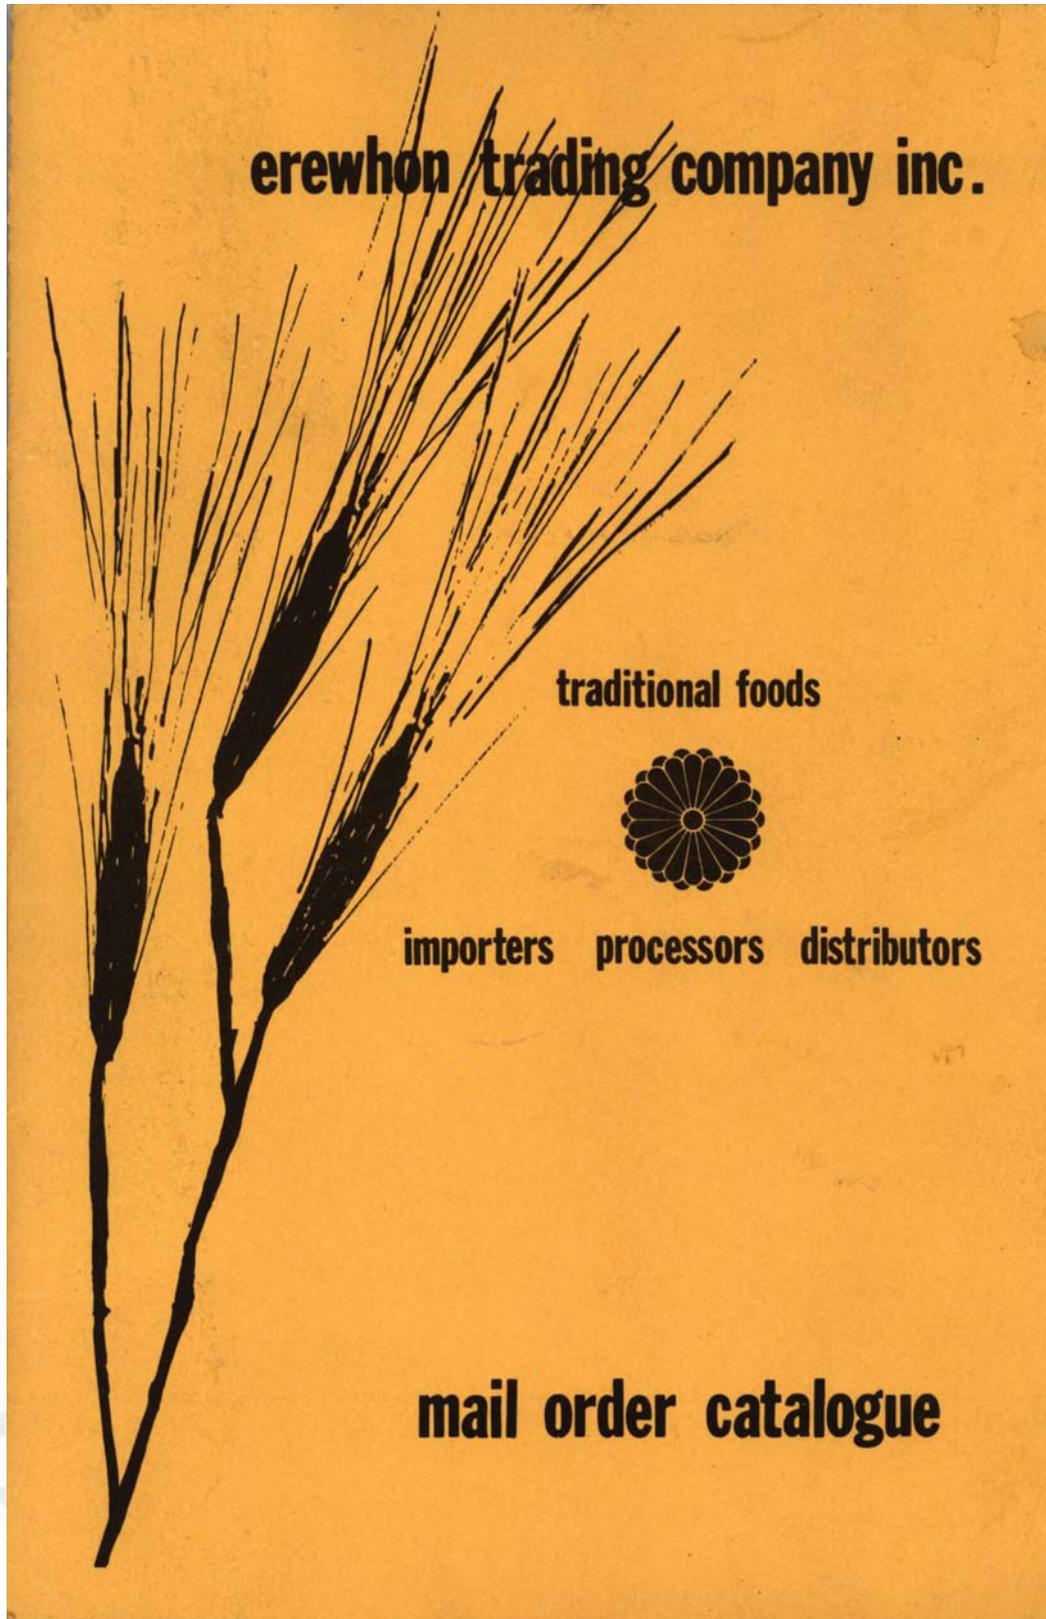

by the Lundberg Brothers (Wehah Farms) in Richvale, California. 1969 was the first year they had grown rice organically, and they grew 78 acres under contract with Chico-San, who agreed to buy all the brown rice grown on that acreage in exchange for the exclusive right to sell that rice. Chico-San sold half the rice in advance and had no trouble selling all of it. But they refused to sell any of the rice to Erewhon. In 1970 Lundberg expanded their exclusive organic brown rice acreage to 200 acres; that rice was harvested in the fall of 1971.

Sweet brown rice (also grown by Koda Bros.), buckwheat groats (Kasha, from Pocono Mts. in Pennsylvania), wheat berries (organically grown in the Golden Valley of North Dakota), millet (organically grown), barley, yellow and white corn (organically grown in Deaf Smith County, Texas), oats, rye (organically grown in Deaf Smith County, Texas). Table of prices for different weights. 2. Fresh stone ground flours. 3. Cereals, made from whole grains and milled in a manner to allow quick cooking, incl. Kokoh (which can be used as a milk substitute or prepared as a cereal for children). 3. Noodles (udon, soba, and shonai fu—wheat gluten cakes). 4. Beans: Azuki beans ("The King of Beans... Organically grown on the island of Hokkaido, Japan), black beans (a sweet black soybean imported from Japan. Organically grown), chickpeas, soybeans ("Organically grown in Pennsylvania. A food high in protein, vitamins and minerals. Should be soaked many hours before cooking. Particularly good if cooked with Kombu"), pinto beans, whole green lentils, red split lentils. Table of prices for different weights.

5. Sea vegetables: Nori (dried laver), kombu, wakame, hiziki, agar-agar. 6. Dried fish and vegetables: Bonita [sic, Bonito] flakes, chirimen iriko, daikon pickle, gourd strips (dried), daikon (dried radish). 6. Order form. 7. Beverages: Kukicha, mu herbal beverage, yannah, lotus root powder, mugicha (barley tea), peppermint tea.

8. Soybean Products (imported from Japan): Soy sauce ("aged for at least 18 months"; 16 oz, 32 oz, ½ gallon, 1 gallon, 4.75 gallon keg). Mugi miso—Soybean puree ("Made by a special enzymatic process, this Miso is aged for 18 months. It is made from soybeans, barley, water and salt. It is ideal for making soups and sauces and blends well with tahini to make a spread for bread." 1 lb, 2 lb, 4 lb, 44 lb keg). Hacho miso—Soybean puree ("A darker, stronger miso than Mugi Miso..."). Moromi ("A thick sauce removed from the bottom of the Soy Sauce kegs after fermentation. Its uses are unlimited in soups & sauces"; 7 oz.). Seitan ("A concentrated protein source made from wheat and soy sauce. When used in soups or sauteed in vegetables, it has a taste much like beef"; 3½ oz.).

9. Condiments: *Furikake*, kuzu arrowroot, tekka, umeboshi, sesame butter, Erewhon sesame tahini, sesame salt, white sea salt, grey sea salt. 10. Oils: Refined corn oil, corn germ oil, sesame oil. 11. Sundries: Sesame

seeds, sunflower seeds, pumpkin seeds, popcorn, raisins (Thompsons), dried apricots, wheat germ (raw), apple butter, whole dried chestnuts. 12. Toilet articles: Dentie (tooth powder made from eggplant and salt), Aditi sesame shampoo, Orgene [Orjene] herbal shampoo, Fu-nori (seaweed shampoo), sesame coconut soap, vege oat soap.

13. Kitchen and tableware: Cookbooks: *Zen Cookery*, *Cooking with Grains and Vegetables*, *Cooking Good Food*, *Zen Macrobiotic Cooking*. Tableware: Rice paddles (bamboo), soy sauce dispenser, oil skimmer, bamboo tea strainer, vegetable press, vegetable brush, bamboo chopsticks (Japanese), chopsticks (Chinese), MAC knife (vegetable), vegetable knife, fish knife, grater, suribachi (3 sizes), Corona hand grinding flour mill (\$10.95).

On the inside back cover is a United Parcel Service rate chart. Address: 342 Newbury Street, Boston, Massachusetts 02115. Phone: 617-262-3420.

547. Blinn, Johna. 1970. Meatless restaurants hard to find: celebrity cookbook. *San Bernardino County Sun (The) (San Bernardino, California)*. March 6. p. 40.

• **Summary:** Actor Dennis Weaver says: “I became a vegetarian about eleven years ago because it made me feel so good.”

The night before he’d fared very well “on a Chinese dinner of sweet-sour fish with fermented bean curd sauce and Chinese vegetables and rice, but he’s not always so lucky.”

Weaver says, “It’s almost impossible for a vegetarian to eat out because American chefs are completely oriented toward meat.”

He has two favorite restaurants in California. Jim Baker first started the “Aware Inn.” Now he has another restaurant on the Sunset Strip called “The Source,” which is strictly vegetarian. The last time Weaver was there he had Baker’s high protein cereal. It’s not cooked; raisins are put on top with chunks of fresh apple slices and a little yogurt or cream. It’s similar to the Swiss cereal, Familia, sold in grocery stores. Weaver says: “It’s marvelous. You feel like ‘Man I’m really out there eating nature’s best!’”

A large photo shows Weaver looking very happy.

548. Bolduc, William T.; Teeguarden, Ronald. 1970. Certificate of amendment to the articles of incorporation: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 2 p. April 23. 26 cm.

• **Summary:** Eden Organic Foods has its registered office at 514 East William Street, Ann Arbor, Washtenaw County, Michigan. At a meeting of the members, held on 22 April 1970, Article IX was amended to read as follows: “In the event of dissolution, all assets real and personal shall be distributed to such organizations as are qualified as tax exempt under section 501(c)(3) of the Internal Revenue Code of the corresponding provisions of a future United States Internal Revenue Law.

Signed by William T. Bolduc, Jr. and Ronald Teeguarden on 23 April 1970. Received by the Michigan Department of Treasury, Corporation Division (Lansing, Michigan), on 27 April 1970. Filed on 13 May 1970. It is noted that the corporation has no corporate seal to affix to this document. Address: 1. President; 2. Secretary. Both: Washtenaw Co., Michigan.

549. **Product Name:** Hopi Seeds: Sunflower Seeds, and Pumpkin Seeds (Dry Roasted with Tamari).

Manufacturer’s Name: Erewhon Trading Co., Inc.

Manufacturer’s Address: 33 Farnsworth Street, Boston, MA 02210. Phone: (617) 542-1358.

Date of Introduction: 1970 March.

Ingredients: Sunflower or pumpkin seeds, tamari.

How Stored: Shelf stable.

New Product–Documentation: Erewhon Trading Co., Inc. 1971. Natural and organic foods. Price list. Effective Thanksgiving day, Nov. 1971. Talk with Nik Amartseff. 1992. April 3. See long interview. These two products were developed by Jerry Sh--, were made in a corner of the Erewhon warehouse at Farnsworth Street, and were on the market by late 1969 or early 1970.

550. Succop, Linda S. 1970. Certified resolution of change of registered office: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 1 p. March 9. 26 cm.

• **Summary:** Linda S. Succop, treasurer and assistant secretary of Eden Organic Foods, Inc. states that at a meeting of the board of directors, held on 18 Feb. 1970, it was “Resolved that the location of this corporation within the State of Michigan is changed from 211 South State Street, Ann Arbor, Washtenaw County, Michigan 48104, to 514 East William, Ann Arbor, MI 48104.” Signed by Linda S. Succop on 9 March 1970. Received by the Michigan Department of Treasury, Corporation Division (Lansing, Michigan), on 10 March 1970. Filed on 19 March 1970. Address: Ann Arbor, Michigan.

551. Photograph of Michio Kushi with a present at his birthday party, 17 May 1970, 216 Gardner Rd., Brookline, Massachusetts. 1970.

• **Summary:** Seated at the table is Susan Sims, wife of Duncan Sims. Duncan was already in Brookline when Susan arrived—in her “really Blue 1968 Mustang Fastback. She was a big fan of Bob Dylan.” They were married in Brookline. In about 1970 they left Brookline and started a macrobiotic community in Fernie, British Columbia, Canada; it was still active in July 1978 when Norio Kushi was in the area on a bicycle trip (e-mail from Norio Kushi, 19-20 Jan. 2011).

“This was the house in which Michio and Aveline lived before they got The Big House (like a stone castle, 62 Buckminster Rd.) off Route 9, near the reservoir.

Wally Gorell lived in the Gardner Rd house, as did, at different times, Paul Hawken and Tyler (Ty) Smith as well as numerous others. Ty used to take care of Michio and Aveline's kids when he first lived there. Yuko Okada [of Muso Shokuhin] used to teach us aikido in the backyard" (Jimmy Silver, 14 Jan. 2011).

This color photograph, taken by Lily Kushi, is from the Michio and Aveline Kushi Macrobiotics Collection, National Museum of American History, Smithsonian Institution, Washington, DC. Reprinted with permission of the Smithsonian. Address: Brookline, Massachusetts.

552. Erewon Trading Co., Inc. 1970. Traditional foods: Importers, processors, distributors. Wholesale catalogue addition. Boston, Massachusetts. 5 p. July 1.

• **Summary:** On the cover is the silhouette of three heads of grain on the plant, by a Japanese crest. "As of July 1st., we will be set-up in our new warehouse... All orders that are to be picked-up, will be from 33 Farnsworth Street, South Boston, Massachusetts. The new phone number for wholesale information and offices is (617-542-1358). Please continue to direct all correspondence and payments to 342 Newbury Street, Boston, Massachusetts 02115." Prices are given for each item.

New products include: Soybeans in 100 lb (\$26.00), 50 lb, 25 lb, 10 lb, and 1 lb quantities. Kome Miso (Made with rice. It is younger and contains less salt than other Miso's. Used more as a delicacy; 44 lb (\$24.50), 2 lb, 1 lb). Koji rice, imported from Japan, will be available soon. Address: 342 Newbury Street, Boston, Massachusetts 02115.

553. *Ann Arbor News (Michigan)*. 1970. Organic gardening craze makes headway in Washtenaw County. July 16.

• **Summary:** A large photo shows William Bolduc, owner of the Eden Organic Food Shop, which he recently opened at 514 E. William St. in Ann Arbor, standing in front of shelves of a variety of bagged organically grown foods. He sells everything from brown rice to cous-cous, and reports that the interest in organic foods and organic gardening is on the increase in the Ann Arbor area. Bolduc caters mostly to students at the University of Michigan campus who, he says, are becoming increasingly diet and health food conscious. A list is given of the name and addresses of organic farmers and gardeners in the area that Bolduc knows (including Tom Vreeland, 5861 Geddes Rd., Ypsilanti; vegetables).

Gardening organically means growing fruits and vegetables in the way it was done 40 to 50 years ago, without the use of chemical fertilizers, sprays, and powders. Rotting organic matter, manure, and mulch are used to fertilize the soil and build good humus. The resulting fruits and vegetables are said to taste much better, be larger and more nutritious, and uncontaminated by chemicals. Ruth Stout's method of organic gardening is discussed.

Note: This is the earliest publication seen (Feb. 2003)

concerning the activities of Eden Foods. However all the founders of the company agree that it was actually founded in November 1969. Several legal documents from late 1969 and 1970 also provide strong evidence in support of this Nov. 1969 date.

554. Sanders, Jacquin. 1970. Market grows for organic food. *Daily Times-Advocate (Escondido, California)*. July 27. p. A-9.

• **Summary:** The ecological revolution has greatly amplified the interest in organic foods. Circulation of Rodale's *Organic Gardening and Farming* magazine has soared to 525,000—to the amazement of executive editor Jerome Goldstein. "Jim Baker founded the Aware Inn in Los Angeles three years ago [i.e. 1967], lost it in a divorce settlement, and now has opened The Source." His clientele includes such regulars as Hollywood stars Steve McQueen, Warren Beatty and Yvette Mimieux. He serves only vegetarian food, mostly raw. He emphasizes fruits and salads. "Salads are the food of the future," says Baker.

"Baker bases his culinary principles on a higher law. Jesus, he says, was against heated food too."

555. Bolduc, William T. 1970. Certificate of amendment to the articles of incorporation: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 2 p. July 6. 26 cm.

• **Summary:** Eden Organic Foods, Inc. has its registered office at 514 East William Street, Ann Arbor, Washtenaw County, Michigan 48104. At a meeting of the members, held on 2 July 1970, Articles II, V, VI, and IX were amended. The main changes read as follows:

"Article V. Said corporation is organized on a stock basis. The total number of common shares which the corporation shall have authority to issue is 2000 of the par value of \$1.00 per share... No stockholder shall sell his stock without first offering it back to the corporation in writing and then giving the corporation the right to purchase same within thirty (30) days at the book value.

"The names and places of residence or business of each of the incorporators and the number of shares subscribed for each are as follows: William T. Bolduc, Jr., 6210 Bethel Church Road., Saline, Michigan: 1000 shares. Judith Bolduc, same address, no shares. Ronald Teeguarden, 915 Oakland, Ann Arbor, Michigan, no shares. Gloria Dunn, General Store, 211 S. State St., Ann Arbor, Michigan, no shares.

"Article IX. In the event of any liquidation, dissolution or winding up of the corporation, the assets or the proceeds thereof belonging to the corporation shall be distributed ratably among the shareholders according to the number of shares held by each after all just debts have been paid."

Signed by William T. Bolduc, Jr. on 6 July 1970. Received by the Michigan Department of Treasury, Corporation Division, on 8 July 1970. Filed on 4 Aug. 1970.

Address: Saline, Michigan.

556. **Product Name:** Soybeans.

Manufacturer's Name: Erewhon Trading Co., Inc. (Importer). From Japan.

Manufacturer's Address: 33 Farnsworth St., Boston, Massachusetts. Phone: (617) 542-1358.

Date of Introduction: 1970 July.

New Product–Documentation: Erewhon Trading Company Inc. 1970. July. Wholesale-retail catalogue. The company now sells soybeans in the following quantities and prices: 100 lb for \$14.50, 50 lb. for \$8.00, 25 lb for \$4.25, 10 lb for \$2.90, and 1 lb for \$0.30.

557. **Product Name:** Shonai Fu–Wheat Gluten Cakes.

Manufacturer's Name: Erewhon Trading Co., Inc. (Importer). Made in Japan.

Manufacturer's Address: 33 Farnsworth St., Boston, Massachusetts. Phone: (617) 542-1358.

Date of Introduction: 1970 July.

Wt/Vol., Packaging, Price: 4 oz.

How Stored: Shelf stable.

New Product–Documentation: Erewhon Trading Company Inc. 1970. July. Wholesale-retail catalogue. “New imports from Japan... Used as crackers or in soups. 4 oz. \$0.33.”

558. **Product Name:** Kome Miso–Made with Rice.

Manufacturer's Name: Erewhon Trading Co., Inc. (Importer). Made in Japan.

Manufacturer's Address: 33 Farnsworth St., Boston, MA 02110. Phone: (617) 542-1358.

Date of Introduction: 1970 July.

Wt/Vol., Packaging, Price: 44 lb, 2 lb, or 1 lb.

New Product–Documentation: Erewhon Trading Company Inc. 1970. July. Wholesale-retail catalogue. “New imports from Japan... It is younger and contains less salt than other Miso’s. Used more as a delicacy. 44 lb for \$24.50, 2 lb for \$1.49, 1 lb for \$0.85.”

559. Photograph of Aveline Kushi standing at 7511 Franklin Ave., Hollywood, California. 1970.

• **Summary:** This color photograph, taken by Lily Kushi, is from the Michio and Aveline Kushi Macrobiotics Collection, National Museum of American History, Smithsonian Institution, Washington, DC. Reprinted with permission of the Smithsonian.

E-mail from Norio Kushi (son of Michio and Aveline). 2011. Jan. 19. “In the spring of 1969, my mother moved to Los Angeles and the first place she rented was at 7511 Franklin Ave., Los Angeles, 90046. The house is on the corner of Sierra Bonita Blvd. and was owned by the actor Gary Cooper.

“It was a much smaller house than 7357 Franklin Ave., which they moved to in 1970.” Address: Hollywood,

California.

560. Photograph of Michio and Aveline Kushi with landlady at 7357 Franklin Ave., Hollywood, California. 1970.

• **Summary:** Seated in a large room with the landlady (Mrs. Durkin), they are discussing the terms of the lease on the house they are about to move into.

This color photograph, taken by Lily Kushi and dated July 1970, is from the Michio and Aveline Kushi Macrobiotics Collection, National Museum of American History, Smithsonian Institution, Washington, DC. Reprinted with permission of the Smithsonian.

E-mail from Norio Kushi (son of Michio and Aveline). 2011. Jan. 19. “In the spring of 1969, my mother moved to Los Angeles and the first place she rented was at 7511 Franklin Ave., Los Angeles, 90046. The house is on the corner of Sierra Bonita Blvd and was owned by the actor Gary Cooper.

“It was a much smaller house than 7357 Franklin Ave., which they moved to in Aug. 1970. This move was made when the people living in the house were working on the new Erewhon store. At the time Aveline moved into 7357 Franklin Ave., a TV movie was being shot there and wasn’t completed until after the move; it was ‘Goodbye, Raggedy Ann,’ starring Mia Farrow (aired 1971).

“Jacques and Yvette DeLangre, along with their daughter Cynthia, and sons, Tommy and Philippe, lived on Sierra Bonita Blvd., two blocks away. Jacques DeLangre was a photographer at that time and later founded the Grain and Salt Society, which is now headquartered in Asheville, North Carolina.

“I stayed in Brookline for the summer and did my first overnight bicycle ride at age 14 from Brookline to Montreal, Quebec and back. I moved into 7511 Franklin Ave. the beginning of November 1969 after having driven across the country (as a passenger) with Jim Docker and Peggy Winters in their Dodge Dart.

“The Kushi homes in Los Angeles were always a bustle of activity. We always had lots of guests for dinner along with the many people who lived in the house. Particularly I recall the musicians who lived with us and who would come by for dinner. Some of the more notable people who would visit are, Cicely Tyson (actress), Lenny Capizzi (who wrote ‘The Monster Mash’), Frank Zappa, along with the Mother’s of Invention, Dan Hicks and the Hot Licks, among others. I lived there for only a short time as I didn’t care for the Hollywood High School scene and ended up moving to Seattle soon after my 15th birthday at the end of December 1969.”

“Gloria Swanson had also become close friends at this time, although my parents may have met her earlier. Gloria Swanson had a Rolls Royce, but got rid of it because she didn’t need such a car, especially as it was designed to be chauffeur driven and Gloria Swanson, having regained

her health, much preferred driving on her own. Gloria Swanson replaced the Rolls Royce with a sporty Toyota Celica (manual transmission, as she preferred) and at the same time bought my mother a Toyota Corolla (automatic transmission).”

Follow-up e-mail from Norio on Jan. 20. “Regarding Gloria Swanson, I know my parents met her through William Dufty. I also know the story of her getting sick to the point she had to give up acting only second hand from Bill Dufty, She did recover through the suggestions from my father and resumed a long acting career on Broadway in New York City (NYC). This story may be in Gloria Swanson’s autobiography *Swanson on Swanson*, which I have never read. Yes, the 1970 Toyota Corolla was brand new and a gift from Gloria Swanson. My mother was once stopped on the Hollywood Freeway driving this car for going too slow.

“Gloria Swanson was close enough friends with the family that if I were in her neighborhood in NYC, near the Metropolitan Museum of Art, I would stop in to say hello without prior notice. Gloria Swanson also let me borrow her Toyota Celica [in Los Angeles] for a few months after I got my driver’s license since she at that time was living in NYC full time and didn’t need a car.”

Peggy Steevensz (who lived for many years in this house), daughter of Roy Steevensz recalls (e-mail of 7 May 2011): “The 7357 Franklin Ave. house was informally called The Kushi House. For lectures seminars events it was promoted and known as The East West Center. Later I think (about Sept/October 1975) the house was sold and we moved to 7511 Franklin Ave, the original home Aveline started as East West Center in the spring of 1969.”

Norio Kushi adds (e-mail of 12 May 2011): “Yes, the first house in Los Angeles that my mother moved into was the one at 7511 Franklin Ave. on the corner of Sierra Bonita Blvd. This house was owned by Gary Cooper, the actor. My mother moved there in February of 1969 with our youngest brother, Hisao, who is now living in Santa Monica with his wife, Karen and their two children, Kate and Ty. The rest of my brothers, Haruo (aka Larry), Phiya and sister Lily moved to 7511 Franklin Ave. in June 1969 after school finished for the summer back in Brookline. I stayed in Brookline until October 1969, when I decided to make the move to Los Angeles as well, which is when I drove across country with Jim Docker and Peggy Winters.” Address: Hollywood, California.

561. Blake, Ambrose. 1970. The organic revolution. *San Francisco Examiner*. Aug. 9. LifeStyle section. p. 7. Sunday.
*

• **Summary:** A remarkable article about a meeting held by Organic Merchants high (at about 8,000 feet) on Mt. Shasta in Northern California next to the Sierra Club’s Horse Camp Lodge. The tone of the article is sarcastic and unsympathetic. Some of the people are naked. Patches of snow still remain

in early August.

Fred Rohe, owner of New Age Natural Foods in San Francisco, calls the meeting to order. Sixty people, sitting on the ground, some in yoga postures, are gathered in a circle. 35 of them are organic food merchants mostly from California, and as far away as Portland, Oregon, and Los Angeles.

Fred Rohe says: “Let us have a few minutes of silence in gratitude for each other’s presence here in the presence of this lovely mountain on this beautiful planet of ours.”

The group becomes quiet in an attitude of prayer. One can hear the afternoon wind rising on Mt. Shasta. After a few minutes Fred continues: “Mountain and man are both permeated with the same spirit... and while we share this spirit let us chant the universal mantra.” The group joins in chanting “OM”—which also happens to be the initials of Organic Merchants.

Fred then leads a discussion and asks individuals why they are here. Answers include:

“We’re here for love.”

“We’re a guiding light to distribute pure food.”

“Our goal is to become god and to serve him.”

“Our purpose is to save the planet.”

“We are here not only for the environment, but for the world.”

Note: The first Earth Day had happened earlier that year, on April 22, 1970.

As the meeting progresses, some men begin gathering firewood and some women to chop vegetables that will be cooked in a 5-gallon metal can in the little water available and seasoned with “vega-vita,” a ground herbal mixture.

The discussion turns to what is happening to the U.S. food supply, as it is contaminated by various chemicals. Organically-grown pure foods are needed.

Natural and organic food stores are popping up all over: Erewhon Trading Co. in Los Angeles; The Family Store in Carmel Valley; the Umbilical Cord in Fresno; Sunshine Natural Foods in Portland; The Mustard Seed in Mill Valley; The Granary in Cotati; and Polar Natural Foods in Arcata—to name just a few. And there are natural food restaurants like Osoba Noodle Nook in Berkeley.

The merchants have agreed not to sell certain foods and additives they consider harmful: artificial flavors and colorings, white sugar and synthetic sweeteners, synthetic preservatives and emulsifiers, corn syrup and hydrogenated fats. This is their “contract with the public.”

The short-haired writer of the article is invited to have some fresh alfalfa sprouts which he accepts. Later he is invited to stay for dinner, but he refuses politely. He closes the article as follows:

“And an hour later, near like Siskiyou, in the motel dining room, you order a choice top sirloin, Caesar salad, french fries and a bottle of Pinot Chardonnay. Finished with a snifter of Hennessy cognac.

“Not organic. But one man’s personal food trip.”

A half-page horizontal photo shows “A meeting of the board of Organic Merchants on Mt. Shasta.”

Note 1. This is the earliest document seen (March 2020) that mentions “Organic Merchants.” According to Arran Stephens, this was the group’s first meeting.

Note 2. In the Sept. 13 (Sunday) issue of the *San Francisco Examiner*, under the heading “Reaction: What the Readers are Thinking,” are many letters from readers criticizing Ambrose Blake’s article. For example: “Sure, Mr. Blake must have felt out-of-place among the people he met on the mountain, but they all welcomed him and went out of the way to be friendly. Is this how he repays that kindness, with a knife in the back?”

562. Coates, Roger M.; Coates, Margery K. 1970. Memorandum of settlement. Harford County, Maryland. 1 p. Aug. 7. 28 cm.

• **Summary:** On 7 Aug. 1970 Rod and Margy Coates purchased 2.63 acres of land from Wilmer D. Morton and Mamie F. Morton, his wife. The purchase price was \$30,000, plus \$1,082 transfer fees. The buyers paid \$3,000 cash at the time of closing. The land was located on the northerly side of Bynum Road in The Third Election District of Harford County, Maryland. Address: Maryland 21014.

563. Cox, Jeff. 1970. The “nowhere” store that’s going places. *Organic Gardening and Farming* 17(8):57-59. Aug.

• **Summary:** Editor’s introduction: “Boston’s busy hub of macrobiotic followers—the Erewhon Trading Co.—is an organic foods center that’s an education in itself.”

“Roger Hillyard, 27, is macrobiotic and is general manager of the company, which also has a store at 8003 Beverly Boulevard, Los Angeles.”

“Nine persons work for Erewhon, which has just leased a large Boston warehouse to expand its shipping department.”

For Erewhon, business took off in 1970. In just one year the company had gone from supplying 2-3 stores to supplying 150.

564. Kennedy, J. Robert. 1970. Exposed! Facts, fallacies and frauds about ‘organically grown.’ *Health Foods Business* [sic, *Dietetic Foods Industry?*] 4(3): Aug.

• **Summary:** A detailed description, with many photos and two illustrations, of exactly how Wehah Farm in northern California grows short-grain brown rice for Chico-San. “We searched eight years offering premium prices for a grower who would meet our standards for *organically grown* rice... Our agreement with Wehah Farm was signed in the fall of 1968 and an advertising campaign was started. By the time of the 1969 harvest a third of our crop was sold in advance and a rapid build-up of repeat sales followed.” Note: The name “Wehah” is formed from the first names of the four

Lundberg brothers: Wendell, Eldon, Harlan, and Homer.

“Chico-San rice fields were selected and located less than ten miles from the head of the famous Feather River which cascades out of the Sierra Nevada.” Purple vetch and chicken manure are plowed into the soil to enrich it and *Gambusia affinis*, a small fish, is used to control insects in the flooded rice fields. “Chico-San rice is stored in the husk and milled only upon order to maintain its freshness...”

One photo shows J. Robert Kennedy with a sack of Chico-San organically grown brown rice. Kennedy believes that there are now some “sly and phony growers” who say they are growing brown rice organically, when actually they are not. And some millers, jobbers, distributors, and retailers are selling this non-organic rice as if it were organically grown. “Manufacturers and distributors in the health food industry have been aware of misleading or deceptive labeling on supposedly organic or natural products.”

Note: The title of this periodical, taken from an offprint sent by Chico-San, is probably incorrect. It should probably be *Dietetic Foods Industry* which started in about 1955, and whose title was changed to *Health Foods Business* in 1973. Address: President, Chico-San, Inc.

565. *Macrobiotic (The) (Carmichael, California)*. 1970. West Coast macrobiotic summer camps. 10(3):2-4. Aug.

• **Summary:** “The first of this year’s West Coast macrobiotic summer camps was held August 14-23, in the tall pine country of French Meadows, California, and was attended by a total of about 200 people, most of whom were under 30, and relatively new to macrobiotics. Two well cooked (wood stove) meals were prepared and served each day by the kitchen staff, under the able supervision of Cornelia Aihara, Nann Schleiger, and Yvette de Langre. The food consisted almost entirely of organically grown: whole grains (rice at every meal, with others for variety and additional nutritional value), cooked and raw vegetables, beans, seaweeds and seasonings miso, tamari, seasalt, vegetable oils, sesame seeds and arrowroot starch. Two desserts were served (rice pudding and oatmeal cookies, both containing raisins), fruit-nut vegetable salad twice, and egg drop soup once—no other fruit or animal food. Breakfast was served for children only, but there were occasionally leftovers for others.

“As at last year’s second West Coast camp (Big Sur), modern conveniences and facilities were minimal, and there was thus plenty of physical activity for everyone, as well as several scheduled daily activities (many more than at any previous camp), all of which, as well as meals, were, as usual, voluntary. At 6:30 a.m., Jacques de Langre led Do-In, a kind of combined self-diagnosis and treatment related to acupuncture massage. At 8:00 came acupuncture massage, led by Becky Wood. People came in pairs, and alternated massaging and being massaged. At 9:00 there were 2 lectures, one by Herman Aihara, the other by Alcan Yamaguchi, Editor-in-Chief of the Japanese macrobiotic

magazine. These extremely interesting and stimulating lectures (which will appear in future issues, of this magazine—including one on this year’s summer lecture tour) were followed, at about 11:30, by lunch.

“The next few hours, between lunch and supper (about 6:30), were filled with plate and pot washing, cooking, wood chopping, hiking, swimming, reading, or ‘goofing off’—unless one felt like attending classes in T’ ai Chi Ch’uan (Gene Neufeld), cooking (Yvette de Langre), cooking for men (Jacques de Langre), macrobiotic symptomatic treatments (Becky Wood), or to go and chant *nam-myoho-ren-ge-kyo* [The Heart Sutra] with Bill French.

“After dinner were nightly discussions and children’s campfires (these included story-telling, games and goodies: popcorn, chapatis, baked apples, etc.; parents alternated supervising, and were thus free each night except when it was their turn.) Talks were given by Merv Lovenburg (Professor of Geology at UC Davis, who pointed out that scientists and ‘macrobioticists’ have much to learn from each other: Scientists should learn about spectral {yin-yang} analysis and the fact that everything is constantly changing; and macrobioticists have a great deal to learn about heredity, genes, chromosomes, DNA, RNA, etc.—as well as some of science’s more polished experimental techniques. Merv also suggested, however, that it would be a mistake for macrobiotics to devote too much time to scientific analysis, since macrobiotics is fundamentally an art. The rest of Merv’s talk was mainly devoted to discussing and answering questions about polar shifts and other geological movements (including continental shifts—which geologists have noticed, and physicists denied, for many years); Villem Van Prooijen (from Amsterdam, Holland, who spoke about macrobiotics in Northern Europe, saying that there is a great deal of interest in macrobiotics there, but that many beginners are still taking drugs) at which point resounding laughter poured forth from the audience (all drugs, especially synthetic ones, are so extremely yin that they neutralize virtually all the beneficial effects of natural eating; see the macrobiotic, vol.9, no.3). Villem went on to say that there is a big need of people with even a minimum of experience and understanding to go there and help them; language is no problem, he said, since anyone who attends a few years of school there learns English quite well); Jack Garvey (who spoke about his and his friends’ opening a macrobiotic food store. One of the main points Jack emphasized was that the harder they worked, the more people came in {Mr. Aihara agreed with Jack’s conclusion that Yang work attracts Yin people}). Details about opening a macrobiotic food store are available from Jack Garvy, (5201 N. Camino Escuela, Tucson, Arizona); Jacques de Langre (see p. 24 for Jacques’ fine talk. Jacques also announced that a new book by Michel Abehsera, author of *Zen Macrobiotic Cooking*, is now on the presses, and will soon be available in hard cover. About twice as long as *Zen Macrobiotic Cooking*, Michel’s new book contains no recipe repetitions, and, as in

his previous book, there are many interesting and humorous anecdotes, helpful hints, and provocative, incisive thoughts—all of which are also different from those in his first book. As soon as it is ready, *Cooking for Life* will be available from the Ohsawa Foundation Business Office), Herman and Alcan.

“Camp Director Gene Neufeld did an excellent job as Activities Director and Master of Ceremonies. His calm humor was often helpful in restoring order and easing tensions, by the agile employment of a delicate balance of common sense and nonsense. General announcements relating to camp activities, including an occasional complaint, were made at the nightly sessions. One of the more interesting complaints was registered by Villem Van Prooijen, who said that he was astounded to see that several people were throwing away food. This almost never happens in Europe, he said, where such affluence as we take for granted is experienced only by the rich. It was then suggested that people take only as much food as they are definitely going to eat, and then go get more later if still hungry. Next it was suggested that, although this is an excellent idea, people make mistakes—so if one takes more than he can eat, he can (a) offer it to someone else, (b) put it in the dogs’ bowl (cats and dogs thrive on grains, fish and cooked vegetables, and are especially fond of miso soup), or (c) return it to the pot from which it was served. When some disagreement with (c) was heard, Mr. Aihara was asked for his opinion on the matter. He thanked Villem for his comments, and pointed out that No-Waste is one of the most basic of all macrobiotic principles (see “Even a Grain of Rice,” in vol.8, no.1; and “Zen or Macrobiotics,” in vol.9, no.4). The next day, people stopped throwing away uneaten food, and John Deming divided the garbage cans into 2 types—organic and other, the contents of the former being returned to the soil. At this point, Mr. X (I’ve forgotten his name) reminded us that aluminum is recyclable, and that since he could get money for turning it in, he would appreciate it if people would give him their empty beer cans, rather than leaving them lying around. At this point, Gene Neufeld stepped in: ‘Anyone willing to admit he’s been drinking beer, please see Mr. X.’

“(Editor’s note: Alcan and I want to express our appreciation to Gene Neufeld and everyone at the camp who donated \$150 for our flight to Seattle so we could be there when that camp started—without having to leave the first one early.) The second camp (August 22-31, in the beautiful Wiley Creek Campground near Seattle) was attended by about 80 people. Aside from obvious similarities with the first, there were also some differences: (1) A boy with ‘infectious’ hepatitis was refused admission; (2) Whereas several people at the first camp complained of constipation, here there were more stomach and liver troubles caused by overeating, caused, in turn, by delicious cooking (supervised by Pat Johnson and Alice Feinberg) and cloudy weather (less physical activity); and (3) less scheduled activities: Due

to difficulties in securing a camp site, and the consequent necessity of changing the dates of the camp, Ken Burns and Tom Katsuyoshi (instructor of Aiki-do, who gave one demonstration) were unable to attend for the full time. Also, there were no classes in cooking, T'ai Chi Ch'uan or Do-In. (There were, however, the following: acupuncture massage and macrobiotic symptomatic treatments (Becky Wood), chanting of *nam-myō-ho-ren-ge-kyō* (Alcan Yamaguchi), and enlightening lectures and discussions by Herman and Alcan.) From Camp Director Bob Johnson, we have just heard that everyone who attended enjoyed it very much, and felt that it was a successful camp. We are sure that next year will be even better." Address: The Ohsawa Foundation, Inc., 2523 Gunn Road, Carmichael, CA 95608.

566. *New York Times*. 1970. Organic food fanciers go to great lengths for the real thing. Sept. 7. p. 23.

• **Summary:** The "real thing" is organically grown food. The article is extremely favorable to the organic movement. However it quotes several scientists who seem not to be fully informed. One is Dr. Victor Herbert, a professor of pathology at Columbia University's College of Physicians and Surgeons. He says: "'Fads come and go, but there is no convincing scientific evidence that so-called organically-grown foods contain any extra nutritional value as compared with the same food grown in a conventional way.'"

Also quoted is Dr. George W. Irving, administrator of USDA's Agricultural Research Service. He says: "I don't know of any evidence that foods grown using inorganic fertilizers and pesticides, in accordance with Federal guidelines, are of any less nutritional value than foods grown without them."

567. Bolduc, William T. 1970. Certificate of increase of capital stock: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 2 p. Sept. 26. 26 cm.

• **Summary:** Eden Organic Foods, Inc. has its registered office at 514 East William Street, Ann Arbor, Washtenaw County, Michigan 48104. At a meeting of the stockholders, held on 26 Sept. 1970, it was resolved to increase the number of shares of authorized capital common stock to 2,000 (par value \$1.00) from 1,000. And the provisions of the Articles of Incorporation relating to capital stock were amended to increase the number of common shares to 50,000, par value \$1.00.

Signed by William T. Bolduc, Jr. on 26 Sept. 1970. Received by the Michigan Department of Treasury, Corporation Division, on 30 Sept. 1970. Filed on 2 Oct. 1970. Address: Saline, Michigan.

568. LaBel, Murray; Izakowitz, Benjamin; Hillyard, Roger. 1970. Lease agreement signed by Erewhon Trading Company Inc. in Los Angeles. Los Angeles, California. 2 p. Oct. 8. Unpublished typescript. 34 cm.

• **Summary:** This lease was executed on 8 October 1970 by and between Murray LaBel and Benjamin Izakowitz (lessors, owners of the building), and Erewhon Trading Company Inc. (lessee), for a retail and wholesale grocery at 8003 Beverly Boulevard, Los Angeles. The 2-year lease commences on 1 July 1971 and ends on 30 June 1973. The amount of the lease is \$225/month. The lease is signed by the three parties to the agreement. Roger Hillyard (lessee) is Executive vice president for Erewhon Trading Co. Inc.

Talk with Tom DeSilva, owner of Erewhon—Los Angeles. 1995. Jan. 17. Tom is quite sure that this is the earliest lease for the Erewhon retail store in Los Angeles. From the time the store opened in about Sept. 1969 until the time of signing this lease, the rent was probably paid on a month by month basis without a formal lease agreement.

Note: This is the earliest document seen (March 2020) concerning Erewhon—Los Angeles. Address: Los Angeles, California.

569. *Time*. 1970. The kosher of the counterculture. 96:59-60, 63. Nov. 16.

• **Summary:** "'Tell me what you eat and I will tell you what you are,' said Jean Anthelme Brillat-Savarin, the 18th century French gastronome. This aphorism is especially true today." The youth of Woodstock Nation, with almost religious zeal, "are becoming vegetarians. They are also in the vanguard of the flourishing organic-food movement, insisting on produce grown without chemical fertilizers or pesticides.

"Diet is very central to the revolution," says the leader of a north California commune. Why the new vegetarian trend? (1) It's inexpensive; (2) The eco-activists are concerned about the amount of DDT and other chemicals in meat; (3) There is the vegetarian influence of East Asian religions such as Buddhism, Yoga, and Hinduism; (4) The Macrobiotic diet is vegetarian except that it allows fish and seafoods, but it discourages use of dairy products. There is a lengthy, critical discussion of macrobiotics, George Ohsawa ("who wrote dozens of abstruse books on ancient Oriental diet and medicine and was the principal proselytizer for macrobiotics in Europe and the U.S."), and Beth Ann Simon ("Macrobiotics can be dangerous. The diet became notorious 5 years ago when a 24-year-old Greenwich Village housewife named Beth Ann Simon died after losing 50 lbs." on Macrobiotic Regimen No. 7); (5) Diet and yoga have become a substitute for drugs for many people. They lead to a more real and spiritual consciousness. "The young are beginning to realize that drugs aren't real. They thought it was a shortcut to the spiritual."

"Anthropologist Claude Lévi-Strauss has shown that a society's cuisine is a language into which it unconsciously translates its structure. Thus frozen foods, packaged foods, TV dinners, fast-food franchises, preservatives and additives all stem from a culture that made pragmatism, step saving

and time saving virtues in themselves. Because there are different values and plenty of free time in the new culture, gardening (organically), grinding wheat, baking bread, preparing yogurt and making a quiet ceremony of cooking and eating are all parts of the scene... For the more earnest of the cultists, the kitchen has become a holy place, as it is to the Hindus and the Buddhists.”

The new diets are filtering to the suburbs via the teenagers. Rows of unfamiliar foods, such as brown rice, miso, aduki, and gomasio [sesame salt], are appearing in middle-class cupboards.

570. Aihara, Herman. 1970. A proposal for re-organizing the Ohsawa Foundation. *Macrobiotic (The) (Carmichael, California)* 10(4):Inside front cover to p. 1. Nov.

• **Summary:** “The following is a proposal that was recently presented to the Directors of the Ohsawa Foundation Inc. by its President, Herman Aihara. To Shayne Suehle, Fred Suehle and Bernard Silver 11/10/70

“In 1961, followers of George Ohsawa’s teaching established an Ohsawa Foundation in New York City, in order to inform the public about the philosophy of the Far East and its applications in daily life. I was elected President. When some of its members moved to Chico, Cal., they organized a 2nd American Ohsawa Foundation, directed by Al Bauman, Teal Ames, Mary Barsamian and me. Efforts to unite the two Foundations were unfortunately unsuccessful, as the number of macrobiotic followers in areas other than New York and Chico was not large enough. In 1964, due to implications pertaining to FDA law, the New York Ohsawa Foundation was dissolved, and the remaining Foundation in Chico was legally incorporated by Bill Salant, Lou Oles, Bill Nichols, Bob Kennedy, and me. Subsequently, however, after Bob Kennedy and I resigned from the Board of Directors because of our association with Chico-San Inc., manufacturers of macrobiotic foods; Bill Salant died in an automobile accident; and Bill Nichols resigned; Lou Oles was the only member of the Ohsawa Foundation. In 1966, he moved to Los Angeles and continued the work of the Foundation in co-operation with Jacques de Langre. After Lou’s death in 1967, I resigned from Chico-San and resumed work as President of the Ohsawa Foundation. During the past 3 years, the sales of books, pamphlets and subscriptions to the macrobiotic have risen steadily. The Commissioner of Non-Profit Organizations (who is investigating the Ohsawa Foundation) was astonished by the fantastic rise in sales this year. There are many reasons for these increased sales: (1) increased interest in macrobiotics among young adults (in America and other areas); (2) increased awareness of ecology, which in turn has led people to macrobiotics, which is based on Oriental ecology; (3) increased awareness of the benefits of organically grown foods; (4) increased awareness of the harmful effects of cyclamates, MSG, refined sugar and all other synthetic chemicals; (5) Michio Kushi, who

has convinced many young Americans of the benefits of macrobiotic eating—as have many of his disciples; (6) some of these, and other American macrobiotic leaders, who have started macrobiotic communities and educational meetings; (7) *You Are All Sanpaku*—which is now available in paperback and has introduced macrobiotics to the general public; (8) Chico-San, Erewhon and other macrobiotic food manufacturers and distributors, all of which have increased the supply of macrobiotic foods to health food stores and have thus made such foods available to people in even the most remote places.

“On this summer’s lecture tour, from letters received daily in large numbers and from my and others’ experience and observation, it is clear that the macrobiotic movement in America is growing at a tremendous rate. Now since the many local teachers lack communication and physical connections between them, the need for direction and educational help from the Ohsawa Foundation has become urgent. Nor can the Ohsawa Foundation be effective without suggestions and participation from the local organizations. In short, without a uniting organization, the American macrobiotic movement may turn into chaos. And since it is my belief that the Ohsawa Foundation, with its history, financial ability and experience, is well suited for such a task, I am proposing that the Directors of the Ohsawa Foundation Inc. re-organize it, by adding the following Directors immediately.

- “1. Michel Abehsera, 5 Clark St., Binghamton, New York.
- “2. Tony Abruzzo, 431 Hicks St., Brooklyn, New York.
- “3. Cornelia Aihara, 2523 Gunn Rd., Carmichael, Calif.
- “4. Joe Arseguel, 61 Pond St., San Francisco, Calif.
- “5. Ken Burns, 4546 8th Ave. N.E., Seattle, Washington.
- “6. Bert Butscher, 624 Myrtle Ave., Bryite, Calif.
- “7. Walter Dale, Box 6358 Pacific Station, Long Beach, Calif.
- “8. Jacques de Langre, 7557 Sunset Blvd., Los Angeles, Calif.
- “9. Jack Garvy, 5201 N. Camino Escuela, Tucson, Arizona
- “10. Lorraine Harr, 4102 N.E. 130th Pl., Portland, Oregon.
- “11. Bob Johnson, 905 30th Ave. S., Seattle, Washington.
- “12. Michio Kushi, 216 Gardner Rd., Brookline, Massachusetts.
- “13. Merv Lovenburg, Geology Dept., UC Davis, Davis, Calif.
- “14. George Mulek, 11724 109th Ave., Edmonton, Alberta, Canada.
- “15. Gene Neufeld, 390 O’Connor, Menlo Park, Calif.
- “16. Loring Palmer, Zen Center, 1884 Bush, San Francisco, Calif.
- “17. Louis Remy, 1258 Industrial Ave., Escondido,

Calif.

“18. Dr. Gordon Ruesink, 61 S. Valley St., Kansas City, Kansas

“Other Directors would of course be needed (especially in areas not covered by this list) and could be added as those in office decide.

“Sincerely, Herman Aihara, President, the Ohsawa Foundation.” Address: The Ohsawa Foundation, Inc., 2523 Gunn Road, Carmichael, CA 95608.

571. *Consumer Bulletin*. 1970. Peanut butter. Nov. p. 4., 37.
 • **Summary:** Above the title of this article is a large photo of a little girl making a peanut butter sandwich.

The suggestion was recently made by the USDA that a peanut butter and jelly sandwich would make a more nutritious breakfast for children than breakfast cereal.

As everyone knows, most children love peanut butter, “but nowadays peanut butter readily available in the stores is processed in a way to give it long shelf life and is scarcely more desirable as children’s fare than the customary breakfast cereals. Chemicals are added to prevent oil separation, to retain the peanut butter as a homogeneous mass, and to keep it from becoming rancid.” Sugar is even added to some brands—where it is just as undesirable as that used by makers of the most popular (and typically sweetest) breakfast cereals.

Page 37 is nearly filled with a list of manufacturers of “pure peanut butter” with no additives but salt. Among these are Walnut Acres of Penns Creek, Pennsylvania.

Note: Any variety of peanut may be used for butter, although usually commercially made peanut butter is a mixture of Virginia and Spanish peanuts. From its origins in the mid-1890s until about 1970, peanut butter was typically made from a blend of Virginia and Spanish peanuts.

572. Goldman, M.C. 1970. Southern California—Foodshopper’s paradise! An exciting burst of organic-living enthusiasm—among young, old and in-between—has created a tidal wave of food shops and more products from Santa Barbara to San Diego. *Organic Gardening and Farming* 17(11):38-45. Nov.

• **Summary:** “Spearheading the surge to organic foods today is the West Coast’s literal Garden of Eden—the southern half of Golden California.” And this should be no surprise. A climate well suited for year-round gardening and farming join with people of all ages with people interested in natural foods plus “that rapidly-enlarging segment of the younger generation now so awake to wholesome eating.

“Actually, a sizable chunk of early interest in organic ideas belongs to this paradisiacal area. Pioneers like Phil Arena, Herbert Clarence White, Maria Wilkes, Clarence Tontz, Lee Anderson and dozens more have all lent the sunny Southwest locale an aura of organic history-in-the-making.”

In a late July trip from Santa Barbara south to San

Diego the writer observed in shop after shop (there are at least 300 “health food stores”) along the beautiful Pacific coastline, streams of young folks—many with surfboards and/or children in tow—were coming in to buy fresh fruits and vegetables, whole grains, “juices, kelp and dulse, sea salt and soy products, breads and eggs.”

Veteran Betty Morales, prolific writer and lecturer, notes: “The influx of young people is like a blood transfusion to the health-food business, particularly to the retailers of organically-grown foods.”

Sun Circle Ranches, based in California, supplied by some 200 organic farmers (large and small), are the leading nationwide distributor of organic produce.

In Los Angeles, Erewhon Trading Co., related to the original shop in downtown Boston, Massachusetts, is only a year old, yet serves 100 West Coast stores, natural food restaurants, co-ops and various institutions. Paul Hawken, president of Erewhon [a macrobiotic company], notes that even some of the big universities, including UCLA, have become customers for the popular organic brown rice and soy sauce.

Jimmy Silver, shop manager, says the store’s retail clientele consist of about half each younger and older people. Fresh produce from Sun Circle attracts both. Silver sells about 1,200 hundred pound bags of brown rice each month—90% of it wholesale to established shops in L.A. and other parts of the Southwest. Grown for Erewhon by Wehah Farms in Richvale, California, it now retails for \$16.50 per 100-lb sack.

“Grains from the well-known Arrowhead Mills in Deaf Smith County, Texas, also make up a sizable segment of business, says Hawken, a young man who typifies the keen, forceful drive of the new generation in health foods marketing. Along with these and rice, soy sauce made from Japanese organic-grown beans constitutes the biggest seller—nearly 4,000 gallons a month at \$8 by the gallon, down to \$1.20 per pint. Various soybean pastes, such as *mugi miso* prepared with the beans, well water and salt, are also favorite products. So is seaweed...”

Says veteran store owner Walter Lindberg: “No question about it, people are becoming more concerned about the quality of the food they buy.” All store owners say that business has jumped during the past year—especially from young people. “Young people have an open communication system that far outstrips TV and radio.”

At the Sun and Earth shop in Goleta, a suburb of Santa Barbara packed with students, one popular item (called the “natural foods answer to the TV dinner”) is “a platter of our soyburgers, carrots and parsley,” which retails for 57 cents.

Goldman concludes: “The thunderbolt of organic living has not only struck ground in the West—it’s sent a strong, vital message crackling everywhere in the land.”

Contains 6 photos taken inside the new breed of food shops. Address: Box 866, Hereford, Texas.

573. Holm, Jane Wang. 1970. Let's enjoy our soybeans. *Organic Gardening and Farming* 17(11):114-16. Nov.

• **Summary:** Describes how to cook “shelled green soybeans,” and dried soybeans. The author notes that “old China dishes sound odd, but taste good. How about some fresh, tender dandelion shoots with soybean cake, or sliced frozen bean cake with eggs and dried seaweed soup? Dried soybean curd cooked with a fish head and tail, together with some fresh hot pepper tastes wonderful.”

Note: The circulation of *Organic Gardening and Farming* is now about 580,000.

574. *Macrobiotic (The)* (Carmichael, California). 1970.

French Meadows lectures by Herman Aihara and Alcan Yamaguchi (Continued–Document part II). 10(4):5-9. Nov.

• **Summary:** (Continued): As a psychologist in the Air Force, he was having severe stomach aches. None of the Air Force doctors could cure them. When a chiropractor told him the cause was coffee, he stopped drinking it, the stomach aches went away, he began studying chiropractic, met Dr. Ruesink, and began studying macrobiotics. He told us he has cured 6 cancer patients diagnosed by medical doctors, and 12 who were not. His faith in macrobiotics is strong. We are very lucky that such doctors understand macrobiotics, and apply it to their patients. After camping out the next 7 days, we came to Vancouver, British Columbia, where Banny Cutt was busy in his new macrobiotic store. Our lecture and cooking class were attended by 40. George Mulek, a successful Alberta businessman, owner of a 21-story building, gave us his best apartment to use: camp-dwellers were suddenly transformed into millionaires! The view of Vancouver Bay was wonderful. George experimented for many years with several health food diets, and is now convinced, from his own experience, of the superiority of macrobiotic eating. His long years in the health food field make him a fine promoter of macrobiotics. We owe him very much. We saw our old friends Lester and Lillian Russell on Vancouver Island. And on Denman Island (5 square miles reachable only by ferry boat from Vancouver Island) we found, surprisingly, a macrobiotic community.

“On July 31st, we returned to the West Coast and were welcomed by Ken Burns, Bob Johnson and others at Ken's familiar Seattle home. The dinner at Kagetsu was excellent. There are many young people in Seattle who are hoping to build a strong macrobiotic community. Our 2 lectures and 1 cooking class were attended by about 150 people.

“When the scheduled Portland lecture was unexpectedly cancelled, Lorraine Harr, in whose home we stayed, quickly arranged a meeting, attended by 10 and filled with interesting questions and lively discussions. In Ashland, we saw our old friends Sandy and Sylvia Goodman, now involved in psychological group therapy. We had a wonderful discussion on the transmutation of emotions, on which I'll write later.

In short, my suggestion is that there is a striking similarity between the biological transmutation of elements and that of emotions, oxygen being the key agent in both. Next stop was Emmett Station, Calif., where John Deming gave me 66 acres of land, on which are 6 houses, a mountain and many apple trees (delicious!). I plan to use this gift for a year-round macrobiotic camp-school. After our lecture there, attended by 10, we made our final stop on the tour: Chico-San Inc., where we lectured to about 10, bringing the total to about 2,300.

“Aside from the above people, there were many others who helped our trip. Joe Arseguel, David Schleiger and Gene Neufeld in the San Francisco area; Jacques de Langre and Shayne Suehle in Los Angeles; are some of them. To all the above, and many others, I extend my deepest appreciation. To our driver, Carl Campbell, who drove over 12,000 miles in 2 months!, I am also grateful. As for Alcan, it goes without saying that I am indebted to him also. The warmth and love he received everywhere we went indicates in itself how interesting and fruitful he made the trip. Finally, to my wife Cornellia, I give my deep appreciation. Throughout the trip, she cooked for us—in a crowded camper or on an unaccustomed campground—so we could enjoy rice, miso soup and vegetables every day. The fact that no accident and no sickness occurred during the entire trip is an indication of her devoted motherly spirit. Without her, we could not have made such a rapid and successful trip. It was a wonderful trip, an unforgettable trip. But there was one trouble we did have. It was not outside, but inside of us. Because of our cramped quarters (4 adults and 2 children in a small camper); the speed of the trip; the almost incredible amount of driving Carl did every day; and his insistence on eating virtually nothing but rice, miso soup, vegetables and bread, Carl began losing control of the excess yang from the above that had gradually built up inside of him. First he became irritable, then nasty. I offered to do some of the driving, but he didn't want me to drive. Then, around Albany, N.Y., Kansas City, and Denver, there were unpleasant exchanges between Carl and the rest of us. And finally, at a motel near Salt Lake City, Carl exploded: “Shut Up. I Don't Like You Japanese, etc. (These expressions, of course, did not represent Carl's predominant feelings towards us either before or after that time; excess yang had distorted his nervous system, and had made up such words in order to discharge itself). Alcan, who has had much experience with such situations, accepted and embraced Carl's anger: ‘I am sorry; I did not treat you nicely. We should talk to each other, so that we will not leave any hidden complaint or resentment against each other.’

“Since that time, Carl's mental condition has changed. He has become happier and friendlier. We had a good talk at the end of the trip. He is now living happily in New York, and is corresponding with me regularly. He changed. He learned. My wife Cornellia, however, is still suffering from

Carl's angry explosion. She is simply not strong enough to heal the wounds of his emotional outburst. It was too much of a shock for her to realize that someone she is giving so much love by cooking and serving food for him every day can act in such a way towards her. If we had not lived in such cramped conditions, for such a long time, moving at such a rapid pace, such a painful experience would probably not have happened.

"Did we make a mistake? Was it too difficult a trip to make? Too big a strain on human relations? I say no. I have no emotional trouble with Carl now. Carl is very happy after passing through this experience (which was undoubtedly very painful for him, too). Why can't Cornelia overcome this agony, by accepting the pain that her belief in an illusional, mortal, dualistic "self" [ego] caused? Why can't she understand that she and Carl (and all other phenomena) are One, and that any pain she has ever felt, or ever will, is always, like everything else that ever happens, absolutely perfect justice? Until we admit that what we dualistically call our "self" is a mere passing shadow of our real Self (Oneness), we will never know absolute peace, confidence, and love.

"I will try again such trips, until we have reached the humble all-embracingness which admits that any pain we ever experience is nothing more than another of the infinite illusional manifestations of our one and only true Self (Oneness: Infinity: God)—true Creator of all happiness and all unhappiness, all pleasure and all pain." Address: The Ohsawa Foundation, Inc., 2523 Gunn Road, Carmichael, CA 95608.

575. Photographs of people at the Erewhon—Los Angeles macrobiotic retail store. 1970. Los Angeles, California.

• **Summary:** These five black-and-white photographs were taken in mid-November 1970 at the Erewhon—Los Angeles retail store on Beverly Boulevard (at the corner of Edinburgh) by Jimmy and Susan Silver. The photos were sent to Soyinfo Center by Jimmy Silver in Aug. 2010.

The show: (1-2) Bruce Macdonald (who was in charge of the store and Erewhon West Coast operations at the time) standing near the cash register. (3) Customers in the store. (4) Jimmy Silver hugging his daughter Rachael (who is in a wooden barrel) in the store. (5) The produce section at Erewhon—Los Angeles.

Note: In an e-mail dated 29 Aug. 2010, Jimmy Silver adds: "We had a warehouse catercorner across Beverly Blvd. The other store employees (and I use the term loosely, as we all lived at the Kushis' house on Franklin Ave. and basically received room and board and sort of an allowance at Bruce's discretion, not actual pay) were Bobby Orgo and John Curran. We all worked at both the store and the warehouse (which did some wholesale and institutional sales, to other stores and restaurants). For whatever reason, Bruce liked me working in the store and talking to the customers or talking

to customers on the phone. So even though Bobby was the one with the most experience and know-how, I kind of became the de facto second in command after a little while, handling the money, etc.

"Also, Jim Docker and Leon Abehsera worked at the store, but doing construction and physical improvements, not the work of the business itself. They both had this incredible (to me, anyway) ability to lie down on a sack of rice, any time of day, and immediately go to sleep for five or ten minutes, and then get up looking and acting as if they'd just had 8 hours sleep.

"Bobby Orgo was really a character. He once got in a big argument with the health inspector (!) of all people, who had come to check out the warehouse. Everything was 'dry' at the warehouse (no refrigeration), so the inspector was saying this and that about the rules, but was basically going to let it all go. Bobby comes in smoking a cigarette and the inspector tells him he can't smoke in a food facility. Why not? Against the health code. So what—smoking isn't bad for you (macrobiotics tended to look at smoking as 'yangizing', which was 'good' for yin people, which everyone was assumed more or less to be). They get into a big yelling match, and the inspector ends up citing us for about fifty violations, and we ended up having to put in tile coving, a floor drain and stainless steel sinks—all to handle bags of

grain, because of Bobby's argument."

In an e-mail dated 10 Jan. 2010 Jimmy Silver adds: Doug Rauch was both sales and purchasing manager. I more or less worked for him, or was trained by him, when I came to Erewhon, mostly because I was interested in what he was doing. He was the guy that knew all the product information.

"Nominally I was in charge of getting the catalogs out, 'envisioning' and 'theming' them, labels and label concepts and designs, new products, customer relations (but in a more technical sense, like product research questions—our customers were primarily stores and coops), vendor relations (making nice with our suppliers and producers beyond issues of payments and shipments and orders), and handling the import business from Japan and our relations with our two Japanese suppliers, Muso and Mitoku. Sort of like a jack of no trades.

"Doug got Trader Joe's (TJ) to take on natural food products from Erewhon. Eventually he left and then went to work for TJ. Their office at the time was only a few blocks from where he lived. I was sent over to his house for two or three days during the transition and made notes on a yellow legal pad of all the things I needed to do and pay attention to that he told me, and then I became the sales manager and purchasing manager. By then Erewhon was in Vernon, no longer in Culver City.

"Doug rapidly rose at TJ, and shortly became their youngest VP. He convinced them to expand to the East Coast and became president of the East Coast division. Now he has 'graduated' as he would put it, has some sort of fellowship at Harvard, and helps out at the local NPR station (I think he may be the chairman, which I believe means they rely on him to make sure that they raise enough money to keep operating)." Doug is tall—a very interesting guy with a very dry wit.

576. Retzliff, Mark Alan. 1970. Certified resolution of change of registered office: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 1 p. Nov. 17. 26 cm.

• **Summary:** Mark A. Retzliff, treasurer and assistant secretary of Eden Organic Foods, Inc. states that at a meeting of the board of directors, held on 17 Nov. 1970, it was "Resolved that the location of this corporation within the State of Michigan is changed from 514 East William Street to 211 S. State Street, Ann Arbor, Washtenaw County, Michigan 48104." Signed by Mark Retzliff on 17 Nov. 1970. Received by the Michigan Department of Treasury, Corporation Division (Lansing, Michigan), on 18 Nov. 1970. Filed on 19 Nov. 1970. Address: Ann Arbor, Michigan.

577. Health Enterprises Corporation. 1970. Back to nature: The new boom in organic foods offers a unique opportunity (Ad). *New York Times*. Dec. 20. p. 131.

• **Summary:** A large, bold ad. "If you haven't read *Time*

or *Life* or *Look* in the past few weeks, then you've missed the excitement about the newest thing in food retailing—the mushrooming growth in organic foods.

"The National Nutritional Foods Association puts it this way: the organic foods business has *doubled* each year during the last three years. And Healthway Natural Food Shops offers you a unique opportunity:

"Today's fastest ways to profit in your own natural food business:

"Our unique approach? We've added fast, over-the-counter service to tastily-prepared, healthful organic foods and beverages to the traditional package food store. Instead of waiting months to build volume, the Healthway food bar creates immediate traffic and profit. As customers learn how good organic foods can taste, package sales grow.

"Our pilot turned a profit the day it opened. Four new Healthway organic food-service / package sales units are now being located in southern New York and Connecticut. We are now looking for Area Directors to develop virtually untouched markets in New Jersey, New York, New England and other eastern areas. We can back each area director with:

"Fifteen years experience in the purchase and distribution of organic foods and vitamins.

"Complete sales and management training program.

"Assistance and back-up in site selection, lease negotiation and unit financing.

"Pre-tested menus and recipes and complete selection of organic bulk and packaged foods."

"We offer this exceptional income opportunity only to the highly-motivated, sales-oriented person who has the vision to see the potential in this area and the drive to develop it... we require a commitment of \$30,000 (which will include the installation of your own Healthway Natural Food Shop and Food Bar).

"If you are interested in the new boom in natural foods, write or call or Marketing Director:..."

Note: This is the earliest document seen (March 2020) concerning retailing of natural or organic foods. Address: 84 Thomas St., New York, NY 10013. Phone: (212) 349-1425.

578. Halas, Susan. 1970. How to speak organic. *San Francisco Examiner*. Dec. 6. Movements section. p. 28-29. 33, 35. Sunday. *

• **Summary:** In this article is a list of organic food stores in the Bay Area with addresses: They include:

Good Natured Foods, 1512 Shattuck, Berkeley.

New Age Natural Foods, 1326 Ninth.

Sonoma Natural Foods, 3214 Folsom.

Wholly Foods, 2999 Shattuck, Berkeley.

Butler Natural Foods, 2944 College, Berkeley.

And organic Restaurants:

Good Karma Cafe, 501 Dolores.

Osoba Noodle Nook, 2505 Hearst, near Euclid, Berkeley, etc.

579. Lansing, Elizabeth. 1970. The move to eat natural: New converts to organic food are sprouting up all over. *Life*. Dec. 11. p. 45-50, 52. Cover story. [2 ref]

• **Summary:** Headline on the cover: “Organic food: New and natural.” A full-page photo shows model Gunilla Knutson, who owns a health food store. The blonde-haired young lady is wearing blue jeans and toting a large knapsack, overflowing with fresh vegetables and ears of wheat.

A growing number of people—most of them young, believe that we eat too much, and mostly of the wrong things. That “our food comes to us not as nature intended, but altered by man during both growth and processing; and this tampering has produced increasingly bad effects on man and the ecology.” Many make every effort to insure that all their food is grown organically—without pesticides or chemical fertilizers—and that it contains no chemical additives. A new industry is growing up in America to meet these demands. Photos: A colorful array of loaves of whole-grain breads, leavened and unleavened, some with sesame, poppy, or sunflower seeds. Most of these come from a commercial bakery in Berkeley, California. (2) Top view of natural food staples in crocks, incl. black beans, millet, azuki beans, soy beans, unsulphured apricots, toasted kasha [buckwheat], sunflower seeds, red lentils. (3) A self-serve cafeteria at U.C. Santa Cruz where students may choose an organic vegetarian menu—including bean curd [tofu].

Other two-page spreads are titled: Filling the gap from earth to table. Photos show: (1) Saturday morning meeting of leaders of the Food Conspiracy in Berkeley, California. (2) Inside of Wholly Foods’ store in Berkeley. Four proprietors under age 30 say success of the store has put them “on a capitalist trip.” (3) Jim Baker’s The Source restaurant in Los Angeles. His wife carries a tray of tall glass of juices. (4) Model Gunilla Knutson on a ladder in the store Nature’s Children, of which she is part owner.

Composting and ladybugs make it work. (1) Aerial view of the Garden Project on a 4-acre plot at the University of California at Santa Cruz. (2) Leaves collected by the city of Allentown, Pennsylvania, on their way to the Rodale Farm compost heap. (3) Organic rice plants in the field (600 acres) at Wehah Farms in Chico, California. A key part of organic gardening and farming is composting. For ages it has been a hit-or-miss process, but in the 1930s, Sir Albert Howard, an Englishman, turned it into a science, which he described in detail in *An Agricultural Testament* and elsewhere. Howard inspired J.I. Rodale and Rodale’s magazine, *Organic Gardening and Farming*, started the organic movement in the USA. An estimated 5,000 farmers are now growing crops for sale organically, and the number is steadily increasing.

A handful of natural starters: Photos show and recipes tell how to make: (1) Unleavened soaked-wheat bread, and Corn pones. (2) Six beverages without added sugar, incl. Carob milk. (3) Meaty soups for the pot: Vegetable bean

soup, and Egg and lemon soup. (4) Organic rice with ‘bite’: Skewered shrimp with rice.

An image to shed, more food to grow. The writer says that “a large part of the public believes” that the natural foods movement “is just wheat germ and molasses all over again, ingested chiefly by body builders and other exotics. Or worse—that natural foods and macrobiotic diets are synonymous. Agricultural colleges may be sympathetic to organic methods but they seldom teach them—probably because so much of their research is subsidized by the chemical industries.

Note: It looks like the natural foods movement has started to go mainstream.

580. Carter, Tom. 1970. Natural food supermarket a success. *San Francisco Examiner*. Dec. 25. p. 25. *

• **Summary:** The article begins: “Palo Alto—If there is any doubt that an organic food revolution is beginning it can be dispelled first by the appearance of the world’s only natural foods supermarket in nearby Palo Alto [near Stanford University] and second, by the success of the man who opened it.

“Ever since New Age Natural Foods supermarket put up its no smoking signs, stocked its shelves and flung open its doors as the first of its kind, it has had a surge of customers, both young and old.”

Fred Rohe, age 33, is president and chairman of the board of New Age Natural Foods, Inc.

Items in the store are more expensive than elsewhere, but Rohe believes that people are “fed up with modern, nutritionless, sugar-coated foods.” He believes that they will choose organic if they understand the how most foods are grown. Therefore his job is education and providing information.

Five years ago Rohe left his career as a starving writer of fiction to try entering a business in an emerging new field—that of organic and natural foods.

He borrowed \$5,000 and in April 1965 he bought a health foods store [Sunset Health Foods at 1319 Ninth Ave. in San Francisco].

But instead of stocking it with the usual health foods fare, he added fresh produce, animal products, baked goods, etc.

During the first year business was slow, but then young people discovered him. “His business doubled each year until 1970. Business was so good that he annexed a shop across the street and used it for a granary.”

Organic food is more inclusive than what has been formerly found in “health food” stores, which are typically small shops which concentrate on vitamin pills, lotions, oils, etc.

In order to have uniform standards, Rohe organized a dozen retailers, growers and restaurateurs into a group named Organic Merchants. The group now has more than 50

members and ranges to Alaska and Hawaii.

In San Francisco alone the number of natural food stores and restaurants as tripled (from 4 to 12) during the past year. Rohe's little one-man operation five years ago is long gone.

Today, New Age is a million-dollar corporation which employs 50 people in four stores in four towns. "It has a burgeoning produce subsidiary that distributes to 55 other stores as well."

Rohe says his biggest problem is keeping the shelves stocked with good organic food. "A good day can wipe them clean."

Rohe says he's not interested in making a lot of money. He just wants to see lots of high-quality natural food stores all across America. "Last year Rohe trained three proprietors so they could go out and independently start their own stores."

A large photo shows Fred Rohe working in his produce section. He is wearing rimless glasses, has a beard and medium-length (not long) hair.

Note: This is the earliest document seen (March 2020) that contains the term "natural foods supermarket" (or "natural foods supermarkets")—regardless of hyphenation.

581. *SoyaScan Notes*. 1970. Chronology of soybeans, soyfoods and natural foods in the United States 1970 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** As the new decade begins, Richard Nixon is president, the Vietnam War dominates the news, gasoline costs 32 cents a gallon, and a nice home in the San Francisco Bay Area sells for \$59,000 on average.

1970 summer. Erewhon—Los Angeles starts distributing macrobiotic natural foods.

1970 July. Westbrae Natural Foods in Berkeley, California, starts distribution, founded by Bob Gerner. Actually the company was not named "Westbrae" until about one month later.

1970. Use of soy oil in cooking and salad oils passes that in shortening to become the leading form of utilization in America.

1970. AGRICOLA, a computerized bibliographic database of agriculture, is established at the USDA National Agricultural Library in Beltsville, Maryland. In 1986 total records passed 2 million, including 20,000 on soybeans.

1970. Plant Variety Protection Act enacted by Congress to extend patent protection to plant varieties reproduced sexually, by seed. This leads to greatly expanded activity by private soybean seed breeders.

1970. First running of the New York Marathon; 55 people finish, no women.

1970, late. Pure & Simple begins operation in Los Angeles, California, as the first of America's new wave of natural food snack companies, founded by Bruce MacDonald, who was working at the time for Erewhon.

After leaving Erewhon in May 1971, Bruce merged Pure & Simple with The Well, a natural food distributor in San Jose. Originally The Well had been named New Age Distributing, founded by Fred Rohe.

582. *Hygienic Review (USA)*. 1970---. Serial/periodical. Editor: Herbert M. Shelton. *

• **Summary:** Part of Dr. Shelton's hygienic system is a vegetarian diet.

583. Rodale, J.I. 1970. Organic food and health: Today's scientists urgently need to take a closer look at natural food health advantages—and to test the organic ideas fairly and fully. *Organic Gardening and Farming* 17(12):103-04, 106-08. Dec. [4 ref]

• **Summary:** At the beginning of the article, in smaller print, is this: "Note—From this point instead of using the cumbersome phrase 'organically-grown food,' I will reduce it to 'organic food,' which I trust will become accepted by constant usage."

An old philosopher once said that every good new idea passed through three phases—ridicule, discussion, and adoption. The organic movement has been in the discussion stage for a long time.

The writer then responds in detail to an article favorable to organic agriculture published in *The New York Times* on 7 Sept. 1970 and titled "Organic food fanciers go to great lengths for the real thing."—that is, to get organically grown food.

Sir Albert Howard is "the father of the organic method." "In 1905 he was appointed Imperial Economic Botanist to the Government of India and was stationed at Pusa, where he developed a natural method of plant disease and insect pest control. He carefully observed and followed the methods of the native farmers. He came to realize: "Insects and fungi are not the real cause of plant diseases but only attack unsuitable varieties or crops imperfectly grown." He found the same to be true of his oxen. He duplicated his methods elsewhere in India and at Indore perfected his famous method of making compost. His many successful experiments with natural farming are described in his book, *An Agricultural Testament*, published by Oxford University Press.

Another pioneer was "the late Dr. Ehrenfried Pfeiffer, who was given an honorary M.D. degree by the Hahnemann Institute of Philadelphia [Pennsylvania] for his brilliant work on crystallization. He was an advocate of the Biodynamic method, a variation of the organic method in that they use sprays made from organic and other innocuous substances, and pay more attention to the making of compost." In 1938 he wrote the book *Bio-Dynamic Farming and Gardening*. Various tests showing the health effects of bio-dynamic feeds vs. commercial feeds fed to rats and chickens are described. In each test, the bio-dynamic group did better. Academics are either unaware of or ignore such studies. They say that if we

don't use their chemical methods in agriculture, the world will starve.

A portrait photo near the headline shows J.I. Rodale.

588. Abehsera, Michel. 1970. *Cooking for life*. Swan House, P.O. Box 638, Binghamton, NY 13902. xiv + 364 p. First Avon Flare Books printing, March 1972. Recipe index. 21cm.

• **Summary:** A beautifully-written, sometimes poetic, book. Contains many imaginative and joyous macrobiotic recipes.

Contents: Foreword. Woman in the kitchen ("The kitchen is the heart of the home"). The cook is a philosopher. A cook in the fields. The cerealian's dictionary. The Yin and yang story. The promised land. Utensils. Cooking brown rice. About salt. Cooking other grains. Nutritionists versus nutrition. Cooking beans, chick-peas and lentils. Doctor M is cooking at my brother's restaurant tonight. Soups. Vegetables. The first meal. Sea vegetables. Fruits, meat, grains and man. The condiments on your table. Why do we overeat? The companions of grains. Of weak and strong men. Something fresh on your dish (Salads and Pickles). Sauces. Dressings. Spreads. The biochemistry of violence. Special dishes. Baking bread and other things. How about a drink? Tempura. Why do we cook our foods? Flours make wonderful things. The acid and the alkaline. Cooking fish. Don't call a doctor, I need a cook! What we enjoyed last week. The ceremony. The international chef. Desserts. The traveller's pack. The Ten Commandments of Health. Epilogue.

Dedication: To Georges Ohsawa—I am infinitely grateful.

Acknowledgments: "This book could never have been completed without the help of my wife, Claude. Most of the recipes are hers; she cooked, tested and wrote them down... Jack Garvy completed the editing of the book and made definite English corrections. My exceptional friend William Dufty gave valuable advice. Finally, my brother Charles was very helpful..."

The author uses the term "black beans" and from his definition on page 18 it seems that he is referring to black soybeans: "Black Beans, twin brothers of the red aduki in size, are sold in Chinese, Japanese and natural-food stores.

They are the milk and honey of the bean family, and their flavor and texture impart a delightful sweetness and richness to any soup or vegetable dish." No definition is given of soybeans. In the section titled "Condiments" (p. 20-21), the author defines soya sauce, miso, seitan, salted plums, tofu, kuzu, etc. "Tofu is another name for soya-bean curd. In Chinatown, you'll see it in wooden barrels. It looks like Feta Greek Cheese and some people would swear it tastes like chicken. It is excellent served with sauteed vegetables, sauces, fried or cooked in Miso Soup.

"Seitan: Your guests will almost certainly mistake this for meat. Teeth find it pleasant to chew. A combination of wheat gluten, wheat soya beans [sic], water and salt, it comes in handy when mixed with vegetables, sauces and soups." Note 1. No recipe for making or using seitan appears in this book.

Soy-related recipes include: Cooking beans in a pressure-cooker (p. 66; "Do not pressure cook black beans. Their skins may come off and clog the pressure cooker spout. It is quite dangerous!"). Cooking beans in a pot (incl. soya beans, p. 67). Black-bean stew (with miso, p. 70). Soja jardiniere (with whole soya beans and miso).

In the chapter titled "Soups," the author tells the story of how the famous Japanese physician, Dr. Tatsuichiro Akizuki, used miso to strengthen his constitution and to survive the atomic bomb dropped on Nagasaki on 9 Aug. 1945. Under "Minerals" in that chapter he discusses other virtues possessed by miso, then gives a recipe for Miso soup (p. 86).

Radishes sauteed in miso (p. 114). Sandwich au gratin (with miso spread, p. 114). Macrobiotic marbles (with miso, p. 155). Claudia's pizza (with miso, p. 158). Salade au cresson (with miso, p. 169). Nato [sic, Natto] (Japanese salad with natto, p. 171; Note 2. The author describes "Nato" as "sour soy-beans, bought in a Japanese store"). Miso sauce (p. 178). Miso spread (with tahini, p. 187). Oat-miso spread (p. 188). Scallion spread (with miso, p. 188). Miso pâté (p. 189). Komoku (with tofu, deep-fried and cut into strips, p. 212). O'Sushi (with tofu, p. 217). Kasha à l'Orientale (with tofu, p. 220). Bi-Cuan (Vietnamese recipe with fried tofu, p. 226). Kagetsu ice cream (with fine soya powder [perhaps Jolly Joan from Ener-G foods in Seattle], p. 334; "Kagetsu is a beautiful restaurant in Seattle"). Yellow pompidou (with soya bean powder, p. 336).

The Foreword states (p. 1-2): "Ten years ago I was a sick man, struggling to stay alive and to finish a novel. I suspected I might fail in both matters and the doctors of Paris agreed. They abandoned me as a hopeless case. It was then that I discovered a way of life called Macrobiotics. After a year of eating grains and vegetables, my health restored, I ventured to New York to discover America and finish my novel."

Note 3. *Webster's Dictionary* (1985) defines feta, a word first used in English in 1940, as "a white semisoft Greek cheese made from sheep's or goat's milk and cured in brine."

Fax from Jimmy Silver. 1991. Dec. 17. This was the first best-selling macro / natural food cookbook. Michel is head of a (the?) Jewish community in Montreal, Canada. He has 7-9 brothers and 1 sister. "His brother, George, founded the Nature de France clay based body care company—originally called Cattier but changed after they were sued by Cartier. I thought they would have prevailed in the suit but George didn't want to spend \$500,000 to fight it even if he won." Address: New York.

589. Bragg, Paul C. 1970. *The shocking truth about water: A universal fluid of death*. Burbank, California: Health Science. xviii + 100 p. Illust. Forms. 21 cm. *

• **Summary:** Explains that fluoride is a poison. Also reprinted, with some new editions, in 1974 (Santa Ana, California: Health Science), 1977, etc. Address: Burbank, California.

590. Ceres Grain Shop and Bakery after moving into a larger location on the Portobello Road (Photograph). 1970. London, England.

• **Summary:** (b) Outside Ceres Grain Shop and Bakery at 136a Westbourne Terrace, London W.2. Greg writes (Aug. 2017): "The actual entrance was around the corner in Bishop's Bridge Road. There was zero passing traffic, no other shops or anything on that stretch of road that goes from Paddington Station to Queensway. You had to know where it was to get there."

Sent to Soyinfo Center by Gregory Sams 2017 April 6. Address: London. Phone: 01 451 3111/2.

591. Darlington, Jeanie. 1970. *Grow your own: an introduction to organic gardening*. Berkeley, California: The Bookworks. 87 p. Illust. No index. 22 cm. [49* ref]

• **Summary:** The chapter titled "Growing your own in five days: Sprouting seeds" (p. 73-75) begins with a quotation about soybeans by Dr. Clive M. McCay, and mentions soybeans as one the seeds you can sprout. Address: Alameda, California.

592. Goldstein, Jerome; Goldman, M.C. eds. 1970. *Guide to organic foods shopping and organic living*. Emmaus, Pennsylvania: Rodale Books. 116 p. 22 cm.

• **Summary:** "Compiled by the editorial staff of Rodale Press." Contains a complete list of organic food sources in the United States.

Contents: The Market Is Becoming Organic. Better Living with Less Conveniences. What Kind of Progress Do We Want? The Young People Are Where It's At. Organic Living Ideas for the 1970's. Natural Foods Are Gourmet Foods with Old-Fashioned Flavor. More Organic Foods for Today's Shoppers. Associations for the Organic Producer and Merchant. At Colleges, Schools and Restaurants. Restaurants Cross-Country Bring "Gourmet Organic" Eating to Life.

Health and Natural Food Stores, Whole Earth Catalogs, Ecology Centers and Organic Trading Posts. Will You Help These Farmers? What to Watch for on Food Labels. An Ecological Consumer Products Listing or What Are Your Favorite "Good" Products? Safe Detergents—Which Ones, If Any? [Phosphates are the problem]. Problems of Today's "Factory" Food Farms. Directory of Organic Food Sources. Natural Fertilizers, Soil Conditioners, Mulches, and Mulching Materials. Ecology Action Groups. Ecology Researchers, Legislators, Teachers, and Students. Organic Gardening Clubs of America. Natural Resource, Wildlife Conservation and Health Organizations. Addenda. Address: Emmaus, Pennsylvania.

593. *SoyaScan Notes*. 1970. Chronology of Food for Life (Chicago, then Elmhurst, Illinois). 24 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1970—Food for Life is started as a macrobiotic retail store by Bill Tara on the 10th floor of a Chicago office building.

1973 Nov.—The company's address is 2231 North Lincoln Ave., Chicago, Illinois 60614.

1973 Dec.—Tom Swan is now the owner of Food for Life. He represents the company at a meeting of natural food distributors in Toronto, Ontario, Canada.

1974—Food for Life, Inc. is now located at 420 Wrightwood St., Elmhurst, Illinois 60126.

1975—They are a member of the Natural Foods Distributors Assoc. (NFDA). But by Jan. 1976 they are one of three companies that have not paid their dues. Address: 2231 North Lincoln Ave., Chicago, Illinois 60614.

594. Trager, James. 1970. *The enriched, fortified, concentrated, country-fresh, lip-smacking, finger-licking, international, unexpurgated foodbook*. New York, NY: Grossman Publishers. xv + 579 p. Illust. Index. 24 cm. [350+* ref]

• **Summary:** This hefty volume is packed with information about a multitude of interesting, little known, or bizarre subjects related to food. It is divided into 11 major chapters, each of which contains many mini-chapters, often with witty or enticing (but often undescriptive) titles such as "mushrooms take savvy" or "Farmer Jefferson." The extensive index is very useful, containing entries for such things as Accent/MSG (p. 445-48), prehistoric agriculture and food (p. 3-11), meat analogs and Bac*Os (p. 450-51, 457, 501), Archer Daniels Midland (p. 450), bean curd (p. 333, 362), Battle Creek Sanitarium (p. 460), Kellogg (p. 384, 460-61), miso soup (p. 362), soybeans (p. 21, 262, 382, 450-51, 518), soy protein (p. 450), vegetarianism and vegetarians (p. 3, 324, 343, 457-59).

In Chapter 10, titled "Nuts in the Fruitcake" (p. 455-86), the author takes the opportunity to make fun of anything he discusses related to health/natural foods or vegetarianism.

To him, it all smacks of food faddism and extremists. There are sections about vegetarians past and present (“there are no convincing nutritional justifications for vegetarianism”), Sylvester Graham (“One of America’s first home-grown food faddists”), Horace Fletcher, Dr. William Howard Hay and acidosis, Gayelord Hauser (“Perhaps the most prominent diet and health mythologist in recent years”), organic foods baloney (“DDT has not yet been shown to have harmful effects for humans”), Carlton Fredericks and Adolphus Hohensee, Tiger’s Milk, aphrodisiac foods, and food and astrology. Address: New York.

595. Turner, James S. 1970. *The chemical feast*. A Ralph Nader Study Group report on food protection and the Food and Drug Administration. New York, NY: Grossman Publishers. 273 p. [125* ref]

• **Summary:** Soy is not listed in the index. Address: Project Director, Washington, DC.

596. **Product Name:** Hama-Natto Savory Miso Beans.
Manufacturer’s Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1970?

Ingredients: Naturally fermented soybeans, ginger, sea salt.

Wt/Vol., Packaging, Price: 5.3 oz (150 gm) plastic bag.

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Health Flavors (distributor), Brewster, New York. 2000. Nov. 10. The self-adhesive Mitoku label (orange, brown, and beige) is affixed over the printed label of the manufacturer: Marunishi, Hoi-gun, Aichi-ken, Japan. The label states: “An authentic taste of traditional Japan. Mitoku Savory Miso Beans are a traditional Japanese fermented soyfood. First prepared by Zen priests in the 15th century as part of their vegetarian cuisine, they are still handmade in the same, completely natural way, and are even now prized for their delicious gourmet flavor and rich, heavy aroma.

“Savory Miso Beans can be eaten as they are, as tasty hors d’oeuvre with tea, beer or natural saké. They are also used as a condiment, like Tekka, on brown rice, vegetables or noodles. Mixed with grated radish (daikon) and seasoned to taste with Sanbai-Su Three Taste Dressing, they make a traditional side-dish that’s both delicious and full of goodness.”

Talk with Jan Belleme, Mitoku’s representative in the USA. 2000. Nov. 21. This product has been available since about 1970.

597. **Product Name:** Authentic Snow-Dried Tofu.

Manufacturer’s Name: Mitoku Co. Ltd. (Distributor).
Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91,

Japan. Phone: 33-201-6701.

Date of Introduction: 1970?

Ingredients: Tofu (soybeans, water and nigari—a natural coagulant extracted from sea water).

Wt/Vol., Packaging, Price: 2.45 oz (70 gm) plastic bag.

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Health Flavors (distributor), Brewster, New York. 2000. Nov. 10. 5½ by 9 inches plastic bag. Orange, gold, black, white, and red. “Mitoku macrobiotic Snow-Dried Tofu is hand-crafted in the snowy highlands of central Japan by one of the few hearty families who still use the traditional methods. The result is an all natural, delicious and concentrated convenience food that stores well and readily absorbs flavors.”

Talk with Jan Belleme, Mitoku’s representative in the USA. 2000. Nov. 21. This product has been available since about 1970.

598. Photograph of Roger W. Hillyard before 1971 at Gardner Road, Boston, Massachusetts. 1970? Undated.

• **Summary:**

Note: This photo was sent to Soyinfo Center by Susan Hillyard, a professional photographer in Santa Cruz, California. (Dec. 2010).

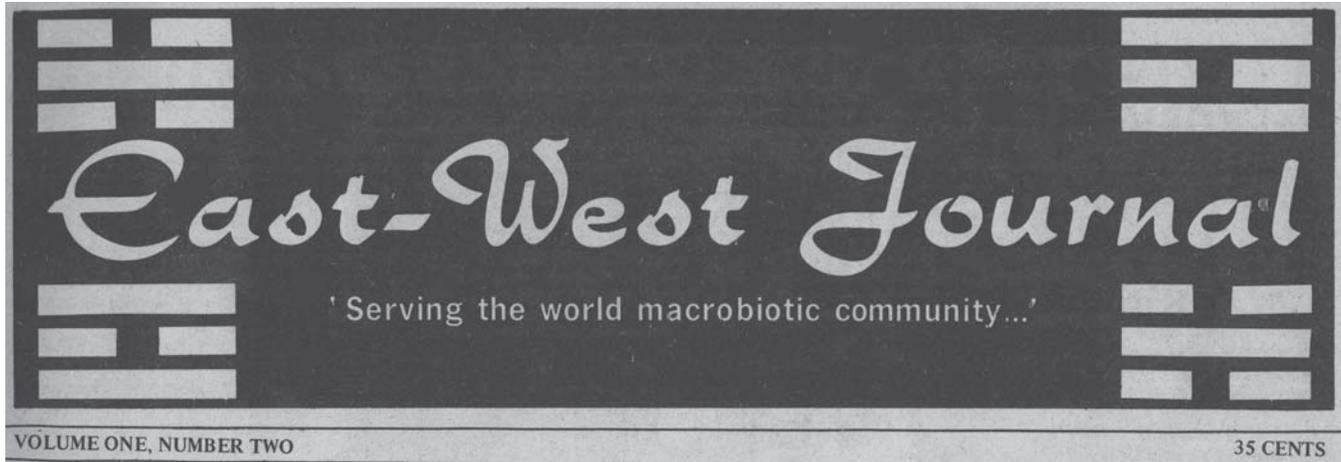

599. Carberry, James F. 1971. Our daily bread: Food faddism spurts as young, old people shift to organic diets. Concern on pesticides cited, but some see deception by quacks claiming cures. Yin and yang ice cream. *Wall Street Journal*. Jan. 21. p. 1, 12.

• **Summary:** Written from Hollywood, California, this article reports that “food faddism has been particularly prevalent lately.” Kahan & Lessin Co., one of the nation’s biggest distributors of organic foods, reports that its sales have doubled to \$12 million a year from \$6 million in 1968. New Age Foods of San Francisco [owned by Fred Rohé] recently opened a branch store in suburban Palo Alto, where it expects to gross \$1 million during its first year.

“Health and organic food advocates say the popularity of such items—as well as the more conventional products grown under ‘natural’ conditions—reflects the growing public concern over pesticide poisoning and the publicity over the dangers of food additives, preservatives, and substitutes like cyclamates.”

Richard Hansen is a sociologist at the University of California at Davis; he is researching the organic food movement.

“New insights into universe: Bruce MacDonald [sic, Macdonald], president of Erewhon Trading Co., a Boston and Los Angeles concern that specializes in such exotic foods as hacho miso (a soybean paste), says that organic foods appeal to many dropouts from the drug culture. ‘It’s not just that the body’s malnourished from being on drugs a

long time,' he says. 'It's also that organic foods can give a person new insights into the order of the universe.'

Warren Stagg, the bearded proprietor of H.E.L.P., a popular vegetarian restaurant, believes in the mystical, spiritual value of certain foods. A vegetarian diet can help elevate a person to a higher level of consciousness and bring him into harmony with the order of the universe, he says. Since 75% of H.E.L.P.'s clientele are nonvegetarians, the "restaurant offers some meat substitutes such as 'beef' stroganoff made from vegetable protein, mushrooms, scallions, bell peppers and sour cream sauce, and a 'vegeburger' sandwich that's also made from vegetable protein. Other dishes on its menu include braised tofu (soybean cake) with brown rice and a salad of cottage cheese, alfalfa sprouts, sunflower seeds, grated carrots, scallions, figs and apricots."

Note 1. This is the earliest English-language document seen (April 2013) that uses the term "braised tofu" to refer to grilled tofu.

"A group of young people following a macrobiotic diet live in an old Victorian mansion above Hollywood's Sunset Strip. They are students of the late Georges Ohsawa, a Japanese philosopher who taught about the delicate balance between yin and yang; they eat ascetic meals that include pressure-cooked brown rice and seaweed soup. There have recently been well-publicized cases of the deaths or severe illnesses of a few young people subsisting on only brown rice, the extreme form of the macrobiotic diet.

"Another famous food-faddist helped found a huge business in breakfast cereals. He was John Harvey Kellogg..." according to Ronald Deutsch, author of a history of food fads called "The Nuts Among the Berries." Deutsch then tells his inaccurate version of how Mr. [sic, Dr.] Kellogg got into the cereal business.

"One man who spends a great deal of time pooh-poohing various nutritional eccentricities is Dr. Fred Stare, chairman of the department of nutrition at Harvard University's School of Public Health." Dr. Stare discusses his pet peeves.

Note 2. Bruce Macdonald recalls (April 1992): "In early

1971 *The Wall Street Journal* ran a front-page feature story on the emerging new natural foods industry. A person from Merrill-Lynch came in and said, 'We could package this business and raise millions for you.'

Advest Co. 1972. Dec. "A recent *Wall Street Journal* article named this industry as one of the ten highest growth industries for the 1970s." Address: Staff Reporter.

600. Product Name: Tamari-Roasted Almonds.

Manufacturer's Name: Chico-San Inc.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1971 January.

How Stored: Shelf stable.

New Product-Documentation: Talk with Bob Gerner, founder of Westbrae Natural Foods. 1992. May 11. Bob thinks that Chico-San was the first company in America to make tamari-roasted nuts—a product that was later made by many natural foods distributors and became popular nationwide. But Chico-San's product was (in Bob's opinion) crude. They would cover the nuts with soy sauce then toast them; the soy sauce would burn on the outside and not taste very good.

601. *East West Journal (Massachusetts)*. 1971--.. Serial/periodical. Boston, Massachusetts. Vol. 1, No. 1. Jan. 1971. Frequency: Biweekly, then monthly.

• **Summary:** One of the earliest and most important magazines of the U.S. natural foods movement that started in the 1960s. Founded in 1970 by Ron Dobrin, a former New York journalist. First issue published in Jan. or Feb. 1971 (See Oct. 1978, p. 6) as a small 12-page bimonthly (twice a month). From Jan. 1973. Address 1972: P.O. Box 203, Prudential Center Station, Boston, Massachusetts 02199. Many of the early issues had a theme. For example: Vol. IV, No. 6, July 1974 was "Energy." Vol. IV, No. 7, August 1974 was "Woman." Vol. IV, No. 8, Sept. 1974 was "Education." Vol. IV, No. 9, Oct. 1974 was "Healing."

In March 1986 with the 15th anniversary issue, the title

changed from *East West Journal* to *East West: The Journal of Natural Living*. Throughout its history, it has contained many articles on macrobiotics, soyfoods, and vegetarianism. With the Jan/Feb. 1992 issue, the title was changed to *Natural Health; The Guide to Well Being*. Then in Aug. 1998 *Natural Health* was acquired by Weider Publications (Pron. = WEE-dur); Weider's company focus is muscles and body-building. Address: P.O. Box 203, Prudential Center Station, Boston, Massachusetts 02199.

602. Rodale, J.I. 1971. Organic food and health. II. Forceful evidence from the Bio-Dynamic method research continues the Editor's significant new series. *Organic Gardening and Farming* 18(1):130-33. Jan. [2 ref]

• **Summary:** Continues his comments on and critique of the favorable article in *The New York Times* of 7 Sept. 1970—with a few more cases from *Bio-Dynamic Farming and Gardening*, by Ehrenfried Pfeiffer. One concerns the health dangers to the heart of excess potassium consumption. Another is an Italian study that concerns the health of turkeys fed with feed grown organically with stable manure. Two other studies show that diets of bio-dynamically raised food speed the return to health in patients.

603. Rodale, Robert; Johns, Glenn F. ed. and comp. 1971. The basic book of organic gardening. New York: Ballantine Books. [vi] + 377 p. Index. 18 cm. An Organic Gardening / Ballantine Book. An Intext Publisher.

• **Summary:** Edited by Robert Rodale. Compiled by Glenn F. Johns. "Based on material which has appeared in Organic gardening magazine."

Contents: I: What is an organic gardener? How to be an organic gardener. Organic living—Why is it so vital?

Part II: Secrets of the best organic gardeners. Soil. Compost. Mulch.

Part III: What to grow and how! The best-laid plans. Starting from seed. Seeding, planting and transplanting outside. Some basic vegetable-growing advice (How to grow 41 different vegetables, listed alphabetically and numbered; soybeans are not among them. Nor are soybeans listed in the Index. However soybeans appear in tables {on earliest and latest safe planting dates} on pages 150, 152, 154, 156, and 158). Address: 1. Editor, Organic Gardening Magazine, Emmaus, Pennsylvania.

604. Reinholz, Mary. 1971. Yin and yang a la carte. *Los Angeles Times*. Feb. 14. p. 6-7.

• **Summary:** This long article begins: "Natural food restaurants—vegetarian, macrobiotic or just plain nutritious—are mushrooming all over town with food for thought on every menu."

Organic merchants typically refuse to carry sugar. "White sugar... is foodless food," writes Fred Rohe, an organic merchant who runs the New Age Natural Foods

Store in San Francisco."

Beneath the shadow of the mighty mushroom, Los Angeles vegetarian restaurants like "The Source on Sunset Strip have become the new cruising stations for street people, musicians, movie-makers. 'Every kind of person comes here,' says Robin, young wife of Source owner Jim Baker, 'including a lot of rich Beverly Hills matrons.

"The Source and H.E.L.P. (health, education love, peace) also draw a lot of smiling swamis in white turbans and flowing Eastern garments. I get the impression that some of these holy men—and some of the super-serene patrons and serving people—have not only transcended McDonald's golden arches, but all carnal appetites as well. But the food is excellent. Besides tasty sandwiches and salads, The Source offers the best fruit juices in L.A. and a hi-protein cereal—with fresh fruits, honey and wheat germ—that would make even the Maharishi put aside his prayer beads for morning pushups."

"Jim Baker, who decided to open the vegetarian Source after reading a translation of the Dead Sea Scrolls in the Calabasas mountains says simply: 'Los Angeles is going through a great spiritual awakening.'"

Organic Merchants (OM), which began in the San Francisco area, "has come up with a list of products they will not sell. It includes anything containing white sugar, bleached white flour, synthetics, emulsifiers, corn syrup, cotton seed products, monosodium glutamate. In 1969 OM also agreed to begin gradual elimination of products containing hydrogenated fats."

605. Smyth, Jeannette. 1971. Stores do a healthy business in natural food. *Washington Post, Times Herald*. Feb. 28. p. 1291.

• **Summary:** The health food industry is divided into two categories: (1) Those the young people call "the pill stores," which sells mostly pills and supplements, not much food. They have been around for decades. (2) The newer natural food stores, run mostly by young people of today's counter-culture, who sell mostly foods and beverages. These stores are based on the philosophy of living in harmony with nature, rather than trying to conquer Nature. Oliver, Cheri, and Krispin are members of the collective which runs Beautiful Day, a natural foods store in College Park, Maryland.

"Bill Beal tries to eat raw fruit and vegetables because cooking, he says, reduces their nutritional value. A typical day's breakfast is cottage cheese of tofu (soy bean curd), mixed with home-made yogurt, brewer's yeast, wheat germ, dark molasses, and fruit—dried or fresh." Note: This article, with two photos, is written in an unsympathetic tone.

606. Eden. 1971. Eden: Organic foods, natural foods (Ad). *East West Journal* 1(2):8.

• **Summary:** "Organic grains and vegetables. Miso and

tamari. Oils, teas, and condiments. Nuts and seeds. Fresh and dried fruits. Book and utensils. Traveling accommodations on advance notice.” The Eden logo is 4 sprouts in a double circle.

Note: This is the earliest document seen (June 2001) that advertises or markets miso. Address: 211 South State St., Ann Arbor, Michigan; 347 Ludlow Ave., Cincinnati, Ohio. Phone: 313-769-8444.

607. Essene. 1971. Essene (Ad). *East West Journal* 1(2):11. Feb.

• **Summary:** “Organic grains—vegetables—beans. Miso—tamari—sea vegetables. Flour stone ground on premises. Distributors of natural and traditional foods. Retail. Wholesale. Mail order. Mon. thru Sat. 9–6:30.”

Note: This is the earliest document seen (March 2020) concerning Essene, an early natural foods and macrobiotic company and distributor in Philadelphia. Address: 320 South St., Philadelphia, Pennsylvania. Phone: WA2-1146.

608. Mother Nature & Sons Ltd. 1971. Natural foods. Organic and macrobiotic foods (Ad). *East West Journal* 1(2):10. Feb.

• **Summary:** “Full line of grains, vegetables, beans, sea vegetables, miso, tamari, umeboshi, fruits, nuts, teas, baked goods. From: Lima [Belgium], Chico San, Infinity, Spiral, Hain, Caldron, and Paradox. Located at: 351 Bleeker Street, New York City, NY 10014. Phone: 212-924-7572.

Note: *East West Journal*—“Serving the world macrobiotic

community”—is presently edited by Ron Dobrin [a former New York journalist], published by Order of the Universe Publications, and distributed by Tao Books & Publications, Inc., 303b Newbury St., Boston, MA 02115. Address: 351 Bleeker Street, New York City, NY 10014. Phone: 212-924-7572.

609. Rodale, J.I. 1971. Organic food and health. III. The link between diet and resistance to disease—plus the effect of diet on character—highlight the continuing in-depth study of food and health. *Organic Gardening and Farming* 18(2):132, 134-35. Feb. [2 ref]

• **Summary:** Continues his comments on and critique of the favorable article in *The New York Times* of 7 Sept. 1970—with still more cases from *Bio-Dynamic Farming and Gardening*, by Ehrenfried Pfeiffer. “Pfeiffer cites four physicians who have had experience with patients who have benefited from bio-dynamically raised food.”

Rodale also discusses the experimental work of Sir Robert McCarrison and his co-workers who followed the organic method in India. The crops they grew gave larger yields with organic than with chemical fertilizers. McCarrison spent over ten years with the Hunzas of northern India around the 2nd decade of the 20th century.

Note: Until 1974 Hunza was an independent princely state in the northernmost part of the Northern Areas of Pakistan. It was centered in the Hunza Valley, just north of the Hunza River, at an elevation of around 2,500 metres (8,200 ft). The state was governed by hereditary rulers who took the title “Mir” (ruler, each with the surname Khan) and were assisted by a council of Wazirs or Ministers. On 25 Sept. 1974 the State of Hunza was dissolved by dissolved by Z.A. Bhutto, Prime Minister of Pakistan.

Rodale (quoting from his book *Natural Health, Sugar, and the Criminal Mind*), continues: Dr. McCarrison “discovered that the Hunza people of northern India had an excellent diet which caused them to be extremely healthy and happy with no crime problem.

“McCarrison decided to find out if rats could be endowed with health equal to that enjoyed by the Hunzas through feeding them on a similar diet. He worked with three groups of rats—one group fed on the same diet as the Hunzas; a second group on the diet of the southern India rice-eaters; and a third group that was subjected to the diet of the lower classes of England, containing white bread, margarine, sugar-sweetened tea, a little boiled milk, cabbage, potatoes, canned meats and sugared jam.

“McCarrison found the Hunza group quite healthy, but group number two suffered from a wide variety of diseases.

“The third group, the ‘British’ rats, not only developed those diseases, but were nervous and apt to bite their attendants. They lived unhappily together and by the sixtieth day of the experiment began to kill and eat the weaker ones amongst them.”

610. Hansen, Barbara. 1971. Lack of proof marks battle between organic faddists, scientists: Poison or packed with nutrients. *Los Angeles Times*. March 18. p. J1.

• **Summary:** Mentions: Betty Lee Morales of Organic-ville, a health food center in Los Angeles; she is prominent in the movement and she offers three guidelines for judging the nutritional superiority of organic produce.

Chico and “B” Bucaro, who grow organic crops on 5½ acres north of Los Angeles. The Bucaros have been growing crops organically for as long as they have been farming. and “long before the current craze.” They plow the weeds back into the soil and water the crops from their well. They sell most of their produce directly to the consumer.

Max Kozek, a distributor of organic produce throughout the United States, says the demand far exceeds the supply. He says that organic produce costs, on average, about 10% more than other produce.

611. Hansen, Barbara. 1971. Faddists claim organic food is superior. *Sarasota Herald-Tribune*. March 26. p. 2-C.

• **Summary:** “From the Los Angeles Times” of March 18, 1971.

612. Bolduc, William T.; Retzliff, Mark A. 1971. Certificate of amendment to the articles of incorporation: Eden Organic Foods, Inc. Lansing, Michigan: Michigan Department of Treasury. 2 p. April 8. 26 cm.

• **Summary:** Eden Organic Foods, Inc. has its registered office at 211 South State Street, Ann Arbor, Michigan 48104. At a meeting of the shareholders, held on 8 April 1971, Article I was amended to read as follows: “The name of the corporation is Eden Foods, Inc.”

Signed by William T. Bolduc, Jr. and Mark A. Retzliff on 8 April 1971. Address: 1. President; 2. Secretary. Washtenaw Co., Michigan.

613. Greene, Wade. 1971. Guru of the organic food cult [J.I. Rodale]. *New York Times Magazine*. June 6. p. 30-31, 54, 56, 58, 60, 65, 68, 70.

• **Summary:** The New York Times Magazine is part of the Sunday New York Times and may be simply listed as such.

A long, well researched, and rather negative discussion of Jerome Irving Rodale. Photos show: (1) J.I. Rodale exercising by hanging from an overhead bar in his book-lined study at Emmaus, Pennsylvania. (2) A Rodale farmhand watering vegetables in a shaded manure bed. (3) Rodale hooked up to a machine that increases his body’s supply of energy. (4) His son, Robert Rodale, in the Rodale pressroom. Last year Rodale publications grossed \$9 million. (4) The cover of the May 1971 issue of *Prevention* magazine. It sells one million copies a month. Address: Freelance writer.

614. MacDougall, Wilson. 1971. Organic food boom is growing. *Southeast Missourian (Cape Girardeau)*. June 17. p. 20. *

• **Summary:** Along with the growing interest in environmental awareness has come an interest in “organic or ‘natural foods,’ so strong the *Advertising Age* magazine calls these foods ‘the fastest growing segment of the entire food market in the 1970s.’”

Organic food is grown without chemical fertilizers or pesticides. Compost is often added to the soil. People who eat organic foods are willing to pay a little more to avoid meals laced with many of the 10,000 food additives one can find in U.S. supermarkets.

Health food stores are opening everywhere to fill the demand. In San Francisco, Fred Rohe operates two natural food stores, and has recently organized a group of over-30 people called “organic merchants”—OM for short.

Erewhon Trading Co. of Boston “ships tons of organic rice each week.” In New York City, small established health food stores (such as Pete’s on Second avenue near 7th street) are overwhelmed with the new demand.

A photo shows shelves in a store that sells “organically grown food.” Address: New York, NEA.

615. *Time*. 1971. Died, J.I. Rodale, 72, organic food advocate and magazine publisher. June 21.

• **Summary:** J.I. Rodale died of a heart attack while taping the Dick Cavett Show in Manhattan, New York. He published magazines such as *Prevention* (circulation 1,025,000) and *Organic Gardening and Farming* (circ. 725,800). In the early 1940s he started a crusade against food additives, chemical fertilizers, and pesticides. A versatile businessman and popularizer of sunflower seeds, he “became a hero of the natural-foods movement.”

618. LaBel, Murray; Izakowitz, Benjamin; Hillyard, Roger. 1971. Lease agreement signed by Erewhon Trading Company Inc. in Los Angeles. Los Angeles, California. 3 p. July 1. Unpublished typescript. 34 cm.

• **Summary:** This lease was executed on 1 July 1971 by and between Murray LaBel and Benjamin Izakowitz (lessors, owners of the building), and Erewhon Trading Company,

(of 8454 Steller Ave. [Drive], Culver City, California 90230. A Massachusetts Corporation) (Lessees), for the purpose of retail and wholesale groceries, at 8001 and 8003 Beverly Boulevard, Los Angeles (two separate individual stores). The 3-year lease commences on 1 Aug. 1971 and ends on 31 July 1974. The amount of the lease is \$800/month. The lease is signed by the three parties to the agreement. Roger Hillyard (lessee) is Executive Vice President for Erewhon Trading Co. Inc. Address: Los Angeles, California.

619. Kushi, Michio. 1971. Re: News of macrobiotics in Boston and beyond. Letter to macrobiotic friends, July 15. 2 p. Typed, without signature.

• **Summary:** “1. Our home address has been changed from 216 Gardner Road to 440 Boylston Street, Brookline, Massachusetts 02146 and the telephone number stays the same, 617-734-3853. Though this house is within a residential section, it faces Route 9 and two schools are at both sides of the house. We are having, therefore, our small studies at home including seminars for teachers, juniors, seniors and women. Two weekly church lectures are continuously held, and our enterprises such as Erewhon, Sanae, Tao, and the publications are being managed by our friends. Though all these establishments are respectively advancing, except Erewhon, they are still financially unsatisfactory.

“2. In Boston about 10 friends are with American friends who have come from Europe and South America. Since Eric [Utne] and Peggy [Taylor] have returned to America for their marriage, Ron Dobrin, the editor of EWJ, is going to be in London, and Rosemary [Traill] is also leaving for London in a few days. During this summer, besides Paul and Dora [Hawken], several marriages were made and several more babies were born among our friends. Duncan and Susan [Sims] with five other Boston friends are now in their land in British Columbia and NHK is planning to introduce their development of land and cultivation in sometime October or November for Japanese people. New Hampshire’s Erewhon farm is under the leadership of Richard and Elaine [Mensoff; her maiden name was Sutton] and about 10 Boston friends are cultivating organic vegetables. Allan and Dorna are also there.

“3. For July 4th weekend, Herman and Cornelia [Aihara] and their two children with Bob Johnson spent three days with our Boston friends. Michel’s [Abesera’s] Binghamton camp [in upstate New York] was held for a week, and Awosting Retreat is having MB [macrobiotic] summer camp this week though our friends are attending as my substitute. Lynn Miller is now in Europe and Bill Anton will join her sometime in the future. Richard and Connie [Sandler; her maiden name was Frank] are in New York, planning to study Medical science more thoroughly. Bob Petrofsky and Hy Lerner are also planning to develop their lands in Vermont, though Hy may visit Japan early in

the next year to study the oriental medicine. Los Angeles house and Erewhon are smoothly operated, and many Boston friends are there, including Roger and Susan [Hillyard], Carolyn [Heidenry], Maureen [Traill], Adele [Wood], John Demoulin. Bruce Macdonald is to return to LA [Los Angeles] after Roger and Susan set out for their domestic long travel. Aveline will spend this summer by the end of August. Ron Kotsch and Jinx, with my children, are also in Los Angeles. Becky [Rebecca] Wood will be there also.

“EWJ [East West Journal] is managed by several friends with Jack Garvey who was in Tucson [Arizona], and Bruce Gardiner with a few friends is trying to publish regularly the Order of the Universe. The Book of Do-in was published by Jack DeLangre, Macrobiotics, the Invitation to Health and Happiness, was published by Herman’s Foundation, and the Book of Miso by Aveline is now being prepared to publish.”

Norio Kushi adds by e-mail (27 March 2011): Maureen referred to in the letter is definitely Maureen Traill, the younger sister of Rosemary Traill. Maureen’s first husband was Bruce MacDonald and they had their first child (a daughter named “Lori,” who now goes by “Lorelei”), while living in Hollywood (Los Angeles) at the first macrobiotic house, 7511 Franklin Ave. Address: 440 Boylston St., Brookline, Massachusetts 02146.

620. Eden Foods, Inc. 1971. Wholesale pricelist. 211 South State St., Ann Arbor, MI 48108. 2 p. July 26.

• **Summary:** See next page. This is the earliest existing Eden Foods catalog seen that is dated. The company was wholesaling the following products: Bulk grains (including some organically grown: Wheat (Deaf Smith), organic [from Texas]; Rye, soft wheat, and open-pollinated corn, organic from Michigan; Brown rice (natural, unsprayed), and sweet brown rice), bulk cereals or packaged cereals (incl. organic cracked wheat, corn flakes, wheat flakes, and rye flakes from Deaf Smith, Texas), bulk flour (all flour is stone ground on order in Ann Arbor, incl. organic soy flour), beans (incl. organic soybeans from Michigan [60 lb], and azuki beans [out of stock until fall]), noodles, oil and nut/seed butters (all unrefined and pressed, incl. soy oil in pint, quart, and 5-gallon sizes), dried fruit.

Soybean products: Tamari soy sauce (pints, quarts, and liters), Hacho Miso (Soy Paste; 1 lb), Mugi Miso (Barley Soy Paste). Note: The Eden logo with 4 sprouts in a circle is shown. Many of these soy products were obtained from Erewhon, and the grains from Arrowhead Mills. The format of the catalog, the product categories, and the product names and spellings are very similar to those used in the Erewhon catalog at this time. Address: Ann Arbor, Michigan. Phone: (313) 769-8444.

621. Kushi, Michio. 1971. Re: Muso and criticism of the situation in Boston. Letter to Jim Ledbetter, c/o Muso, Japan, July 30. 1 p. Typed, without signature.

• **Summary:** “Thank you for your letter. I am glad that you are more actively involved in the operation of Muso, which would give you good experiences and many friendship with Japanese young MB friends.”

“There seem among Boston friends in Japan there are some criticism of Boston’s situation.... If they see unsatisfactory aspects in Boston, they should immediately return to Boston to help the situation. With such positive love and creative spirit to serve for others, a criticism become practical and realistic.” Address: 440 Boylston St., Brookline, Massachusetts 02146.

622. Kushi, Michio. 1971. Re: Japan, Boston, and Erewhon—Los Angeles. Letter to Evan Root, July 30. 1 p. Typed, without signature.

• **Summary:** “After you left for Japan, it has passed almost three years. During this period you have shown a steadiness of development. I have heard you are returning to Japan for a short period. By your eyes, please see the present Boston situation and what we are facing in America. You would feel that America is changing rapidly toward MB [macrobiotics]. When you come back to Boston, let us have a welcome party with many new friends.

“Aveline [Kushi] is now in Los Angeles until the 10th of September. On the way of coming over to the East Coast, I hope you can visit our Hollywood center and Erewhon in LA [Los Angeles], staying a few days there. Make your report and lecture there too. Let them notify [Notify them of] your arrival date before you leave Japan. They will pick you up at the airport. You may also visit San Francisco, Chico [California], Seattle [Washington], and several major places in this country, to see many friends.

“Hollywood address: 7357 Franklin Ave., Hollywood, California 90046. Phone: (213) 876-9153.” Address: 440 Boylston St., Brookline, Massachusetts 02146.

623. Allen, Floyd. 1971. Raising rice the right way: In the midst of the brown-rice boom, one persistent organic foods distributor and four brothers who grow it right set a landmark example. Looking for the organic America. *Organic Gardening and Farming* 18(7):66-68, 70-72. July.

• **Summary:** Describes in detail how Chico-San and Wehah Farm (the four Lundberg Brothers) grow short-grain brown rice organically. Allen visited Robert Kennedy, president of Chico-San Inc., “who certainly must be described as a pioneer organic food processor-distributor. The contract between Chico-San Inc. and Wehah Farm is probably a landmark which spells out the way which the industry will take in order to prosper and develop.”

Over a period of eight years, Robert Kennedy personally contacted and talked to more than 150 rice farmers in the Chico area. He was particularly impressed by Wehah Farm, which is located so that the paddies are the first to receive clean, uncontaminated mountain water flowing in from

the Feather River. He also liked the fact that, unlike other farmers in the area, the Lundbergs returned their rice straw and stubble to the soil each year instead of burning it in the fields to eliminate tillage work.

Wehah Farm is located in Richvale, California, a small, compact farming community about 20 minutes by car from Chico. The community is centered around a co-operative which mills, distributes and sells the rice grown in the area. To grow brown rice, the Lundbergs might have to leave the co-operative and thus risk rejection by many friends and neighbors. They would also have to distribute and sell all the rice they grew—not just the organic rice. These were serious problems. But Mr. Lundberg, the father of the four brothers, had taught his sons that a farmer had a duty to improve the land, and to try to leave it in better condition than when he received it. Moreover, he had farmed without modern, toxic chemicals.

Describes the intricacies of modern chemical rice farming and the many chemicals used at various stages of the growing and milling processes.

Finally the Lundbergs decided to try growing rice on 76 acres under contract with Chico-San. A source of manure was located. The first crop averaged 37 hundred-pound bags per acre, which is low compared to chemical rice yields of 70-100 bags, “but high enough, with organic prices, to demonstrate economic feasibility. The brothers made up their minds. They discarded the chemicals, withdrew from the co-op association, rejected their agricultural educations, their years of experience, and committed their 3,000-acre Wehah Farm to organics.”

Special milling equipment with rubber rollers was purchased from Japan. It removes the husk enclosing each rice grain much more gently than conventional steel or stone rollers, leaving the bran in place so the rice has a longer shelf life. The rice is stored in the husk and only milled before each order, which further extends its life. Mosquitoes are effectively controlled with tiny fish. Weeds are controlled with crop rotation. A photo shows Homer, Eldon and Wendell Lundberg. Harlan joined the Peace Corps to teach organic rice growing to Brazilians.

Note: The label on a 2-lb bag of “Lundberg Nutra-Farmed Short Grain Brown Rice” purchased at Safeway supermarket in Sept. 1997 states: “The Lundberg family has been growing rice in Northern California since 1937.” Four brothers are involved: Eldon, Wendell, Harlan, and Homer Lundberg. They are farming land purchased by their parents, Albert and Frances Lundberg, who had moved to Richvale, California, from Nebraska in 1937.

624. **Product Name:** Eden Soybeans (Organically Grown in Michigan; Whole Dry Yellow), and Soy Flour (Organic).

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 211 South State St., Ann Arbor, MI 48108. Phone: (313) 769-8444.

Date of Introduction: 1971 July.

Ingredients: Soybeans.

Wt/Vol., Packaging, Price: Soybeans: 60 lb bag. Soy flour: 50 lb.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Inc. 1971. July 26. Wholesale pricelist. “Soybeans, Mich. org.” “Soy Flour, org.”

Eden Foods pricelist. 1972. Oct. 5. Organically grown soybeans are now sold in 1 lb, 2 lb, and 5 lb sizes. Soy flour is now in 25 lb size.

Eden Foods, Inc. 1973. April 15. F.O.B. Pricelist. “Soy Flour, organically grown (Deaf Smith, Texas).” Note that the flour is no longer made from soybeans grown in Michigan, though the soybeans themselves are still grown organically in Michigan.

Ad in Soycraft. 1979. Summer. p. 38. “Traditional Soy Products from Eden Foods.” “Our organically grown soybeans come from Michigan’s mineral rich Saginaw Valley region, an area world famous for its high quality agricultural products. Comes in 10 lb and 50 lb sizes.”

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. A farmer 10 miles from Saline was growing soybeans organically for Eden Foods starting in about 1969. Originally the soybeans were grown in Washtenaw County; later they were grown in the Saginaw Valley region, and many other places.

Talk with Michael Potter of Eden Foods. 1993. Oct. 31. The soybeans used to make this soy flour were grown by Tom Vreeland. Eden cleaned them then ran them through a roaster (the same one they made cereal in) at 211 South State St. After the flour cooled, it was ground in a Meadow’s Mill that was located in the same room as the roaster. The man who ground these first organic soybeans was Royce (“Roy”) Seeger, who now lives at 133 S. Clinton, Manchester, Michigan 48158. Phone: 313-428-0973.

Note: This is the earliest known commercial soy product made with organically grown soybeans.

625. Daniels, Mary. 1971. A loaf of whole-grain bread, a jug of bancha and thou: “Food for Life” is food that’s “in accord with the Universe”—even on Halsted Street. *Chicago Tribune*. Aug. 1. p. F18-F25.

• **Summary:** “The mecca of macrobiotics in the United States today is Boston, and its Mohammed [Muhammad] is a Japanese professor of Oriental studies, Michio Kushi. Kushi is a disciple of Georges Ohsawa, who gave his first lectures in New York’s Buddhist Temple in 1959.” Ohsawa’s followers went in two directions. In Oct. 1961, one group went to [Chico] California under the leadership of Herman Aihara. The other followed Kushi to Boston.

The first macrobiotic study house in the Boston area was established very informally about 7-8 years ago in the

Kushi’s home in Brookline. Soon thereafter his students founded Tao Books and Erewhon. By word of mouth and by his writings, Michio Kushi has attracted young people from all over the USA, many of them seeking something better than drugs. Soon the demands on his time were so great that Kushi had to give up his classes at Harvard to teach from his home and lecture twice a week on the true path to happiness.

Erewhon is now almost the size of a supermarket; it owns a large warehouse near the Boston docks. Eight large photos show foods sold at Erewhon retail stores. One caption mentions miso.

Part II of this article, titled “Macrobiotics: where it’s at in Chicago,” is about Tom Swan and his macrobiotic food store “Food for Life.” This store, around which the local macrobiotic community revolves, was started in Feb. 1970 at 2356 Seminary by Ron Kotsch, a Harvard student who had worked at the Erewhon store in Boston.

On the shelves are cans and bottles of corn germ oil and sesame oil (both auger pressed, and both with a rich, natural flavor), sesame butter, a variety of seaweeds imported from Japan, buckwheat noodles, “a fermented soy paste rich in energy called miso (dancers down it before a performance), and a natural soy sauce called tamari that makes you realize how much the supermarket stuff cheats you in taste. All of these things are proudly labeled ‘no preservatives.’”

Note: This is the earliest document seen (March 2020) that mentions Tree of Life, which it says was started by Ron Kotsch.

Also mentions: John Palumbo, Bill Tara, Loren McCune, The Caldron, Dr. Walter Kempner, Burl Ives, brown rice from Chico San, organic foods, Gloria Swanson, and William Dufty. Includes five macrobiotic recipes: Brown rice with gomasio [gomashio]; leftovers fried and served with tamari (soy) sauce. Seaweed and carrots. Bancha tea. Tempura batter. Raisin muffins.

626. *SoyaScan Notes*. 1971. Chronology of Laurelbrook in Maryland. 16 March 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1971 Aug. 23—Laurelbrook Foods begins as a macrobiotic natural foods wholesale distributor in Forest Hill, Harford County, Maryland (about 25 miles northeast of Baltimore). The company started as a division of Cycle Parts & Accessories, Inc., a motorcycle parts company that Rod was planning to start in late 1970 shortly before the idea of starting a natural foods distribution company took form. Laurelbrook company never moved from its original location, but they kept a post office box (P.O. Box 47) in nearby Bel Air. Their original price list shows that they carried 11 products, mostly bulk organic grains and beans (including soybeans) purchased from Arrowhead Mills. Erewhon was their other major supplier from the outset. The company was founded by Rod and Margy Coates, the parents of five daughters (including Sally, Judy, Marion

[Ronnie], and Dora Coates) and one son (Dan). Dora was Paul Hawken's first wife; they were married in June 1971 in Maryland. Judy was John Deming's first wife; they were married in Aug. 1972. Both Paul and John worked with Erewhon. Rod and Margy decided to call the company Laurelbrook since they lived on Laurelbrook Road in Fallston, Maryland. Rod and Margy first got interested in natural foods in 1967 when their next to oldest daughter, Judy, who had been studying macrobiotics with Michio and Aveline Kushi in Boston, Massachusetts, and had worked for Erewhon, offered to come home and cook for her parents for two weeks and let them try out the diet.

1971 Sept. 30—Laurelbrook is still considered by Rod Coates to be a division of his Cycle Parts & Accessories, Inc.

1973 Dec.—Laurelbrook opens a new, second warehouse in Raleigh, North Carolina (at 330 West Davie St.). Four people start and run the operation.

1974—Laurelbrook, which now employs 24 people, enlarges its warehouse.

1975—Feb.—Laurelbrook publishes a 6-page booklet showing that the company now distributes about 43 different food products—including soy flour, tamari, and miso.

1976 Nov.—One of Laurelbrook's employees is trying to start a labor union. Management vigorously opposes it. Laurelbrook now employs 32 people and has a fleet of 12 trucks that delivers to 350 stores. It is still a family operation, with Rod and Margy Coates, their 3 children, a son-in-law, a niece, and a nephew working at Laurelbrook.

1977—Laurelbrook outgrows its warehouse at 330 West Davie St. in Raleigh, North Carolina, so they move into a larger warehouse facility at 2319 Laurelbrook Street in Raleigh.

1977 Nov.—Laurelbrook has 44 employees. Sales last year were about \$3 million.

1978 June—Laurelbrook is now importing foods from Mitoku in Japan.

1979 May—Rod Coates hires Richard Curry as accountant and general manager.

1980 March 17—At a special meeting of the board of directors, Rod informs the board that he will be retiring in one week, on 23 March 1980, his 65th birthday. He recommends that he be replaced as president by Richard Curry and that his (Rod's) official position be chairman of the board.

1981 March—Things are not going well at Laurelbrook. Rod and Marge feel that Richard is not doing a good job in running the company. Employee morale is down. But Richard blames the problems on Rod, and wants Rod to be less actively involved with Laurelbrook on a daily basis.

1981 March—Dora Hawken is fired from her position in the Laurelbrook office.

1981 July 21—Rod, Margy, and Dan Coates, constituting all the board of directors of Laurelbrook, resign, effective immediately. They are upset with the way Richard Curry is

running the company.

1981 Aug.—Richard Curry offers to buy out the Coates' interest in Laurelbrook foods. They accept the offer. Rod and Margy keep ownership of the property and Richard was to pay them rent for using it.

1981 Nov. 21—Over the next 30 days Richard Curry places five large orders with Hain Pure Foods in the amount of \$35,577.

1982 Feb. 15—Laurelbrook Foods files for Chapter 11 bankruptcy protection and does business under Chapter 11 for about 18 months. Richard Curry is president.

1982 Dec. 22—Rod Coates presents a list of items that he alleges Richard Curry sold illegally after the bankruptcy of Laurelbrook, and before the auction of the company's assets. Attached to this are letters between attorneys.

1983 Oct-Dec.—Rod and Margy Coates have to pay off the debt of \$35,577 to Hain—even though they no longer own the company. In Dec. 1983 the last of the equipment in the warehouse was auctioned off.

1990 March 4—Rod Coates dies of Alzheimer's disease. As of early 1992, Judy Coates lives in Ross, California, and Dora lives in Marin, California. Address: 505 Granary Rd., Forest Hill, Maryland 21050.

627. Rodale, Robert. 1971. The right way to vegetate: Organic food. *Washington Post, Times Herald*. Aug. 19. p. H4.

• **Summary:** Many young people are turning to vegetarianism. Here are some of the main reasons: 1. Reverence for life. 2. Mystical [and ethical] reasons. 3. Economy. 4. Animal feeds are drugged. 5. A vegetarian diet can be healthful—as shown by studies of Seventh-day Adventists. Rodale then offers a few words in favor of eating meat. His personal preference in diet is a compromise between a vegetarian diet and the standard American meat-heavy diet.

Some vegetarians eat novel foods. "Health food stores catering to vegetarians do a big business in millet, buckwheat groats, unpearled barley, nutritional yeast, and even Japanese Azuki beans."

Both vegetarians and meat-eaters show a growing interest in such healthy foods as wheat germ, sunflower and pumpkin seeds, brown rice, raw or lightly roasted peanuts, and peanut butter.

628. Laurelbrook Foods. 1971. Wholesale order and price list. Arrowhead organic products. Bel Air, Maryland. 1 p. Aug. 23. 28 cm.

• **Summary:** Margy Coates says (March 1992) that this is Laurelbrook's very first price list, and the only one that was saved. Apparently all of the products were ordered from Arrowhead mills. Wheat, corn & rye (50 lb bag). Cracked wheat (12 x 2 lb or 50 lb). Wheat flour (2 lb or 5 lb). Corn meal. Whole millet. Macro flaked cereals (oats, rye, wheat).

Soybeans (60 lb bag, or 12 x 2 lb bags). Pinto beans. Alfalfa. Hulled peanuts. Peanut oil—Deaf Smith.

Note: This is the earliest document seen (March 2020) concerning Laurelbrook Foods in Bel Air, Maryland. Address: P.O. Box 47, Bel Air, Maryland 21014.

629. Vanocur, Edith. 1971. Conscientiously natural food. *Washington Post, Times Herald*. Aug. 26. p. K1.

• **Summary:** Yes!, a new “natural food restaurant and carry-out,” recently opened at 1039 31st Street in Georgetown. The restaurant and store (The Center for Natural Living, at the same address) are owned by artist Laura Popenoe and her husband Oliver Popenoe. Their sign reads: “Yes! Whole food. Whole people. Whole world.”

Ganga Wentink is the restaurant manager. She and her husband are the East Coast leaders of a yoga organization named “3-HO” (Happy, Holy, Healthy Organization). She adopted the name “Ganga” after the Ganges River in India. Beautiful and seemingly happy, Ganga is a living advertisement for natural foods. She learned to cook while living in a teepee on a commune in New Mexico. Contains four recipes, including Whole wheat bread (with ¼ cup soy flour) and Indian Dahl Soup (with ¼ cup Tamari soy sauce {aged soy sauce}). Contains four photos.

630. Rodale, Robert. 1971. J.I. Rodale: In memoriam (Editorial). *Organic Gardening and Farming* 18(8):36-41. Aug. [2 ref]

• **Summary:** Note: Jerome I. Rodale was born on 18 Aug. 1898 in New York City. He died on 8 June 1971 (aged 71) while taping the Dick Cavett Show in New York City—of a heart attack. Rodale was born in New York City, the son of a grocer, and he grew up on the Lower East Side. His birth name was Cohen, but he changed it to a non-Jewish one after thinking it would be a handicap in business. He married Anna Andrews in 1927, and had three children.

Rodale had an interest in promoting a healthy and active lifestyle that emphasized organically grown foods, inspired by his encounter with the ideas of Albert Howard. Rodale popularized the term “organic” to mean grown without pesticides. To Rodale, agriculture and health were inseparable. Healthy soil required compost and eschewing poisonous pesticides and artificial fertilizers. Eating plants grown in such soil would then help humans stay healthier, he expounded. Photos show: (Color cover) J.I. Rodale, wearing a two-piece suit, glasses, and a small beard and mustache, seated in an armchair. (1) A full page photo of J.I. Rodale (p. 36) speaking into a microphone at a podium. (2) J.I.’s office, with one chair, two work tables piled high with work in progress, and many file cabinets along one wall—some with drawers partly open. (3) An open file cabinet drawer, packed with many files. Address: Son of J.I. Rodale.

631. *Los Angeles Times*. 1971. Kahan and Lessin Co. big in

health foods. Sept. 26. p. H1, H7.

• **Summary:** Kahan and Lessin Co. (Compton) is one of California’s largest distributors of health and diet foods. It was formed in 1945 by the union of two small Los Angeles food distributors: The Ben Kahan Co. and the Joseph E. Lessin Co. During the depression years of the 1930s, they both distributed health foods such as breads, dried fruits, honey, juices, herb teas, candles, etc. When World War II started, Joe Lessin entered the service—and thus ended his business. When the war ended, in 1945, Joe and Ben got together and formed Kahan & Lessin Co. (K&L). In 1948 Art Miller (who had started in the health food industry in the 1930s in New York with All Health Food Distributors and Brownie’s Natural Foods) joined the company and in 1955 became a partner. Today, Kahan is president, Miller is vice president, and Lessin is secretary-treasurer of the company.

Ben Kahan recalls that in 1932, when he graduated from the Los Angeles City school system, the health food industry was virtually non-existent. He started the Ben Kahan Company because of economic necessity, but he soon came to realize the value of natural and organic foods. Early meetings and associations with the patriarchs of the industry such as Otto Carque, William T. Thompson Sr., and Eugene Vandercook Sr. deepened his interest.

In those early days, Ben’s company served the few existing health food stores in Southern California. Those still in business include The Grist Mill in Los Angeles, House of Nutrition in San Diego, Schulman’s in Long Beach, and Seilers in Huntington Park.

Major early manufacturers of health foods included El Molino Mills, Hain, Ayers & Held, Battle Creek [J.H. Kellogg, in Michigan], Alberty, Dia-Mel, Cellu, Modern Products, American Diet aids, and Schiff.

By the mid-1940s, K&L was distributing a previously unimagined 1,500 items, compared with 8,000 items today.

In 1950 K&L moved into a facility of 5,000 square feet on Hunter St. in Los Angeles. In 1955 it moved again to a building of 18,000 square feet on the same street.

Last year Kahan & Lessin opened a 65,000 square foot warehouse and office on a 2-acre site at 3131 E. Maria St. in Compton, to serve 2,000 health food stores in 11 western states, Texas, Alaska and Hawaii. It boasts 11 shipping docks, 126 parking spaces, a railroad spur, freeway access, air conditioning, insulation, and resistance to earthquakes and fires. A refrigerator of 43,200 cubic feet is so large that a fork-lift truck can be driven in.

K&L, a full-service distributor, notes that efficiency plus accuracy equals service. Computers help to make operations more efficient.

All three principals share a deep personal belief in and commitment to health foods; they believe that the future of this industry looks very bright.

A large photo shows Kahan & Lessin’s current warehouse at 3131 E. Maria St. in Compton.

632. Arrowhead Mills. 1971. Classified ad: Organically grown grains, beans,... *Organic Gardening and Farming* 18(2):142. Sept.

• **Summary:** "... other whole unfragmented foods shipped promptly from Deaf Smith County, Texas. Free recipes. Write Arrowhead Mills, Box 866, Hereford, Texas 79045."

Note: This ad is in the section titled "Organically grown." It is the first ad by Arrowhead Mills seen in this magazine. The ad also ran in succeeding months (e.g., Nov., p. 142). Address: Box 866, Hereford, Texas 79045.

633. Business card of Wallace Gorell at Erewhon in Boston, Massachusetts. 1971. Boston, Massachusetts.

• **Summary:** The card, printed in the autumn of 1971 and topped with the erewhon logo, reads: "erewhon. wally gorell. director of imports. Erewhon Trading Co., 33 Farnsworth Street, Boston, Massachusetts 02110. (617) 542-1358.

This card was sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010. Address: Boston, Massachusetts.

634. Cycle Parts and Accessories, Inc. 1971. Balance Sheet, as of September 30, 1971. Maryland. 1 p. 28 cm.

• **Summary:** As of 30 Sept. 1971 Rod and Margy Coates still considered Laurelbrook to be a division of their fledgling motorcycle parts and accessories company. This company, which includes mainly the active Laurelbrook Division and a warehouse, has total assets of \$53,223, including \$6,163 in cash, \$1,136 in accounts receivable, \$22,089 in inventory, and \$18,857 in leasehold improvements. It also has 92 shares of capital stock, each \$500 par value, issued and outstanding. Note (Jan. 1995): Margy has no idea who owned this stock or what its significance was.

For the month ended Sept. 30, 1971—Income consisted of Laurelbrook Division \$3,819, and Rentals \$270. Costs and expenses were: Laurelbrook Division expenses \$413. Parts & Accessories Division expenses \$36.26.

This balance sheet was "Prepared from the books and records without audit." Address: Maryland. Phone: 410-877-1695.

635. Gladstone & Chain. 1971. Erewhon Trading Co., Inc. Report on financial statements for the year ending June 30, 1971. Boston, Massachusetts. 8 p. 28 cm.

• **Summary:** Erewhon has total assets of \$488,963 including current assets of \$406,600. Current liabilities are \$345,766. Net profit before taxes was \$152,168, and after tax profit was \$84,417. Retained earnings were \$124,203, up from \$39,786 in 1970.

In Boston the company is leasing buildings at 33 Newbury Street (\$825/month) and 33 Farnsworth Street (2 parts, totaling \$1,267/month). In Los Angeles, California, the company is leasing buildings at 8454 Steller Drive (\$1,450/

month), 7972 Beverly Blvd. (\$325/month), and 8001 Beverly Blvd. (\$800/month).

Debts—Bank notes: Erewhon is indebted to the New England Merchants National Bank of Boston in the amount of \$145,926. Interest rate: 6.5%. The company also has contingent liability to this bank in the amount of \$88,500 represented by various outstanding letters of credit.

As of July 1, 1971, the company ceased operations in its Seattle, Washington, store. All assets located in Seattle were turned over to a former employee of the corporation in consideration for the former employee's assuming all liabilities brought about by the operation of the Seattle store. Total assets turned over had a net book value of less than \$121,000. Address: Fifteen Court Square, Boston, Massachusetts.

636. Hawken, Paul. 1971. Erewhon gambles all for quality rice. *East West Journal* 1(13):6, 13.

• **Summary:** Starts with a brief history of rice cultivation in the USA, where South Carolina was the first major rice growing state. In 1912, rice was grown commercially for the first time in California. This year over 9,000 million lb of rough rice will be harvested in the U.S., but only about 25% of it will be used here; the rest will be exported, making America the largest rice exporter in the world. The leading rice-producing states are Arkansas, Texas, California, and Louisiana.

While looking for a farmer who could grow rice organically for Erewhon, Paul and Frank Ford (of Arrowhead Mills) drove into the Arkansas countryside and met Mr. Carl Garrich of the Lone Pine Rice and Bean Farm, in Lone Pine, Arkansas. Most farmers in that area had been "organic" farmers prior to World War II, growing their crop without chemical fertilizers or sprays. Formerly they used high-water culture for weed control instead of 2-4-D or Ordram. And they would rotate their crops with legumes and vetch to enrich the soil with nitrogen. "In Arkansas it was a common practice to graze cattle or raise fish on alternate years. Rice straw was stubble-mulched instead of being burned."

A week later Erewhon signed a contract with Carl Garrich, including a guaranteed income per acre. Erewhon was taking a huge risk. "If the crop failed for reasons other than floods or natural catastrophe, Erewhon would go right out of business in order to compensate for the loss." They began to prepare tons of compost. The land on which they chose to grow the first crop had been in soybeans for a while, so they felt it would be fairly fertile. Also they used biodynamic compost based on inoculation of the soil with nitrogen-fixing microorganisms, based on the work of German biochemist Dr. E.E. Pfeiffer. To complete the fertilization program, they added potash, rock phosphate, and mineralized seaweed. Then they planted an additional 300 acres of organic soybeans for next year's rice crop. They were fortunate to have pure well water for irrigation. In late

April and early May the untreated short-grain rice seeds were drilled. At first weeds seemed to be choking out the rice, then the weeds matured and died as the rice grew with increased vigor. They have refurbished an older Arkansas mill and “equipped it with a Japanese rubber sheller which will carefully remove the outer hull without harming the delicate germ and bran layers” of the rice.

Note: Mountain Ark’s Guide to Whole Foods (1982, p. 7) added that Hawken first went to Arkansas looking for a farmer to grow rice organically in December 1970. Erewhon and Garrich finalized their agreement in March 1971, after Erewhon had been turned down by 8 other Arkansas rice farmers. Erewhon placed \$150,000 in a secured account as a credit against any losses the farmer might suffer. In April 1971 Garrich planted his first organic rice crop on 330 acres. That year he got a bumper-crop yield of 120 bushels per acre. Garrich, who started farming in 1941, didn’t start using synthetic agrochemicals until 1950, when it seemed like a wise thing to do. He knew that organic farming required a lot more care and work to ensure the growth of the plants. Address: [Vice-president, Erewhon, Inc.].

637. *Organic Gardening and Farming*. 1971. From the writings of J.I. Rodale. 18(9):40-45. Sept.

• **Summary:** Memorable excerpts include: “What Does Organic Mean?”–1958. “Drought and Floods”–1955. But Who *Are* You? Excerpts from *Pay Dirt*, 1945. “How should Towns Handle Garbage?”–1947. “The Organic Creed”–1956. What is Organic Gardening? Economic Aspects vs. Health Aspects.

A full-page photo shows J.I. Rodale writing notes in a notebook (p. 40). The caption states: “Whenever an idea occurred to him, J.I. would pause to think it through then jot it down for future reference, regardless of time or place.”

638. *Organic Gardening and Farming*. 1971. Letters in tribute to J.I. Rodale. 18(9):46-49. Sept.

• **Summary:** Contains 20 letters, each a tribute to a great pioneer, whose life and work affected each of those who wrote. The name of each writer, with the city and state, are given.

Includes letters from: (1) Devin A. Garrity, Devin-Adair Book Co., Rye, New York. (2) John H. Todd, The New Alchemy Institute, Woods Hole, Massachusetts. (3) Betty Lee Morales and John T. Clark, Topanga, California. (4) Alan Talbot, Wholly Foods, Berkeley, California. (5) Joe D. Nichols, M.D., President, National NFA [Natural Food Associates], Atlanta, Texas. Address: Son of J.I. Rodale.

639. Rodale, J.I. 1971. Why I started organic farming: At the 25-year mark in 1967, Editor J.I. Rodale recalled the events that launched the organic idea in America—and began his own exciting crusade. Today, his chronicle of pioneering forms part of a fitting tribute. *Organic Gardening and Farming*

18(9):34-39. Sept.

• **Summary:** This is a reprint of an article (with the same title) that first appeared in the May 1967 (25th anniversary issue) of *Organic Gardening and Farming* (p. 30-34). Address: Emmaus, Pennsylvania.

640. Rodale, Robert. 1971. J.I. Rodale’s greatest contribution (Editorial). *Organic Gardening and Farming* 18(9):28-33. Sept.

• **Summary:** “J.I. Rodale’s greatest contribution is the feeling people got by working with him, by being part of his movement, by helping him take on the corrupt giants of our society against all odds that the battle would ever succeed.”

A photo shows J.I. Rodale and his son, Robert Rodale, at The Organic Gardening Farm. Address: Son of J.I. Rodale.

641. Council on Foods and Nutrition of the American Medical Assoc. 1971. Zen Macrobiotic diets. *JAMA: J. of the American Medical Association* 218(3):397. Oct. 18. [2 ref]

• **Summary:** Reprinted in *The Macrobiotic*. 1971. Vol. 11. No. 6. p. 2-4.

The American Medical Association’s Council on Foods and Nutrition is deeply concerned over the increasing popularity, particularly among adolescents, of “Zen Macrobiotics” and its nutritional implications. The Zen Macrobiotic diet was originated by a Japanese, Georges Ohsawa. The philosophy of Zen Macrobiotics is outlined in two of Ohsawa’s books, *Zen Macrobiotics* and the *Philosophy of Oriental Medicine*.

The Macrobiotic diet represents an example of a general trend toward natural and organic foods. One of the reasons given for the popularity of these diets is that they are considered to be a means of creating a spiritual awakening or rebirth. In some cases, people have undertaken these diets as a form of protest against the establishment, represented by the food industry. “Regardless of the underlying reasons or motives, however noble and sincere, the concepts proposed in Zen Macrobiotics constitute a major public health problem and are dangerous to its adherents.” The Zen Macrobiotic diet “is one of the most dangerous dietary regimens posing not only serious hazards to the health of the individual but even to life itself.”

The all-cereal diet is “supposedly the easiest, simplest, and wisest diet in achieving that state of well-being, one which will service as a panacea for all diseases known to man. For example, the management of cancer is handled as follows: ‘No illness is more simple to cure than cancer (this also applies to mental disease and heart trouble) through a return to the most elementary and natural eating and drinking: Diet No. 7.’”

“When a diet has been shown to cause irreversible damage to health and ultimately lead to death, it should be roundly condemned as a threat to human health. The Council on Foods and Nutrition believes that such is the case with

the rigid dietary restrictions placed on followers of the Zen Macrobiotic philosophy.”

642. *Christian Science Monitor*. 1971. Soy sauce perks up many American dishes, especially turkey and corn. Oct. 21. p. 11.

• **Summary:** Kikkoman began when two families in Japan started a soy sauce company at about the same time the first English families at Plymouth Rock enjoyed their first Thanksgiving. Kikkoman now has a test kitchen in San Francisco, where a home economist uses the company’s soy sauce directly on meats as a table sauce.

Soy sauce originated in East Asia. “The Chinese and Japanese names for soy sauce are very similar—”see yow’ and ‘shoyu’ respectively.” The original soy sauce in China was made from soy beans, water and salt only. But in Japan, long ago, it was found that adding crushed, toasted wheat produced more natural sweetness, better color, and additional flavor notes. In China, soy sauce is still generally made without wheat—although some manufacturers now add it.

“The ‘tamari’ sauce sold by American health food stores is really a Chinese-type sauce made in Japan with a Japanese name.” But it is no longer authentic tamari, made without wheat; it generally now contains some wheat.

Since 1898 Kikkoman has been the purveyor of soy sauce to the Emperor of Japan. They constructed a special factory for his sauce [the Goyô Gura at Noda].

643. B.W. [Becky Wood]. 1971. Making miso in America. *East West Journal* 1(14):6.

• **Summary:** Contains a description with photos of how miso is made at Norio and Fujimoto, but without the details necessary to actually make miso on a commercial scale.

Chico-San is developing a domestic miso which it hopes to offer commercially in the near future. Miso expert, Junsei Yamazaki, has tested and developed miso in Chico, California for the last seven years. Mr. Yamazaki has one batch which has been aging for a year. He hopes to market this batch in six months. Chico-San will expand its plant for large-scale production as the miso is perfected.

“We called Erewhon to ask if they had plans for the production of miso and Bill Tara reported that there is a big and rapidly growing market for miso. But, he said, ideally miso should be made in a given area for consumption in that area.” Erewhon will introduce to the domestic market a yeast grain called koji, essential to the production of miso.

There are currently two companies in the continental U.S. which produce miso on a commercial basis. One is located San Francisco and the other in Salt Lake City. Each produces rice miso made from white rice. The Norio Company has been located on the outskirts of San Francisco’s Japan-town, at 1532 Post Street, since the company started in 1919. The company is owned and solely operated by Mr. and Mrs. Minoru Arikawa and son.

Fujimoto and Company, which originated in Oakland, California, moved to 302 South Fourth West, Salt Lake City, Utah, in 1945. Mr. Sekino heads the three-man plant. He speaks little English. Address: EWJ, P.O. Box 203, Prudential Center Station, Boston, Massachusetts 02199. \$6.00 for 20 issues.

644. Hawken, Paul; Rohe, Fred. 1971. Lowdown on edible oils (Leaflet). Boston, Massachusetts: Organic Merchants, c/o Erewhon. 1 p. Front and back. 22 x 14 cm. Undated. * Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

645. Erewhon Trading Co., Inc. 1971. Natural and organic foods. Price list. Boston, Massachusetts. 4 p. Effective Thanksgiving day, Nov. 1971.

• **Summary:** This price list has no cover. Prices are given for each product. Products include: Grains (incl. organically grown brown rice [short, medium, or long grain; Note: The short grain was probably grown by the Lundberg Brothers of Wehah Farms, Richvale, California], Ted Whitmer [in Bloomfield, Montana] organically grown wheat, hard red spring and hard amber durum, and Deaf Smith [Hereford, Texas] organically grown wheat [hard red winter], rye, and corn). Cereals. Stoneground flours (incl. Soybean flour, full fat, organic Deaf Smith; Sweet brown rice flour). Beans (incl. azuki beans, black beans [Japanese, probably black soybeans], soybeans [organic]). Seeds. Tamari & miso: Tamari soy sauce (24 pints x \$0.76 each = \$18.24, 12 quarts x \$1.30 each = \$15.60, 6 half gallons x \$2.40 each = \$14.40, 4 gallons x \$4.50 each = \$18.00, 4.7 gallon can for \$19.00, 4.7 gallon wooden keg for \$22.00). Hacho miso (soy paste, 1 lb or 44 lb keg). Mugi miso (barley-soy paste, 1 lb, 2 lb, 44 lb keg). Kome miso (rice-soy paste, 1 lb, 2 lb, 44 lb keg).

Sea vegetables: agar agar (kanten), dulse, hiziki, kombu, nori (dried laver), wakame, wakame root, wakame (thin sheet). Tea: Lotus root tea. Dandelio herbal coffee. Mu herbal beverage. Kukicha twig tea.

Pasta. Crackers (Chico-San Rice Cakes, organic—salted, unsalted, with buckwheat, or with millet). Snacks (incl. Corn munchies [organic corn chips with soy sauce], Chico-San “Yinnies” organic rice candy [made in Chico, California]).

Note: This is the earliest document seen (July 2012) that mentions “yinnies,” a sweet or sweetener made using rice syrup made from koji.

Hopi seeds: Sunflower seeds, pumpkin seeds, almonds, cashews, or soybeans, each dry roasted with tamari. Dried fruits. Virgin oils (incl. Soybean oil, pressed and unrefined in pints, quarts, half gallon, gallon, and 5-gallon can). Nut butters. Condiments (incl. sesame salt, and Tekka [vegetable condiment]). Unusual foods: Umeboshi (plums pickled in brine) and Kuzu arrowroot. For cleanliness [body care products]: Sesame lotion [organic and biodegradable], Sesame shampoo, Orjene shampoo, Peppermint Castile soap,

Toothpowder, charred eggplant and sea salt [Dentie in bag or jar], Clearlake all purpose cleaner, biodegradable. For cooking (utensils, incl. 2 sizes of “soy dispenser,” suribachi with pestle, Save A Tree canvas shopping bag). Flyers: The Organic Merchants NOT List. The Sugar Story. The Oil Story. The Macrobiotic Way.

On the last page is a note from Paul Hawken, with his signature, thanking customers for their orders.

Letter (e-mail) from Norio Kushi. 2011. March 31. “Rosemary Traill just reminded me of an interesting story regarding attempting to get rid of the mice at the Erewhon warehouse at 33 Farnsworth St.

“My mother [Aveline] didn’t want to use chemical poisons in getting rid of the mice so someone told her about ‘sonic’ pest repellents that emit a high pitch sound, inaudible to the human ear, to drive the mice away. These sonic devices were placed around the warehouse and interestingly, what occurred is that the mice changed their diet. Instead of eating the grains, they started eating exclusively seaweed. Somehow, the mice, by eating the seaweed had no problem thriving under the condition of the sonic pest repellents. My understanding is that, after that, they had to resort to regular standard ways of getting rid of the rodents.” Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

646. National Health Foods Association. 1971. Display ad: Buyers “go organic.” *New York Times*. Nov. 1. p. 66.

• **Summary:** A small, square ad. “Plan to attend the National Health Food Fair. Vitamins. Honey. Herbs. Books. Nuts. Tobacco. Grain. Foods, etc.

“Mon., Nov. 1st, 10 am to 6 pm. McAlpin Hotel, 34th St. & Broadway, N.Y.C.”

647. Eden. 1971. Eden: Natural, organic. Serving mid-America with the food of the future (Ad). *East West Journal* 2(18):19. Nov. 30.

• **Summary:** “Complete selection of stoneground flour, whole grains, seeds and nuts, beans, nut butter, soap, cosmetics, unrefined vegetable oil, herbs & Tea, dried fruit, pasta, juice. Stardust cereals: Barleycorn, 7-grain, Kokoh, Rising Sun, Sherpa, Grainola, Rice Cream, Tempura.”

Note 1. Kokoh (also called Grain Milk or Kokkoh) is a macrobiotic preparation typically containing a finely ground combination of roasted rice, glutinous rice, oatmeal, soybeans, and sesame seeds.

Note 2. Neither miso or soy sauce are mentioned in the ad.

This ad also appeared in the Dec. 15, 1972 issue (p. 19) of this magazine. Address: 330 Maynard St., Ann Arbor, Michigan 48108. Phone: Wholesale: (313) 769-8444. Retail: (313) 761-8134.

648. Allen, Floyd. 1971. Texas farmers on the Organic trail:

Dry-land farming in the Texas Panhandle is a tough task—but these grain-growers do a job as big as the state’s reputation! *Organic Gardening and Farming* 18(11):106-12. Nov.

• **Summary:** “Two names that have been emerging very favorably are Arrowhead Mills and Frank Ford of Deaf Smith County, Texas. Just this year we’re hearing a lot about both, and when a star rises that fast it makes you want to go see what it’s all about... After all, a mill and a farmer don’t get to be all that organic overnight.”

Hereford, Texas, is located on the west side of the Texas Panhandle, which consists of the northernmost 26 counties in the state.

Note: On 19 Dec. 1942 *Collier’s* magazine published an article about the fluoride content in Hereford’s water titled “The town without a toothache.” The slogan stuck.

The farmers in Hereford don’t talk much about toothaches, but they do claim that the soil in Deaf Smith County is unusually high in trace minerals. But the area is also very dry and the elevation is about 4,000 feet. Allen visited for three days with Frank Ford and some other farmers in the area. He came away impressed by the commitment to organic farming, and a short-term goal to become 80% organic.

“Frank Ford is a dry-land farmer. A portion of his 1,800-acre farm has enough ground water for irrigation, but he feels that it would be too hard on his soil.” That shows you what a dedicated farmer he is. Frank says: “If you fight nature in farming, you’re going to lose; it might take 20 years to lose, but you’re going to lose. Whereas if you work with it, then every year your soil is stronger, your plants are stronger, finances are stronger as a result.” He knows, because he took over a worn out farm and worked with nature to bring it back to health using sound soil management above all. A graduate of Texas A&M University, he has developed a deep commitment to organics. Eleven years ago he stopped using pesticides.

Frank started his farming career and his milling career at about the same time—in 1960. He wanted a hand in merchandising the fine hard wheat he grew. He had contacted a small mill owner in the town. “In 1960 Ford reorganized the mill with George Warner, an agronomist who was putting together a seed company, and a few other farmers, incorporating the company as Arrowhead Mills.” The mill was small and didn’t have much money, so it had to make a high-quality product to survive. Arrowhead mills doesn’t fumigate its grains; not does it use any preservatives in its flour. Frank and a number of farmers who share similar ideas have come together and organized the Deaf Smith County Organic Farmers Group.

“Working with the group, as well as operating his own composting business, is Fletcher Sims of Canyon, Texas. As a former student of Dr. William Albrecht, Fletcher uses Pfeiffer’s Biodynamic method of composting. In these *still* early days of volume composting, Fletcher Sims is a pioneer

who has had to design his own techniques as well as much of his own equipment.

A full page photo (p. 106) shows Frank Ford, standing in field of wheat, with his hat in one hand; his hair appears to be gray.

649. Product Name: Eden Soy Oil (Unrefined and Pressed).
Manufacturer's Name: Eden Foods, Inc.
Manufacturer's Address: 211 S. State St., Ann Arbor, MI 48108. Phone: (313) 769-8444.
Date of Introduction: 1971 November.
Ingredients: Soy oil.
Wt/Vol., Packaging, Price: Pint, quart, or 5 gallons.
How Stored: Refrigerated.
New Product–Documentation: Eden Foods Inc. 1971. July 26. Wholesale pricelist. “Soy oil.”

650. Product Name: Kokoh.
Manufacturer's Name: Eden Foods.
Manufacturer's Address: 330 Maynard St., Ann Arbor, Michigan 48108. Phone: Wholesale: (313) 769-8444. Retail: (313) 761-8134.
Date of Introduction: 1971 November.
New Product–Documentation: Ad in East West Journal. 1971. Nov. 30. p. 19. “Eden: Natural, organic. Serving mid-America with the food of the future.” Stardust cereals: Barleycorn, 7-grain, Kokoh, Rising Sun, Sherpa, Grainola, Rice Cream, Tempura.” This ad also appeared in the Dec. 15, 1972 issue (p. 19) of this magazine.

Talk with Royce Seeger. 1993. Oct. 31. He began to work in the Eden Foods retail store in about the fall of 1970. One of his main jobs was roasting and grinding grains. About a year or two after he began work, Eden introduced Kokoh, a macrobiotic baby cereal, which contained roasted soy flour and was packed in the small biodegradable cello bags. All the ingredients were roasted together and then ground; soy was one of the ingredients. The soy was roasted more than it was for the plain soy flour.

Note: Kokoh (also called Grain Milk or Kokkoh) is a macrobiotic preparation typically containing a finely ground combination of roasted rice, glutinous rice, oatmeal, soybeans, and sesame seeds.

651. Product Name: Hopi Seeds: Sunflower Seeds, Pumpkin Seeds, Almonds, Cashews, or Soybeans (Each Dry Roasted with Tamari).
Manufacturer's Name: Erewhon Trading Co., Inc.
Manufacturer's Address: 33 Farnsworth Street, Boston, MA 02210. Phone: (617) 542-1358.
Date of Introduction: 1971 November.
Wt/Vol., Packaging, Price: 1 oz. polyethylene-cellophane bags.
How Stored: Shelf stable.
New Product–Documentation: Erewhon Trading Co.,

Inc. 1971. Natural and organic foods. Price list. Effective Thanksgiving day, Nov. 1971.

Talk with Bill Bolduc, founder of Eden Foods. 1992. March 14. Erewhon was probably the first company in America to develop a line of tamari-roasted seeds and grains. Eden was carrying the tamari-roasted soybeans by Oct. 1972, and the full line by early 1973.

652. Product Name: Soybean Flour–Full Fat (Organic, from Deaf Smith).
Manufacturer's Name: Erewhon Trading Co., Inc.
Manufacturer's Address: 33 Farnsworth St., Boston, MA 02210. Phone: (617) 542-1358.
Date of Introduction: 1971 November.
Wt/Vol., Packaging, Price: 50 lb.
How Stored: Shelf stable.

New Product–Documentation: Erewhon Trading Company Inc. 1971. Thanksgiving Day. [Nov.]. Price list. “Stoneground flours: Soybean Flour, full fat, organic Deaf Smith. 50 lb. \$11.00.”

Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 3, 26. Bulk. “Soy Flour Deaf Smith Organic.” 35 lb. Arrowhead Mills, “Soy Flour lightly toasted,” 24 oz.

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 57. Shows the label for “Organically grown–stone ground soy flour.” 24 oz. On the front panel is a description of how to make soy milk from soy flour.

Note: This is the earliest document seen (Dec. 2001) concerning Arrowhead Mills and soy.

653. Product Name: Corn Munchies (Organic Corn Chips with Soy Sauce).
Manufacturer's Name: Erewhon Trading Co., Inc.
Manufacturer's Address: 33 Farnsworth St., Boston, MA 02210. Phone: (617) 542-1358.
Date of Introduction: 1971 November.
Ingredients: Corn tortillas, sesame oil, soy sauce.
Wt/Vol., Packaging, Price: 24 x 4 oz.
How Stored: Shelf stable.
New Product–Documentation: Erewhon Trading Company Inc. 1971. Thanksgiving Day. [Nov.]. Price list. “Snacks: Corn Munchies, organic corn chips w/ soy sauce. 24–4 oz. \$0.40 each.”

654. Product Name: Organic Soybeans.
Manufacturer's Name: Erewhon Trading Co., Inc.
Manufacturer's Address: 33 Farnsworth St., Boston, Massachusetts. Phone: (617) 542-1358.
Date of Introduction: 1971 November.
New Product–Documentation: Erewhon Trading Company Inc. 1971. Thanksgiving Day. [Nov.]. Price list. “Beans: Soybeans, organic. 60 lb for \$8.40.”

Talk with Bruce Macdonald. 2011. March 2. Bruce is not sure who grew Erewhon's first organic soybeans. It may have been Frank Ford at Arrowhead Mills (who supplied a large percentage of Erewhon's early grains and beans, for the first 3 years) or it may have been Carl Garrich, the organic rice grower in Lone Pine, Arkansas. Arrowhead sold quite a few items that it did not grow in Texas. "We didn't start pushing the contract organic farming program until Paul Hawken returned from Japan."

655. Hawken, Paul. 1971. *The macrobiotic way* (Leaflet). Boston, Massachusetts. 1 p. Front and back. 22 x 14 cm. Undated.

• **Summary:** On the front is a description of the basic ideas of macrobiotics. "The principles of Macrobiotics are very few in number and simple. They are commonsense and can be seen every day in nature and in society. Since we live in a constantly changing relative world, the only constants are the principles of change itself. These are our principals: 1. Everything is the differentiated manifestation of one infinity. 2. Everything changes. 3. All antagonisms are complementary. 4. Nothing is identical. 5. What has a front has a back. 6. The bigger the front, the bigger the back. 7. What begins, ends."

On the back we read: "The following seven suggestions are offered for consideration as the basis for a sound program to establish physical and mental well-being:" 1. Eat only pure, whole, natural foods. 2. Choose foods which grow and thrive naturally in your local area and eat them in season. 3. Chew. 4. Eat course [sic, coarse] simple foods only when hungry. 5. Eat serenely and gratefully while reflecting on the origin of our food. 6. Eat two meals a day. 7. Do joyous activity and exercise. Details are given under each heading. Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

656. Hawken, Paul; Rohe, Fred. 1971. *The oil story* (Leaflet). Boston, Massachusetts: Organic Merchants, c/o Erewhon. 1 p. Front and back. 22 x 14 cm. Undated.

• **Summary:** See next page. Most vegetable oils are extracted with solvents, then refined; Organic merchants sell only crude (unrefined), pressed oils. When an industrial oil technician sees a dark color, it represents the presence of "impurities"—material that "prevents the oil from being light colored, odorless and bland in taste. From our viewpoint, those 'impurities' look desirable—the things which impart color, odor and flavor are nutrients. It is both tragic and ironic that the removal of nutrients should be equated with 'purity.' Tragic because if those nutrients were present they would contribute to the health of the consumer. Ironic because establishing the desired 'purity' really results in producing poor quality food."

"There are three methods of extracting vegetable oils from nuts, grains, beans, seeds or olives. The first is by use

of a hydraulic press. This is an ancient method and yields the best quality oil. The only two materials that will yield enough oil without heating them first are sesame seeds and olives. Therefore sesame oil and olive oil from a hydraulic press are the only oils which could be truly called 'cold pressed.'" "Virgin" olive oil refers only to the first pressing by a hydraulic press without heat. "If an Organic Merchant has an oil which has been extracted [sic, expressed] by hydraulic press but has been heated prior to pressing, he will refer to it as 'pressed,' not 'cold pressed.'"

"The second method is by expeller, described in 'The Lowdown on Edible Oils' as follows: 'This uses a screw or continuous press with a constantly rotating worm shaft. Cooked material goes into one end and is put under continuous pressure until discharged at the other end with the oil squeezed out.' Temperatures between 200 and 250 degrees are normal. Obviously, this type of extraction [sic] does not qualify as 'cold pressed' either. Organic Merchants will refer to it as 'expeller pressed.'" Most expeller pressed oil is refined after extraction. So Organic Merchants will use either the word 'crude' or 'unrefined' to identify this additional classification of acceptable oils."

The last method is solvent extraction described in 'The Lowdown on Edible Oils' as follows: 'Definitely dangerous to health.'... This method is universally used by the big commercial oil processors because it gets more oils out quicker and cheaper. About 98% of the soy oil in the U.S. is solvent extracted.'" "What about these solvents? Most commonly used solvents are light petroleum fractions—four types of Naphtha used are Pentane, Heptane, Hexane, and Octane; another solvent used is synthetic Trichloroethylene. Some of these are commonly found in gasoline. Most used solvent is Hexane. Oils dissolved by this method are solvent extracted *dissolved* oils; they are not pressed oils."

Refined oils are susceptible to rancidity, because their antioxidants are removed during refining. Crude oils retain their natural anti-oxidants. A rancid oil has a biting sharp taste and is unhealthy. A crude oil contains all its natural vitamin A, vitamin E, lecithin, and all other natural food factors.

On the bottom back of one edition is: "Preprints available from: Erewhon Trading Co., 8454 Steller Drive, Culver City, California 90230. Phone: (213) 836-7569." Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

657. Rohé, Fred. 1971. *The sugar story* (Leaflet). Boston, Massachusetts: Organic Merchants, c/o Erewhon. 1 p. Front and back. 22 x 14 cm. Undated.

• **Summary:** See page after next. This leaflet, printed with brown ink on orange-yellow paper, begins: "No Organic Merchant sells white sugar or any products containing white sugar because it is a foodless food. It is 99.96% sucrose and when taken into the human body in this form is

the oil story

by Paul Hawken
& Fred Rohe

One very basic difference between our way of looking at vegetable oils and the industrial oil technician's viewpoint should be understood. When he sees dark color, it represents the presence of "impurities" – material that prevents the oil from being light colored, odorless and bland in taste. From our viewpoint, those "impurities" look desirable – the things which impart color, odor and flavor are NUTRIENTS. It is both tragic and ironic that the removal of nutrients should be equated with "purity". Tragic because if those nutrients were present they would contribute to the health of the consumer. Ironic because establishing the desired "purity" really results in producing poor quality food.

We qualified ourselves to make public observations about oils by conducting a threefold research program. First, we read from the following sources: THE ENCYCLOPEDIA BRITANICA; "Rancidity in Oils" and "The Lowdown on Edible Oils" published by the Lee Foundation for Nutritional Research, Milwaukee, Wisconsin; and "The Story of Oils" published by Walnut Acres, Penns Creek, Pennsylvania. Second, we talked for several hours with Frank Lachle, a retired oil chemist with eminent technical qualifications who now owns Healthway Natural Foods, Watsonville, California. Third, we toured one of the largest vegetable oil extraction and refining plants in California, specializing in the production of safflower oil.

There are three methods of extracting vegetable oils from nuts, grains, beans, seeds or olives. The first is by use of a hydraulic press. This is an ancient method and yields the best quality oil. The only two materials that will yield enough oil without heating them first are sesame seeds and olives. Therefore, sesame oil and olive oil from a hydraulic press are the only oils which could truly be called "cold pressed". The terms "cold pressed" as applies to all oils and "virgin" as applies to olive oil are meaningless to the consumer. They have no legal definition, mean whatever the manufacturer wants them to mean, and do not give a true description of the product behind the label. Organic Merchants will not condone misleading labeling. The term "virgin" for olive oil will refer only to the first pressing by a hydraulic press without heat. The term "cold pressed" will refer only to hydraulic pressing without heat. These oils are the closest possible to the natural state, therefore have the most color, odor and flavor – in a word, the most NUTRITION – but they will often be unavailable because so little is produced this way.

If an Organic Merchant has an oil which has been extracted by hydraulic press but has been heated prior to pressing, he will refer to it as "pressed", not "cold pressed".

The second method is by expeller, described in "The Lowdown on Edible Oils" as follows: "This uses a screw or continuous press with a constantly rotating worm shaft. Cooked material goes into one end and is put under continuous pressure until discharged at the other end with oil squeezed out". Temperatures between 200 and 250 degrees are normal. Obviously, this type of extraction does not qualify as "cold pressed" either. Organic Merchants will refer to it as "expeller pressed".

Now with a hydraulically pressed oil labeled "cold pressed" or "pressed", you can assume you have a crude or unrefined oil. But this is not true of "expeller pressed" oil because the common fate of expeller pressed oil is to be refined after extraction. So you need additional information with the words "expeller pressed". Organic Merchants will use either the word "crude" or "unrefined" to identify this additional classification of acceptable oils. So Organic Merchants draws the line of acceptability at this point and, to review, you may expect us to carry only four classifications of oil: (1) virgin (2) cold pressed (3) pressed (4) expeller pressed - crude. And this paper is your tool to remind yourself of what we mean by those words.

The last method is solvent extraction, described in "The Lowdown on Edible Oils" as "definitely dangerous to health. . ." "Oil bearing materials are ground, steam cooked, then mixed with the solvent (of a petroleum base) which dissolves out of the oils, leaving a dry residue. The solvent is separated from the oils. This method is universally used by the big commercial oil processors because it gets more oils out quicker and cheaper. About 98% of the soy oil in the U.S. is solvent extracted.

"What about these solvents? Most commonly used solvents are light petroleum fractions – four types of Naptha used are Pentane, Heptane, Hexane, and Octane types; another solvent used is synthetic Trichlorethylene. Some of these are commonly found in gasoline. Most used solvent is Hexane. Oils dissolved by this method are solvent extracted DISSOLVED oils are not pressed oils.

"The big commercial edible oil processors and distributors tell us that if any of the solvent remains in the oils it is VERY LITTLE. But you know just how harmful these solvents may be. Pertinent here is an observation coming out of a symposium of cancer specialists organized by the International Union Against Cancer meeting in Rome in August 1956. Among many things they observed "Since various petroleum constituents, including certain mineral oils and paraffin, have produced cancer in man and experimental animals, the presence of such chemicals in food appears to be objectionable, particularly when such materials are heated to high temperatures."

The VERY LITTLE argument for solvent residues is just as weak for solvents as it is for pesticide residues. The amount of petroleum solvent that should enter the human system

the sugar story

By Fred Rohe'

No Organic Merchant sells white sugar or any products containing white sugar because it is a foodless food. It is 99.96% sucrose and when taken into the human body in this form is potentially dangerous. It is touted as an energy food, but such propaganda is misleading for there is ample evidence that white sugar robs the body of B vitamins, disrupts calcium metabolism and has a deleterious effect on the nervous system.

The above material can be concluded by anyone through reading, but in addition to the reading, I have taken the trouble to visit sugar refineries in both Hawaii and California. Aside from general curiosity, my reason for these visits was that I had been selling "raw" or brown sugar without understanding what they are. There was no information available which seemed dependable.

Sugar cane is grown with the use of synthetic fertilizers and weed sprays. The fields are burned just previous to harvest. These are destructive agricultural practices; nothing truly good can come from soil so mistreated. I would, therefore, be uninterested in consuming anything derived from commercially grown sugar cane, either brown sugar or molasses.

Sugar refining is largely a mechanical process done in truly huge machines which boil, spin, filter and separate. Aside from water, the materials which enter the processing are lime, phosphoric acid and diatomaceous earth. I don't consider any of these additives significant where white sugar is concerned because one thing is certainly true about white sugar; it is "pure." No chemical residues could possibly remain at the end of the line, so effective is their purification process.

There are three kinds of sugar which are not white: light brown, dark brown, and Kleenraw. They are all made the same way — by adding back molasses to refined sugar. For years I had heard several different versions of how these so-called "raw" sugars are made. All of them led me to believe that the so-called "raw" sugar which has traditionally been used in the health food industry is a "partially refined" product removed from the refining process sometimes before the final stage of white sugar. But my investigation has proved this impression erroneous. All forms of non-white sugars are made from a base of white sugar.

The numbers go like this: Partially refined or "raw" sugar is 97% sucrose when it leaves Hawaii and goes through a gigantic California refinery to produce refined sugar, 99.96% sucrose. For Kleenraw they add back 5% molasses, for light brown they add back 12% molasses, for dark brown they add back 13% molasses. A special crystalization process is used for Kleenraw designed especially to create a raw-like illusion.

All sugar companies use similar processes, as it is against the law to sell sugar which has not been refined. Ostensibly, the purpose of this law is to protect us; in reality it means we have no freedom to choose what kind of sugar we would use. Personally, I would like to be able to buy sugar from organically grown cane in the form of an almost black, syrupy mass of crystals. It is rumored that the law which prevents us from buying such true raw sugar was enacted as a result of powerful lobbying on the behalf of the sugar refining companies.

potentially dangerous. It is touted as an energy food, but such propaganda is misleading for there is ample evidence that white sugar robs the body of B vitamins, disrupts calcium metabolism, and has a deleterious effect on the nervous system.”

“There are three kinds of sugar which are not white: light brown, dark brown, and Kleenraw. They are all made the same way—by adding back molasses to refined sugar... For Kleenraw they add back 5% molasses, for light brown they add back 12% molasses, for dark brown they add back 13% molasses.”

“Organic merchants do not sell brown or ‘raw’ sugar or any products containing brown sugar either, because the plain fact is that brown sugar is a shuck” (phony).

Turbinado and Demarara sugar are similar to brown sugar. So what kind of sugar should we use? The writer recommends following the advice of J.I. Rodale: “So far as we are concerned, the answer is none. If you would be healthy, omit all sugar and just get accustomed to doing without it.” Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

658. Rohé, Fred. 1971. The NOT list (Leaflet). Boston, Massachusetts: Organic Merchants, c/o Erewhon. 1 p. Front and back. 22 x 14 cm. Undated.

• **Summary:** See next page. This leaflet, printed with dark brown ink on beige paper, has the Organic Merchants logo (“1971 member of OM—Organic Merchants”) in the upper left corner. The text begins: “You, the consumer, will see many improvements in the quality of material goods during the coming decade due to the activities of the movement known as ‘consumerism.’ One such activity can already be seen in the efforts of Organic Merchants. True, Organic Merchants is an organization of businessmen, but in its purpose it is nothing less than ‘consumerism’ come to life.

“When a businessman inquires about Organic Merchants, he receives an application which, if he wants to join, he must read, sign and return with his check for a year’s dues. This application is actually a no-nonsense commitment, reading as follows:

“I recognize my kinship to the brotherhood known as Organic Merchants. I understand that the purpose of our brotherhood is to provide information to the public regarding agriculture, the food industry, and nutrition and that this information shall be provided without profit.

“I understand that the purpose of our brotherhood is to set quality control standards, making them in the form of a public contract that validly demonstrates a serious commitment. Therefore, I agree not to sell any food products containing:

“white sugar—‘raw’ sugar—turbinado sugar—corn syrup—bleached white flour—hydrogenated fats—artificial flavor—artificial color—cottonseed products—monosodium glutamate—synthetic vitamins—synthetic sugar substitutes—synthetic

salt substitutes—synthetic preservatives, emulsifiers, or other synthetic food chemicals.

“I also agree not to sell refined salt, refined oil, & refined flours (white flour, degerminated corn meal, gluten flour, white rice flour) and to begin gradual elimination of products containing these items.’

“The above promise represents a truly remarkable phenomenon. There has never been a stricter set of quality control standards. Organic Merchants can rightfully claim to be the guardian of food integrity.

“But it is not enough to set standards, not even enough to live up to them. You, the consumer, must understand these standards, why they exist, their importance to the planet, to you, to everyone. So the principal duty of Organic Merchants is to inform.” Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

659. Chico-San Inc. 1971. Portfolio. Chico, California. 6 sheets. 8 Dec. 1971. 28 cm.

• **Summary:** See 2 pages after next. Includes the following (all printed back-to-back with dark brown ink on golden yellow paper with a new complex spiral logo): (1) Form letter from J. Robert Kennedy to Lorenz A. Schaller, Pasadena, California, with Kennedy’s signature. Spiral Foods “was formed recently for the purpose of selling direct to those who find it difficult to obtain Macrobiotic food products under the Chico-San label at their local outlets. They are the same products, however, only the label is different.

“If you don’t care to order direct, Chico-San products are sold at health food stores throughout the country.” Distributors in Mr. Schaller’s area are given: (1) Kahan & Lessin Co., 3131 East Maria St., Compton, CA 90021. (2) Landstrom Co., 428 Talbert St., San Francisco, CA 94114.

(2) “Rice cakes is our bag.” Three varieties, made from brown rice, grown organically by Wehah Farms. (3) “How Chico-San guarantees Oriental-type, organically grown brown rice,” article reprinted from *Health Food Business* magazine. (4-5) Chico food news 1, about Lima soysauce and sweet brown rice, with recipes. Ingredients include soybean flour and Yinnies Grain Syrup (“made from barley and brown rice is a new product from Chico-San”). (6-7) Chico food news 2, about rice chips, corn chips, Yinnies, mochi, with recipes. (8-9) Chico food news 3, about wild American ginseng and Chico-San rice vinegar. (10-11) Chico food news 6, about sea vegetables: Hijiki, nori, wakame, kombu, kanten. Address: 1262 Humboldt Ave., Chico, California 95926. Phone: (916) 343-6770.

• **Summary:** The section titled “Organic food feasts” states that “Mother Nature on the Run will cater organic food feasts for any occasion.” This catering service was recently formed

The NOT List

By FRED ROHÉ

You, the consumer, will see many improvements in the quality of material goods during the coming decade due to the activities of the movement known as "consumerism." One such activity can already be seen in the efforts of Organic Merchants. True, Organic Merchants is an organization of businessmen; but in its purpose it is nothing less than "consumerism" come to life.

When a businessman inquires about Organic Merchants, he receives an application which, if he wants to join, he must read, sign and return with his check for a year's dues. This application is actually a no-nonsense commitment, reading as follows:

I recognize my kinship to the brotherhood known as Organic Merchants. I understand that the purpose of our brotherhood is to provide information to the public regarding agriculture, the food industry, and nutrition and that this information shall be provided without profit. I understand that the purpose of our brotherhood is to set quality control standards, making them in the form of a public contract that validly demonstrates a serious commitment. Therefore, I agree not to sell any food products containing:

white sugar – "raw" sugar – turbinado sugar – corn syrup – bleached white flour – hydrogenated fats – artificial flavor – artificial color – cottonseed products – monosodium glutamate – synthetic vitamins – synthetic sugar substitutes – synthetic salt substitutes – synthetic preservatives, emulsifiers, or other synthetic food chemicals

I also agree not to sell refined salt, refined oil, & refined flours (white flour, degerminated corn meal, gluten flour, white rice flour) and to begin gradual elimination of products containing these items.

The above promise represents a truly remarkable phenomenon. There has never been a stricter set of quality control standards. Organic Merchants can rightfully claim to be the guardian of food integrity.

But it is not enough to set standards, not even enough to live up to them. You, the consumer, must understand these standards, why they exist, their importance to the planet, to you, to everyone. So the principal duty of Organic Merchants is to inform. We must inform because ultimately quality control must be where it belongs: in the hands of the people. It will not suffice for one poor, small organization, even though it be of pure intentions as Organic Merchants, to be guardians of food integrity for this entire nation. That task requires a force and the only force available is the people, armed with the knowledge of what they want and why they want it.

Organic Merchants believes that when they are properly informed, the people will want natural foods in abundant supply convenient to everyone living anywhere in this country. The necessary awakening is already well underway. This brochure and other writings published by Organic Merchants are designed to further stimulate the consumer consciousness. But again, it is not enough for Organic Merchants to do what it does. So we hereby propose a working agreement between you and us: we will do our part by printing thousands of brochures and giving them away; you do your part by asking one of your fellow men to read it. By being sure the brochures are not thrown away, thousands will turn into millions and we will have become the ultimate effective tool – the people working for the people.

Reprinted from
HEALTH FOOD BUSINESS Magazine

How Chico-San Guarantees Oriental-Type, Organically-Grown Brown Rice

Health Food Stores will be happy to learn that Chico-San now offers the finest quality Brown Rice — guaranteed organically-grown. To back-up their guarantee, Chico-San has gone to fantastic limits to grow, harvest and distribute a truly natural and organic health food, which is now available from most wholesalers in our industry.

To produce an organically grown rice that will meet the rigid standards set up by CHICO-SAN is a big order. To find a grower that could meet these standards, Robert Kennedy, who is now the president of Chico-San, moved to California and began searching the rice growing area for growers that had both the facilities and the desire to oppose the trend of ever increasing use of chemical fertilizers, weed sprays, insecticides and seed treatments.

It was necessary to find a grower with naturally rich soils that had not been over cropped and enough acres to allow a rotation plan that would build up the soil rather than deplete it. This would include naturally enriching cover crops such as purple vetch and clover that would be incorporated into the soil and add much needed humus and fertility.

After 8 years of searching, Mr. Kennedy has found such a grower in the rich Sacramento Valley. This was especially desirable because the water used for irrigation on this land comes from the famous Feather River which cascades out of the Sierra Nevada mountains less than ten miles from this rice growing area and is one of the purest waters used for irrigation in the world.

An agreement has been worked out with WEHAH FARMS that will insure the delivery of the highest quality of organically grown rice on the market today. *The agreement includes a sliding price provision that enables the grower and the buyer to share the risk of producing rice without the use of chemicals and assures the consumer the lowest price possible for this unimpeachable product.*

The first year's operation was rather modest. It was necessary to assess the production potentials of such an operation and also to build and modify equipment to insure purity and quality of the rice.

A field was selected with a record of natural fertility and relative freedom from weeds. This field had laid idle the previous season and had all of the straw and stubble incorporated back into the soil to further build natural fertility.

The common practice of burning this stubble and straw has not been used on this farm for many years because it depletes the soil of humus and also adds to air pollution.

Special arrangements were made with the mosquito control district to control the mosquito larva and several other undesirable insects by the introduction of *Gambusia* fish (mosquito fish). These people were found to be most cooperative in efforts to find natural biological solutions to insect problems rather than the use of chemicals that is practiced in most of the food producing areas of the world.

As spring approached, plans were made for the tillage operations necessary to produce the 1969 crop and the summer fallow operations necessary to insure the best possible conditions for an expanded 1970 operation.

A supply of the highest quality organic manure was found and after the ground was disked, harrowed and landplaned, it was spread at different rates throughout the field. This was done to assess the advantages of various fertility levels on the quality and quantity of the crop for future planning. This manure was incorporated by disking and harrowing to insure an even distribution throughout the soil. Seed and water were applied and the crop was on its way, but the real work had just begun.

It was now necessary to find storage and milling facilities that would insure against contamination with chemicals and non-organically grown rice and also allow for custom milling of each order at the time it was needed. This was solved as WEHAH FARM has facilities to store rice from over 500 acres and keep it in individual lots, but getting it milled to exacting specifications turned out to be more difficult. After checking with almost every mill in Northern California, WEHAH FARM found it necessary to build a new mill designed especially for organically grown, brown rice. To do this, equipment was imported from as far away as Japan and a new building was erected.

As the summer progressed, one could see that the crop was something special. It was progressing with a good smooth growth pattern and steady color without the abrupt changes in growth and color often experienced in fields depending on chemicals.

As this crop was growing, work was proceeding on the rotation land. It was disked and worked down with a drag to incorporate the straw and stubble. Then it was irrigated to start the water grass (*Echinochloa crusgalli*), rough-seeded bulrush (*Scripus mucronatus*) and other weeds that naturally grow in all rice growing areas. When the weeds had started the ground was again disked and a cover crop of purple vetch was planted and ridged to establish the best possible conditions for the 1970 organic rice crop.

When the 1969 harvest was complete both CHICO-SAN and WEHAH FARMS were pleased with both quality and quantity of the rice, and determined to expand the acreage so that everyone who wants a premium quality, organically grown, brown rice will be able to buy it at a realistic price.

by six young health-food enthusiasts who love to cook and who believe that happy food makes happy people. At a recent church dinner, the group served a meal that included “brown rice with miso, tamari and natural peanut-butter sauce.”

661. *SoyaScan Notes*. 1971. Chronology of soybeans, soyfoods and natural foods in the United States 1971 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1971 Jan. *East West Journal* starts publication in Boston, Massachusetts.

1971 Feb. Westbrae Natural Foods, founded in late 1970, opens for business in Berkeley, California, as a natural foods retail store.

1971 Feb. Essene Traditional Foods begins operation as a macrobiotic natural foods distributor in Philadelphia, Pennsylvania. They sell miso and tamari.

1971 May. Tree of Life opens as a natural foods retail store in St. Augustine, Florida, founded by Irwin Carasso.

1971. The Food Protein Council (renamed Soy Protein Council in Dec. 1981) is established as a trade association for major manufacturers of soy protein for food use.

1971 Aug. 15. Richard Nixon devalues the U.S. dollar by cutting its tie with gold. It starts to float, thus changing many of the basics of international trade.

1971. India's first soyfoods development project starts at G.B. Pant University.

1971 Feb. 22. Textured soy protein products authorized for use as meat extenders in National School Lunch Program.

1971 Sept. *Diet for a Small Planet*, by Frances Moore Lappé, published by Ballantine Books. A landmark book that plays a major role in the rise of interest in meatless diets.

1971 Sept. 3. Stephen Gaskin and several hundred friends and disciples purchase a 1700-acre farm at 156 Drakes Lane, Summertown, Lewis County, Tennessee. Vegans (complete vegetarians) and long-haired hippies, they first planted soybeans in the spring of 1972. In December 1971 Alexander Lyon, who has a PhD degree in biochemistry, begins the community's first serious library research on soyfoods, especially soymilk and tempeh.

1971 Aug. 23. Laurelbrook Foods begins operation as a macrobiotic natural foods distributor in Forest Hill, Maryland—founded by Rod and Margie Coates. They kept a post office box in nearby Bel Air.

1971 fall. Eden Foods in Ann Arbor, Michigan, begins distributing macrobiotic natural foods. In June 1971 they had begun wholesaling these foods out of the back of their retail store.

1971. Shadowfax begins operation as a natural food distributor, founded by Charlie Smail.

1971. This year the natural foods boom in America can be said to have begun, pioneered by macrobiotic food distributors. Soyfoods rode to popularity on this wave. Food for Life in Chicago (IL), Ceres in Colorado Springs, and

Lifestream in British Columbia (Canada) also started at about this time.

1971. *Soybeans as a Food Source*, by Wolf and Cowan published by CRC Press. It focuses on modern soy protein products, offering an excellent review of the literature (86 pages and 276 references). A revised edition is published in 1975 (101 p., 416 references).

1971. First modern study on the effect of dietary protein on blood lipids titled “Plasma cholesterol levels and liver cholesterol biosynthesis in rabbits fed commercial or semisynthetic diets with and without added fats and oils,” by Dr. K.K. Carroll (Dep. of Biochemistry, University of Ontario, Canada) published in *Atherosclerosis*. From 1977 on a group led by Sirtori in Milan, Italy, was actively pursuing this same line of research which showed that even in fat-free diets, animal proteins raise serum cholesterol and soy proteins lower it. As early as 1908 the Russian Ignatowski had shown that dietary protein plays a significant role in the development of atherosclerosis in rabbits, but his findings had been forgotten.

1971. African soybean production first tops 100,000 metric tons.

1971—Earl L. Butz replaces Clifford Hardin as U.S. Secretary of Agriculture, ushering in an era of free market agriculture which favors large producers.

662. Chico-San Inc. 1971. The new rice is in... (Ad). *East West Journal* 1(20):19.

• **Summary:** “... roasted rice, whole-grain rice, rice cakes, new rice chips, rice cream, rice flour, koko, yano, “yinnies,”... all brown... all Wehah.”

Note: The “yinnies” (an organic grain-based candy or sweetener) were made from koji. Address: 1262 Humboldt Ave., Chico, California 95926.

663. Chico-San Inc. 1971. Products: A catalog of macrobiotic foods. Chico, California. 8 p. Undated. 22 cm.

• **Summary:** The cover is with dark brown ink on golden yellow paper with a new complex circular spiral logo neat the top and three sheaves of grain across the bottom. The term OEI, applied to some products, means “Our Exclusive Import.” Address: Chico, California. Phone: (916) 343-6770.

664. Greenberg's Natural Foods. 1971. Largest selection of macrobiotic foods in the country (Ad). *East West Journal* 1(20):20.

• **Summary:** “Complete macrobiotic supermarket. Direct receivers: Lima [Belgium], Erewhon, Chico-San, Spiral, Infinity, Sun Circle Ranch. Organic grains, flours, beans, specialty foods, books, cooking utensils, fresh fruits and vegetables, whole grain baked goods, cosmetics and vitamins. Mail order catalog available.” Note: This company was run by Arnie Greenberg. Address: 125 1st Ave., New York, NY 10003. Phone: 212-254-3151.

665. Joyous Revival. 1971. Natural Foods (Ad). *East West Journal* 1(20):20.

• **Summary:** The company sells: Miso. Nuts. Seeds. Beans. Grains. Tamari. Fresh ground flours.

Note: Michael Potter, later head of Eden Foods, worked with this company in the early 1970s, until Dec. 1970. He was not a founder of the company, but he eventually rose to become a partner. Address: 1810 S. Woodward Ave., Birmingham, Michigan 48011. Phone: 313-644-9756.

666. Spiral Foods Inc. 1971. Price list of macrobiotic foods. Chico, California. 2 p. Undated. 35 x 25 cm.

• **Summary:** See next 2 pages. This single-sheet catalog and price list, printed front and back with reddish-orange ink on green paper, contains 8 panels and is undated. Yet it was sent by Chico-San in a portfolio of sell sheets with a cover letter dated 8 Dec. 1971—from which we can estimate the date. It is also with larger Spiral Foods catalogs issued after the disastrous 1972 fire that destroyed the company's plant. Under the name of each food is given a brief description. It includes the following foods:

Condiments: Tekka ("A traditional flavoring prepared from carrot, burdock, ginger, lotus root, Soybean Puree {Miso}, and sesame oil"), seitan ("A meat substitute made from vegetable protein of wheat gluten and tamari soy sauce"), salt plums, kuzu arrowroot, sesame salt, sesame butter, sesame oil (from organically grown seeds), Lima sesame oil (imported), crude sea salt ("Unrefined, unprocessed, trace sea minerals retained"), white unrefined sea salt, Mishio (Lima, with kombu), moromi ("Mash of soy sauce before pressing. A pungent flavor"), furikake ("A seasoning made from Miso, sesame seed, nori, bonito [sic, bonito] powder, whole brown rice and kombu" {kelp}), Goma Muso ("A seasoning prepared from traditional Miso and whole sesame seeds"), bainiku ekisu (concentrate of green [ume] plums), sesame seeds. Dried fish. Cosmetics. Beverages: Yano (grain beverage), Whole grain cereals. Whole grain noodles. Beans: Azuki red (Dainagon, or Korean), black [soy] beans. Sea vegetables. 100% whole grain brown rice. Sweet rice—mochi gome. Rice cakes. Lima soy sauce ("A traditional soy sauce of exceptional quality"), tamari ("The traditional soysauce, fermented naturally and aged 18 months. Prepared from soybean, wheat, salt and water"). Soybean puree (Miso) ("Made from the cultivation of a special enzyme and aged 18 months. The soybean puree is ideal mixed with sesame butter and used as a spread or can be added to soups and sauces"). Utensils.

Note 1. This is the earliest document seen (April 2011) concerning Spiral Foods, a company organized in 1970 by Bob Kennedy of Chico-San and Peter Milbury to distribute Chico-San products directly to retail stores in the greater San Francisco Bay Area. When Chico-San was established in 1962 there were no natural foods stores in the Bay Area (or

in the USA). However by 1970 there were many. They were not being well served by the old-line health food distributors such as K&L and Landstrom which distributed Chico-San's products, yet they wanted to buy Chico-San's products.

Note 2. This is the earliest English-language document seen (Dec. 2006) that uses the Japanese-language term "bainiku ekisu" (literally "plum flesh extract") to refer to a commercial extract of ume plums. Address: 1017 Willow Street, Chico, California 95926.

667. **Product Name:** Soybean Flakes (Macro Flakes; Micronized Soybean Flakes).

Manufacturer's Name: Arrowhead Mills, Inc.

Manufacturer's Address: P.O. Box 866, Hereford, TX 79045.

Date of Introduction: 1971.

Ingredients: Whole soybeans, flaked.

Wt/Vol., Packaging, Price: 1 lb or 25 lb.

How Stored: Shelf stable.

New Product—Documentation: M.W. Ford. et al. 1973.

The Deaf Smith Country Cookbook. p. 156, 324. The whole beans are quickly cooked (about 15 to 20 seconds) under dry radiant heat, then they are dropped into rollers and flattened into completely whole bean flakes. "Thus, all refining or possible leaching of nutrients is eliminated. The inventor of this procedure is Chardo Pierce of Lubbock, Texas. Although he originally developed the method to improve animal nutrition, it was obvious to Chardo that it could also improve human nutrition." Soybean flakes can be used to add taste, texture, protein, and other nutrients to breads, cakes, cookies, cereals, casseroles of every kind, dips, soups, sauces, and stews. Use them instead of or in addition to cracker or bread crumbs. "Oat flakes, rice flakes, rye flakes, triticale flakes, wheat flakes, soybean flakes, and pinto bean flakes are available now."

Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 2, 26. Bulk. "Soybean Flakes Deaf Smith Organic." 25 lb, or Arrowhead Mills, "Soy Flakes" 1 lb.

Arrowhead Mills. 1978. Sept. "Price list." (25 lb bulk and 12 x 1 lb packaged).

Letter from Boyd M. Foster of Arrowhead Mills, Inc., Hereford, Texas. 1979. May 8. Describes the company's "soybean flakes" or "soyflakes." They are only partially cooked and require some additional cooking to make them easier to chew.

He encloses an undated 1-page leaflet which has a large photo of a flaking mill across the top and which states: "For over a year now Arrowhead Mills has been producing Macro Flakes... Macro flaking is an exclusive process that is only done here in our plant. The equipment was designed and custom built under the supervision of Chardo Pierce of Lubbock, Texas."

"The steam-flake is the standard method in the industry.

PRICE LIST OF MACROBIOTIC FOODS

Macro (great), bio (life),
biotics (art or technique of rejuvenation)

People are becoming vitally concerned as they learn there are penalties for trying to adjust their environment—particularly their food, its kind and its production—to satisfy their egotistical desires. The disastrous effects of pesticides, preservatives, chemical fertilizers, artificial colorings, etc. are now well known, giving impetus to the demands for uncontaminated air, water and vegetation.

The principles governing the production of Macrobiotic foods were formulated thousands of years before modern commercialism began to process and strip foods of their vital energy giving qualities. Spiral Foods Inc. offers this list of foods fully confident that they are the most pure and natural that can be obtained.

MAKE CHECKS PAYABLE TO:

Spiral Foods, Inc.
 1017 Willow Street
 Chico, California 95926

All orders are subject to acceptance by the office at Chico, where payments are due.

Prices are subject to change without notice. Residents of California must add 5% sales tax on cosmetics and utensils.

All orders are F.O.B. Chico. Orders weighing less than 50 lbs. should be accompanied by a check including:

1. The cost of merchandise.
2. A 2% charge for handling.
3. The cost of shipping which is to be calculated from the Parcel Post rate table appearing on this list. Add approximately 20% in weight to allow for packaging material.
4. Fees for insurance which are charged as follows:

LIABILITY	
\$ 0.01 to \$ 15.00	\$.20
15.01 to 50.00	\$.30
50.01 to 100.00	\$.40
100.01 to 150.00	.50

PARCEL POST RATES

Zone	From Chico	Up to 2 lbs.	Each Add'l. lb.
Local	Local	\$.60	\$.025
1 and 2	Up to 150 miles	.65	.06
3	Up to 300 miles	.70	.075
4	Up to 600 miles	.75	.09
5	Up to 1000 miles	.80	.12
6	Up to 1400 miles	.90	.145
7	Up to 1800 miles	1.00	.195
8	Over 1800 miles	1.05	.23

To first class Post Office there is a 40 lb. limit up to 150 miles, a 30 lb. limit beyond 150 miles and a 70 lb. limit to Hawaii.

If two packages are necessary for your order, please include an insurance fee for each package.

If further information is needed, consult your postmaster.

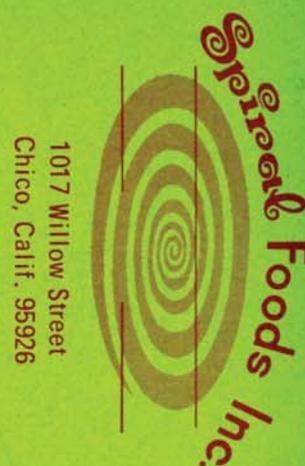

Where United Parcel Service is available, it will be used in preference to Parcel Post.

Spiral Foods, Inc. will return monies not used to pay actual shipping charges and insurance.

Orders exceeding 50 lbs. in weight should be accompanied by a check for the amount of merchandise purchased only. The shipping charges will be collected by the freight company upon delivery.

All items on this list have been endorsed by Mrs. Lima Ohsawa. Products that carry the name LIMA have been manufactured to meet her specific requirements.

**WE CANNOT ACCEPT ORDERS
 LESS THAN \$10.00 IN VALUE**

BUCKWHEAT CAKES or (Case Lots Sold Only)					
MILLET CAKES:					

This process is accomplished by subjecting the grain to steam at high temperatures, about 230° for up to 30 minutes. As you might guess, the use of steam results in a high degree of vitamin loss.

“The macro flakes process uses natural gas which heats ceramic elements. These elements radiate a dry heat that heats or cooks the whole grain or bean for a period of time only sufficient to convert it into a soft form suitable for the roller mill. After being heated [in part with infrared radiation] for approximately 30 seconds, not minutes, at a temperature between 170° and 240° the grain is immediately flaked. This method eliminates drying or parching and conserves the valuable vitamins.

“When the grain passes through the rolls, the seed coat is broken. The cellulose-like membrane encapsulating the starch granule is ruptured, making the starch easier to digest. Because of the dry-heat method the flakes have a longer shelf life. The brief cooking also destroys the anti-trypsin or rancidity enzyme in soybeans. As you may know, the enzyme present in raw-soybeans is known to be poisonous. It is for this reason that our soy flour is also ground from macro flaked soybeans.”

Talk with John Goodman of Arrowhead Mills. 1983. Dec. 20. To make the micronized soybean flakes in a micronizer / flaker, both natural gas burners and infrared heat are used. The infrared heat keeps the beans plastic so they make better flakes. Production started in about 1971. Today the flakes are sold in 1 lb and 15 lb bags. They use these in their Deaf Smith Crunch Granola. They make about 100,000 lb/year. Others use them in granolas, cereals, and as a filler in meat loaves and casseroles.

Arrowhead Mills. 1987. Catalog. 1 lb.

668. *East (The-Higashi)*. 1971. Information box. Vol. 7. p. 58. *

• **Summary:** “I am a reader of *The East* and thought you might know the answer to this question. I have become interested in the natural foods movement which calls for eating unpolished rice, etc.”

672. Photographs of Evan Root, Jim Ledbetter, and Ty Smith in Japan, 1971. 1971.

• **Summary:** This photo was taken in the summer of 1971. The color photo of Evan Root (left) and Jim Ledbetter was taken somewhere near Kyoto, Japan, in 1971 or 1972. The black and white photo is of Ty Smith.

Evan Root writes (29 Nov. 2010): “Yes, me and Jim Ledbetter in Japan, somewhere in or around Kyoto. Jim was over there for at least a couple of years, and, for a period of time, stayed with Alcan Yamaguchi and his family in Kyoto. As you may know, Jim was the editor of *The Order of the Universe*, a magazine that featured mainly edited transcripts of Michio Kushi’s lectures along with letters and useful contacts around the world. After Erewhon moved up the street half a block (about 390 feet) to 342 Newbury St., Tao Book Store occupied the space 303B Newbury St. with Jim as store keeper.

“I suppose Jim, like many of Michio’s students, was drawn to Japan to get direct knowledge of Japanese life and culture. During the time I was in Japan, quite a few students came over to live there for a while, staying from 6 months to 10 years. David and Cecil Levin, Gary Peacock, and Leonard Carmody were already there when Paul Hawken and I arrived. Arriving during my stay were, Peggy Taylor, Nahum and Beverly Stiskin, Matthew and Helen Sandler, Ty Smith, Bill and Beverly Gleason, Adel Wood, Anne Reigel, Jane Randolph, and a few others whose names escape me. Many more came after I left. I mention this as a way of demonstrating that going to Japan was a kind of pilgrimage, you might call it, for some of Michio’s serious students. A very specific reason for going or mission there was not needed. Spending time in the country that gave rise to the macrobiotic movement was reason enough. That said, some of these people accomplished very specific things, such as Bill Gleason became an Aikido teacher and Nahum wrote the book *The Looking Glass God* while there.”

As for Ty Smith: “I can’t speak for Ty, but I would say he was over there for the reasons pointed to above, mainly to get an experience of Japan. Ty and I were also close at that time. I originally met him at a lecture I gave on macrobiotics at Paul Hawken and Bill Tara’s warehouse (they lived in a warehouse when they were in the light show business together in San Francisco [California]). He took over my spot at Sanae when I left for Japan. and when I left Japan, he took over my spot at Muso Shokuhin. Later, in the mid-seventies, he was the president of Erewhon. I included his picture in case you wanted to have a picture of Erewhon’s president for that era, and couldn’t find one elsewhere.

Note: This photo was sent by Evan Root to Patricia Smith and by Patricia to Soyinfo Center (Nov. 2010).

673. Aihara, Cornelia. 1971. Macrobiotic child care.

Macroguide No. 8. 41 p. (George Ohsawa Macrobiotic Foundation, 1544 Oak St., Oroville, CA 95965).

• **Summary:** Contents: What is macrobiotic? About the author (autobiographical). Two pages of photos of the Ohsawa and Aihara families. Macrobiotic child care. First solid foods for baby. Prenatal and postnatal care. How to be a beautiful and loved wife. Recipes for baby's solid food. What is the Foundation? [GOMF].

Pages 35-41 contain "Recipes for baby's solid foods." These include: Mochi made with rice flour. Miso zoni (mochi in miso soup). Amasake (describes how to make amasake at home using either (A) 2 cups sweet brown rice, ¼ cup koji, and 4 cups water, or (B) 7 cups sweet brown rice flour, 1 cup koji, and 8 cups boiling water).

But where did Cornelia expect people to get koji?

Letter (e-mail) from Peter Milbury who worked for Chico-San for many years. 2012. July 18. "I arrived in Chico around that time, and there were two sources of koji. Junsei Yamazaki was making koji as part of the Yinnies Syrup process. Also, we imported it directly from our supplier in Japan. It was not a popular item at that time, so it was probably a special order from Japan."

Note: "Yinnies" was an organic grain-based chewy candy or sweet syrup, made for Chico-San Inc. Address: California.

674. Bunnelle, Hasse; Thomas, Winnie. 1971. Food for knapsackers: and other trail travelers. San Francisco: Sierra Club. 144 p. Illust. 16 cm. A Sierra Club Tote Book.

• **Summary:** Pages 21, 23: "An entire meal may be prepared with dry packaged mixes from supermarket shelves. In addition to popular soups from many countries, mixtures of various meats, soy protein, vegetable starch, and seasoning have been introduced."

Page 54: Another light-weight possibility for emergencies in MPF (Multi-Purpose Food).

A recipe for "Chicken soup plus" (p. 90) includes soy flour.

The section titled "Lunches and snacks" (p. 133-34) does mention the terms "trail lunch" and "trail snacks," but does not mention "trail mix."

675. Editors of Organic Gardening and Farming, and Prevention. comps. 1971. The organic directory. Emmaus, Pennsylvania: Rodale Press. 165 p. No index. 21 cm.

• **Summary:** The first 79 pages contain 16 chapters related to organic gardening and farming, each signed by the author, and many written by Robert Rodale. These are followed by four excellent, early directories, each subdivided alphabetically by state, and within state by city: Directory of organic food sources (p. 79-134; lists 1,606 sources). Ecology action groups (p. 135-53). Natural fertilizers, soil conditioners, mulches and mulching materials (p. 154-61). Organic gardening clubs of America. Soy is mentioned

throughout.

Note: This is the earliest document seen (March 2020) that contains a directory of organic food sources in the United States. Address: Emmaus, Pennsylvania 18049.

676. Max, Peter; Proust, Ronwen Vathsala. 1971. The Peter Max new age organic vegetarian cookbook. New York, NY: Pyramid Communications. 128 p. Color illust. Index. 14 x 21 cm.

• **Summary:** Peter Max (the first author) was born in 1939. Soy-related recipes include: Miso soup (with aduki beans, p. 39). Soya poppy-seed rolls (with soya flour, p. 87). To sprout seeds, berries and beans (incl. soybeans).

677. *SoyaScan Notes*. 1971. Chronology of Shadowfax, natural foods distributor of Binghamton, New York. 16 March 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1971–Shadowfax begins operation as a natural food distributor in Binghamton, New York. The company was founded by Charlie Smail. In 1974 the address is 25 N. Depot St., Binghamton, New York 13901.

More like Midwest Natural Foods, Shadowfax was not macrobiotic and didn't like the macros. Michel Abehsera was one of their advisors. Address: 25 N. Depot St., Binghamton, New York 13901.

678. Winter, Ruth. 1971. Beware of the food you eat. New York, NY: Crown Publishers Inc. viii + 248 p. Foreword by Senator Walter F. Mondale. Index. 22 cm. [400* ref]

• **Summary:** The revised, updated edition of *Poisons in Your Food*. Address: M.S., Health and science writer, Short Hills, New Jersey.

679. **Product Name:** Tamari Soy Sauce.

Manufacturer's Name: Chico-San Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1971?

Ingredients: Water, soybeans, wheat, salt.

Wt/Vol., Packaging, Price: Glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Label (reddish brown, beige, and yellow). Sent by Lorenz Schaller.

680. **Product Name:** Chinese Rolls (With Tofu).

Manufacturer's Name: Health Valley (Marketer-Distributor). Made and developed by ChuChu Foods.

Manufacturer's Address: Los Angeles, CA 90021.

Date of Introduction: 1971?

New Product–Documentation: Talk with George Mateljan, founder of Health Valley. 1985. Oct. 20. His company was founded in 1970. One of his first products was Chinese

Rolls, which contained tofu instead of fish. These were made for him by ChuChu Foods, a Chinese food company that developed the product for him.

Note: This is the earliest record seen (March 2020) concerning Health Valley and soy.

681. *Sun (Baltimore, Maryland)*. 1972. Natural foods group to meet. Jan. 16. p. C3.

• **Summary:** Maryland Natural Food Associates will hold its first meeting on January 28 at 7:30 P.M. at Norbet Farm, Cockeys Mill road, Reisterstown, northwest of Baltimore, Maryland. For further information call 833-1233. The film "Action for Survival" will be shown.

"Natural Food Associates is devoted to preserving the soil, water and health and has members in all 50 states." The group advocates food grown without man-made chemical sprays or fertilizers.

682. Chico-San Inc. 1972. Chico-San Inc. products: A catalog of unique foods. P.O. Box 1004, Chico, CA 95926. 24 p. Revised Jan. 1972.

• **Summary:** The cover of this catalog is printed with dark brown ink on pea-green paper. A complex, circular orange-red spiral is above the title. Three sheaves of grain are across the bottom. Soyfoods imported from Japan include Lima Soy Sauce, Soybean Puree (Miso), and dehydrated miso. They also sell black [soy] beans.

Contents: Rice cakes is our bag. "How Chico-San guarantees Oriental-type, organically-grown brown rice." Wehah Farms is mentioned often in this article. Whole grains and flours. Cereals. Whole grain noodles. Beans. Specialties (incl. Yinnies / Ame). Seeds. Condiments. Sea vegetables. Dried foods. Beverages. Cosmetics. Dentifrice. Utensils. Recipes.

"Chico-San products have gained increasing acceptance throughout the country since their introduction in 1960." The booklet contains 11 pages of recipes (p. 13-23) including: Miso-sesame spread. Miso soup (p. 20). Address: P.O. Box 1004, Chico, California 95926.

683. *SoyaScan Notes*. 1972. Chronology of Janus Natural Foods, macrobiotic and natural foods distributor in Seattle, Washington. And of Granum. 17 March. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1972 Jan.–Janus Foods Inc. is established at 712 Seventh Ave. South in Seattle, Washington, by George Gearhart and Blake Rankin, formerly of Spiral Foods. Some background: In 1969, while a student at UCLA, Rankin came in contact with Erewhon, Los Angeles. After graduation from UCLA he and several friends set up a small health food store in Victoria, BC, Canada. Then he spent 3 months in Boston, Massachusetts, living in a Kushi study house and working in an Erewhon warehouse. Back in Seattle, he worked at Spiral Foods, a wholesale operation that was

an offshoot of Chico-San. Spiral Foods owned the O-Soba Noodle Nook in Seattle. Shortly after that he and George Gearhart, the proprietor, closed Spiral Foods and in Jan. 1972 opened Janus Foods as a macrobiotic and natural foods wholesale and distribution company. Tim Hartman was third of the original incorporators; all three men managed the company. It was successful. From opening day, Janus sold miso and shoyu, imported from Japan; they were among the company's best-selling products. Janus never owned a natural foods retail store or restaurant, and never sold foods retail from their warehouse.

1972 Sept.–Rankin leaves Seattle on a trip to Japan via Hawaii. He leaves Hawaii for Japan in March 1973. Erewhon had given Janus permission to buy natural foods (bearing the Erewhon label) directly from Japan, so in the spring of 1973 Rankin traveled and worked with Muso and Mitoku to set up the first shipments to Janus in Seattle. Janus probably never paid any royalties or fees directly to Erewhon. He leaves Japan in Sept. 1973. Then he goes to Nepal and India on a spiritual search. In late 1973 he returns to Seattle and works for Janus.

1973–Two directories show that "Janus Foods Inc." is still located at 712 7th Ave. South, Seattle, Washington 98104. They now sell tamari and miso and distribute products from Erewhon, Spiral Foods, Deaf Smith, Pure & Simple, Chico-San, and Arrowhead Mills.

1974 March 8–Janus (Gearhart, Rankin, and Hartman) hosts the meeting of the Natural Food Distributors in Seattle; 16 people representing 12 companies attended.

1974 July 19. By this date, Janus Natural Foods, Inc. is located at 1523 Airport Way South, Seattle, WA 98134. Tim Hartman is still a manager of the company and Rankin is present. The company now sells barley koji. The company now has a lovely sprout-like logo (designed by Frederick Walsh) and a new brand called "Verity," whose labels were also designed by Walsh. Soy sauce and misos were sold under the Verity label for a while starting before Sept. 1976.

1975–The three managers decide to rotate the presidency of Janus annually. Rankin became president and Hartman left the company before his turn came around. During 1974 and 1975 Rankin and Gearhart were working on miso production.

1976 Sept.–Rankin leaves Janus and returns to Japan where he works for Mitoku and studies calligraphy. A few days after his arrival in Japan he meets his future wife, Yoko. They later had two children, but separated in 1988 and eventually were divorced.

1977–Janus leaves its large warehouse on Airport Way.

1979 Month? (before summer) Janus goes out of business, under the management of George Gearhart.

1981–Rankin returns to Seattle and in January or February starts Granum (pronounced GRAH-num, not GRAY-num) as a distributor and importer for Mitoku macrobiotic food products from Japan. The Granum logo

is designed by Frederick Walsh. As of 1985 Granum has a small retail store and a 10,000 square foot warehouse, both at 2901 N.E. Blakeley St., Seattle, Washington 98105. Expected 1985 gross is more than \$500,000.

As of March 1992 Granum has more than doubled its business compared with 1985. Blake has remarried to Nancy and they have a 2-year-old son, Addison. George Gearhart now lives in the suburbs to the south of Seattle. He is a sales manager, but no longer works in the natural foods industry. Address: 712 7th Ave. South, Seattle, Washington 98104.

684. Mengenhauser, Jane. 1972. Lightweight foods to send to POWs. *Washington Post, Times Herald*. Feb. 10. p. D1, D6.

• **Summary:** The Vietnam war is still being fought, although it is winding down. Many American prisoners of war are being held in Vietnam. Apparently their families, friends, and others are allowed to send them food—with the hope that it will reach them. Many lightweight and freeze-dried foods are discussed, with focus on those that are rich in nutrients. “Health food stores” also have wide variety of suitable foods.

“Kennedy’s Natural Foods Stores has a tremendous selection of high-protein foods. Among them are Super Snack, a 6-ounce bag containing raisins, sunflower seeds, figs, sesame seeds, cashews, almonds, pepitas, dates and apricots; and packages of roasted soy beans, 1 ounce for 19 cents, 38 per cent protein,” plus numerous vitamins and minerals.

685. Jacobs, Sanford J. 1972. What tastes terrible and doubles in sales every 60 days or so? Crunchy Granola, that’s what, and Layton Gentry is ready to sell the formula to you. *Wall Street Journal*. Feb. 16. p. 1.

• **Summary:** A great, original, funny front-page story on the modern origin and early modern history of granola. Collegedale, Tennessee: John D. Goodbrad, age 28, runs a small cereal factory in Collegedale; he makes Crunchy Granola, but neither he nor his employees are particularly fond of the stuff. He prefers Cheerios. An employee says that her kids don’t like it much either, but she recalls that she once had a horse who really liked it.

Crunchy Granola is made of rolled oats, wheat germ, sea salt, sesame seeds, coconut, brown sugar, and soy oil. These are mixed and baked. “Crunchy Granola is the biggest thing to hit the cereal market since the cardboard box was invented.” Goodbrad says his sales have been doubling every 60-90 days for the last 2½ years. He now makes 12,000 lb per day of Granola, which sells for 73 cents a pound, and runs his factory 24 hours a day. Another company, Lassen Foods, Inc., in Chico, California, is said to make even more; last year they sold \$3 million worth of Granola. Total nationwide sales are estimated to be about \$5 million. He says his family started the business, Sovex, Inc., in this idyllic valley in 1964.

Why are people eating so much Granola? No one sure.

One theory: It is part of the anticommercialism movement of the younger generation. Another: It’s a health food, making it part of the “back-to-nature” movement. But the main reason may be that many younger folks really like it—especially with milk poured over as a breakfast cereal.

Although it is clearly a fabled food in the underground, and sold mostly at health-food stores, some supermarkets are beginning to stock it. Rock singer Neil Diamond even has a popular song titled “Crunchy Granola Suite.” The words are given.

While Crunchy Granola appears to have a bright future, it also has an interesting past. It seems to have been invented by a man named Layton Gentry who, in 1964, sold his recipe and oven to John Goodbrad’s father for \$3,000. He and his wife started making it at home, then built a little factory, and now it is made in a big factory—in the idyllic little valley.

After Layton Gentry left Tennessee he headed out West. In about 1968 (four years ago) he sold the recipe again—to Lassen Foods, but this time for at least \$15,000. Not until the two Granola makers bumped into each other at a health food convention 2 years ago did they realize that they were both making the same product. No problem—both were doing just fine.

Mrs. Gentry says that Layton is a hard man to find. She says they separated after the move West, and her ex-husband had made some more money selling the recipe to folks in Hawaii, Canada, Australia, and Missouri.

But didn’t he miss a golden opportunity to make more money? Not really. Mrs. Gentry explains that Layton never liked things to get too big. “He was in the Army 12 years. You know what that does to a man.”

Note 1. This is the earliest document seen (Aug. 2010) that tells the tale of Layton Gentry and the birth of Granola—in its modern incarnation.

Note 2. According to the Website www.ancestry.com, a person named “Layton S. Gentry” was born on 18 April 1918 in New Pine Creek, Lake County, Oregon. His parents were John Urban Gentry and Mildred G. Gentry. He was married in 1942. He died on 11 Feb. 2007 in New Pine Creek, Oregon. A 1989 obituary for his wife states: “Gentry: Myrtle Frona Gentry, 70, died July 1, 1989, at Lakeview Hospital in Oregon. She was born in Rosedale, daughter of the late William Preston & Lula (Davis) Franz. Surviving are her husband, Layton Gentry; 1 daughter, Karen Angelo of New Pine Creek; 1 grandchild; and 2 sisters, Vivian St. Clair of Molalla, Oregon, and Beulah Mawhinney of Bend, Oregon. 1 sister, Prudence Beilsmith, preceded her in death. Services were conducted at Pine Creek Baptist church, Oregon. Burial was in New Pine Creek cemetery.” Address: Staff reporter, Wall Street Journal.

686. United Press International. 1972. Organic foods demand may aid small farmers. *Hartford Courant (Connecticut)*. Feb. 20. p. 44.

• **Summary:** “New York–Skyrocketing demands for organic foods may help accomplish what farm organizations have been trying to do for years—they may keep more small farmers in business.” *Farm Journal* recently expressed this view of the hottest subject in food marketing. Organic farmers may get as much as 20% above market price for their crops.

The National Nutritional Foods Association reports about 250 food manufacturers and distributors “are handling organics, and about 2,000 retail stores sell such foods exclusively.”

The big success of organic foods has led to one big problem, according to Robert Rodale, editor of *Organic Gardening and Farming* magazine: Organic phonies.

687. Rodale, Robert. 1972. The greatest bean of them all. *Prevention (Emmaus, Pennsylvania)*. Feb. p. 25-30. [2 ref]

• **Summary:** That bean is the soybean. “Make 1972 a memorable year for good health and good eating.” Make it your goal to put some great soybeans on your table before Christmas. Not any old soybeans, but “edible soybeans” as opposed to the regular kind. Yet stores that sell soybeans rarely tell you which type or named variety they are selling.

“I recently had one of those euphoric soybean experiences, and it was with a variety called Kanrich, which we grew in our garden last summer at the Organic Gardening Experimental Farm.” He first realized they had a special variety when he and his wife enjoyed the Kanrich soybeans as tender green soybeans. The “taste was out of sight.”

You can buy Kanrich variety soybean seeds to plant in your garden from Burpee Seed Co., Philadelphia, Pennsylvania 19132, and from Schell’s Seed House, 10th and Market Streets, Harrisburg, Pennsylvania 17105.

The writer then discusses problems with meat. “So if you are truly interested in getting the best of nutrition and food safety for your family, you will want to try to eat less meat.” Rely instead on sources of plant protein, such as the soybean. Learn to combine these foods to improve protein quality. Beans and rice together are a great protein combination—long a staple of Latin American cooking. Use the book *Diet for a Small Planet*, by Frances Moore Lappe to learn how to combine plant proteins to achieve high protein values and good taste. Address: Emmaus, Pennsylvania.

688. Sokolov, Raymond A. 1972. A maverick farmer who finds gold in natural food products. *New York Times*. March 2. p. 46.

• **Summary:** About Frank Ford who grows wheat on 1,800 acres in Deaf Smith County, Texas. But Ford is a maverick, who farms organically, without sprays or synthetically fertilizers. His company is Arrowhead Mills and his brand, Deaf Smith, have become household words among those who buy natural foods.

Deaf Smith County was named after Erastus (“Deaf”)

Smith, a hero of Texas’s war for independence from Mexico. Reputed to have the richest soil in the USA, it is situated on a vast plain about 4,000 feet above sea level.

Contains two recipes. Ingredients in Rebecca Kirby’s soybean chili include 1 cup soybeans and “Tamari soy sauce.” A photo shows Frank Ford.

689. Alexander, George. 1972. Brown rice as a way of life. *New York Times*. March 12. p. 87, 90, 92, 94, 98, 100, 102, 104. Sunday magazine. [3 ref]

• **Summary:** The *New York Times Magazine* is part of the Sunday New York Times and may be simply listed as such. Discusses: Richard Nixon’s declining health; he is sanpaku. Yin, yang, and the Zen Macrobiotic Diet, which has “something more than 10,000 adherents across the U.S., most of them living in macrobiotic communities—particularly in New York City, Boston [Massachusetts], San Francisco [California], Seattle [Washington] and Los Angeles. David C. Prentice and the Tao Bookstore in Boston. George Ohsawa. Bruce Gardiner, “the gaunt editor of Order of the Universe, a macrobiotic monthly magazine.” Comments by Huston Smith, a professor of philosophy at MIT, and by Philip Kapleau, spiritual director of the Zen Meditation Center in Rochester, New York. The 1965 death by starvation of Beth Ann Simon, a young woman following a Zen macrobiotic diet in Clifton, New Jersey. Diet No. 7. Abstinence from marijuana. Attitudes toward sex. Herman Aihara. Vitamin B-12. Dr. Gerald Hass, a Boston pediatrician, who has examined many macrobiotic children and generally found them to be healthy though small in height and weight. Concerns of other pediatricians, incl. Dr. Cyril Ramer of San Francisco—who says that for children the macrobiotic diet is very inadequate in protein, vitamins, and iron.

Photos show: Richard Nixon’s face. Gerald Hass. Japanese foods being sold at the Erewhon store in Boston. Address: Science editor of *Newsweek*.

690. Kingsberry, Emily. 1972. Bragg, now 90, jogs, swims, uses barbells, plays tennis. *Los Angeles Times*. March 19. p. O1. Sunday magazine. Health Foods Advertising Supplement.

• **Summary:** The writer was told that Paul C. Bragg is age 90, lives in Honolulu most of the time, jogs 1-2 miles and swims ½ mile each day, does calisthenics, works out with barbells 3 times a week, and sometimes plays tennis. Last time she was in Hawaii, she showed up at 6 o’clock one morning on Waikiki Beach to see him.

There he was “with 20 followers, jogging and doing exercises.” She was urged to join in. She spent the next 3 hours witnessing what she had heard about this “amazing man.” She was in pretty good physical condition but she had a hard time keeping up with Bragg. He invited some of the people to come back to his apartment for a breakfast of Hawaiian fruit and acidophilus milk. They talked for several

hours.

She told him that when he was age 16 he had developed tuberculosis and was in a sanitarium. A Swiss nurse had told him about Dr. August Rollier of Switzerland who had healed TB patients through natural foods and exercise. Bragg visited Dr. Rollier and in two years he was free of his TB. "As a result young Bragg decided to make nutrition and natural healing his life's work and began the study of those subjects and biochemistry at European centers. His own health improved and his body became strong."

He said that he returned to the USA and in New York met Bernarr Macfadden, publisher of *Physical Culture* magazine; young Bragg became editor of the magazine. Bragg then helped Macfadden establish his health spa in Danville, New York, the Deauville Club in Miami Beach, Florida, and the Penny Kitchens in New York, Philadelphia (Pennsylvania), Chicago (Illinois), and Los Angeles (California). These kitchens dispensed wholesome meals for 1 cent each to the unemployed during the Depression. "Macfadden and Bragg were interested in organically grown foods and the magazine published many articles on the subject. Later [by Sept. 1921] Bragg came to California to study organic gardening with Luther Burbank and to become one of the early settlers in what is now the city of Burbank."

Nearly 50 years ago, Bragg also "opened a naturopathic clinic near 6th and Hill" streets [actually, at 1000 West Seventh Street] in Los Angeles. "In those days there was no place to buy natural foods so Bragg installed a machine to grind whole wheat and other grains," and he stocked many natural foods such as sun-dried fruits. "Out of this grew 'Bragg's Health Food Store' next door to the clinic.

"After this Bragg began to lecture on health foods and physical fitness all across the nation and as a few others did the same, the health food movement began to catch on. Now it has major proportions."

"Bragg claims he was born in Virginia in 1881 and that his grandfather was Confederate Gen. Braxton Bragg. He believes he will live to be 120."

Note: Paul Bragg was born on 6 Feb. 1895. Therefore on the day this article was published he was age 77 years, 1 month, and 13 days—not age 90. He died on 7 Dec. 1976 in Florida shortly before reaching age 82. In 1929 in one of his first two books, he revealed details about his early life. However he never mentioned Dr. August Rollier, or Bernarr Macfadden, or Luther Burbank. Paul Bragg moved to California in about 1921 and lived in Burbank starting in about 1935.

691. *Los Angeles Times*. 1972. 3 market chains face \$40 million 'organic' food suit. March 21. p. C1 or D1.

• **Summary:** "A class-action suit demanding damages in excess of \$40 million was filed against three Los Angeles supermarket chains Monday, charging that they sold common foods at premium prices merely by labeling them 'organic.'"

The three defendants were Safeway Stores, Inc., Boys Market, Inc., and Market Basket Stores.

The three defendants were supplied by five other firms named in the suit: H & M Fugishige, Max Kozak Produce, Inc. [Max Kozek], L & A Juice Co., West Valley Produce Co. and the Healthians, a firm also doing business as De-Soussa's. These last five with the claim the foods they sold were "organic" or "organically grown."

The suit was filed by attorney David L. Caplan on behalf of one Vernon H. Kenricks and 3,000 John Does.

692. Hanes, Phyllis. 1972. Whole-grain cooking keeps natural quality. *Christian Science Monitor*. March 30. p. 10.
• **Summary:** In natural-foods stores once can find many new grains and seeds labeled alfalfa, millet, bulgur, flaxseed, brown rice, etc. What is new is using the whole grain; they haven't been refined or bleached. Of these, brown rice is the best known. They can be cooked and served pretty much like their more familiar counterparts, according to a new book, *The Wonderful World of Natural-Food Cookery*, by Eleanor Leavitt. He says that good things to add to cereals include "wheat germ, sesame seeds, dates, sunflower seeds, pumpkin seeds, roasted soy beans or brewer's yeast."

Recipes are given for: Swiss-style cereal (uncooked). Granola-type cereal. Basic gorp (a mixture of dried fruits, seeds, and nuts—including peanuts). Gourmet gorp. Nutty gorp (including sunflower seeds and peanuts). Address: Staff writer.

693. Aihara, Cornelia. ed. 1972. *The dō of cooking* (Ryorido). Vol. 1. Macroguide No. 13. San Francisco, California: George Ohsawa Macrobiotic Foundation. 109 p. Illust. No index. March. 25 cm.

• **Summary:** All recipes in this macrobiotic cookbook are numbered. Contains information on soy sauce and miso (p. 44-45). Soy-related recipes include: "Top of stove" casserole noodle soup (with "dry tofu" [dried-frozen tofu] and fried wheat gluten, p. 58). Fried whole wheat noodles (with seitan, p. 60). Homemade noodles with soup (and barley miso, p. 61). Onion miso (p. 62). Rolled cabbage with tofu (p. 63). Wheat gluten (p. 71, made from 10 cups whole wheat flour and 4 cups unbleached flour). Seitan (p. 72). Fresh wheat fu (2 versions). Serving recipes—boiled fu (p. 73). Fried fu—gluten cutlet. Shish kebab (with cooked fu, p. 73-74). Making tofu (at home using 3 cups soybeans and nigari, p. 75-76). Making nigari (p. 76). Quantity tofu preparation (using 10 lb soybeans). Okara or unohana (sauteed with soybeans and vegetables, p. 76). Tofu with kuzu sauce (p. 78). Fried tofu. Shinano-age (Fried tofu with buckwheat, p. 79). Kaminari Tofu (Thunder Tofu, p. 79). Nori-maki (Tofu rolled in nori, p. 80). Age-tofu (stuffed tofu, variation, p. 80-81). Miso salad dressing (p. 90). Bean sprout miso salad (p. 91; it is not clear what kinds of beans the bean sprouts are made from—probably mung beans). Gamodoki ([Ganmodoki])

mock goose; p. 99-100).

Note 1. This is the earliest (and only) English-language document seen (April 2013) that contains the word *gamodoki* or the term “mock goose,” both of which refer to deep-fried tofu burgers.

French bread made with gluten water (p. 104). Amazake is not mentioned. Some recipes call for chicken or fish as ingredients.

Note 2. This is the earliest cookbook seen (July 2005) that gives a recipe for making seitan, as follows: “1 T. [tablespoon] dark sesame oil. 1 T. minced gingerroot. 1-2 cups soy sauce. 5 cups cold cooked gluten. Heat oil in a sauce pan, add minced ginger (use only fresh ginger) and saute. The amount of soy sauce used depends upon how long you intend to store the Seitan. Use a larger amount of soy sauce for longer storing and refrigerating. Add soy sauce, bring to a boil, and drop in pieces of gluten. Cook on low heat for three hours, stirring frequently. Remove cover and continue cooking until excess liquid is absorbed and evaporated. Seitan is ideal as a seasoning in noodles au gratin, stews, cooked with vegetables, etc. It will keep for long periods of time in the refrigerator.”

After Volume 2 of this series of four seasonal cookbooks was issued, Volume 1 was subtitled “Spring Cooking.” Address: San Francisco, California.

694. Wiener, Joan. 1972. New food freaks. *Seventeen*. March. p. 134, 156, 158.

• **Summary:** This entire issue is about California. When the writer first came to California in 1967, it blew her mind. It was everything she had wanted back east but couldn't get. Lots of sunshine, great vistas, abundant organic food, bags of brown rice, refrigerators packed with honey ice cream and goat's milk yogurt, crates of California fruits and vegetables “untouched by man-made chemicals. It was food-freak heaven!... Since then the natural food scene has exploded. There are longhair-owned restaurants and stores with names like “The Radiant Radish” (in Los Angeles), “Wholly Foods” (Berkeley), “The Good Earth” (Fairfax), and “Agape Natural Foods” (San Francisco). Hundreds of young people are going back to the land and to farming. Thousands more are buying organic foods at natural food stores. New Age Natural Foods is a huge, magnificent, almost unbelievable natural foods supermarket on California Street in Palo Alto—featuring pretty, healthy young salespeople, a huge produce section, a take-out deli (she watched as someone made meatless sesame burgers with chickpeas and miso), fresh pressed juices and information—such as free pamphlets on recycled paper with titles like “The Sugar Story,” “The Oil Story,” “The ‘Not’ List.” The manager, Randy Fishel, age 25, has been in business for 6 years. Randy says that when Fred Rohe opened New Age [in San Francisco] in 1969, the customers were mostly hip long-hairs. Today, 35% of the customers are the wives of doctors and lawyers. Also in 1969 Fred

Rohe and Randy created Organic Merchants (OM), the only trade association for natural food stores; today there are 110 members—“mostly freaky little stores run by young people.” OM is very concerned with quality control.

Photos show: (1) Jim Baker and Robin Baker, owners of The Source restaurant, seated at a table under an awning. (2) Warren Stagg at his restaurant, H.E.L.P. Unlimited. (3) Customers weighing their purchases at New Age supermarket. Address: San Francisco.

695. Warren, Virginia Lee. 1972. Organic foods: Spotting the real thing can be tricky. *New York Times*. April 9. p. 72. *

• **Summary:** Rodale Press, Inc. (Emmaus, Pennsylvania) is now offering a seal for organically grown food—that meets the company's strict definition and standards—to farmers who apply for it. Rodale started about a year ago and there are now about 85 farms, most of them in the Western USA, which are in the process of being certified. Also discusses: Paul H. Keene and Walnut Acres, Frank Ford and Arrowhead Mills (Hereford, Texas), and Chico-San (Chico, California).

696. Nichols, Joe D.; Presley, James. 1972. “Please, doctor, do something!”: a modern physician looks at health and nutrition. Old Greenwich, Connecticut: Devin-Adair. iv + 197 p. Index. 24 cm.

• **Summary:** The Introduction (by Jonathan Forman, M.D.) begins: “This autobiography of Dr. Joe D. Nichols will help many individuals to attain and maintain optimal health. It comes at a most opportune time.”

Nichols says: “My heart disease and my 1,000-acre east Texas farm are both inextricably intertwined in my life. The resurrection of my poor, worn-out soil is intimately related to my own escape from coronary disaster.”

Joe D. Nichols was born in 1909 and grew up in Parkdale, Arkansas. He graduated from the University of Arkansas Medical School. Since 1933 he has been practicing medicine in Atlanta, Texas. He has practiced medicine there in partnership with his brother, owns and operates the only hospital in the area. He is a chronic workaholic.

On 23 May 1946 he had a terrible heart attack. “It was the most terrific pain I had ever felt in my life.” He was only 37 years old.

The copyright page states: 1st printing, 8,500 copies, April 1972. 2nd printing, 10,000 copies, Jan. 1973. 3rd printing, 10,000 copies, July 1973. Also published in 1972 by Natural Foods Associates (Atlanta, Texas, 185 p.). Address: President, Natural Food Associates, Atlanta, Texas.

697. White, Hilda. 1972. The organic foods movement. What it is and what the food industry should do about it. *Food Technology* 26(4):29-33. April. [6 ref]

• **Summary:** Contents: Food habits and dietary practices are changing. Nutrition concerns are changing. Defining organic foods. Proponents claim benefits. Organic a misnomer.

Using agricultural chemicals. Distrusting food additives. Comparing nutrition & taste. Movement is growing. Regulating organic foods. What [mainstream food] industry should not do (don't jump on the bandwagon). What industry should do (assume an even more active role in consumer education). Address: Assoc. Prof., Home Economics, Northwestern Univ., Evanston, Illinois 60201.

698. Oettinger, Louise. 1972. Adelle Davis vs. the scientists. *Washington Post*. May 4. p. D3.

• **Summary:** In Washington, DC, last week nutrition crusader Adelle Davis faced some tough questions from scientists and “promised to ‘watch very carefully from now on’ what she said about vitamins A, D, and E.” She was challenged by: (1) Dr. Ogden Johnson, head, Division of Nutrition, Food and Drug Administration. (2) Dr. Allan Forbes, deputy director of the same organization; he asked her why she recommended doses of vitamin A and D that are known to be toxic in some people.

At the luncheon, organizer by Robert B. Choate (who had challenged the nutritional claims made by breakfast cereal manufacturers) introduced Mrs. Davis by saying she had done a “fantastic job of alerting the public to nutrition,” but at the same time she was “stirring up questions in the academic community.” Includes other questions to and numerous statements by Adelle Davis. For example: (1) “I get myself identified with the health food industry far more than I like... its tragic the junk a lot of them sell, the misstatements they make. On the other hand, I don't know any other place you can get many things you need. If physicians knew more about nutrition, there wouldn't be any health outfits.”

(2) “The problem with organic food is, there's so much more sold than grown.”

(3) “I feel very strongly that most of our social problems, including crime and drugs, are caused by poor nutrition.” A large photo shows Adelle Davis.

699. Berthelsen, John. 1972. Many organic foods are not. *Modesto Bee (California)*. May 28. p. A-1, A-7.

• **Summary:** In recent years, the popularity of organic food has risen spectacularly. But there is a tendency for unscrupulous merchants and growers to cash in on lucrative new markets—especially if they are unregulated. Many people define organic foods as those which are grown without the use of chemical fertilizers or pesticides, and contain no additives. But an “organic” label does not mean that the product inside is organic.

According to Chico-San, a major Northern California company, half of the so-called “organic” brown rice on the East Coast of the United States is not organic at all. “It is bought on the open market from nonorganic farmers and fraudulently labeled.”

Sylvia Porter, a syndicated financial columnist, estimates

that 90 per cent of the so-called “organic” apple juice in California is not.

Nationwide, an estimated 30% of all foods marketed in the United States as organic may not be organic at all. Address: McClatchy Newspapers Service.

700. Beal, V.A. 1972. Food faddism and organic and natural foods. Lecture presented at National Dairy Council Food Writers' Conference, Newport, Rhode Island, May 1972. *
• **Summary:** The author discusses 8 different types of “food faddists” and the patterning of self-needs their feeding practices serve. 1. Miracle-seeker. 2. Anti-establishment. 3. Super health-seeker. 4. Distruster of medical profession. 5. Fashion follower. 6. Authority-seeker. 7. Truth-seeker. 8. One concerned about uncertainties of living.

701. Farmilant, Eunice. 1972. *Macrobiotic cooking*. New York, NY: New American Library. 224 p. Foreword by Herman Aihara. May. Index. 18 cm. [31 ref]

• **Summary:** This pocketbook has a color (beige) photo on the cover of ears of wheat, one wooden spoon filled with soybeans and one filled with unpolished rice. It is “A basic introductory guide to cooking and eating the macrobiotic way.” The author's interest in macrobiotics began in April 1968. Basic information on soyfoods (especially miso, tamari, and tofu) is given on pages 29, 33-38, 213-14. Soy-related recipes include: Wheat berries and black beans (i.e. black soybeans, p. 78). Sprouts (incl. soy sprouts, p. 82-83). Miso pickles (p. 124-25). Miso soup (p. 128-29). Cream of miso soup (p. 135). Black beans and wheat berries (p. 139).

There is an entire chapter on miso and tofu (p. 142-46) including: What makes miso so beneficial? Barley miso (nutritional analysis). Miso-vegetable stew. Miso-rice. Miso stew with vegetables. Miso-vegetable spoon bread. Homemade tofu (curded with fresh lemon juice).

Pizza—Macrobiotic style (with miso, p. 149). Chop suey (with tofu and miso, p. 151-52). Miso bechamel sauce (p. 159). Miso gravy. Simple tahini and tamari sauces (p. 160). Tempura dip (with tamari). Simple miso spreads (p. 161). Miso-vegetable spread. Miso-watercress spread.

There is a directory of macrobiotic stores and restaurants in the U.S. (p. 191-203, subdivided alphabetically by state, and within each state alphabetically by city). The following states have the following number of stores and restaurants: Alaska 1, Arizona 4, Arkansas 1, California 32, Colorado 4, Connecticut 18, District of Columbia 3, Florida 14, Georgia 7, Hawaii 2, Illinois 7, Indiana 2, Iowa 5, Louisiana 4, Maine 14, Maryland 7, Massachusetts 51, Michigan 12, Minnesota 3, Mississippi 2, Missouri 3, Nevada 1, New Hampshire 20, New Jersey 9, New Mexico 3, New York 61, North Carolina 5, Ohio 14, Oklahoma 3, Oregon 2, Pennsylvania 8, Rhode Island 5, South Carolina 1, Texas 4, Utah 1, Vermont 26, Virginia 4, Washington 3, Wisconsin 2.

There is also a directory of stores, restaurants, and

centers outside the U.S. (p. 204-07, subdivided by country). The following countries have the following number of stores, restaurants, or centers: Australia 1, Belgium 2, Brazil 2, Canada 15, Denmark 4, France 29, Germany 1, Holland (Netherlands) 2, India 1, Italy 1, Japan 3, Portugal 1, Puerto Rico 1, Spain 1, Sweden 1, Switzerland 2, United Kingdom: England 13, Scotland 1, Vietnam 2.

A list of wholesale distributors in the U.S. (p. 208-09) includes Shiloh Farms (Route 59, Sulfur Springs, Arkansas; [Warren Clough]), Erewhon Trading Co. (8003 W. Beverly Blvd., Los Angeles, California 90048), Chico San Foods (1262 Humboldt Ave., Chico, California 95926), Erewhon Trading Co. (33 Farnsworth St., Boston, Massachusetts 02210), Deer Valley Farms (Guilford, New York 13780), Infinity Food Co. (171 Duane, New York, NY 10013), Mottel Foods (451 Washington, New York, NY 10013), Juniper Farms (Box 100, Sugar Loaf, NY 10981), Pioneer Specialty Foods (Fargo, North Dakota 58100), Merit Food Co. (Pill Hill Lane, Box 177, Bally, Pennsylvania 19503), Essene (58th & Grays Ave., Philadelphia, PA 19143).

Note: This is the earliest document seen (March 2020) that contains a directory of macrobiotic food stores in the United States and worldwide.

702. LaBel, Murray; Izakowitz, Benjamin. 1972. Notice: Non-responsibility. Los Angeles, California. 1 p. July 21. Unpublished typescript. 34 cm.

• **Summary:** Erewhon Trading Co. Inc. is making building improvements and alterations on a store at 8001-8003 Beverly Blvd., Los Angeles. The are “remodeling for the purpose of installing an air conditioning and heating system, with carpentry, electrical work, plumbing, etc.”

Note: LaBel and Izkatowitz own this store and are leasing it to Erewhon. Address: Label: 6378 Warner Dr., Los Angeles, California 90048.

703. Conrat, Maisie. 1972. Soybean cookery. *Organic Gardening and Farming* 19(7):89-93. July.

• **Summary:** Discusses the benefits of soybeans and their products: whole soybeans, soy flour, tofu, miso, and soy sauce.

“If you go into a natural food store today, you will find soybeans available in many forms. In some stores you’ll find two or more varieties of whole beans as well as soy grits and soy meal, soy powder and soy flour. Most stores also carry roasted, salted soy nuts and a kind of soy cheese called tofu. They will have noodles, spaghetti, and macaroni made from soy; and they will also carry exotic soy products like miso. This may seem like a lot of things to get from one kind of bean, but in Japan, where soy is considered a protein staple, you will find more products yet...”

“Both tamari soy sauce and miso are made from fermented soy beans. (Regular commercial soy sauce has been adulterated with various chemicals to simulate

fermentation.) Miso is a thick paste made from black [not true] soybeans and rice, and has the same flavor as tamari soy sauce. You can use miso as you would beef extract in making soups, stews and sauces.

“Tofu is a kind of soy cheese. It is widely used throughout China and Japan, where it is available in many forms. Tofu is made from clabbered soy milk, just as cottage cheese is made from clabbered cow’s milk. It is very mild and delicate, so you will probably want to serve it in a sauce or soup that has plenty of character.”

Contains recipes for: Apple soy crisp (with soy meal). Soy pancakes (with soya flour). Soy cheeseburgers (with soybeans). Soy balls (with soy powder).

704. Maddocks, Melvin. 1972. The seeds of idealism. *Christian Science Monitor*. Aug. 31. p. 7.

• **Summary:** Discusses natural and organic health foods. There are now “over 2,000 ‘health food’ stores across the United States, doing an estimated \$500 million business in azuki soybeans [sic], green lentils, buckwheat, and the like.”

“Erewhon Trading Company of Boston [Massachusetts]—one of the best in the new industry has listed fair ‘organic’ food prices so that the buyer may beware.” Short grain brown rice, says Erewhon, should retail for about 35 cents a pound; yet it has been known to sell for as much as 50 cents.

705. Aihara, Herman. 1972. Summer tour. Part II. *Macrobiotic (The)* (*San Francisco, California*) No. 79. p. 11-14. Aug.

• **Summary:** Continued: “June 16 (Fri.)—We arrived at Hiro Fukudo’s [sic, Fukuda’s] home in Albuquerque [New Mexico] at early morning after driving all night from Tucson: We found they were very happy living in this highland city. Hiro has been gardening everyday in his big back yard, between his photography business, growing watermelon, melon, squash, greens, beans, potato, tomato, etc. which will give them more than they can eat.

“Hiro seems to me content living, gardening, doing business and camping around mountains. Here, I found a happy family which is not easy to find nowadays in any place.

“Their life makes a sharp contrast with the life across the street where people live in a modern apartment with super convenience and luxury, but no engagement with nature—no back yard, no natural foods, and no natural living. We took the car to check the transmission which was worn at some part. The repair cost me \$280. However, we were lucky because we found it before any accident.

“We visited the old town where many Indian crafts are sold, which are quite expensive and too commercial.

“Shoko made a big dinner—fried oyster, tofu, scallion, Japanese turnip pickle, sauteed mushroom and vegetables and beer that night.

“June 17 (Sat.)—We picked up the car from the garage and left the home around 12:00 p.m. They said they will come to Colorado in July to camp with us. We camped out at Polo Duro State Park near the valley. I learned that there was an arrowhead company nearby, only 30 miles from here. But we didn’t stop over because it was late Saturday afternoon.

“The park is located in a great canyon which is similar to Chico Canyon. There is flat land all over, no mountain, no valley, just flat land. The car crossed the deep gorge which suddenly widened to reveal a huge canyon. It is smaller than Grand Canyon but a beautiful sight. There are camp sites at the bottom of the canyon.

“June 18 (Sun.)—We were welcomed by two young ladies at their parent’s home in Tulsa. They offered us use of any room in this big home because the parents were in San Francisco for the Medical convention. The meeting was held at the high school library where I met the parents of Jane Randolph and others. The main questions were, smoking, No. 7 diet, how to start the diet, and physiognomy. Five people came to the house for discussion and questions after the meeting.

“June 19 (Mon.)—We left the Atkins at 7:00 a.m. during a heavy storm which stopped after an hour of driving. As rain stopped, the weather became hotter. When we arrived in Houston, we were baked.

“The Tao Whole Foods store is well stocked and busier than last year, but very dirty. Cornellia and I started cleaning soon after we got there.

“June 20 (Tues.)—For lecture, about 30 people came. This is surprising compared with last year, when only a few gathered.

“Tao Whole Foods in Houston is a paradise for the macrobiotic and the lazy bags. People come in to eat, drink beer, and smoke Turkish tobacco, freely without any help. We advised them that they give something as an appreciation.

“June 21 (Wed.)—Chester took video tape of my lecture and Cornellia’s cooking class. It was amazingly clear. This may be a good tool to use for lecture or meetings.

“Dinner was good and delicious because it was cooling. There is much improvement in the Houston area.

“June 22 (Thurs.)—After saying goodbye to Sandra and Chester, we drove to Jackson, Louisiana to the St. Francis Organic Farm run by Scott Tyser. Last year the house was like a ghost house, but is much cleaner and even had two electric lights this year.

“Scott and his wife organized dinner followed by a meeting. She made a famous Louisiana soup which must be French cuisine and was good. Many questions were asked.

“June 23 (Fri.)—We visited Audubon House nearby which is the example of typical early plantation houses. We arrived late at the campground near Memphis, Tennessee. There was no water for this huge campground, due to electrical trouble. We ate out at a nearby restaurant, which

recalled to me the bad life in civilization.

“June 24 (Sat.)—We camped out at Mammoth Cave National Park, and visited the cave which was a huge underground cave, but has no crystal formation. Sonoma Cave in Texas has more crystal formation.

“25 (Sun.)—Camped out at Dillon State Park (Ohio) near Zanesville where I met my first American friend, Roy A. Brown, who is still living nearby. The park was too neat and too civilized and had not much wilderness left.

“June 26 (Mon.)—Left the campground at 8:00 a.m. and visited Mr. Brown at Roseville. He was still in good shape and looked fine even though he is over 80 and eating sugar, meat, and chemical foods. I don’t know how he can be so healthy after eating such bad food. He must be eating very moderately. We were at Oakland Co-op in Pittsburgh at 2:00 p.m. This neat busy-looking store surprised me by its busy business. This is one of the busiest stores I have ever visited. Mark Schwartz, a soft spoken manager, must be doing well. He is not a founder of this Co-op but he has been working already five months.

“He said the Co-op has 1300 members paying \$10. The food store is making \$2000 a month but the dry goods store of the same Co-op is losing \$2000. Therefore, they are thinking of closing the Co-op and starting the food store only.

“There are several interesting macrobiotic students here who have been following macrobiotics faithfully and benefited. Mrs. Catten is such one who was sick from cataract losing eyesight. Only macrobiotic cured her eyes. She should give lectures around here.

“Many thanked me and asked me to come back again, soon, after a three hour lecture in the fabulous classroom of the University. After the lecture, Mark and Fay took us to their house which stands in the mountain north of Pittsburgh. Full moon almost coming out from the cloud, otherwise it was dark and cool.

“June 27 (Tues.)—Oatmeal served at the breakfast table was so good that everyone ate second or even third helpings. It was cooked after freshly ground. Pennsylvania Turnpike was a crowded highway and was being fixed several places where damaged by flood or rain. After several mistakes, we arrived at ‘New Born Farm’ of Kunkletown, Pennsylvania. Don Woodall rented 150 acres of land with a house for only \$50 a month rent. He started farming this spring with the help of David and others. After dinner on the grass, we went to Bethlehem where Glenn and Archie are preparing to open a store.

“June 28 (Wed.)—Visited ‘New Born Farm’ which Don and David started. Twenty acres of kidney beans are proof of their effort. They are growing corn, summer squash, lettuce, etc. on a total of 75 acres of land. Don said that he learned so much by farming for the first time in his life. He is standing on the ground. Several townspeople visited the farm to buy vegetables already. When they earn experiences in farming,

they will be able to live on organic farming. The store in Bethlehem is not opened yet but will create much interest in the town which is benefited by the publication of Prevention magazine which is published in a nearby town.

“There are two macrobiotic houses in this small town. We stayed in Archie and Glenn’s home. They are working hard in the preparation of the Natural Food Store in Bethlehem. Everyone in these two houses enjoyed our visit. Even though we stayed for a short time, we became close friends, for a long time. Thanks to macrobiotic!—Continued Next Issue.” Address: George Ohsawa Macrobiotic Foundation, 1471 10th Ave., San Francisco, CA 94122.

706. Hawken, Paul. 1972. Re: Recapitalization of Erewhon Inc., current officers and board of directors. Letter to Morris Kirsner, 89 State Street, Boston, Massachusetts, Sept. 1. 2 p. Typed, with signature.

• **Summary:** Morris Kirsner is Erewhon’s attorney. Paul has talked with Michio Kushi and the following is agreeable to him. Structure [of Erewhon] before investments: East West Foundation 3,832 shares, 38.3%. Michio Kushi 2,554 shares, 25.5%. Paul Hawken 2,554 shares 25.5%. Employee trust 1,060 shares 10.6%.

Structure after John W. Deming Jr.’s investment of \$150,000: East West Foundation 3,832 shares, 35.4%. Michio Kushi 2,554 shares, 23.6%. Paul Hawken 2,554 shares 23.6%. Employee trust 1,060 shares 9.8%. John W. Deming 831 shares 7.7%.

Structure after Advest’s investment of \$350,000: East West Foundation 3,832 shares, 30.0%. Michio Kushi 2,554 shares, 20.0%. Paul Hawken 2,554 shares 20.0%. Employee trust 1,060 shares 8.3%. John W. Deming 831 shares 6.5%. Advest 1,939 shares 15.2%.

Both Advest’s and John Deming’s investment is based on their purchasing stock at \$18.05 [sic, \$180.50].

The officers of the corporation will be as follows: Paul Hawken, president. William Garrison, vice-president. John W. Deming, vice-president. Tomoko Kushi, treasurer. Paul West, general manager. James Gronemeyer, general manager.

The Board of Directors will be as follows: Tomoko Kushi, Michio Kushi, Morris Kirsner, Paul Hawken (Chairman), John Deming, One representative from Advest.

“I hope this supplies you with all the necessary information and that we can bring this to rapid and speedy conclusion.”

Talk with John Deming. 1994. Dec. 28. Neither of the proposed investments by John or by Advest ever happened. Michio Kushi nixed them both. Paul Hawken believed that he owned 25.5% of Erewhon and Michio told him repeatedly that he did, but Michio would never give Paul a document which proved this ownership. John is quite sure that Paul did not actually own any Erewhon stock. Address: President, Erewhon Inc., 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

707. *Chico Enterprise-Record*. 1972. Food store destroyed (Photo caption). Sept. 14. p. 1A. Thursday.

• **Summary:** The large, front-page photo shows smoke billowing from the store building and bakery and its adjoining warehouse buildings. The caption begins: “A fire at mid-morning today virtually destroyed the Chico-San Unique Foods store and warehouse at 1262 Humboldt Ave. Ten fire units from Butte County and the City of Chico were still at the fire scene at presstime today.” The stubborn fire raged for hours, and in some cases firemen had to use metal-cutting power saws to cut away the corrugated sheet metal siding and roofing in order to get at the fire.

708. *Chico Enterprise-Record*. 1972. Food store fire damage is \$250,000. Sept. 15. p. 1A, 2A. Friday.

• **Summary:** The article begins: “Damage has been estimated at \$250,000 in a fire that yesterday destroyed the Chico-San Unique Foods store, processing department, and warehouse at 1262 Humboldt Ave.”

Firemen gave an estimated breakdown of the damages as \$50,000 to the building and \$200,00 to their contents. “They saved about \$20,000 worth of property.”

Two Chico-San employees and a firefighter were injured in the blaze. Richard Smith, age 45, vice president and manager of the plant, suffered first- and second-degree burns on his face, neck, arms, and back. His condition this morning was reported as satisfactory. He is at the Enloe Hospital undergoing treatment.

Richard Cahoon, age 20, an employee, was burned on the left hand and is also in the same hospital. A Butte County firefighter suffered smoke inhalation.

The first started at 10:15 a.m. on Thursday, Sept. 14, when a hydraulic oil line in the plant ruptured. The oil that escaped was ignited by heating equipment [on a machine that was making rice cakes]. Five units from Butte County, including three pumpers, answered the alarm. The fire was contained before noon, but mopping up operations went on until late last night.

709. Davis, Pat; Bentley, Carol. 1972. Natural foods and no smoking. *Washington Post, Times Herald*. Sept. 21. p. K1-K3.

• **Summary:** A new natural foods restaurant, The Golden Temple Conscious Cookery, located at 1521 Connecticut Ave. NW, opened several months ago and has had lines at lunch and dinner since that day. The restaurant was started by the Washington, DC, chapter of 3HO (the Happy, Healthy, Holy Organization), which is a yoga lifestyle group “organized in Los Angeles three years ago by Yogi BhaJan, a yoga teacher from India.” In Dec. 1970 one of his student-teachers, Larry Wentick, came to Washington, DC, to start a center—now called Ahimsa House (yoga ashram) and located at 1704 Q St. NW. Larry, his wife Ganga (pronounced GUN-

ga), and a group of about 15 people worked for about six months on the restaurant before it was ready to open. Most of the entrees, salads, and fruit drinks were created by Ganga, a native of California, where natural and organic foods caught on early. Ganga and Larry have both had previous experience in natural food stores and restaurants. Some years ago, Ganga was appointed cook at a commune in New Mexico, and soon she was cooking for 20-30 people a day—without recipes. Later she worked at a natural foods restaurant in Los Angeles and as a cook for Yogi Bhanjan.

At the Golden Temple, all dishes are prepared with organically grown ingredients whenever available. No meat, fish, or eggs are served, and no refined sugar or flour are used. The restaurant now seats 75 and serves about 400 daily. The ashram's 25 members practice awareness, yoga, good diet, and service to others. The restaurant is bright and spotless.

Three recipes are given. One, Bhanjan's banquet, calls for "Tamari (soy sauce)."

710. Aihara, Herman. 1972. Summer tour. Part III. *Macrobiotic (The) (San Francisco, California)* No. 80. p. 11-14. Sept.

• **Summary:** Continued: "June 29 (Thurs.)—We arrived in cool Philadelphia where there had been huge floods a couple of weeks ago. The people who live in the Wingohocking Heights house have changed completely since last year. We were given large comfortable rooms and they all stayed in smaller rooms. What a spirit they showed us. For the lecture at the Quaker Church about 50 people came with some interesting questions:

"Q. How are yin and yang measured?"

"A. Yin and yang are not quantitative units but qualitative units. Therefore, they cannot be measured in most cases. They are similar to the concept of health and happiness. How can we measure health and happiness. How much health does one person have. Health measured by weight, height and age, etc. is not true health.

"However, some numbers can be used to measure yin and yang. For example, K and Na, sugar, oxygen, carbon dioxide, etc. Those amounts in our body are fairly constant and they are relative to each other. However, they are not absolute. They are relative. In other words, someone may contain more Na than other persons and be in a healthy condition. Someone may contain more sugar a certain time of the day than another person, etc.

"Also, the amount of these factors are relative to each other. One cannot judge the amount by itself. The right amount of each factor is balanced by others. Modern physiology knows such relationships. However, it is not able to apply these in daily living.

"Q. Why was Ohsawa against logic?"

"A. Ohsawa was not against logic (formal, Aristotelian). He just taught the limitation of such formal logic. Life,

totality, reality, are beyond formal logic because life includes yin and yang at the same time. It has all possibility. It is a creator.

"Q. Why did Ohsawa claim that macrobiotic can cure all diseases?"

"A. Why not? This seems to me the faith of Ohsawa. Christ had a similar faith in fasting and prayer. In reality, this faith cures but the macrobiotic diet does not. The diet certainly brings better health and cures symptoms. However, the real cure of man comes from faith in macrobiotic. That is to say, faith is nothing but the clear understanding of all cause and effect. Faith is expression of Supreme Judgment in action. Faith without Supreme Judgment is superstition. This kind of faith will cause difficulties and stubbornness. Sickness and disease have value when they lead us to Faith. However, we must be careful not to form rigid belief based on our own ego belief without having Supreme Judgment. In other words, one who can cure all diseases can say this is Faith. However, for one who cannot, such expression is mere arrogance and rigidity.

"June 30 (Fri.)—A cooking class was held at Bobbi Parker's huge mansion which has 20 bedrooms, a living room, family room, and kitchen. This house was constructed after a European style from stone. She is separated from her husband and living here with her five children. She is active in macrobiotic, helping in many ways.

"Cooking class was crowded with young and old. Attendance at the lecture filled the living room after dinner.

"July 1 (Sat.)—Debbie Kamor invited us to the Ashram Restaurant which is in an abandoned old church. The foods served are pretty good. People working there are all volunteers. Many religious groups in this country are adopting vegetarian diets. This will be a great thing in the future of mankind. Let religion unite with macrobiotic or macrobiotic unite with religion.

"In the evening, we invited two girls from the house to 'Ceres' which is a new macrobiotic restaurant and a macrobiotic community center where Jim is cooking. Foods are good and prices are reasonable. However, Jim told us that strict macrobiotic restaurants are difficult to manage financially. A restaurant should serve foods which are not strict, such as: white noodles, tofu, etc. Otherwise people will not come. I will not go to a restaurant to eat just brown rice. To me, if foods are not cooked with chemical condiments or are not extremely yin or yang, then many foods are acceptable for serving in a restaurant. In other words, in restaurants we serve #-3, #-2, or #-1 diet. At home we eat #1 to #7. In Tokyo, one macrobiotic restaurant was closed after two years of business because one of the managers insisted that certain foods only be served to the customers. Serving foods without chemicals, sugar and meats is certainly a great improvement in the restaurant business. We should be satisfied with this much knowing that otherwise a restaurant will not be able to survive as a business.

“July 2–July 4 (Sun. through Tues.)—We came to a big city again. It is a good time to come to New York City on Sunday when there is less traffic. Marion Le Blanc was waiting in her apartment on our arrival. This year again, she gave us all her apartment to use for three days. I have no words to show my appreciation to her for such thoughtful giving.

“We would have gathered many more people to cooking class if it had been advertised. Someone said that New York has great potentiality for macrobiotic. We went on sales trips to the Health Food Stores in the city. Most of the stores bought our macroguides because they have never seen them. If someone can make contacts and sales in cities such as New York, we will certainly increase business and the promotion of macrobiotic.

“However, it is risky to live in this degenerate city. It is dirtier and filthier than ever. I feel it is the end of the world. It is a town of business to make money. A friend of mine established a million dollar business from a tiny retail store where people worked without wages. He now has everything: fame, status, income, cars, a \$100,000 house, and is able to go to Japan at any time, etc. I don’t know whether he is happy or not. Unhappiness can easily find a door to enter through in such a life.

“My lecture covered many practical questions such as: Why some long time macrobiotics have trouble with anemia?

“How to start the macrobiotic diet?

“What kind of food is good for anemia?

“What is fatigue and how is it cured?

“Why do macrobiotic people develop blood circulation problems?

“We couldn’t see Mr. Okada [of Muso] who was in New York at this time, nor Miss Yamamoto. However, we met a few old friends. It would take much time to catch up with our many old friends in New York and now we did not have the time to do so. So we left the town before we were able to renew old friendships. To see them at other times

“(Continued Next Issue).” Address: George Ohsawa Macrobiotic Foundation, 1471 10th Ave., San Francisco, CA 94122.

711. **Product Name:** Whole Soy Flour.

Manufacturer’s Name: Arrowhead Mills, Inc.

Manufacturer’s Address: Box 866, Hereford, TX 79045. Phone: (806) 364-0730.

Date of Introduction: 1972 September.

New Product–Documentation: Arrowhead Mills. 1978. Sept. “Price list.” Under “Packaged flours”: “Soy Flour, Whole. (12 x 1½ lb.)”

Arrowhead Mills. 1987. Catalog. 1.5 and 30 lb. Soya Bluebook. 1989. Now sold in 12 and 24 ounce cartons, and 30 lb bags.

712. Eden Foods. 1972. [Catalog and pricelist]. 211 South

State St., Ann Arbor, MI 48108. 2 p. Oct. 5.

• **Summary:** This is the second earliest existing Eden Foods seen that is dated. Soy-related products include: Hopi Roasted Soybeans (1.3 oz snack). Soybeans (1 lb, 2 lb, and 50 lb bags). Soy flour (25 lb or 50 lb). Tamari soy sauce (pints, quarts, gallons).

Other interesting products include: Azuki beans (25 lb, 50 lb, and 100 lb bags). Sweet rice flour (25 lb). Celestial Seasonings herb teas (incl. The Red Zinger). Mu herbal tea #9, #16. Wild ginseng tea. Wild ginseng root. Wild goldenseal powder. Whole wheat noodles. Dr. Bronner’s Castile Soap. Corona Hand Mill. Honey (blueberry blossom or raw clover; “This honey is strained only once and heated only to 115 degrees and not above in order to preserve the natural nutrients and enzymes in the honey”).

Note: This is the earliest document seen (Jan. 2002) containing the term “Sweet rice” or “Sweet rice flour.” The new term is used in place of the traditional term “glutinous rice” which is inaccurate since this type of rice contains no gluten. People with celiac disease, celiac sprue, or Duhring’s disease must strictly avoid foods that contain gluten; they can eat “sweet rice.” Address: Ann Arbor, Michigan.

713. *East West Journal*. 1972. Chico-San burns. 2(14):5. Oct. 2-16.

• **Summary:** A fire at the Chico-San warehouse in Chico, California on September 14 results in the loss of 90% of the company’s natural food inventory worth approximately \$350,000. Origin of the fire was uncertain, but it apparently happened when a vapor leak caused an explosion in one of the new rice cake machines. The macrobiotic food industry got its start in this country eight years ago with the production of Chico-San rice cakes.

Among the items destroyed was the first batch of traditionally-made American miso, which Chico-San had planned to market in the coming year. New office and warehouse facilities are in operation at 2244 West First Street in Chico. President of Chico-San, Robert Kennedy, hopes the rice cake machines and “yinnies” candy production can be re-assembled and working again within the month. Address: P.O. Box 203, Prudential Center Station, Boston, Massachusetts 02119.

714. Aihara, Herman. 1972. Summer tour. Part IV.

Macrobiotic (The) (San Francisco, California) No. 81. p. 7-10. Oct.

• **Summary:** Continued: “July 5 (Wed.)—Bill Haas and his wife, in New London, Connecticut, were delightful persons to meet. We had a nice talk at the local church where about 20 macrobiotics gathered.

“July 6 (Thurs.)—Boston is a mecca of macrobiotics, having two restaurants, a book store, a publishing house and a food distributing business which creates a mood of the established. Michio Kushi gives lectures both day and

evening every day. The Seventh Inn has changed in taste. It has two Japanese cooks, Mr. Hayashi and Abe who are preparing macrobiotic cuisines that are delicious and authentic. They have a new menu.

“As Michio says, macrobiotics in Boston is too easy.

Note: This is the earliest document seen (March 2020) that mentions The Seventh Inn, a macrobiotic and natural foods restaurant in Boston—just off Boston Public Gardens. Relatively large and elegant, it was originally named Sanae 2 (Kotzsch 1985, p. 171).

“July 7 (Fri.)—We visited the Boston Museum. The scroll of the Heiji Story and the collection of Hiroshige’s 36 scenes of Mt. Fuji are truly worth seeing. Also, there were many collections of Ramian Mandala. However, they were rather recent productions. I was disappointed by the fact that there were no Japanese Mandala since they are older even than Ramian.

“July 8 (Sat.)—We visited Erewhon Factory after the welcome party. They improved the facilities for milling, packaging and butter making. The offices of Tao Books, East-West Journal and The Order of the Universe, are combined and well organized under one roof. They are doing a very good and fast job. However, they are having difficulty, financially.

“July 9 (Sun.)—After a busy schedule in Boston, we were again in the country of Vermont where David and his wife live, doing odd work on nearby farms of Craftbury.

“A meeting was held at the top of a hill. David made a big campfire surrounded by over 30 young macrobiotic people who gathered from neighboring towns. It is unbelievable to see so many macrobiotic people in such a farming land where there is no sign of civilization. July 10 & 11 (Mon. & Tues.)—We stayed at the same house in Binghamton again. However, the host in the house is not the same. Frank Corica is the man who invited us this year. After dinner with Mr. & Mrs. Corica, we visited the Belly Of The Whale which is remodeled completely and is serving as a restaurant as well as a food store. Frank is a hard worker and keeps the restaurant in good shape.

“Due to the influence of Michael Abehsera, most of the people who gathered in Frank’s back yard were Orthodox Jews. They liked my talk and many remained after the lecture, discussing many things.

“July 12 (Wed.)—Niagara Falls was great due to the heavy rains. The campground was located at the shore of Lake Erie, which we were told by a park guard was not polluted. However, oil and many dead fishes were floating on top.

“July 13 (Thurs.) Ann Arbor, Michigan visit was written about in the September issue of *The Macrobiotic*, No. 80, because it described the meeting with Mrs. Lima Ohsawa when she joined the tour group there for a short visit. From Ann Arbor they traveled to Chicago [Illinois] which is included in the description of the meeting on pages 2 & 3 of

last issue.

“July 19 & 20 (Wed. & Thurs.) The meeting in Kansas City started rather poorly but ended with satisfaction and gratitude. There were several enthusiastic macrobiotics such as Tish Atkins who has been organizing cooking classes around there. Dr. & Mrs. Tuesink were kind and joyous and gave us their whole house in which to stay while they slept in their car. The day of the cooking class was hot, which made the dinner of noodles and fruit desert taste even better.

“July 21 (Fri.) The car had a funny noise and a strange vibration just after we left Dr. Ruesink’s house. I thought it was due to the road which was bad, however, it was a sign that the universal joint was wearing out. About 40 miles west of K.C. the universal joint broke and the driving shaft came off. We called AAA and were towed to a garage in Florence, and there the joint and muffler were fixed. The cost was cheap. We were lucky that the trouble happened after all, because when the car was repaired it ran very well. It took about 3 hours to fix the car, and we camped out at Fort Fletcher camp grounds, driving only 200 miles that day—the shortest drive per day on our trip. The camp ground is located in the flat farmland surrounded by corn. It was windy all night.

“July 22nd (Sat.) After joint and muffler were fixed the car ran very smoothly. We drove through Colorado Springs and up 9,000 feet to Divide where Mr. & Mrs. Laws welcomed us. They own a big house and ten acres of land. The house is surrounded by trees and the air is clear and cool. Pike’s Peak stands in front of the house overlooking the meadow. It is a wonderful place to live if you don’t mind being isolated from the community.

“The lecture meeting was held at the modern community college in Colorado Springs. It was quite a different lecture room for a macrobiotic meeting. They are usually held in an informal and conventional place.

“July 23rd (Sun.) We woke up in the Law’s modern house in this 9,000 foot altitude. It was an entirely different atmosphere than yesterday when we stayed at the camp ground near Kansas City. We were in mountain country—the real West.

“The cooking class was held at the restaurant which serves organic foods and macrobiotic foods. It is located in the residential neighborhood and the food is good for a restaurant. They said that business is good. The town also has a macrobiotic food store, Ceres, which was formerly Green Mountain Grainery. The store moved to a new location and it too seems to be doing good business. When we returned to the house we went fishing at a nearby lake and caught seven fish. We enjoyed a delicious dinner of marinated trout.

“July 24 (Mon.) We said good bye to Mr. & Mrs. Laws, Jerry & Frank Calpeno and the children and headed to Denver where we visited Nutribooks which carries almost all nutritional health food books. Mr. Nidess, a director of the company, is quite an interesting business man. After a

short stop at the Grainery on 17th Street we hurried to Dillon where we planned to rest two days—at the top of the Rockies. We waited a short while for Eddie Owada to come back home from work. He is the same as last year. Here we were again in the Rockies enjoying clear air, mountains and clear, clear water. Eddie had reserved a space for us at the same motel we had stayed in last year. Everything was the same. Rooms, kitchen, carpet, bath, etc. were all the same as one year ago. I felt as if I had skipped a year.

“July 25th (Tues.) We got up early and went fishing at a nearby lake that Eddie recommended. At first we had no luck. Then we changed shore. Suddenly Jiro [Aihara] started shouting. He caught five fish within an hour or so and Charlie caught some also. The lake is small and shallow but loaded with fish. We wanted to fish longer but had to check out of the motel by 11 A.M. so we went back to eat breakfast. The sky was clear, the air was cool, and we enjoyed the thrill of fishing. We loaded the car and went to another lake which was larger, but we had no luck. However, the sun was warmer and we enjoyed sunbathing.

“In the evening Eddie took us to Cataract Ranger Station which is an isolated branch of his ranger station. He had arranged for us to stay one day in this cozy mountain cabin from which window we could see the clearest lake I have ever seen.

“There was almost a full moon that night and Cornelia fixed trout we had caught that morning. It was a great dinner!

“July 26th (Wed.) We rested completely in this exclusive cabin hiking, fishing and cleaning the floor and reading books. The weather changed there very fast. Bright sunshine followed a quick shower and there was even lightening. Mountain flowers blossomed all over. The huge waterfall, which is miles away, was the only sound we could hear. Hiking around the lake was fun, seeing many grasses, flowers and trees. There was a clear lake to the side of our path. In the lake ducks were catching fish, splashing the water with their white color. There was no man to be seen anywhere. It was complete stillness yet so alive. It is changing always and yet it changes not. Everything changes but we do not see the changes. The clouds moved gradually and the sun faded. Rain started, making millions of dots on the surface of the lake. The wind blew away the clouds and the rain stopped. Sun shone again, leaves, water and mountain edges reflected light. Brightness was all over -

“Swimming ducks cut

“the surface of the lake.

“A white water fall” connects

“the sky and the lake.”

715. **Product Name:** Tan Pups (Skewered Seitan Deep-Fried in a Breaded Batter).

Manufacturer’s Name: Amartseff (Nik and Joanne).

Manufacturer’s Address: 216 Gardner Rd., Brookline, MA 02146.

Date of Introduction: 1972 October.

Ingredients: High-protein wheat flour. Broth: Water, kombu, sauteed onions, soy sauce, fresh gingerroot. Batter: Pre-ground corn meal, fresh onions, garlic, salt, soy sauce, some of the concentrated liquid in which the seitan had been cooked, and maybe some water.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: This was probably one of America’s first two commercial seitan products. With this extremely innovative, all-American product, seitan was transformed from a salty black seasoning into a juicy meat substitute, and the pattern was set for most subsequent seitan products in the western world.

Talk with Nik Amartseff (P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2942; by June 20: P.O. Box 135, Chesterfield, New Hampshire 03443. Phone: 603-256-6750). 1992. May 24. Nik created this product. He and his first wife, Joanne Street Amartseff, made this product together out of their home, though they never operated under a company name. Joanne now lives in Mission Hill, near Brookline, Massachusetts. They first made the product at Gardner Road in Brookline. It was sort of the Erewhon executive house. The name was a play on two words: “Tan” came from Seitan, and “Pups” came from Hot Dogs.

Nik thinks he first made seitan at home in Los Altos, California. He learned the process by reading about it, either from an early issue of *East West Journal* (which began publication in Jan. 1971), or from a book. *Order of the Universe* (which he also read later) had started publication by 1967. He and Joanne first moved to 216 Gardner Rd. in Boston in May, 1971, when Paul Hawken invited them to Boston from Los Altos, California, where he and Joanne worked at Fred Rohé’s New Age Natural Foods. Nik immediately began to work at the Erewhon warehouse and to live at the Erewhon executive house together with Paul and Dora Hawken, Bill and Renee Tara, Hy and Laura Lerner, and some single people including Wally Gorell and Bill Garrison. The women did the cooking in the house, but some of them (including his wife) also cooked the lunches for the workers at the Erewhon warehouse.

Before Nik and Joanne arrived, Renee Tara was baking ready-to-eat unyeasted macrobiotic goodies at home on Gardner Road and selling them at the Erewhon retail store. When Bill and Renee left for England, Renee asked Joanne if she would like to continue this little cottage industry. So in the early spring of 1972 Joanne stopped cooking for Erewhon and took over Renee’s business, with the help of Nik’s sister, Vera, baking at the Gardner Road house to supplement the family income. Joanne’s project was quite successful right away, in part because she did not toe the macrobiotic line very strictly. She sweetened up Renee’s

strict macrobiotic line and added a number of innovative sweet baked snack foods, which apparently no one else thought of or dared to attempt, such as cookies, yeasted cinnamon-maple nut rolls, fruit tarts, and fig newtons. Nik continued to work full time at Erewhon, but during his time off he experimented with making seitan. He had two ideas: One was to use small pieces of seitan mixed with sauteed vegetables as a filling for piroshki (small cases of dough around the filling; Nik is part Russian), and the other he called Tan Pups—skewered deep-fried seitan on a stick. Joanne recalls that they may have sold these two seitan foods a few times (she is not sure) but they were not regular items. However Nik is quite certain that for at least the last few weeks before he and Joanne moved to New York state, in order to have some extra money, they “baked like crazy” and sold Tan Pups and Piroshki.

In May 1972 Nik quit Erewhon for a while, and he and his wife moved to New York state. They returned to the Gardner Road house in Boston in Sept. 1972 and Joanne resumed baking. At this point Nik began baking with Joanne, mainly out of necessity to make some money. Their two lines of baked products were (1) Joanne’s former line of sweet snack foods, and (2) savory products (such as the Piroshki and Tan Pups). Their two seitan products were on the market by about Oct. 1972 and they soon became popular.

They made Tan Pups entirely by hand as follows: The night before make raw wheat gluten from whole wheat flour (which they bought in bulk from Erewhon). The next morning, cook the loaves of gluten in large enamel kettles with water, kombu, sauteed onions, garlic, and freshly grated gingerroot. About half way through the cooking, add soy sauce. Remove the seitan and simmer the liquid until it is reduced to about ¼ its original volume. Slice the seitan into pieces about ¾ inch square and 3 inches long (like a hot dog with a square cross-section; the traditional New England Corn Dog influenced the product concept). Set aside any scraps or trimmings to use later in making Piroshki. In a blender, prepare a thick batter (having a consistency between crepe and pancake batter) using pre-ground corn meal, fresh onions, garlic, salt, soy sauce, some of the concentrated liquid in which the seitan had been cooked, and perhaps some water. Skewer the seitan pieces from one end, then dip them in the batter (without dusting in a dry breading), and deep-fry, placing them like spokes of a wheel in cast iron pots. When they are crisp and piping hot, deliver to stores.

These savory vegetarian foods (typically 100 Tan Pups and 50 Piroshki) were sold at only two outlets: Most at the Erewhon retail store at 342 Newbury St. in Boston, and the rest at The Organic Food Cellar, also on Newbury St. At Erewhon, they were sold on (or later in) a glass case about 10 feet from the entrance of the store. The products were sold in bulk, without packaging or labels. Nik usually delivered them by 3:00 in the afternoon, which was found to be a prime selling time. Most were sold by 6:00 and almost

none were left the next day. He delivered 2-3 times a week. The work was exhausting.

But there was a lot of turmoil at the Gardner Road house, so Nik and Joanne moved in with John Deming in Allston (Massachusetts), then with friends in Saugus, then to Gloucester (27 miles northeast of Boston) by Nov. 1972. At each of the 3 houses they made the Tan Pups, Piroshki, and sweet snack foods.

In early 1973, Kathy and Mike Atherton, friends of Nik and Joanne’s (Mike was employed at the Erewhon warehouse) moved to Boston from New York. Joanne was due to have a child in June 1973. The business was too labor intensive and soon the family would need more money. So the Amartseffs gave their friends the home business (free of charge) and it was moved to the friends’ home in the north end of Boston. Nik gave them the recipes and his two outlets, and showed them how to make all the products. Nik was re-hired to work full time at Erewhon by Bill Garrison. Nik and Joanne’s son was born in June 1973.

The Amartseffs’ friends continued to sell Tan Pups and Piroshki through at least the autumn of 1973, then they moved on—and the products went off the market. The business never did have a real name.

Nik never heard of nor tasted Tan Pops, the successor of Tan Pups, made by John Weissman.

Talk with Joanne Amartseff. 1992. July 8. She just talked with Nik’s sister, Vera, who both Nik and she think has an excellent memory. Vera (who now lives in San Francisco) does not recall them making any seitan products before Nik and Joanne left for New York.

716. Product Name: Hopi Roasted Soybeans.

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 211 South State St., Ann Arbor, MI 48108. Phone: 313-769-8444.

Date of Introduction: 1972 October.

Ingredients: Whole soybeans, tamari.

Wt/Vol., Packaging, Price: 1.3 oz bag.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods wholesale catalog and price list. 5 Oct. 1972. “Hopi Roasted Soybeans. 24 x 1.3 oz.”

Talk with Bill Bolduc, founder of Eden Foods. 1992. March 14. Erewhon was probably the first company in America to develop a line of tamari-roasted seeds and grains. Eden was carrying the tamari-roasted soybeans by Oct. 1972, and the full line by early 1973. Bill learned how to make such seeds from Susan and Jimmy Silver. Susan first showed Bill how to roast sunflower seeds with tamari on their home stove.

717. Product Name: Azuki Beans.

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 211 South State St., Ann Arbor,

MI 48108. Phone: 313-769-8444.

Date of Introduction: 1972 October.

Ingredients: Azuki beans.

Wt/Vol., Packaging, Price: 25 lb, 50 lb, or 100 lb bag.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Inc. 1971. July 26. Wholesale pricelist. “Beans: Azuki.”

718. Haggerty, Donna. 1972. Fire reflects macrobiotics. *Macrobiotic (The) (Chico, California)* No. 81. p. 16-18. Oct.
 • **Summary:** The article begins: “The burning of Chico-San / Spiral Foods on September 14 came as quite a shock to all of us.

“This is the very first company set up in the United States to serve the Macrobiotic community with the staple foods such as Miso, Tamari, brown rice, etc.”

Her article attempts to answer why the fire happened in terms of yin-yang and macrobiotic theory. At the end of the article is this interesting response:

“Dear Donna, ‘In my opinion, Chico-San reached extreme yang [pressure, heat (Chico is very hot in summer), activity, etc.] and not enough yin (such as space, less activity, etc.).’ [Herman Aihara].” Address: [Chico, California].

719. *Macrobiotic (The) (San Francisco, California)*. 1972. A message to Chico-San. No. 81. p. 21. Oct.

• **Summary:** “Our deepest sympathy to the people of Chico-San which was almost entirely ruined by a sudden fire which apparently started in a newly built rice cake machine on September 13th.

“We sincerely wish that Chico-San will restore all damage and resume business again as soon as possible.” Address: George Ohsawa Macrobiotic Foundation, 1471 10th Ave., San Francisco, CA 94122.

720. Photograph of Evan Root and Jim Gronemeyer standing by the Erewhon Los Angeles macrobiotic retail store. 1972.

• **Summary:** This photo was taken in about Oct. 1972. The black and white photo shows the two at the back of the store, and the color photo shows the outside front of the store. Jim was one of those who built the first Erewhon West at the behest of Aveline Kushi—who was living in Los Angeles at the time. Evan and Jim were old friends from pre-macrobiotic days; Jim showed Evan around.

Note: This photo was sent by Evan Root to Patricia Smith and by Patricia to Soyinfo Center (Nov. 2010).

721. Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list 11/1/72. Offering the best in natural foods. Ann Arbor, Michigan. 58 p. Nov. 1. Index. Illust. 22 cm.

• **Summary:** This is a very early natural foods catalog, typewritten and mimeographed on pink paper; it contains a few logos of manufacturers but no ads. On the front cover is a stylized illustration of a rayed sun, with each

ray represented as a fruit or vegetable. Contents: Hi! Who, where, phone, why. General information: Service, terms, freight, notes, contact (Henry Bednarz and Larry Kociela, p. 1-2). Special case lot discount–5%. Lines on which case lot discounts are not allowed (7). “Computerized billing by January 1, 1973 including Quantity, Unit, Description, Size, Sugg. [Suggested] Retail, Unit cost, extension, 10 day 2% discount, 10 day case lot discount” (p. 4).

The body of the catalog is an alphabetical listing of suppliers / manufacturers, with major brands or product categories a cross references (e.g. Bakon Yeast, see Sovex). Within each, products are listed alphabetically (shown below in parentheses). These include: Acme juicer Co. Appliances & utensils. Barth’s Nutra Foods (Barth Soya Date Cereal). Books (Nutri-Books Corp., Denver, Colorado). Chico San (Rice Cakes, Lima Tamari Soy Sauce, Miso Soybean Puree, Sesame Salt, Sesame Butter, Salt Plums, Kuzu {wild arrowroot}, azuki beans, Mu Tea, kombu, soysauce tableserver–glass, chopsticks), Celestial Seasonings teas, Continental Culture Specialists (acidophilus culture, kefir grains, royal yogurt), Dr. Bronner & Assoc. (dulse sea lettuce, lecithin protein cereal, Do It Twice Soy Vege Base, pure peppermint oil soap), El Molino (7 Grain Cereal, soy beans–whole, soya flour, soya grits, soya meal, Graham flour), Fearn Soya Foods (Pancake S.F. [Soya Flour] Mix, liquid lecithin, High Protein (carob, chocolate, vanilla), soya protein 96%, Protein 600 Tablets (vanilla, chocolate), Muscle Protein, Soya Powder–Natural, Soya Powder–Low Fat, Soya Granules, cooking soybeans, Wheat Cereal Soya Mix, Corn Bread Soya Mix, Salted Plain SoyoSnax, Soybean–sprouting, lecithin granules, Soy O Snaks–Natural, barley–hulled organic, triticale flour–organic), Flavor Tree (Pernola, Pernuts {unsalted, sea salted, mild garlic, onion, carosel [carousel] carob covered}), Gides, Inc. (Nu-Life {vitamins & minerals–has the most products of any supplier}; A Soyadophilus, vitamin E natural mixed tocopherols), Lassen Foods (granola), Malt-O-Meal (Soytown) (salted soy beans [roasted], unsalted, barbecue flavor, garlic, soy spread, soy honey bar, soy nut bar), Miracle Juicer Co., Modern Products (Gayelord Hauser), Norganic (vegetable oils, incl. peanut oil, soy oil, safflower oil, sesame oil, sunflower oil, Gold Soya Mayonnaise), Richter Bros. (Familia cereals {Swissy Cereal, Fritini Mix}, Morga vegetable bouillon, Pero coffee substitute, Herbmare seasoning salt), A. Sahadi Co. (sesame tahini), Sourdough Jack’s Country Kitchen (sourdough starter), Sovex (granola, Bakon Yeast), Seelect Dietary Products: Herb teas (incl. Bladderwrack, dulse leaves, saw palmetto, Irish moss), St. Laurant Peanut Butter, Sunshine Valley, Viobin (lists 16 products, incl. wheat germ oil), Mineral Waters (incl. Apollinaris, Vichy, Perrier, Mountain Valley), Grist Mill (granola, Wunder Bars, Honey Graham Cracker, Super Protein Concentrate), Norwalk Juicer Co., Parkelp (Ocean Labs, Inc.; lists 4 kelp products), Nuvita Foods (Langes; Soya Carob Macaroni). Organic Sun Valley

Dried Fruits (incl. Calimyrna figs, Monukka raisins, Black Mission figs, Zahadi dates). Honey Preserves—No sugar added. Index by products and suppliers.

Note 1. This is the earliest document seen (March 2020) concerning Midwest Natural Foods.

Note 2. This is the earliest English-language document seen (June 2006) that mentions the “Acme Juicer” or the “Acme Juicer Co.” Address: 310 W. Ann St. (P.O. Box 100), Ann Arbor, Michigan 48107. Phone: 313-761-2997.

722. Advest Co. 1972. Private placement \$500,400. 1112 shares. No par value common stock. Erewhon Inc. (\$450) per share. These are speculative securities. Hartford, Connecticut. 34 p. 28 cm.

• **Summary:** Contents: Offering. Risk factors. Use of proceeds. Capitalization. Historical statement of income. The company: Sources of supply, management, employees & facilities. The market. Recent developments. New opportunities. Exhibits: (1) 1972 financial statement. (2) Sample product labels. (3) Photographs of facilities.

Erewhon Trading Company, Inc. is a manufacturer, packager, importer, and distributor of organically grown foods and natural products. Founded in January 1968, the company is a Massachusetts Corporation with its principal offices at 33 Farnsworth Street, Boston. It proposes to issue and sell privately 1112 shares of its common stock at \$450 per share. Advest Co., a member of the New York Stock Exchange, has been retained to act as the selling agent. The company reserves the right to approve each investor and to limit the number of investors to 15. The minimum number of shares purchased by any investor will be 55 shares.

“Management: The business of the company may be deemed to be highly dependent upon Paul Hawken, its president and director, and if the company should lose his services, its business may be materially adversely affected.

Use of proceeds: Net proceeds expected to be received by the company from this offering will be approximately \$475,000. Approximately \$250,000 of the funds raised will be used to pay back loans from the New England Merchants National Bank. An additional \$50,000 will be used to pay accounts payable, and the balance (\$175,000) will be available for additional working capital, to support new products and expanded sales, and to open a third retail store in Cambridge.

Erewhon’s sales were \$491,546 in 1970, then 1,864,833 in 1971, and an estimated \$3,160,011 in 1972. Net profit after taxes was \$31,709 in 1970, then \$84,417 in 1971 and \$14,663 in 1972.

Company history: “Erewhon Trading Company, Inc. was organized in May 1965 by Evan Root to sell natural and organic foods. The company’s first store was a small basement level shop on Newbury Street in Boston. Paul Hawken succeeded Mr. Root as manager in August 1967. In November 1969, the company moved its retail shop to 342

Newbury Street where it presently occupies approximately 2,000 square feet of street level space. The store is decorated in a 19th century country store motif and sells a wide range of package and bulk food products, fresh produce, books, and cooking accessories. Sales from this location exceed \$450,000 annually.

“This year (1972) the company also opened a West Coast retail store in Los Angeles, California and a nearby warehouse. This location serves the local retail market and distributes Erewhon labelled packaged foods to the western states. Its retail store has a ‘country store’ decor... This facility is operated under its own general manager.

“The tremendous interest in organic foods, as reflected by growth in the company’s Boston retail store, led to the need to supply a growing number of independent health and organic food retail stores. Consequently the company opened a warehouse in late 1969. Since that time this facility has quadrupled in size and presently occupies 5 floors or 40,000 square feet of two older warehouse buildings at #33 and #29 Farnsworth Street, South Boston.

“This location serves as the company’s headquarters, its processing and packaging plants, and its warehouse. Presently about 500 natural food stores throughout the country are supplied with approximately 300 different items. From its two locations [Boston and Los Angeles] the company shipped approximately 2 million pounds of wheat, 2 million pounds of rice, 50,000 gallons of soy sauce and a million pounds of oil in 1971. By dollar volume importance the ten most important product classifications in fiscal year 1972 were grains 23.7%, nut butters 10.1%, fruits 9.9%, vegetable oils 9.1%, raw seeds 7.5%, soy products 6.9%, roasted seeds 6.2%, shampoos and soap 5.8%, beans 5.3%, and pasta 3.1%. Since that time, the company has introduced its own line of granola and nut butters. Both these products are processed at the South Boston warehouse with equipment owned by the company... The greatest number of customers the company serves are in the northeast, accounting for more than 70% of its total revenues.” The largest single customer is Star Market, a division of Jewel Tea, which is expected to account for about 6% of company sales in fiscal 1972. Star Market, a regional supermarket chain, purchases its organic and natural foods exclusively from Erewhon. It has 100 feet of shelf space in the form of individual gondolas expressly for Erewhon products.

“Supply: Erewhon has been a pioneer in the development of organic foods supply. The company has often encouraged farmers to switch over to organic cultivation by ensuring them a fixed price and quantity order. Erewhon presently has close relations with over 50 farms and has developed a strong reputation and high degree of loyalty among the organic farming community.

“The company purchases a large portion of its grains and oils from one source, Arrowhead Mills, Deaf Smith County, Texas. This grower-processor works closely with Erewhon

to plan production and inventory the company's needs. Arrowhead maintains approximately 30,000 acres under organic cultivation. Rice is purchased from four growers in Louisiana and California." Erewhon "spends approximately \$10,000 annually to have foods verified organic by two independent testing laboratories... Validity is also sometimes ensured by an independent program conducted by Rodale Press, Inc... Based on soil analysis, independent visit, and quarterly laboratory testing, this program certified 70 farmers on the West Coast in 1971." Continued.

Note: This is the earliest document seen (Dec. 2001) connected with Erewhon that uses the term "natural food" (or "natural foods"). Address: 6 Central Row, Hartford, Connecticut 06103.

723. Advest Co. 1972. Private placement \$500,400. 1112 shares. Erewhon Inc. (Continued–Document part II). Hartford, Connecticut. 34 p. 28 cm.

• **Summary:** Continued from p. 12. Management of Erewhon: Paul Hawken–President & chairman. Born on 8 Feb. 1946 in San Mateo, California. Attended Berkeley High School in Berkeley, California. Graduated from Nevada Union High School 1963 [located between Nevada City and Grass Valley, California, in the Sierra Nevada foothills]. Worked one year as a carpenter. Traveled in Europe 1964-65, studied at Alliance Française. Returned to the USA and enrolled at San Francisco State. School was closed by demonstrations, so he went into business for himself–Commercial photography, portraits, and advertising. Left business in 1966 to come to Boston to begin working at Erewhon in Aug. 1966. Married [to Dora Coates, June 1971], one child.

Tomoko Kushi–Stockholder. Michio Kushi–Director East West Foundation. Morris Kirsner–Attorney at law.

John Deming, Jr.–Retail manager. Born 27 June 1947 in Tacoma, Washington. Graduated from Bolton High School at Alexandria, Louisiana, in 1965. Attended Tulane University (New Orleans) until 1967, majoring in English. Began his own business, opening a natural food store in Jackson, Mississippi. Sold the business in Aug. 1971 and went to work with Erewhon in Los Angeles. Married [to Judy Coates in Aug. 1972].

Gordon William Garrison, Jr.–Vice-president. Born 19 Dec. 1946 in New York, NY. Graduated Bennington High School 1964. Attended Norwich University [Northfield, Vermont] 1964-65. Attended University of Vermont 1965-69, and graduated in 1969 with a B.A. in philosophy and art. Job Experience: Camp counselor, construction worker, ski instructor and patrolman, carpenter, farmer, tree surgeon, and lecturer. In 1970 started with Erewhon. Single.

Paul West–General Manager. In Feb. 1971 began employment with Erewhon. Married with two children.

Christopher J. Connolly–Production manager. Began work at Erewhon in 1970 in Los Angeles. Transferred to

Boston in Oct. 1971. Single.

"Employees and facilities: The company maintains a retail store with 2,100 square feet at 342 Newbury Street, Boston, and a second retail store with 2,500 square feet at 8001 Beverly Blvd., Los Angeles. Supporting this store and the Western regional wholesale market is a 14,000 square foot warehouse at 8454 Steller Drive, Culver City, California.

"The company's headquarters and principal warehousing, packing, and processing facilities are located on 5 floors of two adjoining buildings at 33 Farnsworth Street, South Boston. This location comprises approximately 40,000 square feet. The company presently operates two packaging lines in Boston, 2 shifts daily, and one Packaging line in Los Angeles." The company employs approximately 40 people.

"The Market" Because it has grown with the organic movement and has followed rigorous standards of food purchase and preparation, the company enjoys an impeccable reputation for integrity in the rapidly growing organic foods market. The company believes it is presently the largest supplier of organic foods in the East.

"The market for natural, organic and health foods is a dynamic and rapidly growing one. A recent *Wall Street Journal* article named this industry as one of the ten highest growth industries for the 1970s. The National Nutritional Foods Association [NNFA] estimates there are about 250 manufacturers and distributors in the industry whose total sales were estimated by Dr. Dennis Wood, of Arthur D. Little, to have grown from \$140 million in 1970 to \$200 million in 1971 and possibly \$400 million in 1972. These products are sold in over 3000 independent stores and by many food chains. Their level of importance is indicated by the recent printing of a separate Sears & Roebuck catalogue for health and organic foods."

There is a diversity of motivations underlying consumer demand for organic foods. Three categories of demand appear to exist: Cultural, economic, and taste. Organic foods usually taste better than non-organic foods. "The growing public concern for ecology also lies behind the purchase of these foods. Presently many members of such organizations as the Audubon Society, Friends of the Earth, and the Sierra Club purchase organic foods to boycott the farmers and chemical industries whose use of pesticides and artificial fertilizers the groups consider harmful to the environment. The many life styles and philosophies that are loosely grouped as 'counter culture' also underlie the motivation to purchase organic foods. Youth predominates in this category, but some spokesmen are such notables as René Dubois and Buckminster Fuller. In its broadest terms, the 'counter culture' is a search for a better answer to man's modern pattern of life. Man's present life style has led to a dangerous disruption of his environment."

"In fiscal year 1972 the company attempted a vigorous

program of distributor sales aimed principally at broadening its market geographically and increasing sales. This program was successful in increasing sales, but its implementation required a rapid and inefficient expansion of the work force and substantial price discounts on distributor products. By consequence, the company's overall gross margin contracted, while its operating expenses increased, resulting in a 10-month net loss of \$50,000 on sales of \$2.8 million." Since that time distributor sales were effectively discontinued and substantial numbers of personnel were laid off. Gross margins have returned to their previous levels.

"Since its founding, the company has never employed a salesman full-time or run a continuous advertising campaign. Sales growth has been largely in response to externally developed demand and limited by capital."

Photocopies show the following Erewhon-brand labels: Maple granola, Peanut butter, Apple juice, Olive oil, oil of sunflower, corn germ oil, oil of soybean, short grain brown rice (organically grown), whole wheat flour, hacho miso (soybean paste). Photos also show the front and interior of an Erewhon retail store. Address: 6 Central Row, Hartford, Connecticut 06103.

724. Chico-San Inc. 1972. Products (Document part). In: Midwest Natural Foods Distributors, Inc. 1972. Catalog and price list. Nov. 1. Ann Arbor, Michigan. 58 p. See p. 7-8.

• **Summary:** Rice cakes, Buckwheat cakes, or Millet cakes (salted or nonsalted, 3½ oz). Yinnies rice candy (3½ oz). Rice chips or Corn chips (5 oz). Lima Tamari soy sauce (8 oz, pint, or quart). Miso soybean puree (8 or 16 oz). Sesame salt (2, 4 or 8 oz). Sesame salt (4, 8, or 16 oz). Sea salt, white unrefined (1 lb). Salt plums (4 or 8 oz). Kuzu (wild arrowroot) (2 oz or 4 oz). Wholewheat spaghetti (OG [=organically grown], 8½ oz). Buckwheat spaghetti (8½ oz). Wholewheat macaroni (OG, 12 oz). Buckwheat macaroni (12 oz). Azuki beans (8 oz, 1 lb). Wild ginseng root (½ oz). Wild ginseng powder (25/6-pkts). Ohsawa twig tea (4 or 8 oz). Mu tea-Lima, more ginseng (24/2 or 24/8 pkts). Mu tea-Osaka [Japan] (24/2 pkts [also called "16 Herb Tea." Label shows ingredients: Ginseng, Ligusticum, Paonia root, cypress, orange peel, ginger, Rehmannia, cinnamon, cloves, peach kernels, Coptis, liquorice root, Cnicus, Atractylis, Moutan, Hoelen]), Green tea, natural leaf (6 oz). Lotus root tea (1 3/4 oz). Rice cream (OG, 1 or 2 lb). Kombu, kelp size (3½ oz). Tooth powder jar (½ jar).

Appliances: Food grater (with or without well).

Vegetable knife-square end. Fish knife-pointed end. Mortar (suribachi, small or large). Pestle-wooden. Vegetable press. Oil skimmer for tempura. Vegetable scrub brush (small or large). Soysauce tableserver-glass. Rice paddle-bamboo. Chopsticks-lacquered. Chopsticks-long cooking.

At the bottom is the Chico-San spiral logo.

Note: Many of these products are imported from Japan. Address: [Chico, California].

725. **Product Name:** Oil of soybean.

Manufacturer's Name: Erewhon Trading Co., Inc.

Manufacturer's Address: 33 Farnsworth Street, Boston, MA 02210. Phone: (617) 542-1358.

Date of Introduction: 1972 November.

Wt/Vol., Packaging, Price: One quart glass bottle.

How Stored: Refrigerated.

New Product-Documentation: Advest Co. 1972. Nov.

"Private placement \$500,400. Erewhon Inc." On page 29 is a photocopy of the label for this product. The handwritten text reads: "Erewhon oils are pure and complete oils which are freshly pressed from natural vegetable sources. They are absolutely free from any chemical processing or refining. This unique oil contains natural lecithin, vitamin E, and unsaturated fats. Ideal for salads, baking, and sauteing. This oil should be kept in a cool place after opening and used within a reasonable time. Any cloudiness or sediment in the oil is an integral part of nutritious, unrefined oils. Product of U.S.A. Distributed by Erewhon, Boston 02210, L.A. 90230." An illustration (line drawing) shows about 12 soybean pods hanging below 4 soybean leaves.

726. Glycer, John. 1972. Diet healing: A case study in the sociology of health. *J. of Nutrition Education* 4(4):163-66. Fall. [7 ref]

• **Summary:** "There is an increasing interest in 'natural' and 'health' foods. This study compares and contrasts the attitudes, beliefs, and habits of the new 'hip' groups with those of the older movement." This article is based on research conducted during the summer of 1971 under a National Institutes of Health grant. Twenty-three questions were asked of the new groups, and the results tabulated. The older 'health food faddists' wrote books that about half the members the hip group read. Adelle Davis's books were the most popular. Others were *Zen Macrobiotics*, by George Ohsawa (1965); *Mucousless Diet Healing System*, by Ehret [1924?]; and *Back to Eden*, by Jethro Kloss (1939).

On Ninth Avenue in San Francisco are three 'natural' foods stores near each other. Two are actually part of New Age Natural Foods, which grew so large it had to move the granary section to another storefront. Fred Rohe is the owner; he sells no meat and the dairy products come from certified raw milk. Address: Univ. of California Medical Center, San Francisco.

727. Rodale, Robert. 1972. "Chinese yogurt," a gift from the Orient. *Prevention (Emmaus, Pennsylvania)*. Nov. p. 35-42.

• **Summary:** The author uses the term "Chinese yogurt" to refer to tofu, which he praises. "The Chinese practice is to precipitate the solids in soy milk by cooking it and then mixing in gypsum, which is calcium sulfate. The solids drop to the bottom of the container, and the liquid is filtered off the top. Then moisture is pressed from the solids. The

resulting product is called bean cake, bean curd, dow foo yuen (Chinese) or tofu (Japanese). Bean curd is the most commonly used name for it in this country, but I prefer calling it tofu, a name which is gaining in popularity and sounds much more appealing. There is a close parallel between the process for making tofu and the technique for making yogurt. While soy milk is precipitated with magnesium sulfate, or sometimes calcium sulfate, yogurt is curdled by bacteria... I called tofu 'Chinese yogurt' in my title, because tofu is in fact remarkably similar to yogurt. They are both high protein foods, and each in its own way has other specific health values."

"To us, tofu offers the great possibility of providing an alternative to meat, an expensive food that is now a feature of almost every American meal. Both for cost and nutritional reasons, we are going to have to find other things than meat to eat—and tofu could well be what we are looking for."

"On the West Coast, tofu is rapidly growing in popularity. A few years ago you could get fresh tofu only in Oriental food stores. Now it is being sold in many California supermarkets and natural food stores. You can buy canned tofu almost anywhere in the country where gourmet foods are sold. The canned kind has almost the same flavor as fresh tofu, but is more expensive and lacks the soft, creamy texture of the fresh product." A follow-up article in the July 1972 issue of *Prevention* magazine (p. 132-33) is titled "Lime juice improves soy flavor," by John de Haan (Huntington Beach, California). He boiled whole soybeans with lime juice and loved the flavor of the finished product.

Note: This is the earliest document seen (Sept. 2000) that compares tofu with yogurt, or that calls tofu a kind of yogurt, or that notes the similarities in the way these two foods are made.

728. *SoyaScan Notes*. 1972. Chronology of soybeans, soyfoods and natural foods in the United States 1972 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1972 Jan. Janus begins operation as a macrobiotic natural foods distributor in Seattle, Washington. It is founded by George Gearhart and Blake Rankin.

1972 Feb. Tree of Life in St. Augustine, Florida, starts distributing natural foods. Founded by Irwin Carasso, this company would soon become the largest and most successful of its type.

1972 March. The Farm, a large spiritual and vegetarian community in Summertown, Tennessee, sets up a small "soy dairy" to make soymilk and tempeh for members, whose vegan diet contains no animal products, not even dairy products or eggs. This is the earliest known tempeh produced in a Caucasian-run tempeh shop in the U.S., although it is not sold commercially. The soymilk is rationed for use by babies and children.

1972 Sept. Frank Shorter wins the Olympic marathon,

the first marathon victory by an American. A major boost to interest in running, exercise and fitness.

1972 Oct. William Shurtleff and Akiko Aoyagi start full time research on tofu in Japan, writing a book on the subject.

1972. *Soybeans: Chemistry and Technology*, by A.K. Smith and S.J. Circle, published.

1972-74. World food crisis years. Photos of malnourished and starving children appear on the covers of leading magazines and in the TV news.

1972, July. Soviet wheat deal. The USSR suddenly purchases 18 million tons of wheat from the USA via Continental Grain, making it the largest food import deal in history. This starts an era of expanded U.S. agricultural trade with socialist countries. This massive Soviet purchase ends the long postwar period of food price stability.

1972. National Soybean Project established in Brazil.

1972. Soybean research starts at the International Institute of Tropical Agriculture (IITA), in Ibadan, Nigeria. The focus is on soybean production and varietal development. This gradually becomes the most important soybean research program in Africa, and plays a key role in helping national soybean research programs in Africa to get started.

729. Erewon Inc. 1972. Distributor price list. Boston, Massachusetts. 4 p. Effective December 8, 1972.

• **Summary:** Includes: Three varieties of Wehah Farms organically grown rice in 50 lb bags ("Colusa" and Golden Rose" are both short grain; the third is sweet brown rice). Azuki beans (100 lb bags). Tamari & miso: Tamari soy sauce (8 oz, pints, quarts, half gallon, gallon, 4.7 gallon can). Hacho miso (30 x 1 lb or 44 lb keg). Mugi miso (24 x 1 lb or 44 lb keg). Kome miso (20 x 1 lb or 44 lb keg). Granola. Rice cream (toasted). Cereals: Infant cereal (Koko). Tsampa Tibetan barley cereal. Stone ground flours (incl. Soybean flour, full fat, organic; brown rice flour, organic). Grains & beans (incl. soybeans, organic' Barley, pearled).

At the bottom of the last page: "Thank you very much for your order. We try to get our distributor orders out as quickly as possible, but you should allow seven to ten days to be on the safe side... When placing orders please call Bill Garrison or Paul Hawken and when checking on shipping dates and rates, please check with Doug Bray. Thank you."

An illustration at the top left corner of the front page is clip-art of a man cutting barley. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

730. **Product Name:** Soy Flour, Roasted.

Manufacturer's Name: Arrowhead Mills, Inc.

Manufacturer's Address: Box 866, Hereford, TX 79045. Phone: (806) 364-0730.

Date of Introduction: 1972.

Ingredients: Soy flour (roasted).

Wt/Vol., Packaging, Price: 30 lb bulk.

How Stored: Shelf stable.

New Product–Documentation: Arrowhead Mills. 1978. Sept. “Price list.” (30 lb bulk).

Talk with John Goodman of Arrowhead Mills. 1983. Dec. 20. To make full-fat soy flour, they clean soybeans and flake with a micronizer / flaker; most of the hulls are aspirated off. They then grind in a hammermill. They started making this product in about 1972. Production is now about 300,000 lb/year in 1.5 and 30 lb bags and another 100,000 lb/year in mixes, such as pancake and waffle mix and as a fortifier for unbleached white flour. For heat, both natural gas burners and infrared heat are used. The infrared heat keeps the beans plastic. They also make full-fat soy grits, pretoasted, and used in their 7-grain cereal (after running through a flaker).

• **Summary:** Emphasis on raw foods.

733. Petro, Berrangé. comp. 1972. *Natural foods: nutritional value. A bibliography*. Johannesburg : University of the Witwatersrand, Dept. of Bibliography, Librarianship and Typography. vi + 59 p. 20 cm. *

734. **Product Name:** Tamari Cashews, Tamari Sunflower Seeds, or Tamari Almonds.

Manufacturer’s Name: Westbrae Natural Foods.

Manufacturer’s Address: 1336 Gilman St., Berkeley, CA 94706.

Date of Introduction: 1972.

New Product–Documentation: Ad (full-page, color) in *Whole Foods*. 1979. Jan. p. 8. “We believe if you’ve seen one health food nut, you haven’t seen them all!” A large photo with diagram shows Westbrae’s many tamari nuts, nut mixes, and trail mixes, including Tamari cashews, Deluxe tamari nut mix, Tamari almonds, Tamari sunflower seeds, Tamari nutroaster’s mix, Chisholm trail mix, and Jubilee trail mix. “For more information write Westbrae, P.O. Box 8611, Emeryville, California 94662. All Tamari roasted nuts and trail mixes are available in bulk and a select few in two or ten ounce Panda packages.”

Interview with Gordon Bennett. 1987. Aug. 28. Westbrae’s first food containing soy. The “tamari” (actually shoyu) was imported from Japan.

Talk with Bob Gerner. 1992. May 11. Bob thinks that Chico-San was the first company to make tamari-roasted nuts (by early 1971), and that Westbrae was the second—before

Erewhon. This type of product was later made by many natural foods distributors and became popular nationwide. But Chico-San’s product was (in Bob’s opinion) crude. They would cover almonds with soy sauce then toast them; the soy sauce would burn on the outside and not taste very good. After Bob tasted Chico-San’s product, he felt he could improve on it. Westbrae was the first company to process the nuts in an efficient way that made a good-tasting product. After Westbrae Natural Foods opened for business in Feb. 1971, Bob began to buy 1-2 tins of cashews at a time. Then he took a gamble, buying 50 cases. He bought them to use in their best-quality granola—which was cashew granola, but he had no idea what to do with the rest of them. Bob and Gordon Bennett developed the process for making tamari-roasted nuts by accident at Gilman Street. They had no idea it would work. The trick was to roast the nuts (they started with cashew pieces and sunflower seeds) in a small (home-model) horizontal rotating drum roaster (it held 25 lb at a time), then to dump the roasted nuts into a large metal bowl (the kind used at bakeries). Now pour on soy sauce (shoyu, which Westbrae initially purchased from Chico-San) from a gallon jar, and mix it in manually with a wooden paddle. Keep mixing until the heat from the nuts (375°F) had evaporated all the moisture in the soy sauce and made it stick to the nuts in a light, even coating. Bob recalls, “We guarded this secret process with our lives, since we felt we had a superior product. We didn’t tell anyone we put on the liquid soy sauce after roasting.” Westbrae distributed this product widely and later developed it into a very big line.

Bob also remembers a fellow in Berkeley named Crazy Robert, who lived with his mother, and who used to toast nuts and seeds with soy sauce in his home and sell them at Ma Revolution on Telegraph Avenue in Berkeley. Bob talked with him and he brought his nuts from Westbrae. Bob thinks that Westbrae and Jerry probably developed their tamari-roasted nuts independently but at about the same time. Jerry used whole cashews and Westbrae used cashew pieces. Note: Jerry’s process became the basis of Erewhon’s tamari roasted seeds and nuts via Nik Amartseff, who initially worked at New Age Natural Foods in Palo Alto. Bob thinks that store opened in 1971-72.

735. Aihara, Cornelia. 1972. *The Chico-San cookbook*. Chico, California: Chico-san, Inc. 126 p. Illust. 22cm. by Nan Schleiger. Reissued in revised form as *Macrobiotic Kitchen* by Japan Publications in 1982.

• **Summary:** All recipes are numbered and pages are unnumbered. Soy-related recipes include: 6. Brown rice in soy sauce. 16. Black [soy] beans and brown rice. 23. Inari-sushi (with agé). 24. Ohagi of 3 colors (with roasted soybean flour and miso). 32. Ojiya (with miso or soysauce). 37. Roasted rice (with black soybeans). 38. Musubi (with miso). 55. Kinako mochi. 76. Soy bean stock. 87. Oden (with agé and soy sauce). 90. Kenchin soup (with agé). 95. Cream

of onion soup (with miso). 96. Hacho miso soup. 97. Mugi miso soup. 98. Kome miso. 99. Oil miso. 100. Sesame miso. 101. Walnut miso. 102. Miso salad dressing. 103. Shiguri [sic, shigure] miso (with scallops). 104. Tokiwa miso (with shiitake mushrooms, citron, and walnuts). 105. Oyster miso. 106. Tai miso. 108. Nuka miso zuke (vegetables pickled in rice bran and miso). 121. Miso pickles. 137. Daikon with agé. 138. Daikon with miso. 143. Turnip with sesame-miso. 159. Burdock-miso soup. 162. Burdock with miso. 180. Onion-miso sauce. 182. Scallion-miso. 191. Carrots with miso. 192. Carrots with soy sauce. 200. Dengaku (with miso). 220. Roasted soybeans. 221. Soybean soup. 222. Soybeans with vegetables. 223. Soybeans with miso. 224. Soybean tempura. 225. Mashed soybeans with tarako (cod fish roe). 226. Soybean croquettes. 227. Soybean potage. 228. Soybean muffins. 229. Kidney beans with miso. 237. Shigiyaki (small eggplants with miso). 241. Eggplant miso pickle. 267. Rolled shiso leaves with miso. 291. Tofu kuzu sauce. 292. Tofu chili-nabe. 293. Tofu with vegetables. 294. Tofu salad. 295. Okara rice. 296. Torimotsu okara (with chicken giblets). 297. Okara soup. 298. Okara croquettes. 299. Egg tofu. 308. Koi-koku (carp soup with miso). 311. Loach soup (with miso). 312. River fish with miso sauce. 320. Mackerel with miso. 335. Coltsfoot with miso. 341. Dandelion miso-ai [miso-ae]. 345. Horsetail with miso-ai. 359. Watercress miso-ai. 361. Nobiru goma miso (with wild onions). 369. Shiromiso shiru [sweet white miso soup]. 371. Nimame (black soybeans). 400. Shoyu bancha (twig tea). 408. Black bean tea. 409. Amasake (homemade from koji rice and sweet brown rice). 456. Amasake manju. 461. Soba with miso-ame. 515. Tekka (with Hacho and/or mugi miso). 516. Seitan (homemade). 517. Soy sauce (homemade). 518. Miso (homemade). 519. Tofu (homemade using nigari). 520. Nigari (homemade). 521. Amasake (homemade from koji rice and sweet brown rice flour).

Cornellia Aihara was born with a heart valve defect. She was told by doctors that she could never bear children and would probably not live past her nineteenth year. She proved them wrong on both counts. In 1955 she came to America from Japan at the invitation of Herman Aihara, a man she knew only through correspondence, and they were married. Within several years their two children were born.

Cornellia has applied herself to the teaching of macrobiotic cooking, childcare, home remedies, and philosophy since 1960. Address: Chico, California.

736. Brown, Edith; Brown, Sam. 1972. *Cooking creatively with natural foods*. New York, NY: Hawthorn Books. xvii + 302 p. Illust. Index. 24 cm.

• **Summary:** This vegetarian cookbook has been 35 years in the making. Edith was born in 1920, and Sam in 1917. “It really goes back to the birth of Brownies [Health Food Restaurant in New York City]. That was in 1936. In the beginning we were just a sliver in the wall, hardly

a soybean’s throw from Union Square in New York City. The address hasn’t changed but *we* have.” Brownies began as a tiny shop selling natural foods to people who lived or worked in the neighborhood. Today we are a restaurant-bakery -country store complex sprawled across Siamese-twin brownstone houses.”

“The expansion of Brownies began modestly in 1938. Sam acquired a vegetable juice extractor and installed four stools in the shop. Vegetable-juice bars have long since become old hat, but the one on East 16th Street happened to be the first one in the country.

“The juice bar won a warm welcome. Customers ‘dug’ the oral vitamin shots being dispensed from the extractor. Soon people were coming from precincts far beyond the neighborhood to ‘get juiced.’ The word spread. There appeared a distinguished visitor in the person of the late Clementine Paddleford, the influential food editor of (alas, also the late) New York *Herald-Tribune*. Miss Paddleford came, sipped, and wrote rapturously about her discovery. That rave review really put Brownies on the map.” (p. xi)

In the chapter titled “The natural foods cupboard: A glossary” we find good descriptions of various soyfoods: Soyameat (canned, Chicken or Beef Style), soybean granules, soybean powder [flour], soybeans (canned, like Boston baked beans), soybeans (dried), soy nuts [oil-roasted soybeans], Stripple Zips (“Bacony, crunchy, smoky bits of vegetable protein made from soy and yeast. A wonderful meatless flavoring.”), tamari (soy) sauce, VegeBurger (canned, made from soy, wheat, and vegetables), VegeChee [tofu], Vegelona.

Soy-related recipes include: Pizza supreme (with Fearn Whole Wheat Soy-O Mix, p. 17). Soy-stuffed mushrooms (with canned green soybeans, p. 17-18). Dill soybeans (p. 74). Triple-treat bean salad (p. 80). Crunchy soybean salad (with canned green soybeans and Chicken-Style Soyameat, p. 81). Soy-nut meatballs (with canned soybeans in tomato sauce, canned VegeBurger, soybean granules, and Toasted Soy Nuts, p. 109-10). Soy, garbanzo & millet pie (p. 126).

One chapter is titled “The miraculous soya—and other members of the clan (bean)” (p. 129-45). The introduction notes: At Brownies we feature soybeans on the relish tray, on the salad menu, and as a meat substitute. We use soybean flour in almost everything that comes out of our ovens.” Soy-related recipes include: Basic soybeans. Zippy soybean salad. Minty soybean salad. Soybean ratatouille. Scrumptious soy pudding. Soy walnut loaf. Protein casserole (with Beef-Style Soyameat). Lentil soy casserole. Tricolor bean salad (with toasted salted Soy Nuts). Exotic bean salad. Neapolitan bean salad. Peppy bean puree. Any-night beans.

Soy recipes with pasta (p. 175-78): Savory soy spaghetti. Soy spaghetti with saucy franks. Corny spy spaghetti. Spaghetti protein casserole (with soybean spaghetti, green soybeans, and Proteena). Soy elbows in parsley mushroom sauce. Oriental elbows. Soya blueberry muffins (p. 248).

Crunchy soy-nut spinach cake (with soybean powder and unsalted soy nuts, p. 264).

Brownola plus (like Granola, p. 168). Address: New York, New York.

737. Cadwallader, Sharon; Ohr, Judi. 1972. Whole earth cook book. Boston, Massachusetts: Houghton Mifflin Co. Published in association with San Francisco Book Company. xix + 120 p. Illust. by Anita Walker Scott. Index. 24 cm. Preface by Paul Lee. [3 ref]

• **Summary:** All 138 recipes in this natural foods (but not vegetarian) cookbook have been tested at the Whole Earth Restaurant. Soy-related recipes include: Cheese soybean soup (with cooked whole soybeans, p. 5). Soybean spread (p. 27-29). Soybeans as a good “alternative” source of protein (p. 32). Cold-pressed soy oil (p. 33). Soybeans and soybean products (incl. soy grits, tofu or soybean curd or soy cheese, soy and/or wheat macaroni noodles, p. 34). Basic soybean recipe (not pressure cooked, p. 36). Super soybean casserole (p. 37). Tofu-egg omelet (p. 37). Using gluten flour with soy flour in breads (since soy flour is heavy, p. 73). Quick breads and muffins (using soy flour, p. 82).

The chapter titled “Nonmeat protein dishes” notes (p. 34) that soybeans, which are native to the Orient, are relatively new to this country. “They are amazingly healthful, as high in protein as meat. They are considered a complete protein, or one that contains the eight amino acids. Since they taste different from other legumes,... they need careful, imaginative preparation.” The light, soft consistence and bland taste of tofu “make it easy to use as an addition or substitute in your favorite recipes.” Address: 1. Manager, Whole Earth Restaurant, Univ. of California campus, Santa Cruz, California; 2. Organic gardener and housewife, San Juan Bautista, California.

738. Erewhon Trading Co. 1972. Large Erewhon labels for packaged macrobiotic products. Some are organically grown. Boston, Massachusetts.

• **Summary:** These labels (printed black and russet on beige) were used for Erewhon’s first line of large packaged (non-bulk) food products. Wally Gorell designed, hand-lettered, and created these innovative labels (have you ever seen a label with a recipe on the front panel?) in late 1971 or early 1972.

Wally writes: “Each double-cellophane-bagged product had a label slipped in between the two bags. The weights are printed on the labels. The recipes were for the consumers. The idea was to get them to try new ways of using the products. We were aiming to attract new buyers with the packaged line and wanted to provide recipes so that they’d actually like the food when they prepared it so that they’d incorporate it into their diet.”

“I started my college study at the Rhode Island School of Design, intent on a career in graphic- and book-design.

“Paul [Hawken] essentially stole the design for our labels from some other company, it may even have been Arrowhead Mills; I can’t recall. I think he may have had someone else do the drawings, though I believe the idea for the line drawings of furrowed fields was my idea. I never noticed that little monogram [at the bottom center of each label] before—looks like KvH to me. Perhaps it’s the signature of whoever executed the drawings.

“Helvetica (the typeface for the word ‘erewhon’ on the labels) was all the rage then and continued to be for years. Using all lower case type was also in fashion. I can’t account for the origin of the style—perhaps it was influenced by e. e. cummings who wrote his poems all in lower-case. Anyway, the lack of capital letters said ‘modern.’

“I would describe the labels as, ‘printed on cream-colored parchment paper [meant to resemble real parchment, made from animal skin, in that is stiff and somewhat translucent];’ the labels have a russet border and the ‘erewhon’ logo is printed in the same color. The illustration, the product name, and the recipe are printed in black.

“Note that the short, medium and long grain brown rice labels each have a different recipe.”

The labels: (1) Short grain brown rice. (2) Organically grown medium grain brown rice. (3) Organically grown long grain brown rice. (4) Organically grown corn meal. (5) Organically grown rye flakes. (6) Rolled oats. (7) Organically grown wheat flakes. (8) Organically grown stone ground whole wheat flour.

These recipes were sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010. Address: Boston, Massachusetts.

739. Erewhon Trading Co. 1972. Small Erewhon labels for packaged macrobiotic products. Some are organically grown. Boston, Massachusetts.

• **Summary:** These labels (printed black and russet on beige) were used for Erewhon’s first line of small packaged (non-bulk) food products. Wally Gorell designed, hand-lettered, and created these innovative labels (have you ever seen a label with a recipe on the front panel?) in late 1971 or early 1972. He also created and tested the recipes for each of those recipes himself.

Wally writes: “Each double-cellophane-bagged product had a label slipped in between the two bags. The weights are printed on the labels. The recipes were for the consumers. The idea was to get them to try new ways of using the products, We were aiming to attract new buyers with the packaged line and wanted to provide recipes so that they’d actually like the food when they prepared it so that they’d incorporate it into their diet.”

(1) Organically grown alfalfa seeds. (2) Organically grown medium grain brown rice. (3) Organically grown long grain brown rice. (4) Chickpeas. (5) Green split peas. (6) Green lentils. (7) Infant cereal. (8) Organically grown

mung beans. (9) Pearl barley. (10) Organically grown pinto beans. (11) Pumpkin seeds. (12) Sunflower seeds. (13) Red lentils. (14) Stone ground rice cream. (15) Sesame seeds, (16) Wheat kernels. (17) Wheat pilaf. (18) Whole millet. (19) Organically grown soybeans (served baked).

These recipes were sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010. Address: Boston, Massachusetts.

• **Summary:** This photo was taken by Susan Hillyard, now in Santa Cruz, California. <http://susanhillyard.com>.

741. Gaskin, Stephen. 1972. The caravan. Berkeley, California: The Bookworks. 250 p. Illust. (many black and white photos). No index. 24 cm.

• **Summary:** In early 1966, Stephen Gaskin, then a teacher of English at San Francisco State University, began to hold Monday Night Class as part of the Experimental College. Eventually up to 1,500 people would attend each class. By the late 1960s Stephen had become a vegetarian and occasionally at the classes he would talk about the importance of a vegetarian diet as part of a peaceful lifestyle, noting that if people had to kill the animals they ate, there would be a lot more vegetarians. A strong community began to evolve out of the classes; many of these people moved to or toward vegetarian diets.

early October of 1970, Stephen and about 200 members of the community set out in 50 school buses on The Caravan, a nationwide 4-month speaking tour that continued until February 1971. On the trip, Stephen spoke and answered questions about spiritual awakening and practice, love, peace, truth, god, paying attention, caring for the planet, changing from a material to a spiritual life, and dietary reform. By December 1970 the community had decided to buy a farm and, after returning to San Francisco, they left for Tennessee on 10 Feb. 1971 to look for land. They arrived in Nashville in March, moved to Louis County in May, and finally on 3 September 1971 bought and moved onto a 1,700-acre farm at 156 Drakes Lane, Summertown, Tennessee. There they created a spiritual farming community.

The structure of the book is a series of many interviews conducted along the way as the Caravan moved eastward toward the East Coast (Pennsylvania) and then back to San Francisco. The first interview was on 15 Dec. 1970 at Mount Angel College in Mount Angel, Oregon. The last was on 10 Feb. 1971 at Sunday Morning Service, Sutro Park, San Francisco, California.

The book contains many superb photos and a few illustrations and diagrams.

Note: The Farm was probably the first group representing the new consciousness of the 1960s and 1970s to get involved with soyfoods. Rodale Press (Emmaus, Pennsylvania), which pioneered organic gardening and farming in the USA got involved with soyfoods, at

In

about the same This is the earliest document seen (April 2017) concerning the work of The Farm in Summertown, Tennessee; although soyfoods are not mentioned, individuals on The Caravan almost certainly enjoyed soyfoods along the way, and this book describes the lead-up to their communal work with soyfoods.

Letter from Dennis Martin, who drove a bus in the Caravan and was one of the original pioneering residents of The Farm. 2008. Nov. 19. "The name of the farm we stayed at in Tennessee before we bought The Farm was called the Martin Farm. It was owned by a publisher in Nashville, named Mr. Martin, and was his family farm of 1,000 acres which he loaned to us while we went on looking for a farm to buy. I think we stayed there for about 9 months to a year in 1971. During that time Joseph Pepe and I were manning the gate when a local farmer named Carlos Smith came by and asked Joseph and me to help him buck hay. After three days of working for him, he suggested selling his farm to us for 'a fair price' of \$70,000. We took up the offer and the Smith Farm became The Farm, which we occupied in the latter part of 1971.

"In 1973, Stephen found out that Joe Evelyn Walker, our next door neighbor, was working a local factory job at low pay to keep from foreclosing her 800 acre farm. Stephen contacted a guy named I.W. Schaeffer, who bought her farm so she didn't have to go under. Shortly thereafter, we bought that 800 acres for \$100,000, which brought the Farm realty to 1,800 acres."

Note: The Martin Farm was later subdivided and bought by individuals from The Farm in 20 acre parcels. "The Martin Farm is about a half mile away from the Farm and both are in Lewis County, Tennessee." Address: Summertown, Tennessee.

742. Goldbeck, Nikki. 1972. *Cooking what comes naturally: A natural foods cookbook featuring a month's worth of natural-vegetarian menus*. Garden City, NY: Doubleday & Company, Inc. x + 230 p. Illust. by Bill Goldsmith. Index. 22 cm.

• **Summary:** In the section on Flour (p. 14-15), soy flour is mentioned. Under seasonings, the author advises (p. 22) to "Use Tamari or pure soy sauce, which has only water, whole wheat flour, and salt added." Recipes for Fried Brown Rice and Vegetables (p. 52) and Cabbage Salad with Carrot Dressing both use "Tamari Soy Sauce" and notes: "It is sold in all health food stores. If you cannot find it, substitute pure soy sauce to which no flavorings, colorings, or artificial ingredients have been added." Page 131 gives a recipe for Tamari Broth. In the section on "Ingredient Substitutions" under "Dairy Products," 1 cup milk is said to equal 1 cup soy milk. Address: R.D. 1, Box 452, Woodstock, New York 12498.

743. Goldsmith, Maureen. 1972. *The organic yenta*. New

York, NY: Antheneum. xii + 179 p. 23 cm.

• **Summary:** Note: *Webster's Dictionary* defines yenta (derived from the Yiddish *yente* = vulgar woman, probably from the name *Yente*, and first used in 1939) as "one that meddles; also a blabbermouth or gossip." The author describes a yenta as "a woman who likes to stick her nose into everybody's business."

Being a single, 25-year-old hippie-type young woman of Jewish ancestry "whose zest for eating good food is surpassed only by her zest for serving good food," she formed the Organic Yenta Eating Club, which allowed her to cook for 20-30 friends at her house. Initially her meals were meat-based continental favorites. Eventually she started to cook natural food, vegetarian recipes to please a man she was dating. He favorite foods (shrimp, lobster, and crab meat) were considered *traif* (not to be eaten) by Jews. Then she recalled the important distinction in Jewish cookery between meat meals (*fleischig*) and nonmeat meals (*milchig*)—a distinction that many non-Jews (*goyim*) are not aware of. So she developed many Jewish vegetarian recipes.

Soy-related recipes include: Soy sprouts (p. 19-20). Almond fried rice (with fried tofu and soy sauce, p. 48-49). Lentils and nuts (with fried tofu, p. 57). Tofu (homemade from soy flour, p. 58). Organic yenta's "meat loaf" (with cooked soybeans, p. 58-59). Roasted soybeans (p. 60). Soy-cabbage salad (with cooked soybeans, p. 117-18). Address: San Francisco, California.

744. Hewitt, Jean. 1972. *The New York Times natural foods cookbook*. New York, NY: Avon. 434 p. Index. 18 cm. [147* ref]

• **Summary:** Contains a surprisingly large collection of soy-related recipes, and several innovative uses for tofu, considering this relatively early date. The following recipes list soy in the title. Note that all use cooked or dry soybeans as the main soy ingredient unless otherwise stated in the title or in parentheses: Soy cheese appetizer (with tofu, p. 7). Soybean dip (p. 14). Vegetable-soy soup (with "1½ cups cooked soybeans {or 15½-ounce can, drained; see p. 157}," p. 47). Soy chili (p. 73). Soy meat loaf (p. 80). Vegetarian sausages (p. 111). Soybean soufflé (p. 111). Soybean and nut loaf (p. 112). Soybean and vegetable casserole (p. 112). Pressure cooked soybeans (p. 113). Baked soybeans I and II (p. 113-14). Soy burgers (p. 115). Soy-rice burgers (p. 115). Soybean patties (p. 116). Broiled soy cakes (p. 116). Curried soybeans (p. 155). Soybean pistou (p. 156). Soybeans with tomato sauce (p. 156). Cooking dried soybeans (with 2 cups {1 pound} dried soybeans, green or yellow," p. 157-58). Soybean cheese or curd (p. 158; how to make tofu at home using 1½ cups dried yellow soybeans and 1/3 cup lemon juice; this recipe will not work since the soybeans are never ground!). Marinated soybean salad (p. 181). Avocado-tofu dressing (p. 187). Basic tofu dressing (p. 190). Corn meal mush and soy grits (p. 211). Soya-carob bread (with soy

flour, p. 257). Soy butterscotch pudding (with soy milk, p. 322). Soy nut coffeecake (with soy flour, full fat or low fat, p. 353). Soya cookies (with soy grits, p. 376). Soy mayonnaise (with soy flour, p. 394). Soybean spread (with “½ cup mashed cooked soybeans or soy flour,” p. 394).

Although this book is not wholly vegetarian, it does contain a large selection of vegetarian entrees.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Soy burger” (or “soy burger”), regardless of capitalization.

745. Horton, Lucy. 1972. *Country commune cooking*. New York, NY: Coward, McCann & Geoghegan. 232 + [8] p. Illust. by Judith St. Soleil. Index. 24 cm.

• **Summary:** A nostalgic memoir (for those who came of age at this time) of the world of young Americans in communes in the early 1970s, with many fine illustrations (see p. 27). It gives a colorful, accurate portrayal of how the counterculture ate in the early 1970s.

The author, raised in New York City and educated at Bryn Mawr (Pennsylvania, with a major in classical archaeology), earned her traveling money by working as a live-in maid and cook for a rich “Park Avenue Lady” before embarking on the project that became this book. She hitchhiked to San Francisco, arriving in June 1971, then spent most of the next year visiting 43 communes in 12 states and Canada, and collecting recipes from each. There she found “a New Age of Food Consciousness.” The main topic of conversation and common interest at these intentional communities was not God or sex, but food. This book, with her 150+ favorite recipes, features natural and organic foods (with lapses). Most of the recipes from California and the West Coast are vegetarian, but in New Mexico and eastward (especially New England) she was “surprised to find that vegetarianism was more the exception than the rule” (p. 81). Thus, Chapter 3 is titled “Meat (and one fish).” There are recipes for chicken, fish, deer, goat, beef, etc.

The Introduction notes (p. 15): “The *sine qua non* of commune cooking is tamari soy sauce, an unspeakably delicious fermented Japanese product available in natural foods stores which bears no resemblance to commercial soy sauce” * (Footnote: *”Kikkoman soy sauce, available in supermarkets, tastes like tamari but contains a preservative”).

“1. Soups: The commune soups I sampled were typically of mixed vegetables with a tomato or miso (p. 159) base” (p. 27).

Tamari chickbits (p. 94, with chicken). Note about soy grits (p. 114). Sprouts (p. 135-36, many kinds including alfalfa, mung beans, soybeans, from Terra Firma, Oregon). Miso Almond Sauce (p. 158-59). Tamari gravy (p. 159). Soy-related recipes include: From Chapter 2, “Vegetarian main dishes”—Donna’s soyburgers (p. 60-61, with whole soybeans, from California). Soy cheeseburgers (p. 61-62, with whole soybeans, from Moon Garden, Oregon).

Suzy’s soybean casserole (p. 63-64, from Breadloaf, New Mexico). Baked soybeans (p. 64-65, from Woolman Hill School, Massachusetts). Larry’s tofu (soy cheese) (p. 65-68, homemade tofu from whole soybeans, from Om Shanti, Mendocino County, California). Breakfast cereal with roasted, salted soybeans (p. 163). Soy spread (p. 227, with soy flour, from The Motherlode, Oregon). Soy nuts (p. 229-30, baked, soaked soybeans with oil and salt).

A photo on the back cover shows the author, age 27, with long blonde hair, granny glasses, and blue denim overalls. Says Raymond A. Sokolov: “Lucy Horton has done more than collect exotic recipes... she has assembled the crucial artifacts of a movement within The Movement.”

Also discusses (see index): Adelle Davis, gluten (wheat), granola, ground nuts, macrobiotic diet, peanuts. Address: Derby, Vermont.

746. Hunter, Beatrice Trum. 1972. *The natural foods primer: Help for the bewildered beginner*. New York, NY: Simon and Schuster. 156 p. Index. 21 cm.

• **Summary:** A natural food is one with nothing added or taken away. It implies that the food has not been treated with and does not contain any residue of pesticides or other agricultural chemicals. It must be grown on fertile, well mineralized soil. Meats, fish, and poultry are included, but they can not be injected or fed hormones, antibiotics, etc.

The chapter titled “What are the basic natural foods?” lists them in alphabetical order with a brief definition. Lecithin granules (p. 53) are made from defatted soybeans and are a rich source of phosphatides; also called “soy phosphatides.” Oils (p. 55-57) include the many vegetable oils: “corn, olive, peanut, safflower, sesame, soybean, or sunflower.” A table shows the percentage of unsaturated and saturated fatty acids in each. Notes that the term “cold pressed” is meaningless when applied to vegetable oils. The words “pressed” or “unrefined” are better. Soybeans, soy flour, soy grits, soy phosphatides (p. 60-61). Soy lecithin spread (p. 64; not recommended if it has the words “hydrogenated” or “hardened” on the label).

Soybeans have no special storage requirements (p. 86). Use soybeans as a protein food (p. 87) in the “basic four” food groups. Sprouts are good natural foods (p. 121-24), especially those made from alfalfa seeds or red clover (for flavor), fenugreek (for crispness), and mung beans (for ease of sprouting). Soybean sprouts, though highly nourishing and good-tasting, require special care to prevent molding or rotting.”

Cornell Triple-Rich Bread or High Protein Bread (p. 126), developed by Dr. Clive M. McCay and his associates at Cornell University [New York], uses this formula: “For each cup of flour, first place in the measuring cup 1 tablespoon each of soy flour and nonfat dry-milk powder, as well as 1 teaspoonful of wheat germ. Then fill the remainder of the cup with unbleached flour.” A footnote states that

commercial bakers viewed the Cornell Bread as a threat; they filed a lawsuit to prevent the formula from being used. The courts decided that the bread could be sold so long as all the ingredients were plainly printed on the label. Ironically, the ingredients in the ordinary loaf need not be listed on the label.

Under "Homemade snacks," describes how to make "Toasted soybeans" (p. 140) at home. The beans are soaked, drained, then toasted in an oven. A brief biography appears on the inside rear dust jacket. Address: New Hampshire.

747. Maier, Franz. J. 1972. Fluoridation. Boca Raton, Florida: CRC Press. *

• **Summary:** A scientific study of the subject.

748. Photographs of members of the macrobiotic community (1971-1973). 1972.

• **Summary:** (1) Wallace Gorell, with beard, smiling, 1971.

(2) Front (L-R): Lucy, Rob, Anton. Back row (L-R): Terry, Wally Gorell, Aug. 1971 at "Erewhon Farms" (location unknown; Perhaps Keene, New Hampshire).

Steve Earle recalls in an e-mail to Norio Kushi (in reply to a question from Norio). 2011. Feb. 13. "Norio, I roomed with Peter Bradford for awhile in Brookline and he also spent Christmas with us one time in South Conway. I also visited Erewhon Farms once in the summer of 1971. It only lasted for a couple of years if I remember correctly. I saw Peter Bradford over the years when visiting London with Muso, and he also came to Japan once;... Have lost track of him though. Have you tried Bill Tara?" Note: Norio knows that Peter Bradford worked at the Erewhon Farm.

(3) L-R: Wally Gorell, Nahum Stiskin, and Beverly Stiskin, in Central Park, New York City, early 1973 (winter).

These three photos were sent to Soyinfo Center by Wallace Gorell of Berkeley, California, in Dec. 2010.

749. Rodale Press. 1972. A visit with J.I. Rodale (Motion picture). Emmaus, Pennsylvania. 15 minutes, color. Directed by Burton Fox. Available from Bullfrog Films. *

• **Summary:** The Bullfrog Films website (www.bullfrogfilms.com) says this: "Portrait of J.I. Rodale, founder of organic gardening in the U.S."

"... deftly conveys a vivid and incisive portrait of an interesting personality"—Previews.

"J.I. Rodale was responsible for the whole move towards natural foods and natural products in the United States. He was also the leading proponent of organic farming. For 20 years he was treated as a crank and a faddist by all except the loyal readers of his magazines, *Prevention* and *Organic Gardening*.

"Then, in the late sixties, as the environmental crisis reached full public awareness, he found himself in the spotlight, the hero of the hour. All those warnings about the dangers of agricultural chemicals, food additives, and

loss of topsoil were suddenly found to be valid, as were his recommendations for taking vitamin C, growing your own food using compost, and exercising on a regular basis."

Address: Emmaus, Pennsylvania.

750. Smith, Evelyn. 1972. Dictionary of natural foods. New York, NY: Dell Publishing Co. *

751. Chico-San Inc. 1972? Chico-San history and outline for future development. Chico, California: Chico-San Inc. 5 p. Undated. Unpublished typescript.

• **Summary:** A good early history of Chico-San, typewritten on the company's letterhead probably by Bob Kennedy. Atop the letterhead is printed: "Macrobiotic foods, rice cakes, cereals, sea vegetables." "By 1961 eleven macrobiotic families had packed their belongings, left their jobs behind in New York City, and headed for Chico, California, in the heart of the California rice growing country. In a short time Chico-San, Inc. was formed by some of these people for the purpose of importing foods of superior quality which were not available domestically, and locally producing foods of the highest quality for distribution throughout the United States."

One of the company's first popular products was the "Rice Cake, a light cracker made from puffed up whole grain brown rice. The first "machine," imported from Japan in 1963, made one cake at a time and was a crude, hand-operated device. Soon, three more machines were tied to the original one, still hand operated. Bob Kennedy, Dick Smith, and a few others found it necessary to work twelve hour shifts, and for six and seven days at a time to meet the steadily increasing demand for the unique new cracker. In 1965 pulled shoulder muscles ceased to be a problem when the first semi-automatic Rice Cake machine was put into operation...

"Central to the guiding philosophy behind Chico-San was the search for an organically grown brown rice—the prince of grains. This search ended in 1969 when the first organically grown short grain brown rice was harvested just south of Chico, in Richvale, California. This product, grown under exclusive contract for Chico-San, further enhanced their growing reputation...

"Back in the late fifties and sixties people who were interested in food and health were called 'food faddists', or 'health food nuts.' The food products found in most health food stores at this time consisted of a vast array of vitamin and mineral supplements, super protein concentrates, natural cosmetics, and a scattering of whole grains, few of which were organically grown.

"But little by little products with the Chico-San label found their way onto store shelves. First the Rice Cakes, then natural soy sauce, Miso Soybean paste, Sesame Butter and Sesame Salt, and organically grown Brown Rice became popular...

“In the back room too is Junsei Yamazaki, who emigrated to Chico from Japan in 1963 for the purpose of producing natural soy sauce and miso for Chico-San. These two products make up the greater percentage of the imports from Japan, and are subject to high duties and shipping costs. For 17 years Junsei was a rice farmer in Japan after graduating from Tokyo University with a degree in agriculture.

“Combined with the income from Stage I, Chico-San will be ready to begin Stage III. This stage includes the construction of a plant for the production of, at first, miso, and then soy sauce.” Address: Chico-San Inc., 1262 Humboldt Ave. Chico, California 95926.

752. Photograph of Roger W. Hillyard after 1971 at a Florida Health Food Convention. 1972? Undated.

• **Summary:** Note: This photo was sent to Soyinfo Center by Susan Hillyard, a professional photographer in Santa Cruz, California. (Dec. 2010).

753. Erewhon, Inc. 1973. Erewhon visits a soy sauce factory (Ad). *East West Journal* 2(20):24. Jan. 15-30.

• **Summary:** “Soy sauce has been produced in Japan since it was introduced, along with Buddhism and the vegetarian diet, from mainland China over one thousand years ago. Today there are 5000 Japanese companies brewing a total of over 300 million gallons of soy sauce each year.

“One of these companies is Marushima Shoyu, located on Shodoshima Island, four hours by boat from Osaka through the Kii Strait. Marushima is a very old company, using traditional methods of manufacture, and it is here that Erewhon Tamari soy sauce is made. All soybeans used at Marushima are of unusually high quality, and come only from the island of Hokkaido.”

A description of the process for making this soy sauce is then given. Whole soybeans are washed, soaked, then “steamed and boiled in a 14-foot-high cooker.” Toasted whole wheat is “ground into flour, mixed with the cooked soybeans and placed in a large room, right on the wooden floor, which is kept very clean.” The *koji* is placed in vats and spring water is added. The soy sauce changes color month by month until, after about one year, it begins to turn very dark and a rich aroma permeates the storage room. It is then poured into cypress-wood tanks and left to age for two more years. Unlike this pure, aged product sold under the Erewhon label, most other brands are aged only one to three months in concrete or metal containers.

“We at Erewhon would like to thank Marushima Shoyu for the wonderful product they make available to us.”

Note: This was written by Paul Hawken. An illustration (line drawing) shows a traditional shoyu keg labeled “Marushima” and a gallon glass jar labeled “Tamari.” Address: Boston, Massachusetts.

754. Eden Foods, Inc. 1973. Catalog. 211 South State St., Ann Arbor, Michigan. Undated. Probably published about Jan. 1973.

• **Summary:** Eden Foods is now carrying Organic Soybean Flakes from Arrowhead Mills (34% protein), and a line named “Hopi Seeds” which includes soybeans, sunflower seeds, pumpkin seeds, almonds, and cashews—each dry roasted with tamari, each in a consumer snack-sized pack weighing 1.3 to 1.5 oz. Note: This “Hopi Snacks” line was developed by Eden.

Other interesting products include “Michigan Grain” (soybeans, corn, rye, and wheat grown organically in Michigan, mostly by Tom Vreeland in Ypsilanti), umeboshi plums in salt brine, and kuzu arrowroot. Address: Ann Arbor, Michigan.

755. **Product Name:** Hopi Seeds: Sunflower Seeds, Pumpkin Seeds, Almonds, Cashews, or Soybeans (Each Dry Roasted with Tamari).

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 211 South State St., Ann Arbor, MI 48108. Phone: 313-769-8444.

Date of Introduction: 1973 January.

Ingredients: Whole soybeans, tamari.

Wt/Vol., Packaging, Price: Soybeans and sunflower: 1.5 oz bag. Pumpkin, almond, and cashews: 1.3 oz.

How Stored: Shelf stable.

New Product–Documentation: Talk with Bill Bolduc, founder of Eden Foods. 1992. March 14. Erewhon was probably the first company in America to develop a line of tamari-roasted seeds and grains. Eden was carrying Erewhon’s tamari-roasted soybeans by Oct. 1972, and the full line by early 1973.

756. **Product Name:** Organic Soybean Flakes (34% Protein–Arrowhead Mills).

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 211 S. State St., Ann Arbor, MI 48108. Phone: (313) 769-8444.

Date of Introduction: 1973 January.

Ingredients: Soybeans.

Wt/Vol., Packaging, Price: 25 lb bag.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods wholesale catalog and price list. 1973. Jan. [Undated]. Eden Foods, Inc. 1973. April 15. F.O.B. Pricelist. “Soybean Flakes, organically grown (Deaf Smith, Texas).” Eden bought this product from Arrowhead Mills in Hereford, Texas.

757. Spiral Foods Inc. 1973. Mail order price list. Chico, California. 2 p. Jan. 35 cm.

• **Summary:** This single-sheet catalog and price list, photocopied front and back with black ink on tan paper, contains numerous background illustrations and the includes

the following foods: Snacks: Rice cakes, corn chips, Yinnies–brown rice candy sugarless. Condiments: Lima tamari soy sauce–aged naturally over two years, Miso–soybean puree, entirely natural, rice malt vinegar, sesame butter, sesame oil–cold pressed, sesame salt, sea salt white unrefined, salt plums, kuzu–wild arrowroot starch. Grains, flours, seeds and beans: Brown rice / sweet brown rice–short grain, organically grown. Black [soy] beans–Japan import. Azuki beans–Japan import, dainagon. Whole grain noodles. Sea vegetables. Beverages. Hygienic goods. Utensils.

Talk with Robert J. Kennedy, founder of Chico-San. 1991. Oct. 3. By about 1966–1967 rice cakes and rice chips (senbei) were beginning to cut a wedge into the mass market nationwide, so Chico-San created the Spiral Foods brand for these mainstream products, keeping the Chico-San brand for the health food market. Address: 1144 West 1st Street, Chico, California 95926.

758. National Dairy Council. 1973. Food faddism. *Dairy Council Digest* 44(1):1-6. Jan/Feb. [53 ref]

• **Summary:** Several forms of food faddism are discussed, such as organically-grown foods, natural foods, and the Zen macrobiotic diet. Address: 111 N. Canal St., Chicago, Illinois 60606.

759. *Sun (Baltimore, Maryland)*. 1973. Natural food film to be shown. March 8. p. C6.

• **Summary:** The film “Looking for Organic America” will be shown, free of charge, by Maryland Natural Food Associates on Monday, March 19, at 8 P.M. in the social hall of the Trinity Lutheran Church, 117 East Main street, Reisterstown, Maryland.

The film is about natural vs. chemical farming methods. The public is invited. For more information phone 833-1233 or 833-0800.

Note: Produced by BullFrog Films; was released in 1972.

760. Matchan, Don C. 1973. In defense of the macrobiotic diet: this expert says its misunderstood and, even worse, totally misapplied. *Let's Live*. March. p. 76-80.

• **Summary:** This is an interview with Robert Kennedy of Chico-San (Chico, California). Several photos show organically grown brown rice being harvested by large harvesters at Wehah Farms (Richvale, California). “The 1971 organic yield was 34 hundred-pound bags per acre.” Organically grown rice costs twice as much to produce with about half the yield of typical (nonorganic) rice. Two photos show Robert Kennedy.

761. Erewhon. 1973. Supplying natural food stores, co-ops, schools and communities (Catalog). Boston, Massachusetts. 12 p. Effective April 6, 1973.

• **Summary:** The number of products in Erewhon’s

catalog has increased dramatically during the past year. An illustration at the lower center of the cover is clip-art showing a man cutting barley. A message on the inside front cover is signed “Thank you all, Paul Hawken.” Below his message is a smaller reproduction of the man cutting barley and below it: “Good morning.”

Contents: Grains: Incl. brown rice (short grain, “Colusa,” OG {organically grown}, California; medium grain, “Golden Rose,” OG {organically grown}, California; medium grain, OG, Louisiana; long grain, OG, Texas; glutenous [sic, glutinous] sweet, OG, California). Wheat (Deaf Smith, hard red winter, or hard amber durum, OG, Texas; Ted Whitmer, hard red spring, OG, Montana; soft white pastry, OG, Washington [state]). Barley, pearl. Buckwheat groats. Corn. Millet. Oats. Popcorn. Rye. Cereals: Incl. Rice cream. Soybean flakes (Deaf Smith, OG). Stoneground flours: Incl. soybean flour, full fat, OG, Texas. Sweet brown rice flour, OG. Beans: Incl. Azuki beans (100, 50, or 25 lb). Soybeans (OG, Texas, 60 lb). Seeds and nuts: Incl. Almonds. Peanuts (spanish, split). Sesame seeds. Tamari & miso: Tamari soy sauce (8 oz, pints, quarts, half gallon, gallon, 4.7 gallon can). Hacho miso soy paste (1 lb or 44 lb keg). Mugi miso barley-soy paste (1 lb or 44 lb keg). Kome miso rice-soy paste (1 lb or 44 lb keg). Sea vegetables: Agar-agar, dulce, hiziki, kombu, nori, wakame, wakame root. Tea: Incl. Mu herbal beverage No. 9 and No. 16. Kukicha twig tea. Celestial Seasonings herb teas (39 flavors). Pasta: Wholewheat spaghetti, elbows, flat macaroni, and shells. Granola: Five flavors. Snacks: Incl. Corn munchies (organic corn chips with soy sauce). Chico-San corn chips and rice chips. Soybean oil (5 gallon tin). Olive oil. Peanut oil (organic, pint, quart, or 5 gallon tin). Butters: Almond Butter (Golden Farms, OG). Peanut Butter (Erewhon, old fashioned). Sesame butter. Sesame tahini. Honey (Paradise Valley, unheated, unfiltered, clover or orange). Condiments: Sea salt. Sesame salt. Tekka (vegetable-miso condiment). Unusual foods: Ame (rice and barley malt–glucose syrup). McHenry’s sorghum molasses. Kuzu arrowroot. Sauerkraut. Umeboshi (plums pickled in brine). For cleanliness: Dr Bronner peppermint castille soap. Infinity herbal products (shampoo and soap). Natural Living Company (sesame cream shampoo, sesame lotion). Orjene (herbal shampoo). Tom’s coco-orange all-purpose soap. For cooking: Knives (vegetable, utility, paring), chopsticks, rice paddle, tea strainer, “soy [sauce] dispenser” (4½ inch), oil skimmer, vegetable brush, suribachi, Chinese wok, Quaker City hand grinding mill. Austria Email iron-enamel pressure cookers. Save-a-Tree canvas shopping bags, shoulder bags, and bike bags. Flyers: Organic Merchants N.O.T. list. The Sugar Story. The Oil Story. The Macrobiotic Way. Macro-Ecology. Packaged in cellophane bags with recipes (1 lb, 1½ lb, and 2 lb): Incl. brown rice, wheat kernels, pearl barley, alfalfa seeds (OG), sesame seeds, pumpkin seeds, sunflower seeds, mung beans (sprouting), soybeans (sprouting or cooking,

OG), pinto beans, chickpeas, green lentils, green split peas, split red lentils, morning cereal (6-grain cereal blend), infant cereal (koko), tsampa Tibetan barley cereal, rice cream, soybean flour (full fat, OG, 24 oz), soybeans (OG, 2 lb).

A long note at the top of this list states: "In our retail store we like to sell 'bulk' whenever possible. But we have found that to many new customers coming into our store everyday, pre-packaged foods such as we are presenting here offer a better introduction to the world of whole-grain cookery. Each package has an appealing 'kitchen-tested' recipe on the front so that new friends unfamiliar with these foods can give them a try. Furthermore, some people prefer to buy packaged foods because they feel for various reasons that food sold exposed is not as clean or pure. There is some truth to that, of course, depending on the store, but in any case we are happy to offer a complete line of Erewhon grains, cereals and flours in attractive, biodegradable cellophane packages. We will be expanding this line of cereals and grains and welcome your comments and suggestions. Please let us know how we can serve you better."

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

762. Eden Foods, Inc. 1973. F.O.B. pricelist. 330 Maynard St., Ann Arbor, MI 48108. 3 p. Effective April 15.

• **Summary:** The subtitle reads: "Serving mid-America with natural foods." Eden Foods is now selling the following soy products: Soybean Flakes (25 lb bags, organically grown, from Deaf Smith, Texas [Arrowhead Mills]). Soy Flour (50 lb bags, organically grown, from Deaf Smith, Texas [Arrowhead Mills]). Soybeans (50 lb, organically grown, Michigan). Soy-Rice Shells (15 lb, organic, [probably from Erewhon]). Kome Miso (soy paste with rice, 1 lb and 44 lb). Tamari Soy Sauce. Mugi Miso. Soybean Oil (Erewhon, pints, quarts, and 5 gallons). Corn Munchies (organic corn chips with soy sauce, 4 oz.). Rice Munchies (organic rice chips with soy sauce, 4 oz.). Sunflower seeds roasted with tamari (50 lb).

Other interesting products include: Umeboshi (salt plums pickled in brine, 22 lb keg). Kukicha twig tea. Lotus root tea. Pure & Simple Apple Butter. Sea vegetables (Wakame, kombu, hiziki, nori [dried laver], dulse, agar-agar [kanten sea gelatin]).

Note: This is the earliest document seen (March 2020) that mentions Pure & Simple (as a brand). Address: Ann Arbor, Michigan. Phone: (313) 769-8444.

763. LaBel, Murray; Izakowitz, Benjamin; Hawken, Paul. 1973. Lease agreement signed by Erewhon Trading

Company Inc. in Los Angeles. Los Angeles, California. 4 p. April 17. Unpublished typescript.

• **Summary:** This lease was executed on 17 April 1973 by and between Murray LaBel and Benjamin Izakowitz (lessors, owners of the building), and Erewhon Trading Company, Inc. (of 8454 Steller Ave., Culver City, California 90230. A Massachusetts Corporation) (Lessees), for the purpose of retail and wholesale groceries, at 8001 and 8003 Beverly Boulevard, Los Angeles (two separate individual stores). The 7-year lease commences on 1 July 1973 and ends on 30 July 1980. The amount of the lease is \$900/month. The lease is signed by the three parties to the agreement. Paul Hawken is President of Erewhon Trading Company, Inc.

Note: The street name, Steller, is spelled like this twice in the lease. Address: Los Angeles, California.

764. **Product Name:** Kome Miso (Soy Paste with Rice).

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor). Purchased from Erewhon (Boston-Importer). Made in Japan.

Manufacturer's Address: 330 Maynard St., Ann Arbor, MI 48108. Phone: (313) 769-8444.

Date of Introduction: 1973 April.

Wt/Vol., Packaging, Price: 1 lb. plastic bag, or 44 lb keg.

How Stored: Shelf stable.

New Product-Documentation: Eden Foods, Inc. 1973. April 15. F.O.B. Pricelist. "Kome Miso, soy paste with rice."

Eden Foods, Inc. 1974. Feb. 1. Wholesale prices, FOB. "Kome Miso, rice-soy paste (Erewhon)." This is the first time the word "Erewhon" appears after miso. It looks like Erewhon was requiring Eden to add it—which may have caused bad feelings.

765. **Product Name:** Soy-Rice Shells (Organically Grown).

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor).

Manufacturer's Address: 330 Maynard St., Ann Arbor, MI 48108. Phone: (313) 769-8444.

Date of Introduction: 1973 April.

Wt/Vol., Packaging, Price: 15 lb.

How Stored: Shelf stable.

New Product-Documentation: Eden Foods, Inc. 1973. April 15. F.O.B. Pricelist. "Soy-Rice Shells, organically grown."

Eden Foods, Inc. 1974. Feb. 1. Wholesale prices, FOB. "Soy-Rice Shells (Erewhon) organically grown." This is the first time the word "Erewhon" appears after the product name. It looks like Erewhon was requiring Eden to add it—which may have caused bad feelings.

766. **Product Name:** Corn Munchies, Rice Munchies (Organic Corn/Rice Chips with Soy Sauce).

Manufacturer's Name: Eden Foods, Inc.

Manufacturer's Address: 330 Maynard St., Ann Arbor, MI

48108. Phone: (313) 769-8444.

Date of Introduction: 1973 April.

Ingredients: Incl. soy sauce.

Wt/Vol., Packaging, Price: 4 oz.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods, Inc. 1973. April 15. F.O.B. Pricelist.

767. Wolff, Robert J. 1973. Who eats for health? *American J. of Clinical Nutrition* 26(4):438-45. April. [19 ref]

• **Summary:** Those who chose organically grown “health” foods and avoid refined, packaged items, the author terms “health foodists.” They avoid eating what most people eat and, sometimes at considerable cost in time and money, eat food they consider healthier. “They range from the fanatical food cultist to those of us who like ‘health’ bread, brown rice, and prefer vegetables and fruits grown in a friend’s garden (without insecticides and artificial fertilizers).” Extremists among health foodists include “those who eat a Zen-macrobiotic diet, starting out with nothing but brown rice. There are various kinds of vegetarians, a few of them abstaining from any kind of animal protein. There are some who consume what seem to be ridiculous quantities of supplemental vitamins and minerals, and manufactured ‘protein concentrate.’” Health foodists’ beliefs are reinforced by a sense of community with others who share similar beliefs. Address: Prof., International Health, School of Public Health, Univ. of Hawaii, Honolulu.

768. Leverton, Ruth. 1973. Nutritive value of “organically grown” foods. *J. of the American Dietetic Association* 62(5):501. May. Statement filed at the Open Hearing on Organic Food held by the attorney General for the State of New York, 1 Dec. 1972.

Address: Science Advisor, USDA ARS, Washington, DC.

769. **Product Name:** Dehydrated Miso.

Manufacturer’s Name: Chico-San Inc. (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 1004, Chico, CA 95926.

Date of Introduction: 1973 July.

How Stored: Shelf stable.

New Product–Documentation: Chico-San Products. 1973. July. p. 13. “Dehydrated Miso.” This is imported barley miso “dehydrated by our own, low-temperature process that protects the enzymes which are abundantly present in this wonderful food. Use dehydrated miso as you would ‘moist’ miso, only less of it.”

770. Chico-San Inc. 1973. Chico-San Inc. products: A catalog of unique foods. P.O. Box 1004, Chico, CA 95926. 26 p. Revised July 1973.

• **Summary:** Soyfoods imported from Japan include Lima

Soy Sauce, Soybean Puree (Miso), and dehydrated miso. They also sell black [soy] beans.

Rice-based products include: Yinnies Grain Syrup (“a low cost natural sweetener made from whole grain barley and organically grown brown rice,” in a 12 oz. jar; a photo shows the jar and label); a 3-page description tells how the product is made and gives its composition (maltose is the key natural sugar); recipes are included. Yinnies (“A traditional Oriental grain candy. The ingredients are organically grown brown rice and barley. No sugar or artificial sweeteners are used.”). Rice chips with buckwheat. On the label of the Yinnies confection product the following statement appears: “The rice for the Yinnies is grown and harvested exclusively for and under the direct supervision of Chico-San by Wehah Farms of Richvale, California.” A similar statement appears on the Rice Chips label.

Near the front is a label of Rice Cakes San-Wich (Ingredients: Brown rice, sesame seeds, Chico-San Yinnies Syrup {brown rice and barley}). At some point lecithin was added to keep the rice cakes crisp, so they would not be made soggy by the Yinnies Syrup.

Note: Lorenz Schaller of Ojai, California recalls (May 2016): “My interest in lecithin began when the Chico-San company of Chico, CA began manufacturing their ‘Chico-San Sandwiches.’ These were dreamy and I purchased many of them (and ate them, along with my very young daughter). Lecithin was among the very few ingredients listed on the label and the only ingredient that was not immediately familiar to me.

“The ‘Chico-San Sandwich’ came in a sealed plastic sleeve and consisted of two very crisp rice cakes. The two inner faces of the cakes held a filling of very dark brown semi-solid barley malt of goeey, tacky consistency. The crisp rice cake and the goeey barley malt syrup together made a heavenly treat. The lecithin was a key ingredient in getting the malt syrup to a consistency that stayed in place (did not leak or run out of the Sandwich) and was soft to bite into and not tooth-breaking hard and, finally, did not cause moisture to migrate into the rice cake and take away the crispness. These little guys were a culinary, confectionary achievement. I’ve never forgotten them.”

Corn Chips. Rice Cakes (3 types, each with brown rice and sesame seeds: Plain, with Millet, or with Buckwheat). San-Wich Rice Cakes–Unsalted (Ingredients: Brown rice [organic], sesame seeds, Chico-San yinnies syrup (brown rice and barley), various sea vegetables, and kuzu).

One section (p. 9-10) is titled “How Chico-San guarantees Oriental-type, organically-grown brown rice.” The words “Reprinted from *Health Foods Business* magazine” and “Wehah Farms” have been carefully deleted from the text of this article!

This is the revised edition of an earlier catalog. “Chico-San products have gained increasing acceptance throughout the country since their introduction in 1960.” The booklet

contains 8 pages of recipes, including: Sesame-miso spread for bread or dips. Black soy beans (p. 21). Wakame miso soup. Note: This is the earliest macrobiotic recipe seen which uses the term “Black soy beans” instead of “Black beans” to refer to black soybeans. Address: P.O. Box 1004, Chico, California 95926.

771. Eden Foods, Inc. 1973. Wholesale prices. P.O. Box 100, Ann Arbor, MI 48107. 3 p. Catalog. Effective Aug. 1.

• **Summary:** The products are very similar to those in the April 1973 catalog. Address: Ann Arbor, Michigan. Phone: (313) 769-8444.

772. Erewhon. 1973. Supplying natural food stores, co-ops, schools and communities (Catalog). Boston, Massachusetts. 12 p. Effective Aug. 20, 1973.

• **Summary:** The structure and design of this catalog is quite similar to the previous one of April 6, however some new products and sizes have been added. The illustration and note from Paul Hawken are similar. OG = Organically grown. products: Cereals: Soybean flakes (Deaf Smith, OG, 25 lb). Stoneground flours: Soybean flour, full fat, OG, Texas, 50 lb. Beans: Azuki beans (100, 50, or 25 lb). Soybeans (OG, Texas, 50 lb). Tamari & miso: Tamari soy sauce (8 oz, pints, quarts, half gallon, gallon, 4.7 gallon can). Hacho miso soy paste (1 lb or 44 lb keg). Mugi miso barley-soy paste (1 lb or 44 lb keg). Kome miso rice-soy paste (1 lb or 44 lb keg). Pasta: Wholewheat shells (with rice and soy flour, 15 lb). Snacks: Corn munchies (organic corn chips with soy sauce). Hopi Seeds (all dry-roasted with tamari, 1.38 oz or 25 lb): Almonds, cashews, pumpkin seeds, soybeans, sunflower seeds. Vegetable oil, pressed and unrefined: Soybean oil (pint, quart, 5 gallon tin). Condiments: Tekka (vegetable-miso condiment, 3 oz). For cooking: Soy [sauce] dispenser (4½ inch). Packaged in cellophane bags with recipes (1 lb, 1½ lb, and 2 lb): Soybeans (sprouting or cooking, OG, 1 lb or 2 lb) stoneground soybean flour (full fat, OG, 24 oz), soybeans (OG, 2 lb). Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

773. Hawken, Paul. 1973. Erewhon: A biography. The view within. *East West Journal* 3(8):11-16. Aug.

• **Summary:** An early, critical history of Erewhon, written without any capital letters [all lowercase], expressing the viewpoint of one of its early, important, and very innovative presidents. “Arrogant” is a term often used to describe the attitude of the people running the company. A store by the name of “Erewhon” opened in May 1966 on Newbury St. in Boston, first manned by Evan Root, then Paul Hawken.

Paul “generally worked alone for first year [at Erewhon in Boston] with the exception of occasional help from members of the community—Elaine Sutton, Connie Frank, Peggy Taylor, and even Michio would help bag and clean.

“At that time I was much more interested in lectures,

books, ideas, and more invisible things than food. I had no intention of doing Erewhon for very long, but that was before the remarkable and compelling visitations upon my brain that were precipitated by a five week fast augmented by only [brown] rice and water.” Paul then describes the profound spiritual experience he had in 1966—one of great light and energy reaching down to the cellular level. “I could fully experience in that one moment the indivisibility of consciousness and body.”

“Since nothing could really change until cells changed, it seemed the most logical thing was to provide the resource for that change to those who were ready for it. Soil and land would have to be found that was rich and uncontaminated... food should contain the life force inherent in natural growth. The problems posed were complex and many but all these questions gave me the answer as to the purpose of Erewhon... for those seeking the unveiling of the spirit, Erewhon would attempt to provide the renewing and cleansing power of the earth.

“This ‘visceral mysticism’ was a turning point for me and my relation to Erewhon. No revelation can arise unless ignorance precedes it, and the greatest lesson from this vision was the realization of how little I really knew or understood. My ignorance in the matters of spirit and consciousness were so great that I felt more at home with more plain and simple matters. Raising the quality of food seemed an area that was neglected, yet vital, in the path to higher consciousness.”

In 1966 “On Thanksgiving day 1968 we opened a new store down the street [at 342 Newbury St.] which still exists today. At that time we were doing about \$250 a day and the rent on the new store, with utilities, totalled over \$1,000. It was a chance we took, a big chance, and seemed to set the pattern for many to come. The decision to place our economic life on the line was based on growth. By then Erewhon had grown to be six people, and all of us felt in our bones that we had a tiger by the tail. A sort of giddy optimism pervaded the new store, abetted by all of us working 12 to 20 hours a day—Bruce Macdonald, Jim Docker, Jean Allison, Bill Tara (later to leave for Chicago, Illinois), and Roger Hillyard. The intensity was so thick you could scoop it up and bag it. All of us felt like passengers on a very fast vehicle bound for unknown places. Business was increasing very rapidly and it seemed we could do no wrong. Time moved very quickly and I was soon to leave for Japan to establish a source of imported foods. My position as to coming back was ambivalent, so Roger Hillyard was appointed head in my absence. Bill Tara, who had set up Food for Life in Chicago on the tenth floor of a downtown office building, left for Los Angeles with Aveline [Kushi] and set up another Erewhon due to Aveline’s prodding. It was later to prove to be our worst mistake and almost led us to bankruptcy.

“While I was away, roaming around Japan looking for pure foods and wise men, Roger [Hillyard] and others were

busy establishing a wholesale business based primarily on the products that were being sent back from Japan. In retrospect, those times were chaotic, and I do not think the chaos let up until four years later, the spring of 1973. The chaos was (as I think back upon it) caused by thinly veiled ambition clothed in a stylishly cut suit of concern for our biosphere and guts. Perhaps this was a reflection of our urgent need to make up for years of bad living, bad ideas, and trash foods. In any case our actions were hasty, well-intentioned, very salty, and somewhat crude, but like a moldboard plow, we just kept coming.

“Chico-San saw us coming and promptly freaked out. They were very dismayed by their loss of New York business as our wholesale market developed. Chico-San had given us the impression in a number of personal conversations that they encouraged our self-reliance and particularly the importance of Japanese foods. Bob Kennedy, the head of Chico-San, candidly admitted that they lost money on imported items and they were able to stay in business only because they sold rice cakes. So it came as quite a surprise to us when they reversed their attitude. They began to express doubts about our motives and ability to procure good foods. Their attitude seemed to change into one where they were the ‘official’ food company, and that was that—appointed by the crown as it were. I can certainly see now how our brashness and youth did nothing to allay their doubts. In retrospect I have much sympathy, while realizing also that they did little to establish a real dialogue.

“Chico-San was formed by middle-aged people who split from New York City after Ohsawa walked into one of their meetings one night stoned on Scotch [whiskey] and announced the bomb was going to drop. This was during the Cuban [missile] crisis and there were many who shared that fear. They formed a well-organized caravan of families and trekked across the United States in a trip that got national coverage. Their purpose was to find the one place in America that was safest from radioactive fallout and also ideal for growing rice. Eureka! Chico, California. No one was more surprised than the local residents. The rift that opened between Erewhon and Chico-San has never closed. The rift could best be described as an ocean now. Peaceful coexistence. They mainly felt that their maturity and experience uniquely qualified them to be the best judge of what foods people should or should not eat. They thought that there should be only one ‘label’ and that we did not know enough about food to promote it... Herman Aihara who worked there then and Bob Kennedy felt that most young people had been ‘ruined’ by drugs and that their ‘judgment’ could never be completely restored,...” Continued. Address: [President, Erewhon].

774. Hawken, Paul. 1973. Erewhon: A biography. The view within (Continued—Part II). *East West Journal* 3(8):11-16. Aug.

• **Summary:** Continued: “Perhaps the incident that best illustrates the conflict, and the one which simultaneously affected the most people, was the incident about the rice. To this day, I very much doubt there is agreement on the incidents leading up to the event, but here is one version anyway which may shed some light for others.

“In the fall of 1969, one Wendell Lundberg came striding into the retail store on Newbury Street and introduced himself as one of four brothers who were going to grow organic rice. He had heard of our company and wondered if we would be interested. We fell off our chairs. It seemed too easy at the time, and later events proved it to be so. A cordial conversation was entered into, addresses were exchanged, and he left. The following spring, I was in California, and a young man, who was on grant-in-aid to study organic farms dropped into our L.A. [Los Angeles] store and told us about these Lundberg brothers. Homer Lundberg and I began a relationship via the phone. I affirmed our desire to buy organic rice while he continued to express the desire to sell it. We set up an appointment in Richvale to discuss matters. Homer met me and told me that in the interim they had signed an exclusive five-year contract with Chico-San but that should be no problem because he had understood that Chico-San would sell the rice to us—wholesale. I explained how difficult it would be for us to buy rice wholesale from Chico-San and then try to redistribute to a hundred stores on the East Coast. He agreed and said that I should go to Bob. And he was sure it would be alright if I bought directly too or maybe paid Bob a small commission. I immediately went to see Bob Kennedy and posed the question to him, and he was simply appalled at the idea. High drama soon to come. I cannot accurately describe how hostile and upset the people at Chico-San were.”

“Bob’s attitude was formed partly because he had worked for years... trying to get a farmer to grow rice for him organically. When he finally found one, he had to just about sign his life away... in order to guarantee that the farmer would not lose money in case of a severely short crop. None of this of course was explained to us at the time. I suppose they just assumed we would know all the history behind it, but no one stopped to ask us or tell us or even show us the contract. We offered to share the risk, but that too was denied.

“The Lundbergs then made us an offer that they would grow a similar rice [in 1970] that was ‘unsprayed’ but which was still grown on ground with synthetic fertilizer. That was done and we were finally in the rice business, albeit second class.

The following year [1971] came quickly, and a new dance competition began to shape up. Bob [Kennedy of Chico-San] offered to sell us a certain number of acres if we would pay \$1.50 for every bag we bought. One of the reasons he did this was because he heard rumors of other growers of organic rice [were there other growers?] selling

to us. We accepted his offer initially, but I did not stop my search for an organic grower. With the help of Gloria Swanson, I located a group of farmers in Arkansas, and one in particular expressed interest.

“The farmer in Arkansas had fields which had been in soybeans with no fertilizers or pesticides. We tentatively lined up a source of Pfeiffer compost and manure, but as planting time came near it looked as though we were going to get the California rice offer and all the relations with the Arkansas grower were brought to a halt. At the last moment, however, Bob Kennedy reneged on his commitment and decided he would not sell us any rice. He said there just wasn’t enough rice ‘to go around’ and that he was real sorry. (It was ironic because a year later [1972] the Lundbergs almost went out of business trying to get rid of all that organic rice that Chico-San had contracted for but could not buy.)

“We immediately contacted our Arkansas grower and drew up a contract... guaranteeing the farmer a fixed income per acre... [Note: The rice contract with Carl Garrich in Lone Pine, Arkansas, was finalized in March 1971. In April 1971 Garrich planted his organic rice crop on 330 acres]. The rice grew very well there and all was fine except for two things: First, our farmer could not clean the rice very well [seeds of various colors were mixed in with the rice], and second Chico-San had 300-400 acres too much rice, which they had contracted in expectation that they would sell the rice we had originally expected to sell. It did not work out that way so we had organic dirty rice and they had too much organic clean rice.

“Since then, because Chico-San could not meet their contractual obligations, the five-year exclusive had been null and void. Dozens of distributors now buy that rice, including Erewhon, which is now Lundberg’s largest customer.”

“That is the rice saga—the inevitable result of selfishness on everyone’s part. I think one of the things I learned from this is that rice, which most consider inanimate, has a power of its own like water, and seeks its own level... The customer in this case was the victor and beneficiary.

“Bruce [Macdonald] and Roger [Hillyard] were soon to find that there was not enough space in the office for both to operate, so Bruce appointed himself West Coast manager much to Bill Tara’s chagrin, relief, and disgust. Bruce began a very energetic effort to improve the West Coast store. Roger moved to a new fifth floor warehouse on Farnsworth Street overlooking the [Boston] harbor. He found new and dedicated people to help in the move. Richard Mensoff, Bill Johnson, Eric Utne, Chris Elbers, Rob Harrison, and Susan Sims. Richard, recently removed from set designing on Broadway [New York City], went to work immediately building the first Erewhon ‘set.’ It was beautiful, and unlike any food warehouse before it. Work had not even been completed when the first railroad car of rice backed into our siding. Aboard was 100,000 pounds of brown rice, and we

had not the slightest idea of what to do with or how to unload it. Everyone just started carrying the [50 or 100-lb] bags of rice in on our shoulders as we had always done on Newbury Street. The looks of the warehousemen in the vicinity were incredulous. When they couldn’t stand it any longer, they lent us their pallet jack and some old pallets, and we learned our first warehouse lesson.

“I returned from Japan in December 1969 and went to work with Bruce on the West Coast setting up a wholesale operation: it was Boston all over...” Address: [President, Erewhon].

775. Hawken, Paul. 1973. Erewhon: A biography. The view within (Continued—Part III). *East West Journal* 3(8):11-16. Aug.

• **Summary:** Continued: Hawken returned to Boston in Dec. 1969, then was fired by Aveline Kushi. He left and worked in San Francisco with Fred Rohe at New Age Natural Foods. Hawken returned to Erewhon in Boston in the summer of 1970.

In 1970 the “natural foods boom” started and swept Erewhon along with it. “If there is one person who is ‘most’ responsible for Erewhon being here today and not bankrupt, it is John Deming, who brought a sense of joy and happiness wherever he went in the company. He assumed the manager’s position at the retail store and made it the finest part of the company. His positive attitude was in contrast to the apprehension that all of us shared about the future. He gave Erewhon some money without which we would surely have failed. On his twenty-fifth birthday John came into a trust which sort of blew his mind. He had known nothing about it. He wanted to just give it to Erewhon, but it is on the books as a loan. It came just in time to pay back overdue creditors and panting bank officers.”

A table (p. 16) shows Erewhon, Inc.’s sales and sources of supply in 1966 and then in 1973. In 1966 Erewhon had about 200 retail customers. The company bought Koda rice from Sam Rabinowitz; imports from Chico-San, Infinity Co., Japan Foods Corp., and Wing-Wing; Lima (Belgium) products from Merit; grains and flours from Better Foods; and flour from Walnut Acres [founded by Paul Keene].

In 1973 in Boston the warehouse served about 200,000 customers (incl. 200 retail natural food stores, 43 Star Markets, 50 co-ops, 25 schools, 9 distributors, 10 restaurants, and 5 bakeries), and the store about 10,000 customers. In Los Angeles, the warehouse served about 75,000 customers (incl. 150 retail stores, 20 co-ops. 3 bakeries, and 10 distributors) and the store about 5,000 customers. A produce company in Los Angeles was supplied by about 40 organic farmers, and sold to 20 retail stores. Concerning soy products, Erewhon bought organically grown soybeans from Lone Pine in Arkansas [Carl Garrich of the Lone Pine Rice and Bean Farm], and soy oil from California. From Muso Syokuhin [Muso Shokuhin] in Japan they imported tamari, and kome

and hacho miso [plus azuki and black beans]. From Mitoku, Inc. they imported tamari and mugi miso.

Suppliers of organically grown grains included: Short, medium, and sweet rice (Wehah Farms, California). Medium rice (Willow Farms, Louisiana). Spring and durum wheat; flax (Ted Whitmer, Montana). Long rice (Jerry Ladds?, Texas). Winter wheat (Frank Ford, Arrowhead Mills, Texas). White wheat (Lewis Cox & Bill Ingram, Washington state). Buckwheat (Penn Argyl, Pennsylvania). Corn (Bill Stockett, Texas). Millet (Chuck Moses, North Dakota). Oats (Fruen, Minnesota). Rye (Mike Skinner, Colorado). Peanuts (Chas. Warnken, Texas).

Note: This is the earliest document seen (March 2020) that mentions Mitoku, or Muso Shokuhin. Address: [President, Erewhon].

776. Haggerty, Donna. 1973. Re: Tekka [miso]. Letter to Lorenz Schaller, So. Pasadena, CA 91030, Sept. 28—in reply to inquiry. 1 p. Typed, with signature on form.

• **Summary:** “Tekka was discontinued because of lack of sufficient demand.” Address: Spiral Foods Inc., 1144 West 1st Street, Chico, California 95926.

777. Shimoda, Naomi. 1973. Nutrition and life style. II. Observations of a nutritionist in a free clinic. *J. of the American Dietetic Association* 63(3):273-75. Sept.

• **Summary:** The author worked as a volunteer at the Cambridge Free Clinic from Dec. 1970 to May 1973. She relates experiences dealing with vegetarians, macrobiotics, fruitarians and organic foods advocates. Stresses the need for flexibility, objectivity, and a thorough knowledge of nutrition in trying to help these people. Address: Peter Bent Brigham Hospital, Boston, Massachusetts.

778. Vitamin Village. 1973. Display ad: Help us celebrate the Grand Opening of our beautiful new store in Fallbrook,... *Los Angeles Times*. Oct. 1. p. OC_B9.

• **Summary:** “Fabulous specials on juicers. Here are our Grand Opening juicer specials.

“Champion juicer (and grinder). Regular \$159.95. Grand Opening special \$139.95.

“Acme Supreme, all stainless steel. The ultimate home juicer. Regular \$149.75. Grand Opening special \$129.99.

“Acme Supreme—The world’s most popular juicer. 10 year guarantee. Regular \$119.75. Grand Opening special \$109.99.

“Acme Challenger—Quality & economy. Regular \$89.95. Grand Opening special \$79.99.

“Note: We will always give you a 25-lb. bag of organically-grown carrots Absolutely Free with the purchase if one of these fine juicers—Only at Vitamin Village.” Address: Anaheim / Orange / Fallbrook.

779. Allison, Jean Marie. 1973. Curriculum vitae. New York,

New York. 5 p. Unpublished typescript. Undated.

• **Summary:** Prepared for a job application. Address: c/o Shizuko Yamamoto, 14 West 75th, New York, NY.

780. Brown, Edward Espe. 1973. Tassajara cooking. Berkeley, California, and London: Shambhala. 256 p. Introduction by Zentatsu Richard Baker-Roshi. Series: A Zen Center Book. Illust. by Norval Delwyn Carlson. Index. Oct. 23 cm.

• **Summary:** This friendly, nicely illustrated natural foods vegetarian cookbook is also about the spirit of Zen Buddhist practice. The chapter on “Beans” (p. 121-26) begins with a sort of eulogy: “Beans. What suffering the word evokes. Beans. When you couldn’t afford meat. Oh beans! When you went camping. Beans! Beans are not meat, they’re beans: garbanzo, kidney... Soy—which rarely remains as a bean... Beans are the overlooked jewels of the vegetable world. They sell at dirt cheap prices and are one of the best protein buys around... Beans take some getting used to, some familiarity. It’s easy to say ‘beans don’t agree with me,’ without having given yourself a chance to agree with them.”

Soy-related recipes include: Oriental dressing (with soy sauce, p. 72). Cooking beans (p. 122-23; if presoaked, pressure cook soybeans for 20 minutes at 15 lb pressure. If not presoaked, for 25 minutes. For cooking without pressure, presoak, bring to a boil without salt, and simmer for 2 hours). Soy-sweetened beans (p. 124; “the Japanese version of an American standby”). Nut-battered beans. Chili beans (p. 125). Blanco beans. Soy beans with hijiki & carrots (p. 126). Five thing beans (p. 126). Easy Oriental dressing (with soy sauce, p. 172). Soy sauce mayonnaise (p. 173). Tahini salad dressing (with soy sauce, p. 174). Seasoning soups (with soy sauce or miso, p. 179). Miso stew (p. 206). Potato-bean bake (p. 211). Basic recipe for burgers (with cooked, ground soybeans, p. 234). Soyburgers (p. 235-36).

Tassajara Zen Mountain Center was founded in 1967. An illustration of the Center cooking in a large skillet graces the cover of this book, which by July 1978 was in its 9th printing. Address: Green Gulch Zen Farm, California.

781. Gladstone & Chain. 1973. Erewhon, Inc.: Report on financial statements for the year ended June 30, 1973. Boston, Massachusetts. 8 p. 28 cm.

• **Summary:** A balance sheet shows that Erewhon’s total assets decreased to \$967,959 in 1973 from \$1,052,148 in 1972. Sales increased from \$3,160,011 in 1972 to \$3,475,204 in 1973. Net income before taxes was \$47,010, up from \$20,095 in 1972. Erewhon owes \$411,283 to the New England Merchants National Bank. Note that the Advest stock offering, which was supposed to take place in late 1972, never happened. Address: Fifteen Court Square, Boston, Massachusetts.

782. Eden Foods, Inc. 1973. Wholesale prices, F.O.B.

P.O. Box 100, 310 W. Ann St., Ann Arbor, MI 48107. 2 p. Catalog. Effective Nov. 1.

• **Summary:** The products are very similar to those in the April 1973 catalog. But a new soy product is Wheat-Soy Grits (50 lb). Other products include “Umeboshi salt plums,” and Kelp powder (10 lb, bulk [from California]). Address: Ann Arbor, Michigan. Phone: (313) 769-8444.

783. *East West Journal*. 1973. Whole foods directory. 3(11):46. Nov.

• **Summary:** Gives the name, address, and Zip code of 46 natural foods stores and restaurants, arranged by region, including: Erewhon Natural Foods (342 Newbury St., Boston, Massachusetts 02115), Yellow Sun Natural Foods Co-op (35 North Pleasant, Amherst, Massachusetts 01002), Commonground Community Restaurant (Brattleboro, Vermont). Oak Feed Store (Coconut Grove, Florida), Beautiful Day Trading Co. (College Park, Maryland), Eden Natural Foods (347 Ludlow Ave., Cincinnati, Ohio 45220), Ceres Harvest Natural Food [Foods] (3632 West Colorado Ave., Colorado Springs, Colorado), Food for Life (2231 North Lincoln Ave., Chicago, Illinois 60614), Eden Foods, Inc. (Ann Arbor, Michigan), Wholly Foods (2999 Shattuck, Berkeley, California), Erewhon Natural Foods (8001 Beverly Blvd., Los Angeles, California 90048), Janus Natural Foods (712 7th Ave. South, Seattle, Washington 98104).

Note 1. This is the earliest document seen (March 2020) that mentions Ceres Natural Foods (Colorado Springs, Colorado).

Note 2. This is the earliest document seen (July 2017) that mentions Janus Natural Foods (Seattle, Washington). Address: 29-31 Farnsworth St., Boston, Massachusetts 02210. Phone: 617-482-9174.

784. **Product Name:** Wheat-Soy Grits.

Manufacturer’s Name: Eden Foods, Inc.

Manufacturer’s Address: 310 West Ann St., Ann Arbor, MI 48107. Phone: (313) 769-8444.

Date of Introduction: 1973 November.

Wt/Vol., Packaging, Price: 50 lb.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods, Inc. 1973. Nov. 1. Wholesale Prices, F.O.B.

785. Hanes, Phyllis. 1973. Some old-fashioned cookery ideas come back in style again. *Christian Science Monitor*. Dec. 6. p. 26.

• **Summary:** Many new organic and natural foods cookbooks have been published this year: *The Rodale Cookbook*, *The Deaf Smith Country Cookbook*, and *The Natural Foods Sweet Tooth Cookbook*. Susan Hillyard, a photographer who work appears in the Deaf Smith book, studied macrobiotic cooking with Aveline and Michio Kushi in Boston.

786. Erewhon Trading Co. Ltd. 1973. [Meeting of natural food distributors]. 16 Wellesley St. West., Toronto 5, Ontario, Canada. 1 p. Dec. 19. Unpublished manuscript.

• **Summary:** This is a record of the first meeting of a group of friends each representing a company involved in the distribution of natural and organic foods in the United States and Canada. These companies are based in many major centers in the country and the purpose of the meeting was to establish a basis for intercommunication among people and the sharing of a general direction through friendship and knowledge of one another.

“The meeting was arranged by Paul Hawken and took place in Toronto, Ontario at the house of Michael Pate on December 7-9, 1973. The people present were: Paul Hawken, Bill Garrison–(Erewhon Inc. Boston, Massachusetts), Tom De Silva [DeSilva]–(Erewhon Inc. Los Angeles), George Gearhart–(Janus Foods Inc. Seattle, Washington), Tom Swan–(Food for Life. Chicago, Illinois), Rod Coates–(Laurelbrook Foods Inc. Bel Air, Maryland), Roger Hillyard–(The Well–San Jose), Frank Calpeno–(Ceres Natural Foods, Colorado Springs), Michael Pate–(Erewhon Trading Company, Toronto [Ontario, Canada]).”

Note: This is the earliest document seen (April 2006) that mentions The Well in San Jose, California.

Talk with Roger Hillyard of San Francisco. 1982. April. Erewhon–Toronto existed by the time of this meeting. The possibility of forming a trade association was discussed. Paul Hawken had left Erewhon, was planning to leave the country soon and to be away for some time. Bill Garrison was in charge of Erewhon, which is now considered to be a regional distributor with five truck routes in New England. The Kushis own 95% of Erewhon’s stock. John Deming owns 5% and Paul Hawken has an option to buy 25% of the shares. The value of Erewhon is \$1 million. Boston is wholesaling \$250,000 of macrobiotic natural foods per month. Erewhon has a staff of 50 in Boston and 32 in Los Angeles.

Janus started in 1971; George Gearhart and Blake Rankin previously worked for Spiral Foods.

Ceres started in Oct. 1973.

Food for Life started as a natural food retail store in 1970.

The possibility of forming an association was discussed.

The new Kikkoman plant in Walworth, Wisconsin, cost \$10 million to construct. Address: Toronto, ONT, Canada; Or: P.O. Box 44, Milliken, ONT, Canada. Phone: 416-291-1471.

787. *SoyaScan Notes*. 1973. Chronology of soybeans, soyfoods and natural foods in the United States 1973 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1973. The Asian Vegetable Research and Development Center (AVRDC), an international agricultural research center in Taiwan, starts soybean research. It does

early work in introducing soybeans to the tropics and semi-tropics.

1973. Nelson, Steinberg, and Wei at the University of Illinois develop the pre-blanch wet-grind method of making a suspended soymilk—without removing the okara and by using an homogenizer to pulverize the okara into tiny particles.

1973 March. Beef-soy blends, containing 25% hydrated textured soy flour and 75% ground beef, introduced to U.S. supermarket chains in response to skyrocketing hamburger prices. This opens a second large new market for such products, following the school lunch market. Early brands include Burger Pro, Plus Burger, and Pro/Teen. Advertising stresses lower cost than all-beef products and less shrinkage in cooking. By Sept. 1973 they had captured 29% of the ground beef market. At that time beef prices tumbled and by Nov. 1975 the market share of the blends had fallen to only 10%.

1973, April-July. INTSOY (International Soybean Program) established at the University of Illinois, with funding from USAID, to do applied research on soybean production, varietal development, and utilization in tropical and subtropical environments and low-income countries. The International Soybean Variety Experiment (ISVEX) begins and by 1980 is being conducted in 110 countries.

1973 June. U.S. imposes a soybean export embargo, fearing that the drought-induced short supply will drive up domestic meat and poultry prices. Soybean prices soon explode into a new world of double digits, temporarily hitting \$12 a bushel.

1973 June. Kikkoman opens the largest shoyu plant in the Western world at Walworth, Wisconsin, and starts production. Capacity is 10,000 kiloliters (2.6 million gallons) a year.

1973 Sept. The USDA removes all regulations for exporting agricultural products, thus lifting the June soybean embargo. But permanent damage has been done that undercuts confidence in the USA as a reliable soybean supplier and trading partner and stimulates numerous foreign countries (including Brazil and France) to expand their soybean production.

1973 Oct. Arab oil-producing nations (OPEC) abruptly increase petroleum prices fourfold, regulate the production of petroleum, and impose a total ban on oil exports to the U.S. after the outbreak of the Arab-Israeli war. The first oil shock results. Gasoline prices skyrocket. The ban is lifted on 18 March 1974.

1973 Nov. The first World Soy Protein Conference held in Munich, Germany, attended by over 1,100 delegates from 45 countries, and sponsored by the U.S. Foreign Agricultural Service and the American Soybean Association.

1973. Pro-Nuts, the first dry-roasted soynuts in the Western world, launched by Edible Soy products in Hudson, Iowa.

1973. Energy and Protein Requirements published by the Joint FAO/WHO Ad Hoc Expert Committee. It reduces protein requirements for adults by 20%. The National Academy of Sciences in the USA follows suit by lowering its RDA for protein by 25%. These two events essentially define away the “protein crisis,” and mark a crucial turning point in the ongoing “protein versus calories” debate. Insufficient food energy comes to be viewed as the main nutritional problem in poor countries. If a person has sufficient calories (i.e. sufficient food), it is argued, protein intake is also likely to be adequate.

1973. Oregon enacts America’s first organic food labeling law. A boost to organically grown crops.

1973. The era of biotechnology begins when Stanley Cohen of Stanford University and Herbert Boyer of the University of California at San Francisco successfully recombine ends of bacterial DNA after splicing a foreign gene in between. They call their handiwork “recombinant DNA,” but the press preferred to call it “genetic engineering.”

788. Kunen, James Simon. 1973. Dr. Bronner’s magic soap. *Esquire*. Dec. p. 218-21, 314, 316.

• **Summary:** This article is about Dr. Bronner’s life and his Supermild Pure Peppermint Oil Soap, not his soy-based seasonings. The Bronner family had been in the soap business in Germany since 1848, but Dr. Bronner came up with this particular formula 6 years after immigrating to America, in 1935, as a diaper soap for his own children. “Dr Bronner was blind. He was wearing black goggles with opaque lenses. He was a short and wiry man of 66, tanned but unhealthy looking, too thin for his heavy bones (see full-page photo). His life changed at midnight on 1 Feb. 1962 when he delivered a speech to a black power audience in Watts. On 30 Aug. 1944 he buried his wife in a potter’s field in Illinois. She weighed 61 pounds, her jawbones broken. His mother and father had been gassed as Jews in Europe. After that his wife became suicidal. After 1945 he spoke on his peace plan, then was held in a small room. ‘Every night they bound me hand and foot to the slab...’ Dr Bronner was committed to a mental institution in Illinois in 1946 and his blindness, though recent, may have resulted from the more than 20 shock treatments he was subjected to there. He is in deep trouble with the tax authorities who are not impressed with his idea that he is a rabbi... and do not agree that his work is religious... Recently his principal issue has been fluoridation, on which he spoke every Friday for 17 years in Los Angeles.” He believes fluoridation is mass poisoning. His efforts have stopped fluoridation on at least 6 cities. His soap is selling at the rate of 150,000 gallons a year. He has no salesmen or advertisements. He has interesting religious messages on his soap bottles, and he changes them regularly.

789. Erewhon Inc. 1973. Erewhon organically grown short

grain rice. Boston, Massachusetts; Los Angeles, California. Size: 25 inches high x 14½ inches wide. Undated.

• **Summary:** See next 3 pages. This multi-wall Kraft paper bag holds 50 lb. of brown rice. We are unsure of the date this bag was created and first put to use. We have unsuccessfully asked both Lundberg Brothers and Paul Hawken for help.

Across the top of the front is written in large, dark green, lowercase letters “erewhon.”

Below that, in dark green and yellow, is a traditional woodblock print of a farmer harvesting sheaves of grain with a sickle.

Below that, between two horizontal lines, in dark green: “organically grown short grain RICE,” with the last word in bold capital letters (caps) 4 inches tall.

Below that, in light yellowish-green script, is a basic description of how this rice is grown organically by Lundberg Farms: “Erewhon short grain brown rice is grown in Richvale, California, on fertile organically composted soil of the upper Sacramento valley and is irrigated by pure Feather River water from the Sierra Nevada Mountains. Cover crops of purple vetch, clover and oats along with rice straw and husks are turned back into the soil to build up the humus and organic matter in the soil. Insect control is accomplished by Gambusia fish which live in the puddles during the growing season. Absolutely no toxic or synthetic chemicals, fertilizers, insecticides, herbicides, fungicides, fumigants, or seed treatments are employed in cultivation of this rice. This high quality brown rice is stored on the farm in special cooled bins to prevent damage from heat or insects and is husked to order throughout the year by custom built rubber rollers which protect the delicate germ and outer bran.”

On the back is written, in dark green script, 6½ inches wide: “We at Erewhon are happy to offer these whole natural foods to you. Since food is basic to good health, and since good health is the foundation of a happy and creative society, we treat our food with the greatest respect and care. Since the effects on man of many of the chemicals which are presently being used on farms may not be known for many years hence, and since their effects on the delicate ecological balance of man and his environment is not beneficial, we are following that path which will take us towards a renewal and restoration of our land and natural resources. Food represents that very essence of the power of creation and stands at the crossroads between the infinite forces of nature and the biological wonder of man. Erewhon attempts to provide those foods which reflect that great natural order and we hope that you enjoy these foods and take as much pleasure in preparing and eating them as we do in offering them to you.”

Below that, in a square: “Organic Farmers. Certified by Organic Gardening and Farming Magazine. Lundberg Farms. Richvale, California. Brown Rice.”

On each side is written in bold, dark green caps: “California grown Short Grain Brown Rice.” Address:

Boston, Massachusetts 20010; Los Angeles, California 90230.

790. *Organic Gardening and Farming*. 1973. Adzuki (spelled like that) is mentioned. 20(4):Somewhere in No. 4. *
• **Summary:** This is the earliest “adzuki” in OGF.

791. Toms, Agnes. 1973. *Natural foods: meals & menus for all seasons*. New Canaan, Connecticut: Keats Publishing Co. 181 p. 18 cm. Series: A Pivot Original Health Book. *

792. **Product Name:** Green Soy Beans (Organically Raised; Fresh Pack, Unsalted).

Manufacturer’s Name: Walnut Acres.

Manufacturer’s Address: Penns Creek, Pennsylvania 17862.

Date of Introduction: 1973.

Ingredients: Only green soy beans and water.

Wt/Vol., Packaging, Price: 1 lb. Probably canned.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label sent by Dr. Walter Wolf of NCAUR, Peoria, Illinois. 2000. Aug. 3. 9.5 inches by 4 inches. Green on beige. “Suggestions: Add butter, heat and serve. Or, cover with Marinara Sauce or Ketchup and bake. Packed by Walnut Acres.” “The soy beans herein are green vegetable soy beans. They were raised strictly organically. High in protein and lower in starch than most beans, they make an excellent vegetable dish. Untreated well-water used in processing. Here in the quiet countryside, on our farms and in the old barn, we do wondrous things in cooperation with Nature.”

Note: This is the earliest commercial edamame product seen (July 2001) that is organically grown.

793. Albright, Nancy. 1973. *The Rodale cookbook*. Emmaus, Pennsylvania: Rodale Press Book Division. 486 p. Illust. Index. 25 x 20 cm.

• **Summary:** This book is based on natural foods but makes widespread use of meat, poultry, fish, and dairy products. Raw, unstrained clover honey is used as a sweetener instead of white sugar which “is dangerous to health...”

Basic information on soy: Soybean oil is good for sautéing (p. 4, 20).

Page 5: “Salt, whether labeled ‘Sea Salt’ or not, should be used in moderation. We use as little salt as possible in our recipes, because of its unhealthy effect on the circulatory system.

“We use Tamari soy sauce because it is made without monosodium glutamate (MSG), sugar or caramel flavor.”

Tamari soy sauce is also mentioned on page 20. Hints for cooking whole soybeans (“1. Soybeans require at least 8 hours of soaking and 2-3 hours of cooking—longer than any other legume.” 2. Freezing soybeans after soaking decreases the amount of time needed to cook them, p. 16). Use soy

Erewhon short grain brown rice is grown in Richvale California on fertile organically composted soil of the upper Sacramento valley and is irrigated by pure Feather River water from the Sierra Nevada Mountains. Cover crops of purple vetch, clover and oats along with rice straw and husks are turned back into the soil to build up the humus and organic matter in the soil. Insect control is accomplished by Gambusia fish which live in the paddies during the growing season. Absolutely no toxic or synthetic chemicals, fertilizers, insecticides, herbicides, fungicides, fumigants or seed treatments are employed in cultivation of this rice. This high quality brown rice is stored on the farm in specially cooled bins to prevent damage from heat or insects and is husked to order throughout the year by custom built rubber rollers which protect the delicate germ and outer bran.

We at Erewhon are happy to offer these whole natural foods to you. Since food is basic to good health, and since good health is the foundation of a happy and creative society, we treat our food with the greatest respect and care. Since the effects on man of many of the chemicals which are presently being used on farms may not be known for many years hence, and since their effect on the delicate ecological balance of man and his environment is not beneficial, we are following that path which will take us towards a renewal and regeneration of our land and natural resources. Food represents that very essence of the power of creation and stands at the crossroads between the infinite forces of nature and the biological wonder of man. Erewhon attempts to provide those foods which reflect this great natural order and we hope that you enjoy these foods and take as much pleasure in preparing and eating them as we do in offering them to you.

Lundberg Farms

Richvale, California

powder or grits to add protein to meals (p. 21). Basic soy milk (from whole soybeans, p. 63). Cashew milk (p. 64). Sesame milk (p. 68).

Chapter 5, titled “Soybeans, eggs, and cheese,” has an introduction to soybeans which begins: “For us in the Fitness House Kitchen ‘discovering’ the soybean has been a pleasant and surprising adventure. The soybean is one of the most versatile, fascinating and valuable of all plants” (p. 237-38). The chapter contains and many soy related recipes (p. 243-51): Methods for cooking soybeans (“Cover soybeans with cold water. Refrigerate or freeze overnight.” Freezing will decrease the amount of cooking time needed. “Next day put the soybeans and their soaking water on to cook, using a large enough pot and leaving the lid slightly to one side so the soybeans will not boil over. Bring the beans to a boil then turn the heat down and simmer until they are tender, 2-3 hours.” “1 cup dry soybeans will swell during soaking to 2½ to 3 cups. One pound of dry soybeans is about 2¼ cups”). Baked soybeans (with “1 lb. dry soybeans, soaked and cooked... Water soybeans were cooked in”). Barbecued soybeans. Soybean-cheese stuffed peppers (with cooked whole soybeans and cheddar cheese). Soy stuffed peppers (with pureed, cooked soybeans). Soybean chili. Soybean curry. Soybean loaf. Soybean-rice surprise casserole. Soybean-vegetable casserole. Soybean-stuffed eggplant.

Soy related recipes later in the book: Rice-bulgur-soy pilaf (with soy grits, p. 311). Wheat-soy-sesame bread (with soy flour & soy grits, p. 356). Soy milk custard (pudding, p. 400). Wheat-soy dessert (with soy flour, p. 401). Soybean pie (with chopped, roasted soybeans, p. 414). Soy peanut butter cookies (with soy flour).

Note: Neither tofu nor green vegetable soybeans are mentioned (by any name) in this book. In late 1976 (Dec. 6-7) Shurtleff and Aoyagi presented a program (lecture, slide show, food samples) at Rodale Press in Emmaus, attended by 40 members of the staff and employees. Hosts: Nancy N. Bailey and Robert Rodale. There was widespread interest in learning more about these foods. Shurtleff was “surprised they serve white sugar on their dining tables” at Fitness House.

Contains a very interesting directory of natural food stores in the United States (p. 448-76), including phone numbers and specialties.

On p. 242 are simple directions (and 2 photos) for making “yogurt ‘cheese’ to be used in place of cream cheese” in making dips, salads, or desserts. Address: Chef-Manager of Fitness House, the Rodale Press Dining Room, Emmaus, Pennsylvania 18049.

794. Carroll, Anstice; Vona, Embree De Persiis. 1973. The

health food dictionary with recipes. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. vii + 200 p. Illust. by Vincenzo de Persiis Vona. Index. 24 cm.

• **Summary:** The foods, listed alphabetically, include: Adzuki (p. 1-2). Beans, dried (incl. soy beans, p. 17). Gluten flour (p. 74-75, incl. Gluten soy bread). Miso and Miso butter (p. 101). Morromi [sic, Moromi] (p. 102). Mu Tea (p. 102). Nori (p. 106). Oil, vegetable (p. 113-14, incl. lecithin, peanut oil, olive oil, always refrigerate vegetable oil after opening; “Vegetable oils can (and should) be substituted for hydrogenated fats such as margarine, shortening, and lard in many recipes”). Peanut (p. 119-21). Peanut butter (p. 121-22). Soy grits (p. 156). Soy milk powder. Soy oil. Soy sauce (p. 156-57). Soybean (p. 159, incl. Soybean salad). Soybean, roasted (p. 160, incl. recipe for making at home). Tofu (p. 174-75, incl. recipe for Tofu-vegetable soup). Umeboshi (p. 175).

795. Clark, Linda. 1973. Know your nutrition. New Canaan, Connecticut: Keats Publishing, Inc. 267 p. Index. 22 cm. [68 + 333 endnotes]

• **Summary:** This book is mainly about vitamins, minerals, and nutritional supplements, but the influence of the young natural and organic foods movements can be seen. Chapter 1 is titled “Should you take vitamins and minerals?” Chapters 2-14 are each about one of the known vitamins. 15. The magic minerals. 15. Where to find safe sources of all minerals. 17. Cholesterol, fats and oils (Clark advocates eating plenty of eggs). 18. High power foods (Lecithin, brewer’s yeast, wheat germ, sunflower seeds, alfalfa, rice polishings / rice bran, cultured milks {kefir, cultured buttermilk, yogurt}, blackstrap molasses, liver, sprouts {incl. mung, soy, alfalfa, wheat}). 19. Protein, the real staff of life. Epilogue. Suggested additional reading.

796. Farmilant, Eunice. 1973. The natural foods sweet-tooth cookbook. Garden City, New York: Doubleday & Company, Inc. 182 p. Illust. (by Ed Nuckolls). Index. 22 cm. Pocketbook edition published in March 1978 by Jove Publications, New York. [10 ref]

• **Summary:** A tempting collection of more than 100 natural, healthful desserts made without sugar, honey, or artificial sweeteners. Recipes adapted from Far Eastern, Traditional European, and Classical American desserts.

Contents of Part III: An appendix of food value charts. Guide to natural and health food stores (p. 151-167). Bibliography. The guide is arranged alphabetically by state; within each state the stores are listed alphabetically by store name, with the store name, address, city and Zip code given. For example (in California): The General Store, 5th St. between Mission and Junipero, Carmel 93924. At the end of this section, half a page is devoted to: “Wholesale Distributors in the United States” [directory].

Arkansas: Shiloh Farms, Rte. 59. Sulfur Springs 72768.

California:

Erewhon Trading Co. of L.A., 8003 W. Beverly Blvd., Los Angeles 90048.

Chico San Foods, 1144 West First St., Chico 95926.

Illinois: Food for Life, 420 Wrightwood, Elmhurst 60126.

Massachusetts: Erewhon Trading Co., 33 Farnsworth St., Boston 02210.

New York:

Deer Valley Farms, Guilford 13780.

Infinity Food Co., 171 Duane, New York 10013.

Juniper Farms, Box 100, Sugar Loaf 10981.

North Dakota:

Pioneer Specialty Foods, Fargo 58100.

Pennsylvania: Merit Food Company, Pill Hill Lane, Box 177, Bally 19503.

Natural Herbs only:

Celestial Seasonings, Box 1405, 1027 Pine St., Boulder, Colorado 80302.

Meadowbrook Herb Garden: Rte. 138, Wyoming, Rhode Island 02898.

Soy-related information and recipes are (page numbers refer to the pocketbook edition): soy milk as an alternative for cow’s milk (p. 12). Unrefined soy oil (p. 27). Koji and amasake (p. 29). Soy milk (p. 30). Soybean crêpes (with soybean flour, p. 65). Mock cream cheese cake (with tofu, p. 75-76). Tofu or soy cheese (homemade, 76-77). Amasake cookies (p. 83). Amasake (homemade from koji, p. 154-55). Soy cream sauce (with soybean flour, p. 161-62). Eggnog (with 3 eggs separated, 2 tablespoons barley malt extract or Amasake Syrup, 4 cups chilled Soy Milk, 1 teaspoon vanilla extract, and nutmeg, p. 172-73). Soy milk (homemade, p. 180). Food value charts (p. 185-87). Address: Food for Life store, Chicago, Illinois.

797. Ford, Marjorie Winn; Hillyard, Susan; Koock, Mary Faulk. 1973. The Deaf Smith country cookbook: Natural foods for family kitchens. New York, NY: Macmillan Publishing Co. (Collier Books). London: Collier Macmillan Publishers. xiv + 352 p. Preface by Frank Ford. Illust. Index. 24 cm. [7 ref]

• **Summary:** A pioneering natural foods cookbook, produced and copyrighted by Arrowhead Mills, Inc. of Hereford, Texas. Soy-related recipes include: Roasted soybeans (p. 42-43). Miso soup (with wakame, p. 53). Tamari bouillon (p. 57-58). Todo en la caldera (with soybeans and miso, p. 58). Miso sauce (p. 90-91). Thick tamari sauce (p. 91). Tofu (soybean cheese or bean curd, p. 98-99; an early recipe for homemade tofu made with vinegar or lemon juice as a coagulant. Lists 6 serving suggestions for tofu and 1 for the “soy mash” [okara]). Cooking flaked soybeans (p. 132-33). Soy sesame burgers (with 1/3 cup whole sesame seeds, p. 135-36). Rice pancake with tofu (p. 136). Soybean loaf (p. 138-39). Cooking with soybean flakes (p. 156). Blazing star

timbales (with soybean flakes, p. 156-57). Tamale soy pie (with cooked soybeans or soybean flakes, p. 182-83). Soy milk (homemade, p. 292). In the last chapter titled “Natural Foods from Deaf Smith County,” the following soy-related foods are discussed: Soybean flakes (p. 324, 327), black beans (a type of soybeans, p. 326), soybeans and foods made from them (p. 327). Soybean flour (p. 328). Tamari roasted nuts and soybeans (p. 331). Tamari soy sauce (p. 334). Miso soybean paste (p. 334). Wheat gluten is not mentioned in this book. Frank Ford’s preface shows him to be a devout Christian, organic farmer (in Deaf Smith County, Texas), and advocate of natural foods.

In about Sept. 1991 this early natural foods cookbook was reprinted with a new cover and subtitle (“Natural Foods for Natural Kitchens”). Over 300,000 copies are now in print. Address: 1. Arrowhead Mills, Hereford, Deaf Smith County, Texas; 2. Soquel, California; 3. Foods editor, *The Texas Star*.

798. George Ohsawa Macrobiotic Foundation. 1973. Useful names and addresses. 1471–10th Ave., San Francisco, CA 94122. 55 p. 21 cm.

• **Summary:** This macrobiotic directory lists names and addresses of macrobiotic people, organizations, food stores and restaurants, and bookstores in the United States (each category broken down by state), Canada, and abroad. The leading states for individuals are California (7.3 pages), New York (1.5 p.), and Massachusetts (1 p.).

There are listings for the following foreign countries: Argentina, Australia, Austria, Belgium, Brazil, Costa Rica, Denmark, England, France, Germany, India, Ireland, Italy, Japan, Mexico, Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, South Vietnam.

There are ads for the following companies: Sunflower, The Queensberry Bakery (112 Queensberry St., Boston 02215), East West Foundation Center, Sanae Inc. at 2 locations (Sanae Restaurant at 272A Newbury St., Boston, and The Seventh Inn at 288 Boylston St. in Boston), Prasad (1956 University Ave., Berkeley, California) (p. 0). Eden whole earth grocery and delicatessen, and Sun Bakery (330 Maynard St., Ann Arbor, Michigan) (p. 18). Janus Natural Foods (712 7th Ave. South, Seattle, Washington 98104. Phone: 206-MA4-1084) shows that they distribute (import) tamari and miso, as well as sea vegetables. They carry the following brands: Erewhon, Spiral Foods, Deaf Smith, Pure & Simple, Chico-San, Arrowhead Mills (p. 27). Cliffrose (129 Coffman, Longmont, Colorado). Ceres Harvest Natural Foods (3632 W. Colorado Ave., Colorado Springs, CO 80904; wholesale and retail) (p. 39). The Good Karma Cafe (501 Dolores St., San Francisco), and The Good Earth (123 Bolinas Rd., Fairfax, CA 94930) (p. 50). Greenberg’s Natural Foods, Inc. (125 1st Ave., New York, NY 10003).

Individuals and organizations interested in macrobiotics in the United States (arranged by state): Massachusetts:

James Silver, Seventh Inn, 288 Boylston St., Boston, 02116. Erewhon Trading Co., 33 Farnsworth St., Boston, 02210. Michio Kushi, 440 Boylston St., Brookline, 02146. John Deming, c/o Kushi, 440 Boylston St., Brookline, 02146. Nik & Joanne Amartseff, Top of the Harbor, Gloucester, 01930. Ken & Ann Burns, 22 Knoll St., Roslindale, 02131.

Michigan: Mr. and Mrs. Michael Potter, #1169, 1407 Charlton Ave., Ann Arbor, 48103. Judith A. Bolduc, 822 Brookwood Rd., Ann Arbor, 48104.

The George Ohsawa Macrobiotic Foundation is a non-profit organization located at 1471–10th Ave., San Francisco, California 94122. It was founded in 1971. The aim of the Foundation is to spread the teaching of the unifying principle and its practical applications in daily life. Address: San Francisco, California.

799. Goldbeck, Nikki; Goldbeck, David. 1973. The supermarket handbook: Access to whole foods. New York, NY: Harper & Row. xvii + 413 p. Illust. by Ellen Weiss. Index. 22 cm. Second ed. published 1976 by New American Library/Plume Books. 460 p.

• **Summary:** This influential book is dedicated “To the Preservation of the Family Farm.” The authors believe that butter is a better spread than margarine, which is made by saturating polyunsaturated oils and adding many artificial ingredients (artificial color, preservatives). The chapter on beans contains a table titled “Protein for Pennies” that includes soybeans at the top of the list: Calories/lb: 1,828, protein/lb 154.7 gm, cost/lb: \$0.25. Soybeans, unlike other beans, are a complete source of protein. “Soybeans: Soybeans are the most virtuous of all beans. They are the only food in the vegetable kingdom that contains all the essential amino acids the body needs to synthesize protein. People often talk about masking the flavor of soybeans with gravies and lots of seasoning; we don’t know why since these beans actually have quite a pleasant taste of their own. Although cookbooks dealing exclusively with soybeans have been written, soybeans can be used just as you would any other bean and require no special handling” (p. 124).

A quarter pound soybeans grow into about 1 pound of soy sprouts. A nutritional comparison of the whole beans and the sprouts is given, showing the increase in vitamins. An illustrated description of making sprouts is given (p. 130).

Prepared sauces: Imported natural and “tamari” soy sauces are recommended. “The American simulation of soy sauce is unfortunately doctored with sugar, caramel coloring, and preservatives. Kikkomen [sic, Kikkoman] is the purest of these, tainted only with preservatives.” Lea & Perrins, “the original Worcestershire Sauce,” is considered the best and the only natural one. Other brands add corn syrup, artificial coloring and flavoring, and stabilizers. Recommended soy oil brands: Melba, Hain, Hollywood. They contain no artificial additives.

“The section ‘Soybeans: The greatest snack on earth’

(p. 292) recommends: 'Soy Ahoy, roasted, unsalted soy nuts; Flavor Tree Pernuts, plain or seasoned; Parker's Soy Joys.' Flavor Tree also makes a variety of 'chips.'" But these contain no soy. Note that neither tofu nor miso are mentioned in this book. The book does not advocate a vegetarian diet, but in the chapter "Meeting the Challenge of Meat," it discusses the many health problems with meat and recommends that if you still want to eat meat, try to find a natural, good quality product.

A photo on the back of the dust jacket shows Nikki and David Goldbeck. Address: R.D. 1, Box 452, Woodstock, New York 12498.

800. *Health Foods Business*. 1973. Serial/periodical. New York: Commercial Circular Co. Howard Wasserman, publisher. Michael Spielman, editor. Frequency: Bi-monthly. • **Summary:** Continues *Dietetic Foods Industry*, which started in about 1955 (but which is not listed in OCLC / WorldCat as of April 2011). Continued by *Health Products Business* (from Jan. 1999).

Murray, Frank; Tarr, Jon. 1984. *More than one slingshot: How the health food industry is changing America*. See p. 54. "In the [health food] trade, the magazines include *Health Foods Business* (formerly *Dietetic Foods Industry*), which began publishing in 1950; the publisher is Howard I. Wasserman and the editor is Alan Richman. Headquarters is in Elizabeth, New Jersey.

Talk with Howard Wasserman. 1992. Sept. He owns and runs the company, which he bought in Nov. 1972. He changed the title from *Dietetic Foods Industry* to *Health Foods Business* in 1973. He thinks it was NEVER titled *Health Food Business*. The oldest back issue owned by the company is late 1973 (vol. 19). They claim to be the second oldest health food periodical and the oldest existing one. *Health Foods Retailing*, edited by Frank Murray, went out of business several years ago; it was published for at least 15 years. The magazine is now owned by Howmark Publishing Inc., located at 567 Morris Ave., Elizabeth, New Jersey 07208. Howard I. Wasserman, president. Phone: 908-353-7373.

HFB. 1992. Nov. p. 44. Net press run: Average number of copies printed of each issue during preceding 12 months: 12,593. Total paid or requested circulation: 9,815.

In about March 1994 *Health Foods Business* was acquired by PTN, a magazine publishing conglomerate located at 445 Broad Hollow Road, Melville, New York 11747.

Each year the November issue was the "Purchasing Guide" for the next year, e.g. "1984 Purchasing Guide published in Nov. 1983." Each guide was an industry directory. Soyfoods Center owns the 1984 and 1993 purchasing guides. The Library of Congress has most issues from 1977 to Dec. 1998. Address: 475 Park Avenue South, New York, New York.

801. Parsons, Mothey. 1973. *Almonds to zoybeans: A cookbook of delicious, varied & high protein recipes for vegetarians*. New York, NY: Larchmont Books. 192 p. Illust. by Maren Ate and Jim Blackfeather. Index. 18 cm. [1 ref] • **Summary:** An early natural-foods, vegetarian cookbook—inspired in part by *Diet for a Small Planet*, by Frances Moore Lappe. Contents: Introduction: How this book came to be written. Appetizers-dips. Eggs. Soups. Cheese dishes. Soybean dishes. Salads. Vegetable dishes. Jerusalem artichokes. Beverages. Miscellaneous. Desserts. Food charts: Sources of thiamine (vitamin B1), riboflavin (B2), niacin (B3), pyridoxine, vitamin B-12, pantothenic acid, biotin.

In the chapter titled "Soybean dishes" all the 14 recipes call for [whole dry] soybeans, cooked soybeans, or "thick soybean puree."

The last recipe, "Mock turkey souffle," combines soybeans and sage to give a baked dish that tastes "a lot like turkey."

802. *SoyaScan Notes*. 1973. Chronology of Ceres Natural Foods (Colorado Springs, Colorado). 25 Sept. 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1973—Ceres Harvest Natural Foods is located at 3632 West Colorado Ave., Colorado Springs, CO 80904. Their ad in *Useful Names and Addresses* (p. 39), published in 1973 by the George Ohsawa Macrobiotic Foundation [California], reads: "Open weekdays 9-6, Sundays 12-6. Complete stock of organically grown staples, fresh fruits & vegetables. Bulk purchases—Wholesale & retail. Call (363) 636-2898. They are also listed in the *East West Journal* of Nov. 1973 (p. 46). According to James Silver (Dec. 1991) Ceres was started by Frank Calpeno. Frank's sister, Wendy, was known as the "Natural Foods Lady" by all the grocery people.

1973 Dec. 19—Ceres Natural Foods is represented at a meeting of natural food distributors in Toronto, Ontario, Canada, by Frank Calpeno. Frank also attends meetings in March and Nov. 1974, and March and May 1975.

1974—Ceres, Inc. is now located at 2582 Durango Dr., Colorado Springs, CO 80910 (According to Marcea Newman's *The Sweet Life*, p. 151).

1976 Jan.—Ceres is now a member of the Natural Foods Distributor Association. Ceres is also a major account of Erewhon, with James Silver handling their account. Silver recalls that when Ceres went out of business, Erewhon lost a lot of money. Address: 3632 West Colorado Ave., Colorado Springs, CO 80904. Phone: 363-636-2898.

803. Voltz, Jeanne. 1973. *The Los Angeles Times natural foods cookbook*. New York, NY: G.P. Putnam's Sons. 368 p. Illust. by Ellen Friedman. 24 cm.

• **Summary:** This pseudo-vegetarian cookbook uses some fish and poultry. Soy-related recipes include: Soy nuts (oil

roasted, p. 28). Soy beans country style (p. 83). Soy bean loaf (p. 83). Soy bean curry (p. 84). Soy salad mimosa (p. 220). White soy bread (with soy flour, p. 267-68). Whole wheat soy bread (p. 268-69). Oatmeal soy bread (p. 270-71). Molasses-baked soy beans (p. 346).

804. Wade, Carlson. 1973. *Health secrets from the Orient*. West Nyack, New York: Parker Publishing Co., Inc. 252 p. Index. 24 cm. Foreword by William S. Keezer, M.D.

• **Summary:** This “Hollywood-style” book of miracle foods, magic bullets, and eternal youth, unfortunately has no bibliography and only one reference (a footnote) in the chapter on soybeans. Chapter 12, titled “The miracle vegetable protein from the Orient—A key to forever-young vitality” (p. 153-63) is about soybeans and soy products. Its contents: Introduction. Soybeans—A meatless source of complete protein. Soybeans—Meat without a bone. The magic ingredient in soybeans that helps promote perpetual youth: Secret youth power of soybean’s lecithin, the magic power of lecithin, the ten youth-building powers of lecithin in soybeans, soybeans for better energy, improved memory and steady hands, secret ingredient (lecithin contains auxines). Why Orientals call soybeans their “perfect food.” How soybeans gave Rose B. the look and feel of youth. A customer-friend offers Rose B. an Oriental soybean

secret: Soybeans offer digestive balance, soybeans improve skin and hair health, soybeans improve the posture and finger flexibility, soybeans help create a youthful feeling internally and externally. How cooked soybeans offer protein-plus health benefits: Here’s how it works (soybeans contain all essential amino acids but three of them—lysine, methionine and trypsin—are enhanced by cooking. “The soybean deserves its name—the ‘holy bean’”). How to prepare soybeans (try to use organically grown soybeans; drink the cooking liquid as “soybean tea”). Soybeans offer vitality-boosting nutrients (and no starch). For health-plus, try soybean flour. The Oriental way to make soybean milk (recipe for “vegetable milk”). Why Orientals value soybean protein above meat protein. Meat protein may be less effective. Main points (Summary).

805. Erewhon. 1973? *The oil story* (Leaflet). Boston, Massachusetts, and Culver City, California: Erewhon. 3 panels each side. Each panel: 22 x 10 cm. Undated.

• **Summary:** This 6-panel leaflet is printed in dark green ink on beige paper. On the front panel is written: “erewhon: The unrefined oil story.” Below that are three golden and green sunflowers. No author is listed, but the text is different from that written earlier by Paul Hawken and Fred Rohé. It begins by stating clearly that the simple term “cold-pressed” can

prove very misleading. “We do not sell any cold-pressed oils, having chosen to call our oils simply ‘pressed’ because of the fact that all vegetable oils are heated during the process of pressing. To make this distinction clearer it will be helpful to look closely at two phases of oil processing: extraction and refining—or the lack of it.” Both phases are explained clearly and in detail. Erewhon does not refine its oil.

“If you have any questions about our oils or any Erewhon products, please write us. Erewhon, 33 Farnsworth Street, Boston, Massachusetts 02210. Erewhon, 8454 Steller Drive, Culver City, California 90230.”

On the back panel: “We hope you will try our full line of oils: Safflower oil. Sesame oil. Olive oil. Sunflower oil. Corn oil.”

806. Photograph of original Los Angeles Erewhon crew at the Culver City warehouse, southern California, around 1972-73. 1973? Undated.

• **Summary:** See next page. Note: This photo, taken by Roy Steevensz, was sent to Soyinfo Center by Norio Kushi and Peggy Steevensz, daughter of Roy Steevensz.

807. Source (The). 1973? The Source (Menu). Hollywood, California. 6 p. Undated. 22 cm.

• **Summary:** This attractive undated menu, handwritten in calligraphy with a decorative illustrated border, is from the famous vegetarian restaurant started in 1969 by Jim Baker (Yahowa); the original is owned by the Los Angeles Public Library. Though the restaurant is usually said to be vegetarian, a chicken sandwich (tucked in pita bread) and a tuna sandwich appear on the menu under Salads; all other menu items are vegetarian.

Contents: Breakfast menu (incl. Soy or whole wheat pancakes). Juices (Fresh squeezed to order, incl. Fruit smoothie). Sandwiches. Beverages (incl. Herb tea, Mu tea, Carob milk, Red Zinger tea). Salads (incl. Chinese style salad with tamari sauce, and some with alfalfa sprouts). Fruit salads. Entrees (incl. Magic mushrooms with hiziki and “tamari sauce”). Soup. Desserts (incl. Cheesecake, Ice cream, Coffee cooler, Date shake, Carrot cake, Rice pudding).

Note 1. Since the prices in this menu are about 30% (range 18-66%) more expensive than those in the other menu seen from The Source, this one was almost certainly of a later date.

Note 2. The word “organic” does not appear in this menu. Address: 8301 Sunset Blvd., Hollywood, California. Phone: 213-656-6388.

808. East West Foundation for One Peaceful World. 1974. East West Foundation for One Peaceful World Land Project. 440 Boylston St., Brookline, MA 02146. 33 p. 28 cm.

• **Summary:** Contents: Part one: Introduction. Directions to the Land. Map of the Land. Description of the Land.

Intended use of the Land. Spiritual and cosmological center. Presentation of natural agriculture. Educational, research and communication center. Cultural and art exchange center. Center of traditional industry. Social center. Conclusion of part one.

Part two—Appeal for support. General purpose donations. Donations for private use of land. East West Foundation for One Peaceful World sponsorship. Direct participation. Donation of materials. Promotion and personal contact. Participation of companies or corporations. Conclusion of part two.

Part three—Donation forms.

Editor: Edward Esko. Typist: Wendy Everett. Staff: Marylee Boyce, Doug Haywood, William Painter.

Page 1 begins: “January 1974. The East West Foundation for One Peaceful World has entered into an agreement with Mr. Hideo Sasaki regarding the purchase of 550 acres of land in Ashburnham, Massachusetts, which is located north of the town of Gardner. Driving time from Boston is between one hour and one hour and fifteen minutes, yet this land is situated in a beautiful and natural setting amidst pure and clean air, water, and sky. When night comes, the clear northern sky is filled with millions of glittering stars, which seem to be about to drop over our heads.

“The Foundation is planning to establish a spiritual, religious, philosophic, cultural, educational, and social center on this land, which will be dedicated in its entirety to humanity, nature, society, and the infinite universe.” The page is signed: “In Peace and Love, Michio Kushi.” Address: Brookline, Massachusetts. Phone: (617) 734-3853 or 7909.

809. Frankle, Reva T.; Heussenstamm, F.K. 1974. Food zealotry and youth: New dilemmas for professionals. *American J. of Public Health* 64(1):11-18. Jan. [47 ref]

• **Summary:** Discussion of non-traditional eating patterns (vegetarianism, natural foods, Zen macrobiotic diet, organic foods) being adopted by youth in America. Includes guidelines for professionals trying to provide meaningful nutrition information to adolescents on non-traditional diets, and stresses the importance of communication between health professionals and individuals in the counterculture. Address: 1. Coordinator of the Nutrition Div., Dep. of Community Medicine, Mount Sinai School of Medicine, New York, NY 10029, and Instructor, Programs in Nutrition; 2. Assoc. Prof. of Education. Both: Teachers College, Columbia Univ., New York, NY 10027.

810. Eden Foods, Inc. 1974. Wholesale prices, F.O.B. P.O. Box 100, 310 W. Ann St., Ann Arbor, MI 48107. 2 p. Catalog. Effective Feb. 1.

• **Summary:** The products are very similar to those in the Nov. 1973 catalog. The 3 types of miso (Mugi, Hacho, Kome) bear the Erewhon label. Address: Ann Arbor,

Michigan. Phone: (313) 769-8444.

811. Chandler, Russell. 1974. Sun shines bright on brotherhood: 'Dream' bears fruit—and vegetables and profits. *Los Angeles Times*. Feb. 3. p. B1.

• **Summary:** About Norman Paulsen (age 44) and the Sunburst community and Sunburst Farms he founded located near Santa Barbara, California. Brotherhood of the Sun is his 250 member religious (Christian) community. His and their businesses include four ranches, three organic food markets, two restaurants, a bakery, a trucking / distribution service. Members of the community are restoring his 158-foot schooner (a sailing ship), the *Invader*, at San Pedro. He believes that all of this has come about through visions from Christ. He used to live in a yoga community in Los Angeles.

Last summer the brotherhood purchased a 2,000 acre orchard containing 40,000 pear and apple trees in the Cuyama Valley on the Bakersfield side of the coastal range. Here Paulsen wants to expand his community to 1,000 people and to build a "New Jerusalem."

Photos show: (1) Norman Paulsen and his wife meditating with others in the brotherhood. (2) Mary Paulsen weaving at Sunburst Farm. Address: Times religion writer.

812. Kushi, Michio. 1974. Natural agriculture and food processing. *Michio Kushi Seminar Report (Brookline, Massachusetts)* No. 3. Feb. 26 and 27. p. 5-30. Edited by Ane & Mark Riegel.

• **Summary:** On Feb. 26 Mr. Kushi, a macrobiotic teacher, lectured on: Tekka—"Tekka is used not only as a condiment, but also for medicinal use. Tekka is made from three different roots—carrots, burdock, and lotus roots." The "volume of miso is flexible... Homemade tekka is traditionally made in a cast iron frying pan." The Japanese word "tekka" derives from *tetsu* (which means iron) and *ka* (fire). "For medicinal use, yang miso is better."

Miso and miso manufacturing, including how to make malt (rice koji) (8 pages). Note: This section indicates that Mr. Kushi has some basic knowledge of the subject but there are many errors. 1. Koji is not malt (which refers to soaked, germinated cereal grains), but molded cereal grains or soybeans. 2. Koji kin is not malt bacteria, but koji molds. 3. One does not add enzymes to miso and enzymes do not grow. Even modern miso factories do not add enzymes when making miso. 4. The entire mixture is not stirred after 20-25 days to add oxygen. Kushi says you must keep miso for a least 6 months, but to cure sickness it must be kept for 2-5 years. Miso soup can compensate for the bad qualities of meat and eggs—so everyone should eat miso soup daily. Soup stocks and miso soup.

On Feb. 27 he discussed: General outline for making shoyu—soy sauce (4 p.), including discussions with Kikkoman on making natural shoyu starting with whole soybeans. In the early years after 1973, Kikkoman wanted

to make natural shoyu and sent Kushi several samples, but he turned them all down, in large part because Kikkoman wanted to use defatted soybean meal instead of whole soybeans. Erewhon is buying shoyu from 3 companies in Japan. But Kushi says the quality is declining compared to five years ago [i.e., 1969], when it had powerful healing effects when taken with bancha or kuzu. He adds: "Around Boston or on our Ashburnham land, I really hope we can begin to make miso or soy sauce." Kushi says that now, after pasteurization, coloring and flavoring is added [not true, except in HVP soy sauce]. "Traditionally [in Japan] for this they used natural herbs. For a sweeter taste and darker color they traditionally used *kanzō* [kanrō?] or 'sweet grass = sweet herb.'"

"Formerly, until modern technological methods started to be applied, almost each village made their own shoyu like this, either as a joint community project, or someone with money made it and sold it to several villages."

Using bean and grain sprouts—moyashi (including soy sprouts). Other soybean products: Fried tofu (two methods for *agē*). Ganmodoki. Kori-tofu or koya-tofu (freeze-dried tofu). Soybean milk ("Soy milk is very yin." Note: Most Japanese and Japanese scientists consider soymilk to be an "alkaline" {*arukari-sei*} beverage, which therefore promotes good health). Yuba. In the discussion (p. 28), yogurt made by leaving soymilk unrefrigerated and "Chinese fermented tofu... fu nyu" are mentioned. The U.N. [United Nations] recommendations on food, using vegetable proteins.

Note: This is the earliest English-language document seen (April 2013) that uses the term "freeze-dried tofu" to refer to dried-frozen tofu. Freeze drying, which is an expensive, modern, high-tech process that uses a vacuum chamber to dry a frozen food, is not a good term to use for this traditional Japanese food which is air-dried naturally. Address: Brookline, Massachusetts.

813. Gerner, Bob. 1974. Log of trip to Japan to study traditional natural foods, 28 Feb.—2 March 1974. Part I (Log—unpublished). Westbrae Natural Foods Inc., Berkeley, CA 94710. 26 p. Unpublished log. Handwritten. 20 x 8 cm.

• **Summary:** 1974 Feb. 28. Meet Bill Shurtleff and Mr. Masa Miyashita of Kikkoman export dept. (good man, speaks fluent English) at the Imperial Hotel (*Teikoku Hōteru*, built in the 1920s by Frank Lloyd Wright) in Tokyo. Talk for 4 hours. Westbrae hires Shurtleff as an interpreter and guide.

March 1. Dinner at Sasa-no-Yuki, beautiful old restaurant that specializes in tofu cuisine.

March 4, Monday. Visit Kikkoman in Noda with Shurtleff and Miyashita. Tour Plant #7, then Plant #4 (the Goyo-Gura), which produces the emperor's shoyu in the traditional, natural way. "Saw 5 batches of moromi mash from 1 month old to 12 months old, and tasted each one. Delicious. Great color change between the 1 month and the 12 month moromi. We saw all the traditional tools. The

moromi vats were made of cedar and last approximately 200 years.” See a movie on how shoyu is made. Lunch at a sushi shop. Visit two miso retail shops with Shurtleff near his home. One had 42-45 types of miso (mostly rice miso, with 1 each Hatcho, barley, and cooked miso), the other 32-35 types. Tasted many and learned the differences. I buy Saikyo sweet white miso and Hatcho miso.

March 5, Tues. Attend a cooking class at Lima Ohsawa’s house, then have dinner with Lima and the class members. Sick for the next 2 days.

March 9, Sat. Call then meet Mr. Kazama of Mitoku. He represents Erewhon. We may import through Kikkoman’s Pacific Trading. Plan trip to Sendai Miso-Shoyu. Sendai is interested in using organic soybeans to make shoyu but would like a contract stating that all of it will be purchased when done. Dinner at the natural foods restaurant, Hakumon run by a Frenchman named Pierre.

March 11, Mon. Meet Shurtleff early at Tokyo station. Take bullet train (Shinkansen) to visit two Hatcho miso plants (Hayakawa Kyuemon Shoten, and Ota Shoten in Okazaki city, Aichi prefecture). Both plants claim to be over 600 years old. They use modern steamers and koji rooms. They pile 4-6 tons of rocks atop each large vat of miso, age it for 2 summers. It becomes very mellow when fully aged. They also use about half of their Hatcho miso to make Akadashi miso. It also contains caramel coloring, barley syrup, MSG, shoyu, a white miso, and preservatives. They sell a lot of Akadashi but only a little Hatcho miso. Lunch at an udon noodle shop that hand makes and cuts the noodles. Lots of slurping. Then visit a plant that makes real tamari and shoyu. All the tamari is mixed with junk. Train to Kyoto; stay at Friends World College. Note: This is the earliest English-language document seen (March 2012) that contains the term “real tamari.”

March 12, Tues. Visit a tofu maker, a yuba maker (*Yuba Han*), then the company that makes Saikyo sweet white miso. The owner lies to us initially about his miso aging and caramel coloring (which tastes and looks like tar). Then he reverses himself without batting an eye. Lunch at a 300 year old Zen vegetarian restaurant (*Okutan* near *Nanzenji* temple); so beautiful that I start crying. Fantastic place. Light snow falling by the pond. Enjoy Simmering Tofu (*Yu-dofu*) in a broth. Then we go to a 400-year old tofu restaurant (*Nakamura-ro*) at a shrine (*Gion*) for dessert of *amazake* and *Dengaku* (skewered and braised with sweet miso). On to a second miso factory. It is a bore and the owner does not seem sincere but he has a great reputation among macrobiotics. He makes both natural and sweet white miso. Shurtleff visited him last year. For white miso the soybeans are boiled; for red miso they are steamed. Some white miso contains sodium thiosulphate bleach. Visit another yuba shop. They use granite grinding stones to make soymilk, cast iron pot to cook it in and copper skimming tables. A very beautiful place. Meet Ty Smith at a soba shop. He is a chain smoker,

just quit working for Muso, and promoting a cooperative effort between Janus, Chico-San, Erewhon, and The Well to import foods from Japan. Evening at Jittoku coffee house, owned by an American, in a large old Japanese treasury (*kura*). Back to Tokyo by train. Talk until 1:00 A.M.

March 14, Thurs. Meet Kazama and Shurtleff, and take express train to Sendai Miso-Shoyu. We are treated royally by Mr. Muro. Long introduction and discussion. Visit their 2 plants, one modern, one traditional, natural. They make only rice miso. Their production of natural miso is more than all that imported to America by Erewhon and Janus. They age their natural shoyu 18-24 months at the request of Michio Kushi and Erewhon. They have 9 aging vats for the first year, then it is switched to other tanks. They invite us to have a shoyu taste test among 3 products: Kikkoman regular shoyu, Sendai regular, Sendai natural. Both Bill and I choose Kikkoman as best; good aroma, color, and taste. They congratulate us on our good taste. Sendai regular had very strong salty taste. We both liked the Sendai natural least; good color, no aroma, very mild taste. Sendai people say only one year is needed to ferment shoyu naturally. We might sell them organic soybeans (we had purchased 12 truckloads from a farmer) and get shoyu back in 1 year. We meet the president (Sasaki?), born 1928. Elegant geisha-hosted tempura and sushi dinner with president, 2 vice presidents, production manager, and a consulting professor (Shibasaki sensei). After dinner to a traditional bar for *doburoku* (thick, unrefined sake with a low alcohol content [or was it *nigori-zake?*]), then a sushi house. Shurtleff leaves for Tokyo on night train.

March 16, Sat. Visit Shurtleff and Aoyagi’s home for lunch. We have dried-frozen tofu main dish, salad with creamy tofu dressing, strawberries with tofu whipped cream. Delicious. Then we learn how to make tofu at home. It’s easy. I’ll make it at home in California, then at our Westbrae Natural Foods retail store on Gilman Street (Note: This led to a long series of tofu classes by Gerner, Liz Horowitz, and later Shurtleff & Aoyagi; The retail store changed its name in late 1976 to Gilman Street Gourmet).

Note 1. This is the earliest document seen (March 2020) concerning Westbrae Natural Foods.

Note 2. This is the earliest English-language document seen (Jan. 2012) that contains the term “creamy tofu dressing” (or “dressings”) a term coined by Shurtleff and Aoyagi in *The Book of Tofu* (p. 108).

Note 3. This is the earliest English-language document seen (April 2013) that uses the term “dried-frozen tofu.”

Note 4. This is the earliest English-language document seen (Oct. 2013) that contains the term “Tofu whipped cream” (regardless of capitalization). Continued. Address: President & Chairman of the Board, Westbrae Natural Foods Inc., 1224 10th St., Berkeley, California 94710.

814. Gerner, Bob. 1974. Log of trip to Japan to study

traditional natural foods, 28 Feb.–2 March 1974. Part II (Log–unpublished). Westbrae Natural Foods Inc., Berkeley, CA 94710. 26 p. Unpublished log. Handwritten. 20 x 8 cm.

• **Summary:** Continued: March 19, Tues. Take bullet train to Kyoto to meet Steve Earle of Muso Shokuhin. We 3 go to Okayama to see Fuchu Miso, that makes mugi miso (the barley miso sold in our store) and sweet white miso. The president’s wife is the epitome of Japanese woman. For lunch we have tofu burgers with Italian sauce and mushrooms in a bento made by Akiko. Delicious. Take a boat to Shodo-shima where Marushima Shoyu Co. is located. Island is also famous for toasted sesame oil. Arrive at a ryokan at 6:30 P.M. VIP treatment. Bath before dinner and served in private room by geisha. Too much fish! Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “tofu burgers.”

March 20, Wed. Miso soup for breakfast. Visit Marushima Shoyu where Muso gets its “natural” shoyu for export to America. They have the newest wheat roasters (they roast it with sand), biggest presses. We see cement aging tanks in a temperature-controlled room, then onto a large red building with 150 aging tanks. But we see no whole soybeans, only soybean meal (*dasshi daizu*). “I feel the owner is a liar and this is a bogus operation. The scene gets heavy and ugly. Bill is great and presses on with questions.” The owner claims that 40% of their shoyu is natural, aged for 3 years and made with whole soybeans; 60% made with soybean meal, temperature controlled for 7 months. Thus there should be about 120 vats of natural versus 60 regular. But where is the natural? Their faces turn red. We have caught them red handed. The owner take us to one musty, dirty old building with 25 vats, only 8 of which contain shoyu, some only half full. Lots of cockroaches. Looks like no one ever goes here. Still no sign of a single whole soybean. Uneasy departure. Steve Earle is embarrassed. We take a train to Tokyo. We present Earle/Muso with a list of inconsistencies and ask for a written reply.

March 21, Thurs. Visit Mr. Kazama’s miso factory (*Ikeda Kojiro Miso Shoten* in Kawaguchi-shi near Tokyo), that makes barley miso, the only brown rice miso in Japan, and shoyu. Call Ty Smith of Muso. He says Muso was very happy with our findings concerning the problems at Marushima, and that they have contacted a new source in Kyushu. Marushima said their president died a year or so ago and his son took over. They have lost the old feeling and tradition.

March 22, Fri. 6:00 A.M. Meet with Bill Shurtleff at his tofu master’s tofu shop (*San-Gen-Ya*, run by Mr. Toshio Arai). We watch how he makes tofu. Beautiful place (12 feet square) attached to their home. Beautiful people; they don’t speak English. Both make tofu starting early in the morning. He delivers in the afternoon and she sells out of the shop. He gave me hot rich soymilk (from *kinugoshi*) with wild mountain honey. Both incredible. So sweet and delicious.

They also serve us freshly made agé, kinugoshi, and natto. Lunch at Shurtleff and Aoyagi’s home: Noodles and tofu, Chinese fried tofu, tofu pudding, agé, kinugoshi, and mikan orange. We go over my notes from the miso factory. We copy all of his notes. Then I leave, very sad, but the friendship will remain. Akiko is a remarkable lady. Meet Mr. Kazama and go to Pacific Trading. Lousy meeting with Mr. Masaaki Miki (sales manager), and Masa Miyashita (export dept). Go to airport.

Results of the trip: (1) Westbrae started (about 9 months later) to import many varieties of miso, plus shoyu, and other products from Mr. Kazama in Japan. Bob Gerner was the founder, president, and chairman of the board of Westbrae; (2) Bob Gerner and Liz Horowitz taught “Tofu and Miso Cookery Classes” in Berkeley during 1976; (3) Westbrae published and distributed widely two brochures, *What is Miso?* (May 1976) and *What is Tofu?* (July 1976) written by Shurtleff and Aoyagi; (4) In 1976 Westbrae Natural Foods Inc. decided to sell its retail store at 1336 Gilman St. in order to focus on being a distributor and importer. The store had been losing money. Bob Gerner bought it in June 1976 for the low price offered by the highest bidder. He remodeled the store, renamed it Gilman Street Gourmet, and re-opened it in Sept. 1976. In the spring of 1977 Gerner added a deli to the store; there he made and sold Tofu Burgers, Tofu Treasure Balls, and Tofu Steaks Sauteed in Ginger Sauce. The same week that the deli opened, Gerner sold 3,000 to 4,000 of his new Tofu Burgers out of the Westbrae booth at the New Earth Exposition in San Francisco. Bob’s nephew and sister (Margaret) made the tofu burgers. The burgers sold equally well at the same Expo in 1978 and 1979; (5) Shurtleff and Aoyagi wrote *The Book of Miso* and their New-age Foods Study Center moved toward becoming Soyfoods Center.

Note: In late November 1974 Mr. Kazama came to a meeting at Pajaro Dunes by Santa Cruz, sponsored by The Well. The idea was to set up a natural foods trade association. Erewhon wanted to control all imports of Japanese natural foods from Japan. Janus and The Well both had to import through Erewhon. They said Westbrae must buy through them via The Well (Roger Hillyard/Pure & Simple), and pay a 5% commission. Kazama had to defer to them. Gerner refused and they backed off. Ty Smith, now head of Erewhon, was upset that Westbrae was not paying a commission. Gerner told him “Tough.” So Westbrae ended up importing from Kazama. Address: President & Chairman of the Board, Westbrae Natural Foods Inc., 1224 10th St., Berkeley, California 94710.

815. Photograph of people at the Erewhon warehouse–Boston. 1974. Boston, Massachusetts.

• **Summary:** These photos were sent in 2009 by Patricia Smith, who worked at Erewhon. They are not dated and the names of some people are unknown.

Concerning the date and place: Mark Ripa (Jan. 2011)

says: “I think both photos were taken the same day, in the winter of either late 1973 or early 1974. They were taken next to the front windows of the third floor at 31 Farnsworth Street, South Boston (adjacent to the Erewhon warehouse at 33 Farnsworth). 31 Farnsworth was a three floor building adjacent to the six floors of 33 Farnsworth. That floor was used for storage by the Erewhon warehouse. *East West Journal* occupied multiple floors at 31 Farnsworth at the time. I don’t remember the context other than it was a department photo of the ‘warehouse crew.’ Don’t remember any other department photos. The photos were taken, I think, by Nik Amartseff (responsible for creating Erewhon labels and product development at the time). He may also have worked for EWJ. Last I heard Nik was living in Vermont.”

(1) Photo of Mark Ripa (at Erewhon, Boston), wearing a beard, white suit (top and bottom) and necktie. On the photo, to his right, is written: “I’m Swami Bananananda and I’m here to say”—a take-off of the lyrics to a popular tune advertising Chiquita bananas, which begin: “I am

Chiquita banana and I’ve come to say, Bananas have to ripen in a certain way...” Mark notes: “The two lines written on my photo by persons unknown, perhaps inspired by my borrowed white suit”

Mark wrote to Patricia Smith (Oct. 2010): “My title at Erewhon [Boston] changed over the years. I went back to a resume to clarify the following: April 1972 to Feb. 1974—Packaging line worker, miller’s apprentice.

Feb. 1974 to Nov. 1974—Head miller.

Nov. 1974 to Aug. 1975—Buyer / merchandiser for the Star Market account.

Aug. 1975 to Oct. 1976—Buyer, assistant product development manager. Inventory control manager.

Oct. 1976 to June 1978—Purchasing manager. Product development manager.

June 1978 to Oct. 1979—Quality control manager.

“I had my hand in a few Erewhon labeled products, most of which were manufactured by copackers, notably organic corn chips, potato chips (I think I was the first to market a

tamari potato chip), apple juice and apple juice blends (I remember formulating apple spice juice and apple mint juice on my kitchen stove) and Mark's Natural Spaghetti Sauce (2 varieties)—the first spaghetti sauce to have tamari as an ingredient (Michio Kushi wanted to balance the tomatoes with tamari, which was more workable than miso) and bagels (how could I forget the bagels—but they were discontinued as they molded before their time)."

(2) People who worked at Erewhon, Boston. Mark Ripa is in the 2nd row, far left.

John Fogg, who worked at Erewhon, Boston, identifies the people in this group as follows: Front row (three men, left to right): Dan Seamens, Don Lorenson (great guitar player, supervisor in shipping), and Tony Harnett.

Back row (seven men, L-R): Mark Ripa (probably a purchaser by then), Roger, unknown, Bill West (worked in the warehouse or was a truck driver; ended up as Trucking Manager), Warren Murrah (Receiving Manager), Paul Campbell.

Evan Root adds (Jan. 2001). Tony Harnett is now known as Anthony Harnett. "Anthony and Hugo van Seenus bought the small 'Bread and Circus' store in Brookline, Massachusetts. Soon after, Anthony bought out Hugo and developed it into a group of big supermarket sized natural food stores, with a very high quality standard. In 1990 Whole Foods bought him out for \$26 million."

Steve Zoller adds (Jan. 2011): These were all macho warehouse guys who looked down on the "prods" (production guys) upstairs. The main erewhon building was at 33 Farnsworth St. I believe this was taken in the attached building (31 Farnsworth, I think). I base this on what looks like imports that were stored in that building, on the 1st floor. I would definitely date this later than the spring 1975 catalog photo.

Updates (from Steve): Dan Seamens—is at the WF Regional office in Cambridge. Bill West—married someone from erewhon (forget her name) and moved to New Mexico. Late 1980's I saw him last and he worked for a juice or soda company. Warren Murrah—Married Susan Stamps (David's sister) and worked at New Balance (maybe 1980?). Diane Markovitz—moved to St. Augustine, Florida, around 1977 to be with Greg Leonard (Tree of Life). Anthony Valenti—Married Carol (a former erewhonian); I last saw him as a waiter at a high class / priced restaurant in Boston.

816. Meeting of Natural Food Distributors. 1974. Erewhon Trading Co. 1 p. March 7-8. Unpublished manuscript.

• **Summary:** This meeting, a follow-up to the Dec. 1973 meeting in Toronto, Canada, was held at the Janus conference room on 7-8 March 1974, near Seattle, Washington. The meeting began with a brief period of meditation. Those in attendance were: Boyd Foster (Arrowhead Mills), Mike Potter (Eden), Bill Garrison (Erewhon / Boston), Loren Specter and Tom DeSilva

(Erewhon / Los Angeles), Michael Pate (Erewhon / Toronto), Tom Swan (Food for Life), Rod & Margy Coates (Laurelbrook), Charlie Smail (Shadowfax), Erwin Caruso [sic, Irwin Carasso] (Tree of Life), Roger Hillyard (The Well), Frank Calpeno (Ceres), George Gearhart (Janus), Tim Hartman (Janus), Blake Rankin (Janus).

George Gearhart was selected chairman. Each company presented a brief report of its current status.

"Eden—Mike Potter. Eden began as a retailer four years ago [i.e. 1970] and eventually borrowed \$30,000 to set themselves up as a distributor. Wholesale distribution began with products from Arrowhead Mills and Erewhon. The warehouse physically separated from the retail store and the company has recently begun to make money. The retail store is a complete natural foods center with a bakery and mill in the basement (bakery is a separate enterprise) and a restaurant upstairs. The restaurant presently turns \$225 per day. Rent on the retail facilities is \$1200 per month. The wholesale operation works out of a warehouse which is shared with Midwest Distributors (a health food jobber)."

Shadowfax began in 1971 as a trucking company. Tree of Life began in 1972. Lifestream (in British Columbia, Canada) began in Nov. 1969 as a retail outlet. Arrowhead mills began in 1960 selling stone-ground whole-wheat flour.

Note: This is the earliest document seen (April 2006) concerning Tree of Life.

817. Spiral Foods Inc. 1974. Wholesale price list. Chico, California. 4 p. March 15. 28 cm.

• **Summary:** This two-sheet catalog and price list, consisting of two pages stapled in the upper left corner, is printed front and back with reddish-orange ink on tan paper. The first item is five cookbooks. Soy-related products: Condiments: Lima tamari soy sauce (aged naturally over 2 yrs.). Miso—soybean puree (entirely natural—Mugi Miso, or Kome Miso). Lima kome miso. Nigari (natural coagulant to make tofu). Barley koji. Tekka. Sesame salt (toasted whole brown sesame seeds and sea salt). Salt plums (pickled in sea salt). Kuzu (wild arrowroot starch). Utensils: Soy pitcher [soy sauce dispenser]. Address: 1144 West 1st Street, Chico, California 95926. Phone: 343-2111.

818. Redmond, Timothy. 1974. Certificate of change of registered office and/or change of resident agent: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 1 p. March 12. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc. The address of the former registered office is 211 South State Street, Ann Arbor, Washtenaw County, Michigan 48104. The address of the registered office is changed to 310 W. Ann Street, Ann Arbor, Michigan 48103.

The name of the former resident agent is William T. Bolduc, Jr. The name of the successor resident agent is

Timothy Redmond. Signed by Timothy R. Redmond 12 March 1974. Filed by the Michigan Dep. of Commerce on 20 March 1974. Address: President, Ann Arbor, Michigan.

819. *Vegetarian Times*. 1974---. Serial/periodical. Chicago. Vol. 1, No. 1. March 1974. Initially bimonthly, then monthly from Jan. 1982. Paul Obis, founder and publisher. Incorporates Vegetarian World. Absorbed Well Being.

• **Summary:** The most important vegetarian publication ever issued in America. Indexed by AGRIS, and AGRICOLA. ISSN: 0164-8497. By the mid-1980s it was the world leader in the field. The subtitle of Vol. 1, No. 1 is "A Publication for Non-Meat Eaters." The address is 908 W. Oakdale, Chicago, Illinois 60657. This 6-page issue is undated and unpaginated. By 1977 the magazine was a 56-page bimonthly with 10,000 readers, but there were only 2 pages of ads: Obis was at the end of his rope. So he sold 80% of the publication to Bill Schnirring of Associated Business Publications in New York.

Schnirring published the magazine until 1985, with Obis as editor. Circulation increased eightfold and gross revenues topped \$1 million a year. It became a monthly with 15-20 pages of ads. Obis bought back the magazine on 6 Jan. 1986. By Dec. 1987 the circulation was 133,000 and the annual gross is \$1.5 million. In about July 1990, Paul Obis, again in need of capital, sold *Vegetarian Times* to Cowles Magazines, but he continued his active daily involvement with the magazine.

Talk with Paul Obis. 1992. Aug. In the UK, the main vegetarian magazine is published by the Vegetarian Society. One gets the magazine free of charge upon joining the society. In the USA the most popular vegetarian periodical, *Vegetarian Times*, is not connected with any society—which is very unusual.

Soyfoods Center has early issues No. 1, 11, 12, 13. For an early ad, see Mother Earth News #42. Nov. 1976, p. 109. The magazine has been a strong supporter of soyfoods and the soyfoods movement as evidenced by its many articles on those subjects.

Ulrich's International Periodicals Directory 1990-91 notes: Published monthly by Vegetarian Life and Times, Inc., Box 570, Oak Park, Illinois 60303. Phone: 718-848-8100. Also available in microform from UMI; reprint service available from UMI. Indexed by CHNI. Description: Contains vegetarian recipes, dietary information, updates on animal rights issues, advice on buying whole foods and preparing foods for maximum nutritional value, and articles on nutritional approaches to disease, information for travelers and profiles of prominent vegetarians.

ABC Statements on circulation: 30 June 1993—Total paid circulation is 311,820, increasing to 325,893 on 30 June 1994, and to 326,349 on 30 June 1997. But in the opinion of Soyfoods Center, the magazine's content has gone steadily down hill, until most of the magazine is about recipes.

2004 June. *Vegetarian Times* appears in a new format

and style: It has a spine and is owned by Active Interest Media. Chairman and CEO: Efram Zimbalist III. By Nov/Dec. 2004, the "special 30th anniversary issue" is slightly larger in height and width and has 144 pages (vs. 96 pages in June 2004). On page 10 (titled "Big birthdays") is a statement of plans for big changes ahead—but no mention of a switch to bi-monthly from monthly. Address: Chicago, Illinois.

820. *Advent Review and Sabbath Herald*. 1974. Bulletin Board: Deaths. Dr. George A. Johnstone. 151(17):459. April 25.

• **Summary:** "Johnstone, George Anthony—born Oct. 13, 1895, Sioux Falls, South Dakota; died March 2, 1974 in Glendale, California. In 1915 he went to Hinsdale Sanitarium and Hospital to study nursing. In 1917 he married Theresa Arntzen. During World War I they joined the staff of the White Memorial Hospital, Los Angeles, California. He graduated from the College of Medical Evangelists in 1923 and took his internship at the White Memorial Hospital. He established a heart clinic for animals in Los Angeles and donated this to the College of Medical Evangelists. He and his brother-in-law developed a resuscitating machine, known as the E & J Resuscitator, extensively used in hospitals and fire departments. He founded the John Johnstone Hospital in North Dakota, naming it in honor of his father. In 1947 he bought the Research Hospital in Glendale, California, and named it for his friend and partner, Dr. Charles Gehrens. It was later renamed the Verdugo Hills Hospital. More recently he was a co-founder of the Anaheim Memorial Hospital in California. He also established a store, market, and bakery known as Foods for Life in Glendale, California. Survivors include his wife; a daughter, Lois Fischer; a son, William and grandchildren."

A portrait photo shows George Johnstone in 1923 at the time of his graduation from medical school. Kindly sent to Soyinfo Center by Janice Little, Del E. Webb Memorial Library, Loma Linda, California (Nov. 2010).

821. *Loma Linda University Alumni Journal*. 1974. In memoriam: George A. Johnstone. March/April. p. 36.

• **Summary:** Johnstone, George Anthony—born Oct. 13, 1895, Sioux Falls, South Dakota; died March 2, 1974 in Glendale, California.

"Dr. Johnstone became interested in health foods and established a store, market and bakery known as 'Foods for Life,' in Glendale."

822. Photograph of Michio and Aveline Kushi standing behind a workbench with a group of craftsmen at their newly purchased home at 62 Buckminster Rd., Brookline, Massachusetts. 1974.

• **Summary:** This photograph is from the Michio and Aveline Kushi Macrobiotics Collection, National Museum of

American History, Smithsonian Institution, Washington, DC. Reprinted with permission of the Smithsonian.

Letter (e-mail) from Norio Kushi, son of Michio and Aveline Kushi. 2011. Jan. 17. The photograph is taken during the renovation of my parent's home at 62 Buckminster Rd. in Brookline, Massachusetts. Therefore it would have been sometime in the early months of 1974. I am guessing April 1974 soon after I returned from Japan. It is taken on the 2nd floor in what was to be my parent's bedroom.

"I only know the names of two of the people, far left is Claude Paeiment, who currently lives in Sutton, Quebec, Canada (450-538-8399). After Claude returned to Quebec, where he was from, he opened the natural food store "Tau" and had a "macro" center in the same building.

"The person who is [second from the right], next to my mother [Aveline] is Bill Painter, who passed away many years ago. Bill Painter was close friends with "Uncle Charlie," Charles Kendall, who married my mother's sister, Yoko. Charlie and Yoko live in Worthington, MA and they make great natto. "Uncle" Charlie who was actually dating my sister Lily during this time, was part of the scene back during this time so he may know the names of the other two people in the photograph.

"Jimmy Silver of Los Angeles. 2011. Jan. 14. I recognize the faces of all the people but can only identify one by name: Bill Painter is second in from the right. He was also a dedicated shiatsu student of Shizuko Yamamoto and an excellent artist."

Letter (e-mail) from Evan Root. 2011. Jan. 15. "I believe this to be the renovation of 62 Buckminster Road, probably 1973 or perhaps 1974. Standing second from the right (on Aveline's left) is Bill Painter. He was the head carpenter for Seventh Inn, Noah Center and Buckminster Road. I think it would be fair to also call him the designer / contractor as well, as he would draw up the plans and assign the tasks, but he was also hands on, and he and the crew were all Kushi's students.

"As you may know, 62 Buckminster road was part of the former Cardinal Cushing residence and school. When the Kushis first bought it, there were huge, real slate blackboards built in, and commercial exit signs and so forth. Though they got it at a good price (\$100,000) just before condos were discovered, it required extensive renovation."

Claude Paeiment (Jan. 2011) was unable to identify the two unknown people. He said: "Those two guys were only helping for a short time at the Buckminster Road house. So many people were coming to help at the time." Claude lived in Boston for 3 years; he worked as a carpenter. He and Francine directed the study house in Newton, Massachusetts; 30 people lived there at the time. He remembers putting tiles on a low ceiling at Erewhon. Address: Brookline, Massachusetts.

823. Rodale, Robert. 1974. Breakfast revolution: Organic

living. *Sun* (Baltimore, Maryland). May 5. p. T14.

• **Summary:** Much innovation is taking place in what people eat for breakfast, and, as people move away from coffee and doughnuts, the meal is becoming more nutritious. "Natural foods" are a major part of the new breakfast, as is yogurt and foods with dietary fiber. Granola helped start that trend, and home-made yogurt is now a growing part of it. Many people use a blender in preparing breakfast. Two recipes are given: "High protein cereal" (with "2 parts roasted soybeans"). No-sugar cereal.

824. Aihara, Cornelia. 1974. How to make miso using mugi koji (fermented barley). *Macrobiotic (The)* (Chico, California) No. 98. p. 53-55. May.

• **Summary:** Gives a large-scale recipe using 30 lb soybeans, 20 lb barley, 15 lb salt, and 7 cups barley koji. The mugi koji can be ordered from Janus Natural Foods, 1523 Airport Way, Seattle, Washington 98134. Or from Chico-San Inc., 1144 West First St., Chico, California 95926. Address: Chico, California.

825. Eden Foods. 1974. Spring pricelist. P.O. Box 100, Ann Arbor, MI 48107. 4 p. Effective June 1.

• **Summary:** There are many more total products than in the Nov. 1973 catalog. The 8 oz tamari soy sauce and the 3 types of miso (Mugi, Hacho, Kome) in 1-lb packages bear the Erewhon brand after the product name in the catalog, but the pints and gallons of tamari soy sauce and the same 3 types of miso sold in bulk (44 lb tubs) do not bear the Erewhon brand, perhaps indicating that Eden has found a way to go around Erewhon in importing bulk miso. New products include: Kuzu arrowroot. Grade C Korean nori (Roland). Canadian leaf dulse (Atlantic Mariculture). Cilician olives (Pure & Simple). Barley malt powder. Barley malt syrup. Maple syrup. Bee pollen. Shiu-chu finest preserved Ginseng roots (China). Kirin extra large ginseng roots, red. pres. (China). Ginseng balls (*fo-ti-tieng*, *dong kwai* [angelica root]). Mao herb (Chinese ephedra). Lemongrass. And many other herbs. Address: Ann Arbor, Michigan. Phone: (313) 769-8444.

826. *Vegetarian World*. 1974-1978. Serial/periodical. Los Angeles, California. No. 1-14. June 1974 to Aug. 1978. Quarterly.

• **Summary:** This early vegetarian tabloid-size newspaper was run by Scott Smith (managing editor) and Bill Blanchard (publisher). After Blanchard died of cancer (just after issue no. 10), the publication was merged with *Vegetarian Times* in Sept. 1978. Full back sets are owned by Jay Dinshah (The Vegan Society, Malaga, New Jersey) and Scott Smith (Thousand Oaks, California). Address: Los Angeles, California.

827. Erewhon. 1974. Natural and organic foods: Supplying natural food stores, co-ops, schools and communities

(Catalog). Boston, Massachusetts. 16 p. Effective June 1974.
 • **Summary:** The structure and design of this catalog is quite similar to the previous one of April 6, however four pages of new products and sizes have been added. The background of the illustration has been changed but the foreground is the same; it is now copyrighted by Erewhon. The note from Paul Hawken has been replaced by a similar one signed “the erewhonians.” OG = Organically grown.

New additions to the catalog: Flyers: (1) Organic Merchants: The flour story. The salt story. (2) Issues of *East West Journal*. From Vol. IV, No. 6, July 1974, “Energy” to Vol. IV, No. 9, Oct. 1974, “Healing.” (3) Natural Recipes: Three by five inch tear-off pads, each pad containing 100 of the same natural-food recipe. Four assortments (A-D), eight different pads in each assortment. There is one soy-related recipe pad in each assortment: (A) Soybeans au gratin. (B) Miso soup. (C) Soybean casserole. (D) Soyburgers.

This catalog cover (blue on white) was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: (617) 542-1358.

828. Lagodmos, Ted. 1974. Re: Erewhon is now the exclusive representative and agent of Muso and Mitoku in North America. Letter to Blake Rankin, Janus Natural Foods, Inc., 1523 Airport Way South, Seattle, WA 98134, July 19. 1 p.

• **Summary:** Concerning Japanese products and our import status: “The basic program that has been finalized with both the Muso and Mitoku companies can be defined in this way:

“The Erewhon company is the exclusive representative and agent for the above companies in North America... All product labels will have the Erewhon name. Authorized regional wholesalers may purchase direct from Muso and Mitoku subject to Erewhon’s approval.” Address: 33 Farnsworth St., Boston, Massachusetts 02210. Phone: (617) 542-1358.

829. Deutsch, Ron. 1974. Organic foods: Where you should be shopping for your family. *Nutrition Reviews* 32(suppl):48-52. July.

• **Summary:** Reprinted from *Today’s Health*, April 1972. Published by the American Medical Association.

This special supplement is titled “Nutrition misinformation and food faddism.”

This article starts: “Adelle Davis. Ralph Nader. Carlton Fredericks. Sometimes those insistent public voices can make a food shopping list sound almost like a death wish. Listen:

“To Adelle Davis, who has been called the high priestess of health foods, proclaiming, ‘Almost every American suffers from nutritional deficiencies... What’s happened to

market food is just tragic!... The whole country is at the mercy of people who are making money off our food.’

“To consumer advocate Ralph Nader decrying ‘the failure of... regulation to insure safe, pure and nutritious food.’ He thinks food content is ‘dictated by corporate greed and irresponsibility.’”

830. **Product Name:** Mocha Walnut Torte (With Tofu).

Manufacturer’s Name: No Company Name. The owner later ran Cable Springs Bakery.

Manufacturer’s Address: Kelly Rd., Cambridge, Massachusetts.

Date of Introduction: 1974 July.

How Stored: Refrigerated.

New Product–Documentation: Talk with Barry Creighton, founder of Cable Springs Bakery. 1992. May 16. The tofu product he liked best was Mocha Walnut Torte, which he first made as a wedding cake, then sold at the Seventh Inn, a sort of gourmet macrobiotic restaurant in Boston. It was too creamy to package, so it was never sold at retail stores. He baked it in 18-inch-square shallow trays, and the restaurants sliced it into pieces as desired.

831. *Nutrition Reviews*. 1974. Zen macrobiotic diets: Statement of American Medical Association Council on Foods and Nutrition. 32(suppl):27-28. July. [3 ref]

• **Summary:** “The American Medical Association’s Council on Foods and Nutrition is deeply concerned over the increasing popularity, particularly among adolescents, of ‘Zen Macrobiotics’ and its nutritional implications.”

“The Macrobiotic diet represents an extreme example of a general trend toward natural and organic foods.”

Footnote: Reprinted from the *Journal of the American Medical Association*, Vol. 218. No. 3. 1971.

Note: This special supplement is titled “Nutrition misinformation and food faddism.”

832. Rynearson, Edward H. 1974. Americans love hogwash. *Nutrition Reviews* 32(suppl):1-14. July. [31 ref]

• **Summary:** This special supplement is titled “Nutrition misinformation and food faddism.” The main editor is D.M. Hegsted, PhD, Professor of Nutrition, Schools of Medicine and Public Health, Harvard University, Boston, Massachusetts. Special guest editor of this supplement: Philip L. White, D.Sc., Secretary, Council on Foods and Nutrition, Director, Dep. of Foods and Nutrition, American Medical Association, Chicago, Illinois.

This article by Rynearson, the first in the supplement, contains an introduction followed by sections on: Adelle Davis (“almost the only ‘health authority’ among food faddists who possesses any formal professional background”). Vitamin E (the “list of conditions for which vitamin E has been recommended is limited only by one’s imaginative powers”). Carlton Fredericks (“Probably

second only to Adelle Davis in popularity as a dispenser of hogwash...”). The Adrenal Metabolic Research Society of the Hypoglycemia Foundation, Inc. (founded by John W. Tintera, M.D. The foundation believes that hypoglycemia is widespread), Jerome Rodale (“It is not surprising that the man who gave the term ‘organic food’ to the English language should be revered as the ‘guru of the organic food cult.’”). Zen Macrobiotic Diets (“Without doubt... the most dangerous form of hogwash.”). Discussion.

Note: This periodical is sponsored by the food processing industry. Address: M.D., Emeritus Prof. of Medicine, Mayo Clinic.

833. White, Philip E. ed. 1974. Nutrition misinformation and food faddism. *Nutrition Reviews* 32(suppl):1-72. July.

• **Summary:** This special supplement, whose main editor is D.M. Hegsted (PhD, Professor of Nutrition, Schools of Medicine and Public Health, Harvard University, Boston, Massachusetts), has the following contents:

Americans Love Hogwash, by Edward H. Rynearson
Diets: A Review of Dr. Atkins’ Diet Revolution. Adrenal Cortex Injection. Changes in Serum Cholesterol During the Stillman Diet. Zen Macrobiotic Diets. Vegetarian Diets.

Vitamins: How Natural Are Those “Natural” Vitamins? Vitamin E—Miracle or Myth? Supplementation of Human Diets with Vitamin E. Vitamin C and the Common Cold. The Use and Abuse of Vitamin A. Megavitamin and Orthomolecular Therapy in Psychiatry.

Organic Foods: Where You Should Be Shopping. Food Faddism.

Allure of Quackery: The Unicorn and Other Lessons from History. The Allure of Food Cults. Programs to Combat Nutrition Quackery. Suggested Readings.

Note: What could organic foods and vegetarianism possibly have to do with food quackery? Address: D.Sc., Secretary, Council on Foods and Nutrition, Director, Dep. of Foods and Nutrition, American Medical Assoc., Chicago, Illinois.

834. Redmond, Timothy. 1974. Certificate of amendment to the articles of incorporation: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 2 p. Sept. 16. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc. The location of the registered office is 330 Maynard Street, Ann Arbor, Michigan 48104. At a meeting of the shareholders in September, Article V was amended to read as follows: “The total capital stock is: 500 Preferred shares at Par Value of \$50.00 per share. 50,000 Common shares at Par Value of \$1.00 per share. The Board of Directors is authorized to divide the Preferred Stock into series and to prescribed the relative rights and preferences of the shares of any series. The Common shares do not have pre-emptive rights.

Signed by Timothy R. Redmond 16 Sept. 1974. Filed by the Michigan Dep. of Commerce in Oct. 1974. Address: President, Ann Arbor, Michigan.

835. Redmond, Timothy. 1974. Certificate of change of registered office and/or change of resident agent: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 2 p. Sept. 27. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc. The address of the former registered office is 310 W. Ann Street, Ann Arbor, Michigan 48108. The address of the registered office is changed to 330 Maynard St., Ann Arbor, Michigan 48108.

The name of the resident agent is Timothy Redmond. Signed by Timothy R. Redmond, President, 27 Sept. 1974. Filed by the Michigan Dep. of Commerce on 3. Oct. 1974. Address: President, Ann Arbor, Michigan.

836. Williamson, Susan; Williamson, Bruce. 1974. Frank Ford: Founder of Arrowhead Mills. *Mother Earth News*. Sept/Oct. *

• **Summary:** Subtitle: “In the following interview, Arrowhead Mills founder Frank Ford discusses his years-long struggle to establish a successful company, the early years of the natural foods movement, and the future prospects of organic agriculture.”

A photo shows Frank Ford in about 1960.

Note: It would be more accurate to say that Frank Ford was one of the founders of Arrowhead Mills, although he long remained its best-known founder in the natural foods community.

837. Ford, Frank. 1974. The simpler life cookbook from Arrowhead Mills. Fort Worth, Texas: Harvest Press. 157 p. Introduction by Fred Rohé. Index. 18 cm. [13* ref]

• **Summary:** The copyright page states: “First printing—Oct. 1974. This book [Feb. 1976] is the second edition of a book which was originally released under the title of *Pack to Nature*.” Note: 150,000 copies were in print by Sept. 1976. The introduction (written in Dec. 1975 by Fred Rohe, now of Shiloh Farms, Sulphur Springs, Arkansas) tells how Fred first met Frank Ford in 1968 in Hereford when Arrowhead Mills was supplying organically grown grains and beans for Fred’s natural foods store in San Francisco. At that time, Ford’s business was already 10 years old. Today Arrowhead Mills has 22 shareholders. “There are more than 30 Arrowhead organic growers farming more than 60,000 acres, 44 natural foods distributors bring more than 350 Arrowhead products to thousands of stores throughout every state of the U.S.

“Even more exciting than Arrowhead’s tremendous victory for Frank’s business life is the victory that God has won for his spiritual life. Frank made Jesus Christ lord of his life 3 years ago and that’s when love and joy began to

transform his life by the living power of God's Holy Spirit. God is carrying on a great work in his life, transforming an organic farmer into an organic man, integrating his body, soul and spirit, transforming Arrowhead Mills from a work of man into a work of God. The same miracle of God's grace has transformed my life, enabling me to understand what Frank means when he says, 'Arrowhead Mills belong to God.'"

Soy-related recipes are the same as those in the original edition titled *Pack to Nature* (Oct. 1974). A 2-page directory titled "Some Natural Foods Sources" lists 41 companies with full addresses and Zip codes. Details on these new additions are given in the Sept. 1976 edition of this book. Address: Deaf Smith County, Hereford, Texas.

838. Ford, Frank. 1974. *Pack to nature: Nutrition made easy in the home or in the woods*. Fort Worth, Texas: Harvest Press. vii + 157 p. Introduction by Roger Hillyard. Index. Oct. 18 cm. [13* ref]

• **Summary:** This book, containing over 250 recipes, describes how to use whole, natural food staples in quick, easy to prepare dishes. By Sept. 1976 this book had become *The Simpler Life Cookbook from Arrowhead Mills*.

In the introduction, Roger Hillyard (writing in Oct. 1974 from Soquel, California) recalls that in late February of 1969, he and his wife and daughter were returning to Boston from California. They stopped in the small Texas town of Hereford to visit Deaf Smith County and the company that was supplying food to a growing number of natural foods followers and devotees—including Erewhon. Four years later they spent a year in Hereford working with Frank Ford and Arrowhead Mills. "During the five years I have worked with, lived with, and been friends with Frank, I have witnessed one of the most dramatic and beautiful personal unfoldings. Frank never wore that robe of self-righteousness, and he helped me to exchange mine for something more embracing."

Soy-related recipes include: Quick soy pancakes (with soy flour, p. 35). Soybean salad (with cooked soy flakes, p. 43). Quick tamari orange salad dressing (with tamari soy sauce, p. 47). Paul's salad dressing (with tamari, p. 47). Soybean chili (with dry soybeans and "tamari soysauce," p. 54). Sprout soup (with 2 cups fresh soybean sprouts, p. 54). Sprouted lentil soup (with soy flour, p. 55). Squash stew (with soy flakes, p. 55). Tamari bouillon (p. 56). Vegetable-soy-sesame soup (with soy flakes, p. 59). Basic soybeans (p. 74). Basic soy flakes (p. 75). Basic bulghur-soy grits (p. 75). Lentil soy loaf (with cooked soybeans or soybean flakes, p. 84). Soy & mushroom loaf (with soy flakes, p. 85). Soy patties (with soy flakes, p. 87). Stuffed peppers (with soy flakes, p. 87). Soyflake & tahini spread (with soy flakes, p. 106).

A 2-page directory titled "Some Natural Foods Sources" (p. 153-54) lists 30 of the natural food industry's pioneers,

including Akin Distributors, Inc. (Tulsa, Oklahoma), Arrowhead Mills, Inc. (Hereford, Texas), Basic Needs (Grand Prairie, Texas), Cinagro Distributors, Inc. (Atlanta, Georgia), Cliffrose (Longmont, Colorado), Collegedale Distributors, (Collegedale, Tennessee), The Concord (Snowflake, Arizona), Deer Valley Farms (Guilford, New York), Eden Organic Foods (Ann Arbor, Michigan), Erewhon Trading Company (33 Farnsworth St., Boston, Massachusetts 02210, and 8454 Steller Dr., Culver City, California 90320), Food for Health (Phoenix, Arizona), Food for Life (Elmhurst, Illinois), Good Food People (Austin, Texas), Great Plains Distributors (Kansas City, Missouri), Happy Health Products (Miami, Florida), Janus (Seattle, Washington), Laurelbrook Foods (Bel Air, Maryland), Lifestream Natural Foods (Vancouver, BC, Canada; Ratana and Arran Stephens), Mottel Health Foods (New York, NY), Naturally Good Foods (Hereford, Texas), Nu-Vita Foods Inc. (Portland, Oregon), Organic Foods & Gardens (City of Commerce, California), Shadowfax (Binghamton, New York), Shiloh Farms (Sulphur Springs, Arkansas), Taiyo, Inc. (Honolulu, Hawaii), Tree of Life (St. Augustine, Florida), Vim & Vigor (Honolulu, Hawaii), The Well (San Jose, California), Walnut Acres Inc. (Penns Creek, Pennsylvania).

A small photo on the back cover shows Frank Ford out hiking, wearing a backpack.

Note: This is the earliest published document seen (March 2020) concerning Lifestream Natural Foods (Vancouver, BC, Canada). Address: Deaf Smith County, Texas.

839. McBean, Lois D.; Speckman, Elwood W. 1974. Food faddism: A challenge to nutritionists and dietitians. *American J. of Clinical Nutrition* 27(10):1071-78. Oct. [61 ref]

• **Summary:** "The increase in the 'health' food movement has rendered it necessary for nutritionists and dietitians to become cognizant of some of the current forms of food faddism. These dietary regimes advocate the use of 'health' foods, 'organically grown' foods, 'natural' foods, Zen Macrobiotic diets, and vegetarianism... Claims for the nutritional superiority of such diets have not been substantiated... Many of the organic, health, and natural foods cost twice as much as their conventional counterparts without a concomitant nutritional benefit... The Zen Macrobiotic Diet is the most dangerous form of food faddism... The most serious problem with food faddism is the advocacy that the individual be his own diagnostician and physician... The involvement of the nutritionist and dietitian in counteracting food faddism is imperative." Address: National Dairy Council, Div. of Nutrition Research, Chicago, Illinois 60606.

840. Milbury, Peter. 1974. Interview with Junsei Yamazaki. *Macrobiotic (The) (Oroville, California)* No. 101. p. 17-32. Oct.

• **Summary:** “Junsei is one of a handful of people in the U.S. today who can make miso and tamari, staples of the Macrobiotic diet, in the natural, traditional manner. His organic garden overflows with vegetables the year around. His poetry is published in his native Japan. He gives a healing massage. His house is filled with his paintings, calligraphy, ceramics.”

Page 21: “I. That was your first impression of Ohsawa?”

“J. I was very surprised. George was a very wonderful person. I knew just from looking at him, his face. I had no doubts about him being a danger to Japan. He was a kind and peaceful person.

“I. What did you talk about with him?”

“J. I listened mostly. I was having trouble understanding his concepts. My education was so different—meat and sugar are good... So I began to go to his place regularly. Many other very nice people also gathered there for discussions. George told me, ‘Stop eating sugar. Less water!’”

“Then, in 1942 I graduated from college and left to join the Army. It was in September. In August my brother passed away [from tuberculosis].

“George’s place was on the second story. I looked down from the window and saw people running. Airplanes coming! Then I looked over and saw George smiling. ‘Ah, they come, welcome!’ Ha, ha. ‘Second War already lost,’ George had said when the Americans occupied Saipan!

“I. He knew it was all over?”

“J. Japan was the loser. The meeting continued.”

“I. So, where did you go to live after the war?”

“J. I went back to my home. I wanted to live on the land. After the war there was an agricultural revolution—the government, under orders from Gen. MacArthur, took away the land. Only people cultivating lands could hold them, just like communists. My family was left with a fairly small farm, because they had to give up all their lands to the renters. I managed to talk some of the renters into returning five poor acres.

“I. Did you already know how to make miso?”

“J. It was taught at college, but I had already learned from my parents. When I was quite young, maybe five, or seven, I helped them make miso and tamari. Now, in Japan, not very many people make their own miso. They all buy commercially prepared miso from the store. It is not real miso, only fermented for a short time. Also their soy sauce is made with chemicals. We are lucky to have macrobiotic people selecting fine, natural miso and soy sauce.

“So, we made miso, pickles, some other things, ate slightly polished rice. We worked hard, ate miso soup, rice pickles.”

“So, then there was George’s idea of a world government. George published a newspaper in Tokyo, World Government. Aveline Kushi was famous for being the best at selling the newspapers on the street. Sometimes she sold 300 copies. She was very good! Such a young lady!

“I. Did you sell newspapers too?”

“J. No!

“I. Just the girls?”

“J. It is easier for the girls. Girls are the best salesmen.”

“I. Whatever brought you to America? J. I always wanted to go to Europe to produce macrobiotic foods. But I didn’t have enough money. I also had a wife and family. Then, when George was on his way back from his trip to Europe, around 1962, he wrote, saying that there was a need for someone to come from Japan to make macrobiotic food in the U.S.

“I. In 1962.

“J. 1962. I applied for my passport. I received letters from people in New York: Irma Paule, Cecil Brown. Japan gave me a ‘Technologist’ passport. It was not possible to get a visa with it.

“So, George came back to Japan in 1963, and I still hadn’t left. He had me send Kushi proof of my college, which he gave to the American government. Finally the U.S. said ‘O.K.’”

“I. When did you actually leave Japan?”

“J. In March, 1963. I flew to San Francisco. I wanted to stop and visit Chico-San, and also Herman. I stayed there until summer camp in August. I saw at Chico-San that they had imported a small rice cake machine. It was still in its crate, unopened. Nobody knew how to operate it. Before I left Japan I studied how to work them. George had told me to help make rice cakes in the U.S. for ½ year or a year.

“I. He told you to help Chico-San?”

“J. Not only Chico-San! New York, or anywhere. But Chico-San had the machine, unopened. So I opened it, and started it.

“I. The first American rice cake.

“J. Ya!

“I. You opened the box!”

“J. Ya. And it worked by hand. Chico-San had a small building on Mangrove Avenue at that time. They had only been in business a few months, and didn’t have many customers. I stayed with Herman. He had to travel to L.A., Sacramento to work.

“I. To lecture?”

“J. No! To earn money. Chico-San was not making enough money to pay salaries. Some macrobiotic people were musicians, and took part-time jobs to live on. But Herman had to find jobs as a laborer, a gardener. The macrobiotic group collected money to help pay my expenses. Every week they collected some. But anyway, I helped Chico-San, when I could.”

“I. So after summer camp you went to N.Y.

“J. Yes. Kushi had sent an airplane ticket. While I waited in Chico for summer camp I picked peaches with Herman. I saved about \$300. So, in N.Y. I stayed at Kushi’s house. But they were not yet ready to produce macrobiotic products. There was no work for me.

“I. So what did you do?”

“J. I got a job at a Japanese restaurant, after my savings were spent. He (Kushi) wanted to open a restaurant. Not only macrobiotic food, but Japanese food, too. I told him, ‘Don’t start restaurant.’”

“I. Why?”

“J. It is not so easy to run a restaurant. It was already too late. He had put a deposit of \$3,000 on a place in the ‘Diamond Jim Building.’”

“You were the cook?”

“A. Yes. Afterwards clean up too. 14, 15 hours a day.”

“I. How long did you work there?”

“J. Maybe two or three months. My ½ year visa was up and I needed to renew it. I needed some money, I was broke. So I went to a Buddhist church where I was friends with a priest who was teaching me archery. I told him, ‘I need some money to pay for an extension on my visa, \$30. Please buy my camera.’ But he said, ‘Don’t worry,’ and he lent me the money. So I got a six month extension on my visa. Then Chico-San called me. They now had four rice cake units tied together. People were throwing their shoulders out.”

“I spoke with Kushi. I explained to him that my purpose in coming to America was to produce macrobiotic food, but that is not what I’m doing here. In half a year I will have to go back to Japan, so I would like to go help Chico-San for a while. I was afraid that if I stayed working there too long I wouldn’t be able to get a permanent visa.”

“I. So then you went to Chico?”

“J. By then Herman was working there, too. Chico-San was able to pay salaries. Cornelia worked there, too. I mostly made rice cakes. We made rice cakes all day and night. Cornelia came in the afternoon and packed them by hand.”

“I stayed with Herman until Chico-San moved to Humboldt Avenue. Then I got a small cabin nearby for \$21 a month. I slept outside until one o’clock. The mosquitoes were terrible!”

“We worked 12 hour shifts at Chico-San, six to six, making four cakes at a time, by hand. Then came air pressure, and eight at a time. But there were often electrical troubles.”

“I. Ohsawa came to Chico for summer camps...”

“J. Three times: 1963, 64 and 65.”

“I. You went to all three?”

“J. Yes.”

“I. How many people attended?”

“J. About 100.”

“I. What kinds of people? Young, old?”

“J. All kinds.”

“So your purpose is to make macrobiotic foods.”

“Certainly. My main purpose is to make miso, and other special macrobiotic foods. I have made some at Chico-San. The first time I made any in California I was worried that it was too dry, so when I cooked the soybeans, I saved the

water and added it later.”

“I. But it came out all right?”

“J. Less juice would have been better.”

“I. What was it like living in the Chico macrobiotic community? Was it exciting?”

“J. I have been fortunate to find friends everywhere.”

“I. In your house there are many beautiful handmade things, this table, the beautiful painting there on the wall, the tea cups. Where did you learn to do all this, you write haiku, you make swords...”

“J. Sometimes they don’t turn out so well.”

“I. Why do you do all these things? Why don’t you just work in your garden and not be bothered by all these other things?”

“J. I enjoy them. George told me, ‘You must have one thing you can do well; but to have this one thing you must study everything.’ He always said, ‘If I completely master one thing, I can understand everything.’” Address: George Ohsawa Macrobiotic Foundation, 1544 Oak St., Oroville, CA 95965.

841. Eden Foods. 1974. Fall & winter pricelist. 4601 Platt Rd., Ann Arbor, MI 48104. 2 p. Effective Nov. 1.

• **Summary:** Note that the company has moved to a new and much larger warehouse. Soybean Flakes are still organically grown in Deaf Smith, Texas. Tamari Soy Sauce, and 3 misos still bear the Erewhon brand. Eden is selling Honey Vinegar, Apricot Butter, and Apple Sauce under the Pure & Simple brand. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

842. **Product Name:** Sunwheel Organic Hatcho Miso, Mugi Miso, Tamari, and Shoyu.

Manufacturer’s Name: Sunwheel Foods (Importer-Distributor). Made in Japan. Imported from Muso Shokuhin.

Manufacturer’s Address: London, England.

Date of Introduction: 1974 November.

How Stored: Shelf stable.

New Product–Documentation: CSP form filled out by Simon Bailey. 1988. Sept. 28. Gives date of introduction as 1974. In 1984 Sunwheel divided and sold its Sunwheel brand to Northumbrian Fine Foods. Its high quality Japanese products are now imported by Clearspring Natural Grocer. Peter Bradford is the contact person. Japanese agent is Mitoku. Various Japanese manufacturers.

Interview with Bill Tara, founder of Sunwheel. 1991. Aug. 18. By late 1974 Sunwheel Hatcho Miso, Mugi Miso, and Tamari were on the market, imported from Muso (Yuko Okada) in Japan. By 1979 Sunwheel was sold to a larger health food company.

843. [Meeting of natural food distributors at Pajaro Dunes, Watsonville, California]. 1974. Nov. 21-24. Unpublished manuscript. *

• **Summary:** This was the third and most important meeting held by this group of natural food distributors. No known documents remain. But the meeting is referred to in a Steering Committee Report of a meeting held 22-23 March 1975 in San Francisco. The following companies were present at Pajaro Dunes, and appointed a steering committee: Arrowhead Mills, Eden, Erewhon / Boston, Erewhon / Los Angeles, Lifestream, Laurelbrook Foods, Manna, Shadowfax, Tree of Life, The Well, Ceres, Janus, Food for Life, Cliffrose.

Bob Gerner of Westbrae later recalled: In late November 1974 Mr. Kazama of Mitoku in Japan came to a meeting at Pajaro Dunes by Santa Cruz, sponsored by The Well. The idea was to set up a natural foods trade association. Erewhon wanted to control all imports of Japanese natural foods from Japan. Janus and The Well both had to import through Erewhon. They said Westbrae must buy through them via The Well (Roger Hillyard / Pure & Simple), and pay a 5% commission. Kazama had to defer to them. Gerner refused and they backed off. Ty Smith, now head of Erewhon, was upset that Westbrae was not paying a commission. Gerner told him "Tough." So Westbrae ended up importing from Kazama.

844. *SoyaScan Notes*. 1974. Chronology of soybeans, soyfoods and natural foods in the United States 1974 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1974 March. The first issue of *Vegetarian Times* is published by Paul Obis in Chicago, Illinois.

1974 April. Bob Gerner (of Westbrae) and William Shurtleff (guide) travel throughout Japan searching for quality sources of traditional miso and soy sauce. Right after the trip, Westbrae starts importing these products.

1974 Aug. 9. President Nixon, elected in 1968 and 1972, resigns after the Watergate scandal. Gerald Ford succeeds him as president. Butz continues as Secretary of Agriculture.

1974. Brazil passes West Germany to become the world's second largest soybean crusher, after the U.S.

1974 late. Miles Laboratories / Worthington introduces the Morningstar Farms line of meat analogs based on spun soy protein fiber. Sold nationally at U.S. supermarkets.

1974 late. The Farm in Summertown, Tennessee, publishes *Yay Soybeans!*, a 14-page booklet containing many innovative soyfoods recipes, such as "soy ice cream-ice bean," soy yogurt," "soy cheese," "soy cheesecake," "soy mayonnaise," and "soysage" (a meatless okara & soymilk sausage). Most of the dairylike products were made with fresh or cultured soymilk. The Farm now grows 150 acres of soybeans to feed its community of 800 people. It has just established Plenty, a non-profit corporation "To help share out the world's food, resources, materials, and knowledge equitably for the benefit of all."

1974. The Farm in Summertown, Tennessee, publishes

Hey Beatnik, which contains the earliest known use of the term "Soy Dairy." The Farm's soy dairy now makes 60 gallons of soymilk a day at a total cost of \$0.30 per gallon.

1974. *Tofu Recipes*, the first book on tofu in English, written and self-published by Grace Kikuchi in Ann Arbor, Michigan. Spiral bound and 47 pages long, it gives a recipe for homemade tofu and uses tofu largely with fish and meat.

1974 Nov. World Food Conference in Rome, Italy. Delegates from 130 UN member countries adopt an international strategy to overcome world hunger and malnutrition.

1974-1975? Eden Foods starts to import natural foods, including miso and shoyu, from Japan.

845. **Product Name:** Eden Miso [Mugi (Barley), Hacho (Soybean), or Kome (Rice)].

Manufacturer's Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1974.

New Product-Documentation: Ad in Soycraft. 1979. Summer. p. 38. "Traditional Soy Products from Eden Foods." "Eden miso is made from whole soybeans, grains, and sea salt, fermented at natural temperatures in cedar kegs. Barley miso (mugi), Soybean miso (hacho), Rice miso (kome), and Brown rice miso (genmai) are all available in 14 oz, 8.8 lb, 22 lb, and 44 lb sizes."

Eden Foods, Inc. 1991. Feb. "Eden Foods Product Overview." "1972-Trade relationship began with Muso Company, Ltd. of Osaka, Japan."

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. Originally Eden bought tamari and miso from Erewhon. Then Eden started importing them from Mitoku; they were importing from both Mitoku and Muso in the very beginning.

Letter from Bill Bolduc, a founder of Eden Foods. 1991. Dec. 4. Eden started to import a line of foods from Japan in about 1974 or 1975. Imports had definitely not yet started by the fall of 1973. Talk with Michael Potter, Chairman of Eden Foods. 1993. Oct. 31. These 3 varieties of miso arrived with the first shipment imported from Mitoku in Japan.

846. Editors of Nutritional Update and Healthful Living. 1974. Natural foods and your health food store: what's in it for you? New Canaan, Connecticut: Keats Pub. 142 p. 18 cm. A Pivot original health book. *

• **Summary:** On the spine: "What's in it for you?"

847. **Product Name:** Nik's Snaks (Tamari-Roasted Seeds, Nuts, Soybeans, and Trail Mixes).

Manufacturer's Name: Erewhon Trading Co., Inc.

Manufacturer's Address: 33 Farnsworth Street, Boston, MA 02210. Phone: (617) 542-1358.

Date of Introduction: 1974.

How Stored: Shelf stable.

New Product–Documentation: Talk with Nik Amartseff. 1992. April 3. See long interview.

The 1975 Erewhon catalog, titled Erewhon Harvest '75, lists an entire page of “Nik’s Snaks,” containing about 30 products. Of these, eleven are tamari-roasted whole-food snacks. The 30 products are sold in 5 sizes: 2.5 oz, 3.5 oz, or 6 oz. pick-up packages, or 25 lb bulk. The soybeans (dry roasted with tamari, no salt) are sold only in 25 lb packs. Other tamari-roasted seeds include: Spanish peanuts, sunflower seeds, roasted almonds (all 2.5 oz or 25 lb), cashews or pumpkin seeds (25 lb). Non tamari-roasted products include: Raisin walnut mix. Roasted mixed nuts. Raw mixed nuts. Raisin nut mix. Peanut raisin mix. Trail mix. Honey almond granola. Chia seeds. Bee pollen. Alfalfa seeds. Date sugar. etc.

848. Fenten, Barbara; Fenten, D.X. 1974. Natural foods. New York, NY: F. Watts. 66 p. Illust. (by Howard Berelson). 24 cm. *

• **Summary:** “Summary: An introduction to natural foods—what they are, why we should eat them, where to buy them, and how to grow them.” For children.

849. Lipske, Mike. 1974. Sprucetree Baking Co.: They do things naturally. *Sun (Baltimore, Maryland)*. p. A-1.

• **Summary:** Sprucetree Baking Co., which has a black and white Taoist symbol on the sign out front, is located in the 6600 block of Belair Road in Overlea, Maryland. The company opened its doors in October 1973 in the shop that once housed the Overlea Bakery, and today makes about 550 loaves of bread a day. The shop’s manager, Howie Grundland (age 25) drove a cab and worked in a Boston (Massachusetts) coffeehouse before becoming a baker in Baltimore. Almost all the ingredients used to make bread at Sprucetree come from Laurelbrook Foods, a natural foods distributor headquartered in Bel Air, Maryland.

Note: Tofu cheesecake is not mentioned. Address: Maryland.

850. *New Age Journal (Massachusetts)*. 1974. Serial/periodical. Boston, Massachusetts. Vol. 1, No. 1. Jan. 1974. Frequency: Monthly.

• **Summary:** This magazine was started mainly by people who had worked at East West Journal.

852. **Product Name:** Johsen Shoyu (Natural Soy Sauce).

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer’s Address: 1224 10th St., Berkeley, CA 94710.

Date of Introduction: 1974.

New Product–Documentation: Interview with Bob Gerner. 1987. Aug. 20. He says imports started in 1975. Westbrae Natural Wholesale Food Catalog. 1980. Spring. The three imported products are now called “1. Johsen Shoyu-Tamari–Naturally brewed. 2. Johsen Shoyu-Tamari–Naturally brewed shoyu. 3. Traditional (True) Tamari–Wheat free.” Container sizes are 4.75 gallons (1&3), 32 oz (2), 16 oz (3), 12.7 oz. (2), and 5 oz. (2&3). Letter from Gordon Bennett. 1987. Oct. He says the introduction date was 1974.

853. **Product Name:** Westbrae Natural Miso [2 Year Barley Miso, 2 Year Red Miso, Hatcho Miso (Aged 2 Years), or Soybean Miso (1-Year Waka Hatcho)].

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 1224 10th St., Berkeley, CA 94710.

Date of Introduction: 1974.

Ingredients: Barley Miso: Whole soybeans, barley, water, salt.

Wt/Vol., Packaging, Price: 1 lb poly bag.

How Stored: Shelf stable.

New Product–Documentation: Labels. 1974, undated. 3.5 by 5 inches. Black plus 1 color on tan. “Naturally fermented and aged in large wooden kegs. Packed on order and shipped without preservatives or additives of any kind.” Labels. 1977. 4.5 by 3.5 inches. Paper. New design, with glossy gold, green, or red background. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. These were Westbrae’s first soyfoods imported from Japan, from Mr. Kazama and Mitoku.

Westbrae Natural Wholesale Food Catalog. 1980. Spring. Red miso (*kome miso*) aged 2 years, brown rice miso (*genmai miso*) aged 1 year, barley miso (*mugi miso*) aged 2 years, Hatcho miso aged 2 years, soybean miso aged 1 year, natto miso. Each type comes in 1, 5, or 22 lb sizes. Red miso recommended retail price is \$1.36 per 1 lb bag. Westbrae now also sells Cold Mountain Miso (Red, Light Yellow, and Mellow White varieties).

Letter from Gordon Bennett. 1987. Oct. Gives year of introduction as 1974. Currently 8 varieties.

854. Bragg, Paul C. 1974. The shocking truth about water: The universal fluid of death. Santa Ana, California: Health Science. xviii + 108 p. Illust. Forms. 21 cm. *

• **Summary:** Explains that fluoride is a poison. Also reprinted, with some new editions, in 1977, etc. Address: Burbank, California.

855. Corlett, Jim. 1974. Super natural cookery: Recipes for vegetarian gourmets. Newton Abbot, Devon, England,

• **Summary:** Among the “New Words” (p. 8) are miso and tekha [sic, tekka] powder (made from miso). Soy-related recipes include: Lentil, carrot and soy soup (p. 17). Soybean sprouts (p. 38). Gluten (Seitan, p. 56). Soy bean flours (p. 56). Soy sweet (dessert with soy flour. p. 56). Gluten cutlets (. 64). Soy bean cheese (to fu, p. 67). Soy sprouts (p. 67). Sakura’s vegetable sukiyaki (with tofu, p. 69).

An identical 1975 edition was published in Washington, DC, by Acropolis Books. Address: England.

856. Gaskin, Stephen; Farm, The. 1974. Hey beatnik! This is The Farm book. Summertown, Tennessee: The Book Publishing Co. 100 p. Illust. No index. 28 cm. Pages are unnumbered.

• **Summary:** The Farm is a community of 600 people living on a 1,700 acre farm in Summertown, Tennessee. One might call them spiritual hippie idealists, They have about 300 acres under cultivation, and during the summer about 200 of this is in soybeans. They practice a complete and total vegetarian diet; no one eats flesh foods or dairy products, drinks alcohol, or smokes tobacco. They do this for religious reasons, to be compassionate to animals and to leave enough food for everyone. “It is so grossly uneconomical and energy expensive to run soybeans through a cow and then eat the cow instead of just eating the soybeans that its virtually criminal.”

One two-page spread titled “Yay Soybeans!” begins: “Here’s a spiritual reason for being a vegetarian. You can get ten times as much protein growing soybeans than eating beef cattle. If everyone was vegetarian, there would already be enough to go around, and no one would be hungry.” It contains recipes for: Soy milk. Soy cheese (let soy milk stand in a warm place until the curd has separated from the whey, then boil the curds with salt, drain and press). Soy yogurt (cultured). Soy butter (made with 3/4 cups each soy flour and water, 1 teaspoon salt, and 1 cup oil). Soy mayonnaise. Granola (with soy flour). Raw gluten. Gluten roast. Fried gluten. Gluten burritos. Soybean stroganoff.

Another two-page spread is titled “The Soy Dairy: Soy Milk,” by Alexander and the Soy Dairy. It begins: “Soy milk is an easily digestible form of soybean protein. It can be made into whipped cream, sour cream, ice cream, cheese and yogurt. It contains the same amount of protein as cow’s milk, but less calcium and no cholesterol. We made 60 gallons a day for total cost of 30 cents a gallon.” There follows a description of exactly how The Farm’s soy dairy makes soymilk, what equipment is used, and where it was obtained. The text ends: “Please write to the soy dairy if you have any questions about soy milk, or stop by for a visit and tour, and we’ll be happy to give you a glass of milk to taste. Love, Alexander and the Soy Dairy.”

This book is loaded with wonderful photos, including:

(1) Shunryu Suzuki, roshi. (2) A large field of soybeans. (3) Three long-haired members of The Farm eating (L-R): David Chalmers, Charles Hunnicutt, and Wilbur Jordan. (4) A little girl, Susannah Frohman, sitting on a stool drinking a cup of soymilk, with her other hand on a gallon jar of soymilk. (5) The inside of the soy dairy. (6) Leslie Jordan happily drinking soymilk from a gallon jar in front of a truck that is delivering soymilk in milk cans. Standing by the truck is Roger Kanies. Mitchell and Nancy Shapiro are sitting on the ground nearby. (7) Many views of Stephen Gaskin. (8) Growing, harvesting, crushing, and cooking sweet sorghum for use as a sweetener (a light, sweet syrup). Address: Summertown, Tennessee.

857. Hannaford, Kathryn. 1974. Cosmic cookery. Berkeley, California: Starmast Publications. xixd + 264 p. Illust. by Lorena Laforest. 21 cm.

• **Summary:** This vegetarian cookbook contains 190 recipes created and tested at the communal One World Family Natural Foods Restaurant. Page 35 lists uses and seasonings of beans, including aduki beans and soy beans. Favorite seasonings for the latter are thyme, oregano, basil, green pepper, tomato, cheese, soy sauce, onion, or garlic. Soy-related recipes include: Soy grits (p. 75). Macroburger mix (with cooked soybeans, p. 83). Soy mayonnaise (with soy milk powder, p. 111). Chunky soy spread (p. 130). Miso tahini spread. Creamy soy spread (p. 131). Miso soup (p. 144). Miso-scallion broth (p. 145). Macro-sausage (with Soy Spread, p. 163). Spaghetti with miso sauce (p. 176). Super soybean casserole (p. 182). Miso sauce (p. 200). Soya carob nut brownies (with soy milk powder, p. 227). Address: Berkeley, California.

858. Hunter, Beatrice Trum. 1974. Favorite natural foods: Adapted from a series of programs on WGBH, Boston. New York, NY: Simon and Schuster. 219 p. Index. 21 cm. [154 ref]

• **Summary:** Contents: Foreword. 1. Vegetables, vegetables. 2. Perking up the salad bowl. 3. Sprouts (incl. legume seeds {alfalfa, chick pea, lentil, mung bean, peanut, pinto bean, soybean}, grain seeds, vegetable seeds, herb seeds, weed seeds, oil seeds {flax, safflower, sesame, sunflower}). 4. Whole grains. 5. The Cornell mix [for bread; Dr. Clive McCay]. 6. Sourdough. 7. Sauerkraut. 8. Yogurt. 9. Soybeans. 10. Satisfying that sweet tooth: Dried fruit desserts, confections, snacks. 11. Of special concern: Baby foods, brown-bagging, party fare, making good foods even better. Appendix.

Contents of chapter 9, Soybeans: Introduction. Soybean sprouts. Fresh green soybeans as a vegetable: Freezing, canning, drying. Recipes for dry soybeans (Baked soybeans. Soybean tomato aspic). Making soybean pulp (“put cooked, drained soybeans through a meat grinder”; recipe for green peppers stuffed with soybean pulp). Roasting dry soybeans

(soak, drain, and dry roast). Making soybean milk (recipes for spiced soybean milk, brown rice pudding with soybean milk). Making soybean curd (also called “soybean cheese” or “tofu.” From soybean milk, from fermented soybean milk, from soybean flour, from soybeans). Using soybean flours (three types: high-fat or full-fat, low-fat or medium-fat, minimum-fat or fat-free). 100% soybean flour cookies (grain-free). Other soybean products you can buy: Soybean grits and soybean flakes (with 1 recipe). Soybean lecithin (with 2 recipes). Tamari, miso. The soybean and you: Meat alternatives, tempeh, textured vegetable protein products (inferior), fabricated soy foods in school lunch programs (“a nutritional crime”). Avoid mock foods.

About the author: She is the author of numerous books and winner of the French Company’s Tastemakers Award. She and her husband, John, live in New Hampshire. Nationally known for her lectures and demonstrations on natural foods, she is a member of the Price-Pottenger Nutrition Foundation and twice a speaker for the Martha Jones Lectures in Nutrition at the Ashbury Theological Seminary in Kentucky. She holds a B.A. from Brooklyn College and a Master’s degree from Columbia University. She has done graduate work at State Teachers College in Buffalo, New York, and at Harvard University. A small photo of Beatrice Trum Hunter appears on the front dust jacket of the hardcover edition. Address: New Hampshire.

859. Jeavons, John. 1974. How to grow more vegetables than you ever thought possible on less land than you can imagine. Palo Alto, California: Ecology Action of the Midpeninsula. [7] + iv + 82 p. Illust. by Betsy Bruneau Jeavons and Rip King. No index. 28 cm. [64* ref]

• **Summary:** This is the first edition of this classic—typewritten. On the title page: “A Primer on the Life-Giving Biodynamic / French Intensive Method of Organic Horticulture.”

“Dedicated to the plants, animals, insects, rain, planets, people, soil, micro-organisms, flowers, herbs, weeds, forces of nature and love which have made this method, book, and life possible.”

Contents: Preface. History and philosophy. Bed preparation. Composting. Seed propagation. Companion planting. Insect life.

Preface (brief chronology by Jeavons dated March 6, 1974): 1967—Dr. Paul Lee started the Student Garden Project at the University of California, Santa Cruz and hired Chadwick to develop the garden. Chadwick introduced the French Intensive and Biodynamic systems of food and flower production to America. “With love, vision and apparent magic, Alan converted a barren slope into a Garden of Eden. Note: This garden is now known as the Chadwick Garden. Many were touched by his genius. Chadwick was larger than life. He taught and inspired more by his manner and his behavior than by his words alone.

1970—The City of Palo Alto makes land available to the public for a public garden.

1971 Sept.—Larry White, Director of the Nature and Science Dep. of the City of Palo Alto, arranges for Stephen Kafka, Senior Apprentice at the University of California—Santa Cruz Student Garden, to give a 4-hour class on the biodynamic / French intensive method to Palo Alto residents. Several members of Ecology Action of the Midpeninsula (including Jeavons) attended and “learned details of an exciting organic horticultural method about which we had heard encouraging reports.”

1972—Ecology Action’s Board of Directors approve a biodynamic / French intensive method research and education project. “The method’s techniques were communicated by a two year apprentice program at Santa Cruz and through periodic classes given by Alan Chadwick and Stephen Kaffka. The purposes of the Ecology Action project were: (1) To teach regular classes. (2) To collect data on the reportedly fourfold yields produced by the environmentally sound horticultural method. (3) To make land available for gardening to additional midpeninsula residents. (4) To publish information on the method’s techniques.

1972 May—After a 5-month search for land, the Syntex Corporation offers to provide on a no cost basis 3-3/4 acres of land at its site in the Stanford Industrial Park and all the water needed for the project. Dr. Alejandro of the Alza Corporation “contributed the first money to the project, \$5,000 without which we never could have begun.” Commitment by several individuals and corporations, plus the Point Foundation enabled the project to continue.

1972 May—Alan Chadwick visits the garden site and gives basic advice on how to proceed. Those involved with the nascent Palo Alto garden also attend a series of lectures given by Mr. Chadwick in Saratoga, California.

1972 spring—Using the classes taught by Alan Chadwick and Stephen Kaffka as a basis, Jeavons and co-workers begin teaching classes in the Palo Alto area. Soon the class becomes a five week series of Saturday classes, which is continually “recycled.” A set of information sheets are developed. “Many people asked for a book which contains all the information we have gathered... This book is the result.” Names of the people who have made important contributions to the book are given.

“Our initial research seems to indicate that the method produces an average of 4 times more vegetables per acre than the amount grown by farmers using mechanized and chemical agricultural techniques. The method also appears to use ½ the water and 1% the energy consumed by commercial agriculture, per pound of vegetable grown. The flavor of the vegetables is usually excellent and there are indications that their nutritive value may be higher. The method is exciting to me because man becomes important again as he finds his place *in relation* to nature. In the method man helps provide

for the needs of the plants instead of trying to dominate them. When he provides for these real needs, the plants bounteously provide more food... In striving for quality, man can provide a diet and income more than sufficient for his needs. The effort will produce a human renaissance and a cornucopia of food for all.”

History: “French intensive techniques were developed in the 1890s outside Paris on 2 acres of land.” “The biodynamic techniques were developed by Rudolf Steiner, an Austrian genius, philosopher and educator in the early 1920s.” A good history follows.

Although legumes, and beans in general, are mentioned on numerous pages of this book, soybeans are not mentioned. However green vegetable soybeans play a major role in subsequent editions of this book. See also the 1982 edition published by Ten Speed Press. Address: Ecology Action of the Midpeninsula, 2225 El Camino Real, Palo Alto, California.

860. Newman, Marcea. 1974. *The sweet life*: Marcea Newman’s natural-food dessert book. Boston, Massachusetts: Houghton Mifflin Co. 161 p. Illust. by Linda Stine. Index. 29 cm. A 1981 revised edition contained 176 p. [63* ref]

• **Summary:** This early and beautifully presented natural foods cookbook contains very innovative and tasty tofu dessert recipes made with limited natural sweeteners and no dairy products. It discusses the harmful effects of refined and denatured foods, with details on white flour, sugar, oil, salt, eggs, milk, and baking powder [which contains alum, a product of aluminum; “it may even be harmful”].

Chapter 1, titled “Natural necessities: Equipment, techniques, and ingredients,” gives good definitions of and introductions to amasake (p. 6), miso (p. 10), tamari (p. 12), and tofu (soybean cheese, p. 13). Soy-related recipes include: Basic cake II with tofu sour creame (p. 25). Cheesecake tofu pie (p. 37). Cantaloupe cheesecake (p. 37, with tofu). Upside-down tofu cake (p. 38). Mincemeat filling with miso (p. 50-51). Tofu poppy seed filling (for pastries or phylo, p. 53). Instant tofu creame (p. 59). Tofu creame (p. 59). Tofu creame whip (p. 60). Tofu sour creame I and II (p. 60). Tofu custard (p. 62). Apple tofu delight (p. 82). Creame puffs with amasake filling (p. 82). Cherry tofu strudel (p. 88). Tofu sour creame cherry tart (p. 92). Thanksgiving squash-mincemeat pie (with miso in the filling, p. 98-99).

The inside dust jacket gives a brief biography of the author, who was born and raised in New York. In Berkeley, California, she studied Japanese and natural-food cooking, and helped to start a “noodle bar” where she baked her first dessert. Now she lives in Boston and caters weddings, parties and school fairs with natural and organic foods and desserts.

An Appendix (p. 151-52) lists the name and address of 39 suppliers of natural foods in the USA (divided into five regions), with 2 in Canada. This list includes the following companies. Northeast: Erewhon Trading Co. (33 Farnsworth

St., Boston, Massachusetts 02210), Good Nature Distributing Co. (Box 447, Export, Pennsylvania 15632), Infinity Co. (173 Duane Ave., New York, NY 10005), Shadowfax (25 N. Depot St., Binghamton, NY 13901), Sundance Organic Food (R.D. #1, Box 146A, Coventry, Connecticut 06238), Walnut Acres (Penns Creek, Pennsylvania 17862; founded by Paul Keene).

Southeast: Collegedale Distributors (Box 492, Collegedale, Tennessee 37315), Laurelbrook Foods (Box 47, Bel Air, Maryland 21014), Tree of Life (Box 1391, St. Augustine, Florida 32084).

Midwest and Mountain States: Ceres, Inc. (2582 Durango Dr., Colorado Springs. Colorado 80910), Cliffrose (129 Coffman St., Longmont, Colorado 80501), Eden Foods (Box 100, Ann Arbor, Michigan 48107), Food for Life (420 Wrightwood St., Elmhurst, Illinois 60126).

Southwest: Akin Distributors (Box 2747, Tulsa, Oklahoma 74101), Arrowhead Mills (Box 866, Hereford, Texas 79045), Shiloh Farms (Box 97, Sulphur Springs, Arizona 72768), Sunrise Distributors (Box 5216, Phoenix, Arizona 83010).

West Coast: Erewhon Trading Co. (8454 Steller Dr., Culver City, California 90230), Janus Natural Foods (1523 Airport Way, South, Seattle, Washington 98134), New Day Distributors (1242 S. Berendo St., Los Angeles, CA 90006), The Well / Pure & Simple (795 West Hedding St., San Jose, CA 95126).

Canada: Lifestream Natural Foods, Ltd. (724-26 W. 6th Ave., Vancouver 9, BC), and Natural Foodstuffs (1 Main St., Box 27, Sutton, Quebec).

Note: This book contains the earliest recipe seen (Dec. 2005) for a tofu cheesecake. It is also the earliest English-language document seen (Dec. 2005) that uses the term “cheesecake tofu pie” to refer to a tofu cheesecake. For the story of how Marcea got interested in tofu and wrote this book see the interview: Marcea Newman. 1994. Oct. Re: Early work with tofu and tofu cheesecakes in America. Address: Boston, Massachusetts.

861. Ohsawa, Lima. 1974. *The art of just cooking*. With Nahum Stiskin. Hayama, Japan and Brookline, Massachusetts: Autumn Press. 216 p. Illust. by Maurice Owen. Index. 19 x 23 cm. Reissued in 1984 as *Macrobiotic Cuisine* by Japan Publications, NY. 175 p. [26 ref]

• **Summary:** This work is based on Lima’s Japanese-language book titled *Macrobiotic Cookery* (1971; in Japanese *Makurobiotiku ryôri: Shokuyô katei ryôri 700 shu*). The Preface to this book is a 3-page autobiography by Lima starting in 1953, when she was about age 54. In 1953, at age 54, Lima Ohsawa first ventured beyond the shores of her native Japan. She and her 2nd husband, Georges Ohsawa, left on their first world tour. In 1955-56 they spent time with Dr. Albert Schweitzer in Lambarene, Gabon. “Being vegetarian Dr. Schweitzer was always very interested in the

nutritional assets of the soybean and asked me to show him different ways to prepare it” (p. 10). During this and many subsequent travels, Lima learned many traditional, natural recipes from around the world.

Contains numerous Japanese macrobiotic style recipes. Page 32 gives good definitions of miso and shoyu. Soy-related recipes include: Brown rice with soybeans (p. 53). Inarizushi (p. 55). Brown rice porridge with vegetables and miso (p. 58). Soya omochi (mochi with soya flour). Burdock with miso and lemon peel (p. 90). Broccoli and radish with miso dip (p. 92). Carrot with green beans and tofu (p. 95). Ninjin shiro-ae (with “½ cake of *tofu*, drained and mashed {p. 173},” p. 95). Cucumber with wakame and walnut miso (p. 96). Cucumbers with miso and sesame (p. 97). Onion nitsuke with miso (p. 100). Onion goma-miso-ae (onion with sesame miso, p. 100). Eggplant nabeshigi-yaki (with miso, p. 101). Scallion and aburage nitsuke (p. 101). Scallion dengaku (with miso, p. 102). Renkon ikada age with kuzu-lemon sauce (p. 103). Kabocha miso ni (p. 106). Kabu miso-ae (turnips with sesame miso, p. 109). Daikon age rolls (with aburage, p. 114). Vegetable skewers with koya-dofu (dried-frozen tofu, p. 114). Kombu with shoyu (p. 117). Renkon miso inro (lotus root tempura with miso, p. 123). Coltsfoot buds with miso (p. 126). Wakame miso soup (p. 137). Mugi-miso soup (p. 137). Sake-no-kasu jiru (miso soup with sake lees, p. 137). Go jiru (soybean potage with aburage, p. 141). Oden with ninjin and gobo kombu maki (with aburage, p. 146).

Condiments and pickles (p. 154-57): Gomashio (sesame-salt). Tekka miso (sauteed vegetables with miso). Shigure miso (moist tekka). Miso sauté. Soybeans with miso and burdock. Soybeans with miso. Miso pickles (fall and winter). Sauces, spreads and salad dressings (p. 161-63): Lemon shoyu. Ginger shoyu. Orange shoyu. Tsuje-jiru dipping sauce (with shoyu). Goma joyu sauce (with shoyu). Scallion miso. Walnut miso. Citron miso. Goma miso (sesame).

Beans (p. 165-78). Black bean ni (the black beans are actually black soybeans. Soak 1 cup soybeans overnight in 3 cups water. “Drain the beans through a strainer reserving any soaking water.” Add enough fresh water to equal 4 cups then pour this liquid into a heavy saucepan. Add the soaked beans, bring to a boil over high heat. Reduce heat to low, cover and simmer for 2+ hours, or until tender. Add water during cooking if liquid completely evaporates. Toss pan to stir. When done, season with a dash of salt and/or shoyu. “In Japan this exquisitely sweet dish [nimame] is a must on New Year’s Day. It gets even sweeter after standing for a day or two.” Cooking soybeans with a small strip of *kombu* helps to soften them). Gomoku-mame (soybean nitsuke).

Tofu ryori (p. 173-78; “Tofu or bean curd is rich in vegetable protein. Although it is rather *yin* in our classification of foods, the recipes I have included here balance its *yin* characteristics with *yang* so don’t hesitate to use it occasionally. It’s delicious in miso soup, stews and

nabe, and as a dish by itself. It is available at Oriental food shops and can also be made at home.”). Homemade tofu (p. 174; 3 cups soybeans plus nigari make 1 lb. tofu; also describes how to make nigari {sea brine} by dampening 5 lb. sea salt). Variation: Homemade grilled tofu. Unohana pouches (with okara and aburage). Gammodoki. Tofu with kuzu sauce. Tofu roll. Koya-dofu sandwich. Tofu nitsuke. Chinese dow-foo oroshi-ae. Tofu mold (with kuzu). Tofu tempura. Goma dofu (sesame tofu).

Note 1. This is the earliest English-language document seen (April 2013) that contains the term “grilled tofu.”

Squid and scallion miso-ae (p. 183). Salmon head soup (with soybeans, p. 183). Surimi shinoda (with aburage, p. 184). Red snapper in miso. Koi koku (with miso, p. 184). Egg tofu (p. 185). Amazake manju (sweet sake dumplings, p. 198). Amazake (homemade, using glutinous “sweet” brown rice, p. 207).

The section titled “*Kofu*: Wheat Gluten” (p. 85-86) includes recipes for Homemade kofu (wheat gluten, including Kofu loaf and Seitan), and Kofu cutlet. “First introduced to Japan from China by Buddhist monks, *kofu* became a very popular food in Zen temples. It is delicious in soups and stews and mixed with sautéed vegetables. *Kofu* cutlet looks, feels, and tastes like meat.” Seitan is made by simmering 5 cups cold wheat gluten, separated into small pieces, for 3 hours in shoyu, sesame oil, and minced gingerroot.

Dandelion coffee (made from minced and dry roasted, ground dandelion root) and Yannoh (prepackaged grain coffee, made from 5 different grains) are described on p. 206-07.

The book, which contains many fish recipes, begins with a nice photo of Lima at age 75—she looks 20 years younger—and ends with a good glossary. Lovely illustrations, a wealth of original information on Japanese foods.

Note 2. This is the earliest document seen (July 2000) that mentions “Tekka miso” (spelled that way).

Note 3. This is the earliest English-language document seen (Feb. 2005) that used the word “kofu” to refer to wheat gluten. Address: Tokyo, Japan.

862. Shorr, Ivy. 1974. The exciting world of natural food and vegetarian restaurants in southern California. Santa Monica, California: Dennis-Landman. 119 p. Portrait. 14 x 21 cm. *

863. Janus Natural Foods. 1974? Home made mugi miso (Leaflet). Seattle, Washington. 2 p. Undated. 28 cm.

• **Summary:** Describes in detail how to make miso at home using 20 lb soybeans, 20 lb barley koji (dried), and 8 lb salt. Janus sells barley koji.

Note: This is an excellent, accurate recipe, with exact ingredients, a 12-step process, and many notes. Address: 1523 Airport Way South, Seattle, Washington 98134. Phone: (206) 624-1084.

864. Mother Nature's Inn. 1974? Our menu. 1813 West 4th Ave., Vancouver, BC, Canada. 4 p. Undated.

• **Summary:** Contents: [Basics]: Soup of the day, Brown rice, Mother Nature's bread or sprouted 8 grain, Tahini, soy lecithin or vegie butter, Chapatti-whole wheat flatbread of India (buttered or with vegie butter), Sprouted 7 grain English muffin (buttered or with tahini or vegie butter), Bible bread with any spread. Fresh salads (incl. alfalfa sprouts or Tabouli salad). Salad dressings (incl. sesame tahini dressing).

Mom's great sandwiches, Daily special, Evening dinner menu (as posted on menu board) or Golden Lotus Macroplate.

Chapizza, Vegeburger (with vegetable protein patty). Desserts. Juices. Teas (incl. Healthy coffee, Roastaroma, Mu, Red Zinger). At the bottom of page 3: "All food served by Mother Nature's Inn are purely vegetarian and natural, We use neither eggs, sugar, nor cheese with animal rennet. Our fare is lovingly prepared from the freshest, highest quality produce available.

"May the long time sun shine upon you
All love surround you
And the pure light within you
Guide your way home."

On the back cover is a large oval illustration of a child [Jesus] dressed in a long white robe, leading a sheep, a lion and two cows. Around that, the name of the restaurant. Below: Its hours (Mon.-Sat. 11:30 am-5 pm, Sunday 12-7) and address.

Accompanying this menu is a photo (angled upwards) of a waitress at Mother Nature's Inn (Lisa) holding out a plate of food in her right hand; behind her are a hanging light, hanging plant, and the restaurant's ceiling. Address: Vancouver, BC, Canada. Phone: 733-5528.

865. Keller, E.R. 1975. Neue Wege im Ackerbau?—Eine Betrachtung ueber den allgemeinen und biologischen Landbau sowie ueber Koernerleguminosen [New directions in agriculture?—A consideration of general and organic farming, as well as grain legumes]. *Schweizerische Landwirtschaftliche Monatshefte* 53(1):1-30. Jan. [36 ref. Ger]

• **Summary:** Soy is mentioned on pages 21 and 26. Address: Swiss Federal Inst. of Technology, Dep. of Crop Science, ETH Zentrum, CH-8092 Zurich, Switzerland (Inst. fuer Pflanzenbau der Eidgenoessischen Technischen Hochschule, Zuerich).

866. Farm, The. 1975. The Farm vegetarian cookbook. Summertown, Tennessee: The Book Publishing Co. 128 p. Illust. Index. 18 cm. Revised edition by L. Hagler. 1978. 223 p.

• **Summary:** Expanding on the pioneering "Yay Soybeans!" (Oct. 1974), this creative and creatively illustrated vegan

cookbook contains many extremely innovative and original recipes including: Soybean Stroganoff. Soyburgers. Spaghetti Sauce with TVP. Soysage. Soy fritters. Indonesian fried tempeh. Soymilk. Tofu. Tofu spreads. Soy "yogurt." Soy "cheese." Soy "butter" (made with soy flour). "Cream cheese" (made with soymilk). Soy "mayonnaise." Soy "whipped cream." Soy "coffee." "Soy 'nuts.'" Soy pulp granola. Ice Bean [soy ice cream] (Recipes include: Pineapple "sherbet" and "Vanilla ice bean," each made with soy milk instead of dairy milk). Mellowmeal (breakfast cereal containing soy flour). Soy "yogurt" Danish pastry. Soy bread. Soy pulp cookies. Soy "cheese cake." Blintzes (filled with tofu).

Gluten recipes (p. 54-59) include: Basic gluten (feeds 8 generously). Gluten roast. Gluten burritos. Chili gluten. Oven-fried gluten. Janice's barbeque [barbecue] gluten ribs.

The back cover states: "We are a large, long-haired spiritual community in Tennessee. We came together through open meetings in San Francisco with Stephen. We have 750 people, including 250 kids, living on 1,750 acres. This cookbook is to help as many people be vegetarians as possible without turning any of them off and making them think its strange or weird and to let people know that it tastes good, is nice, graceful, and it can be a turn-on, that it'd be really neat to eat, and make you look forward to meal-times and make you really happy to eat such good food." The Introduction, by Stephen, begins: "The thing about our cookbook is we don't want to be faddish or cultish or scare people off. We just honestly want them to know how to make it on vegies, even somebody who doesn't particularly have a moral reason for being a vegetarian, but just wants to eat a little cheaper, or somebody who learns to be a vegetarian to lose weight, 'cause you maintain a really healthy natural weight on vegetables... The main thing is that we're absolute vegetarians. We don't do meat or milk or eggs or cheese or fish or fowl."

"You can increase the world's food supply by being a vegetarian. So its good for everybody else, its good for the individual for health, and its good for the soul and the spirit not to be involved in killing. And I understand that vegetables are alive, but like I've said before, I've been to pig stickings, and I've been to rice boilings, and rice boilings have better vibrations than pig stickings."

Photos show: Facing title page: People planting white potatoes at the edge of a large field in front of the woods. The lady in front is Sylvia Tepper, Robert Tepper's wife. Pages: (1) Little Susannah Frohman eating a rolled up soybean tortilla. (3) Stephen Gaskin. (18) Ruth Thomas, making lunch in the kitchen of the only house on the property when Farm folks first came here. It housed The Farm's clinic, school, bank offices, and receptionist for a number of years until other facilities were built for these purposes. Ruth could make a mean soybean burger (which is pictured). (23) Laurie Sythe making potato soup on the other

side of the same kitchen Ruth was pictured in. (35) Poblano chili plants. (60-61) Tempeh sliced to be round to fit on buns, resting on a plate (L) and a tray (R). (64). Uncle Bill (age 82, center, surrounded, from left by: Marilyn Keating, Jeffrey Keating, Ruth Thomas, Patrick Thomas, Uncle Bill, Joel Kachinsky, Roberta Kachinsky, Bruce Moore, Roslyn Moore {holding baby Sam}. All at their home on Schoolhouse Ridge. The house, named “Kissingtree,” was originally built for Stephen and family, but he declared it “too fancy” for him, and he passed it on to this group {women were mostly schoolteachers in our school}). (67) Janice Hunter making stir fry at the Tower Road House kitchen. (68) John Hurgeton drinking a glass of soymilk on a construction site somewhere. (71) Sue Ellen, who worked in The Farm’s soy dairy, holding a glass of soymilk and relaxing. (89) Sour soymilk Danish pastry. (106) Jars of canned goods stored at the Farm’s canning facility. Thanks to Cynthia Holzapfel for providing photo captions.

Illustrations appear on almost every page: On the front cover is a color illustration of a basket full of vegetables on a quilt. Many of the pages have illustrated borders or unique illustrations (line drawings) (flowers, plants, leaves, a pot of steaming food, psychedelic designs, native American motifs, etc.) where there would otherwise be empty space. Pages: (10) A Farm member eating, with one hand, a tortilla wrap filled with cooked whole soybeans. (20) A young woman in a kitchen facing the stove. (28-29) Illustrations of two Farm members making pizza. (65) Uncle Bill in a kitchen stirring a pot. (81) A pitcher labeled “Soy Milk.” (83) An old-fashion, hand-turned ice cream machine for making Ice Bean. (88) Sour soymilk Danish pastry. (95) A happy man and a woman eating bagels. The man’s finger, pointing up, serves as a bagel holder. Yum! (100) Overhead view of a round table with ten people eating. (105) A vase full of kitchen utensils. (113) A lady holding a cake—a very favorite recipe on The Farm. (120) A lady rolling out dough on a table.

Note 1. This book played an important role in introducing soyfoods (especially tempeh and soy ice cream), as well as a vegan diet, to America.

Note 2. This is earliest publication seen by The Farm that contains a tempeh recipe.

Note 3. This is the earliest document seen (Oct. 2008) that contains the word “vegies” (one of two documents).

Note 4. This is also the earliest document seen (Oct. 2008) that uses the word “barbeque” or “barbequed” rather than the standard “barbecue.”

Note 5. This is the earliest English-language document seen (Oct. 2013) that contains the term “Soy ‘whipped cream’ (regardless of capitalization).

Note 6. Some sources (OCLC/WorldCat) cite Stephen Gaskin as the author of this book. Others cite Louise Dotzler; her maiden name was Louise Hagler, but she was married to Thomas Dotzler in 1975. Later that decade they separated and Louise reverted to using her maiden name As “Louise

Hagler,” she was the editor / author of several later revised and expanded editions of *The Farm Vegetarian Cookbook* (1978, 1988) plus several outstanding books about soyfoods published at The Farm. Address: Summertown, Tennessee.

867. Laurelbrook Foods. 1975. A little bit about our food (Booklet). Bel Air, Maryland. 6 p. Feb. 28 cm.

• **Summary:** Laurelbrook now distributes about 43 different food products, plus 7 non-food products. Each of these is described, including wheat, brown rice, soy flour (ground from lightly toasted beans by arrowhead mills), granola, tamari (“High quality soy sauce from Japan, made from whole soybeans, wheat and sea salt...”), miso (“A thick soybean paste from Japan.” Hacho miso, Mugi miso, and Kome miso are available), Deaf Smith peanut butter, vegetable oils (expeller pressed and unrefined), sea vegetables, kuzu, umeboshi (salt pickled plum with chiso [shiso, aojiso] leaf). Address: P.O. Box 47, Bel Air, Maryland 21014; Raleigh Branch: 330 W. Davie St., Raleigh, North Carolina 27601.

868. DeSilva, Tom; Hillyard, Roger; Hartman, Tim; Kimbro, Bob. 1975. Steering Committee report, being the result of a meeting held March 22 & 23, 1975 upon the request of 14 companies in the natural food field. Unpublished manuscript.

• **Summary:** “At Pajaro Dunes, Watsonville, California on November 21-24, 1974 the following companies agreed to pursue the subject of organization and appointed a ‘Steering Committee:’ Arrowhead Mills, Eden, Erewhon/Boston, Erewhon / Los Angeles, Lifestream, Laurelbrook Foods, Manna, Shadowfax, Tree of Life, The Well, Ceres, Janus, Food for Life, Cliffrose.

“This is the report of that committee which met during the days and nights of March 22 and 23, 1975, in San Francisco and was composed of Tim Hartman (Janus), Roger Hillyard (The Well), Tom DeSilva (Erewhon / LA [Los Angeles]) and Bon Kimbro (Ceres).” Address: 1. Chairman, Erewhon–Los Angeles.

869. Goldstein, Jerome. 1975. The cheapest nitrogen is the best: Natural nitrogen sources are finally being recognized as cheapest, safest—and healthiest by scientists as well as growers. *Organic Gardening and Farming*. March. p. 57-59.

• **Summary:** In 1955 J.I. Rodale was asked during a speech in Iowa: What difference does it make whether a plant gets its nitrogen from a chemical fertilizer or from a legume, animal manure, or sludge? He loved that kind of question and promptly replied that it was basically the same as the difference between feeding pure nitrogen to people in the pill form as compared to giving it to them in scrambled eggs or peas.

Nitrogen is essential for the growth of plants. “Yet an excessive supply of it will not only retard the growth period but will reduce the plant’s resistance to disease, and produce

crops of an inferior quality, often with poor keeping and shipping abilities. It waterlogs the plant, causing an over-succulency. This is where the organic method is superior... It is a known fact that organic matter decays slowly, thereby not releasing the nitrogen too quickly. The organic matter thus is a valuable storehouse of nitrogen, maintaining an automatic supply for the entire growing season. But with chemical fertilizers, a too-enthusiastic hand can sometimes give the soil an oversupply—which will lead to all the troubles described above.”

870. Logsdon, Gene. 1975. Grow your own nitrogen factory. *Organic Gardening and Farming*. March. p. 54-56.

• **Summary:** Editor’s introduction: “The ease with which legume inoculants can put more natural nitrogen into the soil is bringing such traditional soil aids out of relative obscurity in these days of high fertilizer costs. For organic growers, the benefits are doubly attractive.”

“Rhizobia is the family of bacteria which performs the all-essential service of making nitrogen available to plants. In partnership with legumes, certain strains of these bacteria have a proven capacity of manufacturing up to nearly 200 pounds of available nitrogen per acre per year. In these days of inflated fertilizer prices, that’s gold in them that rhizobia!”

A list of manufacturers of legume inoculants is given:

“1. Agricultural Laboratories, Inc. (Legume-Aid) 1145 Chesapeake Ave. Columbus, Ohio 43212.

“2. Kal Laboratories, Inc. 10236 Bunker Ridge Rd. Kansas City, Missouri 64137.

“3. Nitragin Co., Inc. 3101 W. Custer Ave. Milwaukee, Wisconsin 53209.

“4. Research Seeds, Inc. 310 S. Third St. St. Joseph, Missouri 64501.

“5. Rudy-Patrick Co. P.O. Box 404 Princeton, Illinois 61356.

“6. Scarlett & Co., 632 President St. Baltimore, Maryland 21202.

“7. Urbana Laboratories P.O. Box 399 Urbana, Illinois 61801.

A large photo shows root nodules on a leguminous plant. Rhizobia are a form of soil bacteria capable of forming these symbiotic nodules. The rhizobia live inside the nodules. The bacteria transform nitrogen drawn from the atmosphere by the legume into a form the legume and other plants nearby can use as fertilizer. The larger the rhizobia population, the larger and more numerous the nodules.

871. Spiral Foods Inc. 1975. Wholesale price list. Chico, California. 4 p. April 1. 28 cm.

• **Summary:** This two-sheet catalog and price list, consisting of two pages stapled in the upper left corner, is printed front and back with reddish-orange ink on tan paper. The first item is five cookbooks, including *The Art of Just Cooking*, by

Lima Ohsawa. The soy-related products are similar to those in the 1974 catalog. Address: 1144 West 1st Street, Chico, California 95926. Phone: 343-2111.

872. Spiral Foods Inc. 1975. Mail order price list. Chico, California. 4 p. April 1. 28 cm.

• **Summary:** This two-sheet catalog and price list, consisting of two pages stapled in the upper left corner, is photocopied front and back with black ink on white paper. Address: 1144 West 1st Street, Chico, California 95926. Phone: 343-2111.

873. Vellucci, Jody. 1975. He’ll shop at trade fair in China. *Ann Arbor News (Michigan)*. April 11. p. 24. Friday.

• **Summary:** Michael Potter, Ann Arbor entrepreneur, is making his second trip to the semi-annual trade fair held in the People’s Republic of China.” He will be gone for about 5 weeks. Last year he was the youngest person to attend the fair. Last fall Potter bought arrowroot starch, ginseng root, several varieties of beans, bamboo products, and dates. “As president and co-owner of Eden Foods Inc., Potter will buy natural foods and products which his firm will distribute to its clients around the United States. Eden Foods was organized five years ago by Potter, Timothy Redman [sic, Redmond] and William Bolduc. Bolduc has since left, and Potter and Redman are the two remaining partners.

“Eden Foods started out as a natural foods store. It has grown to include a restaurant and wholesale natural foods distributing company. The company, in many cases, buys directly from farmers.” A photo shows Potter. Address: News staff reporter.

874. Erewhon. 1975. Natural and organic foods. Spring 1975. Boston, Massachusetts. 24 p. Catalog and price list. 28 cm.

• **Summary:** The cover shows a family photo in a wooden frame on a goldenrod background. The family is all the Erewhon employees (plus a child, a dog, and a sack of brown rice), in about five rows from front to back, kneeling and standing on a wooden floor.

The first page, from “The people at Erewhon,” begins: “Hi!—All of us at Erewhon wanted to give you folks who use our foods a personal greeting. So we rounded ourselves up on snowy Sunday and snapped a picture to give you a glimpse of who we are. The people who make Erewhon live and breathe are really happy to be serving you. The key to reaching out to those friends who use the foods that we are so proud of is through you. We all remember the days when the foods we have now weren’t available to us and know that there are still many people who don’t yet have good food on their table. So, our activity each day centers around passing on to you what you need to turn on your friends to one of the fundamentals of a beautiful life. Thank you. You are giving us an opportunity to work together, learn from each other, and share something that is very important to us.

“As we get to know each other better, our ability to assist you with higher and more various natural food products also increases. The history of Erewhon has been one of movement from discovery to discovery, and it is our intention to do our best to open up the communication between mother earth and the people that whole food provides. We hope you will find that each new catalogue reflects a step towards this goal...”

We will show the catalog cover relatively small, but the photo from which that catalog was made fairly large and attempt to give the names of the people in the photo. Evan Root identifies these people (in the photo supplied by Robert Hanig—who did not shoot it) as follows:

Front Row:

Zolla (Abiel Halla’s wife)

With child

Jean Blyweiss

Michael Kababian

Unknown

Unknown

Kazuko Awamura

Jean Carter Levine

Unknown

Unknown

Unknown

Tomoko “Aveline” Kushi

Second row (crouching or sitting, left to right):

Abiel Halla (his’s wife and child are in front of him)

Tyler (Ty) Smith

David Stamps

Bob Chiampa

Unknown

Mark Ripa (Erewhon’s brand “Mark’s pasta sauces were named for him. Currently: <http://www.cronigsmarket.com/info/index.cfm>)

Unknown

David Simon

Unknown (baby)

Unknown

Don Larenson (holding baby Lao)

Anthony Valenti

Gene Fialkoff (founded and operated New Morning Cereals, sold to US Mills in 2000). Standing, left to right:

Unknown (Bob Spencer thinks this is Susan Munger.

I know her and didn’t catch that. Then again, I know Bob Spencer and I didn’t recognize him in this picture. Patricia Smith knew her well, perhaps she can make the call.)

Joanne Amartseff (wife of Nick, holding daughter Misha)

Unknown

Jeff Flasher (currently, VP Traditional Medicinals)

Keith Varnum (currently: <http://www.thedream.com/index.php>)

A.C. Gallo (currently president and chief operating

officer of Whole Foods)

Unknown

Unknown

Richard Young

Hugo van Seenus (currently with Alfalfas, <http://alfalfas.com/about/team/hugo-van-seenus/?iframe=true&width=100%&height=100%>)

George Crane (left Erewhon for organic farming in Maine, can’t find anything current)

Phil Levy (<http://phillevy.net/default.aspx>)

Danny Seamans (Last seen by Evan Root about 5 years ago, managing a Whole Foods Store in Bellingham, Massachusetts, no current data available)

Unknown

Bill West

Unknown

Carl Sauter

Warren Murrah

Paul Campbell

Bob Spencer

Eric Lake

Diane Markovitz

Unknown

Blake Gould (<http://www.acupuncturist-acupuncture.com/HealthAcupuncturist/Blake-Gould-North-Star-Health-Care-Stowe-VT-4066.htm>)

Laura Lane

Tony Harnett

Robert “Bobby” Hanig” (without prior experience in IT, studied up on computers from scratch and brought Erewhon into the digital age. Currently, business consulting: <http://www.gulfsol.org/featured/Leadership/facilitator.asp>).

Norio Kushi (Jan. 2011) identifies the people as follows:

Front Row: Zolla (maybe), with child, Mark Ripa’s wife (not the woman who later worked the front desk), Carol ? worked in the office, Unknown man, Unknown man, Unknown lady, Kazuko Awamura (chef, Robert Hanig’s girlfriend), Jean Carter holding rice bag (works at Whole Foods, Brighton, Massachusetts), Unknown man Unknown man, Unknown lady.

Second Row: Abiel Hallah, Unknown person peeking from behind ?, person with cap facing Ty Smith, Unknown lady, Mark Ripa (508-693-4487) (w), Unknown lady, Unknown man with child, David Simon, Don Lorensen holding child, Anthony Valenti, Gene Fialkoff, Aveline Kushi.

Third Row: Joanne Amartseff, holding child (617-731-5923), Tyler Smith (808-895-3395).

People standing (starting behind Joanne Amartseff): Unknown man, William Tetmeyer (317-873-4431), Jeff Flasher, Keith Varnum (lives in Arizona), AC Gallo (VP, Whole Foods, Cambridge, MA regional office), Unknown man, George Crane, Dan Seaman, David, (worked in production Dept), Warren Murrah (worked in Shipping

Dept), Robert Spencer, Stuart Smith (207-935-3994), Unknown man (maybe Tony Harnett).

People standing starting from behind AC Gallo, Unknown man, Richard Young (passed away in 2006), man peeking behind George Crane is Hugo van Seenus (who, along with Anthony Harnett became owners of Bread & Circus, Hugo later started Hugo's in Silver Spring, Maryland, and later Lazy Acres in Santa Barbara, California), Phil Levy, Roger (boyfriend of Martha Fielding later owner of Red Wing Books, they were in an motorcycle accident, Martha was hurt fairly seriously but she graciously recovered), Bill West, Carl Sauter, Pat Campbell (standing behind Robert Spencer, married Jean Blyweiss), Eric Lake, Diane Markowitz, Blake Gould (802-888-2858; behind Stuart Smith), Laura Lane (girlfriend of Bill West), Robert Hanig (781-259-1128, the person furthest to the right in the photo).

Norio adds: The rows are not exactly neat so I hope it is clear enough who I am referencing. I believe this photo was taken by Nik Amartseff (who is absent in the photograph), the husband of Joanne Amartseff standing on the left with their baby daughter.

On the Spring 1977 Catalogue picture and missing from Hanig's photo is Nick Amartseff [mustache] standing between Joanne Amartseff and Jeff Flasher. (Nick's snacks were named for Nick, he also produced art for labels).

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210.

875. Natural Foods Distributors Association. 1975. Minutes, May 1-5. Boston, Massachusetts: Erewhon. Unpublished manuscript.

• **Summary:** This meeting was held on 1-5 May 1975 at 62 Buckminster Rd., Brookline, Massachusetts, the residence of Michio Kushi. It was attended by Boyd Foster and Chuck Brockett (Arrowhead Mills Inc., Hereford, Texas), Frank Calpeno and Howie Schickler (Ceres Natural Foods, Inc., Colorado Springs, Colorado), Tim Redmond (Eden), Tom DeSilva and Ty Smith (Chairmen; Erewhon, Inc., Boston, Massachusetts), Tim Hartmann (Janus Natural Foods, Inc., Seattle, Washington), Rod, Marge and Dan Coates, Frank Mabrey and Dave Raleigh (Laurelbrook Natural Foods, Inc., Bel Air, Maryland), Gene Newman (Manna Foods, Inc., Scarborough, ONT, Canada), Charlie Smail (Shadowfax Whole Foods, Inc., Binghamton, New York), Irwin Carasso (Tree of Life, Inc., St. Augustine, Florida), Roger Hillyard (The Well, San Jose, California), Arran Stevens (Lifestream Natural Foods, Ltd., Vancouver, BC, Canada).

Companies that were members of the Natural Food Distributors Assoc. in June 1975, but that were not at this meeting were: Cliffrose Natural Foods, Inc. (Longmont,

Colorado), Eden Foods Inc. (Ann Arbor, Michigan), and Food for Life, Inc. (Elmhurst, Illinois).

Note 1. This is the earliest document seen (Aug. 2019) concerning Manna Foods, Inc. in Canada.

Note 2. Chico-San, of Chico, California, was not at the meeting, because it was a manufacturer and importer, not a distributor.

Talk with Roger Hillyard of San Francisco. 1982. April. Thirteen representatives of 11 natural food distributors came together in May 1975 to form a new organization. At this meeting the goals of the association were discussed and the name Natural Foods Distributors Association was first decided. Mr. Kazama of Mitoku (Japan) was present. Michio Kushi offered to help any company send representatives to Japan to study miso making, etc. "A Harvard study done on 210 local macrobiotic people showed their blood pressure and cholesterol is the lowest in America," says Michio. Why did this association never happen? The potential members were unwilling to provide the collective funding deemed necessary. And there was a lack of clearly defined goals and projects. Tim Hartman of Janus was chosen the first executive director. Roger does not know if he was ever paid.

On Oct. 9-12, 1975, there was a meeting of distributors at Tree of Life in St. Augustine, Florida. Before that meeting, there was a steering committee meeting in Ithaca, New York. It was determined that it would take \$25,000 to implement the employment contract, but members were willing to commit only \$7,800. A newsletter was planned.

Note 3. Erewhon was the real pioneer, the first of a new breed of natural food distributors. It was also a pioneer (along with Chico-San) in importing traditional, natural foods from Japan. Address: Erewhon, Boston.

876. Photograph of people who worked at Erewhon—Los Angeles, a macrobiotic retail store and warehouse. 1975. Los Angeles, California. Undated.

• **Summary:** People who worked at Erewhon, Los Angeles (probably in both the store and warehouse), probably at the Culver City warehouse on Steller Drive. Doug Rauch guesses the photo was taken in winter/spring 1975, based on who is in it and how they are dressed. It was definitely taken before Sept. 1976, which is when Jimmy Silver arrived.

First row (9-10 people squatting, sitting or kneeling on the pavement; left to right): 1. Peter (squatting on the far left—older with white hair; he is the only one we have been able to identify in this row). Peter was from Canada (spoke English), thought to have been connected with the Vedanta Society and here illegally.

2. Greg Merideth.

3. Michael Stein.

4. Unknown (shielding eyes from sun). 5. Linda (bookkeeper).

6. Unknown. 7. Unknown.

8. Bill. 9. Sharon Flasher (Vishistha; Jeff Flasher's wife

at the time) with son Yudi.

Second row (10 people, standing; left to right): 1. Unknown. 2. Unknown.

3. Dolores Coffee (short woman). 3A. Tom Bagby is the guy sitting on the truck fender right above Dolores Coffee (with his knees on her shoulders).

6. Dale Turner (played jazz trumpet and got a gig with the Oingo Boingo band, playing on several of their albums and did many tours & performances).

8. Francis Pinto ("Franny," a composer and follower / practitioner of Reichian therapy).

9. Tom DeSilva (dark haired, stocky). Once a Hollywood entertainment lawyer, Tom found a new life for himself and his two boys starting at the bottom at Erewhon, doing something that he loved. Smart and personable, Tom was for many years the respected president of Erewhon West when it was a distribution and retail operation. He bought the LA retail store when the company was split up, moving and expanding the once-small store into a highly successful operation but true to its origins as a business.

10. Bob Reddick (writer, involved with the Vedanta Society).

Near the top is a group of 6 people standing or sitting on the hood of the truck (L-R):

1. Joe (he worked for Dolores in the Packaging Dept.).

2. Michael Chernick (standing behind and just to the right, with the bald head, a free lance maintenance man).

6. Loren Spector (guy on the far right of this group, in the black sweater, with his hands clasped around his left knee).

A group of 4 people is sitting on the cab of the truck (highest up, behind the "erewhon" sign) (L-R):

1. Eileen Frankel.

2. Tomi (or Tomei); she was Okinawan, lived in Long Beach, worked in accounts receivable or payable who was married to a guy who allegedly was involved with a gang who hijacked big rigs and heavy equipment in the Midwest; she was involved in her husband's shenanigans.

3. Nick Coffee.

4. Eric is the first name of the black guy at the far right top.

Doug Rauch is the tall blonde, bearded guy standing on the running board just below this group and below the "erewhon" sign.

877. *Yoga Journal*. 1975-- . Serial/periodical. San Francisco, California. Vol. 1, No. 1. May, 1975. Publisher: California Yoga Teachers Association. Editor: William Staninger. *
• **Summary:** The first issue was more like a newsletter, 10 pages long. Address: 1736 9th Ave., San Francisco, California 94122.

878. Erewhon Trading Co. [Los Angeles, California]. 1975. Wholesale price list. July 1975. Culver City, California. 10 p.

Catalog and price list.

• **Summary:** On the front cover is a copy of an analysis of carrots performed by Agri-Science Laboratories Inc. of Los Angeles. They contain no Organo-phosphates—None detected as Parathion < 0.010 ppm.

Products include: Whole grains. Cereals. Flours—Freshly milled whole grains (incl. Raw soy flour, organic). Beans (incl. Soybeans, organic, Texas { 10 or 16 lb }, Soybean flakes, organic, Texas). Butters (incl. Peanut butter, Sesame butter). Applesauce. Carbonated drinks. Juice. Chips. Goodies. Nik's Snaks. Granola. Soybean products: Tamari soy sauce (4 sizes, 8 oz to 4.7 gal). Hacho miso, soybean paste (1 lb or 44 lb). Mugi miso, Barley-soybean paste (1 lb or 44 lb). Kome miso, Rice-soybean paste (1 lb or 44 lb). Sea vegetables. Specialties (incl. Kuzu arrowroot, umeboshi { Plums pickled in brine }, Sesame salt). Seeds. Nuts. Fresh produce—Organic. Dried fruit—Bulk. Dried fruit—Packaged. Books and flyers (Deaf Smith County Cookbook, Oil Story, Pasta Cooklet). Redwood rennetless natural cheeses (Raw or pasteurized). Pasta (Bulk or packaged, incl. Soya-rice shells). Salt. Oils (incl. Soy oil). Erewhon packaged goods: Grains, cereals, flowers, seeds, beans. Teas. Celestial Seasonings bulk herb teas or tea bags. Cosmetics. Cooking utensils.

Inserted is a letter on Erewhon letterhead from Loren M. Spector, general manager, dated 1 July 1975. It begins: "Dear customers: Please find enclosed our summer price list." On the back are "July specials." Address: 8454 Steller Dr., Culver City, California 90230. Phone: (213) 836-7569.

879. Rodale, Robert. 1975. Ideas for vegetarian gardeners. *Organic Gardening and Farming* 22(7):28-32. July.

880. Eden Foods. 1975. Wholesale pricelist. 4601 Platt Rd., Ann Arbor, MI 48104. 19 p. Aug. Catalog.

• **Summary:** This catalog is large enough to have a table of contents on page 1, along with an illustration (line drawing) of large windmills. Page 7 lists "Tamari, Miso & Condiments." Tamari Soy Sauce is now sold under 3 labels (Erewhon, Japan, and Lima—Chico San). Miso (Mugi, Hacho, and Kome) is also still sold under the Erewhon label. Mugi miso is described as "barley-soy paste" and Kome miso as "rice-soy paste." Also includes "Kuzu Arrowroot, Umeboshi Salt Plums (Erewhon), and Sea Salt—white French." Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

881. Erewhon. 1975. Erewhon. Summer '75: Natural and organic foods. Boston, Massachusetts. 32 p. Catalog and price list. 28 cm.

• **Summary:** The color cover shows various leaves growing on their stems.

On page 1 is a message from Ty Smith, President, which begins: "As a distributor of natural foods, I am concerned about the quality of life. I create through my activities of

business. The primary form is the quality of food itself, and to maintain that at the highest level possible I rely on methods of growing, cleaning, storing, and processing which are inherently upgrading and promoting the life force of the foods. I am concerned that these methods of working with nature also promote the enjoyment and creativity of the people who do them every day.

“There is another form of quality which is important to create and maintain—this is the quality of the method of the doing of business. It is as important to produce and foster high standards for relationships through which the food is distributed as it is to safeguard the quality of the food itself... If there is any aspect of doing business with Erewhon which causes you any form of dissatisfaction, I am the person who is responsible to you.

“The keyword is ‘responsibility,’ in the true sense of the word, ‘the ability to respond.’ ...

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210; New York City office: 303 Howe Ave., Passaic, New Jersey 07055. Phone: 617-542-1358 and 212-594-6455.

882. **Product Name:** Hand-Crafted Wooden Tofu Box.

Manufacturer’s Name: Ganesha.

Manufacturer’s Address: c/o Westbrae Natural Foods, 1336 Gilman St., Berkeley, CA 94706. Phone: 415-524-1083 or 524-8841.

Date of Introduction: 1975 August.

New Product–Documentation: This is America’s first commercial tofu box, developed by a woodworker named Ganesha in Berkeley, California. He sold the perforated pine boxes at local natural food stores and by mail order.

Shurtleff and Aoyagi. 1975. Dec. *The Book of Tofu* (Autumn Press). p. 100, 316. Ganesha makes hand-crafted wooden tofu boxes for family or community use. Contact him at Westbrae Natural Foods, 1336 Gilman St., Berkeley, California 94706.

Letter from Ganesha. 1976. Aug. “I have around 15 names of people interested in tofu boxes now. I will save them and all the new ones that come my way. A week or so before you make up the mailing list for your pamphlet, let me know and I will Xerox my ledger pages of addresses and send them to you. Also, lots of people who want boxes also want utensils. Do you know of any sources? Many thanks from Heather, who does most of the repetitive operations on the boxes.”

883. Pulver, Fred. 1975. Summer camp–1975. *Macrobiotic (The) (Oroville, California)* No. 108. p. 34-36. Aug.

• **Summary:** “On the first weekend of camp over one-hundred people showed up, but soon departed, leaving

about 40 to live thru 2 days of cold, wet rain and 6 inches of snow for a day and a night. A few, for whom the snow was too uncomfortable, left camp; the others who stayed enjoyed all the more the sun and warmth when it returned. The nights were cold, the days warm, and grew warmer as the camp continued. Warm sun, clear blue skies, clean air, made swimming in the icy cold water of the stream near camp a renewal of life for those who could stand it. A volley ball court was soon constructed with a twine net of yin/yang triangles, and the volley ball games after supper were filled with joking, laughter, and teamwork. Breakfast and dinner preparation was well attended by the ladies and helped many people learn how to cut vegetables and cook full macrobiotic meals, starting with soup and cereals, and ending with salads and desserts. Friends arrived from Mexico City, and were the life of the camp bringing their energy and Spanish to enrich everyone with new words and expressions.

“Herman’s lectures in the mornings reviewed the basic principles of macrobiotics and health, and Mr. Muramoto carried yin and yang into classification of plants and elements and their effects on man. Jerry Canty spoke in the afternoons, George Gearhart gave massage classes, and Bob Newmiller continued them with emphasis on spinal diagnosis. Ursula Iven from Los Angeles taught Yoga, demonstrating many techniques of Japanese master Oki. Mr. Mitsuo Goto gave consultations and acupuncture treatments to many people throughout each day and demonstrated basic moxibustion and acupuncture. Toni Tarbet of Los Angeles spoke about the Hopi Prophecies and explained the Hopi way of life.

“Afternoons grew hotter, and after lunch cars filled with swimmers were off to the lake a few miles away, bringing picnic lunch and watermelons for all to enjoy. At that altitude, the sun was stronger and people tanned easily. Late afternoons before supper were times to talk with friends, browse at the book store table, help with supper, which was announced with the happy sound of an old metal lampshade struck with the broken lamp stem.

Meals included mochi pounded with freshly picked wort and wild greens (gathered on a field trip on which wild licorice and other herbs were found), corn bread, lentil soup, salads, fried whole wheat noodles with cabbage and green peppers, dried daikon radish, brown rice (of course), pickled watermelon rind, daikon greens and roots, and occasional desserts of cherries, melon, apple kanten and fresh mugwort tea. The slightly yin meals seemed to balance the weather—there was no desire by anyone to go into town for beer or to binge. Jiro’s store which sold apple juice, cherry juice, yinnies and yinnie sandwiches did a pretty good business though, and helped many who had desires for things sweet, cool, and refreshing.

“At night, after supper, kitchen clean up, and volley ball, the fireside gatherings began with getting to know where each person was from and what he and she were doing,

and continued with dancing to the music of Jeff Daniels, Michael McCarthy, Susan Olsen, and Fred Pulver. Native Sufi, Mexican, Vietnamese, Israeli, and Japanese, as well as American rock and roll songs and dances were woven throughout.

“Many people slept under the stars, some in tents, some among the rocks that formed natural hollows for sleeping. New friendships were made, old ones deepened, and the happiness was full and relaxed. Chanting every morning with Cornelia, and meditation with Mr. Muramoto made the togetherness full, peaceful, and strong.

“On the last day we joined hands after a final talk by Herman and sang ‘Auld Lang Syne’. Then all ate a last breakfast meal, made rice balls for travelling, cleaned up, and packed away all the tents and equipment in trucks and said last farewells until the return of next year’s camp. Like a dream it was, a memory of the most precious things—friendship in a forest setting, the happiness of sharing a common spirit, and a common orientation—life with mind and body healthy, free, and creatively expressive of the deepest love.” Address: George Ohsawa Macrobiotic Foundation, 1544 Oak St., Oroville, CA 95965.

884. Gladstone & Chain. 1975. Erewhon, Inc. Report on financial statements for the year ended June 30, 1975. Boston, Massachusetts. 13 p. 28 cm.

• **Summary:** A balance sheet shows that Erewhon’s total assets increased to \$1,275,744 in 1975 from \$1,126,167 in 1974. Total current liabilities are large, \$901,009 in 1975, up from \$723,640 in 1974. Sales increased from \$4,306,572 in 1974 to \$5,538,037 in 1974. Net income before taxes in 1975 was a loss of \$37,101, compared with a profit of \$262,691 in 1974.

Pages 3 and 7 state that Erewhon owes \$103,800 to the New England Merchants National Bank. This demand note is in default and the bank has declined granting of further credit to the company. The note balance is to be satisfied from the sale of California assets. On 21 Feb. 1974 Erewhon entered into a stock purchase agreement with a stockholder to purchase all of this individual’s 210 common shares within 3 years for \$54,000. Erewhon also owes \$27,000 to a former stockholder for the purchase of 1,000 shares of common stock. In Massachusetts, the company now is committed to leases at 29 and 33-39 Farnsworth Street, Boston, 342 Newbury St., Boston, and 1731-1737 Massachusetts Ave., Cambridge. In California there are leases at 8454 Steller Dr. and 8500 Steller Dr., Culver City, and 8001-8003 Beverly Blvd., Los Angeles. Plus 303 Howe Ave., Passaic, New Jersey.

On 1 Aug. 1975 Erewhon sold substantially all of its assets used in operations in California for \$350,000, payable as follows: \$100,000 in cash within 15 days of closing, \$100,000 due 90 days from Aug. 15, \$50,000 due in 3 installments in January, April, and July 1976, and \$100,000

due in quarterly installments of \$12,500 each from 31 Oct. 1976 to 31 July 1978. The book value of the assets sold was \$407,260, subject to liabilities of \$204,876.

In 1975 Erewhon had bad debts of \$22,706 and interest expense of \$28,665. Address: 11 Beacon St., Boston, Massachusetts.

885. Vitamin Village. 1975. Display ad: We carry Max Kozek brand certified organically grown fresh produce. *Los Angeles Times*. Oct. 6. p. C10.

• **Summary:** “The very finest there is. Check our reasonable, low, competitive prices—and great selection.”

Vitamin Village has stores in: (1) Placentia, 132 E. Yorba Linda Blvd. (Placentia Town Center). (2) Anaheim, 1010 N. Euclid (Corner of La Palma). (3) Orange, 732 N. Tustin Ave. (between Chapman and Katellal).

Note: This ad also appeared in the Oct. 13 (p. G8), Nov. 10 (p. 79), and Nov. 24 (p. E12) issues of this newspaper.

886. Erewhon Trading Co. 1975. Erewhon talking food. Miso and tamari (Ad). *East West Journal* 5(10):43. Oct. 15.

• **Summary:** A lengthy description of how traditional miso and tamari (shoyu) are made in Japan and some philosophical reflections on the processes and ancient wisdom that created them. Address: Boston, Massachusetts.

887. Erewhon Trading Co., Inc. 1975. Erewhon harvest ‘75. Boston, Massachusetts. 48 p. Oct. Catalog and price list.

• **Summary:** On the front cover, a brown and white photo shows a rustic farmer, holding a pitchfork, standing by his horse and hay wagon with wife and child. On the back cover, Erewhon’s president, Tyler Smith, writes a poetic passage about the beauty of wheat. Products include: Grains: Lone Pine in Arkansas grows organic short grain and long grain brown rice. Wehah Farms in California grows organic short grain brown rice and non-organic sweet brown rice [glutinous rice]. Baker in Louisiana grows organic medium grain brown rice. Organic hard red winter wheat is grown in Nebraska and in Deaf Smith, Texas. Organic hard red spring wheat is grown by Ted Whitmer in Montana and Ricke in Minnesota. Organic hard amber durum wheat is grown by Whitmer in Montana. Organic soft white pastry wheat is grown by Wild Winds in New York. Other organically grown grains are pearled barley (Idaho), whole unhulled buckwheat for sprouting, hybrid yellow or white corn (Deaf Smith), open-pollinated yellow corn (Minnesota), blue corn, whole oats, and rye. Cereals include organic soy flakes from Deaf Smith (25 lb). Flours include organic soybean flour (25 lb, steelground, full-fat). Pasta (packaged or bulk) includes Japanese soba, Soy Rice Shells.

Snacks from “Erewhon L.A.” include Chico-San Yinnies, and Date-Nut Delight. Nik’s Snaks (p. 8): This full page lists about 30 products. Of these, eleven are “tamari-roasted” whole-food snacks. The 30 products are sold in 5

sizes: 2.5 oz, 3.5 oz, or 6 oz. pick-up packages, or 25 lb bulk. The soybeans (dry roasted with tamari, no salt) are sold only in 25 lb packs. Other tamari-roasted seeds include: Spanish peanuts, sunflower seeds, roasted almonds (all 2.5 oz or 25 lb), cashews or pumpkin seeds (25 lb). Non tamari-roasted products include: Raisin walnut mix. Roasted mixed nuts. Raw mixed nuts. Raisin nut mix. Peanut raisin mix. Trail mix (Honey almond granola, roasted peanuts, raw sunflower seeds, date pieces, raisins, and sea salt). Honey almond granola. Chia seeds. Bee pollen. Alfalfa seeds. Date sugar. etc. Erewhon Aztec organic corn chips. Baked goods from Cable Springs Bakery in Cambridge, Massachusetts. Fruit juices from Erewhon, Heinke's, Knudsen, Lehr's (natural grape juice from Germany), and Biotta (Swiss Vegetable juices).

Dairy Products: Cheeses from Alta Dena (also kefir and yogurt) in California, Superior Cheese Co. in Massachusetts, Redwood Natural Cheese Co. in California. Also Favorite Foods yogurt.

Dried fruit, including organically grown Monukka and Thompson raisins, prunes, dates, apricots, apples, Bing cherries, black mission figs, and Calimyrna figs. Peanut-, apple-, sunflower-, and sesame butters. Sesame tahini. Pure & Simple "fruit butters sweetened with honey only; terrific old-fashioned jams (apple, apricot, peach, plum, raspberry, strawberry, grape, cherry). Erewhon apple sauce. "Pumpkin Sour" apple sauce and apple butter made in Plainfield, Vermont. Tree of Life fresh fruit preserves from Florida (8 varieties).

Seeds & nuts, incl. Erewhon organic soybeans in 1-lb packs, and Erewhon organic stoneground soybean flour in 24-oz packs. Arrowhead Mills packaged products, incl. Bulgur-soy grits (24 oz), Soy flakes (16 oz, organic), Roasted soy flour (24 oz, organic). Beans, incl. Aduki (25 lb, from Japan or Mainland China), yellow soybeans (50 lb, organic, New York), black soybeans (25 lb, non-organic from Japan, or organic from New York), green soybeans [dry] (25 lb, organic). Erewhon granola (17 products, including various sizes), Arrowhead Mills granola, Back to Nature granola (unsalted).

Oils, incl. Arrowhead Mills soybean oil (pints, quarts, or 5-gallon jug). Honey. Baking, incl. Premose barley malt, and Yinnies grain syrup from Chico-San. Tea, incl. 2 pages from Celestial Seasonings, and Erewhon Mu tea (9 or 16 herbs), Lotus root tea, Kukicha-branch twig tea. Springwater.

Tamari & Miso: 4 pages of descriptions and prices for Hacho miso (all misos are sold in 1 lb or 44 lb keg), Mugi miso, Kome miso, Tamari soy sauce [actually shoyu] (8 oz, pints, quarts, ½ gallons, gallons, or 4.7 gallon tin), Barley koji (1 lb). Specialties, incl. Unrefined sun-dried sea salt with natural trace minerals from the north coast of Brittany in France, Tekka, kuzu, umeboshi, sesame salt, Herbamare salt, nigari, brown rice vinegar, non-alcoholic beer (Birell, Kingsbury), Bambu instant coffee substitute.

Fearn Soya Foods: Soya granules, Soy-O wheat cereal, Soy-O corn bread & muffin mix, Soy-O bran muffin mix, Soy-O pancake mix–buckwheat, Soy-O pancake mix–wholewheat, Sesame burger mix, Natural soya powder.

Sea vegies: Agar-agar, dulse, hiziki, kombu, wakame, nori seaweeds (a description of each is given).

Erewhon certified organic produce, incl. Daikon grown in California. Soaps, incl. Cattier clay products and Dr. Bronner's Peppermint castile soap, Orjene, Nature's Gate, Tom's Natural Soap.

Cookware, mostly imported from Japan, incl. Soy [sauce] dispenser, 4½ inch. Growing [sprouts and sprouters]. Cast iron. Flyers, incl. Talking Food series, Natural recipes (3 by 5 inch tear-off pads. Soy-related recipes include: Soy au gratin, Soy casserole, Miso soup, Soyburgers, and Soy loaf).

A map shows Erewhon's delivery region (Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey) and schedule. The company also has an office near New York City at 303 Howe Ave., Passaic, New Jersey 07055. Phone 212-594-6455.

Note 1. This is the earliest document seen that uses the word "vegies" (spelled as such, one of two documents) to refer to vegetables, or "Sea vegies" to refer to sea vegetables (edible seaweeds).

Note 2. This is the earliest document seen (May 2006) that uses the term "trail mix" to refer to a non-perishable mixture of dried fruits, seeds, nuts, roasted soybeans, granola, etc. to be eaten as a snack, as when hiking or walking. Nik Amartseff coined the term "trail mix" and launched the first commercial trail mix product through Erewhon Trading Co. in 1974. At the time, Nik was studying and practicing macrobiotics in Boston, Massachusetts. By the late 1970s several brands of trail mix were on the market in both natural food stores and supermarkets; by the 1980s there were many, as it became a mainstream American snack.

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

888. Erewhon [Los Angeles, California]. 1975. Erewhon. November/December 1975. Culver City, California. 22 p. Catalog and price list.

• **Summary:** On the front cover is an illustration (line drawing) of Benjamin Franklin, wearing a fur hat and glasses. Below is a quote from his *Poor Richard's Almanac* (1739): "Keep thy shop and thy shop will keep thee." Other quotes are scattered throughout the catalog.

Products include: Pasta (packaged and bulk). incl. Soya-Rice Shells (organic) "Eat to live, Live not to eat." Bulk staples–Grains (including Sweet Rice from California),

flours (freshly milled whole grain), cereals, beans (incl. organic soybeans and soybean flakes from Texas), seeds. “Knowledge like a rich Soil, feeds if not a world of Corn, a world of weeds.” Erewhon packaged staples—Grains, flours, cereals, beans (incl. organic soybeans), seeds. “A long life may not be good Enough, but a good Life is long Enough.”

Granola. More packages—Arrowhead grains, cereals, and beans, Fearn Soya Foods (from Fearn Soya Products, incl. Soy-O-Pancake Mix {Wholewheat or Buckwheat}, Soya Powder {Natural or Low Fat}), Earthwonder meals-in-a-bag. Arrowhead Mills The Simpler Life food storage program (nitrogen packed in #10 metal cans; incl. soybeans and soy flakes). Juice. “They that cannot Obey, cannot Command.” Spreads (nut butters {peanut butter, sunflower butter, sesame butter, sesame tahini} and fruit butters {Pure and Simple, sweetened only with honey}). Rocky Hollow Herb Farm’s line of organic and natural herbs, spices, and essential oils. “Time is an Herb that cures all Diseases.” Goodies: Nik’s Snaks, chewies (incl. pemmican), chips (incl. Mother Earth Tamari Chips, Corn Munchies—Pure & Simple). “To lengthen thy Life, lessen thy Meals.” Rennetless cheese from Redwood Natural Foods. Dried fruit (bulk or packaged, incl. calymyrna figs, medjool dates, monukka raisins). Tamari & miso (Tamari soy sauce—4 sizes aged 2 years, Hacho miso—3 sizes aged 2 years, Mugi miso—3 sizes aged 18 months, Kome miso—3 sizes age not given). Vegetable oils (incl. Arrowhead Soy Oil in 3 sizes). Garden fresh produce. Sea vegetables. Herb teas (incl. Celestial Seasonings). “Make Haste slowly.” Body care (incl. Tom’s soap and shampoos, Dr. Bronner’s soaps, Cattier products), “When the well’s dry, We know the worth of Water.” Potpourri: Condiments (incl. “kuzu arrowroot, umeboshi (plums pickled in brine),” cookware (Quaker City grain mill, Corona stone mill, Mac steel utility knife, Soy sauce dispenser), publications). “Hunger is the best Pickle.” Important stuff (Ordering information). “Drive thy Business, let it not Drive Thee.”

On the last page, John Fountain extends “grateful appreciation to all those whose positive accomplishments have created Erewhon: Lima and George Ohsawa, Aveline and Michio Kushi, Cornelia and Herman Aihara, Michel Abehsera, Yvette & Jacques DeLangre, William Dufty, Frank Ford, Paul Hawken, Carolyn Heidenry, Roger Hillyard, Bob Kennedy, Bruce McDonald, Tommy Nakayama, Shane and Lou Olds [sic, Shayne Oles], Fred Rohe, Dr. Pietro Rotundi, Evan Root, Tyler Smith, Bill Tara, our customers, staff, suppliers, and growers, Susan and Lou Remy and all.” Address: 8454 Steller Dr., Culver City, California 90230. Phone: (213) 836-7569.

889. Shurtleff, William. 1975. Chronology of early tofu and miso classes in California and Hawaii: 25 Oct. 1975 to 14 Feb. 1976. Lafayette, California. 1 p. Unpublished manuscript.

• **Summary:** Each class started with a talk about soybeans,

soyfoods protein, world hunger, and meatless/vegetarian diets. Then a series of about 25 color slides demonstrated how to make tofu at home. Other slides showed favorite tofu recipes and how tofu was made in a traditional Japanese shop.

1975 Oct. 25—We do our first real “Tofu Class” at Westbrae Natural Foods in Berkeley, California, arranged by Bob Gerner and Liz Horowitz. Thrilling to have an audience of about 14 interested people. On Oct. 30 at Westbrae 16 people attend, and on Nov. 8, 18 people.

November tofu classes: Nov. 14th—Rainbow Grocery (arranged by Bill Croluis), 23rd—Esalen Institute in Big Sur (John Russel).

December tofu classes. 2nd—We do a big tofu class in living room of 790 Los Palos Dr. with lots of publicity from a big newspaper article on our work; 47 attend. 4th—Acalanes (Sandy Hills, 89 attend), 6th Westbrae (Bob Gerner), 7th—San Francisco Vegetarian Society (Dixie Mahy, 67 attend), 8th—Seventh-day Adventist Pacific Union College (Mary Eighme, 48 attend), 11th—Dawn Horse Bookstore in S.F. (Moe).

1975 Dec. 12—*Book of Tofu* in hand. Since we started it on 22 Oct. 1972, it had taken just about three years to write.

Dec. 13—Sept. 1976—I hand deliver *The Book of Tofu* to many bookstores and food shops that wish to sell it, typically selling 4–50 per stop at 40% discount: Communion Vegetarian Restaurant #2, Nutrition in a Nutshell, Open Sesame, Lafayette Natural Foods, San Francisco Vegetarian Society, Kinokuniya Bookstore, Rising Sun (440 Judah St. in San Francisco), Diablo Oriental Foods, San Jose Tofu Co., Soko Hardware, Effie Chow & East West Academy, Ted Nordquist (1536 Versailles Ave., Alameda, CA 94501), The Wok Shop (804 Grant Ave., SF), Westbrae Natural Foods, etc. By 24 July 1976, I had distributed 266 copies.

December tofu classes after we have our book: 13th & 14th—Jacques Delangre (Paradise, CA), 16th—East West Academy (Effie Chow), 17th—Westbrae, 18th—San Francisco Zen Center (Ed Brown), 19th—Fairfax (M. Squire).

Tofu classes/lectures in January 1976 in Northern California: 5th—Westbrae, 7th—St. Andrew’s Church in Walnut Creek (Dorothy Headley), 8th—Kepler’s Bookstore (Jeffrey Shurtleff & Hank Maiden) 12th—Odiyan, where I see David Mastrandrea after many years, 14th—Berkeley Co-op Natural Food Center at 1414 University Ave. (Susan Kishi, with Ted Nordquist and Janet Fehring [Ahava] helping to make tofu dip; 105 attended), 15th—San Francisco Medical School and East West Academy of Healing Arts (Effie Chow), 17th—Persimmon (Peter Godfrey), 20th—United Energy Co-op (Sri Ramon).

Jan. 16-18—Visit Bubba Free John at his community. Do and film a program on tofu.

Jan. 20-30?—Tofu trip to Los Angeles with mom and Akiko. Many tofu and miso classes. 22nd—East West Academy of Healing Arts (Effie Chow in a church), 24th—

weird Los Angeles Vegetarian Society (Blanche Leonard, 150 people attend), 25th–East West Center (P. Retzsky), 27th–Dr. Harry Miller and Loma Linda Foods (70 attend), 29th–Ojai (Luke Gatto). We visit Frazier Farms, a huge natural foods supermarket in Escondido, then go to San Diego for an interview with *Well Being* magazine (David & Barbara Salat).

Feb. Tofu classes: 4th–Walnut Creek Co-op, 6th–Albany church (Nancy Dohur).

Feb. 10 to Oahu, Hawaii. Feb. 12th–tofu class for Seventh-day Adventist group (Naomi Yamashiro, 80 attend), 13th–Honolulu, Hawaii, Kyukendall Hall at Univ. of Hawaii at Manoa (David Lee “Kalm” Sukowske, 140 attend). Then Feb. 14 arrive in Japan. 30-minute KQED TV special on tofu we made shown in California after we left. Expected viewership is estimated at 45,000.

In summary, from October 1975 until February 1976 we did 35 tofu and miso programs in California and Hawaii plus numerous media appearances and interviews. 1,300 people attended these classes. We requested that an admission of no more than \$1 per person be charged. Our honoraria, shared with the sponsors, totaled \$600. We also sold 366 copies of our books.

Note 1. This is the earliest document seen (Oct. 2019) concerning a natural foods retail chain–Frazier Farms natural foods supermarket.

Note 2. This is the earliest document seen (Aug. 2019) concerning the work of Ted Nordquist with soyfoods. Address: 790 Los Palos Dr., Lafayette, CA 94549.

890. Erewhon Trading Co. 1975. News from nowhere (Japanese fermented foods–Miso, tamari, and koji). *East West Journal*. Nov. 15. p. 29.

• **Summary:** The subtitle states: “Erewhon news from Nowhere is a regular *East West Journal* column providing information about food. We hope that this will be a valuable educational service, enabling readers to select what they eat knowledgeably. If you require more information about food, we invite you to visit us at our retail stores.” Note that though the column is written in the first person, no author is given.

“In my opinion the most fundamental change in the creation of traditional fermented foods occurred with the shift of the Japanese rural-based economy after World War II. The movement of the population to the cities and the emphasis on production and manufacturing by large numbers of city dwellers who consumed increasingly larger amounts of food created a demand for soybeans beyond the capacity of the rural of the rural population’s productivity. The Japanese turned to America for their soybeans and began to use varieties that did not lead to the fine product to which the native beans had formerly contributed. The result was an economic necessity for research, carried out by American and Japanese technicians, and the results created several

basic changes in the manufacturing process.

“First, the koji mold was investigated, and out of the hundreds of strains of mold bacteria [sic] present in the traditional mold culture, certain strains were isolated and propagated for their effectiveness to create the fermentation under laboratory conditions. Thus, new strains of ‘hybrid’ cultures were developed that would break down the American beans of inconsistent quality. The technicians failed to see the process as a whole, not realizing that the long-term fermentation and great attention in handling the raw materials at different stages was an art that depended on a great variety of naturally occurring bacteria to produce an environment where natural competition worked to strengthen the culture.”

“Except for the small number of true traditional makers in Japan, I would say that Americans in their own backyards will, within the next ten years, be producing finer miso and tamari than the majority of producers currently working in Japan.” Address: Massachusetts.

891. **Product Name:** Arrowhead Mills brand Unrefined Soybean Oil.

Manufacturer’s Name: Arrowhead Mills, Inc.

Manufacturer’s Address: P.O. Box 866, Hereford, TX 79045.

Date of Introduction: 1975 November.

Ingredients: Soybeans.

Wt/Vol., Packaging, Price: Pint or quart bottle.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 27. Arrowhead Mills, Vegetable oil, pressed & unrefined. “Soybean Oil,” pint or quart.

Arrowhead Mills. 1978. Sept.

Ad in Mother Earth News. 1977. No. 43. Jan/Feb. p. 90. “Arrowhead Mills Deaf Smith Country Reader... our unrefined oils are not only polyunsaturated, but—as well—retain the natural vitamin A and E, lecithin and minerals...”

“Arrowhead Mills unrefined oils are prepared by mechanical extraction. They are not as light and clear as the so-called ‘pure, cold pressed’ oils, because our unrefined oils have the distinct aroma and characteristic flavor of the corn, sesame, safflower or soy from which they are made and include the inherent nutrients. Our oils are not refined in any way, not bleached by caustics or steam distilled to deodorize them. No chemical preservatives of any kind have been added. At cool temperatures, however, our unrefined oils will last 4 to 6 months.”

Arrowhead Mills. 1978. Sept. “Price list.” Soy oil (pints, quarts, and gallons).

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 75. An illustration (line drawing) shows part of the label.

892. **Product Name:** Bulghur-Soy [Grits] Fortified.

Manufacturer's Name: Arrowhead Mills, Inc.

Manufacturer's Address: Box 866, Hereford, TX 79045.
Phone: (806) 364-0730.

Date of Introduction: 1975 November.

Ingredients: Incl. bulgur wheat and soy grits.

Wt/Vol., Packaging, Price: 24 oz, or 50 lb.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 2, 26. Bulk. “Bulgur Soy Fortified.” 50 lb, or Bulgur-Soy Grits, 24 oz.

Arrowhead Mills. 1978. Sept. “Price list.” (50 lb bulk and 12 x 20 oz).

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 121. “Bulgur-Soy Grits.”

893. **Product Name:** Soybeans (for Sprouting or Cooking).

Manufacturer's Name: Arrowhead Mills, Inc.

Manufacturer's Address: Box 866, Hereford, TX 79045.
Phone: (806) 364-0730.

Date of Introduction: 1975 November.

Ingredients: Soybeans.

Wt/Vol., Packaging, Price: 1 lb packaged or 50 lb bulk.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 26. Arrowhead Mills, “Soybeans, Sprt & Ck” [for sprouting & cooking] 1 lb.

Arrowhead Mills. 1978. Sept. Arrowhead Mills. 1978. Sept. “Price list.” (50 lb bulk and 12 x 1 lb packaged).

894. Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. '75. Ann Arbor, Michigan. [vii] + 93 + 8 p. Index. Illust. 28 cm.

• **Summary:** This catalog, largely printed by a computer, contains many ads on unnumbered pages. Contents: Hi! Ordering and service information. Bulk: Whole grains, beans, seeds and nuts, dried fruit, nut butters, etc. Refrigerated and frozen (“Frozen meats {beef}–No DES, steroids, female hormones, antibiotics, or stimulants used in feeding; Chickens–No hormones & antibiotics. Ask for turkeys and hens during Thanksgiving.” “Frozen soy products: soy milk and tofu soybean curd”). Books. Packaged (by company and product category). Index by product. Index by manufacturer.

“We are happy to announce that Midwest and Mountain High are now one entity... We go into the fall and winter seasons with a fall and winter catalog, delivery schedule, and computer system.” For new developments, watch the monthly newsletter and sale sheets. “Your Friends at Midwest.”

Includes the following ads (the number is that of the facing page). Wheat Stalk Soya Burger (Cotati, California,

p. 17). Arrowhead Mills (p. 27). Dr. Bronner's Magic Soap (p. 32). Chico-San (p. 35). Erewhon (p. 41, incl. “Trail Mix, Niks”). Fearn Soya Foods (p. 42; shows a package of Fearn Soy/o Buckwheat Pancake Mix). Flavor Tree–Pernut soy beans (p. 42). Hain (p. 49, “Cold pressed safflower oil,” mayonnaise, and margarine). Health Main (p. 54; soy is not mentioned—only natural potato chips and yogurt dressing & dip). Infinity Herbal Products Ltd. (p. 56). Malt-O-Meal–Soy Town (dry roasted soy beans, p. 60). NF Factors (Lafayette, Calif., p. 67. A photo shows a can of Protesoy). Pure & Simple (p. 72, 795 West Hedding St., San Jose, California 95126; mainly fruits, fruit juices, fruit butters, vinegars). Sovex (p. 83-84. “The fastest selling natural cereal line on the market... Here's the one that started it all, the original Crunchy Granola”). Viobin (wheat germ oil, p. 85F, 89). Tiger's Milk Products (p. 86).

Companies whose products are listed with ads include: Back to Nature (granola, p. 28). Country Natural (granola, p. 36). El Molino (p. 38-39; incl. Cara Coa Crunch Bar, Carob Fruit & Nut Bar, Carob Mint Candy, Chia Seeds, Flaxseed–Whole, Pumpkin seeds, Soybeans–whole, Soya flour, Soya grits, Carob Coated Soybeans). Ener-G-Foods–Jolly Joan (incl. Instant Soy Milk Powder, Wheat & Soy P&W [Pancake & Waffle] Mix {regular and low salt}, p. 39). Flavor Tree (Pernola cereal, Pernut soy beans–salted, cinnamon, salt free, garlic, Pernut toasted soybeans–salted, salt free, garlic, onion). Wok sets in gift box, Quaker City grain grinder, Corona hand mill (p. 58). Lassen Foods (granola, p. 60, 60F). Mac Knives (p. 60). Orjene (p. 70-71). Parkelp–Ocean Labs (p. 71, incl. Sea Zun).

The Chico-San Inc. ½-page ad (facing p. 35) features four products; a photo of each is given and each is K-Parve: Rice Cake San-Wich (filled with sesame seeds and Yinnies Rice Syrup). Yinnies Rice Syrup (natural sweetener, made from rice and barley). Yinnies (traditional oriental confection, wrapped like individual candies). Rice Cakes in 4 varieties: Salted or Unsalted, Rice Cakes with Millet–Salted. Rice Cakes with Buckwheat–Salted. “Other Chico-San Products: Organically grown brown rice. Lima soy sauce, miso (soybean puree), rice malt vinegar, sesame butter, sesame oil, nigari, barley koji, tekka, sesame salt, sea salt, salt plums, kuzu, organic rice cream, organic rice flour, black soybeans, azuki beans, sea vegetables, mu tea, lotus root tea, twig tea, toothpowder, seaweed shampoo.” Address: Ann Arbor, Michigan 48107. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

895. **Product Name:** Azuki Beans.

Manufacturer's Name: Midwest Natural Foods Distributors, Inc.

Manufacturer's Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Ingredients: Azuki beans.

Wt/Vol., Packaging, Price: 25 lb bulk.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 3. Bulk. “Azuki beans.” 25 lb.

896. **Product Name:** Soybeans.

Manufacturer’s Name: Midwest Natural Foods Distributors, Inc.

Manufacturer’s Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Ingredients: Soybeans.

Wt/Vol., Packaging, Price: 50 lb.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 3. Bulk. “Soybeans.” 50 lb.

897. **Product Name:** Wholewheat Soy Elbows, Wholewheat Soy Spaghetti, Soya Rice Shells.

Manufacturer’s Name: Midwest Natural Foods Distributors, Inc.

Manufacturer’s Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Wt/Vol., Packaging, Price: 10 lb.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 6. Bulk. “Most bulk pasta by Erewhon.” 10 lb.

898. **Product Name:** Soy Milk [Plain, Carob], Tofu Soybean Curd.

Manufacturer’s Name: Midwest Natural Foods Distributors, Inc.

Manufacturer’s Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Wt/Vol., Packaging, Price: Soymilk: 16 or 32 oz. Tofu: 10 oz.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 15. Frozen. “Soy products–soy milk has all amino acids, contains no animal fat, no lactose.”

Note: There are several reasons for thinking that these two products were probably made or purchased from Health Valley or Health Maid in California: (1) In the first index, under “Soy Products,” those from Health Maid are shown as appearing on pages 14-15. Although the name “Health Maid” does not appear on p. 15, there is good reason to believe that Health Maid was selling tofu by Nov. 1975; Shurtleff and

Aoyagi visited their warehouse in Los Angeles in Jan. 1976 and saw their tofu. (2) The main entry for “Health Maid Natural Foods” states: “See also Refrigerated-Frozen.” (3) Although located in Ann Arbor, Michigan, the same city as Midwest Natural Foods, The Soy Plant did not start making tofu until Jan. 1977, or soymilk until July 1977. (4) It would only make sense to freeze tofu and soymilk if they had to be shipped from a distant location, such as California. Freezing totally transforms the texture of tofu, and degrades the quality of soymilk. (5) In Midwest’s Catalog 13, spring 1979, the same soymilk (frozen) and tofu (now refrigerated) products are shown as coming from “Hvly” (Health Valley).

899. **Product Name:** R.G. Lecithin Granules.

Manufacturer’s Name: Midwest Natural Foods Distributors, Inc.

Manufacturer’s Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Ingredients: Lecithin.

Wt/Vol., Packaging, Price: 25 lb bulk.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 60. “R.G. Lecithin Granules” (6 or 14 oz).

Note: This is the earliest document seen (May 2006) that mentions “R.G. Lecithin” or “R.G. Lecithin Granules.” Yet this is almost certainly the same product as “RG Lecithin,” launched by The Glidden Co. in Jan. 1955. RG stands for “refined, granulated.” Midwest Natural probably bought this R.G. Lecithin from either Central Soya Co. (which took over operation of the Glidden Company’s Chemurgy Division on 1 Sept. 1958) or from Fearn Natural Foods, which began to purchase the product from Glidden in the mid-1950s.

900. **Product Name:** Gold Soya Mayo.

Manufacturer’s Name: Midwest Natural Foods Distributors, Inc.

Manufacturer’s Address: Ann Arbor, Michigan. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

Date of Introduction: 1975 November.

Ingredients: -

Wt/Vol., Packaging, Price: 25 lb bulk.

How Stored: Shelf stable.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See p. 69. Mayonnaise & dressings. “Gold Soya Mayo” (16 or 24 oz).

901. **Product Name:** Soya Burger [Plain, Curry, Taco, Bar-B-Que].

Manufacturer’s Name: Wheat Stalk.

Manufacturer’s Address: Cotati, California. Phone: 707-

795-0091.

Date of Introduction: 1975 November.

Ingredients: Blend of finely ground soya beans, carrots, wheat germ, eggs, oatmeal, garlic, onion, soya oil, salt, 10 spices and herbs.

Wt/Vol., Packaging, Price: 12.0 oz.

How Stored: Frozen.

Nutrition: 147 calories. 9.9 gm protein.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1975. Catalog #7. Nov. Ann Arbor, Michigan. 108 p. See ad facing p. 17.

902. Eden Foods. 1975. Wholesale pricelist. Winter 75-76. 4601 Platt Rd., Ann Arbor, MI 48104. 26 p. Dec. 15.

• **Summary:** On the cover is a man entering the gate of his snow-covered cabin in the moonlight. Tamari Soy Sauce is now sold under 2 labels (Erewhon, and Japan-Marushima). The three types of miso (all under the Erewhon brand) are still spelled Mugi, Hacho, and Kome. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

903. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind. Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 15. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]

• **Summary:** This pioneering work started the “tofu revolution” in America. Contents: Preface. Acknowledgments. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food: Introduction, rich in high quality protein (NPU, biological value, protein score, amino acid content), high protein complementarity (tofu contains an abundance of lysine, an essential amino acid that is deficient in many cereal grains; increase usable protein by combining tofu with wheat, rice, corn, etc.), easy to digest, an ideal diet food, low in saturated fats and free of cholesterol, rich in vitamins and minerals, a health-giving natural food, backbone of the meatless / vegetarian diet, free of chemical toxins, low in cost, easily made at home, quick & easy to use, versatile.

3. Getting started: Introduction, buying and storing tofu, basic ingredients (whole-wheat flour, miso {rice-, barley-, and soybean miso, special Japanese miso, Chinese chiang}, oil, brown rice, salt, shoyu {natural shoyu, shoyu, Chinese soy sauce, synthetic or chemical soy sauce}, sugar, vinegar, monosodium glutamate {MSG}), Japanese kitchen tools (each illustrated), preparatory techniques (salt rubbing, rinsing and pressing leeks and onions, soaking burdock root, reconstituting dried sea vegetables {dried hijiki, wakame, agar}, wheat gluten and kampyo [kanpyo], parboiling, cutting tofu and vegetables, using sesame seeds, toasting nori, preparing a steamer), basic recipes (soup stocks and broths {dashi}, basic shoyu dipping sauces {tsuke-jiru}, miso toppings {sweet simmered miso / *nerimiso*, miso sauté /

abura miso, special miso toppings and dipping sauces, finger lickin’ miso, and regular miso}, miso salad dressings, nut and seed butter toppings (incl. sesame butter or tahini, peanut butter), spreads and dressings, basic sauces, rice, noodles and other basic preparations).

Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History of soybeans and “soybean foods,” cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*, incl. a recipe for “Sweet emerald bean paste {*Jinda*}),” kinako (roasted full-fat soy flour, incl. Japanese health food treats such as *kinako amé*, *gokabo*, *kokusen*, *kankanbo*, and *abekawa mochi*), soybean sprouts (*daizu no moyashi*), natto (“sticky fermented whole soybeans,” with “gossamer threads”), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein {TVP}, soy oil products). 5. Gô (a thick white puree of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey. 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing {towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding, homemade tofu (basic, from powdered soymilk, fermentation method related to soymilk yogurt), tofu quick and easy {incl. Chilled tofu–*Hiya-yakko*}, tofu dressings, spreads, dips and hors d’oeuvre {incl. Creamy tofu dressings and dips, Tofu mayonnaise dressing, Tofu tartare sauce, Tofu cream cheese, Tofu sour cream, Tofu cottage cheese, Tofu guacamole}, tofu in salads {Western style and Japanese style salads incl. *Shirae*}, tofu with sandwiches and toast, tofu in soups {Western style and Japanese style soups, incl. miso soup}, tofu in sauces, tofu in breakfast egg dishes, tofu baked, tofu sautéed, stir-fried or topped with sauces {incl. *Mabo-dofu* [Ma Po doufu]}, deep-fried tofu, tofu with grains, tofu broiled {incl. Tofu *dengaku*}, tofu simmered in one-pot cookery and seasoned broths, tofu steamed, tofu desserts {incl. Tofu whipped cream or yogurt, Banana tofu milkshake, Tofu icing, Tofu ice cream, Tofu cheesecake, Tofu-peanut butter cookies}).

9. Deep-fried tofu: Thick agé or nama-agé (incl. *atsu-agé* meaning “thick deep-fried tofu,” “three-cornered agé” {*sankaku-agé*} in Kyoto, agé cubes {*kaku-agé*}, “five-color agé” {*gomoku-agé*}), ganmo or ganmodoki (incl. *hiryozu / hiroso*, “Flying Dragon’s Heads,” “treasure balls,” “Ganmo treasure balls”), agé or aburagé (incl. *kiji*, “agé pouches,” “crisp agé,” *kanso aburagé*, “agé puffs,” “fried soybean cakes,” “hollow agé cubes,” “Smoked tofu,” p. 189-91, 197).

Note 1. This is the earliest English-language document seen (April 2013) that contains the following terms related to deep-fried tofu (p. 180-90): “Thick agé,” *nama-agé*, *atsu-agé*, *Hiryozu*, “Dragon,” “Flying Dragon’s Heads,” “treasure balls,” “five-color agé,” *gomoku-agé*, “Ganmo treasure balls.” “fresh or raw deep-fried tofu,” “three-cornered agé,” *sankaku-agé*, “agé cubes,” *kaku-agé*, *kiji*. “agé pouches,” “crisp agé,” *kanso aburagé*, “agé puffs,” “fried soybean cakes,” or “hollow agé cubes.”

10. Soymilk. 11. Kinugoshi (“*Kinu* means ‘silk’; *kosu* means ‘to strain’; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk.” It is made from concentrated soymilk). 12. Grilled tofu (incl. *sukiyaki*). 13. Frozen and dried-frozen tofu. 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha’s chicken, Buddha’s ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}; see p. 258 for illustrations of many meat alternatives, incl. Buddha’s fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig’s head, and molded ham). One type of Korean soybean miso is called *kotsu jang* [sic, *kochu jang*]. When tofu is served with miso [Korean-style, *Tenjang*] as the dominant seasoning, and with rice, “it becomes the popular *Tenjang Chige Pekpem*” (p. 262). 16. Special tofu.

Note 2. This is the earliest (and only) English-language document seen (March 2009) that uses the word “*Tenjang*” to refer to Korean-style soybean *jang* (miso).

Part III–Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way.

Appendices: A. Tofu restaurants in Japan; many are vegetarian: In Tokyo: *Sasa-no-yuki* / *Sasanoyuki*, *Goemon*, *Hisago*, *Sanko-in*, *Shinoda-zushi*, *Dengaku* (south of Tokyo in Kamakura). In Kyoto: *Nakamura-ro*, *Okutan*, *Takocho*, *Izusen*, *Junsei*, *Nishiki*, *Hakuun-an*, *Rengetsu*, *Sagano*, *Sorin-an*. Tea ceremony cuisine (*Kaiseki ryori*), Zen temple cookery or Buddhist vegetarian cookery (*Shojin ryori*), Tea ceremony cookery from China (*Fucha ryori*), Wild gathered cookery (*Sansai ryori*). A directory of these and others, with addresses and phone numbers, is given (p. 312).

B. Tofu shops in the West (Directory of 43 shops in the USA, 3 in Europe, and 3-7 in Latin America {Mexico City, Rio de Janeiro and Sao Paulo, Brazil}). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

Pudding recipes include: Rice pudding with *gô* and apple (p. 76, incl. 2 cups soymilk). Tofu chawan-mushi (p. 147; Steamed egg-vegetable custard with tofu). Tofu

fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk chawan-mushi (p. 209). Chawan-mushi with yuba (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or *parfait*). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for “Mock tuna salad with deep fried tofu.”

Note 3. This is the earliest English-language document seen (Sept. 2013) that uses the term “Tofu ice cream” to refer to soy ice cream or that contains a recipe for “Tofu ice cream.”

Note 4. This is the earliest English-language document seen (April 2013) that uses the term “Tofu Cheesecake” and the first to give a recipe for a tofu cheesecake.

Note 5. This is the earliest English-language document seen (Oct. 2013) that uses the term “Tofu sour cream” (p. 109) or that contains a recipe for “Tofu sour cream.”

Note 6. This is the earliest English-language document seen (April 2013) that uses the term “tofu milkshake” or that gives a recipe for a shake made with tofu.

Note 7. This is the earliest English-language document seen (Jan. 2012) that uses the term “sticky fermented” to refer to *natto*.

Note 8. This is the 2nd earliest English-language document seen (April 2013) that uses the term “dried-frozen tofu.”

Note 9. This is the earliest English-language document seen (April 2013) that describes preparatory techniques for tofu (p. 96-98).

Note 10. This is the earliest English-language document seen (April 2013) that contains the term “smoked tofu.”

Note 11. This is also the earliest English-language document seen (April 2013) that uses the term “kinugoshi tofu” to refer to silken tofu.

Note 12. As of March 2007, the various English-language editions of this book have sold more than 616,000 copies.

Note 13. This is the earliest English-language document seen (Aug. 2011) that contains the term “Modern Western soybean foods” (see p. 69), a term that Shurtleff would soon (by 1983) replace by the more accurate “Modern soy protein products.”

Note 14. This is the earliest published English-language document seen (Jan. 2012) that contains the term “creamy tofu dressings” (or “dressing”).

Note 15. This is the earliest English-language document seen (Sept. 2012) that contains the term “Soymilk yogurt.”

Note 16. This is the earliest document seen (Oct. 2012) that contains an adequate or detailed description of how to make yuba at home.

Note 17. This is the earliest English-language document seen (June 2013) that contains the term “whole dry soybeans.”

Note 18. This is the earliest published English-language document seen (Oct. 2013) that contains the term “Tofu whipped cream” (regardless of capitalization). This term appears on pages 113, 148 (with recipe), 149, 153, and 179.

Note 18. For a biography and genealogy of William Shurtleff and Akiko Aoyagi see: *The Shurtleff and Lawton Families: Genealogy and History* (2005). Free on the web in PDF format. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

904. *SoyaScan Notes*. 1975. Chronology of soybeans, soyfoods and natural foods in the United States 1975 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Feb. Gale Randall starts America’s first commercial Caucasian-run tempeh company in Unadilla, Nebraska.

March. Alec Evans starts the first of the new breed of Caucasian-run tofu shops in Corvallis, Oregon, named Welcome Home Bakery and Tofu Shop.

March. “Safe protein-calorie ratios in diets. The relative importance of protein and energy intake as causal factors in malnutrition” by P.R. Payne of the Department of Human Nutrition, London School of Hygiene and Tropical Medicine, published in the *American Journal of Clinical Nutrition*. Payne argues convincingly that food energy (calories) is more of a problem than protein in causing malnutrition.

April 29. Saigon falls, ending the Vietnam war.

July. Freezing weather in Parana, Brazil, kills many coffee trees, leading to a big expansion of soybean acreage.

Aug. 3-8. The first World Soybean Research Conference is held in Champaign, Illinois, with 600 participants from nearly 50 countries. The 1073-page proceedings, edited by L.D. Hill, are published in 1976.

Aug. Japan Vegetable Protein Food Association founded to promote modern soy protein products, primarily soy protein isolates.

Oct. 25. William Shurtleff and Akiko Aoyagi conduct their first Tofu Class at Westbrae Natural Foods, Berkeley, California. Eight people attend. Also in 1975 Gordon Bennett becomes president of Westbrae.

Oct. “The Traditional Tofu Craftsman and His Shop,” the first of the new wave of soyfoods articles, published in *East West Journal*. Contains excerpts from the forthcoming *Book of Tofu* by Shurtleff & Aoyagi.

Nov. 9-12. First Latin American Conference on Soy Protein, organized by the American Soybean Assoc., held in Mexico City.

Dec. 12. *The Book of Tofu* by Shurtleff and Aoyagi published by Autumn Press. This book launches the tofu boom and soyfoods movement in America.

Dec. Ganesha, a craftsman in Berkeley, makes America’s first tofu boxes, handcrafted of wood.

Dec. 1975 to Jan. 1976 Shurtleff and Aoyagi do a Tofu and Miso California Tour, with 40 public programs in the Los Angeles Area and northern California.

* *The Farm Vegetarian Cookbook* published by The Farm’s Book Publishing Co. in Summertown, Tennessee. Expanding on the ideas in *Yay Soybeans!* (1974), it contains many soyfoods recipes, plus the first popular information on tempeh and the first tempeh recipes to be published in any European language.

* Textured soy protein concentrates developed and introduced by three companies, incl. Griffith Laboratories and Central Soya (Response).

* Vitasoy soymilk in Hong Kong is first sold in Tetra Pak cartons.

* Latin American soybean production tops 10 million metric tons, up 10-fold since 1967.

* National Soybean Research Center (CNP-Soja) established at Londrina, Parana, Brazil, within EMBRAPA (The Brazilian Research Organization for Agriculture), to stimulate research and coordinate the efforts of the state programs.

905. Shurtleff, William; Aoyagi, Akiko. 1975. The book of tofu: Food for mankind (Illustrations—line drawings). Hayama-shi, Kanagawa-ken, Japan: Autumn Press. 336 p. Illust. by Akiko Aoyagi. Index. Dec. 28 cm. Rev. ed. 1977 Autumn Press, Brookline, MA. [53 ref]

• **Summary:** Continued: Illustrations (line drawings, both numbered and unnumbered) show: A hearth in a traditional Japanese farmhouse with tofu dengaku roasting around a bed of coals in a sunken open-hearth fireplace. An old Japanese plum tree blossoming in winter. Three pieces of skewered tofu dengaku with a sansho leaf atop each in a special serving box. A sprig of sansho with berries. Stylized top of a soybean plant in a circle. Fig. (4) Tofu products available in the West (tofu, dofu, kinugoshi, thick agé triangles, cubes, and cake, agé and agé puffs, hollow agé cubes, soymilk, tofu pudding, doufu-ru {white and red}, ganmo {patties, small balls, and treasure balls}, grilled tofu, dried-frozen tofu, instant powdered tofu, okara, dried yuba, soymilk curds, pressed tofu, savory tofu). A wooden cutting board and Japanese broad-bladed vegetable knife (*nagiri-bôcho*) with vegetables and tofu on a woven bamboo tray.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term “treasure balls” to refer to Chinese-style tofu mixed with various finely-chopped vegetables, rolled into balls, and deep-fried tofu. (8) A wooden keg of red miso and a plastic bag of barley miso. (9) Shoyu in a metal can, wooden keg, glass bottle, and table-

top dispenser. Traditional Japanese kitchen tools: *Miso-koshi* (woven bamboo strainer used in making miso soup). cutting board, Japanese vegetable knife, wooden spatula, bamboo rice paddle (*shamoji*) and spoon, woven bamboo colander or tray (*zaru*), suribachi, Japanese grater (*oroshi-gané*), *sudaré* (bamboo mat), pressing sack for tofu or soymilk, serrated tofu-slicing knife, tawashi scrub-brush (made of natural palm fiber), wok with draining rack and wooden lid, stir-frying ladle and spatula, long cooking-chopsticks, mesh skimmer, deep-frying thermometer, Chinese bamboo steamer (*seiro*), charcoal brazier (*konro, shichirin*), broiling screen. Covered pot steamer. Small lidded pottery pot. More kitchen tools (p. 50-51). (10) A soybean measuring box (*isshô-bako*). (11) The soybean plant. Two views of a soybean seed with seed coat, hilum, and hypocotyl labeled. A bag full of soybeans. Roasted soybeans in a woven bamboo tray (*zaru*). Edamame in the pods. Three shapes of kinako treats. Soybean sprouts. Natto on a bamboo mat (*sudare*). Natto wrapped in rice straw as it ferments. A hand holding chopsticks that lift natto up from a bowl of natto—connected by gossamer threads. Tempeh (round and square pieces). Wrapping a small packet of inoculated soybeans to make tempeh. (15) Two Japanese women in traditional clothing using hand-turned grinding stones (quern) to grind soaked soybeans when making tofu. (16) Push-pull grinding stones. (17) Motor-driven grinding stones. (18) Water-powered millstones. (19) Wind-powered millstones. (20) Unohana. (21) A tofu maker sitting on a traditional lever press that presses soymilk from the okara in a pressing sack on a rack. A heavy iron skillet. (22) Folding okara omelet pouches. Okara doughnuts. (23) A bamboo colander. (24) A tofu maker weighting a colander with a brick so that whey will collect in it. (25) Ladling whey from curds; it foams! (27) A horse drinking whey from a wooden vat. Soymilk curds in a bamboo mat. (28) Ladling curds for Awayuki. (29) Fresh tofu in a plastic tub. (30) A tofu maker placing a weight on pressing lids as tofu is pressed in settling boxes (forming boxes). Transferring tofu-filled settling box to sink. Cutting a block of tofu into cakes under water. Eggplant halves in a yin-yang dance. Preparatory techniques used with tofu (slanting press, sliced tofu, squeezing, scrambling, reshaping, crumbling). (32) Utensils for making tofu at home. (33) Three designs for a homemade settling container. (34) Preparing homemade tofu (a-1). (35) Removing tofu from a farmhouse-style settling container (forming box). (36) Chilled tofu. Iceberg chilled tofu. A hot, moist, white towlette (*o-shibori*) is used to wipe the face and hands before (or occasionally after) a meal. Tofu salads in three Japanese pottery dishes. Japanese soups in three types of containers. (37) Chrysanthemum tofu. (38) Tofu poached egg. Tofu-stuffed green peppers. A wok. (39) Filling a wok with oil. (40) Testing oil temperature in a wok. (41) Deep-frying tofu tempura—and (42) Serving it in a shallow bamboo basket. (43) Making *Kaki-agé*. (44) *Dengaku Hoshi* (from *Tofu Hyaku Chin*). (45) Skewered

Tofu dengaku. Preparing Tofu dengaku in old Japan (from Hokusai's sketchbooks). (46) A variety of skewers. (47) Chinese firepots. (48) A Simmering Tofu wooden serving container heated by coals from within. (49) Miso oden. (50) Tofu wrapped in rice straw. (51) Nanzenji wrapped tofu. (52) Gisei-dofu. (53) Serving freshly deep-fried agé. (54) The deep-frying area of a traditional tofu shop. (55) Deep-frying tools. (56) Wooden bamboo tray with raised sides. Chinese cleaver. (57) Nori-wrapped sushi with agé (making and serving; six drawings). Eating noodles from old Japan (from Hokusai's sketchbook). (58) Preparing homemade noodles. (59) The Oden man on a winter's eve. A pottery bowl of Oden. Kombu rolls. (60) Making konnyaku twists. (61) Nishime in a multi-layered lacquerware box. (61) Pressing tofu for thick agé in a tofu shop. (62) Deep-frying tofu for thick agé. (63) A tofu maker with deep-fried thick agé triangles on screen trays.

Note 2. This is the earliest English-language document seen (May 2012) that contains the terms “deep-fried thick agé triangles” (p. 181) or “hollow agé cubes” (p. 23).

(64) Stuffing thick agé. (65) Thick agé stuffed with onions. (66) Pressing tofu for ganmo. (67) Adding seeds and vegetables. (68) Deep-frying ganmo. (69) A farmhouse open-hearth fireplace with nabe kettle. (70) Preparing homemade ganmo. Ganmo balls in a draining tray. Ganmo cheeseburger. (71) Cutting tofu to make agé slices (*kiji*). (72) Deep frying agé. (73) Opening agé into pouches. Agé treasure pouches.

Note 3. This is the earliest English-language document seen (April 2013) that contains the term “treasure pouches” or the term “Agé treasure pouches” They refer to a Kyoto-style delicacy made with deep-fried tofu pouches.

(74) Agé pouches sealed with foodpicks. Inari shrine with Shinto torii. (75) Kampyo-tied pouches [kanpyo]. (76) Making rolled agé hors d'oeuvre. (77) Tofu maker ladling gô (fresh soy puree) into a cauldron. (78) Stirring down the gô. Pressing soymilk from okara with a hand-turned screw press. (79) Serving fresh soymilk in a tofu shop. Six Japanese commercial soymilk products. Little girl at The Farm (Summertown, Tennessee) seated on a small chair drinking a cup of soymilk. Chinese breakfast soymilk soup with deep-fried crullers (*Siento-chiang* with *yu-chiao tsaio pi*). (80) Takigawa-dofu. (81) Tofu maker pouring the soymilk for kinugoshi tofu. (82) Adding solidifier. (83) Trimming kinugoshi from sides of box. (84) Modern lactone kinugoshi (with GDL). (85) Modern kinugoshi factory. (86) Sasa-no-Yuki's Gisei-dofu container. (87) Kinugoshi with ankake sauce. The entrance way to a traditional Japanese restaurant featuring tofu. Traditional metal skewer for making grilled tofu. (88) Traditional tofu maker grilling tofu over a charcoal brazier (*hibachi*). Grilling tofu in a traditional open hearth. (89) An early method of elaborate grilling. Pieces of tofu on different types of skewers. Farmhouse sukiyaki with grilled tofu. (90) Tying frozen tofu with rice straw. (91) Drying farmhouse frozen tofu. (92) Pressing frozen tofu

at home. (93) Deep-fried frozen tofu with cheese. (94) Making deep-fried frozen tofu sandwiches (*Hakata-agé*). (95) Frozen tofu wrapped in kombu. (96) Steaming table in a yuba shop. Ten different types / shapes of yuba. (97) Lifting yuba away from soymilk. (98) Yuba sashimi. (99) Yuba envelopes. (100) Deep-fried yuba dengaku. (101) Folding yuba into bundles. Trimming half-dried yuba from a skewer. (102-113) Tofu and yuba in Taiwan, China, and Korea (see separate record). Sesame tofu in pottery bowl. (114) Traditional farmhouse tofu, tied into a package with rice straw rope. (115) Shirakawa-go farmhouses with water-powered rice-dehusker in foreground. (116) Making seawater tofu at Suwanose. Mortar and pestle for pounding mochi. Making community tofu: Western metal hand mill, hand-turned stone mill apparatus, faces of upper and lower stones, colander and cloth, two shapes of cooking pots, Japanese farmhouse earthen cooking stove, cooking pot set on cut-off oil drum, ladle, two wooden paddles, pressing rack, pressing okara, lever press, pressing sack, wooden settling [forming] container with cloths. (117) Making nigari with salt in bamboo colander, a traditional “salt boat” for refining salt of nigari. (119) Country farmhouse tofu (5 illust.). (121) Morning shopping at a tofu shop. (122) Diagram of a tofu-shop floor plan. (123) Modern pressure with hydraulic press. (124) Modern centrifuge with 3 soymilk barrels. Thirty-one unnumbered illustrations showing every step in making and selling tofu in a traditional Japanese shop (p. 299-306). (125) Cutting tofu for Dengaku (from *Tofu Hyaku Chin*). (126) Ladies busy making dengaku (from *Tofu Hyaku Chin*). (127) Hearth at Nakamura-ro. (128) The garden at Okutan. Six types of Japanese sea vegetables: Hijiki, aonori, wakame, agar, nori, kombu. (129) Japanese vegetables (27 illustrations). Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

906. Product Name: Black Soybeans (Whole Dry).
Manufacturer's Name: Eden Foods, Inc. (Importer). Grown in China (PRC), then in Japan, then in Michigan.
Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104.

Date of Introduction: 1975.

New Product–Documentation: Eden Foods Products Catalog. 1987.

Talk with Ron Roller, CEO of American Soy Products in Saline, Michigan. 1991. Nov. 27. Eden Foods originally imported these soybeans (along with azuki beans; the Tientsin small red beans) from China. They dealt directly with the Chinese government. Then both types of beans were imported from Japan (from the Muso Co.). The beans were sold as uncooked dry beans. After that, Ron had the black soybeans grown in Michigan.

907. Product Name: [Manna Miso: Soybean Paste (Barley Miso, Rice Miso, Hacho Miso)].

Foreign Name: Manna Miso: Sojapasta (Gerste Miso, Rijste Miso, Hacho Miso).

Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982 (Repacker, Marketer, Distributor). Imported from Muso in Japan.

Manufacturer's Address: Rozenstraat, Amsterdam, Netherlands.

Date of Introduction: 1975.

How Stored: Shelf stable.

New Product–Documentation: Talk with Sjon Welters. 1989. Aug. 15. When he started to work for Manna in Sept. 1975 they were importing 3 varieties of miso from Japan via Muso. He does not know which company in Japan made this miso.

Label sent by Sjon Welters from the Netherlands. 2007. June. Manna Unpasteurized Organic Barley Miso.

908. Product Name: [Manna Tamari (Soy Sauce)].

Foreign Name: Manna Tamari (Sojasaus).

Manufacturer's Name: Stichting Natuurvoeding Amsterdam. Renamed Manna Natuurvoeding B.V. in 1982 (Repacker, Marketer, Distributor). Imported from Muso in Japan.

Manufacturer's Address: Rozenstraat, Amsterdam, Netherlands.

Date of Introduction: 1975.

Wt/Vol., Packaging, Price: 500 ml bottle retails for 7.70 guilders, 1 liter bottle for 14.45 guilders (11/83).

How Stored: Shelf stable.

New Product–Documentation: Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 25. Letters from Sjon Welters. 1989. July 24 and Aug. 10. This product, which was actually shoyu rather than tamari, has been imported from Muso in Japan since 1975. It is presently being made by Marushima Shoyu Co. In about 1980 Manna started importing Manna Organic Shoyu, and in 1989 they plan to start importing Manna Organic Tamari, which will be real tamari.

Note: This is the earliest record seen (Aug. 2015) concerning Manna in Amsterdam.

909. Product Name: Westbrae Natural Natto Miso.

Manufacturer's Name: Westbrae Natural Foods (Importer from Mitoku). Made in Japan.

Manufacturer's Address: 1224 10th St., Berkeley, CA 94710.

Date of Introduction: 1975.

Ingredients: Soybeans, barley malt, kombu seaweed, ginger, water, sea salt.

Wt/Vol., Packaging, Price: 22 lb retails for \$1.77 lb. Also in 30 lb.

How Stored: Shelf stable.

New Product–Documentation: Westbrae Natural

Wholesale Food Catalog. 1980. Spring. Includes natto miso, which comes in 1, 5, or 22 lb sizes. Also label of product. 6 by 7 cm. Red and blue on gold. Note: This is the earliest document seen (Dec. 2008) with the term “natto miso” as a product name or in the title of a publication.

Interview with Bob Gerner. 1987. Aug. 20. Westbrae was the first company in America to introduce this Finger Lickin’ Miso.

910. Dorsey, Chip. 1975. Laurelbrook Foods (Leaflet). Bel Air, Maryland. 3 panels each side. Each panel: 22 x 11 cm. Undated.

• **Summary:** Margy Coates (March 1992) says this leaflet, green ink on tan paper, was probably published in 1974 or 1975. Contents: Our story. Policy. Growing. Our new warehouse. Delivery. “It was thanks to the contagious enthusiasm of our children and their belief in natural foods that the idea of Laurelbrook was formed. We also received encouragement from Erewhon of Boston, Massachusetts, and Arrowhead Mills of Texas, and it was their valuable cooperation and guidance that gave us our start in 1971. It all began with a stock of 76 items, four people, and a used half-ton [Datsun] pickup truck... Our little 18-inch mill had to grind continuously to meet the demand.”

“In 1974, we enlarged our Bel Air warehouse, adding three lower level receiving docks and more than doubling our storage space... In the office, hand typing and extending invoices have given way to a mini-computer... There are now 24 people employed at Laurelbrook to keep pace with the growing demand for fine natural products.

The company’s new warehouse at 330 West Davie Street in Raleigh, North Carolina, started with four employees in Dec. 1973. Illustrations show an aerial view of the Laurelbrook facility in Bel Air, and the company’s delivery routes. Address: P.O. Box 47, Bel Air, Maryland 21014. Phone: 301-879-1717.

911. Elliot, Rose. 1975. *Beanfeast: Natural foods cookbook*. Liss, England: White Eagle Publishing Trust. *

• **Summary:** A vegetarian cookbook.

912. Goulart, Frances Sheridan. 1975. *Bum steers: How and why to make your own delicious high protein mock meats, fake fish & dairyless desserts, and avoid useless calories, cholesterol, sodium nitrate, salmonella, trichinosis & high prices*. Old Greenwich, Connecticut: Chatham Press. 205 p. Illust. Recipe index. 21 x 19 cm.

• **Summary:** This vegetarian cookbook, interspersed with many well-selected anti-meat quotations, describes how to make meatless meats and non-dairy products at home. Contents: Introduction. On the block: Major mock-meat-making supplies. Vegebutchering: Master mock-meat recipe file. Bogus beef. Pseudo pork. Unreal veal. Sham lamb. Con game. Phony poultry. Fake fish. Un-innards. The vege-

deli. Mocking up: General dishes. The mock crock. On the side. Dairyless desserts. Steerage (sources of unfamiliar ingredients).

Chapter 1 begins with an introduction to and nutritional composition of tofu, followed by the soybeans, gluten flour, other legumes, etc. Under “Flavors enhancers” are listed soy lecithin granules or flakes, miso, yeast extract (marmite), soy sauce and tamari, and Worcestershire sauce. Chapter 2 contains recipes for making gluten, tofu, grainola (with soy grits), a stock with miso for non-meat dishes (p. 32), mock milk I (made with soy flour), mock milk II (made with raw cashews or almonds), mock (soy) butter (made with soy flour), and mock cream (with soy flour and soy cream), and mock yogurt (with cashew nuts and soy yogurt culture).

Note: This is the earliest document seen (Sept. 2012) that mentions a non-soy, non-dairy yogurt—in this case one made with cashew nuts. A sampling of the many other soy-related recipes include: Moo-less ragout (with tofu, soy sauce, and soy butter, p. 43). Vegetarian rolladen (with cooked ground soybeans, p. 52). Good red meat (with gluten or tofu, p. 53). Greenbutcher’s meatballs (with tofu, p. 57). Mock Mac I (burger with soybeans, p. 64-65). Pineapple pig (with tofu, p. 72). Half-calf (with tofu, p. 79). Surrogate salami (with “bean pulp (residue from making Tofu)” [okara], p. 125). Bumsteads: Two burgers for meat-totalers (with tofu, p. 131). Meatless mincemeat (p. 142). Soybean mustard (with soy sprouts, p. 165). Cow tow: Cowless milk candy (with soy milk powder). Jersey bounce: A moo-juice-less junket (with soy milk, p. 184). Bum bombe: Egg-less, cream free (with soy cream, p. 184). Two 100% vegetarian ice creams: Eggless, milkless (with soy powder, p. 186).

Many recipes also contain wheat gluten: Charisma: Char-broiled bum steers (p. 48). Pig-less pork sausage (p. 70-71). Roast loin of veal (p. 80). Fake steaks: Two sham schnitzels (p. 80-81). Vegetarian cutlets (p. 82). Mocking birds I (p. 83). Fruit stew (p. 86). Sham lamb (p. 89). Sham lamb curry (p. 91). Bum bunny (p. 97). Sweet breads (p. 121).

Aduki beans are used in Moo-less rice pudding (p. 183). Sources of ingredients include: Walnut Acres, Penns Creek, Pennsylvania 17862 (herbs, spices, oils, whole grains, flours, seaweeds, etc.). Erewhon Trading Co., 342 Newbury St., Boston, Massachusetts 02115 (seaweeds and general goods, grains, beans, vegetables, seeds, etc.). Shiloh Farms, Route 59, Box 97, Sulphur Springs, Arkansas 72768. Arrowhead Mills, Box 866, Hereford, Texas 79045. Dynamic Nutritional Products, P.O. Box 528, North Hollywood, California 91603 (Milk-free yogurt culture. Trade names: Soyadophilus and Theradophilus).

Sample quotation: “... traditional American reliance on meat, particularly beef, is perhaps the single largest inefficiency in world dietary patterns...”—*New York Times* Oct. 25, 1974. Address: Wilton, Connecticut.

913. Hawken, Paul. 1975. *The magic of Findhorn*. New York, NY: Harper & Row. 216 p. 24 cm. *

914. Hillyard, Roger. 1975. Biographical sketch. Hereford, Texas. 1 p. Undated. Unpublished manuscript. Followed by an interview on 17 April 2006.

• **Summary:** Born on 28 Aug. 1942 in Seattle, Washington, Roger was raised in the San Francisco area. In early 1965 he met Susan, his wife to be, through mutual friends in the Haight-Ashbury district of SF—where he was living. She was a photographer, working as a sort of apprentice with Ruth Bernard, a professional photographer. In June 1965 he [Roger] graduated from San Francisco State College with a degree in language arts. He then became technical director for the San Francisco Mime Troupe, produced an experimental film series, and developed one of the first “light shows” in San Francisco.

In Jan. 1966 he started macrobiotics, then in July 1967 he and Susan left San Francisco and moved to New Mexico, where they lived on a 100-acre farm. They were married on Thanksgiving, 23 Nov. 1967 in Placitas, New Mexico. Their first child, Cyrena, a daughter, was born on 13 July 1968 in Santa Fe, New Mexico. In Oct. 1968 they moved to Boston, Massachusetts, where Roger pursued his interest in macrobiotics. He worked at the Erewhon retail store at 303B Newbury St. for 2 weeks, but wasn’t “together” enough, so he worked in a hospital as an operating room orderly for 3 months. In Feb. 1969 he began work at the Erewhon retail store at 342 Newbury St. In Aug. 1969 [actually probably early Oct. 1969] he took over as general manager of Erewhon’s over-all operations. He managed Erewhon-Boston and oversaw the financial aspects of Erewhon Boston and Los Angeles until March 1971. During this period the company grew substantially, wholesale activities were expanded, a warehouse at 33 Farnsworth St. was opened and developed, the staff grew from 6 to 45 members, the retail store’s daily sales grew from \$700/day to \$2,000/day, and imports from Japan expanded (including the largest American stock of hacho [Hatcho] miso).

Roger and Susan’s 2nd child, Christopher, was born on 24 Dec. 1970 in Somerville, a suburb of Boston, at a Seventh-day Adventist hospital that offered natural childbirth. They were living in Newton at the time. Roger and his family left Boston in mid-1971 and drove to Los Angeles, where he spent 4 months managing Erewhon–Los Angeles. He is currently the manager of Deaf Smith Organic Farms, a joint venture of Erewhon and Arrowhead Mills. He is married, with 2 children. Note: That joint venture, created by Paul Hawken and Frank Ford, never developed.

Note: Roger was a notable independent filmmaker, doing lights / light shows and projections for dances etc.—one of the pioneers in the field. He and his filmmaking partner Ben van Meter were well known on the scene in San Francisco. They are listed as performers at the Doors concert at the Avalon

Ballroom in San Francisco (3-4 March 1967) but that means they did projections. Address: Hereford, Texas.

915. Kulvinskas, Viktoras. 1975. *Survival into the 21-st century: Planetary healers manual*. Omangod Press, P.O. Box 255, Wethersfield, CT 06109. 323 p. Cover illust. by Peter Max. Introduction by Dick Gregory. Index. 28 cm. [259* ref]

• **Summary:** This book is about sprouts, sprouting, and a vegetarian live-foods diet. It is a catch-all of New-Age/dietetic ideas assembled with the uncritical journalistic eye of a supermarket tabloid. Concerning soybeans the author states (p. 71): “The soybean is one of the most versatile foods. It is among the few seeds that have an alkaline ash. It will sour just like milk. Sprouted, it makes a delicious cheese and yogurt. It keeps well and can be bought organically grown for as low as 16 dollars per 100 pounds. Sprout for three days. Refrigerate. The best use of soybean sprouts is in making yogurt.” On p. 257 is a recipe for Seed Yogurt (1 cup seeds plus 2 cups Rejuvelac). The preferred seeds are sunflower seeds. “A very bland, delicious yogurt can be made from sunflower alone, or from a mixture of cashew, almond, soy, pumpkin, and/or sesame... If using soybeans, soak them for at least 24 hours, changing water every 4 hours, finally draining. Blend to a creamy consistency using equal parts water and soybeans. The ferment has a delicious, sour taste. It is nutritionally superior to tofu and much less expensive.” A recipe for Rejuvelac is given on the same page.

Page 248: “Dulse should be soaked in water (this is true for all sea vegetables) to soften it and to wash away the sea salt. Kelp, wakame, nori, kombu, hiziki can be found in most macrobiotic stores. Sea vegetables are food and seasoning.”

On p. 249 is a recipe for Soy Loaf using 2 cups soy bean sprouts. Copyright 1975 but published until 1979. Photos (on p. 323 and the inside back cover) show Kulvinskas. He was born in Lithuania, and received his MSc degree in pure mathematics from the University of Connecticut, where he later taught math. For 6 years he was a computer consultant for Harvard Univ., MIT, Smithsonian Astrophysical Observatory, Appollo Project, etc. He retired in 1968 at age 29. He was co-founder with Dr. Ann Wigmore, of the Hippocrates Health Institute in Boston. He is presently director of the Survival Foundation, established in 1977. Address: Wethersfield, Connecticut.

916. Muso Co. Ltd. 1975. *Foods from Japan: Miso*. Osaka, Japan. 7 p. [Eng]

• **Summary:** Contents: Introduction. Hacho miso. Mugi miso. Kome miso. How to make miso soup. Address: Osaka, Japan.

917. Pearson, Janice; Pearson, Alan. 1975. *Light & life cookbook: A new age adventure in natural foods. Forty days of menus and recipes for a transition to balanced vegetarian*

dieting. Los Angeles, California: Astara. 306 p. Illust. Recipe index. 23 cm. Created with Earlyne Chaney. Series: Astara's Library of Mystical Classics. [20 ref]

• **Summary:** Soy-related recipes include: Tamari dressing (p. 119). Soybean barley soup (p. 221). Savory tofu casserole (p. 223). Miso broth (p. 286). Address: Santa Cruz, California.

918. Whelan, Elizabeth M.; Stare, Fredrick J. 1975. *Panic in the pantry: food facts, fads and fallacies*. New York, NY: Atheneum. xxi + 231 p. Illust. Index. 21 cm. [279 ref]

• **Summary:** This book is a response to concerns about the safety of food additives and of the use of hormones, and of the benefits of raising animals in confined enclosures. Throughout the book, those who share this concern are called "food faddists" who advocate the "back-to-nature mania."

The *Wall Street Journal* estimated that in 1970-1971 there were from 1,500 to 2,000 individual health food stores in operation in the United States. Others have estimated that by 1972, the total number reached well over 3,000.

Soyfoods or soybeans are mentioned several times: "... brown rice and good old-fashioned soybean sprouts" (p. 55).

"Aflatoxin-producing strains [of *Aspergillus flavus*] are widely dispersed in air and soil, and have the capacity to grow on a variety of substances, including peanuts, rice, corn, soybeans, whole oats, and wheat (particularly shredded wheat)" (p. 88).

"One of the widely used emulsifier additives is lecithin, a derivative of corn and soybeans. There is something very ironic about a natural food enthusiast's condemning of all 'chemical food additives' which, of course, would have to include the emulsifier lecithin, while he is at the same time stuffing himself with the expensive lecithin wafers he bought in Healthfoodland" (p. 120).

Dr. Fredrick J. Stare of Harvard University (Massachusetts) is beyond doubt the country's most influential teacher of nutrition. He founded the department of nutrition at Harvard's School of Public Health; he advises the government and food industry; he is coauthor of a sumptuous manual on nutrition that is distributed free to medical students by the Upjohn Company [a major pharmaceutical maker]; and he is coauthor of a best-selling textbook on the subject for undergraduates studying to become home economists, dieticians, or teachers.

Dr. Stare reaches the general public directly through a syndicated radio program, a syndicated newspaper column, and a series of popular books—such as *Panic in the Pantry*. Address: Sc.D., Research Associate, Harvard School of Public Health; 2. M.D., Chairman, Harvard School of Public Health.

919. Yanase, Giryô. 1975. *Yûki nôgyô kakumei* [The organic farming revolution]. Tokyo: Daiyamondo-sha. 5 + 242 p. Illust. 19 cm. Series: Daiyamondo Gendai Sensho. [Jap]*

• **Summary:** About organic farming in Japan, the effect

of agricultural chemicals on the environment, and vegetarianism. The author was born in 1920.

920. Photograph of Peggy Steevensz and others at an Erewhon booth at a fair. 1975? Undated.

• **Summary:** Note: This photo, taken by Roy Steevensz, was sent to Soyinfo Center by Peggy Steevensz who writes: She is standing, wearing a yellow Erewhon Rice t-shirt, with a red bandana around her neck and blue jeans. On the wall behind is a long poster / banner that reads: "erewhon natural foods." "The fair was in Los Angeles—somewhere. It looks like an indoor convention. Girl with long hair and blue t-shirt is named Dana. Lady with orange scarf, green apron, and long-sleeved white shirt is Kim Backus, she lived at the "Kushi" house and worked at Erewhon. I forget the guy's name.

"I don't have the yellow t-shirt and doubt if it is still being sold. I think this is later, maybe even summer of 1975, I would have been 16. I know I was living at 7357 Franklin at the time, and hadn't moved to the 7511 house yet. When we moved to 7511 my room was the sun-room on the 2nd floor, my brother had the downstairs room by the living room and my parents had one of the larger bedrooms upstairs. I forget who else was living there; there was much activity at 7511."

921. Re: Natural Foods Distributor Association. 1976. Letter to The Well, 795 West Hedding, San Jose, CA 95126, Jan. 3. 2 p.

• **Summary:** Written on the new letterhead of the Executive Committee, Natural Food Distributor Association, this letter states that membership presently stands at ten companies: Arrowhead Mills, Ceres, Eden, Erewhon, Janus, Laurelbrook, Manna (Canada), Mondo (Erewhon, Los Angeles), Shadowfax, and Tree of Life. Cliffrose has recently dropped its charter membership option. Three other companies have not yet paid their dues: Food for Life, Lifestream, and The Well.

The next meeting of the Executive Committee will be held in Seattle, Washington, on 15-17 Jan. 1976. The association officers are presently: Chairman: George Gearhart (Janus Natural Foods). Secretary: Tyler Smith (Erewhon). Treasurer: Tom DeSilva (Mondo Trading Co.). Bi-annual host: Boyd Foster (Arrowhead Mills).

Note: This is the earliest document seen (April 2011) that mentions Mondo, Shadowfax, or Cliffrose. Address: San Jose, California.

922. Erewhon. 1976. Erewhon 76. Boston, Massachusetts. 16 p. Feb. Catalog and price list. 28 cm.

• **Summary:** The color cover, periwinkle blue and purple, shows many trees growing in shallow snow against a white sky.

The first page, titled "Piscean Specials: Specials

Effective February 18, 1976,” states: Special intro offer: 3 cases, 5% off Erewhon Natural Cheese.” Note: Erewhon is now selling dairy products.

It also offers specials on: NiksSnacks, Celestial Seasonings tea, OG [Organically Grown] apple juice (Knudsen’s, Heinkes), Tom’s soaps, Fearn Soya Products (Buckwheat pancake mix, Wholewheat pancake mix, Corn bread muffin mix), Yinnie syrup, Erewhon pastas, Rocky Hollow herbs & spices, Edible essential oils.

On the next page, titled “First Class,” a list of “Discontinued items: 10% off regular price” includes: All Nature Born cosmetics. All Sumatra honeys. Tamari ½ gallon size. Bulghur-Soy Grits.

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210; New York City office: 303 Howe Ave., Passaic, New Jersey 07055. Phone: 617-542-1358 and 212-594-6455.

923. Bortz, Brenda. 1976. The joys of soy. I. Vegetable soybeans. *Organic Gardening and Farming* 23:28-30, 32, 34, 36, 38. Feb.

• **Summary:** An excellent, pioneering study. “Using growth trials and a reader survey, OGF Research and Development Group checks out vegetable soybeans.” Relatively little research has been done on vegetable soybeans for gardeners. In 1975 the R&D group tested 19 varieties: Imperial, Hark, Provar, Kanrich, Bansei, Verde, Kim, Fuji, Funk’s Delicious [Funk Delicious], Higan, Protana [high protein but not large-seeded vegetable type], Ra, Hokkaido, Disoy, Willomi, Jogun, Magna, Fiskeby V, and Mandelli.

A table (p. 29) gives statistics on the ten top-yielding varieties in descending order of yield: Higan (40.98 gm of dry beans per plant), Kim (19.02), Hokkaido (36.25), Protana, Willomi, Fuji, Imperial, Ra, Mandelli (25.64), and Kanrich (25.39—the lowest yielding). The days to maturity as a fresh vegetable in Pennsylvania ranged from 70 days for Protana to 82 days for Kanrich and Kim. The most resistant to shattering were Kanrich, followed by Ra, Protana, and Kim. The least resistant to shattering was Fuji, followed by Mandelli, Hokkaido, and Willomi. Of the top 10 varieties, only Kanrich was sold commercially, by W. Atlee Burpee Co. and Nichols Garden Nursery. Other commercially available varieties are: Fiskeby V (from Thompson & Morgan), Early Green (Kitazawa Seed Co. in San Jose, California), Early Green Bush (Stokes Seeds, Inc.), The Edible Soybean (The Natural Development Co.), and Giant Greenboy (Farmer Seed and Nursery).

“But more than yield should be considered in choosing ‘the best’ variety for a given garden. In areas with short growing seasons, late-maturing soybeans are a risky bet with crops often reduced or cancelled out by the brisk climate.

To beat this problem a Swede named Sven Holmberg spent 40 years developing an edible soybean that would crop in a short, cool growing season. Called the Fiskeby V Vegetable Bean, this variety is now available only from Thompson & Morgan (P.O. Box 24, Somerdale, NJ [New Jersey] 08083). Containing from 39 to 40 percent protein, Fiskeby is reportedly very low in the antitrypsin factor that inhibits the digestion of uncooked soybean protein” (p. 32).

Note: This is the only document seen (Oct. 1999) that mentions the soybean variety Mandelli. It is not available commercially and its source is not given.

924. *Open Education Exchange (Berkeley, California)*. 1976. Tofu & Miso Cookery [Class by Liz Horowitz and Bob Gerner]. Feb. p. 2.

• **Summary:** Liz has 2 years experience cooking at Tassajara and Westbrae Natural Foods. Bob is a founder of Westbrae and an expert on tofu and miso. Four meetings, Mondays 6-8 p.m. Class size: 5-15. Preprinted recipes. A \$6-\$10 food fee is payable to instructors. Classes held in north Berkeley.

925. Shurtleff, Barbara R.; Hills, Sandy. 1976. Ledger of book sales and expenses, related to *The Book of Tofu*. 790 Los Palos Manor, Lafayette, CA 94549. 31 p. No index. 20 cm.

• **Summary:** Barbara (“Bobbie”) Shurtleff started this ledger on 2 Feb. 1976 to keep track of the name, address, date of order, and amount received from sales of the newly published *Book of Tofu* by William (“Bill”) Shurtleff (her eldest son) and Akiko Aoyagi. Pages 1-21 are in her very clear handwriting and cover sales through 20 July 1976. Some sales are to friends of the Shurtleff family, but most are to people interested in tofu, and many of these live in Hawaii where Bill and Akiko did two public programs about tofu in mid-February (Feb. 12th—tofu class for Seventh-day Adventist group hosted by Naomi Yamashiro, 80 attend; Feb. 13th—University of Hawaii’s Kuykendall Hall, hosted by David Lee “Kalm” Sukowske, 140 attend).

Among the book buyers are: Feb. 12—Harry W. Miller [Loma Linda Foods], 11384 Norwood Ave., Riverside, California. Feb. 18—Nancy Arakaki, Kaneohe, Hawaii. Feb. 18—Naomi Yamashiro, Kailua, Hawaii. Feb. 26—Quong Hop & Co. March 3—San Francisco Vegetarian Society (Dixy Mahy, 10 books wholesale, \$4.17 each = 40% discount). March 3—Lafayette Natural Foods (10 books wholesale). March 4—The Wok Shop, San Francisco (Albert Chan, 25 books wholesale). March 4—Rising Sun Natural Foods, 440 Judah St., San Francisco (6 books). March 8—East-West Academy, Effie Chow, 33 Ora Way, San Francisco (100 books wholesale). March 8—Dharma Publishing Bookstore, Nyingma Meditation Center, 5856 Doyle St., Emeryville (10 books wholesale). March 10—David Lee Sukowske, 1923 Keeaumoku St., Honolulu. March 30—Carmelite monastery, Kaneohe, Hawaii. April 23—Wo Chong Co., 101 16th Street,

San Francisco. May 10–Kinokuniya Japan Center, 1581 Webster St., San Francisco. June 7–Ted Nordquist, 1536 Versailles Ave., Alameda (20 books, wholesale). June 11–Dr. Harry W. Miller (send 1 book to India). June 17–Winston Lo, Hong Kong Soya Bean Products Co. Ltd., 52-54 Hoi Yuen Rd., Kwun Tong, Kowloon, Hong Kong.

Pages 22 and 23 list itemized expenses from 28 Sept. 1976 to 21 Dec. 1976. Entries from Sept. 28 to Oct. 8 are in Bobbie's handwriting, whereas those from Oct. 9 to Dec. 21 were written by Sandy Hills. Bobbie died on 15 Oct. 1976 of cancer of the colon.

Pages 25-31 continue listing sales of *The Book of Tofu* from 29 Sept. 1976 to 19 Oct. 1976; they are similar in format to pages 1-21, with entries from Sept. 29 to Oct. 8 in Bobbie's handwriting. Subsequent entries were written by Noralee and Sandy Hills. The last 1½ pages of entries are undated.

The following is a brief chronology of events related to Bobbie, Bill, and Akiko during late 1975 and 1976.

1975 Sept. 15–Bill and Akiko return to California from Japan; they stay with Bobbie at 790 Los Palos Dr.

Oct. 25–They do their first real “Tofu Class” at Westbrae Natural Foods in Berkeley. About 14 people attend.

October 2-6–The three visit Ananda community then Lake Tahoe together. Nov. 23+ The three put on a tofu class at the Esalen Institute in Big Sur, spend the night at Esalen as guests of Michael Murphy, visit Emile Norman at his home in Big Sur, then drive to Los Angeles and back.

Dec. 2–Bill and Akiko put on a big tofu class in Bobbie's home, followed by 6 other tofu classes in central California.

Dec. 10–They hold a family party and reunion at the family home to announce the publication of their *Book of Tofu*–which arrived two days later. Soon orders for books began to arrive.

1976 Feb. 10–Bill and Akiko return to Japan, via Hawaii, leaving Bobbie alone at 790 Los Palos. In Hawaii they did several tofu programs and asked Bobbie to take orders for books.

March 19-April 10–Bobbie takes a group trip to the Galapagos Islands (Ecuador), Bogota and Cali (Colombia), and the Andes.

May–Bobby has a large malignant tumor removed from her colon at Peralta Hospital in Oakland.

July–Bobbie and her friend Niki spend 10 days together at the Shurtleff honeymoon cabin at Lake Tahoe.

Sept. 29–Bill and Akiko leave on their Tofu & Miso America Tour. Bobbie attended their first class in San Rafael. As they said good-bye (for the last time) Bobbie said, “Have fun on the way.” Address: Lafayette, California. Phone: 283-3161.

926. Bortz, Brenda. 1976. The joys of soy. II. Tofu and tempeh. *Organic Gardening and Farming* 23(3):128-31.

March. See also Part I: 23:28-30, 32, 34, 36, 38. Feb.

• **Summary:** “Two Far Eastern soybean favorites–tofu and tempeh–turn up exciting new menu and nutrition ideas in the OGF Research and Development Group's latest tests...”

“At this time, Dr. Schwartz is inviting a limited number of adventurous OGF readers to help him evaluate the ease and dependability of his method and tempeh's potential as a new food for Americans. Readers who would like to join R & D's modest ‘Soybean Task Force’ should write to Nancy Bailey, R & D Readers' Service, Rodale Press Inc., Emmaus, Pennsylvania, 18049. Those selected will receive soybeans, culture, and complete instructions for making the simple incubator and tempeh itself.”

Contains a recipe for Tofu Loaf with Onion and Cheese from *The Book of Tofu* by Shurtleff and Aoyagi.

Note 1. This is the earliest document seen (April 2019) that mentions tempeh, published by or in connection with Rodale Press.

Note 2. This is the earliest document seen (May 2019) in which Rodale Press offers to send tempeh starter culture or instructions for making tempeh to those who are interested. Rodale continued to send out tempeh culture until Feb. 1978, at which time they referred readers to Farm Foods (Summertown, Tennessee) for instructions, starter culture, and even soybeans.

927. **Product Name:** Tekka (Miso Condiment).

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor).

Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1976 March.

Ingredients: Incl. carrot, burdock, ginger, lotus root, miso.

Wt/Vol., Packaging, Price: 2.8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods. 1976. March. Spring Catalog. Page 15. “Tekka. A salty condiment very rich in iron and minerals. Made from carrot, burdock, ginger, lotus root, and miso.”

928. Eden Foods. 1976. Spring catalog. 4601 Platt Rd., Ann Arbor, MI 48104. 30 p.

• **Summary:** On the cover is a woman carrying a sheaf of grain and a sickle on her head, with a child following after her. This is the earliest Eden catalog seen (July 2012) with explanations of the product categories and individual products. Tamari Soy Sauce is now sold under 2 labels (Erewhon, and Marushima). “All of this soy sauce, bulk and bottled, is naturally and slowly aged for 2 years in wooden kegs. Made from soybeans, wheat, water, and salt.” Hacho miso and kome (rice) miso, both still sold under the Erewhon brand, are fermented for 2 years, barley miso for 18 months. A new condiment is Tekka, sold in a 2.8 oz jar. “A salty condiment very rich in iron and minerals. Made from carrot,

SPRING CATALOG 1976

burdock, ginger, lotus root and miso.”

Under packaged meals is Fritini (regular, with herbs, with curry, or with paprika; 8 oz.). Also new is Plum Extract (Bainiku Ikisu [sic, Ekisu]). Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

929. Dart, Susan. 1976. Mother finds way to beat food additives: Natural foods. *Chicago Tribune*. May 13. p. E30.

• **Summary:** Clara Lo was born in Hong Kong, but educated in the USA. She marinates her ground pork with “Chinese bean paste [jiang], which she buys in Chinatown.” She points out that “a marinade of soy sauce would have the same effect, but the soy sauce must not contain sodium benzoate or other preservatives and be free of any coloring whatsoever...”

Note: This is the earliest English-language document seen (March 2009) that uses the term “Chinese bean paste” to refer to Chinese-style miso.

She notes that the Chinese have traditionally eaten a balanced diet. Based on rice, or wheat, it always includes “green vegetables, fish, meat or soy bean cake [tofu]...”

930. Shurtleff, William; Aoyagi, Akiko. 1976. What is miso? (Brochure). Berkeley, California: Westbrae Natural Foods Inc. 10 panels. Illust. by Akiko Aoyagi. May. 24 x 13 cm.

• **Summary:** Contents: Introduction. Delightfully varied; highly versatile. A nutritional treasure trove. The varieties of miso (including a table). The preparation of miso. Traditional natural miso and quick modern miso. A brief history of miso. Buying, storing, and using miso. Miso in Japan. Traditional Japanese miso shops and modern factories. Making miso at home. Favorite miso recipes (contains 16 recipes). About the Soyfoods Center.

Note: This brochure was sponsored, published, and widely distributed by Westbrae Natural Foods Inc., 1124 10th St., Berkeley, California 94710. From May 1976 to Dec. 1979 approximately 105,000 copies were printed. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

931. Harmony Foods. 1976. The bulk price list. London, England. 8 p. Sept. 16 by 20 cm. Stapled.

• **Summary:** Printed with black ink on light yellow paper. On the bottom half of the cover is a photo of two people and a horse walking along a trail in some woods.

A running table shows: (1) Product name. (2) Contents of each case. (3) Cost [Price] of each case. (4) Unit.

Newstime (page 2 & 7). Product categories: 1. Whole cereals: 11 products. 2. Cereal products: 9 products. 3. Seeds and pulses: 10 products, incl. Aduki beans. Soybeans, No. 10. Soybeans, yellow No. 1. Roasted peanuts, Bombay or Natal. 4. Sauces and spreads: 6 products incl. Peanut butter, crunchy. Tahini sesame cream, dark. Tamari soy sauce. Miso soy puree, mugi. Miso soy puree, Hatcho.

5. Seaweeds: Wakame. Hiziki [hijiki]. Kombu. 6.

Ginseng and teas. 7. The rest. 8. Cases and books: Incl. “Seed” magazine (monthly).

On the back cover: “The History of Harmony: We actually began in 1967 deep in a sprawling basement in Paddington with a restaurant called Seed. It was here that natural foods were first offered to a select group of the British public, the flower power followers of 1967. A typical daily menu (‘Tomorrow’s You’) featured the Special of bean salad, whole oat groats, rice fritters, and carrot sesame, followed by apple cake and a cup of bancha—all at 7/6 (that’s 37p).

“By 1970 we’d also opened a small shop in All Saint’s Road called Ceres which was the first place to carry under one roof all the cooking elements of a wholefood diet. What we couldn’t get from local ethnic food merchants we had to import ourselves—things such as good Tamari and Miso, organic brown rice, and patchouli oil.

“Of course, buying in shipments from *Muso Shokuhin* (Osaka, Japan) and importing five tons of rice for one little shop proved unwieldy and expensive. The answer seemed to be to share what we brought in with other shops and this is how, in 1971, Harmony Foods was born; Our first ever list had ten products: whole rice, buckwheat flour, tamari, miso, mu tea, sesame seeds, aduki beans, umeboshi plums, patchouli, and unleavened bread. As there weren’t any natural food-shops besides Ceres we sent it out by BRS to health shops, As this side of things got under way a few more pioneers opened up shops like Infinity, Harvest, Acorn, Community, On the 8th Day, and Arjuna. These shops buy in bulk and sell at low prices. Since you’re getting this list you’re probably one of the hundreds of others who have opened up across the country in the last five years.

“At Harmony we’ve been flat out for these five years trying to keep up with this growth. We’ve had to become stone millers, bakers and peanut butter makers. Others have opened up wholesale outlets to help fill this demand and many shops have organized into local groups to share information on buying and availability of quality foods,

“We’re here because of you and our major priority will always be to service your needs with the finest foods at the best prices we can manage. Because of this we always value your comments and advice on the products we carry and we should be carrying.

“Keep in touch,....” Address: 1-19 Earl Cottages, Earl Road, London, S.E.1. Phone: 01-237-8396/7.

932. *Minneapolis Star (The) (Minnesota)*. 1976. Organic food message finds a growing audience. June 30. p. 50.

• **Summary:** “Robert Rodale won’t wince if you call him a food faddist” When his father, J.I. Rodale, now deceased, founded the company in 1930, he was pretty much a lone voice. But things have changed.

“Rodale is also trying to develop new foods and introduce Americans to foods, such as the fermented soybean

product tempeh that have found wide acceptance in other parts of the world.”

In the kitchens at Fitness House in Emmaus, Pennsylvania, home of offices and a lunchroom for Rodale employees, cooks develop new recipes. “*The Rodale Cookbook* [1973] is one of the company’s best-selling books.”

A small portrait photo shows Robert Rodale.

933. Shurtleff, William. 1976. Notes on making shoyu from visit to Sendai Miso-Shoyu Co. in Sendai, Japan. Tokyo, Japan. 2 p. Undated. Unpublished typescript.

• **Summary:** Shurtleff first visited Sendai Miso-Shoyu in Feb. 1974. These are notes from a second visit, with Bob Gerner of Westbrae Natural Foods, in June 1976.

The three keys to making good shoyu are making the koji, mixing (*kaibo*), and pasteurization (*hiire*).

Sendai has a new method of making koji in 45 hours. It used to take 72 hours, and homemade koji still takes 72 hours; it cannot be done in 45 hours at home.

Wheat is roasted at 170°C for 2 to 3 minutes in sand, then the sand is sifted off in a rotating screen. Whole soybeans give a better flavor than defatted soy meal. To cook (which?) soak for 12-16 hours, then steam at 0.8 kg/cm² for 60 min at 120°C. Then draw a vacuum on the cooker (to give a lighter color?) and cool at 40-45°C. How? The best protein utilization is obtained with a high temperature, short time cook. The soybeans break down better. Spray with cold water to get it to 40-45°C?

Split wheat at 30-50°C, crack into 8 pieces. Then mix soybeans, wheat, and starter which they call *Aspergillus oryzae* (not *soyae*), with strong protease to break down proteins.

Chitose is a special product; 3-5 years. What does that mean?

Sendai adds yeast (*kobo*) tenka suru, Cool their salt water to -10°C to make it like winter (why?) then mix with koji or salt? to +10°C, called *kanjikomi*. In the old days, the koji was incubated at 25-30°C for 72 hours and shoyu was not made during the summer. First koji mixing was at 28°C, second 30°C, third 25°C. Had to watch out for botulism?

Ingredients: to make 1000 liters shoyu. 396 kg each whole soybeans and wheat, 190 kg salt, 1,100 liters water cooled to -10°C. This makes a total of 1200 kg brine. I calculate this as 15.87% salt but my notes say 22.6% what? Baumé? Usually 23.0 to 23.3° Baumé.

Shikomu = to put in vats. In the old days the best shoyu was *kanjikomi*, that put into vats between Dec. 1 and Feb. 15. Also the most expensive.

Mixing. Not sure of this: mix on third day, then once on 10-13th day, then once every 2 or 3 days, then after 3 months, once every 7-10 days till the end.

Concrete vats hold 30 tons of moromi; each 10 by 10 by 6 ft deep. Wood vats hold 14 tons. Mix each time for 7-15

min.

Kikkoman now uses Mexican sun-dried salt containing nigari or with added nigari.

What is *kejuku*?—related to moromi.

Complex system for getting off oil. See next page.

What is *kiage*? After the oil is removed (during how many days) the shoyu goes into a *kiage chozo* for 2 months. The lees (*ori*) settle to the bottom, then are recycled back to the moromi and repressed; shoyu is run out of this settling tank by a pipe just above the lees. Then I think heated in an old caldron for 3 hours at 80°C, then something about an *iba* (not in dictionary) at 45-50°C, then to *hiire* = pasteurization, then number 2 settling (*chinden*) = precipitation for 7-10 days, then filter with diatomaceous earth or celite or diatomite, then bottle and sell. Chinden is 15 days in winter or 30 days in summer OR filter with diatomaceous earth. So shoyu sits for 2-3 months after being pressed from the moromi. Problems with *kijoyu* are mold and production of CO₂. Even in the old days, shoyu was pasteurized = *hiire*. Lactic acid bacteria give it a vinegar flavor and a bad mold grows unless refrigerated. *Kijoyu* is used in *soba no tsuyu* = soba dipping sauce. Reason for *hiire* are 1. better aroma. 2. darker color, precipitate out sediment, *teri ga deru* = light from within. The flavor gets mellow and flavors are harmonized. Enzymes do act at 50-60°C quickly, then die. So slowly raise temperature.

Two hand drawings on the bottom half of page 2 show parts of the process. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

934. Shurtleff, William. 1976. Koji starter for miso and shoyu. Nerima-ku, Tokyo, Japan. 1 p. Front and back. 28 cm. Undated (June?). Catalog.

• **Summary:** This typewritten, photocopied, 2-page leaflet describes 9 different types of koji starter for: Red miso, barley miso, soybean miso, mellow barley miso, sweet white miso, light-colored miso, fast white miso, amazake or pickling, or shoyu. All 9 types are available from: Mitoku Trading Co., Attn: Mr. Akiyoshi Kazama, C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 03-201-6706. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

935. *Berkshire Eagle (Pittsfield, Massachusetts)*. 1976. Second natural food store opens in city. July 3. p. 8.

• **Summary:** Cornucopia Natural Foods, a retail store, was opened this week at 424 North St., in Berkshire, Massachusetts, by Richard Buck, “a dedicated member of the natural food cult” and a former Prudential Insurance Company employee. He plans to sell the foods and preach their benefits to all who will listen. He has “converted to the Vegan faith. That is a national organization whose members abstain from all animal products including dairy products

as well as meats.” Buck is planning to start a chapter of the North American Vegan Society in Pittsfield, in order to help spread the word locally.

All of the counters and display cabinets in the store are made by hand of unfinished wood, except for the bread counter and the refrigerator section.

“Tofu is a big item in the store. This is bean curd made from soybean and eaten in many ways.” The store also has “a cookbook for sale devoted exclusively to recipes involving tofu [probably *The Book of Tofu*, by Shurtleff & Aoyagi].

The store stocks one of the most extensive collections of herbs and spices outside of New York City.

The store carries fresh garden produce, has a juice bar and “a bakery featuring bread made by the neighboring Sufis.”

Buck is planning to add more new products as business increases. One of the first will be dairyless ice cream.

The store will be open Mondays through Saturdays from 9 a.m. to 9 p.m.

A large photo shows the inside of the store.

Note: This is the earliest document seen (April 2020) that mentions Cornucopia Natural Foods—which is still a retail store.

936. Shurtleff, William; Aoyagi, Akiko. 1976. What is tofu? (Leaflet). Berkeley, California: Westbrae Natural Foods Inc. 5 panels each side. Each panel: 24 x 12.5 cm. Illust. by Akiko Aoyagi. July 20. 24 x 13 cm.

• **Summary:** Contents: Introduction. A family of distinctively varied foods. A storehouse of high-quality protein. Low in saturated fats: free of cholesterol; an ideal diet food. Natural backbone of the meatless diet. Buying and storing tofu. Making tofu at home and in communities. Soybeans, tofu, and the world food crisis. Tofu shops in Japan. Cooking with tofu (13 recipes).

Note: From July 1976 to Dec. 1977 approximately 130,000 copies were printed by Westbrae and Morinaga. In addition, from May 1981 to March 1983 seven tofu companies purchased the rights to print an unlimited number of copies under their own logo. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

937. *Natural Food and Farming (Atlanta, Texas)*. 1976. Frank Ford: American of the Year. 23(2):29-32. July.

• **Summary:** The “American of the Year” award was established several years ago by a group of religious organizations. “This year the coveted award went to Frank Ford, the 43 year old farmer and founder of Arrowhead Mills in Hereford, Texas. The presentation was taped for the Town Hall’s telecast reaching 5 million viewers.” Frank Ford farms his 1,500 acres of wheat using organic methods and no pesticides. Arrowhead Mills features stone ground flour and 250 other products.

“A proponent of natural foods, Ford received his degree in agronomy in 1955 from Texas A & M University where he was named for the outstanding graduate in the School of Agriculture. He has farmed wheat organically in Western Deaf Smith County since 1960, which was also the year he founded Arrowhead Mills. He served as president of the company until 1973, and is now Chairman of the Board.”

Ford is on an advisory board to Secretary of Agriculture Earl Butz in Washington, D.C. “Both he and his wife, Marjorie Ann, are authors of natural food cookbooks. His is *Pack to Nature...* and hers the best-selling *Deaf Smith Country Cookbook*.” He has also written a book of poetry. He and his wife have four children: Davis age 18, Cindy 16, Dan 14, and Susan 12.

Ford said: “I have become acutely aware how fragile the life support systems of our earth have become. A few inches of topsoil on a rapidly shrinking portion of our lands must support the exploding populations of the twentieth century. Yet, we have mined this topsoil as if we simply did not care about those who might follow us. The technology of World War II has been unleashed on the delicate web of life existing in our soil and waters. Now we are beginning to see the tragic results of our shortsightedness.”

Photos show: (1) “Frank Ford, farmer and founder of Arrowhead Mills, Inc., receiving the ‘American of the Year’ award from Bishop A.A. Leiske.” Both are standing at a podium on a stage with many flowers in front and an American flag in the background. (2) Side view (head and shoulders) of Frank Ford driving a tractor. He “has spent 25 years working with the soil, and during that time has accumulated over 20,000 hours of tractor time.” (3) Frank Ford inspecting his organically grown wheat crop on his 1,500 acre family farm. (4) Frank Ford on top of one of his 62 metal holding bins for grain. Each bin holds 4,000 bushels of grain.

938. Wells, E.G. 1976. Re: Twig tea. Letter to Lorenz Schaller, 1036½ Garfield Ave., So. Pasadena, CA 91030, Aug. 4—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** Customs is not allowing Spiral Foods to import twig tea. It is too high in twigs to be called “tea.” Their last batch had to be destroyed. Address: Spiral Foods Inc., 1144 West 1st Street, Chico, California 95926. Phone: 343-2111.

939. Bennett, Gordon. 1976. Re: What is Miso? pamphlets from Westbrae Natural Foods. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 25. 2 p. Handwritten, with signature. [1 ref]

• **Summary:** “(1) Greetings! This letter is a collection of several days of considerations: (2) Is it possible to omit your side of how miso is packaged in America—our miso bag looks terrible next to others, and its a label we no longer use; a new slide?”

“(3) Is it possible to get some pictures made of the miso slides—we’d like to put some of the more striking one into our pricelist & perhaps use as displays in our stores. I will arrange and pay for this.

“(4) Re giving away pamphlets across the country; we feel this is basically a good idea. However (1) we would like you to give away the WB [Westbrae] logo pamphlets...

“(5) Sea vegetables—we are writing to Japan to determine what their labeling capabilities are—this will actually decide whether we can use your copy as is, or whether we need to edit it down...

“(6) Due to the surprisingly small turnout at the lecture, our expenses were much greater than the number of people present @ \$1.00 per person. Next time we will use posters!” Note: Bill Shurtleff gave a outdoor lecture and slide show for Westbrae on Tuesday, Aug. 24, at John Hinkel Park in Berkeley, from 5-8 p.m.

“(7) A number of requests are coming for single pamphlets. We would like to forward there to you for your follow-up and interest. (8) The overseas mailing are more complex than we had thought. (9) Only 1 reply on the pamphlets so far—Manna in Toronto [Ontario, Canada]—their logo—small number [5,000]. (10) It is much more convenient for me to arrange to get your pamphlets, agar, or whatever you’d like in advance... (11) We all thoroughly enjoyed Tues eve.—thank you & thank you Akiko—Gordon.” Address: 1224 10th St., Berkeley, California 94710. Phone: 415-524-0506.

940. Product Name: The Learning Tree Tofu Kit.

Manufacturer’s Name: Learning Tree (The).

Manufacturer’s Address: Box 76E, Bodega, CA 94922.

Date of Introduction: 1976 August.

New Product—Documentation: This is America’s first widely sold and important tofu kit, introduced in August 1976. It was developed by Larry Needleman of The Learning Tree in Bodega, California, based on designs from *The Book of Tofu*.

Shurtleff wrote in his journal in Aug. 1976: “This month I meet Larry Needleman, who has developed a nice Tofu Kit, based on designs from our *Book of Tofu*. He visits our home and Center at 790 Los Palos Dr. [Lafayette, California]; we sit in the den and talk.”

“1976 Sept. 29—Akiko and I leave on Tofu & Miso America Tour, in our white Dodge van packed full of books and tofu kits (from Larry Needleman). As we stop for our first gas on the San Pablo Dam Road, I wonder if the tires will explode or the springs break under all the weight.” “Trip expenses included \$1,200 or more to Larry Needleman for tofu kits at the wholesale price.”

The initial retail price of the kit was \$11.95 and the wholesale price was \$7.77. It soon became the world’s most popular tofu kit. Larry continually improved on the design, until it was a joy to use or behold.

Invoice No. 4992. 1977. Jan. 17. To New Age Foods

Study Center (790 Los Palos Manor, Lafayette, CA 94549) from The Learning Tree (P.O. Box 829, Corte Madera, CA 94925). 12 boxed tofu kits, \$7.17 each, total \$86.04. Picked up by Sandy Hill.

Brochure. 1977. Feb. 1. Tofu Kit Information Sheet. Outside dimensions: 8 5/8 by 5 1/8 by 4 inches high. Weight: 2.85 lb. Suggested retail price: \$12.95. “Ingredients: The Learning Tree Tofu Kit contains a 16 page booklet with recipes for making and using tofu, a Philippine mahogany [red lauan; not real mahogany] settling box, joined by silicon-bronze, ring-shafted, boat building nails, a muslin pressing sack, an 18-inch square of 44/36 unbleached cheesecloth, and a 3 ounce packet of natural nigari solidifier (enough for about ten batches). Packaging: The Tofu Kits are shrink wrapped in 100 gauge Reynolon 4155, a crystal clear, polyethylene film... Current Distribution: First released in September 1986, the kit now has distributors and retail accounts in 22 states in the United States and one in British Columbia. They are almost exclusively Natural Food Stores and Health Food Stores, with a sprinkling of cookware shops and book stores. Advertising: The Tofu Kit has been nationally advertised as a mail-order item in *East West Journal*, *Well-Being Magazine*, and *Mother Earth News*... Terms and Prices: To retailers: \$8/kit. Minimum order—6 kits. To distributors. \$6.50/kit. Minimum order—24 kits. The Tofu Kit is the first product and labor of love and service from The Learning Tree. It was entirely inspired by *The Book of Tofu*, as a convenient tool to help people make their own tofu at home and as a means of shifting eating habits away from meat, freeing much needed vegetable protein to feed starving people.” P.O. Box 829, Corte Madera, CA 94925. 2/1/77.

Ad in *Mother Earth News*. 1977. No. 43. p. 37. Jan/Feb. (4.5 by 2.5 inches) “Tofu—Easier to make than bread! Tofu kit from the Learning Tree.” The kit costs \$11.95 from Westbrae Natural Foods in Berkeley, California.

Leaflet #1. 1977? “Tofu Kit information sheet.” Double sided with recipes. Black ink on tan paper. The kit retails for \$12.95. Leaflet #2. “Tofu Kit: Make your own tofu at home... quicker and easier than baking bread.” Black ink on burnt sienna paper. Single sided. The kit retails for \$12.95.

Note: “The Learning Tree” is the title of the first film made by the well-known black photographer and film-maker Gordon Parks.

Ad in *East West Journal*. 1978. April. p. 11. “Make your own tofu at home—quicker and easier than baking bread.” Send a check or money order for \$12.95 (\$13.95 in Canada) to The Learning Tree, Box 76, Bodega, CA 94922. Ad in *East West Journal*. 1978. Oct. p. 62.

In June 1981 it was selling at the rate of 350 kits/month in the USA, decreasing to 150/month in June 1982. At this time it was made for the Learning Tree by physically handicapped people at the Marin Community Workshop in Mill Valley, California. Suggested retail price was \$18.95.

941. Ohlund, Tim. 1976. Re: Work with miso and koji in Sweden. Letter to William Shurtleff at New-Age Foods Study Center, Aug. 2 p. Handwritten.

• **Summary:** “Dear friend. I have been very impressed with your articles on tofu and tempeh in such magazines as *East West Journal* and *Mother Earth News*. I have been working in this area on a very small scale since about 5 years ago, when I got into macrobiotics in Japan under Nahum Stiskin. Since then I have been living in Sweden studying Japanese and Chinese at Uppsala University as well as managing a truck garden (biodynamic) during the summers.”

He has been growing Japanese vegetables in Sweden—with good results. “I’ve also been working with a new variety of soybean suited for this northern climate. This year I have a very good crop of them. The last two winters I’ve been making up batches of miso just to see how it would go and gain some experience at it. It is not yet as I would like it, but that will take some time. What I really need at this time is some good literature on the subject. My friend and I have combed the library at the university here and found much important information on tofu, tempeh, and lactic acid fermentation in *Applied Microbiology* and *Journal of Food Science*, etc.” He requests more information and contact people. He may make another trip to Japan in the next year or shortly thereafter to do research. Address: Box 559A, 19063 Örsundsbro, Sweden.

942. Shurtleff, William; Aoyagi, Akiko. 1976. Miso to wa? [What is miso? Translated into Japanese by Tsutomu Mochizuki]. Shinshu Miso Research Inst., Nagano-shi, Japan. 15 p. [1 ref. Jap]

• **Summary:** A Japanese-language translation of the English-language pamphlet “What is Miso?” originally published by Westbrae Natural Foods in on 1 May 1976. Dr. Mochizuki was interested in this western viewpoint on miso. Address: Authors: 790 Los Palos Dr., Lafayette, California 94549; Translator: Director, Shinshu-Miso Research Inst., Nagano-shi, Japan.

943. *Christian Science Monitor*. 1976. FTC may ban ‘organic’ claims by advertisers. Sept. 17. p. 1, 30.

• **Summary:** “Chicago—Use of the words ‘natural’ and ‘organic’ would be banned in most food advertising under a controversial proposal under consideration by the Federal Trade Commission (FTC).” The FTC believe that these and other claims related to health and nutrition confuse consumers. Hearings on the proposal are underway in Chicago this week and are scheduled later for Washington, DC, and Dallas, Texas.

Some consumer groups are calling for standard, federally approved definitions of such terms to which ads and labels would have to adhere.

The FTC contends that in place of “natural,” companies “could advertise that the food does not contain artificial

or synthetic preservatives, ingredients, flavor or color.” Likewise, in place of ‘organic,’ companies “could say that the food was grown without the use of pesticides, artificial fertilizers, or artificial conditioners.”

A wide variety of foods are now advertised as “natural” even though some contain food additives and are highly processed. But the National Nutritional Food Association believes such terms should be retained because “they have gained consumer acceptance.” Address: Monitor staff correspondent.

944. Erewhon, Inc. 1976. Erewhon. Autumn 1976. Boston, Massachusetts. 17 p. Catalog and price list.

• **Summary:** On the front cover is a photo of six adults and three children standing atop the Erewhon warehouse building at 33 Farnsworth Street in Boston. In the background are skyscrapers and the Boston skyline. The people are: Front row (left to right): Maureen Trail Young (sister of Rosemary Trail), Richard Young, Holly Young (youngest child), Tansy Young, Lori Young. Back row (left to right): David Simon, Jeanne Bleiweiss, Tom Herzig.

On the first page, Tyler Smith, writes about this catalog and upcoming events. “To help stimulate our customers, in the late Fall, Erewhon will present a lecture and demonstration day in both the New York and Boston areas which will feature as the main teacher, Mr. Bill Shurtleff, author of *The Book of Tofu* and *The Book of Miso*. He will be coming to this area on a lecture tour from Japan.”

Contents: Grains. Cereals. Flour. Pasta. Juices. Beverages. Spring water. Natural sodas. Nik’s snacks. Barbara’s bakery. Bliss pastries (whole-grain, sweetened with unfiltered honey, made at Cable Springs Bakery). Donna’s butter cookies, Butterchews, Lind’s candy bars. Chico-San candies (Yinnies, Yinnies San-Wich). Crackers & Chips (incl. tamari corn chips or corn tortilla chips). Rice cakes & bread. Cheese. Butter. Yogurt. Kefir. Produce. Dried fruit. Seeds & nuts (incl. alfalfa seeds unsprayed, almonds, Brazils, cashews, peanuts, pecan halves, pistachios, pumpkin seeds, sesame—brown, sunflower seeds, walnuts). Granola. Beans (incl. aduki [azuki], organic black soybeans or yellow soybeans from New York, and black soybeans from Japan). Seed & nut butter (almond butter, cashew butter, peanut butter {Erewhon or Deaf Smith—crunchy, or unsalted}, sesame butter, sesame-peanut butter, sesame tahini, sunflower butter). Fruit butters. Oils: Erewhon oils, Arrowhead oils (incl. Soy oil). Condiments-sauces: Erewhon sauces (incl. 4 sizes of tamari soy sauce), Erewhon miso (kome {rice & soy}, Hacho {soy only}, or mugi {barley & soy}—each in 3 sizes), Erewhon Japanese imports (incl. shiitake mushrooms, barley kogi [sic, koji] to make mugi [miso], kuzu arrowroot powder, tekka seasoning, nigari (to make tofu), umeboshi), salt (incl. Herbamare salt, unrefined sea salt from France), olives, pickles, sauerkraut, brown rice vinegar (from Japan), Pure and Simple vinegar (Honey,

red wine, apple cider natural), mulled cider spices. Baking (incl. barley malt syrup). Niblack's. Fearn's [sic, Fearn's] (incl. Rich Earth wholewheat & soy pancake mix, Soya powder natural). Honey-syrup. Erewhon packages: Beans, grains & seeds (incl. soybeans yellow organic), hot cereals, flours (incl. soybean full-fat organic), baking. Arrowhead packages. Sea vegetables (agar-agar, hiziki [hijiki], kombu, nori, flavored nori with tamari, wakame, dulce). Fmali ginseng. Teas: Erewhon, Celestial Seasonings. Body care: Cattier clay, Dr. Bronner's, Natural Living, Nature's Gate, Orjene, Tom's, luffas. Cookware (incl. soy dispenser glass). Readables: Magazines, books, posters, flyers-recipes. Apparel. Discontinued-sale. New products (Bob Swanson was the former owner and creator of Llama, Toucan and Crow, a New England distributor; Chico-San's organic rice cakes).

Erewhon's New York / New Jersey office is located at 303 Howe Ave., Passaic, NJ 07055. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

945. Ford, Frank. 1976. *The simpler life cookbook* from Arrowhead Mills. Fort Worth, Texas: Harvest Press. 157 p. Introduction by Fred Rohé. Index. 18 cm. [13* ref]

• **Summary:** The copyright page states: "First printing—Oct. 1974—23,000. Second printing—Feb. 1976—17,000. Third printing [this book], 110,000. This book is the second third edition of a book which was originally released under the title of *Pack to Nature*."

The body of the book is the same as that of earlier printings. However the 2-page directory titled "Some Natural Foods Sources" has been updated and expanded. It now lists 41 companies with full addresses and Zip codes. New additions include: Arrowhead Mills Distributing Co. (Denver, Colorado). Ceres Natural Foods (2582 Durango Dr., Colorado Springs, Colorado). Cinagro Distributors (now in Chamblee, Georgia). Earth Bound, Inc. (Woodbury, Connecticut). Earthwonder (Blue Eye, Missouri). Health Foods, Inc. (Des Plaines, Illinois). Houston Health Food Distributors (Houston, Texas). Kahan & Lessin Co. (Compton, California). Kozek Products (Los Angeles, California). Landstrom Co. (San Francisco, California). Laurelbrook Foods No. 2 (Raleigh, North Carolina). Lifestream Natural Foods (now at 1241 Vulcan Way, Richmond, BC, Canada). Manna Foods (Scarborough, Ontario, Canada). Midwest Natural Foods (Ann Arbor, Michigan). Nature's Best (El Segundo, California). Pure & Simple (795 West Hedding, San Jose, California). Shiloh Farms, Inc. Eastern Warehouse (Martindale {near New Holland}, Pennsylvania). The Wide Earth Store (Anchorage, Alaska). Tochi Products (Fargo, North Dakota).

Note: This is the earliest document seen (March 2006) that mentions Health Foods, Inc., a wholesale distributor of health foods and natural foods in Des Plaines (near Chicago). Address: Deaf Smith County, Hereford, Texas.

946. Shurtleff, William; Aoyagi, Akiko. 1976. *Tofu & Miso America Tour: 29 Sept. 1976 to 3 Feb. 1977* [Itinerary with two maps]. Lafayette, California: New-Age Foods Study Center. Unpublished manuscript.

• **Summary:** On 13 Sept. 1976 the authors bought a large, white 1975 Dodge Tradesman 300 van (used, with 40,000 miles on it). On one side Akiko painted in large, bold letters "Tofu and Miso America Tour 1976-77." Their *Book of Tofu* had been published in December 1975 and *Book of Miso* on 23 Sept. 1976. On Sept. 29 they packed the van full to the ceiling with their books on tofu and miso, plus Larry Needleman's tofu kits—and departed. In the van was an itinerary of hosts and places to which they had been invited and the route drawn on a large map of the USA.

This trip had five main purposes: (1) To introduce tofu and miso to America; (2) To introduce people to the many benefits of a meatless / vegetarian diet; (3) To encourage people to start soyfoods companies, especially tofu shops; (4) To discuss the dangers of human population growth to our small planet; and (5) To promote the authors' newly-published *Book of Tofu* and *Book of Miso*.

This itinerary includes the name and address of 64 people and organizations visited. Many of these were pioneers in the soyfoods and natural foods movements: Sept. 29—David and Kathleen Sandler, Robert Dolgin, Don Wilson, Farm Food Co. (San Rafael, California; we observed and recorded in detail how Don Wilson made tempeh and tempeh starter / inoculum, and how soymilk ice cream was made at Farm Food Co.). Oct. 1—Petaluma, California. Oct. 2—Josephine County Food Center, Grants Pass, Oregon. Oct. 3. Heliotrope Natural Foods (Salem, OR). Oct. 4—West Bank Cafe (Corvallis, OR). Oct. 5. Visit Linda Shurtleff (McMinville, OR). Visit *Rain Magazine* (Portland, Oregon). They do an interview which is published in their Nov. 1976 issue. Oct. 6. Blake Rankin and Janus Natural Foods (Seattle, Washington). Oct. 7. Janus. Oct. 8—Luke Lukoskie and Sylvia Nogaki of Island Spring (Vashon, Washington). Oct. 10—Jack Grady, a macrobiotic (Spokane, WA). Oct. 13—Univ. of Minnesota. Oct. 14—Georgie Yiannias of Wedge Food Co-op and Ananda Marga (Minneapolis, Minnesota). Our largest class with 300 people. Oct. 15—Barbara ("Bobbie") Reinhardt Shurtleff dies of colon cancer at Alta Bates Hospital, Berkeley, CA. Oct. 15. Famine Food Co-op (Winona, Minnesota). Oct. 16—Bonnie Maroney of The Wisconsin Farm (Ettrick, WI). Oct. 19—Visit George Strayer and Larry Krueger of the American Soybean Assoc. (Hudson, Iowa). Visit David and Ann Tucker (Iowa City, Iowa). Oct. 20. Outpost Natural Foods (Milwaukee, WI). Visit Bountiful Bean Co-op. Oct. 21. Visit Dr. Danji Fukushima and Kikkoman Foods (Walworth, Wisconsin). Oct. 22—Visit Drs. Hesseltine, Wang, Wolf, Mustakas, Cowan at Northern Regional Research Center (Peoria, Illinois). Oct. 23—Morning class on commercial production for Les

Karplus and 5 people at Vegetarian Incorporated (Urbana, Illinois). Oct. 23-24. Side trip to visit ADM and Staley (Decatur, IL). Oct. 24—Les and Debbie Karplus of Vegetarian Inc. (Urbana, IL). Oct. 25—Visit Dr. L.S. Wei of the Univ. of Illinois Dept. of Food Science (Urbana, Illinois). Evening program for Karplus in Urbana. Oct. 26. Purdue University (Indiana). Oct. 27—Chris Steele (Lansing, Michigan). Oct. 28—Mike Potter and Louis Howie of Eden Foods (4601 Platt Rd., Ann Arbor, Michigan). Oct. 29—Calico Market (Erie, Pennsylvania). Oct. 30—Visit Greg Weaver and Jay Thompson of Rochester Zen Center (Rochester, New York; Later Northern Soy). Visit Genesee Co-op. Oct. 31—Alternative Health Education Center (Rochester).

Nov. 1—Visit Arnold Karmody at Empty Cloud (Canandaigua, New York). Meet Dr. Keith Steinkraus (Geneva, New York). Nov. 2—Visit with Dr. Steinkraus at New York Agric. Exp. Station (Geneva, NY). Lunch together with his wife, Maxine. Nov. 3—Tom MacDonald at Hannibal, New York. Nov. 4—Ira and Kathy Leviton of Corncreek Bakery (South Deerfield, Massachusetts). Visit Laughing Grasshopper tofu shop just before it begins operation. Nov. 5—Fritz Hewitt of Common Ground Restaurant (Brattleboro, Vermont). Visit Tom Timmins of Llama, Toucan & Crow (Brattleboro). Nov. 6. Shep Erhard (Franklin, Maine). Nov. 7—Ann S. Johnson, assistant manager of dining halls, Univ. of Maine (Orono, ME). Nov. 8—Visit Marine Colloids (Rockland, Maine). Nov. 10—Drive to Boston, stay with Nahum & Beverly Stiskin (Brookline). Nov. 13—Tofu & Miso program in Boston. Visit Erewhon Natural Foods (33 Farnsworth St., Boston, Massachusetts), Martha Trundy, Jeffrey & Gretchen Broadbent. Nov. 14—Visit to shops in Boston's Chinatown. Michio and Aveline Kushi give a big party in our honor at their home at 62 Buckminster Rd., Brookline, then take us out to dinner at the Seventh Inn. Nov. 15—Tofu-making class at a home in Boston. Nov. 17—Visit offices of *East West Journal*. Sherman Goldman conducts long interview, later published in Jan. 1977 issue. Misomaking class at home of Ken Burns. Nov. 18—Visit Joel Wollner in Cape Cod. Nov. 19—Radio show then program for Joel. Nov. 20—Peter Smith at Quaker group in Pennsylvania. Nov. 22—Visit Woods Hole, Massachusetts to study sea vegetables. Evening program at New Bedford, MA. Nov. 23—Stay with Seung Sahn, Sa Nim at Providence, Rhode Island Zen Center. Meditate and show students how to make tofu. Evening at Insight Meditation Center, Barre, MA, a Vipassana center in a former Catholic seminary, co-founded in 1976 by Jack Kornfield, Joseph Goldstein and 3 others. We have dinner, meditate with the sangha, and hear Jack talk about Vipassana. Nov. 24 Sit morning zazen with master and students at Providence zendo. Nov. 25—Thanksgiving. Akiko and I stay alone in a house near Hartford, Connecticut and taste a good tofu pumpkin pie. I read about seaweeds. We take a long walk in the countryside. Nov. 26—Program for Erewhon Natural Foods in Hartford (stay with Maria Orefice,

owner of Garden of Eating restaurant in Hartford). Article in *The Hartford Courant* (Dec. 1). Nov. 27—Long River Food Coop in Connecticut. Nov. 28—Stay with Susan and Kirk Gershuny of Snowflower (Tivoli, New York). They plan to make soy ice cream soon. Nov. 29—Drive in deep snow to the New York Farm in Franklin, New York. Stay in a big house they built. Nov. 30—Carl Bethage of the East West Center in Gardiner, New York. Also did a radio program.

1976 Dec. 1—Visit Frances Moore Lappé at her upstairs office in Hudson-on-Hastings, New York. Then visit her large home on the hillside. Dec. 1-5—We missed a program for Annemarie Colbin in New York City (partly because we feared our van would be burglarized on the street) so we stayed Dec. 1-5 at the luxurious home of Leo S. Nikora (Niki; Bobbie's friend). I work on writing *The Book of Kudzu*. Dec. 6-7. Program for 40 people (Hosts: Nancy N. Bailey and Robert Rodale) at Rodale Press (Emmaus, Pennsylvania); I am surprised they serve white sugar on their dining tables. Dec. 8—Tim Snyder of Ecology Co-op in Philadelphia. Dec. 9—Stay at home of Sylvia Anderson in Pleasantville, New Jersey and do a program upstairs in a modern university. Study magnificent photos of Native Americans by Edward S. Curtis. Dec. 10—Visit Jay and Freya Dinshah of the North American Vegetarian Society (Malaga, New Jersey); their poor vegan child has bowed legs. Dec. 12—Cindy Blouse in Dallastown, Pennsylvania. Dec. 13—Visit Laurelbrook Foods, a natural foods distributor in Forest Hill, Maryland. We meet Rod and Margie Coates. Dec. 14—Big program hosted by Ella May Stoneburner and Seventh-day Adventists near Washington, DC. Dec. 15—Michael Rossoff (who ran the East West Center in Washington, DC) planned to host a class in a DC church. After we witness a robbery, we are afraid to leave our van on the street. So we do a scaled-down program in the home of Murray and Pam Snyder, which was the East West Center in Baltimore, Maryland. Visit Laurelbrook Foods Warehouse #2 in Durham / Chapel Hill. Dec. 16—Roanoke Food Co-op in Copper Hill, Virginia. Dec. 17-18—John Shuttleworth and Jim Morgans of *Mother Earth News* (Hendersonville, North Carolina). They do a long interview and take photos. Program at night. Note: An audio tape of Bill's talk at this program is filed with Soyfoods Center documents for 1976. Dec. 19—Chandler Barrett in Atlanta, Georgia.

Dec. 28 & 29—Workshop on tofu and miso at East West Foundation, Coconut Grove, Florida. Not on written schedule, but shown in two published articles. Handwritten trip notes show: "Dec. 27-29. Heartsong, Miami. Bob & Toni Heartsong, 6051 S.W. 46th Terrace, Miami, FL 33155. Was this also related to Mary Pung, who flew from Florida to attend one of the programs on our tour? At the time, she invited us to come to Florida—which was not on our planned route.

Note 1. This is the earliest document seen (May 2019) concerning the work of Ira Leviton or Tom Timmins with

soy. One evening, before Shurtleff was scheduled to speak at Leviton's Corncreek Bakery, Leviton drove Shurtleff to see the Laughing Grasshopper Tofu Shop which was under construction on the second story of an old wooden building in the nearby town of Millers Falls, Massachusetts. Much of the equipment was made out of wood—including wooden curdling vats and a wooden cider press. The company opened in Jan. 1977.

Note 2. This is the earliest document seen (March 2020) concerning Llama, Toucan & Crow in Brattleboro, Vermont.

Note 3. This is the earliest document seen (March 2020) concerning the forerunners of United Natural Foods, Inc. (INFI)—in the form of Llama, Toucan & Crow. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

947. Shurtleff, William; Aoyagi, Akiko. 1976. *Tofu & Miso America Tour: 29 Sept. 1976 to 3 Feb. 1977*. Continued from Jan. 1977. [Itinerary with two maps]. Lafayette, California: New-Age Foods Study Center. Unpublished manuscript.

• **Summary:** Continued: 1976 Dec. 21. Arrive at The Farm in Summertown, Tennessee. Meet Margaret Nofziger and Stephen Gaskin. Stay until 2 Jan. 1977. We stayed most of the time at "Hoot Owl Hollow," a large community owner-built home with many families; our host was Edward Sierra. During the next few weeks we stayed in a parked mobile home (owned by the Sandlers) in a lovely valley about 1 hour drive away. I worked on *The Book of Kudzu* final draft. Heavy confrontation with Farm folks—as I am about to start a program—about how they didn't like my way. Write a 4-page pamphlet titled "What is Tempeh?" jointly with Cynthia Bates. 1976 Dec. 31—This is our first year with significant income (\$27,390, mostly from Autumn Press royalties) but no profit. During 1976 thirty articles and book reviews about our work with tofu and miso were published in magazines and newspapers in the USA and Japan.

1977 Jan. 2—Our Tofu & Miso America Tour continues. Jan. 3—Stay in a suburban home with Lynn Delacruz in Meridian, Mississippi. Jan. 4—Program for Atlantis Distributors in New Orleans. That night we stay in a trailer home with John and Katherine Gabriel in Houma, Louisiana. They are from The Farm and make commercial tempeh in their trailer. Jan. 6—Jim Baker (Dallas, Texas). After the program I meet Dr. Ralph Sand who is studying tofu and soy cheeses at Anderson Clayton. We also visit with my cousin, Bob Shurtleff, near Dallas. Jan. 7—Jane Binante in Denton, Texas. Jan. 9—Jim Hemminger of Gregg St. Tofu Co. (started by Thom Leonard) in Fayetteville, Arkansas. His partner is Mary Weingartner. We sleep on the floor of a small house in Fayetteville and the next morning see Jim make tofu in a bathtub. Jan. 10—East Wind in Tecumseh, Missouri. Jan. 12—Stay with Robert Nissenbaum (a fine, humble fellow) in St. Louis, Missouri. I finish typewritten manuscript of "What is Tempeh?" Jan. 13—Program at a restaurant, The Sunshine

Inn (St. Louis). Sponsored by The Ethical Society. Stephen Uprichard, Dale Deraps, and Robert Nissenbaum are there.

Jan. 15—Meet David and Danette Briscoe (Kansas City, Missouri; they soon start publishing *Soycraft*, a small periodical on soyfoods), dinner with Thom Leonard at his home in Lawrence, Kansas (we have miso soup with miso that Thom made, then do a big program sponsored by the Mercantile Community Co-op in downtown Lawrence at either the Lawrence Library or Community Center—in a big downstairs room. I tape the lecture. Unbeknownst to me, Ken Bader, CEO-to-be of the American Soybean Assoc., is in attendance). Jan. 16—Visit Bob Amelay of the Omaha Food Co-ops in Omaha, Nebraska. Jan. 17—Drive across Nebraska to Denver. Jan. 18-19—Dave Bolduc and Christie Shurtleff in Boulder, Colorado. The first night we do a big tofu program in the historic Boulder Theater. That afternoon we have an audience with the Karmapa—a high Tibetan spiritual leader, who has diabetes; we give him an inscribed hardcover copy of *The Book of Tofu*. Akiko recalls cooking tofu burgers for him. That evening in a large, packed hall, we witness his Holiness conduct the Black Crown Ceremony.

Jan. 20. Jimmy Carter is inaugurated as president. Jan. 24—Program for The Colorado Farm in Hotchkiss, Colorado—way out in the boondocks. Jan. 25—Stay with Andrea Chin in Taos, New Mexico. Visit Lama Foundation high above Taos in the snow (Steve Durkee, teacher). They have many small meditation cubicles around the hillside and have just finished a nice adobe meditation hall. Near Durango, Colorado, we visit Ed Tripp, who looks lonely, sad and desolate, farming a little patch of organically grown wheat and living alone in a bare shack on coffee and cigarettes.

Jan. 26. We stay somewhere in New Mexico. Jan. 27—Program at the First Unitarian Church in Albuquerque (79 p.m.) hosted by Michele E. Martin of Jemez Bodhi Mandala Zen Center, Jemez Springs, New Mexico. Sit meditation in their cold Rinzai zendo then soak in the hot springs outside in the snow. Their teacher, Sasaki roshi, is not there. Jan. 28—Susan Berry in Silver City is supposed to host a program. We cannot find her house. At one point along in here we do a program in or near Utah in a remote church up on a little bluff. Dinner before at Frosty Hot Dog place. Jan. 29—Long drive across Arizona to San Diego. Jan. 30—Big program in San Diego for 350 people at the Ocean Beach Community School hosted by David and Barbara Salat, publishers of *Well Being* magazine. Afterwards we stayed overnight on their houseboat in San Diego Bay. Magical. Akiko had a bad cough and was very tired.

In Los Angeles we spend a day (in late January or early February 1977) with Lewis Headrick and Jimmy Silver visiting three small tempeh shops: Bali Foods (in Baldwin Park, run by Mr. Henoeh Khoe), Country Store Health Foods (in Sun Valley; Joan Harriman), and Toko Baru (in West Covina; Randy Kohler). One evening we had dinner with Mr. Yamauchi and perhaps Al Jacobson. I gave a presentation on

tofu. Afterwards, in the parking lot, Mr. Yamauchi gave me an envelope containing several hundred dollars in bills—his way of saying thank you for the work we were doing on behalf of tofu.

Feb. 1. Drive to northern California, then have dinner at the home of Herman and Cornelia Aihara (Oroville, CA).
Feb. 2. Last program of the tour for Harold Lockhard of the Sacramento Natural Foods Co-op (Sacramento, California; Program is in a modern college building).

On 3 Feb. 1977 arrive home in Lafayette, California.

On this 4-month tour the Shurtleffs, trying to do for soyfoods what Johnny Appleseed did for apples, presented 70 public programs attended by about 3,646 people, did many media interviews and appearances, and traveled 15,000 miles. They had a gross income of \$18,020 from honoraria and sales of their books (*Book of Tofu*, *Book of Miso*), tofu kits, pamphlets, and nigari. Total trip expenses were about \$5,361 plus about \$7,200 for books from the publisher, leaving a net income of about \$5,459. It was a huge, challenging, and exhausting Odyssey that bore abundant fruit in the founding of a new tofu shop almost everywhere they spoke.

1977 Feb. 9—Meeting in Lafayette (790 Los Palos Dr.) with Robert Dolgin and David Sandler (from the Farm and Farm Foods in San Rafael) and Larry Needleman leads to the establishment of Bean Machines, Inc. (BMI). The Farm places a firm order for a Japan tofu system.

1977 Feb. 12—Bill and Akiko leave America and fly to Japan. Air fare paid by Hydrometals. Address: 790 Los Palos Manor, Lafayette, California 94549. Phone: 283-3161.

948. Order forms containing names and addresses of people who purchased publications or materials from New-age Foods Study Center in Oct. 1976 (Archival collection). 1976. Lafayette, California. Order forms filled out by the person who placed the order.

Note: This is the earliest document seen (July 1999) that contains the word “wholistic.” Address: New-Age Foods Study Center, 790 Los Palos Dr., Lafayette, California

94549. Phone: (415) 283-3161.

952. *SoyaScan Notes*. 1976. Chronology of soybeans, soyfoods and natural foods in the United States 1976 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Feb. KQED-TV in San Francisco, California, airs a 30-minute special titled “Tofu.” It is an interview with William Shurtleff and recipe preparation by Akiko Aoyagi.

March. “The Joys of Soy” by Brenda Bortz, published in *Organic Gardening and Farming* magazine is the first major popular article on tempeh in America. In June, *Prevention* magazine runs a cover story on tempeh.

April. Soybeans: Brazil as a Competitive Force by J.M. Schultz and W.P. Mason submitted as a Harvard Business School MBA thesis. One of the best early in-depth analyses.

April. The second of the new wave of commercial Caucasian-run tofu shops is started by Peter and Judy Beane in Portland, Maine. There were at least 7 small commercial Caucasian-run tofu shops in America by the end of 1976.

May-June. *Mother Earth News* publishes the first of five long articles on soyfoods, each excerpted from *The Book of Tofu*.

June 2-5. First International Workshop on Low-Cost Extrusion Cookers held at Colorado State University, with 51 participants. Organized by Judson Harper and Richard Jansen, with funding from USAID through USDA. The 173-page proceedings, edited by Wilson and Stumpf, are published shortly thereafter. Cereal-soy blends are seen as having great promise for production in developing countries.

This year cereal-soy blends are first produced in Third World countries using low-cost extrusion cookers: Thripasha in Sri Lanka and Maisoy in Bolivia.

July 20. What is Tofu? pamphlet by Shurtleff and Aoyagi published by Westbrae Natural Foods in Berkeley.

Aug. 6. New-Age Foods Study Center established by Shurtleff and Aoyagi in Lafayette, California. The name was changed to The Soyfoods Center in Sept. 1980.

Aug. The Learning Tree Tofu Kit, America’s first widely sold and important tofu kit, is launched by Larry Needleman of Bodega, California, based on designs from *The Book of Tofu*.

Aug. Farm Food Company, a branch of The Farm in Tennessee, opens America’s first soy deli, in San Rafael, California. They serve tofu sandwiches, salads, salad dressings, and cheesecakes; tempeh burgers, deep-fried tempeh cutlets, tempeh with creamy tofu topping, and Indonesian delight (tempeh strips); soy milk ice cream, shakes, yogurt, mayonnaise, and whipped creme; soybean stroganoff and burritos; and TVP chili. They essentially launched the concept of second-generation soyfood products—and many of them were made with tempeh.

Sept. 23. *The Book of Miso*, by Shurtleff and Aoyagi published by Autumn Press.

Sept. 29. Shurtleff and Aoyagi begin “Tofu and Miso America Tour.” They do 70 public programs nationwide and travel 15,000 miles in their white Dodge van, continuing until 3 Feb. 1977. In the van they carry hundreds of copies of *The Book of Tofu* and *The Book of Miso* and many of Larry Needleman’s tofu kits, plus little bags of natural nigari, all of which they sell at their programs. They usually have meals and spend the night with the people who have sponsored and organized their program. They also visit numerous soyfoods producers and researchers, including The Farm in Tennessee from Dec. 21 to Jan. 2. After the tour, tofu shops started in most of the areas where they spoke.

Sept. Dr. Kenneth Bader becomes executive director of the American Soybean Association. With the help of increasing funding from checkoff programs, he ushers in an era of growth, and increased activity and strength for ASA.

Oct. 13-15. Seminars on the use of soy protein for foods and meal for feeds are held in Moscow, sponsored jointly by the U.S. Foreign Agricultural Service, the American Soybean Assoc., and the Food Protein Council. More than 200 Soviet officials attended.

Oct. *The Joy of Soy*, by Sylvia E. Anderson self-published in New Jersey.

Nov. Island Spring starts making tofu in Vashon, Washington. Founded by Luke Lukoskie and Sylvia Nogaki.

Dec. The term “soyfoods” (spelled as one word) is coined by Benjamin Hills of Surata Soyfoods in Eugene, Oregon, for use in their company name. It is first used in a book (*Tofu & Soymilk Production*) by Shurtleff and Aoyagi in July 1979, and as a magazine title in July 1980.

Dec. Morinaga Milk Industry Co. in Japan is granted the world’s first patent on a method for manufacturing aseptically packaged tofu (in Tetra Brik cartons), U.S. Patent 4,000,326.

* Kibun, in Japan, introduces East Asia’s first commercial fermented soymilk products, a line of acidophilus soymilk drinks brand-named Soena.

* Beginning of the rise of the modern soymilk industry in Japan. This is the first year that a significant amount of soymilk was sold.

* Kikkoman soy sauce passes La Choy to become America’s best selling brand of soy sauce. The three major soy sauce markets are consumer retail, restaurants and other institutions, and industrial (for food processors). La Choy may still be the leader in consumer retail; Kikkoman leads in restaurants.

* Beef consumption in America peaks at 95.4 pounds per capita. It had risen rapidly from 38.6 lb/person in 1930. After 1976 it falls steadily, hitting 75 lb/person in 1985.

* National Soybean Research Program established in Brazil, building upon the National Soybean Project (1972) and the National Soybean Research Center (1975).

953. Order forms containing names and addresses of people

who purchased publications or materials from New-age Foods Study Center in December 1976 (Archival collection). 1976. Lafayette, California. Order forms filled out by the person who placed the order.

954. Phillipps, Stanley N. 1976. The HF [health food] industry has come of age. *Health Foods Retailing*. Dec. p. 70-78, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256-56.

• **Summary:** In this, the 40th anniversary issue of this publication, the author, a two-time president of the National Nutritional Foods Association (NNFA), reminisces about the history of the industry and the NNFA. He has been in the health food business for almost 56 years. In 1920 in Cincinnati, Ohio, he began selling the full line of 25 products from Battle Creek Sanitarium Foods. Hain Health Foods of California was one of his first suppliers. Figco was a big selling coffee substitute. Early lecturers who drew large audiences were Paul C. Bragg (1932), Gayelord Hauser (very high class), Edward McCollum, and Walter Hadson. A major industry change came at the end of the 1930s when new FDA laws prevented manufacturers or retailers from saying much about their products. The 1930s was the golden era, when people became aware of “the harmful effects of devitalized foods.” The main product lines during the 1930s and 1940s were Paul Bragg’s Live Vital Foods [sic, Live Food Products], Gayelord Hauser’s Modern Products, American Dietaids (formerly Tam Products, Inc.), and Alberty Foods. *Better Nutrition* was a major health food magazine. Eugene Schiff was a pioneer who brought stores some of the first natural vitamins.

“The real booms in the industry came at many different times and I will mention a few of them. Gayelord Hauser’s

book, *Look Younger, Live Longer*, was one of the books that in 1950 did a terrific job on the five wonder foods, brewers yeast, blackstrap molasses, wheat germ, low-fat skim milk powder and yogurt. This book was the top seller on the non-fiction list for weeks and weeks, and it brought people into the health food stores for these and many other foods so that a real demand for products began to cause scarcities in these items. The business boom from this book was tremendous and it lasted for a long time...

Calories Don't Count, by Herman Taller, M.D., was another book that created an unbelievable demand for protein foods and low carbohydrate foods... Then came the Dextrose boom... The biggest boom and perhaps the most long lasting was the Adelle Davis books that brought people to the stores in droves seeking the natural vitamins and supplements.

"From her first book, written in story-book fashion, and called *You Can Get Well* in 1939, Adelle Davis became the queen of the health food movement.

"Hauser's books, Kordel's books, Bragg's books, Ancel Keys book, N.S. West, Mildred Lager, Dr. Wm. Howard Hay, and H. Curtis Wood, M.D., all wrote interesting and well studied books that brought lots of business to our stores across the nation. Linda Clark, Rachel Carson. Dr. Jarvis and many others have written books that bring customers to your door."

Concerning the history of the NNFA, in 1937 Anthony Berhalter had a consumer organization started called the American Health Food Association. Berhalter, a man of great foresight, operated a bakery and health food shop on North Clark Street in Chicago. He made fresh-fruit coffee cakes from whole wheat flour, which he procured from Elam Mills on Damen St. in Chicago. The Association's first convention was in the spring of 1937 in Chicago. About 150 people attended. Walter Hodson was one of the speakers. Companies that exhibited included Live Food Products [Paul Bragg], Alberty Products, American Dietetics (at that time known as Tam Products, Inc.), Battle Creek Scientific Foods, Chippewa Spring Water Co, Dietetic Food Co. of New York (Diamel), Elam Mills, Health Food Jobbers, H.W. Walker Company, Loeb Dietetic Foods, Modern Diet Products, Inc., Natural Health Products of New York, Nutty Brown Mills of Texas, Parkelp of California and Vegetable Juices Inc. of Chicago.

After the 1937 meeting a new organization was formed named the National Health Foods Association. Its first convention was in the summer of 1938 in Chicago, which then became its headquarters. The convention lasted 3 days and the 800 to 900 attendees listened to speakers like Paul Bragg and Edward McCollum. Thereafter conventions were held each year; retailers, manufacturers, and distributors all met. 1947 was a low point in the association's history, then Stanley Phillips stepped in and helped create a comeback. The 1948 meeting was in Coronado, California. In 1948 the Association was named the National Dietary Foods Assn. In

1964, with \$30,000 in the treasury, the Association acquired its first full-time secretary. *Health Foods Retailing* magazine, published originally by Lelord Kordel and then by Jack Schwartz, became designated as the association's official publication. In 1966 Phillips resigned from the NDFA and helped start a new retailers organization, ADRA, which merged back into NDFA in 1970. The new organization was called the National Nutritional Foods Assoc. (NNFA). The 1975 convention at the MGM Grand Hotel in Las Vegas was a highlight of the NNFA in its heyday. Throughout its history, and especially in more recent decades, the industry's greatest adversary has been the U.S. Food and Drug Administration (FDA).

955. Product Name: Adzuki Beans (Dry).

Manufacturer's Name: Eden Foods, Inc. (Importer). Grown in China (PRC), then in Japan, then in Michigan.

Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104.

Date of Introduction: 1976.

Wt/Vol., Packaging, Price: 15 oz (425 gm) can.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Ron Roller, CEO of American Soy Products in Saline, Michigan. 1991. Nov. 27. Starting in about 1969, Eden Foods bought azuki beans from Erewhon and sold them at the Eden retail store in Ann Arbor. Eden Foods originally imported these azuki beans (the Tientsin small red beans—along with black soybeans) in 1975 or 1976 from China. They dealt directly with the Chinese government. Then both types of beans were imported from Japan (from the Muso Co.). The beans were sold as uncooked dry beans. After that, Ron had the black soybeans grown in Michigan. He also distributed the azuki beans to farmers, but they did not do very well. The azuki beans from Japan grew well in Michigan, and Ron believes that many of the azuki beans now being grown in America (in Michigan, Ohio, Indiana) are from that Japanese stock.

Ad in *Vegetarian Times*. 1992. Jan. p. 31. "Bean Cuisine" Shows a color photo of canned organic adzuki, black, garbanzo, pinto, navy, and kidney beans.

956. Product Name: Brown Rice (Genmai) Miso.

Manufacturer's Name: Erewhon (Importer). Made in Japan by Sendai Miso Shoyu Co.

Manufacturer's Address: 33 Farnsworth St., Boston, MA 02210.

Date of Introduction: 1976.

Ingredients: Brown rice, soybeans, water, sea salt.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated preferably.

New Product–Documentation: Ad in *East West Journal*. 1977. "Erewhon: Our traditional foods are the foods of the future." "Recently a brown rice (genmai) miso has been added to the Erewhon line of imported foods. Based on the

traditional techniques and standards, this new variety was two and a half years in development before Mr. Ko Haga, brewmaster of Sendai [Miso Shoyu K.K.] produced what he considered a successful brown rice koji, or starter.” Sendai “produced a huller which merely scratches the bran along the ridges of each grain; even though only 1% of the grain is lost in the process, this is sufficient to permit spores to enter the inner starches. You will find genmai miso much sweeter than the kome [white rice] variety, due to the higher ratio of rice to soybeans in this special product. Sendai uses a regionally grown rice, called Sasanishiki, which is highly regarded in Japan, and the soybeans used are the ‘Prize’ variety grown organically in Minnesota by farmer Ed Ricke. Genmai miso is more expensive than the other varieties Erewhon offers. Besides being the first miso made with organic soybeans,” it also undergoes an 18-month fermentation.

Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 236. In 1968 Erewhon started to import miso and shoyu from Japan. “A wholesale and distribution company was started that year and soon it was trucking a line of fine Japanese imported red, barley, and Hacho misos to a growing number of natural food stores.” By 1970 sesame miso and tekka miso were added to the Erewhon line. By 1976 brown rice (genmai) miso was added.

Ad (7.5 by 13 inches, full color) in *Natural Foods Merchandiser*. 1989. Feb. p. 25. There are now 4 varieties of miso under the Erewhon brand: Hacho (note new correct spelling), genmai, kome, and mugi. Note that all still use the esoteric Japanese names. Plastic bag packages are colorful and attractive. On each is the prominent endorsement: “Recommended by Michio Kushi. Macrobiotic quality.”

957. **Product Name:** Food for Thought Tofu: (Soy Bean Curd).

Manufacturer’s Name: Inter-Natural Trading (Distributor).

Manufacturer’s Address: 12302 Exposition Blvd., Los Angeles, CA 90064.

Date of Introduction: 1976.

Ingredients: Selected quality soy beans, water, soy bean oil, food grade lime.

Wt/Vol., Packaging, Price: 12.5 oz. Retail for \$0.65.

How Stored: Refrigerated.

New Product–Documentation: Label. 1976, undated. 4 by 2.5 inches. Self adhesive. Black on orange. Gives 4 serving suggestions. “Send for free recipes with stamped, self-addressed envelope.”

958. Dinaburg, Kathy; Akel, D’Ann Ausherman. 1976. *Nutrition survival kit: A natural foods recipe and reference guide*. San Francisco, California: Panjandrum Press and MidPress Productions. viii + 248 p. Illust. Index. 23 cm. [152 endnotes]

• **Summary:** This book advocates a natural-food (but not vegetarian; see p. 156-58) diet in place of a junk-food meat-

centered diet.

Chapter 6, which emphasizes the importance of dietary fiber—found in whole grains and many other natural foods—advises (p. 110) that cooks use 2 tablespoons of soy granules for every cup (dry measure) of grain or grain product cooked. This will not affect the texture or taste, but it will usually raise the NPU to a level comparable to or greater than that of meat. On page 119 in this chapter is a recipe for Grainburgers (with soy grits or granules and “tamari sauce”).

The section on “Sprouts” (p. 164-66) includes soy sprouts (good stir fried) and sprouting instructions.

Chapter 8, titled “Meat is Bean Replaced” (p. 168-88) discusses: vegetarianism, federal meat inspection, DES (hormones in animal feeds), antibiotics in animal feeds, beef and cancer, world famine, meat and ecology, lost protein, protein, essential amino acids and Net Protein Utilization, cost of 100 gm of usable protein, nutritional value and cost comparison of meat and non-meat foods, mutual supplementation, the “cost” of meat protein, lingering meat myths, soybeans. Soy recipes: Soybeans (pressure cooked). Soybeans (not pressure cooked). Baked beans. Soy cheese (homemade tofu). Soybean curry. Mexican beans (soybean frijoles refritos). Soybean chili (incl. “vege burger”). Bean and/or grain patties.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Grainburgers” (or “Grainburger”).

Note 2. A paperback edition was published in May 1978 by Jove/HBJ.

959. Duquette, Susan. 1976. *Sunburst Farm family cookbook*. Santa Barbara, California: Woodbridge Press Publishing Co. 303 p. Illust. by Donna Wright. Photographs by Mehosh Dziadzio. From the Brotherhood of the Sun. Recipe index. 23 cm.

• **Summary:** “The Brotherhood of the Sun is a family of more than 300 people, who have dedicated themselves to living in harmony with all people and all things. Our desire is to follow the simple laws of God and nature. In order to create an environment in which this is possible, we have established four communities upon thousands of acres of farm and ranch land in the coastal mountains around Santa Barbara, California... In order to help support ourselves and to share with other people our way of life, we have established a large organic foods complex in Santa Barbara called Sunburst Organic Foods.

“This organization includes a large wholesale warehouse that ships food to stores across the country, six large retail markets (with future markets projected along the coast), a community store, a restaurant called ‘The Farmer and the Fisherman,’ a whole-grain bakery and a fresh juice-bottling plant that distributes along the west coast.”

Although this natural foods cookbook is not entirely vegetarian (it includes a chapter titled “Fish,” p. 100-123,

and many fish and shellfish recipes), the rest of the book is vegetarian and one long chapter (p. 64-99) is titled "Vegetarian Main Dishes." The illustrations are beautiful.

Soy-related recipes include: Tofu-vegie soup (p. 17). Miso-onion soup (p. 17). Many recipes topped with "Baco-bits." Bean salad (with soy beans, p. 35). Sprouts (incl. soy sprouts, p. 38-39). Tamari-onion gravy (p. 63). Enchiladas (filled with tofu or soy beans, p. 85). Corn pudding with Baco-Bits (p. 168). Soy flour cakes (pancakes, p. 268).

The chapter titled "Beans and pasta" (p. 124-39) has a section on Soybeans subtitled "Or: How to get protein without really trying." Recipes and descriptions include: How to cook whole soybeans (with or without pressure). Soybean loaf. Soyburgers. Soy milk. Tofu (curded with lemon juice or vinegar). Tamari and miso. Cheese-soybean soup. Soy nuts. Soy grits. Soy flakes. Soybean cheese spread.

The Glossary (p. 295-97) contains descriptions of gluten, lecithin (from the soybean), miso, protein powder, tamari, seaweeds, tofu. Address: Santa Barbara, California.

960. Koepf, Herbert H.; Pettersson, Bo D.; Schaumann, Wolfgang. 1976. Bio-dynamic agriculture: An introduction. Spring Valley, New York: The Anthroposophic Press. x + 429 p. Illust. Index. 21 cm. [204 ref]

• **Summary:** This excellent new English-language edition of the basic book about Bio-Dynamic agriculture, was formerly available only in German. The German edition, *Biologische Landwirtschaft* appeared in 1974. Bio-Dynamics is a method of growing that is biological at its root and metaphysical at its crown. There is no incompatibility with organic methods, but there are many additional considerations. "The Bio-Dynamic folks are the wizards of the biological agriculture movement and, as anyone who has visited a Bio-Dynamic garden [or farm] can attest, they get results."

"The bio-dynamic movement proceeded from a cycle of eight lectures given by Rudolf Steiner at the farm of the Koberwitz estate in Silesia in 1924" [June 7-16]. Note: As of Sept. 2015 Silesia is located mostly in western Poland.

Contents: 1. Bio-Dynamic agriculture today: A new way of thinking is gaining ground, emancipated agriculture, organic movements, what do we mean by "natural"?, a short history of the bio-dynamic method, understanding the bio-dynamic method, a brief description of the bio-dynamic method, conflicts of interests and unsolved questions, population growth and bio-dynamic agriculture, what is the difference between organic and bio-dynamic agriculture?

2. Farm organism and landscape. 3. Plant life, soils, fertilizing. 4. Practical aspects of the bio-dynamic principle. 5. Practical experiences on bio-dynamic farms. 6. Animal husbandry and food production. 7. The sick animal. 8. The bio-dynamic method in garden, orchard and vineyard. 9. Quality through growing methods. 10. Bio-dynamic production and the consumer. 11. Conclusion and future prospects.

Note: The bibliography of this book is poorly designed and hard to use. Address: 1. Prof., Dr. agr., Emerson College, Forest Row, Sussex, England; 2. Lic. agr., Jarna, Sweden; 3. Dr. med. vet., Bad Vilbel, West Germany.

Address: Dr. (Honorary), USA.

962. Shepard, Sigrid M. 1976. The Thursday night feast and good plain meals cookbook: Natural foods of the Eastern Hemisphere: China, Japan, Indonesia, India, the Middle East. Spokane, Washington: New Age Printing. vii + 442 p. Illust. by Margaret V. Putman. Index. 28 cm.

• **Summary:** This is a natural foods cookbook (not vegetarian), with strong influence from East Asia. The author's great aunt, Myra, was a missionary in China. Pages 5-7 describe how to make a "bean curd box" for making tofu, and then how to make tofu at home. Among the many soy-related recipes are about 55 for tofu, 7 for miso, 2 for whole soybeans, and many for soy sauce.

Pages 431-34 contain a directory of natural foods provisioners and a directory of Oriental foods provisioners.

Published in 1979 under title: *Natural Food Feasts from the Eastern World...*

963. Stare, Frederick J. 1976. Food faddisms. In: Dwain N. Walcher, N. Kretchmer, and H.L. Barnett, eds. 1976. Food, Man, and Society. New York and London: Plenum Press. xv + 288 p. See p. 174-85.

• **Summary:** Contents: Introduction. The health food bonanza. Definitions (fad, quack, charlatan, health foods, organic foods, natural foods). Why so much food faddism and quackery. Eating—safely—through the eighties. Food in a growing world (i.e., in a world with a rapidly growing population, which is now over 4 billion). Conclusion.

Dr. Stare considers the following to be food faddists: Sylvester Graham (of Graham cracker fame), Horace Fletcher (who advocated thorough chewing of each bite of food), Bernard [sic, Bernarr] Macfadden ("the self-acclaimed king of the physical culturists"), Henry Ford, John D. Rockefeller, and George Bernard Shaw.

Dr. Stare states that no vitamin or mineral supplement is needed by normal, healthy people who are eating a balanced diet. He also believes that many health food promoters are food faddists and quacks.

In the section on "Definitions" he refuses to define "organic foods" (short for organically grown foods) and "natural foods" in the commonsense way that they are defined by the industries that grow and make them. He deliberately defines "organic" in the chemical sense as "containing carbon," instead of as "grown without the use of chemical fertilizers, pesticides, or herbicides" or as "Organic

farming is the form of agriculture that relies on techniques such as crop rotation, green manure, compost, and biological pest control, to maintain soil productivity and control pests on a farm.”

Likewise he knows full well that natural foods are those which have had little or nothing added (additives) or removed (refining). So brown rice and whole wheat flour are natural foods whereas white rice and white flour are not. Address: Prof. of Nutrition, Harvard School of Public Health, Boston, Massachusetts.

964. Muso Shokuhin. 1976? Distributors of Muso foods in Canada, South America, Europe, and Australia (Leaflet). Osaka, Japan. 1 p. Undated.

• **Summary:** The name, address, and phone number of each company is given. Canada: Lifestream Natural Food, Inc. (British Columbia). Manna Foods, Inc. (Ontario).

South America: Zentro Macrobiotico de Venezuela.

965. *Los Angeles Times*. 1977. Display ad: Announcing the Grand opening of Mrs. Gooch's Natural Food Store. A complete one-stop supermarket stocked with products which contain no chemical additives, no unpronounceable preservative agents, no artificial flavorings, no artificial colorings and no sugar. Jan. 30. p. 6.

• **Summary:** “Mrs. Gooch's Natural Food Store is truly an idea whose time has come.”

“We invite you to drop in and get in on a good thing during our gala Grand Opening Celebration, now through Sunday, Feb. 6.”

“When you come in, be sure to introduce yourself to owner Sandy Gooch; manager Don Volland;...”

Note: This is the earliest document seen (March 2020) concerning “Mrs. Gooch's Natural Food Store” or “Sandy Gooch.”

Note: She was a former kindergarten teacher who went on to build a successful chain of natural food supermarkets in Southern California. Gooch's rules—no sugar, white flour, chocolate, or coffee—were so stringent that any product she approved of became known as “Goochable,” and set a standard for the entire natural foods industry.

In 1993, when Whole Foods Market bought out Mrs.

Gooch's the “Goochable” rules were forgotten. The meaning of the word “natural” changed almost overnight.

966. Organically-grown soybeans start to be used by many companies in the United States and Europe to make commercial soyfoods (Important event). 1977. Jan.

• **Summary:** Here is a list of the pioneers, their companies and their products—all introduced during 1977.

Jan. Southwest Tofu Co., Santa Fe, New Mexico (Tofu, Kathryn O. Bennett).

Jan. Jonathan, Ekren (near Antwerp) Belgium (Soy milk, Jos van de Pongeele).

Jan. The Soy Plant, Ann Arbor, Michigan (Tofu, Steve Fiering; July, Soy milk).

March. Surata Soyfoods, Eugene, Oregon (Nigari Tofu, Benjamin Hills).

June. Bhaga Tofu (renamed Lecanto Tofu Shop), Lecanto, Florida (Tofu, Marvel Huffman).

Sept. Quong Hop & Co., South San Francisco, California. (Tofu Dressing, Jim Miller & Stanley Lee).

Sept. White Wave, Boulder, Colorado. (Tofu, Steve Demos).

Nov. Redwood Natural Foods, Santa Rosa, California (Organic Tofu, Greg Hartman).

Sometime in 1977. Swan Foods, Miami, Florida. (Tofu Chip Dip, Tofu Baked with Tamari, Tofu (Marinated), Mary's Roasted Cashew Tofu Cheesecake, Mary's Tofu Rice Salad, Soy Melk, Tofu: Organic (Soybean Curd), Mary's Rice Pudding, Robert Pung & Mary Brooks).

967. Oblinger, Jan. 1977. Tofu, nutty burgers served on ‘veggie line’ at UMO. *Bangor Daily News (Maine)*. Feb. 16. p. 6.

• **Summary:** “Students at the University of Maine at Orono are eating strange things these days. And they've never been healthier. The Office of Dining Services is making available to students a vegetarian menu in addition to the regular meat and potatoes fare served in the campus' dining halls.” Included on the unique menu are tofu burgers—“a small part of the college's campaign to get more vegetables and less meat to those students who want it.” Many students who eat at the veggie line do not consider themselves vegetarians; they just like the food. The Bear's Den, a student restaurant at the Memorial Union, now offers a tofu salad sandwich, as well as a meatless “nutty burger” based on cottage cheese.

“According to UMO's assistant manager of dining services, Anne Johnson, tofu is purchased from Peter and Judy Beane of the No-moo Dairy in South Portland [Maine], the only source north of Boston [Massachusetts]... Some of the other hard-to-find items are bought through a Boston company named Erewhon.”

“The university learned about tofu in a book by Bill Shurtleff and Akiko Aoyagi, who demonstrated cooking with tofu and miso at the college in November. They showed how

to prepare tofu or miso for less than eight-and-a-half cents a pound.”

Contains “veggie” recipes for Nuttyburger, and Maveric Chili (with 1 cup whole soybeans). Five photos show students “dining on the tofuburger,” which contains soybean curd, carrots, onions, and sunflowers. Most said the flavor “was hard to describe. Several said it tasted a lot like a fish sandwich.” Address: Daily News Staff.

968. **Product Name:** Health Valley Tofu.

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 670 Mesquit St., Los Angeles, CA 90021.

Date of Introduction: 1977 February.

Ingredients: Soybeans, water, nigari.

Wt/Vol., Packaging, Price: 12 oz. Water packed in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

New Product–Documentation: Ad in *Mother Earth News*. 1977. No. 43. Jan/Feb. p. 43. “Write for free tofu recipes and discover Health Valley Tofu. One of nature’s super foods. Made from one of the most perfect foods in the vegetable kingdom... soybeans. Tofu is a delightful addition to soups, stews, meat loafs and salads... enhances the texture and flavor of stir-fry dishes and chop suey.” Note: This ad is in the same issue as a long article on soymilk.

Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 248. Soy products. Refrigerated. “Health Valley Organic Tofu w/ nigari.”

969. Health Valley Natural Foods. 1977. Write for free tofu recipes and discover Health Valley Tofu (Ad). *Mother Earth News* No. 43. Jan/Feb. p. 43.

• **Summary:** “One of nature’s super foods. Made from one of the most perfect foods in the vegetable kingdom... soybeans. Tofu is a delightful addition to soups, stews, meat loafs and salads... enhances the texture and flavor of stir-fry dishes and chop suey.”

Note 1. This is the earliest document seen (March 2020) concerning Health Valley and soyfoods.

Note 2. This is the earliest English-language ad seen for tofu with the word “tofu” in the title. Note 3. This ad is in the same issue as a long article on soymilk. Address: 670 Mesquit St., Los Angeles, California 90021.

970. Root, Evan. 1977. Re: Payment of bills. Letter to Bill Shurtleff, March 15. 1 p. Handwritten, with signature on letterhead. Photocopy.

• **Summary:** States that Erewhon paid a bill for 25 tofu kits promptly (wholesale at \$7.95 each); Shurtleff mistakenly thought it had not yet been paid.

“Thank you for the information on koji and koji starter supply. I wish you continued good fortune on your wonderful

work.” Address: 33 Farnsworth St., Boston, Massachusetts 02210. Phone: (617) 542-1358.

971. Domowitz, Pat. 1977. Health food firm sues 5 retailers. *Hartford Courant (Connecticut)*. March 23. p. 10B.

• **Summary:** “A Boston health foods distributor has sued at least five state health food retailers, charging them with violating federal antitrust laws by boycotting the distributor for selling to food cooperatives.”

This week, Erewhon filed the suit at the U.S. District Court in Hartford. In a previous action, filed in Boston, Erewhon sued 15 other natural food stores in Connecticut and Massachusetts.

In its lawsuits, Erewhon charges that in about 1975 the retail stores began complaining about Erewhon’s sales to food cooperatives, arguing that a distributor breaches “common basic loyalty” owed to the retailer by “selling directly to customers at wholesale prices.”

Erewhon—a privately owned firm with sales of about \$7 million a year—says the boycott started last year and has cost the company about 5% of its market.

Note: Erewhon eventually won this lawsuit, but its legal bills were so high that it could never pay them. This event marked the beginning of Erewhon’s downfall.

972. American Academy of Pediatrics, Committee on Nutrition. 1977. Nutritional aspects of vegetarianism, health foods, and fad diets. *Pediatrics* 59(3):460-64. March. [41 ref]

• **Summary:** Vegetarian and vegan diets can be adequate if selection of foods is varied. Discusses the excellent health, rarity of obesity, and lower serum cholesterol levels of vegetarians, and the serious hazards of Zen macrobiotic diets, and excess intakes of vitamins A, C, D, and E, and protein. Address: USA.

973. **Product Name:** Eden Tamari: Natural Shoyu.

Manufacturer’s Name: Eden Foods, Inc. (Imported from Muso Shokuhin). Made in Japan.

Manufacturer’s Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1977 March.

Ingredients: Whole soybeans, whole wheat, water, sea salt.

Wt/Vol., Packaging, Price: 8 oz bottle, 1 pint bottle, 1 quart bottle, 1 gallon can.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods. Spring and Summer Catalog 1977. On page 25 is the first record of “Eden Tamari: Natural Shoyu” which is sold in 8 oz, pints, quarts, or 1 gallons cans. “The Muso Shokuhin Company has been supplying the macrobiotic community of the United States with tamari, miso and sea vegetables for the last ten years. All of Eden’s Japanese imports are supplied by Muso... Eden tamari is aged naturally (in wooden kegs) for 30 months and is made from whole soybeans, whole wheat,

water, and sea salt.” A photo shows 1 label and 3 bottles of “Eden Tamari: Natural Shoyu.” Prior to this, Eden had imported Tamari Shoyu under the Erewhon brand.

Ad in Soykraft. 1979. Summer. p. 38. “Traditional Soy Products from Eden Foods.” “Eden tamari is a traditional shoyu naturally aged for three years in cedar vats. It is made from whole soybeans, water, and sea salt, giving it the depth and richness only slow, seasonal aging can allow. Available in 8 oz. pint, 1 gallon, and 4.75 gallon sizes. Also in 55 gallon drums.”

Eden Foods, Inc. 1991. Feb. “Eden Foods Product Overview.” “1972–Trade relationship began with Muso Company, Ltd. of Osaka, Japan.”

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. Originally Eden bought tamari and miso from Erewhon. Then Eden started importing them from Mitoku; they were importing from both Mitoku and Muso in the very beginning.

Letter from Bill Bolduc, a founder of Eden Foods. 1991. Dec. 4. Eden started to import a line of foods from Japan in about 1974 or 1975. Imports had definitely not yet started by the fall of 1973.

974. Eden Foods. 1977. Spring and summer catalog 1977. 4601 Platt Rd., Ann Arbor, MI 48104. 53 p.

• **Summary:** See next page. On the cover are bags, trays, and scoops filled with natural foods. Page 25 states that Eden now sells Tamari Soy Sauce (Eden, or Marushima), plus Hacho, Mugi, and Kome Miso. This is the earliest catalog seen in which Erewhon’s name is not listed after any tamari or miso products.

On page 25 is the first record of “Eden Tamari: Natural Shoyu” which is sold in 8 oz, pints, quarts, or 1 gallons cans. A photo shows the quart bottle with label, and the dispenser. It is “made from whole soybeans and naturally fermented in wooden kegs for 30 months... The Muso Shokuhin Company has been supplying the macrobiotic community of the United States with tamari, miso and sea vegetables for the last ten years. All of Eden’s Japanese imports are supplied by Muso.” Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

975. Dolgin, Robert. 1977. Re: Information on a heat sealing machine for tofu, Varipack trays, and polyethylene film. Letter to William Shurtleff in Japan, April 19. 1 p. Typed, with signature on letterhead.

• **Summary:** Contains detailed descriptions of the machine, trays, and film. The Varipak trays are available from Sealright Corp. in Los Angeles. Rolls of polyethylene film can be purchased from the Richmond Corp. in Redlands, California. Eddie Okita [in Los Angeles] also has film and packaging machines, but his cheapest models [automatic] run up from \$2,000 and package 1,200 pieces per hour.

“We are definitely interested in the small sealers you have, so send brochure and info on them ASAP. Also send

the 6 stainless steel settling boxes you ordered.

“We would like to have definite confirmation on the insurance, the agent, and the shipping route, because Westbrae has told us that they will not cover insurance, and that they are not particularly interested in bringing equipment over in their container.

“Payment via a letter of credit would be preferable for us, if possible for you. If not, let us know how payment should be made.”

Farm Foods has placed an order for tofu equipment, which Shurtleff is working to expedite in Japan and to answer Dolgin’s questions.

The letterhead contains the words “The Farm Food Co.” written in large arch. Below the company name is a circular logo, which shows rows of crops (soybeans) in a field converging in the distance at the foot of three mountains. Below that in much smaller letters: “Specializing in Vegetarian Foods.” Below that and to the left is the address; to the right is the phone number. Address: The Farm Food Co., 820 B St., San Rafael, California 94901. Phone: 415-454-3797.

976. Shurtleff, William; Aoyagi, Akiko. 1977. Koji & koji starter for miso and shoyu. Lafayette, California: New-age Foods Study Center. 3 panels each side. Each panel: 22 x 9 cm. April 26. Catalog.

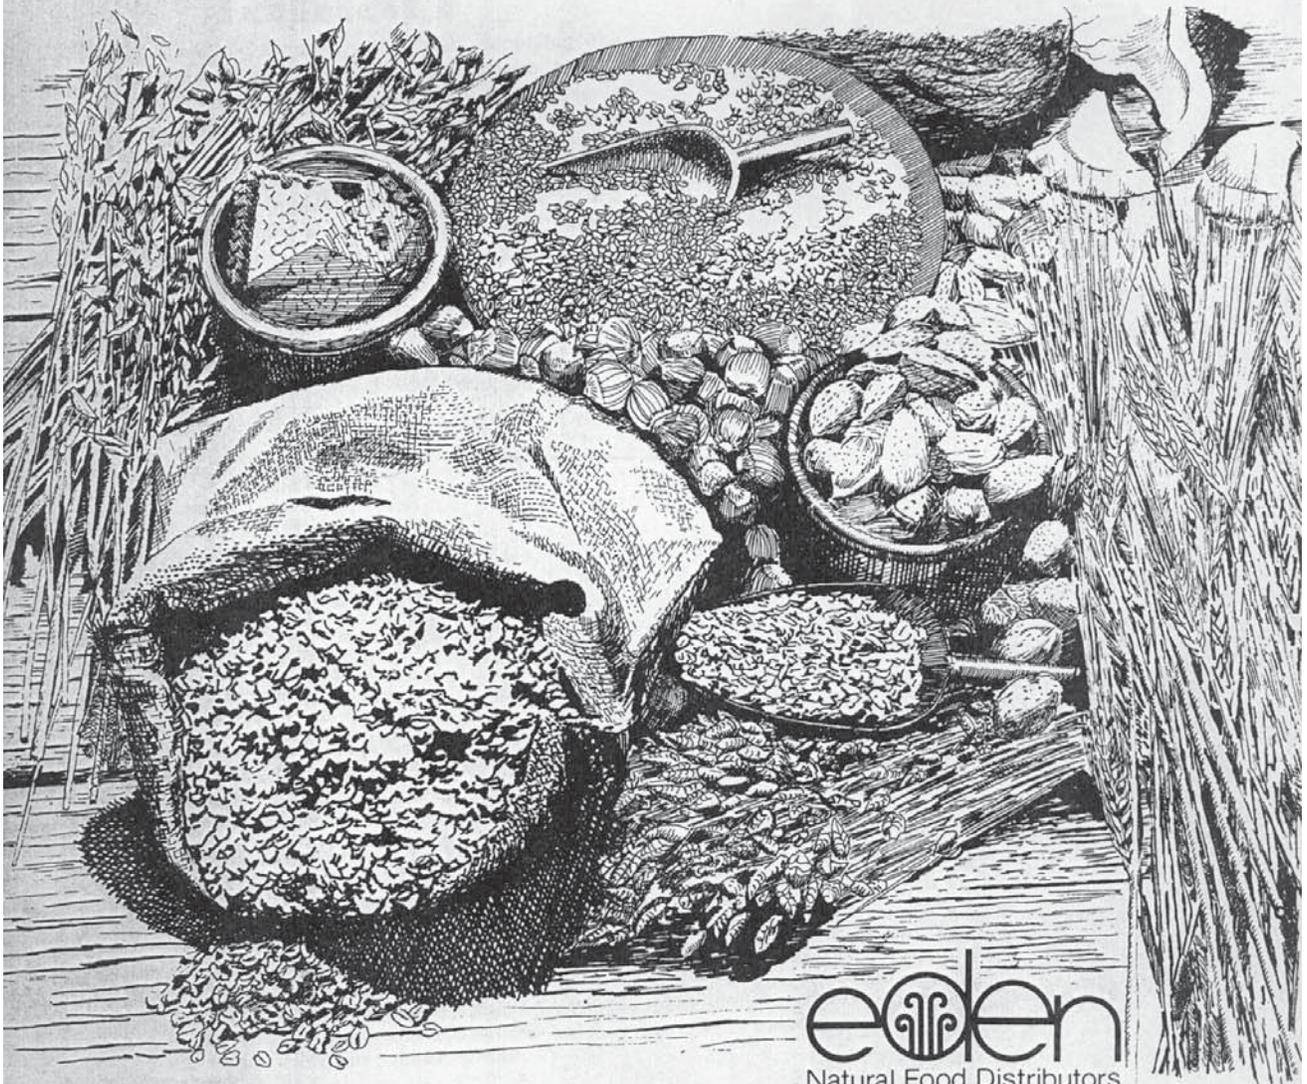

• **Summary:** This is a revised, expanded, typeset (by Jan Herhold), and illustrated (by Akiko Aoyagi) version of a similar leaflet first printed in June 1976. Printed with black ink on saffron colored (yellowish orange) paper, it begins by noting: “Now you can easily make your own miso or natural shoyu (soy sauce) at home using either high-quality, reasonably-priced koji or koji starters available in the United States; illustrated instructions are given in *The Book of Miso*.

Part I describes two types of koji: Firm granular koji, and soft mat koji. Part II describes nine different types of koji starter for which are sold in three textures: Spore-powder texture, whole-grain texture, and meal texture. The nine different types of koji starter are for: Red miso, barley miso, soybean miso, mellow barley miso, sweet white miso, light-colored miso, fast white miso, amazake or pickling, or shoyu. All the above are made by the prestigious Japan Brewing Company (*Nihon Jozo Kogyo*), which employs only the very finest traditional, natural methods.

Sources of ready-made koji: Miyako Oriental Foods (Los Angeles, California), Westbrae Natural Foods (Emeryville, California), Chico-San Food Co. (Chico, California), and Janus Natural Foods (Seattle, Washington). Sources of koji starter: Westbrae Natural Foods sells the 5 most widely used koji starters; all are imported from Mitoku Trading Co., Tokyo, Japan. Address: Lafayette, California.

977. **Product Name:** Lima Soy Sauce (Formerly named Lima Tamari Soy Sauce).

Spring and Summer Catalogue 1977

eden

Natural Food Distributors

4601 Platt Road Ann Arbor, Michigan 48104
Telephone: (313) 973-9400 · Cable: EDENWTD

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: 1144 West 1st St., Chico, CA 95926.

Date of Introduction: 1977 May.

Ingredients: Water, soybeans, wheat, salt.

Wt/Vol., Packaging, Price: Glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Ad in *The Macrobiotic*. 1977. May. p. 25, and 1978. June. p. 24. "Lima Soy Sauce." "There is a beginning, there is an end.' This is true in the case of the name 'Tamari.'" "The word 'Tamari' began 16 years ago when George Ohsawa introduced the macrobiotic movement to this country. He wished to distinguish the macrobiotic soy sauce from the regular commercial soy sauce sold in this country. 'Tamari' is not soy sauce at all, but a word meaning 'liquid drip' which was originally used to describe liquid residue from Miso... Chico-San is now bottling their product, Chico-San Lima Sauce in Japan. This has improved the quality by eliminating a second exposure to air which occurs when soy sauce is bottled here. A problem, though, in importing soy sauce bottled and labeled in Japan is that the Japanese export officials have prohibited the use of the word 'Tamari' on the soy sauce label.

"Our label on the Chico-San Lima 'Tamari' Soy Sauce bottle now will change to simply Chico-San Lima Soy Sauce. We call it 'Lima' soy sauce because it is especially selected for Chico-San by Mrs. Lima Ohsawa who is recognized as the world's leading exponent on Macrobiotic cuisine and diet."

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 127. A photo shows the bottle and label.

978. Erewhon, Inc. 1977. Erewhon. Spring 1977. Boston, Massachusetts. 24 p. Catalog and price list. 28 cm.

• **Summary:** Erewhon catalog's first full color cover shows the front of a 1-lb. box of "Erewhon Number 9–Salt free granola with bran." A shiny locomotive, pulling a long train of cars, has the number "9" on its front.

On page 22 is a full page of "Ordering information," including delivery routes and ordering deadlines, terms, returns and freight claims.

"Erewhon, Inc." now distributes the following lines: "Acres, USA. After the Fall. Ak Mak. Al Capone Dairy. Alta Dena. Arden-Lindsey Life. Arrowhead. Aztec. Barbara's. Cattier. Celestial Seasonings. Chico-San. Deaf Smith. Donna's. Dr. Bronner's. Erewhon. *East West Journal*. Fearn's. Health Valley. Heinke's. Knudsen's. Mother Earth. Nature's Gate. Natural Living. New Age Journal. Nectarel. Niblack's. Niks Snaks. Orgene. Pure & Simple. Redwood. Sands Springs. Sandt's. Talking Food [pamphlets]. Tom's Natural Soaps. Tree of Life. Wehah Farms–Lundbergs. Whitmer. Wm. Escott."

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210; New York City office: 303 Howe Ave., Passaic, New Jersey 07055. Phone: 617-542-1358 and 212-594-6455.

979. Harmony Foods. 1977. Bulk price list. London, England. 8 p. May. 16 by 20 cm. Folded (not stapled).

• **Summary:** Printed with black ink on light green paper. On the bottom half of the cover is an illustration of a big-bellied Buddha (or perhaps Bodhidharma) walking with both hands resting on a rod behind his neck.

A running table shows: (1) Product name. (2) Contents of each case. (3) Cost [Price] of each case. (4) Unit. Product categories: 1. Whole cereals. 2. Cereal products. 3. Seeds and pulses 4. Sauces and spreads: 6 products incl. Peanut butter, crunchy. Tahini sesame cream, dark. Tamari soy sauce. Miso soy puree, mug. Miso soy puree, Hatcho.

5. Oils. 6. Drinks and ginseng. 7. Specialties, salt, and apricots. 8. No-foods. 9. 'Harmony' packets and jars. Seaweeds: Wakame. Hiziki [hijiki]. Kombu. 6. Ginseng. Note: No books or magazines. On the back cover is an aerial map of Harmony Foods. Address: 1-19 Earl Cottages, Earl Road, London, SE1 5HG. Phone: (01) 237-8396/7.

• **Summary:** For each of the following products there is a photo of the front of the package and a description: Spike (instant seasoning), Vege-Sal, New Veget, Swiss Kriss (natural laxative), and Swiss Kriss tabs. Address: Milwaukee, Wisconsin 53209.

981. *Natural Food and Farming (Atlanta, Texas)*. 1977. Table of contents. 23(12):1. May.

• **Summary:** "NFA officers: Joe D. Nichols, M.D., Atlanta, Texas." An article starting on p. 23 is titled "What is ecology?"

982. Potter, Michael. 1977. Certificate of change of registered office and/or change of resident agent: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce–Corporation and Securities Bureau. 2 p. May 27. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc. The address of the former registered office is 330 Maynard Street, Ann Arbor, Michigan 48105 [sic, 48108]. The address of the registered office is changed to 4601 Platt Road, Ann Arbor, Michigan 48104.

The name of the resident agent is Timothy Redmond.

Signed by Michael Potter, President, 27 May 1977. Filed by the Michigan Dep. of Commerce on 8. June 1977. Address: President, Ann Arbor, Michigan.

983. Schatz, Albert. 1977. Soil–food–health chain: A salute to the late William A. Albrecht. *Natural Food and Farming (Atlanta, Texas)* 23(12):11-13. May.

• **Summary:** “The death of Wm. A. Albrecht on May 19, 1974, ended a unique and productive career in soil science which lasted more than half a century. Albrecht’s work not only was, but still is, far ahead of his time.”

“His broad philosophical thinking stands in sharp contrast to the narrow technical training which is characteristic of so many of today’s specialists. In his mind, classical natural philosophy was combined with modern science.”

984. Whelan, Kathy; Leviton, Richard; Timmins, Tom. 1977. Laughing Grasshopper Tofu Shop. LGTS, 3 Main St., Millers Falls, Massachusetts 01349. 6 p. Unpublished typescript. Undated.

• **Summary:** Starts with a brief biography of the three authors / partners.

“Richard and Kathy, natives of Massachusetts and wanting local but meaningful employment, founded Corncreek Whole Grain Bakery in the spring of 1974. Since then, while other bakeries have come and gone, Corncreek has thrived and continues to grow, The bakery was established on a strong advocacy of using pure, organically grown ingredients, a reliance on hand-craftsmanship and minimal use of machines, and an abstention from any dairy or animal products in the baked goods. They have successfully restored bread-baking to the domain of handcraft in a small commercial shop.

“Tom, a native of Iowa, now living in Brattleboro, Vermont, with his wife, Judy, and their three children, worked as manager of the Yellow Sun Natural Foods Coop in Amherst, Massachusetts, for 2½ years. His residency there came during a formative period of struggle and growth in the now prosperous store. Following this, he spent over a year on the sales staff of Llama Trading Company, a natural foods wholesaler in Brattleboro. From his experiences both on the retail and wholesale level, he has catalyzed the distribution and use of wholesome foods all over New England.

“Together, we bring a strong commitment to health-giving foods, an ability to work hard to achieve a goal, and a practical background in transmuting ideals to reality in the business world.”

Explains what tofu is and why they started a tofu shop (Right livelihood, world food crisis, educating the public), describes each ingredient used, and how tofu is made in the shop. The soybeans are ground in a Hobart VCM blender, then the puree is cooked in two 15-gallon stainless steel cooking pots, and the soymilk is curdled with nigari in a

20-gallon oak barrel and the tofu is pressed in two hardwood settling boxes.

Attached to this document is a leaflet (single sided, 28 cm, brown on beige) titled “Laughing Grasshopper Tofu Shop.” Address: Millers Falls, Massachusetts.

985. Erewhon Trading Co., Inc. 1977. Erewhon: Our traditional foods are the foods of the future. *East West Journal*. June. p. 67. [3 ref]

• **Summary:** This informative advertisement is largely about miso. Erewhon imports Hacho [Hatcho] miso from Japan; the source company first made Hacho miso in 1337. “We are grateful to Muso Shokuhin Company of Japan, a macrobiotic natural foods company, for originally distributing hacho miso to the United States through Erewhon and for the work they continue to do in developing sources of high-quality organic foods for Japan and the rest of the world. Erewhon is also grateful to Mr. A. Kazama of Mitoku Company, Ltd., of Tokyo, for encouraging the development of large-scale miso production without the use of chemical additives to speed the aging process. When Mr. Michio Kushi, the founder of Erewhon first convinced Mr. Kazama of the sizable market for naturally produced miso, he initiated a search which resulted in the president of Sendai Miso Company agreeing to produce enough to keep up with the demand.

“Recently a brown rice (genmai) miso has been added to the Erewhon line of imported foods. Based on the traditional techniques and standards, this new variety was two and a half years in development before Mr. Ko Haga, brewmaster of Sendai, produced what he considered a successful brown rice koji, or starter.”

“Sendai uses a regionally grown rice, called Sasanishiki, which is highly regarded in Japan, and the soybeans used are the ‘Prize’ variety grown organically in Minnesota by farmer Ed Ricke.”

Last year 85 tons of traditionally produced miso were imported into the United States from Japan. Erewhon now has 3 locations in the USA, in addition to the headquarters and main warehouse at 33 Farnsworth St.: 342 Newbury St., Boston, Massachusetts 02115; 1731 Massachusetts Ave., Cambridge, MA 02138; 1 Civic Center Plaza, Hartford, Connecticut 06103. Address: 33 Farnsworth St., Boston, Massachusetts 02210.

986. Kushi, Michio. 1977. The book of macrobiotics: The universal way of health and happiness. Tokyo, Japan: Japan Publications, Inc. x + 182 p. June. Illust. Index. 26 cm.

• **Summary:** Many followers of macrobiotics consider this to be the author’s most important book on the subject; by 1985 several hundred thousand copies of the original English-language edition had been sold, and it had been translated into German, French, Dutch, Danish, Portuguese, Spanish, Italian, and Japanese.

The preface tells briefly how Mr. Kushi got involved

with macrobiotics and came to America. He began to lecture in New York in 1955. His teachings began to spread, especially after 1963. By Feb. 1977 he has conducted 5,000 lectures and seminars in America and Europe.

One Appendix is titled “A Historical Review of the Macrobiotic Movement in North America” (p. 168-71).

Concerning foods made from soybeans, the book discusses miso (p. 51-52), protein (p. 69), tamari (p. 51-52, 131-33), tekka (52, 133), and tofu plaster (130; “more effective than an ice pack to draw out fever”). Concerning smoking, the author believes that it “does not contribute to produce lung cancer” if the smoker eats a proper traditional (macrobiotic) diet (p. 115).

Page 169: “In 1949, Michio Kushi, during his postgraduate studies at Tokyo University, was inspired by the teaching of George Ohsawa. He came to the United States in connection with the World Federalist movement. Besides him, Aveline Tomoko Yokoyama in 1951, Herman Aihara in 1953, Cornelia Chiko Yokota, Romain Noboru Sato and his brothers Junsei Yamazaki, Shizuko Yamamoto, Noboru Muramoto and others came to the United States during the following years. After experience with various enterprises they respectively began to teach macrobiotics, mainly in New York. George and Lima Ohsawa also visited America from Europe to conduct seminars. Macrobiotic summer camps, restaurants, and food stores began to operate on a small scale with many American people. Educational activity was organized as the Ohsawa Foundation at that time. However, on the occasion of the Berlin Crisis in 1961, the major active people related to the macrobiotic movement made an ‘exodus’ to Chico, California. Robert Kennedy, Lou Oles, Herman Aihara and others began Chico San, Inc., as a food manufacturing and distributing company, and established the Ohsawa Foundation in California. Later, the Foundation moved to Los Angeles, its main activity being publishing George Ohsawa’s works. The San Francisco center was established. At a later date, Jacques and Yvette de Langre [DeLangre], Joe and Mimi Arseguel and many others shared educational activities in California and other areas of the West Coast.

“In the meantime, after educational activity in New York, besides several seminars on Martha’s Vineyard and various local colleges, Michio and Aveline Kushi moved to Boston in order to concentrate on education for the younger generations. They organized the East West Institute in Cambridge which later moved to Wellesley and then transferred to Boston. To meet the increasing demand for good food, a small basement food store, Erewhon, was opened. Erewhon was managed and developed over the years by the Kushis, Evan Root, William Tara, Roger Hillyard and Paul Hawken. Erewhon was followed by a small restaurant, Sanae, managed at different times by Evan Root, Tyler Smith, and Richard Sandler. Lectures by Michio Kushi continued for five years in Arlington Street Church, Boston,

with repeated visits to many major U.S. cities. Erewhon developed into a larger store, on Newbury Street in Boston, and added its wholesale operation from a warehouse on the South Shore, Boston Wharf, distributing constantly to an increasing number of natural food stores. The warehouse facility has been managed by Paul Hawken, William Garrison, Tyler Smith, and currently Jeff Flasher and other associates as well as the Kushis. Erewhon further established a Los Angeles store which also developed into a wholesale operation—managed over the years by the Kushis, William Tara, Bruce Macdonald, and currently by John Fountain and Thomas DeSilva...

“The *East West Journal*, a monthly newspaper, established in 1970—managed over the years by Ronald Dobrin, Jack Garvey, Robert Hargrove, and currently Sherman Goldman, Lenny Jacobs and other associates—is continuing to introduce to the wider society, the new vision for the present and future world. Educational activities directly concerned with teaching and other educational projects have been administered since 1973 by the East West Foundation, a nonprofit educational organization managed by the Kushis, Edward Esko, Stephen Uprichard, and other associates.” Address: Boston, Massachusetts.

987. Shurtleff, William. 1977. Japanese plums (*umé*) and salt plums (*umeboshi*): Narration for color slide show. Tokyo, Japan. 12 p. June. Unpublished typescript.

• **Summary:** This is a detailed narration of 43 color slides taken on a two-day trip to Wakayama, Japan, with Mr. Kazama of Mitoku to study umeboshi. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

988. High Mountain—A Natural Foods Restaurant. 1977. Dinner specials (Ad). *Missoulian (The) (Missoula, Montana)*. July 1. p. 9.

• **Summary:** “We will be serving these natural food specials this week; July 5—Stir fry eggplant and tofu... July 7. Tempeh smothered with mushroom sauce.

“\$2.95 each. 11:00 a.m.—10 p.m. Monday-Saturday.” Address: 608 Woody. Phone: 728-9611.

989. Doyle, Bill. 1977. Eyeing the economy [Westbrae Natural Foods, Inc. in Berkeley]. *Oakland Tribune*. July 10. p. 39. Business section.

• **Summary:** “An effort to pick and dry pears from an orchard that was not being worked was the first step in a sequence which led to establishment of a natural foods company in Berkeley that will do about \$2.25 million in business this year. ‘The quality of our pears got us known and people urged us to continue,’ said Margaret Ortiz, one of the founders of Westbrae Natural Foods.

“Along with the pears Ms. Ortiz and the other three founders were grinding granola for a few stores and as the

business grew they looked for someplace to operate from. That was a former market building on Gilman Street in Berkeley which still carried the name 'Westbrae' and because Ms. Ortiz, her former husband Bob, her brother Bob Gerner and Kristin Brun were short of money and having trouble obtaining financing they decided to keep the store sign. Hence, the name of the company.

"A \$1,000 gift [actually a loan from a man later found out to be a dope dealer] from a donor who asked to remain anonymous got them into the store and they had visions of better days because he indicated he would provide further financing.

"That promise faded away and bank and Small Business Administration financing never materialized. The youthful entrepreneurs finally collected \$10,000 from family and friends [including \$3,000 each from Bob Gerner's aunt and an employee who made granola] and away they went."

"Gordon Bennett, who is now the general manager, said the first bank loan came after four years and Westbrae has been expanding rapidly. The company now lists more than 400 products in its stock and produces about one third of those itself.

"The business breaks down into two segments. one is the manufacturing arm, which distributes products across the country, and the second is a distribution business which focuses on the area from Sacramento to Santa Cruz and includes the Bay Area."

"The retail store on Gilman Street, which was where it all started, was closed last year, primarily because it was losing money, according to Mr. Bennett. Sixty per cent of Westbrae's revenues come from the Bay Area which Mr. Bennett describes as 'the center for natural foods in the United States.'"

"Almost all of the equipment in the plant at 1224 10th St. in Berkeley was acquired used and renovated. Mr. Bennett laughs when he tells of a recent purchase which moved Westbrae up from a 1913 model roaster for nuts to a 1940 model.

"The 15,000 square foot warehouse and production area is jammed to a 20 foot ceiling with stores materials and inventory and Mr. Bennett said Westbrae will move, in about three weeks, to an Emeryville location which will increase that space to 34,000 square feet."

A photo shows Gordon Bennett and Margaret Ortiz standing in the warehouse.

990. Watson, Lloyd. 1977. They made it their way [Gordon Bennett and Margaret Ortiz of Westbrae Natural Foods, Inc. in Berkeley]. *San Francisco Chronicle*. July 27. p. 57-48. Business section.

• **Summary:** The 6-year-old Berkeley firm expects to ring up sales of close to \$3 million this year. They are committed to supporting organic farmers, but they can't find enough organically grown fruit. "Perhaps the best indication of

the firm's success is the pending move from Berkeley to a plant—three-times-larger—in Emeryville formerly occupied by Nabisco." A photo shows Gordon Bennett (age 31, general manager, divorced Harvard University [Massachusetts] dropout) and Margaret Ortiz (age 35, a founder of Westbrae, and divorced mother of three), who favor what has come to be called an "alternative lifestyle."

991. Harwood, Maureen. ed. 1977. *The Lifestream* cookbook. Richmond, BC: Lifestream Natural Foods Ltd. 52 p. Illust. by Elizabeth Scott. Index. 22 cm.

• **Summary:** Contents: Nutritional information: Protein and the vegetarian diet. Grains. Whole grain pasta. Beans. Tofu. Corn tortillas. Flakes and cereal. Whole grain flour. Seeds and sprouts (Alfalfa seeds, mung beans, lentils, sunflower seeds—unhulled, chick peas, fava beans, soybeans, wheat kernels, alfalfa seeds in Vita salad, sesame seeds in gomasio, pumpkin seeds), Nut butters and miso (incl. Miso honey dressing, Miso soup. Almond butter, cashew butter, peanut butter, sesame butter / Tahini). Cashew butter & Engevita yeast. Dried fruit. Carob. Address: [Richmond, BC, Canada].

992. Nielson, Gary. 1977. A natural foods merger? *CenterPeace (Massachusetts)*. July. p. 5.

• **Summary:** Discusses a possible merger between Llama Trading Co., Corncreek Whole Grain Bakery, and Laughing Grasshopper tofu shop.

Note: Also in Sept. 1977 Channel 57 TV in Springfield, Massachusetts, ran a program on Laughing Grasshopper Tofu Shop. Address: Massachusetts.

993. Erewhon, Inc. 1977. Erewhon. Summer 1977. Boston, Massachusetts. 24 p. Catalog and price list.

• **Summary:** On the front cover is a color photo of a rose flower and leaves. On the first page, Jeffrey Flasher (apparently the new president) writing about this catalog, notes: "Erewhon's summer catalog of 1973 listed approximately 450 products, of which 30% were either grown, manufactured, or repackaged in the Northeast. Although last summer's catalog offered nearly 1,000 products, fully 25% were either grown, manufactured, or repackaged in the Northeast... Between July and December Erewhon will be introducing 50 to 75 new items produced in the Northeast." "No sugar or preservatives added to any food in this catalog."

Soy products—Erewhon packages: Beans: Soybeans yellow OG [organically grown]. Cereals: Morning cereal (with OG soybeans). Flours: Soybean OG (full-fat). Pasta—whole wheat: Soy-rice OG shells. Soy OG spaghetti (both in packaged or bulk). Beans—bulk: Soybeans yellow New York OG. Soybeans yellow Minnesota OG. Cereal—bulk: Soybean flakes Arrowhead Mills OG. Flour—bulk: Soy (full-fat) OG. Oils—Arrowhead Mills: Soy—expeller pressed. Sea vegetables—Erewhon: Agar. Hiziki. Kombu. Nori. Seasoned

nori. Wakame. Atlantic Mariculture: Dulse, Canadian.

Soybean products: Tamari soy sauce (shoyu) aged minimum of 18 months (5 sizes). Erewhon miso soybean paste: Genmai (brown rice and soy). Kome (rice and soy). Hacho (soy only). Mugi (barley & soy).

Condiments: Barley Kogi [sic, Koji] (to make miso). Kuzu (arrowroot). Tekka seasoning (with Hacho miso). Nigari (to make tofu). Umeboshi pickled plums.

Nik's Snacks: Soybeans tamari roasted. Almonds, cashews, peanuts (Spanish), sunflower seeds—each tamari roasted. Chico-San candies (Yinnies, 3 types). Erewhon Aztec corn chips—tamari. Mother Earth corn chips—tamari.

Page 22 is "Ordering information." On the back cover is another rose, and "How to reach us" information from Maine to New Jersey.

This catalog cover was reprinted with permission from the Michio and Aveline Kushi Macrobiotics Collection, Archives Center, National Museum of American History, Smithsonian Institution, Washington, DC. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

994. Ford, Frank. 1977. Arrowhead Mills *Deaf Smith Country Reader* (Ad). *Organic Gardening and Farming* 24(8):45. Aug.

• **Summary:** This full-page ad is Vol. 2, No. 1 of this *Reader*. The subtitle states: "We treat food with respect, not chemicals"—not just a slogan, but a way of life."

"At Arrowhead Mills, our respect for food begins with the soil in which the crops we purchase are grown. The wheat, corn and soybeans grown in Deaf Smith County soil improved with compost, marine trace minerals, kelp or other soil improvement materials are the basis of our program. Beneficial insects abound in the fields, doing the work of controlling insect pests in harmony with God's plan in nature. Over 100 grain bins are equipped with slotted floors—through which the pure cold winter air of this 4,000-foot altitude is fan blown to control quality during storage.

"But the raising of grains on the isolated farms of Western Deaf Smith County, away from the pollution of the cities, the use of country pure air to control quality in storage during winters that range down to 15 degrees below zero is just the beginning..." Address: Deaf Smith County, Texas.

995. Leonard, Thom. 1977. Re: My work with making miso. Letter to William Shurtleff at New-Age Foods Study Center, Sept. 20. 2 p. Handwritten, with signature.

• **Summary:** "I completely agree about Westbrae being the most interested in and knowledgeable in miso of any company in America. Their encouragement and interest has been of great help to me. Where am I with miso making now? Jim Hemminger sold his house and tofu shop and moved to his father's farm in Ohio. So that's over. The miso made this year [in Fayetteville, Arkansas] is stored in a shed

until next year.

"I'm out of money and am now working on an organic vegetable farm in the Yakima Valley, Washington. Late fall or winter I will begin working at Baldwin Hill Bakery in western Massachusetts. This will be a full-time job that pays real money."

Tom is experimenting with corn and wheat miso. In Aug. 1977 he received a complimentary copy of *Miso Production* from William Shurtleff, together with a letter.

Note: This is the 2nd earliest document seen (April 2009) concerning Thom Leonard and miso. He and Richard Kluding founded the Ohio Miso Company, which began selling their miso in March 1979. This company was later acquired by South River Miso Co. in Conway, Massachusetts. Address: 219.5 S. Beech, Toppenish, Washington 98948.

996. Needleman, Larry. 1977. Re: Questions and new developments concerning Bean Machines Inc. Letter to Wataru Takai, Takai Tofu & Soymilk Equipment Co., 307 Inari, Nonoichi-machi, Ishikawa-ken 921, Japan, Sept. 20. 4 p. Typed, with signature.

• **Summary:** The letter begins: "Thank you for the handsome catalogues. I hope that this is the beginning of a long and prosperous relationship. This is a long letter with many questions to make the transition from Bill Shurtleff to Bean Machines Inc. I hope our future correspondence will be less complicated.

"Like Bill, I would like to earn a modest income while providing equipment to my customers at the lowest possible price. I am therefore concerned with keeping my costs as low as possible. From a commercial standpoint this policy will make Takai and BMI the leaders in the field. Some of the CIF prices that Mitoku quoted Bill and which appeared in his catalogue were substantially lower than the CIF prices you have just sent." Address: Bean Machines Inc., California.

997. Laurelbrook Foods. 1977. Purchases from Erewhon—Boston and Los Angeles, 1972-1977. Bel Air, Maryland. 1 p. Unpublished manuscript. Internal company memo, Sept. 22.

• **Summary:** In 1972, Laurelbrook purchased \$27,753 worth of goods from Erewhon—Los Angeles and \$76,685 from Erewhon—Boston, for a total of \$104,439. In 1976, Laurelbrook purchased \$12,905 worth of goods from Erewhon—Los Angeles and \$144,141 from Erewhon—Boston, for a total of \$157,046. Address: P.O. Box 47, Bel Air, Maryland 21014.

998. Coopers & Lybrand. 1977. Erewhon, Inc.: Financial statements for the years ended June 30, 1977 and 1976. Boston, Massachusetts. 9 p. 28 cm.

• **Summary:** Erewhon's total liabilities increased to \$1,322,099 in 1977, from \$913,256 in 1976. Net sales also increased to \$8,379,860 in 1977, from \$6,806,301 in 1976.

Net income before taxes increased to \$244,191 in 1977, from \$182,426 in 1976.

On 1 Aug. 1975 the Company sold substantially all of its "West Coast Division for cash and notes." The net gain was \$86,872. Address: Boston, Massachusetts.

999. East West Foundation. 1977. Food policy recommendations for the United States: Statement of Michio Kushi, September 21, 1977. 359 Boylston St., Boston, MA 02116. 32 p. 28 cm.

• **Summary:** On September 21, 1977, Michio Kushi and several associates, including Dr. Robert Mendelsohn, M.D., met in Washington with members of the White House staff. The meeting, which lasted approximately two hours, began with a 45 minute presentation of a series of recommendations by Michio Kushi, a description of the activities and goals of the East West Foundation (founded 1972), and a history of Erewhon (fiscal 1978 sales estimated at \$10 million). An outline of the East West Journal's position on various political, social, and economic applications of the national food policy was also included in the meeting's agenda.

Recommendations for seasoning foods and to aid digestion of grains, was traditional foods such as pickled vegetables and naturally fermented soy bean products (such as soy sauce, miso, tempeh, etc.). Note: Dr. Mendelsohn died in about May 1988. Address: Boston, Massachusetts. Phone: 617-536-3360.

1000. Erewhon, Inc. 1977. Erewhon. Harvest 1977. Boston, Massachusetts. 23 p. Catalog and price list.

• **Summary:** On the front cover is a photo of a table dispenser of Erewhon Natural Shoyu (but the neck band reads "Erewhon Tamari Soy Sauce"). On the first page, Jack Garvey (apparently the new president) writes about the meaning of the word "Erewhon," which derives from a book of that title written by Samuel Butler. Address: 33 Farnsworth Street, Boston, Massachusetts 02210. Phone: 617-542-1358.

1001. **Product Name:** Tofu—Organic [Bulk, or Packaged].

Manufacturer's Name: White Wave.

Manufacturer's Address: 1738 Pearl St., Boulder, CO 80302. Phone: 303-443-3470.

Date of Introduction: 1977 September.

Ingredients: "Organic soybeans, filtered water, nigari, no more, no less! please refrigerate" (Sept. 1977).

Wt/Vol., Packaging, Price: 14 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

New Product—Documentation: On 10-11 August 1978, William Shurtleff visited Steve Demos at White Wave, 1738 Pearl St. in Boulder, Colorado. The company, which started making tofu in Sept. 1977, was very small and compact, with a deli in front of the tofu manufacturing space. The tofu is

made from organic soybeans, filtered water, and nigari. It is sold in 14-oz blocks in Chinese folded-paper food take-out cartons, each with a wire handle. The oval blue and white label, with a wave breaking from left to right, is pasted on each carton. To the right of the wave is written in bold hand lettering: "White Wave tofu." Across the top of the oval: "Boulder—Net wt. 14 oz.—Colorado." Across the bottom: "Organic soybeans, filtered water, nigari, no more, no less! Please refrigerate." As of Feb. 1999, White Wave still has originals of the three earliest versions of this horizontally oval label; Soyfoods Center has color photocopies. Steve Demos wrote to Shurtleff in Feb. 1999 that the first label was used in "late 1977 and into 1978 to sell tofu to the retail healthfood market. The second label came in early 1978 and this time we had it gummed instead of glueing each one on." This time the ingredients were listed across the top: "soybean cake contains: Organically raised soybeans, filtered water, and nigari (salt bitterns)." Steve thinks the third label [which contains traces of green for added color] was first used in 1980 [sic, probably late 1978]. The ingredients, still listed across the top, now read: "soybean cake contains: certified organically raised soybeans, filtered water, and nigari (salt bitterns). no more, no less! please refrigerate. The "no more, no less!" was White Wave's signature at the time. The size and shape of the three labels is identical. It is clear from the earliest label that White Wave was using organic soybeans from day one: Sept. 27, 1977. Demos was buying these soybeans from Green Mountain Grainery, a small distributor of organic and natural foods, which also had a retail outlet in Boulder. But within a very short time, White Wave started buying soybeans directly from the farmer (see 1998 Aug. 10 interview with Demos).

Form filled out by Steve Demos in Ann Arbor, Michigan, at national soycrafters conference. 1978. July 29. White Wave makes medium-firm tofu in bulk and packaged. The wholesale prices are \$0.65/lb and \$0.75/lb respectively.

Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). "Appendix B: Tofu Shops and Soy Dairies in the West." p. 393. White Wave Soyfoods, 3869 Walnut, Boulder, Colorado 80302. Phone: 303-443-2370. Owner: Steve Demos.

Label. 1979, undated. 3 x 4 inch oval. Self adhesive. Color illustration of a breaking wave. Black, blue, and green on white. Product Price List. 1979, winter. Bulk or packaged. 14 oz. Kreck. 1979. Denver Post. Oct. 17. "Tofu is remarkable." Interview with Steve Demos. 1979. Sept. Address is now (1981): 1990 N 57th Ct., Boulder, CO 80301.

FIND/SVP. 1981, May. "The tofu market: Overview of a high-potential industry." p. 78. "White Wave makes plain tofu in the soft, firm, and extra firm styles. They also make tofu mayonnaise, tofu miso salad dressing, and other soy products such as soysage (soy sausage), tempeh, and a frozen soymilk product, Polar Bean, which comes in five flavors (similar to ice cream). The company makes approximately

7,500 lb/week of tofu. However if one includes all their tofu products, the weekly production capacity increases to between 10,000 and 11,000 pounds.”

Shurtleff. 1987. History of White Wave. Steve Demos reported that when he started White Wave, “Our direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about Jan. 1977. They had the Boulder market locked up when White Wave started.”

Talk with Steve Demos. 1989. Nov. 1. Spinning Kitchen was in the same building as Corn Mother Restaurant in Boulder at the same address. They made tofu on the upper floor; Corn Mother did not make tofu.

Update: 1997 Oct. 16. This company is now named White Wave, Inc., 6123 East Arapahoe, Boulder, Colorado 80303. Phone: 303-443-3470. Contact: Steve Demos, president. They still make tofu and tofu products. This is the fourth oldest existing Caucasian tofu manufacturer in the United States; it is also the largest of these four.

Talk with Steve Demos. 1998. Aug. 10. The oval label owned by Soyfoods Center is the second label for this product. It is identical to the first label except that it contains more colors (black, blue, and green or white). It was printed shortly after White Wave moved into Walnut Street.

Note: This is the earliest record seen (June 2019) concerning White Wave (Boulder, Colorado).

1002. Stuttman, Leonard M. 1977. Re: Work developing soynuts. Letter to William Shurtleff at New-Age Foods Study Center, P.O. Box 234, Lafayette, California, Oct. 10. 2 p. Typed, with secretary’s signature on letterhead.

• **Summary:** “Your letter was extremely flattering and I am so pleased that you found our soynuts of the highest quality. That kind of comment justifies the almost two years we spent in research in and out of Michigan State University... There are many varieties of soybeans. Much of our product development time was spent in testing almost eighty different varieties of soybeans. In addition, we found that there were even distinct differences in the palatability of the same variety grown in different regions of the U.S. based primarily on climatic and soil conditions. We narrowed our varietal selection to a single type grown in a specific area of Michigan.” Good soybeans “must be identity preserved!”

To make good soynuts at home: Select a good variety of whole soybeans that are of uniform size. Rinse the beans and soak them overnight. The volume should have increased approximately 2½ times over the volume of the dry beans. Remove any excess water by spreading the soaked beans on paper or cloth toweling. Heat vegetable oil to 325°F. Oil roast [deep fry] the soybeans for about 12 minutes. The color should be golden brown, the taste bland, and the texture crunchy without being hard. A well-done soynut should fraction into small pieces *without* undue jaw pressure.

“Actually, Bill there is very little that is revolutionary about our processing technique. The real secret is varietal

selection and careful supervision of roasting technique using lower heat over a longer period of time.

“P.S. We have pretty much confined our marketing efforts to Michigan and now we feel we are ready to expand out. Could you help us by giving us a recommendation to Erewhon and others?”

Note 1. The letterhead reads—Line 1: INARI, Ltd. Line 2: “International Nutrition and Resources Inc.” Note 2. This is the earliest document seen (Dec. 1998) concerning INARI (a manufacturer of soynuts) or the work of Len and Irene Stuttman with soyfoods or soynuts. Address: President, INARI, Ltd., 2331 Forest Rd., Lansing, Michigan 48910. Phone: (517) 882-3323.

1003. Curtis & Tompkins, Ltd. 1977. Analysis of nigari. San Francisco, California. 1 p.

• **Summary:** This is a report of an analysis of the lead content of nigari submitted by Westbrae Natural Foods. The sample was received on 28 Sept. 1977 and the analysis was reported on 21 Oct. 1977. Laboratory No. 77k306. Preliminary No. 0138.

Lead: 1.75 parts per million.

Note: See also the analysis of natural nigari conducted in May 1978 by Japan Food Research Laboratories in Tokyo. They found a lead content of 1.50 ppm. Address: 290 Division St., San Francisco, California 94103. Phone: (415) 861-1863.

1004. **Product Name:** Westbrae Wholewheat & Soy Pasta. **Manufacturer’s Name:** Westbrae Natural Foods (Marketer-Distributor).

Manufacturer’s Address: Berkeley, CA 94710.

Date of Introduction: 1977 October.

Ingredients: Stoneground organically grown wholewheat flour, toasted organically grown soybean flour, water. No salt and no preservatives.

Wt/Vol., Packaging, Price: 16 oz (1 lb). In cellophane package.

How Stored: Shelf stable.

New Product—Documentation: Label received from Ken Krick of Westbrae. It is pasted on a sheet giving the product number, the date of each print run of labels and the number of labels printed. For example: 15,000 were printed on 13 Oct. 1977, the 5,000 on 12 April 1978 and finally 6,000 on 8 Aug. 1978.

When these products were sold, the weight of the product was reduced to 12 ounces, but (except for the weigh designation) the label remained the same. On 8 Aug. 1978 10,000 labels of the 12-ounce product were printed.

Note: The name of the manufacturer is not given.

1005. DeVries, Hilary. 1977. Golden temple: serene shrine to good eating. *Christian Science Monitor*. Nov. 16. p. 29.

• **Summary:** The 50 young Americans who work here in

Boston, Massachusetts, have adopted the religion of the Khalsa, the fierce soldier-saints of the Sikh religion. The ancient Khalsa tradition was brought to the United States in 1969 by the group's spiritual leader, Siri Singh Sahib Harbahajan Singh Khalsa Yogi. This restaurant, which opened in 1974, serves international vegetarian cuisine, in a beautiful environment. The workers, many of whom own shares in the company, live in three large communal houses in Dorchester, Massachusetts, south of Boston. Both the waiters and waitresses wear white turbans, close-fitting leggings called pa'ijmah, and long white coats called choghah.

Three recipes are given. Photos show: (1) "Sardini stirs Chinese tofu-zesty soy bean curd." (2) "Simran salad: tofu, red onion, mushroom, olives, alfalfa sprouts." (3) Qurban slicing cake.

1006. Daniels, Stevie. 1977. The growing natural foods market. *East West Journal*. Nov. p. 39.

• **Summary:** Between 1968 and 1973 sales of natural foods in the USA multiplied tenfold, from \$60 million to almost \$600 million. During the recession of 1974-75 sales slowed somewhat, and many marginal operations went out of business—according to the *Small Business Reporter*.

Midwest Natural Foods in Ann Arbor, Michigan, had sales of roughly \$25,000 its first year, but now 5 years later has sales of \$6 million annually, with 750 active accounts. Midwest began with 3 employees and now has 65.

Laurelbrook Foods had sales last year of about \$3 million. Laurelbrook began with 5 employees in 1971 and now has 44. Margy Coates of Laurelbrook says people in her company are exhausted trying to keep up with the high demand, but everything is going well.

Tree of Life in St. Augustine, Florida, started 5 years ago with a staff of 10, now employs 90 people and reports growth of 20% a year. They originally distributed only in Florida, but now their market has spread to ten southeastern states.

Erewhon is a Boston-based natural foods company that began eleven years ago with a capital investment of \$5,000 and one employee. Now the company has 170 employees and sales of nearly \$10 million a year. If all continued to go well, the company will move to a new 77,000-square-foot warehouse this year. Jack Garvey, personnel and education manager, says the company has had to hold down growth to a manageable rate of 30% a year. With no public loans, no stock, and no capital source besides sales, they can't afford to stock as much as they'd like to.

Note: This is the earliest document seen (March 2020) containing industry and market statistics for the natural foods industry in the USA.

1007. **Product Name:** Eden Nigari (Solidifier for Making Tofu).

Manufacturer's Name: Eden Foods, Inc. (Importer). Made in China.

Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1977 November.

Wt/Vol., Packaging, Price: 6 oz, 5 lb, and 44 lb sizes.

How Stored: Shelf stable.

New Product—Documentation: Eden Foods Fall and Winter Catalog, 1977-78. Page 23. "Nigari (Eden) solidifier for making tofu. Concentrated—use about 1/3 the amount recommended in *The Book of Tofu*." Ad in Soycraft. 1979. Summer. p. 38. "Traditional Soy Products from Eden Foods." "Eden nigari is a natural flake nigari, obtained by the evaporation of sea water from environmentally clean areas of China."

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. Eden dealt directly with the Chinese government. But the major product they imported from China was ginseng. In addition, they imported other medicinal herbs, some bamboo cooking wares (tea strainers), some tea, arrowroot flour. After the fire destroyed Eden's warehouse, imports from China were discontinued.

1008. Eden Foods. 1977. Fall and winter catalog 1977-1978. 4601 Platt Rd., Ann Arbor, MI 48104. 81 p.

• **Summary:** On the cover are bags, trays, and scoops filled with natural foods. Page 23 shows that Eden now sells nigari, a solidifier for making tofu, in 6 oz or 5 lb sizes. Hacho, Mugi, and Kome miso are now sold under the Eden brand. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

1009. Shurtleff, William. comp. 1977. Large natural food distributors, health food distributors, and book distributors in North America. Lafayette, California. 1 p. Undated. Unpublished typescript.

• **Summary:** Most of the following companies are presently distributing *The Book of Tofu*, *The Book of Miso* and *The Book of Kudzu* published by Autumn Press. For each, the company name (listed alphabetically) and address are given:

Large natural food distributors (28): Arrowhead Distributing (Denver, Colorado), Beautiful Foods (Philadelphia, Pennsylvania), Cc Grains (Seattle, Washington), Chico-San Inc. (Chico, California), Clear Eye (Rochester, New York; \$3 million/year in sales), Dari Farms Natural Foods (Tolland, Connecticut), Eden Foods (Ann Arbor, Michigan; Phone: 313-973-9400. Tim Redmond, Michael Potter), Erewhon (Cambridge, Massachusetts; Phone: 617-354-2001. John Fogg, President), Erewhon West (Vernon, California; Phone: 213-582-6144. James Silver), Japan Food Corp. (JFC—South San Francisco, California; also in New York), Laurelbrook Foods (Raleigh, North Carolina), Llama Trading Co. (Greenfield, Massachusetts), Midwest Natural Foods (Ann Arbor, Michigan), Pure and

Simple/The Well (San Jose, California; Pure & Simple changed to 1045 Pepitone, San Jose, CA 95110; Jon Hoefler), Rainbow Distributing (Denver, Colorado), Reality Natural Foods (Haleiwa, Oahu, Hawaii), Redwood Natural Foods (3245 Santa Rosa Ave., Santa Rosa, California; Greg Hartman. Phone: 707-546-5878). Rock Island Foods (Ignacio, California), Shadowfax (Binghamton, New York), Starflower (Eugene, Oregon), Tree of Life (Augustine, Florida), United Naturals (Eureka, California), Westbrae (Emeryville, California), Lifestream Natural Foods (Vancouver, British Columbia, Canada), Manna Foods (Scarborough, Ontario, Canada).

Large health food distributors (8—also carry books): Akin (Tulsa, Oklahoma), Akin Southeast (Jacksonville, Florida), Balanced Foods (Bergen, New Jersey), Collegedale Distributors (Collegedale, Tennessee), Foods for Health (Phoenix, Arizona), Health Foods Inc. (Des Plaines, Illinois), Kahan and Lessin (Los Angeles, California), Natures Best (El Segundo, California).

Large booksellers [distributors] (3): Nutribooks Corp. (Denver, Colorado), Bookpeople (Berkeley, California), Landstrom (South San Francisco, California).

Note: This is the earliest document seen (March 2020) that mentions “United Naturals.”

1010. Soy Plant (The). 1977. Re: Introducing The Soy Plant and the Grain Burger Collective. Letter to members of the Michigan Federation of Food Co-ops, Dec. 12. 1 p. Typed, without signature.

• **Summary:** “As the co-op movement continues to grow, a new branch of the cooperative tree has begun to develop; that is collectively organized production groups. Two such collectives have recently been started in Ann Arbor, and this letter is intended to strengthen ties between the food co-ops of Michigan and these production groups.”

“Soy Plant which, produces tofu, and the Grain Burger Collective, which produces Grain Burger [Mix], are organized alike. Started by experienced co-ops, these are worker controlled collectives; this means that each has equal decision making responsibility within the business, (i.e. there are no bosses). We are legally non-profit and are striving to build a system in which businesses view themselves as an integral part of the community. Right now, we feel that the welfare of the community demands sources of non-animal protein that are unadulterated, enjoyable to eat, and inexpensive.

“We hope that our collectives thrive and can expand, but rather than expand in the traditional centralized manner, we would like to expand by assisting other autonomous collectives to start up and serve their own localities with our products and products of their own.

“Our products are available from the Peoples Warehouse [sic, Warehouse]. Tofu comes in one lb. containers and is packed twelve in a case.”

This unsigned letter ends with the typed word “PEACE.” Along the bottom are stylized illustrations of a mother swan looking to her right at three baby swans swimming toward her. The body of each is a spiral. There are little waves to the left of the mother swan and below the baby swans.

Note 1. This is the earliest document seen (Dec. 2000) concerning The Soy Plant, a pioneering tofu shop in Ann Arbor, Michigan.

Note 2. The address at 330 Maynard was in the basement of Eden’s, a restaurant belonging to Eden Foods.

Note 3. Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Steve wrote this letter, though his name is not on it. The purpose of the letter was to introduce The Soy Plant to the Michigan Federation of Food Co-ops to encourage them to distribute Soy Plant products. Eden’s was a combination natural food store and sit-down deli. A guy named James developed a Grain Burger Mix and he was using the same downstairs kitchen that The Soy Plant rented from Eden to mix his burger mix. Steve drew the illustration of the swans—to express his artistic creativity. Address: 330 Maynard, Ann Arbor, Michigan 48104. Phone: 313-663-0500.

1011. *SoyaScan Notes*. 1977. Chronology of soybeans, soyfoods and natural foods in the United States 1977 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 12. Laughing Grasshopper tofu shop starts making tofu in Millers Falls, Massachusetts. Founded by Richard Leviton, Kathy Whelan, Tom Timmins, and Michael Cohen in April 1976, it soon becomes the largest of the new breed of Caucasian-run U.S. tofu manufacturers. It was renamed The New England Soy Dairy in Nov. 1977, Tomsun Foods, Inc. in 1984, and Tomsun Foods International in 1986.

Jan. The Soy Plant starts making tofu inside Wildflower Community Bakery at Ann Arbor, Michigan. Steve Fiering is one of the organizers of America’s first soyfoods co-op.

Jan. 20. Jimmy Carter inaugurated as president of the United States. Bob Bergland is Secretary of Agriculture.

March. Surata Soyfoods starts making tofu in Eugene, Oregon. America’s second worker-owned soyfoods cooperative, organized by Benjamin Hills.

April 5. Takai Tofu & Soymilk Equipment Co. in Japan works with consultant William Shurtleff to acquire an English name, develop a unified equipment catalog, and establish international operations.

April. *The Heartsong Tofu Cookbook*, by Bob and Toni Heartsong self-published in Florida.

May. Flying Cloud Tofu (soon renamed The Tofu Shop, then Northern Soy) starts tofu production in Rochester, New York. Founders are Greg Weaver, Greg Mello, and Andy Schecter.

May 10-June 7. Shurtleff and Aoyagi travel to Indonesia

to do field research on tempeh in preparation for a book on the subject.

Aug. 16. *Miso Production* by Shurtleff and Aoyagi published by New-Age Foods Study Center, the Center's first publication.

Sept. Article in *Mother Earth News* announces that tempeh starter and split whole soybeans are available from newly founded Farm Foods at The Farm in Summertown, Tennessee. Orders start to pour in. Farm Foods continues The Farm's tradition, with a great deal of creative and influential work with soyfoods.

Sept. Swan Foods starts operation in Miami, Florida, run by Robert Brooks and Mary Pung. They produce America's first commercial soymilk yogurt. After doing extremely innovative pioneering work with second generation tofu products and advertising them nationwide, they go out of business in Dec. 1978 from trying to grow too fast.

Sept. White Wave starts making tofu in a bathtub in Boulder, Colorado. Founded by Steve Demos.

Oct. The Tofu Shop, America's second soy deli, opens in Telluride, Colorado. Founded by Matthew Schmit, it was later renamed Far Pavilions.

Oct. 14. Bean Machines Inc., America's first supplier of tofu and soymilk equipment, begins operations in California under the direction of Larry Needleman. Most of their equipment is imported from Takai in Japan.

Oct. *Soycraft*, a newsletter and America's first periodical focusing on soyfoods, begins publication. Initiated by David and Danette Briscoe of Lawrence, Kansas.

Nov. Redwood Natural Foods, Inc. in Santa Rosa, California, launches the world's first vacuum packed tofu. Redwood developed the packing process using tofu made by Quong Hop & Co.

Nov. Paul Duchesne starts selling Fried Rice & Tofu Sandwiches in Fairfax, California. His operation later becomes Wildwood Natural Foods.

* Passage of the 200 mile offshore fishing limit law has a major impact on Japan's protein supplies, increasing interest in and use of soy protein products.

* By the end of 1977 there are at least 13 commercial Caucasian-run tofu shops in America.

* The Chemurgic Council, after a period of decline, finally closed its doors in 1977.

* The Food and Agriculture Organization of the United Nations (FAO) establishes a European Cooperative Network on Soybean in which 14 countries participate, exchanging information on soybean production.

* Genentech becomes the first company founded specifically to apply recombinant DNA techniques for commercial purposes.

* In China, under new post-Maoist economic policies, soybean acreage starts to increase after almost 20 years of decline based on grain-first policies. Soybean production began a slow increase in the mid-1960s, despite declining acreage.

1012. *Mother Earth News*. 1977. Newsworthies: Frank Ford, and Robert Rodale. No. 48. Nov/Dec. p. 60.

• **Summary:** Frank Ford has "farmed organically in Deaf Smith County for 25 years [i.e., since 1953]. Besides that, in 1960 he started a company (Arrowhead Mills, Inc.) that became one of the first major distributors of whole grains in this country. In the years since then, he's served on advisory committees to four different U.S. Secretaries of Agriculture. His *The Simpler Life Cookbook* has sold a quarter of a million copies, as has *The Deaf Smith Country Cookbook*, a book co-authored by his wife, Margie."

Robert Rodale runs Rodale Press, which was started by his father. "The Research and Development Division has a successful tempeh project underway, with over 14,000 packets of starter—and instructions for preparing the fermented soybean food—already distributed to readers of *Organic Gardening and Farming*." Photos show Robert Rodale and Frank Ford.

1013. Swan Food Corp. 1977-1978. Introducing the Soybeanery—Natural food deli & bakery: Now open. Miami, Florida. 3 p. Undated. 28 cm. Catalog and price list.

• **Summary:** This retail catalog lists the company's soy products, iced herbal beverages, and baked goods & pastries—with prices. Serving take out orders—Soy products include: Sandwiches (made with wholewheat pita—pocket bread; all

sandwiches served with fresh organic salad vegetables): Tofu–baked, regular, marinated, or caraway: \$1.40. Eggless egg salad: \$1.40. Tofu cream cheese: \$1.05. Salads: House salad with sprouts plus tofu–baked, regular, marinated, or caraway: \$1.35. Eggless egg salad: \$1.35. Hot food: Soyburger sandwich: \$1.30. Desserts (per slice): Mary’s tofu cheese cake: \$0.75. Mary’s marble swirl cake: \$0.75. Mary’s devil’s food cream cake: \$0.75. Mary’s carob cream cake: \$0.75. Rice pudding [made with organic brown rice, soy melk, raisins, maple syrup, sea salt]: \$1.10. Carob pudding: \$1.10. Vanilla pudding: \$1.10. Soyogurt: Strawberry, peach, plain (more flavours to come): \$0.45. Granola: With soyogurt: \$0.45. With soymelk & banana: \$0.75. Drinks: Soy shake (carob, vanilla, strawberry). Soymelk. Non-soy: Herb teas. Coconut juice. Pinacolada. Smoothie (apple-banana). Sweet rice cookie. Oatmeal cookie. Hummus sandwich.

A page titled “Retail price list” lists many of the products shown above but at slightly higher prices. In addition: Tofu–regular: \$1.00. Tofu–baked: \$1.95. Tofu–marinated: \$1.60. Tofu–caraway: \$1.60. Soymilk [plain]: Quart: \$1.00. Pint: \$0.45. Soymilk (sweetened): Quart: \$1.25. Pint: \$0.45. Tofu cakes and pies (all 7-inch rounds): Tofu pie–cashew: \$4.50 Mary’s devil food cream cake: \$4.50. Tofu chip dip: \$1.25. Whole grain soyburgers: \$1.15. Tofu vegetable stew: \$1.15. Soyogurt–plain or with fruit: \$0.45. Soy shakes–Carob: \$0.85. Vanilla: \$0.95. Strawberry: \$1.05. Mary’s eggless egg salad: \$1.40. Also–Nori roll. Nectarel ginseng.

Note 1. This is the earliest English-language document seen (Dec. 2003) that contains the term “soy shake.”

Note 2. This is the earliest English-language document seen (May 2003) that uses the word “Hummus” (or “Hummous”), which is a paste of pureed chickpeas usually mixed with sesame tahini and/or sesame oil (plus seasonings or spices) and eaten as a dip or sandwich spread.

Note 3. This is the earliest English-language document seen (Sept. 2012) that uses the word “Soyogurt” to refer to soy yogurt.

Note 4. This is the earliest English-language document seen (Feb. 2013) that contains the term “Eggless egg salad” or the term “Mary’s eggless egg salad.”

Talk with Danny Paolucci. 1997. Dec. 1. Danny worked for Swan Foods from 1977 to 1978. He knew Robert Brooks and Mary Pung very well. He last saw Mary about 8 years ago. The foods described above were sold in a little (10 by 12 foot) storefront retail store and deli that was located in the same building as the tofu factory but faced the sidewalk on Bird Road. A young lady named Penny, from England, ran the store. It was take-out only–no tables, chairs, or sit-down space. There was one large glass deli case, from which they sold a great many of Mary’s delicious tofu pies. Danny used to have all the recipes for those pies, but he loaned them to his yoga teacher. They also sold lots of herb teas in Pure-Pak quarts, plus many Wah Guru Chew bars–made by another

company that was probably also run by disciples of Guru Maraji. Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155. Phone: 305-667-7141.

1014. *New West*. 1977. Mentions trail mix. 2nd line from top of page. Vol. 2. p. 73. *

• **Summary:** “with fresh fruit, yogurt, pies, homemade granola and trail mix.”

1015. Wallace, Aubrey. 1977. *Natural foods for the trail*. Yosemite, California: Vogelsang Press. 57 p. Illust. 29 cm. *

1016. Albright, Nancy. 1977. *Rodale’s naturally great foods cookbook: the best foods to use and how to use them in over 400 original recipes*. Emmaus, Pennsylvania: Rodale Press. [vi] + 408 p. Illust. 24 cm. Reprinted in 1983 as

• **Summary:** This book is based on natural foods but makes widespread use of meat, poultry, fish, and dairy products. Raw, unstrained clover honey is used as a sweetener instead of white sugar which “is dangerous to health...”

“Natural foods restaurants are ‘in’” (p. 2). “... the joys of natural foods” (p. 3). “... consumers are making a firm commitment to natural food cooking.”

Soy related recipes: Rice and soy crepes (with ½ cup soy flour, p. 53). Whole soybean casserole (p. 74). Bulgur soybean loaf (with ¾ cup soybeans, p. 81).

The section titled “The soybean” (p. 275-85) begins: “The queen of the legumes is the soybean. And its status is growing. From a relatively unknown commodity... it has finally come into its own in this country as an important food. The soybean is the vegetable that most nearly provides the complete protein necessary for good health.” Discusses varieties suited to the family garden. Recipes: Green soybean and corn succotash (with green vegetable soybeans). Soy flour for added values: Soy pancakes. Soy cheeseburgers (with soy grits). Tofu (soybean curd): Mentions the Learning Tree tofu kit and *The Book of Tofu*, by Shurtleff and Aoyagi (1975, Autumn Press; no tofu recipes are given). Soy sauce (shoyu): Herbed soybean salad (with 1 cup soybeans). Fresh vegetable and fruit stew with soybeans. Soybean-cabbage casserole. Soybean coffee. Soybean custard pie. Soy milk (homemade). Carrot soy loaf. Liver pate (with 1 cup soy pulp [okara] remaining from making soy milk). Mock pumpkin pie (with soy pulp). Scroggin (backpacker’s food, with 3 cups soybeans, boiled). Soy potato dumplings (with ½ cup soy flour). Soy salad dressing (with ¾ cup soy flour or powder).

A photo (facing copyright page) shows Nancy Albright cutting vegetables in Rodale’s Fitness House kitchen. Address: Author of *The Rodale Cookbook*.

1017. Deutsch, Ronald M. 1977. *The new nuts among the berries*. Palo Alto, California: Bull Publishing Co. viii + 359 p. Index. 22 cm. [260* ref]

• **Summary:** This is a follow-up to the author's 1961 work (revised in Feb. 1967) titled "The nuts among the berries: An exposé of America's food fads." The basic premise of both books is the same—That all popular books and people advocating health foods, natural foods, organically-grown foods, vegetarian or macrobiotic diets are nuts (crazy). The book is well researched but the tone is again that of an exposé of popular nutrition, one-sided and derogatory. There are two excellent bibliographies. The first, titled "Some controversial books in nutrition, contains 223 citations, listing almost every book ever published on the subjects noted above, including books such as *Diet for a Small Planet*. The second, titled "The factual resources for this book," includes 37 basic nutrition books, textbooks, and articles.

Contents: 1. The magical feast (Adelle Davis; Daisey Adelle Sieglinger). 2. Of cabbages and things (a brief history of "foodism"). 3. Mr. Graham bakes a cracker (Sylvester Graham). 4. Little men, little women, little food (Amos Bronson Alcott, Louisa May Alcott, and vegetarianism). 5. Water, water everywhere (The naturopaths, James Caleb Jackson, Ellen G. White, Father Kneipp). 6. Snap! Crackle! Enter Dr. Kellogg! (Dr. John Harvey Kellogg). 7. The battles of Battle Creek (Michigan and Seventh-day Adventists). 8. Life along the alimentary canal (Metchnikoff). 9. The jungle, the sausage, and the law (Upton Sinclair, Harvey W. Wiley, and the formation of the FDA). 10. Chew, chew Horace (Fletcher, Chittenden). 11. The bare torso king goes public (Bernarr Macfadden, Jack La Lanne, macrobiotics). 12. How to stop your cow from drooling (selling nutrition). 13. Eating for the hull of it (raw sugar, bran, fiber, and foodist or food extremist Alfred Watterson McCann). 14. The drinks are on the Hauser (Gayelord Hauser, macrobiotics). 15. Old proteinaceous Joe or Is there sex after dinner (Lelord Kordel, protein myths, and sex). 16. Mrs. Spratt's millions or Diet is a four-letter word (fat and dieting). 17. Protomania or Richard Nixon's diet revolution (high-protein diets). 18. Swing low, sweet glucose tolerance (hypoglycemia or low blood sugar). 19. How to sell a vitamin (Linus Pauling). 20. My mother squeaked or How to write about health foods (popular health books and articles). 21. The red faced confession and other tales of food cures and law (fraudulent advertising, the FTC). 22. Quick, nurse! The bean sprouts! (unproven therapies and cures, megavitamin therapy). 23. Meanwhile, back at the organic ranch (Jerome I. Rodale). 24. Organic politics or Gloria Swanson goes to Washington (toxic chemicals in foods). 25. How the poison gets into your health food (Center for Science in the Public Interest, Gary Null, and other health promoters).

Let us examine one chapter, 13, titled "Eating for the hull of it." It was well known by the 1990s that dietary fiber was the one nutrient in shortest supply in the American diet, and that this shortage is the cause of many diseases, from simple constipation to various disorders of the digestive tract.

Those advocating a natural foods diet argued that we should return to eating whole-grain bread, primarily for the dietary fiber it contains, but also for its extra vitamins and minerals lost in the process of making white flour. Instead of dealing with these important issues, the author spends most of the chapter ridiculing a "foodist" and "food extremist" named Alfred Watterson McCann (born in 1879) and a physician named Dr. William Howard Hay (who graduated in 1891 from the medical school of the University of the City of New York), and comparing the nutritional value of raw vs. white sugar. He also notes that before the Civil War, the wheat used to make most American bread was soft winter wheat. It was easily ground between stones, then "bolted" through a soft cloth to sieve out some of the larger bran particles—a process which Sylvester Graham "felt was against God's purpose." After the Civil War, Scandinavian and German emigrées moved into the virgin lands of Wisconsin, Minnesota, the Dakotas, and Iowa, bringing with them a new tough wheat—the hard spring wheat. When the millers began to grind and bolt it, they found that much of the valuable gluten stuck to the bran. "To leave the bran in the flour meant creating a product that only a Graham or an Alcott would buy; dark coarse in texture, and hard to chew. Not surprisingly, the public rejected it." The first solution was the "middlings purifier" first installed in Minneapolis in about 1871; the purifier used a blast of air to blow away the bran. The primary solution was the Hungarian Mill, or highmilling machine—which had 6-7 sets of porcelain or chilled steel rollers. Sylvester Graham, James Caleb Jackson, and others said it was "unnatural" to take the bran out of bread. "Dr. [John Harvey] Kellogg's protests, which began about the time that the new wheat and new milling methods arrived, were based on his belief in 'auto-intoxication,' which called for bran to 'sweep out' the intestines and clear away their 'toxins.'" Address: Popular scientific and medical reporter.

1018. Krich, Ken. 1977. Re: New pamphlets on tofu and miso available from Westbrae Natural Foods. Letter to food distributors and manufacturers. 1 p. Undated. Typed, with signature on letterhead. [2 ref]

• **Summary:** "For several years Westbrae has felt a major commitment to popularizing Japanese foods in this country. During a time when shortages of protein have become such a problem, the knowledge of soy-based foods is greatly needed by more people. Both miso and tofu are extremely healthy and inexpensive sources of protein and other nutritional benefits... yet many consumers are still not familiar with these products.

"To fill this information gap we asked Bill Shurtleff and Akiko Aoyagi, authors of *The Book of Tofu* and *The Book of Miso*, to write readable pamphlets on these topics. The authors have lived in Japan for the past five years studying and writing about traditional Japanese foods. You are probably familiar with their book(s)... I have taken the liberty

of enclosing two copies of each pamphlet..."

"You may order either or both of these pamphlets with either the Westbrae logo, your logo, or no logo." This letter is printed on recycled paper. Address: Distributor Sales, Westbrae Natural Foods, Inc., 1224 10th St., Berkeley, California 94710. Phone: 415-524-0506.

1019. Nature's big, beautiful, bountiful, feel-good book. 1977. New Canaan, Connecticut: Keats Publishing, Inc. 322 p.

• **Summary:** The section titled "Remarkable miso and how to use it," by William Shurtleff and Akiko Aoyagi (p. 54-55) contains an introduction and six recipes.

1020. Phillips, Ann Vroom; Phillips, David A. 1977. From the new world of Australia... the soil to psyche recipe book: Delightful new recipes for new age living... plus a total plan for zestful vegetarian nutrition from the bright new world down under! Santa Barbara, California: Woodbridge Press Publishing Co. 143 p. Recipe index. 16 x 23 cm.

• **Summary:** Cover title: "The soil to psyche recipe book." Soy-related recipes include: Darling Downs soya loaf (p. 48-49; "The Darling Downs produce some of the most beautiful organically grown soya beans in the world, on the softly rolling fertile hills. The extremely high fertility is due to the great depth of rich topsoil—five feet or more in many places. The location in subtropical southern Queensland provides the ideal climate for Australia's soya bean crops").

Chulora soya cheese (p. 49-50; Australian aborigines used 2 flat stones to grind seeds and beans into flour that they called "chulora." The authors grind soybeans into superfine soya flour, which they use to make tofu [though the word "tofu" is not used], curded with lemon juice. Into the well-drained curds they mix and mash finely chopped bell pepper and celery tops or parsley, press into a chosen mold, then refrigerate before serving).

1021. Photograph of a jar of Erewhon organic apple juice. 1977.

• **Summary:** This color photograph was taken by Kezia Snyder who says she probably got the jar in about 1977 at Cauldron's Well in New York City. Kezia worked as a cashier for some years at a number of natural food stores in Manhattan (New York City), then she started cooking for people in the late 1970s. In 1981-82 she started a macrobiotic center. In the early 1990s she made macrobiotic pot luck dinners in New York for 5 years. As of April 2011 she is still cooking, sometimes teaching cooking, doing wellness counseling.

1022. Seddon, George; Burrow, Jackie. 1977. The natural food book. New York, NY: Rand, McNally & Co. 240 p. Illust. (color). 28 cm. *

1023. Talking Food Company. 1977. Miso & tamari (shoyu): Foods steeped in culture (Leaflet). Charlestown, Massachusetts. 2 panels each side. Each panel: 21.5 x 14 cm. [2 ref]

• **Summary:** Printed with red ink on off-white paper. Contents: Introduction. Fabulous fungus from antiquity. Secret life of molds. B12 and the protein profile. Beyond vitamins. Is miso pasteurized? Miso and tamari in the USA. Recipes (3).

"In 1976 over 85 tons of traditional miso and 100,000 gallons of traditional tamari were shipped to natural food distributors in the USA by Muso Shokuhin of Osaka and Mitoku Ltd. of Tokyo."

Others in this series (copyrighted 1977) are: "More on sugar and how it got that way" (4 p.). "Fiber: Grandmother was right" (4 p.). Address: Charlestown, Massachusetts 02129.

1024. Talking Food Company. 1977. Fiber: Grandmother was right (Leaflet). Charlestown, Massachusetts. 2 panels each side. Each panel: 21.5 x 14 cm. [4 ref]

• **Summary:** Printed with green ink on off-white paper. Contents: Introduction. Burkitt sends word from Africa. Where have all the fibers gone. For the conscientious termite. Phytic acid and bran (bran contains phytic acid which can bind minerals).

These leaflets were used by natural food stores to educate their customers. Address: Charlestown, Massachusetts 02129.

1025. Talking Food Company. 1977. More on sugar and how it gets that way (Leaflet). Charlestown, Massachusetts. 2 panels each side. Each panel: 21.5 x 14 cm. [4 ref]

• **Summary:** Printed with blue ink on off-white paper. Contents: Introduction. Sweet teeth grow sharper. Nutrition in the dark. The smile that fell apart. Refined wording for a "raw" sugar. Fructose and the corn-sweetener question.

[7 ref]

• **Summary:** Printed with brown ink on off-white paper. Contents: Introduction. What are the nutrients found in whole wheat flour? What nutrients are lost in the milling of white flour? What about enriched flour? How does whole wheat flour turn rancid or lose nutrients? What are the present trends in flour consumption? A glossary of flours.

Distributed by Erewhon, 8454 Steller Dr., Culver City, CA 90230. Address: Charlestown, Massachusetts 02129.

1028. Huang, Carol Ann. 1977? Re: Work at the soy dairy on The Farm in Wisconsin. Letter to William Shurtleff. 1 p. Undated. Handwritten with signature on letterhead.

• **Summary:** Carol Ann thanks Bill for his bag [probably for making soymilk or tofu] and information on tempeh and miso. While Bonnie and John are in La Paz, Mexico, Carol is “doing the Soy Dairy.” She wrote to Mitoku in Japan for some koji or koji starter, but they suggested she write Westbrae. “I’d love to get it together to make several big crocks of miso in the fall.” Address: Route 2, Ettrick, Wisconsin 54627.

1029. Laurelbrook Foods. 1977? Kuzu (Leaflet). Bel Air, Maryland. 1 page. Front and back. 22 x 14 cm. Undated.

• **Summary:** A basic description of the kuzu root and kuzu powder. Black ink on tan paper. Address: P.O. Box 47, Bel Air, Maryland 21014. Phone: 301-879-1717.

1030. **Product Name:** Westbrae Brown Rice Miso.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 1224 10th St., Berkeley, CA 94710.

Date of Introduction: 1977?

New Product–Documentation: Interview with Gordon Bennett. 1987. Aug. 28.

1031. Eden Foods. 1978. Catalog 1978. 4601 Platt Rd., Ann Arbor, MI 48104. 57 p.

• **Summary:** On the cover is a workman loading sacks from one of many large hoppers. Another man, in front of a truck, moves a pallet. Pages 17 and 18 contain detailed information about and photos of the Eden-brand tamari (natural shoyu) and miso products. Eden now sells a brown rice miso, aged naturally for 1½ years. Hacho miso is now called “Soybean miso.” Nigari and Tekka are also listed. No prices are listed in this catalog; it contains descriptions of the products and many nice illustrations. The prices are listed on separate sheets. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

1032. Grandma Mac’s Orchard. 1978. Trail mix (Ad). *Sierra* (*Sierra Club, San Francisco*) 63(1):11. Jan.

• **Summary:** A 1/12 page ad, with white letters on a black

background. “A yummy snack of fruit and nuts in natural form.

“Natural Trail Mix. Unroasted—no salt. Cashews or pumpkin seeds. 2 lbs. \$4.95 delivered. 5 lbs. \$9.95 delivered. Send check or money order to...” Address: P.O. Box 5125 CC, Bakersfield, Kern County, California 93309.

1033. *Sierra* (*Sierra Club, San Francisco*). 1978. Trail snacks for the hiking gourmet. 63(1):28. Jan.

• **Summary:** “You’ve been hiking all morning. You’ve worked up a sweat and a case of the ‘munchies,’ and your blood sugar is plummeting—but still too early for lunch. So you look in your pack for a snack, and mere seconds later, delight returns to the world—sticky fingers and all.

“*Gorp*. Such an ugly word for such a delicious experience. Hasse Bunelle, author of several trail cookbooks, detests this term... Ms. Bunnelle prefers the term ‘trail mix.’ But Bill Kemsley, publisher of *Backpacker*, likes the term and cites its hallowed etymology; ‘its an acronym,’ he says, for ‘Good Old Raisins and Peanuts.’

Four recipes for mixes / blends are given: (1) Bill Kemsley’s *Gorp*. (2) Edgar and Peggy Wayburn’s *Classic Trail Blend*. (3) Celia Hunter’s *Private Blend*. (4) John Fitzgerald’s *Train Non-Mix* (he likes to keep the ingredients separate). Ingredients include: Sunflower seeds. esame seeds. Salted peanuts. Slivered almonds.

1034. Westbrae Natural Foods. 1978. Someday all of this will be as familiar as apple pie (Ad). *Whole Foods* (*Berkeley, California*). Jan. Inside front cover.

• **Summary:** This full-page color ad shows Westbrae Red Miso, Barley Miso, Brown Rice Miso, Soybean Miso, Hatcho Miso, and Tamari, plus various sea vegetables (nori, hijiki, wakame, kombu, etc.).

This ad also appeared in *East West Journal*, May 1978, inside front cover. Address: 4240 Hollis St., Emeryville, California 94608. Phone: 415/658-7520.

1035. *Whole Foods: The Natural Foods Business Journal*. 1978-- . Serial/periodical. Berkeley, California. Steven M. Haines, publisher. Jim Schreiber, editor. Henrietta Haines, art director. Vol. 1, No. 1. Jan. 1978-- . Frequency: Monthly.

• **Summary:** During its early years, this was a very important, high-quality magazine that played a major role in the reporting on and promoting the growth of the natural foods (including the soyfoods) industry in America. True to its name, it focused on and took advertisements for only natural foods and herbs; it took no editorial interest in or advertisements for vitamins, pills, or other food supplements. In an already small market, this was a major reason that the magazine was unable to last long; the other two reasons were unprofessional management and failure of existing advertisers to pay their bills. In 1980 the magazine was purchased by Hester Communications in Irvine, California.

Hester immediately began accepting advertisements for vitamins and other supplements, and published their first issue in Oct. 1980. But the magazine did even more poorly.

On 1 Feb. 1984 *Whole Foods* was purchased by Howard Wainer [pronounced WAY-nur], president of a new company named Whole Foods Communications Inc. Howard had previously sold advertising for *Health Foods Business*, which at this time was the leading trade magazine in the natural/health foods industry (in terms of circulation and total ad space), followed by *Health Foods Retailing* (they had been #1 for years prior to about 1982-83), *Natural Foods Merchandiser*, with *Whole Foods* way down in fourth place. He moved the magazine to 195 Main St., Metuchen, New Jersey 08840, and published the first issue in April 1984. In early 1990 he moved it to 3000 Hadley Rd., South Plainfield, New Jersey 07080.

Note: This is the earliest post-1960 periodical seen (March 2020) with the term “Natural Foods” in the title or subtitle. Address: 2219 Marin Ave., Berkeley, California 94707.

1036. New England Soy Dairy Inc. 1978. Re: Announcing opening of New England Soy Dairy, Inc. Letter to customers and friends of the business, Feb. 17. 2 p. Typed, with signature on orange letterhead. [1 ref]

• **Summary:** “Dear friends. We are pleased to announce the opening of the New England Soy Dairy, Inc... As soon as we can hook up our deep fryer and practice making agé and agé pouches, we’ll add them to our list of products... We have ordered a packaging machine that is scheduled to arrive in a few weeks.” The company will then start making packaged tofu (now it is all sold in bulk), and may begin producing hard tofu (doufu), tofu pudding, and bottled soymilk. “The possibilities for freshly made soybean products seem almost endless. We are experimenting with a soy ice creme, and with miso. We’d really like to start producing tempeh this autumn... Our tofu price will remain at \$0.44/lb to retailers.” The company plans to pick up its first two distributors: Homestead Trading Co. and nearby Llama.

Shurtleff and Aoyagi, and their *Book of Tofu* and *Book of Tempeh* are mentioned in the letter. At the end: “Soy to the world, (Thanks to Akiko Aoyagi for the drawings).” A handwritten note at the end reads: “Bill & Akiko, We sent this around to our customers. We’re still reading the B.ofT. [Book of Tofu]. Tom Timmins. P.S. Come visit us next time you’re East.”

Note 1. This is the earliest document seen (May 2019) that contains the company name “New England Soy Dairy.”

Note 2. This is the earliest English-language document seen (May 2019) that contains the phrase “Soy to the world.” Inspired by the new phrase, Akiko Aoyagi designed a wreath to send out with Bill and Akiko’s Christmas cards later that year. Address: 305 Wells St., Greenfield, Massachusetts 01301. Phone: (413) 772-0746.

1037. Erewhon, Inc. 1978. Hippocrates—Greek physician and father of Western medicine taught: (Ad). *East West Journal*. Feb. p. 9.

• **Summary:** “Let food be thy medicine and thy medicine be food.” A photo shows a marble bust of Hippocrates. Across the bottom of this full-page black and white ad are the addresses and phone numbers of Erewhon’s four stores: Three in Massachusetts (Boston, Cambridge, and Brookline), and one in Connecticut (Hartford). Address: Boston, Massachusetts.

1038. Shumway, Bill. 1978. A chunk of the Orient. Promoting the lowly bean. *Recorder* (Greenfield, Massachusetts). Feb.

• **Summary:** Discusses the New England Soy Dairy, which moved to Greenfield on 1 Feb. 1978. The company incorporated, and invested \$40,000 to \$50,000 in new Japanese equipment and remodeling, according to sales manager Steven Hassell. There are now 8 stockholders in the corporation.

“The dairy distributes much of its product in Massachusetts, with Boston buyers accounting for one-third of the firm’s business. Llama Trading Co., of Greenfield, distributes to northern New England, and two other distributors cover New York state, Maryland and Pennsylvania. Most of the tofu is sold in health food stores, primarily because it is sold in bulk...”

“Foster’s is the only traditional area food store that sells the product. A new individualized packing machine will help the dairy penetrate the chain-store market, Hassell said.” A photo shows Shohaku Okumura cutting tofu.

1039. Westbrae Natural Foods. 1978. Price list [Catalog]: February 1978. Emeryville, California: Westbrae. 20 p. 26 cm.

• **Summary:** On the cover are a black plum blossom logo and a large, bold double “W” in calligraphy near the bottom against a gray background.

Interesting products: Natural fruit butters and unsweetened fruit spreads. Four types of granola and two trail mixes. Panda snacks: Tamari almonds, Tamari cashews, Tamari nut roaster’s mix, Tamari sunflower seeds, White water trail mix (tamari roasted). Westbrae roasted nuts (25 lb boxes): Tamari almond, Tamari cashew pieces, Tamari valencia peanuts, Tamari nut roaster’s mix, Tamari sunflower seeds, Tamari pepitas (pumpkin seeds), Tamari filberts. Tamari nut butters (12, incl. almond, 6 peanut, and sesame tahini). Whole wheat soy pasta.

Asian foods & sea vegetables: Miso (red miso, brown rice miso, barley miso, Hatcho miso, soybean miso, light yellow miso, natto miso). Miso made in the United States: Light yellow, mellow white, red, mixed case. Sea vegetables: Agar, dulce (whole or flakes / powder), sea palm, nori,

aramé, hijiki, kombu, wakame. Shoyu and shoyu products: Josen shoyu, Sendai shoyu, White Tiger Tofu Sauce. Nigari. Kudzu. Umeboshi. Toasted sesame oil. Helpful tools: Wok (11 inch), vegetable brush, glass shoyu dispenser, Tofu kit, Tempeh kit, rice koji (Cold Mountain brand made by Miyako Oriental Foods). Beans: Azuki (10 lb or 25 lb bag), soybeans (60 lb or 25 lb), soy grits raw. Publications: Includes four books and 3 pamphlets by Shurtleff and Aoyagi.

Note: The products in this catalog do not require refrigeration; they contain no refined sugar / white sugar, no meat, and no dairy products—just like the catalogs of almost all other natural food distributors during the 1970s and 1980s. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (order) or 7521 (office).

1040. Cook, Jack. 1978. Erewhon: Purveyor of natural foods. One hundred fifty tons of sunflower seed, 250 tons of spring wheat, and 40,000 pounds of carrot seed are part of this Boston-based wholesaler's \$7 million annual business. world. *Country Life? / Harrowsmith Country Life? Living*. March. p. 35-39, 40.

• **Summary:** Back in the days when Paul Hawken was head of Erewhon something remarkable happened! An anonymous donor offered Erewhon, via Hawken, \$500,000 “to further the basic mission of turning America on to natural foods.”

Then a controversy broke out. Hawken wanted Erewhon to gradually pull out of the commercial, money-grubbing scene entirely, and just leave that to other companies.

Hawken's vision was to “use the donated money to buy a new farm in northern New England. There it would create a community for people to be trained in growing, processing, wholesaling, and retailing natural, organic foods. Erewhon's role would be largely that of natural foods guru, so to speak. Others felt they should continue to do what they were doing, only better, using the money to expand and improve operations. Owner Michio Kushi sided with the latter, but the offer had been made through Hawken. The result was that the \$500,000 was never forthcoming, and Hawken resigned to go write his book on Findhorn.” Address: Former Boston newspaperman, now lives in Vermont on a onetime dairy farm.

1041. **Product Name:** Protein 90, and Protein 90 Plus.

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor).

Manufacturer's Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1978 March.

Ingredients: 1. Isolated soy protein. 2. Isolated soy powder, casein, lactalbumin, brewer's yeast.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Catalog. 1978. “Protein 90 instant high protein soy powder, is an aid to weight control and to reducing calorie, fat, and carbohydrate

intake. Mix in juice, milk, or soup.

“Protein 90 Plus instant high protein blend is made of isolated soy powder, casein, lactalbumin, and brewer's yeast. A nutritional aid to healthful dieting, and to reducing intake of calories, fats and carbohydrates.”

1042. Erewhon, Inc. 1978. Food from the sea of life (Ad). *East West Journal*. March. p. 9.

• **Summary:** This full-page black and white ad shows a dolphin jumping in front of a wave. It discusses hijiki, a sea vegetable. “Enjoy Erewhon hijiki and also try these other fine Erewhon sea vegetables: Kombu, Wakame, Nori, and Arame.” Gives the addresses and phone numbers of Erewhon's three stores in Boston and Cambridge, Massachusetts, and in Hartford, Connecticut. Address: Boston, Massachusetts.

1043. Timmins, Tom. 1978. New England's Laughing Grasshopper tofu shop. *Soycraft (Lawrence, Kansas)* 1(2):1-3. Winter (March).

• **Summary:** An excellent description, with many technical details of the process and equipment, of how tofu is made and marketed at Laughing Grasshopper. The company is now producing 5,000 to 5,500 lb/week of nigari tofu. They buy nigari from both Erewhon Inc. (a direct importer) and Westbrae. Address: Laughing Grasshopper, 3 Main St., Millers Falls, Massachusetts 01349.

1044. *Erewhon News (Newbury Street)*. 1978. Good morning rice with overnight amasake. April 10-16. p. 2.

• **Summary:** “Have you tried Amasake Rice for breakfast? Amasake Rice is a naturally sweet breakfast cereal that you can make easily at home... Amasake is made by fermenting cooked grain with ‘koji’ spores. Koji, the enzyme-rich culture used to make miso, breaks down the natural carbohydrates in the rice to their simple sugar form. The result is a surprisingly sweet rice porridge that is easily digestible and gives quick and lasting energy to start the day. The recipe for Amasake is quite simple.” This recipe for “Overnight Amasake” calls for 3 cups cooked brown rice, 1 cup water, and ½ handful koji starter.

This newsletter is produced by Joel Wollner (Editor & Assistant Manager), and George Rosendale (Manager). Address: 342 Newbury Street [Boston, Massachusetts]. Phone: 262-3420.

1045. *Erewhon News (Newbury Street)*. 1978. Erewhon—Happy Birthday!! April 17-23. p. 1.

• **Summary:** “This weeks marks the twelfth anniversary of Erewhon Natural Foods. It was right here in Newbury Street twelve years ago that Michio and Aveline Kushi, along with a few young friends, bagged the first Brown Rice and bottled the first Tamari that have since become Erewhon standards and the backbone of the Natural Foods movement

in America.” Address: 342 Newbury Street [Boston, Massachusetts]. Phone: 262-3420.

1046. **Product Name:** Eden Genmai (Brown Rice) Miso. **Manufacturer’s Name:** Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1978 April.

Ingredients: Soybeans, brown rice, salt.

Wt/Vol., Packaging, Price: 14 oz, 8.8 lb, 22 lb, and 44 lb.

How Stored: Shelf stable, 6-12 month shelf life.

New Product–Documentation: Eden Foods spring-summer pricelist 1978. Page 11 lists “Eden Brown Rice Miso (Genmai)” as a new product. It is sold in 4 sizes: 14 oz, 8.8 lb, 22 lb, and 44 lb.

Eden Foods Catalog. 1978. Page 18. “Eden Brown Rice Miso (Genmai)—the latest addition to our line is made from soybeans, brown rice and salt. Aged naturally for 1½ years. For more information about miso, we suggest you see *The Book of Miso* and the pamphlets ‘What is Miso?’ and ‘Miso and Tamari, Foods Steeped in Culture,’ all available in our literature sections.”

Ad in Soykraft. 1979. Summer. p. 38. “Traditional Soy Products from Eden Foods.” “Eden miso is made from whole soybeans, grains, and sea salt, fermented at natural temperatures in cedar kegs. Barley miso (mugi), Soybean miso (hacho), Rice miso (kome), and Brown rice miso (genmai) are all available in 14 oz, 8.8 lb, 22 lb, and 44 lb sizes.”

Talk with Michael Potter, Chairman of Eden Foods. 1993. Oct. 31. Genmai Miso was started to be imported from the Muso Co. about 3 or 4 years after the first shipments arrived from Japan.

1047. Eden Foods. 1978. Spring-summer pricelist 1978. 4601 Platt Rd., Ann Arbor, MI 48104. 37 p.

• **Summary:** Products are similar to the catalog published earlier in 1978. Eden now carries many East Asian (mostly Japanese) herbal products from Herb T. Company in San Francisco, incl. Kuzu Root Tea. Salt products include: Mineral Salt (Indianola Oquirrh), and Herba Mare (France). Pure & Simple now makes 3 salad dressings: Romano, Sesame Herbal, and Mayonnaise.

Page 11 lists “Eden Brown Rice Miso (Genmai)” as a new product. It is sold in 4 sizes: 14 oz, 8.8 lb, 22 lb, and 44 lb. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

1048. **Product Name:** Nasoya Organic Tofu (Water Pack).

Manufacturer’s Name: Nasoya Foods.

Manufacturer’s Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453. Phone: 617-537-0713.

Date of Introduction: 1978 April.

Wt/Vol., Packaging, Price: First bulk packed in water, then

water packed in molded plastic trays, then vacuum packed, finally water packed in trays again.

How Stored: Refrigerated.

New Product–Documentation: Shurtleff & Aoyagi. 1978, Dec. *The Book of Tofu* (Ballantine pocketbook edition). “Appendix B: Tofu Shops and Soy Dairies in the West.” p. 396. Owner: John Paino and Bob Bergwall.

Ad in Order of the Universe. 1979. No. 52. Autumn/winter. p. 21. “Tofu. Get the pick of the crop. Nasoya—Traditional firm tofu. Made with untreated, deep well water and using organically grown soy beans, stone ground just prior to cooking in large open cauldrons—a traditional firm tofu. Great for: Miso soups, salad dressings, stir-fried vegetables, baked dishes & vegetable stews.”

Letter from John Paino. 1981. Jan. Gives starting date as April 1978. The company’s main founders were John Paino and Robert Bergwall. It cost them about \$40,000 to get into business. The first tofu plant was about 1,500 square feet in size. During the first year, they made tofu and soymilk. After 1 year, they were making 18,000 lb/month of tofu, after 2 years 33,000 lb/month, and now they are making 50,000 lb/month.

Poster. 1982, undated. 9 by 12 inches. Color. Reprinted in Soyfoods. Soyfoods Center Computerized Mailing List. 1981. Jan. 22. Owner: John Paino & Bob Bergwall. 1983. Winter. p. 64. “Experience the variety of tofu tastes: Rich in protein, cholesterol free, low in calories.” As of Oct. 1988 Nasoya no longer vacuum packs tofu. They private label water packed tofu for Cornucopia and Stow Mills.

Talk with John Paino. 1989. Sept. 26. For the first month after Nasoya started making tofu, they packaged it in pails in bulk. Then they switched to water packing in tubs, starting with a small Monkey Packer with a foot pedal that packed once cake at a time. Under ideal conditions, this tofu had a 2-week shelf life. For the next 4 years they sold only water packed tofu. Then Tomsun, their main competitor, started pasteurizing their water packed tofu, which gave it a longer shelf life, and gave them a competitive advantage in supermarkets. Nasoya did not have enough space in their plant to install a pasteurization unit (the plant’s maximum output was 5,000 to 6,000 lb/day of tofu), nor the inclination to pasteurize. So they made a bold move, and in 1981 started vacuum packaging, using a \$55,000 Tiromat film machine. Their first tofu was vacuum packed in a clear film package, but within a month everyone told them to either change the film or take the product out of the produce case, because it looked terrible; it got beat up very badly. So they changed to a bottom film.

Nasoya Newsletter. 1990. Jan. p. 2. “Nasoya introduces new tofu labels.” In January, Nasoya will introduce a colorful new tofu label to all supermarkets and natural food accounts. The new label, which matches the company’s Nasonaise, Vegi-Dressing, and Vegi-Dip labels, will contain a brief description of the style of tofu, along with an easy recipe on

the back. A large circle in the center of colorful vegetable drawings says “Organic. Made with well water.”

Note: This is the earliest record seen (May 2019) concerning Nasoya Foods.

1049. Rodale, Robert. 1978. With the editor: Nasty surprise about pesticides. *Organic Gardening and Farming* 25(4):40-41. April.

• **Summary:** A recent series of discoveries has destroyed the idea that chemical pesticides can be used safely as long as you follow the directions on the label. It has been found that some of the basic facts about pesticide safety for humans is wrong.

For example, some pesticides labeled as “non-persistent” (meaning they can kill humans and animals when first applied, but they soon disappear) are not.

A scientific article has shown, for example, that three common pesticides considered to be “non-persistent” are actually not. “They fasten themselves to soil particles much more than does a “persistent” chemical like DDT.

Then there is Vesicol Chemical Corporation, maker of heptachlor and chlordane. Last Dec. 12 the company was the subject of an 11-count Federal indictment charging that they failed to submit data to the Environmental Protection Agency (EPA) which allegedly showed that mice fed these chemicals had tumors on their livers “visible to the naked eye” and that they might pose a risk of cancer in humans. But the data was withheld.

The bigger picture is this: most of the tests of pesticide safety are done by scientists working for the chemical companies. How is the end user supposed to know the truth.

Another problem is many of the effects of exposure to chemicals first appear years after the chemicals were used.

Still another problem is so-called “inert” ingredients—such as vinyl chloride or formaldehyde. They may be inert to insects but some have the potential to do enormous harm to humans. It is now known that vinyl chloride can cause cancer in humans about 15 years after they are exposed to it.

The sad fact is that most of these chemicals are not needed. “Millions of organic gardeners and thousands of organic farmers have proven in recent years that abundant harvests can be produced without the use of any synthetic pesticides.” They use other natural and biological controls with excellent results. And with fertile soil, Nature often takes care of the problem. An estimated 99% of all bugs are either helping us or not hurting our plants.

A small portrait photo shows Robert Rodale.

1050. Wells, Patricia. 1978. The American way of eating: Carnivores and others. For some, organic is better. *New York Times*. May 24. p. C1, C6-C7.

• **Summary:** About Robert Rodale, the growing organic movement, and natural living. He is working “to bring the rest of the world closer to his own goal of a simpler, cleaner,

more self-sufficient life.”

1051. Japan Food Research Laboratories. 1978. Analysis of natural nigari. Tokyo, Japan. 1 p. [Eng]

• **Summary:** This is a report (analysis certificate no. 11040896) of natural nigari submitted by the Natural Salt Spread Association of Japan. The sample was received on 26 April 1978 and the assay conducted on 15 May 1978 at Laboratory No. 1.

Arsenic: not detected (below 0.1 ppm [parts per million]). Lead: 1.50 ppm. Zinc: 0.10 ppm. Total mercury: not detected (below 0.1 ppm). Iron: 11.3 mg%. Signed: H. Suda, inspector.

Note: See also the analysis of nigari conducted in Oct. 1977 by Curtis & Tompkins in San Francisco, California, for Westbrae Natural Foods. They analyzed only the lead content and found 1.75 ppm—16% more than was found by this Japanese laboratory. Address: Tokyo Head Office: 52-1 Motoyoyogi-cho, Shibuya-ku, Tokyo.

1052. Shurtleff, William. comp. 1978. Mailing labels of companies buying large quantities of *The Book of Tofu*, and *The Book of Miso* from Autumn Press. Lafayette, California. 1 p. Undated. Unpublished typescript.

• **Summary:** Mailing labels (including the company name, purchaser or key contact person, and address) are given for the following companies: Erewhon, Inc. (Cambridge, Massachusetts), Nutri-Books Corp. (Denver, Colorado), Lifestream Natural Foods (Richmond, BC, Canada), Manna Foods (Scarborough, Ontario, Canada), Midwest Natural Foods (Ann Arbor, Michigan), Nature’s Best (Torrance, California), Laurelbrook Foods (Bel Air, Maryland), Feather River (Bellevue, Washington), Arrowhead Mills (Denver, Colorado), Llama Trading Co. (Greenfield, Massachusetts), Reality Natural Foods (Honolulu, Hawaii), Tree of Life (St. Augustine, Florida), Eden Foods (Ann Arbor, Michigan), New Leaf Distributing Co. (Atlanta, Georgia), East West Journal (Brookline, Massachusetts), Mother Earth News (Hendersonville, North Carolina), Bookpeople (Berkeley, California), Landstrom (South San Francisco, California), Health Foods Inc. (Des Plaines, Illinois).

A single-letter code, A through D, appears in the upper right corner of each label. A = Biggest buyer. B = Second biggest buyer, etc. Erewhon and Nutri-Books are the two biggest buyers. Address: Lafayette, California.

1053. Westbrae Natural Foods. 1978. Price list [Catalog]: June 1978. Emeryville, California: Westbrae. 30 p. 22 by 28 cm.

• **Summary:** On the cover are pink, red and light blue Japanese plum blossom crests against a blue background. Address: P.O. Box 8711, Emeryville, California 94662. Phone: 415/658-7518.

1054. Fitzgerald, Rick. 1978. Eden Foods: Small shop to major distributor. *Ann Arbor News (Michigan)*. July 9. p. D-16. Sunday.

• **Summary:** At lunch time the owners and 50 employees at the Eden Foods warehouse on Platt Road sit down together for lunch, then play volleyball before going back to work. Eden is now a multi-million wholesale-retail company serving more than 500 natural food stores and restaurants throughout the Midwest. “This year, Eden Foods partners Mike Potter and Tim Redmond estimate their sales to retailers will be \$4 million. When the sales at their own retail store and two restaurants are tossed in, they figure total sales will hit \$5 million. Potter and Redmond tout their business as the largest natural food distributorship in the Midwest.”

“Potter estimates that 20 percent of the total warehouse inventory is imported from China and Japan. This includes teas, herbs, seaweed, cooking utensils and ginseng. Eden foods has an exclusive import franchise from China to the United States for the Shiu Chu ginseng root.”

Eden has also been able “to convince several local farmers to grow grains for them without the chemicals they were used to using on their fields. Eden foods contain no refined sugars or non-natural preservatives. Instead of sugar they use either honey or a malt syrup...”

“Eden Foods also operates a retail store and natural foods restaurant at 330 Maynard. Last August, Eden also opened Turtle Island restaurant on State Street... As recently as 1974 they had to have Redmond’s father co-sign for a loan from an Ann Arbor bank.”

The company “started a wholesale business in 1972, and in the fall of 1974 Potter attended his first commodities trade show in China. Potter was 23 when he first went to the Chinese Export Commodities Fair in Canton and has now returned 8 times.” At the fairs, which can be attended by invitation only, Potter lines up imports of ginseng root, tea, and other goods.

Photos show: (1) Owners Tim Redmond (age 31) and Mike Potter (age 28). (2) The inside of the Eden Warehouse. (3) A noon volleyball game. Address: Business-Labor reporter.

1055. Bean suppliers. 1978. Ann Arbor, Michigan. 1 p. Unpublished manuscript.

• **Summary:** This handwritten, one-page list of soybean suppliers was compiled by various tofu makers during the foundation meeting of the Soycrafters Association of North America, July 28-30, 1978, Ann Arbor, Michigan. Each entry has three parts: Shop [buying the soybeans], supplier [of the soybeans] and address, and price (in cents/pound). In some cases the organic status and/or variety name is given.

(1) White Wave: Living Farms, Tracy, Minnesota. 17.5 cents/lb. [organic]. (2) Swan Food: Golden Acres, Illinois (certified organic). 20 cents/lb. (3) Nupro Foods / Soywaze Tofu: Arrowhead Mills, Denver wholesale. 21 cents/lb. (4)

Magic Bean Co-op: Inter-Community Co-op, 1335 Gilson, Madison, Wisconsin 53715. From Columbus, Wisconsin. 21 cents/lb. (5) Happy Dragon Tofu, Laurelbrook Natural Foods. 18-20 cents/lb.

(6) Rebecca Miller [Rebecca Uchida, MU Tofu], GIP-C Warehouse, St. Charles, Minnesota (organic). 19 cents/lb. (7) Joy of Soy: Ed & Helen Kranz, Diamond K Enterprises, St. Charles, Minnesota. Corsoy: 14 cents/lb, Veg: 16 cents/lb. (8) The Tofu Shop—Rochester, New York: Logan Bros. Farms, Fort Plain, New York. 13.5 cents/lb. (9) Southwest Tofu, Rt. 2, Box 234, Santa Fe, New Mexico 87501: New Life Food Co-op, Santa Fe, New Mexico. 21 cents. (10) The Soy Plant, 211 E. Ann, Ann Arbor, Michigan 48104. Phone: 663-0500: Tom Vreeland, 5861 Geddes Rd., Ypsilanti, Michigan. 13.34 cents/lb. Cleaned. 14 years—no herbicides or pesticides. Beeson variety.

(11) Lecanto Tofu: Ken McCaleb, Clarence, Louisiana. 24 cents/lb. Organic. (12) New England Soy Dairy: New Life, Tracy, Minnesota. Prize: 19.25 cents/lb. Organic. (13) Crystal Hills: Logan Bros., Fort Plain, New York. 17.25 cents/lb. Organic.

Note: Of the 13 soyfoods manufacturers listed, 6 (almost 50%) are buying organic soybeans.

1056. Bellicchi, Kathy. 1978. New England Soy Dairy. *East West Journal*. July. p. 42-44.

• **Summary:** A good history of and introduction to the company. “New England Soy Dairy began a year and a half ago with four partners, Tom Timmins, Kathy and Ira Leviton, and Michael Cohen. Before they got together, Tom was working for a natural foods distributor [Llama, Toucan & Crow], Kathy and Ira were running a natural foods bakery, and Michael was living in Virginia in a satellite community of The Farm (an experience which provided him with a sound working knowledge of soybeans)... They went into business as the Laughing Grasshopper Tofu Shop...” Later the company moved to a much larger facility on the outskirts of Greenfield, Massachusetts. Today they make 1,600 lb of tofu per 8 hour day.

The company presently produces only tofu. However they are in the “process of perfecting a variety of other soy products, including soy milk, soy mayonnaise, dips for crackers and spreads for sandwiches, tempeh (split, hulled soybeans that are fermented), age (deep-fried tofu), and, eventually, ice cream.”

Photos show: A barrel of soy milk being curded with nigari. Arthur Braverman standing by the tofu-making equipment at the center of the plant. Tofu being pressed in forming boxes. Ira Leviton carrying a tray of tofu ready for packaging.

1057. *Consumer Reports*. 1978. Fluoridation: The cancer scare. I. 43(7):392-96. July.

• **Summary:** *Consumer Reports*, after a long and apparently

fair history of the problem and analysis, concludes that fluoridation is safe and effective in reducing dental cavities.

1058. *Organic Gardening*. 1978-- . Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Robert Rodale, editor. Vol. 25, No. 7. July 1978.

• **Summary:** Previous title *Organic Gardening and Farming*. Subsequent title *Rodale's Organic Gardening*. Continued until Vol. 32, No. 7, July 1985. Address: Emmaus, Pennsylvania.

1059. Rodale, Robert. 1978. Welcome to *Organic Gardening*: With the editor. *Organic Gardening*. July.
• **Summary:** "With this issue, the words 'and Farming' no longer appear in the name of our magazine. *Organic Gardening and Farming* has become *Organic Gardening*. Millions of Americans are now growing food in home gardens, and the editor believes that should the magazine's focus." Address: Editor, 33 E. Minor St., Emmaus, PA 18049.

1060. *Consumer Reports*. 1978. The attack on fluoridation. II: Six ways to mislead the public. 43(8):480-82. Aug.

• **Summary:** This article (Part II) begins: "There are three kinds of lies,' remarked 19th-century British statesman Benjamin Disraeli, 'lies, damned lies, and statistics.' Probably every type of misrepresentation known to Disraeli, and some he may have overlooked, have been used to attack fluoridation. Misleading information about it appears regularly in a paper called the National Fluoridation News, and the entire gamut of hokum has recently been published in a 176-page issue of the *Cancer Control Journal*, a pro-Laetrile magazine based in Los Angeles.

"In last month's issue of *Consumer Reports*, we examined the most prominent charge—that fluoridated water causes cancer—and reported it to be baseless. But fluoride is also accused of causing numerous other ills, ranging from brittle nails to birth defects. Since such claims are resurrected whenever fluoridation comes up for a vote, we'll discuss the most persistent ones and the evidence behind them."

The six ways to mislead are: (1) Claim: fluoride is a poison. (2) Claim: Fluoride causes birth defects. (3) Claim: Fluoride is mutagenic. (4) Claim: Fluoride causes allergic reactions. (5) Claim: Fluoride causes cancer in animals. (6) Claim: Fluoride contributes to heart disease.

The facts: Antigo learned them the hard way. In 1960 the residents of Antigo, Wisconsin, "voted to discontinue its 11-year practice of fluoridating the water supply. The decision eventually led to a study by public health officials, who wanted to learn what effects the end of fluoridation would have on the dental health of Antigo youngsters.

"During 1960, dental personnel from the Wisconsin Division of Health examined nearly all children in the kindergarten, second, fourth, and sixth grades of Antigo's

schools. The examiners recorded the number of decayed, missing, or filled teeth for each child. Four years later, they repeated the examination among children in all of the same grades except the sixth.

"The kindergarteners in 1964 had a rate of dental problems 92 percent higher than their counterparts four years earlier. Among second-graders, the decay rate in permanent teeth was up 183 percent. Among fourth-graders, it was up 41 percent. A subsequent examination of sixth-graders showed a 91 percent increase in decay rates. In 1965, Antigo voted to reinstate fluoridation.

"Despite persisting claims about heart deaths by local anti-fluoridationists, the people of Antigo today still drink fluoridated water. Meanwhile, about 100 million Americans do not, largely because of the fears raised by opponents of fluoridation. The simple truth is that there's no 'scientific controversy' over the safety of fluoridation. The practice is safe, economical, and beneficial. The survival of this fake controversy represents, in CU's [Consumer Union's] opinion, one of the major triumphs of quackery over science in our generation."

Consumer Reports concludes that fluoridation is safe and effective in reducing dental cavities.

1061. Westbrae Natural Foods. 1978. Results of miso survey, at Wholly Foods in Berkeley, California, Aug. 14-15. Berkeley, Calif. 1 p. Unpublished manuscript.

• **Summary:** 59 people were polled on their uses of and attitudes toward miso. 33 people used it in soups, 12 in sauces, 9 in spreads. 29 had a favorable attitude toward miso, 17 unfavorable, 13 neither. Of the unfavorables, 9 said miso is too salty, 5 don't know how to use it, 3 said it is inconvenient to use. Of the favorable, 17 said it is a natural food, which meat is not. Address: Berkeley, California.

1062. Arrowhead Mills, Inc. 1978. Price list. Hereford, Texas. 6 p. Sept. 15. 28 cm.

• **Summary:** Printed with light brown ink on white paper. Contents: Whole grains. Beans, seeds and nuts. Cereals and flakes. Flours. Packaged grains. Packaged beans, seeds and nuts. Packaged cereals and flakes. Packaged flours. Oils. Nut butters (Peanut butter {creamy or crunchy}, sesame butter, sesame tahini). Condiments. Pastas. Beverages. Earthwonder dinners. Miscellaneous. Simpler Life vitamins. "The Simpler Life" Unit A all #10 cans. Unit B all #2½ cans. Unit C all #2½ cans. Star Unit all #2½ cans. Additional Simpler Life foods.

Soy related products—bulk: Soybeans (50 lb). Bulghur-soy grits (50 lb). Seven grain cereal (40 lb). Soybean flakes (25 lb). Soy flour (roasted, 30 lb).

Soy related products—packaged: Soybeans (12 x 1 lb). Bulghur-soy grits (12 x 20 oz). Seven grain cereal (12 x 24 oz). Soybean flakes (12 x 1 lb). Soy flour, whole (12 x 1½ lb). Soy oil (pint, quart, or 5 gallon). Tamari soy sauce (pint,

quart, or 4.7 gallon). Protein powder (in Simpler Life Unit-B #2½ cans). Address: Box 866, Hereford, Deaf Smith County, Texas. Phone: (806) 364-0730.

1063. **Product Name:** Tamari Soy Sauce.
Manufacturer's Name: Arrowhead Mills, Inc. (Marketer).
Manufacturer's Address: Box 866, Hereford, TX 79045.
 Phone: (806) 364-0730.
Date of Introduction: 1978 September.
New Product–Documentation: Arrowhead Mills. 1978. Sept. "Price list." (pints, quarts, and 4.7 gallons). / Arrowhead Mills. 1987. Catalog. 1.5 and 30 lb.

1064. **Product Name:** Seven Grain Cereal.
Manufacturer's Name: Arrowhead Mills, Inc.
Manufacturer's Address: Box 866, Hereford, TX 79045.
 Phone: (806) 364-0730.
Date of Introduction: 1978 September.
Ingredients: Wheat, oats, triticale, millet, soybeans, buckwheat, yellow corn.
Wt/Vol., Packaging, Price: 24 oz (680 gm). in poly bag.
How Stored: Shelf stable.
New Product–Documentation: Arrowhead Mills. 1978. Sept. "Price list." (40 lb bulk and 12 x 24 oz).

Ad in Whole Foods. 1979. p. 21. "A hot deal on our hot cereals. We treat foods with respect, not chemicals."

Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 45-55. "Arrowhead Mills Deaf Smith Country Reader" by Frank Ford. "Arrowhead Mills 7-Grain Cereal offers all the natural goodness of wheat, oats, triticale, soybeans, buckwheat, yellow corn and millet—all blended together in a flavorful cereal your whole family will love. Delicious." An illustration (line drawing) shows the label. The correct order of ingredients is that shown in the "Ingredients" field. The "soybeans" are probably soybean flakes (microflaked soybeans), introduced in 1973.

1065. **Product Name:** Protein Powder.
Manufacturer's Name: Arrowhead Mills, Inc.
Manufacturer's Address: Box 866, Hereford, TX 79045.
 Phone: (806) 364-0730.
Date of Introduction: 1978 September.
Ingredients: Soy protein (isolate).
Wt/Vol., Packaging, Price: 12 x 12 oz cans.
How Stored: Shelf stable.
New Product–Documentation: Arrowhead Mills. 1978. Sept. "Price list." Protein powder (12 x 12 oz).

1066. **Product Name:** The Simpler Life (Food Storage Program).
Manufacturer's Name: Arrowhead Mills, Inc.
Manufacturer's Address: Box 866, Hereford, TX 79045.
 Phone: (806) 364-0730.

Date of Introduction: 1978 September.

Wt/Vol., Packaging, Price: Canned.

How Stored: Shelf stable.

New Product–Documentation: Arrowhead Mills. 1978. Sept. "Price list." "The Simpler Life" Unit-A All #10 cans. Soybeans (2 x 25.9 lb). Soy Flakes (7.5 lb). Unit-B All #2½ cans. Protein (2 x 9 lb). Unit-C All #2½ cans. Bulghur-Soy Grits (7.5 lb). Note: Food storage programs are for those who want to be sure they have adequate food reserves in their home in case of a disaster.

1067. Coopers & Lybrand. 1978. Erehwon, Inc.: Financial statements for the years ended June 30, 1978 and 1977.

Boston, Massachusetts. 9 p. Sept. 1. 28 cm.

• **Summary:** Erehwon's total liabilities increased to \$1,852,423 in 1978, from \$1,322,099 in 1977. Net sales also increased to \$10,155,870 in 1977, from \$8,379,860 in 1977. Net income before taxes decreased dramatically to a loss of \$200,717 in 1978, from a profit of \$244,191 in 1977. Address: Boston, Massachusetts.

1068. **Product Name:** Tofu Tahini Spread.

Manufacturer's Name: Michele's Beautiful Spreads and Dressings.

Manufacturer's Address: 1214 Manor Rd., Havertown, PA 19083. Later Philadelphia, PA. Phone: 215-474-8638 (9/92).

Date of Introduction: 1978 September.

Ingredients: Incl. soft tofu, sweet carrots, sesame tahini, fresh herbs (10/87).

How Stored: Frozen.

New Product–Documentation: Spot in Natural Foods Merchandiser. 1987. Oct. p. 23. "Tofu Dressing." The product seems to be named "Michele's Original Tofu Tahini Spread." The company is now named Michele's Original Gourmet Tofu Products, located at 6441 Haverford Rd., Philadelphia, Pennsylvania 19151. 9 oz. Retail for \$2.55.

Manufacturer's catalog. 1987. Richard Rose review. 1987. Oct. 28. "Bland, uninspiring."

Talk with Robert Ashton of Natural Alternatives in Washington, DC. 1992. Sept. 14. Michele's Tofu Spread (which is still on the market) is very similar to the one he has long made. Note: This product is not made by Michele's Bakery in Philadelphia. Talk with John Liss of Michael's Bakery. This product is still on the market. Talk with Howard Waxman of Essene in Philadelphia (Phone: 215-922-1146). 1992. Sept. 21. He carries Michele's tofu spreads and dressings. The small business, which operates out of a store front (but does not sell retail), is run by a woman named Michele. Gives phone number of Michele's.

Talk with Michele D'Ambrosio, founder and owner of Michele's Original. 1992. Sept. 21. She became a vegetarian in 1974 in college and started making this product that year for herself and for one restaurant (named The Sunflower; she worked there while she went to St. Joseph's University

in Pennsylvania. “We used to make it for a Pita Pocket, a Yogi Hoagie”). After the restaurant closed, she started in Nov. 1978 to sell it to a few health food stores (since that’s all there were) in Havertown. She now made this, her first tofu product, out of the pantry of her home in Haverford. It was her original idea and it is still her best-seller. Other people have copied the idea since. Her company made only this one product for a number of years. In 1980 she changed the company name to Michele’s Original and moved to her present address, a commercial deli kitchen at 6441-43 Haverford Ave., Philadelphia PA 19151. Phone: 215-474-8638. But she still lives in Havertown.

Talk with Michele D’Ambrosio. 1998. June 29. Her company produces vegetarian sandwiches made with soy meats (such as tofu and baked tofu), plus tofu spreads, tofu dressings, tofu salads, and tofu in the pasta. It’s a whole vegetarian menu. She is age 48. The Tofu Tahini, a spread, is still her best-seller. It is prepared with carrots and other vegetables, which are pureed, then tahini is added; its like an orange whipped cream. She buys her tofu from a Korean company located in Chinatown in Philadelphia, Tung Yu [which is actually a wholesale distributor for tofu made by Sun Yee]. Her distributors are Cornucopia, Stow Mills, and Neshaminy Valley. In 1979 her community published a little cookbook titled *The what to do with tofu cookbooklet: Recipes for soybean curd*. It contained cute illustrations. It used to be distributed by her co-op, the Grow-cery, later renamed the Philadelphia Co-op. Her community practiced meditation from Guru Maraji; she is still his disciple.

1069. Product Name: Miso Cheese (Tofu Fermented in White Miso).

Manufacturer’s Name: Soy Plant (The).

Manufacturer’s Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

Date of Introduction: 1978 September.

Ingredients: Firm tofu, miso.

Wt/Vol., Packaging, Price: Sold fresh in slices in a deli.

How Stored: Refrigerated.

New Product–Documentation: Interview with Steve Fiering. 1988. June 10. He is at 30 Newell Rd., Palo Alto, California 94303. Phone 415-326-7123. “This product was developed in the fall of 1978 by a person name Jura (pronounced Ju-RAH) McDowell, who was a black American Rastafarian and a vegan from Alabama. He made very firm tofu, sliced it into ½-inch-thick slices, and embedded it in young, usually sweet white miso in a crock. Some of the miso they made in house, and some they bought from Westbrae, who bought it from Miyako/Cold Mountain in Los Angeles. The tofu was not wrapped in cheesecloth. After about 4-6 weeks they would remove the tofu, scrape off the miso for use later in cooking, then sell the tofu slices in the deli. The tofu was never pureed (like Simply Natural did) to give a cream-cheese consistency. By the time it had

been through the fermentation it has lost the rubbery aspect of its texture. It was pretty soft, but we never processed it any further. It was sort of like the cream cheese you buy in a slab, wrapped in a piece of Saran. It was always quite tasty when we would make it. I always thought it was great, and a great original idea. It was very rich, kind of like Brie. We used to love it when we could get it. We just never sold it outside our Soy Deli and even in the Deli we usually had a very limited amount of it. People would use it as a spread. It was quite expensive for us to make, probably over \$6 a pound, mainly because of the cost of the miso. That was prohibitive, so it never really became anything. We could never make any money on it. Jura also made delicious stuffed Agé [deep-fried tofu pouches] and yuba rolls that were sold in the Deli. He did a lot of experimenting.”

1070. Pollack, Susan R. 1978. Food for thought: Activist turns to the lowly soybean as tool to promote global change. *Detroit News*. Oct. 4. p. A-1, col. 5.

• **Summary:** The activist is Jerry MacKinnon, age 29. Five years ago he was shivering on the streets of Washington, DC, with thousands of angry anti-war activists protesting President Nixon’s second inauguration. He’s still struggling for social change, but now he’s making tofu with six other vegetarians at The Soy Plant in Ann Arbor, Michigan. He has focused his political energy on two less dramatic movements: (1) Promoting the inexpensive, protein-rich soybean as an answer to world hunger; (2) Expanding America’s network of “new wave” cooperatives. Still part of the Revolution, now he talks less and works more.

Tim Huang, is an emergency medical instructor who owns Yellow Bean Trucking Company, which distributes The Soy Plant’s products. He also believes that soybeans are a revolutionary food—“right off the top of the food chain.” China’s 800 million people use them to survive in place of meat. America, the world’s leading producer of soybeans, feeds them to cows instead of to people.

The Soy Plant, at 211 East Ann St. in Ann Arbor, makes tofu, and soymilk (plain and flavored with honey-vanilla). The products are distributed to co-ops and natural food restaurants throughout Michigan and neighboring states by the Michigan Federation of Co-ops, Midwest Natural Foods of Ann Arbor, and Huang’s trucking company.

The nonprofit Soy Plant has become a thriving wholesale-retail operation in less than a year. The work is shared and decisions are made jointly. The investment of almost \$7,000 for equipment and supplies has come mostly from community residents, who receive as interest for each \$100 loan a pound of tofu a week for the rest of their lives.

The plant is operating at near capacity, making 2,000 lb/week of tofu. But it’s hard work and members have to be self-motivated.

Recently [in July] The Soy Plant hosted, in Arbor, the first national convention of tofu makers.

Sue Kalen, age 22, likes to experiment with tofu. She has made such delicacies as tofu pies, filled with raisins, banana, coconut, and carob; tofu tahini spread, and spiced tofu with poppy seeds, mustard, cayenne, garlic, and sunflower seeds.

According to Dr. Zane Helsel, an agronomist at Michigan State University, the soybean has become Michigan's fastest growing crop in recent years. Among grains, it is second only to corn as a cash producer. About 720,000 acres/year are grown in the state's southern five tiers of counties.

A photo shows Jerry MacKinnon pouring soaked soybeans into the hopper of a grinder and Steve Fiering pouring soybeans into a soaking tank. Address: News staff writer.

1071. Dart, Susan. 1978. Tofu means high protein at a low price: Natural foods. *Chicago Tribune*. Oct. 19. Section 6. p. 14. [1 ref]

• **Summary:** "Everyone by now has heard of tofu, but a lot of people still haven't tried it." Talks about *The Book of Tofu* by Shurtleff and Aoyagi, notes that you can make tofu at home (using the Learning Tree tofu kit, \$12.95), and gives a recipe for a Mushroom-tofu dish.

1072. Mori, Shigeru. 1978. Re: Cold Mountain Dry Koji. Letter to Lorenz A. Schaller, Natural Order Co., P.O. Box 4, Angelus Oaks, CA 92305, Oct. 24—in reply to inquiry. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** Suggests that Mr. Schaller order Cold Mountain Dry Koji from Erewhon Natural Foods. Note: This koji is made by Miyako Oriental Foods, a subsidiary of Mutual Trading Co. Address: Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013. Phone: 213-626-9458.

"*The Book of Miso*, \$7.95 postpaid."

1075. Jacobs, Leonard. 1978. Menage: Where can I get information about traditional Japanese foods—like miso, soy sauce, umeboshi, sea vegetables—that are sold at my natural food store? L. Paulsen, Chicago, Illinois. *East West Journal*. Oct. p. 12.

• **Summary:** Answer: One of the largest exporters of these foods, Muso Co., has recently printed a series of pamphlets describing how these products are made and the nutritional value of each. The pamphlets are available from: Stephen Earle, Muso Co., Ltd., Nishishinmachi 1-2-18, Wakae, Higashi-Osaka 578, Japan. Address: Publisher, East West Journal.

1076. Westbrae Natural Foods. 1978. Price list [Catalog]: October 1978. Emeryville, California: Westbrae. 34 p. 22 by 28 cm.

• **Summary:** On the cover are orange and yellow Japanese plum blossom crests against a brown background. New products (written in all capital letters): Wholewheat soy spirals (pasta). Address: P.O. Box 8711, Emeryville, California 94662. Phone: (415) 658-7518 (orders).

1077. *Boston Globe*. 1978. Living section: Erewhon. Nov. 13.

• **Summary:** For organic foods in Boston, visit Erewhon at 1731 Massachusetts Ave. (including locally grown organic produce), or Cambridge Natural Foods at 1670 Massachusetts Ave., or the Organic Food Cellar at 1050 Massachusetts Ave. Address: Massachusetts.

1078. O'Byrne, Marjorie. 1978. Getting around. *Boston Globe*. Nov. 19. Local New England section.

• **Summary:** The Sun Pot, a manual yogurt maker, provides an easy way to make smooth and creamy yogurt at home—with no electricity or timer required. It can be purchased at Erewhon, Inc., 342 Newbury St., Boston, MA 02115. Phone: 262-3420. Or Erewhon, Inc., 1731 Massachusetts Ave., Cambridge, MA 02138. Phone: 492-2599. Address: Massachusetts.

1079. Swan Food Corp. 1978. Swan Foods: Remember the name! (Ad). *Alternatives (Miami, Florida)*. 2(11):53. Nov.

• **Summary:** This half-page ad lists the company's soy products, iced herbal beverages, and baked goods & pastries. Soy products include: Baked tofu, Marinated tofu, Caraway tofu, Tofu chip dip, Tofu salad dressing, Soy melk (sweetened, or carob soy milk), Soyogurt (a cultured soy product), Wholegrain soy burgers. Baked goods include: Tofu cheesecakes, Carob maple swirl, "and more to come."

On the top half of the ad is a large circular logo featuring a stylized swan, with two large wings symmetrical about a vertical axis and an arched neck on the left side. The other half of the arch is drawn in to form a heart, inside of which is written "Because we love you." Across the inside top are the large words "Swan Foods." A rainbow arches below them and over the swan. At the top center, between the words "Swan Foods," are the smaller words "Nature's Finest" written one below the other; between them is an infinity sign.

Across the bottom of the ad is written: "Every Swan Soybean Product contains all 8 essential amino acids (which are necessary for a balanced diet) and have no cholesterol. Available in health & natural food stores. Retailers: Swan Quality Products are distributed by Tree of Life, Inc., or contact Swan Food Corp., 5758½ Bird Rd., Miami, Florida 33155. In Miami enjoy all Swan Products at Swan's Retail Deli & Bakery, The Soybeanery, 5758½ Bird Rd."

Note: A full-page Swan Foods ad that is very similar to his half-page ad was published in the July/August issue of this magazine. There are four differences between the two ads: (1) This November ad is smaller; Swan Foods went out of business one month later, in December 1978; (2) A Tofu Salad Dressing and Red Zinger tea appear in this ad but not in the earlier ad; (3) This ad states that Swan Foods' products are distributed by Tree of Life, Inc., a major distributor, whereas in July/August they had been "distributed by your local Natural Foods Distributor"—less impressive. (4) The following products appear in the earlier (July/August) ad but do not appear in this one: Soy Shakes (Carob, Vanilla & Strawberry), three iced herbal beverages (Lemon Mist, Miami Cooler, Red Quencher), and two baked goods & pastries (Mary's Cream Cake, and Mary's Devil's Food Cream Cake). Address: The Soybeanery, 5758½ Bird Rd., Miami, Florida, 33155.

1080. *Hartford Courant (Connecticut)*. 1978. Food Associates unit will meet Sunday. Dec. 6. p. 20A.

• **Summary:** "The Connecticut Natural Food Associates, a group that promotes the use of unprocessed foods, will meet Sunday in Waterbury," at 1 p.m. in the "Second Advent Christian Church." Dr. Warren M. Levin of Brooklyn Heights, New York, will speak at the meeting.

1081. *U.S. Trademark*. 1978. Deaf Smith Organic Farms. 1,108,852. Registered Dec. 12. Application filed 14 Sept. 1977. 1 drawing.

• **Summary:** First use: 1977-08-19. First use in commerce: 1977-08-18. The mark is simply the four words, two above and two below, written in a certain font.

1082. *SoyaScan Notes*. 1978. Chronology of soybeans, soyfoods and natural foods in the United States 1978 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 25-27. International Soya Protein Food Conference held in Singapore, sponsored by the American Soybean Association. 400 people from 24 countries participated.

Jan. *Whole Foods* magazine starts publication in Berkeley, California, founded by Steven & Henrietta Haines, and Jim Schreiber. The first issue features an article titled "Making Money Making Tofu," about five tofu companies. Westbrae has a full-page color ad titled "Someday all of this will be as familiar as apple pie," showing five types of miso plus sea vegetables.

Feb. 17. Laughing Grasshopper tofu shop changes its name to New England Soy Dairy, Inc., the first company to use the term "soy dairy" in its name. Also in 1978 White Wave in Boulder, Colorado, publishes a charming poster announcing, "We've got an alternative. White Wave Soy Dairy." An illustration shows a man leading his cow, standing under a beanstalk, looking in wonder at the seeds, soybeans.

March. The Cow of China, America's third soy deli, run by White Wave, opens in Boulder, Colorado. It is later renamed Good Belly Deli.

April. Nasoya Foods Inc. starts making tofu and soymilk in Leominster, Massachusetts, inside a former dairy. Founded by John Paino and Robert Bergwall. May. 3. "What is this Thing Called Tofu" by Patricia Wells published in *The New York Times*.

May 22-25. Keystone Conference on Soy Protein and Human Nutrition held in Keystone, Colorado, organized by Ralston Purina. 105 registrants. The world's top researchers on the subject present 34 papers demonstrating a new scientific understanding of the quality of soy proteins for human nutrition. The influential 406-page proceedings, titled *Soy Protein & Human Nutrition*, are published in 1979, edited by Wilcke, Hopkins, and Waggle.

May. The Soy Deli opens at The Soy Plant in Ann Arbor, Michigan. America's fourth soy deli.

June. Brightsong Tofu, founded by Joel Brightbill and Bob Heartsong, starts making tofu in Redwood Valley, California. Sharon and Richard Rose bought the company in June, 1980 and in Nov. 1980 started The Real Food Tofu Cafe, a soy deli, adjacent to it.

June 26. First Takai catalog of tofu and soymilk equipment published, written by William Shurtleff. The first publication of its type in English, it helps start many new soyfoods companies.

July 28-31. First Soycrafters Conference held at The Soy Plant in Ann Arbor, Michigan. Conceived and organized by Steve Fiering. 75 people attend. The Soycrafters Association of North America (SANA) is founded, with Larry Needleman as the first president and a board of directors.

Sept. First issue of *Soyanews* published in Sri Lanka.

Oct. *The Farm Vegetarian Cookbook* (revised ed.) by Louise Hagler published by The Farm's Book Publishing Co.

in Tennessee.

Oct. Morinaga Milk Co. in Japan starts to export their tofu in aseptic Tetra Brik cartons worldwide. They issue a color recipe booklet to accompany each carton.

Oct. Kendall Food Co. starts to make America's earliest known commercial amazake in Brookline Village, Massachusetts. Amazake is made from koji, as are miso and shoyu. Not even in Hawaii was commercial amazake made before this—so far as we know.

Oct. 29-Nov. 3. World Conference on Vegetable Food Proteins held in Amsterdam, The Netherlands. More than 1,000 participants. Sponsored by the American Soybean Assoc. and others.

Nov. The Tofu Shop, America's fifth soy deli-restaurant, opened in Rochester, New York, by Greg Weaver. Large and very creative menu. Later called The Tofu Gardens, and The Lotus Cafe.

Dec. American Soybean Association moves its headquarters from rural Hudson, Iowa, to St. Louis, Missouri, into greatly enlarged, modern offices.

Dec. *The Book of Tofu* (extensively revised, Americanized edition), by Shurtleff and Aoyagi published by Ballantine Books in a mass-market paperback edition. By 1987 the two editions have sold over 450,000 copies.

Dec. *Tofu Goes West*, by Gary Landgrebe published by Fresh Press.

Dec. *How to Cook with Miso*, by Aveline Kushi published by Japan Publications.

Dec. *Tofu Madness*, by Olszewski published by Island Spring tofu company in Washington [state].

Dec. Growing use of the term “shoyu” and less misuse of the term “tamari” in publications, indicating awareness of the difference between these two types of soy sauce.

* *Peaking Out on Tofu*, by Matthew Schmit self-published in Colorado.

* Soymilk Piima, resembling the traditional Finnish cultured dairy product, is first made (on a home scale) by Pat Connolly in southern California.

* Soy oil: The King with no crown. A series of studies initiated by the American Soybean Assoc. in 1978 showed, surprisingly, that although soy oil is by far America's widely used oil (accounting for 84% of all vegetable oils and 58.3% of all edible oils and fats), most consumers are simply not aware that they are using soy oil. When 1,200 female heads of households were asked “What oils can you think of?” only 17% mentioned soy oil (52% mentioned corn oil, 36% peanut oil, and 23% safflower oil), and only 7% reported having purchased soy oil in the past 6 months. The ASA Market Development Foundation promptly began a campaign to increase product recognition and loyalty, improve product image, and to encourage manufacturers worldwide to identify soy oil on product labels. The slogan used is shown at the start of this paragraph.

1083. Erewhon, Inc. 1978. Why seaweed? (Ad). *East West Journal*. Dec. p. 24.

• **Summary:** A full-page black and white ad. “Sea vegetables are a truly delicious and versatile food.” Address: 3 East St., Cambridge, Massachusetts 02141. Phone: (617) 354-2001.

1084. Durkin, Mary Sutro. 1978. The natural foods diet book. New York, NY: Grosset & Dunlap. 80 p. Illust. (by Ariane Reed). Index. 28 cm. Includes bibliography (p. 73). Series: Grosset Good Health Books *

1085. **Product Name:** Erewhon Natural Shoyu.

Manufacturer's Name: Erewhon Products [Los Angeles, California]. (Imported). Made in Japan.

Manufacturer's Address: Los Angeles, California. Phone: (213) 836-7569.

Date of Introduction: 1978.

New Product–Documentation: Ad (¼ page, black and white) dated 1978. Source unknown. An illustration (line drawing) shows a dispenser of Erewhon Natural Shoyu. The text underneath it reads: “Aged two years in wooden barrels using well water, sea salt, and whole soybeans. Rich in available protein, vitamins, natural sugars and minerals.”

1086. Jenner, Bruce. 1978. Bruce and Chrystie Jenner's guide to family fitness. New York: Sunridge Press [a division of Ace Books, and Grosset & Dunlap Co.]. xv + 139 p. See p. 33-34. Preface by Coach L.D. Weldon. Illust. Index. 28 cm. *

• **Summary:** Page 44 (top line): “granola trail-mix with raisins and coconut and other healthy nuts and grains.” See also p. 43 for first of sentence.

1087. **Product Name:** Wheatmeat (Seitan), and Wheatmeat Sandwiches.

Manufacturer's Name: Kushi House/East West Center. Then Macrobiotic Kitchen Unlimited.

Manufacturer's Address: 708 North Orange Grove Ave., Hollywood, California.

Date of Introduction: 1978.

New Product–Documentation: Talk with Marijke Steevensz. 1999. July 9. Phone: 213-937-0777 or 213-876-2813. Pronounced Ma-REE-kuh. She and her husband Roy Steevensz first made seitan (which they always called “Wheatmeat”) and Wheatmeat Sandwiches at their East West Center on [7357] Franklin Ave. in Hollywood. She does not recall where the term “Wheatmeat” came from. They began making it commercially sometime between 1975 and 1978. They sold the plain Wheatmeat only to Erewhon, but they sold the sold the Wheatmeat Sandwiches to many other stores as well. In 1979 they moved their food manufacturing operations into a big commercial kitchen named Macrobiotic Kitchen Unlimited (MKU) at 708 North Orange Grove Ave., Hollywood, California. They discontinued the sandwiches

and sold the Wheatmeat in the Los Angeles area, including at their adjacent retail store and restaurant named Grain Country at 787 Melrose Ave. (at Orange Ave.) in Los Angeles. They made seitan at MKU from 1979 to 1984. In 1979 they were the only company making seitan in the Los Angeles area, “but now everybody is doing it.” Marijke learned how to make seitan from Cornelia Aihara in the early 1970s. Cornelia visited their East West Center in Los Angeles, did cooking classes, and made seitan. She also learned part of the process from Jacques Delangre, who also taught cooking classes at their center. Grain Country opened in May 1979. Carlos Richardson of Gold Mine Natural Foods now makes seitan and sells it at Erewhon in Los Angeles. Marijke and Roy taught Carlos how to make seitan in cooking classes when Carlos lived in Hawaii.

Talk with Tom DeSilva, owner of Erewhon Natural Foods in Los Angeles. 1992. July 10. He thinks that the first American-made seitan sold at Erewhon was made by some of the girls at the Kushi House on Franklin Ave. in Hollywood.

1088. Product Name: Tofu.

Manufacturer’s Name: Musubi Foods (Paul’s Tofu).

Manufacturer’s Address: 155 Archway Rd., Highgate, London, N6 4NA, England. Phone: 013-481-192.

Date of Introduction: 1978.

New Product–Documentation: Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company’s name, address, and phone number. Owner: Paul Jones.

Shurtleff & Aoyagi. 1982. *Soyfoods Industry: Directory & Databook*. p. 3. Letter from Sjon Welters. 1982. April 16. “I only know of one tofu maker in Britain, Paul Jones (Tofu Shop), 155 Archway Rd., London N19.”

Leaflet titled “Paul’s Tofu” (undated, but sent in 1982). Address: The Old Brewery, Wheathampstead House, Wheathampstead, Hertfordshire, UK. Phone: Wheathampstead (058283) 4241. 3 panels on each side. Each panel: 21 x 10 cm. Printed brown ink on beige paper. Contents: Introduction to tofu. For whom is tofu intended? The qualities of tofu. Suggestions for use. Storage. Try these recipes with your tofu (5 recipes from *The Magic of Tofu*, by Jane O’Brien; Thorsons Publishers). Community Health Foundation (188-94 Old Street, London EC1V 9BP). “Paul’s Tofu Burgers are made from organically grown soya beans, whole grain cereals, vegetables and herbs...”

Soyfoods Center Computerized Mailing List. 1983. June 20. The company is now listed as Paul’s Tofu, with a second location at Wheathampstead House, Wheathampstead, St. Albans, Hertfordshire, England. This latter address is also listed at the First European Soyfoods Workshop, Sept. 1984.

E-mail from Paul Jones, founder. 2011. June 6. Q1. On what date did you make your first commercial tofu? Ans: It must have been 1977/78—I was already in production when

we came to ‘Soyfoods Comes West’ in 1979. Peter Bradford might remember for it was he who gave us the Chinese stone grinder to make the ‘Go.’ Q2. Was the address at that time you started commercial production: 155 Archway Rd., Highgate, London, N6 4NA, England? Ans: Yes.

Letter (e-mail) from Paul Jones in England in reply to questions. 2013. March 25. (1) What was the name of your company when it started making tofu? Ans: “I was called ‘Musubi foods’ (made by bringing yin & yang together), but people called me Paul Tofu as they had previously called me Paul the baker.” (2) Where did you first learn about tofu and tempeh? Ans: “I learned about tofu & tempeh from Macrobiotics—Chris Dawson (Mitoku / Clearspring) & others at East West / Community Health Foundation.”

“Peter Bradford might remember when he gave us the Chinese quern for making the ‘go’. I did all this at 155 Archway Rd but on a small scale. The macrobiotic community were the customers in 1979/80. We moved to Wheathampstead House Herts, home of Murphy & Son where they had a former brewery which we occupied until we set up in Melton Mowbray.” Letter (e-mail) from Peter Bradford. 2013. March 29. “I too have no records going as far back that far but I think that Paul is correct. We must have supplied him with his quern for making tofu sometime mid/late 1970’s.

“Paul was as far as I know the first person in the UK to make tofu using organic soybeans and Japanese nigari. Before that from when we started our wholefood shops in the early/mid 70’s we used to buy in fresh tofu from London’s Chinatown for resale. In those early days I also remember that people also used to make homemade tofu using kits that we imported from Japan.”

1089. Peterson, Vicki. 1978. *The natural food catalog*. New York, NY: Arco Publishing Co. 160 p. Illust. Index. 29 cm. Incl. bibliography (p. 158-59). *

1090. Peterson, Vicki; Sanders, Mary Anne. 1978. *The natural food catalog*. London: McDonald and Jane’s 160 p. Illust. Index. 29 cm. Incl. bibliography (p. 158-59). *

• **Summary:** Note: Mary Anne Sanders is the editor. The title is also given as *Wholefood Catalog*. Published in London, this appears to have been slightly modified from the U.S. edition. The number of pages is the same.

1091. Abehsera, Michel. 1978. *Cooking with care & purpose: menus for strength and peace of mind*. Brooklyn, New York: Swan House Publishing Co. [x] + 271 p. Index. 21 cm.

• **Summary:** A macrobiotic cookbook. From the front cover: “Toward the prevention and elimination of disease.” “Amazing cures from the kitchen.”

The chapter on “Legumes” (p. 39-45) includes: Cooking beans in a pressure cooker (chickpeas, lentils, aduki beans).

Sweet beans casserole (with aduki beans). Soft adukis. Chickpea stew. Soja jardiniere (with “1 cup cooked soya beans” and “2 tablespoons soy bean paste (miso)”). Bean sprouts (mung beans or lentils). Vegetarian cheese [tofu] (made with 2 cups soybeans, ½ cup lemon juice, salt, and cold water). Soya milk from soybeans. Soya milk from soya flour. Vegetarian cheese from soya flour [tofu].

Miso: The chapter on “Soups” begins with a long quotation by Dr. Tatsuichiro Akizuki, M.D. (no source is cited) about the use of miso to changes one’s constitution and prevent radiation sickness (p. 49-52). Miso soup (p. 52). Miso sauce (p. 137). Miso spread (with tahini, p. 145). Miso pate (with aduki beans, p. 147).

A common seasoning in this book is “soya sauce.” There are also many recipes for “seaweed” (p. 91-95).

Michel Abehsera arrived in the USA (New York City) from North Africa in 1964, and “was startled to find an entire generation of rootless youth.” In the late 1960s he left the East Village [a largely residential neighborhood to the east of Greenwich Village on the west side of lower Manhattan in New York City] for Binghamton, New York, intending to slow the pace at which he had been living and to write a few books. His first book was *Cooking for Life* (1970, Swan House). Address: Brooklyn, New York.

1092. Calella, John R. 1978. *Cooking naturally: An evolutionary gourmet cuisine of natural foods*. Berkeley, California: And/Or Press. ix + 112 + 5 p. Illust. by Pedro J. Gonzalez. Index. [81 ref]

• **Summary:** The author of this vegetarian cookbook, of Italian ancestry, is popularly known as “Organic John.” He likes to use fresh foods, and he has a call-in radio show in San Francisco. In chapter 4, Ingredients (p. 16-), he discusses soya butter [margarine], miso, tamari, instant protein powder (incl. Shaklee’s Instant Protein), lecithin granules, Soyamel powder (powdered soymilk made by Worthington Foods), Balanced protein seasoning (powdered HVP made from soybeans).

Chapter 10 (p. 79-83) contains a long section on soya beans, with recipes: Homemade soya bean curd (tofu). Things you can do with tofu. Soya patties (with dry soya beans). Soya bean loaf. Green soya bean mix (with dry green soya beans). Soya beans in a beet stew. Soya bean spread.

In the section on Fruit Sherbets, many of the recipes contain 2 tablespoons Soyamel (powdered soymilk) and lecithin granules. Address: Berkeley, California.

1093. Cuthbertson, Tom. 1978. *Alan Chadwick’s enchanted garden*. New York: E.P. Dutton. xv + 208 p. Introduction by Page Smith. Illust. Index. 23 cm. [63 ref]

• **Summary:** A superb book. The Introduction begins: “On March 1, 1967, Alan Chadwick, a Shakespearean actor turned horticulturist, paid a visit to the newly established campus of the University of California at Santa Cruz, and

was invited to start a garden there. Working like a man possessed, literally from dawn to dusk, he set about his task on an uncompromisingly thin-soiled, rocky hillside. The result was a garden of such brilliance and such all but miraculous fecundity that students, townspeople, and then visitors from farther and farther away were drawn to it as bees are to the source of honey.

“At the time the word ‘organic’ was just beginning to have general currency. Even those who wished on philosophical grounds to practice organic gardening had very little notion [assuming they had never heard of *Organic Gardening and Farming* magazine or Rodale Press, established in 1942] of what it entailed, other than abstention from the use of chemical fertilizers and pesticides. As a practitioner of a school of horticulture called, to give its full name, the French Intensive Biodynamic Method, Alan Chadwick became a magnet... Chadwick proved a severe taskmaster. A passionate amateur of music, a painter, and actor, and a wildly unorthodox tennis player, he is an eccentric in the grand English tradition. As a young man he had become acquainted with the philosophy of Rudolph Steiner, to whose notion about the relatedness of all living things he added his own pragmatism training in classic French horticulture. His authoritarian manner ran counter to the current fashions of pedagogy. In a period that all but deified collective decision-making, Chadwick was dictatorial, mercilessly demanding, given to sudden and unpredictable rages, alternately charming and terrible.”

“In our garden,” Alan Chadwick explains, “we are trying to re-invest in simple tasks a sense of their true significance.” “It is not the gardener who makes the garden, but the garden that makes the gardener.” (p. xiii).

Contains many fine illustrations and one photo (p. xi) of Alan Chadwick demonstrating how to prune.

Note: Soy is not mentioned in the index.

1094. Duquette, Susan. 1978. *Sunburst Farm family cookbook: Good home cookin’ the natural way*. 2nd ed. Santa Barbara, California: Woodbridge Press Publishing Co. 303 p. Illust. by Donna Wright. Photographs by Mehosh Dziadzio. From the Sunburst Farms Communities. Recipe index. 23 cm.

• **Summary:** This book is identical to the 1976 edition except that it comes from Sunburst Farms Communities instead of The Brotherhood of the Sun. The title and first paragraph of the introduction have been changed to read: “Sunburst Farms Communities is a family of more than 300 people, who have dedicated themselves to living in harmony with all people and all things.” Address: Santa Barbara, California.

1095. Goldman, Aviva. 1978. *Erets zavat halav u-devash [Jewish vegetarian cookery]*. Israel. 255 p. Illust. 25 cm. [Heb]*

1096. Mortimer, Robert; Mortimer, Charles; Eberhardt, Suzanne; Mortimer, Mary Ellen. comp. and ed. 1978. The menu guide of Los Angeles. Pacific Palisades, California: Corm Enterprises. 191 p. Illust. No index. 28 cm.

• **Summary:** Contains copies of menus from Alice's Restaurant (not vegetarian), The Golden Temple (Yogi Bhajan, vegetarian, 7910 W. 3rd St., Los Angeles), The Source (vegetarian, 8301 Sunset Blvd., Los Angeles), etc.

The Source (p. 155-59): This attractive undated menu, handwritten in calligraphy with a decorative illustrated border, is from the famous vegetarian restaurant started in 1969 by Jim Baker (Yahowa). Only two pages from the larger menu are shown: Breakfast (incl. Soy or whole wheat pancakes). Beverages (Large selection of juices squeezed to order, large or small, coffee, tea, milk). Juices (Fresh squeezed to your order, incl. Fruit smoothie, carrot, celery, lemon slush). Desserts (incl. Cheesecake, Ice cream, Coffee cooler, Date shake, Carrot cake, Rice pudding).

Note: This menu may have been printed in 1969, when The Source Restaurant opened. The restaurant's mystical name and symbol, with many esoteric signs, appears on p. 158. Address: Pacific Palisades.

1097. Needleman, Larry. 1978. The Tofu Kit story. In: 1978. The Briarpatch Book: Experiences in Right Livelihood and Simple Living from the Briarpatch community. San Francisco: New Glide / Reed Book. xiii + 313 p. See p. 237-40. 24 cm.

• **Summary:** In the spring of 1976 (about April or May) Larry decided it was time to create a situation that utilized his food karma and experience, "but that wasn't a quick burnout like a restaurant, and was healthy and made sense world economically—one that would provide unlimited personal and spiritual growth and was a service." He committed himself to positive thinking and positive action. He began fasting a lot, meditating, praying and concentrating regularly, taking his jogging seriously and generally just putting out good energy. "About a month into this I remember saying, 'O.K., Lord, I'm ready, lay it on me.' And that week the Tofu Kit was born.

"Inspiration: I had just received test results from a physical exam, saying I was in fine shape but my cholesterol was too high. That day, as I remember, I saw a copy of *The Book of Tofu*, by Bill Shurtleff and Akiko Aoyagi. It blew me wide open. I'd used tofu like any other good, miso-soup loving hippie, but hadn't connected heavily with the bland, unappealing white cake. But the book gave marvelous ways to use this new-found 'friendly' food and pointed out how shifting from meat to tofu could have a direct effect, helping feed people elsewhere. Some 300 pages and 500 pages recipes later I came to the book's last page, 'Sending Tofu to the Four Directions,' an inspirational page that said, 'Do it!' So I did.

"Three of us were sitting around a wood stove in

Sonoma County talking about tofu and tofu making, when the word 'kit' popped up. It rang the bell. I immediately began researching and developing the kit the very next day and have continued to work on it daily since then. This is my first venture into the manufacturing world.

"Connection: When the kit was about 3/4 of the way to market, Bill and Akiko arrived from Japan and Bill called me to say he'd heard from Westbrae Natural Foods that I was working on a tofu kit. I was really excited. He invited me to share food, films, and tales of tofu with him and asked me to bring the kit. What a connection! That meeting, one of several, tuned up and accelerated the kit. We talked of and planned many projects together, and then around midnight on the first of October [1976], I bid Bill and Akiko good-bye as they began a four-month speaking tour. Bill left me with instructions to meet with The Farm Food Co. people in San Rafael, California, and to begin organizing a school to share the technology and equipment of small-shop tofu making with hundreds of people in this country who were waiting for it; I left him with 200 Tofu Kits and a sales rep. agreement. Orders started pouring in for Tofu Kits, but production wasn't pouring out."

Larry moved from Occidental, California, to Corte Madera (P.O. Box 829), which was much closer to San Francisco. Describes expansion of production and designing a school, The Learning Tree, at the Farm Food Co. The term will be about 3 weeks long and enrollment limited to about 10 students per term. The kit retails for \$11.95. A photo shows Larry holding his Tofu Kit. Illustrations show: (1) The tofu kit. (2) A jar of soy beans, and a cake of tofu on a plate. (3) A small "Tofu School" building in a field. Address: The Learning Tree, P.O. Box 829, Corte Madera, California 94925.

1098. Laurelbrook Foods. 1978? Miso (Leaflet). Bel Air, Maryland. 2 panels each side. Each panel: 22 x 14 cm. Undated.

• **Summary:** Printed with black ink on tan paper. Contents: Hacho [sic, Hacho] miso. Mugi miso [barley miso]. Kome miso [red or rice miso]. Address: P.O. Box 47, Bel Air, Maryland 21014. Phone: 301-879-1717.

1099. Starr, Andy. 1979. Beyond bean sprouts: Rochester's natural food companies are doing a healthy business [Northern Soy]. *Upstate*. Jan. 28. p. 8-9.

• **Summary:** Five large, superb photos show tofu-making at Northern Soy in Rochester, New York. (1) Peter Kilbridge puts soybeans, which have been soaked in water, into a grinder. (2) Jay Stiler draws off the whey from above the curds, formed by natural nigari. (3) Kilbridge scoops the curds into cloth-lined forming boxes. (4) Kilbridge and Norman Holland fold cloths over the top of the curds in the forming boxes. (5) Cut blocks of tofu are placed into a plastic bucket to be shipped (in bulk) to market.

Northern Soy is one of the few tofu-manufacturing firms in the USA. Andy Schecter and Greg Weaver began making tofu in the Zen Center's basement at Arnold Park a few years ago. Production has grown from 70 lb/week to 2,000 lb/week. Now they have set up a retail outlet, The Tofu Shop, at 686 Monroe Ave. in Rochester. There they serve chocolate, lemon, or carob pies made with tofu, tofu lasagna, tofu burgers without beef, tofu sloppy joes, tofu spinach casserole, tofu reuben sandwiches, tofu peanut butter cookies, and tofu gingerbread with lemon sauce. Wegmans supermarkets carry Northern Soy's tofu and Clear Eye distributes it. Address: Rochester, New York.

1100. Aihara, Herman. 1979. Macrobiotic lecture trip in Europe, 1978. *GOMF News (Oroville, California)*. Jan. p. 1. • **Summary:** "About 200 macrobiotic leaders from Europe and some from the United States gathered to honor Mrs. Lima Ohsawa and Shuzo Okada [of Muso]. The first European Macrobiotic Congress was held during November at the Community Health Foundation in London. Having a restaurant, food shop and many lecture halls, this building served well for the meeting. Originally the Congress was scheduled for Ghent and the sudden change was difficult for them. However, the Congress was well organized.

"I arrived in London from Los Angeles around 6 o'clock in the morning. However, due to a deep fog over the airport, the plane did not land in London until 4 o'clock in the afternoon. Mr. K. Takaki greeted me at the airport and took me to his home. It was about 9 o'clock in the evening when Rosa Takaki and I arrived at the Congress. The meeting started with a meditation in memory of George Ohsawa whose picture was displayed on the wall. Michio Kushi gave the opening speech saying that a North American Macrobiotic Congress will be held in 1979, and will be followed by a Congress in South America, and then one in Asia.

"The next day, I was asked to give a speech after Lima Ohsawa's and Shuzo Okada's speeches. I said: "Michio Kushi will organize similar congresses in North America, South America and Asia. This is a great idea. Many will be stimulated and observe a macrobiotic diet. However, I see two difficulties in this movement. One is a jealous mentality among leaders. A less popular leader will be jealous of another who is more popular. This jealousy will create emotional resentments and be a hazard to a peaceful mind. Even though one peaceful world is realized, if each one is not peaceful, how good is such a world.

"Another problem concerns food distribution. The macrobiotic movement is related to food—the special kinds of food which can not be bought at a regular market. Therefore, food distribution is one of the activities of macrobiotics as well as a source of income for some macrobiotics. Many macrobiotics as well as some non-macrobiotics perform the macrobiotic food businesses. Performing business can create

a greedy mentality and an exclusive ego attitude which is not the character which macrobiotics aim to achieve. If this happens, resentment, gossiping, tricks, even arrogance will be observed among macrobiotic people. We have to be humble and reflect more in order to succeed in such a movement.'

"Amsterdam: On November 14 in the evening, I left London for Amsterdam with Ineke Niermeyer, who had been at Vega two years ago with her husband and two children. We took the train and then a boat to the Holland port. I was very hungry because I hadn't eaten since morning except for a cup of miso soup. I went to the ship's restaurant and ate a fish dinner. It was expensive, but very fresh and delicious. The sea was rough, but I slept well in the cabin.

"The next morning early, we arrived at the port. The weather was nice, but chilly. Ineke had rice and miso soup, while I drank a cup of miso soup. We arrived at Amsterdam after a two hour ride on the train. The town was busy and active, and very clean. By street car, we went to Ineke's apartment. Leaving my stuff there, we went to the East West Center which is within walking distance. The center, which was organized eight years ago by Adelbert Nelissen, is a big house facing a canal. It consists of a big lecture hall, an exercise hall, a food store, a printing room, a camera room, a dining room, several dormitories and Adelbert's family room. They own eight stores, bakeries and the center house. They bake one ton of bread every day using flour ground by windmill. It seems to me one of the best organized centers in Europe. Adelbert, a young Jewish fellow who started this two million dollar per year macrobiotic activity, lives at the center with his beautiful wife and two daughters in three rooms. He gave me a room in which to stay. When I was introduced at the center, Abe Nakamura came from his home in Dusseldorf. He moved my suitcases to the center from Ineke's apartment so that I could take a nap until 6 o'clock. Then, he took me to an authentically decorated Japanese restaurant. The food was very tasty, but very expensive when compared with Japanese restaurants in America. It seems to me that everything is expensive in Holland when compared to the cost of living in America.

"I started the first night lecture at 8 pm with about 70 people attending. They were mostly between 20 and 30 years old. I talked about how I met Ohsawa, and about my difficulty with the Immigration Law and its cause. I finished around 10:30 pm.

"On November 16, Abe took me to his home—a two hour drive. His business has been well established in Germany. However, he is losing his customers to Michio's students, who are opening several stores in the same town. Such things make him reluctant to help Michio. I see such mentality among the Japanese macrobiotic leaders in Europe. This problem relates to their living income; so, it is difficult to solve.

"That night, I spoke about the macrobiotic diet,

physiology, yin/yang principles, balancing sodium and potassium and balancing acid and alkaline.

“On the 17th, I talked about balancing hormones, nervous systems and Selye’s stress theory, concluding that we will not have absolute peace of mind unless we reach complete gratitude, absolute faith in the Order of the Universe.

“On the 18th, the meeting started in the morning. I talked about the spiralic concept of man. Real man is the whole universe. Macrobiotic means becoming such a person. During the afternoon, I taught Sotai exercise, which they enjoyed very much. Then I gave palm diagnosis of family and marriage, and palm reading. This created a strong curiosity—everyone came around me, asking me to read their palms.

“In Holland, there is no Christmas ceremony, but there is the Santa Claus custom. He arrived in town that day and stays for a month giving many gifts to the children as he passes through the streets. Therefore, there was a big parade...” Address: 1544 Oak St., Oroville, California.

1101. Logsdon, Gene. 1979. From lawn to miracle garden: That’s how Michael McConkey sums up his holistic approach to gardening, health and the simple life. *Organic Gardening* 26:54, 56, 58, 60, 62, 64. Jan.

• **Summary:** McConkey has a 100 by 200 foot backyard garden in his brother’s backyard in Adelphi, Pennsylvania. He lives in his garden in a yurt he built for about \$200. A vegetarian, he grows his food organically and eats most of it raw. He is most interested in how his fruits taste, but researchers at the nearby USDA experimental orchards at Beltsville, Maryland, seem much more interested in how well a fruit can be shipped. Numerous photos show McConkey. “He’s age 30—but looks 18—is supple and lithe and radiates health.” He strives for voluntary simplicity, holistic health, and love.

1102. Westbrae Natural Foods. 1979. We believe if you’ve seen one health food nut you *haven’t* seen them all (Ad). *Whole Foods (Berkeley, California)* 2(1):8. Jan.

• **Summary:** In this full-page color ad, a large photo with diagram shows ten different types of Westbrae’s nuts, seeds, dried fruits and trail mixes, including Tamari cashews, Deluxe tamari nut mix, Tamari almonds, Tamari sunflower seeds, Tamari nutroaster’s mix, Chisholm trail mix, and Jubilee trail mix. “For more information write Westbrae, P.O. Box 8611, Emeryville, California 94662. All Tamari roasted nuts and trail mixes are available in bulk and a select few in two or ten ounce Panda packages.” Address: P.O. Box 8611, Emeryville, CA 94662.

1103. *Natural Foods Merchandiser*. 1979-- . Serial/periodical. Hope, Pennsylvania. Doug and Karen Green. Bob White. Frequency: Monthly.

• **Summary:** Founded by Doug & Karen Greene. First issue was Feb. 1979. This colorful, large-format magazine (11 by 15 inches) has played an increasingly important role in the growth of the natural and health food industries.

Murray, Frank; Tarr, Jon. 1984. *More than one slingshot: How the health food industry is changing America*. See p. 54-55. This trade magazine, in its fourth year, is headquartered in New Hope, Pennsylvania. Publisher is Bob White, publication director is Doug Greene and editorial director is Karen Greene. Steve Blount is the editor.”

In 1989 it was moved from South Main St., New Hope, Pennsylvania 18938, to 1301 Spruce St., Boulder, Colorado 80302.

The company that owns that magazine, New Hope Communications, has also organized the Natural Foods Expo, the leading industry exposition, which is held twice a year. In April it is held at Anaheim, California, and in September on the East Coast (Baltimore, Philadelphia, etc.).

During 1992 the total number of copies printed averaged 13,191 and the paid and/or requested circulation averaged 11,989 (NFM, Dec. 1992, p. 53). During 1995 these figures increased to 14,573 and 13,501 respectively (NFM, Dec. 1995, p. 66). Address: Hope, Pennsylvania.

1104. Westbrae Natural Foods. 1979. Price list [Catalog]: February 1979. Emeryville, California: Westbrae. 35 p. 22 by 28 cm.

• **Summary:** On the cover are yellow and light green Japanese plum blossom crests against a green background. New products (written in all capital letters): Kelp (powder and granules). Traditional (true) tamari—wheat free. Mu tea. Address: P.O. Box 8711, Emeryville, California 94662. Phone: (415) 658-7518 (orders).

1105. *Hartford Courant (Connecticut)*. 1979. Natural health food group to meet. March 14. p. 44.

• **Summary:** “Wethersfield [Connecticut]—The National Natural Health Food Association will meet Thursday at 7:30 at Town Hall. Dr. John Youmanitis will speak on food additives and preservatives and fluoridation in the water supply.”

Note: The name of this group is probably written incorrectly. It might be the “National Nutritional Food Association.”

1106. Andrews, W.H.; Wilson, C.R.; Poelma, P.L.; Romero, A.; Mislevic, P.B. 1979. Bacteriological survey of sixty health foods. *Applied and Environmental Microbiology* 37(3):559-66. March. [16 ref]

• **Summary:** “A bacteriological survey was performed on 1,960 food samples encompassing 60 types of health foods in the Baltimore-Washington, DC, metropolitan area. No consistent bacteriological distinction (aerobic plate counts, total coliform, and fecal coliform most probable numbers)

was observed between foods labeled as organic (raised on soil with compost or nonchemical fertilizer and without applications of pesticides, fungicides, and herbicides) and their counterpart food types bearing no such label. Types and numbers of samples containing *Salmonella* were: sunflower seeds 4, soy flour 3, soy protein powder 2, soy milk powder 1... The occurrence of this pathogen in three types of soybean products should warrant further investigation of soybean derivatives as potentially significant sources of *Salmonella*.”

Though these organisms were isolated from these dry soy protein products, the products were not considered to be potentially hazardous. Their low water activity value prevents “rapid and progressive growth.”

“Interestingly, soybeans themselves were one of the maximally sampled food types, yet *Salmonella* was not detected in any of the 60 soybean samples examined.” It is conjectured that trypsin inhibitors, typically removed during processing the soybeans into food, may inhibit *Salmonella*. Address: Div. of Microbiology, Food and Drug Administration, Washington, DC 20204.

1107. *Ann Arbor Observer (Michigan)*. 1979. One of the few U.S. tofu manufacturers is right here in Ann Arbor: At the Soy Plant on Ann Street a collectively-run business combines political and nutritional interests to produce over 2000 pounds of soybean curd weekly. March. p. 29. [1 ref]

• **Summary:** This February morning Steve Fierling [sic, Fiering] arrives at The Soy Plant at 5 a.m. to start the day’s work in the back room of the former pizza carryout at 211 East Ann St. in Ann Arbor. He turns on the lights and the boiler, then starts cooking soy milk for the first batch of tofu. Fiering is part of a nine-member collective; this week he’s the cooker. The first batch of tofu should be ready by 7 a.m. Making tofu is a demanding discipline. Fiering, Sue Kalen, Chris Coon, and Al Dynak were the original founders of The Soy Plant one and a half years ago. Steve originally came from Camden, New Jersey, to the University of Michigan, where he majored in geology and, as he puts it, “minored in extracurricular political activism.” Politics led to a job as coordinator of the People’s Food Co-op, and that led to helping to start The Soy Plant. The Soy Plant is one of the few places in America where people can buy fresh tofu daily. A low-cost vegetable source of protein, retails for \$0.70/lb in the consumer’s tub or \$0.85 in a plastic tub.

Henry Ford was deeply interested in soybeans. He believed that “mechanized soybean production would help free the farmer from the drudgery of dealing with animals by eliminating the need for most meat... In fact his large demonstration soybean farm was near Macon, south of Saline, in Lenawee County.” Tofu can become an economical vegetarian alternative to ground beef.

The company began as the Tofu Collective, a Sundays only operation at Wildflour Community Bakery around the corner on North Fourth Avenue. A few months later, in the

summer of 1977, the name was changed to The Soy Plant, and the collective moved into the basement of Eden Foods, where it attempted to produce tofu to sell wholesale. Fiering recalls that the early days were *really* hard. They used to work 14-16 hours a day. But the hard work paid off. By last spring The Soy Plant had the track record and credibility to be able to raise \$10,000 in loans to purchase more efficient equipment and move into larger quarters at its present location on Ann Street near Fourth.

For each \$100 loan, supporters were compensated with an unusual but sensible kind of interest: a pound of tofu each week, which yields a 35% annual return. Backers included both typical co-op supporters and quite a few native Asians eager to find a local source of fresh tofu.

Members of the collective now earn \$3.25 an hour—a big increase over the \$50 a week that they were paid in the beginning. But that cheap labor was the capital that got the business started. Current members of the collective are Fiering, Sue Kalen, Dan Ecclestone, Anne Elder, Kurt Getman, George Hanley, Mike Mazzie, Jerry McKenna [sic, MacKinnon], and Ann Wilson.

The Soy Plant makes its tofu in 50-pound batches. Of the more than 2,000 lb of tofu it makes each week, about 350 lb are sold at The Soy Plant retail store, where soy milk, soy byproducts, and prepared soy foods like sandwich spreads, missing egg salad, soysage, and pies are also sold. Another 1,700 lb/week of tofu goes to local restaurants, retail stores (incl. Meijer’s Thrifty Acres, Asian-, and natural food stores), and to Midwest Natural Foods, which distributes the tofu to as far away as Pennsylvania and West Virginia.

Soy Plant workers have strong political motivations. They believe that soy products can help to solve world food problems. Fiering, a decentralist, talks about his personal beliefs. An excellent introduction to tofu is the 15-cent pamphlet titled “What is tofu?” available at The Soy Plant. It contains ten popular recipes plus basic information. “For the truly committed, there’s the encyclopaedic *Book of Tofu: Food for Mankind* by William Shurtleff and Akiko Aoyagi.” Shurtleff “has been the tofu guru for America in the 1970s, and this book has inspired and instructed most of the country’s approximately fifty tofu shops operated by non-Asians.”

A sidebar titled “Take-out tofu treats” mentions the following made and sold at The Soy Plant: Tofu-tahini spread. Tempeh—which resembles Brie cheese in texture and flavor. Tofu tarts in several flavors: pecan cream, pumpkin cream, yam, mocha, and lemon.

Photos by Peter Yates show: (1) Anne Elder adding soy puree to boiling water in the cooking kettle to make a foamy brew that is eventually curded to become tofu. (2) Steve Fiering filling one-pound tofu retail packages (in a bathtub) with water from a hose before shipping. Address: Ann Arbor, Michigan.

1108. *Hereford Brand (The)*. 1979. Mills just say 'natural.' April 3. p. 7B.

• **Summary:** Arrowhead Mills is a multi-million dollar operation and one of Hereford's largest industries. Run by 30, mostly local, stockholders, it is the largest supplier of natural foods in the United States. Arrowhead Mills has 60 employees in Hereford and 25 more in its warehouse in Denver, Colorado. Note: Hereford is a city in and county seat of Deaf Smith County, Texas. The population was 15,370 at the 2010 census.

"Arrowhead Mills, a spinoff of Rodgers Grain, began producing natural foods—whole foods grown on fertile soil—formed in 1960 through an idea of George Warner, Henry Turner, Frank Ford and others.

"Turner, who in 1953 bought the stone-grinding operation of Rodgers Grain in Dawn, moved the set-up to Hereford in 1958. Turner, in 1960, served as the first president of Arrowhead Mills."

Turner is no longer associated with the company but Warner is, serving as president, while Frank Ford is now chairman of the board of directors.

Frank Ford, a tall, sturdy fellow, "would make a good poster boy to show the effects of his products."

He says that during the past 18 months, Arrowhead Mills has paid approximately \$250,000 in premiums, over and above the existing market prices, to mostly local growers who supply the company with wheat, corn, soybeans and triticale. He adds that Arrowhead Mills' reputation is based on the quality of the soil in Dear Smith County and the quality of the products grown there.

The company produces a wide variety of natural foods from various types of grains and whole-grain flours, to peanut butter ("Deaf Smith Old Fashioned Peanut Butter"), raw honey, oils, vitamins ("Simpler Life Vitamins"), dried vegetables, fruits and mixes.

"Organically-grown grains are stored in more than 100 bins at Arrowhead Mills where they are fan blown with cool air." The grains are also passed over a gravity table and stoner to remove foreign matter.

The factory uses several large, granite mills and two impact mills for making its whole-grain flours.

Ford said: "We believe food, as the way God designed it, is the best way for people to eat."

Photos, with the caption "Natural Foods Producer," show: (1) A young black man wearing headphones and a white jacket, standing near a sack of yellow corn. (2) Frank Ford sitting atop sacks of Arrowhead Mills whole wheat flour.

1109. Silver, James. 1979. Re: Arrowhead Mills' soy flakes. Letter to William Shurtleff at New-Age Foods Study Center, April 3—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Dear Bill—Thanks for your letter. I have

enclosed what little information I have on soy flakes. This is not really a new product, since I can remember Arrowhead working on setting up the flaking machinery when I passed through Hereford in 1971. They have special flaking mills which include ceramic heating units to soften the beans. I think that these things were originally developed for flaking cereals and beans for cattle feed, but they certainly turn out a nice product for humans.

"Susie likes to use them for making soyburgers, since they are so much easier to work with than beans or grits.

"And, as reluctant as I am to refer you to someone else and thus demonstrate my ignorance, I would suggest that you write to Arrowhead. I have most often found them to be helpful and productive of information and test results. I have enclosed their address. You can tell them that I suggested that you write Besides, I am sure that they would love the publicity! Sincerely, James Silver." Address: Erewhon Los Angeles, Inc., P.O. Box 58064, 4770 District Boulevard, Vernon, California 90058. Phone: (213) 582-6114.

1110. Coates, Rod. 1979. Quality—How do you measure it? What is it worth? (Brochure). Bel Air, Maryland. 4 p. April. 28 cm.

• **Summary:** "Eleven years ago two of our five daughters, Judy and Dora [Coates], were living in Boston [Massachusetts] with Michio Kushi's family and working with Erewhon Trading Co. It was Judy who said, 'Dad, it's time for you and Mom to change your diet!... Judy came to cook for us in Maryland and a remarkable change took place after she arrived! No more meat, sugar, alcohol or highly processed foods. Gone were the pies, cakes, candies, cokes and all sweet stuff, both solids and liquids. We began to say, 'If it tastes good, it's off the diet.' I must admit, it was tough going for the first few weeks. But from then on we never looked back! In fact we were so impressed with our new 'Well Being' that we decided to follow Erewhon's example and establish a business distributing whole, natural foods to those people concerned with improving their health... Our first suppliers were Arrowhead Mills in Texas and Erewhon in Boston."

Discusses the work of Paul Hawken and Erewhon to locate and help farmers who "had been growing and would continue to grow their crops organically using the established Rodale standards. During the early years, the Lundberg Brothers, Ted Whitmer and sons, Lewis Cox, Frank Ford, Carl Garrich, John Baker, George Crane, A.P. Thomson (Golden Acres) and others have established methods of improving their soils and producing crops that are grown without the use of chemicals, herbicides or pesticides." Address: Laurelbrook Foods, P.O. Box 47, Bel Air, Maryland 21014. Phone: (301) 879-1717.

1111. Tofu Shop (The). 1979. Workshops in tofu-making on the community level (Portfolio). Telluride, Colorado. Eight

inserts. 28 cm.

• **Summary:** Rather than being a typical portfolio, with many inserts, that all arrive at one time, this is a collection of eight documents all related to a common theme.

(1) “Workshops in community level tofu-making: Beginning in April 1977, the Tofu Shop of Telluride, Colorado, is making available to interested groups and communities training workshops in tofu-making on the community level. Topics to be covered in these workshops will include: The process of tofu-making. Setting up shop. Other soy products. Marketing. Financing and fundraising. Bookkeeping and record keeping. Restaurants and delis, Nutritional info. Community education. The community food chain. The personal benefits. Inner-shop organization. Contacts and resources.

“Workshops are led by members of the Telluride Tofu Shop and may include an experience in tofu-making... Apprenticeships—The Telluride Tofu Shop also has a limited number of openings for workers / owners in its restaurant and wholesale business. A one year time commitment is required.”

(2) “Dear ___: The Telluride Tofu Shop was born in October, 1977, when we moved into our small, unfurnished shop with a meager one-thousand dollars capital and began making tofu. Now in April, 1979, twelve of us operate a growing restaurant and wholesale food business with annual sales approaching fifty-thousand dollars annually. What happened during this period is something we want to share with other communities and groups of interested people.” So we are offering a workshop in “How to Start a Community Tofu Shop.” (3) “The community level tofu shop and the local food chain.” A complex circular diagram shows many complex relationships.

(4) “Supplies and information for community level tofu-making.” Lists five key organizations: (a) Soycrafters Association of North America (SANA; Greenfield, Massachusetts, Richard Leviton). (b) New-Age Foods Study Center (Lafayette, California; Books, brochures, tofu-making materials, slides, tapes, general info.). (c) Bean Machines Inc. (Bodega, California; Larry Needleman. Tofu-making equipment from Japan). (d) Farm Foods (Summertown, Tennessee. Attn. soydairy; tempeh starters, tvp, cookbook, general info.). (e) Westbrae Natural Foods (Emeryville, California; Nigari).

(5) A tofu recipe: For making approximately 15 pounds of tofu. Gives equipment, ingredients (soybeans and nigari), and recipe [process].

(6) A settling box press. Two views showing how to make one yourself.

(7) Soymilk: Nutritional information and recipes courtesy of The Spinning Kitchen, Boulder, Colorado.

(8) Our favorite tofu recipes.

Letter (e-mail) from Matthew Schmit. 2009. March 30. “Our motivation for doing tofu workshops was primarily to

spread the word. But also hoping to make a little money.

“We (Christie Mather and myself) conducted three workshops in early 1979. There were approximately 12-15 participants per workshop. These workshops were far from Telluride, so there was no concern about competition.

“The first was in Arcata, CA, (little did I know I would be moving there soon), to a group known as the Arc Community which was trying to form an intentional community to purchase land. My sister and brother-in-law were members, hence our invitation. After we left, they began making tofu weekly in home kitchens and selling it informally in the community. When I moved to Arcata, I joined the group as they began planning to rent a production space. As it turned out, it was too big of a leap for them. Their effort dwindled. I went ahead and opened the Arcata shop. The Arc Community eventually disbanded.

“The second workshop was held in Ashland, Oregon, in the home of friends from Telluride. They were very involved in the Ashland Food Co-op. Later when the Co-op expanded and installed a commercial kitchen, co-op members began making tofu in-house. I visited them once during production after moving out to Arcata. Eventually, Ashland Soyworks started up and Co-op production stopped.

“The third workshop was held in The Dalles, Oregon, also in the home of ex-Telluridians. As far as I know, nothing every grew out of that.” Address: 116 N. Oak St., P.O. Box 69, Telluride, Colorado 81435.

1112. Foster, Boyd M. 1979. Re: Arrowhead Mills’ soy flakes. Letter to William Shurtleff at New-Age Foods Study Center, May 8—in reply to inquiry. 1 p. Typed, with signature on color letterhead.

• **Summary:** “Dear Mr. Shurtleff—Thank you for writing. We appreciate your interest in our soybean flakes.”

“Our soyflakes are only partially cooked and require some additional cooking to make them easier to chew. We use them in our Arrowhead Crunch Granola which is cooked in an oven for a short time. The protein content of the flakes ranges in the area of 25% to 30%.

“Enclosed is a copy of our cookbook that tells how to cook flakes by themselves. They can also be cooked with grains or other beans in a variety of casserole type dishes. Very truly yours, Arrowhead Mills, Inc., Boyd M. Foster.” Address: Arrowhead Mills, Inc., Post Office Box 866, Hereford, Texas 79045. Phone: (806) 364-0730.

1113. **Product Name:** Soy Moo Non-Dairy Soy Milk [Plain, or Carob].

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1979 May.

Ingredients: Pure filtered water, organic soybeans, soya oil, wild honey.

Post Office Box 866
Hereford, Texas 79045
(806) 364-0730

May 8, 1979

New-Age Foods Study Center
PO Box 234
Lafayette, CA 94549

Attn: Bill Shurtleff

Dear Mr. Shurtleff:

Thank you for writing. We appreciate your interest in our soybean flakes.

We are aware of your excellent book on tofu and will be looking forward to the publication of Soyfoods.

Our soyflakes are only partially cooked and require some additional cooking to make them easier to chew. We use them in our Arrowhead Crunch Granola which is cooked in an oven for a short time. The protein content of the flakes ranges in the area of 25% to 30%.

Enclosed is a copy from our cookbook that tells how to cook flakes by themselves. They can also be cooked with grains or other beans in a variety of casserole type dishes.

If we can be of further help, please let us know.

Very truly yours,

ARROWHEAD MILLS, INC.

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1979 May.

Ingredients: Vegetable broth, organic pinto beans, tomatoes, onions, organic carrots, soy granules, olive oil, tomato paste, chili pepper, concentrated organic apple juice, sea salt, bell peppers, unsulfured molasses, garlic powder, cumin, organic potato flakes, paprika, ground bay leaves, organic oregano, organic sage, organic thyme.

Wt/Vol., Packaging, Price: 15 oz (425 gm) can.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 86-87. Ad: “New! From Health Valley. Vegetarian Chili. Ingredients include pinto beans, soy grits, and aged tamari soy sauce.”

Ad in Bestways. 1979. Oct. p. 51.

Label obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white. Color photo of crock of chili surrounded by uncut vegetables. “Certified organic beans. Made the healthy way. Plenty of zesty robust flavor without any meat.” Distributed by Health Valley Foods, Inc., 16100 Foothill Blvd., Irwindale, California 91706-7811.

1115. Lifestream Natural Foods, Ltd. 1979. Lifestream (Document part). In: Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 113, 249-51.

• **Summary:** Packaged goods (p. 113): Lifestream: Carob mint fudge, Cashew halvah, Hiker’s bar, Mega bite bar, Sesame dream bar, Sunshine honey bar. These retail for US\$0.38 to \$0.46 each.

In the refrigerated section: Full-page ad (p. 249). “Lifestream natural fruit ‘n nut delites!” No sugar. No corn syrup. No fillers. No chemical additives or preservatives! Lifestream–Nourishing the roots of society. A photo shows packages of 4 of the products (each with both English and Canadian text): Almond delite. Strawberry delite. Raspberry

delite. Peach delight. Several of these products themselves are also shown, together with the natural ingredients from which they are made.

Full-page ad (p. 250). “Essene Bread. Wholesome. Nutritious. Uncompromising quality. Organically grown food that tastes good.” A large label of this 1-lb loaf of bread is shown. The only ingredient is sprouted organically grown wheat—no salt. “There are now six Essene breads to choose from: Regular, raisin, fruit, seed, rye, and fruit muffins.”

Refrigerated products: Lifestream. Delights & Pastries: Almond, peach, raspberry, strawberry, butter tarts, peanut butter cookies. These retail for US\$0.39 to \$0.42 each.

“Sprouted grain breads (organic). Refrigerated or freeze: Essene fruit muffins, bread, pumpernickel-rye, raisin, seed bread, Lifestream Essene fruit cake, 8 grain sprouted bread, sesame sprouted bread, sunflower sprouted bread.” These breads retail for \$1.37 to \$1.76 each. Address: [Richmond, BC, Canada].

1116. Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. Index by product category. Index of manufacturers. Index of advertisers. Illust. 28 cm.

• **Summary:** On the cover are two kites (colored orange and red) flying in the sky. This catalog, largely printed by a computer, contains many ads on numbered pages. Contents: Policies and terms. Catalog information. Packaged. Books. Refrigerated and frozen. Bulk. Literature and flyers. Indexes (3).

“One stop shopping... We are now a Full Line distributor.” List of new lines. List of new products within existing lines. Symbols and abbreviations.

Suppliers are listed alphabetically: Arrowhead Mills, Balanced Brand [Balanced Foods, New Jersey], Bragg’s (Liquid Aminos), Dr. Bronner’s (with full page ad showing the doctor), Carmé (lecithin), Cedar Lakes, Cellu (Soy bean flour), Chico-San, A.A. Debole (Spaghetti sauce—soy conc), Dragon’s Milk (Arica), Elam’s (soy flour), El Molino, Ener-G—Jolly Joan, Erewhon (with “Erewhon West” full-page ad), Family Orchards (Tamari mixes, Trail mix), Fantastic Foods, Fantastic Falafel [Felafel], Fearn Soya Foods, Flavor Tree, Hain Pure Foods (“Cold pressed” vegetable oils, mayonnaise, nut butters), Hansen’s juices, Health Valley (incl. Vegetarian Chili), Hi-Energy Foods (food bars), Hoffman’s (protein powders, snack bars), Lact-Aid (p. 109, ad p. 118), Jack La Lanne, Lange’s, R.G. Lecithin, Lifestream (p. 113, 251, ads p. 249-50), Malt-O-Meal, Maya Grainburgers (p. 119, ad p. 126—mix with tofu), Midland Lecithin, Miso Cup, Modern Products (Gayelord Hauser), Mus-L-On (MLO), NF Factors, Niblack (“Tamari toasted sunflower seeds,” Tamari pumpkin seeds,” raw or toasted wheat germ, unprocessed miller’s bran), Old Stone Mill (soy), Orjene, Parkelp, Plus Produces (incl. Tiger’s Milk), Richter Bros., Soken, Sovex, Viobin, Waring (blender,

juicer), Westbrae.

Books, Talking Foods, Meats (nitrate and nitrite free), Poultry (no hormones or antibiotics), Soy Products (Health Valley soy milk, tofu), Soy Plant Tofu (nigari, and tofu sausage, p. 259-60), Tumaros, Willow Run (Soybean spread [margarine]). Bulk—Beans, dry roasted soybeans, fruit & nut mixes (trail mix), nut butters, condiments, vegetable oils, pasta (with nomenclature), granola, teas & herbs. Literature & flyers. Indexes. Note: Many companies have a large selection of herbs. Address: 170 Aprill Dr., Ann Arbor, Michigan 48103. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

1117. Chico-San, Inc. 1979. The Yinnies brand Rice Syrup cookbook. P.O. Box 1004, Chico, CA 95927. 19 p. June.

• **Summary:** Contents: Introduction. What is Yinnies brand rice syrup? How Yinnies brand rice syrup is made. Comparison with refined sugar. Contains recipes and shows labels for Yinnies Rice Syrup in jar, Taffy and Caramel.

“Yinnies brand Rice Syrup “is made from a few simple ingredients: rice, water, malted barley, and enzymes from malted grains. That’s all!” It “is a pure, natural sweetener” with a “mild, delicate flavor. It can be used to replace honey, sugar, or other sweeteners that you may now be using.”

“The process that Chico-San uses to make Yinnies brand Rice Syrup involves the conversion of the natural starches in the rice into complex sugars. The secret to the process is to cook the rice at a low temperature, for a long time, allowing the enzymes from the malted grains to create a fermentation. This fermentation occurs in a liquid mash.

“After the mash as fermented for the optimum length of time, the process of fermentation is halted. The liquid is then squeezed from the mash. This liquid is then vacuum cooked at a low temperature to bring the syrup to the right consistency (80 brix).” “The enzymes Chico-San uses in this process are related to those used by the Japanese in making miso and soy sauce. They are made from the same family, *Aspergillus oryzae*.”

Note: Yinnies are made using rice koji; they are an example of glucose syrup production by enzyme hydrolysis of starch [in this case, from rice].

Note: First printing, 5,000 copies. 20,000 copies of this cookbook had been published by Dec. 1981. Address: Chico, California.

1118. Westbrae Natural Foods. 1979. Distributor catalog: June 1979. Emeryville, California: Westbrae. 16 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1119. Westbrae Natural Foods. 1979. Wholesale food catalog: June 1979. Emeryville, California: Westbrae. 36 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1120. Westbrae Natural Foods. 1979. Snack food catalog: June 1979. Emeryville, California: Westbrae. 5 p. incl. 1 p. insert 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1121. *Soycraft*. 1979-1980/02. Serial/periodical. Greenfield, then Colrain, Massachusetts, USA. Richard Leviton, editor and publisher. Vol. 1 Summer 1979. Quarterly magazine.

• **Summary:** Continues (informally) *Soycraft* (Lawrence, Kansas), privately published by David and Danette Briscoe, starting in Oct. 1977. The first issue of this *Soycraft* magazine (Summer [July] 1979, 60 pp., 8½ by 11 inches), was published from Leviton's office at the New England Soy Dairy, 158 Main St. No. 3, Greenfield, Massachusetts 01301 USA. The second issue was published from Leviton's office in his home at 100 Heath Road, Colrain, Massachusetts. Both these issues bore the subtitle *The Journal of the Soycrafters Association of North America* on the cover and title page. This high-quality periodical is the world's first English-language magazine devoted solely to foods made from soybeans. Leviton was an excellent researcher and writer. Renamed *Soyfoods* with issue No. 3 in the summer of 1980.

On the cover of No. 1, Greg Weaver serves at customer at the Rochester Soy Deli (New York state).

On the cover of No. 2, Jeremiah Ridenour and Akiko Aoyagi are seated at a wooden table in the Rochester Soy Deli; it is loaded with dishes prepared at and sold by the Rochester Soy Deli. As of 2012, each of these issues is on Google Books. Search (in quotes) for "Journal of the Soycrafters Association of North America."

The ten issues were published as follows:

- (1) 1979 July (tan cover).
- (2) 1980 Feb. (light green cover).
- (3) 1980 July (red cover).
- (4) 1981 Feb. (silver cover).
- (5) 1981 July (gold cover).
- (6) 1982 Feb. (yellow cover).
- (7) 1982 July (brown cover).
- (8) 1983 Feb. (blue cover).
- (9) 1983 July (yellow cover).
- (10) 1984 July (full color cover). Address:

Massachusetts.

1122. Lavin, Tom. 1979. The wonderful world of books: The story of tofu. *Natural Food and Farming (Atlanta, Texas)* 26(2):4. July.

• **Summary:** "Something new—something different—a traditional food for the future and—it will help you fight inflation in your own kitchen." A good overview based on *The Book of Tofu*, by Shurtleff and Aoyagi, and several important newspaper articles. Mentions Tom Timmins, Richard Leviton, and New England Soy Dairy.

1123. *Natural Food and Farming (Atlanta, Texas)*. 1979. Confessions of a medical heretic. 26(2):4, 16. July.

• **Summary:** "One of the features of the 1979 NFA National Convention in Tulsa [Oklahoma] was the lecture by Robert S. Mendelsohn, M.D. (Chicago, Illinois). Dr. Mendelsohn has been practicing medicine for over 25 years. He has been the National Director of Project Head Start's Medical Consultation Service, Chairman of the Medical Licensing Committee of the State of Illinois, and the recipient of numerous awards for excellence on medicine and medical instruction. He is currently Associate Professor of Preventive Medicine and Community Health in the School of Medicine of the University of Illinois."

His simple creed: "I do not believe in Modern Medicine."

1124. Nichols, Joe D. 1979. NFA yesterday, today, tomorrow: Keynote speech 1979 National NFA Convention. *Natural Food and Farming (Atlanta, Texas)* 26(2):1, 6, 7, 15. July.

• **Summary:** This brief history of NFA begins: "How many of you out there attended the first NFA Convention at the Normandy House Restaurant in Chicago in February, 1953?"

"How many of you have attended all the NFA Conventions since?"

"I think I am the only one who can answer "yes" to both questions. I have seen NFA organized, grow and in some places go to sleep.

"It has been a long hard fight to keep the NFA story alive. In the late 1950's and the 1960's, we went all over America trying to organize local and state NFA chapters.

"The NFA story in those days was not very popular. We were called extremists, unscientific and even the word 'quack' was thrown at us.

"I lost most of my professional friends. I had been councilor of the Texas Medical Association for nine years. This is where they train future presidents of the TMA. My wife was vice president of the Woman's Auxiliary. Some of my friends had intimated that Texas might have another husband and wife team as president of the TMA and the Auxiliary..." Address: M.D., Atlanta, Texas.

1125. Shurtleff, William; Aoyagi, Akiko. 1979. Distributors

of natural nigari in North America (Document part). In: William Shurtleff and A. Aoyagi. 1979. *Tofu & Soy milk Production*. New-Age Foods Study Center. 336 p. See p. 312.

1126. Wade, Carlson. 1979. Lecithin—A food to reverse aging. What is it?—What it does. *Natural Food and Farming (Atlanta, Texas)* 26(2):1, 5. July.

• **Summary:** This is a "Special Report, Good Health Series" by Carlson.

1127. *Recorder (Greenfield, Massachusetts)*. 1979. Our growth industry [soyfoods]. Aug. 8. p. A6.

• **Summary:** This editorial states that the New England Soy Dairy has moved into the former Bete Fog Nozzle building on Wells Street and plans to add 1,200 square feet for refrigeration. New equipment will help maintain production of 25,000 pounds of tofu weekly.

Michael Cohen is opening The Tempeh Works on French King Highway; he hopes it will be one of the largest volume tempeh businesses in the United States. And Lama Trading Co. [formerly Llama, Toucan & Crow], which moved to Greenfield from Brattleboro, Vermont, is growing as a major soyfood-natural foods distributor throughout the Northeast.

"To help coordinate and build the industry, Richard Leviton and David Kilroy have formed the Soycrafters Association of North America and are publishing a slick quarterly magazine called *Soycraft*. Both use the Wells Street address. More than 200 industry representatives gathered in Amherst recently for a national conference organized primarily under Mr. Leviton's direction."

1128. Lifestream Natural Foods Ltd. 1979. Classified ad: Warehouse and delivery personnel requested... *Toronto Star (Ontario, Canada)*. Aug. 20. p. C16.

• **Summary:** "... good working cond. [conditions], with opportunity for advancement. Non-smoker preferred. Apply immed. [immediately] at 91 Estes Park Dr. or call 495-6836.

Note: This tiny ad is in the lower left corner of this full-page of classified ads.

1129. Minsky, Terri. 1979. Natural growth—Health-food chains, in a rapid expansion, cause some heartburn: Purity of goods questioned and some rivals claim unfair marketing tactics. Are any foods healthful? *Wall Street Journal*. Sept. 28. p. 1.

• **Summary:** In 1938, in the midst of the Great Depression, David Shakarian started a health food store he named "Lackzoom" in downtown Pittsburgh, Pennsylvania, in the warehouse district.

Today, Mr. Shakarian calls his 700 stores General Nutritional Centers; he owns them all. Two additional GNC stores open every week, and he plans to eventually own 6,000. In addition to wheat germ, honey, vitamins and other traditional health foods, he also sells "sea-salted toasted soybeans," natural fruit juices, and other items that bring in revenues of \$200 million/year. GNC's biggest competitor is the 70-store chain of Nature Food Centres. Address: Staff reporter.

1130. Barton, David. 1979. Foods from the Far East. *Whole Foods (Berkeley, California)*. Oct. p. 28-34, 54.

• **Summary:** Mutual Trading Co. is making 500 tons of miso a year, and this is expected to increase by 10-15% in 1980. Their miso sales are up 300% in 5 years. Erewhon wholesale sales by product for the year ended June 1979 were: Miso \$100,000, shoyu \$200,000, tofu \$110,000. Japanese trade commission figures for 1978 natural food imports are: Miso \$625,528, and shoyu \$1,466,909.

1131. Barton, John. 1979. Fire levels area food warehouse. *Ann Arbor News (Michigan)*. Nov. 27. p. A-1, A-2.

• **Summary:** At 5:00 in the morning of Tuesday, Nov. 26 a fire started in the Eden Foods warehouse, made of cinder block and bricks, at 4601 Platt Road. About 100 firefighters from Pittsfield Township and six other departments battled the blaze, but it nevertheless turned the building into rubble.

"Eden Foods employs some 100 persons in the distribution and production of natural foods that are supplied to about 500 stores and restaurants. The firm also operates a retail store and natural foods restaurant at 330 Maynard Street, as well as the Turtle Island restaurant on State Street.

"Eden Foods was organized in 1970, and began as a tiny single-room natural food store. Last year, the firm's owners, Tim Redmond and Michael Potter, said they expected total sales to reach \$5 million and called the business 'the largest

natural food distributorship in the Midwest.”

“Authorities planned to return to the warehouse today and begin searching for the cause of the blaze.”

A large photo shows the charred and gutted warehouse. Address: Police reporter.

1132. *Ann Arbor News (Michigan)*. 1979. Warehouse fire probe continues. Nov. 28.

• **Summary:** An investigation continued today into the cause of a Tuesday morning fire that levelled the Eden Foods 60-by-120-foot cinder block and brick warehouse on Platt Road, causing an estimated \$650,000 damage. Officials estimate that about \$450,000 worth of natural food products were destroyed in the blaze. There was about \$100,000 worth of insurance on the building, which was built 3-4 years ago, but that won't come close to covering the cost of replacing it, said James Kay, Pittsfield Township's fire chief.

1133. *Ann Arbor News (Michigan)*. 1979. Warehouse fire began in office. Nov. 29.

• **Summary:** “Investigators say the fire that leveled the Eden Food warehouse Tuesday began in an office area, but authorities are still uncertain how it started.” Judson Storms, Pittsfield Township fire marshal said he was stymied as to how the fire started “if it was accidental or if it was arson.”

“Total damages were estimated at \$650,000, including the destruction of about \$450,000 worth of natural food products distributed and processed in the warehouse at 4601 Platt Road. Meanwhile, Tim Redmond said he and his partner in the business, Mike Potter, plan to rebuild and locate ‘some where in Ann Arbor as soon as possible.’” Eden has its phones back in operation and a skeleton crew of workers on the job.

An industry insider, who is not connected with Eden Foods in any way and who has provided this information only on condition of anonymity, states: “Remember, Eden Foods had a Mafia hit and they burned down the warehouse. It was a mistake by the Mafia, which set the fire deliberately, with explosives, but in the wrong location! The Mafia intended to blow up another place, but they accidentally blew up Eden Foods' warehouse. Years later, someone from the Mafia in Detroit later contacted Eden and apologized—but there was more to the call than just that.” It had never made sense before that time.

1134. *Ann Arbor News (Michigan)*. 1979. Eden Foods wants to sell [Turtle Island Restaurant]. Nov. 30.

• **Summary:** “Eden Foods, recently hit by a warehouse fire which virtually wiped out its stock of supplies, wants to sell one of its two Ann Arbor restaurants. The Turtle Island Restaurant, 315 S. State St., had been for sale before Tuesday's fire... Turtle Island has been open since August 1977 and offers a combination of Eden's natural foods, fresh fish, salads and soups... Eden also operates a natural foods

deli at 330 Maynard St... Eden lost between \$400,000 and \$450,000 of inventory and equipment in the fire at 4601 Platt Road this week, but Redmond said the company already has started rebuilding.”

1135. Eivers, Richard Warren. 1979. From alternative to big business: The story behind Erewhon's unionization. *New Age Journal (Boston, Massachusetts)*. Nov. p. 31-34, 36-40.

• **Summary:** On 27 April 1979 the “workers in Erewhon's production, trucking, shipping, and kitchen departments voted 42-19 to form a union affiliated with Local 925, the Service Employees International Union, and they have since been negotiating a contract... Erewhon employees cite as a major reason for the unionizing effort—in addition to concerns about wages, working conditions, and medical benefits—their feelings that behind Erewhon's New Age image lay the reality of an uncaring and unresponsive management willing to exploit them just as any ‘straight’ business might.”

The natural foods industry is rapidly becoming big business. *Whole Foods* magazine reports that the “estimated 1978 sales of the seven largest distributors amounted to \$156 million; in a recent 12-month period 6,400 health and natural food retail stores did over \$1.1 billion in sales.” Erewhon's sales now top \$11 million yearly.

The history of the events leading to unionization are discussed, beginning in Dec. 1976 when the “Production Caucus” began to meet. A document titled “History of the Production Caucus” was started and kept track of ongoing developments. Management refused to deal with this group; repeatedly rebuffed, they grew bitter and suspicious. Jack Garvey, Michio Kushi, Evan Root, and Bunny Meagher all worked to stop unionization—but they failed.

A sidebar describes the Alternative Food Workers Alliance (AFWA), a union formed at Westbrae Foods in Berkeley 3 years ago (Dec. 1975); see separate record.

Photos show: The inside of Erewhon's warehouse, “Zoraih” (Lane Curland), Jeff Flasher, Rob Pell, Tim Reagan.

1136. Eivers, Richard Warren. 1979. The AFWA: A prototype for alternative unions? *New Age Journal (Boston, Massachusetts)*. Nov. p. 38.

• **Summary:** This sidebar to an article on the new labor union at Erewhon describes the Alternative Food Workers Alliance, a union formed at Westbrae Foods in Berkeley, California, 3 years ago (i.e. on 22 Dec. 1975). This union is now seeking to become a national labor organization for workers in the natural foods industry. “According to Tom Miller, a dispatcher at Westbrae who helped organize the union and now acts as its general coordinator, the workers at Westbrae chose to unionize when the owner of the company decided to form a corporation and expand the business. Prior to that decision, there had been talk of turning the company into a

collective: many of the people involved with the company thought it should be an alternative business in form as well as product. When collectivization was ruled out, the employees decided that a union was needed, not only to maintain an economic balance between management and workers, but to ensure that Westbrae's integrity would not get co-opted as the company grew.

"Westbrae's owner and management resisted the idea of unionization, arguing that Westbrae was a spiritual New Age family and that there was no need to resort to a union... On December 22, 1975, the union was certified by the National Labor Relations Board and began negotiating its first contract... Miller reports that today the work situation at Westbrae is excellent, and that the happy, efficient work force has contributed to the company's successful operation and growth.

"Bruce Handler, executive officer of Westbrae, agrees that the union contributes to the company... AFWA invites workers in natural foods businesses to contact the union for more information: Alternative Food Workers Alliance. 1825 Curtis St. Berkeley, California 94702. Phone: (415) 549-3387."

1137. Rodale, Robert. 1979. The amazing three-way bean: With the editor. *Organic Gardening*. Nov. p. 28-35.

• **Summary:** Some people see soybeans as just another bean. Soycrafters see in soybeans the potential for a natural, healthful and even profitable new way of life. And one doctor even sees in soybeans a possible way of controlling cancer.

After discussing tofu and tempeh, and why one might want to become a soy crafter, Rodale continues: "What may really cause soy craft to boom, though, is new information that the eating of soy foods may give people a potent weapon in the control of cancer. Walter Troll, Ph.D., a researcher at New York University Medical Center, is about to publish details of experiments which show that experimental animals fed soybeans were able to resist the effects of chemical carcinogens (cancer-causing substances). It is already known that women living in countries where soybeans and other seeds are important sources of protein have less breast cancer. Now there is laboratory evidence showing why. Substances called protease inhibitors [or trypsin inhibitors] are the key."

"If you are interested in tofu or tempeh-making as a business, you may want to check out *Soycraft* magazine. The address is 158 Main Street #3, Greenfield, Massachusetts 01301. A one-year subscription—four issues—is \$15." Photos show: (1) Robert Rodale. (2) Tofu being made at the New England Soy Dairy.

1138. *SoyaScan Notes*. 1979. Chronology of soybeans, soyfoods and natural foods in the United States 1979 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. Yvonne and Irene Lo incorporate The Soya Bean Products Co., N.A. in San Francisco as a marketing company and immediately begin to import and distribute Vitasoy, the world's most popular soymilk, to Canada from their parent company in Hong Kong. It is not yet sold in America due to an FDA ban on aseptic Tetra Pak cartons.

Jan. Soycrafters Association of North America headquarters moves to Colrain, Massachusetts. Richard Leviton takes over as Director. Decides to edit and publish *Soycraft* magazine.

Jan. "The Soyfoods Revolution" published as a cover story by *Whole Foods* magazine.

Jan. 15-18. Second International Workshop on Low-Cost Extrusion Cookers held in Dar es Salaam, Tanzania, with 43 participants.

Feb. Takai catalog of large scale equipment published.

Feb. 9. Judith Rubenstein, institutional consultant for the New England Soy dairy, initiates a correspondence with Carol Tucker Foreman, Director of Child Nutrition programs at USDA, on the subjects of tofu standards and acceptance of tofu in USDA Child Nutrition Programs, including the school lunch program. Four letters are exchanged between Feb. and Aug. 1979. This is the start of work of tofu standards and tofu in school lunch programs.

Feb. *Natural Foods Merchandiser* magazine starts publication, founded by Doug and Karen Greene.

March 11. KOPTI is founded in Indonesia. It soon functions as an active, effective trade association for Indonesian tempeh and tofu manufacturers. By June 1986 it has more than 12,000 members from 40 cooperatives, and is promoting mechanization of production.

March. Soycrafters Assoc. and Quong Hop & Co. have adjoining booths at the New Earth Expo in San Francisco. 6,000 people sample free tofu burgers, tofu chip dips. Farm Foods sells Ice Bean (soymilk ice cream) and tofu cheesecakes. Gilman Street Gourmet sells tofu burgers.

March. Oak Feed Miso Company is founded by Sandy Pukel, John Belleme, and Barry Evans. Joe Carpenter, Michio Kushi, and James Kenny are also involved. It is soon renamed American Miso Co.

March 26-29. World Soybean Research Conference II held at North Carolina State University. The 897-page proceedings, edited by F.T. Corbin, are published in 1980.

March. Food Protein Council holds International Soybean Fair in Washington, D.C. Many Congressmen, consular officials, etc. attend and sample soy protein products and tofu dips.

March. The Ohio Miso Company, founded by Thom Leonard and Richard Kluding, begins production in Ohio. America's first Caucasian-run miso company.

March. Richard Leviton takes a 3-week soyfoods research trip to the Midwest. Establishes many important contacts.

April. *New England Soy Dairy Product and*

Merchandising Guide published.

April 12. "Good Old Bean Curd Is Suddenly Popular, But You Call It Tofu" by W.M. Bulkeley published as a front page article in *The Wall Street Journal*.

May 24. "The Americanization of Bean Curd," an expansion of Bulkeley's April article, published in the *Washington Post*.

May. Quong Hop & Co. in San Francisco introduces vacuum packed firm tofu, tofu cutlets, tofu burgers, and teriyaki tofu. Each of the latter three products is the earliest known product of its type in America.

June. *The Tofu Cookbook* by Kathy Bauer and Juel Andersen published by Rodale Press.

June 29. An internal FDA memorandum is prepared by FDA headquarters personnel to set forth the agency's views on the attributes of tofu. Publication of a "pull date" on tofu packages is encouraged.

July. Farm Foods starts national advertising of tempeh starter and tempeh kits.

July. David Mintz, owner of Mintz's Buffet, a kosher Jewish deli in New York City, first learns of tofu from Pesach Lazaroff, a young Jewish vegetarian. That summer Lazaroff spends many hours working with Mintz as a paid consultant, developing kosher tofu recipes. Mintz later becomes rich and famous for developing Tofutti, a soy ice cream.

July. *The Book of Tempeh*, by Shurtleff and Aoyagi published by Harper & Row in both large-format paperback and professional hardcover editions. The world's first book about tempeh.

July. *Tofu & Soy milk Production*, by Shurtleff and Aoyagi published by The Soyfoods Center. This is the first book to use the term "soyfoods" in English.

July 17. "Tofu—The Oriental Way to High-Protein, Low-Calorie Meals" published by *Family Circle*.

July 23. Judith Rubenstein (see Feb. above) writes the Commissioner of the FDA requesting that the agency establish a standard of identity for tofu. She notes that the Director of Nutrition and Technical Services for USDA suggested that FDA give top priority to this issue. Issues of imitation tofu products and bacterial contamination are raised.

July 26-29. Second Soycrafters of North America Conference: "Producing and Marketing Soyfoods," held at Hampshire College, Amherst, Massachusetts, organized by Richard Leviton and financed on a shoestring. A major milestone for the U.S. soyfoods industry. 230 people attend and the content is a great success, but Leviton loses \$1,000 on the venture. The first issue of Soycraft magazine, written and published (1,900 copies) by Leviton, is distributed at the conference. In the keynote address, Shurtleff notes that the biggest challenges facing the industry are to build a strong trade association with adequate funding, and to develop soyfoods standards.

July. *Alimentacion Integral Para Una Vida Plena: Los*

Mil Usos de la Soya (Integral Nutrition for a Full Life: The Thousand Uses of Soya), by Blanca Dominguez published by Editorial Posada in Mexico. The country's first book on soyfoods.

Aug. Robert Rodale and Rodale Press gives strong support to *Soycraft* magazine, with ads and a nice mention in an article, which brings in 135 subscriptions in November.

Sept. The Soycrafters Apprenticeship Program is started by Luke Lukoskie at Island Spring, Vashon, Washington. Here people can spend about 3 weeks getting hands-on experience in making tofu, soymilk, and tempeh.

Sept. Tempeh Works, America's first Caucasian-run commercial tempeh shop in a commercial building and making only tempeh, starts production in Greenfield, Massachusetts. Founded and run by Michael Cohen.

Sept. Many articles about the Amherst Soyfoods Conference published in national magazines, such as *New Age*.

Sept. New England Soy Dairy opens America's first in-house tofu & soymilk sanitation laboratory.

Sept. "Chinese Cuisine: Bean Curd" by Nina Simonds published in *Gourmet* magazine.

Nov. 26. A fire destroys Eden Foods warehouse and \$800,000 inventory. The company, struggling for its life, moves to rural Clinton, Michigan.

Oct. *The Great American Tofu Cookbook* by Patricia McGruter published by Autumn Press.

Dec. Rodale Press contacts Richard Leviton to announce plans to do a Soybean Newsletter, with Leviton as editor. The idea later falls through.

Dec. *Frijol Soja* (Soybeans) published in Peru by INTSOY.

Dec. *The Soysage Cookbook*, by Cloud and Burdett self-published in Vermont.

* San-J tamari starts to be imported to America from Japan.

* California and Maine become the second and third states to enact organic labeling laws. California's becomes a model and a standard for many other similar laws, and it is cited on many soyfood product labels. By 1988 there are 12 states with organic laws, and 5 more planned.

* Tofu production in Japan tops 1.1 million metric tons for the first time.

* Soybean research in America begins to shift from emphasis on production to emphasis on utilization.

* Syntex corporation of Palo Alto, California, recalls its soymilk Neo Mull Soy after it is found to be missing a key nutrient, chloride. Many children who used this product were mentally damaged.

* Lauhoff Grain Corp. acquired by Bunge.

* 1979-82. Years of the "salt craze." Growing concern with the level sodium in American food products begins to hurt sales of miso and shoyu. Continued.

1139. *SoyaScan Notes*. 1979. Chronology of soybeans, soyfoods and natural foods in the United States 1970s (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Overview of the 1970s:

The Soyfoods Movement Begins. This industry focused on traditional, low-tech soyfoods such as tofu, soymilk, tempeh, and miso. Many of the pioneer Caucasian-American (non-Asian) soyfoods companies started during this decade, often for philosophical and ideological reasons. The founding of the Soycrafters Association of North America in July 1978 marks the beginning of this movement.

By Dec. 1979 there are 159 tofu manufacturers in the United States. Ninety of these are run by Caucasian Americans and are less than 3 years old. There are also 18 tempeh companies and 3 commercial miso companies (not including those in Hawaii).

Natural Foods and Vegetarian Movements Grow. The basic philosophy of natural foods and vegetarianism became more widely accepted, and this greatly helped the soyfoods movement.

Unprecedented Interest in Nutrition, Health, and Fitness. During this decade, the interest in nutrition grew dramatically, both among consumers and professionals. Consumers, seeking ways of protecting themselves from the ravages of heart disease and cancer, try more healthful diets. Exercise and looking healthy are now “in.” For example, the New York Marathon, which had 55 finishers (no women) in 1970, boasted 10,477 finishers (including 1,621 women) in 1979. Preventive medicine is becoming a new profession.

Steady Increase in Population of Asian-Americans. The number of Asian- and Pacific-Americans living in the USA increased from about 800,000 in 1960 to 1,369,000 in 1970 to 3,500,000 in 1980, at which time they comprised 1.5% of the total U.S. population. Their burgeoning numbers were a major factor in steadily growth of the soyfoods industry, since many Asians use soyfoods in their daily diets.

U.S. Soy Sauce and Miso Consumption Grows. Soy sauce consumption grew from about 9,000 kiloliters in 1970 to about 38,000 kl in 1979, a 4.2-fold increase during the decade. In 1974 domestic production passed imports.

U.S. miso consumption grew from about 750 metric tons (tonnes) in 1970 to about 1,800 tonnes in 1979, a 2.4 fold increase.

Shipments of Soy-Fortified Foods in the Food For Peace (P.L. 480) Program jumps. Shipments of two products in 1970 totaled 131,000 tonnes. In 1979 a record 664,000 tonnes of ten products were shipped to needy countries, a 5-fold increase during the decade. In 1979, the main products shipped were SFB (soy-fortified bulgur), CSM (corn-soy-milk), and WSB (wheat-soy blend).

The Ongoing Protein-Versus-Calories Debate. As Nevin Scrimshaw concluded prophetically in his insightful 1977 lecture “Through a Glass Darkly: Discerning the

Practical Implications of Human Dietary Protein-Energy Interrelationships”: “To the extent that the pendulum swung too far in emphasizing protein in the 1960s, and too far in emphasizing calories in the 1970s, it must come to a more appropriate position for the 1980s and beyond.” He noted that two big protein issues concerned (1) human requirements for protein at different ages and physiological states, and (2) the evaluation of the protein quality of foods as related to human requirements.

Reappraisal of the Value of Plant and Animal Proteins. During the late 1960s and early 1970s, animal proteins probably reached their historical peak of popularity in the U.S. A diet rich in animal protein was considered a “better diet.” However during the 1970s a growing body of nutritional and ecological evidence, and changing attitudes toward world hunger and animal rights, led to a new appreciation of the quality, now more broadly defined, of plant (and soy) proteins. They were more healthful, less expensive, more efficient in utilizing farmland, energy and water, less polluting, and obviated animal slaughter.

Switch from Animal to Vegetable Oils. In the early 1950s Americans were consuming approximately equal amounts of animal and vegetable fats. By 1978 the ratio of vegetable to animal fat was 84 to 16. The same shift occurred worldwide, where the 1978 ratio was 71 to 29.

There were at least three basic reasons for this shift: (1) The growing concern, especially after 1960, with the health dangers associated with consumption of saturated fats and cholesterol, most of which came from animal fats such as butter and lard; (2) Hydrogenation, which allowed vegetable oils to be used in making substitutes for butter and lard (i.e., margarine and shortening); and (3) the lower price of vegetable oils, shortening, and margarine.

Production of soy oil grew dramatically during the postwar period, filling most of the increased demand for vegetable oil.

Boom Years for U.S. Agriculture. The 1970s was a decade of rapid growth for U.S. farmers. With high inflation and low interest rates, American farm products dominated world trade. The boom ended with the second “Oil Shock” of 1979-80, which set off the most serious recession of the post-war era, and marked the start of the Latin American debt crisis that later had a major negative effect on U.S. soybean farmers. 1979 was the last year of roughly 50 years of essentially non-stop, rapid soybean growth. During the next decade, U.S. soybean production zigzagged sideways and declined slightly.

Rapid Increases in Soybean Production in New Third World Countries. Prior to the 1970s, soybeans had never been widely grown in the tropics or semi-tropics (except perhaps in Indonesia). But during this decade a host of countries in such areas started to grow soybeans on a large scale for the first time. Major causes for this were the U.S. soybean boycott of 1973, the pioneering work done by

INTSOY in Illinois, IITA in Nigeria, and AVRDC in Taiwan, and the development of day-neutral soybean cultivars that gave high yields at low latitudes. The major areas of rapid new production growth were...

Latin America. Total production increased from 1,746,000 tonnes in 1970 to 15,384,000 tonnes in 1979, an 8.8 fold increase during the decade. Latin America's three leading soybean producers in 1979 were Brazil, Argentina, and Mexico. Brazil's production rose 7.8 fold between 1970 and 1979, but Argentina's jumped 137-fold!

In 1979 soybean production in Latin American passed that in all of Asia, the birthplace of this ancient crop, and became second only to that of North America (61,722,000 tonnes in 1979/80).

In 1974, Brazil passed China to become the world's second largest soybean producing nation after the USA. The ranking in 1979 by tonnage was USA, Brazil, China, Argentina, Mexico, Indonesia, Paraguay, USSR, Romania, India, and North Korea.

Africa: Total production increased from 67,000 tonnes in 1970 to 300,000 tonnes in 1979, a 4.5 fold increase during the decade. By 1979 Egypt had become the largest soybean producing country in Africa, followed by Zimbabwe, Nigeria, and South Africa. This promising growth was doubly important because it came at a time of steadily falling per capita food production in Africa as a whole, down 20% from 1970 to 1987.

India. Total production increased from a mere 18,000 tonnes in 1971 (production was negligible in 1970) to 450,000 tonnes in 1980, an astonishing 25-fold increase in ten years, and a growth rate greater than that of Latin America. Meanwhile, in Asia as a whole soybean production was slowly declining.

1140. Product Name: Deaf Smith Crunch.

Manufacturer's Name: Arrowhead Mills, Inc.

Manufacturer's Address: P.O. Box 866, Hereford, TX 79045. Phone: (806) 364-0730.

Date of Introduction: 1979.

Ingredients: Oat, wheat, soybean, rye, and triticale flakes.

How Stored: Shelf stable.

New Product–Documentation: Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 45-55. "Arrowhead Mills Deaf Smith Country Reader" by Frank Ford. An illustration (line drawing) shows this product label. The subtitle reads: "Ready to eat cereal and snack." "The nutrients in this granola-type cold cereal are all naturally occurring in the oat, wheat, soybean, rye and triticale flakes." The soybean flakes (microflaked soybeans) were introduced in 1973.

1141. Product Name: Tofu.

Manufacturer's Name: Bean Mountain Soy Dairy.

Manufacturer's Address: 121 W. Howard St., Boone, NC

28607. Phone: 704-264-0890.

Date of Introduction: 1979.

Ingredients: Water, organic soy beans, nigari.

Wt/Vol., Packaging, Price: 1 lb.

How Stored: Refrigerated.

New Product–Documentation: Rick Mashburn. 1980. *The Sentinel* (Winston-Salem, North Carolina). Feb. 15. p. 7. "From beans to 'cheese.'" Four photos show Jerry MacKinnon and Marc Crowell making tofu. A blow-up photo shows one of their tofu labels. Below the ingredients is written: "Store in fresh water."

Soyfoods Center. 1980. Sept. Tofu shops and soy dairies in the West (2 pages, typeset). Gives the company's name, address, and phone number. Owner: Jerry McKinnon.

Talk with Jon Kessler of Virginia Soyworks, then with an employee of the company. 1991. Sept. 14. The company, now named Bean Mountain Natural Foods, has just moved to 1096 New Stock Rd., Weaverville, North Carolina (phone: 704-658-2326), and has just gotten a major account with Tree of Life. John Swann is president. The company is privately owned and presently makes only tofu and tempeh.

D. Christner. 1992. Dec. 14. *Times-Dispatch* (Richmond, Virginia). Bear [Bean] Mountain Natural Foods of North Carolina went out of business during 1992.

Letter (e-mail) from John Swann. 2012. July 18—in reply to a question from Shurtleff. "I did indeed own a tofu and tempeh shop from 1987 until 1992. Your books on commercial tofu and tempeh production were invaluable to us, and I still have them. Thank you for writing them. I would be glad to share a brief history of the company.

"The shop was started in 1979 in Boone, NC, by Gerry McKinnon. I helped Gerry get it started for the first few months (he actually rented the production space from me at the time), but was not actively involved in the business until I bought it in 1987. We ran it in Boone for three more years, then moved the plant to Weaverville, NC, (north of Asheville) in 1990. At the height of the business, we had two refrigerated trucks and were delivering weekly to retail stores throughout most of NC. We had Tree of Life, Harris Teeter, Biggers Brothers (Fresh Market), and Mountain Warehouse Co-op as wholesale accounts. We also distributed American Miso Co. and a few other products on our delivery runs, which is when I met John and Jan Belleme.

"For the tofu operation, we used a hammer-mill disintegrator and an 80-gallon steam jacket kettle with a steam injection wand. Our hydraulic okara press was homemade. We curdled with nigari. We used weighted buckets to press the tofu, with locally made stainless steel press boxes. We hand packed in a 16-oz printed cup and lid, packed 6/ and 12/case, as well as bulk in 12# and 25# buckets.

"For the tempeh, we used an antique stone mill to split the beans and a centrifugal commercial laundry extractor to dry them. We used a sausage mixer to inoculate, and we

incubated on dishwasher trays set in rolling bread racks, in an incubator room that I designed. We packed in perforated poly bags, over-wrapped by printed poly bags after steam oven pasteurization. We packed (24) 8-ounce frozen cakes in a punch-out display box.

“Unfortunately, the same month that we opened our new plant near Asheville, Cornucopia Natural Foods (now UNFI) opened their warehouse in Atlanta, Georgia, bringing with them Nasoya tofu and Lightlife tempeh. We worked hard for two years to get Cornucopia to pick up our products, but they never would pick them up. And my associate John Paino (we served together on the Soyfoods Association of America for a year) made good on his promise that he (Nasoya) would “own tofu in the eastern US,” with killer promos and pricing through both Tree and Cornucopia. We ran for two more years, but never could get sales to grow enough to cover the higher cost of the new plant. So, in 1992 we sold the assets of the company to Jon Kessler and Twin Oaks Community Foods in Virginia, and moved on.

“That’s the short story. If you want any more of the bloody details, I would be glad to fill in the blanks.

The only product that we made other than regular soy tofu and tempeh was a Dulse Tofu, which only had modest success.

“Thanks again for your work and all you have done for the industry.

“Best Regards,...”

“P.S. I am still in Asheville. After Bean Mountain, I worked in several food related businesses, including a year as general manager at Great Eastern Sun, and four years with a local produce distributor. Since then, I have been working mostly in retail, with seven years at Earth Fare and seven years with Greenlife Grocery, of which I was a partner. Since Whole Foods bought out Greenlife two years (over my strenuous objections), I have been consulting and am currently developing a new retail venture here in Asheville.”

1142. Product Name: Koji Starter.

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: 4601 Platt Rd., Ann Arbor, MI 48104. Phone: (313) 973-9400.

Date of Introduction: 1979.

How Stored: Refrigerated.

New Product–Documentation: Ad in Soycraft. 1979. Summer. p. 38. “Traditional Soy Products from Eden Foods.” “Koji [sic, Koji starter], a light green mold spore, (*Aspergillus Oryzae*) is available in dried or cultured grain form for such fermented grain products as shoyu, miso, sake, and amasake. Different varieties available.”

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. Eden Foods never sold koji.

1143. Shepard, Sigrid M. 1979. *Natural food feasts from the Eastern World: China, Japan, India, Indonesia, the Middle East*. New York, NY: Arco Pub. Co. vii + 455 p. Illust. (by Margaret V. Putnam). Index. 28 cm. *

• **Summary:** Published in 1976 under title: *The Thursday Night Feast and Good Meals Cookbook*.

1144. Product Name: Bonsoy (Soymilk).

Manufacturer’s Name: Spiral Foods (Importer). Made in Japan by Marusan. Imported via Muso Shokuhin.

Manufacturer’s Address: Melbourne, Australia.

Date of Introduction: 1979.

Ingredients: Water, soybeans, pearl barley, kombu (sea vegetable), barley malt.

New Product–Documentation: Australian Dairy Foods. 1986. Feb. p. 84. A photo shows Barley Malt Bonsoy in a Tetra Brik carton. It is imported from Japan. Shurtleff & Aoyagi. 1986. *Soymilk Industry and Market*, Update. Australian Dairy Foods. 1986. Feb. p. 84.

Sojarei (Austria) price list. 1989. Jan. The company markets this product in plain and cocoa flavors, in 500 ml and 1 liter sizes.

Talk with Ron Roller of Eden Foods. 1992. Feb. 26. When he visited the Muso office in Osaka, Japan, in Sept. 1982, he noticed very large shipments of soymilk in aseptic foil retort pouches, made by Marusan, being shipped to Spiral Foods (run by James Wilson) a macrobiotic distributor in Melbourne, Australia.

Talk with Yuko Okada. 1992. July 16. Muso first exported soymilk (Bonsoy) from Japan in about 1979 to Spiral Foods in Australia, owned by Jim Wilson. This soymilk was packaged in a foil retort pouch.

1145. Product Name: Tamari [Traditional Wheat-Free Tamari, or Johsen Shoyu Tamari].

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1979.

Ingredients: Wheat Free: Whole soybeans, water, sea salt. Johsen Shoyu: Water, whole soybeans, whole wheat, salt.

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml), 16 fluid oz (473 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1982. 6 by 3.5 inches. Paper. Red, green, black, and white on gold. Label. 1982. Wheat Free: 6.5 by 3.5 inches. Paper. Red, blue, green, grey, tan, black, and white. 5 fl oz. Label. 1982. Johsen Shoyu: 8 by 3.5 inches. Paper. Red, blue, green, tan, black, and white. 16 fl oz. “The words ‘Tamari,’ ‘Shoyu’ (shoyu), and ‘Soy Sauce’ are often used to describe the same product. The history of soy seasoning explains the product’s evolution and name. Tamari–Centuries ago, the Japanese

discovered the seasoning and nutritive benefits of the liquid that collected in hollows of soybean miso. Miso-tamari was the forerunner of all soy sauces. The natural food movement began calling premium or naturally brewed soy sauce 'Tamari...'" Explains shoyu and modern soy sauce. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Letter from Gordon Bennett. 1987. Oct. Gives date as 1979. I had 1982.

1146. Product Name: White Tiger Tofu Sauce.

Manufacturer's Name: Westbrae Natural Foods.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1979.

Ingredients: Soy sauce (water, soybeans, wheat, seasalt), honey, vinegar, toasted sesame oil, lecithin, gum tragacanth, cayenne.

Wt/Vol., Packaging, Price: 10 fluid oz, 12 fluid oz (355 ml) bottle.

How Stored: Shelf stable.

New Product–Documentation: Two Labels. 1979. undated.

3.5 by 3.5 inches. Paper. Red, black, and white or green and yellow-orange. Stalking tiger illustration. 5.25 by 3.5 inches. Paper. Brown, blue, black, orange, white. Mt. Fuji logo illustration. Small tiger in title. **Ingredients:** Soy sauce, malt syrup, cider vinegar, honey, sesame oil, natural gum stabilizers, ginger, cayenne. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Westbrae Natural Wholesale Food Catalog. 1980. Spring. **Ingredients** are now: Tamari, honey, apple cider vinegar, toasted sesame oil, guar gum, gum tragacanth, cayenne. Letter from Gordon Bennett. 1987. Oct. Gives date as 1979.
