• **Summary:** In this macrobiotic cookbook, note (despite the subtitle) that fish are used in some recipes, so it is not actually a vegetarian cookbook. The term "shoyu (natural soy sauce)" is used throughout. **Contents:** Part I: Theory: A kitchen philosophy. Where we are now. Choosing our food. Balance. Menu planning: General guidelines, food categories. In the kitchen: Cooking: why and how, setting up the kitchen, buying, storing, and preserving food, cutting vegetables. Special situations: Eating away from home, if you live alone, entertaining, the art of eating.

Part II: The practice. Using this book. Fall meals. Winter meals. Spring meals. Summer meals. Basic beverage recipes. Homemade bread. Appendix. Bibliography (24 cookbooks, 65 reference books and others).

Soy-related recipes include: Miso soup (with tofu, p.

69), Hiziki [Hijiki] with mushrooms and tofu (p. 74), Tofu-ginger dressing (p. 93), Miso-tahini spread I (p. 94), Oden stew (with fried tofu, p. 112), Fried tofu (p. 113), Miso-tahini spread II (p. 118), Tofu-miso spread (p. 127), Daikon with miso (p. 139), Cold tofu with garnish (p. 144), Tofu-sprout spread on toast (with alfalfa sprouts, p. 146), Tofu cream pie (p. 156), Scrambled tofu (p. 158), Noodles with tofu and bean sprouts (p. 165; the type of "bean sprouts" is not specified), Miso-dill dressing (p. 172), Tofu mayonnaise (p. 182-83), Lemon-miso soup (p. 185), Peanut-apple-miso spread (p. 190), Tofu pickle spread (p. 191), Miso-dill dressing with tahini (p. 195), Miso-vinegar dressing (p. 204), Baked tomatoes with miso (p. 207), Tofu dip (p. 208), Miso dip (p. 209), Tahini-tofu dressing (p. 209), Tofu-mustard dressing (p. 213). Address: 365 West End Ave., New York City, NY 10024. Phone: 212-580-7121.

1148. Haines, Stephen; Schreiber, Jim; Fillip, Janice; Stein, Ellin. eds. 1979. *Whole foods–Natural foods guide: What happens to natural food products from farm to consumer?* Berkeley, California: And/Or Press. 301 p. *

• **Summary:** Contains thirty articles compiled from the pages of *Whole Foods* magazine. On pages 129-30 are sections on miso and koji, including praise for the "wonderfully comprehensive" *Book of Miso* by Shurtleff and Aoyagi. Address: Berkeley, California.

1149. Mortimer, Robert; Mortimer, Charles; Mortimer, Mary Ellen. comp. and ed. 1979. *The menu guide of Los Angeles*. Pacific Palisades, California: Mortimer Development Co. 191 p. Illust. No index. 28 cm.

• **Summary:** Includes a copy of part of the menu from the Golden Temple of Conscious Cookery (Hollywood, p. 64-65). The vegetarian menu is divided into: Fruit salads. Vegetable salads. Soups. Sandwiches (Eggplant Bhajan incl. breaded eggplant with lemon-tahini dressing; Falafel). Soups and appetizers (incl. Country French onion soup, Guacamole salad, Gaspacho, Sprout salad). Entrees (incl. Golden deluxe, delicately seasoned eggplant and soybeans, with topping on patty). Desserts. Various recipes mention Yogi Bhajan.

1150. Riker, Tom; Roberts, Richard. 1979. *Directory of natural and health foods: A sourcebook for dietary revolution*. New York, NY: Putnam (A Paragon Book). 320 p. Index. 37 cm.

• **Summary:** The first part of this book (p. 7-49) consists of essays on natural foods and nutrition (some reprinted). Part two is a commercial catalog/directory of natural foods available in 1979; it lists and describes (with many photos and labels) products from most of the major U.S. natural foods manufacturers. An Index (p. 293-308) lists participating companies alphabetically.

Soy-related products include: Hain Super-E Soy Oil and Crude [unrefined] Soy Oil (Los Angeles, California,

p. 55). Health Valley Soy Moo (Montebello, California, p. 56). Edward & Sons Miso-Cup (Union, New Jersey, p. 57). Family Orchards Fruit & Nut mixes, incl. Back Packer+*, Hi-Fiber Mix+, Hi-Iron Mix+, Hi-Protein Mix+*, Hiker's Helper, Mixed Nuts*, Mountain Munchies*, Tamari Mixed Nuts* (+ = contains Soy Nuts; * = contains Tamari Peanuts) (Berkeley, California, p. 60-61). Niblack Tamari Pumpkin Seeds (Pepitas), Tamari Roasted Sunflower Seeds, Liquid Lecithin, Granular Lecithin (Rochester, New York, p. 72-73). Arrowhead Mills Unrefined Soybean Oil (Hereford, Texas, p. 75). Good Morning New England Granola incl. Cashew-Raisin Bran-ola (with okara soy fiber), Happy Trails Mix (with roasted soynuts) (Amherst, Massachusetts, p. 79). Elam's Soy Flour (Broadview, Illinois, p. 81).

A long section on Erewhon and its products (p. 84-108) is probably the reproduction of an Erewhon catalog. Erewhon is now located at 3 East Street, Cambridge, MA 02141. Following several pages about the company and its philosophy and standards, each of its major products is discussed in detail, often with nutritional analyses. A label for Soy Flour (organically-grown stone-ground, 24 oz.) is shown; the main recommended use is for making soy milk! A major part of the presentation is titled "Japanese food guide." Products described include: Umeboshi (2 pages): Plums pickled in brine (umeboshi). Umeboshi paste. Plum concentrate (*bainiku ekisu*). Miso (2 pages): Hatcho, waka-Hatcho, soybean, barley, brown rice, rice, and natto miso varieties. Tekka (made with Hatcho miso). Sweets made from mizu ame [rice syrup]. Nigari. Gomashio. Koji starters for various types of miso or shoyu. Goma-muso (60% barley miso and 40% whole sesame seed butter). *Gomamiso furikake* (with barley miso, whole roasted sesame seeds, and shredded nori seaweed). Kombu candy. Kokkoh. Dried tofu (*Kohya-dofu*). Brown rice sake. Mirin. Gluten cakes (*Kuruma-fu*). Seitan (Gluten cooked in shoyu). Rice crackers seasoned with tamari soy sauce. Kuzu (3 pages). Tamari and shoyu (4 pages; Johsen Shoyu is made in Sendai and tamari is made by San-jirushi Co.). Seaweeds (4 pages): Kanten, arame, hijiki, kombu, ne-kombu, nori, seasoned nori, kanten, kanten flakes, wakame, and mekabu.

Good Food brand Soy-Millet Bread (Austin, Texas, p. 120). Arrowhead Mills Bulgur-Soy Grits (p. 121). Erewhon Morning Cereal, and Infant Cereal (each containing soy beans). Chico-San Black Soybeans (imported), and Azuki Beans (Dainagon imported small red), and Lima Soy Sauce (Chico, California, p. 126-27). Arrowhead Mills 7 Grain Cereal, and Deaf Smith Crunch (granola-type cold cereal) (each contains soybeans, p. 130).

The section on pages 188-197 is titled "Soy." It lists Farm Foods Tempeh Kit, Tempeh Starter, Natural Nigari for Curding Tofu, Soyflour, Whole Cleaned Soybeans, Good for Ya Textured Vegetable Protein (Summertown, Tennessee, p. 189). New England Soy Dairy Tofu (with many tofu recipes, Greenfield, Massachusetts, p. 192-96).

The Redwood Sprouter Co. sprouter containing Soy Sprouts (1976, Austin, Texas, p. 202-04). Worthington Foods (a photo shows their line of 38 products). Millstone Burger-Like (with soy flour and TVP), Wheat Fries (with wheat gluten), Tender Cuts (with wheat protein and soy flour) (Penryn, California, p. 222-23). Sunrise Health Products Lecithin Granules (p. 274-75).

1151. Vegetarian Society of the United Kingdom Ltd. 1979. *International Vegetarian Health Food Handbook*. Altrincham, Cheshire, England. 210 p. 19 cm.

• **Summary:** Edited by Bronwen Humphreys and Derek McEwen. Contents: Introduction. Application. United Kingdom: Vegetarian societies, other societies, publications, British periodicals, general facilities, travel and holidays, restaurants, hotels and guest houses, health centres, health foods stores, organic growers.

Overseas: Vegetarian societies, publications, vegetarian food hints for Continental hotels, restaurants, hotels and guest houses, health centres. *Shopper's guide: Introduction, contents, products. Glossary of common food additives and contaminants. Index of manufacturers. Index of advertisers.* Address: Parkdale, Dunham Rd., Altrincham, Cheshire WA14 4QG, England.

1152. *Manna Bulletin*. 1979---. Serial/periodical. Meeuwenlaan 70, 1012 JK Amsterdam, Netherlands. Editor: Sjon Welters. Illust. 21 cm. [Dut]

• **Summary:** This is a magazine about natural foods, macrobiotics, and alternative lifestyles. Soyfoods Center owns Vol. 3, No. 2 (June 1979), and Vol. 4, No. 3 (autumn 1982). In the former issue, the advisors are Adelbert Nelissen and Willem de Ridder. The editors are Hans den Hoed, Wieke Nelissen, etc. The latter issue contains one article titled "Macrobiotic Economics and the Practice of Manna" (a photo shows Adelbert Nelissen, Manna director), and another titled "Fermented products, an essential supplement to a vegetarian (*plantaardig*) diet." Page 12 shows an ad for Witte Wonder Products (2 Riemerstraat 186, 2513 EZ Den Haag), producers of tofu and seitan.

Talk with Sjon Welters. 1994. April 4. He was once the editor of this publication. He thinks it stopped being published in about 1984-1985. Address: Amsterdam, Netherlands.

1153. Harmony Foods factory and warehouse (Photograph). 1980. London, England.

• **Summary:** Harmony Foods (Cobbold Road, Willesden, London NW10) was the first distributor of whole and macrobiotic foods in the UK. These four photos show the inside of their factory and warehouse in London in 1980. Gregory Sams writes (Aug. 2017): At Harmony Foods we had a stone flour mill with 3 ft. stones, a jam-making facility, a peanut butter machine, plus packing lines and a cash and

carry. 55,000 square feet in all.

Sent to Soyinfo Center by Gregory Sams 2017 April 6.
Address: Willesden, London. Phone: 01 451 3111/2.

1154. Harmony Foods. 1980. Price list. London, England. 9 p. Jan. 30 cm.

• **Summary:** The catalog is divided into Case Prices and Bulk Prices. Too many new categories to count, but the same soy products and grains are (as always) available, although a few names have changed: Shoyu soy sauce. Miso soy puree genmai. Hatcho Miso.

One page near the rear starts with this: “On November 5th 1979 after a jam and marmalade breakfast attended by members of the press, we faced Hammersmith Council at the West London Petty Sessions charged with having inadequate sugar content in Whole Earth Jams. After a long and at times, amusing hearing we were found guilty of a technical breach of jam legislation and given a conditional discharge. The jams which were the subject of the prosecution bore a label which we stopped using in March 1979 and the labels on all Whole Earth Jams now contain a consumer notice advising purchasers that they will be getting more fruit and less sugar than they would normally expect. Herewith a collage of our press clippings on the case.

“Bureaucrats put food firm in a jam. Makers of a new natural jam were ordered to take their product off the market because it doesn’t contain enough sugar.” “Pure jam that broke the law.” “Jam caught in a sticky position.”

Note: This jam went on to become the company’s first big hit, being sold in supermarkets throughout the UK and continental Europe.

Gregory K. Sams was managing director. Address: Cobbold Road, London N.W.10. Phone: 01 451 3111/2.

1155. Leviton, Richard. 1980. Soycrafters Conference: The birthing of a new industry. Director’s report: Missed all the meals. *Soycraft (Colrain, Massachusetts)* 1(2):16-23. Winter.

• **Summary:** A report on the Second Soycrafters Conference, held 26-29 July 1979 at Hampshire College, Amherst, Massachusetts. Over 50 workshops and lectures were presented on all aspects of the soyfoods industry. “Miraculously, the \$19,000 conference broke even financially, and attracted significant national press in the following three months.”

The section titled “The view from the guests” (p. 20-23) contains brief statements (all positive) about the conference from the following attendees: Luke Lukoskie (Island Spring), Rebecca Uchida (Mu Tofu Shop), Michelle Ajamian

(Amesville, Ohio), Shag Kiefer (Redbud Creek Tofu), Will Truslow (Jamaica Plain, Massachusetts), Dr. Joseph Rakosky (Rakosky Services, Melrose, Illinois), Marvel Huffman (Lecanto Tofu), Francine Watanabe (La Soyarie, Hull, Quebec, Canada), Dr. Charles Howes (Loma Linda Foods, Mt. Vernon, Ohio), Timothy Metzger (Dannon Milk Products, Long Island City, New York), Lee Cunningham (Wonder Life Corp., Des Moines, Iowa), Joseph Jaffer (Waymart, Pennsylvania), Chico Wagner (Yaupon Soyfoods), Dr. Malcolm Bourne, Frank Pilotte (Golden Key Farm, Grant Park, Illinois), David Patten (Brightsong Tofu, {Redwood Valley}, California), Patti Smith (Erewhon, Cambridge, Massachusetts), Larry Needleman (Bean Machines, Bodega, California), Peter Driscoll, Goodhart Foods (Petosky, Michigan), Bill Shurtleff (New-Age Foods Study Center), George Strayer (Agricultural Exports, Hudson, Iowa), David Blumberg (San Francisco, California), Dr. Keith Steinkraus (Cornell Univ., Ithaca, New York), Bob Bergwall (Nasoya Foods, Leominster, Massachusetts).

Photos show: (1) Overview of the conference registration hall incl. Richard Leviton talking with George Strayer. (2) Kathy Leviton adding finishing touches to large trays of tofu cheesecake. (3) A woman preparing scrambled tofu and fried soysage patties in the Hampshire College kitchens. (4) Members of Okita Enterprises and the Tennessee Farm: Charles Ishigawa, Robert Dolgin, Eddie Okita, and Michael Moorman. (5) Dr. Walter Wolf (Northern Regional Research Center, Peoria, Illinois). (6) Robert Rodale, Rodale Press, Emmaus, Pennsylvania. (7) Dr. Malcolm Bourne, Cornell University, Geneva, New York. (8) Michael Cohen, holding a baby and talking with Dr. Clifford Hesselstine.

Note: This is the earliest publication seen (Feb. 2003) that mentions Brightsong Tofu. Address: Colrain, Massachusetts.

1156. Coates, Margery K. 1980. Minutes of special meeting of board of directors of Laurelbrook Foods, Inc. Bel Air, Maryland. 1 p. March 17. Unpublished manuscript. 28 cm.
 • **Summary:** The special meeting was held in Bel Air, Maryland. The following directors, constituting a quorum, were present: Roger M. “Rod” Coates, Daniel G. Coates, Margery K. Coates. Rod, the president of the Corporation, stated that the meeting had been called to inform the board of directors that he would be retiring from Laurelbrook on his 65th birthday [23 March 1980]. He recommended to the board that he be replaced as president by Mr. N. Richard Curry and his (Rod’s) official position be chairman of the board. Mr. Coates also suggested that Mrs. Sally Sunkel be named to the board of directors. The board voted an annual salary of \$6,240 for Mr. Coates as chairman of the board. Mr. Curry informed the board that he would accept the position contingent upon a 5-year employment contract with Laurelbrook.

Note 1. Rod Coates hired Richard Curry in May 1979 as accountant and general manager. Note 2. As of 3 Oct. 1980 Dan Coates is vice president of Laurelbrook. Address: Secretary, Laurelbrook Foods, P.O. Box 47, Bel Air, Maryland 21014.

1157. *SoyaScan Notes*. 1980. How Laughing Grasshopper tofu shop (which became the New England Soy Dairy) was founded (Overview). March 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The following story was compiled from various interviews with and writings by Richard Leviton and Tom Timmins from 1977 to 1980. In 1976 Ira (Richard) Leviton and Kathy Whelan were running the successful Corncreek Whole Grain Bakery, which they had started in the spring of 1974. It was located in South Deerfield, Massachusetts, 10 miles north of Amherst, where some 25,000 students attended the University of Massachusetts and Amherst College. In Feb. 1976 an employee from Corncreek Bakery visited the Welcome Home Bakery and Tofu Shop in Corvallis, Oregon, started by Alec Evans in March 1975. He returned to tell Ira in detail how Alec made tofu in Oregon. Ira, a vegetarian, had already been eating tofu since 1970; he bought it at a local supermarket, which in turn bought it from Chinatown in Boston.

In early 1976 Ira bought *The Book of Tofu* by Shurtleff and Aoyagi, then made tofu at home several times successfully. He thought, “This would be a good second food business.” He found that the bakery’s 100 bread accounts were eager to stock tofu. But his partner, Kathy, was not very interested in the idea. Ira wrote Bill Shurtleff in mid-1976 to explain his idea and ask for advice. Ira then firmly decided to start a tofu shop during a Zen meditation sesshin on 19 July 1976. In August he rented a two-room 1,000-square-foot shop (with handsome wooden floors) at 3 Main St. in the sleepy little papermill town of Millers Falls, Massachusetts, 8 miles from the bakery. Working largely alone, he began to convert the space into a traditional, cauldron-style tofu shop.

For startup capital, Ira and Kathy together put in \$4,000 of their own funds, to which Tom Timmins added \$1,200 and Michael Cohen added \$2,000. In Sept. 1976 Ira got a \$7,500 five-year bank loan to bring the total to \$14,700. Part of this money was used to equip the shop with a large Hobart VCM-40 (Vertical Cutter-Mixer) to grind the beans, four 15-gallon stainless steel pots set over four gas burners to cook the slurry, a solid-oak apple cider press to extract the soymilk, hand-made oak curdling barrels (former cider barrels) and forming boxes, and cedar soaking barrels from a Maine lobster supply house. The “old fashioned” shop was a joy to behold—but soon proved to be a misery to work in!

On 4 Nov. 1976 Shurtleff and Aoyagi, while on a nationwide tour to introduce tofu and miso to America, visited Leviton in Massachusetts. Leviton hosted their program at his bakery and drove Shurtleff to the tofu shop

that would open in several months. A day or two later Shurtleff and Aoyagi visited Tom Timmins, in Brattleboro, Vermont. From 1973-75 Timmins had been manager of Yellow Sun Natural Foods Cooperative in Amherst, Massachusetts. This food co-op had 500 member families and was a pioneer in the organic farming movement in New England. From 1975 to 1977 he was sales manager at Llama, Toucan & Crow, a natural foods distributor in Brattleboro.

In early December, Timmins called Leviton to say that he would like to be a partner with Ira and Kathy in the new tofu shop. Timmins' wife, Judy, had started the Equinox Vegetarian Restaurant in Amherst,—which bought bread from Corncreek bakery. Timmins was soon invited to join as the third partner.

Ira, Kathy and Tom made the first batch of tofu at Laughing Grasshopper Tofu Shop on 12 January 1977, a Saturday. Initial output was 300 to 1,000 pounds a week. The young craftsmen, bypassing the traditional Japanese apprenticeship and having made tofu only five times before opening, learned as they went along, partially following instructions in a pre-publication rough draft of Shurtleff and Aoyagi's *Tofu and Soy milk Production*, and benefitting from their daily mistakes and observations.

But before long things started to go awry. Heaving the heavy pressing sacks onto their cider press, they found, required almost superhuman physical strength and conditioning; it left them exhausted and with aching backs at the end of each day. The wooden soaking and curdling barrels warped badly, began to rot, and generally were too unsanitary and too heavy to handle. The forming boxes warped and pulled apart at the seams. The pressing sacks often sprang leaks, tore open at the seams, and sprayed hot okara all over the shop and workers. The floor warped (especially after 1 month when the drains clogged permanently; the landlord had done an illegal plumbing job himself) and water dripped through the radiator pipe openings into the room below onto the landlord's stored art materials. The sheet rock walls slowly began to crumble. The landlord, who lived in the building, often showed up drunk (sometimes with a pistol) and occasionally shut off the water in the middle of production. The smell of tofu production seeped into the town library, which was in the same building, prompting complaints. Town and state health inspectors, concerned with the unsanitary conditions, kept a close eye on the operation. Nonetheless, in the process of overcoming these and many other unforeseen difficulties, the young craftsmen soon became proficient in the art of making fine nigari tofu. Timmins later remarked, "Only willpower and dedication kept us going." Ira got mononucleosis in February or March 1977 from stress and overwork, and was out for 7 weeks. Many other early tofu shops in America experienced the same types of difficulties.

The three partners hired Michael Cohen to deliver their tofu 3 times a week. Michael had just returned from The

Farm in Tennessee (there and at a satellite community of The Farm he had learned to make soyfoods) and wanted to start his own tofu shop. In Feb. 1977 the company took in Michael Cohen as the fourth partner. This combination of diverse talents proved helpful in running the business. The partners used Corncreek Bakery to develop a Tofu Pie (4½-inch diameter tofu cheesecake), which was launched in April 1977. But it was not on the market very long, since the bakery closed in Aug. 1977 due to a continuing labor dispute.

Yet despite all these problems, business was booming. At the end of its first year in business (Jan. 1978), the little company was employing ten people, each working 40 hours per 7-day week, and making over 7,000 pounds of tofu a week. They packed their tofu in plastic lined 5-gallon plastic pails, storing them overnight in a 10-by-12-foot self-built cooler. They made deliveries in their own van two to four times a week to over 100 small food stores, restaurants, and supermarkets in Boston and Western Massachusetts. With sales for the first year at an impressive \$75,000, they company was already planning a first expansion and a new image—just in time, as they were also being evicted by the landlord and town council.

In Nov. 1977 the partners incorporated the company, made Tom Timmins the top man (president), changed the name to New England Soy Dairy, raised \$45,000 of new capital, and began to move the business into a much larger building at 305 Wells St., Greenfield, Massachusetts. Production in Greenfield began on 31 Jan. 1978. In Feb. 1978 the company stopped using the name "Laughing Grasshopper" for their tofu. In Feb. 1978 the former landlord sued the company for \$35,000 but *his* lawyer dropped the suit out of embarrassment.

1158. Barton, David. 1980. Safeway goes natural. *Whole Foods (Berkeley, California)*. March.

• **Summary:** Safeway, the West Coast supermarket chain, has begun to install a natural foods section in many of its stores.

1159. Laurelbrook Foods, Inc. 1980. Product standards (Leaflet). Bel Air, Maryland. 1 p. Single sided. March 1. 28 cm.

• **Summary:** An 11-point description, with emphasis on organically grown products. Address: P.O. Box 47, Bel Air, Maryland 21014.

1160. **Product Name:** Westbrae Nigari (Bittern).

Manufacturer's Name: Westbrae Natural Foods (Distributor). Imported from Japan. Made in China (PRC).

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1980 April.

Ingredients: Incl. magnesium chloride.

Wt/Vol., Packaging, Price: 44 lb. Wholesales for \$21.60.

How Stored: Shelf stable.

New Product–Documentation: A series of 3 labels appears on Westbrae’s internal print order log: (1) “Westbrae Nigari (Bittern): for use in making tofu.” 1976. Printed with dark blue ink on light blue paper. 3.5 by 4 inches. “Made from clear seawater from which most of the tablesalt (NaCl) and water have been removed. Store tight to prevent water absorption. Net weight: 5.29 oz. (150 grams). Imported by Westbrae Natural Foods. Product of Japan. (2) “Westbrae Nigari: Bittern.” 1977. July 20. Printed brown on beige. (3) Westbrae Dried Natural Nigari (Bittern).” 1978. Jan. 26. Printed with dark blue on silver. 2¼ by 3¼ inches.

Westbrae Natural Wholesale Food Catalog. 1980. Spring. “Nigari is the mineral-rich liquid that remains after sodium-chloride (table salt) is separated from seawater. Westbrae’s natural nigari is made after the traditional methods in the salt fields of the People’s Republic of China. Used as a coagulant in making tofu.”

1161. Griffin, J. Mogador; Jeavons, John. 1980. One crop test booklet: Soybeans. Palo Alto, California: Ecology Action of the Midpeninsula. 24 + 4 p. May. Illust. 22 cm. Series: Self-Teaching Mini-Series #2. [35 ref]

• **Summary:** Contents: Introduction. The soybean. The test. Harvesting and drying the beans. Notes. Ecology action publications. This 24-page booklet, plus data sheet and log form, “contains step-by-step instructions for conducting comparative tests for spacing and yield (with optional water monitoring) for soybeans—an important protein crop. Enables one to participate in Ecology Action’s research efforts.” “Ecology Action has been researching, developing, and teaching the bio-intensive method for the past 8½ years.” This is a type of organic mini-farming. “As the late Alan Chadwick (the person who synthesized the biodynamic / French intensive methods) noted—it is not the gardener who makes the garden; but, rather, the garden that makes the gardener.”

The soybean varieties being tested are Frostbeater (available from Burpee Seed Co., Clinton, Iowa 52732), and Traverse (from Johnny’s Selected Seeds, Albion, Maine 04910). The beans are planted on 6 or 9 inch centers using a planting triangle; thus, each seed is equidistant from those around it.

The purpose of this test is to grow whole dry soybeans. An excellent yield is 13.77 lbs. per 100 square feet dry weight. However the section titled “Notes” (p. 19) states: “Once you have experienced growing soybeans, you may wish to harvest them when they are completely plump, but still *green*. This reduces the growing period by at least 30 days—and the beans are much tastier when cooked fresh like this. *Do not try to eat them raw*, however.” Address: 2225 El Camino Real, Palo Alto, CA 94306. Phone: 415/328-6752.

1162. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods America Tour: May 5 to June 10; July 25 to Aug. 3, 1980

(Log and trip report—unpublished, including Itinerary with map). Lafayette, California: New-Age Foods Study Center. Unpublished log.

• **Summary:** This trip had five purposes: (1) To introduce tempeh to America; (2) To promote the authors’ newly published *Book of Tempeh*. Harper & Row, the publisher, paid most of the trip expenses; (3) For William Shurtleff to attend the University of Illinois Short Course in Soybean Processing; (4) To visit and study soyfoods companies in America; (5) To introduce people to the many advantages of a meatless / vegetarian diet.

A photo shows: Shortly before the trip, Akiko (left) and Valerie Robertson (right) (working in the Shurtleff’s small home kitchen) “canned” many quart Mason jars of Tempeh Cacciatore to serve at the intermission of each lecture / presentation.

Includes the name and address of 37 people and organizations visited. Many of these were pioneers in the soyfoods and natural foods movement: April 25—Optimum Foods (Napa, California). April 27—David Burns (Sebastopol, CA). May 5—Jeremiah Ridenour of Monterey Bay Soyfoods (Santa Cruz, CA). May 6—Thelma Dalman, Foodservice Director for the Santa Cruz City Schools, *Monterey Peninsula Herald*, Ted & Marie Fehring (Carmel), Paula Welch Terui of Jack and the Beanstalk (Carmel Valley, CA). May 8—Al Jacobson of Garden of Eatin’, Mr. Kaye Dunham of Tumaros, Hugh Roberts of Meals for Millions. May 9—Eddie Okita of Okita Enterprises, and Noritoshi Kanai of Mutual Trading Co. (Los Angeles, CA). May 10—Kay Glass (La Cañada, CA). May 11—Frazier Farms natural foods supermarket (Escondido, CA), Bill Walton vegetarian and basketball star (San Diego, CA; we stay with Craig Wright and Andrew Salony of TriLife; they hope to market Bill Walton’s tofu under the TriLife brand). May 12—Clare Quinn of The Farm (Tucson, Arizona; her check bounced so we never got paid). May 13—Kathryn Bennett of Southwest Soyfoods (Santa Fe, New Mexico), Tracy McCallum, Taos. May 14—Leslie Wertz (Alamosa, Colorado). May 16—Stay with Christie and John Baker (Boulder, Colorado). May 17—Steve Demos of White Wave Soyfoods and Good Belly Deli. May 18—Sanford and Rebecca Greenwood of East West Center (Boulder, Colorado). May 19—Judson Harper and the low cost extrusion cooker program at Colorado State Univ., Carol Hargadine of Nupro Foods & Soywaze Tofu (Fort Collins, CO). May 21—Gale Randall of the Indonesian Tempeh Co. (Palmyra, Nebraska). May 22—David Tucker of New Pioneer Co-op Society (Iowa City). May 23—George Strayer of Edible Soy Products (Makers of Pro-Nuts, May 23) and Agricultural Exports (Hudson, and Cedar Falls, Iowa). May 24—Cedar Falls (Iowa) and Minneapolis media. May 25—Pat Aylward and Jamie Stunkard of Joy of Soy Tofu (Minneapolis, Minnesota). May 27—Richard Cihoski (Duluth, MN). May 28—Chris Burant of Bountiful Bean Plant and Jehan Ziegler of Higher Ground Cultured Foods (Madison,

Wisconsin). May 29–Danji Fukushima of Kikkoman Foods (Walworth, Wisconsin), Diane Loomans of The Magic Bean Co-op (Milwaukee, Wisconsin). May 30–Susan Dart (Lake Forest, Wisconsin), Research staff of Kraft Foods (Glenview, Illinois), Brian Schaefer of It's Natural (Evanston, Illinois). May 31–Paul Obis of *Vegetarian Times* magazine (with Brother Ron Pickarski) (Oak Park, Illinois). June 2–Lou Richard of Fearn Soya Foods, Leonard and Irene Stutman of INARI, Ltd. June 3–John Gingrich of The Soy Plant. June 4–Tim and Carol Ann Huang of Yellow Bean Trading Co. (Detroit, Michigan). June 5–Glen Blix and Charles D. Howes of Loma Linda Foods (Mt. Vernon, Ohio; furthest point east on tour). June 6–Warren Hartman of Worthington Foods (Worthington, Ohio). June 7–Mick Vissman and Bill Lutz of Hip Pocket Tofu Deli and Rain Star (Columbus, Ohio), Ed Willwerth of Soya Food Products (Cincinnati, Ohio). June 8–Jay McKinney of Simply Soyfoods (Bloomington, Indiana). June 9–Lynn Adolphson and Bob Thompson of Archer Daniels Midland Co., and Grant Smith of A.E. Staley Mfg. Co. (Decatur, Illinois). June 10-11–Les Karplus of Corn Country Foods and Strawberry Fields. June 11–William Thompson and John Santas of INTSOY (Champaign, Illinois).

During the INTSOY Short Course: July 6–We did a program hosted by Patricia Mutch at Andrews University (Berrien Springs, Michigan). July 9-13–Third Annual Soycrafters Association of North America conference was held at the University of Illinois, produced by Richard Leviton. There were 270-285 attendees, and it made good money.

People at the University of Illinois we met during the course: Dr. William Thompson, Frances Van Duyne, Harold Kauffman, John Erdman, L.S. Wei, A.I. Nelson, M.P. Steinberg, Munir Cheryan, Ted Hymowitz, Woody Yeh.

Return trip after course: July 28–Bob Davis of Light Foods (St. Louis, Missouri). July 30–James Lowrie of Iowa State University (Ames, Iowa). Aug. 2–Lake Tahoe. Aug. 4–Home in Lafayette, CA.

At most of the public classes/lectures on this trip, Shurtleff and Aoyagi served their favorite tempeh and tofu dishes. They wanted to find out how Americans liked tempeh, so they asked for a show of hands as to which the attendees liked best. The tempeh dish was usually Tempeh Cacciatore, and the results were, on average, that the tempeh was preferred by a ratio of 2 to 1 over the tofu.

On this trip, Shurtleff and Aoyagi did 27 public programs, had 28 media interviews and appearances, traveled 9,000 miles, earned \$13,000 gross income and \$8,500 net income. Address: P.O. Box 234, Lafayette, California 94549.

1163. Westbrae Natural Foods. 1980. Wholesale food catalog: Spring 1980. Emeryville, California: Westbrae. 23 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and

dark red on a tan background. Contents: Westbrae juices. Honey butters. Unsweetened spreads. Preserves. Applesauce. Nut butters (Almond butter roasted, cashew butter roasted, cashew butter raw, cashew-peanut-date butter, raw sesame tahini, toasted sesame tahini, peanut butter crunchy, peanut butter smooth, peanut butter crunchy salted, organically grown Valencia peanut butter crunchy). Cereals (mostly granola, incl. cashew granola, maple almond granola).

Trail mixes: Bay to Breakers trail mix (with sunflower seeds and Valencia peanuts, both roasted and coated with shoyu), Chisholm trail mix (with sunflower seeds, cashew pieces, and almonds, each roasted and coated with shoyu).

Roasted nuts (bulk, 12-25 lb; * = 9 oz package also available): Tamari almonds*, Tamari cashews*, Tamari Chisholm mix*, Tamari Valencia peanuts, Tamari pepitas (pumpkin seeds), Tamari sunflower seeds*, Tamari nutroaster's mix*, Deluxe tamari nut mix, roasted Spanish [peanuts] splits for butter stock, roasted Valencia peanuts. Packaged nuts.

Wholegrain pasta (incl. Soy linguini). Westbrae miso (imported from Japan): Red miso, brown rice miso, barley miso, Hacho miso, soybean miso, natto miso. Cold Mountain miso (made in Los Angeles): Light yellow, mellow white, red. Sea vegetables: Kombu, hijiki, arame, wakame, nori. Atlantic Mariculture dulse.

Westbrae tamari and other Asian foods: Johsen shoyu-tamari, Traditional (true) tamari–wheat free, White tiger tofu sauce, natural nigari, agar flakes and sticks, umeboshi salt plums, rice wine vinegar, brown rice wine vinegar, ramen with soup stock.

Helpful tools (incl. Learning Tree tofu kit, wok, vegetable steamers, vegetable brush, utility knife).

Informational pamphlets: What is miso? What is tofu?

Miscellaneous (incl. falafel mix, tabouleh mix, Ak Mak crackers, sea salt, mayonnaise, black spiced olives, kosher dill pickles). Oils. Sweeteners. Bakery products. Dried fruit. Beans (incl. azuki beans, soybeans). Grains. Nuts and seeds. Non edible (drums, jars, and bottles). Glossary of manufactured products showing ingredients. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1164. Klein, Pamela. 1980. Soy Plant finds room to sprout. *Ann Arbor News (Michigan)*. June 8. p. F-10.

• **Summary:** The Soy Plant has grown rapidly during its three years in Ann Arbor. It began when several people joined to make several hundred pounds of tofu a week in the basement of Eden's Deli at 330 Maynard Street. The 15 to 20 members of the Soy Plant Cooperative, now located at 211 East Ann Street, are about to relocate their production facility to 771 Airport Road what they say may be the best tofu production plant in the country. Producing 1,500 pounds of tofu a day, they have outgrown their present quarters.

Walt Rogaczewski says The Soy Plant plans to enlarge its deli at 211 East Ann St. after the production equipment is moved to the new location, and eventually hopes to operate a restaurant there when next-door The Herb Shop moves. The aim of the restaurant and deli are to educate the public on the virtues of tofu.

Photos by Larry E. Wright show: (1) Jean Raubar and Walt Rogaczewski [later Wally Rogers] taking orders for tofu. Wally is wearing a T-shirt with “Yay soybeans” written across the front. (2) Bob Schroeder pressing out soymilk. (3) ... then pouring the soymilk into containers. (4) John Gingrich cutting a large block of tofu into squares.

A sidebar titled “An introduction to tofu,” by Pamela Klein describes how tofu is made and gives three recipes: Scrambled tofu & eggs. Tofu rollups. Tofu lemon cream pie (dairy free). Address: Business-Labor reporter.

1165. Boyd, Billy Ray. 1980. Tofu in the public schools: Santa Cruz’s Thelma Dalman introduces a natural foods lunch program. *East West Journal*. June. p. 46-50.

• **Summary:** For over 20 years Thelma Dalman has been head of the school lunch program in Santa Cruz, California, schools. As early as 1970, the program was running its own bakery, producing whole-grain breads and pastries. In 1972 Dalman eliminated practically all chemical additives from the school lunches. In 1975 sugar was also eliminated. In Sept. 1978 a vegetarian alternative was instituted (about 8% of elementary students now take that option) and in Oct. 1978 tofu was introduced into the kids’ diet in a limited way. “The result is what is perhaps the most progressive school lunch program in the nation, and all without any added burden to the taxpayer.

Today tofu is used increasingly in the program, but it still may not be used to meet the meal requirements of the Type A lunch. So Dalman went to the USDA with a proposal to do a pilot program using tofu in school lunches, but funding was denied. Dalman feels frustrated, and believes that the USDA is not fully meeting the mandates of school lunch legislation. According to a Roper Poll there are almost 7 million individuals in America eating whole foods instead of meat and another 37 million “cautious” about the amount of meat they eat. Two photos by Susan Hillyard show Thelma Dalman, the “Tofu Queen.” Address: Santa Cruz and Honolulu.

1166. **Product Name:** Living Tempeh Starter [Kit Size 15 x 60 mm Petri dish, or Professional Size 15 x 100 mm Petri dish], Koji Starter for Miso (40 gm) [Light Rice, Red Rice, Barley, or Soybean Koji], Shoyu Koji Starter (60 gm), Natural Nigari (Tofu Coagulant).

Manufacturer’s Name: GEM Cultures.

Manufacturer’s Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.

Date of Introduction: 1980 June.

New Product–Documentation: Article and ad in Soyfoods. 1980. Summer. p. 4-5. “New Source of Tempeh Starter.” “Gordon McBride, PhD, former manager of the Living Culture Department at Ann Arbor Biological Center [Inc. in Michigan], and his wife, Betty Stechmeyer, B.S., announced the formation of GEM Cultures, which will provide high-quality tempeh starter cultures at reasonable prices.”

Letter and catalog from GEM Cultures to Tempeh producers. 1980. July. Offers a free sample of professional size Living Tempeh Starter (a pure culture of *Rhizopus oligosporus*).

Shurtleff & Aoyagi. 1985. History of Tempeh. p. 55. This starter, sold live, was grown on agar in petri dishes.

Letter from Betty L. Stechmeyer of GEM Cultures. 1991. Oct. 18. These four basic products were introduced in June 1980. For a while, they tried to import commercial shoyu and miso cultures from Nihon Jozo Kogyo but it never worked, so they ended up ordering via Mitoku.

1167. Nichols, Joel D. 1980. Ask that doctor: What happened at the Owensboro National NFA Convention. *Natural Food and Farming (Atlanta, Texas)*. June. p. 12.

• **Summary:** “Answer: The recent NFA convention in Owensboro may well have marked a turning point in the history of NFA. Solutions to some of the problems were found and the ground work necessary to insure the continued growth and influence of NFA was established.

“Mrs. Irma Hooks of Tomball, Texas was re-elected president. Devin Garrity was re-elected first vice-president. Other vice-presidents elected were Dr. H. W. Holderby, Dr. Robert Reisinger, George Bockel, Hugh Paddock and Robert Stickle. I was reelected chairman of the board. These officers make up the executive committee of NFA. Martha Andrews was re-elected secretary/ treasurer.

“The programs at the NFA National Conventions are always great. This year was certainly no exception.”

Note: The first natural foods movement in the USA is still alive and having annual national conventions. Address: M.D.

1168. Nolan, Tom. 1980. The health-food restaurateur who decided to be God: Retrospect. *Los Angeles (City Magazine, Beverly Hills)*. June. p. 128-40.

• **Summary:** A good biography of Jim Baker. The first health food restaurant started by Jim Baker (an ex-marine) and his second wife, Elaine, was the Aware Inn, which opened in 1958 in the heart of the Sunset Strip in Hollywood. The first customer to “wander in” was Greta Garbo, and she proved to be an omen.” She was followed by Anthony Perkins, Steve McQueen, Warren Beatty, Paul Newman, even Marlon Brando. Cardini invented the Caesar Salad; Baker hired his daughter, Rosa Cardini, to develop his salad dressings. He bottled them and sold them in health food stores. Baker became a local celebrity.

His second restaurant, also named the Aware Inn, opened in Sherman Oaks. He sold it to his friend Al Kaiser.

Then Baker, who knew judo, killed a man with his bare hands. He had gotten involved with some woman. Her ex-husband got upset, and came over to Baker's place with a gun. A shot was fired and the ex-husband was killed. Baker was convicted of manslaughter, but the charges were later dismissed.

After his release [from jail], he opened another restaurant, the Old World, just a block east of the Aware Inn on Sunset Boulevard in Hollywood. It was conceived as a relaxing lunchtime oasis, where inexpensive, short-order organic food would be served in a French country-inn atmosphere.

He took some time off, then in the late 1960s he opened The Source, his first solo venture, a vegetarian, organic restaurant which drew in the new rock n' roll people as well as the movie crowd; it was "one big party." John Sebastian, Donovan, Bob Dylan, Julie Christie, Crosby, Stills Nash & Young, and Joanie Mitchell.

Then everything changed when he met and became a disciple of Yogi Bhaajan, the Sikh guru, who arrived in Los Angeles in 1969. Religious pamphlets began to appear on the tables, and meditative music appeared on the stereo. Then he moved en masse to Hawaii with his spiritual family. In 1974 Baker sold The Source, On 25 Aug. 1975 Baker died in a hang gliding accident off a cliff at Koolau Ridge, Makapuu Point, Oahu, Hawaii.

Photos show: (1) Baker in his 30s. (2) Baker in 1972 as Father Yod, looking like God is supposed to. (3) The symbol outside The Source Restaurant. (4) Baker in long hair seated next to a smiling woman

Talk with Akasha Richmond of Los Angeles. 2004. March 25. Her friend Richard Glasser (Baba Singh Khalsa), a disciple of Yogi Bhaajan, ate at The Source. A scene from the Woody Allen movie *Annie Hall* was shot there. After about a year, Baker left Yogi Bhaajan, grew his hair long, grew a beard, and became a swami/guru himself, with his own cult following—which included at least 12 lovely young ladies who lived with him in a house in Hollywood. They called him "Father." Address: Los Angeles, California.

1169. Potter, Michael. 1980. Certificate of change of registered office and/or change of resident agent: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 2 p. June 4. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc. The address of the registered office is 4601 Platt Road, Ann Arbor, Michigan 48104.

The name of the former resident agent is Timothy Redmond. The name of the successor resident agent is Michael Potter. Signed by Michael Potter, President, 4 June 1980. Filed by the Michigan Dep. of Commerce on 17 June

1980. Address: President, Ann Arbor, Michigan.

1170. *Soyfoods*. 1980-1984. Serial/periodical. 100 Heath Rd., Colrain, MA 01340 USA. Richard Leviton, editor and publisher. Vol. 1, No. 3. Summer 1980. Quarterly magazine. • **Summary:** Continues *Soycraft*, which was also edited and published by Richard Leviton (of Colrain, Massachusetts). This high-quality periodical is the world's first to have the word "soyfoods" in the title. The first four issues bore the subtitle *The Journal of the Soycrafters Association of North America* on the cover and title page. This was discontinued with issue No. 5 (summer 1981) because of lack of financial support from SANA; it became Leviton's private venture. Only eight issues were published between summer 1980 and August (summer issue) 1984. Leviton wrote most of the articles, sold the ads, and arranged and paid for the publishing of all issues except the last. Doug Fiske (of Encinitas, California) took charge of the last issue, then sold the magazine to Paul Obis, then owner of *Vegetarian Times*. Paul never published any issues. Address: Colrain, Massachusetts.

1171. Ney, Tom. 1980. Rodale Test Kitchens: Soyfoods for the American menu. *Soyfoods* 1(3):10-11. Summer. Address: Director, Test Kitchens, Rodale Press, Inc., 343 E. Minor St., Emmaus, Pennsylvania 18049.

1172. *North Adams Transcript (North Adams, Massachusetts)*. 1980. Buck is market rep at B. gas. Aug. 11. p. 4.

• **Summary:** North Adams—Richard Buck is now employed by the Berkshire Gas Company as a Propane Marketing Representative for the company's Berk-Gas Division.

Mr. Buck, who founded Cornucopia Natural Foods in July 1976 in Pittsfield, will be responsible for the sale of propane as well as gas appliances to residential accounts throughout Berkshire County.

"He is a graduate of Pittsfield High School and Boston University, where he received a Bachelor's degree in sociology. He lives at 374 West Housatonic St. in Pittsfield with his wife Ann Marie."

A portrait photo shows Richard B. Buck. Is he wearing a Sikh or Sufi turban?

1173. Arrowhead Mills, Inc. 1980. This is Arrowhead Mills' promise (Ad). *Health Foods Retailing* 44(8):104-05. Aug. • **Summary:** A two page black and white ad. "To provide our customers with the purest and tastiest natural health food available. Arrowhead mills will continue to work with nature to provide a line of natural foods without preservatives, artificial flavoring or coloring... products that for two decades have been considered the standard of quality in the industry."

Illustrations show Arrowhead Mills brand products, which include: Whole grain wheat, Stone ground whole

wheat bread mix, Strawberry jam, Safflower oil, Bear mush (milled from wheat), Apple butter, Multigrain corn bread mix, 7 grain cereal, Apple butter, and Peanut butter. One Simpler Life brand product is Yellow corn (in a can, 4 lb, 11 oz). One Olde Mill product is Stone ground whole wheat flour.

The Arrowhead logo shows a basket holding sheaves of grain. "We treat food with respect, not chemicals." Address: Hereford, Texas 79405.

1174. Chico-San, Inc. 1980. Good things come naturally from Chico-San (Ad). *Health Foods Retailing* 44(8):139. Aug.

• **Summary:** A photo shows Chico-San's products. Next to each is a brief description. New Rice Nuggets. New Carob Rice Cakes. Rice cakes. Yinnies taffy and caramel candies. Yinnies rice syrup. Lima soy sauce (A traditional, natural shoyu, made from whole soy beans and pure well water).

"Chico-San products are all natural. No preservatives. Nothing artificial." Chico-San's spiral logo appears on each product. Address: Chico, California 95927.

1175. Conte, Mary. ed. 1980. Balanced Foods' 40th anniversary. *Health Foods Retailing* 44(8):99-226. Aug. Special supplement / section.

• **Summary:** This is the "Official Magazine of the National Nutritional Foods Association." Much of this issue of the magazine is devoted to an excellent special section that celebrates the 40th anniversary of Balanced Foods, Inc. [BF] (700 Grand Ave., Ridgefield, NJ 07657. Phone: (201) 943-5500), pioneer health food distributor. Ads on many of the pages congratulate the company and express thanks for all it has done for the health food industry.

Contents: A family of [five] companies: The finest health food distributors, sell all leading national lines (ad, p. 100). We're celebrating our 40th! A short letter of thanks from Samuel H. Reiser to health food manufacturers, other jobbers, and especially retailers ("... we are once again on the threshold of an exciting new era in our industry," p. 101). Table of contents: Balanced Foods at forty (p. 106). An overview. Nostalgia: Tribute to two founders: "Doc" Shefferman and William "Will" Reiser. Growth. Management. Balanced Foods 1980: New Jersey, Northwest, Akin-Tulsa (Oklahoma), Akin-Jacksonville (Florida), Midwest. Computerization. Special services. Private label. Legal battles. Progressive warehousing. Balanced Foods checklist. Adapt and change. Tribute.

Photos related to Balanced Foods show: "Doc" Shefferman, William Reiser, and Samuel H. Reiser (p. 108, 122, 128, 226). Balanced Foods' display at early convention (p. 118). Inside the BF warehouse in New York city in the early days (p. 131). A portion of the old offices on West 4th St., New York City (p. 138). Individual portrait photos of Sam Reiser, John Reiser, Rhona ("Ronnie") Reiser (p. 142-

44). Employees at Ridgefield, New Jersey (incl. Sol Wilson, p. 146-47). Employees and warehouse at Northwest Dietetic in Kent, Washington (incl. John (Jack) Vogt, Sr., p. 148-49). Russ Meyer, President of Akin, in Tulsa, Oklahoma (p. 151). Employees and warehouse at Akin in Jacksonville, Florida, (incl. Martin Joffe, president, and Dick Whelan, general manager, p. 152-53). Employees and warehouse at Midwest Natural Foods in Ann Arbor, Michigan (incl. Steve Giordano, president, and David Rock, VP and general manager, p. 154-55). The computer room (incl. Ed Sands, Arnold Lang, p. 156-58). Special services (incl. Doug Braun and John Reiser, p. 159, 200). Warehouse personnel (p. 163-64). San Reiser (p. 167). Retailers Vic Boff and Ron Camp (p. 169). Howard Inches, one of the first lecturers to promote his own line with product demonstrations (p. 174). Attorney Milton Bass (p. 181). Frank Brassington, asst. to Sam Reiser (p. 192). Inside the BF warehouse (p. 208, 210, 220). Fred Boneri, former warehouse manager (p. 212). Calvin Tynes, BF's first full-time truck driver (p. 214). Marty Lerner (asst. Warehouse manager, p. 218). Midwest Natural.

1176. Conte, Mary. ed. 1980. Balanced Foods' 40th anniversary: Chronology. *Health Foods Retailing* 44(8):99-226. Aug. Special supplement / section.

• **Summary:** 1939-Balanced Foods (BF) is founded in New York City by "Doc" Shefferman, Samuel Reiser, and his brother Will Reiser. Its first location was in Manhattan (New York City) at 100 Fifth Avenue [between 15th and 16th streets] on the 17th floor of an office building. "Doc" Shefferman "had a degree in naturopathy and always advocated the benefits of good diet and nutrition. He was an associate editor for *Nature's Path* [published by Benedict Lust] and also wrote for *Better Nutrition* and *Health Foods Retailing*. 'Doc' authored *Foods for Longer Living* [1956], a well-received book on health and nutrition, and even found time to teach classes at the Lust College of Chiropractics... An early advocate of nutritious eating and a balanced diet, he was truly one of the industry's pioneers. He helped found the NNFA and was an active member of PELLL." He was "a gallant and gentle man who embodied the highest ideals of integrity, honesty and fairness." Sam and Bill Reiser were fresh out of college. American was in the midst of the Great Depression.

Sam Reiser recalls (p. 118, 122, 128, 182): "Balanced Foods was so small in the beginning that it was almost impossible to describe it as a business. Health foods was an infant industry. Everybody knew everybody in the industry. All the store owners went into it not to make money, not as a business, but to make health foods available to as many people as possible. But they frequently didn't know too much about business, or how to run a store, or manage finances." When Balanced Foods first started there were three health food stores "in New York City, one in Brooklyn, one in the Bronx—two in New Jersey, three in Philadelphia—

perhaps 100 from Maine to Florida.” “Doc” Shefferman “knew the industry intimately. He understood nutrition, was familiar with the products, and had been involved with health food lecturers and publications for 20 years. It’s amazing how well the three of us worked together. We complemented each other. We each respected the other’s talents and abilities.” “We worked seven days a week for 15 to 18 hours a day.” “Our first year in business we lost money. But from then on we grew little by little. It was a very rough struggle. Then came the war [World War II]. We were locked in with a lack of money. There was a shortage of merchandise and everybody wanted cash payments and cash was scarce.” “Government quotas, which were based on the previous year’s sales, were placed on many items... It was a very, very difficult period.”

“Maurice ‘Doc’ Shefferman was a very quiet and dynamic man, noted for his quick wit, gentle humor and a great waxed mustache. It was his business acumen and knowledge of the health food industry that helped shape the basic philosophy of BF, Inc.; to provide special dealer services; offer quality products; and set a distributor standard—and select products to live up to it.” “Doc was also an accomplished musician and singer; he often performed on radio in a trio.”

1940—Helen Hollinger joins BF as a bookkeeper.

1941 or 1942—BF moves across the street to 79 Fifth Avenue to get more space. “At that time orders were shipped via public carrier. Costs were 15 cents for 100 pounds, local, and 50 to 75 cents for ‘over the road’ destinations like Washington, D.C. and Pennsylvania. During this time dietetic foods boomed. People went to health food stores primarily for sugar-free and salt-free products.”

1942—Balanced Foods starts to carry the original vitamin pills. “When vitamins first came out, they were strictly a health food item. When health food stores started doing well with them, the drug and department stores got into the field and took away the business completely... Only with the advent of Schiff and their natural vitamin line did we get back into the category” (Sam Reiser, p. 174).

1943—BF makes a big move into a 10,000 square foot loft at 304 East 64th Street in Manhattan.

1940s and 1950s—These are the days of the lecturer. They traveled around the USA, educated people, and promoted their own line of health food products. “They were great showmen.” “After the lectures people would buy from the health food stores.”

1947—Calvin Tynes becomes BF’s first full-time truck driver, driving the company’s the 1936 Ford delivery truck.

1951—BF moves into a new warehouse at 700 Broadway, a spacious two-level structure with offices on a mezzanine overlooking the warehouse floor; there was also a basement. The company remained here for 16 years.

1955 June 23—Balance Foods, defended by Milton Bass, wins an important lawsuit brought against it by the federal

government.

1960-1965—90% of BF’s business is now diet foods. Eventually most of that business went to the supermarkets.

1964 Nov. 14—Balanced Foods wins a second lawsuit (brought against it by the FDA) concerning the sale of books that promote certain products.

1967—BF moves to North Bergen, New Jersey, into a 50,000 square foot space in a giant 400,000 square foot warehouse. “Doc,” Sam and Will and a handful of employees pack up the entire operation and made the move together. “As BF grew bigger and bigger it expanded simply by extending its space in the building. It also hooked into the warehouse’s computer system.

1972—BF begins to expand into a national distributor by acquiring Northwest Dietetic in Kent, Washington—a suburb of Seattle—its first such acquisition.

1974—“Doc” Shefferman dies.

1975—BF expands further by acquiring Akin in Jacksonville, Florida and Tulsa, Oklahoma.

1977—William “Will” Reiser dies.

1977—BF moves into its own completely air conditioned public warehouse located in North Bergen, New Jersey, several blocks from the previous one. With this move, warehouse and office operations were geographically split; the warehouse (new) was located in North Bergen just three miles from the offices at 700 Grand Ave. in Ridgefield, New Jersey. Note: The offices were later moved to the same building as the warehouse. As of 1980: “Over 30 employees bustle about in the 10,000 square foot office, which is 10 times larger than the company’s first office and warehouse combined.

1978—BF expands further by acquiring Midwest Natural Foods in Ann Arbor, Michigan.

1980 (today)—There are 7,500 retail stores nationwide and Balanced Foods with its affiliates sells to most of them. Of the 3 founders, only Sam Reiser is still living “to talk about the dream. But then its no longer just a dream. Now health foods is a thriving industry and Balanced Foods is the biggest health food jobber in America” (p. 114).

1177. Conte, Mary. ed. 1980. Balanced Foods’ 40th anniversary. Ads. *Health Foods Retailing* 44(8):99-226. Aug. Special supplement / section.

• **Summary:** Continued: There are ads (mostly full page) from the following companies: Balanced Foods: A family of [five] companies (p. 100). KAL (Canoga Park, California, p. 102). Nature’s Gate Herbal Cosmetics (Chatsworth, CA, p. 103). Arrowhead Mills, Inc. (Hereford, Texas, p. 104-05). Hoffman’s Food Products (York, Pennsylvania, p. 107). Schiff (p. 109). • **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1184. Ferretti, Fred. 1980. Brown rice and whole grain at Amherst. *New York Times*. Sept. 3. p. C1.

• **Summary:** The macrobiotic community’s sixth annual conference on holistic health and natural living, was recently held at Amherst College in Amherst, Massachusetts. Sponsored by the East West Foundation of Boston, it was titled “Humanity in the ‘80s.” Michio Kushi, founder and president of the foundation, conducted weekly seminars during the week-long conference. He gave the attendance at 400 people.

Participants lived in dormitories, ate macrobiotic meals such as brown rice, vegetables and whole-grain bread baked in college kitchens, took part in Zen meditation, yoga, and aikido in the morning, in natural food selection and preparation and shiatsu massage in the afternoon, and in various symposiums (ranging from cancer prevention and cure to family health) in the evening.

The food was vegetarian and free of mucous-forming foods; such a diet is seen as one aspect of holism and the holistic lifestyle, which is need to recover our natural balance. This diet is said to be the key to total cleansing of body and mind. Dishes included miso soup, seitan cutlets, dried seaweed, and soy-flavored potato chips.

Ken Burns, age 45, who used to teach political science, taught participants how to gather wild, edible, nourishing weeds.

Dr. Anthony J. Sattilaro, president of the Methodist of the Methodist hospital in Philadelphia, described his recovery from bone cancer in several parts of his body. The cancer “had been arrested and cured, as a result, he believed, of faithful adherence to a macrobiotic diet.” After 17 months the cancer had vanished, without use of the conventional therapy of estrogen hormones.

A photo shows Aveline Kushi preparing a special dish.

1185. Rucker, Ellie. 1980. Mother’s milk drive in need of donations. *Austin-American Statesman* (Austin, Texas). Sept. 12. Life/style section. p. C1.

• **Summary:** “And thanks to other readers we now know Herbs, Etc. carries it as well as Safeway Foods. They sell it under the name ‘annatto.’

“P.S. Don’t look for Safeway Foods at the same location; they’ve moved to the corner of 10th and Lamar [in Austin] and the new name is Whole Foods Market.”

Note: This is the earliest document seen that mentions “Whole Foods Market.”

1186. Kushi, Michio. 1980. Re: Thoughts on phasing out use of the word “tamari” to refer to naturally fermented shoyu. Letter to William Shurtleff at Soyfoods Center, Sept. 13. 1 p. Typed, with signature.

• **Summary:** “Dear Bill, I have noted your article entitled ‘In Search of the Real Tamari’ in *Soyfoods* magazine, together with your letter addressed to Jeff and John, in connection with the name tamari.

“It is well understandable that you suggest to terminate the word ‘tamari’ in order to distinguish between real tamari and naturally fermented soy sauce. This problem involves a variety of issues, due to the fact that several million people in western countries already have been familiarized with the name of tamari soy sauce, as the words identifying naturally fermented soy sauce. More than twenty distributors in western countries and more than three hundred educational centers in America, South America, and Europe have been using this name for the past years and also currently through various publications. The problem of reorientation of the name would bring a great confusion, unless it is dealt with carefully and on a gradual basis.

“At any rate, I appreciate your suggestion and continuous contributions for the introduction of essential products in the area of food.

“Peace, Michio Kushi.

“akr; cc. Jeff Flasher [of Erewhon].” Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

1187. Belleme, John. 1980. Re: Building a miso factory in North Carolina. Pasteurizing miso and selling dry koji. Letter to William Shurtleff at Soyfoods Center, Sept. 29. 2 p. Typed, without signature or letterhead.

• **Summary:** “Our miso project is going quite well. This summer I located the remaining equipment in New Jersey and ordered our vats from Arrow Tank Co. in Buffalo [New York]. The owner is stone deaf; it was an interesting afternoon.

“We are now leveling the site for the miso factory. It’s going to be one of those metal Butler buildings, about 4,000-sq-feet. Besides the miso project, we are working on other projects such as building a structure for summer camps, shiitake mushroom farming, and preparing our land for growing soybeans. There’s just Jan. and I, so our hands are full.”

While in Japan, John noticed that Mr. Onozaki’s wife

and most older traditional people never boil their miso soup. “People go out of their way to buy Mr. Onozaki’s unpasteurized miso. These people believe that there is a very beneficial bacteria in miso which is killed by heat. More specifically, old people in rural Japan strongly feel that if you smoke, it is best to drink unpasteurized miso every day.

“On the other hand, the people at Sendai [Miso Shoyu Co.] and Michio [Kushi] believe this is nonsense. I have great faith in the wisdom of tradition. People that live close to the earth do not waste their time if not for good reason. Also, the people at Sendai pasteurize all exported miso, much of which is sold by Erewhon.” John asks Shurtleff’s opinion on these matters.

John would like to sell some of the koji he makes as dry koji. He asks how to dry it and the effect of drying on the enzyme activity of the koji. “Finally, do you know anything about the nutritional benefits of koji in making amasake or pickles?”

Talk with John Belleme. 1980. Oct. 3. The rebuilt cypress vats are 7 feet tall and 5 feet in diameter. Each costs \$1,000 with stainless steel hoops. John is deeply interested in macrobiotics.

Note: Rutherfordton, North Carolina, is located in the beautiful Blue Ridge Mountains of western North Carolina. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

1188. Photographs of soynuts taken at New-age Foods Study Center in Lafayette, California. 1980. Sept.

• **Summary:** (1) Carob-coated soynuts held in cupped hands. (2) Three packets (and flavors) of Soy Town Roasted Soy Beans (Barbecue, Salted, and Garlic). (3) Soynuts used as a topping for mainstream commercial cookies. (4) Five packets (and flavors) of Whole Roasted Soy Nuts, made by INARI, Ltd. of Lansing, Michigan. (5) Bulk Soy-Nuts at Westbrae Natural Foods in Berkeley, California.

1189. Goodbrad, John. 1980. Re: Soy products made by Sovex Natural Foods, Inc., “The Granola People.” Letter to William Shurtleff at New-Age Foods Study Center, Oct. 23. 1 p. Typed, with signature.

• **Summary:** “A couple of months ago, we received a form letter from you indicating interest in what we produce primarily from soy products.

“Under separate cover we are sending you a package of our Prothin Snack Chips, Vege-Pat Sausage flavor, Vege-Pat Burger flavor, and Chili.

“If these meet with your definition of soy foods, please drop us a line and we will give you additional information about these products. Yours truly, John Goodbrad, President.” Address: President, Sovex Natural Foods, Inc., Box 310, Collegedale, Tennessee 37315. Phone: 615-396-3145.

• **Summary:** Black on white (photocopied). Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

1193. Business Trend Analysts, Inc. 1980. The health and natural food market: An analysis of current performance & future prospects. Dix Hills, New York. viii + 234 p. Oct. No index. 28 cm. Spiral bound. Project director: Amadee Bender. [9 ref]

• **Summary:** Section 12 (p. 85-113) of this study is titled "Soyfoods & Other Soy Products." It consists largely of statistics compiled by the Soyfoods Center and Soycrafters Association of North America. On pages 95-110 is published, without permission, complete lists of all U.S. tofu shops, tempeh shops, and miso and koji manufacturers from books copyrighted by Shurtleff and Aoyagi. Acknowledgement of the source of all this information is given only at the bottom of tables, on the last page of the plagiarized list of manufacturers, and in Appendix 6, page 234. No permission was obtained from the Soyfoods Center to use any of this material.

On page 113 is a table on U.S. lecithin production from 1976 to 1979, based partly on U.S. Census figures. Production averaged about 60 million lb/year, worth \$19 to \$23 million. The estimated percentage consumed for health purposes rose from a estimated 2.5% worth \$500,000 in 1976 to an estimated 5.5% worth \$1.3 million in 1979.

Page 232 lists the largest health food wholesalers in the USA: Balanced Foods Inc. (Ridgefield, New Jersey), Landstrom Distributing (San Francisco, California), Erewhon, Inc. (Cambridge, Massachusetts), Health Foods

Inc. (Des Plaines, Illinois), Kahan & Lessin Co. (Compton, California), Nature's Best (Torrance, California), and Tree of Life Inc. (St. Augustine, Florida). Address: Dix Hills, New York.

1194. Erewhon, Inc. 1980. Erewhon quarterly-winter 1980-1981. Over 100 new products [mail order catalog]. Cambridge, Massachusetts. 82 p. Oct. Catalog and price list.

• **Summary:** This is a new type of Erewhon mail order catalog; it is to be issued quarterly, it is from the new warehouse at 3 East St. in Cambridge, and it signals a dramatic increase in the number of products being sold by Erewhon.

On the front cover is a brown and white photo of an old mill and mill pond. Address: 3 East Street, Cambridge, Massachusetts 02141. Phone: (617) 354-2001.

1195. *Lakeland Ledger (Florida)*. 1980. General Mills announces purchase of Good Earth restaurant chain. Nov. 8. p. 7C.

• **Summary:** "Minneapolis-General Mills Inc. said Friday it has acquired Good Earth Restaurants Inc., a privately held group headquartered in San Diego [California]. Terms were not disclosed.

"Good Earth has 15 restaurants in California, Arizona, Colorado and Minnesota." They serve whole-grain baked goods, fresh fruits and vegetables.

General Mills already has a restaurant group which, in fiscal 1980, accounted for \$526 million of General Mills' \$4.2 billion in sales.

Note: Some of the restaurants have a bakery in the restaurant.

1196. Goodbrad, John. 1980. History of Sovex Natural Foods, Inc. and other small Adventist food companies (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 26. 1 p. transcript.

• **Summary:** Sovex is a private company. John and his wife are Seventh-day Adventists, as are many of the company's employees. John worked at the Boulder Sanitarium (also called the "San," in Boulder, Colorado) from 1947 to 1953; the Sanitarium owned 8 health food stores and he was in charge of them. During the time he was in Boulder, the Sanitarium did not manufacture any foods; they had already gotten out of that business.

Then he went to work for Collegedale Distributors (in Collegedale, Tennessee), which was owned by Southern Missionary College. They made, and still make, granola.

Sovex was founded in 1953 by the Hurlingers in Holly, Michigan. The company's original product was Sovex, a flavor concentrate paste, made from a mixture of brewer's yeast and soy sauce. In 1964 John bought the business and moved it to Collegedale, Tennessee, where he worked.

In 1981 Sovex products containing soy include Prothin

Snack Chips, Vege-Pat (textured soy flour, in sausage, burger, and chili flavors), and Granola (their main product line, in nine flavors, many of which contain soy grits).

Sovex had no relationship with Madison Foods (of Madison, Tennessee). Madison was one of the pioneers in the meat substitute field. They were purchased by Worthington Foods, which phased out the Madison products. John has eaten Madison products on and off for over 50 years, but has had no direct contact with them for a number of years. John has a copy of *Back to Eden*, autographed by Jethro Kloss.

A Mr. White, who was a grandson of Ellen G. White, had a super soymilk recipe about 20 years ago. He started with soy flour, ran it through an homogenizer, then sweetened it with honey. People loved the flavor; it was fresh, not canned. He called it Nu-Milk and made it on the sly at the Southern Missionary College dairy in Collegedale, Tennessee. It was illegal because there are laws against putting anything but milk in a milk processing plant.

John just talked with Frank Miller (phone: 817-641-8343), who used to work for Madison Foods and who now owns Texas Protein Products, a company that sells TVP in Texas. Another key man was Bruce Stepanske, who made soymilk at Madison until it was discontinued. Address: President, Sovex Natural Foods, Inc., Box 310, Collegedale, Tennessee 37315. Phone: 615-396-3145 (or 2111).

1197. McKnight, Jack. 1980. Food: Cider preserved. *Boston Globe Magazine*. Nov. 30. Photos by Elizabeth McKnight.
 • **Summary:** Willis and Tina Wood make apple cider jelly on their 67-acre farm in Weathersfield, Vermont. They produce 12 tons of the dark, tart-tasting jelly each fall using a 100-year old family recipe. They started making cider jelly on this farm in 1882 and for a while they were the only people in the world making it. Erewhon in Boston is one of their biggest distributors. The product is totally natural, with no additives. It's just pure, concentrated apple juice. Address: Massachusetts.

1198. *SoyaScan Notes*. 1980. Chronology of soybeans, soyfoods and natural foods in the United States 1980 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 4. An embargo on the sale of grain to the USSR is announced by President Carter in retaliation for the Soviet invasion of Afghanistan. Though the embargo was lifted in 1981, it led to a subsequent reduction on Soviet purchases of U.S. soybeans and products.

Feb. Second issue of *Soycraft* magazine published by Leviton. 5,000 copies. On Shurtleff's suggestion, Leviton decides to change the magazine's name to *Soyfoods* in future issues. Feb. By now *Soycraft* magazine and the Soyfoods Association of North America (SANA) are subscribing to a press slipping service (probably Luce). This subscription continues until early 2001.

Feb. New England Soy Dairy holds a big press conference and soyfoods luncheon in Boston.

Feb. First statistics on the size of the U.S. soyfoods industry and market published by SANA (Soyfoods Association of North America) and The Soyfoods Center.

Feb. Plenty, a Third World development and relief organization run by The Farm in Tennessee, works with the people of Solola, Guatemala to open a solar-heated soy dairy. They make tofu and soy ice cream. Partial funding comes from Canadian International Development Agency (CIDA). A promising, original concept and model for taking soybeans and soyfoods to Third World countries.

March 10. *Tempeh Production* by Shurtleff and Aoyagi published by The Soyfoods Center (176 p., 8½ x 11 inches).

March. Trader Vic (Bergeron), internationally famous San Francisco restaurateur, publishes a poster titled "Put a Little Tofu in Your Life," containing a lovely Polynesian girl and names of tofu recipes served at his restaurants. Three major newspaper stories on his tofu cuisine follow.

March. Soja Soyfoods Cafe opens in Toronto, Canada.

March. Hip Pocket Tofu Deli and Rainstar, a distributor of soyfoods, open at the same location in Columbus, Ohio.

March. A second commercial source of tempeh starter culture is now available from Ann Arbor Biological Supply [Michigan] and GEM Cultures, run by Gordon McBride and Betty Stechmeyer.

April. "Climbing Curd," an article on tofu, published in Time magazine, as a result of the New England Soy Dairy Press Conference in February.

May. New England Soy Dairy puts Numu brand soymilk on the market after 2 years of product development. It is quickly withdrawn and dropped, due to short shelf life.

May 5 - June 9. Shurtleff and Aoyagi do Soyfoods America Tour: 20 public programs, 30 media interviews, and 5,800 miles of driving to promote and teach about tempeh and tofu. Ends in Champaign / Urbana, Illinois where Shurtleff attends the INTSOY Short Course on Soybean Processing for 2 months.

May. Gary and Chandri Barat start selling soyfoods (Whipped Tofu Mousse Pie, Tofu Muffins, Tofu Spinach Quiche) at street fairs in New York City under the name Legume. During 1980 both Legume and Quong Hop & Co. in South San Francisco introduce tofu quiches (both sold frozen); these are America's first tofu entrees to be sold frozen.

June. "Tofu" by Nancy DeRoin published as a cover story by *Cuisine magazine*.

June. U.S. Supreme Court rules that man-made organisms created by genetic manipulation can be granted copyright protection. This ushers in a new era of research on and commercialization of soybean varieties by private companies.

June. INTSOY and Land of Lincoln Soybean Farmers establish International Soybean Institute, headed by Russ

Odell, to expand soybean utilization overseas.

June. American Soybean Association's *Soya Bluebook* publishes its first information on the new wave of U.S. soyfoods producers.

July. *Das Miso Buch* (The Book of Miso), by Shurtleff and Aoyagi published in German by Ahorn Verlag.

July 9-13. Third Annual Soycrafters Conference at the University of Illinois. Organized and financed by Richard Leviton. 270-285 attendees from 10 foreign countries. Very successful, with a profit of \$7,000. Third issue of Soyfoods magazine published by Leviton. A new Board of Directors is elected with Luke Lukoskie as chairman.

July. Mark Brawerman starts Jolly Licks (later renamed Pacific Trading Co.), a soyfoods marketer-distributor, in San Francisco. First product is soymilk ice cream. Quickly expands to tofu cheesecakes, tofu tamales, etc. Best existing model of this new concept.

Aug. 15. Archer Daniels Midland Co. enters the soy protein isolate market with its purchase of Central Soya's isolate plant.

Aug. Wildwood Natural Foods, Inc. formed in Fairfax, California. Original owners are Paul Duchesne, Paul Orbuch, Bill Bramblett, and Frank Rosenmayr. They do very creative work with prepared, convenience tofu products, such as sandwiches and salads.

Aug. *Tofu: Everybody's Guide*, by Stephen Cherniske published by Mother's Inn Center for Creative Living.

Aug. *The Soy of Cooking*, by Norton and Wagner self-published.

Aug. 20. "Tofu Gaining Popularity as a Cheap Protein Source," by Sylvia Porter published in the *Washington Post*. This is the earliest known publication to mention David Mintz's work with tofu. It describes the numerous deli products he makes from tofu. Ice cream is not mentioned.

Sept. 3. "Tofu: Trader Vic's Creativity Americanizes an Asian Staple" by Harvey Steiman published in San Francisco Examiner. Trader Vic is one of America's foremost restaurateurs.

Sept. Richard Leviton (Soyfoods Association) and Thelma Dalman (food service director for Santa Cruz city school system) lobby for tofu in Washington, D.C. USDA grants 1-time approval for a test program using tofu in Santa Cruz County School Lunches. But this failed to set a national precedent.

Sept. Soyfoods Association board holds first meeting in Colrain, Massachusetts. Plans fund raising program that fizzles.

Sept. 17. New-Age Foods Study Center (run by Shurtleff & Aoyagi) changes its name to The Soyfoods Center. Creates new logo and letterhead.

Sept. 24. "A Couple on a Tofu Mission in the West" (about William Shurtleff and Akiko Aoyagi) by Lorna Sass, published in *The New York Times*.

Oct. First issue of *The Beanfield* (named after a chapter

in *Walden* by Henry David Thoreau) a monthly soyfoods newsletter, published by Leviton. Name changed to *Soyfoods Monthly* in March 1982.

Oct. Tofu and The Bountiful Bean Plant in Madison, Wisconsin are on the Today Show for 2 minutes. This TV segment is aired 2-3 times.

Oct. 13. "With his Book on Tofu William Shurtleff Hopes to Bring Soy to the World" by Dianna Waggoner published in *People* magazine (circulation 3.4 million). The same issue noted: "Model Cheryl Tiegs" has been eating tofu for several years and gives it some of the credit for helping her to lose 35 pounds in 1972. Her favorite recipe for Oriental Pudding (with "1 block tofu (4 ounces)") is published.

Oct. Severe nationwide shortages of peanuts and peanut butter. Soyfoods producers miss a golden opportunity to make and sell soynut butter.

Nov. 1. First Soy crafter Apprenticeship Program begins at Island Spring, Vashon, Washington (state). Conceived of and directed by Luke Lukoskie, each program lasts 21 days, strongly emphasizes practical experience supported by books, periodicals, and tapes. Six programs per year. Costs: \$20 non-refundable registration fee plus \$500 individual tuition; \$400 per person group rate for two or more from the same business.

Nov. 9-14. World Conference on Soya Processing and Utilization held in Acapulco, Mexico, organized primarily by the American Soybean Assoc. 1,100 participants from 35 nations; of these approximately 300 registrants and 250 student attendees were from Latin America. Proceedings published in March 1981 issue of Journal of the American Oil Chemists' Society. Leviton attends and mans a SANA booth, but is not invited to speak.

Nov. Soyfoods Center publishes three pamphlets on soyfoods in Spanish: *Que es el Tofu? Que es el Tempeh? Que es el Miso?*

Nov. *East West Journal* and Michio Kushi stop misusing the term "tamari" and start using the proper term, shoyu or "natural shoyu."

Dec. The Soyfoods Center and Soyfoods magazine merge and computerize their mailing lists of people and organizations world wide actively interested in soyfoods. 5,000 names now on list. Soyfoods Center pays all costs of computerization. By mid-1981 there were 10,600 names in 50 categories. List is available for rent.

Dec. Farm Foods starts national ad campaign for Soy Ice Bean with full-page color ads in national magazines: *New Age*, *Whole Foods*, *East West Journal*, and *Vegetarian Times*.

Dec. First branch of the International Soyfoods Center Network starts in Sweden, run by Ted Nordquist. Headquarters are in Lafayette, California.

Dec. *The Tofu Primer* by Juel Andersen published by Creative Arts.

Dec. Soymilk viili is first made (on a home scale) by

Gordon McBride and Betty Stechmeyer of GEM Cultures in Fort Bragg, northern California. This cultured milk product, similar to the traditional Finnish dairy product, has a thick consistency almost like honey.

Dec. New England Soy Dairy becomes the first of the new generation of Caucasian-run tofu companies to top \$1 million in annual sales (they hit \$1.2 million). With only 6 workers in the plant, they are making \$4,000 profit per month during the last quarter.

Dec.—Seth Tibbott of Turtle Island Soy Dairy starts making and selling tempeh out of Hope Co-op, Forest Grove, Oregon, about 20 miles west of Portland, Oregon.

* In *Diamond v. Chakrabarty*, the U.S. Supreme Court upholds by 5 to 4 the patentability of genetically altered microorganisms, opening the door to greater patent protection for any modified life forms.

1199. Gerratt, David. 1980. The selling of soyfoods [Interviews with Tom Timmins of New England Soy dairy, Michael Cohen of Tempeh Works, and Martin Strasman of Nature's Table]. *Sprouts: The Newsletter of Western Mass Co-ops (Hatfield, Massachusetts)* 2(7):4-5. Dec.

• **Summary:** Tom Timmins started his career in natural foods as a manager of the Yellow Sun Food Co-op in Amherst, in 1973. He was introduced to tofu through his work at the Equinox, Amherst's first natural foods restaurant. In 1974 the Equinox started serving tofu, which was purchased through a local Chinese restaurant, which was in turn supplied from Boston's Chinatown. "In 1976, while working for a local natural foods distributor [Llama, Toucan & Crow], Tom was turned on to *The Book of Tofu*. It excited him to such a degree that by the next year he began to work on the Laughing Grasshopper Tofu Shop, together with Richard (Ira) Leviton... The New England Soy Dairy now employs 40 people and sells over 100,000 lb/month of tofu (25,000 lb/week by Jan. 1980).

Michael Cohen, a vegetarian since 1971, stopped eating foods containing any animal products in 1975. He too was involved with the Equinox restaurant when it first opened and was introduced to tofu there and at The Farm in Tennessee. In 1978, after 6 months at The Farm, he returned to what had become the New England Soy Dairy. But he decided to leave for personal reasons to start his own tempeh business.

1200. **Product Name:** [Soy Flake Number 1].

Foreign Name: Daizu Fureeku No. 1.

Manufacturer's Name: Ajia Protein.

Manufacturer's Address: Main Office: Miyanomori Palace, Miyanomori 4 jo, 11 chome, Chuo-ku, Sapporo-shi, Japan. Phone: (011) 644-1760.

Date of Introduction: 1980.

Ingredients: Whole soybeans.

Wt/Vol., Packaging, Price: 15 or 30 kg (33 or 66 lb).

How Stored: Shelf stable, 10 month shelf life.

New Product—Documentation: Leaflet. 1983. *Daizu Fureeku No. 1: Gyokai no machinozonde ita kakumei-teki genryō desu* [Soy flake Number 1: The revolutionary ingredient that the industry has long been waiting for]. 4 p. Describes whole (non-defatted) soybean flakes that are used to make tofu in Japan. Stored under the proper conditions (in a cool, dry, dark place), they are guaranteed to keep their quality for 10 months. They are packaged in quantities of 15 kg and 30 kg (33 or 66 lb). An annotated flow sheet of the process for using the flakes to make tofu is given.

A table shows that from 30 kg of Soy Flake No. 1, a tofu maker can obtain 400 cakes (400 gm each) of regular tofu, compared with only 250 cakes if whole soybeans were used. This implies that the flakes give a 60% higher yield of tofu per unit weight than whole soybeans.

The address of the factory is Aza-Toyoni, Hirō-machi, Hirō-gun, Hokkaido.

Talk with (call from) Art Mio of Morinaga. 1990. March 28. He says that Morinaga has used these flakes to make tofu, and the resulting tofu is more bitter than that made from whole soybeans.

Letter from David Nichols of Nichii Co. of America. Asia Protein Co. was established in 1977 by Mr. Chikaarashi; they started to make soy flakes in 1980.

Leaflet (3 panels each side) sent by Nichii Company of America (Torrance, California 90505). 1993. Jan. 28. "Science meets the soybean. And tofu will never be the same again."

Ad (full page, black, green, and red) in *Natural Foods Merchandiser*. 1993. Feb. p. 93. "Science meets the soybean. And tofu will never be the same again."

Ad (full page, black, blue, orange and green) in *Vegetarian Times*. 1993. July. p. 83. "Whose tofu do you buy?" "Spring Creek Natural Foods? Southwest Soyfoods? Wildwood Natural? Marjon Specialty? Fresh Tofu Inc? The Soy Shop? Nasoya? Mori-Nu? The Farm? Quong Hop? Northern Soy? Island Spring? What about White Wave or Tree of Life? Answer: They all offer a reduced fat tofu! Tell them you want 'Reduced Fat' tofu."

Same ad but half page in *Vegetarian Times*. 1993. Sept. p. 74.

Note: This is the earliest document seen (June 2013) concerning Nichii Co. and soy.

1201. **Product Name:** Tree of Life Organic Tofu.

Manufacturer's Name: Tree of Life, Inc. (Distributor).

Manufacturer's Address: St. Augustine, FL 32084.

Date of Introduction: 1980.

Ingredients: Purified water, organically grown soy beans, natural nigari (an extract of sea water).

Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983, undated. 5.5 by 5 inches. Plastic film. Dark green, cream, and white on film. “We appreciate your confidence in choosing this Tree of Life product. To ensure your satisfaction, we have made certain it contains the freshest, most natural ingredients available. Each Tree of Life product states clearly on the label what is inside and we know because we put it there.” As of 1987, this tofu is made by Swan Gardens in Georgia.

Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in April 1980. By 1988 they were selling 6,000 to 8,000 units/week.

1202. Aihara, Herman. 1980. Learning from salmon. Oroville, California: George Ohsawa Macrobiotic Foundation. xiii + 156 p. Illust. No index. 22 cm.

• **Summary:** This is a collection of Herman Aihara’s writings, over the past 20 years, compiled by Sandy Rothman, editor of GOMF, with Carl Ferre as typesetter. Each article or essay is dated. Contains a good early history of macrobiotics in the USA, and of Chico-San (p. 26-35).

Contents: Dedication. Acknowledgments (Feb. 1980). Preface, by Sandy Rothman (April 1980). Introduction: Before Learning from Salmon, by Herman (Feb. 1980). Thanksgiving 1964 (Nov. 1964). America Was Defeated in Vietnam (because Vietnamese soldiers had the will to fight and persist, while American soldiers had no fighting spirit. Feb. 1973). Happy New Year 1974 (1 Jan. 1974). An Introduction to Spiritual Japan (Dec. 1973). The President’s Greeting (March 1961, New York City; about Dogen). Macrobiotic Beginnings in the United States (Campfire lecture, French Meadows, July 1979). George Ohsawa Seventh Year Memorial Ceremony (“This is the seventh year since George Ohsawa left this world.” May 1972). Never Mind vs. No Matter (Feb. 1961). Macrobiotic Principles (From a summer camp lecture, July 1975). The Abuse of Memory (Sept. 1973). Forgiveness and Marriage (Aug. 1974). Macrobiotics and EST (Dec. 1974). East West Journal Interview (Dec. 1978). Honda (the car maker. Aug. 1978). Psychological Transmutation (June 1971). A New Life (July 1977). Friendship (Dec. 1975). Transmuting Dislike to Like (Dec. 1975). Maintenance of Karma (Feb. 1977). His daughter Marie has been plagued with psychological problems. He realizes this is due to his karma, and that he must change himself). Lima-San (Lima Ohsawa. Sept. 1972. She radiated happiness. Ohsawa tried many times to divorce Lima but he failed. “In reality, they had difficulties and troubles between them all the time”). George Ohsawa Ninth Memorial Day Prayer (27 April 1975). Learning From Salmon (3 Sept. 1975. Like the salmon, George Ohsawa took the most adventurous trip near the end of his life). Why Do Salmon Go Upstream? I (March 1977. They use their sense of smell and imprinting). Why Do Salmon Go Upstream? II (May 1977). Chewing is to Return to God (May 1975). Eyes Lie Horizontally, Nose Lies Vertically (Eihei Dogen zenji.

March 1973). Editorial (July 1968). Why Did Vietnam Win the War? (May 1973. A table shows per capita consumption of sugar {lbs.} in selected nations in 1961 and 1964. The four countries with the lowest consumption in 1964 are North Vietnam {2.20}, South Korea, North Korea, China. The four countries with the highest consumption in 1964 are Ireland {129.8 lb}, Denmark, England, and USA {101.20}). Japanese Alphabets and Brain Functions (Feb. 1974). Cutting Redwoods (on his property at Mirimichi. April 1972). Proper Food for Man (Grains are man’s principal food. Aug. 1968). Wu-Wei (from the *Tao Te Ching* by Lao Tsu. Aug. 1968). Yin and Yang (April 1980). Jitsu and So (July 1968). How Did Religion Start? (June 1971). Create Your Own Temple (Sept. 1975). The Art of Cooking (March 1977). Two Kinds of Memories (Dec. 1972). Giving My Books a Home (June 1978). Great Paradoxes in Man (July 1976). Message to the North American Macrobiotic Congress (Aug. 1979). Thanksgiving 1979 (Nov. 1979). The Author (Herman Aihara, p. 155-56).

“Herman Aihara was born [Nobuo Nishiyama] in Arita, a small town [in Saga Prefecture, near Nagasaki, Kyushu] in southern Japan, on September 28, 1920. The town is famous for its production of porcelains called *Imari-ware* or *Kakiemon-ware*. Imari is the name of the port from which Arita porcelains were shipped to Europe... His birth family was too poor to support ten children, and so at the age of nine Herman was adopted into his uncle’s home in Tokyo. His family name was changed to Aihara. He grew up without knowing his actual mother. He was told who she was when she died, and at that time he returned home to his native community... His ‘stepfather’ owned a factory that produced iron materials for the national railways and telephone companies, and Herman chose metallurgical engineering as a life work. He was accepted by the school of engineering at the reputable Waseda University.

“At this time he attended a lecture by George Ohsawa. Immediately he became more interested in the philosophy of yin and yang than metallurgy. As World War II began in 1942 he graduated with a bachelor’s degree from Waseda. Illness kept him from military service. When the war ended, he recovered and began to attend Ohsawa’s classes from time to time.”

He was fascinated by the philosophical part of Ohsawa’s teaching (yin and yang) but showed little interest in the food, which was cooked by Ohsawa’s students. These meals consisted of brown rice, hijiki seaweed, carrots, burdock and red beans [azuki beans]. Herman was in college where his classmates laughed at him for his interest in yin and yang, which were considered old, obsolete ideas in Japan. His classmates were busy digesting 20th century Western science—on their way to becoming the future engineers of Sony, Toyota, Datsun, and Toshiba (p. 2).

During his first year in college, Herman was chosen for the crew of a rowboat race representing his class. He

was the heaviest among the crew, so he was positioned as number one. He trained every day during the summer. In the hot weather he ate shaved ice with sugar syrup. His stomach cramped. Since he thought he understood macrobiotics, he ate salt to balance the yin of the ice and sugar. “What a silly mentality.”

After graduating from college, he began to cook for himself—but he became weak and skinny. His friend became worried, since he was “one of the most athletic students” (p. 4). But the real cause of his sickness was arrogance; he thought he understood macrobiotics but his practice was unwise. During World War II he worked at his father’s factory. When the war ended in 1945 he lived at home. Since food was very scarce in those days (they had to buy foods on the black market) he ate whatever his mother cooked—including white rice and sugar.

He started to learn social dancing in the newly opened dance halls. “Social dance was a new fashion after American forces occupied Japan. When people were starving to death just after the war, I was a playboy, chasing sexy girls at various dance halls.

“My father worried about my behavior and hurried my marriage. I married because my parents were agreed, but I myself was not much attracted to her. My wife committed suicide before our marriage passed one year. It was the end of autumn. She climbed a mountain alone, drank poison, and died without giving anyone her reasons.” Herman was shocked and depressed for a long time. He lost his mind for a month. “How pitiful a man I was. My wife could not rely on me” (p. 5).

Herman decided to become an independent man and he chose George Ohsawa as his life’s teacher and he asked Ohsawa if he could stay at his unique school. Ohsawa’s teaching was about how to understand and acquire infinite freedom, absolute justice, and eternal love. He inspired his students greatly, and told them it was their own fault if they were not happy. The food you eat is one of the most important factors that influences a person’s health and happiness.

Herman landed in San Francisco in 1952 at age 32 to start a new life. His wife was sick, and two of their babies died.

Before March of 1961 Ohsawa visited Europe and saw many beautiful macrobiotic restaurants and clinics in Belgium, France, Italy, Germany, Switzerland, and England. The Lima factory in Belgium produces macrobiotic foods. Macrobiotic restaurants include *Au Riz Dore*, and *Longue Vie* (p. 24).

Like the salmon, Ohsawa took his most adventurous trip late in his life (p. 77).

He held his first American macrobiotic lectures in 1960 on Long Island, New York. They lasted for 2 months (p. 26). At that time Herman was manager of the first macrobiotic food store in the USA, in New York City [Named Ginza, it

had been started by Herman in 1960.] In 1960 Herman went to Europe to solve visa problems, then in about late 1960 he returned to New York and started publication of *Macrobiotic News*, a magazine that contained mostly Ohsawa’s lectures. In 1961 Ohsawa returned to New York for a summer camp at Watsboro in the Catskill Mountains. After the camp he said that followers of macrobiotics should leave New York because nuclear war was immanent. 36 people, including 15 families, decided to move to Chico, California, which they had calculated was the safest place from nuclear fallout. Arriving in Sept. 1961, they soon founded Chico-San, which was the first macrobiotic food production and distribution company in the USA. The first store was in the basement of a small shop. Herman began to import miso, tamari, and other traditional, natural foods from Japan (p. 31).

Some followers of macrobiotics stayed in New York to keep up the Ohsawa Foundation and food store. One customer got sick and died [Beth Ann Simon died in Nov. 1965]. The FDA came in and closed the store. Bob Kennedy became president of Chico-San and soon began America’s first successful production of Rice Cakes.

Herman moved to San Francisco in about 1971 (p. 35). At the end of 1970, John Deming Jr. had given him some land in Mendocino. In Sept. 1972 a fire, started by a rice-cake machine, burned down the Chico-San factory (p. 34) and most of its inventories of food. Chico-San started making money in about 1978.

Western medicine is interested only in treating symptoms. Medical professionals are largely ignorant of the influence of diet on health, and even block the development of the dietary approach to healing. Address: Oroville, California.

1203. Kandel, R.F.; Pelto, Gretel H. 1980. The health food movement: social revitalization or alternative health maintenance system. In: N. Jerome, R. Kandel, and G. Pelto, eds. 1980. *Nutritional Anthropology: Contemporary Approaches to Diet and Culture*. Pleasantville, New York: Redgrave Publishing. viii + 433 p. See p. 327-63. *

• **Summary:** A vegan cookbook, which advocates plenty of (but not all) raw foods, by a very cultured lady and reluctant cook, replete with wonderful quotes on vegetarianism, food, and cookery from bygone eras. Soybeans are mentioned on page 46 as making efficient use of land for producing protein. On page 215 is a recipe for baked soybeans.

Reissued in 1982 by Delta Publishing Co., Inc. (Imprint: Delta Books). Address: Social Science Inst., Harborside, Maine 04642.

1205. Null, Gary. 1980. *The new vegetarian cookbook*. New York, NY: Macmillan Publishing Co., Inc.; London: Collier Macmillan Publishers. x + 310 p. Recipe index. 24 cm.

• **Summary:** One chapter (p. 52-60) titled “Soybeans and Soybean Products” discusses: “Whole, raw soybeans” [green vegetable soybeans], dried soybeans, soybean milk soy flour, soy grits, soy flakes, tempeh, tamari, miso, and tofu. The long section on tofu begins: “As a high-quality source of complete protein, tofu (soybean curd, usually called bean curd) is hard to beat, not to mention inexpensive, low in calories and versatile.” It ends: “As you become more familiar with tofu, you’ll come up with many of your own innovations. But no matter how you choose to serve this natural, high-protein food, serve it often and savor its benefits!”

Page 78, under “Bean Sprouts,” states that “Soybeans make the most delicious sprouts, but are a little more difficult to grow” than mung bean sprouts. Page 88 notes that tamari and miso are good alternatives to salt.

Soy-related recipes include: Miso tofu soup (p. 132-33). The section titled “Tofu Dishes” (p. 199-208) includes: Butternut tofu. Tofu cauliflower casserole. Herby tofu croquettes. Mushroom and tofu sautéed in miso. Tofu Orleans. Red and green peppers with tofu. Soba tofu dinner. Tofu eggplant Parmesan. Yogurt tofu casserole [with cow’s milk yogurt]. Tomato tofu and kidney beans. Bulgur, lentil and tofu casserole. Tofu à la king. Sesame tofu (Tofu plus sesame seeds). Hot breakfast for two (tofu with oatmeal, raisins, and walnuts).

Soy-enriched wheat berry bread (p. 242). Page 304 contains a list of food suppliers, including Chico San, East West Journal Mail Order, and Walnut Acres (Penns Creek, Pennsylvania). Address: New York City, NY.

1207. *Boston Rice Paper (Macrobiotic)*. 1980? New Erewhon products. No. 1. p. 4. Undated.

• **Summary:** These new products are: (1) Crispy Brown Rice Cereal, a blend of organic medium grain brown rice, barley malt, and sea salt. It is ready to eat. (2) Erewhon tofu. “Tofu is one of the health food trade’s big celebrities, and Erewhon’s comes in two organic styles, firm and soft. (3) Erewhon Bread, a yeasted whole-wheat loaf. (4) Erewhon Pickles and Erewhon Sauerkraut.

Note: This new 8-page typewritten newsletter (with no date or address) is published by Louis Fellman.

1208. **Product Name:** Lima Barley Koji.

Manufacturer’s Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1981 January.

Ingredients: Dried fermented barley with koji (*Aspergillus oryzae*).

Wt/Vol., Packaging, Price: 17.6 oz (500 gm) plastic bag.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Chico-San Products. 1981. Jan. p. 13. “The koji used to make miso.” Label for Barley Rice Koji for Making Miso. 1984. Collected by Lorenz Schaller of California. 4 by 5 inches. Orange and brown on beige. “Imported from Ohsawa Japan by Chico-San.”

1209. Chico-San, Inc. 1981. *Chico-San products: A catalog of unique natural foods*. P.O. Box 1004, Chico, CA 95927. 28 p. Revised Jan. 1981.

• **Summary:** Contents: A message from the president, J. Robert Kennedy. Chico-San rice products: Rice Cakes (6 varieties; plain, millet, or buckwheat, each salted or unsalted), Carob Crunch (carob-coated rice cakes in plain or mint flavors), Golden Rice Nuggets, Yinnies candies (Taffy made from rice and barley; Caramel made from rice, barley, oat powder, raisins, almonds, sesame oil, coconut, rice bran, lecithin, natural vanilla, and agar agar).

Yinnies brand Rice Syrup (“A pure, natural sweetener made from rice, water, and barley malt...”). “How Yinnies brand Rice Syrup is made: Chico-San’s process involves the conversion of the natural starches in the rice into complex sugars. Extended low temperature cooking allows the enzymes from the malted grains to create a fermentation which occurs in a liquid mash. After an optimum period of fermentation, the process is halted and liquid squeezed from the mash. This liquid is then vacuum cooked at low temperature, bringing the syrup to the proper consistency.” Yinnies brand rice syrup and refined sugar comparison. This rice syrup is high in maltose.

How Chico-San guarantees Oriental-type organically-grown brown rice (describes in detail how the rice is grown in California). Chico-San whole grains, seeds and beans (Incl. organically-grown brown rice, sweet brown rice, sesame seeds, black soybeans, and azuki beans). Chico-San condiments: Lima soy sauce, soybean puree (miso, in 3 types, mugi, kome, or hacho), barley koji, kuzu, malt vinegar malt vinegar, salt plums, nigari (for tofu making), sesame oil (light or dark), tekka. Chico-San imported seaweeds: Hijiki, kombu, wakame, nori, sea vegetable gelatin (kanten). Herb teas and other products. Chico-San cookbooks. Chico-San special recipes—including recipes for Sesame miso spread, Black soy beans, Azuki beans, and Wakame miso soup. Address: Chico, California.

1210. Eden Foods. 1981. Catalog 1981. 701 Tecumseh Rd., Clinton, MI 49236. 69 p.

• **Summary:** On the cover is a stylized 2-story house (Cliff and Fran Adler’s home) in the snow. This is the earliest catalog seen after the major Eden fire in Nov. 1979. The cover design is by Fran Adler. Prices are given in the catalog. Address: Ann Arbor, Michigan.

1211. Phillip, Janice. 1981. Stockpiling for a foodless future: The serious business of putting food by. *East West Journal*. Jan. p. 39-41. [1 ref]

• **Summary:** Concerned with the nuclear arms race, a California commune recently ordered two tons of Hacho miso from Westbrae Natural Foods in Berkeley. “When the salesperson expressed astonishment at the size of the order, the customer explained that the commune decided to lay in a supply after reading in *The Book of Miso* (by Shurtleff & Aoyagi) that miso may protect against radiation poisoning.”

A portrait photo shows Frank Ford, of Deaf Smith County, Texas; he leads Arrowhead Mills’ production of 200,000 pounds of storage food weekly. Address: California.

1212. Soy Plant Co-op Inc. (The). 1981. Price list effective 1/28/81 [28 Jan. 1981]. Ann Arbor, Michigan. 1 p. 28 cm.

• **Summary:** This hand-lettered sheet contains four columns: Manufacturer, product, unit price, and case price. The Soy Plant is manufacturer of: Tofu, plain soy milk, flavored soy

milk, tempeh, miso garlic dressing, and Soyanaise (soy mayo). Other manufacturers are Sunshower (fruit juices and butters), Hills Brothers (apple cider), Toper (pickles), Westbrae (miso—3 types), and Canadian Soya (Soya Lecithin Spread, non-hydrogenated). Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: 313-663-TOFU (663-8638).

1213. Kennedy, J. Robert. 1981. Re: History of Chico-San and its work with rice cakes. Letter to New Jersey Economic Development Authority, Trenton, NJ 08625, Feb. 17. 2 p.

• **Summary:** Chico-San was launched on 6 March 1962 as a retail store and wholesale business, capitalized with \$10,000. The company literally grew up with the health foods business. “The Feather River brand was introduced on products marketed to the grocery trade. A subsidiary company, Spiral Foods, Inc., was organized in 1968 to handle these sales. The subsidiary was formally merged with Chico-San in 1976.

“Chico-San had achieved the primary goal of acceptance by supermarket chains and had expanded production with funds from a Small Business Administration-guaranteed loan when fire destroyed the Chico plant in 1972 and set company’s marketing efforts behind five years. It was not difficult to resume marketing and shipping to the health and natural food trade, but the supermarket accounts were not regained until 1977. The firm took temporary quarters in a ‘ragtag’ group of buildings and Quonset huts where Chico zoning restrictions prohibit expansion. When market demand increased, the company leased space in a small building a cross town to expand rice cake production, but in 1978 was required by the city to shut down two rice cake machines because of zoning restrictions. This forced the company to vacate the building. Chico-San put its main facility on around-the-clock, seven-day-a-week scheduling to keep pace with orders, but orders still surpass production today.”

“Our present location was found in July of 1978 which would allow expansion, free of zoning restrictions. On Jan. 1, 1979, our Rice Cake machines were moved into 1262-1266 Humboldt Avenue. Chico-San still retains 6,000 square feet of our previous location for the manufacture of Rice Syrup. The Humboldt Avenue address was leased for 10 years with an option to renew for a 10-year period.”

In Dec. 1979 Chico-San Inc. introduced a new label called “Spiral Brand.” It has gained popularity in the delicatessen trade and has increased sales dramatically, especially in the eastern United States.

Chico-San proposes to build a plant at Carteret, New Jersey, in December 1981. “At the moment 45% of our sales are within a 250 mile radius of Newark, New Jersey, and 65% are east of the Mississippi River. It is expected that significant relief will be gained from excessive costs of transportation, almost immediately, and a continued favorable effect on earnings will result from an Eastern

manufacturing location. Chico-San has never had a problem in selling Rice Cake Products. Our problem has been in developing machines to produce them.” In earlier years Chico-San had the machines custom made at a cost of \$70,000 to \$90,000; a year was required from the time of order to delivery. Now the assembly time has been reduced to 6-8 weeks and the cost to \$35,000. Address: President, Chico-San, Chico, California.

1214. Leviton, Richard. 1981. Making soymilk in America. *Soyfoods* 1(4):16-24. Winter.

• **Summary:** A review of soymilks available nationwide and a detailed analysis of Numu, New England Soy Dairy’s problematic soymilk and the reasons for its failure in September 1980, at a cost of \$40,000. Also discusses: Vitasoy (imported to California). President Soybean Drink (imported to California). Soy Fresh (made by Quong Hop in California since 1972). Soy Moo (made by Health Valley in California). Fresh Soybean Juice (made by Wy Ky of Los Angeles). Soymilk (made by Mighty Soy). Soybean Beverage (made by Hoven Foods, Seattle). Soy Juice (made by Redwood Valley Soyfoods Unlimited [Richard Rose]). Plain Soymilk (made by Island Spring, Vashon, Washington). Nutrisoya (made by Victor Food Products, Toronto, Canada). Soy-Ya! (made by Joy of Soy, Minneapolis, Minnesota). Soy Milk (made by White Wave of Boulder, Colorado). Soyalac and Soyagen (made by Loma Linda of Mt. Vernon, Ohio). In 1978 Nasoya introduced Vidasoy—prematurely; it was a disaster. A photo shows Stephen Yu holding a bottle of Victor Foods’ Nutrisoya. Address: Colrain, Massachusetts.

1215. Smith, Patti. 1981. Three places in New England. *Erewhon Monthly*. Feb. p. 1-2.

• **Summary:** “Beginning in the late 60’s in a tiny store in Boston, Erewhon has since grown into a large natural and organic food distributor. Our first wholesale catalog offered food for sale by mail or United Parcel Service; we now deliver food throughout the Northeast in tractor-trailers. In March, 1970 we listed 96 products in our catalog; we currently list approximately 4000 products!”

“Within New England, through increased sales, we provide jobs for over 175 people in our warehouse and retail stores and service over 2,000 customers with 4,000 products. Every person at Erewhon can be proud of the results we’re producing on the planet.” Address: New England Regional Manager, Massachusetts.

1216. Curry, Richard. 1981. Re: Problems at Laurelbrook. Letter to Rod Coates, chairman of the board and owner of Laurelbrook Foods, March 9. 2 p. 28 cm.

• **Summary:** “It was obvious during our meeting this morning that you have no intention of retiring from Laurelbrook and that you plan on involving yourself in any activity you deem necessary. As President and Chief

Executive Officer, I cannot perform my duties properly if I am constantly putting out fires that are created by you.”

“In the year 1980, both Bel Air and Raleigh took losses, in 1981 both are profitable; both would be more profitable if resistance to change had been less.” He then makes five specific requests of Rod. Address: President, Laurelbrook Foods, P.O. Box 47, Bel Air, Maryland 21014; Raleigh Branch: 2319 Laurelbrook St., Raleigh, North Carolina 27604. Phone: (301) 879-1717.

1217. Coates, Margy. 1981. Re: Problems at Laurelbrook. Letter to N. Richard Curry at Laurelbrook Foods, March 10. 1 p. 28 cm.

• **Summary:** Margy discusses several areas where she and Rod feel Richard is not doing a good job of running Laurelbrook. Employee morale is down and there are slow downs—neither of which are caused by Rod’s presence. Address: Laurelbrook Foods, P.O. Box 47, Bel Air, Maryland 21014. Phone: (301) 879-1717.

1218. Coates, Rod. 1981. Re: Problems at Laurelbrook. Letter to N. Richard Curry at Laurelbrook Foods, March 10. 1 p. 28 cm.

• **Summary:** Richard wants Rod to be less actively involved with Laurelbrook. Rod answers five requests from Richard. For example: “2. I will not open the mail as long as you keep me informed as to the payables and receivables and certain costs that I might worry about.” Address: Chairman of the Board, Laurelbrook Foods, P.O. Box 47, Bel Air, Maryland 21014. Phone: (301) 879-1717.

1219. Barry, Ann. 1981. Flour: Which type to use for what. *Chicago Tribune*. March 26. p. W_A2 (or S_A2 or N_B2).

• **Summary:** The small section titled “Other flour” states: “Gluten flour has practically all starch removed... Other diet flours include potato starch, soybean, oat flour, rice flour, and corn flour. Some brands of diet flours are Cellu Goods, Golden Harvest, and Fearn Soya Foods, available in Chicago health food stores.”

The last section, “Where to get natural flours,” begins: “Stone-ground flour is milled the old-fashioned way, by stone rollers, which are often propelled by water power.” Best to keep refrigerated: The name and address of the following sources is given: Arrowhead Mills (Hereford, Texas), El Molino Mills (City of Industry, California). Erewhon Trading Co. (Cambridge, Massachusetts), Grain Process Enterprises Ltd. (Scarborough, Ontario, Canada), Great Valley Mills (Bucks County, Pennsylvania), Shiloh Farms (Sulphur Springs, Arkansas), Vermont County Store (Weston, Vermont), and Walnut Acres (Penns Creek, Pennsylvania). Address: Chicago.

1220. Hawken, Dora. 1981. Re: Response to notice of possible dismissal from Laurelbrook. Letter to Richard

Curry, President of Laurelbrook Foods, March 30. 2 p. Typed, with signature.

• **Summary:** Dora has been employed by Laurelbrook since 21 Jan. 1981. On 27 March 1981 she received a letter from Linda J. Mason, office manager of Laurelbrook, stating that her work was not satisfactory. “By way of this memo you are hereby given a two week notice that if I do not see a vast improvement in all of your duties you will be terminated on April 10, 1981.”

Dora replies that it is difficult for her to take customer orders properly because of lack of information on how to handle the many different situations that regularly occur on this job. Moreover, she believes that the way she was fired was “entirely unfair and inconsiderate.”

“Fortunately for you I wasn’t intending to stay at Laurelbrook, so I don’t want to make an issue of this, but as I said, I am concerned for my parents’ sake that things be improved for future employees.” Address: Bel Air, Maryland.

1221. Banker, C. 1981. Keeping up with the computer. *Ereworld*. March. p. 1, 3-4, 8.

• **Summary:** *Ereworld* is a 14-page in-house newsletter, published for the people who work at Erewhon. This issue is 12 pages long—8½ by 11 inches, photocopied and stapled. This article is about the wonders of the Data Processing Department. Address: Boston, Massachusetts.

1222. **Product Name:** Instant Miso Soup (Miso-Cup) [Regular, or With Seaweed].

Manufacturer’s Name: Eden Foods, Inc. (Marketer-Distributor: Imported from Japan by Edward & Sons Trading Co.).

Manufacturer’s Address: Eden Foods Inc., 701 Tecumseh Rd., Clinton, MI 49236. Phone: (313) 973-9400.

Date of Introduction: 1981 March.

Wt/Vol., Packaging, Price: 4 packets/box.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods Catalog. 1981. Page 18. Eden Foods 1981 Catalog II. “Instant Miso-Cup is a convenient miso soup and seasoning. It is made from Japanese miso dried under low temperatures to retain nutritional content. It is available in two flavors, original golden light and red with seaweed. Contains soybeans, rice, sea salt, onions, parsley. Each box contains 4 packets—order twelve boxes in an attractive display box.” Note: This product was developed and imported by Edward & Sons Trading Co.

1223. **Product Name:** Eden Specialty Pastas: Soy Flats.

Manufacturer’s Name: Eden Foods, Inc. (Marketer-Distributor).

Manufacturer’s Address: Eden Foods Inc., 701 Tecumseh Rd., Clinton, MI 49236. Phone: (313) 973-9400.

Date of Introduction: 1981 March.

Ingredients: Incl. wheat flour and soy flour.

How Stored: Shelf stable.

New Product–Documentation: Eden Foods 1981 Catalog II. Page 16. “Soy flats have soy flour added for increased protein content. It is also a lighter flour than whole wheat.”

1224. *Prevention (Emmaus, Pennsylvania)*. 1981. A health food dictionary: Soybeans. March. p. 144-46.

• **Summary:** Soybean foods include soybean oil, tofu, tamari, soy milk, tempeh, miso, soybean sprouts, soy flour, soy ice cream, and soy nuts.

The article on “soybeans” ends: “Do yourself a favor. Get to know the soybean.” Address: Emmaus, Pennsylvania.

1225. **Product Name:** Tree of Life Tamari.

Manufacturer’s Name: Tree of Life, Inc. (Importer/Distributor). Made in Japan.

Manufacturer’s Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1981 March.

New Product–Documentation: Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in 1981. Talk with Greg Leonard of Tree of Life. 1988. Oct. 5. This product was introduced on 17 March 1981.

1226. Kotzsch, Ronald Ernst. 1981. Georges Ohsawa and the Japanese religious tradition. PhD thesis, History of Religions, Harvard University, Cambridge, Massachusetts. 360 p. April 1. 28 cm. [75 ref]

• **Summary:** The best history of macrobiotics written up to this time. Full of original, interesting, and often humorous material. Contents: 1. An overview of Japanese religious life. 2. Ishizuka Sagen and the origins of Macrobiotics. 3. Georges Ohsawa, the early years: 1893-1929. 4. First sojourn in the West: 1929-1935.

5. Return to Japan in Crisis: 1936-1939. 6. The war years: 1940-1945. 7. The post-war years: 1945-1953. 8. The world journey of the penniless samurai: 1953-1966. 9. Ohsawa as a religious thinker. 10. Ohsawa as the Japanese religious tradition. 11. The prophet in his own land and elsewhere. Conclusion. Notes, arranged by chapter. Bibliography: (1) Works by Georges Ohsawa arranged alphabetically by original title Romanized. For each Japanese-language work is given: (a) The title in Japanese characters. (b) A translation of the title into English. (c) The year of publication. (d) The name of the publisher Romanized and in characters. (2) Works in Japanese by authors other than Ohsawa.

Here are a few key dates after World War II:

1947—Ohsawa joined the World Federalist Movement. He becomes more interested in world peace.

1947—Ohsawa comes upon F.S.C. Northrup’s book *Meeting of East and West*; he is deeply impressed and begins translating it from English into Japanese.

1948—He moved his school to the Hiyoshi section of Yokohama. He put a sign on the roof reading “World Government Center.” At that time there were about 30 students in residence and about 100 commuting daily to hear Ohsawa’s lectures.

1949—He suddenly changes his name from Sakurazawa Jyōichi to Georges Ohsawa. Also he begins to call his philosophy and teaching “macrobiotics” instead of *shokuyō*. It is quite likely that he borrowed the word and its usage from a 19th century German philosopher and physician, Christoph Wilhelm von Hufeland (1805). The name of his school came to be called *Maison Ignoramus*, French for “School of the Ignorant.” He also started giving his students new names. “They were to be new persons, no longer simply Japanese but international citizens of the world” (p. 215)

1953 Oct. 14—Four days before his 60th birthday, George and Lima Ohsawa departed Japan at Kobe on the steamer *Sadhana*. “Announcing himself ‘a citizen of the world,’ and calling his trip ‘the world journey of the penniless samurai,’ Ohsawa vowed to spend the rest of his life traveling the world and spreading macrobiotics.” He felt like a bird leaving a small cage after a long confinement. Address: Harvard Univ., Cambridge, Massachusetts.

1227. Wheat and Meat Retreat, Inc. (Staff). 1981. Why “natural”* foods? You are what you eat! (*Natural—The way God designed). *Washington Post*. May 28. p. AS30.

• **Summary:** “Across the country, as more and more consumers are growing wise and nutritionally aware, natural food grocery stores are rising up to meet the demands...”

“On a diet? Eat the ideal high protein diet food—Tofu! Tofu is a tasty soyfood from the Orient.” It is entirely free of cholesterol and very low in saturated fats.

1228. Wheat Meat Retreat. 1981. You are what you eat! Be more energetic and “alive”! Shop and save at your natural grocer (Ad). *Washington Post*. May 28. p. AS13.

• **Summary:** “Eat wholesome, uncontaminated, limited-processed foods free of all chemical preservatives, additives & coloring.”

“Large selection of: Dairy products, nuts & dried fried tofu products, meats, herbs, teas, spices, vitamins, beverages,... fish, poultry,...” Address: 19310 Montgomery Village Ave., Gaithersburg, Maryland 20760. Phone: 977-2022.

1229. Abrams, Richard A 1981. Gritty spirit abounds amid flood devastation. *Austin-American Statesman (Austin, Texas)*. May 31. Life/style section. p. A1, A-11.

• **Summary:** This article is about the May 1981 flood that wiped out Whole Foods Market.

“Indeed it had. One day after the Whole Foods Market at 914 N. Lamar Blvd. was devastated, more than 60 volunteers showed up to help cart out meat from water-logged freezers,

vegetables and vitamins. Perhaps it was a sign of the spirit of Austin or, perhaps an indication of thanks to the owners themselves.

“One of the four owners, Renee Lawson, estimated the inventory damage at \$300,000. Still, she was happy ‘first that we all survived, and second that we were able to take what was left of our cash flow after the flood and pay all our employees.’

“The market was not insured against floods. Neither was the building, which is leased from a Houston owner. ‘What we really want to stress right now, though,’ Lawson said, ‘is that we owe a lot of thanks to everybody who showed up to help us out.’ She was smiling, even though, by her estimation, cash reserves were somewhere ‘near zero.’

“And then she said: ‘You know, there’s no sense crying. We’ll be back. I assure you of that.’ Like those of Austin who found themselves homeless; those who found themselves in business one day, and wiped out the next, she was able to summon something from the reserve—the spirit that is so much a part of the human element.”

A large photo shows Renee Lawson.

1230. Erewhon Mail Order. 1981. Erewhon. Natural foods mail order catalog. Brookline, Massachusetts. 16 p. May. Catalog and price list.

• **Summary:** This is a new mail order catalog, whose prices become effective on 1 May 1981. On the front cover is a woodblock print of a man with a sickle cutting sheaves of grain in a field. He is wearing a hat, and behind him on the ground is a wooden barrel. Erewhon is now located at 26 Washington St. in Brookline Village—also the home of Erewhon Mail Order. There are retail stores at 342 Newbury St. in Boston and 1731 Massachusetts Ave. in Cambridge. Address: 236 Washington Street, Brookline, Massachusetts 02146. Phone: 617-738-4516.

1231. Eden Foods. 1981. Catalog II, 1981. 701 Tecumseh Rd., Clinton, MI 49236. 71 p.

• **Summary:** On the cover is a stylized 2-story house on a farm. Address: Ann Arbor, Michigan.

1232. Root, Evan. 1981. John’s visit. *Ereworld*. June. p. 1, 4.

• **Summary:** Ereworld is a 14-page in-house newsletter, published for the people who work at Erewhon in Boston—welcoming new employees, congratulating those who have been transferred or promoted, etc. This issue of Ereworld is largely about the visit of John Denver (the popular American singer, songwriter, actor, activist, and poet) to Erewhon. Evan’s article begins: “John Denver made friends with the Macrobiotic community on a visit here last month. Many of us here at Erewhon enjoyed meeting and talking with him.

“John and his friend and cook, Ron Lemire, (Ron introduced John to macrobiotics) arrived in Boston Tuesday night, April 21st following a 10 day brown rice and water

purification in the desert. They left the following Friday morning.” A description of what he did during his 2½ day stay is given. On page 1 is a photo of Michio Kushi and John Denver seated at a table, both fastening their Erewhon pins.

“Transcript from John Denver’s talk at the 1st Presbyterian church 4/22/81” [22 April 1981] is on pages 4-7. It is followed by “John Denver comes to Erewhon,” by Mary Estella & Lynn Patterson (p. 8-9) followed by a photo of Lynn Patterson (Left) and Mary Estella (Right) in the Erewhon kitchen.

On page 13 are 6 photos including: Robert Langone (head of purchasing, top left). Susan Munger (art dep. & product development, top right). Anthony Valenti, Steve Geddes, Bob Spencer, and Steve Zoller (L-R, production dep., center left).

On page 14 are 8 more photos including: Robert (Bobby) Hanig (center left). Rhoda Houtz (accounting manager, center, bottom left). Address: Boston, Massachusetts.

1233. Coates, Roger M.; Coates, Margery K.; Coates, Daniel G. 1981. Resignations. Bel Air, Maryland. 1 p. July 21. Unpublished manuscript.

• **Summary:** Rod, Margy, and Dan, constituting all of the Directors of Laurelbrook Foods, Inc., resign, effective immediately. They also resign their respective offices held in the corporation. Rod and Rod reside at 2516 Laurel Brook Road, Fallston, Maryland 21047. Address: P.O. Box 47, Bel Air, Maryland 21014.

1234. Shurtleff, William; Leviton, Richard. 1981. Soycrafters 1981: The year in review. Paper presented by Shurtleff at Fourth Annual Soyfoods Association of North America (SANA) Conference, Colorado State University, Fort Collins, Colorado. July 8. 3 p. Unpublished manuscript.

• **Summary:** January:

“*Soyfoods* magazine #4 is published. 10,000 copies printed and mailed. Steve Fiering loans SANA money for mailing it and agrees to make a loan for test mailing.

Union activity begins at New England Soy Dairy

Hain Food Co. starts nationwide color ads for Natural Onion and Jalapeno (Soy) Bean Dips

Pacific Tempeh near San Francisco introduces America’s first commercial tempeh burgers.

February:

Island Spring in Washington state becomes America’s first unionized tofu plant (Feb. 2).

Soyfoods Unlimited tempeh plant starts in San Francisco area. Most modern U.S. tempeh plant although small output.

USDA National Food Review article “Soyfoods Catching On” by Judith Brown. About tofu and tempeh.

Many tempeh plants switch to using GEM Cultures tempeh starter.

March: Institute of Food Technologists meeting at New

England Soy Dairy. Tour, dinner, speeches.

Richard Leviton on National Public Radio “All Things Considered”. Two million people for 10 minutes about soyfoods.

The Book of Miso, by Shurtleff and Aoyagi published by Ballantine Books in mass market edition.

April:

“Tofumobile” from Wildwood Natural Foods published in *East West Journal*. Return to the vision of local, small tofu shops in areas where there is high density of interest and high food consciousness. Rediscovering soyfoods craftsmanship.

USDA decides to set tofu standards then announce them in the *Federal Register*

Soyfoods Center published Tempeh Tasting poster and distributes free to all tempeh makers.

Dr. Cook at Kansas publishes paper on the inhibitory effects of soy products on nonheme iron absorption in humans. USDA becomes concerned.

Tofu at Center Stage, by Landgrebe published. First tofu cookbook calling for a lot of meat in the recipes.

Bean Machines introduces new sanitary disintegrators for tofu production

“The Miso Master’s Apprentice” published in *East West Journal*.

June: “Surprise, It’s Soy” published in *Bestways*.

FIND/SVP survey of the U.S. tofu industry and tofu consumer survey published. 33% of respondents in major metropolitan areas were aware of tofu and 10% had purchased it. Predicts market will grow at 32% a year for the next 6 years

July:

Soyfoods magazine incorporates and offers stock 8-12, Fourth Annual Soycrafters Convention at Colorado State University. 240 people attend, 210 paid. First soyfoods trade show and cheesecake bakeoff. SANA loses \$4,200 on the conference. *Soyfoods* magazine #5 published.

Soy Foodery Cookbook, by Richard Ford published

Mary Tolan selected Registered Young Dietician of the Year by the American Dietetic Association for her speech on “Tofu—Food of the Future” at ADA national convention in Philadelphia, Pennsylvania.

Tofu Cookbook, by Sally Sheppard of Jack’s Beanstalk published

Tofu Boken, by Ted Nordquist published in Sweden; Europe’s first book about tofu.

“Soy Ice Cream—Getting Your Licks In” published in *Vegetarian Times*.

August:

“Soyfoods: The Future Is Here But Are You Ready?” published in *Health Foods Business* as cover a story.

“Soyfoods: Versatile, Cheap, and on the Rise” and “A Top Quality Source of Protein” published in *New York Times*, and syndicated nationwide.

“My Favorite Tempeh Recipes” by Aveline Kushi

published in *East West Journal*.

“Delights of Tofu,” by Fox, O’Connor & Timmins published by New England Soy Dairy

Das Tofu Buch by Shurtleff and Aoyagi published in Germany

September: “Soyfoods Report” published in *Natural Foods Merchandiser*.

Home Soyfood Equipment, by Wolf, Hoffman and Keough published by Rodale Press

At SANA board meeting in California it is voted to change SANA’s name to “Soyfoods Association of North America” to broaden our scope and support base.

SANA and The Soyfoods Center do a major press release on soyfoods production and consumption in America to about 250 key media centers. Report is published by many in the following months. These are the first soyfoods industry statistics published in America.

October:

“Things Go Better with Soyburgers; The New All-American Food” published as a cover story by *East West Journal*

Cook with Tofu, by Christina Clarke published by Avon

John Belleme starts miso production in North Carolina

Erewhon Natural Foods and Autumn Press (publisher of *The Book of Tofu*, *The Book of Miso*) both file for bankruptcy.

November:

SANA has a booth and representative (Richard Leviton) at the World Soya Conference in Acapulco, Mexico.

New England Soy Dairy announces 28-Day Shelf Life Advantage Pasteurized Tofu in 2/3 page ad in *Natural Food Merchandiser*.

Soyfoods Unlimited advertises Tempeh Burgers in *Natural Foods Merchandiser*

San-jirushi advertises “San-J” brand natural tamari in full color full page national ads

December:

La Soya y Sus Derivados (Tofu, Miso, Tempeh), by Shurtleff & Aoyagi published by Quadernos de Natura in Mexico.

Juel Andersen’s Tofu Kitchen, published by Bantam Books for mass market distribution

“World’s Best Tofu Cheesecake” published in *Vegetarian Times*

Dec. Food Protein Council, the trade organization for soy protein producing companies, changes its name to Soy Protein Council for wider recognition.

As of Dec 1981 there were 218 tofu manufacturers in the West, including 158 in the U.S., 20 in Canada and Mexico, and 40 in other Western countries. There were 56 tempeh manufacturers, including 41 in the U.S., 3 in Canada and Mexico, and 12 in other Western countries.

The Tofu-Miso High Efficiency Diet, by Yoshiaki Omura M.D. published by Arco in New York.

Cooking with Tofu, by Mary Anna DuSablon (32 p.) published by Garden Way.

The main challenge: To build a strong soyfoods trade association. The conference was held on 8-12 July 1981. Address: Co-founder and director, Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1235. Shurtleff, William. 1981. Soynuts; The soybean’s answer to the peanut. Edible Soy Products: Pro-Nuts (Dry Roasted), Hudson, Iowa (Document part). *Soyfoods* No. 5. p. 20-25. Summer. See p. 24-25.

• **Summary:** “Pro-Nuts were conceived by two men from California in the early 1970s. After they had developed the process and were producing dry-roasted soynuts in a pilot plant in California, George Strayer, who was selling them their soybeans from Hudson, Iowa, convinced them that it would be more economical for them to build the plant where the beans were. George joined them to become one of the owners of the new business, and the plant was opened in 1970. The equipment, much of which was custom built, cost \$500,000 and the specially constructed building cost \$250,000. The company presently sells all of its Pro-Nuts in bulk bags. Their customers do their own packaging in film or vacuum-packed containers if the Pro-Nuts are to be retailed as a snack.

“Pro-Nuts resemble large, dry-roasted split peanuts; they are light in weight and neutral in flavor. More than 50 percent of all Pro-Nuts are sold plain (unseasoned), mostly to health-foods consumers who want low-salt items and eat them as is. They are also added to candy bars and trail mixes. The second best seller is salted Pro-Nuts and the third best is barbeque-seasoned. Other seasoned varieties include imitation cheddar cheese, sour cream and onion, onion, and garlic. Most of the seasoned types contain ingredients such as MSG, dextrose, hydrolyzed plant proteins, imitation flavorings, and disodium inosinate [a flavor enhancer often used in potato chips and snack foods]; they are not aimed primarily at the natural foods market. Pro-Nuts may also be coated with sugar, carob, or chocolate in a sugaring kettle. As shown in the chart (p. 24), Pro-Nuts are an excellent source of nutrients. They have a storage life of six to 10 months, versus two months for peanuts.

“Only select, large-seeded, high-protein, and low-fat vegetable-type soybeans are used to make Pro-Nuts; the present Prize variety soybeans may soon be replaced by Vintons. The natural processing methods remove the beans’ soy flavor and alter their size, shape, and texture. At nearby Agricultural Exports (owned by George Strayer), the whole Prize soybeans are size graded then run over a gravity separator to remove light and heavy particles.

“The size-graded beans are then stored in a silo adjacent to the Pro-Nuts plant. From here they are run into a surge tank and then flash dried in a standard grain dryer. Flash drying, the key to subsequent dehulling without splitting,

removes only the moisture in the soybean hull and surface of the cotyledons; this causes the hull to later flake off easily but does not make the cotyledons brittle, which can cause unwanted cracking. During flash drying the moisture is reduced from 13¼% percent down to 12 or 12¼% percent. Now the beans are run through an abrasive huller-splitter, a specially designed and built 18-inch-diameter vertical axis mill; its construction and operation are described in detail in our book *Tempeh Production* (page 33).

“Now the beans are run through an aspirator which uses a vacuum to suck off the light hulls, hypocotyls (germs), and other lightweight particles. They then go into a size grader which separates off any whole beans and sends them back to the huller-splitter. The remaining cotyledons run through a Hart Carter aspirator, and finally into a holding bin; by now 70 to 80 percent of the hulls have been removed. The beans are next soaked in hot water for 30 minutes in a 25-foot-long tank, where they are moved along by a screw conveyor. This hydrates the beans and allows more of the hulls to be floated off in an overflow system. These overflowed hulls are dewatered on a Sweco vibrating screen.

“From the discharge end of the soak tank the beans are run into a long continuous tube cooker, in which they are totally immersed in hot water (no chemicals are added) and cooked at 150 to 200 psi for 10 minutes; this causes the beans to expand greatly. After being run onto another Sweco vibrating screen, which separates the small beans and splits them from the whole cotyledons, the cotyledons are run into a dryer-toaster, a closed metal compartment about 60 feet long with a square cross-section about 4 feet wide and 2½ feet high. On a stainless steel wedge wire screen the beans are vibrated and bounced along the length of the toaster. Hot air from side ducts at 6- to 10- foot intervals is blown up through the layer of beans to roast them; the initial temperature of the air is 455°F (234°C), the final temperature is 300°F (148°C), and the transit time is 12 minutes.

“At the discharge end, any dark or overroasted beans are sorted out one by one in a falling stream with a Sortex separator. The roasted beans are then run into a Sweco vibrator, which separates out three sizes of split cotyledons called ‘soy bits.’ The whole cotyledons go into a horizontal axis tumbler where, to make seasoned soynuts, they are sprayed with heated, partially hydrogenated shortening, then sprinkled with salt or seasoning; the oil helps the powdered seasoning to stick to the soynuts. The ‘soy bits’ are used by the candy and baking industries. Finally the plain or seasoned soynuts are bagged in bulk in poly-lined paper sacks, which are first sealed then sewn closed. In June 1980, each 50-pound bag wholesaled for \$25, or \$0.50 per pound. Working three to four days a week, the plant produced 185 bags per day, or 32,375 pounds of soynuts a week.

“Other Oil-Roasted Soynuts: America’s largest producer of oil-roasted soynuts is General Nutrition Mills in Fargo, North Dakota. They started production in 1971 and now

make roughly two million pounds a year of finished soynuts in five flavors (salt-free, salted, barbecue, garlic, and onion) which they sell nationwide under their Golden Harvest brand at their 800 retail outlets, General Nutrition Centers. The soynuts are generally sold in 12-ounce Mylar bags, 36 bags to a case, but they also do private labeling (co-packing) and bulk wholesaling in 50-pound sacks. The product is made without precooking. Whole soybeans (with the hulls on) are simply soaked, dried, deep-fried, and flavored.

“The Subama Food Company, which began production in 1971, makes oil-roasted products brandnamed Soynuts in unsalted, salted, and salted-with-herbs flavors; the latter is the best seller. They use large vegetable-type soybeans grown on their own farm and package mostly 25- or 50-pound bags, but also do some one-pound bags. They use a lot of their own soynuts in the granola products that they produce, and also make a soynut butter, sold mostly to co-ops in 30-pound pails.

“The Malt-O-Meal Company makes oil-roasted soynuts that are marketed under the brand name Soy Town to health and specialty food stores and under the brand name Soy Ahoy to chain stores. Sold as large dehulled cotyledons in salted, unsalted, barbecue, and garlic flavors, they are packaged in jars, eight ounces of soynuts per jar. Whole soybeans are soaked, cooked, split, dehulled, deep-fried in cottonseed oil, flavored, cooled, and bottled in jars. Production started in about 1970.

“Editors Note: For a copy of the list, ‘Makers of Soynuts in North America’ compiled by William Shurtleff, send a stamped, self-addressed envelope to *Soyfoods*.” Address: Soyfoods Center, Lafayette, California.

1236. *Whole Foods Source Directory*. 1981--.. Serial/periodical. Santa Ana, California. Hester Communications, Inc. Frequency: Monthly.

• **Summary:** Each year the July issue of *Whole Foods* was the “Source Directory” for the next year, e.g. “1981-82 Source Directory published in July 1981.” Each was an industry directory. Soyfoods Center owns the 1981-82, 1982-83, and 1984-85 source directories. Address: 1700 East Dyer Rd., Suite 250, Santa Ana, California 92705.

1237. Sklarz, Eleen. 1981. Vegetarian stakeout: Surveying restaurants in the southland that feature meatless menus. *Los Angeles Times*. Aug. 25. p. I1, I14.

• **Summary:** Today vegetarian restaurants are widely available. In Los Angeles County: Butter Thief (Venice): Known for its vegetarian pizza. Comeback Inn (Venice): Includes a “bistro burger” with tofu, and wok-fried vegetables with tofu. Follow Your Heart (21825 Sherman Way, Canoga Park).

Golden Temple Conscious Cookery of Los Angeles (7910 West 3rd St., Los Angeles): “This is one of the oldest of vegetarian restaurants, with other locations throughout the

United States and Europe.” “The restaurant is collectively owned by Sikh Pharma, a religion founded in India 500 years ago.” The “Marrakesh Vege-Kebab” is a broiled vegetable and tofu kebab.

Govinda’s (9624 Venice Blvd., Culver City). Meyera (Santa Monica). Natural Fudge Co. (Hollywood; Among other entrees are tofu platters). Organic-ville Vegetarian Restaurant (Los Angeles). Our Contribution (Van Nuys; serves a tuna sandwich). Paru’s Indian Vegetarian Restaurant (Hollywood). Two Worlds Kosher Vegetarian Restaurant (8022 West 3rd St., Los Angeles; all the dishes are kosher. If you like soybeans, this is the place for you. “Two Worlds offers soy chicken, soy scallops, soy steaks, soy fish, and even soy chicken chow mein”).

Orange County: Mother’s Market and Kitchen (Costa Mesa).

San Diego (City): Cornucopia (112 W. Washington St.; Omelet choices include tofu and mushrooms. The whole-wheat spaghetti has tofu as an ingredient). Kung Food (Serves sandwiches and dinner entrees made with tofu; tofu tostada; tofu-vegetable enchiladas, and braised tofu over brown rice, served with guacamole and *tabbouleh*). Peaceable Kingdom (Serves spring rolls stuffed with stir-fried vegetables and tofu, with sweet-and-sour sauce. Also creative sandwiches with ingredients including tofu). Prophet International Vegetarian Restaurant (Serves miso soup).

A large cartoon shows a rabbit seated at a table, with knife and fork, launching into a large vegetarian entree.

1238. Gooch’s (Mrs.) Natural Foods Ranch Markets. 1981. Display ad: Once all food was natural. What Happened? Grand opening. *Los Angeles Times*. Aug. 27. p. OC_D16.

• **Summary:** A stunning full-page ad. “Announcing the natural food store the size of a supermarket.” “Mrs. Gooch’s philosophy: Our products contain: No chemical additives. No unpronounceable preservative agents. No artificial flavorings. No artificial colorings. No sugar and no white flour.”

In the lower right corner is a box featuring Hain mayonnaise, 24 oz. \$1.19. “Family-owned Hain Pure Foods has been in business since 1926. Of their numerous quality products, we have chosen to offer this cold processed mayonnaise made with cold pressed soy oil, fresh eggs, cider vinegar, honey, sea salt and lemon juice. It is incredible on sandwiches or salads. 24 oz. \$1.19.” An illustration shows a hen, seated on either a nest or a burger, atop a tall jar of Hain Mayonnaise.

Addresses for three of Mrs. Gooch’s stores are given, in West Los Angeles, Hermosa Beach, and Northridge.

1239. McNeese, Pat. 1981. Questions? Read on [A list of books about healthy foods]. *Washington Post*. Aug. 27. p. E1, E26. [30 ref]

• **Summary:** The books listed here are a good introduction to the subject of healthy and natural foods. Includes books

on whole foods, whole grains, macrobiotics, vegetarianism, and soybean products. “Serious vegetarians and lovers of Oriental cuisine will want to take a look at, if not own, three thoroughly fascinating and informative books about how to prepare and make the best use of three important soybean products: ‘The Book of Miso’ (Autumn Press), ‘The Book of Tempeh’ (Harper & Row), and ‘The Book of Tofu’ (Autumn Press), all by William Shurtleff and Akiko Aoyagi. Aoyagi creates the recipes, which work better than those we’ve tried in some other recipe books mainly because she doesn’t try to make the principal ingredients taste too much like something they’re not (although even she fails to make tofu palatable as a dessert, in the recipes we tried). What makes these books seductive for cookbook buffs is the research, which is Shurtleff’s bailiwick; he tells you more than you could ever want to know about a subject, but he sure keeps you reading...”

1240. Brown, Judy. 1981. Health foods—Finding their way onto supermarket shelves. *National Food Review*. Summer. p. 18-19. NFR-15. [9 ref]

• **Summary:** “Safeway, the nation’s largest supermarket chain, plans to add health food departments to 200 stores this year... The health food industry has grown from 1,000 stores with \$140 million in sales in 1970 to 6,600 stores with over \$1.6 billion in sales in 1979, according to a Frost and Sullivan report and a survey conducted by the industry publication *Whole Foods*...”

“In a USDA 1980 survey, ‘Consumer’s Food Related Behavior, Attitudes and Motives,’ researchers found that 26 percent of the 1,353 consumers surveyed in a national random sample shop in health food stores. In another 1980 national family food study conducted by Yankelovich, Skelly and White—an independent national research firm—1 out of 3 of the 1,221 respondents had purchased natural food. The same research firm found that 68 percent of the respondents say that natural foods are healthier than processed foods, and 26 percent strongly agreed that supermarkets should offer a larger, more varied selection of natural foods. USDA’s 1980 survey found that 30 percent of the respondents who shop in health food stores did so because they could not find the products elsewhere.” Address: USDA.

1241. Price, Charlene C.; Brown, Judy. 1981. Organic certification programs. *National Food Review*. Summer. p. 31-32. NFR-15.

• **Summary:** “In 1941, Robert Rodale, a prominent figure in the health food movement, pioneered America adoption of organic farming practices patterned after organic farming research in Britain.

“In the early 1970’s, he introduced standards for certifying organic foods... The farmer was visited personally by a Rodale representative, and technicians from an independent testing laboratory tested soil samples, water

supplies, and plant tissue. If qualified, the farmer was permitted to use the label 'Certified by Organic Gardening and Farming.' Although Rodale's program ended in 1973, his standards are the basis for several current programs.

"Regional organic certification organizations began to develop in 1973. Currently, there are about 22 active U.S. private organic farming organizations to provide informational exchange among members, certify and inspect organically produced crops, and help market and distribute organic crops throughout the Nation.

"The International Federation of Organic Agriculture Movements (IFOAM), formed in 1972, serves as an international promoter of the aims and principles of organic agriculture, as well as a coordinator of organic farming developments. It is comprised of 80 member groups in 30 nations.

"Attempts to enact Federal legislation on organic foods have been unsuccessful... The Federal Trade Commission (FTC) began a full-scale review and analysis of organic and natural advertising claims in 1974...

"Although no standards exist for organic foods on a national level, California and Maine have recently passed legislation patterned after the Oregon Food Rule, which establishes standards for foods that are advertised and/or labeled 'organic.' Oregon, in enforcing the rule which has become a model by many private farming organizations, has enforcement powers, regularly tests produce during store inspections or on request, and mediates disputes concerning 'organic' claims."

1242. *New York Times*. 1981. Westchester / This week. Sept. 13. p. WC22.

• **Summary:** An illustrated lecture in White Plains, New York, titled "What is Naturopathic Medicine," by Dr. Sidney Saffron, will be presented by Huxley Institute for Biosocial Research, Westchester Chapter, and Natural Food Associates of Westchester. Tomorrow at Trinity Lutheran Church, Bryant Ave. and North St., at 8 P.M. \$2, but \$1 for members.

1243. Corn Country Whole Foods, Inc. 1981. Market Street: Natural foods with a difference (Catalog). 132 South Market St., Champaign, IL 61820. 24 p. Index. 28 cm.

• **Summary:** This natural foods, vegetarian catalog is printed on beige paper with black ink. Corn Country is now distributing products made by many other companies. Interesting products: (1) Stoneground flours: Soy flour-full fat (OG = Organically Grown). Chickpea (garbanzo) flour. Our "old fashioned granite stone mills keep the flour at the lowest grind temperature..." Soybeans and chick peas are preheated before grinding. (2) Beans: Soybeans OG. Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans (for sprouting). (3) Peanut butter. Almond butter. Sesame tahini. (4) Sea vegetables (10 types). Westbrae miso (7 types). (5) Light Foods: Tofu. Marinated

tofu. "Soyproducts are becoming an increasingly attractive source of protein throughout the world... We offer a small variety of soy products." (6) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Miso (red or white). Tamari (with dispenser to quarts). (7) Market Street meals (vegetarian): Nutburger. Soyburger. Chick 'n sea burger. (8) Nutritional (brewer's) yeast (20 lb to 125 lb): "These yeasts are primary yeasts cultured on molasses for human consumption. They are not a byproduct of petroleum, or paper industries." Sold in powder or flakes. (9) Natural oils: Sesame oil. Safflower oil. (10) Seeds. Alfalfa seed for sprouting. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. (11) Market Street shoyu almonds, suns (sunflower), cashew pieces. (12) Soy & corn "nuts": Soy nuts salted. Soy nuts plain. (13) Market street mixes (unsulfured fruits and natural nuts): Sweet & shoyu mix. (14) Literature: 26 Talking Foods pads. (15) Dr. Bronner's soap (14 types). (16) Kitchen help: Tofu kit. Sprouter lids. Wok set. Address: Champaign, Illinois. Phone: 217-359-8843.

1244. *Vegetarian Times*. 1981. Erewhon (Ad). No. 49. Sept. p. 35.

• **Summary:** "At Erewhon, quality is a tradition. Beginning as a small retail outlet, where education and good food went hand in hand, Erewhon has evolved into a producer and distributor whose standards lead the natural foods industry.

"Since the quality of life is directly influenced by what you eat, Erewhon is committed to developing improved sources of wholesome products. By promoting the use of traditional staple foods, Erewhon provides the opportunity for an ever-increasing number of people to improve their well being..."

1245. **Product Name:** Westbrae Natural Johsen Shoyu Tamari.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1981 September.

Ingredients: Wheat, whole soybeans, salt.

Wt/Vol., Packaging, Price: 12.7 fluid oz glass bottle.

How Stored: Shelf stable.

New Product-Documentation: Ad in *East West Journal*. 1981. Sept. Inside back cover. "Soy sauce made complicated. Why it takes 18 months to brew Westbrae tamari."

Ad in *Macromuse*. 1986. Summer. p. 5. "Westbrae's Johsen Shoyu is the *real* shoyu.

"Recently, some big Japanese companies that have never brewed soy sauce before have begun to sell in the Natural Food Markets. You may be able to buy some soy sauces for less per tin than Westbrae's Johsen shoyu." At Johsen, shoyu is aged for 2 full summers in Japanese cedar kegs.

Photos show: (1) Westbrae tamari and shoyu. (2) Various

Westbrae soy sauce products.

1246. Flinders, Carol. 1981. 'Whole Foods Guide' presents facts on growing, processing: Notes from Laurel's Kitchen. *Hartford Courant (Connecticut)*. Oct. 14. p. E4.

• **Summary:** In Jan. 1978 *Whole Foods* magazine was launched. The magazine's staff were veterans, and very dedicated. Each issue concentrated on one subject: whole grain flours, edible oils, soyfoods, etc. "The investigative approach was invariably fair.

It was a sad day when, in Sept. 1980, the magazine was sold.

1247. New England Soy Dairy, Inc. 1981. Put time on your side. New Soydairy cookbook increases tofu use. *Erewhon Monthly*. Oct. p. 2-3.

• **Summary:** These are the titles of two full-page ads. The first shows a package of Soydairy tofu "with the soydairy 28 day shelf life advantage." The second shows a man holding a cookbook titled "Delights of Tofu." Address: Greenfield, Massachusetts.

1248. Smith, Patricia J. 1981. Re: Early history of Erewhon, and Michio Kushi's teaching. Letter to William Shurtleff at Soyfoods Center, Nov. 2—in reply to inquiry. 1 p. Typed, with signature.

• **Summary:** Erewhon began as a small retail store on Newbury St. in April 1966. It was incorporated as a distributor/manufacturer in March 1969. Michio Kushi began teaching in New York in 1954. Address: New England Regional Manager, Erewhon Inc., 3 East St., Cambridge, Massachusetts 02141. Phone: (617) 354-2001.

1249. Cowen, Peter; Doherty, William F. 1981. Bankruptcy petition filed by Erewhon Inc. *Boston Globe*. Nov. 18. Economy section.

• **Summary:** "Erewhon Inc., a Cambridge-based natural food store chain, is seeking protection from its creditors while it reorganizes its financial affairs. In a petition filed in federal court here under Chapter 11 of the Bankruptcy Act, Erewhon listed 551 creditors to whom it owes a total of \$1.5 million. The firm also said it has \$4.4 million in assets and another \$3 million in general claims against it.

"The major creditor is the Commercial Trading Corp., which is owed more than \$1 million. Under a factoring agreement Commercial Trading has a secured interest in Erewhon's inventory and accounts receivable. Judge Harold Lavien granted Erewhon permission to continue paying its 130 employees while the case is pending. The reorganization petition under which Erewhon will continue to operate the business was filed Nov. 10 by Michio Kushi, president of the firm. While it remains under the protection of Chap. 11, Erewhon will be run by Arthur Blasberg Jr., a business consultant and attorney.

"The privately-owned firm has three stores in Massachusetts and distributes its products worldwide... According to company officials, its sales reached about \$18 million recently but had been falling off sharply to the point where it now has about \$7 million to \$8 million in annual sales.

"The firm's attorney, Frederick G. Fisher of Hale & Dorr, told the bankruptcy court in arguing for Chap. 11 protection that the company's problems were caused by its expansion 'beyond its ability to find capital.' In addition, Fisher said, 'Mr. Kushi was not able to provide it with day-to-day management. He's a philosopher, teacher and writer and he was absent from the business on trips.'" Address: Globe staff, Massachusetts.

1250. Belleme, John. 1981. Update on work with miso in North Carolina (Interview). *SoyaScan Notes*. Nov. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon Trading Co. recently filed for Chapter 11 bankruptcy protection. They are in receivership and on the verge of bankruptcy; they are no longer delivering products to stores, only manufacturing. Erewhon owes Mr. Kazama of Mitoku \$400,000 plus the shipments on the docks.

John plans to sell a miso fermentation kit, consisting of koji plus instructions for making miso at home. Address: Route 5, Box 258, Rutherfordton, North Carolina 28139. Phone: 704-749-9537.

1251. Burns, Ken. 1981. Re: George Ohsawa and a brief history of macrobiotics in America. Letter to William Shurtleff at Soyfoods Center, Dec. 9—in reply to inquiry. 7 p. Typed, with signature. [1 ref]

• **Summary:** An excellent, in-depth history by a very knowledgeable source, who occasionally teaches a course in Boston on the history of macrobiotics in the USA. With numerous fond personal recollections and character sketch of Ohsawa. 1959 Dec.—Ohsawa first visited the USA. 1960 Jan.—He published, in mimeograph form, his astonishing book *Zen Macrobiotics* in English in New York City. "Although not in great detail, here he introduced miso, tamari, and tofu to the general public. The first two especially quickly become essential ingredients in the diet of almost all macrobiotic people in the US.

"During January, February, and March [1960] he lectured extensively at the Buddhist Academy in New York City. He returned to the US in July and lectured at the First American Summer Camp on Long Island daily for two months.

"The Second American Summer Camp was held in July and August of 1961. I am not sure whether he was present or not. This was in Wurtsboro, New York. In that year also, thirteen macrobiotic families left New York and moved to Chico, California on his advice. The next year, 1962, they founded the first American macrobiotic food distribution and

processing center in this country.

“In 1963, in the summer he came to the US again and lectured in Boston, NYC, and at the Chico Summer Camp.

“In 1964, he lectured at the Big Sur Summer Camp.

“In 1965, he lectured at Mayoro Lodge near Pulga, California.

“In 1966, on April 24th [or 23rd] he died in Japan.

“All in all, George Ohsawa visited this country either five or six times, each time lecturing, and speaking to the people individually without rest. He was ceaselessly active. I have heard many anecdotes concerning him during that period. As best I can determine, his affect on people was quite simply shattering—they had never seen anything like it.

“According to Madame Ogawa (who spoke in great and loving detail of him at the 1981 French Meadows Summer Camp) he was a very sharp dresser and had quite an eye for beauty in the female of the species. She was so obviously still in love with this ‘terrible man.’

“Jacques DeLangre... never tires of telling about the time when they were descending the mountain after a long and intensely yangizing summer camp. Their car rounded a bend and there!, suddenly!, was a huge patch of luscious juicy *blackberries!* The car as though it had a mind of its own, screeched to a halt, all the doors flew open, and all the passengers were catapulted into the middle of that patch. It would be hard to imagine a clearer, cleaner-cut example of the attraction of yang to yin. Their ecstatic reverie was broken, a few moments later, by the sound of another car coming around the bend. ‘Oh my God, it’s Ohsawa himself; what will he say?’ (In those days people were, understandably, a little naive in their application of yin and yang.) Well, that second car did just exactly what the first one had done—the screeching halt, the doors flying open, and of a sudden there was George Ohsawa right in the middle of that patch too, crying out in his basso profundo voice, ‘Oh blackberries, they are sooo delicious!’

“That voice—possibly there is the key to understanding Ohsawa’s impact in this country; I didn’t personally meet him; he died about a month after I began macrobiotics in 1966. But I have heard him on many tapes, poorly-recorded as most of them were. And I have spoken to others who did know him personally, and sooner or later they get around to mentioning his voice. Peter Magnusson here in Boston describes it as the kind of voice that rattled the windows. I have done a course here in Boston I call ‘The Healing Power of the Spoken Word;’ and for that course I have listened to all the recordings of the great speakers of this era that I can get my hands on—Kennedy, Churchill, Roosevelt, William Jennings Bryan, John L. Lewis, etc. Probably the best orator in the world today (or was anyway, I haven’t heard him lately) is Fidel Castro. His is a warm, rich, full voice, capable of a startling range of thoroughly human emotions—from the righteous indignation and anger of an oppressed people through endless shades and nuances to a profoundly warm

and compassionate voice that might be that of your very best friend. Take that voice in account and you can understand Castro’s success against seemingly insurmountable odds in Cuba. Well, I can tell you of an even better voice—that of Ohsawa. Peter Magnusson goes on to say that when he spoke it seemed as if the very world itself was speaking. As I have said above, his was a profoundly rich, deep voice, ranging from bass to baritone. But at the same time it was very delicate, sensitive, and poised, as ready to go up as down, as ready to go left as right—flexible! But the one quality that his voice had that I have never heard equaled I can sum up with one adjective—Vibrant.

“Probably this is not the kind of material you can use in your book, but I have taken a lot of time here on it anyway. The reason is that all the discussions I have heard about Ohsawa and his impact on this country have centered on what he said and not how he said it. Otherwise, how are we to explain how he was able to inspire so many people, along with Michio and Aveline Kushi, Herman and Cornelia Aihara to literally give up everything and come to a strange land to struggle against apparently insurmountable odds. Because that’s what they did, arriving here penniless, operating on a wing and a prayer so to speak. And it is to them that we must go in the next chapter of this little story.”

Note: People were also attracted to the great sense of happiness, vitality, love of life (*joie de vivre*), and purpose that Ohsawa radiated. Continued. Address: Boston, Massachusetts.

1252. Burns, Ken. 1981. Re: George Ohsawa and a brief history of macrobiotics in America (Continued—Part II). Letter to William Shurtleff at Soyfoods Center, Dec. 9—in reply to inquiry. 7 p. Typed, with signature. [1 ref]

• **Summary:** Continued: “Michio Kushi, giving up a promising career in some area of international politics, arrived in New York in 1949. Still a little uncertain, and actually quite new to the macrobiotic way of life, himself, he did not immediately begin to teach the macrobiotic way of life on a full-time basis. Besides, his English wasn’t sufficient, and he had to work full-time to support himself. To do this he engaged in many types of work such as managing a department store, elevator operator, and other types of odd jobs. Also, at this time, he had some connection with Columbia University. (Whether as a student or as a teacher or both, I am not quite sure. Maybe, if this is important, you could contact him, but I don’t know if he would have the time to answer you.)

“In 1951, he was joined by Aveline (Tomoko) Kushi who had lived for a year and a half in Ohsawa’s school ‘Maison Ignoramus’ near Tokyo. In 1961, instead of going to Chico as many other macrobiotic families did on the advice of George Ohsawa, they stayed in New York, not long afterward finding their way to Boston. Just how this happened I am a little uncertain. According to Peter

Magnusson whom I have mentioned above, there was a certain fellow, whose name is probably forever lost, who was from this area and who convinced them that this was where they would have their greatest success. After all, the great ideological movements, the ones that had affected this country most profoundly, had come, mainly, out of New England.

“So, it was in 1963, I think, they arrived here, living successively in Cambridge, Wellesley, and Brookline. From this time dates the tradition of study house—always they had a full complement of ‘students’ with them—many of whom were withdrawing from psychedelic drugs and perfectly outrageous ‘lifestyles.’ They must have thought Americans were very strange people, indeed, (At least the ones they knew.) But if they didn’t, their neighbors sure did. By some magic or sleight-of-hand, they always managed to end up in some rather elegant houses in some rather elegant neighborhoods. Thus, in one or more cases, they were asked by the authorities to move.

“But, sure enough, it was here in the Boston area that they had found a medium in which they could really function well. Not long after, regular lectures were started in the Arlington Street Church where we would troop dutifully and eagerly in under the watchful eyes of a bust of William Ellery Channing, one of the founders of American Unitarianism. In the beginning, there weren’t many people present at these talks—maybe six, eight or ten. (And even in the spring of 1967 when my wife and I arrived after spending a year in Detroit knocking our heads against this strange thing called ‘macrobiotics’ there might be only twelve, fourteen or sixteen.)

“But the spirit of adventure and camaraderie was simply exquisite. And the lectures were tremendously exciting—one moment we would be on the outer rim of the Milky Way Galaxy, examining its structure, and the next moment we would be examining the spirals on our fingertips. People who were here when we got here and whose names you may have heard were Evan Root, Bill Gleason, and Paul Hawken (and by the way, I think Paul Hawken has a company out there in your area—maybe you can contact him). Also Joe Leis and Jim Gronemeyer whose whereabouts I don’t know. Not long afterward came Bill Tara and Ron Kotsch who are still active in macrobiotics. The Word was out and people were coming from everywhere.

“In 1965 Erewhon was started, also on a wing and a prayer, right in the Kushi’s home in Brookline. It moved in 1966, I think to a location on Newbury Street [April 1966 to 303-B Newbury St., below street level] where I used to see Mr. Kushi putting rice and aduki beans in little white paper bags. Evan Root and Paul Hawken originally managed the store [Evan first, then Paul Hawken more than a year later] and later on Bill Tara also had a hand in it. But it was definitely Paul Hawken who set his stamp on the store, and who had the most to do with it becoming what it eventually

became—the largest handler of macrobiotic and natural foods in the country. At present there is a little difficulty there, but if you know the history of Erewhon, you cannot help but be convinced, as am I, that everything will come out all right.

“Also in 1965, certainly in 1966, Mr. Kushi began to travel around the country giving talks on macrobiotics as well as consultations. I wonder if his experience in other cities was anything like his experience in Detroit. It simply never dawned on us that he might need any money for traveling expenses, etc. I wouldn’t be surprised if on a lot of these tours Michio Kushi didn’t arrive back home with a lot less money than he started out with.

“But now I must get down to the gist, the ‘nitty-gritty’ of this story. There is something that is not explained here. The tremendous success of macrobiotics in this country is not really explained here. Of course some people will say that macrobiotics has not been a tremendous success. But I say it has. If you will look at its history from beginning to end, noting that it has never received any funding or any support from powerful organizations, that it has always operated on a wing and a prayer (I’ll use that phrase again), then I think you can agree with me that its success has been miraculous.

“Well, one of the chief reasons for that is to be found in the behaviour of Mr. Kushi. Over the years he has literally given himself away, literally used himself up so many times over that you would swear there is simply nothing left to use up anymore. He has seen hundreds of thousands of people in formal consultations and as many more in informal consultations. And an awesomely large percentage of these consultations have been with crazy, sick, and desperate people anywhere and any time of the day or night. (And I ought to know, I was one of them.) I am not being overly sentimental here, nor am I stretching anything to make something seem true that isn’t true. As a matter of fact, for various reasons I sometimes wish it weren’t true, because for some people it has led to a ‘cult of the personality’ that limits their own development.

“To round out the list of macrobiotic developments that are more or less Boston based: The *East West Journal* commenced publication in January of 1971, its purpose being ‘to explore the unity underlying apparently opposite values: Oriental and Occidental, traditional and modern, visionary and practical.’ I think that’s pretty well what it has done; and in the process it has helped more people to substantially change their lives than any publication I know of. Although many dedicated and talented people have been involved with it over the years, the two people who have had the most to do with creating and directing the *East West Journal* have been Lennie Jacobs and Sherman Goldman.” Continued. Address: Boston, Massachusetts.

1253. Burns, Ken. 1981. Re: George Ohsawa and a brief history of macrobiotics in America (Continued—Part III). Letter to William Shurtleff at Soyfoods Center, Dec. 9—in

reply to inquiry. 7 p. Typed, with signature. [1 ref]

• **Summary:** Continued: “In 1972, the East West Foundation was established in order to provide seminars and other forms of learning experience for the general public. In the ensuing ten years it has organized hundreds of full-scale programs of macrobiotic instruction in which tens of thousands of new-comers to the macrobiotic diet and way of life have participated. Since 1974, the annual highlight of these activities has been the Amherst Summer Program. Here, each year, an average of three to four hundred people from all parts of the United States and from many other countries in the world have gathered to study the philosophy of yin and yang, macrobiotic cooking, Shiatsu, Oriental medicine, and Oriental culture. Over the years, the person most responsible for the majority of the activities of the Foundation has been Ed Esko (whose wife, Wendy, has written a very popular book on macrobiotic cooking), although he is not currently directing it.

“In the Fall of 1978, the Kushi Institute opened its doors. Under the very able and patient direction of Olivia Oredson it has offered an intense, disciplined, and complete program of macrobiotic studies to thousands of students from the United States and from many foreign countries. At present, under the direction of Bill Tara, it is continuing these activities, and in the near future will expand into a full-fledged college for macrobiotic studies.

“About 1953, Herman Aihara came to this country [from Japan], finding his way to New York City where he was later joined by Cornellia. There, they engaged in various activities with Michio and Aveline Kushi. I think they all had a hand in a restaurant called Musubi in the late 1950s or early 1960s; but I am very sketchy on this. I do know that for a while there was an Ohsawa Foundation on Second Avenue. At any rate, New York City was proving difficult for a philosophy of life that centers around home, family, regular meals, etc. So it must not have been with any great reluctance that, on Ohsawa’s advice, they left for California in 1961.

“Herman and Cornellia first went to Chico. Later they moved to San Francisco where they lived until about 1970. Since that time, they have lived in or near Oroville. Sometime in the late 1960s, Herman, sometimes accompanied by Cornellia, began to lecture in various cities and towns in California as well as others such as Portland [Oregon], Seattle [Washington], and Vancouver [British Columbia]. Those must have been hard times for them. More than once, up there in Seattle, I handed him the receipts for two days of lecturing knowing there was not enough there to cover his round-trip expenses back to San Francisco. (It begins to dawn on me, ever more and more poignantly, how much of the macrobiotic movement has been done on a shoestring.)

“In 1970, they embarked on the first of their yearly nation-wide macrobiotic teaching tours. On these tours they have usually covered about 20,000 miles, visiting towns and

cities in all sections of the country, and teaching macrobiotic philosophy and cooking. I think it safe to say that the Aiharas know this country in a way that few people know it.

“Also, in 1970, they initiated the George Ohsawa Macrobiotic Foundation (poetically known as GOMF). The purpose of this was to promote understanding and provide information on the macrobiotic diet and way of life, chiefly through publications. In addition, throughout most of the 1970s and in 1980 and 1981, they have conducted the Vega Institute, a residential program for the study of macrobiotics.

“Last but not least they have organized eighteen summer camps, the last eleven of which have been held [starting in 1970] at French Meadows in the Tahoe National Forest. Now, I am somewhat of a veteran when it comes to macrobiotic seminars, programs, summer camps, etc; and on the basis of that, I will simply have to say, after attending the last three camps, that the version of macrobiotics they present there is the experience of a lifetime. I have never seen anything like it. It is sublime. The life of anyone who attends is deeply touched—deeply changed.

“Well, those are the bare facts of the case. But once again, they do not tell the full story. So I am going to try to describe something that is almost impossible to describe: Herman and Cornellia have sat and listened to thousands of tales of woe, patiently answered uncounted impertinent, even insane questions, endured all kinds of chaotic behavior, and even suffered through more than a few insults and accusations—in short they have done all the things they have had to do to help the kind of people they have been dealing with—without complaining. In fact, they have usually managed to maintain a pretty good sense of humor throughout all this. And they have not asked for (and usually not received) anything in return either: ‘Oh Herman, I almost forgot, here is the money we took in from the seminar this week-end. Hm, gee, it’s only sixty dollars, that’s not much money is it...?’ ‘Oh..., that’s all right—don’t worry!

“To be sure, there are people who don’t want fortune who do want fame (recognition) or power. As far as I am able to discern, though, they haven’t sought those things either. In spite of all their efforts, all their achievements, all the help they have given people, they have always been modest, humble, and unassuming. Herman would kill me if he were to see this in print. If I’m not mistaken (and I hope I’m not getting too sentimental again), isn’t this the kind of behavior that we were all taught to look up to in our Sunday-school classes? (And in our public school classes too, when they still taught morals, ethics, and values?) It’s not flashy, glamorous stuff that you can turn around and dazzle other people with. Indeed, it has taken me many, many years to see this picture. But when I saw it I was floored. So this is the version of macrobiotics they have taught me and many other thousands of people.” Continued. Address: Boston, Massachusetts.

1254. *SoyaScan Notes*. 1981. Chronology of soybeans, soyfoods and natural foods in the United States 1981 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. *Soyfoods* magazine issue No. 4 published. Silver cover. 10,000 copies published. Steve Fiering loans SANA money for mailing it and agrees to make a loan for a test mailing.

Jan. Union activity begins at New England Soy Dairy.

Jan. Boxed tofu (1 lb. vacuum packed in a box with a window) first made by Zakhi Soyfoods in Fort Wayne, Indiana. This important innovation of packaging tofu in a box was later employed by New England Soy Dairy (1982), Quong Hop & Co. (1983), Swan Gardens (1983), and White Wave (1985).

Jan. Hain Food Co. starts nationwide color ads for Natural Onion and Jalapeno (Soy) Bean Dips.

Jan. Travis Burgeson of Pacific Tempeh near San Francisco, CA, introduces the world's first commercial tempeh burger.

Jan. Paul's Tofu & Tempeh, the first European tempeh company in Europe outside of the Netherlands, opens in England.

Jan 20. Ronald Reagan inaugurated as president of the United States. His Secretary of Agriculture is John R. Block. The regulatory climate in Washington, DC, begins to shift toward less federal regulation and more encouragement for industries to regulate themselves. The Republican administration favors free-market policies with less government involvement.

Jan. 23. Legume, run by Gary and Chandri Barat, is incorporated in New York, then that month moves to Verona, New Jersey.

Feb. 2. Island Spring in Washington state becomes America's first unionized tofu plant.

Feb. San-Jirushi International starts its first major American ad campaign using the slogan "San-J is the real tamari." The full-color, full-page national ads aim to clarify the confusion between tamari and shoyu created by the macrobiotic movement.

Feb. Soyfoods Unlimited tempeh plant starts operation in San Francisco area. It is the most modern U.S. tempeh plant, although output is small.

Feb. Vitasoy soymilk and Morinaga tofu start to be imported and sold in the USA from Hong Kong and Japan respectively, immediately after the FDA lifts its ban on aseptic Tetra Pak type cartons. Morinaga tofu was sold by Beech Nut California Corporation, a joint venture with Beech Nuts Food Corp., established in 1977 in San Jose, California.

Feb. "Soyfoods Catching On" by Judith Brown published in *USDA National Food Review*. About tofu and tempeh.

Feb. Many tempeh plants switch to using GEM cultures

tempeh starter.

March 1. Svadesha Pflanzen-Feinkost, West Germany's first commercial tofu company, starts production. Founded by Swami Anand Svadesha (Rudiger Urban) in Fuerth im Wald.

March. Institute of Food Technologists meeting at New England Soy Dairy. Tour, dinner, and speeches.

March. Richard Leviton on National Public Radio's "All Things Considered" talks for 10 minutes about soyfoods to 2 million people.

March. *The Book of Miso*, by Shurtleff and Aoyagi published by Ballantine Books in a mass market paperback edition.

April. USDA decides to establish tofu standards, then announce them in the Federal Register, but this plan is dropped in September, amid controversy over changes in the School Lunch Program.

April. Dr. Cook at Kansas State University publishes a paper on the possible inhibitory effects of soy proteins on nonheme iron absorption in humans. USDA becomes concerned.

April. *Tofu at Center Stage*, by Gary Landgrebe published by Fresh Press. First tofu cookbook containing many recipes calling for use of meat.

April. Bean Machines introduces new sanitary disintegrators/ grinders for tofu and soymilk production.

April. "The Miso-Master's Apprentice," by John Belleme published in *East West Journal*.

May. "The Amazing Tofumobile," by Janice Phillip, about Wildwood Natural Foods, published in *East West Journal*. Revival of interest in small tofu shops in areas where there is a high density of interest and high food consciousness, and rediscovery of soyfoods craftsmanship.

May. *Tofu Boken* by Ted Nordquist and Tim Ohlund published by Aros Sojaprodukter in Sweden. Europe's first book on tofu.

June. *Tofu Fever in New York*, by Megan B. Murray notes that David Mintz is making 275 gallons of tofu ice cream a week. This is the earliest known publication on his work with soy ice cream. He had been making it for 3-4 months.

June. "Surprise, It's Soy" by Barbara Bassett published in *Bestways*.

June. FIND/SVP survey of the U.S. tofu industry and tofu consumer survey published. 33% of respondents in major metropolitan areas were aware of tofu and 10% had purchased it. Predicts market will grow 32% a year for the next 6 years... an over-optimistic prediction.

June 29. "Trader Vic Bergeron Offers Timely Tips for Tofu" by Rose Dosti published in *Los Angeles Times*.

July. *Soyfoods* magazine is incorporated by Richard Leviton, and offers stock.

July 8-12. Fourth Annual Soycrafters Convention at Colorado State University. 240 people from 18 nations

attend, 210 pay. First National Tofu Cheesecake Bakeoff and Soyfoods Equipment / Supplies Expo in the western world.

July. Mary Tolan selected Registered Young Dietitian of the Year by the American Dietetic Association. Invited to present speech on "Tofu—Food of the Future" at ADA convention in Philadelphia, Pennsylvania.

July. *Tofu Cookbook*, by Sally Sheppard published by Jack's Beanstalk.

July. "Soybean Ice Creams: Getting your Licks In" by Richard Leviton published in *Vegetarian Times*.

July. Soyfoods Center is working to build the world's largest library of documents on soyfoods, each with a bibliographic card, filed by author. Also building a large library of color slides on soyfoods.

Aug. "Tofu, Tofu Everywhere," by Karen Dukess published in *The New York Times*' Business section.

Aug. "Soyfoods: The Future Is Here but Are You Ready" by Alan Richman published by *Health Foods Business* as a cover story.

Aug. 12. "Soy Foods: Versatile, Cheap and on the Rise" by Lorna Sass, and "A Source of Quality Protein" by Jane Brody published in *The New York Times*, and syndicated nationwide.

Aug. "My Favorite Tempeh Recipes" by Aveline Kushi published in *East West Journal*.

Aug. *Delights of Tofu*, by Fox, O'Connor and Timmins published by New England Soy Dairy.

Aug. *Das Tofu Book*, by Shurtleff and Aoyagi published in Germany by Ahorn Verlag.

Sept. "Soyfoods Report" published by *Natural Food Merchandiser*.

Sept. *Home Soyfood Equipment*, by Ray Wolf published by Rodale Press.

Sept. 13. At SANA Board of Directors Meeting held near San Francisco, the Soycrafters Association of North America has its name changed to Soyfoods Association of North America to broaden scope and support base.

Sept. SANA and The Soyfoods Center do a major press release on soyfoods production and consumption in America to 250 key media. Many magazines publish this report and conduct radio interviews.

Sept. Okita Enterprises takes 22 tofu and bean sprout makers to Japan for a 10-day tour. SANA executives Richard Leviton and Luke Lukoskie make important contacts with Japanese tofu trade officials and publications.

Sept. USDA publishes tofu regulations in the Federal Register, then withdraws entire school lunch revisions and revokes permission given to the Santa Cruz (Calif.) school system to use tofu in school lunches.

Sept. Dr. Hirayama of the National Cancer Center in Japan announces that miso soup is effective in combating stomach cancer and stroke.

Oct. "Things Go Better With Soyburgers: The New All-American Food" by Richard Leviton published in *East West*

Journal as a cover story.

Oct. *Cook with Tofu*, by Christina Clarke published by Avon Books in mass market edition.

Oct. John Belleme's American Miso Corp. begins miso production in North Carolina.

Oct. Workers at Hinode Tofu Co. in Los Angeles go on strike for 2 weeks.

Oct. *Nasoya Tofu Cookbook*, published by Nasoya Foods.

Oct. *O Livro da Soja*, by Jane Cadwell published in Brazil by Editora Ground. One of the country's first books on soyfoods.

Nov. 10. Erewhon, America's natural foods pioneer, files for Chapter 11 reorganization under the U.S. bankruptcy laws. On 2 April 1982 Erewhon is sold to Nature Food Centers.

Nov. Autumn Press, publisher of *The Book of Tofu*, original edition, files for Chapter 11 bankruptcy.

Nov. New England Soy Dairy announces 28-Day Self Life Advantage Pasteurized Tofu in a 2/3 page ad in *Natural Foods Merchandiser*.

Nov. Soyfoods Unlimited advertises tempeh burgers in *Natural Foods Merchandiser*.

Nov. The Ministry of Agriculture and Forestry in Japan announces a Japanese Agricultural Standard (JAS) for soymilk. The soymilk boom in Japan starts.

Dec. *Juel Andersen's Tofu Kitchen* published by Bantam Books in mass-market paperback.

Dec. "World's Best Tofu Cheesecake" by Richard Leviton published in *Vegetarian Times*.

Dec. *La Soya y Sus Derivados (Tofu, Tempeh, Miso)*, by Shurtleff and Aoyagi published by Quadernos de Natura in Mexico.

Dec. *The Tofu-Miso High Efficiency Diet*, by Yoshiaki Omura M.D. published by Arco Publ.

Dec. *Cooking with Tofu*. by Mary Anna DuSablon published by Garden Way.

Dec. There are now 158 tofu manufacturers and 41 tempeh manufactures in the USA.

Dec. The Farm Vegetarian Cookbook published as *Soja Total* in German.

* Global economic activity is shifting from the Atlantic to the Pacific. In 1981 Asia passed Europe to become the largest market for U.S. agricultural products. In fiscal 1981 Japan bought \$6,700 million worth of U.S. farm products.

* Soybean breeders, which have formerly focused their research efforts on increasing quantity (yield) of soybeans, now start to give more attention to quality (composition). Increasing total protein, methionine, and oil, and decreasing linolenic acid and antinutritional factors are priorities.

* U.S. soybean exports reach their peak this year of 25 million metric tons (tonnes). By 1987 they have fallen to 18 million tonnes, a 28% drop, due largely to competition from Brazil and Argentina, and to foreign subsidies. The market

changes from a seller's to a buyer's market.

1255. **Product Name:** Bonsoy (Soymilk).

Manufacturer's Name: Bean Supreme (Importer). Made in Japan by Marusan. Imported via Muso Shokuhin.

Manufacturer's Address: New Zealand.

Date of Introduction: 1981.

Ingredients: Water, soybeans, pearl barley, kombu (sea vegetable), barley malt.

New Product–Documentation: Talk with Yuko Okada. 1992. July 16. Muso first exported Bonsoy soymilk to Bean Supreme in about 1981. This soymilk was packaged in a foil retort pouch.

April 2010. There was a national food recall of Bonsoy because of its high iodine content, which was believed to cause thyroid problems.

1256. **Product Name:** Grain Nog (Amazake-Based Non-Dairy Egg Nog) [Plain, Strawberry, or Carob].

Manufacturer's Name: Grain Country.

Manufacturer's Address: 787 Melrose Ave. (at Orange Ave.), Los Angeles, California.

Date of Introduction: 1981.

Ingredients: Amazake, vanilla, nutmeg, sea salt.

New Product–Documentation: Talk with Stuart Kerrigan. 1988. Jan. 30. Talk with David Jackson. 1988. Jan. 30. This was a product Roy Steevensz developed. He used to make it on Christmas and New Years. It was like an amazake egg nog. I think he was making it by 1981. Talk with Roy Steevensz. 1988. Jan. 30. Roy conceived of and developed this product. Sometimes we had flavors. It started out at Christmas, but we often continued during the cold months. The Grain Nog and Frostie was introduced at about the same time in 1981. Talk with Marijke Steevensz. 1988. Jan. 30. Phone: 213-851-2023. Pronounced Ma-REE-kuh. "More recently, we started to add some of the Westbrae Malted to our Grain Nog."

Note: This is the earliest known nondairy egnog.

1257. Weaver, Diana; Weaver, Purcell. 1981. *Natural foods: their preparation and use. With dietetic tables by Edmond Székely.* New York, NY: Gordon Press. *

1258. Block, Lawrence; Morrison, Cheryl. 1981. *Real food places: A guide to restaurants that serve fresh, wholesome food.* Emmaus, Pennsylvania: Rodale Press. xiii + 296 p. 22 cm.

• **Summary:** The real food places are arranged alphabetically by state, and within each state alphabetically by city. Each entry was written by a "reviewer," whose name appears at the end. For example, under California: "Glendale–Foods for Life, 504 E. Broadway. 213-249-2660. Natural wood is the decorating motif of this attractive natural foods restaurant. The tables and chairs (wood and padded seats) are custom

made. Bright lights permit reading, and the surroundings are clean and neat at all times. Mostly women dine here; there are very few children, and few men.

"The foods and drinks are top quality; they seem slightly high-priced but are apparently worth it because sales volume is high. Sandwiches are a big seller, assembled to order and served with a mixed green salad including chopped walnuts. Menus are posted on the walls and they're so extensive it takes a while to absorb them. Tuna with sprouts is very popular. There are many delightful desserts, made without sugar; carrot cake is the most popular, but others come close.

"Coffee and a substitute are available; no beer, wine or liquor. Finding a place to sit at meal time is a problem; it is recommended that you arrive early or late—Alan W. Farrant."

California (p. 6-68) is the state best represented in this book. Other restaurants in California: Hollywood—The Source, 8301 Sunset Blvd., 213-656-6388. Serves fish and chicken. The desserts contain no refined sugar. The menu states: "Only whole grains and pure honey... all our oils are cold pressed."

Los Angeles—Golden Temple Conscious Cookery, 7910 Third St., 213-655-1891. "Bright yellow paint on the outside makes this restaurant especially easy to find." Vegetarian menu. Drinks: Nectaral Rose is Red Zinger tea mixed with apple juice and sparkling mineral water. Sparkling cider is served, too, but there is no coffee or alcohol."

San Francisco: Good Earth, 2323 Powell St. Seats 250. Special section for smokers.

San Francisco: Greens, Building A, Fort Mason. This old Army warehouse has been renovated by the San Francisco Zen Center. The brochette includes tofu. Desserts, which come from Zen Center's own bakery, are extra special. Reservations are a must. Smoking permitted.

San Francisco: Real Good Karma, 501 Dolores St. A vegetarian restaurant, with many hanging plants and fresh flowers. Everything is prepared without preservatives or chemical additives, using only whole grains, cold-pressed oils, and natural rennetless cheese. Tofu is used in at least one salad. "Coffee is served but no alcohol. Customers may bring their own wine."

Florida: Oak Feed Restaurant, 3008 Grand Ave., Coconut Grove. "Under the sign of a huge carrot in the center of this artistic village is Oak Feed." "Desserts are sugar free, with the soybean cake deserving special attention." Smoking on the patio only.

Boston, Massachusetts: Sanae (which means "little sprout" in Japanese), was Boston's first natural food and macrobiotic restaurant; it opened in 1969. It has mellowed somewhat since it started, enough to serve coffee and offer dairy products in the baked goods. No meat or sugar is on the menu, which does include: Tofu stew. Miso soup with tofu. Hiziki [sic, Hijiki] topping with creamy tofu. Desserts are sweetened with maple syrup. "No alcohol. No credit cards. No smoking."

Boston: Seventh Inn, 288 Boylston St. This is the elegant, grown-up sister of Sanae. The pedigree is macrobiotic. Specializes in vegetarian and fish dishes, and it also serves tofu and eggs—but no meat and very little cheese. “Smoking permitted. MasterCard and Visa accepted.”

Many of the other restaurants are vegetarian and quite a few serve soyfoods, especially tofu. Address: 1. Novelist who has been a vegetarian for several years; 2. Nonvegetarian but health-conscious freelance writer. Both: New York City.

1259. Dalsass, Diana. 1981. Cashews and lentils, apples and oats: From the basics to the fine points of natural foods cooking with 233 superlative recipes. Chicago, Illinois: Contemporary Books. xix + 301 p. Illust. Recipe index. 24 cm.

• **Summary:** A natural foods, vegetarian cookbook. Soy-related recipes include: Sweet-simmered soys (with whole soybeans, p. 10). Soy granule soufflé (p. 30-31). Soy granule loaf (p. 31). Soy and vegetable stew (with soy granules, p. 33). Soy and carrot casserole (with soy granules, p. 34).

Chapter 18, titled “Soy Flour” (p. 147-53) contains recipes using soy flour in: Modified Cornell bread (originally developed by Dr. Clive McCay at Cornell Univ.). Oatmeal soy bread. Soy corn bread. Puffed soy casserole. Soy gingerbread.

1260. Fite, Gilbert Courtland. 1981. American farmers: The new minority. Bloomington, IN: Indiana University Press. ix + 265 p. Illust. Index. 10 p. of plates. 24 cm. *

• **Summary:** This is a history of American farming from the 1920s to the 1980s. Fite has been a small farmer himself, so he does not romanticize or glamorize the idea of being a family farmer. He explores how the rise of agribusiness, new farming technologies, and government policies have hastened the exodus of farmers from the land. Address: Athens, Georgia.

1261. Laurelbrook Foods. 1981. Wholesale order and price list. Bel Air, Maryland. 27 p.

• **Summary:** Margy Coates says (March 1992) that this is a price list with lots of illustrations by Dora that she was working on when she (Margy) left Laurelbrook. It never got used. It contains a good description of each product. One category is “Soy Products.” Address: P.O. Box 47, Bel Air, Maryland 21014.

1262. Photograph of various types of Chinese and Japanese of soy sauce sold in the San Francisco Bay Area. 1981.

• **Summary:** Back row (left to right): Superior Soy, Longevity Brand Soy Sauce, Superior Soy, and Westbrae White Tiger Tofu Sauce. The first three brands are Chinese style.

Front row (L-R): Westbrae tamari, illegible, Kikkoman

soy sauce in table-top dispenser, illegible. Longevity Brand Soy Sauce.

The Chinese brands were purchased in San Francisco Chinatown by William Shurtleff, who also shot the photo at home on Mountain View Dr. in Lafayette, California.

1263. *Tetra News*. 1981? Soymilk becomes new mainstay of product lines at Okazaki Marusan Co. Undated.

• **Summary:** Okazaki Marusan Co. was established in 1952 and has grown rapidly in the past 3 decades to become one of Japan’s five major miso manufacturers. Miso presently accounts for over 80% of the company’s total sales revenues. Mr. Michinobu Nabeta, Managing Director, says the company’s short-term objective is “to become a health foods manufacturer.”

“The first product resulting from Marusan’s R&D program for soymilk launched a decade ago was ‘Doujan’ (Chinese for soymilk) which was commercialized eight years ago. ‘Doujan contains the essence extracted from pearl barley and kelp and is a health food that is marketed through a health-conscious consumer organization that has a good reputation,’ Mr. Nabeta comments.

“It’s Marusan Tonyu (soymilk) in a 250 ml gable-top carton went on sale 2 years ago, and last year Tonyu in a Tetra Brik Aseptic 200 ml carton was introduced... The company’s ‘Tonyu,’ ‘Orange Tonyu’ and ‘Malt & Tonyu,’ all in Tetra AB cartons [and on the market by 21 July 1981 in 200 ml cartons] are distributed nationwide to supermarkets; thus, the sale of these products is growing.

“In recent years the soymilk market [in Japan] has expanded steadily, and it is estimated that the market will grow from ¥3,100 million in 1980 to ¥5,000 to ¥6,000 million this year. ‘The market will reach ¥6,000 million or thereabouts this year; many believe the market will grow by 30% in 1983, though part of the industry predicts a ¥10,000 million market. In the future we expect the market to grow to a ¥50,000 million to ¥60,000 million market, or comparable to the tomato juice market. Our company and other soymilk suppliers hope that the soymilk market will eventually share 10% of the cow’s milk market,’ Mr. Nabeta says.”

“The company has been tapped by some U.S. companies [including Eden Foods] for soymilk manufacturing ventures in the U.S., but Mr. Nabeta believes the company should concentrate on the domestic market, at least for the time being.”

1264. Evans, Barry. 1982. Re: The American Miso Company announces the opening of its miso shop in North Carolina. Linden’s Elf Works is sole agent in marketing and distribution. Letter to Friends of The American Miso Company, Jan. 4. 1 p. Typed, with signature on letterhead.

• **Summary:** “Dear Friends—We at The American Miso Company are proud to announce the opening of our miso shop in Western North Carolina. This long awaited dream

of making American miso has evolved from a genuine need here in the United States for an unpasteurized miso made with organic ingredients and fermented under natural conditions in large wooden vats.”

“Through the joint efforts of producer John Belleme and his teacher, Takamichi Onozaki from Yaita, Japan, we are now making absolutely delicious miso that will strengthen the body and delight the palate.

“The Lindenself Foundation, doing their business as Linden’s Elf Works, located in Piedmont, North Carolina, has been appointed as the sole agent in marketing and distribution of The American Miso Company brand products... Their address is Route 1, Box 43-D, Rougemont, North Carolina. Your phone contact is John Troy at... 919/364-2723. Enclosed is the Linden’s Elf Works distributor price sheet which includes all the pertinent information for your upcoming Spring catalogue. With kindest regards, Barry Evans, President.”

Note 1. This letter was precipitated by Erewhon Trading Company’s announcement in Nov. 1981 that it was filing for Chapter 11 bankruptcy.

Note 2. This is the earliest document seen (June 2017) that mentions the company’s new name, “The American Miso Company.”

Note 3. This is the earliest document seen (March 2020) that mentions Great Eastern Sun, a macrobiotic trading company in North Carolina.

Note 4. This is the earliest document seen (July 2017) that mentions John Troy of Elf Works in connection with miso or soy.

Note 4. Talk with Barry Evans, owner of American Miso Co. 2000. June 29. Linden’s Elf Works never distributed any miso made by AMC; Great Eastern Sun, Barry’s new company, was the distributor. During the first year or two, John Troy purchased a significant percentage of the miso made by AMC for his sauces and dressings. To this day, he remains an important friend and advisor, but the percentage of miso he buys is now quite small. Joel Dee, a pioneer with his Miso Cup, worked with John Troy. Joel lived in the little town Saluda, North Carolina, where John Belleme lives today. Last year, Joel introduced Organic Miso Cup using miso from AMC; he is now a significant customer. Address: President, The American Miso Company, Rutherfordton, North Carolina.

1265. Boismenu, Clyde. 1982. Textured soy protein products in America today (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The biggest present outlet for TVP (more precisely textured soy flour or TSF) is in the pet food industry, and some is used in the U.S. school lunch program. Occasionally a foreign country, such as Poland or the USSR, will buy some to extend meats.

The Briggs Amendment is a California state amendment

of about 1975; it regulates the labeling of meat products containing soy. If you add soy to hamburger you must label it “imitation hamburger,” and even restaurants and institutions must state the names on the menu or, if there is no menu, in a sign on the wall, if the extender is bread crumbs. But the health inspectors overlook a lot of violations, as in small restaurants. Companies are not even allowed to use fanciful names such as “Superburger.” Because of all this, customers in California have stopped using soy in droves and brought sales to a crashing halt. Clyde thinks there may be a similar law in New York; he does not know how many other states have such restrictive laws.

Nationwide, imitation cheese must have the word “imitation” as the largest word on the box; it looks absurd.

A company that wants to make TSF must buy a number of large extruders. Each one makes 3,000 to 5,000 lb/hour, and most companies own 3 to 5. Every one of the major manufacturers for TSF or textured soy protein products is losing money. Prices are terribly low and the industry is operated at an estimated 10% of capacity in 1981.

ADM’s TVP is the most dense, but it gets too soft on cooking. Textured concentrates are too hard, and are like gristle or rubber in the finished product; they have less flavor but cause less flatulence. Textured isolates are too expensive, costing more than the meat they are intended to replace. All companies are desperate for a breakthrough.

ADM has never spent much money on developing imitation beef, ham, or chicken. Yet it the company has developed meatless entrees to increase profit margins. Uncle Archie’s line of meatless entrees included Pepper Steak (the first one developed), Chicken Almadine, Sweet and Sour Pork, and Hearty Stew. ADM wanted to move from TVP extender to meatless entrees about 2 years ago. Like everybody, they rushed to GNC (General Nutrition Corp.), which reformulated the pepper steak by removing the mushrooms. It didn’t sell well before or after the reformulation, so ADM tried to market it themselves under the Uncle Archie’s brand. From the start, they appealed to the Safeway mentality, using lots of artificial ingredients. The product now tastes good but it looks like they will flop anyway.

Worthington and Loma Linda are also having big, indeed disastrous, problems. All the TSP (textured soy protein) products are dying on the vine. Central Soya can’t sell textured concentrates. Loma Linda plans to try to duplicate the success of Sanitarium Food Co. [Australia] with breakfast cereals. Some health food stores have carried Loma Linda products, but natural food stores object to all the additives. And now even some Seventh-day Adventists are starting to be critical for the same reason. None of the natural- or health food stores will carry Clyde’s TVP because it contains so much artificial stuff.

Nabisco is no longer in the business, and Central Soya has discontinued the line of material they bought

from General Mills. Cargill and Lauhoff are now in quite a precarious position. Cargill makes a good line of soy flours, but they also have a line of textured protein products that they have never been able to position correctly; they are operating at about 10% of capacity. Cargill got in early then in 1976 spent several million dollars more upgrading their plant so it is one of the nicest in the industry. A man with the inside scoop on Cargill is ADM's manager in the western region, Bill Potter, phone 213-833-1389. He was Cargill's sales manager and now lives in Los Angeles.

The three people and companies that hold all the process patents and pooled them were Nabisco, Swift & Co. and ADM; that jump-started this industry. All three had a slightly different process, so they cross licensed to get the TVP process going. Lynn Adolphson of ADM is the best man in the USA to ask about his; he really knows the industry.

General Mills was one company that really went into TSP in a big way. They had a line of flavored products that has never been duplicated since—all the TVP items that were used as meat extenders, including the Bontrae line which were very fancy products. They introduced spun isolates in a really big way in both the bacon bits type products and their whole line of frozen meat analogs. One day they shut down the whole operation without any warning. They sold the frozen line to Dawson Mills, and sold the Bontrae process to Central Soya, both of whom have shut down these products in the last 18 months or so. Dawson Mills got completely out of the ISP business, but may still have a weak line of textured products. People keep hoping the market will materialize, but it never happens, so eventually they have to get out to cut their losses.

Three companies went out in the first washout: General Mills, Swift & Co., and finally the Marschall Division of Miles Laboratories. A division of National Can called National Protein Products or something like that made a compressed soy grit very similar to that made by Nabisco.

We're now heading for a second washout. Lauhoff is weak but has a little niche in the pet food industry. With the market collapsing and export sales bleak, everyone is going hook and tong after the pet food industry. Lauhoff was just bought by Bunge. Worthington is probably in a pretty precarious position. They have huge capacity with a market of 2-10% of capacity.

Lauhoff and Cargill will probably be the next ones out. Dawson Mills is sort of dragging along at the rear, a little weak. Clyde is not sure if they still sell textured products. They banked an awful lot on textured soy concentrate. They still have a few fairly large customers—such as SAGA Food Services. All three companies need big volume to run their machines economically.

ADM is definitely in the strongest, premier position among the makers of new soy protein products. ADM has strength across the board—not just in pet foods. They are the only company with a truly complete line of products and a

decent line of flavored products. ADM is way out in front with the edible soy products because of better texture and flavor. Cargill, Dawson Mills, and Central Soya have sort of a nondescript product—not outstanding and not positioned well. They are losing money.

Central Soya is having problems with its textured soy protein concentrate. Staley is a dogged competitor. They have concentrated on a few items which they sell inexpensively; they do a good job with those, but they have no flavored products. Farmland (Far-Mar-Co) is also a dogged competitor. They have a line of flavored TSF that has never gone anywhere.

Each strong manufacturer has at least one pet food account from which they draw their financial life. All the companies are losing money on their pet food TSF but they have to have it to keep their overhead spread thin enough to make money on anything else. So the competition in the edible soy products industry is brutal.

What killed them all was Wenger Manufacturing Co. In the early days the pet food makers were happy to get TSF at 60 cents/pound, which was much cheaper than beef. But soybean meal was 6 cents/pound. So pet food makers started to buy a lot—dozens of carloads. Then Wenger shows up and says, “Why not buy an extruder, buy soybean meal for 6 cents/pound, and make your own TSF?” This forced TSF processors to drastically lower rates to cost of meal plus a fixed processing charge. That still allowed the processors to work off a lot of scrap. Some bought Wenger extruders. That was the end of profits in the pet food industry.

Dwayne Andreas took an early liking to TVP. Dwayne is a very homey person, a Quaker [sic, Mennonite] in the true sense. He developed and made a flaked breakfast cereal out of TVP; it contained 100% of the RDA for everything and you just poured milk on it—not a hot cereal. Or it could be used as a tuna extender. But in about 1972 the cereal makers rejected it; they thought it was too concentrated. That was one of the first times ADM got burned—a sort of TVP tragicomedy. Bob Sullenberger is another key man and good source of information. Address: Basic Foods Co., 1211 E. Olympic Blvd. #204, Los Angeles, California 90021. Phone: 213-623-6686.

1266. Westbrae Natural Foods. 1982. Distributor catalog and pricelist: Jan. 1982. Emeryville, California: Westbrae. 16 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue on a tan background. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (orders).

1267. Wollner, Joel. 1982. History of Erewhon, macrobiotics, and soyfoods in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 2. 2 p. transcript.

• **Summary:** Evan Root was the first attendant at the Erewhon retail store, below street level at 303-B Newbury

Street. He lacquered the walls with Michio. Evan is a great storyteller, very intelligent. The initial store was just one room, about 10 by 20 feet. Very few people came in to buy food, so it was more like a stock room than a store. Some evenings there were lectures there. Redwing Books now occupies that space. Most of the food (a tin of miso, a keg of tamari) was just being sent by the Kushis' friends from Japan as gifts; it didn't get through customs.

The Kushis got nigari and made tofu at home. It was not for sale, but for dinner guests and cooking classes. Joel made some tofu using lemon juice when nigari was not available.

As tofu started to become more popular, Erewhon started to buy it from a tofu maker in Boston's Chinatown. First they just bought and sold that tofu, but before long (in about 1973-74) they convinced him to start making nigari tofu for them. They guaranteed to buy what he made, and they sold him the nigari at cost. This might have been the first nigari tofu made in USA. A lot of nigari tofu is still made in Boston's Chinatown. Joel thinks the tofu maker was located on Tyler, Street, perhaps Yah Kee. Nigari came in 66 pound sacks from Japan. Erewhon also sold small quantities of nigari in the retail store. Chinatown was Erewhon's main source of tofu until Laughing Grasshopper appeared.

What was the macrobiotic movement's contribution to the history of soyfoods in the United States? Macrobiotic teachers and students talked and wrote about them, ate them, and sold them. They felt soyfoods were an important part of a good diet. They educated people and developed a market for soyfoods. Few Americans had eaten miso and tofu at home before 1966—the year Erewhon started. Macrobiotics were the first Caucasian Americans to really use soyfoods regularly. Before that, soyfoods (except perhaps soy sauce) were just interesting oddities. One could say that the macrobiotic movement introduced soyfoods to America.

As for tofu, Joel thinks that Michio Kushi's students misinterpreted his remarks about tofu being yin. Macrobiotics now eat tofu regularly, 3-4 times a week. There are endless ways to prepare it. It's been years since Joel has heard that tofu is "too yin."

What did *The Book of Tofu* (published in Dec. 1975) do for tofu? It expanded its relevance for the Western diet. Before that book, most of the tofu in the United States was consumed by people of East Asian ancestry.

Charles Kendall played a key role in making and introducing natto, mochi, and amazake to Caucasian Americans. He made these foods in his home and sold them locally. Initially, it was not a formal / legal business. But today his business, Kendall Foods, sells \$500 a week of these three foods. He has been making natto for 4-5 years. He was America's first Caucasian natto maker. Natto was served in macrobiotic restaurants in Boston.

The latest soyfood to hit Boston has been tempeh. It's been a phenomenal success. Macrobiotics are going crazy over it. Thom Leonard has been giving lots of tempeh classes

for the past 1½ years. For more than a year, lots of sandwich makers in Boston have been making and selling tempeh sandwiches. Tempeh is made into cutlets, burgers, tempeh mock-tuna salad. Why is it so popular? Because it is rich and meaty in texture and flavor—the opposite of rice. Most macrobiotics crave rich, meaty foods.

Ron Kotsch is very close to the Kushis. A very unpretentious person with a wonderful sense of humor, he is now teaching in North Carolina. He is friends with Helen and Scott Nearing. He toured China and Japan with John Denver, the singer and songwriter—who did a benefit for Michio's new college.

How does Joel see the future of Erewhon? He thinks the company will focus on manufacturing only. Now is the critical time. He'd give Erewhon a 30-70% chance of survival. Address: Boston, Massachusetts.

1268. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.

• **Summary:** Roger got involved with macrobiotics in San Francisco in about 1965. He lived in San Francisco, was doing light shows at the Avalon Ballroom, read the book *You are All Sanpaku* [by Sakurazawa Nyoiti (George Ohsawa); English version by William Dufty], and got involved. Also in about 1965, Herman Aihara and Bob Kennedy used to come to town to lecture in a church on Oak Street. Bill Tara and Paul Hawken, who were filmmakers, lived in a warehouse on lower Mission St. described in the *Electric Kool-Aid Acid Test*, by Tom Wolfe (largely about Ken Kesey and the Merry Pranksters). "A little macro scene started. We heard that Boston was macro Mecca."

Roger arrived in Boston in Oct. 1969. Erewhon started when Michio and Aveline Kushi were living in Cambridge, Massachusetts; in their basement they had a little food, which they would sell to people who came to hear Michio lecture. "The food was but a vehicle to the larger teaching. The food is like an asana or yoga posture, but the goal is enlightenment. You can get stuck on the food. That is why Michio had very, very little involvement in Erewhon's food business. His focus was on the philosophy of macrobiotics and spreading it."

The Erewhon store was (at the time) in the basement of today's Redwing Books. Evan Root started the store, but he wanted to get out of it into a restaurant. Paul Hawken took over the sleepy little store. Bill Tara (who was from Santa Cruz) also worked there for a while. The tiny store had few customers, a very limited selection of products, and a little mail order business. Shortly after Roger arrived, the Erewhon store at 342 Newbury Street opened—in Nov. or Dec. 1969. Bruce Macdonald and Jim Docker helped to renovate the new store. The whole thing was called Erewhon Trading Co. In Feb. 1970 Roger started to work in this retail

store.

Shortly thereafter, Paul Hawken went to Japan. At that time the only companies importing food from Japan were Chico-San and Infinity Foods in New York; both were macrobiotic. Erewhon bought from them, and then started doing a little wholesaling. After Paul went to Japan, Erewhon started importing directly from Japan. Paul got in touch with Mr. Kazama and helped to get Mitoku into the natural food export business. Kazama was an old friend of Obiyashi, who was an old friend of Michio Kushi's from Columbia University. Muso was shipping to Chico-San and Infinity. Erewhon imported from Muso and Kazama. Roger thinks Mitoku started in about 1970-71. Before that they sold soccer shoes and cranes. The fact that Paul was in Japan was instrumental in getting Erewhon's imports started.

The Erewhon retail store would sometimes get huge shipments, such as a 40-foot-long truck of rice that filled up the whole Erewhon storeroom. It was something like Kokuho Rose [a brand of short grain brown rice grown by Koda Bros. in Dos Palos, California]; it was not organically grown. There was really no room for it, and no refrigeration. At about this time the Lundberg Brothers in California started growing brown rice organically. At one time a boxcar of 100,000 lb of Lundberg rice arrived, so Erewhon needed more warehouse space. Also involved were Jean Allison (from California) and Wally Gorell (from the San Francisco Calliope Co). In about mid-1970 Erewhon leased a 10,000 square foot warehouse space on the 5th floor of 33 Farnsworth St. [a big brick warehouse] in Boston. The space had a nice milling room. Then the wholesale business took off. Roger left Boston in April 1971. He had been running both the distributing company and the wholesale company, but there was a store manager. The retail store expanded into its back room. Then the wholesale business grew like mad. Orders came from non-macro natural foods stores, from new macro groups, etc.

How did the natural food movement get started? As Roger recalls, it was not started by macros. In about 1966 or 1967 Sunset Natural Foods became New Age Foods, an early natural foods store run by Fred Rohe. The natural food movement sprung out of the new consciousness—the counterculture—as did macrobiotics. The macrobiotic movement fed the natural foods movement. One Erewhon customer was Mr. Natural in Carbondale, Illinois. Although he was not a macro, he bought miso, tamari, rice, etc. There were lots of other non-macro stores like that too. But there were also lots of macro stores. Bill Tara opened a store and macro center on the 14th floor of a downtown building in Chicago; out of that grew Food for Life. Tom Waxman started Essene in Philadelphia, Pennsylvania. These were two mini-Erewhons. Each started as a small retail store, then became a wholesaler. Erewhon provided the model.

Erewhon set up a branch distributor in Canada, which later became Manna Foods, with Gene Newman, a macro.

Westbrae was a Berkeley political organization started by Bob Gerner, making granola. Erewhon West was connected with Bruce Macdonald. Bill Tara, with Aveline Kushi's prodding, started the Erewhon store in Los Angeles; it did a little distributing. Bruce Macdonald went to Los Angeles, then Bill Tara left for England—Roger doesn't know why. Erewhon West started growing. Jimmy Silver ran the Big Sanae, which became the Seventh Inn. Roger then went to Texas and in Jan. 1972 he worked with Deaf Smith for about a year. Later Erewhon West was sold to John Fountain, but really to John Demming—as a separate business from Erewhon.

The Well [a wholesale and distribution company in San Jose, California] was an offshoot of Fred Rohe's New Age Foods, ca. 1969-1970. It was never macrobiotic. Fred sold stock in his business, had 2 stores in San Francisco, then opened a big natural foods store [actually a supermarket] named New Age Natural Foods on California Street in Palo Alto. The whole thing was a fiasco; the Palo Alto store never made money.

Deaf Smith Farms was established as a joint venture between Erewhon and Arrowhead Mills; it never worked out. In April 1971 Bruce Macdonald started a marketing company named Pure & Simple. In March 1972 Roger started working at the Well in San Jose. Bruce went to Green Mountain Grainery in Boulder, Colorado. Gradually The Well became Pure & Simple, and started importing from Mr. Kazama and Muso.

Paul Hawken was the first person to work with farmers to get them to grow grain organically for Erewhon. One of these was Carl Garrich of Lone Pine, Arkansas—after Erewhon moved to 33 Farnsworth Street. Roger did a lot of work with farmers at Arrowhead Mills, but not connected with macrobiotics.

Major macrobiotic wholesale distributors: Erewhon East and West, Laurelbrook (later), Food for Health, Essene, Manna in Canada (later). Llama (later) was not macro.

Macrobiotics played the major, primary role in introducing soyfoods to America. A little was also coming through Japan Foods [San Francisco] and Nishimoto [Trading Co., Los Angeles]. The macros made these foods available, but don't overcredit it; the time was ripe and it just happened. The main contribution of macrobiotics was simply making these foods available and teaching about them. Michio always said that macrobiotics is not just about food and the diet.

"It was frightening when we stopped to think about it. The business was doubling and tripling at a crazy rate." Roger still has his early notes but no accounting books. Continued. Address: California.

1269. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7.

2 p. transcript.

• **Summary:** While Roger was in Boston, no tofu was sold at the Erewhon retail store at 342 Newbury St.—since there was no refrigeration and no room. He thinks tofu was introduced after Erewhon got 33 Farnsworth St.

The trickiest question, which has no place in this book, is about work as a disciple / discipline vs. for money / as business. Work can be a spiritual practice (*karma yoga*), and that is how many of the early workers at Erewhon viewed it.

Roger does not know why so many people left Erewhon. Maybe Michio Kushi planned it that way. He does not know why Erewhon went bankrupt; maybe it was because the company was undercapitalized, there was no worker equity, and Michio did not know American business. “Maybe Michio did not care so much. Distributing foods was always a minor focus for Michio.”

Other macrobiotic food distributors outside the U.S. were Lima in Belgium (by far the earliest), Harmony and Sunwheel in England, and some company in Italy. Address: California.

1270. Kowalsky, Avrum M. 1982. Re: Laurelbrook Foods, Inc. Letter to Thomas E. Marshall, Esq. in Bel Air, Maryland, Feb. 9. 2 p.

• **Summary:** Laurelbrook Foods, Inc. is apparently preparing to file Chapter XI proceedings. Also, there was a fire recently at Laurelbrook.

Margy Coates notes (March 1992) that Richard Curry rented 2 trailers for extra storage and illegally put up a shed-type passage connecting one to the warehouse. He left a heater on in one overnight and that started the fire, which demolished the trailer and did quite a bit of damage to the building. The trailer was insured and Richard collected the money for himself. Address: Law Offices, Baltimore, Maryland. Phone: (301) 332-8500.

1271. Milbury, Peter. 1982. Re: Comments on draft manuscript chapter “George Ohsawa, the macrobiotic movement, and soyfoods,” by William Shurtleff. Letter to Bob Kennedy, President, Chico-San, Chico, California, Feb. 28. 2 p. Handwritten, on lined paper, with signature.

• **Summary:** A photocopy of this letter was forwarded to William Shurtleff at New-Age Foods Study Center, together with the edited manuscript.

“Bob, Please check out my comments on manuscript. I didn’t answer the question sheet [31 questions], figuring to let your corporate records answer. The guy seems to be trying to do a good job, but just had a natural Boston bias, unintentionally.

“I think you should send him the Floyd Allen article [July 1971, in *Organic Gardening and Farming*], plus those you did for *Health Foods Retailing*

Business. Those show *your* contribution to bringing soyfoods to the American retail system, a key factor.

“Also, it should be stressed that Chico-San’s work at getting macrobiotic products into health food conventions, years before Erewhon, played a major role in their acceptance and availability. Also, using the regional, main-line distributors such as Landstrom, Balanced Foods, etc., to carry them is also important. They all still exist, but Erewhon is going to be long-gone, an important point for Shurtleff’s book, when looking back 10-20 years from now.

“The fact that Erewhon was originally modeled after Chico-San, but was able to [sell] direct to the retail stores, which market had been built as a result of Chico-San’s work through the jobbers [wholesalers; wholesale distributors], should not be forgotten.

“You might also send them a copy of our article in *Grocery Communications*—the long one with the GS quality organics.”

“It was nice to have lunch with you Friday... Talk to you soon, Peter.” Address: Chico-San, Chico, California.

1272. *Vegetarian Times*. 1982. Erewhon fighting to stay in business. No. 54. Feb. p. 83.

• **Summary:** “The company, with annual gross sales of an estimated \$12 million, has a debt of \$4.3 million... Erewhon defaulted on a secured bank loan and, unable to reach a new agreement with the bank, filed for protection of its assets under bankruptcy law...

‘It all comes down to management,’ confided one insider. ‘Erewhon was horribly mismanaged.’

“It’s difficult to lay the blame squarely on the shoulders of any one individual and, in fact, the people remaining at Erewhon are understandably reluctant to discuss their problems, but the two names which most commonly do come up are Mishio [sic, Michio] Kushi and Tom Williams.

“Williams, the company president, was brought into the organization a little less than a year ago to ‘straighten things up,’ but he’s now missing and nobody knows where to contact him. Mishio Kushi, the man who introduced America to macrobiotic principles and who also founded and owns Erewhon, has been criticized for holding the company too tightly. It is rumored that Mishio Kushi tried to sell shares in the company in an effort to raise capital, but that he was too inflexible in his business dealings to interest investors.”

1273. Belleme, John. 1982. Re: New developments at American Miso Co. Letter to William Shurtleff at Soyfoods Center, March 3. 2 p. Typed, without signature or letterhead.

• **Summary:** “We got a really good response from our light miso. People reported using it for dressings, dips and even desserts. We have decided to market our white miso through our wholesale company in bulk only during the winter. We also plan to market a mellow barley and a mellow rice miso, both of which should have a good shelflife.

“Mr. Onozaki just visited our factory for two weeks. He said our koji is some of the best he has ever seen. I was

really worried about our koji and his comments settled my anxious mind. He also said our long-term miso is developing fine.

“The ownership of our factory is finally settled. The following will not be participating: Erewhon, Michio [Kushi], Mitoku, Johsen, Oak Feed and Sandy Pukel. This leaves only Barry Evans and myself, we are now the sole owners.”

“I am sending you 10 pounds of Mr. Onozaki’s rice miso. It is hopefully just like the miso we are making. We are getting a really good response from the East Coast macros; they love Mr. Onozaki’s miso. Last year we imported 20,000 pounds.

“Barry and I are starting a wholesale company in Asheville. It’s tentatively called Great Eastern Sun Trading Company. We are specializing in hard-to-get macrobiotic foods—will send you a catalog in a few weeks.”

Note 1. On 31 May 1982 John wrote a 2-page typed letter to Dr. Hiroshi Ito at the National Food Research Institute in Japan asking for help in making a white miso. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

1274. Sams, Craig. 1982. Natural foods and the law (Letter to the editor). *Times (London)*. March 3. p. 11.

• **Summary:** Feb. 26. Sir—“Several years ago a Japanese brewer of soya sauce asked us to take over the supply of their natural product to their European customer. We were unable to take advantage of this offer...”—due to the natural 1½% alcohol content of the product, outdated laws and the expense of trying to change them.

It is a shame that laws governing food cannot accommodate innovation without pointless bureaucratic restraints. Address: Harmony Foods Ltd., Unit D, Western Trading Estate, Park Royal Rd., NW10 [London].

1275. Root, Evan. 1982. Re: History of macrobiotics. Letter to William Shurtleff at Soyfoods Center, March 4—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** “Here is my reply to your questionnaire.” Discusses Sanae, Erewhon, Paul Hawken, Michio Kushi. The original Erewhon store started in April 1966 at 303-B Newbury St. Prior to that, some food sales were done from the Kushi’s home on a very small scale.

In Oct. 1967, Paul Hawken took over the management of Evan Root moved up the street to commence renovations for Sanae Restaurant. Paul was the main force in expanding and developing Erewhon in the early days. Prior to him it was mainly a cracker barrel style store where people came in to talk philosophy and swap recipes, whether or not they bought anything.

Sanae opened its doors to the public in Feb. 1968.

In the early days of Erewhon one of the suppliers not to be overlooked is Japan Food Corporation. From them

we bought seaweeds, fish flakes, gourd strips, and most importantly from your point of view, Hacho miso. Chico-San and Infinity Foods were in operation before Erewhon and we got most of the Japanese items from them except for a couple of kegs of miso that Junsei Yamaguchi put up in the Kushi’s basement.

I do not know this for a fact, but I have speculated that the early tamari that was available when I first got into macrobiotics in 1964 may have been, in fact, real tamari as I distinctly remember that it was thicker and richer than what became available a little later. Address: Relationships, 39 Harvard St., Brookline, Massachusetts 02146. Phone: 617-739-3300.

1276. Rothman, Sandy. 1982. Re: History of work with macrobiotics and soyfoods in America. Focus on William Shurtleff, Herman Aihara, Bob Kennedy, and Chico-San. Letter to William Shurtleff at Soyfoods Center, March 5. 1 p. Typed, with signature.

• **Summary:** Legitimate criticisms of Shurtleff, who is not a man of contrition, is always trying to save money, and has a “single-minded steamroller approach to getting what you want.” “I hope you will reconsider your seemingly inflexible stance that a personal visit up here is out of the question for you.” Address: GOMF, Oroville, California.

1277. Aihara, Herman. 1982. Re: Introducing miso and soy sauce to America. Letter to William Shurtleff at Soyfoods Center, March 15—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** “Miso and ‘tamari’ were imported in America by Ginza, Inc., managed by H. Aihara, in 1961 in New York City. The brand name was not remembered.

“After 16 families moved to Chico and started Chico-San, Chico-San imported Marushin soy sauce and miso. Ohsawa arranged the manufacture and export in Japan. Ohsawa always supervised and examined the products.

“Ohsawa told us to call natural soy sauce ‘tamari’. The reason is, he named natural soy sauce ‘Ohsawa Soy Sauce’ in Europe and gave its sole agency to someone else. This guy started to import bad soy sauce and called it ‘Ohsawa Soy Sauce.’ Then, Ohsawa began importing a good one by himself, but could not use the name ‘Ohsawa Soy Sauce.’ Therefore, he called soy sauce ‘tamari.’ (A mistake, I think.) Chico-San has been importing the best quality of miso and soy sauce (named ‘tamari’) even though the cost was higher than other, lower grades.” Address: President GOMF, P.O. Box 426, Oroville, California 95965.

1278. Rothman, Sandy. 1982. Re: History of work with macrobiotics and soyfoods in America. Focus on Herman and Cornelia Aihara, and Chico-San. Letter to William Shurtleff at Soyfoods Center, March 17. 5 p.

• **Summary:** Also discusses Alcan Yamaguchi, Zen

Teahouse, Paradox, Michio Kushi, Musubi, Irma Paule.
Address: GOMF, Oroville, California.

1279. Kushi, Michio; Kushi, Aveline. 1982. Re: History of work with macrobiotics and soyfoods in Boston. Letter to William Shurtleff at Soyfoods Center, March 29. 2 p. Typed, without signature on letterhead.

• **Summary:** These are answers (dictated to a typist) to a list of questions sent by William Shurtleff of Soyfoods Center.

1. Why were George Ohsawa's students given Western names? "Right after the second world war, and after the Americans took over Japan, George Ohsawa wanted everyone to speed up their lifestyle. For this reason he gave Western names to his students, taking those names from Western heroes born in the same month. We think that perhaps it was his intention to have them go to America to spread macrobiotics. As a teacher, George Ohsawa adopted the western style of having his students call him by his first name, George. Almost all his students were given new names."

5. Prior to 1959, which macrobiotic teachers were in New York? "Michio Kushi was lecturing and giving seminars in New York at that time, along with other friends."

9. When was the Ohsawa Foundation in New York City established? By whom? "The Ohsawa Foundation was founded in 1960 or 1961, by Michio, Irma Paule and other friends. Michio was the first President of the 2nd Avenue location. The Musubi Restaurant was by Mr. Sato, Alcan Yamaguchi, and Junsei Yamazaki. Irma Paule was later to take over the East West Foundation and set up the 2nd Avenue location.

12. When and where were Michio and Aveline married? They were "married in 1953 [sic, 1954] in New York. They [first] met in New York but had been corresponding from Japan through George Ohsawa's study house [Maison Ignoramus?] before that time.

13. Cornelia and Herman [Aihara] were married in New York and had also been corresponding from Japan.

14. What was Musubi in New York City? Musubi "was a restaurant and food store but not a gift shop. They sold miso and shoyu from Japan the George Ohsawa had sent."

16. When did Michio Kushi start and stop lecturing at Arlington Street Church in Boston? "He started in 1965 and stopped in 1970."

18. When did Michio organize the first East West Institute? "1965."

19. When did the Kushis move from New York to the Boston area? What prompted this? "In 1963 [sic, March, 1964] Aveline and the children moved to Martha's Vineyard [an island off the south of Cape Cod in Massachusetts] for 6 months because it was a much better environment for natural living. Michio was still working in New York. In September 1963 [sic, 1964] they moved to Cambridge, Massachusetts with Michio, who at that time stopped all business and put all

his efforts toward macrobiotic education. The death of Beth Ann Simon and the FDA crackdown came after Erewhon was established.

20. Erewhon started in the Kushi home in 1963 in Cambridge. In 1965 [sic. April 1966] it was established as a company on Newbury St.

25. When did Sendai Miso Shoyu start making natural shoyu. Who set this up? When did they start to sell it? "Mr. Kazama [of Mitoku] set it up" and would know the answers to the other questions. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

1280. Shurtleff, William; Aoyagi, Akiko. 1982. History of the soyfoods movement worldwide. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 50 p. March. Unpublished typescript. Available online at www.soyinfocenter.com.

• **Summary:** www.soyinfocenter.com/HSS/soyfoods_movement_worldwide1.php

A comprehensive history of the subject. Contents: New image of soyfoods and causes of interest: Good health, nutrition and fitness, weight loss diets, low-cost protein, meatless and vegetarian diets, world hunger, appropriate technology and right livelihood, voluntary simplicity, ecology and conservation, interest in East Asian cultures, spiritual practices, and cuisines.

Allied movements: Macrobiotics, natural foods, Rodale Press, vegetarianism.

Characteristics of the soyfoods movement: Major foods and types of products, comparison of soy protein industry (high tech) and soyfoods industry (low tech), appropriate technology, relevance to the Third World, conclusion.

The Farm in Tennessee. *The Book of Tofu* and Soyfoods Center. Early soyfoods manufacturers. Soyfoods delis and restaurants. Second-generation soyfoods manufacturers and distributors (e.g. Swan Foods in Florida). Tofu kits and equipment. Soyfoods terminology. Founding of the Soycrafters/Soyfoods Association of North America: Richard Leviton. Growth of the Soyfoods Association: First conference, Soyfoods magazine, subsequent conferences, SANA problems, The new Soyfoods Association of America—Gary Barat and Michael Austin of New York City.

Soyfoods books and booklets. Media coverage. Growth of the soyfoods industry, including the Soycrafters Apprenticeship Program. Soyfoods Marketer/Distributors: Yellow Bean Trading Co., Garden of Eatin', Jolly Licks. Soyfoods in foodservice institutions. Influence and activities abroad. The future.

Note: This is the earliest document seen (Oct. 2016) that uses the term "Second-generation" in connection with soyfoods to refer to a soyfood product which uses a basic soyfood as its major ingredient. Thus, Tofu Cheesecake, Tempeh Lasagna, and Instant Miso Soup are all commercial "second-generation soyfood products." If made at home for home use, they would be "second-generation soyfoods." For

some products, the line between basic and second-generation soyfood products is blurred, since some second-generation products that have a long history have come to be thought of as basic. For example: Deep-fried tofu burgers (*ganmodoki*), teriyaki sauce, etc. Address: Lafayette, California. Phone: 415-283-2991.

1281. Soy Plant Co-op Inc. (The). 1982. Price list effective 3/22/82 [22 March 1982]. Ann Arbor, Michigan. 1 p. 28 cm.
 • **Summary:** This typewritten sheet contains three columns: Supplier, product, and price. The Soy Plant is supplier of (packaged or in bulk): Tofu (1 lb tub), plain soy milk and flavored soy milk (quarts), tempeh (8 oz), soysage (8 oz), miso garlic dressing (16 oz), Soyanaise (soy mayo, 16 oz), carob tofu pies, missing egg salad, tofu spinach quiche, gomaseao [gomashio]. Other suppliers are Micro Farms (alfalfa- or mung bean sprouts), Westbrae Foods (miso–3 types), The Grocery (The Tofu Cookbooklet), and Learning Tree (tofu kit, \$13.50 each).

New products available soon: Tempeh salad. Tofu tahini spread. Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: (313) 663-8638.

1282. *SoyaScan Notes*. 1982. Chronology of Great Eastern Sun Trading Company in North Carolina. 26 Jan. 1994. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1982 March–The company is founded by Barry Evans. Martin Roth is the first manager. The original purpose is to be a distributor for the miso made by American Miso Company. But the company soon decides to import Japanese macrobiotic products from Mitoku (the first order was placed in Jan. 1982) and later to become a manufacturer.

1984 July–Great Eastern Sun starts to import Ah Soy (soymilk, in chocolate, vanilla, and original flavors). Made in Japan by San-iku Foods, and sold in a stand-up foil retort pouch, it soon becomes very popular. Don DeBona is the first product manager. Address: 92 Macintosh Rd., Asheville, North Carolina 28806.

1283. **Product Name:** Tofu (Vacuum Packed in a Box with Window).

Manufacturer's Name: Swan Gardens.

Manufacturer's Address: 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.

Date of Introduction: 1982 March.

Wt/Vol., Packaging, Price: Vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Soyfoods. 1983. Summer. p. 39. “The Miami soyfoods scene. In March 1982 Swan introduced their boxed tofu.” Spot in Soyfoods. 1983. Summer. p. 55. “The Boxed Look.” The 1 lb cake of tofu contains 16.6% protein and retails for \$1.19 in supermarkets. The first boxed tofu appeared in 1982, and was the second major tofu packaging innovation, after vacuum packaging,

which started in about 1979.

Talk with confidential source. 1987. Lisa tofu undersold Swan and drove the company into Georgia. Swan moved to Decatur, Georgia. Oct. 1988. Stops making vacuum packed tofu for Tree of Life, by mutual consent. Swan has too much business.

1284. Cowen, Peter. 1982. Bankrupt Erewhon Inc. bares its assets and liabilities. *Boston Globe*. April 8. Economy section.

• **Summary:** “Erewhon Inc., which is attempting to reorganize under Chapter 11 of the federal bankruptcy code, yesterday reported that it had liabilities of about \$3.9 million and assets of slightly more than \$1 million, exclusive of its three retail stores.

“At the same time, parties to the reorganization announced that Ronald L. Rossetti, president of a Wilmington [Massachusetts] firm that operates 86 health food and vitamin stores, had been named president and chief executive officer of Erewhon.

“Rossetti, 38, was associated with the accounting firm of Coopers & Lybrand for six years before joining Nature Food Centres Inc., which he now owns and runs. In a news release distributed yesterday, those involved in the reorganization of Cambridge-based Erewhon said that, under a proposed reorganization plan, all ‘administrative and priority claims’ against Erewhon would be paid in full once the plan is approved.

“Further, unsecured claims of more than \$800 would be settled by a payment of about 18 percent of the claim, 6 percent payable in cash and the balance in four annual installments of 3 percent each. Unsecured claims of \$800 or less would be settled with a 15 percent cash payment. Finally, holders of Erewhon’s \$560,000 in subordinated debentures would receive 3 percent of their claims, as full payment.

“In its statement, the company’s financial difficulties were attributed to a shortage of equity capital ‘to finance and sustain its operations and growth,’ costs ‘greatly exceeding’ the firm’s estimates for its move to Cambridge in 1978, and ‘intense competition’ in the health foods field.

“Rossetti, in attempting to bring the company back to profitability, ‘will attempt to increase sales growth by expanding distribution of Erewhon products nationwide,’ the firm said. The operation of its three retail stores will be continued under Erewhon’s name.” Address: Globe staff, Massachusetts.

1285. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p. and 5 p. transcripts.

• **Summary:** Hawken played an important and very innovative role in establishing the natural foods industry in

America and in building Erewhon into a major distributor of macrobiotic and natural foods.

Chico-San imported foods from Tokyo CI (Centre Ignoramus); Muso didn't exist at that time.

The Kushis never made tofu or nigari tofu. They were not big tofu eaters, largely because tofu was considered too yin—ridiculous. Then people started craving it, and buying it from Chinatown. But the tofu they bought was not made with nigari.

By the mid-1960s there were roughly 300 to 2,000 people actively involved with macrobiotics in the USA—including Michio Kushi's students, Herman Aihara's students, and those in New York and Boston.

Beth Ann Simon had started using heroin again before she died [on her No. 7 macrobiotic diet]. The family covered it up, blaming Japanese and tamari. But she was not the only one who died. George and Lima Ohsawa's only child died within a year of being born in Tokyo (according to Lima) from excess salt.

Erewhon was started by Aveline Kushi, not by Evan Root. Paul does not know who gave Erewhon its name [it was Aveline Kushi]; of course, it is "Nowhere" scrambled, as in the title of the famous 1872 novel by Samuel Butler about a utopian island divested of machinery. Originally various people would drive to Pennsylvania to see the Mennonites and Walnut Acres. It was a buying club for students who lived in the Kushi's house in Cambridge, Massachusetts. Foods such as wheat, [whole-wheat] flour, oatmeal. Nothing imported from Japan. It was started with \$500 cash in the basement of the Kushi's house. It backed into being a store since it was cheaper to buy larger quantities. The food was divided up into little bags and a price was written on each. It was sort of a way of buying food for people at the Kushi's house, like Aveline doing her shopping for 10-12 people in the first big macrobiotic study house. It began to outgrow the house and outside students wanted good food. It was never seen as a business or a money-making venture. Good food was so difficult to get in those days.

Another source of good food was Infinity Foods in New York City, started and owned by Howard Rower; they had a warehouse and were wholesaling by mid-1965. Soon Howard was importing miso and tamari (shoyu / soy sauce) from Tokyo CI. "This 'guaranteed' its quasi-medicinal effects. Otherwise it didn't work. It was actually the best food—really." Then Howard started to import directly from the manufacturers of miso and shoyu in Japan: Hatocho miso and Marushima shoyu (whose owner knew Ohsawa intimately). Paul visited Marushima in 1969. Paul thinks Marushima bought their shoyu from other shoyu factories on the island, or maybe they made it in the early days. Paul thinks there is a big difference in taste between shoyu made from whole soybeans and that made from defatted soybean meal (*dasshi daizu*). Paul was suspicious of Marushima shoyu in 1970; he demanded that Muso Shokuhin change

to Johsen [Sendai Miso Shoyu] as their source; Johsen has a long history and the owner was also one of Ohsawa's cronies.

Paul left Erewhon in 1973. He went to Japan three times. The first trip was in March 1969, when he set up Mitoku in the natural foods business; before that they were an importer of hockey equipment. Muso was called Osaka CI; neither of those two companies were exporters before that time.

In the early days of the below-ground store in Boston, more of the foods came from Lima Foods in Belgium than from Japan. The miso and shoyu in those days came from Infinity Foods in New York City. They did not carry tofu because there was no refrigeration. None of the food was sent by the Kushis' friends.

In the early days of that store, Evan Root just tended the store, which had sales of about \$20–\$30 a day. The store was Aveline's idea. Evan was Aveline's lover—and not the only one. The store was originally called simply "Erewhon." Paul later added the words "Trading Co." when he incorporated it in the late fall of 1967. Paul and Aveline each owned 50% of the corporation. During its first year as a corporation, sales went from \$1,000/month to \$9,000/month—and not because it was macrobiotic. Erewhon was the first natural food store (as opposed to health food store) in America. It sold no pills. Many of the customers were not macros; they wanted whole foods. In mid-1968, as Paul was ready to leave Erewhon, someone came into the store and asked: "How do you know the oil is cold-pressed? And how do you know the grains are organically grown? He couldn't answer. So he wrote letters and found out that most were not what they claimed to be. Then Paul decided to use Erewhon to create a true food supply. He went directly to farmers. He didn't trust anyone. The idea was to know where the food came from and to have no middlemen between Erewhon and the producers.

In Oct. 1968 the little Erewhon retail store moved up and across the street to a new location at 342 Newbury Street. At that time they began to sell wholesale and to import from Japan, by correspondence with Mr. Kazama. The first import order from Japan, dated Aug. 1968, was *aka miso* (red rice miso—superb) from Sendai Miso Shoyu and Marushima shoyu. Soon customers who used to drive 400 miles to buy staples from Erewhon started to open their own stores. The natural foods business mushroomed. Erewhon started selling tofu in 1968 at 342 Newbury; they got it from a Chinese tofu maker in Boston. Nigari came in much later, after 1973. Neither Evan nor anyone else wanted to work at or run Erewhon; they all wanted to teach macrobiotics.

Paul was selling whole dry soybeans at that time, but mostly non-macros were eating those soybeans. Erewhon's first supplier, in mid-1968, was a wheat grower in North Dakota. Carl Garrich in Lone Pine, Arkansas, was much later. Paul got his first soybeans from a guy in a boxcar who was an insurance salesman, but who worked one day a week selling soybeans and wheat. Paul also bought soybeans from

Deaf Smith County, Texas. Paul knew Frank Ford of Deaf Smith County in the early days. Paul was vice president of Arrowhead Mills before Roger Hillyard even worked for them. He ground his flour in a boxcar.

Paul wrote a long and detailed article about the early history of Erewhon titled "Erewhon: A biography. The view within," published in the Aug. 1973 issue of *East West Journal*. He was upset at the time. It was critical of the Kushis, and Paul explained why he was about to leave Erewhon. Robert Hargrove, editor of the journal, ran it anyway. Since then, Erewhon's history has been sanitized. Continued. Address: California.

1286. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p.

• **Summary:** Continued: Erewhon grew rapidly. One year after moving to the new location they had sales of \$35,000 to \$40,000 a month, both wholesale and retail. Paul thinks Erewhon had a retail catalog from 1967 to 1970. Paul was president (until 1973, when he left) and half owner. Then he left for Japan. Before leaving he made a great error, by signing over his half of the stock to the corporation in case something happened to him. It was put in escrow, but he could never get it back. When Paul left for Japan, Roger Hillyard, Bill Tara, Bruce Macdonald, and Jim Docker were all working for Erewhon. He had hired many or all of them, and everything was in place for takeoff. Erewhon did not get its big brick warehouse until July 1970.

When Paul first went to Japan in the spring of 1969, he traveled with Mr. Kazama of Mitoku, visited many factories, and set up sources. He tried to find out where Tokyo CI and Osaka CI were getting their foods. He was in Japan for about 9 months, from March to December.

When he returned, he opened [sic] Erewhon in Los Angeles; Roger Hillyard was still in charge of Erewhon in Boston. Then he moved to San Francisco, started Organic Merchants with Fred Rohe, and started writing "The Sugar Story," "The Oil Story," and other leaflets. His main interest was now in providing accurate information about foods. In mid-1970 Erewhon stopped its mail order catalog and business when it moved into the brick warehouse.

Originally Erewhon West (Los Angeles) and Erewhon Boston were one; about 4 years later they split in two.

When Paul left in 1973, Erewhon was contracting directly with something like 57 farms in 35 states producing organically grown foods, including lots of produce. This program began in 1968, included the Lundberg Brothers (who grew brown rice organically in Northern California), and led to the wholesale business. Paul and Erewhon helped many other natural food companies to get started.

The Natural Food Distributors Association [Organic Merchants] was not successful because it was Paul's idea and he left. Lack of money and fundraising were secondary. His

goal was to see cooperation in the industry.

In conclusion Paul says: "Read the article [in *East West Journal*] and then we should talk again. You'll have a lot more questions." He asks Shurtleff to send him a photocopy of the article as well as the final draft of the chapter on the history of macrobiotics (including Erewhon); he'll be glad to recheck it. Address: California.

1287. Okada, Teizo. 1982. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter to William Shurtleff at Soyfoods Center, April 22. 2 p. [Eng]

• **Summary:** Muso was started in 1959 by Mr. Shuzo Okada, president of the World Macrobiotic Association in Osaka. George Ohsawa was not involved in establishing the company, but he was very much involved in the company's direction as an Associate. Muso started exporting soyfoods to the West in 1963. The first foods were shipped to Lima N.V. in Belgium. The first soyfoods were shipped to America in 1966, when mugi (barley) miso was shipped to Chico-San Inc. in Chico, California.

Note: Compare this history with that given by Ronald Kotsch. 1984. "Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide." *East West Journal*. Dec. p. 14-21. Kotsch states that Muso was founded in 1966 and began to export macrobiotic foods from Japan to the West in 1969. Address: Export Dep., Otedori 2-5-1, Higashi-ku, Osaka, Japan. Phone: 06-945-0511.

1288. Adler, Clifford. 1982. Certificate of change of registered office and/or change of resident agent: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 1 p. April 30. 26 cm.

• **Summary:** The name of the corporation is Eden Foods, Inc.—corporation No. 187-885. The address of its registered office as currently on file with the Corporation and Securities Bureau is 4601 Platt Road, Ann Arbor, Michigan 48104. The address of the registered office is changed to 701 Clinton-Tecumseh Road, Clinton, Michigan 48236.

The name of the resident agent is Michael Potter. Signed by Clifford Adler, Vice-President, 30 April 1982. Filed by the Michigan Dep. of Commerce on 12 May 1982. Address: Vice-President, Ann Arbor, Michigan.

1289. Chico-San, Inc. 1982. Choice imported natural foods (Ad). *Bestways*. April. p. 65.

• **Summary:** A half-page black-and-white photo shows Lima Ohsawa, wearing a kimono and carrying a tray of Japanese foods, including Lima Soy Sauce. "Top quality natural foods and condiments are imported from Japan under the supervision of Mrs. Lima Ohsawa, Chico-San's specialist in macrobiotic foods."

Chico-San imports from Japan include Lima Soy Sauce, soybean puree (miso), mineral-rich mercury-tested seaweeds,

azuki beans, black soybeans, barley koji, kuzu, nigari, and tekka. “Soon, a companion for Lima Soy Sauce–Lima Tamari–Wheat Free–Whole soy beans–Rice & zestful–Naturally brewed in wooden casks for about 2 years.”
Address: Chico, California 95926.

1290. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America. *East West Journal*. April. p. 58-61.

• **Summary:** A history of Chico-San, including Bob Kennedy. “In 1981 Chico-San and Arden, the two companies who manufacture rice cakes on a national scale, sold approximately 9 million bags of rice cakes to natural foods stores.”

In 1968 “Chico-San was beginning to work on a project which would change the entire course of natural foods in the U.S.” That year, “Bob Kennedy, Chico-San’s president, had begun negotiating with the Lundberg brothers of Wehah Farm in Richvale, California for them to grow totally organic brown rice. The vision of Kennedy and his associates encouraged these farmers to invest considerable time and energy in a very risky project. The Lundbergs were successful, and this success has been an inspiration and incentive for many other large-scale farmers to grow grains organically—a development that has had far-reaching consequences on the health of millions of people.

The story of Chico-San and Bob Kennedy is one of a dedication to quality that is continually renewed and strengthened. But the development of Chico-San was not always so clear. Kennedy was a studio trumpet player in the 1950s, working for the Columbia Broadcasting Company in New York City. ‘I was feeling good and didn’t really have any serious health problems, but around 1960 I heard of a Japanese man who was lecturing on natural health care and Oriental philosophy, and I was interested,’ Kennedy recently said. This man was George Ohsawa, the teacher of macrobiotics, whom Kennedy eventually met at a summer camp in upstate New York in July of 1960. ‘Ohsawa’s message was very inspiring, and a few of us felt compelled to put his ideas into practice immediately,’ Kennedy recalled.

Ohsawa, after a trip to Japan, returned to America near the end of that year and lectured on the possibility of nuclear war as a result of U.S. / Soviet tensions. He warned that New York City could be one of the first cities to be destroyed and advised his students to leave. Several key members of this early group began to search out areas of the country that would be safe from bombs or fallout and that would also be suitable for growing rice.

They finally decided on the town of Chico in the Sacramento Valley in Northern California, an area of fertile farmland, where rice was already being grown. They felt confident that eventually organic brown rice would also grow there. Thus, in October, 1961, thirty-two of these early pioneers left New York City to travel across the country in a

caravan of VW buses, vans, and station wagons, to settle in Chico, California. The American pioneering spirit had been reinforced with Ohsawa’s spirit of adventure and change—a combination that set them on the path they are still traveling today.

The group was considerably diverse, including five professional trumpeters, a painter, a wood-carver, a Harvard economist, a TV soap opera star, an engineer, and a social worker. Most of these early settlers have since moved on to other things, but not all. Dick Smith, one of the trumpeters, is now vice president of Chico-San and continues to work there, but now with his three children. Kennedy’s wife and two of their four children also work with the company. And Herman and Cornelia Aihara, both of whom had been students of Ohsawa in Japan, have remained involved with Chico-San, although their primary interests are in macrobiotic education through lectures and cooking classes.

“But back in 1961 Aihara and Kennedy were the originators of the food company. They decided to call it Chico-San, ‘san’ being the Japanese word signifying respect. Aihara had contacts in Japan for importing foods such as miso, tamari soy sauce, umeboshi plums, and sea vegetables. They began a small food store in the city of Chico to introduce these products to the local community, which did not, however, buy them. ‘Unfortunately, Japanese foods were not what people had in mind when they considered health foods,’ Kennedy said. ‘The only way we could get any sales was to begin some sort of classes on the value of these foods and macrobiotics in general.’ So Kennedy and Aihara began travelling up and down the Coast giving lectures on philosophy and Oriental medicine. However, even with these classes, sales were not justifying the type of products these men were offering.

“The next step was to introduce a small bakery into the back of the store. Keeping true to their macrobiotic ideals, the bread they baked was an unyeasted loaf made from freshly ground whole wheat, and the best quality oil, sea salt, and water available; no sweeteners were added. Again they had put their principles ahead of conventional business practices and bottom line motives, and again they had created a product with limited immediate demands. So when Ohsawa visited Chico in the summer of 1963 for a lecture series, Kennedy confided in him about the difficulties they were experiencing. Ohsawa laughed at the idea of difficulties standing in the way of ideals and mentioned that a new possibility for a popular food product might be rice cakes. Apparently puffed rice cakes were well-liked in Japan and machines were available to mechanically manufacture them.” Continued.

1291. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America (Continued–Part II). *East West Journal*. April. p. 58-61.

• **Summary:** Continued: “By the end of the year, Ohsawa had

located an old rice cake machine in Japan and shipped it to Chico. Kennedy had it refurbished and assembled and began the first rice cake manufacturing in America. (Basically, rice cakes are made by soaking rice, adding measured portions into individual molds, heating them under pressure, and then releasing the pressure so they puff uniformly and take on the shape of the mold.) However, this first machine was manually operated and required a strenuous effort to stamp out individual crackers. Since the operation of the machine was sending the employees to the chiropractors more and more frequently, Kennedy redesigned it to operate more automatically. Eventually he created a design which worked fairly easily, and they began selling the rice cakes as quickly as they could manufacture them.

“To ensure the quality of the rice, Kennedy and Aihara started searching for the best rice farmers in the area. Eventually they found a Farmer Koda who was growing a strain of short grain brown rice 200 miles south of Chico [Koda Farms in South Dos Palos]. Although his rice was of excellent quality, he was located in an area of cotton growers who used large quantities of chemicals. Kennedy felt compelled to find another farm which was relatively free of surrounding chemicalized agriculture and which would be willing to experiment with growing completely organic brown rice. In 1968 he signed a contract with the Lundberg’s of Wehah Farm [Richvale, California], guaranteeing the purchase of their first organic crop. This was a considerable risk on each side, since at best the farmers felt the yield would be half as much as the conventional crop, and even then the weeds and insects, especially during the paddy stage, would be extremely competitive with the rice. However, the experiment proved successful, and we all have been benefiting ever since. (Other farmers have since begun producing organic brown rice, most notably Farmer Garrich of Lone Pines Farm in Arkansas.)

“Interestingly, with the recession of 1973 and 1974, the price of organic rice increased quite a bit and the demand for organic rice cakes decreased considerably, so Chico-San discontinued the organic rice cakes—selling only organic rice. However, by 1976, they were able to reintroduce the organic rice cakes and the demand has again been on the up-swing.

By the late ‘60s/early ‘70s the FDA began a close scrutiny of the relationships between food companies and educational programs. They would not allow promotion of foods based on educational or health claims. As a result Kennedy and Aihara established the George Ohsawa Macrobiotic Foundation (GOMF) to continue the educational activities separately from the food company. Kennedy became the director of Chico-San, Aihara the director of GOMF. This relationship has proved very productive for both sides as each continues to promote the other. Aihara is still involved in the selection and quality control of the food products, and he gives weekly classes to approximately thirty-five of the seventy-five staff members of Chico-

San. Kennedy began to devote himself completely to the development of the food company.

“In addition to enlarging the ware- house space, Kennedy looked for ways to expand and improve the product line. In 1974 he brought Junsei Yamaguchi into the company to begin manufacturing miso and tamari soy sauce according to Chico-San’s standards. Chico-San also began to produce yinnie rice syrup, a traditional sweetener Kennedy had discovered on one of his trips to Japan. Yinnie syrup is a whole grain product made from malted wheat and rice and has a much lower concentration of refined sugars than most other malted grain sweeteners such as barley malt or corn syrup. During this time Chico-San had acquired additional rice cake machines purchased from Japan, but Kennedy felt that these machines could be improved. Eventually he developed a completely hydraulic machine which was capable of increasing the supply of rice cakes up to the market demand. Unfortunately, soon after they got the new machine into production, it shorted out, blew up, and caused a fire which totally destroyed the Chico-San warehouse, all the incubating miso and tamari, and the majority of their other products. The founders of Chico-San had escaped the threat of destruction in New York, but over a decade later they witnessed their almost total devastation in California.

“However, by that time the company had developed a strong reputation in the market. In addition, Kennedy was willing to withstand considerable odds and start from scratch. So within a year of the fire (and a loss of \$250,000 beyond the insurance settlement), he began again with a larger warehouse and what he considered to be better rice cake machines. Presently, Chico-San is making rice cakes twenty-four hours a day, seven days a week. It is selling these cakes in the natural foods stores, and has distribution in the supermarkets and (under the label of Landau and Kemach) in the Jewish Kosher foods stores. Kennedy is also attempting to get his rice cakes into the institutional food services, such as hospitals and prisons, but finds this to be very slow. ‘The bureaucracies involved are very difficult to work with. But we do have a few public schools in California using rice cakes in the lunch programs,’ Kennedy claims.

Although Chico-San never got back into miso and tamari production, it did expand its own product line by increased importing of traditional macro- biotic foods from Japan. These include Lima Soy Sauce (named after George Ohsawa’s wife, Lima), miso, barley koji, kuzu, and rice malt vinegar; the sea vegetables hijiki, kombu, wakame, nori, and kanten; nigari (for making tofu); tekka (a condiment rich in iron); umeboshi plums; and the Japanese teas kukicha, mu, and renkon (lotus root). In this country Chico-San makes yinnie syrup, yinnie taffy candies, rice cakes, carob-covered rice cakes, and rice nuggets. Chico-San also publishes the *Chico-San Cookbook*, which was written by Cornelia Aihara. The products sold by Chico-San undergo close scrutiny by Kennedy, Smith, and Herman

Aihara. They are very careful about quality control and generally agree about standards. One exception has been the carob-covered rice cakes. It is difficult to solidify the carob without adding some type of refined sweetener. Although they have been experimenting with yinnie syrup, at this point they are using fructose but without consensus within the company as to whether it is a healthful ingredient. Besides the manufacturing company in Chico, Kennedy is planning to reopen the Chico-San retail store. He has also opened up a warehouse and rice cake plant near Trenton, New Jersey and is considering opening up another outside of London [England]. In addition, Kennedy and Aihara went to Japan in early December, 1981, to conclude formal discussions with the Ohsawa C.I. macrobiotic teaching organization in Tokyo, concerning the creation of a distribution company called Ohsawa U.S.A. Lima Ohsawa's sister, Flora, will be in charge of this company which will allow for the increased distribution of many Japanese macrobiotic specialty foods.

1292. San-J. 1982. Some soy sauces are called tamari. But they're not! San-J is the real tamari (Ad). *East West Journal*. April. Back cover.

• **Summary:** This ad is a combination of black-and-white and color. In black-and-white are 5 quarts of so-called tamari under the following brands: Westbrae, Erewhon (2), Llama, and Pure & Simple. In color are 2 bottles of San-J Tamari (wheat free, in 5.7 oz refillable dispenser and 20 oz glass bottle). The text explains that this real tamari is: Made only from soybeans. Mellow, smoother, richer than regular soy sauce. More protein than regular soy sauce. San-J Tamari will enhance any dish. A concentrated, economical product.

1293. *Natural Foods Merchandiser*. 1982. Tree of Life, the largest natural food wholesale company in the Southeast, was sold in April. May. [1 ref]

• **Summary:** ... to a Jacksonville, Florida businessman whose background is in insurance and real estate management. The company was founded in 1972 by Irwin Carasso, who remained the president until the sale.

1294. *Natural Foods Merchandiser*. 1982. Erewhon plan accepted. May.

• **Summary:** A \$1.3 million offer by Ronald Rossetti, president of Nature Food Centres, has been accepted as the reorganization plan in the Erewhon, Inc. bankruptcy. On 10 Nov. 1981 Erewhon, a Boston-based natural foods wholesaler, was forced to file for bankruptcy under Chapter 11 of the U.S. bankruptcy laws because of debts totaling \$4.3 million. Then on 15 Feb. 1982 Laurelbrook Foods also filed a Chapter 11. Richard Curry was president. The company didn't have the capital to finance growth.

1295. *Natural Foods Merchandiser*. 1982. Laurelbrook files for Chapter 11. May.

• **Summary:** "Laurelbrook Foods, Inc., a major East Coast natural foods distributor [in Bel Air, Maryland], filed Feb. 15 for reorganization under Chapter 11 of the U.S. bankruptcy laws, and was scheduled to submit a repayment plan to its creditors by March 10. This is the second East Coast distributor which has recently filed a bankruptcy petition. Last January, Erewhon, Inc., a Boston-based natural foods wholesaler, was forced to file a Chapter 11 because of debts totalling \$4.3 million. Laurelbrook president Richard Curry declined to comment on the subject."

"One large East Coast-based supplier, who spoke with *Natural Foods Merchandiser* off the record said, "This is another example of a company which didn't have the capital to finance its growth, or the management strength to attract new capital. Many of us felt with Laurelbrook that it was just a matter of time. The distribution business today is tough. You've got increased energy costs, high interest rates and a tough economy. This year will be a real test for many companies."

1296. *Natural Foods Merchandiser*. 1982. New study defines diverse industry. May. p. 1, 50-54.

• **Summary:** Estimated sales of natural foods in the USA during 1981 were \$2.4 billion. Independent natural food stores accounted for just under \$2 billion of that, with the rest coming from large chains and supermarket sections.

1297. *New Age Journal (Boston, Massachusetts)*. 1982. Erewhon changes hands. May. p. 15.

• **Summary:** Erewhon, one of the oldest and best known natural foods manufacturers in the U.S., was sold on April 2 to Nature Food Centers, which operates a chain of 85 health food stores primarily devoted to marketing vitamin pills and other dietary supplements. Erewhon had sales of \$17 million a year. The company has been plagued throughout its history by financial and labor crises (see "From Alternative to Big Business," *New Age*, Nov. 1979). In 1981 alone Erewhon's losses amounted to more than \$1 million.

1298. Arrowhead Mills, Inc. 1982. Price list and order form. Hereford, Texas. 4 p. June 15. 28 cm.

• **Summary:** Printed with light brown ink on white paper. Contents: Whole grains. Beans, seeds and nuts. Cereals, flakes and granolas. Flours and mixes. Packaged grains. Packaged beans, seeds and nuts. Packaged cereals, flakes and granolas. Packaged flours and mixes. Oils—natural unrefined. Nut butters (Peanut butter—creamy or crunchy). Condiments. Magnificent Munchies: Nutrition-bars (Carob Chew, Sesame Chew, or Vanilla Chew). Pastas. Protein powders and yeast. Arrowhead Mills bulk module.

Soy related products—bulk: Soybeans (50 lb). Bulghur-soy grits (50 lb). Soybean flakes (25 lb). Soy flour (roasted, 30 lb).

Soy related products—packaged: Soybeans (12 x 1 lb).

Bulghur-soy grits (12 x 20 oz). Soybean flakes (12 x 1 lb). Soy flour, whole (12 x 1½ lb). Soy oil (pint, quart, or 5 gallon). Tamari soy sauce (pint, quart, or 4.7 gallon). Protein powder (12 x 10 oz). Address: Box 2059, Hereford, Deaf Smith County, Texas 79045. Phone: (806) 364-0730.

1299. Re: First International Natural Food and Health Exhibition. 1982. Letter to William Shurtleff at Soyfoods Center, June 21. 1 p. Typed, on letterhead. [Eng]

• **Summary:** “We were introduced to you by Mr. Lawrence Dreyer from “Weg der Natur” in Austria who forwarded us all the mail received from you.

“At the moment we are organizing the “First International Natural Food and Health Exhibition, Conference, Seminar and Film Festival,” which will be held in West Germany in autumn 1984, with the expected attendance of over 40,000 persons.

“We will appreciate very much if you join us to organize within our exhibit the “First International Soyproducts Conference.”

“For this matter we would urgently need your “Soyfood directory” and “Data Book” as well as the “Soyfood Mailing List.”

“Also we are very interested to establish a Soya Food Center in Munich, Germany. Please send us information and application forms.

“Also we want a one year subscription to the “Soyfoods Magazine.” When possible we want to buy a camera-ready copy of pamphlets about Tofu and Miso in German.” Address: Weg der Natur, Amalienstrasse 45, D-8000 Munich 40, West Germany. Phone: (089) 28 37 51.

1300. Chico-San, Inc. 1982. Mail order–Price list. P.O. Box 1004, Chico, CA 95927. 4 p. June. 28 cm.

• **Summary:** Products include: Rice Cakes (6 varieties, with 4 new ones coming soon); all in 3 different packages. Carob coated rice cakes in plain or mint flavors. Yinnies brand products: Taffy, Caramel, or Rice Syrup. Grains, beans, and seeds: Incl. Sweet brown rice, azuki beans, black [soy] beans (the latter two imported from Japan since 1962). Tea. Natural condiments from Japan (some imported since 1962): Lima soy sauce. Mugi (barley) miso. Kome (rice) miso. Rice malt vinegar. Tekka (soy plus). Nigari (for tofu making). Kuzu (wild arrowroot). Salt plums (umeboshi). Sesame oil (dark). Koji, barley. Seaweeds from the Orient: Wakame (curly dulse). Kombu. Hijiki. Kanten (gel). Nori. Household goods: Incl. The Yinnies Brand Rice Syrup Cookbook.

Introducing a new Chico-San Product: Tamari Soy Sauce. Address: Chico, California. Phone: 916-891-6271.

1301. Chowka, Peter Barry. 1982. Natural foods: A commodity in crisis. *New Age Journal (Boston, Massachusetts)*. July. p. 32-41.

• **Summary:** Includes sidebars or discussions on: “Erewhon:

High hopes, high standards—and low profits.” Michio Kushi. A history of health foods. Wildwood Natural Foods and Good Earth: Small, beautiful, and profitable. The McGovern Committee and Dietary Guidelines. Bread & Circus (whose first store opened in 1975). Dr. Michael Jacobson of Center for Science in the Public Interest. Talk show host Gary Null. Address: Massachusetts.

1302. **Product Name:** Vegi-Patties (Meatless Burgers). **Manufacturer’s Name:** Lifestream Natural Foods Ltd. **Manufacturer’s Address:** Richmond, BC, Canada V6V 1J7.

Date of Introduction: 1982 July.

Ingredients: Textured soya flour, wheat gluten, safflower oil, whole wheat bread crumbs, tomato paste, dried vegetables, oat flour, pea flour, tamari, sunflower seeds, sesame seeds, nutritional yeast.

Wt/Vol., Packaging, Price: Four 3-ounce burgers per box. **How Stored:** Frozen.

Nutrition: Per 3-oz. burger: 230 calories, 15 gm protein, 17 gm carbohydrate, 13 gm fat, 485 mg sodium.

New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 55. “All vegetable meat substitute.” Spot in Adweek East. 1987. April 6. All vegetable meat substitute. Label. 1987 (undated). Box 8.5 by 4.5 by 1 inch. Color illustration of burger on lettuce and tomatoes. “All vegetable meat substitute made with textured soy flour. An exciting new way to cook. Look for recipe ideas on back.” Cheese and Spinach Casserole. Spaghetti Sauce with Vegi-Balls.

1303. Quong Hop & Co. 1982. New Leaf. The Soy Deli in natural food store freezers everywhere (Ad). *Natural Foods Merchandiser*. July. p. 136.

• **Summary:** A 1/3 page vertical black and white ad. “Now, open a full-line gourmet soyfoods deli right in your own store’s freezer and give your customers all they’ve been looking for in natural food goodness, gourmet quality and selection, and super-convenience.

“Natural food goodness: Every product from your New Leaf Soy Deli contains only the finest quality natural ingredients including organic tofu, garden fresh vegetables, organic whole wheat pastas, and pressed oils. NO sugars, NO preservatives, and NO artificial ingredients whatsoever are used, We give you tofu, the food of the future, in its most delicious forms ever.

“Gourmet quality and selection: Plump and juicy tofu ravioli, ready to boil and serve in just minutes, an eggless tofu quiche with Gruyere cheese and fresh mushrooms on a whole wheat crust, and rich and savory tofu cacciatore with garden vegetables are just a few of the many items you can offer to satisfy even the most discriminating tastes. For desserts or snacks, they’ll always come back for more of our baked tofu no-cheese cakes or our incredible dairy-free tofu ‘Wholly Canoli.’

“Convenience for your customer and for you: For your customer, convenience means desserts that are ready to thaw and serve from the package and entrees that are piping hot and ready to eat from the oven or microwave in just minutes. For you, the retailer, convenience means that just one phone call and as little as \$50.00 can put you into the soy deli business with our soy deli ‘Grand Opening’ kit. Included in one package are window posters, shelf talkers, and a selection of the best moving products in the line.

“The Grand Opening: For piping hot samples and specials, drop by our grand opening at the coming NNFA Show in New Orleans [Louisiana], Booth 755.” Address: 161 Beacon St., South San Francisco, California 94080.

1304. **Product Name:** Tree of Life Miso [Mugi Miso, Genmai Miso, Hatcho Miso, Kome Miso].

Manufacturer’s Name: Tree of Life, Inc. (Importer/Distributor). Made in Japan.

Manufacturer’s Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1982 July.

How Stored: Shelf stable.

New Product–Documentation: Brochure. Undated. Tree of Life natural foods of Japan. Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. These 4 miso products were introduced in April 1982. Talk with Greg Leonard of Tree of Life. The miso products were launched on 15 July 1982.

1305. *Vegetarian Times*. 1982. Erewhon names new president. July. p. 67.

• **Summary:** Erewhon, which filed for bankruptcy last November, has announced the appointment of Ronald L. Rossetti and its new president and CEO. Rossetti, age 38, is currently head of Nature Food Centers, Wilmington, Massachusetts. It is anticipated that Michio and Tomoko Kushi will continue to be involved with the company.

1306. Therrien, Lois. 1982. Erewhon bought by Nature Food. *Boston Globe*. Aug. 26. Economy section.

• **Summary:** “Erewhon Inc., the Cambridge-based health food retailer, has been purchased by the owner of Nature Food Centres Inc. for an undisclosed sum. The company, which had been trying to reorganize under the federal bankruptcy laws, was purchased by Ronald L. Rossetti, 38, who had been named president and chief executive officer in April after Erewhon filed for protection under Chapter 11.”

“The health food company will remain as a separate entity from Nature Food Centres but Erewhon products will be marketed in Nature Food Centres stores, according to Anthony Barber, vice president of finance for Nature Food Centres. Nature Food Centres, based in Wilmington [Massachusetts], operates 86 vitamin and health food stores in the United States.” Address: Globe staff, Massachusetts.

1307. Chowka, Peter Barry. 1982. Natural foods: The quest for standards. *New Age Journal (Boston, Massachusetts)*. Aug. p. 47-51.

Address: Massachusetts.

1308. Pure Sales. 1982. Some soy sauces are called tamari. But they’re not! San-J is the real tamari (Ad and poster). *East West Journal*. Aug. Inside front cover.

• **Summary:** This ad is a combination of black-and-white and color. In black-and-white are 5 quarts of so-called tamari under the following brands: Westbrae, Erewhon (2), Llama, and Pure & Simple. In color are 2 bottles of San-J Tamari (wheat free, in 5.7 oz refillable dispenser and 20 oz glass bottle). The text explains that this real tamari is: Made only from soybeans. Mellow, smoother, richer than regular soy sauce. More protein than regular soy sauce. San-J Tamari will enhance any dish. A concentrated, economical product. Address: 250 Newport Center, Newport Beach, California 92660. Phone: (714) 760-1076.

1309. Sattilaro, Anthony; Monte, Tom. 1982. Physician, heal thyself: A doctor’s remarkable recovery from cancer and the diet he’s convinced was responsible. *Life*. Aug. p. 62, 64, 68, 70. [1 ref]

• **Summary:** “This article was excerpted from *Recalled by Life: The Story of a Recovery from Cancer*, (c) 1982 by Anthony J. Sattilaro with Tom Monte, due from Houghton Mifflin in September.”

Four years ago, Dr. Sattilaro, President of the Methodist Hospital in Philadelphia, was dying of cancer. Today, after changing his lifestyle [primarily by adopting a macrobiotic diet, including brown rice, miso soup, and sea vegetables,], prescribed by Deny Waxman and Michio Kushi, he is totally free of this disease. Several photos show Dr. Sattilaro—and two x-rays of his upper body. Address: 1. M.D., Philadelphia [Pennsylvania].

1310. Weiner, Steve. 1982. Cashing in on ‘natural foods.’ *Eugene Register-Guard (Oregon)*. Sept. 19. p. 1E, 2E.

• **Summary:** A large color photo shows Surata Soyfoods tofu and tempeh, plus Nancy’s Honey Yogurt. Sue Kesey, co-owner of the Springfield Creamery (founded 22 years ago), is president of the fledgling Lane County Natural Foods Association, a 20-member group that wants everyone to eat natural foods. Gil Johnson is a spokesman for the Association. Callix Miller is Surata’s marketing manager.

1311. Corn Country Whole Foods, Inc. 1982. Fall-winter 1982: New & improved (Catalog). 132 South Market St., Champaign, IL 61820. iv + 26 p. No index. 28 cm.

• **Summary:** The cover of this natural foods, vegetarian catalog is printed on orange paper with brown ink. Corn Country has increased the number of products it distributes, both those under its own Market Street brand and those

made by many other companies. Corn Country trucks deliver throughout the Midwest: Freight is free with a minimum order of \$400. Product categories: Refrigerated products. Bulk foods. Packaged foods. Snacks. Other.

Interesting products: (1) Tofu: Packaged (\$0.82/lb) or bulk (\$80/lb). (2) Market Street bread: Cinnamon raisin and Whole wheat both contain “whole soy flour.” (3) Stoneground flours: Soy flour-full fat (OG = Organically Grown) (\$0.42/lb). Corn Country uses old fashioned granite stone mills to keep the temperature low, which “preserves the nutritional value and flavor of the whole grain... Whole soy flour is milled from soybeans which have been heated first to destroy an enzyme which interferes with protein digestion. It is milder tasting compared to the defatted soy flour typically sold commercially.” (4) Market Street granolas: Of the 7 varieties, 6 contain small amounts of “soy flour.” (5) Beans, peas, and lentils: Soybeans OG (\$0.28/lb). Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans. (6) Market Street meals (vegetarian): Nutburger (incl. soy flour). Soyburger (soy flour is main ingredient). (7) Sea vegetables (9 types). (8) Westbrae miso (6 types). (9) Market Street nut butters: Peanut butter (“coarsely ground to retard oil separation”). Almond butter. Sesame tahini. (10) Natural oils: Sesame oil. Safflower oil. (11) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Tamari (with dispenser to quarts). (12) Seeds: Alfalfa seeds. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. Pepitas. (13) Market Street snack nuts: Shoyu almonds. Shoyu suns (sunflower), Shoyu cashew pieces. (14) Soy & corn snacks: Soy nuts salted. Soy nuts unsalted. (15) Market street mixes (unsulfured dried fruits, nuts and seeds): Sweet & shoyu mix (ingreds: Raisins, date pieces, dried bananas, shoyu almonds, shoyu cashews, shoyu sunflower seeds). Flatland mix (incl. unsalted “soynuts” {soybeans, vegetable oil}, fancy cashew pieces, and pumpkin seeds). (16) Health and beauty aids: Dr. Bronner soap (14 types). (17) Literature: 25 Talking Foods pads. (18) Traditional medicinal herb teas (27 types). (19) Celestial Seasonings teas (38 types); (20) Packaging supplies and kitchen help: Tofu kit (\$12.56). Address: Champaign, Illinois. Phone: 217-359-8843.

1312. *Natural Foods Merchandiser*. 1982. Food co-ops fight off economic woes. Sept. p. 72-73.

• **Summary:** “It was the Great Depression that spawned the consumer food cooperative movement, and ironically, it is the worst economic period since then that threatens to end it.” The co-ops organized in the 1930s were designed to bring groceries and related products to members at the lowest possible prices, and to ensure that people had a voice in running the stores where they shopped.

Many of the major consumer food co-ops lost money last year, as revealed at the annual conference of the Consumer Cooperative Manager’s Association (CCMA) in

Seattle in late June.

The Consumers Cooperative of Berkeley, for example, which has gross sales of more than \$80 million a year, was forced to close two stores last year.

In many parts of the USA, the word “co-op” is often preceded by the adjectives “hippie” or “funky,” in reference to the small natural foods stores that emerged in the late 1960s and early 1970s. But this is not correct usage; in co-op parlance, these stores (when they are cooperatively owned) are referred to as “new-wave” co-ops.

In 1981, according to a report released by the CCMA, the “old-wave” co-ops had total sales of \$340 million compared with only \$40 million for the “new wave” cooperatives.

1313. Benson, Taylor. 1982. Foodcrafters’ market study: The U.S. soy sauce market. Colorado: Foodcrafters. 8 p. Oct. 28 cm. [6 ref]

• **Summary:** Contents: I. Existing domestic markets. Overview of the existing domestic natural foods market. Overview of the existing domestic shoyu and tamari market (sources are cited). II. Market survey results. Background information on the survey. Survey questions and results (1,190 respondents in Oct. 1982 at Pearl Street Market, in Boulder, Colorado, at Rainbow Grocery in Denver, and via a mail-in questionnaire from random natural food consumers around the USA).

1. Have you ever used shoyu? (9.2%), tamari? (70.6%), soy sauce? (12.6%), none of these? (7.6%). 2. How did you first learn of the product? Friend (52.7%). Family (10.9%). 3. What size do you usually purchase? 16 oz (33.6%). 4. Which brand do you purchase? Private label (40.8%). Kikkoman (11.8%). Erewhon (9.1%). 5. If you heard about a new brand that was low in salt and naturally fermented, how likely would you be to try it? Definitely (36.4%). Probably (35.5%). 6. How important are the following items to you when you evaluate your product? Price (#3), company rep., bottle shape, package, label, advertising, aroma (#2), taste (#1). 7. Are you a vegetarian? Yes (33.6%). No (35.3%). Partially (31.3%). What is your age (25-34 = 50.4%). 9. What occupational category describes you best? 10. What is your average annual household income? (Under \$5,000 = 18.5%). 11. Sex? Male (53.8%). Female (46.2%). 12. How many people do you shop for? (1 other = 44.3%; Yourself = 29.5%). 13. How many years of school have you attended? (16 years = 41.6%).

Summary of the market survey results. III Market strategy. Address: Colorado.

1314. **Product Name:** Lima Real Tamari (Wheat Free). **Manufacturer’s Name:** Chico-San, Inc. (Importer). Made in Japan. **Manufacturer’s Address:** P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1982 October.

New Product–Documentation: Ad in East West Journal. 1982. Oct. p. 27. “Would the real tamari please stand up!?”

1315. Chico-San, Inc. 1982. Would the *real* Tamari please stand up!?! (Ad). *New Age Journal (Boston, Massachusetts)*. Oct. p. 7.

• **Summary:** Chico-San thanks San-J for exposing the practice of labeling soy sauce as Tamari. Chico-San’s Tamari is real! “It contains no wheat and is brewed naturally from only whole soybeans, water and sea salt.” Address: P.O. Box 1004, Chico, California 95927.

1316. **Product Name:** Tree of Life Baked Tofu, and Savory Yeast Baked Tofu.

Manufacturer’s Name: Tree of Life, Inc. (Distributor).

Manufacturer’s Address: St. Augustine, FL 32084.

Date of Introduction: 1982 October.

Ingredients: Organically grown soybeans, purified water, natural Nigari, soy sauce and spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 5 by 4.5 inches.

Plastic. Brown, yellow, green and white. Picture of tree (may be logo). “We appreciate your confidence in choosing this Tree of Life product. To ensure your satisfaction we have made certain it contains the freshest, most natural ingredients available.” Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in Oct. 1982.

1317. Smith, Patricia J. 1982. History of Erewhon, natural foods, and macrobiotics (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 7. 1 p. transcript.

• **Summary:** This interview was conducted after Erewhon declared bankruptcy. What caused Erewhon’s demise? The main reason was that the company grew too rapidly. Erewhon was distributing many products that were taboo for macrobiotics, such as frozen meat and vitamins. Erewhon was selling the very foods they advised people not to eat. The company lost integrity. She does not think that poor management was a major cause. Erewhon was a social, philosophical, and economic experiment. One reason the company had to grow was to pay for the move to the large and very expensive warehouse at 3 East Street in early 1978. No single factor caused Erewhon’s demise. By 1982 Erewhon was located at 5 Waltham St., Wilmington, Massachusetts. Patti went to Boston in 1977, after working for Erewhon–Los Angeles, in California.

Erewhon failed on one level but on another it succeeded because of the many people in other companies who are still carrying on the ideas that it started. Erewhon pioneered in developing quality foods and maintaining standards, until near the end.

Note (based on a talk with Patricia on 28 May 1996):

She was in Los Angeles from 1970-1974 (not with Erewhon), then in Los Angeles affiliated with Erewhon from Aug. 1974 to Aug. 1977. Then she lived in Boston from 1977-82. She lived and studied with the Kushis for 2 years in Boston. She feels extremely close to Aveline and Michio, as if they were her parents.

Enclosed is a color copy of a pin Patricia made for Erewhon folks and friends. Address: New England Regional Manager, Erewhon Inc., 3 East St., Cambridge, Massachusetts 02141. Phone: (617) 354-2001.

1318. Houtz, Rhoda. 1982. Ronald Rossetti, Nature Food Centers, and Erewhon (Interview). *SoyaScan Notes*. Nov. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ronald Rossetti, owner of Nature Food Centers, bought Erewhon (including the 3 Erewhon retail stores in the Boston [Massachusetts] area–Newbury, Brookline, and Cambridge) and filed a reorganization plan with the court. He is now the owner of Erewhon Inc., which is a separate and independent company from Nature Food Centers; there is no affiliation between the two. Michio Kushi transferred his Erewhon stock to Mr. Rossetti. The plan Rossetti filed offers to pay creditors 18% (18 cents on each dollar owed) over 5 years.

Erewhon is no longer manufacturing any of its own products, is also no longer a distributor, and has totally moved out of the warehouse at 3 East Street. The Erewhon brand products are now being manufactured by subcontractors with careful quality control. Michio has been retained as a consultant. He is on the board of directors of the new Erewhon but is not chairman of the board.

Erewhon Inc. does not presently sell to any retail outlets, only to master distributors and a chosen few distributors. Nature Food Centers owns retail stores; it is not a master distributor. Stores by the name of Erewhon in Los Angeles, California, are not connected with Erewhon Inc. Address: Nature Food Centers.

1319. Jacobs, Lenny. 1982. Recollections of the early days of Erewhon (Interview). *SoyaScan Notes*. Nov. 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lenny is absolutely certain that when Paul Hawken left Erewhon, other people had to purchase his stock. Paul had and apparently still has a lot of bitterness about this. The guy at the branch of Erewhon in Toronto, Canada, was extorting a lot of money from the company. There was also a scam with a guy from Free State of the Arc; he took lots of money and ran, then later wanted to give it to Erewhon. Paul used that as a reason for quitting Erewhon; he may not have known that the money was dirty money.

When he resigned, Paul Hawken called a public meeting. It was a big event, with many people in attendance. Paul was very bitter and he aired lots of “dirty linen.” It may be that later the Kushis gave him another 25% of the

Erewhon stock; Lenny is not sure. Lenny is planning to do a story on Erewhon. People can still trust the Erewhon label for quality. Address: Publisher, East West Journal, Brookline, Massachusetts.

1320. *Ann Arbor News (Michigan)*. 1982. A Clinton firm [Eden Foods] is one of six Michigan companies that are among 3,100 exhibitors at SIAL. Nov. 12.

• **Summary:** SIAL is the “world’s largest food show, which began in Paris this week. Companies from 61 countries are attending the show, which is expected to attract more than 100,000 visitors, including 40,000 from outside France.” SIAL serves as an international meeting place for food buyers and sellers and provides opportunities to view the world’s most developed food technology. The exhibit closes Nov. 20.

1321. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript.

• **Summary:** Oroville is located about 23 miles southeast of Chico, California. Shurtleff visited Herman Aihara at his home with a tape recorder and about 75 questions.

The first East West Institute in New York City was established in about 1960 by Lao Shastri, a woman disciple of George Ohsawa. She studied Sanskrit at Cambridge, and was a distinguished scholar and an authority on the subject. It was her idea to have such an institute. She met Ohsawa in India and he advised her to stop eating sugar. She was in New York City when Ohsawa was there; he stayed at the Riverside Buddhist Academy, a cultural center. She was a very aggressive woman but very quiet, and she wore a sari. She convinced famous people to be directors of the Institute. She lived at what became Herman’s house before Herman came to the USA. She died while relatively young, not long after late 1961.

In 1965, about 4 years later, Michel Abehsera, re-opened and activated the East West Institute.

Lima Ohsawa’s maiden name was Sanae Tanaka. Her second marriage was to George Ohsawa.

Ohsawa’s first name was Nyoichi, not Joichi. Yukikazu was his original first name, written with the same Japanese characters. He just took “Georges” as his French name. Larry Korn says Joichi became “Georges.”

The village was named “Hi no Haru.” Ron Kotzsch got it wrong (but not in his history book, see p. 104). Herman has heard this 100 times.

The correct spelling of Kaibara’s given name is Ekiken, not Ekken.

Herman does not know of Lima Ohsawa’s daughter, Fumiko. But he heard that her second child, Mari, died of excess salt.

The system of yin-yang (*in-yo*) was first used by

Ohsawa in about 1929 in a book of lectures entitled *Shokuyo Kogi Roku (Lectures on Macrobiotics / Macrobiotic Studies)*; he has a copy at home. He was still working in the Shokuyokai. Ask Hashimoto Masanori, who is doing a lot of research on Ohsawa and early macrobiotic history, at Nippon CI in Tokyo.

Before Ohsawa’s first visit to the United States there was a little bit of talk about macrobiotics with Michio Kushi at Michio’s apartment, with a few people coming in but no real lectures. So Ohsawa’s first series of lectures was the first real transmission of macrobiotics to the USA. Michio and Herman did not know much about macrobiotics before Ohsawa’s first visit. Herman studied with Ohsawa in Japan for only 1 month, and Michio had met Ohsawa only 3-4 times. Herman came to the USA to study the helicopter aviation industry, not to teach macrobiotics; he studied at a technical institute in Brooklyn. However Herman read a lot of Ohsawa’s books in Japan. So when Herman came to the USA he was personally very interested in macrobiotic philosophy (not so much in the diet, but with no thought of teaching).

Aveline Kushi came to the USA a long-time student of Ohsawa. She believed the diet was very important and she influenced Michio.

After Ohsawa’s first series of lectures, Herman got interested in teaching macrobiotics. Why did Ohsawa stay with Herman? Most others were afraid of him. It is not correct to say that Herman was Ohsawa’s closest student. Michio was also close because of lots of correspondence he had had with Ohsawa. Ohsawa tried to convince Michio of the value of macrobiotics.

When did Michio change careers? He had been at Columbia University for about 1 year. Then, on his own, he got the idea of working for world government [“a one-worlder”], to promote “one peaceful world. Herman has a draft of Michio’s paper on this subject, including publications and schools, by about 1952-53. Michio was in Europe in 1952. Ohsawa said that “One Peaceful World” must include diet. At that point Michio started his serious interest in macrobiotics. Michio was initially involved in business.

In 1955 Azuma, a small gift shop selling Japanese handcrafts, was opened at 802 Lexington Ave. at 62nd St. by Cornelia and Herman Aihara, Michio, and Roland Sato. Michio focused his efforts on this business—not on teaching macrobiotics. In 1956 Michio and Herman started Ginza, a similar gift shop down town at 9 West 8th Street; they did not include Roland Sato who was very angry at this time. Both of the gift shops were very successful. They were established to impress Takashimaya—a leading department store chain in Japan [see Emerson 1958]—and to prove that a branch of Takashimaya could be successful in New York City.

Michio was an interpreter in the U.S. Dept. of the Interior to guide foreign visitors; he earned \$45 per day. One

visitor was the director of Takashimaya, Michio convinced him to start a branch of Takashimaya in New York City. Michio then worked for Takashimaya, and eventually rose to become vice president of the branch.

Musubi was started by Alcan Yamaguchi in the fall of 1960 (not in the late 1950s), near Greenwich Village. Zen Tea House was different; it was also started in 1960, but by an American, after Ohsawa's first lectures. After that, Musubi (another restaurant) was established. Herman did not supply the carpentry (as stated in Shurtleff's draft history of macrobiotics in the USA). Miso and shoyu were served in both restaurants.

At Ginza, starting in 1956, Herman sold a little food; people came to buy food there after Ohsawa's lecture, including miso and shoyu. It was the only place in the USA you could buy macrobiotic foods. It was a back-room operation and the food was imported from Ohsawa Japan. As soon as Ohsawa started lecturing in the U.S. he imported 20 [wooden] kegs of shoyu. It was sold at intermissions and after his lectures.

Junsei Yamazaki first arrived at Chico in 1963, stopped only briefly, then went to New York City that same year. Thus, Yamazaki was not connected with Musubi in 1960, but he did help them starting in 1963, when Michio was managing the shop at a new location. In 1960 Herman sometimes helped Alcan Yamaguchi at Musubi.

The first summer camp on Long Island was about 2 months long, with lectures by Ohsawa only on weekends. Some people stayed during the week. 1,000 to 2,000 people attended.

The Ohsawa Foundation in New York City was founded in 1961 by Michio, Irma Paule, etc. Herman was in Europe at the time. He left for Europe in about Jan/Feb. of 1961 and returned in the fall. Then he was elected president of the Ohsawa Foundation.

Herman's first macrobiotic publication was *Macrobiotic News*, which started in 1960; its maximum circulation was several hundred. It continued until he moved to Chico in 1961, and then was re-continued.

The macrobiotic periodical *Macrobiotic Monthly* was started in Los Angeles in 1965 by Herman and Lou Oles. Its title then changed into the *Macrobiotic*. It ceased publication in 1978. Its maximum circulation was over 1,000.

Publishing at Chico started in 1962. Herman's present periodical is *GOMF News*, which has a circulation of about 650. Concerning books that Herman and Cornelia have written: *Miso and Tamari* has sold about 10,000 copies (lots through Nutribooks). *Soybean Diet* has sold about 10,000 copies. *The Dô of Cooking* (1972, four seasonal volumes) has sold about 10,000 copies. *The Calendar Cookbook* (1979) has sold about 5,000 copies. The *Chico-San Cookbook* was first published in 1972. But *Zen Cookery* has sold about 50,000 copies.

Attendance at French Meadows summer camps was

about 100 to 200. Address: Oroville, California.

1322. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San (Interview) (Continued—Document part II). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript.

• **Summary:** Continued: Chico-San imported their first Japanese foods from Herman personally. At that time, there was no Muso and no Nippon CI. Ohsawa Japan (which started in about 1965) was the trading / export company and Nippon CI was devoted to education. Before Muso was "Three Boys," the "Three L" (*San-L*) company. Ohsawa told them to take charge of exports. Then Mr. Okada took over from them. Osaka was PR and education. "Three L" (which started in about 1962 in Osaka) was whom Chico-San was importing from. George Ohsawa kept a careful watch over what was being exported from Japan. Chico-San later imported from both Muso (Osaka) and Ohsawa Japan (Tokyo). Note: Did Ohsawa have two trading companies? If so, why?

The first edition of *The Book of Judgment* was printed in Japan in about 1956, then revised in 1966. There is no publication date in the book. This book came after *Zen Macrobiotics*. It is actually *The Philosophy of Oriental Medicine* (subtitled *The Book of Judgment*), probably first written in French.

Herman has just started writing a biography of Ohsawa, but he is too busy, so it will not be finished for a long time.

The Ohsawa Foundation in Paris was started by 1956 by George Ohsawa. The Ohsawa Foundation in Tokyo started before 1960. The Ohsawa Foundation in Los Angeles was started in 1965 by Lou Oles, an older Jewish trumpet player. The Ohsawa Foundation of New York was founded in 1961 by Michio Kushi and Irma Paule. The name "GOMF" was coined in 1970.

Herman has a green 8½ by 11 inch edition of *Zen Macrobiotics*. Herman says the date was about 1960. It shows that the Ohsawa Foundation then existed in New York, Paris, Brussels, and Tokyo. It also contains lots of recipes. I copied some pages. Copyright date of the fifth edition was 1966, Ignoramus Press, the Ohsawa Foundation, 1424 N. Curson Ave., Los Angeles.

Michio Kushi was Ohsawa's senior student in the sense that he came to America first. I should omit the concept that Herman was Ohsawa's closest associate. Herman and Michio simply have different styles. Michio has broad appeal; he has started a mass movement, and is more businesslike. Herman appeals to a small group, deeply; he works more with individual students.

Lou and Shayne Oles got involved with macrobiotics during the second summer camp, in 1961. They traveled with the group from New York to Chico. He was a famous trumpet player, worked with Benny Goodman. In California he emphasized publishing more than his trumpet. His first

publication was titled *Spiral*; 1-2 issues were published. Then *Macrobiotic Monthly*. After Beth Ann Simon's death, Chico-San was separated from educational work. Lou Oles went to Los Angeles and that year established the Ohsawa Foundation; he did education and publication. He published three books: *Zen Macrobiotics*, *Book of Judgment*, and *Guidebook for Living*. Jacques DeLangre helped him. Lou died in 1967 of cancer. He got depressed when George Ohsawa died; he started drinking coffee, which may have activated his cancer growth. Shayne continued his work. Lima asked Herman to be president, so he traveled to Los Angeles once a month. In those days they sold lots of *Zen Cookery* books. The Ohsawa Foundation in Los Angeles closed in about 1970.

Yes, Ohsawa was age 72 when he died. He died April 24 (Japan date) in Japan.

The spiralic multidimensional scale from yin to yang was Peter Milford's idea, not Herman's. It is generally a linear scale.

Infinity Foods, founded by Howard Rower, is still in existence. Herman thinks they started in about 1962, and they imported foods from Japan.

Chico-San established only one organic grower—the Lundbergs for rice. The controversy was complicated. The Lundbergs and Bob Kennedy of Chico-San made a contract. Eventually there was a lawsuit between Chico-San and Lundberg [but it was resolved before it went to court]. Herman thinks Lundberg sued Bob Kennedy.

In 1963 Herman went on the lecture circuit with Bob Kennedy as they tried to educate people about the macrobiotic foods that Chico-San was selling.

The first summer camp without Ohsawa was 1967 (or perhaps 1968).

Macromuse is published in Washington, DC, by Michael Rossoff. It started in 1981.

Chico-San was founded in Jan. 1962. In Nov. 1962 Chico-San's first location (a retail store) opened, downstairs with hearing aid company. It moved upstairs to a different location and opened on 6 March 1962; they had an open house.

In 1973 the Aiharas established the Vega Institute, a residential program for macrobiotic studies in San Francisco. Then in 1974, they moved the Vega Institute and the George Ohsawa Macrobiotic Foundation to Oroville, a town southeast of Chico, where the Aiharas continued their work, together with their students. Herman and Cornellia Aihara moved to Oroville instead of Chico because it was more rural and because Peter Milbury, a high school teacher in Oroville, knew of some good land. The Ohsawa Foundation in San Francisco bought the land, and then they moved. Herman owns the Vega Institute on Oak Street.

Junsei Yamazaki came to the USA in 1963. Ohsawa told him to help Americans grow brown rice. First he tried in New York, but there was not enough sun. He originally

graduated with a degree in fermentation from a major Japanese university, but he then became a rice farmer. Then in New York City he went to work with Michio at Musubi near Takashimaya—for little pay. The Chico group invited him to Chico. He worked on the rice cake machine—again poor pay. Like Herman he also worked with orchids.

In 1971 Herman invited Noboru Muramoto to be on his lecture trip. His first guest was Alcan Yamaguchi in 1970. Herman read Muramoto's articles in a Japanese magazine. He had family problems in Japan and was happy to stay here. Herman was his guarantor, and he became a permanent resident.

Chico-San began baking in March 1962 in an upstairs store; Herman was the first baker.

Herman talked with Michio Kushi this summer. They have a friendly relationship but both are very busy.

Junsei Yamazaki's plans with Chico-San are not clear; he may end up working on his own.

A good Japanese-language biography of George Ohsawa is *Kakumei-ji*, by Matsumoto Ichiro; he interviewed Lima Ohsawa.

Herman likes the term "a macrobiotic" better than "a macro" or "a macrobiotic student / follower."

Cornellia arrived in the U.S. in 1955.

The Ohsawa Foundation did not move from Chico to Los Angeles; it never existed in Chico—only in Los Angeles.

Overview of macrobiotic contribution. Typical Americans overemphasize the importance of protein (even though nutritionists may not agree). Most people who stop eating meat start consuming more dairy products. Macrobiotics avoid dairy products and go straight to grains plus legumes—with little mention of protein.

Mari Metz has a good color photo of Herman and Cornellia together.

Erewhon was hurt by high interest rates and inflation.

In 1960 the handbound book *Zen Macrobiotics* was made in Herman's apartment in New York City. In it Ohsawa used the word "syoyu" [shoyu]. He changed to tamari because when he introduced soy sauce to Europe he initially called it "shoyu." He then gave exclusive distribution rights to a European to distribute Ohsawa's selected shoyu. The man called it "Ohsawa Shoyu," but then in about 1960-61 he started importing low-quality shoyu from Japan and selling it under the same brand name. Ohsawa could do nothing to stop him. That was when Ohsawa started using the word "tamari" to refer to natural shoyu. Herman heard this story directly from George Ohsawa—whose name in Japanese is pronounced OH-sawa.

Herman says a healthy person may eat 12-16 ounces of tofu a week, but it is not recommended for cancer patients who need a diet that is more yang.

Herman came from Kyushu, moved to Tokyo at age 9. He likes natto. Address: Oroville, California.

1323. Aihara, Cornelia. 1982. *Macrobiotic kitchen: Key to good health*. Tokyo: Japan Publications, Inc. 140 p. Illust. Index. 26 cm.

• **Summary:** This book was originally published under the title *The Chico-San Cookbook* (1972). This completely revised and enlarged edition was published in Nov. 1982. Address: Chico, California.

1324. Cooper, Kenneth. 1982. *The aerobics program for total well-being: Exercise, diet, emotional balance*. New York, NY: Bantam Books. 320 p. 24 cm. [200+* ref]

• **Summary:** In America “between 1968 and 1977, we saw a 23 percent decrease in deaths from heart attacks; a 36 percent decrease in deaths from strokes; and a 48 percent decrease in deaths from hypertensive disease. In addition, between 1971 and 1979 there was a 2.7-year increase in the longevity of the American people, which almost tripled the increase in life span during any previous decade.

“What is the cause of all this progress in individual health? Several factors have been mentioned by medical experts: (1) Fewer people are smoking; (2) more people are aware of the importance of monitoring their blood pressure; (3) more are minimizing cholesterol in their diets; and (4) more are becoming attuned to signs of stress in their lives and learning to deal better with the pressures of everyday living.

“But the last reason—and in my opinion the single most important factor—is the increased commitment of Americans to aerobic exercise. The number of adults who exercised regularly in the United States went up dramatically, from about 25 percent prior to 1968 to 47 percent in 1977. And in a trend that bodes well for the future, a 1979 Gallup Poll revealed that more than 50 percent of all American teenagers are engaged in some type of regular aerobic exercise.”

This book advises reduction of meat and alcohol intake but not does not mention a vegetarian diet. Address: M.D., M.P.H., Dallas, Texas.

1325. Greenwood, Rebecca. 1982. *Smokey Mountain miso: Traditional and modern methods unite to create a fine domestic miso*. *East West Journal*. Nov. p. 50-53.

• **Summary:** About John and Jan Belleme and the American Miso Co., located in the Smokey Mountains [sic, Great Smoky Mountains] in the small town of Rutherfordton, North Carolina. The company started making miso in August 1981 and now makes 5,000 pounds a month. “John has a determined air about him. You get a sense that here is a man who, if he’s going to do anything, is going to do it all the way.” John’s main interest is in making high-quality miso.

Almost all miso sold in the U.S. today is made by a fully automated process and pasteurized. The Bellemes spent seven strenuous months studying miso-making with Takamichi Onozaki in Japan. They now have three goals in making miso: (1) Sell unpasteurized miso—which should be

refrigerated. (2) Produce miso using traditional methods, including wooden vats, handmade koji, and slow, natural fermentation—rather than the faster and more commonly used forced heat method. (3) Use the high quality ingredients, including certified organically grown soybeans and rice, unrefined sea salt, and deep well water. This miso will be distributed by Great Eastern Sun Trading Co. which is partially owned by the Bellemes’ friend and fellow investor, Barry Evans, of Miami, Florida.

The American Miso Co. is located on 100 acres of rural land and consists of two buildings totalling some 3,400 square feet. The small building is used for storage and milling rice. The big one is where the miso is made and aged—for up to 18 months in huge, custom-made cypress vats which hold 8,000 pounds of miso each. When each vat is full, it is topped with 1,000 pounds of rocks which add pressure during the fermentation. Presently three types of miso are aging here: three short term (Sweet White Miso, Mellow Rice Miso, and Mellow Barley Miso) and one long term (Red Brown Rice Miso).

The secret of good miso lies in making good koji—by hand. John removes up to 90% of the bran from the rice for short-term miso, but only 10-30% for long-term miso. The company’s pride is its koji room.

The Bellemes’ dream is greater than just making miso. They have started constructing another home on their rural property to accommodate students in a living and learning environment. Each summer they plan to hold workshops which will include miso-making, gardening, natural foods cooking, philosophy, and meditation. A large photo shows John Belleme standing by the soybean cooling table and as the huge steamer basket overhead discharges a load of freshly cooked soybeans.

Note: The Great Smoky Mountains (often shortened to Great Smokies) is a range of the Appalachian Mountains extending along the North Carolina-Tennessee boundary. A part has been set aside as Great Smoky Mountains National Park. Address: Co-director, Rocky Mountain Inst. of Macrobiotics, Boulder, Colorado.

1326. Oak Feed. 1982. *Catalog and price list*. Coconut Grove, Florida. 1 p. Back to back. 36 cm.

• **Summary:** At top of page 1: “Your Japanese connection: Importers and wholesale distributors of macrobiotic foods. Lowest wholesale prices available. Abbreviations: E = Erewhon. M = Mitoku. W = Westbrae. * = New product. Contents: Miso and tamari. Sea vegetables. Tea. Noodles. Condiments. Vinegars, pickles & mirin. Beans. Crackers. Miscellaneous foods. Kitchen utensils. Body care products. Medicinal products.

Miso and tamari: Onozaki miso (11 lb or 44 lb). Tamari-filled dispenser (W). Organic shoyu (Lima Ohsawa). Authentic tamari (4.75 gal. or dispenser). Hatcho miso (M). Soybean mame miso (M). Mugi (barley) miso

(unpasteurized). Mugi miso (W). Genmai (brown rice) miso (W). Genmai (brown rice) miso (unpasteurized, 44 lb). Organic brown rice miso (unpasteurized, 22 lb). Kome (white rice) miso (W). Instant miso soup (light or red, M). Soba (buckwheat) miso (M). Natto miso (22 lb or 2.2 lb).

Condiments: Goma muso. Goma muso furikake (M). Tekka. Jinenjo tekka (M). Seitan condiment. Umeboshi. Roasted sesame oil. Black sesame salt. Black tahini.

Also: Barley miso pickles. Aduki beans [azuki]. Black soybeans. Kuzu. Address: 3030 Grand Ave., Coconut Grove, Florida 31333. Phone: (305) 448-7595.

1327. Leviton, Richard. 1982. Re: Summary of soyfoods research trips in the Midwest and Canada (Oct. 14-28) and West Coast (Nov. 21-30). Letter to William Shurtleff at Soyfoods Center, Dec. 6. 2 p. Typed, with signature on letterhead.

• **Summary:** The letter begins: “As you requested, the notes on my ‘historic’ tour, hysterically unprofitable, but at least fun.” Traveling 4,700 miles, Leviton gave programs about tofu, tempeh, and other soyfoods sponsored by various companies, and was on TV and newspaper interviews. Companies visited in the Midwest and Canada: Rising Sun (Columbus, Ohio), Prairie Soyl, Community Foods Tofu/Tempeh Shop, Light Foods, Michiana Soyfoods, Zakhi Soyfoods, Bountiful Bean, Higher Ground Tempeh, Steve Fiering (disappointing business meeting), Soyateria, Victor Foods (Toronto, Ontario, Canada), La Soyarie (Ottawa), Unisoya (Quebec).

West Coast and British Columbia: Wildwood Natural Foods, Brightsong Light Foods, Dayspring Soyacraft, Sooke Soyfoods, Metta Tofu, Sin-Mei-Do, Thistledown, Lifestream, Surata.

Leviton is thinking about relocating in California or working with Soyfoods Center on writing books. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1328. Coates, Roger M. 1982. Items that were removed before the auction. Fallston, Maryland. 1 p. Dec. 22. Unpublished manuscript.

• **Summary:** This is a list of items that Rod Coates alleges that Richard Curry sold illegally after the bankruptcy of Laurelbrook, and before the auction of the company’s assets.

Attached to this are letters between attorneys dated 18 Nov. 1983 and March 1984—as the matter drags on. Address: 2516 Laurelbrook Rd., Fallston, Maryland 21047. Phone: 301-877-1695.

1329. *SoyaScan Notes*. 1982. Chronology of soybeans, soyfoods and natural foods in the United States 1982 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. White Wave in Colorado is the first

company to get its tofu placed in the yogurt / dairy case in supermarkets.

Jan. Legume, Inc. launches Tofu Lasagna, frozen in a box. It is soon followed by Tofu Ravioli.

Jan. *The Incredible Tofu Cookbook, California Style*, by Immegart and Dansby self published.

Jan. New England Soy Dairy launches “Year of the Dog” Chinese New Year tofu promotion and nets 47% immediate sales increase.

Jan. Food Protein Council, a trade association, changes its name to Soy Protein Council, since all of its members make only soy protein products.

Jan. Island Spring survives industry’s first publicized tofu recall and the discovery of new tofu spoilage microorganism, *Yersinia enterocolitica*.

Jan. ADM becomes a sponsor of “This Week with David Brinkley” on Sunday ABC TV, with 4.4 million viewers.

Jan. Soyfoods Unlimited in California introduces tempeh burgers and ships them air freight to East Coast markets; Pacific Tempeh in California follows suit.

Feb. Yuba is first produced and sold commercially in the Western world by Ken Lee of Soyfoods of America, in Duarte, Southern California. Trial production had begun in Nov. 1981.

Feb. *Soyfoods* magazine No. 6 (yellow cover) published.

Feb. Many large ads run by San-J (tamari), New England Soy Dairy, and Legume in major national trade journals.

Feb. Unicorn Restaurant in Miami, Florida, has \$15,000 gourmet, soy / natural foods banquet to welcome chef Ron Pikarski, who makes elegant tofu dishes and carves a swan from soy butter.

Feb. Nasoya buys \$50,000 Kutter vacuum-packaging machine, which helps to popularize this packaging style for tofu.

March. *Tofu Fantasies*, by Juel Andersen published by Creative Arts.

March. USDA issues new school lunch regulations, fails to approve tofu for use.

March. Inaccurate, damaging article on iron binding by soy proteins appears in San Francisco Chronicle and Los Angeles Times.

March. Fifteen soyfoods companies exhibit at Natural Foods Expo, Anaheim, CA. Richard Leviton gives key speech. 5,000 visitors see expo. Pacific Tempeh unveils new full-color tempeh burger poster.

March. Auenland Tofu und Soja Produkte (Prien-Chiemsee, Germany), founded by Peter Wiegand, starts to make 7 tofu products from day one: (1) Tofu Pizza, Tofu; (2) Apple Tart, or Tofu Slices; (3) Tofunafish Salad or Tofu Salad; (4) Tofu Mayonnaise; (5) Tofu Burger (Ready-to Eat, Vacuum Packed); (6) Auenland Tofu; (7) Baked Tofu Sandwich. Peter had learned how to make tofu at Wildwood Natural Foods, Fairfax, California.

March. Cauldron Foods Ltd. of Bristol, England, founded by Philip Marshall and Peter Fagan, starts making: (1) Tofu: Soy Bean Curd; (2) The Bristol Vegetable Burger (Meatless Tofu Burger); (3) The Bristol Chilli Burger (Meatless Tofu Burger); (4) The Bristol Nut Burger (Meatless Tofu Burger).

March. Big increase in European soyfoods companies; there are now eleven.

March. Name of *The Beanfield* newsletter changed to *Soyfoods Monthly*.

March. Great Eastern Sun trading company founded in North Carolina by Barry Evans.

April. At New York's International Food Show, Quong Hop, Yeo's, and President brand soymilks, and Veda's Bayou Delights (tofu / tempeh pot pies) exhibit. ADM serves soy isolate ice cream and soymilk.

April. Quong Hop unveils its new Soy Deli marketing concept for retail using posters and tofu entrees sold frozen.

April. Jack's Beanstalk in Utah does creative work at introducing tofu to institutions. Develops 30 bulk recipe cards scaled to 100 servings.

April. ADM unveils work with glucono delta-lactone (GDL) and soy isolates in making tofu.

April. *Toyo Shimpō*, Japan's tofu newspaper, gives extensive coverage to upcoming Soyfoods Come West conference in Seattle, Washington.

May. Island Spring releases two 5-minute color video tapes demonstrating tofu cooking for showing in supermarkets.

May. Public schools in Hawaii are granted permission to use tofu in meals.

May. *Soyfoods Directory and Databook*, (1st ed.) by Shurtleff and Aoyagi published by Soyfoods Center, the first book of its type listing all soyfoods companies and industry and market statistics, 21 pages. Based on many phone interviews with company owners. Second edition published in June as *Soyfoods Industry: Directory and Databook*, 52 p.

May. William Shurtleff and Mark Fruin receive a grant from Kikkoman to write a book on soy sauce.

May. *Cook with Tofu*, by Christina Clarke is 2nd runner-up in R.T. French's Tastemaker awards for cookbooks.

May. Clearway Tofu sponsors the first Mother's Day Tofu Fair in Santa Cruz, California, with tofu recipe competition, music, and prizes.

June. Vitasoy USA runs color display ads for soymilk on San Francisco buses.

June. Kibun of Japan exhibits four flavors of soymilk in Tetra Pak cartons at National Restaurant Show in Chicago, Illinois.

June 16. *The New York Times* runs an article on Dieter Hannig, Director of Food Research for Hilton Hotels. His many tofu recipes on microfiche are sent to 86 Hiltons worldwide.

June. *Bestways* magazine begins a 3-part series on soyfoods by Bonnie Mandoe.

June. *The Soy Dairy: A Way to Save the Small Farm*, by MacCormack published by Sunbow Farm.

June. *The Book of Nigari Technique* (in English) published by Yoshikawa Kagaku in Japan.

June. Metta Tofu Products in Denman Island, BC, Canada, introduces Frozen Buddha soymilk ice cream.

June. Haarmann & Reimer debuts flavors for tofu and okara at IFT convention in Las Vegas.

June. Royal American Foods is launched in Kansas City, Missouri, with \$1 million startup capital to sell TVP entrees, tofu-like products via multi-level marketing system.

June. Granny Goose Potato Chips does extensive radio advertising in California for a new potato chip. Ad makes frequent, positive reference to tofu. First national radio ads mentioning tofu.

June. Farm Foods presents Ice Bean at American Booksellers Convention at Anaheim, California, along with previews of their new tofu cookbook.

July. "Discover Tofu" published by *Cosmopolitan* magazine.

July. Farm Foods receives a U.S. trademark for "Ice Bean" as a soy ice cream.

July. Bob Davis of Light Foods excites NNFA convention in New Orleans, Louisiana, with debut of Light Links, the world's first tofu hot dogs.

July. Eden's Orchard tofu / soymilk ice cream introduced in New York by Heller Enterprises.

July. Richard Jennings announces a new formula for okara / barley tempeh; later purchases Southwest Soyfoods, relocates company in Santa Fe, New Mexico. Continued.

1330. *SoyaScan Notes*. 1982. Chronology of soybeans, soyfoods and natural foods in the United States 1982 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. July. Turtle Island releases liquid tempeh starter to industry.

July. *Soyfoods* magazine No. 7 published by Richard Leviton, with 4-color cover (brown border) and glossy paper.

July. Bean Machines introduces its new Continuous Pressurized Slurry Cooker. July. *Tofu: Einladung ins Schlaraffenland* (Tofu: Introduction to the Land of Milk and Honey), by Walter Daenzer published by Verlag Bewusstes Dasein in Zurich, Switzerland (in German). Europe's third tofu book.

July. *Using Tofu, Tempeh & Other Soyfoods in Restaurants, Delis & Cafeterias*, by Shurtleff and Aoyagi published by The Soyfoods Center.

July. Soyfoods Come West, the Fifth Annual Soyfoods Convention and Expo, in Seattle, Washington, draws 250 people from 12 nations and makes a profit. Plans are made for a new tofu trade group to represent the larger manufacturers. Gary Barat of Legume and Steve Snyder lead this effort to break away from SANA.

July. *Diet for a Small Planet*, by Frances Moore Lappe, a completely revised edition, published by Ballantine Books. Over 2 million copies of the book have been sold since 1971. The new edition contains many new soyfoods recipes, including 8 tofu and tempeh recipes submitted by Shurtleff and Aoyagi as part of a recipe contest.

Aug. The BBC of London, England, runs a 30-minute program on the U.S. tofu industry and market.

Aug. "Why Are Soyfoods Catching On?" by Judy Brown published in *Whole Life Times*.

Aug. Soy Protein Council in Washington, D.C. releases filmstrip on soy proteins.

Aug. *Tofu, Tempeh, Miso & Other Soyfoods*, by Richard Leviton published by Keats. 32 p., 15,000 copies printed.

Aug. Mexico announces that it can no longer meet its foreign debt repayment obligations. The first major debtor nation to do so.

Sept. New England Soy Dairy launches herb and spice preflavored tofu in colorful boxes. This is an important innovation in tofu packaging.

Sept. Miyako / Cold Mountain Miso in Los Angeles moves into new plant, has \$15,000 reopening party.

Sept. Dr. C.W. Hesseltine, at USDA Northern Regional Research Lab., receives \$50,000 research grant to study shelf life of tofu, tempeh, miso.

Sept. *Soyfoods Labels, Posters, and Other Graphics*, compiled and edited by Shurtleff and Aoyagi, published by Soyfoods Center. 185 p.

Sept. Soyfoods Unlimited runs full-page color ads for tempeh burgers in national magazines: *Vegetarian Times* and *New Age*.

Sept. Richard Leviton plans to move to Ann Arbor [Michigan]. Steve Fiering offers to recapitalize Soyfoods magazine and buy typesetting equipment. Plan dropped by Fiering in October.

Oct. Legume Inc. has its first of many public stock offerings (IPO); raises \$100,000 from sale of stock plus \$100,000 from a loan. Legume thus becomes the first of the new wave of soyfoods companies to be publicly owned. In Nov. 1983 Legume raised \$600,000 more, two-thirds from sale of stock and one-third from debt.

Oct. Richard Leviton does "Soyfoods in the Heartland" nationwide tour with 13 programs, 11,000 miles. Net loss of \$300 but lots of fun.

Oct. *Tofu Cookery*, by Louise Hagler published by The Farm's Book Publishing Co.

Oct. *Tofu Cookery* by Fusako Holthaus published by Kodansha, New York. Japan's first tofu book aimed at the American market. Both this and the Farm's tofu book are America's first tofu books with color plates.

Oct. Beatrice Wittels' CSC sponsors World Food Day in Philadelphia, with speech by Richard Leviton and soyfoods banquet. 200 people, including a Pennsylvania senator, attend.

Oct. South River Farm Miso Co. opens in Massachusetts as the nation's second Caucasian-run miso manufacturer. It was formerly Ohio Miso Co.

Oct. "The Hilton Hotel's Gourmet Tofu Dishes" by Clare Barrett published by *Vegetarian Times*. Dishes made from Dieter Hannig's tofu recipes are shown in full color.

Nov. Unicorn Restaurant in Miami, Florida, prepares three tofu turkeys for Thanksgiving Day.

Nov. Restaurant Business magazine praises Legume products as "tasty, superb."

Nov. Whole Life Expo held in New York. Farm Foods gives speech on soyfoods.

Nov. "Mainstreaming Soyfoods" by Richard Leviton published by *Vegetarian Times*.

Nov. Campbell Soup makes offer to buy Legume stock. Quaker Oats is reported to make tender to buy any of America's largest tofu makers. But nothing happens.

Nov. Pacific Tempeh introduces nitrogen-flush vacuum packaging for tempeh.

Nov. Well Bean Soy Deli in Santa Cruz changes its image to "Fast Natural Foods" after soy deli sales sag.

Nov. *East West Journal* publishes article on The Bridge tofu company in Connecticut.

Nov. Lane County Natural Foods Assoc. sponsors large, Natural Horizons Expo in Eugene, Oregon. Richard Leviton gives speech. Surata Soyfoods and Devi's Country Soy Sausages (both of Oregon) have exhibits.

Nov. *Quick & Easy Tofu Cookbook*, by Yukiko Moriyama published by Joie in Japan. Aimed at American market; over 400 full-color photos but poor English translation.

Nov. *La Magie du Tofu* (The Magic of Tofu), by Tremblay and Boyte published by Stanke in Montreal. Canada's first original tofu cookbook. It becomes a best-seller.

Nov. *Le Plaisir de la Cuisine au Tofu* by Marie Poirier published by Unisoya in Quebec, Canada.

Nov. *Cooking with Tempeh*, by Claire Seguin published by Higher Ground Press. America's second tempeh cookbook.

Nov.—Thomas Karas und Ingeborg Taschen start making SoyaStern Tofu in Siegburg, West Germany. The company is renamed Soyastern Naturkost GmbH in Dec. 1985. By 1987 they are the country's largest tofu manufacturer, making 4,000 kg/week.

Dec. Robert Davis of Light Foods helps establish a soup kitchen in St. Louis [Missouri]; will provide okara and tofu scraps free of charge to the city's indigent.

Dec. Nasoya restyles their tofu dips as "Vegi-Dips" in new containers.

Dec. Soyfoods of America runs \$2,800 large display ad in Los Angeles Times (circ. 1 million) with tofu recipes.

Dec. *Washington Post*, in the Style section, says frozen yogurt is "Out" and frozen tofu desserts are "In."

Dec. Swan Gardens, Miami, after 3 years of R&D, announces informally that it has three flavors of “meltable” cheeselike tofu. It is introduced as Soya Kaas in Feb. 1986.

Dec. *Le Tofu dans le Cuisine Macrobiotique*, by Eddie H. Hara published in France by Editions de la Maisnie.

Dec. Since 1974, 25 books on tofu have been published in the U.S. In 1981 and 1982 publication of books on tofu in North America and Europe reaches its peak, with 12 published each year.

Dec. There are seven brands of tempeh burgers on the market; four brands of frozen tofu ravioli; 8 brands of soy ice creams.

1331. **Product Name:** Natto Miso (Aged & Fermented Soybeans with Kombu & Ginger).

Manufacturer’s Name: Eden Foods, Inc. (Importer from Muso). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982 December.

Ingredients: Barley miso–soybeans, barley, water, sea salt, and *Aspergillus oryzae* (Koji)–barley malt, kombu (edible seaweed), ginger.

Wt/Vol., Packaging, Price: 22 lb (10 kg) plastic tub. Retail for about \$80 (1/92, Boulder, Colorado).

How Stored: Shelf stable.

New Product–Documentation: Richard Leviton. 1984. *East West Journal*. April. p. 20. “The organic Garden of Eden.” In 1982 Eden imported 25 container loads (each weighing 35,000 lb) of Japanese natural foods, including natto miso and buckwheat miso.

Eden Foods catalog. 1987. Nov. Includes: Natto miso “Kinzanji.”

Talk with Scott Stoltz of Nederland, Colorado. 1992. Jan. 6. This product has been available from Eden for at least 6 years. The price in stores is typically about \$6/lb. He reads off the ingredients and container type.

Label sent by Scott Stoltz. 1991. 8 by 6 inches. Self adhesive. Black, red, and green on white. Multi-colored Eden crane logo and green sprouts logo. “A condiment with a sweet, spicy flavor. Use on grains, noodles, mochi, beans, vegetables, and as a spread or dip.”

1332. **Product Name:** Eden Tamari: Natural Shoyu.

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982 December.

New Product–Documentation: Ad in *Vegetarian Times*. 1982. Dec. p. 24. “What was once a flight of fancy... Natural Soy Sauce (Tamari).” Ad in *Soyfoods*. 1984. Summer. p. 37. “Just the Best.” This label is confusing; the product is actually natural shoyu, not tamari.

1333. **Product Name:** Eden Hacho Miso, and Soba Miso.

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982 December.

New Product–Documentation: Ad in *Vegetarian Times*. 1982. Dec. p. 24.

1334. Eden Foods, Inc. 1982. George Ohsawa first introduced “tamari” to North America. The product he gave us was a traditionally brewed SHOYU... (Ad). *East West Journal*. Dec. p. 11. Also in *Vegetarian Times*, Jan. 1983, p. 36.

• **Summary:** “..., made of soybeans, wheat, water & sea salt, fermented for many months and pressed.

“He called it Tamari because he thought that Shoyu was too difficult a word for Westerners to say and because it would differentiate Shoyu from commercial, chemical soy sauces.

“In Japan, Tamari is the by-product of making soybean miso, from soybeans, sea salt, and water. A very small amount of this is made compared to the amount of Shoyu brewed. In Japan, Tamari is most commonly used in food processing while Shoyu is used in cooking and on the table. Both are excellent foods. The original ‘Eden Tamari-Shoyu’ is macrobiotic soy sauce. This is the product Eden has marketed as Tamari since 1967, because George Ohsawa called it ‘Tamari.’

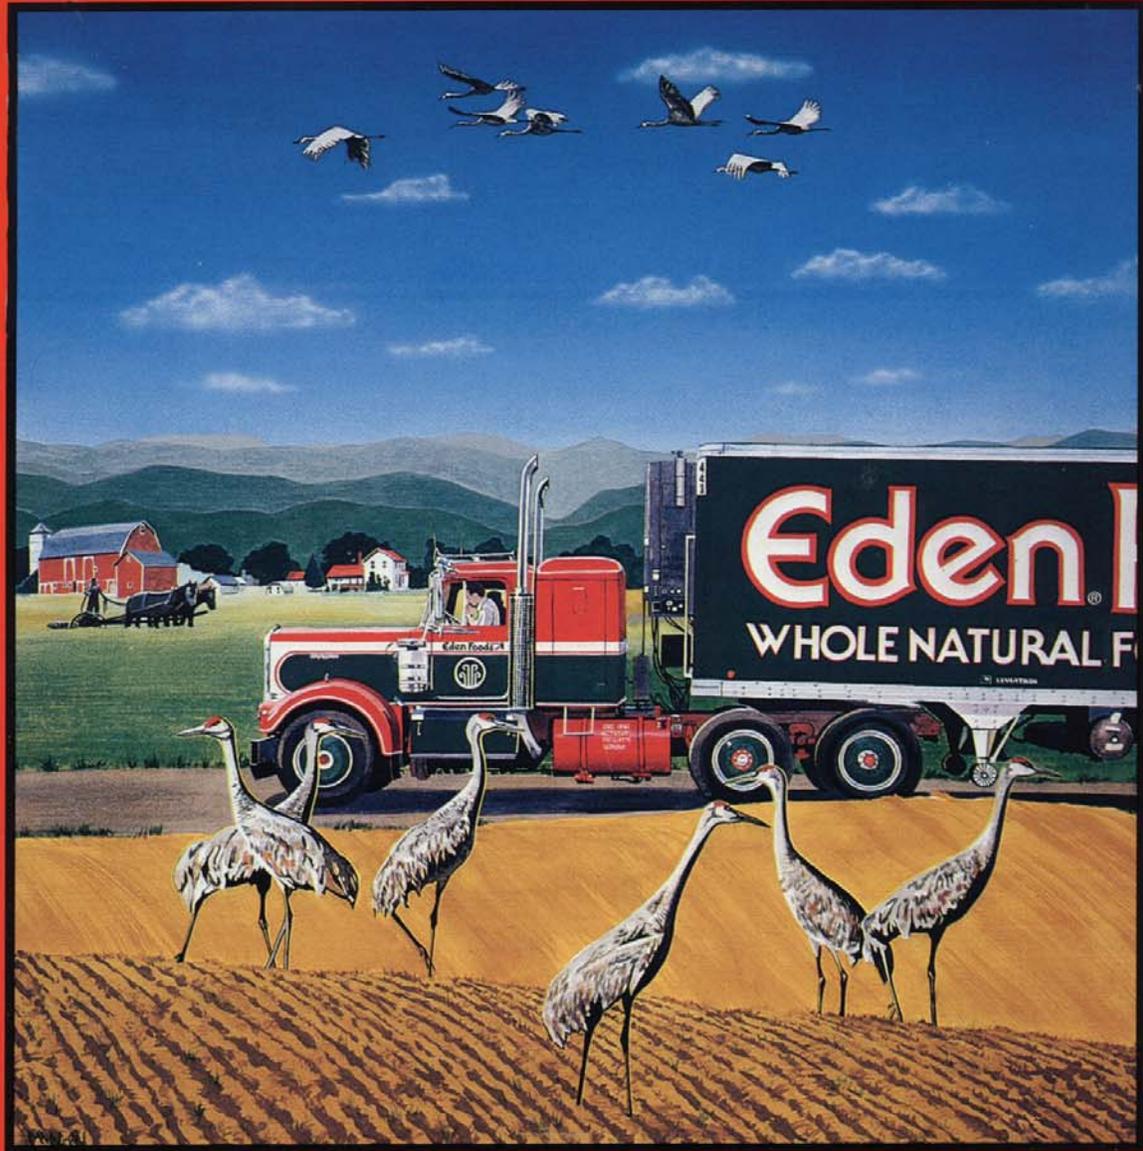

“Recently, real Tamari (Wheat Free) has been imported into the U.S.A. Mr. Ohsawa did not anticipate this. Now there are two products on the market being called Tamari. Shoyu & Tamari”

Note: This is an early macrobiotic effort to distinguish between tamari and shoyu. “Eden offers: Tamari Natural (Shoyu) Soy Sauce and Tamari Wheat Free.” Address: Clinton, Michigan 49236.

1335. Eden Foods, Inc. 1982. Catalog 1983. 701 Tecumseh Rd., Clinton, MI 49236. 70 p.

• **Summary:** “Founded in July 1967, Eden Foods began as a small retail outlet of macrobiotic foods in Ann Arbor, Michigan.”

Contents: Organic certificate. History. Terms and policies. Whole grains. Beans. Flour. Pasta. Cereals and granolas. Packaged dinners & beans. Mixes. Oils–unrefined. Vinegars. Shoyu-tamari. Miso. Seaweed. Oriental vegetables & special foods. Ume plum products. Nuts & seeds. Snacks & dry roasted nuts, Nut & seed butters. Fruit jams. Apple butter & sauce. Dried fruit. Juices & drinks (incl. Edensoy natural soy milk). Sweeteners. Condiments. Sauces. Pickles. Baking & cooking. Crackers & chips. Rice cakes. Tea. Candies. Cheese. Herbs & ginseng. Body care. Vitamins & supplements. Cooking utensils. Books. Recipes. Advertisers (in alphabetical order): Arrowhead Mills. Barbara’s Bakery, Inc. Chico-San Inc. Eden Foods, Inc. Edward & Sons. Honey

1336. Eden Foods, Inc.; Muso Shokuhin. 1982. What was once a flight of fancy... (Ad). *Vegetarian Times*. Dec. p. 24.
 • **Summary:** This full-page color ad shows the colorful Muso crane logo flying at the top. Across the bottom in bold letters is written "Eden." The page is filled with boxes of macrobiotic natural food products imported by Eden from Muso in Japan. These include: Bulk miso, bulk kuzu, ramen, bulk sea vegetables, bancha tea, natural soy sauce (tamari), umeboshi, soba miso, Hacho miso, and vegetable brush. In the background is a landscape of terraced rice paddies. Address: [Clinton, Michigan].

1337. Thompson, Gerry. 1982. Impressions of a visitor to Vega from outer space. *GOMF News (Oroville, California)*. Dec. p. 1-2.
 • **Summary:** In October I attended a course at Vega House, and I'd like to tell you about it. I come from a far-off planet called Belfast [Ireland]. Contrary to common belief, there is intelligent life on it and people can read about West Coast Macrobiotics. Nonetheless, the experience was not what I expected. First of all, it was Fun. Fun is something we are sometimes short of at home, especially in connection with macrobiotics. I like it though. Getting up in the morning was fun, sotai (or exercise) was fun; then meditation was fun and so was 'brunch,' then cooking class, dinner, and evening class with Herman. It was all fun.

"But the content was there too. We got through a lot of stuff information, technique, and food. We got through a lot of food—especially rice cakes. Maybe too many rice cakes. I think I could live without seeing another rice cake. They come from Chico-San in Big Boxes, and they're Omnipresent. They fill up those little gaps between other things, and they 'drop quickly.'

"Then there was Variety. Variety is something else I don't always see a lot where I come from, but Vega's got it. I only attended for one week of a three-week session, but we did a lot of different things. What a variety of different dishes we learned how to cook, and what a lot of different subjects we studied.

"In just a couple of hours, Cornellia would have us transforming a confusing pile of materials into an elaborate meal. And there was no standing around watching—you were doing it yourselves, and with great energy too. Somehow, she manages to pull it all together, no matter how diverse or spaced-out you all might be. And she almost manages without comprehensible language. I don't know what she uses instead—it must be a combination of example and ESP. It works, anyway.

"In Herman's lecture there was always something

different, something new even if you had studied it before. One day it would be diagnosis, and you would learn how to choose your wife or husband: narrow eyes if you wanted to be dominated; ears sticking out if you like someone who's picky and fussy; large ears for a good housekeeper, small ones if you prefer a spendthrift (one way to get more yang).

"The next day it might be macrobiotic medicine, and perhaps re-learning the fact that being well is normal, natural, and easy; ill-health is the thing that is strange. So you don't 'make yourself well'—you 'let yourself return to health.' After class, you can spend a sleepless night pondering on why you are so keen, in that case, to hold onto your sickness.

"Another time you may study hand-reading: is the person next to you 'Miss Right' or 'The Girl of Your Dreams'? Are you going to be rich or famous, or both, or neither? Would you make a good gambler? All this and more is covered, with no holds barred, and no need for crossing palms with silver. Curiously, though, the lesson was always the same: Living with someone unsuitable? Then eat well. Creating difficulties for yourself? Eat well too. Barking up the wrong tree in life, or firmly fixed on the right course with clear vision? Still eat well and chew all the more!

"Sometimes the subjects were quite spontaneous. You might come back from watching the salmon in the river and bring up the subject. After all, Herman is something of an authority on it. He even reminds you of one, with the silvery sheen in his head of hair, his hooked nose and downturned mouth, that general angularity and most of all the strong sense of direction, single mindedness and purpose. (Hope you don't mind the analogy, Herman.)

"So it was all pretty flexible, and the learning and teaching wasn't limited to class-time either. Over a meal you might ponder on why ancient Chinese feast days always seemed to be on days with odd numbers (January 1st, May 3rd, September 11th and so on). Over a late-night binge, conversation could well turn to how the same is true of Beethoven's most popular symphonies. And incidentally, was *The Pastoral* the product of a great meat-eater?

"The Anecdotes and Reminiscences Department is very strong at Vega. What a good stock of stories there is, and how freely they are distributed. Always they are educational, and usually hilarious as well.

"Nothing seemed to be too secret or too sacred. You learnt how Cornellia would jump up in the middle of the night swearing that someone else was in the room, but it was only the ashes and bones of the first Mrs. Aihara lurking under the bed. Then you might hear about different people who had stayed at the house from time to time—like the man who stayed for three years and never took a bath, until in the end he was involuntarily baptized; or the one who spent all his time permanently meditating, and claimed each morning that George Ohsawa and God (in that order) had been talking with him. Then there was the local person who wouldn't

leave home for four years; when visited, he would put a blanket over his head for extra security. But macrobiotics could help get through all this; the last man is now a travelling salesman! (Everything changes into its opposite.)

“And did you know that Herman’s first bingeing was stealing molasses from his father’s store? Or that he later changed his name and lived underground for a while? And that the reason Chico chosen when the early Macrobiotic Pioneer Settlers came out to the Wild West was because that was Cornelia’s original name? I didn’t.

“On top of all this, there was Adventure. You never knew what Cornelia was going to suggest next, and you had to be careful about making joking suggestions because they might be taken up. Someone joked about going to San Francisco for the day (nearly, a four-hour drive); two minutes later we were making rice balls for the journey—and intending to get back for the evening lecture. None of your stay-at-home academic claustrophobia here. Other field trips took us to the Chico-San factory, whence rice cakes are sent as far afield as England, Sweden, and Australia, and where Carob Coatings now made their presence felt; and to the Ponce Bakery, which makes what I can safely say is The Best Bread I Have Ever Tasted. (The pastries are a bit dangerous, though.) All flour is freshly ground, and no yeast is used. Monsieur Ponce told us how yeast was once tried in another product, and how they couldn’t understand why the sourdough they made alongside it was behaving so strangely. Now we all knew better. All this, and breadmaking lessons from Jacques de Langre too! He, Ponce and baker Daniel Collin look just like so many stalks of wheat the ultimate yin constitution. But what earlobes!

“The other trip was to the George Ohsawa Birthday Picnic. Amazing foodstuffs were brought by one and all, and after a brief ball game and talk we tucked in. My only reservations concerned the percentage of baked foods and the speed with which people disappeared when everything was eaten. Was there a connection, one wondered? Something to be learnt, anyway.

“I’m still not sure how this all fitted into just one week of the three-week course. Yet there was still time for the other things one looks for—Contemplation, Stillness, Inner-Development or whatever you like to call it. In fact the very first thing each day was Cornelia asking everyone about any problems. There was a great feeling of intimacy and togetherness.

“Does it all sound a bit euphoric? Well of course there were difficulties too. (But I won’t tell you about them—you can discover your own.) What more could one ask?”
Address: GOMF, 902 14th St., Oroville, California 95965.

1338. **Product Name:** Eden Organic Amazake.
Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.
Manufacturer’s Address: 701 Tecumseh Rd., Clinton, MI

49236.

Date of Introduction: 1982.

Ingredients: Spring water, organically grown brown rice, koji (*Aspergillus oryzae*), sea salt.

Wt/Vol., Packaging, Price: 8.8 oz (250 gm) stand-up retort pouch.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Bob Schiering. 1988. Jan. 21. He will send info on this product which is apparently imported in a retort pouch. Talk with Ron Roller. 1988. Feb. 23. Eden Foods starting importing this amazake concentrate in 1982. The manufacturer in Japan is not known. The package is sold in an 8.8 oz (250 gm) retort pouch. In 1987 they imported about 2160 pouches, or 143 gallons. Very small. Their wholesale price to distributors is \$2.10, so that it each pack probably retails for at least \$3.70. Since the product is diluted with 2-2.5 parts water, this is not as expensive as it seems. It can be used full strength as a sweetener. Label. 1987. 4.5 by 6 inches retort pouch. Silver, purple, white, and black on maroon, with colored stork holding the Muso sign. “Concentrated grain sweetener. Made of cultured organic brown rice.” 14-line description of product and recipe for “Macro” Oatmeal Cookies on back.

1339. **Product Name:** Vegetarian Baked Beans with Miso.

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1982.

New Product–Documentation: Shurtleff & Aoyagi. 1983. The Book of Miso. 2nd ed. p. 239.

1340. **Product Name:** Corn Chips with Miso.

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1982.

New Product–Documentation: Shurtleff & Aoyagi. 1983. The Book of Miso. 2nd ed. p. 239.

1341. **Product Name:** Amazake.

Manufacturer’s Name: Infinity.

Manufacturer’s Address: Jamaica Way, Boston, Massachusetts.

Date of Introduction: 1982.

Ingredients: Incl. rice, water.

How Stored: Refrigerated.

New Product–Documentation: Talk with José Antunes, owner of Smoke & Fire Natural Foods, Inc. in Great Barrington, Massachusetts. 1998. July 14 and Sept. 16. He began studying macrobiotics in 1974 in Portugal. After he got out of the air force (in Africa), while he was sick with typhus and in the hospital for several months, he read a book by Georges Ohsawa. He continued his studies at

the Community Health Foundations and Kushi Institute in London, England, in 1974-76 with Bill Tara; there he first learned about tofu and amazake. Then he studied in Boston. Being very independent, he wanted to create his own business. He had learned how to make amazake at cooking classes in the Kushi Institute in Boston. So in about 1981 or 1982 in Boston, he and his ex-wife, Melissa Crane Morehouse, started making amazake at their home on Jamaica Way and selling it at the first Erewhon store and the first Bread and Circus store. Their amazake business was named Infinity, and it lasted for only about eight months. The product sold well, but the process was very labor intensive.

1342. Product Name: Tamari Shoyu: Natural Soy Sauce.

Manufacturer's Name: Pure & Simple, Inc.

Manufacturer's Address: P.O. Box 1235, Corona, CA 91720. Phone: (714) 371-4210.

Date of Introduction: 1982.

Wt/Vol., Packaging, Price: Bottle.

New Product–Documentation: Poster. Ad (full-page color) in *Natural Foods Merchandiser*. 1982. "Bland Aid." Shows 3 sizes of bottles amidst many other bottled products on shelves: 5 fl. oz, 1 pint, and 1 quart. Each has a round red rising sun in the center against a light gold background. "Tamari" is written against a red background and "Shoyu" against a green one.

1343. Pure & Simple, Inc. 1982. Bland aid (Poster and ad). P.O. Box 1235, Corona, CA 91720. 1 p.

• **Summary:** This full-page color poster and ad (copyrighted 1982) shows various sizes of many products in the Pure & Simple line. Three different sizes of Tamari Shoyu are shown (5, 16, and 36 oz glass bottles), each with a red, green, and gold label.

This ad also appeared in 1983 in *Bestways* (Feb., p. 55) and in 1984 in *Natural Foods Merchandiser* (July, p. 89). Address: Corona, California.

1344. Product Name: Pasteurized Tofu: Firm Style.

Renamed Organic Tofu: Firm Style by 1992.

Manufacturer's Name: Stow Mills (Distributor).

Manufacturer's Address: Brattleboro, VT 05301.

Date of Introduction: 1982.

Ingredients: Filtered water, organic soybeans, nigari (a salt-free sea mineral, magnesium chloride).

Wt/Vol., Packaging, Price: 16 oz. Retail for \$1.19 (7/92, Maryland).

How Stored: Refrigerated.

Nutrition: 7/92. Per 4 oz.: Calories 120, protein 13 gm, carbohydrates 3 gm, fat 6 gm, cholesterol 0 mg, sodium 9 mg.

New Product–Documentation: Label. 1982, undated. 4 by 4.75 inches. Plastic film. 4 color featuring blue, green, red, orange, yellow and white on clear plastic. Picture of plate

with broccoli, carrots and tofu with card which says, "100% Natural." Package says, "No Chemicals. No Cholesterol. No Preservatives. Low in Sodium. Low in Calories. High in Protein."

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Label is 4 by 6 inches.

Blue, black, green and orange on white. "Creamy texture.

No cholesterol. No chemicals. No preservatives. 100% natural. Low sodium. Low calories. High in protein. High in calcium. Refrigerate 34-38°F. Vacuum packed for freshness."

Ingredients: "Filtered water, organically grown soybeans, natural calcium chloride Nigari—a naturally occurring mineral coagulant, not a preservative." Distributed by Stow Mills, Chesterfield, New Hampshire 03443.

1345. Product Name: Organic Shoyu.

Manufacturer's Name: Westbrae Natural Foods (Importer).

Made in Japan by Sendai Miso-Shoyu Co.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1982.

New Product–Documentation: Label, color. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. *Soya Bluebook*. 1986. p. 105.

1346. Jeavons, John. 1982. How to grow more vegetables than you ever thought possible on less land than you can imagine. Berkeley, California: Ten Speed Press. xv + 160 p. Illust. No index. 28 cm. First ed., 1974, published by Ecology Action of the Mid-Peninsula. [405* ref]

• **Summary:** This pioneering and influential book is based on the biodynamic/French intensive method of gardening to produce high yields. Jeavons' method is based on careful collection of data concerning inputs and yields from each crop. Contents: Preface. Introduction. History and philosophy. Bed preparation. Fertilization. Compost. Seed propagation. Making the garden plan. Companion planting. A balanced natural backyard ecosystem and insect life. Bibliography.

Soybeans play a key role in this method. For information on soybeans, see p. 76-79, 129. They may be harvested "green or hulled, dry." The soybean "Grows with anything, helps everything." "The Common Ground Garden was started in Palo Alto [California, by Ecology Action] in 1972 to find the agricultural techniques that would make food raising by small farmers and gardeners more efficient. We have come to call the result 'mini-farming.' Mini-farms can flourish in non-agricultural areas... After ten years of testing, 'the method' has produced amazing benefits and a lot of work is still to be done. Yields can average 4-6 times that of U.S. agriculture and range on up to 31 times... Energy consumption, expressed in kilocalories of input, is 1/100 that used by commercial agriculture... Nitrogen fertilizer use is less than 1/2 or less that used commercially." Alan

Chadwick was a key mentor in the project. In May 1972, Syntex Corporation offered 3.75 acres of their grounds in the Stanford Industrial Park at no cost and all the water needed for the project. Address: Ecology Action of the Midpeninsula, 2225 El Camino Real, Palo Alto, California.

1347. The land & its people, 1876-1981: Deaf Smith County, Texas. 1982. Deaf Smith County, Texas: Deaf Smith County Historical Society. 652 p. See p. 610-11.

• **Summary:** On pages 610-11 is a very interesting article on the history of Arrowhead Mills, by J. Frank Ford. It begins: “The foundation of the success of Arrowhead Mills was laid by Dr. George Heard [a dentist] and others during the late 1930s and the 1940s. Much favorable publicity on the quality of our Deaf Smith County soil and water resulted from these early pioneers’ efforts.

“After World War II, David Rodgers started a small milling operation at Dawn [an unincorporated community in eastern Deaf Smith Co.]. In the 1950s this was bought out by Henry Turner, who became one of the founders, and the first president of Arrowhead Mills in 1960.

“George Warner was one of those who saw the vision for a whole food company, and provided much of the guidance for the company’s growth in the 1970s, serving as president and working with farmers to obtain the highest quality grains for a premium market.

“Frank Ford, a wheat farmer in Deaf Smith County, had always been that kind of farmer who felt himself to be a partner with his land rather than its master. The kind who helped his land to perform its natural task in a natural way instead of exploiting it unnaturally.

“Out of that deep respect for the natural ways of things also came his knowledge that whole wheat flour is far superior in nutrition and taste to other flours commonly used. Arrowhead Mills was begun in an old rail car and small milling building on Tierra Blanca Creek. Eight used grain bins served as storage.

“In an old pickup and trailer, Frank delivered flour and corn meal ground with a 30-inch stone grinder. It was seven years before the little enterprise broke even financially. Now, the whole food company, Arrowhead Mills, is a multi-million dollar food business operating out of a 20-acre complex...”

A photo (p. 611) shows an excellent aerial view of the Arrowhead Mills complex.

Note: The Deaf Smith County Museum has an old stone grinding mill that was used in grinding grain by Rodgers Grain Co. which became Arrowhead Mills in 1960. The stone was bought second-hand in the 1940s by David Rodgers and donated by Frank Ford / Arrowhead Mills in 1967.

1348. Weaver, Dusk; Weaver, Willow. 1982. Sunburst: A people, a path, a purpose. The story of the most provocative communal group in America today. San Diego, California:

Avant Books. xiii + 176 p. Illust. Portraits. 23 cm.

• **Summary:** This book is basically a journal, kept by the authors from 29 March 1978 to Christmas 1979; while it gives details of daily life in the Sunburst community, it gives only limited help in understanding the context and larger picture (which are well described at “Sunburst community” on Wikipedia, Feb. 2008). During 1978-79 Sunburst was a spiritual community located on 5,000 acres in the mountains at Tajiguas above Santa Barbara, California (adjacent to the home and ranch of President Ronald Reagan). The 250 members, whose religion was a mixture of Christianity and mysticism, practiced meditation, and cultivated large, organic gardens, and lived a unique, wholistic lifestyle. In 1980 the community was America’s largest distributor of organically grown produce, earning some \$16 million through its 12 wholesale and retail outlets in five cities (p. ix). The community also created *The Sunburst Family Farm Cookbook*.

An appendix, dated 3 March 1982, and titled “Ten American eclectic communities” gives a description of each of the following: (1) Koinonia Partners, Americas, Georgia (Founded 1942, refounded 1968). (2) Ananda, Nevada City, California (Founded 1967). (3) The Farm, Summertown, Tennessee (Founded 1971). (4) Kayavarohana, St. Helena, California (Founded 1977). (5) Renaissance Community, Turners Falls, Massachusetts (Founded 1968). (6) Moniteau Farm / The Spiral Inn, Jamestown, Missouri (Founded 1976). (7) Cornucopia, St. Mary, Kentucky (Founded mid-1970s). Excell in Expression, Colorado (Founded 1930s in Canada). Abode of the Message, New Lebanon, New York (Founded 1974). The Love Family, Seattle, Washington.

The last chapter, “In Closing,” dated 16 March 1982, explains that in Sept. 1981 the community secured a large property they had long sought by exchanging equity in Taiguas for a large cattle ranch of 500,000 acres in the high desert of Northern Nevada. To date, only 15 members have moved to pioneer the Nevada settlement. Sunburst Farm and Lemuria Ranch are now for sale. All Sunburst members must be off the Taiguas land by 25 Dec. 1981; it has been purchased by movie star John Travolta. The community’s wholesale foods division, which had grown to become the largest U.S. distributor of organic produce, but had consistently lost money (operated at a deficit), ceased operations (declared bankruptcy?) several months ago. Sunburst’s small Isla Vista store and its Ventura supermarket were sold to private families. The fates of eight existing Sunburst retail outlets are undecided. The community’s bakery discontinued its line of wholegrain breads, but expanded production of other popular products. Through the release of two other Sunburst books, *Return of the Ancient Builders* (autobiography of Sunburst founder Norman Paulsen) and *The Complete Book of Natural Foods* (Shambhala Press). Address: Sunburst community, Santa Barbara, California.

1349. **Product Name:** Meiji Seifun Miso [Mugi, or Kome].
Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1982?

New Product–Documentation: Crackerbarrel. 1983. Jan. No. 1. p. 1. And Crackerbarrel. 1983. April. p. 5. Meiji Seifun is in Hiroshima.

1350. Chico-San, Inc. 1982? From yesterday comes today's tamari... or, shoyu, shoyu, who's got the shoyu. Chico, California. 10 p. Undated.

• **Summary:** About San-J tamari. Address: Chico, California 95927.

1351. Kennedy, J. Robert. 1983. History of Chico-San and macrobiotics in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Jan. 6. 2 p. transcript.

• **Summary:** Rice cake production started in Canada.

The following are not that important: (1) The conflict over Erewhon buying organic brown rice from the Lundbergs. (2) Erewhon taking away Chico-San's New York market (Bob didn't even know this). (3) Lawsuit (that never went to court) between Chico-San and Lundberg.

The initial contract with the Lundbergs to grow brown rice exclusively for Chico-San was risky for Chico-San; they agreed to pay higher prices if the yield was low. Michio and Paul Hawken tried to get the Lundbergs to break the contract. Bob does not know who went to who. Did the Lundbergs go to Erewhon or vice versa? Why did this happen? Problems arose in the third year of the contract. The first year, the Lundbergs grew only 67-70 acres of brown rice, which Chico-San sold by the end of January. The second year, Chico-San also sold all the rice that the Lundbergs grew. The third year was the fire at Chico-San, and Chico-San was unable to sell all the rice they had agreed to sell. Michio came to California with Aveline and they tried to talk the Lundbergs into selling some organic brown rice to Erewhon. But there was no conflict. Michio used to phone Bob Kennedy at nights in those days asking if Erewhon could buy organic brown rice at no profit to Chico-San. Bob said "no." That is not a conflict, and there were no bad feelings.

There was no lawsuit between the Lundbergs and Chico-San—just some litigation prior to what could have been a lawsuit, concerning the third year and the fire. Chico-San was out of business for almost a year because of that fire, and could not sell all the rice they had contracted to sell that year. The litigation led to changes in the original contract: (1) Chico-San could and would pay for the rice over an extended schedule. (2) The Lundbergs could sell the organic brown rice to other customers.

Why is Chico-San a loner in the natural food industry? They are a manufacturer and importer which uses other

distributors; they do not generally distribute themselves—unlike Erewhon. However now they have some big trucks, used to distribute their own products in the San Francisco Bay Area.

Erewhon was able to take away Chico-San's New York market because Erewhon was price cutting; Kennedy refused to cut prices. Also, Erewhon sold direct to some markets, delivering their own products in their own trucks—unlike Chico-San which generally used other distributors. Many other companies besides Erewhon did this too. Most of those companies are gone now, but Chico-San remains!

Whenever Paul Hawken would talk to Bob Kennedy he always seemed to have a chip on his shoulder [a sort of grievance].

Initially Chico-San had an exclusive agreement with Ohsawa. Chico-San broke that in deference to Michio when Aveline set up Erewhon. This is a big, important point that should not be forgotten.

Ohsawa's first lectures in the USA, in early 1960, were at the Buddhist Academy in New York City.

There were two main reasons the group that formed Chico-San left New York and traveled to California: Rice (most important) and nuclear safety. Ohsawa strongly supported the group's efforts. Ohsawa tried to set up Japanese companies to supply Chico-San, but it was difficult. Then Muso Shokuhin [Muso Foods], in Osaka, came into the picture, and Chico-San started to order from them. Then they went back to ordering from Tokyo. There were some problems between the export companies in Tokyo and Osaka. Ohsawa Japan was the export company and Nippon CI was the educational arm.

The amount of miso and shoyu that Chico-San sells today is proprietary [confidential] information. Chico-San is now in serious talks with some manufacturers in Japan.

Chico-San started to make rice syrup in 1972. Bob traveled to Japan twice, visited some *amé* [rice syrup] makers, and got information on quantities, temperatures, etc. It's a fermentation process.

Chico-San expects to have a new rice cake plant in New Jersey in operation by December 1981. The plant will make only rice cakes but Chico-San will store

warehouse some of its Japanese foods in the plant. The next plant after that will be in Canada, then one in Europe after that. If these are successful, Chico-San will add distribution of Japanese products. They will sell both organic brown rice (from the Lundbergs and from Arkansas) and non-organic commercial brown rice—each clearly labeled.

What are Chico-Sans plans concerning miso and shoyu? In collaboration with Ohsawa Japan, two Japanese makers of miso and shoyu are very interested in coming to the U.S. and helping Chico-San to set up a plant in the U.S. They would provide technical assistance and be part shareholders / investors. Junsei Yamazaki plans to return to the Chico area, possibly this spring. He studied fermentology, so he may be

the process overseer.

In 1961 Chico-San received its first imports from Japan, from Tokyo, from George Ohsawa himself. Previously Herman Aihara in New York had ordered these imports from George Ohsawa. He had received 2-3 shipments before Chico-San was incorporated. George Ohsawa encouraged Muso to get started. Three companies tried to get started and folded before Muso took root. Bob will try to find the details (date and products) of Chico-San's first shipment from Muso. Bob also has George Ohsawa's early correspondence.

Bob would like to read the final draft of Shurtleff's History of Macrobiotics. Peter Milbury will look at it too. Address: Chico, California.

1352. Munson, Judy. 1983. Dining out: The Golden Mushroom (Ad). *Chicago Tribune*. Jan. 7. p. SWC7, or SC7. • **Summary:** The menu of this natural foods restaurant, at 18500 S. Vincennes Ave., compromises with a few chicken, shrimp and tuna offerings, but no white sugar is allowed in the place. The most popular item on the lunch menu is the veggieburger, served stuffed in whole wheat pita bread. Tofu, a food well known to vegetarians, is served scrambled with green onions and sesame seeds.

"For the uninitiated, tofu looks like cubes of chicken breast, but actually is a soy bean curd (soy milk made into cheese). 'It's a perfect food, if you can get used to the taste,' said the chef."

1353. Hawken, Paul. 1983. More history of Erewhon and macrobiotics in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Jan. 16. 2 p.

• **Summary:** The following are Hawken's comments on a draft history of Erewhon, by Shurtleff. Erewhon was not the "General Motors of the natural foods industry." What vanity! By 1980 various natural food distributors had expanded until they were 2-4 times as big as Erewhon—and very profitable. Erewhon was known throughout the industry as being undercapitalized, mismanaged, a laggard, behind the times. Its market share declined from 1973 on. By that time, Landstrom [in Southern California] had crossed over from health foods to natural foods and had sales of \$100 million a year.

Erewhon was not the victim of runaway expansion—unless you mean expansion of new products. From 1973 to 1981 Erewhon barely managed to double its sales—and it did this largely by adding new products such as vitamins, jam, yogurt; these products were in conflict with its basic philosophy of good food. After a while it would sell almost anything, but its core business and market share were declining. Inflation was another major factor that helped to double its dollar sales. There was lots of movement but very little real growth from 1973 to 1981.

The story of the relationship between the Lundberg brothers, Chico-San, and Erewhon concerning organically

grown rice is not well known. Bob Kennedy still does not believe this story. In 1968 [sic, fall 1969; see Hawken 1973, "Erewhon: A biography"], before the Lundbergs signed a rice contract with Chico-San, two [sic, one] of the brothers walked into the Erewhon store in Boston [Massachusetts] and said, "We're growing organic rice; do want to buy some?" Paul said, "Sure." They went back to Chico-San but Chico-San said, "Don't worry, we'll sell the rice to Erewhon." The risks on Chico-San's part were overstated. Paul knows the contract well. The Lundbergs were appalled to see Chico-San's mark-up on their rice; Chico-San basically doubled the price per pound. Paul said he would not buy rice from Chico-San at that price. Though very likeable people, the Lundbergs didn't realize how the contract would restrict them and their market. The Lundbergs put pressure on Chico-San to lower their prices on rice, and Chico-San did. However Paul is sure that Chico-San was unable to sell the volume of rice that it had contracted to buy. And this was long before the fire at Chico-San. So the contract was broken. The Lundbergs had been desperately looking for a way to get out of that contract. During that time Paul had set up Carl Garrich (Lone Pine, Arkansas [in March 1971]) as a grower of organic rice for Erewhon. After the contract was broken, Paul and Erewhon designed the Lundberg's rice bag using a Currier & Ives design. Paul believes that "people should know where their food is coming from." Erewhon had no pretensions of controlling organic rice.

Chico-San had been putting out the word in the rice valley of northern California that they wanted to buy organic rice. It was the Lundbergs, however, who developed a very clever method for growing the rice to Chico-San's basic specifications—no chemicals. The Lundbergs came to Erewhon before actually growing the rice, or at least before harvesting it.

Paul was shocked when he first heard of the contract between Chico-San and Lundberg. By trying to control this rice, Bob Kennedy blew it. Chico-San had an exclusive for only 2 years; it probably expired at the end of the 2nd year, before the fire. Erewhon was definitely buying rice from the Lundbergs before Chico-San burned down.

Chico-San was upset at all the natural food companies up and down the East Coast and even in California—Food for Life, Janus, and others. Erewhon's whole mission was to get good food to the people. Chico-San's rice was expensive because it underwent so many mark-ups. Chico-San had antipathy to all macrobiotics other than their own version. Paul had no antipathy for Chico-San. The Lundbergs deserve the credit.

The issue of Paul's losing his Erewhon stock. This is not correct as written. The macrobiotic movement has a huge gap between the stated goal and the reality. The falling out in which Paul was involved concerned what he viewed as Michio's dishonesty. When Paul came back from Japan, he did not realize that the stock was no longer his. A year later,

when he drew up a stock ownership plan, he said that he wanted his stock back. Michio said he would give it back to Paul but not to the others. It wasn't that clear. He never said "No, you can't have your stock back." Michio is somewhat anti-Semitic and very rich. Address: California.

1354. **Product Name:** Yamaki Organic Miso [Hatcho, Mugi, or Genmai], and Yamaki Organic Soy Sauce.
Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.
Manufacturer's Address: P.O. Box 810, Chico, CA 95927.
Date of Introduction: 1983 January.
New Product–Documentation: Crackerbarrel. 1983. Jan. No. 1. p. 1. "Our new line of organic imports. Long awaited soy sauce and miso from organically grown ingredients introduced... The Yamaki Co. [Yamaki Jôzo], owned by Tomio Kitani, contracts directly with family farmers for his organically grown grains. Yamaki miso is unpasteurized. The organic soy sauce has 16.9% salt."

Note: The Yamaki Co. is located in Kamiizumi-mura, about 75 miles from Tokyo, Japan.

1355. Kennedy, Robert. 1983. A message from our president [History of Chico-San]. *Crackerbarrel (Chico, California)* 1(1):2. Jan.

• **Summary:** This article, which gives a brief history of Chico-San, Inc., is in the first issue of a new Chico-San newsletter.

"There is a lot of excitement at Chico-San these days. Twenty years have passed since we opened in a little basement room to grind sesame seeds by hand for gomasio [gomashio], and repack bulk shipments of miso and shoyu (then called tamari) from our suppliers in Japan. From that meager beginning, Chico-San has become a leader in many areas of food manufacturing and distribution and has gained annual sales substantially in the millions.

"We are grateful for our achievements and we are proud that the complement of Chico-San employees had the loyalty, talent, tenacity and integrity that it took to bring us to this satisfying twenty-year plateau, I refer to this as a plateau

because we are now reorganizing our efforts to put more emphasis on our Japanese imports. These are quality foods, called for in George Ohsawa's macrobiotic dietary precepts, that are not yet manufactured in this country.

"It was in 1959 that George Ohsawa with Lima Ohsawa first introduced his philosophy of the Far-East and his concepts of diet to the U.S. public. It was in New York City where hundreds of people attended his 'dinner lectures.' The food was orchestrated by Lima while George took care of the philosophy and other pertinent subjects.

"It was from these lectures that 32 people collected under the umbrella of Ohsawa's teachings and moved to Chico, California where they could work together to pass along what they were learning.

"Some of the names—Herman & Cornelia Aihara, Alvin & Nina Bauman. Dick & Penny Smith, Bill & Dorothy Salant, Teal Ames, me and my wife, Betty.

"As we camped on the way from New York to Chico, we had nightly campfire meetings during which time we defined and prioritized our purpose for moving. Everyone agreed that first on our list of priorities would be to set up a food company that would provide the best available products necessary to the macrobiotic dietary instructions of Ohsawa. All of us were working on various degrees of health problems and we knew that our physical and mental betterment would parallel the quality of the food we ate. It was our resolve then that Chico-San, Inc., our new company name, would carry only the best foods available. This has been our policy and it is our responsibility to people who seriously relate good health to good food.

"Chico-San was incorporated in March 1962, and after Chico-San had been in business a few months the health food industry began seeing food products with foreign-sounding names on its shelves—names such as Tamari—Miso—Kombu—Hijiki—Kuzu—etc. All products first introduced by Chico-San. Later on Chico-San introduced the first organically grown rice to the health food industry, while our rice cakes became one of the industry's most popular sales items.

"In 1972 Chico-San was consumed by fire of such severe consequences that we were put out of business for almost a year. When we did return it was necessary for us to concentrate on our most popular items. These were items that we manufactured—rice cakes—rice syrup—candies made of rice syrup—these products would give us our best chance to regain solvency because they offered better profit margins.

"We continued to carry the Japanese products because it was our responsibility to those that had come to depend on Chico-San for quality, however by this time there were several companies [including Erewhon] competing for the sale of the Japanese products. Through their price cutting policies a market was created that was not profitable, consequently they had to lower their costs by buying products from dubious sources. Many such companies have since gone bankrupt.

“Twenty years ago when Ohsawa’s macrobiotic diet was new to America it was taken with scepticism but now that there have been many dramatic cures accorded to it, its popularity is gaining by great strides. This makes Chico-San’s responsibility greater than it has ever been because more and more people are being attracted to the Ohsawa regimen.

“Since Chico-San started it has always been the Ohsawas, both Lima and George, who have given Chico-San its quality control regarding the Japanese imports. We have only carried products recommended to us by them and chosen by them for their own use. Since Mr. Ohsawa’s death several years ago Mrs. Ohsawa was given the recognition by people world-wide for being the most knowledgeable person in regard to her husband’s work.

“Chico-San uses Ohsawa Japan, Inc. in Tokyo as its only supplier for its imports, This is a company started by George Ohsawa and now run by Lima Ohsawa’s sister, Flora Tanaka. The very strict supervision of the company and the uncompromising attitude of its employees comes from years of collective study under Ohsawa.

“Jun Makino, a representative to Chico-San, Inc. from Ohsawa Japan, Inc. in Tokyo, has recently joined us in Chico. He is now busily engaged in translating hordes of material being sent to us from Ohsawa Japan. pertaining to macrobiotic foods and how they have traditionally been used.

“This additional information will appear in our newsletters; it will also be included in our pamphlets and catalog as space and time permit.

“Jun will be in charge of our Japanese imports and will also take over our mail order department.

“Peter Milbury is back with us to help with our expanded efforts. Peter is our operations director, a job designed to assist me as president in the performance of executive duties,

“We have added several others to our complement, so that we can increase our effectiveness as a macrobiotic foods supplier. We’ll introduce them to you in future issues of the newsletter because we would like you to get to know the people that supply your food.

“Our excitement on our 20th anniversary is genuine as we confirm our dedication of 20 years ago. to bring you the best quality available.”

Also includes articles on imports from Japan and winter recipes using miso and soy sauce. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

1356. Walnut Acres. 1983. Organic farming–natural foods [Mail order catalog and price list]. Penns Creek, Pennsylvania 17862. 40 p. Jan/Feb. Illust. Index. 28 cm. [37 ref]

• **Summary:** A large color photo on the cover shows a red barn in the snow, with the caption “Buy direct from the

farm–500 acres of chemical free soil.” In 1946 Paul and Betty Keene first fell in love with Walnut Acres. They had just completed four years of study in organic homestead-and-farm schools. Note: It is unclear when they started to do business. They also sell products made by other companies, such as Shiloh Farms, Fearn, and Westbrae. Soy related products: Miso Plus all natural dip mixes. 4-grain cereal (incl. soybeans). Hearty cereal (incl. soya). 12-grain cereal (incl. soy). Soy grits, organic. Rice pancake mix (with soya flour). Triticale pancake mix (with soya flour). 12-grain pancake mix (with soya flour). Unbleached white pancake mix with soya flour. Wheatless pancake mix with soya flour. Whole wheat and soy pancake mix with soya flour. Cornell flour, with organic soy flour. Soy flour, organic. Instant soy milk powder. Sterling special carob blend (soya carob). 12 grain flour (incl. soya flour). Soya-carob bread mix (with soya flour). Corn muffin mix (with soya flour). Apricot nut quick bread mix (with soya flour). Granola maple quick bread mix (with soya flour). Four Fearn cake mixes (with soy powder). Pro-Nuts (soy-nuts). Soybeans, yellow (25 lb, 5 lb, 3 lb, 1 lb). Tempeh starter. Whole wheat and soy spaghetti. Pea and soybean soup. Miso-Cup red vegetarian soup. Green soybeans (whole dry, canned). Tamari soy sauce (with or without wheat). Comtessa coffee substitute (with soy beans). Celestial Seasonings Breakaway Coffee Substitutes (most have roasted malted barley and barley grains, and roasted chicory root as the main ingredients). Lecithin granules (soya phosphatides). Soy bean lecithin (raw, crude, natural pint). Books. Soya-carob bread. Portrait photos show Paul Keene and Betty Keene.

Also discusses: Gluten flour. Amaranth seeds. Psyllium seed. Sesame seed (raw hulled; raw unhulled; toasted hulled). Adzuki beans. Peanut butter, sesame tahini, and other nut butters. Pita bread. Address: Penns Creek, Pennsylvania. Phone: (717) 837-0601.

1357. Hawken, Paul. 1983. Erewhon and miso in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the early days, the first Erewhon retail store (located downstairs) got miso from Infinity Foods (in New York City), Chico-San, and perhaps a little from Lima in Belgium, plus Hatcho miso from a Japanese trading company (perhaps JFC or Nishimoto).

Paul doesn’t know of any early Caucasian miso makers. Address: California.

1358. Yamazaki, Junsei. 1983. Work with miso and macrobiotics in America (Interview). *SoyaScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In May 1963 Junsei first arrived in the U.S. in San Francisco, from Japan. He first went (by bus) to Chico, California, to help with the installation of small rice cake machines. After the July 1963 summer camp at French

Meadows, California, he went to New York, arriving in August.

Note: The first macrobiotic summer camp was held at French Meadows (just west of Lake Tahoe) on 14-23 Aug. 1970.

Initially, he did nothing with soyfoods in New York. But there was a group in New York, composed of a woman or women; he can't recall the name. It was not Irma Paule, but rather some woman whose husband had died in a car accident. They asked him to teach them how to make miso, and he taught her how to make miso.

Initially Herman Aihara (pronounced AI-ha-ra) had to work as a guard to earn money in Chico; the macrobiotic group in Chico had no income. Some group raised money for him to do something in New York or Chico.

In about Nov. 1963 Michio Kushi opened the Genpei restaurant on the first floor of the Diamond Jim Building on 46th Street in New York City. In the basement Junsei made koji, then used it to make about 100 pounds of miso. He showed the process to a Caucasian woman and child. The miso was not used in the restaurant. Junsei took it to Boston, Massachusetts, where it was used by Michio and Aveline Kushi themselves.

In March 1964 Junsei returned to Chico-San in Chico, California. While making rice cakes there, he made miso in the interim. Starting in about 1965, when Chico moved to a bigger place, he made about 20 whiskey barrels full of miso; each barrel held 320 lbs of miso. He did not really teach miso making to anyone. The real teacher of miso among macrobiotics was Mr. Noboru Muramoto.

In Boston, Erewhon wanted to make miso within their building. They asked Yamazaki to tell them the best place, so he went to Boston. He did not teach any classes to students then, unlike what Aveline recalled.

In 1980 Junsei and his wife bought land in Orland, in northern California (Zip code 95963). He wants to make miso using good ingredients, either cooperatively or in individual homes. He is now working as a guard for a construction firm. He also wants to grow ume plum trees for making umeboshi [salt plums]; he tried this in Washington state but failed. Address: Orland, California.

1359. Kendall, Charles. 1983. Early work making miso in America (Interview). *SoyaScan Notes*. Feb. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1974 Charlie heard that someone up at Erewhon Farms in New Hampshire, a macrobiotic community, had made miso. That person was part of a group of people who tried to start a farm in New Hampshire. In 1976 Charles made a batch of miso at home using ready-made store-bought koji and following instructions from one of Michio Kushi's lectures.

Note: At Tassajara Zen Mountain Center (in the Santa Lucia Mountains, California), the students made miso long

before 1974. The method was transmitted by Zen priests from Japan. Ask Loring Palmer and Ed Brown for more details. Address: Ashburnham, Massachusetts.

1360. Rankin, Blake. 1983. Early work making miso in America (Interview). *SoyaScan Notes*. Feb. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In late 1975 and early 1976 George Gearhardt taught a number of miso classes on the West Coast; Blake did not. But George Gearhardt and Blake made miso back in 1974-75, after Blake returned from a trip to Japan. The maximum in the works was 500 pounds—back in the days when they owned Janus Natural Foods, in Seattle. In early 1974 they made a number of small batches, then when those turned out well they made a number of larger batches at Janus. They made barley miso first using bulk dried koji from Japan, but for big batches, in 1975, he had redwood koji boxes made and they made koji themselves, using Janus' kitchen. At the end of 1975, when doing a 30-day koji run he did informal classes inviting 6 people from the Seattle Zen Center. A single big batch was 40-50 pounds; then some people in the Zen center made miso using the groups koji. Blake also made miso using eastern Washington soft white wheat.

How did Blake learn to make miso? Probably from notes he had taken in Japan while visiting miso plants there—plus (maybe) Herman Aihara's books and maybe some comments from Junsei Yamazaki. His notes alone would not have been detailed enough. Blake does not know of any Caucasians who made miso in the USA before he did. The only person he knows who made miso in the USA before he did is Junsei Yamazaki.

Blake lost all his notes at the time of Janus' bankruptcy. When Blake returned from Japan at the end of the 1970s, the miso was all gone.

Blake does not know where George Gearhardt is now—probably in Spokane or Seattle. Cooking classes at the Federal Way Natural Food Store. He imports Taiwan tatamis for \$72 each plus shipping. Blake left in Aug. or Sept. to go to Japan. George moves a lot. Address: Washington state.

1361. Milbury, Peter. 1983. Soy sauce and tamari analysis: Meeting with Tomio Kitani of Yamaki Co. Chico, California: Chico-San Inc. 4 p. Feb. 14. Unpublished manuscript.

• **Summary:** Present at this meeting to discuss soy sauce quality were Bob Kennedy, Jun Makino, Peter Milbury (Chico-San), T. Murata (Ohsawa Japan), and Tomio Kitani (Yamaki Co.). There are 2 ways to tell if soy sauce is made by natural fermentation of whole soybeans, or if it is "mixed with acid hydrolyzed defatted soybean meal." (1) Visit the maker and dip into the moromi. (2) Use a combination of sensorial and laboratory testing. Address: Chico-San Inc., P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927. Phone: 916 891-6271.

1362. Milbury, Peter. 1983. Chico-San, miso, and soy sauce (Interview). *SoyaScan Notes*. Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob Kennedy thinks that Junsei Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3-4 were in the building that was burned down by the fire at Chico-San. The rest came to maturity and were mixed with imported miso. Mr. Yamazaki also made about 3 barrels of fermented shoyu (soy sauce) at Chico-San in about 1965. Chico-San feels that SANA (Soyfoods Assoc. of North America) should establish soy sauce terminology, standards, and an analysis program. Importers could help set it up to protect themselves.

Mr. Kitani is Chico-San's advisor for fermented soyfoods. He is a manufacturer in Japan. Chico-San now has a four-stage plan to make miso and shoyu in Chico. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San, Chico, California.

1363. Milbury, Peter. 1983. Junsei Yamazaki's work with miso and shoyu at Chico-San. Work of Mr. Kitani (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 17. ½ p. transcript.

• **Summary:** Bob Kennedy thinks Mr. Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3 to 4 were destroyed by the fire. The rest came to maturity and was mixed with imported miso. Mr. Yamazaki also made about 3 barrels of fermented soy sauce at Chico-San—in about 1965.

Peter believes SANA should develop soy sauce terminology, standards, and analysis techniques. Importers would use these to protect themselves.

Mr. Kitani, a manufacturer, is Chico-San's fermented foods advisor. Chico-San now has a four-stage plan to make miso and shoyu. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San Inc., P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927.

1364. Welters, Sjon. 1983. Re: Brief history of Stichting Natuurvoeding Amsterdam and Manna Natuurvoeding B.V. (Manna Natural Foods) in the Netherlands. Letter to William Shurtleff at Soyfoods Center, March 2. 2 p. Typed, with signature on letterhead.

• **Summary:** "Manna was started in 1971 by Adelbert and Wieke Nelissen with a few hundred guilders in a small garage where some natural food products were sold. One year later they gave it an official status by founding

the Natural Foods Foundation Amsterdam [Stichting Natuurvoeding Amsterdam; this Manna started as a foundation, and Manna was their brand]. Their first store was on Rozenstraat in Amsterdam. Two years later a second store was opened and the first sourdough bakery in Holland opened. The name of the bread became 'Manna.' Soon after this a third and fourth store opened in other parts of Amsterdam while at the end of 1975 the distribution of bread, nutbutters, cereals and miso, tamari, shoyu, and seaweeds began all over the Netherlands. In 1976 it became clear that a warehouse should be rented. Meanwhile production grew and more and more stores carried Manna products. Again a new Manna store started. In 1977 the warehouse was moved to a bigger place. Another new store opened its doors. We began making tofu and were the first to do so with organic beans and nigari. Also soymilk and seitan were produced. In 1978 sales went steadily up. In 1979 two new stores were opened.

"Meanwhile the East West Center was founded by Adelbert and Wieke, promoting natural foods as part of a healthy and natural way of living. This was a great help for Manna. Two more stores opened in 1980 and 1981. In the beginning of 1982, Manna suffered from bankruptcy and was started one day later as Manna Natural Foods, a holding company mainly owned by the Foundation 'Manna Natural Foods' [Manna Natuurvoeding B.V.; B.V., pronounced Bay Fay, is an abbreviation for Besloten Vennootschap, which means a private company with limited liability]. A reorganization was necessary but the promotion and sales of quality natural foods went on.

"In 1983 Manna is going steady and probably will cooperate with other natural foods distributors to form one strong network of farmers, producers, distributors and retailers. The purpose will be to eliminate competition and put more energy into publications and promoting by cooking classes, radio and television programs and education.

"Soyfoods played quite an important role in the history of Manna because it was the soyfoods Manna promoted that made it different from the other health and natural food businesses. Because Manna is based on the macrobiotic view of life, miso, tamari, tofu and so forth were an essential part of the diet of the Manna people.

"Instead of the cheese, milk, yogurt (of which consumption is one of the highest in the Netherlands) we advise soyfoods as a healthy alternative. We did no business in dairy foods. Soyfoods are the number one product to introduce in Netherlands. A great deal of sickness in the Netherlands is caused by the overconsumption of dairy foods, meat and eggs (and other animal products). From this point of view Manna is a unique company in Holland, even in the alternative natural foods business. This difference is a reason of conflict with them. Only by eating a diet which is based mainly on vegetable products such as grains, legumes, soyfoods, seaweeds, fruits and nuts, etc., can a healthy and

peaceful world be created. No animals can be mistreated and no land wasted, or misused or destroyed.” Address: Manna, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands.

1365. Hankin, Lester; Hanna, J. Gordon. 1983. Quality of tofu and other soy products. *Connecticut Agricultural Experiment Station, Bulletin* No. 810. 4 p. March. [8 ref]
• Summary: This cooperative study by the Connecticut Agric. Exp. Station and the Connecticut Department of Consumer Protection analyzed the microbial and nutrient content of 17 soy products: 5 tofu products made by New England Soy Dairy (Greenfield, Massachusetts), Firm Organic Tofu, and Tofu Slices (Marinated and Broiled) made by Nasoya Foods (Leominster, MA), Soy-Moo soymilk sold by Health Valley Natural Foods (Montebello, California), Tempeh Burgers made by Soyfoods Unlimited (San Leandro, CA), Tempeh Burger made by Pacific Tempeh (Emeryville, CA), Tofu Lasagna with Sauce marketed by Legume, Inc. (Bloomfield, New Jersey), Tempeh made by Tempeh Works (Cambridge, MA), Genmai Miso distributed by Erewhon, Inc. (Cambridge, MA), Kome Miso distributed by Tree of Life (St. Augustine, Florida), and 3 tofu products made by The Bridge (Middletown, Connecticut). Ingredients of each product are given.

The study showed high levels of bacterial contamination in many of the products, much higher than for dairy products. Only 41% met the coliform bacteria standard of less than 10 per gram of product, 29% met yeast standard of less than 10/gm, 41% met the 10 mold standard of less than 10/gm, and only 12% met the standard for total aerobic bacterial count (less than 25,000/gm). In addition, soyfoods generally contained more fat than claimed.

This report had widespread repercussions for the soyfoods industry, which (in the short term) were negative. The authors had previously published studies on the microbiological quality of numerous dairy products. Address: P.O. Box 1106, New Haven, CT 06504. Phone: 203-789-7272.

1366. **Product Name:** Amasake [Plain, or Carob].
Manufacturer’s Name: Imagine Foods, Inc.
Manufacturer’s Address: Moniteau Farm, Jamestown, MO 65046.
Date of Introduction: 1983 March.
Ingredients: Incl. koji, Yinnies rice syrup.
Wt/Vol., Packaging, Price: Plastic bottle.
New Product–Documentation: Talk with Robert Nissenbaum. 1988. Jan. 5. He was the original maker of amazake at Imagine Foods. He arrived in the fall of 1982 and amazake production started in March 1983. His company, still called Imagine Foods, is now located at 299 California Ave., Palo Alto, CA 94306. Phone: 415-327-1444. He still makes amazake, but it is all used to make Rice Dream, a frozen amazake dessert, sold in ten flavors. His major

initial influences were from both macrobiotics and natural foods. He learned how to make koji from *The Book of Miso* (by Shurtleff & Aoyagi) but learned amazake from Lima Ohsawa’s *The Art of Just Cooking*. He now produces about 2,000 gallons/week of amazake in summer, less in the off season. He is thus the largest amazake manufacturer in America. It retails for \$2.09 to \$2.16 a pint. It is made with “pure culture enzymes” [commercial enzymes, not koji].

Talk with Robert Nissenbaum. 1988. Feb. 7. He is now developing a thinner milk-like amazake beverage that will be sold fresh or frozen in plastic bottles or Pure Pak cartons, and could compete with soymilk. In 1984 Chico-San began tests to try to package amazake in Tetra-Brik cartons. Similar tests were undertaken in 1985 by his Imagine Foods, Grainaissance, and Mitoku. After 3 years he basically gave up trying because the starches and fibers in the rice are substantially changed by the HTST heat treatment process. The amazake becomes a different product; there are separation problems, which can be solved but only by filtration and homogenization.

1367. **Product Name:** Kinmei Soy Sauce, and Kinmei Tamari Soy Sauce (Wheat Free).
Manufacturer’s Name: Chico-San, Inc. (Importer). Made in Japan by Mizoguchi Soy Sauce Inc.
Manufacturer’s Address: P.O. Box 810, Chico, CA 95927.
Date of Introduction: 1983 April.
Ingredients: The tamari is completely wheat free.
Wt/Vol., Packaging, Price: 5 oz dispenser, quart, or gallon.
How Stored: Shelf stable.
New Product–Documentation: Crackerbarrel. 1983. April. Insert. Made by master brewer Hideo Mizoguchi of Mizoguchi Soy Sauce Inc., Honjo, Chiba prefecture, Japan.

1368. **Product Name:** Chico-San Lima Hishio. Finger-Lickin’ Miso (Dry Mix).
Manufacturer’s Name: Chico-San, Inc. (Importer). Made in Japan.
Manufacturer’s Address: P.O. Box 810, Chico, CA 95927.
Date of Introduction: 1983 April.
New Product–Documentation: Article in Crackerbarrel. 1983. April. p. 4. “Hishio: ‘Instant’ natural miso in seven days.” This is a dry mix. “To make use of Chico-San Hishio, one need only add soy sauce, water and raw vegetables, place the mixture in a covered jar, allowing it to sit in a warm or sunlit place for several days with stirring. Within four to seven days it should develop a miso-like aroma, and is ready to use.

“Hishio comes packaged in a dry form, a type of koji made from barley and soybeans which have been fermented for approximately sixty days.”

Spot in East West Journal. 1984. Jan. p. 69. “Do it yourself miso.”

1369. **Product Name:** Lima Yamaki-Brand Organic Soy Sauce.

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983 April.

Ingredients: Organically grown whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 5 oz dispenser, quart, or gallon.

How Stored: Shelf stable.

New Product–Documentation: Crackerbarrel. 1983. April. Insert. Made by Mr. Tomio Kitani of Yamaki Miso-Shoyu Co., Japan. Spot in Whole Foods. 1983. June. p. 28. A black-and-white photo shows the 5-oz. bottle. Made entirely from organically-grown ingredients, this soy sauce is made by the Yamaki Company in Japan, brewed and aged naturally for 2 years.

1370. *Crackerbarrel (Chico, California)*. 1983. Are natural soy sauces really natural? Laboratory analysis shows some are not! 1(2):1, 6. April.

• **Summary:** Recent laboratory analyses... States that three of four brands tested contain 0.91-0.98% glycerin. "A natural soy sauce should have a minimum of 1.0% glycerin. If the sample has less than 0.5% glycerin, then it must have been made from defatted soybeans." Two brands contain levulinic acid (12-17%). Alcohol content ranges from 1.26 to 2.52%.

The four brands of soy sauce commonly sold in American natural foods stores showed the presence of artificial additives in two of them. The tests were performed last November, by the Japan Food Research Laboratories, in Tokyo.

Chico-San pioneered the importation of natural soy sauce over 20 years ago. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

1371. **Product Name:** Rice Dream (Amazake-Based Non-Dairy Frozen Dessert) [Plain, Carob, or Almond].

Manufacturer's Name: Fresh Foods.

Manufacturer's Address: Boulder, Colorado.

Date of Introduction: 1983 April.

Ingredients: Sweet rice, rice koji, soy oil, honey, carrageenan, flavorings.

Wt/Vol., Packaging, Price: Pints.

How Stored: Frozen.

New Product–Documentation: Talk with Robert Nissenbaum. 1988. Feb. 7 and 11. According to his contract with Gloria Gilbert, owner of Fresh Foods in Boulder, Colorado, she began to use the trademark "Rice Dream" on or before 26 August 1983. He recalls that she only made a total of 2-3 batches. At the time Robert was planning to make an amazake-based frozen dessert and was looking for a name. He felt the best name was Rice Dream. So he called Gloria, whose company was small, and offered to buy the

rights to the name Rice Dream from her. She wanted to sell him the entire company. But he was already making his own amazake and he did not want to add any sweetener; he only wanted the name. On 10 February 1984 he purchased the name Rice Dream for \$2,000.

Talk with Steve Demos. 1988. Feb. 8. The lady's name was Gloria and her company was Fresh Foods. It still exists. Demos made her Rice Dream at his present plant. It was only on the market for 3-6 months. She was close friends with Don McKinley of Quinoa Corp. She is now in New York.

Talk with Don McKinley of Quinoa Corp. 1988. Feb. 22. Gloria works for Louis Harris & Associates, pollsters. Work: 212-698-9600. Home: 177 E. 93rd St., Apt. 3A, New York, NY 10128. Phone: 212-534-5468. Don McKinley: Office: 303-444-9466. Home: 303-530-9414. He incorporated in 1984. Colorado State University is the pioneering university with this crop.

Talk with Gloria Gilbert. 1988. Feb. 22. The idea of freezing amazake came from a friend, Peggy Markel, who said one day, "It would be great if we macrobiotics had a non-dairy ice cream." By December 1981 Gloria had started experimenting with freezing amazake, and by late 1982 or early 1983 she had begun to sell it informally to friends. With the product fairly well developed in soft serve and the name Rice Dream established, she went to Steve Demos of White Wave (a soy ice cream manufacturer in Boulder), who began to make it for her in hard pack on a larger scale. Her birthday is August 26, but she is fairly sure it was informally on the market locally, without the name Rice Dream, before that, perhaps in late 1982 or early 1983. She thinks that Rainbow Natural Foods Distributing picked it up as Rice Dream, with a label, in about August 1983. It was always packed in pints. Flavors were plain, carob, and almond. She does not recall adding a sweetener.

Talk with Barbara Svenning. 1989. Aug. 21. She and Marty Roth made amasake, amasake shakes, and amasake ice cream in 1980 in Santa Fe, New Mexico. In mid-August they moved to Boulder, Colorado, and Barbara started a business named Community Kitchens which made a Fried Rice Sandwich with tofu. In mid-December she sold that business to Gloria Gilbert. At the time of the sale they taught Gloria (free of charge) how to make amasake, how to ferment it overnight in a Styrofoam picnic cooler heated with a 40-watt light bulb wired into the lid to keep it just under 140°F all night (a technique she learned from Muramoto sensei). They also bragged about their amasake shakes and ice cream (of which they were very proud) but did not tell Gloria production details. Gloria began to make amasake at the same time she started her fried rice sandwich business. But the idea for an amasake ice cream must have come from Barbara and Marty.

1372. Ikegami, Seishiro. 1983. Recent developments with tofu at Morinaga (Interview). *SoyaScan Notes*. April.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Presently about 80% of Morinaga's tofu is sold at Japanese / Oriental food stores. General Nutrition Corp. is the only natural foods distributor. Morinaga presently has no central warehouse in the USA, but should get one later this year. Between April 1982 and March 1983 Morinaga sold 80,000 cases of tofu, with 24 cartons (10.5 oz. each) per case. This is the equivalent of 24,230 lb/week. Sales are up 30-35% over a year ago. Address: Morinaga Milk Co., c/o Beech Nut California Corp., P.O. Box 5759 (1661 Senter Dr.), San Jose, CA 95150. Phone: 408-293-8330.

1373. Leviton, Richard. 1983. The Westbrae story. *East West Journal*. April. p. 22-26, 28-29.

• **Summary:** An excellent history of Westbrae Natural Foods. Westbrae was founded in late 1970 by Robert Gerner, Kristin Brun, and Margaret and Bob Ortiz. The foursome secured an abandoned supermarket at 1336 Gilman Street and opened for business in Feb. 1971. Their main products were granola and dried pears. In 1971 Gordon Bennett, finishing a 2-year stint as a conscientious objector, was driving a Goodwill Industries truck in Berkeley while living at Zen Center. He stopped by one day at Westbrae for lunch, asked for a job, and soon found himself hired part time to sweep and move cases. In 1972 they started distributing foods and in the late fall of 1973 the group purchased their Gilman Street store and relocated the warehousing to a new 2,000 square foot building nearby at 1224 10th St., Berkeley, California 94710.

In Feb/March 1974 Gerner (then president and chairman of the board) went to Japan and traveled the country with guide and interpreter William Shurtleff (who was studying tofu in Japan) to search for quality sources of soy sauce, miso, and other traditional Japanese natural foods. About 9 months thereafter Westbrae began to import natural foods from Japan via Mr. Kazama of Mitoku. By late 1974 annual sales had reached \$2 million. Between June and Sept. 1976 the retail store at 1336 Gilman Street was renamed from Westbrae Natural Foods to Gilman Street Gourmet. In September 1977, Westbrae Natural Foods moved its warehouse and offices to Emeryville from Berkeley, into a much larger building. "Today Westbrae is a successful, confident, and growing \$7 million corporation of 25 employees at work in a bustling 50,000 square foot warehouse sandwiched between Oakland and Berkeley in Emeryville, California." Gordon Bennett (whose photo is shown) is president. Over the years the company has had a strong interest in soyfoods. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

1374. Makino, Jun. 1983. Imported from Japan: A visit to the Yamaki Miso-Shoyu Company. *Crackerbarrel (Chico, California)* 1(2):1, 6. April.

• **Summary:** Mr. Tomio Kitani is the company's owner and a third generation master maker of soy sauce and miso.

The factory is relatively small. It uses whole soybeans, organically grown locally, and does not pasteurize the miso. Mr. Kitani's grandfather started the company over 58 years ago. He recommends that miso be aged for more than a year. Chico-San is now importing this miso to America. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

1375. Schick, Rabbi Michael. 1983. How Chico miso and soy sauce are made kosher. *Crackerbarrel (Chico, California)* 1(2):4-5. April.

• **Summary:** The author, traveling from San Francisco with Jun Makino (director of imports for Chico-San Inc.), visited Mizoguchi Soy Sauce Inc. in Honjo/Kimitsu, Chiba prefecture, Japan, owned by Mr. Hideo Mizoguchi. The business is over 100 years old. He gives a description of the process for making miso and shoyu at the plant, illustrated by 3 photos. He then visited Meiji Seifun Co. in Fukuyama/Hiroshima and described the miso process. He certified all products kosher, for import by Chico-San. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

1376. *Soyfoods Monthly (Colrain, Massachusetts)*. 1983. Soyfoods Association rejuvenated at first meeting of new board, new goals. 3(4):1. April.

• **Summary:** "Thirty two industry members attended a 2 hour planning session of the new Soyfoods Association in Anaheim, February 7 and appointed board of directors and officers. Michael Austin was selected the new Executive Director following Richard Leviton's resignation. Board members include: Gary Barat, Legume (President), Yvonne Lo, Vitasoy USA (Vice President), Tom Timmins, New England Soy Dairy (Vice President), Dan Burke, Pacific Soybean (Treasurer), Richard Leviton, *Soyfoods Magazine* (Secretary), Travis Burgeson, Pacific Tempeh; Michael Fountain, SanJi [San-J] Int'l.; Jim Miller, Quong Hop; Jack Mizono, Azumaya; Morris Shriftman, Tree of Life; Robert Tepper, Farm Foods; Shoan Yamauchi, Hinode Tofu Co. An initial pledge of \$12,000 from 14 companies was received at this organizational meeting."

1377. Leviton, Richard. 1983. Notes from a visit to Eden Foods of Michigan. 19 p. June 4. Unpublished typescript.

• **Summary:** These notes were condensed into an excellent article in *East West Journal* (April 1984) titled "The organic Garden of Eden: A Michigan-based natural foods company stresses quality and fidelity." Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1378. Tara, Bill. 1983. Re: Comments on William Shurtleff's "History of Macrobiotics" manuscript. Letter to William Shurtleff at Soyfoods Center, June 9. 2 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** "I would check the reference to Paul Hawken owning 50% of the stock in Erewhon. My reason for this

is as follows: During this period of time there were many discussions which took place between myself, Paul, the Kushi's and others regarding an equitable distribution of stocks in the company to the management. No plan was ever finalized. Paul's desire was 50% for himself. Michio and Aveline were hesitant since that would have meant that future stock participation by management would be severely limited. It was my understanding that the upshot of these discussions was that Aveline would hold the shares in her name in trust until such time that an equitable proposal was put forward by management. In lieu of stock participation, many employees including Paul, myself & Roger Hillyard were given cash bonuses and extensive time off from our work to pursue our own travels and study. (Paul went to Japan under such an arrangement, Roger traveled through the U.S. and I traveled through Europe.)"

"Paul did not 'set-up' Mitoku & Muso. They were already in operation and exporting. Paul did however, cement a good relationship with these companies and make more efficient arrangements for shipping and quality control.

"As per Paul's shock regarding the shares. I can only say as stated above, plus the fact that what you want and what you have are two different things, if the shares had been legally his, they could not have been taken away and Paul could never be accused of having been ignorant of the law in business matters."

"Erewhon in Los Angeles was started by myself and Aveline Kushi. I had moved to Los Angeles to set up a center there immediately after establishing a center in Chicago [Illinois] and getting the shop opened. The shop was opened in 1970 and our original purchase of miso and tamari were made through Chico-San. We later received our first direct shipment from Japan prior to Paul's arrival. I was joined by Bruce Macdonald and we began distribution up the California coast as far north as San Francisco, distributing miso and tamari as well as some Japanese condiments and seaweeds to small co-ops and natural food shops. Our biggest customers were the co-ops in Berkeley and Fred Rohe in San Francisco."

"What can I say regarding Paul's impression of Erewhon in 1970? We were all younger then. My impression was that Erewhon was a very happy place to work at Farnsworth Street. There was a high degree of comradery [camaraderie] and a poor understanding of business. The words arrogant and dogmatic were words often used to describe Paul—rightly or not.

"Bill, I hope these comments are not in any way taken to be disparaging of Paul and his involvement in the natural foods movement. His energy and vitality combined with his sharp business sense was one of the main driving forces behind the wide distribution of Japanese foods. Combined with Michio's educational work, this forged the beginning of the wide acceptance that we are now seeing for many of the traditional food items. It would be sad, I think, to allow

Paul's own personal frustrations to overly color what was an exciting and adventurous experience for all involved." Address: The Kushi Institute, P.O. Box 1100, Brookline, Massachusetts 02147. Phone: (617) 731-0564.

1379. Rasmussen, Carol. 1983. Goldbeck's cookbook is an excellent primer on using natural foods. *Chicago Tribune*. June 16. p. N_A3B or S_A8 or W-A8 or G3E or D8 or NW3A.

• **Summary:** Starting in 1971, when the immensely popular *Diet for a Small Planet* was published, Americans have been discovering "natural" foods. Many cookbooks are now available for both vegetarians and natural foods enthusiasts who also want recipes that include meat.

Into this rapidly expanding new field comes *Nikki & David Goldbeck's American Wholefoods Cuisine*, containing 1,300 meatless recipes and a wealth of other information packed into 523 pages. Much more than a cookbook, it is a guide to the whole concept of whole foods, and the wholefoods kitchen.

The focus is on using whole, natural foods and avoiding processed and refined foods. The book includes eggs and dairy products.

One of their systems "is to use frozen tofu, which is a way of keeping tofu on hand at all times. Freezing also toughens the curd, which they think is more acceptable to the American palate."

A photo shows Nikki and David Goldbeck with their new book.

1380. Kazama, Akiyoshi. 1983. Early years of selling macrobiotic foods to the western world (Interview). *SoyaScan Notes*. June 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mr. Kazama worked for a German export company named Ravenna; he ran their Tokyo branch office, exporting machines, cameras, transistors, etc. That company started in 1959.

He first heard of macrobiotics (before Paul Hawken arrived in Japan) from Mr. Shin Obayashi, a friend of his from Waseda University. Obayashi and Michio Kushi (from Tokyo Univ.) had won Japanese government scholarships to study in the United States. Both studied at Columbia University. Obayashi is no longer living. Mr. Kushi asked Obayashi to help him find a company in Japan from which Kushi could import Japanese natural foods. Before that, Kushi had to buy such foods from Chico-San at very high prices, like medicine. Mr. Obayashi contacted Mr. Kazama. Mr. Kushi found out the names of Chico-San's sources by reading the Japanese labels on their products. He sent these names to Mr. Kazama, who in turn bought the foods from Chico-San's sources. Evan Root and Paul Hawken suggested that Kushi and Erewhon should buy directly from Japan.

Mr. Kazama was accustomed from his office machines

business to taking a low markup, so he charged Erewhon a commission of only 10%. Thus Erewhon got low prices, which was a key to their success. Mr. Kazama shipped the first order to Erewhon 3-4 months before Hawken arrived in Japan. Hawken's brother-in-law, a lawyer, helped provide the funds for opening the first letter of credit. In about 1969 Mr. Kazama established a new company named Mitoku, which he owned. It was independent of Ravenna.

Originally Mr. Kazama had bought his shoyu from Marushima, but Muso objected, saying it was their exclusive source. Muso asked Marushima to stop selling to Kazama, which Marushima did. Kazama then searched the length of Japan to try to find a company that still made shoyu in the traditional way. He finally located Sendai Miso Shoyu. Sasaki Jube, the 7th generation owner, made both traditional and modern shoyu products. He set aside a warehouse for only his traditional products, and insisted that all his brewmasters should master the traditional process first. Sasaki eats brown rice. Mr. Kazama found Sendai by himself and first went there alone. Sendai first sold its existing traditional product to Kazama in about 1970, then they expanded their production by adding on new fermentation rooms as orders increased.

Sendai has a special process for keeping a large amount of shoyu moromi in a huge vat; they then use half of this in each new batch, so that part of each batch is old and part new. Thus the finished product is not clearly 2 years old but maybe an average of 2 summers old. Thus in each bottle, there may be some shoyu that is 3 or 4 years old. Sendai gets very consistent quality. They still use well water, but the maximum amount they can use is limited by the government.

Today Mitoku's biggest customer is Westbrae, followed by Erewhon. Address: President, Mitoku Co., Tokyo, Japan. Phone: 03-201-6706.

1381. Leviton, Richard. 1983. In search of the elegant plate: Using tofu in restaurants. *Soyfoods*. Summer. p. 22-32.

• **Summary:** *Soyfoods* magazine recently interviewed 50 restaurants around the country to learn how they were serving tofu, the amount of tofu they used each week, and their prognosis for tofu's future in restaurants. The interviews focused on natural foods and macrobiotic style restaurants—where much of the current use and innovation is taking place. The 50 restaurants represent an estimated 8% of America's estimated 600 natural foods restaurants. The 50 restaurants interviewed purchase about 111 tons of tofu yearly; by extrapolation, all natural foods restaurants would purchase a total of 611.5 tons of tofu yearly, or 2.25% of current tofu production. Asian restaurants are estimated to use an additional 3,822 tons, or 14% of total production. Many restaurants prefer to buy their tofu in bulk directly from the manufacturer. Leading centers for tofu innovation in restaurants are Boston (from the macrobiotic community), New York, then San Francisco and Los Angeles (which have

large numbers of Asian-Americans and tofu manufacturers). Open Sesame, one of Boston's foremost macrobiotic restaurants, uses 350 pounds/week of tofu according to owner Gary Welkin. Also discusses tofu use and dishes served at various natural food vegetarian restaurants: Lotos/Lotus Cafe (Rochester, New York; owner Greg Weaver, 400 lb/week of tofu), Woodlands (Vancouver, BC, Canada; owner Arran Stephens, 250 lb/week), Blair Island (Eugene, Oregon; 200 lb/week), Meyera (Santa Monica, California), Penthouse Garden (New York City; chef George Roeger), Greens (San Francisco, California; run by Zen Center, head chef Jim Phalon, 125 lb/week), Sojourner Coffee House (Santa Barbara, California), Amazing Grace (San Francisco), Blue Heron (Minneapolis, Minnesota), Sunshine Inn (St. Louis, Missouri), Pachamama (Boulder, Colorado), Brownies (New York City), Moosewood Restaurant (Ithaca, New York), Latacarta (Boston), Blind Faith (Evanston, Illinois), Whole Wheat 'N' Wild Berries (New York City), Earth Angel (New York City), Green River Cafe (Greenfield, Massachusetts), The Garland (Tucson, Arizona), Cafe Shalom (Boston).

At macrobiotic restaurants: L'Odeon (Boston; 210 lbs/week), George's (Philadelphia, Pennsylvania; 200 lb/week), Grain Country (Hollywood, California; 175 lb/week), Paul & Elizabeth's (Northampton, Massachusetts; 150 lb/week), Five Seasons (Jamaica Plain, near Boston; owner John Pell), The Caldron (New York City; they have been open since 1970, and making their own tofu since 1975), Angelica's Kitchen (New York), Seventh Inn (Boston), Harvest Cafe (Washington, DC).

At mixed cuisine natural foods restaurants: The Unicorn (North Miami Beach, Florida; Terry Dalton, owner, opened in late 1979, uses 335 lb/week of tofu), Nature's Oven (Miami), The Natural Cafe (Santa Fe, New Mexico), The Eatery Amulette (Monmouth Junction, near Princeton, New Jersey), The Haven (Santa Fe, New Mexico), The Copper Star (Tucson, Arizona).

At tofu fast food takeout restaurants and delis: The Unicorn (Florida), Erewhon Healthycatessen (Los Angeles), The Patisserie (Boulder), Golden Temple (St. Louis).

Natural foods Oriental restaurants: The Wok (Greenfield, Massachusetts), Real Good Karma (San Francisco; has served tofu since 1976), Souen (New York City), Golden Horde (Cambridge, Massachusetts; 100 lb/week), Plum Tree (New York City), Shangrila (San Francisco), Inaka (Los Angeles), Fuji-Ya (Minneapolis).

Specialty atmosphere white tablecloth restaurants: Trader Vic's (San Francisco), Cambridge Crossing (Salt Lake City, Utah), The Good Earth (chain of 30 restaurants owned by General Mills). Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1382. Milbury, Peter. 1983. Soy sauces: Maybe not so natural. *Soyfoods*. Summer. p. 65, 67, 68.

• **Summary:** "In October of 1982 we sent seven unlabelled

samples of soy sauce and tamari to the Japan Food Research Laboratories, in Tokyo for analysis. The samples included four soy sauces and three tamaris. Three of the soy sauce samples were purchased from natural food stores, as were two of the tamari samples. One soy sauce and one tamari were taken from Chico-San warehouse stock. All products were labeled as natural products, made with whole ingredients, naturally fermented, without any synthetic or chemical additives.

“Five different characteristics were examined through scientific laboratory analysis to detect inferior shoyu and tamari. The inferior product is considered to be one which is made from cheap, fractionated ingredients, such as defatted soybean meal, and made with the use of chemicals, synthetics and preservatives. Based on a review of the literature on soy sauce brewing, several tests were conducted.

“1. Glycerin level: This is to detect the use of defatted soybeans. Researchers have determined that 0.5% or less glycerine in soy sauce (not true for tamari) indicates defatted soybeans, while 1.0% or more indicates the use of whole soybeans. Readings between 0.5% and 1.0% are suspect.

“2. Nitrogen ratio: The ratio of amino nitrogen to total nitrogen is an accepted standard for overall quality of a soy sauce or tamari. The normal range is 50-60%, the higher the better.

“3. Levulinic acid: According to Fukushima, this acid does not occur in the natural world. This is confirmed by Chiba, and verbal discussions with laboratory scientists. It occurs as a constituent of the acid hydrolysis of soybeans, and in artificial caramel coloring. It is also thought to occur in the manufacture of monosodium glutamate, according to master shoyu brewer Tomio Kitani. None should be found in natural, traditional shoyu.

“4. p-hydroxybenzoic acid: This is a common preservative, used in commercial soy sauce. None should be found in natural, traditional shoyu.

“5. Ethyl alcohol: Common knowledge, as well as the literature, points to artificial ethyl alcohol as a preservative. One problem with ethyl alcohol, is that it also occurs naturally. Accepted levels for ethyl alcohol in soy sauce, according to master natural shoyu brewers Tomio Kitani and Kideo Mizoguchi, should be between 1.0 and 2.0%. However Fukushima reports 2.2%. This refers to commercial shoyu, and would allow for the inclusion of ethyl alcohol as a preservative, which would boost the level from 1.0%, to more than 2.0%. The accepted level of ethyl alcohol for tamari is given by Fukushima as 0.1%. This is disputed by Mizoguchi and Kitani who say the upper limit for a natural tamari might go up to 1.0%, but no higher.

“The results of the analyses are presented below:

“Glycerin:

“Soy Sauce The four soy sauces ranged from 0.91% to 1.3%, with an average of 1.04%. The highest was Chico-

San Lima Soy Sauce, with the three others at 0.98, 0.98, and 0.91%, with an average of 0.957, excluding the Chico-San shoyu. It is clear that the Chico-San shoyu passes the glycerin test, since it has 30% more than the required percentage. The other three brands are below 1.0%, and thus cannot be entirely free from suspicion as having been made from or mixed with defatted soybeans.

“Tamari: Although glycerin levels for tamari have not been established, the data is presented for comparison with the soy sauce samples, in the event that it was suspected that a tamari had been made with wheat, even though the label stated wheat-free. The tamari samples ranged from 0.56% to 0.80%. The Chico-San sample was lowest, at 0.56%, with the other two at 0.63% and 0.80%, averaged at 0.72%. In the absence of glycerin data for tamari, it is difficult to use the results to assess whole versus defatted soybeans. However, since glycerin is a sugar of sorts, and relates to the interaction of wheat and soybeans, the fairly high glycerin levels for the other two tamari samples might suggest the use of some (10%) wheat. Other data, presented below, (the presence of levulinic acid and the high ethyl alcohol levels) tend to support this idea.

“Nitrogen Ratio:

“Soy Sauce: The overall average was 53.0%. These samples averaged 54.3%, with the Chico-San sample highest at 58% which tended to pull the average up. Without the Chico-San sample the average was 52.9%. The Chico-San sample stands clearly above the others. While the other three samples can't be completely condemned in this test, there is no doubt that they are inferior products to the Chico-San sample.

“Tamari: The average ratio for these three samples is 51.4%, with Chico-San having the highest (58%), and greatly pulling the average up. The average of samples E and F is 48%. The Chico-San sample is clearly the most superior product. The two other tamari samples are clearly mediocre, falling below the 50% level arbitrarily set in the literature as minimal quality.

“Levulinic Acid:

“Soy Sauce: Two of the four samples (A and B) had traces of levulinic acid (0.017% and 0.012%, respectively.) Samples C and Chico-San (D) showed no traces of the chemical. The two samples with traces of levulinic acid must be considered to contain at least some dubious synthetic ingredients. Both of these brands also had marginal readings for glycerin, and one had an abnormally high ethyl alcohol level (2.52%), which supports the notion that both are processed using one or more unacceptable, synthetic practices.

“Tamari: Two of the three samples had traces of levulinic acid, while one (Chico-San, G) didn't. The two had levels at 0.021% and 0.002%. The two samples with levulinic acid traces must be tagged as using at least some artificial and unacceptable ingredients. The Chico-San

sample was clearly free of the chemical. The levulinic samples have problems with other tests: abnormally low amino nitrogen/total nitrogen ratio, abnormally high ethyl alcohol levels; and one sample shows a curiously high (0.80%) glycerin level.

“Benzoic Acid”

“None of the samples turned up with any trace of this common preservative. It is possible that a so-called ‘natural’ manufacturer using dubious ingredients, would be clever enough to use a preservative that would not be easily detectable, such as ethyl alcohol. As it turns out, several of the samples have abnormal levels of alcohol” (Continued). Address: Operations director, Chico-San Inc., Chico, California.

1383. Milbury, Peter. 1983. Soy sauces: Maybe not so natural (Continued—Document part II). *Soyfoods*. Summer. p. 65, 67, 68.

• **Summary:** (Continued). “Ethyl Alcohol:

“Soy Sauce: The average was 1.58%, with a range of 1.22% to 2.52%. The average was pulled up slightly by one sample (A) with its high reading of 2.52%. Excluding this, the samples average 1.27, with the three tightly grouped around it (1.33%, 1.22% and 1.26%). With its abnormally high level of 2.52%, Sample A is strongly suspect for the use of synthetic ethyl alcohol added as a preservative. Sample A also had the highest percentage of levulinic acid (0.017%). The other three samples appear to be fairly similar for the ethyl alcohol characteristic. And while Fukushima states that 2.2% is the normal level of alcohol for soy sauce, he is undoubtedly referring to semi-synthetic soy sauce. It would appear that the alcohol level for natural soy sauce would be closer to the 1.27% of the three samples.

“Tamari: The average for the three samples was 1.65%, with a range from 0.7% to 2.38%. The Chico-San sample had the lowest reading. All of the samples are quite a bit above Fukushima’s data for alcohol in tamari; it is also unclear what his data is based on. Chico-San’s brewer Mizoguchi gave 1.0% as the maximum upper limit, based on a conversation with a Japanese laboratory analyst who handles soy sauce analyses regularly. The Chico-San tamari was quite a bit below the level, with a reading of 0.71%. Sample E was extremely high (2.38%), while sample F was quite high (1.87%), almost double the level given by Mizoguchi. The low level for Chico-San’s tamari would appear acceptable, considering Fukushima’s statement that in tamari ‘alcoholic fermentation does not occur substantially, because of its sugar shortage and the inhibiting effects due to high nitrogen contents.’ This statement also helps support the low glycerin level (0.56%) in the Chico-San tamari, and casts doubt on the authenticity of the wheat-free claims of Samples E & F. Taking into consideration the presence of the levulinic acid in Samples E & F, and their low amino nitrogen/total nitrogen ratios, this would seem plausible.

“Summary: In the analyses Chico-San Soy Sauce showed the highest ratings in the qualitative tests (glycerin and nitrogen ratio), a complete absence of synthetics and additives, and an apparently normal range for ethyl alcohol. The Chico-San Tamari came out quite strong as well, with a high nitrogen ratio, no presence of synthetics, and a low ethyl alcohol level. The other brands did not generally fare well: all three soy sauces had mediocre glycerin levels, and markedly lower nitrogen ratios (though within an acceptable range). Two of the three showed a presence of levulinic acid, an artificial substance that is created during the acid hydrolysis of defatted soybeans or through the use of caramel coloring. One of these two also had an abnormally high alcohol ester level, suggesting the presence of grain alcohol as a preservative.

“Similarly, the two other brands of tamari had markedly lower nitrogen ratios, and both showed the presence of levulinic acid, indicating the probable use of acid-hydrolyzed defatted soybeans, caramel coloring, or monosodium glutamate. The two also had unusually high levels of ethyl alcohol suggesting the use of grain alcohol as a preservative. Additionally both other brands had higher levels of glycerin. When the higher levels of glycerin are considered with their much higher levels of ethyl alcohol esters, along with the presence of levulinic acid, it is reasonable to wonder if brewers might be using wheat to improve the otherwise mediocre aroma of tamari.

“It is clear that two of the three soy sauce samples and both of the other tamari samples are not only inferior qualitatively, but are not produced naturally, or without wheat, thereby contradicting their labels.

A photo shows a bottle of “Chico-San Lima Yamaki Brand Organic Soy Sauce formerly called tamari.” Product of Japan. 150 ml.

Note: This seems more like an advertisement or advertorial for Chico-San than an article. Address: Operations director, Chico-San Inc., Chico, California.

1384. *Soyfoods*. 1983. Soy marketing: Promotions [Hinode tofu, New England Soy Dairy, Ice Bean sandwich, Bread & Circus, Tree of Life]. Summer. p. 48-51.

• **Summary:** Soy Dairy discontinued selling its Herb Garden and Spice Garden Tofu in boxes, switched to redesigned, less expensive, standard tofu tubs.

“Ice Bean Sandwich: In May Farm Foods released a newly redesigned Ice Bean container, a new vanilla flavor (sweetened with fructose), and an exciting Ice Bean Sandwich (vanilla Ice Bean layered between carob-coated wafers). The new products were unveiled at the May ECHO show in Atlantic City and the NNFA show in Denver [Colorado] in July.

“Farm Foods also operates a monthly press release service, adds marketing co-director Beth Lloyd, in which product information releases are mailed to 125 trade journals

and distributors, and, every couple of months, publishable short articles, with recipes (Southern Soy Breakfasts, Low Calorie Coolers for Hot Summer Days) are sent to 100 newspaper food editors. In terms of the article publications and favorable notices, this twofold program has been 'very effective,' states Beth Lloyd.

Farm Foods predicts that sales of Ice Bean will jump 50% in 1982, and will top \$1 million by the year's end. Farm Foods recently established a Los Angeles warehouse to handle its 14 West Coast distributors. Farm Foods also recently landed the Alpha Beta supermarket account; Ice Bean is now sold in 15 of the chain's leading Northern California outlets in their natural foods centers. In February 1983, Ice Bean moved into 40 Raley's Supermarkets in the Sacramento area. And Ice Bean is sold at 500 General Nutrition Centers (about half of all outlets) nationwide.

1385. *Soyfoods*. 1983. Our first designed-for-America soymilk [Edensoy]. Summer. p. 6.

• **Summary:** "Eden Foods, the 15 year old natural foods manufacturer and distributor in Clinton, Michigan, has introduced America's first soymilk designed for American tastes, thereby filling a major product gap in the soyfoods market. Edensoy is a Japanese-made, aseptically-packaged, long life, rich, creamy soymilk and represents a year of careful research, testing, and FDA consultation, according to President Mike Potter. Eden Foods imported their, first 300,000 units of 6 ounce packages in June and brought 15,000 to Denver to debut at the National Nutritional Foods convention.

"Edensoy comes in two flavors including plain (89.9% water, 3.4% protein, 3.0% fat, 5.1% carbohydrates, 40 calories/100 g) made from soybeans, kombu seaweed, and pearl barley, and carob (89.1% water, 1.9% protein, 1.5% fat, 7.0% carbohydrates, 48 calories/100 g) and is made from soybeans, pearl barley, barley malt, carob, kombu. Edensoy (subtitled 'Cup of Health' on the package) has a full fat, thick taste, is free of any grassy or beany quality, is not chalky, is not unpleasantly or noticeably sweet—in short it lacks all of the customary shortcomings of soymilk for Americans—and is well-positioned in taste and packaging for both the natural foods and mainstream markets.

"Eden Foods has approached the marketing of a national soymilk correctly by recognizing it cannot be done on a local cottage level but requires sophistication in machinery, a long shelf life, snappy packaging, and sustained promotions and advertising.

"Initially Eden Foods had planned to use the common Tetra-Pak style cartons now customary with fruit juices and some milks in the U.S., but the FDA balked at the allegedly inferior Japanese machinery and packaging materials employed in Japan. Eden therefore decided to use a 5-layer retortable pouch, similar to the now popular CapriSun(TM) imitation fruit drink package. Eden's free-

standing nearly conical container (5.5" tall, 2.8" wide) has an exterior layer of polyethylene terephthalate film, next to a nylon and aluminum foil layer; the aluminum layer is a functional barrier between the outside films and the internal food contact layer which is a nonleaching, polyolefin film. All layers comply with current FDA standards. To open the package, the consumer tears the top corner of the package.

"The 14 step process involved in producing Edensoy involves about two dozen machines in a completely self-contained, clean-in-place operation. The process flow, according to Mike Potter, proceeds as follows: (1) whole cleaned soybeans are passed through a cyclone chamber to remove loose skins; (2) they are mechanically crushed (slightly) to loosen hulls; (3) they are steamed at 266°F at 57 psi for 30 seconds using continuously-injected steam; (4) the beans are ground with hot water; (5) then pumped into a colloid mill where the particle size is further reduced; (6) followed by centrifugation to remove fiber leaving 11.5% solids; (7) the milk is decanted in a receiving tank; (8) then de-aerated in a vacuum; (9) the ingredients are added in a seasoning tank; (10) then the soymilk is homogenized at 112-140°F; (11) followed by pasteurization with steam at 266-275°F; (12) the milk is returned to a high pressure homogenizer for mixing at 194°F at 220 psi; (13) then to a plate cooler for chilling to 35°F and storage in aseptic tanks; (14) finally the packaged soymilk is retorted with steam at 248°F (internal product temperature) for 30 minutes. The finished soymilk is shelf stable without refrigeration for 6 months.

"The Eden Food's distribution network is ready and waiting to move Edensoy into all 50 states this year, while the package is intended to create a 'tidal wave of interest,' states Mike Potter. The company is commended for their thorough homework and careful preparation in launching their soymilk and in their efforts to pioneer a new generation of designed-for-American soymilks."

Photos show 3 packages (front and back) of each the two flavors.

1386. *Soyfoods*. 1983. The Miami soyfoods scene [Heartsong Tofu, Sunshine Soy, Swan Foods, Swan Gardens, Unicorn Village, Oak Feed Store]. Summer. p. 38-39, 43.

• **Summary:** In Miami, three major tofu companies make about 25,000 pounds a week of vacuum packed tofu, prepared tofu products, and tempeh.

Brightsong Tofu: Bob and Toni Heartsong began making tofu in "1976 in a south Miami cottage style tofu shop which lasted until 1978. Making 900 pounds of hand-made tofu every week, the Heartsongs pioneered the Miami market, fully one year before the legendary and short-lived Swan Foods was opened in 1977. In January 1978 the Heartsongs moved to Redwood Valley, California, to help launch Brightsong Tofu. Meanwhile in 1977 they had written and Banyan Books had published, *The Heartsong Tofu*

Cookbook, one of the first designed-for-tofu cooking guides. Bob Heartsong then worked in Hawaii for Mrs. Cheng's Soybean Products where he made 600 pounds of tofu daily."

Finally, the Heartsongs, peripatetic tofumakers, returned to Miami and in January 1982 opened Heartsong Tofu, a "1,200 square foot plant where today they produce 4,500 pounds of vacuum packed tofu each week (with an 18-day shelf life)." The company employs 6 full-time and 2 part-time workers. A list of their tofu products and equipment is given. The Grand Union supermarket chain sells \$2,200/week of their tofu products.

"Sunshine Soy, owned and managed by Danny Paolucci, occupies 2,500 square feet, in suburban Coral Gables, of what once was a Borden's walk-in cooler... Paolucci opened Sunshine in June 1980, a company which today produces 4,000 pounds of tofu and various secondary products every week.

"Previously Paolucci served as production manager for Swan Foods until its closing in December 1978. [Note: Swan Foods opened in 1977.] Paolucci often measures his Sunshine Soy's sensible survival against Swan Foods exciting but disastrous history. Swan Foods was, unfortunately, a textbook example of uncontrolled growth marked by nonmanagement: no competition, distribution by the formidable Tree of Life, a wildly innovative product line, a quadrupling of sales in the first 18 months, \$2,200 in weekly sales—ending in a disheartening crash. Their product line included baked, marinated, regular, and caraway tofus, soymilk (1,000 quarts weekly), tofu cashew pie, tofu dips and salads, soy yogurts, and soymilk shakes.

"Sunshine Soy, which employs four workers, has a privately labelled vacuum packed tofu (Golden Harvest brand) in most of Florida's 100 General Nutrition Centers; Tree of Life, out of St. Augustine, handles the distribution."

Swan Gardens: "Commanding the top tofu market position in Miami, Jocelyn and Richard McIntyre's Swan Gardens, which moved to south Florida in 1979 from Montana, produces 15,000 pounds each week of vacuum packed tofu. Their 10,000 square foot plant uses only 3 production workers, each working 10 hour days, 5 days weekly—a model of streamlining. In March 1982 Swan introduced their boxed tofu (see New Products, this issue) featuring their firm (16.6% protein) tofu which sells for \$1.19 a pound in produce at Winn Dixie. A major Florida distributor moves an estimated 5,000 pounds of their dealer brand every week as far north as Washington, DC. Recently Swan introduced an okara tempeh with a two week refrigerated shelf life, and this product joins their Spicy Soysage and Baked Tofu, also vacuum packed. Swan Gardens tofu is pre-dated 4 weeks for the supermarkets but McIntyre claims it remains microbially sound for 6 weeks. The company is comfortably profitable."

Photos show: (1-2) Bob Heartsong, with tofu pressing in stainless steel forming boxes, and a close-up of his line of

products. (3-4) Danny Paolucci and a close-up of his line of products. (5) A close-up of Swan Gardens' products.

"On the retail natural foods level, four major stores share the bulk of Miami soyfoods sales. The Unicorn Village in North Miami Beach is stocked with 25 soy products... The Unicorn itself prepares a Tofu Cottage Salad, Eggless Egg Tofu Salad, Baked Tofu, and Tofu Onion Dip in their restaurant for retail sale in their adjoining store." Also discusses: The Oak Feed Store, a macrobiotic retailer in Coconut Grove (carries 44 soy products). Sundance Natural Foods in downtown Miami (many tofu-based deli items prepared in their kitchen). Nature's Touch in Miami.

1387. *Soyfoods*. 1983. The soyfoods industry on display [at Natural Foods Merchandiser Expo in Anaheim, California and Whole Life Times Expo in San Francisco]. Summer. p. 7.

• **Summary:** Sixteen soyfoods companies exhibited at Anaheim to 7,600 paying visitors. "Six soyfoods companies shared an official Soyfoods Association booth, where they retailed their own products and provided liberal tasting samples as well. Participants included Legume Inc. (tofu pizza, tofu lasagna), Farm Foods (Ice Bean, in cones), Quong Hop (tofu burgers, tofu canolli, soymilk), Sonoma Specialty Foods (tofu salads, tofu cheesecakes), Laughing Moon (vegetable tofu turnovers), and San-Jirushi International (samples of San-J Real Tamari). The Association booth, one of 10 food catering booths at the Expo, was 'packed solid through the whole show,' reports Farm Foods' Robert Tepper."

"William Shurtleff gave a one hour speech and slide presentation on soyfoods to an enthusiastic audience."

Other interesting companies include: Pacific Tempeh, Light Foods, Essential Foods, Garden of Eatin', Living Lightly, Kibun, Westbrae Natural Foods, Edward & Sons, Cedarlane Foods, Morinaga, Worthington Foods.

Interesting products: Light Links tofu "hotdogs," Ravioli, Tofumale Tamale, Tempehroni Pizza, Chili Con Tempeh, Tempeh Enchilada.

Photos (without captions) show: (1) Danielle Lin of Laughing Moon. (2) Steve Snyder of Hinode. (3) The Morinaga booth, with Mr. Seishiro Ikegami.

1388. **Product Name:** Westbrae Natural Instant Miso Soup [Shiro (White), or Aka (Red) Flavor Broth].

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983 June.

Ingredients: Powdered miso (rice, soybeans, sea salt), wakame seaweed, fu (wheat gluten), dried green onion.

Wt/Vol., Packaging, Price: 1.4 oz foil pouches containing 4 individual packets. Each packet makes 8 oz of soup.

How Stored: Shelf stable.

Nutrition: Per 10 gm.: Calories 35, protein 3 gm, carbohydrate 4 gm, fat 1 gm.

New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 53. Labels. 1983. 5 by 7 inches. Plastic pouch. Green, white, purple, red, black. Picture of cup of soup surrounded by vegetables. Back of package: “Deliciously natural. 35 Calories per serving. Conveniently packaged. Easy to cook. Sauces, dips, dressings...” Inside foil packets are 3 by 4 inches. Shiro: Purple and black on white with instructions on back. Aka: Red and black on white with instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. A display caddy holds 12 pouches. Poster. 1984. March. Letter from Gordon Bennett. 1987. Oct. Gives date of introduction as 1983. Currently 5 varieties.

1389. Fargo, Charlyn. 1983. Soy-food firm takes aim at diverse markets. *Crain's Chicago Business*. July 17. p. 3, 43.
 • **Summary:** About: Spectrum Foods, Global Foods, Royal American Co., and Carl Hastings. “When floods hit Houston [Texas] and New Orleans [Louisiana] this spring, Global Foods [of Decatur] came to the rescue. Through the American Red Cross, the company supplied tasty, low-cost meals to the flood victims, including chili, beef stroganoff, Mexican dinners and a sweet-and-sour Oriental dish... Soybeans are the basic ingredient in all the company’s instant entrees.

“Global is one of three companies run by local entrepreneur Carl Hastings under the corporate umbrella Spectrum Foods. Each division aims at a different market: Global is targeting charitable organizations; Royal American Co. sells directly to consumers, and the brand-new Continental Food Assn. plans to cultivate the institutional (nursing homes and penal institutions) and export markets, particularly Saudi Arabia and Greece.

“The dynamic Mr. Hastings—who earned a doctorate in food science from the University of Illinois—has built Spectrum into a profitable, \$11-million retail sales empire since leaving A.E. Staley Manufacturing Co. in February 1982. He started Spectrum with \$1 million in capital provided by 25 investors. The company, which has 125 employees, uses a direct selling method similar to that of Amway Corp. Distributors—25,000 in the 50 states, Puerto Rico and Guam—invite prospects into their homes for tasting parties. A.E. Staley supplies the company with raw soy-protein concentrate, and Spectrum handles production of the meals...

“Though ADM isn’t involved in direct sales of soy-food products, it does sell soy-protein concentrate to an East Coast retailer, General Nutrition Corp. Mr. Hastings hopes to double revenues during the second year of operation... Sales to vegetarians and health-conscious consumers look promising. But real growth is expected from the institutional

market and the new international division.”

1390. Snyder, Steve. 1983. Mr. Yamauchi and Hinode’s interest in and involvement with soymilk (Interview). *SoyaScan Notes*. July 30. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Steve called me to ask various questions. Then Shurtleff asked him if Hinode was still planning to make and market soymilk. He said “no.” Shurtleff asked why?

1. The main reason was that it was getting too expensive to put together the whole project. Initially it was estimated to cost \$500,000. Now it looked like \$4.5 million.

2. The market: Steve did a lot of market research. It looked promising in that he could get a lot of distribution but not so promising for repeat purchases. He talked to a great many people and felt it would require spending a lot of money to convince people to buy the product again.

3. Placement of product in stores: This is the key point. Do you position soymilk as a children’s juice, in the dairy section, in self standing end cases, in the adult section, with nutrition section, in the produce section with tofu?

4. The name is also a big problem. He tried to trademark “Tonyu”—the Japanese name for soymilk—but failed.

So finally they gave up, even though Marusan was actively pursuing a joint venture and wanted to invest and provide technical assistance. I think he said that Shoan had even ordered two Tetra Brik machines.

Steve is now working on development of a Tofu Parfait. Tofu is a big plus in the product. He has orders for 70,000 cases the first 6 weeks.

Steve says Shurtleff must visit Ms. Gooch’s in Los Angeles. Super natural foods supermarket.

Steve thought the SANA [Soycrafters Association of North America] meeting was very positive. He was delighted that Jack Mizono [of Azumaya] was elected vice president. and that Tom Timmins [of New England Soy Dairy] is on the standards committee.

Steve is planning to do a program for 100 or more nutritionists and foodservice people on tofu; Thelma Dalman will speak. He will give away a packet of info, including a free copy of our books. Address: Marketing, Hinode, Los Angeles, California. Phone: 544-2781.

1391. Bialick, Barbara. 1983. A century of natural foods: From Battle Creek to Berkeley. *Whole Life Times* No. 28. July.

• **Summary:** This 5-page article gives a good overview of the natural foods movement, which began in the mid-1800s, at about the same time as the industrial revolution and the growth of cities (urbanization). In 1826 some 83% of U.S. citizens made their living from farming; by the 1850s, fewer than 50% did so. Farming and food production were becoming mechanized. Social reformers began to advocate the abolition of slavery and vivisection, expansion of the

rights of women, food and dress reform, etc. Rev. Sylvester Graham, a Presbyterian minister, was “one of a group of idealists who in 1850 founded the American Vegetarian Society in New York, rallying around Dr. William A. Alcott’s historic words ‘A vegetable diet lies at the basis of all reform.’” In 1866 Ellen G. White founded the Western Health Reform Institute in Battle Creek, Michigan. Also discusses the work of John Harvey Kellogg, W.K. Kellogg, Henry D. Perky (an Ohio farm boy who invented Shredded Wheat in 1893), C.W. Post (Grape Nuts, Postum grain coffee), etc. “In 1925 the Postum Company combined with the Jell-O Company in the first of a series of mergers that eventually created today’s huge General Foods Corporation, the first company originating from the health movement to shift to a strictly commercial purpose.”

1392. Chico-San, Inc. 1983. America’s first macrobiotic food company: What do we mean by first? (Ad). *East West Journal*. July. p. 13. Also in *Whole Foods*, July 1983.

• **Summary:** “Chico-San was the first food company in America founded on macrobiotic principles. We were the very first company to import pure, natural foods from Japan, made in the traditional manner without chemicals or fractionated ingredients. We were the first to make Rice Cakes in America, and the first to convince farmers in California to organically grow brown rice.

“We have always been first with quality, both with our domestic products, and imports from Japan. We are the first and only company to import macrobiotic foods from the Ohsawa Japan Company, Japan’s most respected supplier of natural foods. Their history goes back eighty years, to George Ohsawa’s first efforts to encourage Japanese farmers, food producers and people to stick to or return to the natural way. Our founders were the first students of George and Lima Ohsawa in America, and understood that one of the first precepts of macrobiotic is the quality of balance. That is why our first and continuing emphasis is on quality and balance. Although other companies have come and gone with similar products, none have had the consistent quality of Chico-San’s. We are healthy, independent, and are expanding our line of macrobiotic products from Japan that appeal not only to macrobiotic shoppers, but to all others interested in pure, natural foods.

“Along with the addition of new product offerings for both our domestic and imported products, we have designed completely new labeling. Our Organic Rice Cakes have a colorful, informative and attractive new printed bag, with additional data and labeling on sodium content. They are available in Low Sodium and Sodium Free varieties, with eight flavors, including our new Rice Only variety.

“Our macrobiotic import labels contain several important, informative features. In addition to tasty recipes and detailed information on the ingredients and processing methods, we tell how to use one’s senses to judge the quality

of that particular type of product. For example, how does one tell a truly fine soy sauce from a mediocre or inferior one? This information is also available on our attractive sales sheet, free upon request.

“Many of our products are made from organically grown ingredients, and bear the statement ‘Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.’ In addition to our eight flavors of Rice Cakes from Organically Grown Rice, we have organic Miso, Soy Sauce, Salt Plums, Soba and Udon Noodles, Kuzu, Vinegar, Pickles, and two varieties of Twig Tea. There has been much concern expressed by teachers of macrobiotics in Japan and America for the general poor quality of Japanese food exported to the American health food market. For this reason, we have added a statement on our Japan imports that goes like this: ‘This Chico-San product is the only one of its kind available in America which is used in the kitchen and cooking classes of Mrs. Lima Ohsawa, world’s foremost authority on Japanese natural foods cookery, and author of the definitive ‘Macrobiotic cookbook.’ Mrs. Ohsawa’s taste is impeccable. and her life has been dedicated to the teaching of the Macrobiotic philosophy.

“You will also notice the logo of the Ohsawa Japan company on our packages, and the statement: ‘Chico-San and Ohsawa Japan: Guided By A Philosophy For Life.’ Our two companies are now forming a joint venture along with the Yamaki Miso Shoyu company to more efficiently handle imports to our respective countries. We will also be co-operating on the production of miso and soy sauce in America, assisted by Mr. Kitani, of the highly respected Yamaki Company. In all of our efforts, we remain committed to the strict guidelines of the macrobiotic philosophy concerning quality. We believe that this is the best way for us to express our gratitude for our existence and success.”

“We invite you to share it with us.”

To the right of this text, Chico-San Inc. describes itself as “A company built on a philosophy.” Address: P.O. Box 810, Chico, California 95927.

1393. **Product Name:** Edensoy (Soymilk) [Plain, or Carob].

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan by Marusan-Ai Co., Ltd.

Manufacturer’s Address: 701 Tecumseh, Clinton, MI 49236.

Date of Introduction: 1983 July.

Ingredients: Plain: Water, soybeans, kombu seaweed, pearl barley. Carob: Water, soybeans, pearl barley, barley malt, carob, kombu.

Wt/Vol., Packaging, Price: 6 fluid oz (180 ml) free-standing retort pouch.

How Stored: Shelf stable.

Nutrition: Plain: 89.9% water, 1.9% protein, 1.5% fat, 7% carbohydrates, 48 calories/100 gm.

New Product–Documentation: Labels. 1983. 3.25 by 6 inches. Plastic. Carob: Brown, and yellow on silver package. Plain: Navy and light blue on silver. “Natural soy beverage. No cholesterol. Easy to digest. Made from whole soybeans. Edensoy has been known in the East since the earliest times as more than a drink, but a food. It may be served hot or cold and is suitable for a variety of diets and recipes.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. “Cup of Health.”

The use of kombu as an ingredient offers at least three benefits: (1) Natural thickener. (2) Adds salt without having to list salt on the label. (3) Adds various minerals.

Article in *Soyfoods*. 1983. Summer. p. 6. “Eden Foods imported the first 300,000 units of 6-ounce packages in June 1983 from Japan.” The product was officially launched in July at a trade show.

Shurtleff & Aoyagi. 1984. *Soymilk Industry & Market*. p. 45-46.

East West Journal. 1984. June. p. 68. “Taking the moo out of milk.” Shows a black-and-white photo of Edensoy plain and carob flavors in stand-up retort pouches. The package is made of a 5-layer coated aluminum foil film. The inside layer is a cellulose-based biodegradable film. The outermost layer is a gas-resistant plastic which ensures a 1-year unrefrigerated shelf-life for the product.

Dairy Record. 1985. Sept. p. 86. Cranberry Edensoy added in May 1985. Shurtleff & Aoyagi. 1986. *Soymilk Industry and Market, Update*. By March 1986 Edensoy was selling very well, at the rate of about 600,000 units (28,125 gallons) per month. But sales have not increased much recently.

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. At the time this product was introduced, the exchange rate with Japan was good, and Eden’s imported Japanese foods, including soyfoods, entered a period of rapid growth. Erehon had just gone out of business, and macrobiotics was very popular. Macrobiotic foods peaked during the years 1984-1986 in part because there were not many other quality [certified organic] prepared natural foods, nor were there many major companies in the natural foods industry (Westbrae, Arrowhead Mills, Eden, etc.). Since then, many good-quality prepared natural foods have become available, and many are easier to relate to and more convenient.

1394. Shulman, Martha Rose. 1983. The health food industry. *Cosmopolitan*. July. p. 240-45.

• **Summary:** “These days, as interest in nutrition burgeons, health food is no longer the fringe fad it once was. Jane Fonda, Barbra Streisand, Sidney Poitier, Jerry Brown, Carol Channing, and Erica Jong are all avid fans of nutritious cuisine... and did you know Doris Day, Cheryl Tiegs, and Bill Walton have a distinct weakness for tofu? Sales of health food, now \$2.4 billion a year, have *tripled* in the last

decade. There are more than eight thousand natural-foods stores in the United States—over thirteen hundred in Los Angeles County alone—and over eighteen million people shop in them. Increasingly, too, the funky natural-foods shops of the late sixties and early seventies are becoming sophisticated supermarkets. Health-food chains are—excuse the expression—sprouting up nationwide. The largest, General Nutrition Centers, has about eleven hundred stores.”

1395. Belleme, John. 1983. Re: Problems at American Miso Co. Progress on white miso. Letter to William Shurtleff at Soyfoods Center, Aug. 30. 1 p. Typed, with signature on letterhead.

• **Summary:** After a year of confusion and misunderstanding, the problems at American Miso Co. may be nearing a final resolution. About three months ago, John hired a lawyer. A draft of the final contract between him and the majority shareholder has been passed back and forth recently. He hopes it will be signed in the near future.

John has learned a great deal about white miso through constant experimentation—and very little from Japanese correspondence. He now understands the basic process for making unrefrigerated white miso. At present, Great Eastern Sun, the miso company’s sole distributor, is selling about 50,000 pounds of white miso annually. It does very well unrefrigerated, but needs to be refrigerated for long-term storage. Address: Route 3, Box 541, Rutherfordton, North Carolina. Phone: (704) 287-2940.

1396. Mountain Ark Trading Company. 1983. Catalog—Summer 1983 [Mail order]. 120 South East St., Fayetteville, AR 72701. 30 p. 27 cm.

• **Summary:** This is a mail order catalog for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. The owners of the company are Frank & Phyllis Head, Tom & Toby Monte, Bill & Carol Tims, and Joel & Wendy Wollner.

Concerning seitan and *fu*, we read: “Seitan (wheat gluten)—100% Wheat Protein (“gluten” is the name for wheat protein). (1) Mountain Ark’s seitan—savory wheat gluten cutlets, freshly cooked in small batches; made from Deaf Smith’s organic whole-wheat flour [Arrowhead Mills] and Ozark mountain water; seasoned with tamari, kombu, and ginger. Shipped frozen; customer assumes risk of spoilage April 1 through November 30. 8 oz or 16 oz tub. Price: \$4.75, not including postage. (2) Spicy seitan—as above with cayenne pepper and garlic added for zest, though not overly spicy. 8 oz or 16 oz tub. (3) Seitan condiment—juicy, chewy chunks of very concentrated wheat gluten cooked in Johsen Shoyu; not perishable. 6.35 oz. jar. Price: \$2.95, not including shipping.

Dried wheat gluten cakes (*Fu*)—use like pasta. Sifted wheat gluten jumbo rings (*Kuruma Fu*), Sifted wheat gluten sheets (*Shonai Fu*), Sifted wheat gluten rings (*Zeni Fu*),

Whole wheat gluten rings (*Zenryu Fu*).

Talk with Joel Wollner. 1992. July 13. The first two types of seitan were made in Fayetteville by Hans Decoz, from the Netherlands.

Soyfoods Center also owns a Mountain Ark catalog dated Autumn 1983. 36 p. The company now has a toll-free number: 1-800-643-8909. Address: Fayetteville, Arkansas. Phone: 501-442-7191.

1397. Leviton, Richard. 1983. Report on soyfoods research trip across America, September 1983. Colrain, Massachusetts. 8 p. Unpublished typescript.

• **Summary:** Visited or discusses: Grainaissance (makes amazake and mochi), Brightsong (Dik / Richard Rose), Sonoma Specialty Foods (California), Northern Soy (Rochester, New York), Southwest Soyfoods (Richard Jennings), White Wave (Steve Demos, Boulder, Colorado), Quong Hop & Co. (South San Francisco, California), Modern Fare (Loveland, Ohio), Soyfoods Unlimited (Valerie, Gary and John Robertson, San Leandro, California), Soyfoods Center (Lafayette, California), Soyfoods of America (Doug Fiske and Ken Lee, Los Angeles), Real Foods (Polk St., San Francisco), Tumaros (Los Angeles), Unicorn (Terry Dalton, Florida), Japantown and Rainbow Grocery (San Francisco), Berkeley Natural Grocer and Berkeley Co-op (Bob Gerner, California), Hinode Tofu Co., Edensoy, Farm Foods, New England Soy Dairy, and Nasoya (Leominster, Massachusetts). Legume (Gary & Chandri Barat, New York City), Lotos / Lotus Cafe (Greg Weaver, Rochester, New York).

NRRL (Hesseltine and Wang, Peoria, Illinois): Their work is in mixed starter culture fermentation, vitamin B-12 work. Japanese man from Tokyo to work one year on natto at NRRL, paid by Japanese government. B-12 can withstand some heat during cooking and the percentage of B-12 lost depends on the initial percentage present. Natto research: examine all Japanese publications for review article. Experiment using U.S. soybeans to make natto since the Japanese buy Chinese beans for their thinner seed coat. See what happens to the oil to protein ratio during fermentation. Natto as such has no possibilities in the U.S. as it is a slimy food with a rotten smell; hard to tolerate. There might be vitamin B-12 in natto produced by *Bacillus subtilis*. Koreans have done lots of B-12 research with kimchee and other pickled vegetables. Earl Swain died this summer of a heart attack at age 36. Natto research will help U.S. soybean exports. USDA bureaucrats are making it difficult for Dr. Hesseltine to do natto research. They have 65 objectives, but Dr. Wang's projects don't fit any of them clearly, so they won't mention "food" in their research outlines, just fermentation methods. Secretary of Agriculture John Block [served 1981-86 under President Ronald Regan] says the U.S. needs more ag exports and more basic information about crops uses, so he is in support of this natto research.

Out of business: Michiana Soyfoods, St. Ignatius shop, Sunshine Soy, Heartson, probably Joy of Soy and a Korean shop in Salt Lake City, Utah.

Concerning soymilk: 10. In Oak Park, Illinois, a natural foods retailer says Edensoy outsells San-J by two to one. (Note: San-J imports "To-Neu Natural Soy Beverage" made in Japan by Kibun). Teenagers buy the carob Edensoy along with popcorn in the store, and use it as a soft drink. But most retailers say the Eden package [stand-up foil retort pouch] is a disaster; it is impossible to open without scissors, then if you squeeze, it sometimes spills out. San-J [in a Tetra Brik carton] is convenient but the taste is poor and the front graphics are confusing—too many words and images. According to Shurtleff, both are inferior products compared to Japan's best.

22. Concerning Edensoy at the NNFA show in Denver, Colorado: Mike Potter says "it went over great." He sold two container loads right away. People liked the package and the taste. About 4,000 people sampled it and were "generally amazed." The results were as good as they could want; it generated interest and excitement. Now they are setting up the distribution system. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1398. Shurtleff, William. 1983. Notes from a phone talk with Richard Leviton concerning his trip across the USA in Sept. 1983 visiting soyfoods companies and giving talks (Interview). *SoyaScan Notes*. Sept. 3 p. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Discusses: Nasoya, New England Soy Dairy (doing radio ads and videos in supers; making 45,000 lb/week of tofu), Hinode tofu, Lotus Cafe, Penguin's (chocolate is their favorite soy ice cream favorite), Northern Soy and Wegman's, Vegetarian Times, Emperor of Japan to give Dr. Clifford Hesseltine a high medal at the end of November, Bob Davis plans to move to Nevada City (California), Kraft bought 15 Okita packaging machines. Richard Jennings, his marriage, Southwest Soyfoods, and chilled water as an alternative to pasteurization; his shop in Ecuador is now closed. Nasoya makes 22,000 lb/week of tofu with no outside money. David Mintz was on Good Morning America talking about Tofutti. The Farm (Summertown, Tennessee) now makes only liquid soymilk, no powder. Tom Leonard and Jim Hemminger are selling tofu to Community Mercantile. Leonard was in Arkansas in 1977, first batch of miso in Dec. 1978. Now makes 500 lb/week. Well Spring is a new miso maker in Colorado. White Wave (Boulder, Colorado) is making 12,000 lb/week of tofu and doing well financially, has new frozen entrees & nut butters, tofu lasagne. Edensoy is outselling SanJ soymilk by 2 to 1. Time magazine Sept. 19 insert. American Dietetic Assoc. will list tofu as a good protein source. Jim Cooley of Lawrence, Kansas. He started making tofu in 1977. Legume Inc.'s new product line out Oct. 5; lists names of each

product. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

1399. Shurtleff, William; Aoyagi, Akiko. 1983. Appendix A: A history of miso and soybean chiang [jiang] (Document part). In: W. Shurtleff and A. Aoyagi. 1976. *The Book of Miso*. Hayama-shi, Kanagawa-ken, Japan, Soquel, California, and Brookline, Massachusetts: Autumn Press. 278 p. See p. 214-41. Illust. by Akiko Aoyagi. [223 ref]
 • **Summary:** Contents: Introduction: Etymology. Soybean chiang in China: Early Chinese non-soybean chiang, 600-1899. Soybean chiang in Korea and Southeast Asia: Dissemination of chiang from China, Korea, Indonesia, Vietnam, other Southeast Asia.

History of miso in Japan: Introduction, early non-soybean hishios (before AD 700), the Nara period (AD 710-784), the Heian period (AD 794-1160), the Kamakura period (1185-1333). The Muromachi period (1336-1568), the Edo or Tokugawa period (1603-1867). A brief overview of origins. the Meiji and pre-war periods (1867-1939), World War II and the postwar period: Modern times (1940-1983).

History of miso in Europe: Early European references, 1900-1949, 1950-1982.

History of miso in the United States and Canada: Early developments (1896-1929), 1930-1959, growth of interest in miso (1960-1982; Shibasaki and Hesseltine at the NRRC, Peoria, Illinois, Ichiro Ouchi, the macrobiotic movement, Herman Aihara, George Ohsawa, Miso and Aveline Kushi in Boston, Massachusetts, Noboru Muramoto, George Gearhart, Thom Leonard, Allen Ginsburg and Gary Snyder, Mt. Tamalpias, Tassajara Zen Mountain Center, Miyako Oriental Foods, Kanemasa Miso Co., Ohio Miso Co., Shin-Mei-Do, American Miso Inc., South River Miso Co., Joel Dee and Miso-Cup), miso's future in the West.

Miso in other countries: Israel, India, Latin America (Brazil, Mexico), Africa.

Illustrations: Evolution of Chinese characters. Hideyoshi Toyotomi and a robber on the bridge (Hatcho miso history, p. 219). Making miso-damari (p. 220). Graph of the miso market in Japan (1880-1980) (p. 226). Ohio Miso letterhead and logo (p. 238). U.S. miso imports, production and consumption (1970-1983) (p. 240). Page 219: "The origins of modern shoyu can be traced more clearly to the mid 1200s when the Japanese priest Kakushin returned from China, having learned there the technique for preparing Kinzanji miso. Establishing himself at Kokoku-ji temple near the town of Yuasa..." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

1400. Potter, Michael. 1983. Edensoy and Eden Foods (Interview). *SoyaScan Notes*. Oct. 3. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Eden Foods has already sold 3 containers of Edensoy, imported from Japan. Each container holds 61,800

foil packs. People taste the carob first and they like it. But in both Australia and the UK, they switched to plain, making it the most popular there.

The Eden Foods warehouse was burned by arsonists outside the company. The principals took a lie detector test and passed with flying colors, then the insurance company refused to pay; so they had to settle out of court. Address: CEO, Eden Foods, Clinton, Michigan. Phone: 544-2781.

1401. Brody, Jane E. 1983. Assessing what is good for you and what is not. *New York Times*. Oct. 12. p. C1, C8.

• **Summary:** Those who eat wisely "can expect an improvement in well-being and a decreased risk of developing such diet-related disorders as heart disease, cancer, high blood pressure, and obesity." But "Myths abound in the health food industry and, experts, say, many believers are being hoodwinked."

Discusses: Sweeteners, raw foods, salty seasonings (including miso and soy sauce), granolas, snacks and candies, nuts and seeds (including peanut butter), oils (cold-pressed oils contain more vitamin E but they become rancid more quickly), "health" foods high in fat, yogurt and frozen yogurt, herbal teas, and pastas (including those enriched with soy flour).

"A tablespoon of soy sauce contains about half a teaspoon of salt. Tamari sauce is hardly less salty than ordinary soy, but Kikkoman makes a reduced-salt soy that has 47 percent less salt than regular soy. Miso, another popular health-food flavoring, contains nearly as much salt as soy sauce. Domestic soy sauce is generally much saltier than imported brands."

1402. Coates, Margery K. 1983. Affidavit. Hain Pure Food Co. vs. Roger M. Coates, et al. Circuit Court for Harford County. 5 p. Oct. 26. Legal document.

• **Summary:** Hain is suing Rod and Margy Coates for not fulfilling a contract, which Margy believes Richard Curry should have fulfilled. "In July, 1981, I sold all of my shares of stock and resigned any position I held in Laurelbrook." At that time Laurelbrook did not have any indebtedness to Hain. Margy adds (March 1992): "In the one month period from Nov. 24, 1981 to Dec. 23, 1981, Richard placed five orders with Hain in the amount of \$35,577.34. Rod and I had never wanted Hain products although they were always asking us to take them on. When Richard first came in, he persuaded us to take on Hain, and we signed an agreement with them. And so when Richard went bankrupt in Jan. (or Feb.?) 1982, we found we were still liable for that debt even though the business was no longer ours. Of course we didn't win that battle either, and Rod and I had to pay off the Hain debt." Address: Maryland.

1403. Kingaard, Jan. 1983. Spotlight on Erewhon. *Whole Foods (Berkeley, California)*. Oct. p. 18.

• **Summary:** A black-and-white photo shows Charles T. Verde (Erewhon's president and CEO) and Cynthia C. Davis (vice president of marketing). "Today's Erewhon has evolved from a cupboard in Michio Kushi's kitchen in 1966, into a \$17 million modern corporate manufacturing concern in 1981, through Chapter 11 Federal Bankruptcy reorganization in late 1981, and on to new ownership in 1982." Erewhon has three retail stores and the company now manufactures and markets a line of more than 100 natural food products including cereals, nut butters, granolas, Japanese imports, oils, and snacks.

"Erewhon defines 'natural' to mean without chemical additives or preservatives; no artificial colorings or flavorings; no refined sugar (the only sweeteners used are honey, pure maple syrup, and barley malt); and products which contain no hydrogenated oils (only cold pressed rather than chemically extracted)."

1404. Leviton, Richard. 1983. The soy deli case. *Whole Foods (Berkeley, California)*. Oct. p. 27-28.

• **Summary:** "The Hinode Tofu Company of Los Angeles recently propelled the industry years by running a series of full page, full color ads for their branded tofu in regional editions of *Good Housekeeping*, *Weight Watchers*, *Runner's World*, *Bon Appetit*, and the *Los Angeles Times* (circulation: one million). Their ad included a 15¢ discount coupon (eight million were printed in total). Edward & Sons has been advertising its Miso-Cup instant soups and Miso+Plus Chive and Jalapeno dry miso dips in national trade and consumer publications. And Farm Foods, with their expanding line of Ice Bean soy ice creams (hard packed and soft-serve) recently launched a cooperative advertising and discount program in cooperation with retailers..."

The Real Food Store on Polk Street in San Francisco has introduced what is probably the first distinctly labeled soy case. It consists of a self-standing reach-in cooler filled with about 34 different soyfood products, from bulk and packaged tofu to soymilk and tempeh burgers.

"At press time, Bread & Circus, a leading natural foods retailer in Boston, was planning a week-long soy promotion in cooperation with a half dozen Bay State producers... Elsewhere, Tree of Life, Florida's \$35 million distributor and manufacturer, designated August as Soyfoods Month and ran promotions in their 60-page monthly newsletter sent to their 2,000 accounts. Soyfoods were presented as that month's 'Super Specials' with 'deep pocket discount' for retailers, reports Morris Shriftman, vice president." Address: Colrain, Massachusetts.

1405. **Product Name:** Amazake Rice Syrup [Natural].

Manufacturer's Name: Miyako Oriental Foods, Inc.

Manufacturer's Address: 4287 Puente Ave., Baldwin Park, CA 91706. Phone: 213-626-9458.

Date of Introduction: 1983 October.

Wt/Vol., Packaging, Price: 8 oz plastic bag.

How Stored: Refrigerated or frozen.

New Product–Documentation: Economic World. 1987. June. p. 46. Says that Miyako makes Amazake Drink in Almond, Chocolate, and Strawberry flavors. Talk with Noritoshi Kanai. 1988. Jan. 26. The only company he knows that made koji in the early days was Fujimoto. Most of the koji they sold was used to make amazake at home. Many Japanese bought it and made amazake at home but he knows of no Japanese-American company that ever made amazake commercially in the USA. Miyako's amazake is made at their miso plant. They sell koji to Cedarlane Natural Foods (a distributor in nearby Glendale, California) and amazake to two local stores. They have just started freezing it for wider distribution. Sales are slow now but should pick up now that it is frozen.

Talk with Noritoshi Kanai. 1988. Feb. 8. His Mutual Trading Company began to import amazake to California from Japan in 1983. JFC (Japan Foods Corp.) and Nishimoto began to do the same at about the same time. He is not aware of any imported amazake before that time. The information from Economic World (above) is wrong. Miyako only makes one flavor, natural.

1406. Erewhon Mail Order. 1983. Erewhon. Natural foods mail order catalog. Brookline, Massachusetts. 16 p. Nov. 1. Catalog and price list.

• **Summary:** This is a new mail order catalog, whose prices are effective from 1 Nov. 1983. On the front cover is a woodblock print of two wooden barrels, a wooden tub, two sacks of corn, a sheaf of wheat, several ears of corn, and a scythe. Erewhon is located at 26 Washington St. in Brookline Village—also the home of Erewhon Mail Order. There are retail stores at 342 Newbury St. in Boston and 1731 Massachusetts Ave. in Cambridge. Products grown organically, without chemicals, are marked with the code "OG."

Contents: Whole grains & cereals (incl. Erewhon granolas). Flours. Pastas. Beans (incl. azuki beans, black soybeans from Japan, yellow soybeans from Minnesota). Seeds, nuts & dried fruit (incl. alfalfa seeds, sesame seeds, and tamari roasted nuts and seeds). Sea vegetables. Misos and tamari soy sauces. Japanese macrobiotic specialty products. Condiments, vinegars & sauces. Sea salts. Erewhon vegetable oils. Baking & home products (incl. koji rice for making amazake and miso, nigari for making tofu, tempeh starter). Sweeteners (Yinni rice syrup, barley malt, maple syrup, clover honey, wildflower honey {unfiltered}). Erewhon nut butters (Almond, cashew, peanut, sesame, sunflower). Fruit spreads. Snack foods. Sweets. Perishables (incl. bread, mochi, produce, amazake, tempeh). Beverages. Supplements. Natural cosmetics & body care. Cookware & appliances. Books & publications. Ordering & shipping information. Zone & shipping charts. Address: 236

Washington Street, Brookline, Massachusetts 02146. Phone: 1-800-222-802 or (617) 738-45168.

1407. Shurtleff, William; Aoyagi, Akiko. 1983. George Ohsawa and the macrobiotic movement: History of work with soyfoods. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 46 p. Nov. 10. 28 cm. Unpublished typescript. Available online at www.soyinfocenter.com. [92* ref]

• **Summary:** www.soyinfocenter.com/HSS/george_ohsawa_macrobiotics_soyfoods1.php

A comprehensive history of the subject. Contents: Introduction: Acknowledgement of Ron Kotzsch.

The roots of macrobiotics: *Yellow Emperor's Classic of Internal Medicine*, Shinto classics, Ekiken Kaibara (1630-1714), Nanboku Mizuno (late 1700's-early 1800's), Sagen Ishizuka (1850-1910), Manabu Nishibata.

The life of George Ohsawa (1893-1966): To Paris 1929-36, return to Japan and World War II, Internationalism 1946-53, ran school Centre Ignoramus, "world journey" 1953 to India, Africa, then Paris, started Muso Shokuhin (macrobiotic food company) in Osaka, Japan, in 1959, work in Europe 1956-66, earliest reference seen to soy (miso) in 1956, first visit to New York City Dec. 1959, post-visit institutions, second visit 1960, first American macrobiotic summer camp on Long Island, exodus to Chico, California, Aug. 1961 to escape feared nuclear war, establishment of Chico-San, move of Michio and Aveline Kushi to Boston in 1963, *Zen Cookery* 1963, *Zen Macrobiotics* second edition 1965, growth of the movement, Beth Ann Simon's death blamed on macrobiotics in 1965, response of U.S. Food and Drug Administration is to close N.Y. Ohsawa Foundation, Ohsawa's general macrobiotic teaching, view of Western civilization as one in crisis, with fundamental biological change required to improve it, death in 1966 in Tokyo at age 72 of cardiac failure, seen as sage by his followers, seen as inconsistent crackpot by his critics, work carried on by wife Lima and by his students.

Development of macrobiotics in Boston: Kushi's lectures and classes from 1965, early food sales from house, Erewhon's start in 1966 and subsequent growth, establishment of organic suppliers in the U.S., first imports from Japan 1968, 1970 natural foods boom, National Food Distributors Association, *East West Journal*, Autumn Press founded in Japan by macrobiotic student from Boston, Boston institutes, centers, and foundations from 1972 on, increasing popularity of soyfoods (tofu, tempeh, and miso) in Boston, Erewhon from 1973 to bankruptcy in 1981 and sale to Ronald Rossetti in 1982.

Development of macrobiotics in New York City: Void after departure of Aihara group and Kushis, establishment of Infinity Foods in mid-1960's, Michel Abehsera's restaurants, cookbooks, and tour.

Development of macrobiotics in California: Influence of Chico-San on natural foods movement to 1970, Lundberg

rice 1968-69, Yamazaki miso and shoyu 1970, 1972 fire in Chico-San warehouse, educational activities and institutions, growth of Chico-San, Noboru Muramoto.

Nutritional views of macrobiotic diets: General critical attitude from 1965 to 1977, not countered by macrobiotic leaders, scientific studies pro and con, specific critique of the diet, turnaround in attitude since 1977 (*Dietary Goals* published by U.S. Senate's McGovern Committee), Dr. Mendelsohn, Nathan Pritikin, cancer cures and Anthony Sattilaro (1980).

Macrobiotics in Europe and Latin America: First European company Lima N.V., other distributors, centers, publications, tours, active in South America since 1954.

A major contribution: Type of overall influence on soyfoods, number of followers in 1981. Address: Lafayette, California. Phone: 415-283-2991.

1408. Barat, Gary. 1983. Re: Soyfoods Association members invited to participate in Soyfoods Pavilion '84 at Natural Foods Expo in Anaheim, California. Letter to members of Soyfoods Association, Nov. 28. 1 p. Typed, with signature on letterhead.

• **Summary:** "I am happy to announce that the Soyfoods Pavilion '84 is rapidly taking form. We now have approximately 15 companies participating in our pavilion area at the Natural Foods Expo in Anaheim, California. In addition to the pavilion, we have commitment from approximately 20 manufacturers for ad space in the *Natural Foods Merchandiser* March issue." Address: President, Soyfoods Assoc., P.O. Box 36, New York, NY 10009. Phone: 212-254-6698.

1409. Aoyagi, Kazuko; Aoyagi, Akiko; Shurtleff, William; Bennett, Gordon. trans. and comp. 1983. Japanese standards for soy sauce ("shoyu"): English-language translation. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 14 p. Nov. [1 ref. Eng]

• **Summary:** Contents: Translators introduction: Brief history of shoyu standards in Japan and the USA. 1. Definition of fermentation methods: Basic fermented method (*honjozo hoshiki*), semifermented HVP method (*shinshiki jozo hoshiki*), semifermented HVP and acid HVP mixed method (*aminosaneki kongo hoshiki*), semifermented HVP and enzyme HVP mixed method (*koso shorieki kongo hoshiki*), semifermented HVP-acid & enzyme HVP mixed method (*aminosaneki koso shorieki kongo hoshiki*), semifermented HVP-enzyme & acid HVP mixed method (*koso shorieki aminosaneki kongo hoshiki*). 2. Definition of varieties of shoyu: Regular shoyu (*koikuchi shoyu*), light-colored shoyu (*usukuchi shoyu*), tamari (*tamari shoyu*), double-fermented shoyu (*saishikomi shoyu*), clear shoyu (*shiro shoyu*).

3. Standards for varieties of shoyu: Regular shoyu, light-colored shoyu, tamari, double-fermented shoyu, clear shoyu. 4. Analytical methods: Degree of color, total

nitrogen content, soluble solids, alcohol content, direct reducing sugar. 5. Labeling requirements: Items to be listed, particulars for each item listed, prohibited terms.

Brief history: "In 1963 the Japanese Ministry of Agriculture and Forestry (*Norinsho*), with the support of the Japanese Shoyu Association, set the first JAS (Japanese Agricultural Standards) for shoyu. The 1963 JAS shoyu standards were revised in July 1970 with *Norinsho* Notification #974. Companies choosing voluntarily to make their shoyu to these standards were allowed to print the prestigious JAS mark on their labels. These standards were revised again in 1980.

"In January 1976 in the United States the Federal Supply Service of the General Services Administration established America's first soy sauce standards for use by all federal agencies. The classified all soy sauce into two types: Type I—Soy Sauce (fermented), and Type II—Soy Sauce (non-fermented). These standards were revised on 5 May 1978 as Fed. Spec. EE-S-610G.

"In late 1983 the Japanese shoyu standards were first translated into English and work began to adapt them to American needs and conditions." Address: 1. Albany, California; 2-3. Soyfoods Center, P.O. Box 234, Lafayette, California 94549; 4. Westbrae Natural Foods, P.O. Box 8711, Emeryville, CA 94662.

1410. Chico-San, Inc. 1983. Why does Chico-San pay premium prices for products and ingredients (Ad). *Vegetarian Times*. Nov. p. 31.

• **Summary:** Chico-San describes itself as "A company built on a philosophy"—macrobiotics. "Over the past two decades many macrobiotic food companies have come and gone. We are grateful that we have been able to survive a disastrous fire that wiped out our facilities in 1972, plus a couple of severe recessions. Chico-San is now strong and independent."

"We continue to operate under the belief that it is not enough just to eat brown rice, vegetables and miso soup."

"Some of you may have already seen the first issue of our free newsletter, *The Crackerbarrel*, which featured articles on subjects ranging from organic miso and soy sauce,... Also included is a message from Lima Ohsawa, and information on processing low-sodium soy sauce (and why it may not be very desirable),..."

The signature of J. Robert Kennedy, President, Chico-San Inc., and the Chico-San logo (a sort of spiral) are shown. Address: P.O. Box 810, Chico, California 95927.

1411. *Country Reader (Arrowhead Mills, Inc., Hereford, Texas)*. 1983. Coming soon: Five new cereals. 3(4):1. Winter. • **Summary:** "Arrowhead Mills proudly announces the introduction four new 'Puffed Cereals.' Whole Grain Puffed Corn, Millet, Rice and Wheat will be available in 6 oz, bags in Approximately 30 days.

Note 1. A list of "Specials—15% off" on page 4 of this issue shows that Arrowhead Mills carries "Soybean Oil" in pints and quarts.

Note 2. This quarterly, 4-page newsletter contained mostly information about Arrowhead Mills products (which are all organically grown, whole foods, without any food additives), including new products, special discounts, etc. It began publication in 1980 and continued until at least Winter 1986. Soyinfo Center has all issues from the one cited above to Winter 1986, a gift from Lorenz Schaller of Ojai, California.

1412. *Health Foods Business*. 1983. Industry news: Pharmaceutical firm acquires K&L. Nov. p. 31.

• **Summary:** "Kahan & Lessin Co. of Compton, California, has been acquired by Jameson Pharmaceutical Corp. of San Mateo, California. K&L, a leading distributor of natural products, was founded in 1932; it has been owned by Fleming Companies of Oklahoma City since 1972.

"Jameson's main business is the manufacturing and distribution of vitamins and food supplements, mainly through drugstores and supermarkets. James H. Jones, 53-year-old chairman of the board at Jameson, is a founding director of" Wal-Mart.

A photo shows Arthur Miller, age 62, who will continue in his role as president and chief operating officer of K&L.

"K&L currently serves over 1,600 health food store accounts in the states of California, Hawaii, Arizona, Utah, Nevada, Colorado, Montana, Washington, New Mexico, Texas, Oregon, etc. It carried more than 8,500 items at a 100,000-square-foot distribution center."

1413. Leonard, Tom; Jacobs, Leonard. 1983. Choosing the best sea salt. Lab reports and production methods should be considered. *East West Journal*. Nov. p. 16, 18-20.

• **Summary:** An excellent, well-researched and well-written article. Sea salt contains more of the minerals found in sea water than does commercial salt (sodium chloride). These elements include magnesium, calcium and potassium. Most Americans consume too much salt, and over the past decade, the sodium which makes up about 40% of salt has been implicated in obesity, arthritis, kidney stones, high blood pressure, and increased risk of cardiovascular disease.

Among commercial table salts there are two main types: mined land salt and refined sea salt. Both types conform to the Food Chemicals Codex which requires salt to 99.5% pure sodium chloride or 97.5% NaCl if the salt is treated with an anti-caking substance (typically magnesium carbonate). These refined salts might be called the "white bread" of salt.

There are sixty different elements in ocean water. A table compares the "Major compounds (salts) in sea salt." In the table are five brands of sea salt: Westbrae, Muramoto, Lima, Erewhon, and Maldon. For each is given the content of moisture, sodium chloride, calcium chloride, magnesium

carbonate, and potassium sulfate—on both an “as is” basis and on a dry/moisture-free basis. Before about 1960 there was no sea salt in the United States. Muramoto’s sun-evaporated salt is made on the west coast of Mexico’s Baja peninsula. He “brings this unrefined salt into the U.S. and ‘cleans’ it by re-dissolving, filtering, and re-evaporating and crystallizing it in enameled pans over glass flames.”

Maldon salt comes from Essex in England; it is evaporated in large pans over fire.

Lima salt is made in Europe. Address: Boston, Massachusetts.

1414. Shurtleff, William; Bennett, Gordon. 1983. Proposal for a Soy Sauce Council of North America. Lafayette, California: Soyfoods Center. 2 p. Unpublished typescript. 28 cm.

• **Summary:** Contents: Definition. Purpose. Membership. Funding. Communication, proposals, and voting. Initial activities: Standards, soy sauce press release program. Your participation.

“Definition: The Soy Sauce Council of North America (commonly referred to as the “Soy Sauce Council”) is an organization within the Soyfoods Association of North America.” This idea was proposed by the authors, a cover letter, questionnaire (containing 10 questions, mostly related to terminology), and 4-page list of potential members were drafted, and a mailing was done to all potential members. Eleven companies responded to the questionnaire and their responses were tabulated. The respondents were: Chico-San, Erewhon, Granum, Kikkoman-Wisconsin, Kikkoman-International, Mandarin Soy Sauce, Mountain Ark, Pure Sales, San-Jirushi, Westbrae, and Mark Fruin.

But Michael Austin and at least one other leader of the Soyfoods Association did not like the idea, so it was never implemented. Address: 1. Director, Soyfoods Center, Lafayette, California; President, Westbrae Natural Foods.

1415. Goodman, John. 1983. Arrowhead Mills’ work with full-fat soy flour and microflaked soybeans (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 20. 1 p. transcript.

• **Summary:** Technical descriptions of how the company makes these two products. Full-fat soy flour production started in about 1973-74. Current production is about 300,000 lb/year in 1.5- and 30-lb bags, and another 100,000 lb a year in mixes, such as pancake and waffle mix, and as a fortifier for unbleached white flour. They also make full-fat soy grits (pretoasted and run through a flaker) for use in their 7-grain cereal.

In about 1974 they started to make micronized soy flakes, sold in 1 lb and 25 lb bags. They use these in their Deaf Smith Crunch Granola, and other companies use them in granolas, cereals, as a filler in meat loaves, and casseroles. Present production is about 100,000 lb/year. Address:

Arrowhead Mills, Hereford, Texas.

1416. *SoyaScan Notes*. 1983. Soymilk and dairy milk prices in California, December 1983 (Overview). Dec. 28. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In Lafayette, California, whole fluid cow’s milk retails for \$0.39/pint (1 pint = 16 ounces) and nonfat cow’s milk retails for about \$0.43/quart. Milk is the least expensive popular beverage, less expensive than Coca-Cola, beer, or orange juice. Prices of unflavored fluid soymilks are as follows: Vitasoy, 8.4 oz. Tetra Brik sold to the Asian-American market \$0.35 (which is the equivalent of \$0.67 per pint), Quong Hop Soy Fresh 10.16 oz. Pure Pak carton \$0.59 (\$0.89/pint), Wildwood Yosoy pint plastic bottle \$1.05, Brightsong Honey-Vanilla pint plastic bottle \$1.08, San-J To-Neu 6.76 oz. Tetra Brik \$0.74 (\$1.75/pint), Edensoy 6.0 oz. retort pouch \$0.74 (\$1.97/pint). Vitasoy, the least expensive soymilk, is 1.72 times as expensive as cow’s milk. The average price of the pint equivalents of all 6 U.S. soymilk products mentioned above is \$1.24 a pint (which would be \$2.48/quart). Thus the average soymilk in a typical pack is 3.53 times as expensive as dairy milk per unit volume.

1417. *SoyaScan Notes*. 1983. Chronology of soybeans, soyfoods and natural foods in the United States 1983 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 16. Larry Needleman decides to sell Bean Machines; he is looking for a buyer. Jan. 24. “Legume, Company Finds Niche Selling Frozen Foods Made with Tofu, published by *The Wall Street Journal*.

Feb. *Soyfoods* magazine No. 8 published by Richard Leviton. Blue cover, 5,000 copies

Feb. 6-8. Sixteen soyfoods companies exhibit at the Natural Foods Expo. in Anaheim, California. A new trade association named Soyfoods Association of America (SAA) is formed; it is basically a restructured version of the original Soyfoods Association of North America, which was founded in July 1978 and which now ceases to be active. SAA elects a new board of directors; Michael Austin is chosen new Executive Director and Gary Barat of Legume becomes new President. Fourteen companies pledge \$12,000. Headquarters established in New York City.

Feb. 7. The First Great Tofu Burger, a dry mix, made in Oakland, introduced at Anaheim Natural Foods Expo.

Feb. 18. Wm. Shurtleff has idea for forming a Soy Sauce Council to help encourage soy sauce companies to join Soyfoods Association, develop soy sauce terminology and standards, and eliminate mislabeling.

Feb. Jack’s Beanstalk, innovative tofu company in Salt Lake City, Utah, goes out of business.

March 10. *Soyfoods Industry and Market: Directory and Databook 1983* published by Soyfoods Center, accompanied by glossy flyer and catalog of professional publications and

services.

March 10. *Tempeh Primer*, by Juel Andersen and Robin Clute, published.

March 14. Connecticut Agricultural Experiment Station, in Bulletin 810 "Quality of Tofu and Other Soy Products," reports high bacterial and coliform counts. A virtual expose, revealing the tofu industry's erratic quality control, it gets wide media coverage and hurts sales of New England and New York tofu companies.

March. Hinode Tofu Co. starts major tofu ad and coupon campaign, with full-page ads in four national magazines. Most extensive national publicity ever done for tofu. Triggers lawsuit from a rice company over the Hinode brand, with which Hinode Tofu Co. is subsequently forced to part.

April 27-30. Six soyfoods companies exhibit at Whole Life Expo in San Francisco, as part of Soyfoods Association's booth. Shurtleff presents a speech and color slide show.

April. Jacob Hartz Seed Co. is purchased by Monsanto.

May. *The Au Naturel Tofu Manual*, by Chloe & Abraham Fox self-published in Canada. Vol. 1 is *Tofu Recipes for Families*. Vol. 2 is *Modern Jewish Tofu Cooking*.

May 3. Michael Austin mails out Soyfoods Association Charter Member letter. By year's end \$18,000 in membership fees had been raised.

May 4. Richard Leviton decides to move to California.

May 8-11. Hinode Tofu Co. exhibits five flavors of Tofu Parfait at the prestigious and influential Food Marketing Institute convention in Chicago, a major national supermarket convention, attended by 20,000.

May 9. Dr. Hwa L. Wang of USDA NRRC speaks on "Tofu and Tempeh as Potential Protein Sources in the Western Diet" at the American Oil Chemists' Society symposium on "Potential New Protein Sources" in Chicago.

May 16. Quong Hop & Co. introduces the first Soy Deli cooler display case to Raley's supermarkets in Reno (Nevada) and Sacramento (California). In July they introduce the idea to Safeway supermarkets in California. By August there are Soy Delis in ten Safeway supermarkets in the San Francisco Bay Area.

May 18. The New York Times article on "Bacteria in Soy Products" is a follow-up on the Connecticut tofu contamination report.

May 24. Wm. Shurtleff leaves for China for three weeks to study soyfoods, sponsored by Danish Turnkey Dairies; the first trip for this purpose since Dr. A.K. Smith of the USDA went there in 1949. Shurtleff writes 75-page report on *Soybeans and Soyfoods in China: 1949-83*. After China, Wm. and Akiko Shurtleff spend 3 weeks studying the burgeoning soymilk industry and market in Japan.

May 31. Leviton and Wang speak on the soyfoods industry at Iowa State University conference on grains and legumes.

June. Worthington Foods introduces Tofu Garden

Patties, developed for the health food market as part of a larger new line of natural food products, all sold under the Natural Touch brand. This is a new trend for the company and they commit money to promoting it. In 1984 they launch Okara Patties (which contain okara as the 4th ingredient).

June. *Quantity Tofu Recipes for Institutions & Restaurants*, by Gary Landgrebe published by Soyfoods magazine and Fresh Press.

June. *The Magic of Tofu*, by Jane O'Brien of Ireland published by Thorsons in the UK.

June. *Tofu: Not Just for the Health of It*, by Jana H. Crutchfield self-published.

June. *Handbook of Indigenous Fermented Foods*, edited by Keith H. Steinkraus, published by Marcel Dekker. Extensive original material on traditional soyfoods. It soon becomes a classic.

June. *Soyfoods* magazine No. 9 published, 7,000 copies. *Soyfoods Newsletter* published in new typeset, 4-page format with new design.

June. Torigoe Seifun, Japan's fifth-largest flour miller, starts production of tempeh. This is the earliest known commercial tempeh ever made in Japan.

July 1. Quong Hop & Co. purchases Pacific Tempeh Co.

July. INTSOY publishes *Proceedings of the First China/USA Soybean Symposium*, held July 1982 at the University of Illinois.

July 3-Aug. 22. Richard Leviton in England, lectures on soyfoods in London and Leicester, and does some soyfoods research.

July 25. Soyfoods Association meeting in Denver, Colorado. Tom Timmins, president of Tomsun Foods Inc. (one of the companies seriously affected by negative publicity on tofu quality) is asked to be head of the Soyfoods Association's Standards Committee, and to appoint people to work with him on the development of standards, especially tofu standards. In October he sends a 4-page survey letter concerning soyfoods standards to the 18-person Soyfoods Association Standards Committee that he has appointed.

July 28-Aug. 2. Second US/China Soybean Research Symposium, held in Jilin, China

July. NNFA show in Denver. Eden Foods surprises the natural foods industry by launching designed-for-America Edensoy in plain and carob flavors. Made in Japan by Marusan-Ai and exported by Muso, it is packed in a 6-ounce retort pouch. San-J's To-Neu brand soymilk is also debuted in Tetra Brik cartons.

Eden Foods is the first Caucasian-American company to import soymilk, and their gamble soon pays off; sales skyrocket, sparked by an extensive magazine advertising campaign. Between Sept. and Dec. 1983 over 1 million packs are sold. A host of competitors rush to follow Eden's lead... and many of them go to Muso. Eden objects.

July 31. Fifth Anniversary of the founding of the Soyfoods Association of North America.

Late July. Hot, dry summer weather heats up the price of soybeans from \$6/bu to over \$9.50/bu in August and September, falling back to \$8 in December.

Aug. 15. *Time* magazine article on stylish ice creams has a paragraph on Tofutti soy ice cream.

Aug. 15. Delegation of four soyfoods experts from People's Republic of China spends 5 hours at The Soyfoods Center. First stop of the first Chinese soyfoods team to visit the USA.

Aug. 15. Soyfoods Center makes the first photocopy of the entire Log of the Dorsett-Morse Expedition to East Asia, 1929-31. 6,170 pages. The only original is owned by the American Soybean Assoc. in St. Louis, Missouri.

Aug. Farm Foods serves Ice Bean soymilk ice cream at the American Soybean Association convention in Nashville, Tennessee.

Sept. Legume in New Jersey, in their second public stock offering in 15 months, raises an additional \$400,000 (\$300,000 net).

Sept. Continental Soyfoods, run by Pat Aylward in Minneapolis, Minnesota, goes out of business.

Sept. 9. Richard Leviton leaves Massachusetts, moves Soyfoods magazine to Encinitas, California. But he decides to leave there a week later.

Sept. 21. New Ten Speed Press edition of *The Book of Miso*, by Shurtleff and Aoyagi published. Extensively revised, it shows miso consumption in the U.S. has increased 300% since 1975.

Sept. 25. Open House at new headquarters of Soyfoods Center for 30 people, including Nancy Dailey, who is writing a major story on soybeans for *National Geographic* magazine, and for Richard Leviton, newly arrived in California. Shurtleff shows color slides of soyfoods in China.

Sept. 26–Oct. 1. Symposium on “Soybean in Tropical and Subtropical Cropping Systems” held at Tsukuba, Japan. About 200 people attended. Proceedings were published in 1985.

Sept. 28. Soyfoods Center buys its first computer and begins computerization, which soon leads to development of the world's three largest computerized databases focusing on soyfoods and the soybean industry—from which this chronology is compiled.

1418. *SoyaScan Notes*. 1983. Chronology of soybeans, soyfoods and natural foods in the United States 1983 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. Oct. 9 to Nov. 14. Richard Leviton travels to Europe as a consultant for the American Soybean Association. Gives six speeches on soyfoods in Italy, Belgium, Denmark, France, Netherlands, and Hungary. The 50-minute speech in Italy is about the soyfoods industry in the USA, presented to 150 members of EUVEPRO, the European Vegetable Protein Association. Leviton studies

soyfoods throughout Europe, the first representative of the American soyfoods movement to do so. He reports that virtually all tofu in Europe is vacuum packaged. On Oct. 28, ASA Belgium Office expresses interest in sponsoring a European Soyfoods Conference and a European Soyfoods Newsletter. Leviton writes a 56-page report on the trip.

Oct. New England Soy Dairy starts to sell its tofu under the Tomsun brand.

Oct. The world's first spray-dried tofu is introduced by Clofine Dairy & Food Products of Linwood, New Jersey. St. Peter Creamery first began spray-drying soymilk powder in late 1984, and tofu in the summer of 1985, under the Oberg patent.

Oct. *Kikkoman: Company, Clan, and Community*, by W. Mark Fruin (358 p.) published by Harvard University Press as part of their series Studies in Business History.

Oct. Major reorganization of The Farm in Tennessee. It is no longer a cooperative. Every participant must pay his/her own way. All workers earn wages. The soy dairy sells its tofu and soymilk to Farm residents. Farm Foods becomes an independent, for-profit corporation.

Oct. Pauline Six-Chan, founder of Premier Foods in Leuven, Belgium, starts making Tofu Tart/Cheesecake and promoting tofu and other soyfoods in Belgium.

Nov. Hymowitz and Harlan's “The Introduction of the Soybean to North America by Samuel Bowen in 1765” is published in *Economic Botany*. This brilliant piece of historical research pushes the introduction date back 39 years, and shows that by the late 1760s Bowen, in Georgia, was making soy sauce and exporting it to England. It also credits Benjamin Franklin with the earliest known reference by an American to tofu, in 1770.

Nov. 11. Wm. Shurtleff and Gordon Bennett (Westbrae Natural Foods) mail out a packet including proposed U.S. soy sauce standards, English translation of Japanese Shoyu Standards, and proposal for formation of a Soy Sauce Council to 60 companies connected with soy sauce in the USA.

Nov. Soyfoods Assoc. officers meet with David Mintz of Tofu Time (maker of Tofutti) asking him to either use tofu as an ingredient in Tofutti or drop the term “tofu” from his product name and stop stating or insinuating that his product contains tofu.

Nov. 11. William Shurtleff writes a strongly worded letter to Mintz threatening to report the matter to the Securities and Exchange Commission and the FDA if Mintz fails to stop deceptive practices. Mintz quickly re-adds tofu to Tofutti.

Nov. 19. House Shokuhin Kogyo, a major Japanese food company, invests \$2.5 million in Hinode Tofu Co. in Los Angeles as part of a joint venture to expand tofu production.

Nov. 25. Dr. Clifford W. Hesseltine of the USDA NRRC receives the award of the Third Class of the Order of the Rising Sun from the Emperor of Japan in recognition of

the meritorious services he has rendered: proving the safety of Japan's traditional fermented foods, training Japanese scientists, and promoting technical cooperation in the field of food fermentation between the United States and Japan.

Dec. New England Soy Dairy, in a half-page article in *Inc.* magazine, is named as one of America's 500 fastest growing small private companies.

Dec. Inari Trading Co. in Michigan develops a delicious Christmas Soynut Sampler with seven flavors of Super Soys, including yogurt-coated, carob-coated, and butter-toffee. Runs a full page color ad in *Soybean Digest*.

Dec. *International Bibliography of Soybeans* (3 volumes, 2,500 pages) published in Brazil. 19,571 references total, under 75 subject headings, all published during 1970-1982. Volume III contains author and subject indexes. Mostly soybean agronomy, but 1,584 references on soyfoods.

Dec. 1. The title of *Soyfoods Monthly* is changed to *Soyfoods Newsletter*.

Dec. 5-7. Symposium on Soybean Utilization held at Ibadan, Nigeria, Sponsored by IITA. First event of this type in Africa.

Dec. 8. Tofu Time Inc. in New York raises \$3.2 million (\$2.4 million net) in their first public stock offering (IPO), to finance national marketing of Tofutti soy-based ice cream.

Dec. 10. Doug Fiske becomes majority owner (55%) of *Soyfoods* magazine, Leviton owns 45%. Fiske will take over most publishing responsibilities. Leviton moves to San Francisco Bay Area.

* *Eurosoya*, the annual publication of the European Cooperative Network on Soybean, begins.

* Soymilk production peaks in Japan at 116,724 kl. By 1986 it has fallen to 43,392 kl, which is only 37% of the peak.

1983 New Trends:

New Capital and Expertise are Flowing into the Soyfoods Industry, leading to many exciting new ideas and products and marketing programs. A dozen or so large companies with nationwide marketing are emerging.

New Emphasis on Soyfoods Marketing, now that production techniques have been fairly well mastered, is seen throughout the industry, and is reflected in new editorial and advertising policies of *Soyfoods* magazine.

Brand-Name Promotion by larger companies is surpassing generic or commodity promotion.

Stylish Second-Generation Products, prepared convenience soyfoods, are appearing with better product quality, better marketing and promotional programs, and better packaging and graphics. These are the fastest growing component of the soyfoods industry.

Extensive Professional Advertising of Soyfoods in natural and health food consumer magazines, as by Legume, Eden Foods, San-J, Hinode, Edward & Sons, and Pure & Simple. Each of these companies run very attractive, professional ads. Brightsong Light Foods has top graphics

for a small company.

Exhibits at National Trade Shows are now a matter of course: The Natural Food Merchandiser show, followed by the National Nutritional Foods Association (NNFA) show are most popular.

Tofu Market Control is Increasingly Concentrated in the hands of large manufacturers, who distribute nationally and have professional marketing. Most companies are getting much more professional, but many small tofu companies are going out of business. The total number of companies is stabilizing.

Soymilk Makes its First Big Splash in the American Caucasian Market, led by Eden Foods' Edensoy. Vitasoy has big plans for early 1984. Vitasoy had the largest total imports in 1983, but mostly sold to the Asian-American market. Large new soymilk plants are planned to open in 1985.

East Asian Soymilk Sales are Skyrocketing, leading to a general soyfoods Renaissance, and reevaluation of traditional soyfoods staples. Production of soymilk in Japan tops 100,000 metric tons (tones) for the first time, reaching 116,724 tonnes, up 71% over last year. The per capita consumption of soybeans in Japan is 5.8 kg/year, up 3.6% from last year.

Soy Ice Cream is becoming fashionable. Made with tofu, soymilk, and/or isolated soy protein, it is emerging as a major way that Americans are discovering soyfoods.

Tofu industry is vulnerable to sanitation and credibility problems as vividly demonstrated by the Connecticut quality / contamination report in March and subsequent adverse publicity, and by a Tofutti mislabeling incident in November. The industry urgently needs standards and better sanitation. Tofu souring and spoilage is the tofu industry's number one problem.

The Soy Deli Concept: Defunct or Ready for Takeoff? No new openings and some closings. But more and more natural food and vegetarian restaurants are starting to use soyfoods, and Chinese and Japanese restaurants are increasing their traditional use. In *Soyfoods* No. 9, Leviton calculated that as much as 16% of all tofu made in the U.S. is being served in restaurants, but this figure is probably far too high. Most promising, plans by Tofu Time/Tofutti to open a chain of natural, fast food restaurants featuring tofu, soymilk and other soyfoods could bring the Soy Deli concept new life and widespread publicity as a healthful alternative to McDonald's, Burger King, and the like.

European Soyfoods Industry is Flourishing, with lots of innovation. Large producers of tofu and tempeh are emerging in the Netherlands.

Tempeh is Starting to Take Off in Japan and interest is rising rapidly: 13 articles were published on tempeh in Japan this year, followed by 20 in both 1984 and 1986.

1419. **Product Name:** Erewhon Shoyu Tamari.

Manufacturer's Name: Erewhon, Inc. (Imported). Made in

Japan.

Manufacturer's Address: Boston, Massachusetts.

Date of Introduction: 1983 December.

New Product–Documentation: Ad in *Whole Foods*. 1983. Dec. p. 51. “The look is new but the flavor is still aged.” “Our look may be new. But all 150 Erewhon Natural Food products are still made the same quality way.”

Leaflet. 8½ by 11 inches, color. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Ad (full-page, color) in *Whole Foods*. 1989. Feb. p. 27. “Made in Japan 400 years ago.” Shows chopsticks on a small bowl or shoyu next to two types of sashimi against a black background.

1420. Erewhon Trading Co. 1983. Order food by mail? Naturally (Ad). *New Age Journal (Boston, Massachusetts)*. Dec. p. 4.

• **Summary:** A half page black-and-white ad. “Erewhon’s mail order natural food brings the highest quality natural and organically grown products right to your mailbox. Shopping for macrobiotic food, all natural cosmetics and body care products has never been so convenient.” An illustration shows a mailbox full of Erewhon brand products. Address: 236 Washington St., Brookline, Massachusetts 02146. Phone: 1-800-222-8028.

1421. Cook, L.K.; Cronk, Loren K.; Free, Lisa. 1983. Guide to natural food restaurants. Angwin, California: Daystar Publishing Co. *

1422. Eden Foods, Inc. 1983. Expand your horizons. Edensoy (Leaflet). Clinton, MI 49236. 1 p. Single sided. 28 x 22 cm. Also widely run as an ad.

• **Summary:** See next page. A color illustration shows a boy climbing out on a rock over a pond with a meadow and mountains in the background. Superimposed on this are two large foil retort packages of Edensoy (plain and carob). A table compares the nutritional value of Edensoy/whole cow’s milk. Key differences are (gm per 100 gm): Calories 40/65. Protein 3.4/3.0. Fat 3.0/3.3. Ash 0.6/0.8. Calcium 40 mg/100 mg. Iron 1.5 mg/0.05 mg. Also appeared as an ad in *Natural Foods Merchandiser*. 1984. Jan. p. 10 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion ‘84. Marketing soyfoods in America. Address: Clinton, Michigan. Phone: (517) 456-7424.

1423. Eden Foods, Inc. 1983. Process for making soy milk [in Japan, by Marusan] (Leaflet). Clinton, Michigan. 2 panels each side. Each panel: 28 x 21.6 cm. Undated.

• **Summary:** Printed with dark green ink on glossy white paper. The stylish logo of Eden Foods, Inc. is four green shoots or fiddlenecks in a circle.

The purpose of this very interesting leaflet is to give a detailed technical description of the process for making and packaging (in retort pouches) Edensoy soy milk, and to give

a floor plan showing the different pieces of equipment used and their location in the building. We applaud Eden Foods for their openness in disclosing exactly how their soy milk is made and packaged.

“Process for making soy milk (the numbers refer to the machines on the diagram): “Cleaned soybeans are fed through a cyclone chamber (105) removing loose skins and hulls. Then the beans are mechanically compressed (crushed slightly) to loosen the skins away from the rest of the bean (106). Next into the enzyme invalidator (106) where they are slowly augured through and cooked with steam, which enters the chamber at 266 °F, and pressure, which is maintained at 57 lb/sq. in. (201).

“Steam is continuously being added and removed. This releases and destroys enzymes that cause undesirable smells. Enzymes are carried away in the spent steam. The soybeans are in this enzyme invalidator (201) for 30 seconds. From here they go into a grinder (203) and are mixed with hot water (80-85%) and then pumped into the ultrimixer colloid mill (205) where the particle size is reduced to pass through a 200 mesh screen. This is then pumped into a centrifuge (207), which removes the fiber down to about 11.5% solids. This liquid is then decanted in the receiving tank (208) and then deaerated by vacuum in the deaerating tank (209). Soy liquid is now moved to agitating blending tanks (211), and then pumped to seasoning tanks (213), where other ingredients are added. The liquid is now between 122°F and 140°F. It is now moved to the first homogenizer (216) and then back to the seasoning tanks (211).

“From there it goes into pasteurizing and smell removing (218) where it is heated with steam and pasteurized at between 266°F and 275°F. It is now moved to the high pressure homogenizer (219) and homogenized at 194°F and 220 lb/sq. inch. The liquid is now passed through a plate cooler (220) where its temperature is reduced to 35 °F and stored in aseptic tanks (221).

“CIP unit (222) is used to flush and clean the system.

“Once moisture has been introduced to the beans, the only surface that the mash or liquid comes in contact with is SUS 316L stainless steel.

“The soy milk has a specific gravity of between 1.03 and 1.04. The percent of solids is controlled by testing the soy milk after production, then adding the other ingredients to bring it up to standard.

“The soy liquid is tested for solids, pH, Brix: first, after mixing with other ingredients, second, just before packaging, and third, after it comes out of the retort.”

“Process for packaging and retort sterilization of soy milk.” The same kind of detailed description is given. “The filling machine is a Bosch Form, Fill, and Seal Machine, model number BMR-200ST. It is in a separate packaging room.

“The film used is an RF-P high temperature laminate manufactured by the Toyo Seikan Kaisha Co., Ltd. of Japan.”

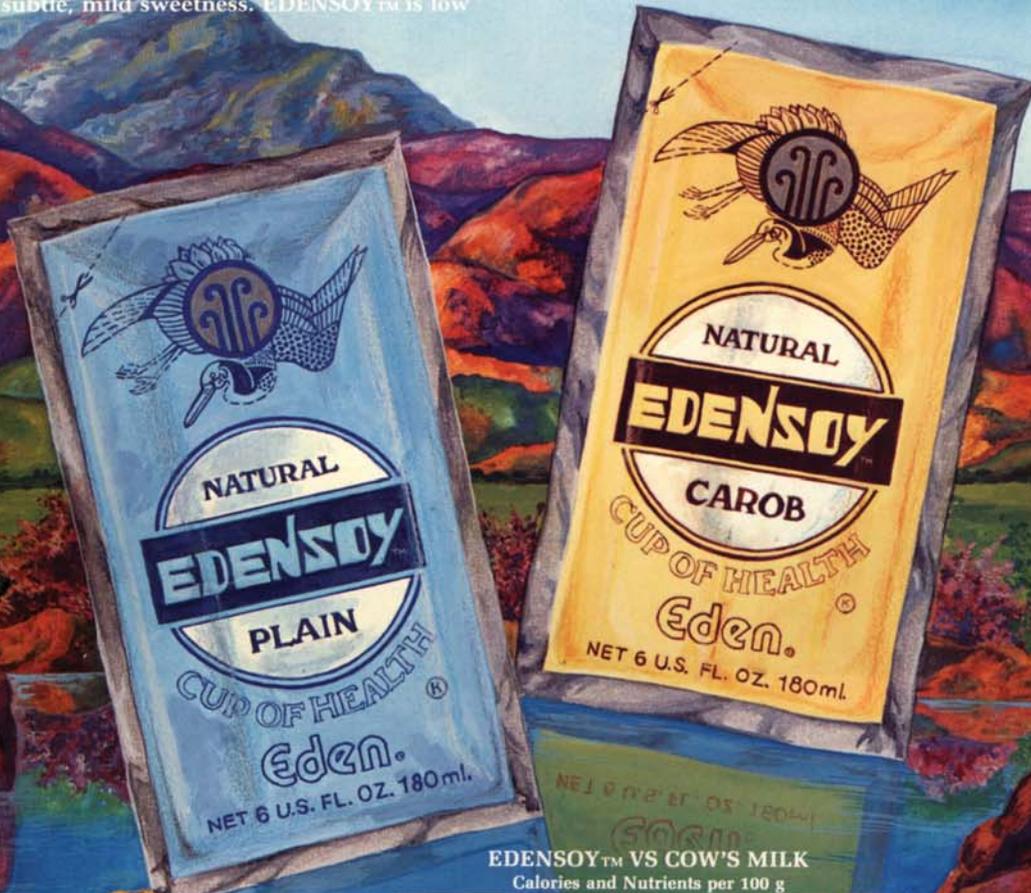

EXPAND YOUR HORIZONS

EDENSOY™ is a nutritionally balanced beverage made from choice, selected natural foodstuffs offering a large complement of minerals and vitamins. EDENSOY™ is fun to drink and leaves you with a satisfied feeling. It is one of the safest, most delicious beverages ever produced on a commercial basis. EDENSOY™ tastes great with a natural full-bodied flavor, a mellow aroma and a subtle, mild sweetness. EDENSOY™ is low

in starch and fats, and cholesterol free. It is an excellent complement to a meatless diet.

Soyfoods are receiving wide acceptance and are being highly acclaimed by nutrition, fitness, gourmet and health-conscious people from coast to coast.

EDENSOY™ is a first-class soyfood that makes the best use of the potential nutrients of the soybean, and rendering this nutrition into an easily digestible food.

1424. **Product Name:** Yahmee Rice Nectar [Original Amazaké Drink, and Toasted Almond].

Manufacturer's Name: Price-Rice Foods Co.

Manufacturer's Address: Price, Maryland 21623 or 21656. Then to Wilton Manners, Ft. Lauderdale, FL 33334. Then by 1986 to 650 N.W. 71 St., Miami, FL 33150. Phone: 391-556-6727.

Date of Introduction: 1983.

Ingredients: Cultured organic brown rice and sweet brown rice, deep well water, high mineral sea salt.

Wt/Vol., Packaging, Price: 8 oz or 16 oz plastic bottles.

How Stored: Refrigerated.

New Product–Documentation: Photocopy of Label. 1983, undated. 4 by 2 inches. “Very low sodium, low calorie, alkaline forming. Keep refrigerated. Rice nectar is rich in protein, minerals, B-vitamins, smooth blended fiber, and digestion aiding enzymes. Try it hot or cold or as a light sweetener in your favorite recipes. Good health comes from our kitchens.”

News release from Mary Lee Bergman of PriceRice Foods Co., Price, Maryland 21656. 1984. June. “Yahmee Rice Nectar (amazake).” “PriceRice Foods Co. is happy to announce the addition of Rice Nectar (amasake) to our line of fine nutritive snacks. Rice Nectar is the result of culturing cooked Lundberg organic brown rice and sweet brown rices with ‘friendly’ *Aspergillus oryzae* (Mitoku Organic Brown Rice Koji). The goodness of whole grain brown rice is transformed into a delicious and digestible sweet liquid. Every sip is a delightful refreshment.” An 8 oz plastic bottle with a tamper-proof snap-seal lid retails for a suggested \$1.19.

Two leaflets. ca. 1984. “Yahmee Rice Nectar. Toasted Almond Amazaké. So sweet and refreshing with all the nutrition of organic whole grain brown rice. No starchy aftertaste. No soy. Truly digestible [sic, Truly digestible]. For a nutritious breakfast try Almond Rice Nectar on your favorite hot or cold cereal. JBJ.” Illustration of large jar by a rice plant. Second leaflet adds banner: “Smooth blended fiber” and gives address: Price-Rice Foods Co., 2701 North Dixie Highway, Fort Lauderdale, FL 33304. \$3.25. The company also made a toasted almond Bongo Bar, with brown rice and barley malt (no amazake). Leaflet. 1986, Jan. “Festive Favorites with Yahmee Rice Nectar.” 8½ by 11 inches, both sides, green on white. Recipes for Strawberry Mousse, Amasake Nog, Chestnut Cream Pie, Moist and Tender Gingerbread, Pumpkin Pie. Two addresses: Miami and Price, MD.

Letter from Frank Marrero/Allen of Grainaissance. 1987. Dec. 21. Talk with Charles Kendall. 1988. Jan. 26. They started near Baltimore 4-5 years ago, but are now in Florida. Call Oak Feed Co. 305-446-9036. They are

distributed by Organic Farms.

Talk with Stuart Kerrigan (305-532-5427 Home or Macrobiotic Foundation 305-448-6625; 4349 Sheridan Ave. #2, Miami Beach, FL 33140). 1988. Jan. 29. Price Rice was started in about 1983 in Price, Maryland by Mary Lee Bergman. She made two amazake products in her home; they were distributed by Organic Farms. Then she moved to Wilton Manners, a city inside Ft. Lauderdale, Florida. There Stuart Kerrigan started to work with her in July 1984. He had previously made amazake in Los Angeles at a store named Grain Country, connected with the East West Center. In Nov. 1984 Mary started to share her kitchen with Yaron Yemini and in about March 1985 he bought the business. At that time Price Rice was making 70 (or up to 90) cases a week, or a total of about 79 gallons a week. Mary Lee is now in California, married.

Talk with Yaron Yemini. 1988. Feb. 23. He confirms the above dates. Before he bought the business he had an agreement that Mary would produce amazake with him, teaching him how and sharing profits, for 3 months. He makes his own koji now; probably the only amazake company to do so.

Talk with Stuart Kerrigan. 1988. March 10. He uses the term “modern amazake” to refer to that made with purified [commercial] enzymes. After the sale of Price Rice, which was a financial disaster, Mary Lee worked with a dessert company in Florida making pies with modern amazake out of her home. Then she moved to California. Stuart has just signed a contract to work with Daniel’s of Boston making seitan and amazake.

1426. **Product Name:** Westbrae Natural Mild Soy Sauce (Salt Reduced).

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Water, whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983, undated.

3.5 by 8 inches. Color. “Half the Sodium of Regular Shoyu. Most ‘salt reduced’ soy sauces use an ion exchange

method to lower their sodium content.” Westbrae removes it mechanically, starting by heating the shoyu at lowered atmospheric pressure until the salt precipitates out. It is then removed by a centrifuge. Label. 1986. 5 by 3.5 inches. Paper. Brown, green, blue, yellow and white. Mt. Fuji logo illustration. “Contains 175 mg sodium per 5.9 gm (1 tsp.) serving, vs. 350 mg for regular shoyu.” Letter from Gordon Bennett. 1987. Oct. Gives year of introduction as 1983.

1427. **Product Name:** Westbrae Natural Buckwheat Ramen. Instant Asian-Style Buckwheat Noodles & Miso Flavor Broth.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole buckwheat flour, sifted wheat flour, water, sea-salt. Vegetable broth: Powdered soy sauce (soybeans, wheat, sea salt), powdered miso (soybeans, seasalt), dried Kombu seaweed, dried Japanese mushrooms, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

Nutrition: Per 45 gm.: Calories 158, protein 5 gm, carbohydrate 32 gm, fat 1 gm.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, brown, white, green, black on yellow. Color picture of bowl of Buckwheat Ramen. Miso Flavor Broth packet. 3 inch square. Foil. Burgundy on silver.

1428. **Product Name:** Westbrae Natural Seaweed Ramen. Instant Asian-Style Whole-Wheat Noodles & Seaweed Flavor Broth.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole-wheat flour, sifted wheat flour, salt. Soup: Powdered miso (soybeans, white rice, salt). Powdered soy sauce (soybeans, wheat, seasalt), shiitake mushroom powder, onion powder, dried wakame seaweed, garlic salt, ginger powder, black pepper.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, white, black, brown, green on blue. Color picture of bowl of Seaweed Ramen.

1429. **Product Name:** Westbrae Natural Miso Ramen. Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: whole wheat flour, sea salt. Miso broth: Powdered soy sauce, soybeans, wheat, sea salt, powdered miso, dried kombu seaweed, dried Japanese mushroom, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz.

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 9.5 by 6.5 inches. Plastic packet. Orange, purple, white, green brown. Full color picture of bowl of Miso Ramen. Directions with pictures of how-to.

• **Summary:** A listing of the titles of each volume. This source is good to use as a supplement to the National Union Catalog.

Contains a good section on natural foods (p. 46227-46228).

1436. DE-VAU-GE Gesundheitswerk GmbH. 1983. GranoVita. Health-food & natural food from Germany. Natural nutrition for young and old for every day. P.O. Box 1660, D-2120 Lueneburg, West Germany. 6 p. Manufacturer’s catalog. [Eng]

• **Summary:** This full-color manufacturer’s catalog contains a color photo of each of the company’s products and a listing of ingredients. All are natural, vegetarian foods. The lines are Soya-Products, Sandwich-spreads, Baby food, Fruit-and Grain bars, Nut-Creams, Wholemeal Breakfast, Herbal drugs, Drinks (soymilks and coffee substitutes), and Boesen grain-mill. Contains a concise history of the company, which was founded in 1899 by a group of health reformers at Friedensau near Magdeburg. Today the Lueneburg plant employs about 120 workers. The company supplies 2,500 health food stores in West Germany and has business dealings worldwide. “By our motto ‘Once a week a meatless day with granoVita soya-food’ more and more customers are induced to try the wholesome and tasty soya-products.”

In 1977 DE-VAU-GE acquired the Boesen Bakery Ltd. which employs 130 workers. In 1982 total sales for granoVita and Boesen were 50 million DM (German marks).

Among the many color photos is an aerial view of the present factory at Lüneburg. Address: Lueneburg, West Germany.

1437. Eden Foods, Inc. 1983. Edensoy. Clinton, MI 49236. 12 p. 21 cm.

• **Summary:** This booklet was written by Mike Potter to explain the uses of Edensoy. Inset in the red cover, a color photo shows a glass of soymilk next to a blue package Edensoy plain (retort pouch). On the inside front cover a large illustration shows a soybean with the bold caption “Look and feel great.” Contents: What is Edensoy? Edensoy—Quality ingredients. Soyfoods popularity: Just another fad? Edensoy—An alkaline food. Good for young

and old. Edensoy compares very favorably with cow’s milk (2 tables). What about cholesterol. Rich in iron. Good for babies.* Versatile. About the maker. On the inside back cover, a color photo shows the modern stainless steel equipment used to make Edensoy in Japan. The outside back cover shows the Eden crane logo with a Muso banner in its beak.

* The paragraph titled “Good for babies later got Eden Foods into big trouble with the FDA. It reads as follows: “Nothing can surpass mother’s milk for young children and we strongly recommend breast feeding, but when this is not possible, Edensoy is a quality substitute. It may be used with confidence for bottle fed babies that cannot tolerate the substances found in liquid and powdered formulas or are unable to tolerate dairy milk. Infant formula was developed because babies under the age of one year cannot tolerate (digest) cow’s milk.

“Vegetable quality babies cry less.” Address: Clinton, Michigan. Phone: (517) 456-7424.

1438. Goldbeck, Nikki; Goldbeck, David. 1983. American wholefoods cuisine: Over 1300 meatless, wholesome recipes from short order to gourmet. New York, NY: New American Library. viii + 580 p. Illust. Index. 23 cm. [65* ref]

• **Summary:** This is the best of the Goldbeck’s many good books on food. Contains many recipes for tofu (regular and frozen, p. 166-73) and tempeh (p. 173-75), and some for soynuts, whole soybeans, and soy flour. Although its subtitles says it is a meatless cookbook, pages 15-16 discuss the value of adding small amount of meats, fish, and poultry to other dishes, and page 478 contains details on storing six different types of meats, plus poultry and fish. Address: Woodstock, New York.

1439. Hatton, Hap; Torbet, Laura. 1983. Helpful hints for living better: How to live it up while cutting down. New York, NY: Facts on File Publications. xv + 237 p. 24 cm. [100+* ref]

• **Summary:** In the chapter on “Shopping for food,” the section titled “Shopping for protein” states that the five foods that provide the most protein for the money are all legumes—soybeans, lentils, split peas, kidney beans, and chick peas. More important, soybeans are used to make tofu.

In the same chapter, under “Mail-order shopping” is an entry (p. 44) for: “Manna Foods, 112 Crockford Rd., Scarborough, Ontario, Canada M1R 3C3. Small, high-quality wholesaler. Catalog free.” Also listed: Shiloh Farms (Sulphur Springs, Arizona). Starflower (Eugene, Oregon). Stow Mills (Greenfield, Massachusetts). Walnut Acres (Penns Creek, Pennsylvania). Deer Valley Farms, Inc. (Guilford, New York).

1440. Jeavons, John; Griffin, J. Mogador; Lehler, Robin. 1983. The backyard homestead, mini-farm & garden log

book. Berkeley, California: Ten Speed Press. 224 p. Illust. No index. 28 cm. [153* ref]

• **Summary:** A companion work to Jeavons' *How to grow more vegetables* (1982). Both are based on the Biodynamic / French Intensive method of gardening to produce high yields. Information on soybeans is found on pages 11, 49-50, 52, 56ff, 59-60, 73-74, 77-78, 90-91, 100-03, 116. The book is based on careful collection of data on each crop.

"Soybeans are particularly sensitive to the length of the days and nights (especially the nights) and to the night temperatures. There is a built-in 'clock' that signals each plant" when it is the right time of year to begin flowering and producing the seeds. "As the nights get longer and warmer, the timer sets this process in motion." Address: J. Jeavons, 5798 Ridgewood Rd., Willits, California 95490. Phone: No phone.

1441. Rohé, Fred. 1983. The complete book of natural foods. Boulder, Colorado: Shambhala. xvi + 491 p. Illust. Index. 26 cm. [120 ref]

• **Summary:** This book is about "The New American Diet," which is an "omnivarian" [omnivorous] diet including some fish and meat.

Chapter 14, titled "New and future natural foods," contains a section titled "Soy foods" (p. 162-65) including tofu, tempeh, miso, soy sauce, soy milk, and other soy products (yuba and sufu). The work of William Shurtleff and Akiko Aoyagi, and their Soyfoods Center, is mentioned 2-3 times. Toward the back of the book are many soyfoods recipes.

Page 165: "Vegetable Gels and Thickeners: Two 'vegetarian gelatins' are fairly widely used in food manufacturing. Most Americans have had them without realizing they are sea vegetables.

"Irish moss, also known as carrageen, can be bought in bulk in natural foods stores and boiled down to form a clear gel for puddings, jelly, or 'jello' desserts."

The next section (p. 165), titled "Future Foods from the Sea," briefly discusses arame, hijiki, and wakame.

The Prologue tells Rohe's life story and pioneering work with natural foods. In 1964, at the ripe old age of 27, he didn't feel good, didn't look good, and didn't like it—the result of years of smoking, drinking, eating bad food and "burning the candle at both ends." "It was time to do something about it. Adelle Davis became my guru and Thom Hamilton—the health foods store owner who sold me [her book] *Let's Eat Right to Keep Fit* became my mentor." Within a few months he was feeling much better. "So in 1965 I bought a small health food store in the Sunset district of San Francisco." It was named Sunset Health Foods." He discarded most of the dietetic foods on the shelves and replaced them with "old-fashioned groceries—basic stuff, traditional, simple, whole food... What was evolving was a modern version of an old-fashioned grocery store." He would

provide information instead of hype, bulk retail foods sold out of barrels, crocks, jars, and drawers instead of packaged products, food instead of food supplements. He renamed the store "New Age Natural Foods."

"My career ended in 1973, after eight years. New Age Natural Foods had served as a model for what were called in those days 'hippie food stores.' It is credited as being the prototype natural foods store, as distinct from a health food store." Since 1973 Fred continued to work in the natural foods industry. In 1979, in his capacity as a consultant, he met the people of Sunburst Farms, who are his collaborators on this book. "Sunburst is the realization of a vision experienced in 1951 by its founder Norm Paulsen, while he was living as a student monk studying yoga at the Self-Realization Fellowship in Los Angeles. He moved to the Santa Barbara area, and while operating a construction business in 1968 established Sunburst Farms as a group of people living communally under spiritual principles on 160 acres of land in the mountains above Santa Barbara. The community-owned business, Sunburst Natural Foods, grew foods organically and flourished. In 1970 they opened a natural foods retail store in Santa Barbara. The community grew to include a second ranch and a total membership of over 200 people. "The business came to include manufacturing and wholesaling as well as retailing. There are now five Sunburst Farmer's Markets, two of them—in Goleta and Ventura—large, complete, natural foods supermarkets. Sunburst also owns and operates a natural foods restaurant, 'The Farmer and the Fisherman,' 35 miles north of Santa Barbara along the coastal highway." Then Norm envisioned a new direction and everything changed. They traded their 6,000 acre coastal ranch for land in northeastern Nevada totaling over 500,000 acres. "It could hardly have been a more radical change. But the soil is rich in minerals and there is abundant water from artesian wells. They are responding strongly to the challenge of, as they say, 'making the desert bloom as a rose.'"

"Appendix eight: Recommended reading list" (p. 470-78) includes a section titled "Soyfoods."

This book was Re-published in 1986 as *Nature's Kitchen* by Garden Way in Brattleboro, Vermont.

Interview with Fred Rohe. 1988. Nov. 3. Fred bought Sunset Health Foods in 1965 and transformed it into New Age Natural Foods at 1326 Ninth Ave. in San Francisco.

Note: This is the earliest document seen (March 2020) that contains the term "natural foods supermarkets"—plural, but regardless of hyphenation. Address: 4014 Lincoln Way, San Francisco, California 94122. Phone: 415-564-7024.

1442. Westbrae Natural Foods. 1983. Traditional sushi, the Westbrae way? (Leaflet). 4240 Hollis St., Emeryville, CA 94608. 1 p. Single sided. 28 cm.

• **Summary:** The top half of this glossy color leaflet shows a Japanese-style plate of nori-wrapped sushi (made with brown

rice), chopsticks, and a 5-oz jar of Westbrae Natural Wheat-Free Tamari. The text below begins: “Now you can make traditional sushi right at home. Westbrae makes it easy by providing three essential ingredients...” Westbrae Sushi Nori, Westbrae Brown Rice Vinegar, and Westbrae Traditional Tamari. Address: Emeryville, California.

1443. Whelan, Elizabeth M.; Stare, Frederick J. 1983. The 100% natural, purely organic, cholesterol-free, megavitamin, low-carbohydrate nutrition hoax. New York, NY: Antheneum. xiv + 303 p. 22 cm.

• **Summary:** An unbalanced and sleazy belittling of the natural foods movement, full of half truths and misrepresentations, funded by Big Food. Contents: Introduction. 1. The nutrition (mis) information explosion. 2. The basic premise of the nutrition hoax: Americans are undernourished. 3. Obesity in America: Our number-one nutrition problem. 4. Diet and heart disease: Is there a link? 5. The “poisons” in our food. 6. Diet and cancer: Taking advantage of fear. 7. Sugar: The killer on the breakfast table. 8. Vitamins: If a little is good, more must be better. 9. You are what you eat: Nutrition and behavior. 10. Nutrition information: Whom do you believe? 11. What is good nutrition? Address: 1. PhD, Exec. Director, American Council on Science and Health; 2. PhD, Prof. emeritus and founder of Harvard University’s Dep. of Nutrition.

1444. **Product Name:** Tempeh.

Manufacturer’s Name: Paul’s Tofu.

Manufacturer’s Address: The Old Brewery, Wheathampstead House, Wheathampstead, Hertfordshire, England. Phone: Wheathampstead (058283) 4241. 3. Phone: Wheathampstead (058283) 4241.

Date of Introduction: 1983?

New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Jan. 22. No phone. The owner is later found to be Paul Jones. Shurtleff & Aoyagi. 1985. History of Tempeh. p. 31. This was the first of the new wave of “New Age” European tempeh companies.

L. Leneman. 1985. The Vegetarian. July/Aug. p. 23. “Tomorrow’s Food.” “Some enterprising wholefood shops are now making tempeh (and Paul’s Tofu includes fresh tempeh on their price list), but the first company to manufacture tempeh on a large scale is Tempeh Foods (Ipswich, Suffolk).”

Letter (e-mail) from Paul Jones in England in reply to questions. 2013. March 25. (1) What was the name of your company when it started making tofu? Ans: “I was called ‘Musubi foods’ (made by bringing yin & yang together), but people called me Paul Tofu as they had previously called me Paul the baker.” (2) Where did you first learn about tofu and tempeh? Ans: “I learned about tofu & tempeh from Macrobiotics–Chris Dawson (Mitoku / Clearspring) & others at East West / Community Health Foundation.”

“Peter Bradford might remember when he gave us the Chinese quern for making the ‘go’.

“I built an incubator & got tempeh spores growing on a culture medium in test tubes from the University of Illinois. I got *Aspergillus oryzae* from Mitoku & was making koji, amazake & mugi miso as well as tempeh. U of I got tired of sending slopes so I tracked down a lab called Micro Audit, part of Murphy & Son, whose main activity is support for micro breweries. They still offer extended spores of *Rhizopus*, and are near us in Nottingham.”

1445. Leonard, Thom. 1984. Re: Thoughts on miso in America. Letter to William Shurtleff at Soyfoods Center, Jan. 3. 3 p. Handwritten, with signature.

• **Summary:** Thom was surprised and pleased to see the “Ohio Miso” logo in the history chapter of the new second edition of *The Book of Miso*. “I, too, have found it strange that many influential people in the macrobiotic community have such resistance to the use of the English language in describing the varieties of miso.” Thom prefers the terms “brown rice” and “barley” to *genmai* and *mugi*. “Last spring I was asked to give a miso workshop to employees of Erewhon’s retail division. I stressed the importance of demystifying miso, including the use of English variety names. A beginning (belated) at least.

Next month, in Ireland, Thom will “begin making miso on a small scale, 800 pounds a week. My shop space is small, my finances smaller... I don’t have a company name yet, but favor The Irish Miso Company, trade name of Eire Miso.” “We are renting a beautifully re-done cottage on a south-facing hillside above the River Nore, and will be here at least a year.”

Update: Talk with Thom. 1984. Sept. 24. He was in Ireland for a year, but he couldn’t raise the money he needed. He planned to export miso to the USA. The Irish economy was slow and the UK market was small. He is planning another miso company. His wife is in Dublin, Ireland. He will go back to meet her there, and then perhaps on to Japan. He is now staying with Jim Hemminger, Remelle Road, Monroeville, Ohio 44847. Address: Kilkieran, Inistioge, Co. Kilkenny, Ireland.

1446. Westbrae Natural Foods. 1984. Distributor catalog No. 1: Jan. 1984. Emeryville, California: Westbrae. 19 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Page 18: Glossary for new Japanese items, incl. Seaweed chips with miso, Tamari veggie chips, Vegetable chips with miso, Shrimp chips with miso, Sesame salt “gomashio,” Umeboshi vinegar, Umeboshi paste, Tororo kombu, Miso ramen, 5-spice ramen (with powdered soy sauce and miso), Curry ramen (with powdered soy sauce and miso), Agar bar, Miso drops (candy, sweetened with natural rice malt).

Page 19: Sunburst product glossary, incl. Peanut butter domes with honey (with soybean oil, soy lecithin), Herb & cheese dressing (with soybean oil and whole soybeans), Honey mustard dressing (with refined soybean oil), Cinnamon apple granola (with soy oil), etc.

Note: The Sunburst community, which began as an intentional spiritual community in the late 1960s, founded and led by Norman Paulsen, was in its prime [in the 1980s] one of the largest shippers of organic products in the United States. Founded near Santa Barbara, California, the Sunburst members believed in a holistic lifestyle based on meditation, living from the land, organic farming, and—to some degree—chastity (Source: Wikipedia, Dec. 2008). Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1447. Chico-San, Inc. 1984. Why does Chico-San bother to import soyfoods? (Ad). *Natural Foods Merchandiser*. Jan. p. 9 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America. • **Summary:** A 4½ by 7½ inch black-and-white ad. Because the quality of fermented soyfoods made in Japan is considered better. Chico-San's miso-shoyu master is Mr. Tomio Kitani. He uses Japanese soybeans and sea salt rich in minerals. His Nama Shoyu, which takes 4 years to make, is the only unpasteurized soy sauce available in America. It is also the only shoyu with a salt content lowered by techniques not involving extraction or additives. "Taste is the difference."

This ad also appeared in *Macromuse* (1984, Spring, p. 35). Address: Chico, California 95926.

1448. Erewhon, Inc. 1984. Made in Japan 400 years ago (Ad). *Natural Foods Merchandiser*. Jan. p. 3 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America. • **Summary:** This 8½ by 11 inch ad begins: "To the ancient Japanese shoyu masters, making the finest possible soy sauce was more than just a matter of pride. It was a matter of necessity. Because, in medieval Japan, no one served inferior shoyu to a shogun twice." "Our great taste comes naturally." The full-page color photo shows the tips of two chopsticks on the edge of a small bowl containing shoyu for dipping sauce. Above that are sliced fish and orange fish eggs. In the lower left a bottled labeled (confusingly) "Erewhon Shoyu Tamari." Note: Shoyu and tamari are different types of soy sauce.

1449. Hatch Natural Products. 1984. Catalog and price list. 746 Germanna Highway, Culpepper, VA 22701. 76 p. 28 cm. • **Summary:** This company distributes natural foods from 48 manufacturers including Arrowhead Mills, Chico-San Inc., Eden Foods Inc., Edward and Sons Trading Co., Fantastic

Foods, Great Eastern Sun, Kingdom Foods, Living Farms, Love Natural Foods, Mitoku (Great Eastern Sun), Virginia Soyworks, and Westbrae Natural. The company was founded by Mildred and Ira Hatch; Its history is given on page 1. The ingredients in each product are listed. They carry soybeans (p. 16-17), dinner mixes with TVP (p. 31-32), imported Japanese miso and soy sauce (p. 37-43), soybean oil (from Arrowhead Mills p. 60-61).

Concerning so-called "cold pressed" oils the catalog states: "The words 'cold pressed' on many oil labels is generally thought to mean that they contain natural oils processed by the low temperature and pressure method discussed above. But this is totally mistaken. The words 'cold pressed' are absolutely meaningless when used as an indication of quality. They have no bearing on how the oil was extracted or at what temperature it was removed. They appear only as a marketing aid which just confuses and misleads the consumer and may be found on oils that are chemically extracted, bleached, and deodorized. Reputable suppliers refuse to use the term on their labels.

"Oils are extracted by two methods: pressure and chemical solvents. Pressing is normally done by what is called an expeller press. Temperatures produced seldom fall below the 140° to 160°F range. Still, the oil produced at these temperatures loses little of its flavor and nutrition."

Concerning soybean oil: "Soy oil's flavor is the strongest of all the oils, and many people find the unrefined product unbearable. Its flavor is best described as fishy or painty and lacks stability." Address: Culpepper, Virginia. Phone: (703) 825-4302.

1450. Leviton, Richard. 1984. Lifestream in the mainstream. *East West Journal*. Jan. p. 30-35.

• **Summary:** An excellent history of the Lifestream Company. Leviton was introduced to Lifestream when he first tasted its Essene bread, Essene Seed bread, Essene Rye bread, and Essene Fruit Cake. The bread was made from only sprouted wheat berries and a little salt, with no flour, oil, or leavening.

Lifestream which is located in Richmond, British Columbia, Canada, just across the Fraser River from Vancouver, also makes natural fruit cakes, whole wheat shortbread pastries called Fruit 'N' Nut Delites (in almond, peach, peanut butter, raspberry, and strawberry flavors), and 8 varieties of sprouted milled breads. The president is now Glenn Gratton, who says that in Vancouver, Lifestream is best known for the yogurt it sells and for its two retail stores. It owns Canada's largest natural foods retail store, and it owns a wholesale operation in far-away Toronto.

More important, however, Lifestream is Canada's leading distributor of natural foods carrying 140 branded products (both packaged and bulk) including nut butters, fruit juices, spreads, and Canada's leading brand of natural yogurt (in 14 flavors!).

So, in all, Lifestream is a food manufacturer, a distributor of its own and of other natural food products, and the owner of two natural foods retail stores; the company employs 85 people and with has total sales of more than \$10 million a year.

In the USA, Lifestream is best known for its delicious Essene breads; at least 1 million loaves, all based on sprouts, are baked at the Richmond bakery each year.

History: Arran started as a successful oil painter in the USA.

1965 (about)—He traveled to India, where he lived for two years with Sant Kirpal Singh.

1967—Arran realizes that he wants to start a business in Canada as a form of “right livelihood” as part of a vegetarian lifestyle with space for meditation. Kirpal Singh encouraged him to sell wholesome food. The first venture was the Golden Lotus restaurant in Vancouver. It was later sold to friends who closed it.

1969—Lifestream is founded by Arran Stephens and partner Peter Harwood. It began as a natural foods store (80 square feet) at the corner of 4th Street and Burard in Vancouver; they named the store Lifestream, at the suggestion of Arran’s father.

1970—Arran rents space in the back of the Burard store to friends who start Mother Nature’s Inn—a natural foods, vegetarian restaurant.

1971—Lifestream begins to wholesale granola and yogurt; it eventually moves out of the natural foods store to a separate location, where it also mills flour. It soon becomes Canada’s leading natural foods distributor. Arran’s focus is on the quality and purity of his foods and ingredients. All are vegetarian. Arran is the meditating disciple of Sant Kirpal Singh. He has practiced meditation daily since 1965, lived in India with his guru, and still makes frequent trips to India with his wife, Ratana.

1972—Lifestream now has 20 employees and sales this year first topped \$1 million.

1973—Arran and his wife purchase Mother Nature’s Inn and rename it Woodlands; it is kept financially separate from Lifestream.

1973—Lifestream purchases a bakery, partly to ease itself out of a restrictive granola contract, but also a place to develop new types of bread.

1974—Lifestream launches Essene breads. The word “Essene” came from the vegetarian spiritual community that once thrived by the Dead Sea and was made famous by “The Essene Gospel of Peace,” a book (supposedly a translation by Edmond Bordeaux Székely) published in 1971. Initially Arran modelled his breads after Wayfarer’s Bread, made from sprouted wheat in California; it was dense, moist, unleavened, and contained no flour. At about this time, a third partner, Louis Kiraly, was brought in. A bid at unionization by retail store employees failed.

1976—Lifestream’s wholesale operations relocated to

Richmond, BC, where they remain today. The year 1976 also marked the beginning of a falling out among the partners which would eventually lead to the sale of the company.

1977—Lifestream’s sales first top \$7 million.

1981 July—Arran Stephens sells Lifestream at a good profit. Glenn Gratton, a former marketing director at General Mills in Toronto, becomes the new president.

Arran Stephens: Today he is age 38, “a calm, bearded man who often wears a turban. He is the model of the principled family man who has survived the rigors of business, the ideals of the 1960s, the recessionary pressures of the 1970s, to arrive in 1983 financially successful and spiritually intact.” He and his wife (who have four children) have launched two natural foods restaurants, named Woodlands, in Vancouver. He has built Lifestream into a flourishing company with total sales of \$12 million a year. In short, he has gracefully and successfully combined his spiritual path and his many natural business.

“Thus in mid-1983 Lifestream is a well-established natural foods leader and recognized brand name in breads, yogurt, juices, nut butters, and jams. While the 1970s’ flurry of innovation and inspired growth lies becalmed in the fiscally shrunken 1980s, Lifestream has kept its mandate for purity in ingredients, simplicity in processing, and profitability in operations. It’s an accomplishment that both Arran Stephens and Glenn Gratton, in many respects culturally a generation apart although nearly identical in age, can both agree on.” Address: Freelance writer and editor of *Soyfoods* magazine, 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1451. McPartland, Christine. 1984. The new American diet: Has the nation gone natural? *New Age Journal* (Boston, Massachusetts). Jan. p. 50-57.

• **Summary:** The natural foods industry in America is growing rapidly. One sidebar (p. 54) is titled “From tofu to Twinkies: What *New Age Journal* readers really eat. 23% describe themselves as lacto-ovo vegetarians, 5% as strict vegetarian (vegan), 3% as macrobiotic, and 41% as semivegetarian (occasional fish and fowl). Only 28% said they were outright omnivores.

Another sidebar (p. 57) titled the “Top Ten Cookbooks” begins: “Our readers, upon being polled, were virtually unanimous in picking Frances Moore Lappe’s 1971 classic *Diet for a Small Planet* (Bantam, \$3.50) as their all-time favorite book on food. For many, Lappe’s observations on protein complementarity and planetary consciousness are what got them started on the road to responsible eating. And when it came to their cookbooks of choice, our respondents’ tastes were remarkably contiguous once again. If the following tomes are missing from your kitchen cabinet, you may be missing out on a real treat.

The Moosewood Cookbook, by Molly Katzen.

The Enchanted Broccoli Forest, by Molly Katzen.

The Vegetarian Epicure, by Anna Thomas.

The Book of Whole Meals, by Anne Marie Colbin.

The Deaf Smith Country Cookbook, by Marjorie Winn Ford, Susan Hillyard, and Mary Faulk Kooock.

The Ten Talents, self-published by Seventh-day Adventists Dr. Frank J. Hurd and Rosalie Hurd.

Laurel's Kitchen, by Laurel Robertson, Carol Flinders, and Bronwen Godfrey.

The New York Times Natural Foods Cookbook, by Jean Hewitt.

The Joy of Cooking, edited by Erma Rombauer Becker and Marion Becker. Address: Freelance writer, Jamaica Plain, Massachusetts.

1452. Milbury, Peter. 1984. More about sweeteners (Letter to the editor). *Whole Foods (Berkeley, California)*. Jan. p. 6-7.

• **Summary:** “Dear Editor: Your recent article on natural sweeteners (October, 1983) omitted mention of our Yinnies Brand Rice Syrup, which has been sold in natural food stores for almost 15 years. Made from only milled rice, water, and a pinch of barley and enzyme starter, it contains no preservatives or artificial ingredients.

“Chico-San has developed a unique process for making rice syrup, which involves converting the natural starches of rice into complex sugars. Complex sugars are absorbed into the blood stream very slowly, as compared to simple sugars. Yinnies syrup is mainly composed of maltose, an oligosaccharide [sic, disaccharide] that requires more time for digestion than sucrose and other simple sugars, such as fructose or glucose.

“Chico-San’s unique method for producing Yinnies Syrup involves the cooking of rice at low temperatures for a long period of time. This allows the enzyme from the malted grains to create fermentation in a liquid mash The liquid is vacuum-cooked again, at a low temperature, until the rice syrup is at the correct consistency.” Address: Operations Director, Chico-San Inc., Chico, California.

1453. Nasoya Foods. 1984. Make the Nasoya Foods section a part of your store (Ad). *Natural Foods Merchandiser*. Jan. p. 11 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion ‘84. Marketing soyfoods in America.

• **Summary:** A 7.75 by 10.5 inch black-and-white ad. An illustration show the following Nasoya products: Firm Style Tofu, Soft Style Tofu, Marinated and Broiled Tofu, Tofu Burgers, Tempeh, Tempeh Burgers, Fresh Noodles, Wonton Skins, Egg Roll Wrappers, Tofu Vegi Dip (Creamy Dill, Soyannaise, Onion, Creamy Garlic) and Corn Cakes (Blueberry, Cranberry, With Bran). “Nasoya Foods. A commitment to quality.”

This ad also appeared in *Soyfoods* magazine (summer, p. 9). Address: P.O. Box 841, Leominster, Massachusetts 01453. Phone: 617-537-0713.

1454. Soyfoods Assoc. of America. 1984. Soyfoods Pavilion ‘84. Marketing soyfoods in America (Ad). *Natural Foods Merchandiser*. Jan. 12-page color advertising insert.

• **Summary:** Contains large color ads by Legume Inc. (6 frozen tofu entrees), Erewhon, Inc. (shoyu tamari), Vitasoy (USA), Inc. (natural and coconut soy drink, sweetened with maple syrup), San-J International, Inc. (tamari, teriyaki sauce, tamari crackers, teriyaki crackers), Tofu-Time, Inc. (Tofutti “nondairy tofu frozen dessert”), Eden Foods, Inc. (Edensoy soy beverage in plain and carob flavors, retort pouch), and Westbrae Natural Foods (natural ramen in 100% whole-wheat, buckwheat, brown rice, mushroom, seaweed, miso, 5-spice, and curry flavors).

Contains black-and-white ads by Westbrae Natural Foods (shoyu, tamari, and soy sauce), Chico-San, Inc. (imported miso and soysauce), Fantastic Foods, Inc. (tofu burger mix), Penguino’s, Inc. (dairy-free frozen dessert), Nasoya Foods (Firm Style Tofu, Soft Style Tofu, Marinated & Broiled Tofu, Tofu Burgers, Tempeh, Tempeh Burgers, Tofu Vegi-Dip [Creamy Dill, Soyannaise, Bleu Cheese, Onion, Creamy Garlic], Corn Cakes [Plain with Bran, Blueberry, Cranberry]; Non-soy products in the “Oriental Cuisine” line include Fresh Noodles, Wonton Skins, Egg Roll Wrappers), Hinode Tofu Co. and Azumaya, Inc. (“The #1 and #2 tofu producers in America”).

The only article, whose author is not given, is titled “Soyfoods Pavilion debuts at Natural Foods Expo ‘84.” On the front cover of the insert is a list of members of the Soyfoods Association of America (formed in Feb. 1983) that participated in Natural Foods Expo ‘84. In addition to the advertisers mentioned above, they include: Farm Foods, Laughing Moon Food Co., Paradise Distributors, Inc., Soyfoods Magazine, Tempeh Works, Inc., and White Wave, Inc. Address: 526 East 20th St., New York, NY 10009.

1455. **Product Name:** Miso Drops (Candy).

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984 January.

Ingredients: Natural rice malt (whole grain rice, organic sprouted barley, spring water), miso (brown rice, soybeans, water, sea salt).

Wt/Vol., Packaging, Price: 1.76 oz. (50 gm).

How Stored: Shelf stable.

New Product–Documentation: Westbrae Natural Foods. Distributor catalog No. 1: Jan. 1984. Product label. 4 by 3.5 inches. Red and dark blue on gold.

1456. **Product Name:** Buckwheat Miso (“Soba miso”).

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA

94608. Phone: (415) 658-7521.

Date of Introduction: 1984 January.

Ingredients: Whole soybeans, buckwheat, water, sea salt.

Wt/Vol., Packaging, Price: 17.6 oz (499 gm).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Westbrae distributor catalog. 1984. Jan. 10. p. 10. Product label. 3 by 3.75 inches. Brown and dark blue on gold.

1457. Westbrae Natural. 1984. Soy sauce made complicated (Ad). *Natural Foods Merchandiser*. Jan. p. 5 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** This 8½ by 11 inch black-and-white ad begins: “Many people call traditional soy sauce ‘tamari.’ This labeling is illegal in Japan, where this soy sauce can only be called by its correct name, ‘shoyu.’ Some natural food companies avoid the Japanese law by importing *shoyu* and relabeling it as *tamari* in the U.S., where no soy sauce standards exist as yet.” A photo shows 10 Westbrae soy sauce products in various sizes, including: Mild soy sauce. Traditional tamari. Tamari. Traditional shoyu. Organic shoyu. Visit booths 652-656 in the Soyfoods Pavilion.

1458. Westbrae Natural. 1984. The uncommon ramen (Ad). *Natural Foods Merchandiser*. Jan. p. 12 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** This colorful full-page color ad begins: “We’d all like to enjoy wholesome, home-cooked food at every meal, but few of us have the time. That’s why Westbrae offers 8 great-tasting ramens—the widest variety of instant miso soups available.” “Our Whole-Wheat Ramen is made entirely of 100% whole-wheat flour, complemented by a classic miso broth. Special broths and noodles create 7 other uncommon flavors: Westbrae Buckwheat, Brown Rice, Mushroom, Seaweed, Miso, 5-Spice, and Curry ramens.” A large photo shows a bowl of noodles with broth, ready to eat. It is surrounded by whole mushrooms, leeks, and snow peas, sliced red peppers, mushrooms, cucumbers, and diced tofu.

Note: This ad also appeared in *East West Journal* (Jan. 1984, back cover).

1459. Daems, Chr. 1984. Re: Alpro’s commercial soy milk products. Letter to William Shurtleff at Soyfoods Center, Feb. 7. 1 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** Alpro started commercial production of soy milk in 1979 at a plant in Izegem with a capacity of 6,000 liters/hour. Soy milk production in their new plant in Ghent is expected to start in May 1984. They have 3 brands of their own: Soyamel, Alpro, and Provamel. They also sell their soy milk to several companies who use their own brand. The best known are DE-VAU-GE in Germany and Granose Foods in England. They have recently started selling to

Health Valley in California under the latter’s brand.

They sold a turnkey soy milk plant to a company in Madagascar, which started making soy milk in Jan. 1984. They were attempting to sell compact soy milk plants with capacities of 2,000 to 4,000 liters/hour to other countries. Address: Alpro, Zuidkaai 33, B-8700 Izegem, Belgium.

1460. **Product Name:** Soy Moo (Soy milk) [Plain, or Carob].

Manufacturer’s Name: Health Valley Natural Foods (Importer). Made in Ghent, Belgium by NV Vandemoortele, Protein Div.

Manufacturer’s Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1984 February.

Wt/Vol., Packaging, Price: 16.9 oz Tetra Brik Aseptic carton. Retail: \$1.75 for plain or \$1.99 for carob.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Food Report (Lehmann). 1984. March. A 16.9 oz aseptic carton. Shurtleff & Aoyagi. 1984. Soy milk Industry & Market. p. 33, 44. “In late 1983 Alpro/Vandemoortele picked their first master distributor in the U.S., Health Valley in Los Angeles, which will appoint the product’s actual distributors.”

Talk with George Mateljan, founder of Health Valley. 1985. Oct. 20. Soy Moo is made by Alpro/Vandemoortele in Belgium.

Shurtleff & Aoyagi. 1985. Soy milk Industry and Market, Update. “During early 1985 Alpro continued to make a private-label soy milk, brand-named Soy Moo, for Health Valley in Los Angeles. Then in mid-1985 Health Valley switched to having their product made in America, probably from powdered soy milk, packaged in 250 ml and 1 liter Tetra Brik cartons by a contract packer in the western USA.”

Golbitz. 1987. *Soya Newsletter*. March/April. p. 8. After severing ties with Vandemoortele in 1985, Health Valley worked for nearly a year on a new Soy Moo soy milk and re-launched the product in the fall of 1986.

Soyfoods Center taste test. 1988. Sept. 4. Watery. Brown color. Powdery taste but OK, not bad.

1461. Kotsch, Ronald E. 1984. Natural foods pioneer Erewhon: An industry leader’s tough fight to survive. *East West Journal*. Feb. p. 24-29.

• **Summary:** A very well written and accurate history of Erewhon from its founding in 1966, to its declaration of Chapter 11 bankruptcy in the fall of 1981. The company was able to clear its \$3 million indebtedness by paying 11 cents for each dollar owed. In early 1982 “the company was sold by the Kushis to Ron Rossetti, owner of the Nature Food Centres retail chain. Later that year [in July] Rossetti accepted as financial partners Charles T. Verde and Cynthia C. Davis, who became respectively president and vice president of marketing. Since then the operation has been

totally in their hands. Erewhon has a production facility at Natick, Massachusetts.” A photo shows Davis and Verde with 5 Erewhon products.

“The story of Erewhon is a dramatic one. Founded in Boston in 1966 on the thinnest of shoestrings it soon began to grow at a phenomenal rate. By the mid ‘70s it was the most powerful force in the burgeoning natural foods industry, respected as a leader and innovator, with annual sales of over ten million dollars. Several troubled years culminated, however, in 1981 with a petition for protection under the Chapter Eleven ‘bankruptcy’ statute. Only a change in ownership and management prevented the disappearance of the company altogether. Phoenix-like, it has continued but is substantially changed. Erewhon’s history is instructive as well as dramatic. It reveals something basic about the nature of ‘new age’ or idealistic, service-oriented business, and the perils of success, as well as failure, for those who practice it.

“In 1965 Michio and Aveline Kushi, a Japanese couple in their forties, moved to Boston. Their purpose was to teach macrobiotics, the philosophy, way of life, and diet formulated by their mentor, Georges Ohsawa. They rented a house on a side street in North Cambridge. Michio began to lecture in the evenings, and Aveline prepared meals for the lecture guests and gave cooking classes.

“The core of their message was simple. Food is a primary factor in physical health, and also in emotional, psychological, and even spiritual well-being. The key to health and happiness is a proper diet, based on whole cereal grains, beans, and indigenous vegetables and fruits. As Ohsawa had written: ‘Food is the basis of life. If food is good then all else will be good as well.’

“Those who came and were convinced wished, of course, to follow the recommended diet. Its elements however were difficult or impossible to obtain. One could no more buy organically grown brown rice in Boston in 1965, than one could purchase samples of the British crown jewels. So the Kushis ordered extra sacksful of rice, oats, wheat flour, and kegs of miso and tamari, stashed them in their hall closet, and began to sell to students.

“In April, 1966, with the help of young former actor Evan Root, the Kushis rented a small basement store on Newbury Street in Boston. With shelving and counters made from planking and cinder blocks, they began to sell a modest array of whole foods. These were macrobiotic staples, with an occasional jar of sesame or apple butter thrown in for excitement. Root and the Kushis decided to name the store ‘Erewhon’ after the utopia in Samuel Butler’s novel, an imaginary place where people had to take responsibility for their own health and where it was a crime to get sick.

“Erewhon was a company therefore founded not on the profit motive but out of a desire to serve the public. From the outset it had two primary aims: to make available the highest quality natural whole foods, and to educate the public in the importance and proper use of these foods. The store was a

natural and necessary extension of the educational activities of the Kushis, and their hope to effect positive healthful change in individual lives and in the society as a whole. At base, it was a kind of missionary enterprise.

“Root managed the tiny business for about a year, then left to start Boston’s first macrobiotic restaurant. Shortly thereafter, Paul Hawken and Bill Tara arrived from the never-never land of San Francisco’s Haight-Ashbury to study with the Kushis. Bright, energetic, gifted with business sense and intuition and committed to the Kushis and their ideas, the two took over and began to develop Erewhon. They moved the store to a larger, more attractive site, greatly expanded the product offering, and began a mail order department. The business began to take off rapidly—more rapidly perhaps than anyone anticipated or hoped.

“The next decade was a period of headlong and often dizzying growth for Erewhon; It began to manufacture and distribute its own product line. It opened retail outlets in Los Angeles, Hartford [Connecticut], Cambridge, and Brookline [Massachusetts]. In a short time it had grown into a large, influential and respected corporation. Throughout, it strove to remain true to its ideals of quality and education. Rather than merely responding to consumer demand the company sought to help the public understand the importance of quality food products. It succeeded to a remarkable degree. Erewhon’s most impressive accomplishments were that it:

+ originated and developed the term and concept of ‘natural foods’ (a direct translation of the Japanese *shizenshoku*) to distinguish its products from the pills and elixirs of the older ‘health food’ industry.

+ manufactured, or contracted manufacturing, according to strict specifications a product line that set industry standards for purity and quality.

+ developed new sources of quality commodities. For example, it encouraged a farm in Arkansas to grow organic rice, promising to then buy and market the crop.

+ established the ‘down-home country store’ ambiance as a model for natural foods stores. The plain wood floors and panelling, the bulk bins and indirect lighting, influenced scores of new businesses.

+ showed broad ecological and social concern: in its retail outlets it encouraged bulk sales to avoid wasteful packaging; it began to use biodegradable cellophane for its packaged foods; it supported coops and communes through direct wholesale transactions; and it began to distribute to supermarkets in order to reach the general public.

+ published educational flyers and pamphlets on food and nutrition, and used its packaging to provide information to the consumer.” Continued.

1462. Kotsch, Ronald E. 1984. Natural foods pioneer Erewhon (Continued—Part II). *East West Journal*. Feb. p. 24-29.

• **Summary:** Continued: “In these years the company was

unique not only in its activity in the marketplace but in its internal organization as well. Erewhon was basically an extended family, held together not by blood bonds but by common beliefs and aspirations. The Kushis, 'Mom and Pop,' exercised an ultimate but benevolent authority. Day to day management and much long term policy making was in the hands of a succession of young, idealistic 'adopted sons,' Hawken and Tara, followed by Roger Hillyard, Bruce MacDonald, Ty Smith, Bill Garrison, Jeff Flasher, and others. Most of the employees at all levels were macrobiotic and were committed to the Erewhon mission. Hence there was little or no gulf between managers and workers. All wore the same outfit of jeans and vests, and went to the same lectures and parties. All ate their macrobiotic lunch provided free in the company lunchroom. People worked hard for modest wages but were recompensed by a clean, harmonious environment, and by job security. One could leave for an extended period and return assured of a position. The company took care of its own.

"There were of course tensions, but they were minor and in retrospect seem almost humorous. There was the great debate, for example, over whether the retail store should carry tomatoes, potatoes, bananas, and other reasonably wholesome but not strictly macrobiotic foods. The decision in the end was 'yes,' the rationale being that if people wanted these foods, Erewhon should give them the best available. It couldn't expect every customer to be macrobiotic. In general it was a heady, idyllic period.

"Somewhere, somehow, though, things began to go wrong. A decision was made to move the factory and warehouse to a large facility in East Cambridge and to expand the product line and the distribution network. The transfer and expansion took much more time, energy, and money than anyone expected. Large bank loans were made just when interest rates were skyrocketing. Suddenly the company found itself deeply in debt, struggling to keep up repayment schedules. Meanwhile, because of rising production costs, smaller profit margins, and increased competition, revenue from sales decreased. Anxious to generate more cash, Erewhon expanded its product line even more, including yogurt and cheeses, vitamins and supplements. Amid an atmosphere of ideological compromise there were more loans, more interest, more pressure.

"Within the company serious problems of morale and loyalty were developing. At the new expanded facility the family model of organization ceased to pertain. Fewer and fewer of the employees were actually macrobiotic. It was growth and size that led to difficulties among the lower echelons, the people roasting granola and loading rice on trucks. Doing dull work for a large impersonal company, even when it has a grand, altruistic design, is still doing dull work for a large impersonal company.

"There were indications of theft, waste, malingering,

and abuse of privilege throughout the company. Between the managers and the workers a perceivable gap opened. Separation was followed by resentment and discontent. There was a unionization initiative, a strike, and then a movement to 'de-unionize' the company. In the end the union was voted out. The cost, in legal fees, was a quarter of a million dollars, and in time, energy, and harmony, almost incalculable.

"As a result of these various pressures the company became less and less able to pay its bills. Finally, in the fall of 1981, it filed for bankruptcy under Chapter Eleven—a front page story in the *Boston Globe*. The natural foods industry's Rock of Gibraltar had begun to slip beneath the waves.

"Every failure has much to teach us. In Erewhon's near fatal crisis one key lesson may be that 'small is beautiful.' For an organization fueled by idealism and held together by personal commitment, growth past a certain point is a dangerous gamble. Many, perhaps most, of Erewhon's difficulties stemmed from the decision (perhaps never explicitly made) to expand as much as possible. This led to a rate of growth which the company simply was not able to handle. An organization presided over by 'Mom and Pop' and managed by 'inspired amateurs,' few of whom had prior management training or experience, was not ready to cope with the pressures and decisions. Educated, shrewd professionals were needed. When high-priced consultants were finally brought in, it was too little too late.

"The disaster could perhaps have been avoided. Erewhon might have consciously rejected the intoxicant of growth and decided to remain small. It could have remained a local purveyor of macrobiotic products and used its resources to establish similar firms or franchises in other regions. The bananas, yogurt, and vitamins might have been left to others. Even had it not chosen to limit its size, Erewhon might have avoided serious problems with preemptive innovations. A few competent business people early on might have helped. The labor relations crisis might have been avoided by introducing job rotation, a profit-sharing plan, and employee stock options. Had the Kushis, who remained sole owners throughout, been more willing earlier to share that ownership and control, financial partners could have been taken in. The cash flow and interest payment problems would have been eased.

"Of course, with the cheap wisdom of hindsight, it is easy to array above the smoldering ruins the 'what if's' and the 'might have been's.' The fact remains that as it was organized and run the company could not survive in the slack economy of 1979-1981.

"Happily though, Erewhon did not disappear. In early 1982, after several months in the limbo of negotiation, the company was sold by the Kushis to Ron Rosetti, owner of the Nature Food Centres retail chain. Later that year Rosetti accepted as financial partners Chuck Verde and Cynthia Davis, who became respectively president and vice president

for marketing. Since then the operation has been totally in their hands.

“Recently I met with Verde and Davis, who were accompanied by Jeanne Bock, a pre-Chapter Eleven employee of Erewhon who now handles public relations for the company. Verde, an affable, energetic man in his forties, has a master’s degree in marketing, and worked for years in management and marketing at Mennon and Gillette. Davis is a tall, articulate, business-like woman with a Harvard MBA and also with experience at Gillette. We sat in a plush meeting room at Erewhon’s production facility in Natick, Massachusetts and discussed the company’s recent past, its present, and its future.”

The rest of the article is about plans for Erewhon’s future.

1463. Shurtleff, William; Aoyagi, Akiko. 1984. *Soy milk industry and market: Worldwide and country-by-country analysis*. 2 vols. Lafayette, California: Soyfoods Center. Vol. 1, 199 p. Vol. 2, 100 p. Feb. 28 cm. [165 ref]

• **Summary:** A comprehensive overview, worldwide, with extensive historical information. The first study of its type, with many statistics, graphs, and tables. Volume 1 is the market study, and Volume 2 is black-and-white copies of soy milk labels and other graphics.

Contents: 1. Introduction. 2. Directory of soy milk manufacturers and related companies worldwide. 3. Definitions and varieties of soy milk. 4. Overview of world soy milk industry and market, and future outlook. 5. United States soy milk industry and market. 6. Japan. 7. Korea. 8. China. 9. Taiwan. 10. Hong Kong. 11. Singapore and Malaysia. 12. Southeast and South Asia: (13. Vietnam. 14. Thailand. 15. Philippines. 16. Indonesia. 17. India. 18. Sri Lanka). 19. Europe (Incl. Plamil Foods in England, Tetra Pak Group in Sweden, Alfa-Laval and John Wilson in Sweden, Danish Turnkey Dairies–DTD and Soya Technology Systems (STS), Alpro / Vandemoortele in Belgium, Nestle, F. de Selliers in Belgium, Dansk Sojakefabrik in Denmark, Lima Andiran in France, Galactina in Belp, Switzerland, and Semper A.B. in Sweden).

20. Latin America. 21. Africa. 22. History of Vitasoy in Hong Kong. 23. Two modern soy milk manufacturing processes: Marusan and Alfa-Laval. 24. Etymology of the word “soy milk” worldwide. 25. Analysis of ingredients in 49 popular Japanese soy milk products. 26. Bibliography. 27. About the Soyfoods Center. A table on p. 12 gives an overview of world soy milk production in 1983 ranked in descending order of annual per capita consumption. These statistics do not include China (PRC) or soy-based infant formulas, usually made from soy protein isolate. 1. Taiwan, 210 million liters, 11.1 liters / capita, growing at 30% per year. 2. Hong Kong, 39.1 million liters, 7.5 liters / capita, growing at 10% per year. 3. Singapore, 11.2 million liters, 4.7 liters / capita, growing at 15% per year. 4. South Korea,

67.0 million liters, 1.60 liters / capita, growing at 60% per year. 5. Malaysia, 21.4 million liters, 1.53 liters / capita. 6. Japan, 131.8 million liters, 1,10 liters / capita, growing at 101% per year. 7. Thailand, 50.0 million liters, 1.00 liters / capita. 8. USA, 9.6 million liters, 0.04 liters / capita. Total world production: 548.3 million liters.

Page 36 gives an overview of the U.S. market for soy-based infant formulas and adult soymilk. Production of soy-based infant formulas (on a ready to serve basis) in 1983 was as follows: Ross Laboratories made 14,720,000 gallons of Isomil (i). Mead Johnson made 14,080,000 gallons of Prosobee. Loma Linda made 2,240,000 gallons of Soyolac. And Wyeth Labs made 960,000 gallons of Nursoy. Thus 32,000,000 gallons of soy-based infant formula were made in the USA in 1983.

Also in 1983, consumption of soymilk by adults in the USA was as follows: 1,743,000 gallons were made by specialized soymilk manufacturers in the USA (Loma Linda Soyagen 1,000,000 gallons; Worthington Soyamel 670,000 gallons, Miller’s Soy (private label) 73,000 gallons). 690,000 gallons were imported (328,000 gallons of Vitasoy by Vitasoy USA, 254,000 gallons of Yeo’s by YHS, 50,000 gallons of Edensoy by Eden Foods, 25,000 gallons of President by President, 25,000 gallons of Kibun by Kibun, 8,000 gallons of To-Neu by San-J International). 250,000 gallons were made fresh by tofu companies (45,000 gallons by Mighty Soy, 41,000 gallons by Victor Foods [Scarborough, Ontario, Canada], 39,000 gallons by Quong Hop & Co., 35,000 gallons by Wy Ky, and 90,000 gallons by others).

Yield. 1 ton of raw soybeans yields approximately 4,320 gallons of soymilk. Conversion: 3.785 liters = 1 gallon.

On page 56 is a table of “Large natural food distributors in the US” with the dollar figure being estimated annual sales in millions of dollars.”

1. Rainbow Distributing (Denver, Colorado) \$13.
2. Arrowhead Mills (Hereford, Texas) \$12.
3. Eden Foods (Clinton, Michigan) \$10.
4. Rock Island Foods (Ignacio, California) \$10.
5. Westbrae Natural Foods (Emeryville, California) \$9.
6. Pacific Rim (Seattle, Washington) \$7.
7. Cornucopia Natural Foods (Coventry, Rhode Island) \$7.

Total estimated sales for the top 7 distributors: \$68 million a year.

1464. Shurtleff, William; Aoyagi, Akiko. 1984. Brief history of Alpro in Belgium (Document part). In: Shurtleff and

Aoyagi. 1984. *Soy milk Industry and Market: Worldwide and Country by Country Analysis*. Vol. 1. 177 p. See p. 122-23.

• **Summary:** “In 1975 Alpro, the Protein Division of the Vandemoortele group started making soy milk; they decided to introduce alternative, vegetable proteins to developing countries. This Group, established in 1879, by the 1980s ranked as one of Europe’s largest food processing companies in the fields of edible oils and fats, and protein foods. In 1978 the Group employed over 1,700 people and had annual sales of over \$600 million. In 1979 Alpro started commercial production of soy milk at a plant in Izezem with a capacity of 6,000 liters/hour. They also sold a turnkey soy milk plant to Madagascar (it started production in January 1984) and were attempting to sell compact soy milk plants with capacities from 4,000 to 8,000 liters/hour to other countries. In May 1984 Alpro opened a new soy milk plant at Ghent, reputed to be the largest in the world. The 100% natural soy milk is made from whole soybeans, not soy protein isolates, and is sold under three brands: Soyamel, Alpro, and Provamel. Alpro will look to the U.S. and Asia for additional markets for this product, since the European market is small. They plan to focus on areas with protein shortages or lactose intolerance. In October 1983 an Alpro representative visited the USA and lined up Health Valley in Los Angeles as a master distributor. In early 1984 Alpro got distribution on the East Coast of the USA. Alpro sells quite a bit of its soy milk to other European food companies, which sell it under their individual brands. DE-VAU-GE in West Germany and Granose in England, for example, sell plain and carob soy milks (made by Alpro) in 500 ml packs. The main figures behind Alpro are Philip Vandemoortele (Managing Director) and Christian Daems (Marketing Manager).” Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1465. Shurtleff, William; Aoyagi, Akiko. 1984. Large natural and health food distributors in the United States (Document part). In: Shurtleff and Aoyagi. 1984. *Soy milk Industry and Market: Worldwide and Country by Country Analysis*. Vol. 1. 177 p. See p. 56-57.

• **Summary:** These two tables were compiled from various reliable sources: (1) Natural food distributors. (2) Health food distributors. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1466. Colbin, Annemarie. 1984. Re: Development of macrobiotics in New York after 1961. Letter to William Shurtleff at Soyfoods Center, March 15. 1 p. Typed.

• **Summary:** “After Herman Aihara and the Chico group left New York in 1961, and the Kushis left in 1963, something of a void was left. Irma Paule remained to run the Ohsawa Foundation on Second Avenue. She offered food and books for sale, macrobiotic meals, and advice, until 1966, when the Foundation was closed as a result of the uproar caused by the death of Beth Ann Simon.

“In 1965 Howard Rohrer [sic, Rower] established Infinity Foods, a macrobiotic and natural foods warehouse, that was a prime wholesale source for many of the early groups and students. He imported from Tokyo CI [Centre Ignoramus], which ‘guaranteed’ the foods quasi-medicinal effects. The food was top quality.”

A key figure in New York during this period was Michel Abehsera, a young Jewish French Moroccan, who began the macrobiotic diet and studies with Ohsawa in 1961. In the summer of 1964 he arrived with his wife in New York from Paris. For the next year they ran a small but popular macrobiotic restaurant in their home in the West Village. He then ran a number of successful restaurants and published influential books on macrobiotics.

“In 1972 Annemarie Colbin started teaching a course called, ‘Macrobiotics: An Alternate Lifestyle,’ at the New School for Social Research; the course became quite popular and was offered for four semesters. Shizuko Yamamoto had been quietly teaching for several years, and now began to publicize more widely her classes in shiatsu and macrobiotic cooking. The New York East West Center for Macrobiotics was founded by her in 1975, with Serena Silva as president, Annemarie Colbin as vice-president, and herself as treasurer. The Center first functioned in a small apartment on West 21st Street, and later moved on to spacious quarters on West 44th Street.

“Nobi Ozaki took over the center in 1977, but it eventually closed the following year. Shizuko Yamamoto continued teaching shiatsu and counseling. In 1977, Annemarie Colbin opened The Natural Gourmet Cookery School, which is still in operation as of this writing (1984); the School offers cooking classes based on broad macrobiotic principles. Colbin’s cookbook, *The Book of Whole Meals*, was published in 1974.

“In the early 1980’s, a new organization, the Macrobiotic Institute of New York, was formed by Kezia Shulberg, with the support of Yamamoto and the East West Foundation of Boston. The Center began offering lectures by Michio Kushi and other macrobiotic teachers such as Bill Spear and Murray Snyder, as well as cooking classes. Other teachers appeared independently here and there, offering classes, lectures, consultations, and Sunday suppers. At the time of this writing, macrobiotics in New York is alive, diversified and eclectic.” Address: 365 West End Ave., New York City, NY 10024. Phone: 212-580-7121.

1467. Miner, Jo Ann. 1984. Aloe vera juice and ‘Funoodles’ were attention-getters at Natural Foods Expo at Anaheim. *Santa Ana Register (California)*. March 22.

• **Summary:** “There were many tofu products—everything from frozen entrees to burger mix to dairy-free frozen desserts. Tofutti, a soft-serve type [non-dairy] frozen dessert that debuted last year is really delicious.”

1468. Chico-San, Inc. 1984. Chico-San Rice Cakes never looked so good (Ad). P.O. Box 810, Chico, CA 95927.

• **Summary:** This full-page color ad shows two lines of eight Chico-San Rice Cakes in new eye-catching packages: Millet added, Sesame added, Rice only, and buckwheat added, each in low sodium or sodium free. “More than 400 television stations coast-to-coast will carry the Chico-San story this year... Also, look for our ads in national magazines: Prevention, American Health, New Age Journal, Bestways, East-West Journal, and Whole Life Times.”

Note 1. Ads for Arden Rice Cakes, a competing product, began to appear in 1984 (East West Journal, Feb. 1984, p. 15; Natural Foods Merchandiser. 1994. Feb. p. 93). Note 2. Talk with Michael Potter of Eden Foods. 1984. Feb. 3. Chico-San is mainly a rice cake company. Their total sales are about \$17 to \$19 million of which \$15 to \$17 million are from rice cakes. Address: Chico, California.

1469. Fieldman, Anita. 1984. Spotlight on Westbrae Natural Foods. *Whole Foods*. March. p. 22.

• **Summary:** The company was started in 1970 by Gordon Bennett, Kristin Brun, and a few friends making and distributing granola and fruit juice for San Francisco Bay Area stores. Today Westbrae is a \$7 million corporation with a line of 150 products in a 50,000 square foot facility in Emeryville, California. Most of the Westbrae labels are designed by San Francisco artist David Gauger. The company deals with about 50 distributors and 1-2 brokers. They do not sell directly to retailers. A photo shows Gordon Bennett.

1470. *Natural Foods Merchandiser*. 1984. 5th Annual Natural Foods Merchandiser Merchandising Awards: [Silver: Polar Bean by White Wave, Inc.]. March.

• **Summary:** “Silver awards: Penguins wearing earmuffs. On any other frozen dessert product, the approach might appear flippant. But White Wave pulls it off with a colorful package, humorous cartoon characters and a simple package shape...” The result is to create an alternative to the serious “gourmet” look conveyed by most ice cream packages these days. A color photo shows the front of a package of Polar Bean Dairyless Frozen Dessert.

1471. Miller, Jim. 1984. Soy Deli cases in Raley’s and Safeway. Fermented tofu must be refrigerated (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The first soy deli cases went into Raley’s supers in Reno, Nevada, and Sacramento, California, on 16-17 May 1983. Raley’s has now dropped the coolers, but integrated the soyfoods in with their other products in the natural foods section of the store. Safeway is keeping the coolers. A new area of interest is high-volume natural foods stores and co-ops. In March the Puget Consumers Co-op in Seattle,

Washington, and the Arcata Co-op in Arcata, California, each took a cooler.

Quong Hop’s fermented tofu now retails for \$1.75 per pint (16 oz.).

Starting about a year ago, the California state Board of Health required Quong Hop to ship and sell all of its fermented tofu refrigerated. This ruling applies to any fermented tofu made in the USA because the manufacturing process does not conform to cannery standards which are designed to prevent botulism; under extreme conditions botulism spores grew out on furu. Yet imported fermented tofu is not under this regulation because, it is believed, that its overall medium of salt and alcohol acts to prevent botulism.

Miller estimates that 500,000 lb/year is imported. The imported product retails on average for \$1.30/lb. Address: V.P. Marketing & Personnel, Quong Hop & Co., 161 Beacon St., South San Francisco, California 94080. Phone: 415-873-4444 or 761-2022.

1472. Warsh, David. 1984. A new trend for businesses. *Boston Globe*. April 22. Economy section.

• **Summary:** “Paul Hawken was just 21 when he started Erewhon, a health foods retailer in Cambridge, in 1967 with \$500 in cash. He built it into a big little business, sold it in 1973, moved to California from Boston and undertook a series of turn-arounds, ‘to see,’ he says, ‘if I really knew something about business.’

“He did. When he decided that the mesquite charcoal that one little company sold to restaurants was an ingredient instead of a fuel, he doubled the price, and also doubled the demand. Suddenly a charcoal stove was a status symbol. You can’t go into a California restaurant without being offered mesquite-flavored chicken, mesquite-flavored fish.

“Today Hawken runs Smith and Hawken, a beautiful little mail-order tool business with \$5 million in sales. ‘What I’m good at is seeing how markets change. I could probably start a conceptually sound business a week,’ he says, ‘but I lose interest after a certain point. I don’t have an instinct for the jugular.’

Hawken is in Boston promoting the paperback edition of his new book, “The Next Economy: What to do With Your Money and Your Life in the Coming Decade.” It is about the coming information-based economy. He is already at work on another book to be called “Corporate Courage.” Its about what corporations really are and how they function. “It will open with a history of their development from what he calls ‘the original sin’—the invention of limited liability in the last century.

“I learned my lesson at Erewhon, the hard way, very early on,” says Hawken. “One day a customer came into the Newbury street store and said, “How do you know these products are really as pure as you say they are?” So I began investigating my suppliers, going out to their farms, and what

I found was outrageous. Half of them were lying to me about not using chemicals. In the end I had to put the entire system together myself.” Address: Globe staff, Massachusetts.

1473. **Product Name:** Bean Supreme Tofu [Bulk, or Vacuum Pack].

Manufacturer’s Name: Bean Supreme Soyfoods.

Manufacturer’s Address: P.O. Box 78-084, 1 Wallingford St., Grey Lynn, Auckland, New Zealand. Phone: 09-764-988.

Date of Introduction: 1984 April.

Ingredients: Whole soybeans, water, natural coagulant.

Wt/Vol., Packaging, Price: Bulk, or 250 gm vacuum pack.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 121, moisture 76.9 gm, protein 12.0 gm, carbohydrate 3.4 gm, fat 6.7 gm, ash 1 gm, sodium 3.3 mg, calcium 170 mg.

New Product–Documentation: Poster. 1986. Letter from Alan Tam. 1986. Nov. 18. Bean Supreme makes about 1,000 to 1,500 lb/week of tofu. Form filled out by Trevor Johnston, Marketing Director. 1989. April. The company started producing soyfoods in April 1984, and fresh bulk tofu was their first product. In Aug. 1984 they started vacuum pack tofu. They presently make 3,000 lb/month of the former and 7,000 lb/month of the latter. “Tofu is still growing, albeit slowly.” The company is now Bean Supreme Ltd., Hugo Johnson Drive (P.O. Box 78-084), Penrose, Auckland, New Zealand. Phone: (09) 590 592. They are also involved with Bio Farm, Ro Quark, Spiral Foods, and Musashi. They also distribute other small manufacturers’ products and import from Muso-Osaka.

Label for Bean Supreme Tofu, Firm Style. 1989. 6 by 7 inches. Purple and white on clear plastic bag. “High protein. Cholesterol and lactose free.” Suggested uses: “Mash with seasoning to resemble cottage cheese. As a base for blended dressings or dips. Slice and marinate to fry or broil. Add to casseroles or savoury loaf, low calorie fruit whip, homemade ice cream or cheesecake. For recipe leaflet send stamped envelop to address below.”

In about Feb. 1990 the company changed its name from “Bean Supreme” to “Down to Earth Natural Products Ltd.” Bean Supreme will remain as a brand name for their existing and expanding range of traditional soy products.

1474. Kotzsch, Ronald E. 1984. Paul Hawken: Prophet of the next economy. *East West Journal* 14(4):32-37. April. [1 ref]

• **Summary:** From 1967 to 1973 Hawken was involved in the Boston macrobiotic community. Contains a brief history of Hawken’s pioneering work in establishing Erewhon as a major distributor of macrobiotic and natural foods. Four good photos show Hawken, including a full-page color cover photo. Address: Dartmouth, New Hampshire.

1475. Leviton, Richard. 1984. The organic Garden of Eden:

A Michigan-based natural foods company [Eden Foods] stresses quality and fidelity. *East West Journal*. April. p. 18, 20-23.

• **Summary:** A good history of Eden Foods (although the early dates are incorrect), which has blossomed from a student-run co-op in Michigan in 1967, to a nationally recognized name in 1984. Based on an interview with Mike Potter, who had become interested in macrobiotics in 1967 when, sick with hepatitis in California, he met Herman and Cornelia Aihara and found that macrobiotics “all articulated my own intuition.” Potter is now a seasoned businessman, with 13 trips to the People’s Republic of China and 7 to Japan.

“Eden’s beginnings are a little vague, Mike Potter explains... In July 1967 a group of students in Ann Arbor began distributing macrobiotic staples from Boston. This effort eventually led to a co-op called Eden Foods; in 1968 it became a full-fledged, though small, retail store. Around 1969 Potter visited Ann Arbor and the brand new Eden Foods. At the time, he was busy managing a natural foods store in nearby Birmingham [Michigan].

“In these days Judy and Bill Bolduc and Tim Redmond owned the 1,500 square foot Eden store. By 1971 the group was milling flour and baking granola and they asked Mike [Potter] to become a manager with an ownership position. In 1973 they moved the manufacturing end into a much larger building a half block away, and sales topped \$175,000 a year. By late 1973 Eden was sharing a building with competitor Midwest Natural Foods and co-distributing products. They also relocated their retail store, adding on a natural foods restaurant and a whole grain bakery, and employed 25 people. By 1972 Potter and the Bolducs had begun to distribute their products using first a Dodge van, then a couple of refrigerated twenty-foot trucks. But all this relocating and moving the retail store about, which had been underwriting the wholesale and manufacturing aspects, used up their cash flow. Financial troubles ensued. Mike bought out the Bolducs. ‘I can make this thing work, he told them.

“Potter traveled to Japan and made important contacts with Muso, a leading macrobiotic supplier. Eden imported Erewhon-branded products directly from Japan. They started searching Michigan farms for organic crops... A cornerstone of Eden policy since 1973 is support of local Michigan farmers. Eden supports sixteen farms in Saginaw Bay which grow organic grains and beans (and three organic rice growers elsewhere) for a total of 6,000 acres [in 1984]—up from 1,000 in 1977... In 1977 Eden opened Turtle Island restaurant, which stayed open until the fire. In 1978 Eden started to advertise in magazines. But the company had grown wobbly, bureaucratized, and unwieldy.”

“Late in the evening of November 26, 1979 the Eden warehouse was consumed and destroyed by flames... An estimated \$800,000 in inventory, machinery, and supplies were lost, much of it irreplaceable, since the eventual

insurance settlement covered barely one half the loss. Most old-timers at Eden agree that the fire was ultimately highly beneficial... 'The fire was constructive,' says Ron Roller. 'The energy here was stagnated, with too many departments each claiming a turf. The management was in disarray; a change was needed...' The Eden of 1979–2,400 products, 100 employees, a natural foods restaurant, a whole grain bakery, a retail store in Ann Arbor, several tractor trailer trucks, a \$50,000 computer with eight terminals, a 10,000 square foot building—burned to the ground. Eden, somehow, was out of operation for only two weeks after the fire. Immediately it began to function in an empty 5,000 square foot building next door (the truck garage). They got the cash flowing again on an inventory staggeringly depleted. The insurance company gave them a depressingly small advance against damages and refused to settle on the claim. Eden was advised to declare bankruptcy.” About a year after the fire, construction on the new building was completed. By 1980 Eden had moved into this 20,000 square foot building at 701 Tecumseh Road in the tiny town of Clinton, Michigan, (population 2,000) about 60 miles southwest of Detroit. It was 27 months [2¼ years] before the final settlement.

In 1982 Eden imported 25 container loads (each weighing 35,000 lb) of Japanese natural foods, including natto miso and buckwheat miso. Ron Roller is now purchasing manager, Bena Burda is sales manager, Bill Swaney is production manager, and Kathy Nohr is office manager. Cliff Adler and Mike Gorman are also key co-workers. The company has nine shareholders, of whom seven are daily employees. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

1476. Rossoff, Peggy. 1984. Tamari and shoyu: Twin foods with a single heritage. *MacroMuse*. Spring. p. 8-9. [4 ref]
 • **Summary:** “Tamari and shoyu rightly earn their place as staple foods. These two soy sauces are the careful and patient transformation of whole soybeans, water, koji and salt into undeniable enhancer in flavor and nutrition of the foods they season. Miso is the forefather of both, yet over the years there has been confusion over their differences. The evolution of these two foodstuffs has been as fascinating and intricate as the process which produces them.

“Tamari’s history dates back as far as the eighth century in Japan. It came from the liquid which rose to the surface or settled to the bottom of miso kegs and was used as a seasoning much as we use it today. If miso is drained too much in this way it becomes weak and unstable. Thus, this early tamari enjoyed limited use. It’s taste, however, was so valued (poems were created in its praise) that Buddhist monks began to experiment with new techniques, using more water than in the usual process of miso making, to obtain more of the treasured liquid.

“Up to the 1400’s tamari was known as the liquid extracted from soybean or barley-soybean miso. Later,

the name ‘tamari-shoyu’ was given to the latter product to distinguish it from the sauce drawn from an entirely (or nearly so) soybean miso.

“In the mid-seventeenth century, tamari-shoyu makers began to experiment with the substitution of roasted, cracked wheat for the barley. The product, which contained a higher quantity of simple sugars and some alcohol from the breakdown and fermentation of the wheat, resulted in its new name—‘shoyu’. At this point, its separation from miso production became a clear one. Today, most tamari is produced in much the same way as shoyu except that it contains no wheat.

“Confusion arose over these two products from the following incident, related in a letter by Lima Ohsawa to Chico-San, Inc. in 1983, and shared with MacroMuse by Bill Shurtleff, promoter and historian of soy foods. Lima states in her letter:

“In 1958 George Ohsawa gave a lecture at a university in Hamburg, West Germany. The lecture hall was packed with some 400 to 500 people. Among them was a young man [who] was running an organic school in Germany. After the lecture he came to Mr. Ohsawa and earnestly inquired about various aspects of the Unique Principle.

“At that time there was also some talk about shoyu. As soon as he tasted this shoyu, he registered the word ‘shoyu’ as his own trademark and brand name, so that only he could sell it under this name. We came to know about this later and thought that it was a terrible thing for him to do. We were troubled by his action, for in Germany the law concerning registered trademarks was very strict. Therefore, in Germany, we were unable to call shoyu by its proper name. Out of sheer necessity, we decided to call shoyu by the name ‘tamari.’ After that, people in Europe started to call shoyu by the name ‘tamari’.

“In Japan we call the liquid from soybean miso by the name ‘tamari shoyu,’ and it has been used in fine restaurants and for high class recipes. It is a type of shoyu.’

“The distinctions of tamari and shoyu deserve focus. Tamari has a stronger flavor, darker color and thicker consistency than shoyu. Some say it imparts its own flavor to foods, while shoyu enhances food flavors. Yet Shurtleff points out that tamari contains 36% more glutamic acid (a naturally-occurring flavor enhancer) than shoyu.

“Tamari, while higher in protein (9.8%) than shoyu (5.2–5.6%), is not by itself as well balanced in amino acid content as part of a grain-based meal, however, this is certainly no detriment.

“Don’t let the lighter color of shoyu fool you. It is somewhat saltier than tamari. Therefore, you can use slightly less, and its lighter color does not drastically alter, as tamari does, the vibrant colors of vegetable side dishes.

“Those with food sensitivities would do better with tamari. This is because shoyu contains equal amounts of wheat and soybeans. Wheat is a common food irritant for

such people.

“Tamari, miso, shoyu—the most important fermented soy foods—vary much as wines do. The final products will taste different according to the quality of raw materials and the fermenting agent (koji), seasonal and climatic changes during the aging process and the processing itself. You must taste to know.

“While choosing your soy sauce (or sauces) can be a very personal thing, be sure first of the integrity of the producer. Most, but not all, of the soy sauces available in natural food stores are offered by companies using traditional methods and the strictest standards. High quality ingredients are used, including whole soybeans, and the final product has been fermented in wooden kegs for twelve to twenty-four months. Their taste will vary greatly from modern chemicalized soy sauces which can be produced in as little as two days.

“True tamari and shoyu, besides being delicious seasonings, are beneficial for maintaining health. They stimulate digestive activity, destroy unfavorable microorganisms and encourage the growth of beneficial organisms in our intestines. Their salt is truly ‘mellowed’ by aging; it is in excellent form to be assimilated by our body cells and to maintain an alkaline blood condition. Tamari and shoyu are sources of vitamin B12 and help preserve nutrients present in foods (such as vitamins A, C and E). Since they contain active enzymes (whose activity is occasionally discernable by white flakes which rise to the surface), consuming these traditional foods helps our bodies in breaking down and absorbing other high protein foods such as beans and seeds.

“Is it any wonder that tamari and shoyu have been used so long for home medicinal remedies? When combined with bancha tea (and sometimes umeboshi), they are powerful weapons against headaches, hangovers, indigestion, acid blood and fatigue. Tamari and shoyu are a twin team which benefits our lives.”

Four sources are cited. Address: Rockville, Maryland.

1477. Troy, John. 1984. Work with miso and American Natural Foods (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John dropped out in the 1960s. He has always loved to eat. He does not remember when he first heard of miso, but he probably first tasted miso or used it in a recipe in about 1976. That was the year he met Joel Dee of Edward & Sons. John started using miso in about 1980, on spiritual retreats when he was the cook. He brought in all the visiting gurus. When John Belleme and Barry Evans set up their American Miso Company they called him and invited him to visit. He was very, very impressed and soon got involved. Hot Stuff, his first product that contained miso, was introduced in early 1981. Hot Stuff originated when one end of a little string of hot peppers fell into the blender. He thought, “I’m gonna make me a hot sauce,” so he tossed in

lots of macrobiotic ingredients that were on his lazy susan—including miso and umeboshi- and “hit it pretty close.” He decided to bottle it, so he located a bottling company. Not long after that he met John Fogg, introduced him to the fascinating subject of marketing and changed his life forever.

John is now working with Jimmy Silver and Jeffrey Hilgert of Pure and Simple (San Jose, California) in developing Hot Chips, which will be made by using powdered Hot Stuff for dusting corn chips. John is now also doing a private offering in North Carolina to raise money; a public offering is 3-5 years away.

Update: Talk with John Troy. 2000. June 26. John was working at a little natural foods store named Beautiful Day (in Durham, North Carolina) one day when Joel Dee drove up in a car peddling Miso Cup, a new product, sold in little packets. This was the first time that John can recall ever seeing miso or Miso Cup. Address: Suite 21, The Courtyard, Chapel Hill, North Carolina 27514.

1478. *Wall Street Journal*. 1984. “Health-food” stores aren’t just for wheat germ and tofu anymore. May 24. p. 1, col. 5.

• **Summary:** “Nowadays they’re also for pizza, potato chips, candy and many other items that suspiciously resemble those in ordinary supermarkets.”

1479. American Natural Foods, Inc. 1984. Confidential private placement: Offering circular, May 1, 1984. Suite 21, The Courtyard, Chapel Hill, NC 27514. 40 p. 28 cm.

• **Summary:** Contents: American Natural Foods, Inc. (ANF)—Offering circular. Risk factors and capitalization (One million shares are offered for \$150,000. Four million shares have been issued to the principals in this venture and 4 million shares have been issued to the former Shareholders of Elf Works, Ltd. If fully subscribed, the total proceeds from subscriptions and from investment by the principals will be as follows (in millions): John C. Troy \$2.4. Jeffrey Hilgert \$1.040. James Silver \$1.040. John Fogg \$0.80. Hague C. Bowman \$0.600. Ernest G. Golding \$0.600. Thomas D. Higgins, III \$0.600. etc.). Owners of shares in Elf Works Ltd. Capital leveraging. Application of proceeds. Terms of offering. Description of securities. Summary of the merger between American Natural Foods, and Elf Works, Ltd. Obligations of and to American Natural Foods, Inc. Legal options. Exhibit A: Corporate stock redemption agreement. Exhibit D: Employment agreement. Exhibit E: Contract between ANF and American Miso Company, Inc. Exhibit F: Contract between ANF and Mrs. Campbell’s Canning Co., which has a plant in Winston-Salem, North Carolina. Exhibit G: Exclusive distributorship agreement between ANF and U.S. Naturals (Novato, California). Product schedule. Addendum to exclusive distributorship agreement: Minimum purchase required. The natural foods industry. An overview of the market for health/natural foods (from *Business Trends Analysts = BTA*). Supermarket nutrition centers (from *BTA*).

Health-natural food chains. The market for health/natural groceries (from *BTA*).

Tables (from *BTA*): (1) Retail sales of health/natural foods by product (shows soyfoods have grown from \$26.1 million in 1977 to an estimated \$163.0 million in 1983). (2) Manufacturers' shipments of health/natural foods by product (shows soyfoods have grown from \$15.8 million in 1977 to an estimated \$101.8 million in 1983). (3) Manufacturers' shipments of health/natural foods, 1977-1993P—dollars per year. (4) Retail sales of health/natural foods, 1977-1993P—dollars per year (Annual growth is about 25% a year). (5) Retail sales of grocery items in health food stores, by specific product category, 1981-1982. (6) Manufacturers' shipments of natural groceries, 1977-1993P—dollars per year. etc.

ANF financial objectives, by product and by year.
ANF corporate strategy (create single brand identities).
Distribution and sales strategy. ANF overall product strategy.

"Miso soup—Safeguard against cancer," by Bill Shurtleff (from *East West Journal*). "Ah, so you want to try miso: A mountain couple is practicing the ancient art of making this Japanese food," by Beatrice Taylor Quirk (from *Carolina Lifestyle*, Sept. 1982). Color poster titled "It's Hot Stuff." Address: Chapel Hill, North Carolina. Phone: (919) 929-1240.

1480. *Country Reader (Arrowhead Mills, Inc., Hereford, Texas)*. 1984. Adzukis have arrived. 4(1):1. Spring.

• **Summary:** "Arrowhead Mills is proud to add another product to our long list of organically grown beans—Adzukis.

"Adzukis have a somewhat less 'beany' taste than most legumes, with a distinct and delicious flavor. In Japan they are outranked only by soybeans in legume consumption."

"Adzukis are excellent for sprouting plus they can be cooked like other beans."

1481. Price, Charlene C.; Brown, Judy. 1984. Growth in the health and natural foods industry. *USDA Economic Research Service, Staff Report No. AGES840501*. 32 p. May. [24 ref]

• **Summary:** The number of natural food retail stores has increased from about 1,000 stores in 1970 to some 8,000 in 1982. Total sales have jumped from \$140 million in 1970 to a little over \$2 billion in 1983. The three basic foods in the industry are natural foods, health foods, and organic foods. About 37 full-line wholesalers serve the industry.

Table 4 titled "Percentage of health and natural food industry sales held by foods and nonfoods categories"

(1975-1983, p. 15) shows that soy products rose from zero percent in 1975 and 1976, to a peak of 1.5% in 1977, the fell slowly to 0.6% in 1983. The source of these statistics is *Health Foods Business*, annual surveys, 1976-1984. Address: National Economics Div., ERS.

1482. Appropriate Foods, Inc. 1984. Eat Appropriately! Summer catalog '84. 137 New Hyde Park Rd, Franklin, NY 11010.

• **Summary:** The following lines are carried and distributed: Appropriate Foods (tempeh, soymilk), New York Soy Deli, Grainaissance (amazake and mochi), Garden of Eatin', McZand Products, N.Y. Miso, Nasoya, Nutri-Gest, The Soy Source, Sister Shorter, Swan Gardens, Sprout Delights, Willow Run Margarine, Great Eastern Sun (all of their products). Address: Franklin Park, New York.

1483. Eden Foods, Inc. 1984. From the bounty of Eden (Ad for Edensoy soymilk). *Vegetarian Times*. June. p. 21.

• **Summary:** Full page, color. The top half of the ad shows an illustration of a modern Garden of Eden. A family is enjoying a picnic in idyllic surroundings, with a border of flowers, fruits, nuts, butterflies, etc. The bottom half shows a mother with her 5-year-old daughter, who is drinking Edensoy from a glass. Across the bottom is Eden's colorful symbol of a crane with a banner in its bill bearing the word "Musso" in red.

This ad also appeared in *East West Journal*. 1984. June. Back cover. Aug. Inside front cover. And in *Natural Foods Merchandiser*. 1987. July, p. 67.

Note: This is the 2nd earliest ad seen for Edensoy. Address: Clinton, Michigan 49236. Phone: 800-248-0301.

1484. Harnett, Susan Guillory; Vigderman, Patsy. 1984. The great white wave: Protein-rich, low-calorie tofu is a gourmet food for everyone. *New Age Journal (Boston, Massachusetts)*. June. p. 28-30, 32.

• **Summary:** An introduction to tofu plus recipes: Tofu chili. Pineapple cake. Tofu-peanut butter balls. Deep-fried tofu. Tofu gelatin. Homemade tofu. Address: 1. Natural foods cooking teacher and vice-president of Bread and Circus natural food supermarkets; 2. A senior editor at New Age Journal.

1485. **Product Name:** Rice Dream (Amazake-Based Non-Dairy Frozen Dessert) [Hard Pack Pints: Vanilla, Carob, Carob Chip, Strawberry, Lemon, Orange, Carob Almond].
Manufacturer's Name: Imagine Foods, Inc.

Manufacturer's Address: Moniteau Farm, Jamestown, MO 65046. Or P.O. Box 1702, Fayetteville, AR 72702. Phone: 501-443-7216 AR.

Date of Introduction: 1984 June.

Ingredients: Water, cultured brown and white rice, maple syrup, vanilla, soy lecithin, extracts from Irish moss, carob

bean and guar seed, sea salt. Safflower oil was added in assorted flavors by Oct. 1984, and the maple syrup was replaced by a sweeter koji in 1985.

Wt/Vol., Packaging, Price: 1 pint carton.

How Stored: Frozen.

Nutrition: Per ½ cup: Calories 100, protein 1 gm, carbohydrates 24 gm, fat 155 mg, sodium 18 mg. After oil was added: Calories 132, fat 4 gm, protein 1 gm, carbohydrates 28 gm, sodium 18 mg.

New Product–Documentation: Label. 1984, undated.

White and blue on light blue. “Please serve soft for full flavor. No cholesterol. No refined sweeteners. Low calorie. Amasake is a sweet, rich, non-dairy milk made from brown rice.” Poster. 1984, Oct. “Finally! A Great Tasting Ice Cream That Makes No Compromises With Your Health.” Shows Label (dark blue and light blue carton), gives company address as P.O. Box 1702, Fayetteville, Arkansas 72702, and lists 7 hard pack and 4 soft serve flavors, with ingredients. Features: Dairy free, grain based, no refined sugar, fructose or honey, no cholesterol, low sodium.

Ad in East West Journal. 1984. June. p. 15. And in New Age. 1985. May. p. 5. Same title as Oct. 1984 poster. Shurtleff & Aoyagi. 1985. Tofutti & Other Soy Ice Creams. p. 88-89. Letter from Frank Marrero/Allen of Grainaissance. 1987. Dec. 21. Nissenbaum introduced Rice Dream at a natural foods trade show in July 1984 and it took off.

Talk with Robert Nissenbaum. 1988. Feb. 7 and 11. In 1983 he bought the rights to the name Rice Dream for \$2,000 from Gloria Gilbert, owner of Fresh Foods Boulder, Colorado. In the summer of 1984 he was talking with Chico-San, especially Peter Milbury, about his making amazake and their making Rice Syrup in the same plant in Fayetteville, Arkansas, a rice farming center, where the macrobiotic trading company Mountain Ark had just moved. The idea fell through when Bob Kennedy sold Chico-San to Heinz. Robert decided to move his company there anyway. He lived in Fayetteville for 1 year. His present partner, Ken Becker, an attorney, joined the company in the fall of 1984. Then one day Milbury called and said that a company named California Natural Products (in Manteca, CA), which was making a coffee substitute and inulin (for diabetics; a tasteless white polysaccharide found esp. dissolved in the sap of the roots and rhizomes of composite plants) from dahlia tubers, had the necessary equipment. Their process was similar to malting and extracting a syrup, but they used no rice or enzymes. California Natural Products started to make Nissenbaum’s amazake using rice and commercial enzymes in early 1985. They shipped it in a stainless steel tanker to the Peninsula Creamery in Palo Alto, where it was made into Rice Dream. Koji was no longer used. Talk with Robert Nissenbaum. 1988. March 24. The original Rice Dream, from homemade koji, had no added sweetener. Then they added maple syrup to make it a little sweeter. This was discontinued after a sweeter koji began to be made by CNP.

1486. Murray, Frank; Tarr, Jon. 1984. More than one slingshot: How the health food industry is changing America. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. June. Illust. No index. 18 cm. [20 ref]

• **Summary:** A history of the National Nutritional Foods Association (NNFA) and their decades of legal battles with the U.S. Food and Drug Administration (FDA). This is one of the only supportive (non-critical) histories of the health foods movement in America.

Contents: Introduction. 1. How the health food industry began. 2. The vitamin and mineral hearings (prompted by onerous FDA regulations of 18 June 1966). 3. The battle rages on. 4. The struggle over vitamins A and D. 5. NNFA marches on Washington (May 1975). 6. The vitamin bill is finally passed (22 April 1976; Proxmire Bill, signed into law by President Gerald Ford. NNFA victory over FDA). 7. Hanky-Panky in Washington. 8. How the FDA attempted to curtail the sale of health books. 9. NNFA vs. Frederick Stare and Elizabeth Whelan (and the American Council on Science and Health, ACSH, whose current funders and institutional members are listed on pages 187-92). 10. The golden years of PELLL Committee (Public Relations, Education, Legal, Legislative and Lobbying; formed by NNFA in 1955). 11. NNFA supports the Delaney Clause. 12. NNFA’s radio and TV programs. 13. NNFA has many friends. 14. NNFA’s first woman president. 15. What lies ahead. Epilogue.

Frank Murray got involved with the health foods movement in 1963, working for Jack Schwartz at Syndicate Publications. The book was written for the NNFA and not released commercially. Several thousand copies were printed in paperback, selling for \$4.95. A copy was sent to each member of Congress.

The health food industry was born out of the discovery of vitamins and the devitalization of the American food supply (especially white flour since the late 1890s, and white sugar) by large corporations. A few early companies started in the 1920s but most began in the 1930s. It grew on the issues of chemicals and pesticides in foods.

“The National Nutritional Foods Association (NNFA), which has had several names since its inception, has been the spokesman for the health food industry since 1938” (p. 6).

Companies: Akin’s Special Foods (Tulsa, Oklahoma, p. 30-31), Eichenauer’s (Phoenix, Arizona, p. 34-36. Opened in 1938. Early lines included Paul Bragg products, Dr. Walker’s Vegetable Juice Hydraulic Press and books, Gayelord Hauser products and books, Martin Pretorius products and Waring Blender), Vita Food Co. (Washington, DC, p. 34-36. Opened in 1928. A list of products sold in an early catalog includes Lust’s Peanut Butter, Carque’s Almond Butter, Black Mission Figs, Kadota Figs, Manukka raisins, Carque California Health Bars {5¢ each}, Live Food Juicer {\$5.95}), Vic Boff’s (Brooklyn, New York, p. 36. For 48 years he has been associated with the pioneers of

Physical Culture), House of Better Living (now owned by John Quinn and called Quinn's, p. 38), General Nutrition (Pittsburg, Pennsylvania; David Shakarian), Kahan & Lessin Co. (Compton, California), The Landstrom Co. (South San Francisco, CA), Balanced Foods, Inc. (North Bergen, New Jersey), Wm. T. Thompson Co. (Carson, CA), El Molino Mills (City of Industry, CA), Ener-G-Foods, Inc. (Seattle, Washington), Naturade Products (Paramount, CA), Seelect, Inc. (Chatsworth, CA; Max Lessin), Fearn Soya Foods (Melrose Park, Illinois), Hoffman Products / York Barbell Co. (York, Pennsylvania), Worthington Foods (Worthington, Ohio), RichLife, Inc. (Anaheim, CA), Hain Pure Foods (Los Angeles, CA).

Periodicals: *Health Foods Retailing* (New York City; started in April 1936 by Lelord Kordel), *Better Nutrition* (1940 by Jack T. Schwartz), *Health Foods Business* (formerly *Dietetic Foods Industry*, 1950), *Whole Foods* (Jan. 1978), *Natural Foods Merchandiser* (1979 in Hope, Pennsylvania), *Prevention* (1949 by J.I. Rodale), *Let's Live* (1933), *Bestways* (1973).

NNFA Presidents (1938-1981, p. 56-58).

People: Dr. Linus Pauling, Dr. Roger Williams, Dr. Albert Szent-Gyorgyi, Paul C. Bragg, Gayelord Hauser, Adelle Davis, Anthony Berhalter (founded the American Health Food Assoc. and the National Health Foods Assoc., predecessors of the NNFA in 1937), Ben Kanan, Otto Carque, Lelord Kordel, George Spitzer, Milton A. Bass (lead attorney), Max Huberman, Dave Ajay, Stanley N. Phillipps, Martin Pretorius, William T. Thompson, Jack Schwartz; Wayne Walker, Eugene Schiff, and Herb Bristol started the NNFA and kept it going during hard times; Milt Okin. Address: New York.

1487. Murray, Frank; Tarr, Jon. 1984. Balanced Foods, Inc., North Bergen, New Jersey (Document part). In: F. Murray and J. Tarr. 1984. *More Than One Slingshot: How the Health Food Industry Is Changing America*. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. See p. 43.

• **Summary:** "This wholesaler opened for business in 1939 in New York City, at 15th Street and Fifth Ave. In its New Jersey location [2501 71st Street, North Bergen, NJ 07047], it has a 100,000 square foot operation" [mostly warehouse]. Note: North Bergen is very close to New York City. Directly west of Central Park, it is just across the Hudson River from Manhattan, and about 3 miles north of the Lincoln Tunnel under the Hudson River.

"During its formative years, the company was run by Samuel H. Reiser, the current president, and Will Reiser, his brother, and Dr. Maurice Shefferman, both deceased. John H. Reiser and Rhona C. Reiser are vice presidents of the firm. Its subsidiaries include Akin's in Oklahoma and Jacksonville, Florida; Midwest Natural Foods Distributors, Ann Arbor, Michigan; and Northwest Dietetic Supply, Kent, Washington.

"In the early days the health food industry was primitive," Sam Reiser said. "The operators of health food stores were visionaries—idealistic and few of them were merchants. Leading products at that time were the Battle Creek meat substitutes, yeast tablets, vegetable salt, vegetable tablets, carrot tablets and health cereals.

"The health food industry at that time comprised less than 50 stores from Boston [Massachusetts] to Washington [DC], with only about 150 stores in the entire country, he continued. "There were probably no more than six jobbers [wholesalers] to serve the entire industry. Growth of the health food field was very slow, for it was primarily a business catering to diabetics."

Note: An Internet search (March 2006) shows that Sam Reiser died in 1989. His wife was named Helen. One of his sons, Paul Reiser (born 30 March 1957 in New York City) became quite famous as an actor. In 1973 he graduated from Stuyvesant High School in New York City, and in 1977 he earned his BFA (Bachelor of Fine Arts) at SUNY (State University of New York) Binghamton, with a major in piano and composition. In 1996 Paul Reiser established the Samuel Reiser Scholarship Endowment, in honor of his father, for students majoring in piano or composition. When he finished college, his family expected him to take over his father's health food business. But he turned to stand-up comedy and acting instead. He married Paula Ravets on 21 Aug. 1988 and they had a son, Ezra Samuel Reiser, born Sept. 1995. Address: New York.

1488. Murray, Frank; Tarr, Jon. 1984. The Landstrom Co., South San Francisco, California (Document part). In: F. Murray and J. Tarr. 1984. *More Than One Slingshot: How the Health Food Industry Is Changing America*. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. See p. 42.

• **Summary:** "In 1931, in the depths of Depression, Wesley Landstrom began selling fresh milk, cottage cheese, and other items door to door. In 1941, Wesley's brother, Lloyd Landstrom, took over the growing business, and, in 1942, George Merriam and his wife, June, the former June Landstrom, became partners in the business. Thelma Landstrom, June's mother, was also active in the business for many years. June's sons, Richard and Robert, were directors of the company over the years, but only Richard is presently an executive of the company.

"The parent company, with Gerald Fleming as president, is known as Nutritional Foods, Inc.; its subsidiaries include Landstrom Distributors, Keene Distributors (Keene, Texas), Mottel Distributors (Linden, New Jersey); and Collegedale Distributors (Chattanooga, Tennessee)." Address: New York.

1489. Murray, Frank; Tarr, Jon. 1984. Health Foods, Inc., Des Plaines, Illinois (Document part). In: F. Murray and J. Tarr. 1984. *More Than One Slingshot: How the Health*

Food Industry Is Changing America. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. See p. 42.

• **Summary:** “In 1936, Samuel Middell began this company, then known as Health Food Jobbers. For many years the company was managed by Aaron Solomon and Al Levenberg, both in semi-retirement. They sold the company in Feb. 1984 to Tree of Life (St. Augustine, Florida), whose president is W. Ryland Dooley, III. Tom Keim is the VP of sales and marketing of HFI.

“The health food industry has made many Americans label conscious and has changed the eating habits of millions,” Al Levenberg said. “The industry has convinced many that, by eating better, they can perhaps remain a little healthier than they would if they ate all of the junk foods on the market today.” Address: New York.

1490. Murray, Frank; Tarr, Jon. 1984. Kahan & Lessin Co., Compton, California (Document part). In: F. Murray and J. Tarr. 1984. More Than One Slingshot: How the Health Food Industry Is Changing America. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. See p. 40-41.

• **Summary:** The Ben Kahan Co. began in 1932, and the Joseph E. Lessin Co. in 1935. In 1945 the two companies merged to become Kahan & Lessin Co. [widely known as K&L]. “In 1972, this wholesale company was acquired by Fleming Companies, Inc. and in the fall of 1983 the company was sold to Jameson Pharmaceutical Corp., San Mateo, California. Art Miller, long-time president of K&L, has retired and Jan Stoll is now president of the wholesale concern.

“The industry has come out of the homes and back-street locations to take its place with the finest specialty food stores in the country,” said Ben Kahan, who is now retired. “Our customers were mainly elderly people who were medically disenchanting, diabetic, vegetarian or whole-food dedicated people. Today, we can add to these early customers a great host of people of all ages and stations in life; we now have a broad base of customers.

“Our industry had and is exerting a major impact on America’s eating habits,” he continued. “Here are a few examples: reintroduction of natural fiber to the daily diet; supplementation of our foods with natural type vitamins and minerals; encouragement of ingredient content of foods on labels; encouragement of nutrition content of foods on labels; more Americans are now eating health foods such as yogurt, whole-grain cereals, unfiltered juices, wheat germ, lecithin, etc., and we have championed Freedom of Choice and Freedom of Information,” he said.” Address: New York.

1491. Murray, Frank; Tarr, Jon. 1984. Sherman Foods, Bronx, New York (Document part). In: F. Murray and J. Tarr. 1984. More Than One Slingshot: How the Health

Food Industry Is Changing America. Richmond, Virginia: Marlborough House Publishing Co. 240 p. + 16 p. of photos. See p. 41-42.

• **Summary:** “Founded by Solomon Sherman in 1924, this wholesaler was purchased in 1946 by Ernest Fried, deceased, and Jerome (Jerry) Sperling, who is still active with the company. Sherman’s arcadia brand of products is one of the oldest lines in the industry; they also distribute thousands of other items from the industry’s manufacturers.

“Consumers have become more nutrition conscious through favorable articles in newspapers, magazines, etc.,” Jerry Sperling said. “Also, radio and TV appearances by the authors of books on health and diet foods have increased interest. These sources have kept the public informed on the importance of nutrition. And, of course, the thousands of new health [natural] food stores in towns and cities across America have made it convenient for the consumer to satisfy his nutritional needs while doing his daily shopping.

“The health food industry has been the No. 1 factor in changing America’s eating habits,” he continued. “During World War II, we were physically the poorest nation of all countries involved. That can never happen again.” Address: New York.

See p. 20-25.

• **Summary:** “In 1937, Anthony Berhalter organized a consumer group known as the American Health Food Association.” A man of foresight, he operated a bakery in Chicago, and bought high-protein whole-wheat flour from Elam Mills, also of Chicago. Berhalter also had a health food store (one of the first in Chicago), and a mail order business, with 24- to 36-page catalogs. He bought “quantities of fine, sundried, unsulphured fruits from California” [probably from Otto Carque].

“In the spring of 1937, Berhalter set up a convention of some 10 to 15 booths” in the old Auditorium Hotel in Chicago. “Exhibitors included Live Food Products, Alberty Products, American Dietetics (then known as Tam Products, Inc.), Battle Creek Scientific Foods, Chippewa Spring Water Co., Dietetic Food of New York (Diamel), Elam Mills, Health Food Jobbers (now Health Foods, Inc.), H.W. Walker Co., Loeb Dietetic Foods, Modern Diet Products, Inc., Natural Health Products of New York, Nutty Brown Mills of Texas, Parkelp of California, and Vegetable Juices Inc. of Chicago.” About “150 health food people” attended the convention, coming from across the United States.

Berhalter hoped to bring together all factions of the health food industry in this one organization. “Dr. Walter

Hodson was one of the able speakers at those first meetings of the American Health Food Association... And those attending the first convention, among them Ed Neumann, George Spitzer, Henry Rosenberger, Sr. (of Cambridge, Massachusetts), Herb Bristol, H. Wayne Walker and others, felt that Tony Berhalter should be offered a fee to form an organization made up of retailers, manufacturers and jobbers, but excluding consumers.”

“Mr. Englehardt of Physical Culture Publishing Company, who was sent to the meeting by Bernarr Macfadden to help in starting a solid organization, secured a large room at the Big Hotel down the street on Michigan Avenue, where dissenters could thrash out a plan for the new organization.”

Eight men were elected to the organization committee. “After working all night with attorney Henry Junge, the committee presented a Constitution and By-Laws the next day to those who wanted the new association. It was approved [in 1937] and the new organization, National Health Foods Association [NHFA], which is now NNFA, was born. Herb Bristol and Wayne Walker immediately made plans for a second convention to be held in the summer of 1938 at the Sherman House in Chicago.”

The first president was Dr. John Maxwell. George Fleming was the paid secretary, who served until 1945. The next [2nd] convention at Sherman House [sic, La Salle Hotel, in late August 1939] was a resounding success with speakers such as Paul Bragg, Edward McCollum [not to be confused with Elmer V. McCollum, the famous biochemist from Johns Hopkins University], and others. Approximately 150 people attended the banquet, “however Bragg and McCollum had 800 to 900 people at their lectures.

“Chicago became the headquarters for the new association, with Herb Bristol, Wayne Walker and George Fleming doing most of the work. Fleming received about \$50.00 a week as secretary. The next two conventions were held in Chicago. “In 1941, the fledgling association held its fourth convention at the McAlpin Hotel in New York.” Since this convention was not a financial success, the next 5 conventions were held in Chicago. In 1947 the convention at French Lick Springs, Indiana, marked a low point in the association’s history. So the next convention was held in California (Ben Kahan helped to organize it), followed by another in Chicago.

After the 1966 convention at the International Hotel in Los Angeles, Stanley N. Phillips (of Cincinnati, Ohio) who, for years, had done much of the work organizing conventions, “resigned and helped to start a new retailer organization, American Dietary Retailers Association” (ADRA). But after two years, in 1968, Phillipps of the ADRA and Walter Camp of the NHFA began to communicate about merging the two organizations in order to better “fight a common enemy—the bureaucrats in Washington [DC, at the FDA] rather than squabbling among

ourselves.

“In 1969 the two associations held a joint convention and it was agreed that, if the remaining differences were resolved at the 1970 convention in New Orleans [Louisiana], the merged group would be united under the name of National Nutritional Foods Association” [NNFA].

The transition was made and Phillipps continued as convention manager through 1974, when he resigned and turned over the convention work to Arnold Pike, who managed the Las Vegas convention that Phillipps had set up for the MGM Grand Hotel. Address: New York.

1493. Bergen, Annegreet van. 1984. Natuurvoeding: geen gefluister en witte jassen [Natural foods: No whispering and white coats]. *Volkskrant (De) (Netherlands)*. July 23. p. 2. [Dut]

• **Summary:** About Yakso Farms, a Dutch organization that grows and sells organic foods (Biologische Boerderijprodukten) and makes soyfoods. Yakso wants to raise 1.6 million Dutch guilders through issuance of participation papers to the public, thus creating a fund to finance natural food store franchises by the Cooperative Vereniging Yakso. The article mentions soy-based meat replacers like spreads with herbs for use on bread, and seitan.

1494. **Product Name:** Ah Soy: Natural Non-Dairy Beverage (Soymilk) [Chocolate, Vanilla, or Original].

Manufacturer’s Name: Great Eastern Sun (Importer). Made in Japan by San-iku Foods.

Manufacturer’s Address: Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1984 July.

Ingredients: Original: Water, organically grown soybeans*, barley malt, pearl barley malt, cold pressed safflower oil, sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Vanilla: Vanilla extract. Chocolate: Natural cocoa, natural vanilla extract.

Wt/Vol., Packaging, Price: 6 fluid oz (180 ml) in stand-up foil retort pouch.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Original: Per 6 oz.: Calories 100, protein 4.5 gm, carbohydrate 9.4 gm, fat 5 gm. Vanilla: Calories 142, protein 4.3 gm, carbohydrate 21.2 gm, fat 4.4 gm. Chocolate: Calories 149, protein 3.9 gm, carbohydrate 25.5 gm, fat 3.5 gm.

New Product–Documentation: Labels. 1984. 4 by 6.25 inches. Plastic packs. Original: Red and white on blue. Vanilla: Red and white on tan. Chocolate: Red and white on dark brown. The words “ah soy” are written in script and look rounded, as if they were made from brightly colored round tubing. Text on front panel: “Made with organically grown soybeans.” “The really soft drink.” On back panel:

“It drinks like a shake and you can use it to bake. Ah Soy is the most versatile, delicious and nutritious natural non-dairy soft drink you can buy. Can something so smooth, so rich, so refreshing, really be good for you? Ah Soy is. Ah Soy is full of protein, free of cholesterol, low in calories and has no cane, fruit or milk sugars. And of course, there are no chemical additives and no preservatives. Use Ah Soy on breakfast cereal, as the secret to spectacular sauces, to make extra fluffy pancakes, and as a healthy, all natural thirst quencher.”

Note: This is the earliest commercial soymilk product seen with an English-language label (June 1999) that has a flavor named “Original.” In March 1982 a Japanese company named Nagoya Seiraku introduced a soymilk in Japan named *Sujaata no Gen Tōnyū*, which means “Sujaata Original Soymilk.”

Shurtleff & Aoyagi. 1984. *Soymilk Industry and Market, Update* (Based on interview with Bob Ballard, 21 March 1985). This product has been a “fantastic success.” During the period from 1 Nov. 1984 to 25 Jan. 1985 (just under 1 fiscal quarter), 525,000 unit packs of 4 flavors were sold.

Shurtleff & Aoyagi. 1985. *Soymilk Industry and Market, Update*. By March 1985 sales of Ah Soy are growing rapidly, now accounting for 15-20% of Great Eastern Sun’s total sales. The favorite flavor is vanilla, followed by original [plain], carob, and chocolate, in that order. By 1987 Ah Soy was being made in the USA in quarts. Shurtleff & Aoyagi. 1986. *Soymilk Industry and Market, Update*. By March 1987 Ah Soy is selling about 270,000 units (10,906 gallons) per month. Sales by flavor are vanilla (35% of the total), original/plain (30%), carob (17.5%), chocolate (17.5%). Sales have been flat for the past year.

Letter from Bruce Sturgeon, Vice President, Great Eastern Sun, Enka, North Carolina, to East West Journal. 1989. Jan. p. 6. Convincingly refutes EWJ’s award to Ah Soy for the “Most Questionable Beverage Label Claim.”

1495. Imagine Foods, Inc. 1984. Rice Dream, made from amasake: Finally! A great tasting ice cream that makes no compromises with your health (Ad). *East West Journal*. July. p. 29.

• **Summary:** This ad (5 inches square) is the first ad ever run in a national magazine by Imagine Foods. Printed with blue and black ink on a white background, it contains a blue photo of a pint carton of “Ice Dream: A non-dairy frozen dessert.” Small letters below the word “Amasake” explain that it is “a non-dairy brown rice milk, made by a culturing process where the rice starches are converted into complex sugars.” The text explains the asterisk: “* Non-dairy—Rice Dream is 100% free of any products of animal origin.

“No refined sugar, no fructose, no honey—We use Rice Syrup from Chico-San, and a touch of Vermont Grade A maple syrup.

“No oil—The leading soy ice creams on the natural

foods market today *all* contain *refined* vegetable oil. We’ve developed a unique recipe using sesame tahini instead of oil.

“Low calorie—Though you’d never know it by the creamy, rich flavor, Rice Dream contains only 100 calories per 4 oz. serving. That’s as low as most diet ice creams.”

“Currently available in pints: Vanilla, carob, carob chip. If not available in your area, ask your favorite natural food distributor to contact us: Imagine Foods, Inc., Jamestown, Missouri 65046. Phone: (816) 849-2583. Available from: Earthly Organics, Philadelphia [Pennsylvania]. Rainbow Natural Foods, Denver [Colorado].” Address: Jamestown, Missouri 65046. Phone: (816) 849-2583.

1496. Chico-San. 1984. Educational / Professional price list. Chico, California. 6 p. 28 cm. Plus cover later dated 15 Aug. 1984 from Peter Milbury and Joel Wollner.

• **Summary:** “August 15, 1984. Dear Friends,

“Please accept our Chico-San Educational/Professional price list. With it you can purchase the finest quality American and Japanese macrobiotic foods for your center, and at special low prices.

“Since 1961, when Chico-San was founded as the first macrobiotic food company in America, high quality and education have proceeded hand-in-hand. Inspired by the macrobiotic teachings of George and Lima Ohsawa, we have sought out and developed the very best products available. We have educated the American consumer in their beneficial use. Chico-San product brochures, cookbooks and advertisements have exposed millions of Americans to macrobiotic foods, recipes and ideas.

“The continuing work of Lima Ohsawa at the Macrobiotic Education Center (Tokyo CI) and at the Ohsawa Japan Company, provides us with the finest quality traditional foods. These products have been developed by George and Lima Ohsawa in close association with the very finest, small-scale food processors. They are used exclusively by Mrs. Ohsawa in the cooking classes and consultations at the Tokyo center. It is her wish that we provide these products to you for your use in teaching and counseling. Chico-San domestic products offer the same high quality, macrobiotic tradition.

“Please take a moment to look through our price list. Call us anytime if you have questions or to place an order. We feel that good food is more than a business, but the very basis of a happy, healthy life.

“We thank you for allowing us to serve you.

“Your friends at Chico-San

“For information call: Peter Milbury at Chico-San or Joel Wollner at (501) 443-7216.

Contents: Rice cakes. Domestic specialties: Golden rice nuggets, Yinnies taffy, Yinnies caramel, Yinnies syrup, Sesame salt [gomashio] (15:1 seeds salt ratio), organic rice cream (breakfast cereal), Kokkoh (breakfast cereal).

Organic brown rice (California short grain, 25 lb bags,

\$13.25 each). Natural brown rice (short grain, not organic, 50 lb bags, \$12.00 each).

Everything Natural brand jams and jellies (Sweetened with Chico-San Yinnies rice syrup, 6 flavors in 10 oz jars).

Macrobiotic quality: Discussion of what it means.

“Informational Materials: Chico-San is involved in an effort to provide as much information on our products as possible. This listing of informational materials includes a variety of offerings, from detailed descriptions of each individual product, to colorful posters to attract attention and stimulate curiosity. All materials are available free, in appropriate quantities.

“Fact Sheets: An extensive series covering all Chico-San products, describes ingredients, processing methods, and explains use. Includes picture of the product in its package, along with sizes/case-packs available, etc. Space for your imprint at the bottom or additional information on the back. Appropriate for mailing or handouts to students.

“The Crackerbarrel: Our informative newsletter, featuring interesting articles on topics relating to Chico-San products. Includes recipes, in-depth background on natural, traditional processing methods for making various foods imported from Japan, offers of free informational materials, human interest articles on the company and related subjects. Also designed to familiarize teachers and students with macrobiotic foods and concepts from an informative perspective.

“The Chico-San Story: This is an interesting story reprinted from the April 1982 issue of the East West Journal. It traces the history and background of Chico-San, and touches on some of the company’s pioneering and innovative efforts over more than twenty years (3 p).

“From Yesterday Comes Today’s Tamari: Explains the difference between Soy Sauce and Tamari, as well as giving a detailed explanation of how both products are made using natural, traditional methods. Alerts reader to common shortcuts and synthetic processing tricks to beware of (10 p).

“The Yinnies Brand Syrup Cookbook” A nineteen page booklet of recipes and information on how-to-use Chico-San unique syrup sweetener.

“Secrets of the Ohsawa Ceramic Cooking Pot: Explains why food tastes so good when cooked in the Ohsawa Ceramic Cooking Pot. Reprinted from Macromuse.

“The Nine Day Wonder Trip, by Rabbi Michael Schick. The interesting story of how Chico-San’s imported macrobiotic foods are certified as Kosher (K-Pareve).”

Cracker snacks (Brown rice n’ peanut treats).

Soy sauces and tamari soy sauces.

Miso and miso products. Barley koji. Brown rice koji. White rice koji.

Other fine condiments: Kuzu powder (wild, organic), organic salt plums, Rice malt vinegar, organic red ume vinegar, roasted sesame oil, tempura sesame oil, organic radish pickles (Yamaki daikon moromi), powdered nigari

(for making tofu).

Noodles, Japanese pasta: organic soba, organic udon, 80% soba, mugwort soba.

Herbal teas: Twig tea, three year. Twig tea, one year. Mu tea, Lotus root powder.

Seaweeds: Sushi nori, nori, wakame, kombu, hijiki, arame.

Hygiene: Dentie toothpowder, Dentie toothpaste, albi powder. Cooking accessories: Pots, knives, chopsticks, sushi mats, rice paddles, suribachi with surikogi, tawashi, bamboo tongs, soy sauce server [dispenser], salad press. Address: P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927. Phone: 916-891-6271.

1497. Word of Nutrition. 1984. The most complete, unique and attractive: More than a health food store in the country (Ad). *Hartford Courant (Connecticut)*. Aug. 16. p. H13.

• **Summary:** This half-page ad appears on the page titled “Spotlighting: Newton.” “Come in and let us ‘show off’ our wares from A-Z. Atmosphere (par excellence)... Herbs (bulk-enormous selection)... Kombu,... Macrobiotic selection (very extensive)... Peanut butter (made fresh by us)...Soy milk... Tofu (fresh)... Tofu entrees... Vegetarian foods...” Address: 194-200 Market Square, Newington, Hartford County, Connecticut.

1498. Brisson, David. 1984. Natural foods go gourmet. *East West Journal*. Aug. p. 22, 24-27.

• **Summary:** Brother Ron Pickarski, a 34-year-old Franciscan friar from Miami, Florida, is a world class vegetarian chef, who won a bronze medal in the 1980 Culinary Olympics, and who likes to use tofu in his creations. At this year’s Olympics in October in Frankfurt, Germany, he will prepare Tofu Sushi with Mikado Sauce and Seitan Moutard Bitard (a vegetarian steak). A consultant for Legume, Inc. he has created such sumptuous dishes as Tofu Bourguignon and Tofu Tetrizzini for them. Contains an illustration and biography of Pickarski. An illustration shows Brother Ron. Address: Brookline, Massachusetts.

1499. **Product Name:** Eden Miso [Rice, Brown Rice, or Barley].

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1984 August.

New Product–Documentation: Ad in Soyfoods. 1984. Summer. p. 37. “Just the Best.”

1500. Eden Foods, Inc. 1984. Just the best (Ad). *Soyfoods*. Summer. p. 37.

• **Summary:** This full-page black-and-white ad, with plenty of empty space used effectively, shows packages of Edensoy (two flavors of soymilk in retort pouches), Eden tamari (2

sizes of glass bottles), Eden Rice Miso, Eden Brown-rice miso, and Eden Barley Miso. Near the bottom is Eden's logo of four sprouts in a circle. Address: Clinton, Michigan 49236.

1501. Estella, Mary. 1984. Spotlight: Restaurant. *The Five Seasons*, Jamaica Plain, Massachusetts. *Soyfoods*. Summer. p. 8.

• **Summary:** "The Five Seasons Restaurant is enjoying the sweet success that foodservice people dream about. Owned and operated by the Pell brothers, Jon, Rob and Steve, business at the 40-seat natural foods restaurant has increased by 25 percent each year since they opened in 1981. The average lunch check is \$5-\$8; dinner \$8-\$12. Weekend nights are busy, turning the tables an average of three times each night.

"Our intention is to show the public that natural foods are more than carrot juice and sprouts," says Rob.

"The Five Seasons is situated in a row of busy stores on Centre Street. A clean, country feeling is given by fresh white walls above a wood wainscoting. Two rows of attractive oak tables greet customers. Seating is on comfortable benches along each wall and on wooden chairs. Hanging plants, ceiling fans and a photography display lend a relaxed air.

"When we opened three years ago we used four tubs of fresh tofu per week. Now we're up to eight 25-pound tubs. We buy our tofu from Yah Kee, a third-generation soy crafter in Boston," explained Rob. Tempeh is supplied by 21st Century Foods, also in the Boston suburb of Jamaica Plain. Savory tempeh specials have increased tempeh use from eight to 20 pounds per week. Miso from American Miso and Eden Foods is used to season soups, sauces and dressings. About 20 pounds of miso are used weekly. The soyfoods list is completed with tamari from the Lima Company. This rich tamari is preferred by the Pells for seasoning and for use in their famous teriyaki sauce.

"Soyfoods appear in all areas of the menu. Two of the eight appetizers feature tofu as the main ingredient. Tempura Nori Rolls are very popular. Slices of tofu, carrots, cabbage and watercress are wrapped in nori (a sea vegetable), dipped in a tempura batter and fried golden brown. Each roll is cut into one-inch pieces and artfully arranged around a ginger-tamari dip.

"Tofu Cream Cheese is a star of the menu. The smooth, rich pate of tofu, tahini, umeboshi (a Japanese salt plum) and scallions is served as an appetizer with crunchy homemade poppyseed crackers. A salad plate similar to a cottage cheese dieter's special uses this cream for its foundation. You can order a hearty sandwich filled with Tofu Cream Cheese and salad vegetables. For many, Sunday wouldn't be Sunday without bagels Five Seasons style—topped with Tofu Cream Cheese, lox and a colorful salad garnish.

"Lasagna is a Saturday night tradition. Thick layers of

garlicky tofu 'ricotta' are layered with sauteed vegetables, pasta and the Pells' own tomato sauce. The day I visited, tempeh was prepared in a delicate sweet and sour sauce with matchstick carrots, broccoli, peppers and served over rice.

"Szechuan Tofu and Vegetables combine deep-fried cubes of tofu and Oriental vegetables in an authentic sauce of hot pepper, barley malt, garlic, ginger and tamari. 'Veal' Parmesan is by far the most creative dish. Seitan, a wheat gluten cutlet, is seasoned, sauteed and topped with tomato sauce and a layer of 'Mexican Cheese.' The latter is a Pell creation of golden corn polenta, sauteed onions and tofu pureed in a blender. It's also used on other au gratin dishes and as a cheese-like sauce.

"The richest entree combines tofu and tempeh in a surprising European-style special: Tempeh Mushroom Stroganoff. Thin slices of tempeh are deep fried and served in a sauce of sauteed mushrooms and stock thickened with a roux. Tofu Sour Cream is added at the end to finish the dish and it's served over a plate of colorful spiral noodles.

"Sunday brunch shines with soy-foods delights, a tradition in the Jamaica Plain natural foods community. Brunch is a relaxed time to read the *Globe*, meet friends and indulge in pancakes, French toast and omelettes. French toast is made with eggs or an unusual mixture of amazake (a sweet, fermented rice drink), tofu, vanilla and cinnamon blended together. Thick slices of homemade bread are dipped in this sweet cream, fried and topped with strawberry or maple-walnut sauce. Scrambled tofu is gaining a large audience, selling about 25 portions each brunch.

"A changing selection of the Pells' famous desserts completes the menu. Jon explains, "Tofu is not traditionally used for desserts in Asia. We find it an excellent replacement for dairy products in baking moist cakes, cream pies and puddings. Our secret is very fresh tofu."

"The Pells have succeeded in designing a menu with something for everyone—from soyfoods fans to gourmet diners to those looking for an honest, home-cooked meal. The focus is on consistency. Dedication to high quality is the Pell family's sure recipe for success.

A photo shows the three brothers Pell: Jon, Steve and Rob in a relaxed moment.

"Mary Estella's *Natural Foods Cookbook—Vegetarian Dairy-Free Cuisine* will be published this fall by Japan Publications." Address: Author.

1502. Fiske, Doug. 1984. Soyfoods in the supers [supermarkets]. *Soyfoods*. Summer. p. 18-23. Cover story.

• **Summary:** Gives an in-depth look at the marketing strategies of Legume Inc., Tomsun Foods, Eden Foods, Vitasoy, Tempehworks, Nasoya, Eden Foods, Soyfoods of America (Furama and Nature's Spring brands), White Wave, Hinode Tofu Co., Tofu Time (Tofutti), and Nasoya.

"Without considering soy sauce and excepting a few areas with concentrated Asian populations, ten years

ago you would have been hard pressed to find soyfoods in supermarkets. Today, after a decade that has seen the industry grow from infancy to adolescence, soyfoods can be found in supermarkets from coast to coast. Indeed, 52% of the 27 tons of tofu produced in the United States in 1983 was sold through supermarkets. What *Soyfoods* set out to do in this article was to determine the strength of soyfood products' presence in supermarkets, to discover how and by whom that presence was achieved, and to project soyfoods future in the supers. We spoke with representatives from 17 companies chosen according to three criteria: what soyfoods the company markets through supers, where the company is located, and its size. We feel that the information given here by a 10-company cross section fairly represents the industry as a whole.

"Legume of Montville, New Jersey is unique among soyfoods companies. It is the only firm in the industry whose product line consists solely of frozen single-serving entrees. Founded in 1981 by the husband-and-wife team of Gary and Chandri Barat. Legume's progressive idea is to provide convenient, low-calorie, cholesterol-free, dairy-free, natural entrees made with tofu to health-and-weight-conscious consumers.

"In early 1984 Legume introduced six new, attractively packaged entrees: Vegetable Lasagna, Stuffed Shells Provencale, Cannelloni Florentine. Sesame Ginger Stir-Fry. Tofu Bour-guignon and Tofu Tetrazzini. The company's supermarket marketing program is focused on these products. For 1984, sales through supers are projected at \$400-500,000, about 50% of total sales. Great gains are expected in 1985, with supermarket sales rising to about \$2 million.

"Legume initially gained entry to supers through several natural foods distributors. At about the same time, Legume began making sales calls, mostly in the New York metropolitan area, on supermarket chain frozen food buyers. Among the regional brokers the company has come to retain in certain markets across the U.S., the New York area brokers are especially strong. Legume works closely with them, first in selecting the most appropriate chains, second in teaming up on the sales calls, and third in servicing established accounts and doing in-store demonstrations.

"Says Bob Shapiro, marketing director for Legume, 'We don't fool ourselves thinking that our product can be sold, or should be sold, in every store in a given market. We are selective about the chains and stores we move into. We're looking for a particular type of consumer who shops there. It's a working, educated, middle-income, 30-year-old head of household profile.'

"Because of the relative unfamiliarity with the product and with tofu on the public's part, Legume has had some difficulty finding brokers to take the line, and in gaining authorizations from buyers. Shapiro again: 'We find that as much as we have to develop programs that are financially

rewarding to the chain, and in the long run to the broker, ours is a total educational process. We spend a lot of time explaining to the buyers how our product is unique and why it should be sold in their stores. The product novelty is a big part of it. In addition, it's absolutely essential that you show the buyer how you will help promote the product, say with quarterly promotions and advertising—at least their newspaper ads and/or manufacturers' ads in regional or national magazines. They ask for television right off the bat. We work down from there. Although we are planning regional television ads for early 1985.'

"Among soyfoods companies, Legume is a leader in recognizing the value of attractive, informative packaging and in developing creative and effective promotional aids. The line of six 11-ounce frozen entrees is packaged in colorful, tastefully designed boxes featuring bold graphics, large color photographs of serving suggestions, and product information. Also on the box is an offer to write or to call a toll-free number for discount coupons and the Legume Light Eating Plan. The Plan appears in an attractive, thoroughly researched booklet designed as a guide for consumers concerned about their weight and health. The same coupon/booklet offer appears in Legume's magazine advertising. Consumer responses run about 100 per week.

"As of summer 1984, Legume's products can be found in about 12 chains representing roughly 125 stores. The company projects tripling their store numbers by October. The deepest penetration is in the New York metropolitan area where the product typically sells for about \$2.59. California, Colorado, the Midwest, New England, and Florida are other markets where Legume has established a presence. In stores with freezers in both the mainstream and natural foods sections, Legume enjoys far better sales when placed in the mainstream freezer and feels that this is largely due to increased exposure.

"Legume's Shapiro sees second generation products—specifically frozen entrees, desserts and beverages—as soyfoods' best shot in supermarkets. Although the chains are dominated by giants, soyfoods, largely due to their inherent nutritional advantages, can do well if product creation, production and marketing are well planned."

"Eden Foods of Clinton, Michigan has had a 15-year presence in the natural foods trade but it has been just within the past year that they have established a beachhead in supermarkets with their miso, soymilk and soy sauce products. They are presently selling through five chains representing about 50 individual stores. Supermarket sales account for approximately 10% of their \$7.5 million yearly sales.

"Eden gained entry to the supers without the aid of brokers but now retains a half dozen and emphasizes their importance in establishing and servicing accounts. 'It takes too much time and money for us to perform the broker's function,' says Eden's Michael Potter. 'Brokers have access

to quality time with buyers and in-store managers. They know the mainstream game, they know the right people. And that's often the key—it's not what you know but who you know.'

"Having gained entry to supers, Eden has tried to influence placement in the store but with little success. 'It's their game,' says Potter. 'Supermarkets don't even appreciate the proven methods of large natural foods stores. The grocery industry is very confused as to how to deal with natural foods. There are two ways to go. One is to create a natural foods section, or 'set' as they call it, and the second is to integrate natural foods with their mainstream counterparts. The former very much limits natural foods' appeal. The average person wants to be normal and shopping in a natural or health foods section is seen as abnormal. Another factor is time—people don't want to take the time to explore a natural foods section. I think integration is better. It increases exposure. Then it's up to the industry to communicate to the public what those products are and why they are more desirable than their more familiar commercial counterparts.'

"To promote sales in supers Eden uses co-op ads in newspapers and in flyers mailed directly to consumers' homes, promotional allowances, and especially in-store demos. The promotional budget is a percentage of sales and is presently higher than normal because of the relative newness of the products in supers. At this point, sales are humble, according to Potter, but the potential is there. He sees education of consumers and in-store personnel as being crucially important.

"Eden Foods has received thousands of letters and even one telex from a broad spectrum of consumers inquiring about and praising their products. This response is seen as an indicator of soyfoods' potential. Potter cites statistics on lactose intolerance (10% of Caucasian adults, 50% of Asian adults and 70% of black adults) as further indication of the potential of soy milk products. Plans are being made to expand that product category.

"Michael Potter, citing a statistic that 51% of grocery buyers are interested in soyfoods, sees a bright future, especially for second generation products. 'The Soyfoods Pavilion was the busiest aisle on opening day at the Natural Foods Expo in Anaheim. Soyfoods pulled them in.' At the same time, Eden is wary of depending too heavily on supers. It's a huge arena where the giants hold the power. Chip Bruchac, with 11 years mainstream grocery experience before joining Eden as national sales manager, feels that the company 'should nibble our way into that market.' Potter adds a final note. 'The soybean came to America and flourished but the technology to use the bean for human food was delayed. Now 75-90 years later the technology has followed, and that fact coupled with the rising concern for efficient use of agricultural resources and for the negative health effects of eating meat, makes the future look very good for soyfoods.'"

1503. Leviton, Richard. 1984. Soyfoods market: The top 15 prepared convenience soyfoods. *Soyfoods*. Summer. p. 42-43.

• **Summary:** "Since 1980 most of the innovation—and excitement—in the American soyfoods industry has centered around what are now called prepared convenience soyfoods." The top 15 are: (1) Legume Light & Natural Tofu Entrees. (2) Edward & Sons' Miso-Plus Jalapeno and Chive miso dips. (3) Farm Foods' Ice Bean and Ice Bean Sandwich. (4) Tofu Time's Tofutti. (5) Light Foods' Light Links (tofu hot dogs). (6) Brightsong Light Foods' Tofu Desserts and Dips. (7) Tomsun Foods' Spice and Herb Tofu. (8) Eden Foods' Edensoy. (9) Nasoya's Vegi Dips. (10) Sonoma Specialty Foods' Nutcracker Sweets. (11) Pacific Tempeh and Soyfoods Unlimited's Tempeh Burgers. (12) Soyfoods Unlimited's Leandro's Meatless Lasagna [with tempeh]. (13) Fantastic Foods' Tofu Burger Mix. (14) Quong Hop's Soy Fresh. (15) Garden of Eatin's Nuclear Freeze (soymilk ice cream pops). A photo shows each product.

1504. **Product Name:** WestSoy Natural (Soy milk).

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by San-iku Foods.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984 August.

Ingredients: Water, organic soybeans, malted barley, expeller pressed corn oil (less than 1%), sea salt.

Wt/Vol., Packaging, Price: 6 fluid oz (180 ml). Stand-up foil retort pouch.

How Stored: Shelf stable.

Nutrition: Per packet: Calories 140, protein 5 gm, carbohydrates 25 gm, fat 2 gm, sodium 124 mg.

New Product—Documentation: Label. 1984, dated. 4 by 6.25 inches, color. Retort pouch. Blue, brown, white and black on orange background. Milk bottle illustration. "Non dairy drink. Organic. Shake well. Serve chilled. Low sodium. Half the fat, all the protein of milk. No cholesterol. No refined sugar. No preservatives." Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Shurtleff & Aoyagi. 1984. *Soy milk Industry and Market, Update*. This plain soy milk, similar to Ah Soy (launched 1 month earlier and also made by San-iku Foods in Japan), is Westbrae's first soy milk product.

Talk with Marty Roth of Westbrae Natural. 1985. Jan. 3. Their Westsoy natural was a sort of me-too effort, so that Westbrae could have its plain counterpart to Edensoy, Ah-Soy, and Vitasoy. Westbrae didn't put a lot of effort into the product. Westsoy, introduced a little before the Malted, was not eventually as successful as the Malted but it quickly became one of the company's better products. Its features: 1. Organic. 2. The lowest price plain soy milk. It was made in the same plant (Saniku Foods in Japan) as Ah-Soy and had a

similar flavor.

1505. Westbrae Natural Foods. 1984. Distributor catalog No. 2: Sept. 1, 1984. Emeryville, California: Westbrae. iv + 11 + [7] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-11 are a computer-printed price list, and the last 7 are a product glossary. The company now sells Malted (soymilk shakes in 3 flavors, packed in foil pouches), Organic soymilk (available in August) and two types of Instant miso soup (aka [red] and shiro [white]). Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1506. Tranfa, Anthony D. ed. 1984. Even on tour, Jackson sticks to a Sikh diet. *Daily Breeze (The) (Torrance, California)*. Sept. 2. p. 18.

• **Summary:** On his “Victory Tour,” singer Michael Jackson has a traveling chef, Mani Khalsa, who knows that his “diet must be strictly vegetarian.”

While on the road, Mani Khalsa prepares every meal the superstar eats. “He is an employee of The Golden Temple Conscious Cookery and Catering Co. of Hollywood, which supplies all of Jackson’s food—on tour and at home.”

Akasha Khalsa, head chef at The Golden Temple, which follows the dietary practices of the Sikh religion, says “Everything is fresh, natural and strictly vegetarian.” The two chefs are not related.

Jackson’s favorite foods are enchiladas, whole wheat pizza. and oriental salad.

Jackson, a Jehovah’s Witness, is not required by his religion to restrict his diet. But he prefers to follow the Sikh’s vegetarian diet.

Note: The Golden Temple of Conscious Cookery, a vegetarian restaurant chain, is run by the followers of Yogi Bhajan.

1507. Troy, John. 1984. American Natural Foods, Elf Works, and work with miso (Interview). *SoyaScan Notes*. Sept. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** American Natural Foods (ANF) was formed in Jan. 1984 as its own company with its own investors; in March 1984 it acquired Elf Works, Ltd. Miso Mustard, BeeNut Butter, and Smoky Mountain Sizzlin’ were all introduced formally for delivery in Sept. 1984. ANF had a private stock offering in May 1984 in North Carolina; the proceeds (\$150,000) from 25 shareholders will be used mainly to develop new products. Some of the shareholders (such as John Fogg, marketing and design) are working with the company. Barry Evans, owner of American Miso Co. in North Carolina, is the company’s miso supplier. The packer is also a shareholder. Hot Stuff is John’s only commercial miso product with a sales record to date. The Works will

be out in about 2 weeks. He expects big revenues from it because people use much more per serving—dink dink vs. glug glug. Smoky Mountain Sizzlin’ is getting rave reviews. It’s super with tempeh. They are sampling it on grilled skewered tempeh and pineapple.

John’s first commercial miso product, Hot Stuff, was first put on the market in early 1981 [about April]. John is trying to use miso to create natural foods for Americans. To date John has sold exclusively to U.S. Naturals, his distributor, run by Jeffrey Hilbert and Jimmy Silver. But he has had bad service and many problems from them, so he is considering a new distribution system. He may get regional warehouses and sell from there to distributors like K&L [Kahan & Lessin], cutting out any master distributors. Address: Suite 21, The Courtyard, Chapel Hill, North Carolina 27514.

1508. American Soybean Assoc. ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 129 p. Held Sept. 27-28 at Amsterdam, Netherlands (Krasnapolski Hotel). No index. 30 cm. [38 ref]

• **Summary:** Contains 9 papers, mainly on soyfoods in Europe. A directory includes company name, person’s name, and address for the conference’s 105 participants. Organizations represented include Caderas de Kerleau, Aarhus Oliefabrik (Aarhus C, Denmark), Aixagri, Alfa-Laval, Alfa-Laval Food (John Wilson), Alpro N.V. (Ph. Vandemoortele, Ch. Daems), Alpura Koreco Ltd., Aros Sojaprodukter (Ted Nordquist), BRT, Cargill (R. Sevink, Amsterdam, Netherlands), Cauldron Foods Ltd. (Mr. Marshall, Mr. Fagan), Centraalbureau Voor Schimmelstruct, Centro Studi Proteini Vegetali, CETIOM ONIDOL (Emmanuel Prudom, Toulouse, France), Chemex, Comite Eetbaar Plantaardig Eiwit (Hague, Netherlands), Consumers’ Association, Condimenta, Cooperative Occitane, Danish Turnkey Dairies Ltd., Delisana Natuurvoeding, Deutsche Gesellschaft für Ernährung [2 different addresses], DE-VAU-GE Gesundkostwerk (Dr. W. Lubosch), Dragon & Phoenix Ltd. (Donald Lysen), E & R Chemicals, Edelsoja GmbH (K.O. Tielker), E.M. Chajuss Ltd. [Daniel Chajuss], Fa L.L. Frank (Missendorp de Bie), Fed. Nat. Syndicats De Dietetique, F.I.M. Housterman, Food Industries, Food Manufacture, F.M. Lin, Galactina Ltd. (P. Speck), Gebruder Bauermeister, Gemint, Giulini Chemie, Goorden Import Cy, Henselwerk GmbH (Rolf Berger), Heuschen (Mr. Heuschen, Deurne, Netherlands), Itona Products Ltd. (Mr. and Mrs. Hampson), Ivel, Keuringsdienst Voor Waren, Libelle, Lucas Meyer (Axel Schulte), Masterfoods, Melkunie Holland, Niticel B.V., ONIDOL (Guy Coudert), Paksoy TIC, Paul’s Tofu (Paul Jones), PFW Nederland BV, Plumrose FDD, Premier Foods, Purina Protein Europe (A.G. van der Horn & Willy Naesens, Zaventem, Belgium), Royal Neth. Dairy Federation, Ruitenbergh N.V., Sanico N.V., S.G.A. Flavours, SIO [Societe Industrielle des Oléagineux, Marie Gérard,

Nanterre, France], Sopad Nestlé (Mr. Rolland, France), Sojadoc (A. Lacombe, P. Roger, Mr. Henras & Mr. Attié; St. Paul, 81140 Penne du Tarn, France), Sojaquelle (Wolfgang Furth-Kuby), Solnuts B.V. (J. Liebrechts), Soy (De Preneuf, Cerny, France), Staley Intern[ational], Stern Chemie (Volkmar Wyviol, Hamburg), UNCAA, Union Deutsche Lebensmittelwerke [Hamburg], Univ. of Strathclyde [Glasgow, Scotland], Vamo Mills (B. Cleenewerck, Ghent, Belgium), Versteegen Specerijen, V.D.SP.V.B.A., Wenger International (I. Ben Gera, Antwerp, Belgium).

Registered on Sept. 27. Naarden Intl., Protevit, Wessanen, Mr. Karas & Mr. Drosihn [Soyastern—From Germany, not Turkey].

A note in the Nov. 1984 issue of *Soya Foods* (ASA, Europe) (p. 2) stated that the workshop was attended by 105 people from 14 countries, and was considered to have been very successful.

Note 1. This is the earliest published document seen (May 2015) concerning Sojadoc of France.

Note 2. E.M. Chajuss is the name of Daniel Chajuss' father. He and his son founded Hayes Ashdod Ltd. "E.M. Chajuss Ltd." is a limited or incorporated company that was jointly owned by Daniel and his father. Daniel Chajuss attended this Soyfoods Workshop as a "delegate" of E.M. Chajuss Ltd. company.

Note 3. This is the earliest document seen (March 2020) that mentions Wessanen of the Netherlands. Address: Brussels, Belgium.

1509. Great Eastern Sun. 1984. Ah soy: Finally a really soft drink (Ad). *Natural Foods Merchandiser*. Sept. p. 39. [1 ref]
 • **Summary:** A full-page color ad. This natural, non-dairy beverage comes in vanilla, chocolate, and original flavors. Photos show: (1) Ah Soy being poured into a clear glass. (2) The front of each of 3 foil cartons.

This ad also appeared in *East West Journal*. Sept. p. 56-61. Address: P.O. Box 327, Enka, North Carolina 28728. Phone: (704) 252-3090.

1510. Westbrae Natural Foods. 1984. Westbrae Natural Malted's: Vanilla, Carob, Cocoa-Mint (Ad). *East West Journal*. Sept. Inside front cover.

• **Summary:** A full-page color ad. "Thick and rich non-dairy soy delights. 'Did you make this out of ice-cream?' Ryan Garvy, age 7. All the fun, half the fat of milk shakes. No refined sugar, no preservatives, no cholesterol."

This ad also appeared in *Natural Foods Merchandiser* (Oct. p. 19).

1511. **Product Name:** Lima Ohsawa's Miso [Genmai, Hatcho, or Mugi].

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: Chico, California.

Date of Introduction: 1984 October.

New Product—Documentation: Chico-San Cracker Barrel. 1984. Oct. p. 1, 4. Labels read: "Pressure release valve. Keep unclogged. Organic, Unpasteurized." Aged over one year (Genmai and Mugi); Over 2 years for Hatcho. This pressure release bag is a major innovation, and a first.

1512. **Product Name:** Westbrae Natural Malted's [Carob Malted, Vanilla Malted, Cocoa-Mint Malted, Almond Malted, or Caffeine-free Java Malted].

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by San-iku Foods.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984 October.

Ingredients: Cocoa-Mint: Soybeans, malted barley, expeller-pressed corn oil (less than 5%), cocoa, sea salt, peppermint.

Wt/Vol., Packaging, Price: 6 fluid oz.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Cocoa-Mint: Per 6 oz.: Calories 250, protein 6 gm, carbohydrate 50 gm, fat 3 gm. Carob: Calories 230, carbohydrate 44 gm. Vanilla: Calories 250, carbohydrate 46, fat 5 gm.

New Product—Documentation: This is soymilk with a thick and rich milk shake-like consistency. Ad in *East West Journal*. 1984. Sept. Inside front cover. "Westbrae Natural Malted's. [Note spelling, with apostrophe]. Vanilla, Carob, Cocoa-Mint. Thick and rich non-dairy soy delights. 'Did you make this out of ice-cream?' Ryan Garvy, age 7. All the fun, half the fat of milk shakes. No refined sugar, no preservatives, no cholesterol."

Labels. 1984. 4 by 6.25 inches. Plastic retort pouches. Brown, yellow, white. Cocoa-Mint on mint green background. Carob on cherry background. Vanilla on orange background. All have soda fountain picture with glass of malted with straw. "Shake well. Serve chilled. No refined sugar or cholesterol. No preservatives." Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Shurtleff & Aoyagi. 1984. *Soymilk Industry and Market, Update*. Thick soymilk from whole soybeans (no soy protein isolates) plus malt and 2.65% oil are used to give this product its thickness. Sales of Westsoy and Malted's for 1984 were roughly \$700,000 or 1.67 million units at \$0.42 each FOB.

Ad (8½ by 11 inches) in *Natural Foods Merchandiser*. 1985. May. p. 26. "Afternoon Delight." "15% off. On special now." "For a great afternoon treat for the kids (or even the young at heart) try New Morning Honey Grahams and Westbrae Natural Malted's!"

Natural Foods Merchandiser. 1985. May. p. 48-49. Gold medal in 6th annual merchandising contest. Poster. 1986. June. "The Cadillac of Soydrinks." Talk with Martin Roth. 1989. Aug. 17. "Gordon Bennett gave me the assignment to

develop a soymilk product for Westbrae. He recognized that Westbrae had already missed the boat on soy drinks, with Edensoy, Vitasoy, Ah Soy, and Health Valley already on the market. I said ‘Great. How can you make a soy drink that isn’t a soy drink.’ Then the Malted idea flashed into my mind, and I said ‘Maybe we can do a thicker, richer, creamy one and make it a dessert.’ I designed the graphic idea and developed the name and formula.”

As of about Feb. 1995 this product was made by Cathay Industrial, owned by John Yamauchi, in Los Angeles. Prior to that, it was made by House Foods & Yamauchi in Los Angeles.

1513. Beazley, J. Ernest. 1984. Largest retailer of health foods indicted by U.S.: General Nutrition [GNC], 3 officials cited in FDA bid to halt therapy-based claims. *Wall Street Journal*. Nov. 15. p. 4.

• **Summary:** Concerns the marketing and sale of oil of evening primrose tablets. The FDA wants to send a clear message to the entire health-food industry that the promotion of health foods for therapeutic purposes must stop.

1514. *Pittsburgh Post-Gazette*. 1984. News briefs: Heinz buys rice cake maker. Nov. 20. p. 13.

• **Summary:** Heinz U.S.A. announced yesterday that it has acquired Chico-San Inc. (headquartered in Chico, California), a manufacturer and marketer of rice cakes and related products. Privately held Chico-San operates rice-cake production facilities in California, Mississippi, and New Jersey. Founded in 1962, the company has about 340 employees. Terms were not disclosed.

1515. *Food Engineering*. 1984. 30 million people can now enjoy lactose-reduced foods. 56(11):80-81. Nov.

• **Summary:** Subtitle: “Whether for health, dietary, or religious reasons, there’s a vast market in America for lactose-reduced foods as well as substitute products.”

Since the enzyme lactase became commercially available 7 years ago, “lactose hydrolysis has become the wave of the future in processing dairy products for the lactose-intolerant consumer.”

In all its forms, lactose intolerance affects an estimated 30 million Americans. Soymilks include Vitasoy (color photo shown) and Health Valley Soy Moo (which has been on the market for over 6 years). Ice creams include Tofutti (which was discovered in 1981 by David Mintz). Entrees include Legume Cannelloni Florentine (color photo shown).

1516. Johnson, Gil. 1984. Natural foods and American history: A ten year perspective. *Vegetarian Times*. Nov. p. 33-34, 66-67. [2 ref]

• **Summary:** This very insightful 10-year history of the natural foods movement in America begins: “A generation ago, they were called ‘dietetic’ foods—the domain of the

sick and the desperate, the vain and the visionary. Natural foods were limited to wheat germ, bran, brewer’s yeast, blackstrap molasses and vitamin supplements. And in an era of stereotypes, ‘health nuts’ were no exception: ninety-seven-pound weaklings desiring muscle-bound physiques; scientific men with horn-rimmed glasses; aging actresses trying to preserve their youthful beauty; and wild-eyed men in leather loincloths. The whole thing was reminiscent of the ads in the back of an *Amazing Tales* comic book.

“Then came the Baby Boomers—the Pepsi Generation, and while this generation grew up, the natural foods industry matured along with them. Together they eventually made tofu and alfalfa sprouts acceptable. In the late 1960’s natural foods became politically correct. In the mid-1970’s they became chic, and today they are commonplace.

“Ten years ago, total retail sales of natural foods were \$350 million. Last year, according to *Natural Foods Merchandiser*, a trade magazine, natural foods sales were \$3.3 billion—a thousandfold increase. For an industry once dominated by anti-growth sentiments, that’s a phenomenal performance, rivaling even the high-tech industries.

“Throughout this growth period, however, the natural foods industry has been perceived by its proponents as a movement as well as a business. The products sold in natural foods stores are not merely fuel for the human body, but the very keys to health and happiness. Success has not overridden this conviction. Yet, like all movements, the natural foods industry is vulnerable to charlatans posing as heroes of the revolution. Every year, it seems, a new miracle product which promises to cure cancer, boost energy or safely take off pounds is introduced. These products generate a short-lived burst of sales in some health foods stores, then fade away (or are forcibly withdrawn by the FDA), only to be followed by the next miracle product.

“Sub-Culture: Perhaps the first major expansion of the natural foods market emerged from that great political cauldron where the causes of peace, civil rights, sexual liberation and ecology bubbled together in the same broth. (Weren’t war protestors labeled ‘hippie-commie-vegetarian types’?) During this period, all corporations were mistrusted and food companies were no exception. Simultaneously, an awareness of environmental problems prompted a renewed interest in organic farming and unprocessed foods. The counter-culture theory that big, corporate and technological things are bad, and small, collective and natural things are good fostered the spirit which nurtured fledgling natural foods stores and co-ops.

“Prior to the emergence of co-ops, natural foods were available only in small health food shops, which specialized in vitamins and a limited amount of packaged foods for special diets. Later, when stores began stocking staples such as whole wheat flours and breads, certified raw milk, free-range eggs and organic produce, shoppers could purchase enough natural foods with which to prepare an entire meal.

“Most of these stores were characterized by rough wooden fixtures, rudimentary bins for holding bulk items and unusual signs. Walls in some stores were covered with revolutionary posters, in others by photos of favorite gurus. They were staffed by volunteers or barter-rate employees, and many stores served as focal points for extended families, to the point that it was impossible to tell the employees from the customers.

“These early stores developed to serve the needs of specific communities, or sub-communities, but the reason they succeeded can be traced to the one or two ambitious and intelligent individuals who realized they had to start making a living. To them, selling natural foods was a lot more agreeable than working for law firms or defense contractors, and it seemed to have more of a future than pottery or candlemaking.

“An array of natural foods philosophers influenced the nascent movement and got it rolling. Names such as Adelle Davis, Paavo Airola, Linus Pauling and Michio Kushi are familiar to anyone who has endeavored to learn more about their own health. Their books prompted people to question their lifestyles, their diets and their relationships with the medical establishment. Although only a few preached absolute vegetarianism, most of these authors advised their readers to eat less meat and more whole grains.

“The dissemination of Kushi’s macrobiotic teachings, based on balancing opposing characteristics in foods, paralleled the rise of the industry. Kushi began lecturing on macrobiotics shortly after arriving in the United States in 1949, but he didn’t establish a strong following until 1965, when he founded a summer camp on Martha’s Vineyard, and it wasn’t until 1972 that the EastWest Foundation was opened in Boston, representing a broadening of his attempt to awaken the public. It was in that year and the following few that the natural foods movement really began to spread.

“Macrobiotics had a direct impact on the industry, with Kushi controlling Erewhon until its bankruptcy in 1981. Other manufacturers and importers, such as Eden Foods in Michigan and Chico-San in California, evolved to supply the consumer demand for macrobiotic foods, and hundreds of natural foods stores opened around the country.

“Mainstreaming: In the mid-1970’s, the voices advocating natural foods diets changed somewhat. Instead of iconoclasts on the fringes of their disciplines, the messengers were now from the mainstream. In 1977, Sen. George McGovern’s Special Committee on Nutrition released its landmark *Dietary Goals*, a document which gained favor across a broad spectrum of health officials and nutritionists. Within two years, even officials from the notoriously stodgy National Institutes of Health adopted most of the recommendations from the McGovern report. But the public received this information piecemeal, in headlines such as “Cholesterol Linked to Heart Disease” and “Fat and the Risk of Cancer.” The McGovern report sent millions of

people into natural foods stores for the first time in varying attempts to escape preservatives; artificial colorings, food additives, refined sugars and flours, and meat. Yet even greater millions, equally concerned about their diets, stayed away from natural foods stores. In 1980, a Food Marketing Institute survey found that 68% of grocery shoppers felt natural foods were superior and that 34% actively purchased natural foods. But only 8% regularly shopped in natural foods stores. Still, for a fledgling industry, the shoppers who did enter natural foods stores created tremendous growth curves, with some operations experiencing sales jumps of 50% or better in one year. People were being scared into eating better, and they were becoming vegetarians in droves. Fortunately for these born-again vegetarians, there were more foods to eat.

“With the publication of William Shurtleff and Akiko Aoyagi’s *The Book of Tofu* in 1975, the natural foods industry discovered soyfoods. Although several Asian tofu companies had operated in the U.S. since the 1930’s, their products were sold mainly to Asian-Americans. But after the book appeared, small tofu plants started springing up throughout the country. The phenomenon was so startling that food industry writers proclaimed that tofu would become ‘the yogurt of the 80’s.’ Last year, Juan Metzger, the founder of Dannon Yogurt, was named chairman of the board of New England Soy Dairy, the largest Caucasian-run tofu company.

“To meet the consumer’s demand for convenience, American ingenuity has come up with quick brown rice and frozen tofu lasagne, and just in time. By the end of the 1970’s, even committed natural foods shoppers had grown tired of baking their own bread and soaking beans overnight. They had started careers and were beginning families. Time was of the essence.

“As a result, the natural foods stores themselves began to change. Where it was once properly ecological for stores to require customers to bring their own bags (and bag their own groceries), that now took too much time. And working a few hours a week at the co-op was too much for a lot of two-income couples. Predictably, the number of co-ops with working memberships began to decline.

“At the end of 1977, a new kind of natural foods store was launched in Los Angeles by a former school teacher who had nearly died from an allergic reaction to an antibiotic commonly found in chicken. After doing some research, Sandy Gooch discovered her problem was by no means unique and that she could avoid near-fatal reactions with a natural foods diet. But she was not willing to shop in small, limited natural foods stores which required her to make additional trips to the supermarket in order to purchase other household items. She wanted something better.” (Continued). Address: Executive editor of *Natural Foods Merchandiser* magazine, Oregon.

1517. Johnson, Gil. 1984. Natural foods and American

history: A ten year perspective (Continued—Document part II). *Vegetarian Times*. Nov. p. 33-34, 66-67. [2 ref]

• **Summary:** (Continued): “That something better turned out to be Mrs. Gooch’s Natural Foods Market, and it was typical of the type of store which revolutionized the industry. Although only 6,000 square-feet (small by supermarket standards), Mrs. Gooch’s nevertheless advertised itself as a ‘natural foods supermarket’—Indeed, it had a bountiful produce department, a full-service meat counter and rows of grocery aisles devoted to everyday kinds of food products. Some of the produce was organically-grown, all of the meat was naturally-raised, and the grocery products had to meet the strictest of standards: ‘It is our goal not to offer any food, beverage, vitamin, cosmetic or household product made with refined flours or sugars, hydrogenated oils, artificial sweeteners, chocolate, caffeine, toxic preservatives, artificial flavors or harmful dyes or additives,’ reads the store policy. Yet despite these restrictions, Mrs. Gooch was able to find regular grocery products which fit her criteria and filled the gaps left by natural foods suppliers.

“Present Realities” Today there is at least one large and comprehensive natural foods supermarket in nearly every major metropolitan area, and in several smaller ones. The largest and most successful stores are concentrated on the West Coast, across the Sunbelt and in New England. Several are now over 20,000 square-feet in size, which is ample even for a traditional supermarket. Most of these stores have meat and seafood counters, but there are some, such as Follow Your Heart in Los Angeles, Lifestream in Vancouver, BC, and Rising Tide in Glen Cove, NY, that get along quite well without these food products. And there are stores which carry natural meat products even though their owners are vegetarians.

“Many of today’s natural foods supermarkets carry meats, beer, wine, chocolate, coffee, bagels made with white flour, and ice cream made with white sugar. They have added these products to serve a broader public, and to keep up with the changing eating habits of their core customers.

“For years we were an exclusive store. We only carried what we felt was absolutely healthy for people and excluded all other products,’ says Stan Amy, president of Nature’s Stores in Portland, Oregon. ‘We’ve now decided to change our marketing strategy. We’ve agonized over the introduction of products such as beer and wine and meat, but the fears we had about losing customers haven’t materialized. What we’re doing now is bringing a lot more people into our stores because we carry those products, and once they’re inside, we can give them samples of baked tofu and tell them how to cook brown rice and hijiki.’

“When we started,’ says Tony Harnett of Boston’s Bread & Circus, ‘we drew mainly hippies. Now we have a mix of everyone—young and old, all ethnic groups, all income levels. We are no longer an alternative store. We are a store that other grocery stores want to emulate.’

“That’s no idle boast. Bread & Circus is annually named the best grocery store in the Boston area by a local upscale magazine.

“Although the expansion of the natural foods industry was nurtured by external, societal influences, today’s growth occurs because of a conscious effort by progressive natural foods companies to expand their markets. These entrepreneurs are talking about marketing strategies, market shares and advertising budgets. They’re conducting consumer studies to determine what their present customers and potential customers want, and are learning, for example, that their customer base is aging, their average shopper is concerned with keeping a trim, healthy appearance and about feeding their children properly.

“Retailers are receiving more help from their suppliers these days. Selections have increased, gaps have been filled and packaging looks professional. A few companies have reached mega-size: when Celestial Seasonings sold to Kraft for a reported \$36 million, it indicates the industry has arrived.

“Despite this success, the natural foods industry still has a long way to go. The 3.3 billion in annual sales for 1983 is just 1% of all the money spent on food by American consumers—roughly the same volume as the McDonald’s hamburger chain.

“But retailers are going after the McDonald’s market too. ‘We’re thinking about putting a drive-in window next to our restaurant,’ says Terry Dalton, president of the Unicorn Village Natural Food Store and Restaurant in North Miami Beach, Florida. ‘We’ve developed our own healthy fast foods. I see a rejection of traditional fast foods. People today want both convenience and quality.’

A photo shows: Check-out lanes at Mrs. Gooch’s Natural Foods Store, Sherman Oaks, California. Address: Executive editor of *Natural Foods Merchandiser* magazine, Oregon.

1518. Macrobiotic Wholesale Co. (The). 1984. Catalog and price list [Mail order]. 92 McIntosh Road, Asheville, NC 28806. 63 p. 28 cm.

• **Summary:** The catalog, effective 15 Oct. 1984, contains 450 new products from 15 new vendors, plus 73 new books. The president of the company is Don DeBona. Soy-related products include miso, shoyu, tamari, nigari, kinako, natto and koji spores, black soy beans, tekka, Ah Soy soy drink (soymilk), and amasake.

One of the many suppliers is The Mitoku Co. Ltd., which “was founded in Tokyo [Japan] in 1968 by Mr. Kazama at the express behest of Michio and Aveline Kushi. In fact, the company was named after MI-chio and TO-moko (Aveline’s real name; Aveline was given her name by George Ohsawa) KU-shi.” Address: Asheville, North Carolina. Phone: 800/438-4730 or 704/655-1056.

1519. Kennedy, J. Robert; Milbury, Peter. 1984. The sale of Chico-San to H.J. Heinz Co. (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 18. 1 p. transcript.

• **Summary:** Peter: Chico-San was sold on 16 Nov. 1984. The sale price is confidential, but it was large and all cash. Bob Kennedy, who will soon be age 65, has a full-time contract for 6 months, then 6 months on a half-time basis, then a retainer after that. Bob sold the business because he could no longer finance the runaway expansion of the rice cake business, and so he could retire to do his own work with food. One big question is what Heinz will do with the macrobiotic product line—mostly imports. The marketing, sales, and product development liaison for Chico-San in Pittsburg is Mary Ann McCullough, Heinz USA, Div. of the H.J. Heinz Co., P.O. Box 57, Pittsburg, Pennsylvania 15230. Phone: 412-237-3812.

Bob: The original intent was to sell only the rice cake portion of Chico-San. But the rice syrup business was also sold. If Heinz wants to get behind the macrobiotic foods with all their financial and with Chico-San macros in control of that division—that's one idea they are now studying. Heinz is interested in the macrobiotic program as a program for the future. But it may not be compatible. Herman Aihara may be hired as a food consultant; he and Peter Milbury might stay in that division. Bob thinks the key is to preserve the quality of the foods, and not to put pressure on small suppliers. Right now he doesn't think it will work, but it might. If it doesn't work out, Bob will set up another company. The contract allows him to keep the brand names and buy back inventories. Bob has joint ventures starting to be planned with Japanese friends. Bob has already established a new company to continue his work with macrobiotic foods. He wants to cut his work load and get away from nuts and bolts. "We're not selling just food products; we're selling a philosophy. There are two levels of macrobiotic foods: Medicinal quality foods, and regular products."

Bob's organization starts with Lima Ohsawa, then goes through Ohsawa Japan, then Herman and Bob Kennedy, Peter Milbury, and Joel Wollner. All of this organization could go into the macrobiotic division of Heinz. For example, Heinz could use miso in their barbecue sauces. Address: Chico, California.

1520. Tepper, Robert. 1984. New developments with soy ice creams, Ice Bean, and Farm Foods (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 28. 2 p. transcript.

• **Summary:** Sales of Farm Foods' Ice Bean were about \$500,000 in 1982, almost \$700,000 in 1983, and just short of \$1,000,000 in 1984. More than 90% of the sales were in hard-pack pints.

Robert was in and out of San Rafael. He was the official president of the company. They definitely distributed Ice

Bean with a van from 820 "B" Street in San Rafael. They even started getting involved with Rock Island—a natural foods distributor. One big change at "B" Street was in the equipment used to make Ice Bean. They went from little batch ice cream machine with no overrun. At the King Street plant in San Francisco they bought a \$25,000 Mark III continuous ice cream freezer. So in both locations they made Ice Bean themselves! They sold the Mark III when Farm Foods left San Francisco to a frozen yogurt company.

At King Street by 1979 they were shipping to Midwest Natural Foods, Tree of Life in Florida, etc. The move from King Street [to The Farm in Summertown, Tennessee] marked a commitment to getting more involved with ice cream and less with tofu (which was growing fast but was more competitive). They had a monopoly on ice cream. They didn't think they could do both. Both were growing so fast. The peak was 500-600 per week. Most was sold in California.

At King Street rent was a huge problem; also difficulties of urban communal life. They moved from Richmond where all had lived together in a hotel in a high-crime black neighborhood. They tried to move to San Francisco, so rent and food went way up. Combined with realization that they had a hot product and monopoly with Ice Bean.

With tofu they were first with tofu salads, and tofu cheesecakes.

They held Al Jacobson [Garden of Eatin'] at Bay. Didn't want to private label.

From their point of view, Tofutti helped them by expanding the market. They have sold about one million pints and over one million pints equivalent. More than 90% is in hard pack pints.

They've done lots of experimenting with soy protein isolates. Farm Foods now has a natural foods line with fresh soymilk and honey and a line resembling Tofutti's taste and ingredients. The first of the latter products were introduced in Nov. 1984 and are now sold in Southern California in dipping stores. Their 3-gallon dipping tubs are on the market now. This Tofutti-like product uses both isolates and fresh soymilk, with honey and high fructose corn syrup (HFCS). They are test marketing the products in Southern Calif and Ohio. There will probably be parallel product lines in all forms. The Tofutti style product will contain tofu and the term tofu will precede the flavor term, e.g., Ice Bean Tofu Vanilla. They make the tofu on The Farm.

Malone and Hyde in Nashville is now distributing Farm Tofu. One of top 5 distributors in the USA is running test markets on both ice beans and tofu. They've upgraded the soy dairy; it's now sanitary and looks nice. It would surprise me. They can make several thousand gallons a day. List Farm Soy Dairy as source of milk, tofu, and tempeh.

Big changes on the farm during the almost past 1½ years. Some things are still collective. Land, medical, the gate, and electricity. But the actual cash flow thru

people's hands has changed drastically. It's now a blend of community and capitalism. Most are happy with the changes. But making the change was wrenching and difficult. Big changes in philosophy.

The main reasons for closing B Street: The rent skyrocketed, difficulties of large urban communities very expensive. A small business could not support them. Address: Farm Foods, 632 Radcliffe Ave., Pacific Palisades, California 90272. Phone: 213-459-9251.

1521. Kerr, Peter. 1984. Gayelord Hauser, 89 author; Proponent of natural foods [obituary]. *New York Times*. Dec. 29. p. 26.

• **Summary:** Helmut Eugene Bengamin Gellert Hauser was born in about 1895 [Wikipedia gives his birth date as 17 May 1895], in Tübingen, Germany, the son of a Lutheran schoolmaster and the 11th of 13 children. He went to the USA to be with his elder brother, Otto Robert, who was a Lutheran minister in Milwaukee, Wisconsin.

He was stricken with tuberculosis of the hip and underwent several operations. But his cure did not begin until a doctor recommended warm baths, clay packs, herb teas, and a diet of salads, fruit juices, and vegetable broth. He had discovered the healing power of food.

In 1923, after studying food from medical specialists in Vienna and Dresden, Mr. Hauser opened an office in Chicago, Illinois, where he gave advice on diet and nutrition. He soon became a partner in Modern Food Products (Milwaukee, Wisconsin), which specialized in an herbal laxative, Swiss Kriss, and Hauser broth.

In 1927 he moved to California and quickly won a following among film stars. His ideas also became popular with Queen Alexandra of Yugoslavia [reigned 1944-1945; lived 1921-1993] and the Duchess of Windsor. From 1930 to 1936, he wrote 8 books on diet and health. During the 1950s he remained nationally prominent via his radio and television programs and his periodical "Diet Digest." He and Greta Garbo (a close friend) invested in property on Rodeo Drive in Los Angeles before prices skyrocketed. He had buildings constructed and became landlord of about 6 prestigious shops there.

Mr. Hauser never married. He is survived by a nephew, O. Robert Hauser. A portrait photo shows Hauser in 1974.

Note: Concerning his later years and death, Wikipedia states:

"Hauser was friends with Greta Garbo until the end of his life and they may have been romantically involved. Garbo was also friends with Frey Brown, a promising young actor who had left his career in the early 1940s to be Hauser's male domestic partner. Garbo and her close friend Mercedes de Acosta would spend time at Hauser and Brown's houses in Los Angeles, Palm Springs, and Italy.

"After purchasing a villa in Taormina, Sicily in 1950, Hauser spent much of his time there with Frey Brown. After

Brown's death in 1979, Hauser sold the villa and returned full-time to Hollywood, where he remained in vigorous good health until shortly before his death on 26 December 1984 from complications of pneumonia."

1522. *SoyaScan Notes*. 1984. Chronology of soybeans, soyfoods and natural foods in the United States 1984 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. A highly influential 10-year, \$150 million study released by the National Heart, Lung, and Blood Institute in Washington, D.C. proves for the first time a direct relationship between high blood cholesterol and the risk of heart attack, the nation's number one killer.

Jan. Legume, Inc. launches an all-natural line of cholesterol-free low-calorie Italian and international gourmet tofu-based frozen entrees in stylish full-color packages: Tofu Tetrazzini, Cannelloni Florentine, Vegetable Lasagna, Tofu Bourguignon, Sesame Ginger Stir-fry, Stuffed Shells Provencale, Tofu Manicotti, and Tofu Lasagna. Jan. Eden Foods becomes the sole import agent for Muso Shokuhin in the United States.

Feb. 25. *Soymilk Industry and Market: Worldwide and Country-By-Country Analysis*, by Shurtleff and Aoyagi published by Soyfoods Center. 177 pages, 640 references. \$350.

Feb. Marusan-Ai, Japan's second largest soymilk maker and one of the five largest miso makers, starts to market tempeh. They publish a 27-page tempeh booklet and by May are producing 30 tonnes (66,000 lb.) of tempeh a month, making them the largest tempeh manufacturer in the world. During 1984 at least five Japanese food companies are making tempeh, leading to a mini-boom of this soyfood which was first sold commercially in Japan in 1983.

March 2. Based on responses to his Oct. 1983 survey, Tom Timmins drafts preliminary 3-page tofu standards (2 pages of which are microbiological standards) that he circulates to the Soyfoods Standards Committee, inviting comments. On March 6 Wm. Shurtleff of Soyfoods Center expands these, keys them into the Center's word processor, and returns them to Timmins.

March 2. Problems start between Eden Foods and the U.S. Food and Drug Administration (FDA). FDA sends Eden a strongly worded letter citing eleven claims in Eden's brochures that the agency considers erroneous, including the company's apparent endorsement of Edensoy as an infant formula. FDA asks Eden to recall the brochure in which Edensoy is promoted as "Good for Babies." An infant became ill due to copper deficiency on an Edensoy diet.

March 8. Soyfoods Association of America members have 12 pages of impressive color advertisements and information about soyfoods and the Association in Natural Foods Merchandiser, in preparation for the NFM Anaheim Natural Foods Expo in March. Full-page color ads by

Legume, Erewhon shoyu, Vitasoy, San-J, Tofutti, Edensoy, and Pure & Simple soy sauce.

March 11-13. At the Natural Foods Expo at Anaheim, the Soyfoods Association organizes the first Soyfoods Pavilion, a 16-booth cluster of soyfoods companies and products, which is the hit of the Expo and a show of strength for the industry. Lots of delicious free food draws throngs from the 9,000 Expo attendees.

March 11. At Anaheim, Vitasoy launches its first designed-for-America soymilk, in natural, coconut, and chocolate flavors, each sweetened with maple syrup, and imported from Hong Kong. Many subsequent eye-catching, health-oriented full-page color ads are run in national health magazines.

March 29. First draft of the Tofu Standards, 15 pages double spaced, is compiled by Shurtleff. Timmins allocates \$2,000 to retain two Washington, DC, attorneys who are specialists in foods and regulations to assist the committee in developing professional standards. The draft is circulated to 38 people who are asked to respond to a poll on 14 key issues.

March 29. The term “second generation” products is first applied to soyfoods by Wm. Shurtleff in the new tofu standards. A computer-related term indicating one step more advanced, it quickly replaces the term “secondary,” which has a slightly negative connotation.

March. American Soybean Association’s Belgium Office publishes the first issue of *Soya Foods*, a 6-page newsletter edited by Michael Martin, Protein Market Development Manager. It will be issued three times a year in English, French, Dutch, and Italian. This is a completely new direction for ASA in the Western world... but it doesn’t last long.

April 7. *Soyfoods Industry and Market: Directory and Databook 1984* (4th ed.) by Shurtleff and Aoyagi published by Soyfoods Center. 215 pages, \$95.

April 13. Richard Leviton resigns as co-director of *Soyfoods* magazine and decides to discontinue his active involvement in the U.S. soyfoods movement. He plans to go to England to write a novel about King Arthur; he leaves in late April.

April 20. *Tofu, Tempeh, & Other Soy Delights*, by Camille Cusumano published by Rodale Press. It is widely and positively reviewed by national media.

April 27. The term “soymilk” is legalized for use in Canada, after a lengthy and expensive court battle by Victor Food Products. The court ruled that this is the “common and ordinary term” for the product, used since about 1918 in scientific articles and commerce. Thus it cannot be squelched by dairy interests.

April. New England Soy Dairy, America’s largest Caucasian-run tofu manufacturer, changes its name to Tomsun Foods, Inc.

May. *Nutritional Cooking with Tofu*, by Christine Liu

published by Graphique Publishing in Michigan.

May. American Natural Foods (formed in Jan. 1984 by John Troy, creator of miso-containing Hot Stuff) has a private stock offering that raises \$150,000. In October ANF debuts a line mainstream American sauces and seasonings, each featuring miso, that are delicious and beautifully marketed.

May. *Die Tofu Kueche* (The Tofu Kitchen), by Verena Krieger, Swiss soyfoods pioneer, published by Tanner + Staehelin Verlag in Zurich. 171 pages with many photos.

June 7. “Tofu” by Barbara Hansen and “Tofu: Americanization of a Soy Food” by Karen Gillingham published in the *Los Angeles Times*.

June. Landstrom Distributing Co. of San Francisco, files for Chapter XI bankruptcy. Keene Distributors of Texas, and Collegedale of Tennessee, both profitable, well-run companies, are also pulled under, innocent victims of the Landstrom collapse. All three units were owned by Nutritional Foods, Inc. and all were major natural / health foods distributors. These bankruptcies seriously hurt the natural foods industry as well as many individual companies; sales and confidence plummeted nationwide. In late 1984 Fillmore Foods purchased Landstrom, and Balanced Foods purchased Collegedale and Keene.

June. Migros, Switzerland’s largest supermarket chain, launches Tofu Nature, its own brand of tofu, made at Conserves Estavayer S.A., with widespread publicity and excellent product information on both tofu and soybeans. It is sold in the same section as dairy products and eggs. The launch is considered a great success; supply is not able to catch up with demand until late December.

June. *The Book of Soybeans*, by Tokuji Watanabe and Asako Kishi published by Japan Publications. 191 p.

June. *Using Tofu, Tempeh & Other Soyfoods in Restaurants, Delis & Cafeterias*, compiled by Shurtleff & Aoyagi, published (comb bound; 181 p.) by Soyfoods Center.

July. Kikkoman completes its second major shoyu (Japanese-style soy sauce) plant outside Japan, in Singapore. The 18,000 square meter factory, with a capacity of 3,000 kl (792,500 gallons) a year and 40 employees, costs \$14 million. It will make shoyu and teriyaki sauce. Official opening ceremony was Nov. 21.

July. The requirement in effect since 1965 that isolated soy protein used as an ingredient in meat and poultry products must contain titanium dioxide as a tracer, is removed from federal meat and poultry products inspection regulations, following a petition by ADM, Grain Processing Corp., and Ralston Purina.

July 9. “Its Trendy, Tasty and Tofutti” (2/3 page) by J.D. Reed published in *Time* magazine (U.S. circulation 4.3 million). Probably the biggest media coverage for tofu in U.S. history. Tofutti hits the big time!

July 17. *History of Tempeh*, by Shurtleff and Aoyagi

published by Soyfoods Center. 102 pages, including 375 references. Continued.

1523. *SoyaScan Notes*. 1984. Chronology of soybeans, soyfoods and natural foods in the United States 1984 (Continued–Part II) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: July 26. At the NNFA (National Nutritional Foods Association) show in Atlanta, Georgia, Great Eastern Sun rolls out Ah Soy, its new line of soymilk imported from Saniku Foods in Japan, in vanilla, chocolate, and plain flavors, in foil retort pouches. After the show, the Soyfoods Association board meets. Steve Snyder replaces Michael Austin as director of SAA. The next day, SAA directors Snyder, Burke, and Barat travel to St. Louis, Missouri, to meet with the staff of the American Soybean Association to discuss possible areas of mutual interest. ASA appears friendly and open minded, and offers to discuss specific future joint projects. A potential line of communication is opened.

July 30. *People* magazine (circulation 2.8 million) article on Tofutti titled (ineptly) “A Happy Zealot Turns Curd (Yuck!) into a Creamy Treat.”

July. “The Soyfoods Industry: Growing Like a Beanstalk” by B. Bialick published in *Whole Life Times*.

Aug. 9. The last issue of Soyfoods magazine (No. 10) arrives, with its first color photo on the cover. 7,000 copies printed at a cost of \$11,200. Doug Fiske of Encinitas, Calif., a professional editor and publisher, did a fine job. Magazine’s focus has been changed from production to marketing of soyfoods.

Aug. 12-17. World Soybean Research Conference III held at Iowa State University. Heavy emphasis on soybean production and agronomy; relatively little new material on soyfoods. Soyfoods movement is not represented.

Aug. 20. Ralston Purina introduces Checkerboard Farms TenderLean, America’s first branded ground beef product consisting of 75% ground lean beef and 25% textured soy protein isolate. Some meat journals are harshly critical and many meat departments refuse to carry it. Ralston withdraws the product.

Aug. 24. Westbrae Natural launches WestSoy Natural, a plain soymilk similar to Ah Soy but lower in price and made with organic ingredients. Imported in a foil pouch from Saniku Foods in Japan, it is the company’s first soymilk.

Aug. 31. San-J International Inc. announces that it will construct a soy sauce plant (44,000 square foot, \$5 million) in Virginia on a 27-acre site just north of Colonial Heights.

Sept. Chico-San, Inc. introduces unpasteurized miso in a revolutionary “Pressure Release Package,” a plastic bag with a one-way valve that allows the escape of the carbon dioxide produced naturally during fermentation.

Sept. 9-14. Gloria Vanderbilt announces that she, in conjunction with Dolly Madison and Frusen Gladje, will

launch a tofu ice cream.

Sept. 27-28. First European Soyfoods Workshop held in Amsterdam, The Netherlands, at the Grand Hotel Krasnapolski, organized by the American Soybean Association’s Belgium office. ASA reports attendance as 105 people from 14 countries, but participants report a maximum of 50 participants. Talks on tofu, soymilk, tempeh, distribution, and microbiological standards, all later published in the Proceedings. There is a large Expo with soymilk equipment from Alfa-Laval and Soya Technology Systems prominently featured. A very successful event, and another ASA first!

Oct. *The Tofu Gourmet* by Linda Barber and Junko Lampert published by Kodansha in Menlo Park, CA. 129 p. Many color photos.

Oct. 15. “Here Tofutti, There Tofutti,” a full-page, very positive article with 2 color photos published in *Newsweek* magazine (circulation 3 million).

Oct. 23. The joint managing directors of the International Food Information Service, owners of Food Science and Technology Abstracts (FSTA, the world’s largest, oldest, and most widely used food-related computerized database) visit William Shurtleff at The Soyfoods Center to discuss putting the 6,500 bibliographic records in The Soyfoods Center Library into FSTA, thus making this information available worldwide. Both parties are very interested in the project but technical problems remain to be solved.

Oct. Westbrae Natural Foods launches Malted’s, billed as “thick and rich non-dairy soy delights.” Marketed like a milkshake and imported from Japan in a foil pouch, they come in three flavors: vanilla, carob, and cocoa-mint.

Oct. Three member team from Plenty Canada spends one month in Sri Lanka, funded by the Canadian International Development Agency, studying the country’s soyfoods program. They learn, teach, and introduce tofu ice cream.

Nov. 13. A.E. Staley Manufacturing Company, America’s oldest existing soybean crusher, announces that its soybean crushing operations are for sale.

Nov. 20. Tofu Time’s first Tofutti Shop opens in uptown Manhattan, New York. A fast-food retail outlet with a slick, red-and-white plastic, almost gaudy, decor.

Nov. 16. Chico-San Inc. is purchased by H.J. Heinz Co., largely for its rice cake business.

Nov. 21. After years of searching, William Shurtleff, with help from Nancy Florida in Java, discovers an 1815 reference to tempeh in the *Serat Centini*, from the Court in Solo, Java. This pushes the earliest reference to tempeh back 60 years and has it originating in Indonesian rather than in Dutch culture.

Nov. 30. America’s first Tofu Standards are issued by the Soyfoods Association’s Tofu Standards Committee, in part to help stem the rising tide of products bearing the name “tofu”

that contain little or no tofu.

Nov. Galactina, a Swiss manufacturer of soymilks since 1969 (they make Vita Drink / Enteroform, a soymilk sold to in vanilla, chocolate, and strawberry flavors to the dietetic and pharmaceutical markets for tube feeding), starts test marketing tofu in Swiss supermarkets. An attractive recipe booklet is attached to each packet, which is pasteurized for a 6-week shelf life.

Dec. Excellent, 19-page cover story on “Soy milk and Soyfoods,” published in the prestigious *Journal of the American Oil Chemists’ Society*. 1984 is the Society’s 75th anniversary.

Dec. Ralston Purina, in its 1984 annual report, notes: “The Company has entered into preliminary agreement with Cargill, Inc., to sell six of the Company’s seven soybean [crushing] plants.” It also reported strong, steady growth in sales of soy protein products, from about \$98 million in 1980 to \$152 million in 1984, for an 11.5% compound annual growth rate (but only 4.5% after adjusting for inflation).

Dec. Gloria Vanderbilt’s Glace, a soy-based nondairy ice cream, starts being test marketed in Los Angeles, in nine flavors.

Dec. A poll of readers by *Vegetarian Times* magazine finds that 53.1% of readers used tofu one or more times during the past 7 days; 29.4% used it 3 or more times.

Dec. 31. Brightsong Light Foods in Petaluma, California, receives the first funds of a \$500,000 equity investment from a Hong Kong investor, who had seen an article praising Brightsong in *Venture* magazine. Brightsong greatly expands its product development and promotion.

* American Soybean Assoc. phases out its Human Nutrition Dept., headed for years by Judy Trujillo.

* Chicago Board of Trade [Illinois] starts trading options contracts on soybean futures. Continued.

1524. *SoyaScan Notes*. 1984. Chronology of soybeans, soyfoods and natural foods in the United States 1984 (Continued–Part III) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. 1984 New Trends: Growing Awareness of Dangers of Excess Cholesterol and Fat Consumption. Since cholesterol became a public health issue in the mid-1950s, the medical profession has been uncertain about the degree of its dangers, largely due to lack of medical evidence from long-term human studies. Yet for years the American Heart Association, United States Dept. of Agriculture, and the Soyfoods Association have been urging Americans to lower their blood cholesterol levels by eating less of the foods rich in cholesterol and saturated fats. In Jan. 1984 the long-awaited medical evidence was finally released, dramatically and extremely visibly. There were repercussions throughout the entire food and health care industries. The public started to pay serious attention.

Then on March 26 *Time* magazine ran a landmark

cover story on the dangers of cholesterol. On 13 December *The New York Times* ran a major front-page report titled “Panel Suggests Many in U.S. Need to Reduce Cholesterol” containing the “the most far-reaching health recommendations yet made on cholesterol and heart disease” by an expert panel, convened by the National Institutes of Health. Numerous prestigious groups lowered their recommended safe cholesterol intake levels. These developments made soyfoods (which, like all non-animal products are free of cholesterol) look better than ever nutritionally, and increased their consumption significantly.

It has been known for several decades that consumption of polyunsaturated fatty acids (such as those found abundantly in soybeans) reduces serum cholesterol. During the 1970s Americans were encouraged to reduce consumption of saturated fats and cholesterol and increase consumption of polyunsaturates. Now this advice is changing. The new message is to “Reduce the intake of dietary fat.” All fat, including polyunsaturated. In fact, these very words now appear as the first of four dietary guidelines on the letterhead of the prestigious American Institute for Cancer Research.

Continued Drop in U.S. Beef and Red Meat Consumption. From a high of 94.4 lb per capita in 1976, beef consumption has steadily declined, falling to 77.3 lb in 1982, a drop of 18.1% in only 6 years. During the same period, total red meat consumption (including pork, lamb, mutton and veal) fell from 163.6 lb to 148.0 lb, a drop of 9.5%. Many consumers switched to lower priced, lower cholesterol chicken, which rose from 42.7 to 52.9 lb per capita. Still, total annual U.S. meat and poultry consumption increased by over 4 pounds during his period (Stucker and Parham 1984).

Rise and Decline of the Soyfoods Association. The Soyfoods Association of America (SAA) got off to a promising start in 1984 with a successful fund raising drive. Then in March, soyfoods companies took 16 adjoining booths to form the Soyfoods Pavilion, capturing the spotlight at the Natural Foods Expo in Anaheim. It looked like the “soyfoods movement” was maturing into the “soyfoods industry.” But for the rest of the year the Association was largely inactive. This was disappointment to many, since interest in soyfoods in America had never been higher.

Prior to the founding of SAA in 1983, its active forerunner SANA (Soyfoods Association of North America) had six major ongoing activities: (1) Publication of *Soyfoods* magazine, a quarterly that actually came out about twice a year; (2) Publication of the monthly *Soyfoods Newsletter*, a key source of communication within the industry between issues of the magazine; (3) An annual summer Soyfoods Conference and Expo, drawing participants from around the world; (4) Periodic press releases; (5) Writing a steady stream of excellent articles on soyfoods for publication in national magazines; (6) An association phone and mail service to respond to outside enquiries for information.

The person primarily responsible for initiating and carrying out all these activities was Richard Leviton. Though funding was hard to obtain, he worked hard, wasted nothing, and made many personal and financial sacrifices for a cause he believed in. Leviton's many and diverse talents, and especially his talents as a careful researcher and outstanding popular writer, were of tremendous aid to the incipient soyfoods movement. In late April, after 5 years of devoted effort and feeling a bit "burned out," he left the soyfoods movement and moved to England to pursue his long-cherished career as a novelist. Leviton, more than any other person, was responsible for the rapid rise and visibility of the soyfoods movement in America. His departure was a major loss to both the association and the magazine. He and his creative efforts will be sorely missed.

Only the last of the six major activities initiated by Leviton has been continued by the "new" Soyfoods Association of America. However it did initiate the excellent Soyfoods Pavilion at the annual Natural Foods Expo and it started subscribing to the valuable Luce Clipping Service. There were board meetings in June 1984 and Jan. 1985. By summer of 1984 the Association was looking for a replacement for Executive Director Michael Austin, who was also "burned out." In August he was temporarily replaced by Steve Snyder, former marketing director for Hinode Tofu, but shortly thereafter Snyder was hired as national sales manager by Vitasoy USA. After that there was no executive director. Despite relatively large initial pledges, the Association's balance was always low which meant that, lacking Leviton, activity largely came to a stop. The only significant new activity was the development of tofu standards by the Association's Standards Committee.

Unlike the original Soyfoods Association, the "new" one took little interest in small soyfoods companies, arguing that they had no money. The "new" association was therefore composed mainly of larger companies with regional or national distribution and not truly representative of the industry.

Rapid Rise in Soymilk Imports. The boom in soymilk imports, started during the past two years by Vitasoy and Edensoy, accelerated during 1984. New products included Vitasoy's new American flavors, Westbrae Natural's Malted, and Great Eastern Sun's Ah Soy. All three were very widely advertised in eye-catching color ads. Most of the adult soymilk beverages sold in America are still imported from Japan. Strangely this dramatic development has gone largely unnoticed by the media, which has been focusing its attention on Tofutti.

Two new companies and products were mentioned only briefly by Shurtleff and Aoyagi in their two-volume book *Soymilk Industry and Market: Worldwide and Country-by-Country Analysis*, published in Feb. 1984. The first of these was Westbrae's Malted and Westsoy. Although Westsoy was launched in August and Malted in October, sales of both

for 1984 were roughly \$700,000 or 1.67 million units. They quickly became the best-selling products in the company's history.

From late July when Great Eastern Sun launched Ah Soy, the product was a "fantastic success." During the period from 1 Nov. 1984 to 25 Jan. 1985 (just under one fiscal quarter) 525,000 unit packs of four flavors were sold. By March 1985 Ah Soy accounted for 15-20% of GES's total sales.

Big Food Companies Increasingly Interested in Tofu. Those studying tofu for use in foods include Quaker Oats, CPC International, International Multifoods in Minneapolis (Minnesota), Pillsbury, and Campbell's Soup.

1525. **Product Name:** Pureharvest Organic Soy Drink [Natural, Vanilla, Barley Malt plus Other Flavors].

Manufacturer's Name: Ceres Natural Foods Pty. Ltd. (Importer & Distributor). Made in Japan.

Manufacturer's Address: East Bentleigh, Victoria, Australia.

Date of Introduction: 1984 December.

Wt/Vol., Packaging, Price: 500 ml Doypack stand-up retort pouch.

How Stored: Refrigerate after opening.

New Product–Documentation: Australian Dairy Foods.

1985. Feb. p. 51. "Soy report." Over the past year sales have increased greatly. Also distributing Morinaga Tofu. Don Lazzaro is director of this company.

STS. 1985. Containers for Soymilk. Shows color photo of package. Brown, yellow, and orange.

Australian Dairy Foods. 1986. Feb. p. 84. Shows two sizes of Tetra Brik cartons, each vanilla flavor.

Letter (fax) from Don Lazzaro of Ceres Natural Foods. 1995. June 15. In Dec. 1984 they introduced Pureharvest soymilk in vanilla and natural flavors, in 500 ml Tetra Brik cartons, made by and imported from Kibun in Japan.

Letter (fax) from Daniel Hannaford of Ceres Natural Foods Pty. Ltd. The company's brand is Pureharvest. They apparently import soymilk from Mitoku. The address is now 18 Ardena Court, P.O. Box 187, East Bentleigh, Victoria 3165, Australia. Phone: (03) 579 3422.

1526. Kotsch, Ronald E. 1984. Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide. *East West Journal*. Dec. p. 14-21.

• **Summary:** "Muso was founded in 1966 as a macrobiotic food company, aiming to provide the highest quality traditional Japanese foods. It is now the oldest and largest macrobiotic food concern in Japan. Within the natural foods movement in the country it is one of the top three firms. Also, since 1969, it has been a major exporter of macrobiotic foods. With its Tokyo-based competitors the Mitoku Company and Ohsawa Japan, it dominates the large and growing international trade in Japanese foods."

Shuzo Okada, one of George Ohsawa's earliest and most devoted disciples, was the son of a family of Osaka textile merchants. After Ohsawa's death in 1966, Okada invested \$3,000 to establish Muso Shokuhin in Osaka, with his eldest son Teizo as director. Yuko Okada, the second eldest Okada son, was head of the export division; he had spent 6 years living in Boston, mostly working for Erewhon. Initially the company was located in Fukusenji, a dilapidated Buddhist temple.

Today "the company has gross annual sales of over \$25 million and employs over 120 people. In addition to the Osaka headquarters, built at a cost of over \$1 million, it has an 18,000-square-foot production and warehouse facility in Osaka, as well as branch offices in six other cities. It wholesales over 1,800 products in the domestic market... Muso has accounts with nearly half of Japan's 3,400 natural food outlets. In addition, it has developed a rapidly growing franchise chain of fifty-two stores, mostly in the Kansai area...

"About \$5 million a year comes from international sales... Growth in the international sector has been steady despite the blow of the 1981 Erewhon bankruptcy. (Muso had credits of about \$200,000 when its chief customer failed, and lost over \$150,000 of that.) Muso, which is now owned by more than fifty investors, was able to survive the shock. Muso exports about 270 different products...

"At present a runaway best seller is a soybean drink made of soybeans, pearl barley, kombu sea vegetable, and malt sweetener. Marketed in North America as Edensoy it has proven an excellent dairy substitute."

There follows a description of the Nanki Umeboshi Co., Muso's principal supplier, and then of the Kanemitsu Miso Co. (in Fuchu City, Hiroshima prefecture) which has been in business for 300 years. "While it once made sake and soy sauce as well, it now produces only miso—1,300 tons a year." There are now some 2,000 miso makers in Japan and Kanemitsu is one of only 200 which produce more than 1,000 tons annually. It is one of a very few which produce miso according to traditional methods... It is aged in natural temperatures for two years, run through a masher, then packed in either 40-pound wooden kegs or 1-pound plastic pouches. "All the miso going into the pouches is pasteurized by 84°C heat. If it were not, gases produced by the continuing fermentation would burst the bags. Kegs may or may not be pasteurized."

Photos show Yuko Okada.

1527. *SoyaScan Notes*. 1984. How the National Nutritional Foods Association (NNFA) missed a great opportunity to become the trade association of the budding natural foods industry in the 1960s and 1970s (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Founded in 1938, the NNFA was the thriving trade association of the health foods industry during the

1960s and 1970s. By this time, the health foods industry had largely become an industry that focused on dietary supplements (pills). Young Americans at this time realized that both the health foods industry and the mainstream supermarket industry were no longer supplying traditional natural foods, such as unrefined grains, whole-wheat bread, organically grown foods, foods sweetened with natural sweeteners, foods for vegetarian diets, etc.

Therefore these young people decided to start their own stores, and manufacturing and distributing companies to supply such foods. They tried several times to form a trade association to represent them, but never succeeded. By the late 1970s there were thousands of natural food stores in the USA but they had almost no interest in the health food industry or the NNFA.

If NNFA's leadership had been awake to this major huge new trend, they would have started a dialogue and tried to interest members of the natural foods industry into becoming members of NNFA. But instead, NNFA largely ignored this new industry. To this day, most members of the older industry still use the term "health foods" instead of "natural foods." One reason for this (according to Frank Murray, NNFA historian) may have been that the NNFA constitution and by-laws require that the president of NNFA must be a health food retailer.

It was not until July 2006 that NNFA, its industry having been left in the dust by the natural foods industry decided to change its name to the "Natural Products Association" in the hope of attracting members from the natural foods industry.

The natural foods industry still has no trade association; the bi-annual Natural Products Expos, on the West Coast in Anaheim, and on the East Coast in Washington, DC, or Baltimore, Maryland, have filled some of the functions of a trade association.

1528. **Product Name:** Clearspring Sakae Organic Shoyu, and Wheat-Free Mansan Tamari.

Manufacturer's Name: Clearspring Natural Grocer (Importer). Made in Japan.

Manufacturer's Address: 196 Old St., London EC1V 9BP, England. Phone: 01-250 1708.

Date of Introduction: 1984.

New Product-Documentation: Simon Bailey. 1988. *Natural Choice*. Aug. 15. "Soya-Based Products." A photo shows the Labels. "Traditional Soya Sauce. The perfect seasoning for savoury dishes." CSP form filled out by Simon Bailey. 1988. Sept. 28. Gives date of introduction as 1984. Formerly sold under the Sunwheel label (1974). Sold to Clearspring in 1984. Peter Bradford is proprietor. The company is an importer, wholesaler and retailer of high-quality Japanese shoyu, tamari, miso, koya-dofu and macrobiotic specialties. Japanese agent is Mitoku. Various Japanese manufacturers. Letter from Simon Bailey. 1988. Oct. 10. In 1984 the old Sunwheel company on Orpheus

Street closed. The brand name Sunwheel was sold, along with some higher turnover products, to Granary, which sold it in turn to Northumbrian in 1987. This brand includes shoyu, tamari, and miso that are sold to the mainstream health food trade. Clearspring, Peter Bradford's present business, agreed not to compete with the Sunwheel range, but continued to import high quality tamari, shoyu and miso for their own label, some of which he had formerly imported as the original Sunwheel company. These are available mostly in independent natural food and macrobiotic stores. Note: Mansan tamari is also imported by Great Eastern Sun in the USA.

1529. Product Name: Eden Dried Tofu.
Manufacturer's Name: Eden Foods, Inc. (Importer). Made in Japan.
Manufacturer's Address: Clinton, MI 49236.
Date of Introduction: 1984.
Wt/Vol., Packaging, Price: 5.8 oz retails for \$5.49 (8/88).
New Product–Documentation: On sale in Berkeley. 1988. Aug. 30. This is actually dried-frozen tofu.

Talk with Ron Roller of American Soy Products (formerly of Eden Foods) in Saline, Michigan. 1991. Nov. 27. When he went to Japan in 1984, he picked up 30 new items, including this product.

1530. Product Name: Eden Double Brewed Shoyu: Soy Sauce (Low Salt).
Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor). Made in Japan.
Manufacturer's Address: 701 Tecumseh Rd., Clinton, MI 49236. Phone: 800-248-0301 or 313-973-9400.
Date of Introduction: 1984.
Wt/Vol., Packaging, Price: 10 fluid oz bottle.
How Stored: Shelf stable.
New Product–Documentation: Bottle seen at Open Sesame in Lafayette, California. 1991. Feb. 16.

Talk with Michael Potter, Chairman of Eden Foods. 1993. Oct. 31. This product was made in Japan by Mr. Okada, who was a different person from that family that runs the Muso Co.

1531. Product Name: Amazake Shake [Vanilla, or Carob].
Manufacturer's Name: Grain Country.
Manufacturer's Address: 787 Melrose Ave. (at Orange Ave.), Los Angeles, California.
Date of Introduction: 1984.
Ingredients: Frosty Amazake, Westbrae Malted.
Wt/Vol., Packaging, Price: Sold fresh from soft serve machine.
How Stored: Frozen.
New Product–Documentation: Talk with Marijke Steevensz. 1988. Jan. 30. Phone: 213-851-2023. Pronounced Ma-REE-kuh. "A more recent product is our Amazake

Shake, which we make by blending one package of Westbrae Malted with some of our plain Frosty Amazake in the blender on the side of the Taylor soft serve machine. We started in 1984. It was great, a real seller. We loved the Westbrae flavors, the vanilla and the carob."

1532. Product Name: Amazake.
Manufacturer's Name: Great Eastern Sun (Importer). From Mitoku. Made in Japan.
Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806.
Date of Introduction: 1984.
Ingredients: Organic brown rice, organic rice koji (rice culture), spring water.
Wt/Vol., Packaging, Price: 8.8 oz (250 gm) stand-up retort pouch.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Label. 1987. 3.5 by 1.5 inches. White on red. Printed front and back atop a plastic retort pouch. Front panel: "Naturally sweet, deliciously creamy. The traditional Japanese sugar-free organic brown rice drink." Back panel: Mitoku amazake is rich, creamy, and unbelievably sweet; yet it contains no sugar or artificial sweeteners, just the natural goodness of premium brown rice. Made in the traditional way, it has been enjoyed for centuries in Japan as a sugar substitute in desserts and baked foods; and it is always popular, especially with children, as a deliciously warming winter drink. To prepare, just dilute with 2 parts of water in a pan, and heat gently (do not boil). Serve piping hot, flavored with freshly grated ginger, a sprinkle of cinnamon, or a dash of carob powder. As a refreshing summertime alternative, refrigerate and serve chilled. Product of Japan, distributed by Mitoku Co. Ltd., Tokyo, Japan 100.

Talk with Bob Schiering. 1988. Jan. 21. He will send info on this product which is imported in a retort pouch. Talk with Bruce Sturgeon of GES. 1988. Jan. 27. Imports from Mitoku started in about 1984. He does not know the actual manufacturer.

Talk with Bob Schroeder, former partner of Gary Granas. 1988. Feb. 12. Great Eastern Sun was going to make Amazake in America. We were going to have a joint venture with them to make Amashake. Soyfoods Center product evaluation. 1989. Feb. 6. The poorest flavor and consistency we have ever seen. Thin, with large chunks of abrasive rice bran.

1533. Product Name: Eggless Tofu Salad (in a Sandwich).
Manufacturer's Name: Martha's Sandwiches.
Manufacturer's Address: Putney Rd., Brattleboro, VT 05301. Phone: 802-254-4778.
Date of Introduction: 1984.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Unrefrigerated and perishable.

New Product–Documentation: Talk with Bari Madwin. June 29 and Aug. 28. Susan Quinn sells tofu and tempeh sandwiches in Brattleboro, Vermont. She bought an existing company in 1988. She uses about 12 lb/week of tofu. Talk with Susan Quinn. 1988. Aug. 30. She bought this company from Martha Brown in Aug. 1987. It was named Martha's Sandwiches, and at the time, Martha had a line of sandwiches, including Eggless Tofu Salad (in a sandwich, 8 oz) and BLT with Fakin' Bacon (made from tempeh).

Talk with Martha Brown. 1988. Aug. 31. She was asked in 1982 by Llama, Toucan & Crow, where she was employed, to make sandwiches for their store. That was the only place she ever sold them. She bought her tofu from the store, which bought it from Tomsun. She learned the recipe out of a little book.

Note: This is the earliest known commercial soy product made in Vermont.

1534. **Product Name:** [Tofu, Miso, Seitan].

Manufacturer's Name: Sunfood.

Manufacturer's Address: Mlynska 659, 51081 Dobruska, Czechoslovakia. Phone: 42 443 94325 or 443 21578.

Date of Introduction: 1984.

New Product–Documentation: Talk with Bernd Drosihn of Viana Naturkost GmbH, Cologne, Germany. 1991. Aug. 25. At a recent trade show, Bernd met a "very curious visitor," a macrobiotic man from Czechoslovakia who has been making tofu, miso, and seitan for 8 years. He has a large line of products, which he sells mostly in Czechoslovakia. He speaks a little English, and is about 40-45 years old. He now wants to start making tempeh. He buys his soybeans from China. He has great difficulty in obtaining nigari for use as a coagulant. His address is: Sunfood, Mlymska 659, 51081 Dobruska, Czechoslovakia. Phone: 011 + 42 443 94325 or 443 21578.

Letter from Dr. Kamil Bersky, M.D., from The Macrobiotic Centre of Czechoslovakia, Mlynska 659, 51 801 Dobruska, Czechoslovakia. Phone or fax: 011 + 42 443 21578. 1993. July 30. "We are now producing 5 varieties of seitan, 5 varieties of tempeh, amasake, tofu, and we can offer barley malt. Our plan is to start koji and miso production, open a macrobiotic center with a year-round program, a kindergarten, and a small restaurant with a shop."

Talk with Sladjan Randjelovic of Serbia, Yugoslavia. 1993. Dec. 29. His friend named Vacek runs Sunfood in Dobruska, Czechoslovakia (about 75 miles east northeast of Prague near the border with Poland), and his friend is also an agent for Mitoku Macrobiotic Foods.

Note: This is the earliest known commercial soy product made in the Czech Republic.

1535. **Product Name:** Westbrae Natural Buckwheat Miso. "Soba Miso."

Manufacturer's Name: Westbrae Natural Foods (Importer).

Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1984.

Ingredients: Whole soybeans, buckwheat, water, sea salt.

Wt/Vol., Packaging, Price: 17.6 oz (499 gm).

New Product–Documentation: Label. 1984, undated. 3.5 by 5.5 inches. Plastic. Brown and black on gold with green and orange. Information on package given in Japanese.

1536. Westbrae Natural Foods. 1984. Westbrae Natural–Traditional foods of Japan (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• **Summary:** This is a color photo of a large beige metal display rack with six shelves holding products including the following: (1) Samurai snacks, soup plum drops. (2) Tamari brown-rice wafers, Tamari brown-rice crackers. (3) Miso ramen, Instant miso soup. (4) Organic shoyu, tamari, mild soy sauce, Johsen tamari shoyu, Tofu sauce. (5) Kukicha (tea), Umeboshi (salt plums), Shiitake mushrooms, Agar flakes, Kuzu, Miso (in plastic bags; brown rice, red, barley, Hatcho). (6) Seaweeds (Wakame, kombu, hijiki, nori, sushi nori), Jinenjo soba, Somen, Brown rice noodles. At the top is the banner featuring the head of a samurai. One accompanying leaflet (printed black on white) is titled "Westbrae Natural product inventory. 4-foot Japanese foods section." A second leaflet titled "'Ichi-Ban' Westbrae Natural–No. 1 supplier of macrobiotic food in the U.S." lists the products by category. In the upper left corner are the Japanese characters for "Ichi-Ban" above a line drawing of Mt. Fuji. Address: Emeryville, California.

1537. Gerras, Charles. ed. 1984. Rodale's basic natural foods cookbook. Emmaus, Pennsylvania: Rodale Press. xi + 899 p. Illust. Index. 24 x 20 cm.

• **Summary:** This book, containing over 1,500 recipes, does not use salt or white sugar, but does use meats, poultry, and fish. It was also published by Simon & Schuster as "A Fireside Book." It contains extensive information on and many recipes for soyfoods, including whole dry soybeans, tofu, soy ice cream, soy flour and grits, miso, soymilk, soy oil, okara (soy pulp), soy sauce, tamari, and soy sprouts. Address: Pennsylvania.

1538. Hatton, Hap; Torbet, Laura. 1984. Helpful hints for better living: How to live better for less. New York, NY: Facts on File Publications. 231 p. Index. 24 cm. [10* ref]

• **Summary:** A survival guide for the 1980s. In the section on "Shopping for protein" is a full-page table (p. 15) that lists many common protein foods (from both animal and vegetable sources), the first of which is soybeans, and contains four columns: (1) Grams of protein per dollar (224.2 for soybeans, the top ranking). (2) Grams of protein per

pound (154.7 for soybeans, the top ranking). (3) Price per pound (\$0.69). Calories per pound (1,828, #2 ranking after bacon).

The text states (p. 14-16): “The five foods that give you the most protein for your money—soybeans, lentils, split peas, kidney beans, and chick peas—are all from the legume family. Legumes are rich in protein, vitamins and minerals, and can be used in hearty casserole dishes, served cold with a salad, roasted for a tasty and nutritious snack, and so on. Dried beans are absolutely the best supermarket bargain. Buy them in bulk; they’ll last a year if stored in airtight containers such as large mayonnaise jars and set in a cool dry place. By buying them dry and cooking them yourself you can save 50 percent on their cost and avoid the antitoxins that are generally added to preserve color. You’ll find a much greater variety of legumes in uncooked form anyway.”

Soybeans are a good source of natural lecithin, which is a valiant cholesterol fighter. “Also, soy oil can be used for frying and soy flour for baking. But perhaps most important, soy beans are used to make tofu, also known as bean curd, a white, cheesy-looking food which is low in cost and calories and high in protein. Tofu is very bland. Its texture is smooth, like a very firm pudding. By itself, it’s dull, but it takes on the flavor of whatever it’s cooked with... tofu is a good way to extend meat dishes you can afford and to replace the protein that’s gotten to expensive. You can slice it into broth, scramble it into eggs, blend it into salad dressing, stir-fry it with vegetables, add it to oatmeal, crumble it and use it like hamburger, or add it to tuna fish salad.

“One caution: Legumes are not a complete protein in themselves.” Therefore you must supplement them.

Note: See *Diet for a Small Planet*, by Francis Moore Lappe, revised edition, 1975, for more accurate and precise information on this subject and on protein complementarity.

A listing in the directory (p. 24) reads: “Manna Foods, 112 Crockford Rd., Scarborough, Ontario, Canada M1R 3C3. Small, high-quality wholesaler. Catalog free.” Address: New York City.

1539. Photographs of the Arcata Tofu Shop in Arcata, California (1980-1984). 1984. Arcata, California.

• **Summary:** Twenty-two color photos (most 4 by 5 inches), numbered with captions, were sent to Soyfoods Center on 24 Sept. 2002 by Matthew Schmit, founder and owner of the Arcata Tofu Shop. They were taken in Arcata between 1980 and 1984. Nos. 3-12 were taken in Dec. 1980. They show: (1) Oct. 1980—Inside of building in Arcata during complete remodeling of previous insurance offices (1,000 square feet). (2) Oct. 1980—Outside of same building at 768 18th St. Lease just signed. Newspapers in windows in preparation for remodeling. (3) Open for business. Large wooden sign above door reads “The Tofu Shop: Soy Deli and Whole Grain Bakery.” (4) Putting up sign over door. All people standing on sidewalk or ladder have their backs to the

camera. Bottom left (standing on sidewalk): Paul Kusterman, who loaned money to help shop open; a truck driver for United Naturals, he had been selling tempeh burgers at local fairs since 1978. On ladder: Matthew Schmit. Bottom right (standing on sidewalk): Jackson Hollomon and wife Valerie. Jackson gave Matthew Schmit his first taste of tofu in the winter of 1973-74. In 2001 Jackson finished 3-year Buddhist retreat. On roof holding sign—On left: Man who created the sign. On right: Daniel Schmit (Matthew’s brother). (5) Grocery section inside The Tofu Shop, with bottles of sauces, packages of Miso Cup, and an issue of *Soyfoods* magazine on wooden shelves, with a “What is Tofu?” pamphlet on the wall. (6) Suzanne Kosciolk Schmit stocking specialty grocery shelves. A Learning Tree Tofu Kit is now visible. (7) Suzanne Kosciolk Schmit holding The Tofu Shop’s tiled logo (a writhing blue dragon on four white tiles in a wooden frame) next to the first shipment from United Naturals: Soybeans (from Arrowhead Mills), nigari, barley malt, natto miso, sea vegetables, etc. (8) Looking in the front door of The Tofu Shop; six shelves of special groceries, tempeh kits, etc. (9) Matthew Schmit dressed in white apron with “first batch grin.” Deli store front counter area is in the background. (10) Back wall of shop with supplies and custom forming box table with adapted “load bar” presses (idea from *Soyfoods* magazine). (11) Cutting first batch of tofu in stainless steel sink. (12) Close-up of The Tofu Shop’s first printed tofu labels in Arcata atop a deli take-out carton. Color and design are similar to those from Telluride—Blue on white, with a dragon in a circle. (13) 1981—Steve Rhine setting presses on metal forming boxes. (14) 1981—Matthew Schmit ladling *gō* from cooking pots to hand-screw apple-cider press used as a soymilk press. (15) 1982—Workers sitting on brick bench in front of shop. Left to right: Matthew Schmit. Stephen Lyons, tofu maker. Amy Pujanawski, deli worker. Tom Nawrocki, maker of tofu and tempeh. Rob Earhardt, tofu maker. John Hendricks, tofu maker. (16) 1982—Matthew Schmit packing tofu in take-out boxes on shelf of shop’s back wall. (17) 1983—Linda Redfield behind Tofu Shop table, promoting soyfoods at Arcata Co-op event. (18) 1983—Deli worker Jeannie Penn behind Tofu Shop table World Food Day at Arcata Co-op. Jeannie was one of the few female tofu makers ever employed by the shop. (19) 1982—Tofu Shop booth at Gemini Distributors Food Show, Fortuna, California (in the middle of cow country), attended by Matthew Schmit and Linda Redfield. Prepared dishes with signs on red checkerboard tablecloth: Creamy herb & onion tofu dressing. Marinated and baked tofu cutlets. Most early labels were rubber stamped on pre-printed generic Tofu Shop adhesive labels. (20) Soyfoods books and magazines on tablecloth at Gemini Food Show. Two signs: Introducing tofu, and The Tofu Shop. (21) Different view of table, with sign: “The Tofu Shop Specialty Foods, Arcata, CA. We specialize in freshmade soyfoods.” (22) 1984—Shawn White at food demo in a store. Address: Arcata, California.

1540. **Product Name:** Lima Brown Rice Koji.
Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1984?

Ingredients: Dried fermented brown rice with koji (*Aspergillus oryzae*).

Wt/Vol., Packaging, Price: 17.6 oz (500 gm) plastic bag.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label for Barley Rice Koji for Making Miso and Amasake. 1984. Collected by Lorenz Schaller of California. 4 by 5 inches. Orange and brown on beige. “Imported from Ohsawa Japan by Chico-San.”

1541. **Product Name:** Westbrae Natural Miso (Light Yellow, Mellow White, or Red).

Manufacturer's Name: Westbrae Natural Foods (Distributor). Made in Canada by Shin-Mei-Do.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984?

New Product–Documentation: Catalog. 1984. Talk with Bob Gerner. 1988. Jan. 30. Westbrae has dropped Miyako Oriental Foods's miso. Switched to that made by Shin-mei-do on Denman Island, Canada.

1542. **Product Name:** Tamari Brown Rice Crackers, Tamari Brown Rice Wafers, Tamari-Veg Chips.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984?

New Product–Documentation: Catalog. 1984.

1543. Nissenbaum, Robert. 1985. Rice Dream (Interview). *SoyaScan Notes*. Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In June 1984 Robert launched Rice Dream, a non-dairy ice cream based on amazake made from koji in the traditional way. Rice Dream was his idea and he developed the product. He was working at the time with partner David Carlson, who liked the hands-on craftsmanship. Carlson is presently an inactive partner in the business, but he still owns stock. They were working with Chico-San, from whom they were buying rice and Yinnies rice syrup. They agreed to do a joint venture to make amazake and rice syrup at the same new plant in California. So Chico-San moved the rice syrup out of their plant and into the new plant.

Robert is now having the Rice Dream made at Peninsula Creamery in Palo Alto, but he still lives in Fayetteville. Working with a photographer and typesetter, he recently

developed a new color leaflet. Rice Dream will be in Berkeley, distributed by Rock Island, in 2 weeks. The price is higher than Ice Bean and a little lower than Tofutti [both soy ice creams]. The only soy in the product is the lecithin. Imagine Foods no longer makes any soyfoods. Rice Dream has 16 distributors nationwide. They presently sell only hard pack Rice Dream but will soon develop a liquid mix. They buy koji from Miyako Oriental Foods in Los Angeles. They used to make it themselves and plan to do so again later. The product originally contained no added oil. Now they add a little safflower oil to the thick amazake to avoid iciness and get it to pack well in cartons. Address: Executive Vice President, Director of Product Development, Imagine Foods Inc., P.O. Box 1702, Fayetteville, Arkansas 72702. Phone: 501-443-7216.

1544. **Product Name:** Rice Dream (Rice-Based Non-Dairy Frozen Dessert) [Hard Pack, Pints: Vanilla, Carob, Strawberry, Lemon, Carob Chip, Orange, Carob Almond].

Manufacturer's Name: Imagine Foods, Inc.

Manufacturer's Address: Amazake made by California Natural Products, Manteca, Calif. Rice Dream made by Peninsula Creamery, 900 High St., Palo Alto, CA 94302. Offices at 299 California Ave. #305, Palo Alto, CA 94306.

Date of Introduction: 1985 January.

Ingredients: Vanilla: Water, brown rice (partially milled), safflower oil, vanilla, lecithin, carob bean and guar gum, carrageenan, sea salt.

Wt/Vol., Packaging, Price: 1 pint carton. Retail for \$2.22 to \$2.25 (2/88).

How Stored: Frozen.

Nutrition: Per ½ cup. Calories 130, protein 1 gm, carbohydrates 20 gm, fat 5 gm, sodium 80 mg.

New Product–Documentation: Interview with Thom Leonard. 1985. Aug. Robert Nissenbaum of Imagine Foods no longer makes or uses koji. Instead he uses a commercial enzyme blend from Miles Laboratories and other enzyme suppliers. His company is now in Palo Alto.

Ad in *Natural Foods Merchandiser*. 1986. May. p. 53. “Presenting Rice Dream Soft Serve.”

Bob Schiering. 1988. Jan. 18. U.S. Amazake Manufacturers Update. Based on interviews with 8 companies. Imagine Foods now makes about 2,000 to 4,000 gallons/week in spring, summer, and fall, 2,000 gallons/week in winter. It retails for \$2.09 to \$2.16/pint. It is made with “pure culture enzymes.” Talk with Steve Reed of Brown Cow. 1988. Feb. 1. California Natural Products in Manteca, California makes the base for Rice Dream.

Talk with Robert Nissenbaum. 1988. Feb. 7. In the summer of 1984 he was talking with Chico-San, especially Peter Milbury, about his making amazake and their making Rice Syrup in the same plant in Fayetteville, Arkansas, a rice farming center, where the macrobiotic trading company Mountain Ark had just moved. The idea fell through when

Bob Kennedy sold Chico-San to Heinz. Robert decided to move his plant there anyway. Then one day Milbury called and said that a company named California Natural Products (CNP, in Manteca, CA), which was making inulin (for diabetics) from dahlia tubers, and a natural coffee substitute from the same tubers, had the necessary equipment. Their process was similar to malting and extracting a syrup, but they used no rice or enzymes. CNP started to make Nissenbaum's amazake using rice and enzymes in early 1985. They shipped it in a stainless steel tanker to the Peninsula Creamery in Palo Alto, where it was made into Rice Dream. Koji was no longer used. The use of enzymes increased the glucose content of the product, obviating the use of maple syrup. Robert moved to Palo Alto in 1986. California Natural Products is now doing a booming business making rice syrup, which is rapidly becoming the preferred sweetener in the natural foods industry. Today Rice Dream retails for about \$2.00 to \$2.25 in California. It is less expensive than most soy ice creams. Robert is exporting it to Canada and will soon export containers to the UK. He has a patent pending on the process and formulation. One gallon of amazake base from CNP yields about 1.5 gallons of hard pack Ice Dream. The amazake base comprises more than 90% of the ingredients. If white rice has 100% of the bran removed, his rice has only 30% removed. Thus it is lightly polished brown rice. Labels. 1988. Feb. Many flavors. Full color showing ice cream cones floating in the sky. "Rice Dream Non-Dairy Dessert. Parevine. Pareve. No cholesterol. No refined sweeteners. Rice Dream has fewer calories than most frozen tofu desserts and none of their refined sugar. The sweet creaminess you love in Rice Dream comes from our unique recipe that enables the starches in brown rice to convert to natural sugars."

1545. Shurtleff, William; Aoyagi, Akiko. 1985. Brief history of Imagine Foods (Arkansas) and Rice Dream non-dairy frozen dessert (Document part). In: Shurtleff and Aoyagi. 1985. *Tofutti & Other Soy Ice Creams: The Non-Dairy Frozen Dessert Industry and Market*. Vol. 1. 145 p. See p. 88-89.

• **Summary:** "In June 1984 Robert Nissenbaum and David Carlson of Imagine Foods, a small rural Missouri company that also made tempeh and miso, introduced Rice Dream, one of the most creative non-dairy frozen desserts to appear in America in decades. It was based on *amazake* (literally "sweet sake") a creamy-thick, subtly-sweet, low-alcohol precursor of Japanese sake, made by fermentation of rice koji in water. Koji, used to make rice miso, is made by fermenting rice with the koji mold (*Aspergillus oryzae*) (Shurtleff and Aoyagi 1983). The company made its own koji and amazake. Unlike most other non-dairy ice creams, Rice Dream was extremely low in calories, since it originally contained no added oil or fat. Most of the product's sweetness came from the natural sweetness of amazake, but small amounts of

Grade A maple syrup were also used. A nutritionist's dream, containing only 132 calories and 18 mg of sodium per ½ cup serving, Rice Dream was advertised with a lovely full-page color ad in various natural foods magazines. As demand grew, production of the amazake was moved to California and the hard-pack frozen dessert was made at Peninsula Creamery in Palo Alto, California. Thereafter a small amount of safflower oil had to be added for functional reasons, and Chico-San's rice syrup replaced the prohibitively expensive maple syrup. The only soy in the product was soy lecithin. By January 1985 there were 16 distributors for the product nationwide. Originally made in hard pack, it was also sold as a soft-serve mix starting in early 1985."

Note: At the time of this writing, the author was not aware that Rice Dream was no longer being made from koji, and that commercial enzymes were being used instead of the enzymes from koji. Address: Lafayette, California.

1546. Shurtleff, William; Aoyagi, Akiko. 1985. Brief history of Farm Foods' work with soy ice cream—Ice Bean (Document part). In: Shurtleff and Aoyagi. 1985. *Tofutti & Other Soy Ice Creams: The Non-Dairy Frozen Dessert Industry and Market*. Vol. 1. 145 p. See p. 39-41.

• **Summary:** "In 1974 The Farm's publications *Hey Beatnik* and *Yay Soybeans!* both mentioned soymilk ice cream; the latter gave a home-scale recipe for making "Soy Ice Cream—'Ice Bean' using 'soy milk' sugar, oil, salt, and either vanilla or chocolate flavorings. In 1975 the *Farm Vegetarian Cookbook* gave three recipes for Homemade Ice Bean, made from soymilk; flavors were double Dutch chocolate, vanilla, and pineapple sherbet. In the second edition of this book (Hagler 1978), recipes for two more flavors were added; carob and honey banana. All but the latter were sweetened with sugar. In the Vanilla Ice Bean recipe, soymilk comprised over 90% of the ingredients by weight; a little oil, vanilla, and a pinch of salt were also added. There were also two recipes for Frogurt (frozen soymilk yogurt) in strawberry and vanilla flavors. This was the world's earliest known reference to such a frozen soymilk yogurt product.

"In August of 1976 members of The Farm opened The Farm Food Company (a natural food store, soyfoods restaurant, and soy dairy) at 820 'B' Street in San Rafael, California. There, using a batch Emery Thompson ice cream freezer and a soft serve machine, they started to make the first commercial Ice Bean. What a name! Was it a joke? No. It was the absolutely honest, unpretentious, tongue-in-check vegetarian all-American counterpart to such highfalutin pseudo-European names as Haagen-Dazs. Initially, most Ice Bean was sold in cones over the counter at the Farm Food Co. soda fountain and in pints in their freezer, but a little was distributed locally by Farm Foods' van. Soon five flavors were available; strawberry was the favorite.

'Also in 1976, and completely independently of The Farm, Snow Flower Frozen Desserts (run by Susan Gershuny

and Kirk, and located first in Tivoli, then in Woodstock, New York) launched its own soymilk ice cream in banana-honey and maple-walnut flavors. It was widely distributed by Shiloh Farms. These two brands, Ice Bean and Snow Flower, introduced tens of thousands to soymilk ice creams.

“In early 1978 The Farm Food Co. in San Rafael was closed. Production of ice cream and other soyfoods was moved into a big warehouse at 144 King St. in San Francisco. Farm Foods had purchased a \$25,000 Mark III continuous ice cream freezer, and in July of that year production resumed. Output of Ice Bean rose rapidly that summer.

“In March 1979 Farm members sold Ice Bean and Tofu Cheesecake at the huge New Earth Exposition in San Francisco; both were very popular. In the following years Farm Foods sold and sampled Ice Bean at a hundreds of fairs, expos, conventions, and anti-nuclear rallies across America. It gradually became a counter-culture favorite.

“By early 1979 Farm Foods Ice Bean (renamed ‘Soy Ice Bean’ from mid-1979 until early 1982) was available in six flavors (vanilla, honey-carob, strawberry, orange, banana, and chocolate), each packaged in pints with a handsome four-color label. It was being advertised (with large color posters) and distributed (by Farm Foods and Rock Island) throughout the San Francisco Bay area, especially to natural food stores, with a little going to other parts of California. Farm Foods also began a little national distribution, shipping some Ice Bean to Midwest Natural Foods in Michigan and to Tree of Life in Florida. By this time, Ice Bean had become the most popular soy ice cream in US history, with production reaching 500 to 600 gallons a week during the summer (Dolgin 1982, 1985; Tepper 1985, personal communications).”

Note

On 31 May 1985 Barricini Foods acquired Farm Foods. Address: Lafayette, California.

1547. *Vibrant Life*. 1985. Serial/periodical. Hagerstown, Maryland. Review and Herald Publishing Association. Published by the Seventh-day Adventist Church. Vol. 1, No. 1 Jan/Feb. 1985. Frequency: Bimonthly (every 2 months).
 • **Summary:** Preceded by *Life and Health*, and before that by *Pacific Health and Temperance Advocate*. A magazine about health and Christian life. Address: USA.

1548. *Whole Foods*. 1985. Heinz deal for Chico-San fuels expansion. Feb. p. 22.

• **Summary:** “The recent purchase of Chico-San by food giant Heinz U.S.A., says Chico-San president Robert Kennedy, stemmed from ‘Chico-San’s inability to finance the rapid growth needed to meet the rising demands for products... We need three more plants, but we don’t have the capital to finance that kind of expansion ourselves.’” Heinz is headquartered in Pittsburgh, Pennsylvania.

1549. Ballard, Bob. 1985. Ah-Soy! and Great Eastern Sun (Interview). *SoyaScan Notes*. March 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ah-Soy was launched at the NNFA show in Atlanta, Georgia, in the summer of 1984. Initial flavors were vanilla, chocolate, and original (plain). It was made by Saniku Foods in Japan and imported via Mitoku. Carob flavor was introduced in the fall of 1984. Vanilla is now the best seller because it is the most unique. The product is a “fantastic success.” The four flavors account for 15-20% of Great Eastern Sun’s total sales from 1,100 products. GES only sells to distributors [i.e. it is a master distributor].

Sales reports for the period 1 Nov. 1984 to 25 Feb. 1985 show the following number of units sold (there are 30 units/per case): Vanilla 210,000 units. Original/plain 110,000. Carob 105,000. Chocolate 100,000.

Other GES soyfoods that sell well: Mellow white miso (made by American Miso Co.), 35 lb tub, #9 best seller by dollar volume. Onozaki rice miso, 11 lb tub, #20 best. Mellow white miso, 15 lb tub, #20 best. Instant miso soup from Japan (ranking unknown). This month’s sales are annualized. The company is now doing \$4 million/year in sales. They used to import freeze-dried tofu; the FDA forced them to change the name to “dried tofu.” Shurtleff notes that he prefers the term “dried-frozen tofu.”

Another best seller (about #3-5) is their White Cloud Rice Syrup It is made from rice with sprouted barley for malt. Address: Great Eastern Sun, 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

1550. **Product Name:** Vital Wheat Gluten.

Manufacturer’s Name: Arrowhead Mills (Importer-Marketer-Distributor). Made in Australia.

Manufacturer’s Address: P.O. Box 2059, 110 S. Lawton, Hereford, TX 79045. Phone: 806-364-0730.

Date of Introduction: 1985 March.

How Stored: Shelf stable.

Nutrition: 75% protein.

New Product–Documentation: Talk with Bob Holzapfel. 1989. Oct. 12. He thinks Arrowhead Mills makes this product. Talk with Boyd Foster, President, Arrowhead Mills. 1989. Oct. 13. This product is imported by Arrowhead from Australia. The source is proprietary. It is a dark beige powder which, according to his specifications sheet, contains a minimum of 75% protein. Government policies and subsidies in Australia make it financially attractive to produce the product there. He knows of no manufacturers presently in North America; there was one 2-3 years ago. The product is good for making seitan or to add to other flours to achieve better rising in bread baking. The product is made by a water washing process followed by dehydration or drying, not by dry separation. This product should not be confused

with gluten flour, which is just wheat flour with a somewhat higher gluten content.

1551. Public Sector Consultants, Inc. 1985. The potential for expanding the Michigan soyfoods industry. In: 1985. The Potential of Food Processing for Economic Development in Michigan. PCS, Knapp's Centre, 300 S. Washington Square #401, Lansing, MI 48933. See p. III-45 to III-67. 28 cm. [47 ref]

• **Summary:** Michigan soyfoods manufacturers include Michigan Soy Products (Royal Oak; Tofu, soymilk; 1,650 lb/week of tofu), Oryana Soy Shop (Traverse City; Cooperative. Tofu, tempeh, soysage; 275 lb/week of tofu), The Soyplant (Ann Arbor; Cooperative. Tofu, tempeh, tempeh burgers, soymilk, dofugan, soysage; 7,500 to 10,000 lb/week of tofu), INARI Ltd. (Mason; Soynuts), Michigan Farm (Bitely; Miso), Hercules, Inc. (Harbor Beach; HVP), Eden Foods (soymilk importer, which hopes to build a soymilk plant in Michigan), and Midwest Natural Foods (Ann Arbor).

“Hercules produces nonfermented soy sauce [HVP] and sells its product to large final producers, such as La Choy and Beatrice Foods, located outside Michigan for sale under their labels.” This report was prepared for the Michigan Dept. of Agriculture. March 15. Address: Lansing, Michigan.

1552. Belleme, John. 1985. New developments at American Miso Co. (Interview). *SoyaScan Notes*. April 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Feb. 1984 (actually 1 Oct. 1983) John sold his ownership in the American Miso Co. to Barry Evans. Originally, John, Sandy Pukel, and Barry each owned one-third of the business. Before that, it had 6-7 owners. First Sandy (under pressure from Barry) sold his one-third to Barry, which made Barry the majority shareholder. After that, Barry let John run the company, which is doing very well in terms of productivity and profitability. They are selling all the miso they can possibly make.

At the time John sold his stock, he set up a new corporation named Just In Foods, Inc. (named after his son, Justin) to make second-generation miso products. John recently sold Just In Foods (which makes Miso Master brand products) to Barry Evans, because John doesn't own a miso plant. John is now a paid consultant for American Miso Co.

Miso Master is a marketing company for miso and miso products, and also a brand name. Chick Peaso is a mellow miso made with chick-peas instead of soybeans; it contains no soy. Introduced in May 1984, it was first sold in bulk from Great Eastern Sun but is now sold in 1-pound plastic bags.

Two tofu-miso dips were introduced in Nov. 1984; they are made by Nasoya using John's miso. They are both selling well, under the Miso Master label. Another new product is a delicious spaghetti sauce produced by Ventrillos in New York; it is made with a very mellow miso, low in salt. John sells John Troy about 35,000 lb/year of mellow miso; that's

all Troy uses but Belleme does not make much money on this. Troy's miso mustard has 3-month amakuchi miso in it. John first saw this product in Fukuoka, Japan, made by Toshi Shiroozu, a man who makes mellow white miso for Eden Foods; it was in 1-pound packages, exported by Muso Shokuhin. John had a product named Mellow Ebony Miso, made with black soybeans. It was delicious but the color was grotesque, so he phased it out.

Another new non-profit organization is the Institute for Fermented Foods. Its logo is a pickle barrel with a rock on it borrowed from the book *Miso Daigaku*.

Pretty soon John is going to stop making miso. He is now training Don DeBona, who Barry sent to be trained. After that, John plans to run Barry's Just In Foods full time. John's wife, Jan, is writing a book on Japanese foods. John plans to go back to Japan for a while. Address: North Carolina.

1553. Chico-San, Inc. 1985. Why does Chico-San pay premium prices for products and ingredients (Ad). *East West Journal*. April. 4 p. Inserted after p. 50.

• **Summary:** A 4-page glossy color advertising supplement, inserted after page 50. Chico-San describes itself as “A company built on a philosophy.” Color photos show: (1) Chico-San's new label designs for their Organic Shoyu, Nama Shoyu (organic, unpasteurized), and Natural Shoyu. (2) Chico-San Rice Cakes. A black and white portrait photo shows J. Robert Kennedy, President, Chico-San, Inc. Address: P.O. Box 810, Chico, California 95927.

1554. Eden Foods, Inc. 1985. Seafood! Just the best (Ad). *East West Journal*. April. Back cover.

• **Summary:** This full-page color ad shows the Eden crane, wearing a snorkel and a pair of swim fins, with the Eden logo on its back, swimming under water in the sea where it sees colorful packages of the following Eden sea vegetable products: Sushi Nori. Hijiki. Agar Agar. Arame. Kombu. Wakame. The ad notes that sea vegetables contain “vitamins A, B, C, D, E, and K, including B-12 which is hard to find in a vegetarian diet.” Address: Clinton, Michigan 49236.

1555. Estella, Mary. 1985. Natural foods cookbook: Vegetarian dairy-free cuisine. Briarcliff Manor, NY, and Tokyo: Japan Publications. 250 p. April. Illust (color). Recipe index. Index. 26 cm. [22 ref]

• **Summary:** This macrobiotic cookbook, though free of dairy products, uses fish in many recipes. In the chapter titled “Getting Started” there is a section titled “Beans” (p. 25-26) which describes adzuki beans, black soybeans, chickpeas, lentils, mung beans, etc. Concerning black soybeans: “Distinct from our American black bean in shape, texture and taste, this is a type of soybean They are available in Oriental markets or at natural food stores. Black soybeans cooked with sweet brown rice is a special treat” (see p. 157 for the

recipe).

On the same page, in the section on “Whole grains” is a description of seitan (“Wheat gluten, also known as ‘wheat meat’ in America... Making seitan at home is an easy but time-consuming process.”).

There is also a section on “Soy Foods” (p. 26-27) which begins by stating that “Soybeans, the king of beans, are ironically not often eaten as whole beans, but instead are processed into miso, shoyu, tofu, tamari, and tempeh.” Each of these foods are discussed briefly. Three types of soy sauce are defined: Shoyu, tamari, and commercial soy sauce (which is said to be artificially colored and processed). Chapter 7, titled “Whole grains, beans, tofu and tempeh” contains 7 tofu and 7 tempeh recipes. There are a large number of soy-related recipes throughout the book, including others tofu, tempeh, using miso and tamari.

1556. *Health Science*. 1985-- . Serial/periodical. Tampa, Florida: American Natural Hygiene Society. *

• **Summary:** Continues *Vegetarian Health Science*. *Ulrich's International Periodicals Directory* 1990-91 notes that as of 1990, *Health Science* was still published by the American Natural Hygiene Society, Inc., Box 30630, Tampa, Florida 33630. Phone: 813-855-6607. Editor: James Michael Lennon. Does book reviews and has a cumulative index 1978-1983. Circulation: 6,000. Back issues available.

Talk with James Lennon. 1992. May 4. This magazine has always advocated a vegetarian diet as part of its broader philosophy of naturopathy (pronounced nach-ur-OP-uh-thee). Address: Tampa, Florida.

1557. Kass, Monica. 1985. High-tech soymilk pouch creates market success: Stand-up retortable pouches for soymilk boom in natural-food stores, break into supermarkets. *Packaging*. April. p. 36-37.

• **Summary:** On the cover of the magazine and the first page of the article is a large color photo of Westbrae Natural Cocoa-Mint Malted. On the second page is a color photo of ten brands of soymilk in stand-up gusseted retort pouches, the type of soymilk packaging now most popular in America. “Marusan Ai and San-iku Foods are two Japanese companies currently processing and retort packaging soymilk for export to the USA. Marusan forms the retort pouch from multilaminar rollstock supplied by Toyo Seikan Kaisha Co. (Toyo Seikan is licensed by Doy-n-pak [Doypack] to produce the material.) And San-iku Foods retorts soymilk in preformed pouches, also made from the Doy-n-pak patented lamination.

“Sources say the fact that Doy-n-pak’s design patent on the stand-up, gusseted pouch runs out this fall has prompted some scrambling among American materials suppliers who see the potential of the stand-up pouch and want to establish market position with the pouch.

“American companies importing soymilk in the

preformed retort pouch include Westbrae Natural Foods and Great Eastern Sun. Eden Foods Inc. was the first company out with soymilk in the rollstock formed pouch. Structural differences between the two pouch varieties are minimal. The rollstock-formed square-cornered pouch must be opened with a scissors and is somewhat narrower in shape than the round-cornered preformed pouch which has an easy-open feature.

“Lamination for both pouch types consists of an outer layer of PET laminated to nylon, aluminum and an inner layer of polyolefin film that meets FDA food contact material requirements.

“Processing methods Marusan and San-iku use to adapt soymilk to American tastes differ, but both companies retort pouches up to 250°F giving them an unlimited shelf life.

“Graphics reflect positioning: The real difference between the various retorted soymilks is in positioning. Eden Foods is strictly interested in promoting the product for its nutritional benefits. Great Eastern Sun’s soymilk appeals to health-conscious consumers with an eye on trends. And Westbrae has two soymilk varieties. One is a plain soymilk, targeted for the health-conscious crowd. The other is a line of dessert-type malted drinks—’fun’ products the company is targeting at younger consumers.”

Note: This is the earliest document seen (Sept. 2011) with the term “high-tech” (or “high tech”) in the title in connection with soyfoods—in this case soymilk, historically a low-tech product.

1558. Chico-San. 1985. To grow the purest, tastiest organic brown rice, we start from the ground up (Ad). *East West Journal*. May.

• **Summary:** A full-page black and white ad. “The bedrock of Chico-San’s superior quality is our commitment to the macrobiotic tradition.

“So in growing superior, natural and organic rice we needed to find not only the best varieties of rice, but the purest, most fertile land to grow them in. And we found it in California’s Upper Sacramento Valley.

“Here the fields are fed by the crystal waters of the Shasta-Trinity Alps river system. And because our fields are the very first to receive the mountain’s waters, they’re in no danger of pesticide drifts and agri-chemical runoff. What’s more, the area’s favorable ecology minimizes the afflictions of weeds and pests. So the rice reaches maturity naturally. Once it does it’s immediately harvested and stored in special aerated silos, then hulled as needed by soft protective rollers. This keeps the grain and its precious nutrients intact.

“So the rice you receive is of the highest quality. In fact, it’s the same rice used in making Chico-San Organic Rice Cakes. But whether you choose our organic or original rice cakes, our natural brown rice, or any of our organic brown rices, including golden rose, sweet brown and short grain, you can be sure it’s the best. Because anything less would go

against our grain.”

“Chico-San: The rice cake people.”

Three illustrations show the environment and two show packaged products. Address: P.O. Box 810, Chico, CA 95927. Phone: (916) 891-6271.

1559. **Product Name:** Edensoy (Soymilk) [Cranberry].
Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan by Marusan-Ai Co., Ltd.
Manufacturer’s Address: 701 Tecumseh, Clinton, MI 49236.

Date of Introduction: 1985 May.

Ingredients: Plain: Water, soybeans, kombu seaweed, pearl barley. Carob: Water, soybeans, pearl barley, barley malt, carob, kombu.

Wt/Vol., Packaging, Price: 6 fluid oz (180 ml) free-standing retort pouch.

How Stored: Shelf stable.

Nutrition: Plain: 89.9% water, 1.9% protein, 1.5% fat, 7% carbohydrates, 48 calories/100 gm.

New Product–Documentation: Spot in Whole Foods.

1985. March. p. 65. “Berry added: Eden Foods has expanded its soy beverage line with Cranberry Edensoy... It is available in a 6 oz. retort pouch... Suggested retail price is 79¢ per package.” A small photo shows the new packages.

Dairy Record. 1985. Sept. p. 86. Cranberry Edensoy was added in May 1985.

1560. *Natural Foods Merchandiser*. 1985. 6th Annual Natural Foods Merchandiser Merchandising Awards. May. p. 1, 48, 49.

• **Summary:** Three soy products won awards. A color photo shows each. Gold: Naturally Preferred Miso Mustard by American Natural Foods, Malted by Westbrae; Silver: Ah Soy by Great Eastern Sun. Color photos show all three products.

1561. Crump, Constance. 1985. FDA probing use of local soy beverage. *Ann Arbor News (Michigan)*. June 19.

• **Summary:** “The inquiry concerns Edensoy, a soy drink made by Eden Foods of Tecumseh and manufactured in Japan by the Marusan Co. A recall of the product’s explanatory pamphlet is expected, probably today. In Toronto, Ontario [Canada], a woman fed her infant Edensoy as the child’s only food for five months after she developed difficulty in nursing, said Mike Potter, president of Eden Foods. At six months of age, the baby was hospitalized for malnutrition.” The FDA investigation was confirmed by Alan Hoeting, FDA district director in Detroit.

The pamphlet was written by Potter in 1983 to explain the uses of Edensoy. About 9,000 copies were distributed in 1983 and 1984. It contains one sentence [actually one page] which could easily be misinterpreted to mean that Edensoy could be used as an infant formula.

“Eden’s Store and Deli, 330 Maynard, was once part of Eden Foods, but there has been no connection in ownership or management for several years.” Address: News Staff reporter.

1562. Food and Drug Administration. 1985. [Warning on use of Edensoy and similar soy drinks as an infant formula] (News release). Washington, DC. 1 p. June 19. Address: Washington, DC.

1563. *Import Alert (U.S. Food and Drug Administration)*. 1985. Edensoy and other soy drinks that may serve as infant formulas. No. 40-01. June 26. 3 p. PAC Code 17R043. ADFS-DFRG (HFO-415). Field Compliance Branch.

• **Summary:** “Background: Edensoy, a soy-base beverage, is imported and distributed by Eden Foods, Inc., Clinton, Michigan. The product may be received from either ‘Musco Co., Ltd.’ Osaka, Japan (a marketing and exporting company) or from the manufacturer ‘Marusan’, Osakaki-shi, Japan. Edensoy has been promoted as an infant formula, and as a substitute for mother’s milk, by means of pamphlets and advertisements. The product’s immediate label does not make infant formula use or mother’s milk substitute claims. Edensoy does not comply with the requirements of 412(g) of the FDIC Act, and should not be used or promoted for use as an infant formula. A Class I recall of the promotional literature is underway. Also, Edensoy does not comply with the nutrition labeling requirements of 21 CFR 101.9. Eden Foods has agreed to promptly prepare new labels, with nutritional labeling and a warning against use of the product as an infant formula or as the sole source of nutrition. In addition, the firm has agreed to place a warning placard into each carton of product with the old label.

“Since Edensoy is also sold to at least six Canadian firms, it may enter the United States from Canada as well as Japan.

“A Canadian physician recently reported a six-month old infant has rickets due to Vitamin D deficiency, vision problems due to Vitamin A deficiency, and general malnutrition. It is reported the infant had been consuming Edensoy as the sole source of nourishment for five months after its mother experienced difficulty in breast feeding. FDA’s Health Hazard Review Board has concluded: ‘the use of this product (Edensoy), as a sole nutritional source (e.g., as an infant formula) will result in severe protein-calorie malnutrition and multiple vitamin and mineral deficiencies which would result in diminished resistance to disease and ultimately to death if not treated. This product when so used would represent a chronic/severe life threatening hazard to health.’ This has led to our concern over similar products.”

A partial list of similar products includes: Soy Moo (Belgium, Health Valley); Sun Soy (Belgium); Ah Soy (Japan, San-iku Foods, Great Eastern Sun); Westsoy (Japan, San-iku, Westbrae), Vitasoy (Hong Kong), Malted

(Westbrae), Marusan. Address: Washington, DC.

 • **Summary:** A color photo shows a simple Edo plate from 16th century Japan. In Japan, what is simple and from nature has always been highly regarded. For 18 years Mitoku Co. Ltd. has brought simple, natural foods from Japan to America. Address: Tokyo, Japan.

1566. *Natural Foods Merchandiser*. 1985. NNFA lobbying blunts dietitian’s bills: natural food retailers have blocked attempts by the American Dietetic Association to restrict the flow of nutrition information to the public, but the state by state challenge continues. June. p. 10.
 • **Summary:** “‘The effect of many of these bills, however, would be to put the health food retailer out of business.’ Bass says. He notes that the dietitians bills are often worded in such a way that anyone giving out nutritional information, or even selling high-potency supplements, would be violating the law.”

Note: Scott Bass is legal counsel for the NNFA.

1567. **Product Name:** Westbrae Natural Tofu Ramen. Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.
Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.
Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.
Date of Introduction: 1985 June.
Ingredients: Asian style noodles: whole wheat flour, sifted wheat flour, and sea salt. Vegetable broth: powdered shoyu (soybeans, wheat and sea salt), dried tofu (soybeans, nigari bittern), shiitake mushroom powder, kombu seaweed powder, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.
Wt/Vol., Packaging, Price: 3.1 oz (90 gm).
How Stored: Shelf stable.
New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Red, green, white, brown on yellow. Color picture of bowl of Tofu Ramen.

1568. **Product Name:** Naturally Delicious Fried Rice Sandwich (With Tofu).
Manufacturer’s Name: Naturally Delicious.
Manufacturer’s Address: Asheville, North Carolina.

Phone: 704-253-7656.

Date of Introduction: 1985 July.

Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. Handwritten “Naturally delicious. Made fresh today. To eat; peel back wrapper from one end.” Talk with Paul Duchesne. 1989. Aug. Barbara Svenning originally learned how to make this sandwich from Paul. She made it at the Natural Cafe in Santa Fe, New Mexico, with her husband Marty Roth. When she separated from Marty, she moved to Asheville, North Carolina, where Jack Garvey (a former husband) and her children were living. She made a line of at least 28 Fried Rice Sandwiches (many of which contain tofu) and whole meals, which she sold at various places.

Talk with Dinner for the Earth. 1989. Aug. 15. This is a natural food store and deli that has been in business for 13 years and has sold Barbara’s line of sandwiches for 3-4 years. In April 1989 Barbara Svenning became manager of the Deli at Dinner for the Earth (160 Broadway St. Phone: 704-253-7656). She lives in Black Mountain, North Carolina.

Talk with Barbara Svenning. 1989. Aug. 21 and 23. It was a coincidence that Great Eastern Sun was established in Asheville. Barry Evans was partners with Sandy Pukel and Michio Kushi. They had a miso factory [American Miso Co.] in North Carolina and they wanted to establish GES near it. Marty suggested Asheville, since it was a good location and he could live their near his wife’s children (Jack Garvey lived in Asheville). Barbara did not make her brown rice and tofu sandwiches while Marty was working at Great Eastern Sun. After Marty Roth had set up Great Eastern Sun in Asheville, North Carolina, he continued to live in nearby Black Mountain but worked for Chico-San for a while and set up the Ohsawa America mail order program for Bob Kennedy. Then he began working for Westbrae in California, where he and Barbara and her son relocated. After 2 years, in July 1985, when her son was age 3, she left Marty Roth (they had never been married), and returned by herself to Asheville, North Carolina to be with her two other children. In Asheville, she established a new company named Naturally Delicious. She ran it out of some else’s kitchen and sold 12-15 sandwiches a day at only one store, Nothing But Natural, which promised to tell any health inspectors that the sandwich was made in their kitchen. During that time another woman, Barbara Hoffman, who now lives in Israel, sort of took over the sandwich business. When Nothing But Natural went out of business, she moved to Black Mountain (where she still lives), got her own kitchen,

and sold the sandwich exclusively to Dinner for the Earth, where she now runs the deli. Yet she still owns the brown rice sandwich business. She makes them at home and sells them to Dinner for the Earth. “Its still my little baby, still an underground business. I make about 15 fresh each day and they are different every day. Only the chapati, fried rice, and lettuce are the same. I make a Mexican, and Indonesian, a Chinese, etc. Not all contain tofu. Sometimes its a tofu sauce, or barbecued or baked tofu. I guarantee the sale and take back any not sold that day. There is a profit of about \$1 each. I also make another nice wheat-free tofu sandwich called Barbecued Tofu on Millet. It’s on square slices of millet bread. It started it about 6 months ago.”

1569. Westbrae Natural Foods. 1985. Distributor catalog, FOB pricing: Aug. 1, 1985. Emeryville, California: Westbrae. iv + 11 + [7] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-11 are a computer-printed price list, and the last 7 are a product glossary. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1570. Westbrae Natural Foods. 1985. Product listing [glossary]: Aug., 1985. Emeryville, California: Westbrae. [7] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on an orange background. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (800) 621-0851.

1571. Datz, B. 1985. Augusta [Maine] woman’s complaint gets [Edensoy] formula folders recalled. *Kennebec Journal (Augusta, Maine)*. Aug. 3.

• **Summary:** Eden Foods has sold 8 million single serving packages of Edensoy in the last 2 years, according to company president Michael Potter in a phone interview. A six-month old Canadian infant was fed nothing but Edensoy for 5 months. Severely malnourished, the child developed rickets from a lack of vitamin D and vision problems from a lack of vitamin B. Edensoy was launched on the U.S. market in August 1983. Mary Owen, a dietitian from Augusta, Maine, has been vocal about raising questions the suitability of Edensoy for infants. She obtained a brochure describing Edensoy then in late 1983 wrote Eden Foods several questions about Edensoy’s level of calories, protein, fat, minerals, and vitamins compared with breast milk. Michael Potter said that, until about 9 months ago, he didn’t know about the requirements of the Infant Formula Act of 1980.

In April 1985 the FDA recalled Eden’s brochure describing Edensoy “in response to false advertising and nutritional deficiencies of two soy drinks produced by another firm. Their brand names are Nutra-Milk and Kama-

Mil.”

1572. *Country Folks (Palantine Bridge, New York)*. 1985. Consumer alert issued on “soy drinks” fed to infants. Aug. 12.

• **Summary:** “The Maine Department of Agriculture, Food and Rural Resources has issued a consumer alert warning parents that so-called ‘soy drinks,’ or soy ‘milks,’ should not be used as a sole source of nutrition for infants.”

“The federal Food and Drug Administration recently issued several such warnings about specific brands of soy drinks often sold in health food stores. Earlier this year, a 6-month-old child in Canada developed rickets, vision problems and malnutrition after being fed a soy drink product called Edensoy as a sole source of nutrition for 5 months.” Brands with serious nutritional deficiencies and false advertising included Nutra-Milk and Kama-Mil. Also published in *The Journal (Lewiston-Auburn, Maine)*. Aug. 5.

Note: This is the earliest document seen in which the U.S. Food and Drug Administration uses the term “milk” to refer to soymilk. Address: Maine.

1573. *Food Chemical News*. 1985. FDA knew of Edensoy situation for 20 months prior to recall: Metzenbaum. 27(23):3-4. Aug. 12. [3 ref]

1574. *Washington Post*. 1985. Cosmic energy from Irish monks. Aug. 25. p. SM16.

• **Summary:** Each one looks like a cross between a tepee and a bootlegger’s corn mash still, but a sign at the base of each says its an “Ortho-molecular Multi-wave Oscillator.” A.P. Thomson claims that they bring “cosmic energy” to crops. Thomson, who has two in his orchard, admits they look silly. “We put some on our demonstration farm (operated by Natural Food Associates, a group Thomson heads) in Texas, and [Joseph Francis] the man who manages the farm said, ‘This has gotta be the biggest con game there ever was.’”

But today Francis is a convert, after he just harvested four times as much hay out of that field than he ever got before.” He was quite surprised, and says that of he were starting his own farm the first thing he would do would be to get some of these oscillators.

A photo shows the device.

1575. Ohsawa-America. 1985. Chico-San sells products line (Ad). *East West Journal* 15(9):33. Aug.

• **Summary:** A full-page ad. “Ohsawa-America, a newly formed macrobiotic food company, has recently purchased the Ohsawa-Japan products line from Chico-San, a division of H.J. Heinz, Inc.” The ad/letter is signed “... in the spirit of Ohsawa, Herman Aihara, Bob Kennedy, Marty Roth, Joel Wollner.”

The mail order catalog and price list, printed in tiny letters on this same page, includes 4 types of soy sauce, 5

types of miso, 3 miso condiments, 3 types of koji, and 6 seaweeds.

This ad also appeared in the Sept. 1985 issue (p. 4) of this magazine. Address: P.O. Box 12717, Northgate Station, San Rafael, California 94913-2717. Phone: 415-492-8110.

1576. *Rodale's Organic Gardening*. 1985-- . Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Robert Rodale, editor. Vol. 32, No. 8. Aug. 1985.

• **Summary:** Previous title *Organic Gardening*. Subsequent title *Organic Gardening*. Continued until Vol. 35, No. 4, March 1988. Address: Emmaus, Pennsylvania.

1577. *Whole Foods*. 1985. Source book 1985-86. 8(8):1-136. Aug. Illust. Index. 28 cm.

• **Summary:** This is the 5th edition of this directory. Contents: Publisher's page. NewsLinks Wholesalers / distributors: Alphabetical address directory. Wholesalers / distributors: Geographical directory. Product directories: A list of product manufacturers: Foods (p. 33-48—soy-related categories include: Bean products, beans, coffee substitutes, cultures, ice cream, macrobiotic, milk, miso, sauces, soy products, soy sauce, tamari, tempeh, tofu), vitamins and supplements, cosmetics & personal care, herbs. Trade name index: An alphabetical listing of products by their brand or trade names. Brokers. Publishers. Associations. Alphabetical listing of manufacturers / importers. Advertisers' index.

Note: The listings related to soy products are full of errors. This Source Book contains many interesting ads. Whole Foods claims prominently and repeatedly to have the largest circulation in the natural foods industry. Address: South Plainfield, New Jersey.

1578. Puzo, Daniel P. 1985. Food briefs: Alta-Dena to honor founders with new label on some dairy products. *Los Angeles Times*. Sept. 26. p. H26.

• **Summary:** Alta-Dena (located in City of Industry near Los Angeles) is celebrating its 40th anniversary with a name change. From now on the well-known brand name will appear on only the companies pasteurized dairy products, which comprise most of the company's production of 100,000 gallons/day. Equally important, "Alta-Dena Certified Raw Milk, which has been discussed in countless news stories for the past 20 years [i.e., since about 1965] because of various health disputes, has been retired."

Steuve's Natural will become the brand for the five products that will make up the new line: raw milk, raw butter, raw cream, raw kefir, and raw cottage cheese.—daily production of which will total about 15,000 gallons. Address: Times staff writer.

1579. *FDA Consumer*. 1985. Warning on soy drinks. 19(7):34. Sept.

• **Summary:** "Edensoy and similar drinks should not be used

as an infant formula or substitute for mother's milk or sole source of nutrition, FDA has warned. The warning came in June after the agency learned from a Canadian hospital physician of a 6-month-old infant who had rickets due to vitamin D deficiency, vision problems due to vitamin A deficiency, and general malnutrition. It was reported that the infant had been consuming Edensoy as the sole source of nourishment for five months after its mother experienced difficulty in breast feeding...

"A pamphlet and various advertisements and other promotional materials distributed by Eden Foods since 1983 have erroneously suggested that Edensoy may be used as a substitute for mother's milk or as a substitute for infant formula. The pamphlet also states that 'Edensoy compares very favorably with cow's milk.' This statement is false. Soy drink products such as Edensoy are nutritionally inferior to milk..."

"FDA advised Eden Foods about the Canadian incident on June 14, and the firm has cooperated fully with the agency."

1580. Kotzsch, Ronald E. 1985. *Macrobiotics: Yesterday and today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. Illust. Index. 26 cm. [144* ref]

• **Summary:** The best and most objective book available to date (April 2020) on the origins and history of macrobiotics, worldwide. Includes detailed information on central ideas and practices of macrobiotics, its leaders, organizations, applications, and aspirations. Carefully researched and well written.

Contents: 1. Ekken Kaibara: The grandfather of macrobiotics. 2. Sagen Ishizuka: The founder of modern macrobiotics. 3. George Ohsawa: The early years (1893-1929; Yukikazu Sakurazawa, later known as George Ohsawa was born on 18 Oct. 1893 in a western suburb of Kyoto, Japan, the family's eldest child). 4. George Ohsawa: The first sojourn in the west (1929-1936). 5. George Ohsawa: Return to Japan in crisis (1936-1939).

Photographic interlude for *Macrobiotics Yesterday*. Illustration (line drawing) of Ekken Kaibara. Photos of Ishizuka, Nishibata, Ohsawa's parents, George Ohsawa (many from 1901-1966). 6. George Ohsawa: The war years (1940-1945). 7. George Ohsawa: Hope for a new Japan and a new world (1945-1953). 8. George Ohsawa: The world journey of the penniless samurai (1953-1966; George and Lima visited India [Nov. 1953-July 1955]; Africa [Aug. 1955-Feb. 1956, incl. Kenya, and 3½ months with Albert Schweitzer at Lambarene, Gabon]; Paris, France and Brussels, Belgium; New York City, USA [late 1959-Oct. 1961]; France [around 1961 he met Louis Kervran]; Tokyo [most of 1963-64]; Vietnam 1965; Tokyo, where he died on 23 April 1966 [24 April Japan time], probably of filarial parasites contracted in Lambarene, and smoking). 9. George Ohsawa: The man and the legacy. 10. After the master: Part

one: America.

Photographic interlude for *Macrobotics Today*. Photos are given (p. 193-208) of Toshi Kawaguchi, Michi Ogawa, Hiroshi Maruyama, Kaoru Yoshimi, Francoise Riviere, Cecile Levin, Dr. Kikuo Chishima, Dr. Moriyasu Ushio, Michio and Aveline Kushi, Herman and Cornelia Aihara, the Kushis, Aiharas, and Shizuko Yamamoto, William Dufty, Bill Tara, Aveline Kushi and Wendy Esko, Alex Jack, Dr. Marc van Cauwenberghe, Edward Esko, Murray Snyder, Noboru Muramoto, Jacques and Yvette de Langre [DeLangre], Jerome Carty, Duncan Sim, Lima Ohsawa, Shuzo Okada, Hideo Ohmori, First European Congress of Macrobiotics in London, Nov. 1978, Lenk summer camp, Switzerland, July 1984, Jan Lansloot, Peter Doggen, Rik Vermuyten, Georges Van Wesenbeeck, Roland Keijser, Mayli Lao Shun, Tomio Kikuchi (in Brazil).

11. After the master: Part two: Japan. 12. After the master: Part three: Europe and elsewhere. 13. The gospel according to Kushi. 14. Macrobiotics in western culture. 15. Prospects for the future. Bibliography.

The author, an excellent historian and writer, with a delightful sense of humor and light touch, began his study and practice of macrobiotics under Michio Kushi in Boston in Jan. 1967. A photo of Ronald E. Kotsch appears on the back cover. This book is based on his doctoral dissertation titled "Georges Ohsawa and the Japanese Religious Tradition," submitted on 1 April 1981 for a PhD degree in History of Religions from Harvard University. Pages 185-86 discuss briefly the role of the macrobiotic movement in introducing soyfoods (especially miso, shoyu, and tofu) and natural foods to America. Address: PhD, Hanover, New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

1581. Kotsch, Ronald E. 1985. The early years of macrobiotics in Great Britain (Document part). In: R.E. Kotsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. See p. 219-21.
 • **Summary:** "Great Britain is one of the few European countries which had little or no macrobiotic activity during the Ohsawa years. The first signs of life were in the late 1960s when Greg and Craig Sams began to promote macrobiotics in London. Of Anglo-American parentage, they had learned of the movement while in the States. The brothers started a food company, Harmony Foods, and opened a small restaurant in the Portobello Road section of London. While there was little formal [macrobiotic] teaching done, macrobiotic food and literature were made available. The warmest reception was in the emerging counterculture..."

"In 1970 Bill Tara, then a manager of Erewhon [he had studied with the Kushis in Boston and Los Angeles], passed through on a longer trip eastward and gave several talks. Two years later he returned to look into the possibility of opening an Erewhon operation somewhere in Europe. When the plan

fell through, Tara decided to stay on and began to manage Ceres, the Sams brothers' food shop. Well-spoken and with experience in teaching macrobiotics in Boston, Chicago, and Los Angeles, Tara started to hold public meetings and talks in his home. In 1974, working with Peter Bradford, a Brit just returned from a period of study in Boston, Tara set up Sunwheel Foods. This was a macrobiotic food company modeled after Erewhon. It dealt in macrobiotic staples including imported specialty items from Japan. It also produced and distributed more generally popular items like peanut butter and granola. That same year Tara, Bradford and others organized the Self Health Center to promote macrobiotics and other holistic and spiritually-oriented teachings."

In 1975 Tara helped arrange a seminar for Michio Kushi in London, followed by Kushi's first European tour. "With this visit began a new era of macrobiotics in Europe..."

"By 1976 the group which had grown up around the Self Health Center in London felt ready for a major expansion. They organized the Community Health Foundation and rented a large, five-story Victorian school in East London. A restaurant and bookshop were opened on the ground floor. The first Kushi Institute, earlier than even the Boston school, was established on the upper level. The core curriculum, which Tara had worked out with the Kushis during one of their visits, included macrobiotic philosophy, cooking and medicine, plus Oriental diagnosis and massage. Extra space was rented out to groups with similar views and aims. The CHF was among the first self-supporting centers of macrobiotic activity. It served as a model for macrobiotic groups in other countries including Holland, Belgium, and Switzerland.

"As interest [in macrobiotics] developed on the continent, Tara traveled widely and lectured in Belgium, Holland, Germany, and Scandinavia. Also, many aspiring teachers and leaders went from other countries to the Kushi Institute in London. Thus Tara and the London center played a major role in the development of macrobiotics throughout Europe.

"Meanwhile, smaller centers began to open up around Britain. In 1978, for example, Michael Burns, an Irishman who had studied in Boston, went to Edinburgh to start activities. London, however, remained the basis of the movement. Perhaps the first macrobiotic nursery school in the West was opened in the yard behind the CHF building on Old Street.

"In 1981 Tara returned to the United States to become director of the Kushi Institute of Boston. Denny Waxman, head of the Philadelphia East West Center, went to London to run the CHF and the Kushi Institute. He stayed two years. Since then the operations have been run by Kenyan born Jon Sandifer and others." Address: The New North Church, Hingham, Massachusetts (18 Mar 1985).

1582. Kotsch, Ronald E. 1985. George Ohsawa and Maison Ignoramus in Yokohama (Document part). In: R.E. Kotsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. [144* ref]

• **Summary:** Pages 106-08: “Early in 1947 Ohsawa moved yet again, this time to the Myorenji district of Yokohama [south of Tokyo] where he rented a tiny house. He called this the Maison Ignoramus, “House of the Ignorant.” These frequent transfers reflect the housing and economic difficulties of the time. Perhaps too, they reflect Ohsawa’s restlessness, his search for a context in which he could express himself fully and organize his activities most effectively.

“Later that year Ohsawa read in the *Reader’s Digest* a condensed version of a book called *The Anatomy of Peace* by the American Emory Reeves. He was much impressed by its vision of a world political structure to prevent war. Shortly thereafter, Ohsawa came into contact with Japanese representatives of the World Federalist movement. This group had begun in the United States after the war, mainly through the work of intellectuals and public figures associated with the University of Chicago [Illinois]. It aimed to establish a world government, with all the elements of a national government: a parliament, president, even a ‘world army’ to enforce the authority of the central government. It was hoped that an international rule of law would achieve world peace. Centers were set up in various countries, and efforts were made to draw up a satisfactory world constitution.

“Ohsawa saw World Federalism as the perfect complement to his own *Shin Seikatsu Ho*. His vision of a peaceful world community began with individual biological regeneration. That of World Federalism began with a global organization based on law. Ohsawa joined the movement and quickly became one of the leaders of the nascent Japanese branch.

“With this broad new perspective, Ohsawa tried to give his activities an international ambience. He adopted the term ‘macrobiotics’ derived from Greek and meaning ‘great, all-embracing life.’ It is not clear where Ohsawa got the term. It may have come from the title of a book by an 18th century German physician named von Hufeland (see Chapter 15, p. 264). Whatever its source, the term was more international than *Shoku-Yo* or *Shin Seikatsu Ho*. Ohsawa also changed his own name. He substituted an alternate reading of the ‘sakura’ or ‘cherry tree’ ideograms, and came up with ‘Ohsawa.’ George came as a fanciful pronunciation of Jyoichi, a possible reading of his first name characters. Hence he became George Ohsawa. Also he gave many of his students Western style P.U. (*Principe Unique*) names such as Augustine and Gertrude. A few managed to escape this scourge, though with some difficulty. Ohsawa felt he was training citizens of the world, international missionaries who would bring the gospel of biological revolution and world

government to all nations.

“In 1948 Ohsawa moved the Maison Ignoramus to the Hiyoshi district of Yokohama, where it was to remain for four years. He gave it a second name, ‘The World Government Center,’ and put a large sign with those words on the roof of the small house. He continued to teach about the importance of food in health, and published a magazine called *Sana* (‘Health’) to spread these views. He also began to publish a newspaper (every ten days) called *Sekai Seifu* (‘World Government’). In it he addressed broader social, economic and political issues from his combined macrobiotic and world federalist perspective. Beginning in 1948 Ohsawa drafted a monthly letter to the leaders of the world, presenting his suggestions for solving current problems. The letter was rendered into fractured English, mimeographed, and then sent to 100 prominent political and cultural figures including Stalin, Truman and Einstein. The single reply was from Dr. Albert Schweitzer in Africa, and included an invitation to visit. Schweitzer probably never suspected that the unknown Japanese would someday actually arrive in Lambarene with his wife.

“At the same time Ohsawa tried to inject his macrobiotic views about the role of food in human life into World Federalism. He wrote to the leaders of the movement, complimenting them on their draft of a world constitution but chiding them for ignoring the role of food in establishing world peace. A world of peace can be realized only by a world of healthy and happy individuals. And this can be accomplished only by sound diet in accordance with the law of nature. If the leaders and citizens of the world eat foods such as meat and sugar, which generate fear and hostility, there will never be peace, regardless of a world political structure. Ohsawa coined the phrase ‘biological theory of revolution,’ and argued that until now all attempts to improve the human condition have focused on changing social, political and economic forms. They have ignored the biological basis of human life-food. Hence they have failed. Only a revolution which keeps this idea in mind will be effective and lasting. The movement for world peace must understand diet and apply this understanding in its work. In the summer of 1949 Norman Cousins, one of the American leaders of the World Federalist movement and founder of *The Saturday Review of Literature*, visited Hiyoshi. He stayed for a week, sharing the simple diet of miso soup and brown rice.”

“Ironically, as Ohsawa was adopting his ‘citizen of the world’ stance, he was censured by the government as an ultranationalist. After the war the authorities surveyed all war-time writings to ferret out ‘dangerous persons.’ The 1937 version of *Hakushoku Jinshu o Teki to Shite* had been banned as seditious by the Imperial Government in 1941. Now that same book was judged dangerously patriotic, and Ohsawa was officially blacklisted. He was barred from holding public office, which he did not mind, and from traveling abroad,

which he did indeed mind.

“For the next four years Ohsawa, not knowing when he himself would be able to go abroad, devoted much time and energy to the training of the students at the Maison Ignoramus. They would be his proxies in spreading macrobiotics in Japan, and particularly in the world beyond. Very consciously and carefully he sought to train people to be missionaries to the world. A small dormitory was built in the garden, containing a men’s and a women’s section. With bunk beds arranged three or four high it could accommodate about thirty people. It was usually full. Many of those who came were young idealists, sincerely attracted to Ohsawa and his mission. Others were interested more in the opportunity to go abroad. All were free to come and go as they pleased. The school was organized on the principle of ‘He who comes let him come, he who goes let him go.’ Of those who came and stayed, many were to remain active in the macrobiotic movement for years.

“Ohsawa ran the school as a *dôjô*, a place where a Tao or spiritual discipline is practiced. It was not a clinic or hospital. No sick people were allowed. Conditions were spartan, with no heaters, no radios, and no newspapers. Ohsawa, as *sensei*, or ‘Master’ was the absolute authority. The students or *deshi* were there to train themselves physically, mentally and spiritually. They looked to him for guidance and obeyed him absolutely.

“Each day followed a strict schedule. The students rose at 5: 00 A.M. and went immediately to a nearby aikidô dôjô for an hour and a half of martial arts training. Returning to the school, they performed *o-soji*, or the ‘honorable cleaning’ of the dojo buildings and grounds. The place was completely swept and then the straw mat floor, wooden pillars, and verandas were scrubbed down with cold water. Ohsawa, who usually had been up since two or three A.M. writing, would join the students in this task. Brandishing a duster in each hand, he would clean the walls with the speed of an ambidextrous swordsman. He would scrub the floor squatting on tiptoes, moving the rag vigorously with both hands. In all things he gave the students an example of efficiency, speed and concentration. Ohsawa would also sweep the street and clean the sewerage ditch that ran from the house to the station. One day the passing milkman had compassion on the poor fellow shoveling out the ditch and offered him a job. Ohsawa politely refused.

“After a brief period of free time the three-hour morning lecture began. Ohsawa stood before a blackboard in the narrow main room. The students sat in stiff *seiza*, the formal seat-on-heels position, on the floor about him. He lectured on a wide variety of topics-current events, history, art, literature-surveying all from the perspective of the Unique Principle” (Continued). Address: PhD, Hanover, New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

1583. Kotzsch, Ronald E. 1985. Chapter 10. After the master.

Part one: America [young Michio and Aveline Kushi, and Herman and Cornelia Aihara] (Continued–Document part II). In: R.E. Kotzsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. [144* ref]

• **Summary:** (Continued): p. 166-168. “Next Kushi and Aihara established a Japanese gift shop called ‘Azuma,’ along with another student of Ohsawa, Noboru Sato (Roman). This venture was successful. Kushi then cooperated with another partner in a similar shop called ‘Ginza.’ He also represented a Japanese textile firm and later became vice-president of Takashimaya, New York. Takashimaya is one of the oldest and largest department store chains in Japan, with origins in the Tokugawa Period (18th century). Kushi was put in charge of setting up a branch on Fifth Avenue near the New York Public Library. In the summer of 1953, Aihara went to California. A supporter of world government and macrobiotics, George Hicks, had offered to reactivate a defunct tungsten mine to raise money for the movement. Aihara, with his background in metallurgy, went to help run the mine. However, union opposition made the project impractical. Aihara moved to Los Angeles and there received the first of the many deportation notices that were to haunt him for the next years.

“By late 1959 Aihara was back in New York City, when Ohsawa made his initial visit. He arranged the three ten-day lecture series which Ohsawa gave in the first months of 1960 and made a first mimeographed edition of *Zen Macrobiotics* to distribute at the meetings. Then, because of continuing pressure from the Immigration Service, he went to Europe with Cornelia and his two small children. Aihara returned to New York early in 1961 to discover that he had been elected president of the newly formed ‘Ohsawa Foundation.’ Accepting it with characteristic humility, Aihara worked to organize the small but growing macrobiotic community in New York City.

“In the spring of 1961 the confrontation between the U.S. and the U.S.S.R. over the Berlin wall occurred. When a group formed and, following Ohsawa’s advice to find a fall-out free haven, went to California, Aihara was one of its leaders. With his family, he was in the automobile caravan as it drove across the country. The group averaged three hundred miles a day and stopped each night to camp and to dine on rice and miso soup cooked over kerosene stoves. And Aihara was one of the leaders when the group, once settled in their new home, decided to form a food company, Chico-San.

“With the Aiharas’ departure from New York and resettlement with their fellow ‘pioneers’ in Chico, a second focus of macrobiotic activity in America was created. Until then New York, where both the Kushis and Aiharas lived, and where Ohsawa and Lima came to visit, was the sole center. For the next several years Chico and New York were the twin poles of the movement. When Ohsawa came

to America he visited both, and gave lectures and summer camps on the West Coast as well as in the New York area.”

“After Ohsawa’s departure for India in 1953, [Alcan] Yamaguchi remained active in the movement in Japan until Ohsawa summoned him to New York in 1960. Soon after arriving, Yamaguchi established, with the help of Kushi and Aihara, a tiny restaurant (there were only about ten seats) in Greenwich Village called ‘Musubi.’ It was America’s first public macrobiotic eating place. Another restaurant, on West 46th Street, was attempted before Yamaguchi returned to his wife and family in Japan in 1963.”

“Activities were also stimulated by the involvement of New York journalist and writer, William Dufty. A veteran writer for the *New York Post*, and the author of the celebrated biography of jazz singer Billie Holliday, *Lady Sings the Blues*, he had met Ohsawa in Paris in August 1964. After having experienced a tremendous change, physically and mentally, through the diet (he lost 60 pounds and ‘about ten years of age’ in two months), Dufty agreed to do an English version of *Zen Macrobiotics* that could be presented to the general public. The result was *You Are All Sanpaku*, published in 1965. As early as 1963 Ohsawa had become fairly well known in New York through feature articles by Tom Wolfe in the *New York Herald Tribune*. His prediction of problems for President Kennedy (because of the upward turning ‘sanpaku’ or ‘three-whites’ condition of his eyes), followed of course by the Dallas assassination, received considerable notice. But Wolfe’s articles and an all-night interview on WOR Radio’s Long John Silver show focused on Ohsawa as some kind of Oriental ‘medicine man.’ Only with Dufty’s book were Ohsawa and his teachings presented to the public in a clear, non-sensational manner.

“Late in 1965 though, the FDA raid closed down the Ohsawa Foundation. A year later Ohsawa died. These two shocks ended most macrobiotic activity in the city. For several years, until [Michel] Abehsera moved to Binghamton, N.Y., he continued teaching on a modest scale. And from the late ‘60s Shizuko Yamamoto, a shiatsu massage therapist, gave cooking classes in her apartment on a sporadic basis. But otherwise the New York macrobiotic community was moribund. Only in November, 1984 did a new, permanent macrobiotic center finally reestablish itself.

“Meanwhile, Kushi was increasingly dissatisfied with New York, both as a place to raise a family and as a place to teach macrobiotics. In 1964 Aveline and the children went to live in Gay Head on Martha’s Vineyard. Kushi remained in New York. The following year he chose Boston, the intellectual capital of America, as a place to settle and teach. Kushi, Aveline, and their then four children moved into a rented house on a side street north of Harvard Square in Cambridge. From that time Boston became the new focus of activities on the East Coast. Ohsawa visited in 1965, classes were held and a small group began to form. Kushi, no longer with Takashimaya, or otherwise employed, began teaching,

and giving lectures and massages. To meet the growing need for macrobiotic foods, Aveline Kushi started ordering rice, miso, and other staples in bulk and selling them to friends and lecture guests out of her front hall closet.

“In 1965 the Kushis rented a large house in Wellesley, an affluent suburb west of Boston. They planned to set up an ‘East West Foundation’ where macrobiotics and various Japanese traditional arts would be taught. Very quickly, though, opposition from conservative neighbors forced them to move again, this time to Brookline. Despite the setback, the macrobiotic group continued to grow. A tiny basement storefront on Newbury Street in Boston was rented as a retail food outlet. Aveline, the prime mover of the project, thought of using the name of Samuel Butler’s utopia. With twenty-three-year-old former actor Evan Root as manager, the Erewhon Trading Company was founded.

“Although it had escaped the fate of the Ohsawa Foundation the Kushi operation struggled during those first years in Boston. The bad publicity which resulted from the [Beth Ann] Simon case [see p. 137] continued to hang over the name of ‘macrobiotics.’ National media attention had labeled it as the ‘killer diet’ which caused extreme malnutrition and various deficiency diseases. One of its leading opponents was right in the Kushis’ backyard. At the Harvard Medical School, Dr. Frederick Stare, head of the Department of Nutrition, spoke and wrote widely about the macrobiotic diet as a serious public health hazard. Nevertheless, because of the determination of the Kushis and the support of their small group of friends, Boston became a stable center of macrobiotic activity. From 1966 it, rather than New York, was the focus of the movement on the East Coast. And from this time, the history of macrobiotics in America is really two stories. One concerns macrobiotics on the West Coast as it developed under the influence of the Aiharas and their associates. One concerns the Boston-based movement which grew and spread under the leadership of Michio and Aveline Kushi. While sharing the same philosophy, practice and general aims, these two streams, influenced by geography, culture and personality, followed somewhat different courses.

“While the East Coast branch of the family was having its ups and downs, the Chico community was having its own struggles. The first task was to survive economically in a strange city. Chico-San soon had stocks of native brown rice, wheat, beans, and of miso, soy sauce, sea vegetables and other foods from Japan. A bakery was opened, turning out the famous and now happily extinct unleavened macrobiotic ‘doorstop’ bread. This was sold on consignment at local stores. But there was little demand for it or for the other exotica. The good burghers of the Sacramento Valley scarcely knew what the foods were, let alone had any inclination to buy or eat them. The ‘pioneers’ found their best customers to be themselves. Many had to take outside jobs in order to support themselves. Herman, for example, worked

as a fruit picker in the local orchards” (Continued). Address: PhD, Hanover, New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

1584. Kotzsch, Ronald E. 1985. Chapter 10. After the master. Part one: America [young Michio and Aveline Kushi, and Herman and Cornelia Aihara] (Continued—Document part III). In: R.E. Kotzsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. [144* ref]

• **Summary:** (Continued): p. 168-171. “Nevertheless, an Ohsawa Foundation was formed and became particularly active in publishing. A monthly magazine called *Yin Yang* was founded. A new edition of *Zen Macrobiotics* was prepared. An English version of *La Philosophie de la Medicine d’Extrême Orient* was published as *The Book of Judgment*. The ‘Shoku-Yô Human Life Reader’ published in Japanese in 1938 appeared as *The Macrobiotic Guidebook for Living*. Aihara was instrumental in these projects but got help from many others, including Shane and Lou Oles and Belgium-born Jacques de Langre. In 1964 *Zen Cookery* was compiled by Cornelia and other women in Chico and became the first macrobiotic cookbook published in English. It presented the very salty cuisine favored by Ohsawa, and by the second edition in 1966 an insert warned that the salt recommended in its recipes should be cut in half. The first West Coast summer camp was held in 1962 and became an annual tradition.

“In 1964 Aihara suggested to his partners at the Chico factory that they import a rice cake machine from Japan. The senbei (rice cake), a flat, round wafer of puffed rice about three inches across, is a favorite Japanese snack food. In New York, at the second ‘Musubi’ restaurant, rice cakes were being made and were well-liked. Aihara felt that these, containing only rice and salt, might be popular in the macrobiotic and in the broader ‘health food’ market in America. A machine was shipped to America by George Ohsawa. Soon the rice cakes (which to their detractors have the texture and romance of styrofoam) were being produced by a hand-operated press. Chico-San partner and eventual president Bob Kennedy automated and refined the machine. Soon several descendants of the original were turning out rice cakes for a growing market. Also in 1964 Junsei Yamazaki, a Japanese macrobiotic farmer, settled in Chico. He had come to the U.S. in 1963 and had first gone to New York. He had experimented with miso production there, setting up kegs in the basement of the Diamond Jim building on 46th Street under Yamaguchi and Kushi’s ‘Genpei’ restaurant. Moving to Chico, Yamazaki started making miso on a large scale to be marketed by the company. By 1967, with native miso and rice cakes, the company at last had a stable financial basis.

“Acceptance of the diet by the general public was slow, however. For most Californians the food and the ambience

were perhaps too exotic, spartan and Japanese. In one group though, macrobiotic thinking and practice, in some form at least, was widely adopted. In 1965-66, and then especially in the following year, the ‘hippie’ subculture developed, centered in the Haight-Ashbury district of San Francisco. Composed of the young and disaffected it rejected the values and lifestyle of bourgeois America. It embraced various vague anarchies and forms of mysticism, including that provided by hallucinogenic drugs. Marijuana, long available in the American subculture, and the newer, more powerful agents like LSD-25 and mescaline, were staples of daily life. By word of mouth and by the widespread distribution of the yellow paperback version of *Zen Macrobiotics*, the diet and something of its philosophy were introduced into the Hippie movement. By the summer of 1967 when the public media and the midwestern runaways arrived in force, brown rice, miso soup and sea vegetables had become the basis of the typical Hippie larder. These foods could be bought readily, for example at Fred Rohe’s ‘New Age Foods,’ one of the first of a new breed of natural foods stores. Several macrobiotic restaurants opened, and when ‘street kitchens’ were set up to feed the homeless young people, it was usually with a macrobiotic style meal.

“There were several reasons for this attraction to macrobiotics. For one thing it was exotic, distinctly non-American. On the culinary level it was a clear rejection of Middle America and the diet of meat, potatoes and ice cream which nourished it. And if the Hippies were doing anything, they were rejecting Middle America. Besides, it was Oriental, and thanks to Ohsawa’s well-intended ploy, associated with Zen Buddhism. Ever since the alcoholic mysticism of the 1950s Beatniks, Zen had a special appeal for America’s alternate culture. Then, as presented in *Zen Macrobiotics*, the diet promised a quick fix—perfect physical and mental health, plus some species of enlightenment—in the ten days of the Diet Seven rice cure. To a generation raised on TV dinners and fast food this was quite appealing. And it was cheap. Brown rice, beans and twig tea were and remain relatively inexpensive food staples. And in a subculture where much of the ready cash came from handouts or welfare, and much of it went for drugs, economy was an advantage.

“Despite the appeal of the diet there was little deep understanding of it or the philosophy behind it. Many, probably most, combined a brown rice-based diet with the free use of drugs. They did not realize that from a macrobiotic perspective, hallucinogens and other chemical agents at the extreme Yin end of the spectrum are very unbalanced and dangerous. They weaken the internal organs and the entire nervous system. Vitality, especially sexual vitality, as well as motor coordination, memory and mental acuity are all impaired by their use.

“Meanwhile, the Aiharas had moved to Carmichael, near Sacramento. In 1966, Lou Oles, who with his wife

Shane had managed the revived Ohsawa Foundation, died, and Shane asked Herman to assist her. Herman began to travel to Los Angeles once a month to give lectures at the Foundation headquarters. He was also instrumental in the publishing of Ohsawa's books, which were selling well on the East Coast as well as the West. By 1969, however, dissension had developed over the role of Shane's new husband in the organization. Herman resigned. In 1970 the Ohsawa Foundation dissolved. Aihara, who had moved to San Francisco, established the George Ohsawa Macrobiotic Foundation as a new educational and publishing organization.

"In Boston activities were on a modest level. After Ohsawa's death in April of 1966 the Kushis were in a state of deep reflection for several months. Kushi began giving lectures each Monday and Wednesday evening in a back room of the Arlington Street Church in Boston. These talks were supplemented by cooking classes with Aveline in Brookline. Between five and fifteen people usually gathered for Kushi's talks. Most of them were under thirty and many were regular attenders. Erewhon limped along on about \$300 per week in retail sales. Root's main compensation was room and board at the Kushis'. Another student and boarder, Jim Ledbetter, recorded and transcribed some of Kushi's talks and published them in mimeographed form as the first issue of *The Order of the Universe* magazine. The whole macrobiotic community in Boston at the time did not exceed 100 people.

"Then in the summer of 1967, almost as an East Coast counterpoint to San Francisco's 'Summer of Love,' the tempo of activity increased markedly. Scores of young people began to arrive from around the country, many of them directly from Haight-Ashbury. They were anxious to study and practice macrobiotics seriously, and had heard that Boston was its center and Kushi its main teacher. Attendance at the church lectures doubled, then tripled and continued to grow. They were moved out of the back room with its central wooden table surrounded by wooden chairs to a large lecture room with rows of folding metal chairs. The Kushi house began to overflow with family plus live-in students, and a large ex-boarding house on nearby University Road was rented. It was the first Boston 'study house.' Kushi began to give special lectures there for its residents, including talks 'only for women.' Business at Erewhon grew rapidly. Root turned its management over to others and with the Kushis looked for a restaurant site. One was found nearby on Newbury Street and early in 1968 Sanae ('young rice plant') was opened as the first macrobiotic restaurant in Boston."

Note: In 1968 Michio Kushi made his first trip to the West Coast as a teacher of macrobiotics. From May 10-14 he gave a seminar at Stanford University as part of the Esalen at Stanford program. He was invited and hosted by William Shurtleff (a director of the Esalen program), at whose commune home he also stayed.

"The next years were a kind of heyday for macrobiotics in Boston. A large, tightly knit community developed, creating and supporting a wide variety of activities. The network of study houses grew so that there were usually 100-150 people living in 'study' situations directly or indirectly controlled by the Kushis. Erewhon moved to new quarters on the other side of Newbury Street. Under the astute and far-sighted direction of Californians Paul Hawken and Bill Tara it became a pioneer and trend setter in the whole natural foods industry. Food production and distribution were started in a large warehouse on Farnsworth Street in South Boston, and new retail outlets were opened. At some point, most all those who came to Boston to study macrobiotics earned their living at the company. In 1969 Tao Books moved into the former Erewhon storefront and began to sell and distribute macrobiotic literature. The Order of the Universe Publications continued to publish monthly reports on Kushi's teachings. In 1970 former New York journalist Ron Dobrin started the *East West Journal* as a monthly magazine for the general public. The following year a second restaurant, large and relatively elegant ('Sanae 2,' eventually 'The Seventh Inn') was opened just off the Boston Public Gardens. Also in 1972, the East West Foundation was organized as a non-profit educational organization to promote macrobiotic teachings. A permanent center was established in spacious and bright quarters in downtown Boston. Kushi continued to lecture regularly there to a large and stable audience. Meanwhile Aveline was teaching cooking, training young women who in turn became cooking teachers. Deeply interested in Noh drama, the traditional dance theater of Japan, Aveline set up Noh study center at the East West headquarters. The master of the Kita Noh school in Tokyo visited periodically, and Aveline and a number of students in the macrobiotic community studied with him" (Continued). Address: PhD, Hanover, New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

1585. Kotzsch, Ronald E. 1985. Chapter 10. After the master. Part one: America [young Michio and Aveline Kushi, and Herman and Cornelia Aihara] (Continued—Document part IV). In: R.E. Kotzsch. 1985. *Macrobiotics: Yesterday and Today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. [144* ref]

• **Summary:** (Continued): "There were, to be sure, difficulties as well. Tao Books went bankrupt in the mid-1970s and the Seventh Inn, while busy, was hobbled with a \$2,000 a month basic rental expense and never really thrived. Erewhon Farms, a macrobiotic rural community near Keene, New Hampshire, struggled for several years and then dispersed. Some of these problems were due to the fact that those running the various businesses and organizations were young and inexperienced, if dedicated, amateurs. There was a somewhat naive faith that if one ate properly, lack of formal training and expertise would be outweighed by good

sense and good intuition. This often did work out. Sometimes it did not. There were also some tensions as Erewhon became a large company operating in the broader marketplace. When the retail stores in Boston began to sell potatoes, tomatoes, dairy foods, honey and other items not strictly 'macrobiotic' there was a heated controversy within the community. Some argued that Erewhon was compromising its values for business reasons. Others said that the company should meet the needs of a broad spectrum of customers but with the highest quality products. The latter group won the day. Despite these difficulties and tensions, it was a time of growth and accomplishment, and of optimism about the future.

"Thus by the mid-1970s there was a stable and substantial macrobiotic community in Boston, with flourishing businesses and with thriving educational activities. Several factors were crucial in this development. Chief among them, perhaps, was the work of the Kushis. Throughout these years both Michio and Aveline worked with energy and dedication to promote macrobiotics. Each, functioning in a distinct sphere, was crucial in the birth and growth of the community.

"Kushi emerged as a forceful and original interpreter of macrobiotics. Despite a lack of real fluency in English he presented the basic themes of Yin and Yang, the spiral of materialization, and the 'Way of Eating' in a clear and convincing manner. Yet he made some important changes and additions. For one thing, he greatly liberalized the diet. Under Ohsawa the emphasis had been on Diet Number Seven observed for ten days, followed by a less strict regime, but one still based on rice, much salt and a minimum of liquid. It became clear to Kushi, particularly after his many contacts with alumni of the American drug scene, that a less spartan form of the diet was better suited to most Americans. Many young people who had taken drugs proved too weak physically to thrive on such a simple diet. At the same time they were drawn for psychological reasons to very strict and rigid patterns. It became clear too that even healthy people had a hard time thriving on such a regimen. Thus Kushi began to recommend a transitional period during which meat, dairy products and raw fruits were reduced in a gradual way that would allow the body to adjust slowly. And for the long term he began to advise what he called the 'Standard Diet.' In terms of percentages of different types of foods, this regime is an average of the various 'levels' of the diet which Ohsawa taught. It consists roughly of fifty percent grains, ten percent soup, five to ten percent beans, twenty to thirty percent cooked vegetables, plus occasional fish and seafood, seeds and nuts, salad and fruits. He advised a drastic reduction in the amount of salt taken. In general, Kushi urged a flexible and free approach, counseling people to eat and drink more in accordance with their natural intuition than according to rigid rules. Under this influence the diet became more attractive and practical for a wide range of people. It

even acquired a hedonistic aspect as the grand tradition of 'the Boston dessert' was born and developed. Interest in creating natural 'sweets and goodies' added such delights as apricot-tofu custard and carob-carrot cake to macrobiotic cuisine. On the West Coast at the same time, Herman and Cornelia and others were also broadening the diet and adapting it to the needs of Americans.

"Also, Kushi greatly increased the body of macrobiotic thought. With insight and imagination he systematized and explained in detail topics over which Ohsawa had passed lightly. These subjects included macrobiotic medicine, diagnosis and physiognomy, the 'five-energy transformations' theory of Chinese traditional thought, agriculture and the particulars of world government. Also, he dealt with many areas which had previously not been an explicit concern of macrobiotics: history of the cosmos, human prehistory, astronomy, UFOs, human auras, the structure of the spiritual world, meditation, and spiritual practice. This expansion of macrobiotic thought by Kushi is so extensive and has had such a marked impact on the movement as a whole that it will be treated at length in Chapter 13.

"Kushi functioned not only as teacher and philosopher for the burgeoning macrobiotic community in Boston. He was also counselor, friend and father figure to the scores of young people who arrived from around the country and from other parts of the world. With a high and broad brow above dark owl-eye glasses, a perennial black three-piece suit, and a cigarette poised toward the heavens, Kushi was an impressive and mysterious figure. Yet he was also an approachable one, friendly, patient and even-tempered. Always willing to listen to any problem or question, general or personal, he was usually ready with some good, plausible advice. Unlike Ohsawa, Kushi seldom criticized his students, let alone berate or embarrass them in public or in private. His most frequent rejoinder to a suggestion, idea or answer was 'Ah yes, very good!' or 'Ah so, that's great.' Kushi was quite aware of this characteristic and its importance. In a lecture once he observed, 'Mr. Ohsawa's approach to teaching was very Yang, mine is very Yin. If I were like Mr. Ohsawa I would be sitting here tonight all by myself. Americans need a little gentler method.' Yet this was a natural rather than a consciously chosen inclination. Even as a young man Kushi apparently was almost uncannily patient and unflappable. During the first part of his stay in America Kushi received a particularly abusive letter from Ohsawa. He lost his temper, tore up the letter and wrote Ohsawa an angry reply. Ohsawa returned: 'I am so happy to learn that even you too can become angry.' The letter had been a test! Those who worked and studied with Kushi in Boston had to learn to deal with various, often disconcerting traits. He preferred to work late into the night and to rise late in the morning. He tended to be late for appointments or to forget them entirely. His business decisions were often inscrutable as well as ill-fated.

But his patience and kindness were unfailing.

“Kushi pursued these roles of teacher, guide and confidante with utter dedication. Like Ohsawa, he committed his time and energy totally to his mission. He pursued and seemed to thrive on a demanding schedule of lectures, meetings and consultations. Almost a classic case study of the ‘workaholic,’ he took no days off and, while lavishing time and energy on his students and their projects, had little time for his own children. He took no vacations. Once several students impelled Kushi to drive with them to the coast of Maine. When they pulled up to a rocky beach, Kushi remained in the car smoking a cigarette while the others gambolled by the water. ‘So this is a vacation?’ he observed quizzically when they returned. Kushi’s chief recreation seemed to be regular forays to the local coffee shop.”

Page 174: “In 1975 the first residential summer program was held at Amherst College.”

“In 1977 the Kushi Institute was established in Brookline. The Kushis rented and renovated large quarters in a substantial brick building to house this ongoing school for macrobiotics. A three-level program was set up.

Page 175: In 1975 “Michio made his first lecture trip to Europe. His seminar ‘The Principles and Practice of Oriental Medicine’ held at the Tara Hotel in London was attended by about 500 people. In the following years he made several trips each year.”

“While macrobiotics was spreading geographically from Boston, it was also spreading socially. That is, it was gaining a wider respectability and was being adopted by many older people and by others not associated with the youthful ‘counterculture.’ Several factors helped this process. One was the increasing acceptance by the medical community of the macrobiotic diet as nutritionally safe, and even as effective against illness. From early in his teaching career Kushi took every opportunity to present the case for macrobiotics to doctors and health professionals. He met often with individual physicians and appeared frequently before medical groups. These efforts began to bear fruit as early as 1972 when Dr. Frank Sacks and Dr. Edward Kass of Harvard Medical School did a study [published in 1974] of the effect of macrobiotic eating on blood cholesterol levels. They found that a sampling of macrobiotic people in Boston had optimally low cholesterol levels and thus hypothetically would be less prone to heart disease. Still, progress was slow. By the mid-1970s, though, there was a small but committed group of physicians who practiced and supported macrobiotics. This group included Drs. Mark Hegsted, Keith Block, Robert Mendelsohn and Christiane Northrup. Even Dr. Stare, the movement’s one-time nemesis, was enough convinced by Kushi’s broad presentation of the diet to allow that macrobiotics could be a sound nutritional regime. The image of macrobiotics as the ‘killer diet’ gradually disappeared from the medical community and thus largely from the popular press.” Address: PhD, Hanover,

New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

1586. Mitz, Bea. 1985. The joy of soy. *Total Health (California)*. Sept. p. 55-56.

• **Summary:** An overview that contains photos of products made by Legume (Tofu Stuffed Shells Provencale), Loma Linda (Ocean Fillets, Griddle Steaks), Worthington Foods (Tofu Topper), Eden Foods (Edensoy), plus Tofutti and Tofulite (made by Barricini).

1587. *Natural Foods Merchandiser*. 1985. Erewhon remodels, sales grow 53% to \$4 million. Sept. p. 1, 61, 64, 67.

• **Summary:** In 1776 Boston helped start the American Revolution. In April 1966 it helped start the natural foods revolution, when Erewhon opened for business. Three and a half years ago Erewhon filed for Chapter 11 bankruptcy. But today a revitalized Erewhon Trading Company, which operates three retail stores in the Boston area, has seen sales jump 53% to \$4 million.

A small color photo shows Erewhon’s Cambridge store which produces \$1.3 million annual sales in just 1,500 square feet of selling space.

1588. *Vegetarian Journal*. 1985-. Serial/periodical. Baltimore, Maryland: Vegetarian Resource Group. Editors: Debra Wasserman and Charles Stahler.

• **Summary:** Continues: *Baltimore Vegetarians Newsletter* and its numbering. Starts with Vol. IV, No. 9 (Sept. 1985). Focuses, as its subtitle states, on health, ecology, and ethics, plus recipes, world hunger, and animal rights.

Ulrich’s International Periodicals Directory 1990-91 states that the circulation is 4,000. Does book reviews. VRG is located at P.O. Box 1463, Baltimore, Maryland 21203. Phone: 301-752-8348. Editors: Debra Wasserman and Charles Stahler. Form filled out by Debra Wasserman. 1992. June. The circulation is now 25,000. It is published bimonthly (once every 2 months). “In Sept. 1985 (Vol. 4, No. 9), *Baltimore Vegetarians Newsletter* became *Vegetarian Journal*. In June 1989 (Vol. 8, No. 6), the publisher’s name changed from Baltimore Vegetarians to The Vegetarian Resource Group in 1990—because the group had so many members outside Baltimore. The Newsletter began as a typewritten 2-sided 11 x 17-inch piece (4 pages). It then gradually became a 16-page newsletter, until Jan/Feb. 1990 when it became a 36-page journal. We focus on health, ecology, and ethics related to vegetarianism. Nutrition articles are written and/or reviewed by dietitians and doctors. We try to focus on practical information and original research.”

Charles Stahler adds: The new name of The Vegetarian Resource Group was accepted in 1989 by Arnie Alper, MD, Ernest Kopstein, MD, Reed Mangels, PhD, RD, Charles

Stahler, Debra Wasserman, Anadi Naik, Carole Hamlin, Cindy Blum, Michael Blum, Audrey Fluke, Norris Fluke, and Barbara Lovitts. Karen Lazarus, MD, participated in discussion and creation of the name. She vetoed Vegetarian Resource Center since she thought that implied a medical center.

Contents of Vol. IV, No. 9—the first issue titled “Vegetarian Journal.” 10,000 copies were printed. Letters to the editor (incl. Michael Klaper, M.D., Florida). Information on Oct. 6 conference. Cooking classes. Meatless recipes. Animal products and their alternatives. What are the sources of casein, gelatin, musk, palmitic acid? Beluga whales (release them!). Alternatives to the 4 food groups. Note: This issue contains 12 ads for places to eat or shop. Address: P.O. Box 1463, Baltimore, Maryland 21203. Phone: (410) 366-VEGE.

1589. Brody, Jane E. 1985. Organic farming moves into the mainstream. *New York Times*. Oct. 8. p. C2.

• **Summary:** Discusses the work of the Rodale Research Center in Kutztown, Pennsylvania, and its “regenerative” agriculture techniques. The main focus of this research is finding economically viable ways that farmers can switch from conventional to organic farming. Weed control is another focus. Legumes are widely used for erosion control.

Rodale researchers deplore the attention being given to so-called “conservation tillage,” in which land is not plowed to reduce erosion, but lots of herbicides are used to keep the weeds down. This technique is being promoted by the herbicide manufacturers.

The conventional approach of modern agriculture is to dominate nature; But the Rodale approach is to try to work with nature. Address: Staff.

1590. Engel, Margaret. 1985. Relaxation and rice: Its mind over body at Natural Foods Expo. *Washington Post*. Oct. 27. p. G4.

• **Summary:** This Expo is a four-day gathering in Washington, DC, of 5,000 food manufacturers who are selling “everything from soy-burgers to no-sugar candy bars” and even “tofu hot dogs.”

1591. *Natural Foods Merchandiser*. 1985. Over 3,000 supermarkets now have natural foods sections. Oct. p. 18-19.

• **Summary:** Safeway, America’s largest supermarket chain, accounts for 950 of the 3,000 sections. In 1982, only 1,500 American supermarkets had natural foods sections.

1592. *Vegetarian Times*. 1985. USDA report gives portrait of natural food industry. Oct. p. 8.

• **Summary:** “In 1970, approximately 1,000 ‘health food’ stores were in operation. By 1983, this figure had grown to 10,975 (about 7 percent of all U.S. grocery stores), according to a U.S. Department of Agriculture report on the natural

foods industry. Sales have increased from approximately \$140 million in 1970, to an estimated \$3.3 billion in 1983 (about 1.2 percent of total grocery sales). This figure is expected to hit \$5.3 billion this year and \$12 billion by 1990... Nonfood items now account for about half of store sales—down from two-thirds in the early ‘70s.”

1593. Sugarman, Carole. 1985. Selling what comes naturally: From whole grains to tofu mayonnaise, health foods have hit the mainstream. *Washington Post*. Nov. 3. p. K1-K2.

• **Summary:** Mentions: Westbrae, Fantastic Foods, Second Generation Tofu Products. Address: Washington, DC.

1594. Sands, David R. 1985. A generous taste of natural foods: Industry holds first [Washington] D.C. expo. Tofabulous. *Business Review (Vienna, Virginia)*. Nov. 8. p. 7, 28.

• **Summary:** Soyfoods were the hit of the show. Address: Staff writer.

1595. Bennett, Gordon; Snyder, Steve. 1985. Soymilk standards: First draft. Emeryville, California. 11 p. Nov. Unpublished manuscript. 28 cm.

• **Summary:** Contents: Purpose of standards. General definition of soymilk: History, terminology, types of soymilk. Plain soymilk (traditional and new type): Ingredients, manufacturing process, varieties and nomenclature according to consistency, varieties and nomenclature according to method of growing soybeans (organic soymilk), varieties and nomenclature according to protein ingredients (soybeans, isolated soy proteins, etc.), varieties and nomenclature according to fat content, soymilk with (dietary) fiber, pasteurized soymilk.

Dairy-like soymilk (traditional and new type): Note: Each of the following have all or many of the same subcategory headings as for Plain Soymilk. Dairy-equivalent soymilk (traditional and new type). Infant formula soymilk. Blended soy beverages. Flavored soy beverage.

Labeling and advertising of soymilk: General, statement of identity, ingredient labeling, use date labeling, refrigeration information labeling, bulk products, substantiation of advertising claims. Microbiological guidelines for soymilk. Endorsement: “Seal of Soymilk Integrity.” Soymilk Standards Committee: Adoption and amendment of standards.

Gordon Bennett took the lead in creating an Ad Hoc Soymilk Group and in compiling these standards, which were based on and modeled after the tofu standards developed during the previous year. Bill Shurtleff of Soyfoods Center, who compiled the tofu standards and served as a consultant for these standards, is listed on the front page as a “Source.” Address: 1. Westbrae Natural Foods, Emeryville, California; 2. Vitasoy (USA) Inc., San Francisco, California: Both: Ad Hoc Soymilk Group.

1596. Bush, Larry C. 1985. Fermented foods: Tasty toner uppers. *Total Health (California)*. Nev. p. 40-41.

• **Summary:** An overview with a large color photo showing packages of: Miso-Cup, Westbrae Natural Shoyu, Westbrae Natural Johsen Double-Brewed Shoyu, Westbrae Natural Traditional Tamari Soy Sauce, Westbrae Natural Instant Miso Soup, Westbrae Natural Mild Soy Sauce, Erewhon Shoyu Tamari, Erewhon Hatcho Miso, Premier Japan Rice Miso, Premier Japan Mugi Miso, Premier Japan Takuan, Premier Japan Umeboshi, and Premier Japan Pickled Ginger.

1597. Ozora, Colleen. 1985. Of Granum and macrobiotics: A visit with Blake Rankin. *Macrobiotics Today (Oroville, California)*. Nov. p. 3-7.

• **Summary:** In 1969, while a student at UCLA, Blake Rankin came in contact with Erewhon—Los Angeles. After graduation from UCLA he and several friends set up a small health food store in Victoria, BC, Canada. Then he spent 3 months in Boston living in a Kushi study house and working in an Erewhon warehouse. Back in Seattle, he worked at Spiral Foods, an offshoot of Chico-San. Shortly after that he and George Gearhart, the proprietor, closed the store and in 1972 opened a wholesale company, Janus Foods. It was successful. [Note: Miso and shoyu, imported from Japan, were among the company's best-selling products.] After 2 years Rankin left and went to Japan for 6 months, where he traveled with Mitoku and Muso. Mr. Kazama, a friend of Aveline Kushi's brother, had not been in the food business before starting Mitoku. Then he went to Nepal and India on a spiritual search. In late 1973 he returned to Seattle and worked for Janus. Then he returned to Japan where he worked for Mitoku and studied calligraphy. In Japan he met his future wife, Yoko. Returning to Seattle, Rankin started Granum in 1981 as a distributor and importer for Mitoku products from Japan. Now the import company has a small retail store and a 10,000 square foot warehouse. Expected 1985 gross is more than \$500,000.

This article contains numerous photos of Blake and Yoko Rankin, and their two children. Address: GOMF, Box 426, Oroville, California 95965.

1598. *SoyaScan Notes*. 1985. Chronology of soybeans, soyfoods and natural foods in the United States 1985 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 2. The soybean crushing industry begins a year of major restructuring as the big get bigger and two pioneers drop out. Ralston Purina announces that it has sold six of its soybean crushing plants to Cargill, Inc. A seventh at Memphis, Tennessee, was closed. This removed the company from the soybean commodity business. With this transaction Cargill passes ADM to become America's largest soybean crusher.

Jan. 3. "Myth or Miracle: Debunking the Tofutti Fad," by Mark Medoff published in *Whole Life Times*. The first exposé of Tofutti, which contains very little tofu. Jan. 13 Medoff appears on the Gary Null Show, Natural Living, to discuss his findings for 1 hour on prime time radio.

1985 Jan. 12. A.E. Staley Manufacturing Co. announces that it is basically getting out of the soybean crushing business. It has sold five of its six soybean plants (having a combined crushing capacity of some 275,000 bushels daily) to Independent Soy Processors Co., which is closely affiliated with Archer Daniels Midland. Staley was unable to sell its Decatur facility, which ceased operations indefinitely in Jan. 1984. With this transaction ADM has probably regained a slight lead as America's largest soybean crusher.

Jan. 14-26. Soybean Utilization Workshop held at Soyfoods Research Center in Gannoruwa, Peradeniya, Sri Lanka, sponsored by the Sri Lanka Soybean Project and INTSOY. 24 representatives from 12 developing countries participate. The world's first event of its kind (*Soyanews*, Dec. 1985).

Jan. 25-27. Natural Foods Expo at Anaheim. Soy ice creams steal the show. Tofu standards are debated heatedly at Soyfoods Association board of directors meeting on Jan. 28, especially by Ralston Purina attorney. Board decides funds are too limited to try to hire an executive director for SAA. Jan. 31. Paul Obis, founder and editor of *Vegetarian Times*, is seriously considering buying *Soyfoods* magazine from Doug Fiske. He makes a firm offer in late March.

Feb. "Designer Beans," an excellent overview of the U.S. soyfoods movement and its gourmet connections by Sandy MacDonald, published in *New Age* magazine.

Jan. American Soybean Association introduces SIS (Soybean Information Service), a computerized database focusing on soybean production and marketing, and oil and meal. The earliest record is 1958.

Feb. 21. *Tofutti and Other Soy Ice Creams: Non-Dairy Frozen Dessert Industry and Market*, by Shurtleff and Aoyagi published by The Soyfoods Center. Two volumes, 352 pages. This is the first study of the rapidly emerging soy ice cream market, and of Tofutti.

Feb. 27. "Tofu Products May Be In, but Its Fans Wonder if There's Tofu in the Products" by Trish Hall published in *The Wall Street Journal*. Second major exposé on so-called "tofu ice creams" (such as Tofutti and Gloria Vanderbilt Glace), which contain only a token amount of tofu, as a marketing gimmick.

March 13-14. The theme of the Feb. 27 *Wall Street Journal* article picked up by the NBC evening news and the Today Show. Very positive coverage for tofu. Gary Barat of Legume, David Mintz of Tofu Time, and Gloria Vanderbilt each speak about tofu.

March 22. *The Book of Tempeh*, extensively revised second edition by Shurtleff and Aoyagi, published by Harper & Row. New bibliography (374 entries), history chapter, and

list of tempeh producers.

March 26. Soyfoods Association's Tofu Standards (7th draft) presented to eight senior officials at the U.S. Food and Drug Administration's Center for Food Safety and Applied Nutrition, in Washington, DC, by Tom Timmins (Head of SAA Standards Committee), Gary Barat (President of SAA), Steve McNamara and Tom Donegan (SAA Food & Drug attorneys). The FDA group hears an hour long presentation on tofu, the standards, and the Soyfoods Association of America.

March. Soyarella (later renamed Soy Mozzarella), a tofu-based cheese, is introduced. It becomes an instant hit. Distributed by Neshaminy Valley Natural Foods of Huntingdon Valley, Pennsylvania, it is labeled as "non-dairy," yet it melts, and it tastes like cheese. Shrouded in secrecy, its manufacturer is unknown and the ingredients are questionable. It is sold in large blocks and labeled at individual stores.

March. American Soybean Assoc. launches a campaign among its members to write USAID and encourage them to cancel support for U.S. programs (such as INTSOY) aiding soybean production in Third World nations. The campaign is successful.

April 1. INTSOY signs a new cooperative agreement with USAID. Their work will henceforth focus on soybean utilization. The shift toward utilization began in 1983 and all work on soybean production and varietal development stopped in Aug. 1986.

April. *Tempe: An Annotated Bibliography*, compiled by Siagian and Sofia in Indonesia. Containing 273 references, it is the first bibliography to introduce the extensive Indonesian-language research on tempeh, the majority of which has been published since 1980.

April 15-16. International Symposium on Tempeh held in Jakarta, sponsored by the Indonesian Ministry of Health. 113 people attend.

April. Central Soya buys Griffith Laboratories' line of protein products.

May 31. Barricini Foods acquires Farm Foods, which then becomes a trade name for Barricini's natural / health foods line of non-dairy frozen desserts, including the pioneering product, Ice Bean, and Barricini Tofulite.

May. Morinaga, one of Japan's largest dairy companies, establishes Morinaga Nutritional Foods, Inc., a subsidiary with offices in Los Angeles, to focus on promoting their long-life silken tofu in America.

May. At the 6th Annual *Natural Foods Merchandiser* Merchandising Awards, soyfoods do well. Miso Mustard by American Natural Foods and Malted by Westbrae win gold medals. Ah Soy by Great Eastern Sun wins a silver.

May. Soft Tofu Cheese, a non-dairy cream cheese cultured in miso, launched by Simply Natural, Inc.

June. Tofu Topper launched by Worthington Foods.

June. Ralston Purina publishes its 1985 Consumer

Attitudes Monitor. Soy Protein in Foods, based on a nationwide survey of 628 adults. Indicates positive attitudes toward soy protein and soyfoods.

July 19. Shamrock Capital, a private company headed by Roy Disney, buys Central Soya, a publicly owned corporation. Agreement to buy was announced April 2.

July. Soy Supreme, spray-dried tofu powder, launched by Oberg Foods Div. of St. Peter Creamery.

July. Asian Symposium on Non-Salted Soybean Fermentation held at Tsukuba, Japan.

July 31. Tofu Time's sales of Tofutti increased more than sevenfold last year to \$17,114,886 as compared with \$2,361,391 for the previous year. Net income increased nearly 100-fold to \$2,006,451.

July. New Gallup survey on vegetarianism of 1,033 Americans shows that millions are eating less meat and tens of millions agree with the move away from meat. 72% disagree with what used to be the standard notion: "The vegetarian diet is just a fad that will pass." A majority (52%) believe that "no one really needs to eat meat more than once or twice a week."

Aug. The DE-VAU-GE soymilk plant in West Germany starts production. Built by STS, with 4,000 liters/hour of soymilk capacity, they make Granose and GranoVita brands of soymilk.

Aug. Lightlife Meatless Tofu Pups (hot dogs) introduced by Tempehworks / Lightlife Foods of Greenfield, Massachusetts. The product sold nearly \$250,000 in the next 10 months.

Sept. Soyfoods Center introduces SOYA, a computerized bibliographic database on soybean utilization, history, nutrition, processing, marketing, and production. Contains 18,500 references from 1100 B.C. to the present.

Sept. 30. Fearn Natural Foods in Illinois is sold by Louis Richard to Modern Products, Inc. in Milwaukee, Wisconsin.

Sept. 30 to Oct. 4. Tropical Soybean Workshop held at the International Institute of Tropical Agriculture (IITA), Ibadan, Nigeria. Proceedings are published in 1987 as *Soybeans for the Tropics*. Also this year IITA established a soybean utilization unit.

Sept. Tofulicious, a tofu-based non-dairy ice cream launched by Eastern Food products of Minneapolis. It was developed in conjunction with the University of Minnesota and funded by the Minnesota Soybean Research and Promotion Council. By 1986 it has become the first soyfood product in recent times to be actively promoted by state soybean associations, who sell it at many state and county fairs... where it is a big hit. Through Tofulicious many soybean growers begin to warm up to soyfoods.

Oct. 8th Draft of the Tofu Standards finished, incorporating extensive suggestions from FDA. Compiled by William Shurtleff.

Oct. Mori-Nu brand aseptically packaged tofu introduced by Morinaga Nutritional Foods.

Oct. Cream of the Bean Soygurt, a cultured soymilk yogurt, launched by Cream of the Bean, Inc.

Nov. Kikkoman introduces a long-life tofu in a foil retort pouch, imported from Japan. Poor quality causes the product to be withdrawn. It was re-introduced later.

Dec. Tofu Time starts exporting Tofutti to Japan. The first order by Daiei (a large retailer) of tubs for their parlors, is \$350,000. This may be the first major export of a soyfood product (not including ingredients such as soy protein isolates) to Japan.

* The International Institute of Tropical Agriculture (IITA) in Ibadan, Nigeria, starts a program to promote processing and utilization of soybeans in Nigeria and throughout Africa. Continued.

1599. *SoyaScan Notes*. 1985. Chronology of soybeans, soyfoods and natural foods in the United States 1985 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. 1985 New Trends:

Dramatic Rise of Tofutti and Other Soy Ice Creams. 1985 will go down in the soyfoods history books as the “Year of Tofutti.” Never before in history of the United States has any soyfood product achieved such widespread and sudden popularity or notoriety.

During 1985 at least 50 brands of soy ice cream (many with “Tofu” on the label) were on the market worldwide, most in the USA. And many were made by America’s biggest dairy companies. An estimated 2.5% of all frozen desserts except novelties (popsicles, bars, etc.) sold in supermarkets were soy-based nondairy. The result of all this was to introduce tofu and isolated soy proteins to millions of people in a very positive context.

But many of the companies that sold so-called “tofu ice creams,” while emphasizing tofu in their product names and marketing programs, actually had surprisingly little (if any) tofu in their products. In fact they contain so little that this marketing gimmick might be misbranding and a deliberate deception of the consuming public.

Rise of Soyfoods in Europe. Thanks to the Belgian Office of the American Soybean Association (ASA), and specifically to the efforts of Michael Martin, Europe’s growing soyfoods movement is starting to become organized and active. In March 1984 Martin launched Europe’s earliest known soyfoods newsletter, *Soya Foods*, and in September organized the First European Soyfoods Workshop, for which bound proceedings were published. This is the first time in recent decades that ASA has promoted soyfoods (other than soy oil) in the Western World. The strong U.S. dollar has led to a recent dramatic decline in imports of soybeans and soybean meal to Europe for feed and oil use (European rapeseed and sunflowerseed are being substituted), so the ASA is exploring new outlets where soy is unique.

The launching of tofu production and marketing by

Switzerland’s biggest supermarket chain, Migros, and by Galactina, a large and respected maker of dietetic and pharmaceutical products (including soymilk) is a landmark for tofu in Europe. In early January, *Tages Anzeiger*, one of Switzerland’s biggest newspapers, had a special report on tofu, followed on Jan. 9 by a 30-minute TV feature on tofu.

The total number of soyfoods companies in Europe continues to show a steady increase. Many of these are being founded by people interested in macrobiotics. By Jan. 1985 there were 1,113 names in The Soyfoods Center’s computerized mailing list of people actively involved with soyfoods in Europe.

At the 1984 ASA soyfoods workshop, Martin reported the following estimates of annual European soyfoods consumption: A table with three columns shows: Soyfood name, consumption, percentage of U.S. consumption.

Soy oil—1.7 million metric tons—38%

Modern soy protein products—40 million kg—28%

Soymilk—9 to 10 million liters—7%*

Tofu—5 to 6 million kg—22%

Tempeh—400,000 to 500,000 kg—50%

Miso—250,000 to 300,000 kg—11%

* U.S. figure includes soy based infant formulas.

European figure is not clear on this point.

Note that the population of the USA is about 234 million compared with 489 million for all of Europe (not including the USSR), but 237 million for Northern and Western Europe, where most of these products are consumed.

Rapid Growth of Second Generation Soyfoods. In the 1984 edition of this book, we stated that the three fastest growing soyfoods in the USA (in terms of production increases) were tempeh (33% a year compound annual growth rate), tofu (15%), and soy sauce (14%). But now the picture has changed. In 1984 the fastest growing category was second generation products, ready-to-eat, all-American preparations, especially those based on tofu. The leader in this group is clearly soy ice creams (led by Tofutti), with a production growth rate of roughly 600% a year for the past 1-2 years. Then comes convenience tofu-based entrees such as Legume’s products, tofu burgers and tofu burger mixes, and the like. This is the number one way that soyfoods are now entering the mainstream American diet. And the biggest gains are being made by marketing companies, rather than manufacturers. The second fastest growing category may now be imported soymilks, growing at about 40-60% a year. Major New Capital Influx. The following is a brief summary of new capital influx to the soyfoods industry: A table with four columns shows: Company name, date of offering, \$ amount, equity or debt; use.

Legume—Oct. 1982—\$100,000 net—Equity. For tofu frozen entrees

Legume—Oct. 1982—\$100,000—Debt. For tofu frozen entrees

Legume—Nov. 1983—\$400,000 net—*Equity. For tofu

frozen entrees

Legume–Nov. 1983–\$200,000–Debt. For tofu Frozen entrees

Hinode Tofu–Nov. 1983–\$2,500,000–Equity For general expansion

Tofu Time–Dec. 1983 \$2,760,000 net–Equity. For soy ice cream

Tempehworks–July 1984–\$265,000–Debt. For tempeh expansion

Legume–Feb. 1984–\$200,000–Debt. For tofu frozen entrees

Legume–Aug. 1984–\$1,248,000 net–Equity. For tofu frozen entrees

Brightsong–Dec. 1984–\$500,000–Equity. For tofu products

Legume–April 1985–Expecting lots more. For tofu frozen entrees

White Wave–Expecting.

Note: Equity = Sale of equity ownership in the company via stock in a public offering or in a private placement. Debt = Debt financing by taking out a private loan.

How have these companies fared? Tofu Time has done spectacularly well. The value of the company has increased more than five-fold since Dec. 1983, and profits are excellent. Legume, a marketer of low-calorie, cholesterol-free frozen entrees featuring tofu, has had the hardest sledding. A preliminary prospectus by Huberman Margaretten & Straus dated 5 June 1984 stated that from its inception through 31 March 1984, the company incurred aggregate losses of \$709,773, including a loss of \$18,465 in 1982, then \$225,302 in 1983, increasing again to roughly \$486,500 in 1984. Legume's common stock had a negative book value; 1984 sales were "a little less than \$1 million." Yet the company has excellent products and in early 1985 landed some big food chains, which could help its bottom line considerably.

Growing International Interest in Tempeh. During 1983-84 Japan became a major tempeh producer. By May 1984 the world's largest tempeh producing company was Marusan-Ai (of Japan), which made 15,150 lb. a week. New marketing and production techniques were pioneered. The full story was described by Shurtleff and Aoyagi in *Tempeh Production* (1984).

Three Major International Symposia Featuring Tempeh were held: 15-16 April 1984 in Jakarta, Indonesia; 15-17 July 1984 in Tsukuba, Japan; and May 1986 in Honolulu, Hawaii. A special 13-day group study tour on Japanese Food Fermentations, led by Dr. Keith H. Steinkraus, has been organized by the Japanese-run, New York-based Technology Transfer Institute. Tempeh continues to be one of the fastest-growing soyfoods in the USA.

Growing Interest in Spray-Dried Tofu. Eleven articles were published this year on a product that promises to revolutionize the tofu industry. The first and largest

manufacturers (St. Peter's Creamery and Clofine) are both dairy companies. Spray dried tofu should appeal to the food industry, since it is easy to ship, store, and process.

Dairy Magazines Publishing Many Positive Articles About Soy-Based Dairylike Products. Traditionally the dairy industry has seen dairy analogs as a threat and fought to oppose them. The decades-long struggle against margarine is a good example of this. But now, many small dairies, struggling to survive, are looking for new products. A number (such as St. Peter's Creamery and Clofine) have gained a new lease on life by starting production of soyfoods.

Major Changes in the U.S. Soybean Crushing Industry. Narrow crushing margins, a depressed export market for U.S. soybean meal, and poor profitability have led two of America's biggest soybean crushers, the A.E. Staley Manufacturing Company and Ralston Purina, to decide to get out of the soybean crushing business in Jan. 1985. Clearly they view poor profitability as a long term problem, and plan to diversify away from unpredictable agricultural commodities toward the "value added," retail end of the nation's food supply. Staley, in effect, sold its plants to ADM and Ralston Purina sold its plants to Cargill. In Nov. 1984 Staley acquired CFS Continental, Inc., the nation's second largest supplier to the foodservice industry. Staley, previously the oldest existing soybean crusher in America (since 1922), now relinquishes that honor to ADM. ADM is now the largest soybean crusher in America, but Cargill (which has many overseas plants) is the biggest in the world. These changes have led to a concentration of control in the U.S. soybean crushing industry. Both Staley and Ralston Purina plan to keep their edible soy protein (isolates, concentrates, etc.) operations.

Biotechnology is Emerging as a Major, Promising Factor in future soybean breeding development. Some agricultural experts are predicting that it could usher in the latest agricultural revolution, following the agricultural revolution of the 1940s and the Green Revolution of the 1960s and 1970s.

The "Calcium Craze" Starts in America, aiding sales of tofu (curded with calcium sulfate), which is one of the best non-dairy sources of calcium.

1600. Johnson, Kirk. 1985. The Edensoy-FDA saga: A misleading claim about Eden's top product led to a pamphlet recall. *East West Journal*. Dec. p. 30, 32-35.

• **Summary:** Chronology of events: 1984 March 2–The FDA (U.S. Food and Drug Administration) informs Eden Foods, in a strongly worded letter, that it considers eleven claims in a promotional pamphlet for Edensoy to be erroneous. The FDA advised that the "Good for Babies" section of the pamphlet be deleted. Indeed the agency was so worried about the possible impact of the pamphlet that it asked Eden to stop distributing it, a request to which Potter agreed.

Exactly what happened next is unclear. The FDA says

it has invoices proving that Eden continued to distribute the pamphlet. Potter admits that “eight or nine” of the pamphlets did leak out.

1985 June 14—The FDA informs Michael Potter that a six-month-old child in Canada had become seriously ill after being fed the company’s soymilk as an infant formula. The mother said her decision to forgo regular infant formula was inspired by Eden’s own literature—the promotional pamphlet cited above which said that Edensoy was “Good for Babies.” For Eden, a company with 40 employees, the news came at a bad time since the company was geared up to begin a national promotion of its soymilk starting June 15—the very next day. By this time the come had sold some 18 million foil pouches of Edensoy. Eden took the position: “There’s a problem and were responsible for it.”

1985 June 23—Eden Foods voluntarily mails 10,686 requests for a recall of the pamphlet to its distributors and to individual retail stores. The company also agrees to insert a statement on the Edensoy label warning that the product is not to be used as an infant formula or as a sole source of nutrition. Until new labels could be printed, Eden Foods would mail red on white warning placards to be placed on store shelves where Edensoy is sold.

1985 Sept. 1—Sales and Edensoy for the last 2 months (July and August) were 50% higher than normal, thanks to a summer discount promotion. A photo shows Eden’s Michael Potter.

1601. Product Name: Tree of Life Spaghetti Sauce with Tofu.

Manufacturer’s Name: Tree of Life, Inc. (Distributor).

Manufacturer’s Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1985 December.

New Product—Documentation: Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in Dec. 1985.

1602. Great Eastern Sun. 1985. All About AhSoy—The Really Soft Drink (Leaflet). Enka, North Carolina. 1 p. Front and rear. 28 cm.

• **Summary:** Questions and answers about this soymilk. It is made by San-iku Foods in Japan. “It drinks like a shake—and you can use it to bake.” Address: Enka, North Carolina.

1603. Herman Aihara in California in about 1985 (Photograph). 1985. Undated.

• **Summary:** Herman Aihara was born in southern Japan and raised in Tokyo from age nine. He received a bachelor’s degree in metallurgical engineering from the reputable Waseda University in 1942. He met George Ohsawa at that time and became interested in Ohsawa’s philosophy. Herman moved to the United States in 1952 and began teaching macrobiotics in New York City in 1960. He was the first

elected president of the Ohsawa Foundation of New York. Herman moved to Chico, California in the fall of 1961 and continued his work with the west coast Ohsawa Foundation along with working for Chico-San, the first macrobiotic producer and distributor of macrobiotic foods in the United States, in 1962. He resigned from both and founded the George Ohsawa Macrobiotic Foundation in 1971 in San Francisco and moved to Oroville, California in 1974 and founded the Vega Institute, a residential study center, later that year. Herman is author of *Acid and Alkaline* in 1971, *Learning from Salmon* in 1980, *Kaleidoscope* in 1986, and many other titles. He is pictured here at the Vega Study Center in Oroville, California around 1985.

1604. Product Name: Soy “M” Non-Dairy Soy Milk [Carob, or Plain].

Manufacturer’s Name: H.V. Natural Foods (Distributor).

Manufacturer’s Address: Los Angeles, CA 90021.

Date of Introduction: 1985.

Ingredients: Plain: Pure filtered water, organic soybeans, soya oil, honey. Carob: Same plus carob and vanilla as last 2 ingredients.

Wt/Vol., Packaging, Price: 15 fluid oz (444 ml). Pure-Pack carton. \$1.25 plain. \$1.39 carob.

How Stored: Refrigerated.

Nutrition: Plain: per cup (8 fl. oz.): Calories 130, protein 2 gm, carbohydrates 17 gm, fat 5 gm, sodium 55 mg, potassium 120 mg. Carob: Calories 160, carbohydrates 12 gm.

New Product—Documentation: Labels. 1985, dated. 2.75 by 4 inches by 2.75 wide. Paper carton. Carob: White and tan on dark brown. Plain: White and light blue on dark blue. Glass of soy milk illustration. “From organically grown soybeans. Refreshing lite beverage. Drink it like milk. Use on cereal (plain) or in shakes (carob). Cholesterol free. No refined sugar added.” H.V. stands for “Health Valley.”

Talk with George Mateljan, founder of Health Valley. 1985. Oct. 20. Soy “M” is made in Los Angeles. Health Valley was founded in 1970. Hain was much earlier. Soyfoods Center product evaluation. One of the best soymilks we have ever tasted.

1605. Product Name: Soy Beans, Green Soybeans (Organic).

Manufacturer’s Name: Laurelbrook Foods.

Manufacturer’s Address: Bel Air, Maryland.

Date of Introduction: 1985.

Ingredients: Whole dry soybeans.

Wt/Vol., Packaging, Price: 1 lb.

How Stored: Shelf stable.

New Product—Documentation: One Label for each product sent by Margy Coates. 1992. March. Each weighs 1 lb and is “Packed and distributed by Laurelbrook Foods.” Soy Beans (Green ink on tan paper). 4.37 x 2.75 inches. “Dried

Beans are a rich source of nutrients, especially valuable as an economical, vegetable-protein food. Use alongside whole grains or seeds in soups, salads, burgers, stews and spreads. For easy digestion of the harder Beans, remember to soak them at least 3 hours or overnight and discard the soaking water. Use fresh water for cooking.”

Green Soybeans (Black ink on light beige paper). 4.25 x 2.63 inches. “These are easy cooking good eating soybeans, organically grown by local farmers. To prepare: wash and soak overnight. Drain and cover with water, then simmer (without salt) ‘till soft (just 2 or 3 hours). Substitute these beans for regular field beans in your favorite soybean recipe. They’re grown especially for people food.”

Note: This is the earliest document seen (June 2013) that contains the phrase “discard the soak” or “discard the soaking water”—in order to reduce the intestinal gas caused by sugars in beans, without losing essential nutrients. Then cook the beans in plenty of fresh water.

1606. Product Name: Westbrae Natural Johsen Double-Brewed Shoyu.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985.

Ingredients: Water, whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 5 fluid oz (146 ml).

New Product–Documentation: Bush, Larry C. 1985.

“Fermented foods: Tasty toner uppers.” *Total Health*. Nov. p. 40. A color photo shows the small bottle.

Label. 1986, undated. 6.5 by 3.5 inches. Paper. Orange, brown, blue, green, yellow and white. “Unique ‘4 year’ flavor. Westbrae exclusive 1984 pressing. Brewed once... then brewed again. 30% less salt than regular shoyu.”

1607. Product Name: Westbrae Natural Teriyaki Sauce.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985.

Ingredients: Johsen Shoyu and double-brewed shoyu (water, soybeans, wheat, salt), Sendai red miso (soybeans, rice, water, salt), rice vinegar, apple juice, tomato puree, Mirin (water, rice), rice malt (rice, malted barley), onions, black pepper, garlic, ginger, allspice, red pepper, natural gum stabilizers (tragacanth, xanthan).

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1986, undated. 5 by 3.5 inches. Paper. Orange, white, blue, green, black. Mt. Fuji logo. “Westbrae’s Teriyaki Sauce is thick, so it can be used American-style like barbecue sauce or catsup.”

1608. Diamond, Harvey; Diamond, Marilyn. 1985. *Fit for life*. New York, NY: Warner Books. xiv + 341 p. Index. 24 cm. Paperback edition published Feb. 1987. 316 p. [204* ref]

• **Summary:** Contents: Part I—The principles. Introduction. 1. Diets don’t work. 2. Natural hygiene. 3. The natural body cycles. 4. The theory of metabolic imbalance. 5. The principle of high-water-content food. 6. The principle of proper food combining. 7. The principle of correct fruit consumption. 8. The theory of detoxification. 9. Protein. 10. Dairy products. 11. Exercise. 12. You are what you think you are. 13. The most frequently asked questions. Part II—The program. Introduction. 1. Breakfast. 2. Fresh juices. 3. The energy ladder. 4. The *Fit for Life* shopping list. 5. The main-course salad. 6. Life-style guidelines. A four-week example of the fitness life-style. In conclusion. Bibliography.

The only references to soy or soyfoods in the index are: Miso (p. 175; Cold Mountain, Eden, Westbrae), Soy sauce and Tamari sauce (p. 176; low-sodium—Eden, Soken, Westbrae). The text mentions Tofu Sauce (Westbrae). The authors (who live in semi-tropical Los Angeles) advocate high consumption of fruit, and are apparently unaware of tofu and tempeh. The book is near vegetarian but includes the use of fish, seafood, chicken, and turkey (p. 173-74, 237). It advises against the use of dairy products.

The paperback edition announces: “America’s all-time #1 health and diet book! Over 3 million copies in print!” Address: Pasadena, California.

1609. Duhon, David; Gebhard, Cindy; Jeavons, John; Stoner, Gary. 1985. *One circle: How to grow a complete diet in less than 1000 square feet*. Ecology Action, 5798 Ridgewood Rd., Willits, CA 95490. 200 p. Illust. No index. 28 cm. [27 ref]

• **Summary:** Duhon is a student of John Jeavons and Alan Chadwick, using the Biodynamic / French Intensive method of gardening. For good information on growing soybeans in a home garden or mini-farm, see p. 105-08. The Contents of this section are: Introduction. Use. Plant physiology. Culture. Varieties. Potential problems. Harvest. Storage. “If green beans are desired, harvest some of the pods before they turn yellow.” Address: Willits, California.

1610. Findlater, Evelyn. 1985. *Making your own home proteins: Tofu, tempeh, soft cheeses, yoghurt and sprouted seeds*. London: Century Publishing. 151 p. Illust. Index. 20 cm.

• **Summary:** Contents: The soya dairy (The soya bean, products of the soya bean {soya flour, shoyu and tamari, miso, cooking with miso}, soya milk, how to make it at home, recipes, tofu, silken tofu, yuba, soya milk yoghurt, soya milk yoghurt cheese, tempeh). Gluten (wheat protein). Goat’s milk dairy produce. Sprouting beans, grains and seeds (beans: aduki, alphantoco, chick peas, flageolet, lentils, mung beans, soya beans).

A portrait photo of the author appears on the front cover; a brief biography is found on the first page and in the introduction. Address: England.

Organizational listing (alphabetical, with detailed descriptions of 120 of these). Subject index (soy is not mentioned). Geographical index. How to participate in this directory (form to fill out and send to Healthy Harvest). Order form for more copies of this book.

1613. *The first macrobiotic cookbook: Formerly Zen Cookery*. Revised edition. 1985. Oroville, California: George Ohsawa Macrobiotic Foundation. 134 p. Topical index. General index. 22 cm. Copyright 1984, 1985 [11 ref]

• **Summary:** Edited by Cornellia and Herman Aihara, this is a revised and expanded edition of *Zen Cookery*, which was first published in 1964 by the Ohsawa Foundation of Chico, California. "Includes 296 recipes updated for the 1980's." Each recipe is numbered and the numbers are almost the same as in the original edition though some of the names have been changed slightly, and ingredients have been adjusted. Much less salt has been used.

There is an interesting preface followed by 4 pages of photos titled "Recollections of the early 1960s"—related to Chico-San, Inc. and followers of macrobiotics.

Contents: Preface. Photo recollections. 1. Grains. 2. Noodles. 3. Vegetables. 4. Beans and sea vegetables. 5. Soups. 6. Sauces. 7. Salads and pickles. 8. Special dishes. 9. Miso and soy sauce dishes. 10. Breads and snacks. 11. Desserts. 12. Beverages. Seasonings. Cutting styles. Glossary.

"Soon after George Ohsawa came to the United States as a missionary of macrobiotics in 1959, he published *Zen Macrobiotics* in 1960. This book in its original form included

recipes for macrobiotic cooking. Although the number of macrobiotic students increased rapidly because of his interesting lectures and charisma, the much needed editing of the recipes for clearer instructions and measurements was not realized until later.

"In 1961, on Ohsawa's advice, thirteen macrobiotic families, numbering thirty-six [sic, 34] people, left New York City and moved to a small town in Northern California named Chico. The following year, all the adult members of the group started the first macrobiotic food distributing company, Chico-San, Inc.

"Since nobody on the West Coast had heard of macrobiotic foods, one of the first jobs for the Chico-San founders was educating people in the macrobiotic philosophy, diet and cooking. A committee for the teaching of macrobiotic cooking was formed by the women of the group who began by separating the cooking section from *Zen Macrobiotics* and gathering recipes among themselves. Thus, Chico-San, under the name of the Ohsawa Foundation of Chico, published the first macrobiotic cookbook, *Zen Cookery*, in 1964.

"The book sold very well for eleven years. It was out of print from 1975 until 1984, when the George Ohsawa Macrobiotic Foundation published the book under its new title, *The First Macrobiotic Cookbook*. The 1985 edition has been completely revised and corrected; however, the original outline and numbering system have been retained."

The photos have these captions: "(1) Bill Salant, Al Bauman [both standing by a car], and Herman Aihara (not in picture) stop for refreshment on their exploration of the Sacramento Valley area prior to the cross country move. (2) On the road, Cornellia Aihara preparing breakfast for 36 hungry people at a scenic spot near Lincoln, Nebraska, on the way to California. (3) CBS News is on hand to greet the travelers upon their arrival in Chico. Later a 'Welcome to Chico' dinner was sponsored by the town. (4) Joanne Hirsch (left) with Teal Nichols (center), editor of the first edition of *Zen Cookery* [both are seated at a formal dining table with several other people]. (5) Shayne Oles, editor of *The New Zen Cookery*, with husband Lou (left) and Junsei Yamazaki.

"(6) Jacques deLangre, Tommy Nakayama, Lou Oles, and Bob Kennedy relaxing in front of Herman and Cornellia Aihara's home [in Chico]. (7) Herman Aihara rings up a sale at the first 'Chico-San'—the tailgate of his car. (8) Irv Hirsh getting a workout on the first rice cake machine (modified) in the United States. (9) Construction underway on a koji room at the Chico-San facility in Chico. (10) Bob Kennedy (right), president of Chico-San at its sale in 1985, standing in front of a new shipment of organic rice. (11) Meal time at the premier Chico picnic; still held annually at Hooker Oak Park. (12) Herman and Cornellia Aihara, hosting the 1964 New Year's Day celebration." Address: George Ohsawa Macrobiotic Foundation, 1511 Robinson St., Oroville, California 95965.

1614. Kotsch, Ronald E. 1986. Japan's natural foods pioneer: Mitoku's success is due to its network of quality suppliers. *East West Journal*. Jan. p. 18, 20-25.

• **Summary:** Mitoku "has been and (at present) remains the larger of the two main exporters of natural foods from Japan. With its chief competitor, Muso Shokuhin (see Sept. 1984 EWJ), it shares the bulk of a \$14-million-a-year market for superior Japanese food products.

"The central office of Mitoku is located in the prestigious Marunouchi building, in front of Tokyo Central Station... There is a staff of six Japanese and two foreigners (Christopher Dawson, a new Zealander, and Robbie Swinnerton, an Englishman)...

"The founder, sole owner, and guiding spirit of Mitoku is Akiyoshi Kazama, now fifty-five years old... A graduate of Waseda University in Tokyo, Kazama was selected in 1956 to study business in the United States... He became the first Japanese national to serve in the American Army following World War II. After two years as an American G.I. in Korea and Japan, Kazama returned to Japan and settled in Tokyo. He became an import-export agent for a German company dealing in opticals and electronics. Then in 1967 he got involved in the emerging natural foods business...

"At the time the newly formed Erewhon Trading Company of Boston was trying to import foods directly from Japan. Its owner, macrobiotic teacher Michio Kushi, was introduced to Kazama by letter through a mutual friend. Kazama agreed to use his trade expertise to ship \$3,000 worth of high-quality Japanese foods, selected by Kushi, to Boston...

"In 1969 Kazama formed a separate company to handle steadily increasing shipments, and called it Mitoku. Through the 1970s Mitoku continued to grow. It remained the principal supplier of Erewhon, which had become a leader of America's natural foods industry. Also, it played an important role in the development of other companies such as Janus, Laurelbrook, and Oak Feed... The company moved into the European market as well, becoming a major supplier of Lima of Belgium, Sunwheel of England, and other major distributors...

"When in the fall of 1981 Erewhon finally collapsed, Mitoku was its largest creditor and took a \$300,000 loss. Erewhon's demise nearly destroyed Mitoku... Mitoku has become a major supplier to Westbrae, Great Eastern Sun, Tree of Life, and the reborn Erewhon, all vigorous American firms...

"Over the last five years, Mitoku's annual sales have grown at about 20 percent a year. During the 1984-85 fiscal year gross sales were about \$7.5 million. During that period Mitoku bought some 300 food products from eighty-three producers... It sold to fifty-six customers around the world, including ten in North America and about thirty in Europe...

"Just this past month, Mitoku has introduced a line of

especially high quality products under its own label."

The author and Mr. Kazama visited a number of Mitoku's suppliers. Descriptions are given of Mansan Company Ltd. (making tamari and soybean miso since 1895), Sendai Miso Shoyu Co. Ltd. (the Sasaki family which runs the company started making miso in 1853), Fukaya Honten Shoyu (a small maker of organic shoyu).

1615. Associate Director, Import Operations Unit, (HFC-131). 1986. Revision to Import Alert #40-01—"Soy drinks, milk substitute drinks and other drinks that may serve as infant formulas." *Import Alert*. Feb. 21. 3 p. U.S. Food and Drug Administration, internal document.

• **Summary:** Concerns: Eden Foods' Edensoy, Soy Moo, Sun Soy, Ah Soy, Westsoy, Vitasoy, Westbrae Malted. "All soy-type beverages, whose labeling do not recommend or imply use as infant formula and do not make claims as a substitute for milk, should be released with the comment: 'This product is not to be used as an infant formula or as the sole source of nutrition. If this product is subsequently found to be offered for those purposes, FDA will take legal or administrative action against this and/or future shipments.' The labeling of these products should also be reviewed for compliance with nutrition labeling requirements (21 CFR 101.9). If the product does not comply with nutrition labeling requirements, comment to that effect should be included in the release." Address: Washington, DC.

1616. Eden Foods, Inc. 1986. The bean comes true. Enjoy America's favorite. Edensoy (Ad). *Natural Foods Merchandiser*. Feb.

• **Summary:** "Since July, 1983, the New Food, Edensoy, has been America's #1 soymilk. Overnight it became and remains the best selling soy drink in the U.S.A." A photo shows packages of Edensoy plain and carob standing on a table. A second package of Edensoy plain is being poured into a tall glass. Address: Clinton, Michigan.

1617. Great Eastern Sun. 1986. Information packet on Miso Master miso (Leaflets). Enka, North Carolina. 5 p. 28 cm.

• **Summary:** Contains the following leaflets: (1) Miso Master miso main selling points. (2) Miso Master misos: Traditional red miso, Mellow white miso, Country barley miso, Mellow barley miso, Sweet white miso, Chick pea miso. (3) Miso Master nutritional information. Address: P.O. Box 327, Enka, North Carolina. Phone: (704) 252-3090 or (800) 334-5809.

1618. Mitoku. 1986. Mitoku macrobiotic: The fine art of traditional food (Ad). *Natural Foods Merchandiser*. Feb. p. 28.

• **Summary:** A full-page color ad. "Like the finest painting or craft, each Mitoku Macrobiotic(TM) product is a masterpiece.

"They are made from extraordinary ingredients. Almost

all are organic, the purest and most natural we can find, the very best in all Japan. They are carefully made by hand with all the attention to detail that their time-honored recipes and traditional preparation demands. These foods are made in small quantities and cannot be hurried. Miso and Tamari require over a year to make; our Tsuyu Shoyu dipping sauce takes almost four full years.

“Mitoku Macrobiotic products are simple and elegant. Each package tells the story, where it comes from and how it was made. The foods themselves are superb: premium Sun-Dried Seaweeds, Authentic Mirin, Brown Rice and Umeboshi Plum Vinegars, Donko Shiitake Mushrooms, Sakurai Pastas, Mochi, Tekka and much more. Each one is unique with a distinctly different gourmet quality you will taste immediately. They are the most delicious products of their kind in the world.

“For Mitoku Macrobiotic the finest art of all is to create for you products of superior taste and health. Truly, The Fine Art of Traditional Food.”

1619. Product Name: Westbrae Natural Instant Miso Soup & Recipe Mix [Onion, Vegetable, Tomato, Mushroom, or Chili].

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986 February.

Ingredients: Incl. dehydrated miso, vegetables.

Wt/Vol., Packaging, Price: 1 oz packets. Retail for \$0.70-\$1.00 each.

How Stored: Shelf stable.

New Product–Documentation: Ad (full page) in East West Journal. 1986. Feb. Black, green, brown, and white on yellow background. “Years of culture–yours in an instant. What is Miso? Macrobiotics? What did the Ancient Samurai Drink in the Morning? Why Westbrae’s Miso Soups? Who Are We? Since 1970, Westbrae continues to bring to the marketplace ‘foods that sell out from the company that didn’t.’”

1620. Roller, Ron. 1986. New developments with Edensoy, and sales figures (Interview). *SoyaScan Notes*. March 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Eden Foods has a joint venture with Marusan (Japan), building a soymilk plant in Saline, Michigan. Some Marusan technicians are now working with them in Saline, building the plant. Its about half done and should be on stream by June or July 1986. They plan a big plant opening. The new Edensoy will be packed in Tetra Pak, which has a lower packaging cost.

In the last 2 months sales of Edensoy have been 40,000 cases of 30 packs per case. This is 600,000 packs/month. Each pack is 6.0 U.S. fluid ounces or 0.1875 quarts. So this

is 28,125 gallons/month, or 337,500 gallons/year. Note: This is the first news of this exciting new venture. Edensoy soon became America’s leading brand of soymilk and a very famous and profitable soy product. Address: Vice president, Eden Foods Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: 800-248-0301 or 517-456-7424.

1621. American Miso Co. 1986. Hand-crafted organic miso: Made in the USA (Ad). *East West*. March. p. 10.

• **Summary:** This one-third page vertical black-and-white ad begins: “Near the Smoky Mountains in the green, rolling country of western North Carolina, the Miso Master continues a centuries-old tradition of hand-crafted miso.”

“Containing living cultures, they are truly a living food. Look for Miso Master in the refrigerated section of finer natural foods stores everywhere.

“With its velvety, creamy texture and its superb flavor, Miso Master miso is perfect for soups, dressings, dips, spreads and sauces. For free recipes using Miso Master miso, send a self-addressed, stamped envelope to: Great Eastern Sun, P.O. Box 327, Dept. H, Enka, NC 28728. From our kitchen to yours—traditional Japanese miso, made for you, in the USA.”

At the top of the ad is an illustration (line drawing) of a traditional Japanese miso shop, with thatched straw roof and several wooden kegs and barrels outside. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below it: “Distributed by Great Eastern Sun, 92 McIntosh Rd., Asheville, North Carolina 28806.”

1622. *East West*. 1986. The best & worst natural foods. East West’s first annual awards. March. p. 83-86.

• **Summary:** “Frozen non-dairy desserts. Best hard-serve product: Rice Dream by Imagine Foods of Palo Alto, California. Leaves all the soy products with their squabbles about tofu content and soy isolate use in the dust.” Address: Massachusetts.

1623. **Product Name:** Miso Master Miso [Country Barley, Traditional Red, Mellow White, Mellow Barley, Sweet White, or Chickpea with Barley].

Manufacturer’s Name: Great Eastern Sun (Marketer). Made in North Carolina by American Miso Co.

Manufacturer’s Address: 92 McIntosh Rd., Asheville, NC 28806. Phone: 1-800-334-5809.

Date of Introduction: 1986 March.

Ingredients: 1996: Organic soybeans, organic partially polished brown rice, sun dried sea salt, well water. Organically grown/processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 1996: 1 lb plastic tub. Retail for \$6.59 (Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Ad in *East West*. 1986. March. p. 10. Nov. p. 81; *Soy Power*. 1987. Catalog. All 16 oz. Product with Label purchased at Open Sesame in Lafayette, California. 1996. Dec. Price: \$6.59. 4.25 inch diameter lid. Black, brown, and light green printed on clear plastic. An illustration shows the Miso Master logo. Text on the side of the tub reads: “The American Miso Company is proud to present domestic organic miso.” Soyfoods Center taste test. 1996. Dec. Excellent flavor, color, and aroma.

1624. Kotzsch, Ronald E. 1986. The way we were: An *East West Journal* retrospective. *East West*. March. p. 55-75. [20 ref]

• **Summary:** *East West Journal* started in January 1971. Ron Dobrin, a former New York reporter, says that the new periodical will start small, just 12 pages and about 1,500 copies printed. Richard Nixon was president and the Vietnam War dominated the news.

“While *East West Journal* was founded in 1971, its roots go back to the mid and late 1960s. The first wave of the post-war baby boom generation was entering adulthood. Many of these young people were restless and dissatisfied with the ideology and lifestyle to which they were heir. The dominant ‘cultural religion’ of the day had several key elements:

“* materialism: the belief that only what can be measured and apprehended through the senses is real (and important);

“* scientism: the belief that the scientific method is the only avenue to truth and that it applies to all areas of inquiry;

“* technologism: the belief that technology (the application of scientific knowledge) can solve all the problems of human life, i.e., sickness, poverty, hunger; * consumerism: the belief that the highest good in life lies in the consumption of goods and services. The more one has, the more one has realized human potentiality;

“* anthropocentrism: the belief that humans are the lords of the earth, and are free to use, exploit, and destroy nature as it suits their ends;

“* ethnocentrism: the belief that Western culture in particular in its modern form represents the apex of human civilization, and that the cultures of the past and of other parts of the world are inherently inferior.

“Many young people rejected some or all of these ideas and the way of living which they engendered.

“Mobile, bright, open-minded, and gullible, they set out in search of new ideas, new ways to live. They roamed the country and the world. Most passed through a period of experimentation with drugs. A few stayed there. Others went on, coming to abide (for a time, at least) on rural homesteads, in communes, in ashrams, or on the long road to India and Nepal. Some landed in Boston in the macrobiotic community which developed there after 1967.

“There was a strong Zen influence in Kushi’s teachings

and in the lifestyle of the macrobiotic community. This was seen as a tendency toward material simplicity in everyday life, an impulse toward communal living, a sensitivity and respect for nature, a valuing of intuition over science, and a concern for spiritual development.”

“There is indeed a unifying principle, obscure as it may sometimes be. *East West Journal*’s ‘thread of continuity’ is comprised of the ideas and values upon which the magazine was founded. And each is a creative response, a viable alternative to the mainstream ideology which we had found wanting. In lieu of materialism there is a belief in ‘spirit’ or ‘energy’ as the fundamental reality. Various terms, ki, chi, prana, it is the key even to matter, which is only a compressed form of it. In lieu of scientism there is a realization that while valid in its sphere, science cannot observe or judge the unobservable. In lieu of technologism there is a faith in simple and natural ways to solve problems, to cure sickness, and to raise food. In lieu of consumerism, there is a taste for simplicity and self-sufficiency. In lieu of anthropocentrism there is a humility before nature and a sense of responsibility for it. In lieu of western ethnocentrism there is a deep respect for the East, for the ‘developing’ world, and for the wisdom of generations. In lieu of historical pessimism is a belief that the world can be set right, that order and harmony can prevail on the societal as well as on the individual and family level.

“These ideas may turn out to be naive and idealistic. But for fifteen years they have been the heart of the *East West Journal*. In each issue, on each page, the magazine has tried to express and promote them.”

The name of this periodical was changed name from “*East West Journal*” to “*East West: The Journal of Natural Health & Living*” in March 1986 with this, the 15th anniversary issue. Address: Massachusetts.

1625. Sturgeon, Bruce. 1986. Great Eastern Sun, soymilk, and St. Peter Creamery (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** GES presently imports 3 containers a month of Ah-Soy. There are 3,000 cases/container and 30 packages/case. Each package is 180 ml. So this is 270,000 packages/month or 48,600 liters/month or 12,840 gallons/month or 154,081 gallons/year. Percentage of sales by flavor are vanilla 35%, original 30%, chocolate 18%, carob 17%. Sales have been flat for the last year due to increasing costs due to the poor exchange rate. They will soon make the product in the USA in Tetra Pak, but also continue to import some from Japan.

St. Peter Creamery in Minnesota has bought/licensed the Oberg patent. Their biggest customer is Ice Bean (soy ice cream, from The Farm in Summertown, Tennessee). They are a dairy company that also makes cheese for Kraft. They have three plants and will soon move to or start a new one in South Dakota. Address: Director of Marketing, Great Eastern

Sun, 92 Macintosh Rd., Asheville, North Carolina 28806.
Phone: 808-438-4730.

1626. Thomson, Bill. 1986. In search of the natural chicken. Is the truly organic, free-ranging, no-antibiotic chicken a mythical beast? *East West*. April. p. 38-42, 45. [2 ref]
Address: USA.

1627. *Washington Post*. 1986. Obituaries: Augustus Pembroke Thomson. May 19. p. D4.

• **Summary:** He died on May 12, at age 76, at the Medical College of Virginia. He lived in Front Royal, Warren County, Virginia. "Commander Thomson was president of Natural Food Associates and the founding president of Virginia Biological Farmers. He was also a widely known orchardist who used natural methods of growing apples and processing juice and vinegar."

1628. Bushnell, Davis. 1986. Erewhon: Back from Nowhere. *Boston Globe*. May 26. p. 11. Business section.

• **Summary:** Wilmington, Massachusetts—An anagram of Erewhon is "nowhere." And that appeared to be where natural foods manufacturer Erewhon Inc. was going in November 1981 when it filed for reorganization under Chapter 11.

Today Erewhon is going somewhere. To Charles T. Verde, president and chief executive officer, that means the company is on the way to a successful restructuring. "All our creditors have now been paid," said Verde, 44, explaining that previous claims against Erewhon of \$4.8 million have been settled for \$1.5 million. Last month Erewhon acquired a small cereal manufacturer, US Mills Inc. of Omaha [Nebraska], for about \$5 million, Verde said. In addition to its own mass-market cereals, the Omaha facility will also produce the nine new cereal products that Erewhon plans to introduce in the next year.

"We will be profitable because we're going to focus on cereals, the largest category—\$75 million to \$90 million annually—in the natural foods industry," said Verde. For the fiscal year ended last June 30, though, Erewhon lost "just under \$500,000" on revenues of \$3 million, he said. This year Erewhon will report sales of \$3.3 million, while its three retail stores, which are accounted for as subsidiaries, will have total sales of \$4.2 million, up 200,000 from a year ago...

"In April 1966 Michio Kushi opened an Erewhon Trading Co. store on Newbury Street in Boston to serve those espousing macrobiotics (the promotion of longevity through diet). 'Kushi was one of the forces behind the macrobiotics movement in this country,' said Verde, adding that Kushi's popularity prompted the opening of a Cambridge store in 1976 and a Brookline outlet in 1978. And then the troubles began... "In November 1981 the manufacturing and distribution operations went into Chapter

11. Yearly sales were about \$15 million, but there were also losses of \$2 million," he said. Kushi gave up control of the company (he is on retainer now as a quality adviser), which was then acquired by Ronald Rossetti, owner of Nature Food Centres Inc., whose Wilmington offices Erewhon now shares.

Verde was named president of Erewhon in the fall of 1982 and he, in turn, hired a former Gillette marketing colleague, Cynthia C. Davis, as vice president of marketing the following spring. First, the distribution operation was disbanded... "When Cynthia Davis, now executive vice president came in, she gave the packaging a contemporary look and weeded out the unprofitable products. Some 200 items were reduced by half."

Rossetti sold his stock last year for an undisclosed amount to a person Verde describes as "an East Coast investor." Verde said that he and Davis, 35, also have equity positions in Erewhon. Sixty-five percent of Erewhon's sales now come from the Northeast, 20 percent from California and the remainder from the Southwest and Southeast. Three years ago, said Verde, distributors wouldn't return phone calls because they had the attitude, "Who needs Erewhon?" Today, 40 distributors serve the company.

The *Boston Globe* (19 April 1987) notes that "Erewhon is the title of a satirical romance published in 1873 by English author Samuel Butler. In the mid-19th century, Butler went to New Zealand, where he became a successful sheep farmer. The narrator of his book finds a remote mountain colony in New Zealand where many institutions and attitudes are the opposite of conventional ones."
Address: Globe staff, Massachusetts.

1629. Business Trend Analysts, Inc. 1986. The health and natural food market. 2171 Jericho Turnpike, Commack, NY 11725.

• **Summary:** Section VII is titled "The Market for Soyfoods." It is a combination of material taken without permission from Shurtleff & Aoyagi's *Soy Milk Industry and Market* (especially the overview on page 96) and little bits and pieces for various sources that fail to give an accurate picture of this market. The report repeatedly speaks of the "soyfoods market" without defining which product types it is including. Part of the information is said to be based on "A special survey of 5,000 households, providing up-to-date information on changing consumer attitudes and buying patterns with respect to soyfood products." The results of this survey include consumption levels by household income, type of retail outlet, geographic region, race, age and presence of children. They project manufacturers' sales of soyfoods to be \$499.5 million in 1995, assuming a compound annual growth rate of 15.3% from 1985 to 1995. Generally a disappointing study, especially for the price.
Address: Commack, New York.

1630. **Product Name:** [Dried-Frozen Tofu].
Foreign Name: Gedroogde Tofu / Koya Dofu.
Manufacturer's Name: Manna Natuurvoeding B.V. (Importer-Distributor). Made in Japan.
Manufacturer's Address: Weerenweg 28, 1161AJ Zwanenburg, Netherlands.
Date of Introduction: 1986 May.
Wt/Vol., Packaging, Price: 200 gm bag. 7 pieces.
How Stored: Shelf stable.
Nutrition: Per 100 gm.: Calories 436, water 10.4 gm, protein 53.4 gm, vegetable fat 26.4 gm, carbohydrate 7.2 gm, calcium 590 mg, iron 9.4 mg, sodium 18 mg.
New Product–Documentation: Manna Bulletin. 1986. May. No. 12. p. 3. A photo shows the package with the Muso brand on it. Note: This is the earliest Dutch-language document seen (April 2013) that uses the term “Gedroogde Tofu” or the term “Koya Dofu” to refer to dried-frozen tofu.

1631. Westbrae Natural Foods. 1986. Q&A. Answers to most-asked questions about WestSoy (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.
• Summary: Questions and answers about this soymilk. The shelf life is 1-2 years. It is sweetened with barley malt made from sprouted barley. It contains less than 1% added oil. Other soydrinks seasoned with seaweed averaged 144 mg of sodium per serving vs. 125 mg for WestSoy. Address: Emeryville, California.

1632. Belleme, Jan; Belleme, John. 1986. *Cooking with Japanese foods: A guide to the traditional natural foods of Japan*. East West Health Books, 17 Station St., Brookline, MA 02146. xi + 220 p. Illust. Index. 25 cm. [45 ref]
• Summary: A good study from a macrobiotic viewpoint, with more than 200 macrobiotic recipes. The authors studied in Japan and speak Japanese. Contents: Foreword. Acknowledgements. Introduction. Fermented Foods: miso, shoyu, tamari, brown rice vinegar, sake, mirin, koji, amazake, pickles, umeboshi, ume su, medicinal teas, ume extract, bonito flakes, natto. Noodles: cooking noodles, udon, soba, somen, clear noodles. Grains, incl. rice, mochi, seitan, fu gluten cakes, hato mugi [*hatomugi*] (Job's tears), rice syrup, rice bran. Vegetables: shiitake, daikon, Hokkaido pumpkin, Chinese cabbage, burdock, jinenjo, lotus root. Sea vegetables: kombu, nori, wakame, hijiki and arame, kanten (agar). Beans: azuki beans, black soybeans, tofu. Condiments: kuzu, dark (toasted) sesame oil, goma (sesame seeds), tekka, shiso momiji (shiso leaf condiment), wasabi. Teas. Cooking utensils. Appendix: Composing meals, pronunciation guide, suppliers. Bibliography.

Amazake (p. 39-45). Contains a ½ page description plus good instructions for making basic amazake (thick “pudding” and thinner beverage), both from glutinous (“sweet”) rice. Also recipes for Vanilla Amazake Pudding, Amazake Cream

Puffs, Neapolitan Parfait, Carob Amazake Brownies, Bob's Coconut Amazake Macaroons, Amazake Bread (yeasted), and Unyeasted Amazake Bread. Perhaps the most lengthy information on amazake available in English up to this time.

Hato mugi (“Job's tears,” p. 93) “resembles barley, but it is actually a member of the rice family. An easily digestible whole grain with only the tough outer husk removed, hato mugi contains less vitamin B-1 than brown rice but approximately twice as much protein, iron, vitamin B-2, fat, and slightly more calcium.” It has long been used in China and Japan as a medicinal food, “for strengthening the stomach, purifying the blood, and restoring health. Since it is so effective in helping the body to discharge toxins, people who are sick and weak, and women who are pregnant, nursing a baby, or menstruating should eat it sparingly.” Address: Rutherfordton, North Carolina.

1633. Kingaard, Jan. 1986. Looking back at the NNFA. *Whole Foods*. June. p. 1, 23-26.

• Summary: A 50-year anniversary history of the National Nutritional Foods Assoc. Today it represents a \$3 billion industry. Pioneers who helped to organize health food advocates into an industry include Ed Neumann, Stanley Phillips, Herbert Bristol, Bernarr Macfadden, George Spitzer, Henry Rosenberger Sr., and H. Wayne Walker. A photo shows some of NNFA's past presidents: Dave Ajay, Rosemarie West, Stanley Phillips, Max Huberman.

“The original organization, the American Health Food Association (AHFA), was founded in 1936 by Tony Berhalter.”

1634. Westbrae Natural Foods. 1986. *Westbrae Natural Malted*s. “The Cadillac of Soydrinks” (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• Summary: Questions and answers about these rich and thick soymilk drinks. “What makes Malted so thick? What makes Malted so sweet? Why do Malted contain oil? Aren't Malted high in Calories?” Address: Emeryville, California.

1635. Westbrae Natural Foods. 1986. If all you want to do is save a few pennies on your soy sauce, don't bother reading this [about Johsen Shoyu] (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• Summary: Johsen is made with whole soybeans and aged for two full brewing years. Address: Emeryville, California.

1636. Troy, John. 1986. Update on work with American Natural Foods and miso (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• Summary: John is now \$150,000 in debt. The natural foods market was much smaller than he had thought and than market studies indicated. There are only 200 good and

fairly big natural foods stores in the USA. The biggest ones are: Bread and Circus, Alfalfa's, Mrs. Gooch's, Whole Foods Markets in Texas, and Blue Bonnets in Texas.

John's products are now in 1,700 Kroger's stores. His three best-sellers are: (1) Miso Mustard, (2) Hot Stuff, and (3) Miso Sauce (a new product for chicken, with tahini and tamari).

Note: This is the earliest document seen (March 2020) that mentions Whole Foods Markets. Address: North Carolina.

1637. Hulm, Trevor. 1986. County gets big soy milk plant [American Soy Products, a \$10 million joint venture of Eden Foods, Kawasho International (USA), Marusan Co. Ltd., Muso Co. Ltd., and Seikensha Co. Ltd.]. *Ann Arbor News (Michigan)*. July 30. p. A1, A4.

• **Summary:** "A Clinton [Michigan]-based company has clinched a \$10 million deal with four Japanese joint venturers to produce soy milk in Michigan for the North American market. The company, Eden Foods Inc., and its partners have almost completed construction of a manufacturing plant at Saline. Production is expected to start in September, with an initial staff of 35."

Eden Foods' president Michael Potter estimates that Eden presently has 38-40% of the \$20 million a year soymilk retail consumer market in the USA.

"Potter, 36, will be chairman and chief executive officer of the new company, American Soy Products Inc. The four Japanese companies involved in the joint venture are Kawasho International (USA), Marusan Co. LTD., Muso Co. Ltd. and Seikensha Co. Ltd.

"Under terms of the agreement, Eden Foods will handle product marketing, sales and distribution; Kawasho will oversee administration and financing; Marusan will be responsible for product production; and Muso will coordinate international sales. Seikensha has patents on key pieces of the manufacturing equipment and is supplying the processing equipment for the plant.

"The joint venturers have already spent \$2.3 million on the factory and land at Saline. Another \$4.3 million has been invested in the latest equipment available in the industry, with a \$700,000 outlay for start-up costs. The company has committed \$1.8 million in marketing funds and \$700,000 in working capital."

"The new plant is expected to consume 85,000 bushels of soybeans and 8,000 bushels of barley annually, almost all of which will be obtained in Michigan."

Note 1. This is the earliest document seen (July 2013) concerning American Soy Products or this new American soymilk plant. A photo shows the soymilk equipment.

1638. *Natural Foods Merchandiser*. 1986. 7th Annual Natural Foods Merchandiser merchandising awards. July. p. 42-43, 45.

• **Summary:** Soyfoods won the following awards: Gold: San-J Tamari (wheat-free soy sauce) and Shoyu; Silver: Fantastic Foods' Tofu Scrambler & Tofu Burger, Westbrae Natural miso soups; Honorable mention: Walker & Wilks Tofoods frozen entrees, White Wave boxed tofu. Color photos show each.

1639. *Toyo Shinpo (Soyfoods News)*. 1986. Hatsu no Beikoku genchi seisan: Marusan-ai no tōnyū. Gōben-gaisha Michigan seiritsu [The first American production of Marusan-Ai's soymilk. Joint stock company established in Michigan]. Aug. 1. p. 1. [Jap; eng+]

• **Summary:** Japan's second largest soymilk maker, after Kibun, is Marusan-ai K.K. (Head office: Araki 1 banchi, Nikimachi Aza, Okazaki-shi, Aichi-ken, Japan. President: Koji Sato). They have recently established a joint stock company to produce soymilk in Saline, Michigan. Production is scheduled to start at the end of August, 1986.

The new company's name is American Soy Products. The start-up capital is \$200,000. There are 4 Japanese companies and one U.S. company involved. Their respective percentage ownerships are: Marusan-Ai (25%, soymilk and miso maker from Okazaki), Kawatetsu Shoji (25%, the New York based company that was previously in charge of exporting soymilk to Eden Foods from Japan), Eden Foods Inc. (25%, natural foods distributor and importer from Clinton, Michigan), Muso Shokuhin (15%, macrobiotic and natural foods exporter from Japan), and Seikensha (10%, soymilk equipment maker from Tokyo).

The chairman of the board is Mr. Michael Potter of Eden Foods Co. and the president is Mr. Hiroyasu Iwatsuki. As before, Eden Foods will continue to distribute the soymilk. The head plant is located in Saline, Michigan (50 km west from Detroit) on a site of 15,000 square meters. The main facilities are 1 Soymilk Line and 2 Tetra packaging lines. The initial run is scheduled to produce 100,000 packages of 250 ml equivalent. They are actually going to make both 250 ml and 1-liter packages. The company's first year sales goal is \$5,000,000. Address: Kyoto, Japan.

1645. Olson, Lise. 1986. Soy milk plant opens: State farmers to reap benefits of new facility [American Soy Products plant at Clinton, Michigan]. *Detroit News*. Sept. 10.

• **Summary:** The American Soy Products soy milk plant was dedicated on 9 September 1986. A small package (8.45 oz) of Edensoy sells for \$0.59; the larger (33.8 oz) sells for \$1.99. Edensoy comes in three flavors: plain (which has a wheat germ flavor), carob, and vanilla. In 1985 privately held Eden Foods had sales of about \$12 million.

A large photo shows Yasuo Watanabe and Teizo Okada, two Japanese partners in American Soy Products, at the dedication of the new soy milk facility. Address: Michigan.

1646. Bennett, Gordon. 1986. Re: Soy milk standards and the Soy milk Standards Committee. Letter to Judy Walker, Soyfoods Association, 1101 Connecticut Ave., N.W. #700, Washington, DC 20036, Sept. 12. 1 p. Typed, with signature

on letterhead.

• **Summary:** “Regarding the Soy milk Standards Committee: the self-appointed ad hoc committee consists of myself, and Steve Snyder and Yvonne Lo of Vitasoy. Since the standards are on my word processor, I guess that makes me the ad hoc chairperson.

“The soy milk standards draft #1 was composed about two years ago entirely by myself, based on the format of the then-current draft of the tofu standards and incorporating information primarily from Bill Shurtleff’s Tofu and Soy milk Publications. After comment from various people in the tofu standards group (especially Tom Timmins), I put together draft #2 in time for the Washington [DC] meeting last October.

“Draft #2 was offered at the general meeting to any members who had interest, and I suggested that comments be forwarded to my attention. To this date, I have received written comments from the technical people at Vitasoy (Hong Kong) and a copy of the Chinese National Standards for Soy milk from Mr. Chen of the Food Industry R&D Institute of the Republic of China (which unfortunately is in Chinese). Steve and Yvonne and I also met and discussed Draft #2. Most of their comments and some later ideas that I had have been incorporated into Draft #3 (“Third Draft Soy milk Standards”), which is enclosed and which I plan to hand out at the general meeting, again soliciting comment.

“At this general meeting, it might be wise to formalize this committee, and I would like to get a few other soy milk producers on the committee—Harry Tanikawa from House Foods would be good, for example, if he is willing. Peter Golbitz of Island Tofu Works may also be interested. I do hope, however, that we can avoid clogging the committee with people who may have good intentions but who are not knowledgeable in the field and who are not among the more important factors involved. One last point: all expenses to date have been borne by Westbrae, including some conferences with the same law firm that is advising on the Tofu Standards. I am happy to continue to do this, so long as these expenses stay “reasonable.”

“Please advise if you want copies of Drafts #1 and #2 for your records.”

Copies mailed to: Gary Barat, Tom Timmins, Bill Shurtleff, Steve Snyder, Yvonne Lo, and Harry Tanikawa.

Note: The Third Draft of the Soy milk Standards is 21 pages, typewritten, double spaced, with 12 sections. Address: Westbrae Natural Foods, 4240 Hollis St. (P.O. Box 8711), Emeryville, California 94608 (or 94662). Phone: (415) 658-7518.

1647. Rosenbaum, Jack. 1986. Out in the cold—Larry Brucia. *San Francisco Progress*. Sept. 19. p. B1.

• **Summary:** “Larry Brucia hosted a dinner for 16 at the Trattoria Contadina to celebrate his forthcoming marriage. Who he? Several years ago broken boxes of nuts, raisins,

coconut, dried peas and such were returned to the plant with the contents all mixed together. He idly picked up a handful and popped it into his mouth. Trail Mix, a popular supermarket item, was born and Brucia was making a mint. To get the proper proportions the company now uses a genuine cement mixer. Minus the cement.”

1648. **Product Name:** Sweet Cloud Sesame-Miso Munchies.

Manufacturer's Name: Great Eastern Sun (Marketer-Distributor). Made in North Miami, Florida, by Sprout Delights Bakery.

Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1986 September.

Ingredients: Sweet Cloud Rice Syrup, crisp brown rice [like brown Rice Krispies], tahini, mellow white miso, pure vanilla, natural flavor.

Wt/Vol., Packaging, Price: 1.33 oz (38 gm) plastic bag. Retail for \$0.69 (11/91).

How Stored: Shelf stable.

New Product–Documentation: Soya Newsletter. 1987. Nov/Dec. p. 7. Talk with Bruce Sturgeon of GES. 1988. Jan. 27. Gave manufacturer and introduction date.

Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 2.75 by 4.5 inches. Plastic bag. Tan, black, dark red, and white on pink. Illustration of white clouds against a pink sky. “All natural.” Soyfoods Center product evaluation. 1991. Nov. 28. Chewy and delicious.

Talk with Steve Bern of Sprout Delights. 1992. July 11. He introduced other flavors of these Munchies in about 1985 or 1986, then later Great Eastern Sun got interested in them shortly after GES introduced Sweet Cloud Rice Syrup in a jar. Only the sesame-miso flavor contains miso.

1649. McSweeney, Daniel. 1986. Organics in action! OFPANA seeks uniformity, commonality, verification of organic foods. *Whole Foods*. Sept.

• **Summary:** The Organic Foods Production Association of North America (OFPANA) was formed in 1984. Thomas B. Harding, Jr., is OFPANA's first president. He is president of AgriSystems International of Wind Gap, Pennsylvania. This is an interview with him and the progress of OFPANA.

Note: This is the earliest document see (March 2020) with the word “organics” in the title.

1650. *Toyo Shinpo (Soyfoods News)*. 1986. Kenko imeeji-do besuto 20. 6 i ni nattô, 11 i ni tôfu [The 20 Japanese foods with the healthiest image. Natto is 6th and tofu is 11th]. Oct. 21. p. 1-2. [Jap; eng+]

• **Summary:** The healthy image ranking, based on a survey of 1,000 households in October 1985. Conducted by Shokuhin Sangyo Center in Tokyo (Toranomom. Tel. 03-591-

7451) and titled “Health and Food.” 1. Sardines (340 points out of a possible 1,000), 2. Shirasu (the young of sardines, 298), 3. Process cheese (259), 4. Real fruit juice (241), 5. Umeboshi salt plums (227), 6. Natto (227), 7. Natural cheese (225), 8. Brown rice (218), 9. Honey (210), 10. Tofu (204), 11. Wakame (sea vegetable, 197), 12. Soymilk (196), 13. Yogurt (193), 14. 1651. Eden Foods, Inc. 1986. Lima. Muso. Eden Foods (Ad). *East West*. Oct. p. 107.

• **Summary:** The Lima Company, founded in 1957 in Belgium and France, was the first macrobiotic food company, a pioneer and champion of biological [organic] agriculture. The Muso Company, founded in 1959 in Osaka, Japan, was the second macrobiotic food company, and mother of the most developed, prolific, and effective macrobiotic educational effort in the world. Eden Foods, founded in 1967 [sic, 1969] in Michigan, USA, is an American macrobiotic food company and trusted conduit for biological and organically grown staples.

“After an eleven year relationship, the Muso Company appointed Eden Foods its General Agent for North America in January of 1984. In May of 1986, after two years of negotiations, the Lima Company honored Eden by placing it in the same position.” Address: Clinton, Michigan 49236. Phone: (313) 973-9400.

1652. **Product Name:** Health Valley Soy Moo: Non-Dairy Soy Drink.

Manufacturer's Name: Health Valley Natural Foods (Marketer-Distributor). Contract packaged in the Western USA.

Manufacturer's Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1986 October.

Ingredients: Pure water, organically grown soybeans*, concentrated grape juice, malted barley, vanilla, dulse (sea vegetable) (2/91). * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 250 ml and 1 liter Tetra Brik Aseptic cartons.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 6 fl oz.: Calories 90, protein 6 gm, carbohydrate 9 gm, fat 3.5 gm, cholesterol 0 mg, sodium 85 mg, potassium 25 mg. RDA of calcium = 2%.

New Product–Documentation: Shurtleff & Aoyagi.

1985. Soymilk Industry and Market, Update. “During early 1985 Alpro continued to make a private-label soymilk, brand-named Soy Moo, for Health Valley in Los Angeles. Then in mid-1985 Health Valley switched to having their product made in America, probably from powdered soymilk, packaged in 250 ml and 1 liter Tetra Brik cartons by a

contract packer in the western USA.”

Golbitz. 1987. Soya Newsletter. March/April. p. 8. After severing ties with Vandemoortele in 1985, Health Valley worked for nearly a year on a new Soy Moo soymilk and re-launched the produced in the fall of 1986. Talk with Gordon Bennett of Westbrae. 1988. April 2. Health Valley uses a soymilk powder from some source (perhaps Clofine) and trucks it to a Tetra Brik company, that reconstitutes and packages it.

Product with Label purchased at Open Sesame in Lafayette. 1991. Feb. 16. 3.75 by 6.5 by 2.5 inches. Tetra Brik Aseptic carton. Front: Color photo of milk being poured into a glass that is surrounded by muffins, strawberries, and a blue bowl of cereal against a sky-blue background. The Health Valley Logo is in the center of the glass. “Cholesterol free. Lactose free. Made with organic soybeans. Ready to use.” The company address now given as 16100 Foothill Blvd., Irwindale, California 91706-7811. “Product of U.S.A.” Soyfoods Center product evaluation. Flavor: So-so, with a somewhat unpleasant and unnatural aftertaste. Package design: Excellent.

1653. Kotsch, Ronald E. 1986. The pioneering spirit of Ohsawa-Japan: Japan’s first macrobiotic company puts principles before profits. *East West*. Oct. p. 72, 74-75.

• **Summary:** In 1953 George Ohsawa “left Japan to teach the principles of macrobiotics in other lands. Several years later, after sojourns in India, Africa, Europe, and America, he returned to his homeland for a visit. When he saw that it had become almost impossible to procure traditional-quality foods in his own country, he urged some of his followers to become involved in farming and in food processing. He encouraged others to set up a company that would seek out existing producers of high-quality items and market their products in Japan and abroad. Thus was born Ohsawa-Japan, staffed by loyal disciples of Ohsawa and headed by his sister-in-law Flora Tanaka.

“From its inception Ohsawa-Japan was a company rich in ideals and slim in capital. As Yoshi Nanabayashi, its export manager, told me, ‘We have always been, above all, a macrobiotic company. So our first concern has been to distribute only the highest-quality food, made according to strict standards. Considerations of cost and profit have always been secondary. Mr. Ohsawa taught that proper food is the key to the health and happiness of humanity. Our main aim has been to promote the health of individuals and of society, not to make a lot of money. And,’ he added with a laugh, ‘we have been fairly successful.’”

What the Tokyo-based company lacks in professionalism it makes up for in dedication to its ideals. From several score of traditional Japanese food producers (mostly small and family-run) around Japan, it gathers more than 100 products (including miso from Yamaki Miso Co., shoyu, and tamari), packages them, and distributes them to the small but strong

network of macrobiotic stores and centers throughout Japan.

For years Ohsawa-Japan’s “exclusive North American distributor was Chico-San, the natural foods company located in Chico, California. In 1984 Chico-San, which had thrived on its rice cake business, was sold to the H.J. Heinz Corporation. Six months later the import rights to the Ohsawa-Japan products were sold back to Chico-San’s original owners, Herman Aihara and Bob Kennedy. At that point a new company, Ohsawa America, was set up to import and distribute the products of Ohsawa-Japan. Today that company, based in Chico, handles about seventy basic Japanese macrobiotic items...

“The main difficulty facing Ohsawa America is the high prices it must ask for its products. The cost of living in Japan is one of the steepest in the world... In addition, the value of the yen has increased dramatically.” Lane Seiger is operations manager of Ohsawa America. As Joel Wollner notes, “Like Ohsawa-Japan, Ohsawa America is a philosophy-driven company.”

Note: This article does not say what year Ohsawa-Japan was established, but it was probably in about 1961 or 1962 since Ohsawa first went to the USA in 1959. Address: PhD, Staff.

1654. Lehnert, Dick. 1986. Eden Foods’ new product: Milk from soybeans. *Michigan Farmer (Duluth, Minnesota)*. Oct.

• **Summary:** The new \$10 million soymilk plant at Saline in Washtenaw County will use 85,000 bushels/year of Michigan-grown soybeans. These beans will be grown under contract with Michigan farmers to be processed in the 22,000 square foot stainless steel plant. One such farmer, Fred Schettenhelm, from Milan, has worked with Eden Foods for 10 years. He and a few other farmers will provide Beeson soybeans to the new plant. Fred works with Ron Roller who is in charge of procurement for Eden Foods. The soybeans will not be organic initially, but they must be of premium quality and guaranteed Beeson variety.

“Eden began in 1967 as a student-run cooperative in Ann Arbor. Now it is privately held by six stockholders. Headquarters are near Clinton in northern Lenawee County.” The U.S. market for soymilk is now about \$50 million a year. Edensoy, which has captured 38% of it in the last 3 years, is now Eden Foods’ most successful product. “The taste is nutty, not beany, reminiscent of sunflower seeds.”

While the plant is not big by world standards, it is the first low-acid food producing and aseptic processing plant in the USA. As the author left the plant on Sept. 9, six weeks of FDA inspection was to begin before the plant would begin operation. Photos show: Michigan Department of Agriculture Director Paul Kindinger, Michael Potter, and a Japanese investor. A view of the outside of the plant with a silo. Address: Minnesota.

1655. *McDougall Newsletter (The)*. 1986-- . Serial/periodical.

Santa Rosa, CA: Dr. John McDougall. Vol. 1, No. 1. Sept/Oct. 1986. Editor and publisher: John McDougall, M.D. Frequency: Bimonthly. *

• **Summary:** Form filled out by Dr. John McDougall. 1992. June. The circulation is not given. Address: 3550 Round Barn Blvd., Suite 303, Santa Rosa, California 95403. Phone: 707-576-1654.

1656. **Product Name:** Supersoy [Original, Vanilla, Carob, Cocoa, Lemon, or Coffee].

Manufacturer's Name: Mitoku USA (Importer). Made in Japan by Kibun Health Foods Co., Ltd.

Manufacturer's Address: 292 Washington Ave. Ext., Albany, NY 12203. Phone: 518-456-8006.

Date of Introduction: 1986 October.

Ingredients: Original: Water, whole soybeans, brown rice malt, brown rice, kombu (seaweed).

Wt/Vol., Packaging, Price: 6 oz retort pouch or 6.7 oz Tetra Brik Aseptic carton with straw.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 6 fl oz.: Original: Calories 110, protein 7 gm, carbohydrate 10 gm, fat 4 gm. Vanilla: Calories 180, protein 6 g, carbohydrate 32 g, fat 3 gm. Carob: Calories 180, protein 6 gm, carbohydrate 33 gm, fat 3 gm.

New Product–Documentation: Labels. 1986. 3.75 by 6 inches. Plastic pouch. Yellow, black and white. Original: on blue background. Carob: On cherry background. Vanilla: on tan background. All have glass of soy drink with straw illustration. “Rich, refreshing flavor! No added oil. Low sodium.” Ad, full-page color, in East West. 1986. Oct. p. 105. “All Natural Supersoy. Original Soy Drink. Made from whole soybeans with brown rice. No added oil, salt, refined sugar, or preservatives.” Three packages: 6 fl oz pack; 6.7 fl oz box with straw; 16.8 oz family size.

Ad in East West. 1987. March. Inside front cover. “New! 6.7 fl oz box w/ straw.” Golbitz. 1987. Soya Newsletter. March/April. p. 8. In Oct. 1986 Mitoku USA began to import Supersoy from Japan, where it was made by Kibun. This late entry product was originally available in 6 oz retort pouches but is now packaged in 6.7 oz Tetra Paks in original, vanilla, carob, and cocoa flavors according to Mitoku’s Joel Wollner. Lemon and coffee flavors were just unveiled. Retail prices are \$0.49 to \$0.69 per unit. Talk with Martin Roth. 1989. Aug. 17. He played a key role in developing the concept and graphics for this product.

Letter from Joel Wollner, Executive Dir., Mitoku USA, Albany, New York to East West Journal. 1989. Jan. p. 6. Like Edensoy, Supersoy contains no added oil in any of its 4 flavors and never has since its introduction in 1986.

Talk with John Belleme. 1991. March 7. The company that imported this product and a cola drink, Mitoku (USA), went bankrupt about 18 months ago. Talk with Sherry Kelly of a marketing company. 2001 Sept. 14. Walmart sold Supersoy until several weeks ago, a 3-pack totaling 18.2 oz.

in vanilla flavor.

1657. Photographs of J. Robert (“Bob”) Kennedy in Chico, California. 1986.

• **Summary:** See also next page. Both photos, taken in Oct. 1986, were sent to Soyinfo Center by Carl Ferré who adds: (1) At the Ohsawa America office. “If memory serves, he was rarely in the office at this point in his life. He is sitting at Lane Seiger’s desk—Lane was the manager of the operation. (2) At his home office.” The photo on the wall directly behind his chair is of the youthful couple, Lima and George Ohsawa. Carl adds: “Interesting to see his trumpet in the photo—I only heard him play a few times—he was a real pro.”

• **Summary:** A brief history of Eden Foods and an analysis of the development of American Soy Products, based on interviews and other publications. Address: Lafayette, California.

1659. *SoyaScan Notes*. 1986. What are barley, pearl barley, and Job’s tears? (Overview). Nov. 1. Compiled by William

Shurtleff of Soyfoods Center.

• **Summary:** Note: Barley was one of the first grains cultivated to provide food for both humans and animals. Because it has two hard, inedible husks, most barley is milled to some degree to make it more edible. The word “pearling” is used to describe the refining of barley down to the grain’s endosperm (starch) layer. After the husks, bran and germ are removed, the remaining grain resembles a pearl. For the highest protein, fiber, vitamins, and mineral content, look for barley kernels that have been pearled enough only to remove the tough outer layers.

Barley comes in many forms and degrees of refinement. Hulled (also called whole) barley, has only the tough outer husks removed; it still contains the nutrient-rich germ and bran. Scotch or pot barley is husked and coarsely ground. Barley grits are husked and ground into medium-coarse pieces. Pearled barley has the husk and bran removed and has been steamed and polished; it comes in coarse, medium (the most commonly packaged), and fine sizes.

A new barley hybrid, high beta-glucan hullless, does not require pearling, contains more soluble fiber, and contains starch that is more stable during freezing and thawing.

Job’s tears (*Coix lachryma-jobi*), used as an ingredient in some varieties of soymilk (such as Edensoy) and known as *Hato Mugi* in Japan, are the seed kernels of an annual grass

long prized in the Orient for its health giving and nutritional properties. The term *Hato Mugi* is translated in some Japanese dictionaries as “pearl barley,” but this is not correct; *hato* means “dove or pigeon” and *mugi* means “barley.”

1660. Bennett, Gordon. 1986. Update on work with soymilk at Westbrae Natural Foods (Interview). *SoyaScan Notes*. Nov. 14. 2 p. Conducted by William Shurtleff of Soyinfo Center. [1 ref]

1661. Potter, Michael. 1986. History of Eden Foods and development of American Soy Products joint venture and Edensoy–1971 to 1986 (Interview). *SoyaScan Notes*. Nov. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael Potter joined Eden Foods in Oct. 1971, and by Aug. 1973 he and Tim Redmond each owned 50% of the shares. Under their leadership the company grew steadily until 26 Nov. 1979, when a fire destroyed the Eden warehouse and \$800,000 inventory. The firm with 100 employees and 2,400 products struggled for its life. After the fire, Redmond sold his stock back to the corporation and resigned. Thereafter the company moved to rural Clinton, Michigan, decreased its size and number of products, while switching its emphasis to manufacturing and marketing carefully selected imports.

A major reason for Eden’s recovery after the fire can be traced to support from Muso, Eden’s export partner in Japan. In the mid-1970s Muso had about 12 importers in America but by 1979 many of these had gone out of business. Each bankruptcy dealt Muso a painful blow, as had the fact that many of the natural food products that Muso had pioneered in Japan were now being imitated and launched by other, bigger companies in mainstream Japanese markets. Muso was hurting.

In July 1983 Eden Foods surprised the American natural foods industry by launching two designed-for-America long-life soymilks named Edensoy in plain and carob flavors. Made in Okazaki, Japan by Marusan Ai, packaged in stand-up retort pouches, and exported by Muso, the product was the result of a 15-month process involving trips to Japan to visit Marusan and consultations with the U.S. Food and Drug Administration in Washington, DC. [Note: Individual 6-ounce pouches retail for \$0.69-79, making Edensoy the most expensive soymilk on the U.S. market, selling for 12.3 cents per ounce, or more than 5 times the price of cow’s

milk.]

Eden was the first Caucasian-American company to import soymilk, and their gamble paid off; sales skyrocketed sparked by extensive magazine advertising. Between September and December over 1 million 6-ounce packs had been sold. Now a host of competitors rushed to follow Eden's lead, and many of them went to Muso to ask for a similar product made by Marusan. Eden strongly objected. The result was that in January 1984 Eden became Muso's exclusive import agent in the United States, not only for soymilk but for all products. Both companies considered the agreement beneficial.

Just as Edensoy was getting into high gear, the product had its first serious encounter with the U.S. Food and Drug Administration, which on 2 March 1984 sent Eden Foods a strongly worded letter citing eleven claims in Eden's pamphlets that the agency considered erroneous. FDA expressed concern about the company's apparent endorsement of Edensoy as an infant formula; FDA asked Eden Foods to stop distributing the pamphlet in which Edensoy was promoted as "Good for Babies." Despite the hassle that followed, Edensoy performed much better that year than Eden had dared to hope: 1984 sales were 11 million units (individual pouches), 70% above target, and Potter began to dream about a Marusan soymilk plant in America.

By 1985 privately owned Eden Foods had about 50 employees and annual national sales of about \$12 million. Sales that year were 10.25 million units, down 7% compared with 1984. By 1986 Potter estimated that Eden Foods had 38-40% of the \$50 million a year of the soymilk retail consumer market in the US. Edensoy accounted for 20% of Eden Foods' sales, and Edensoy plain was selling better than any other brand in a small-sized carton. But the market was getting crowded. Yuppies were buying Edensoy. The macrobiotic market was only a small segment for Edensoy.

See also interview with Potter (Nov. 1986) on "History of Eden Foods: Building a soymilk plant in America." Address: President, Eden Foods Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: 800-248-0301 or 517-456-7424.

1662. Snyder, Steve. 1986. New developments at Vitasoy and with soymilk worldwide (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 14. 2 p. transcript.

• **Summary:** A good overview. "Sunsoy is a force, but when Edensoy and Ah Soy come out in liter sizes they will tear hell out of Sunsoy's sales. The US products are better tasting and with better packaging. Sunsoy does not taste that good." Address: San Francisco, California 94107.

1663. Hoefnagels, Herman. 1986. History of Vamo Foods, Vandemoortele, and work with soymilk (Interview).

Conducted by William Shurtleff of Soyfoods Center, Nov. 17. 2 p. transcript.

• **Summary:** This import company is owned by Vandemoortele and Alpro makes their product, Sunsoy. They began U.S. operations on 1 Jan. 1984. Their first product was a frozen dough, which they distributed to the foodservice market. They started importing Sunsoy on 1 Jan. 1985, in both the small and liter sizes.

Initially Balanced Foods was their sole distributor, but that exclusive relationship was ended this year because Vamo wanted to pick up additional distributors. Balanced was always free to distribute other soymilks if they wished.

Both the liter and the small package are selling well.

Future: New dessert product, is a soymilk pudding brand-named "Sunsoy Chocolate Dessert." Packaged in both 1 liter and 250 ml Tetra Briks. Already on market in USA. When introduced? Nothing else new.

He will not disclose sales figures.

Vamo Foods imports two lines, the Banquet d'Or line, which is a frozen dough unbaked puff pastry, produced by Vamic. Vamo Foods distribute them via Incotra, which is their mother company. "All products are sold via our export company, of which I am president in Belgium. We export many other products besides this one.

"We (Vandemoortele) are Europe's biggest soybean crusher. All exports of soybeans and products etc. go via Incotra. It is owned by Safinco, which is the largest company (holding company?).

"Vandemoortele, Alpro, Vamic, and Incotra are all daughter companies of Safinco. Safinco is the largest entity, not Vandemoortele." Address: President, Vamo Foods USA Inc., 20 Shawnee Dr., Watchung, New Jersey 07060. Phone: 201-769-0290.

1664. **Product Name:** Edensoy: Natural Soy Beverage [Original, Vanilla, or Carob].

Manufacturer's Name: American Soy Products, Inc.

Manufacturer's Address: 1474 N. Woodland Dr., Saline, MI 48176. Phone: 800-248-0301.

Date of Introduction: 1986 November.

Ingredients: Original: Water, soybeans, job's tears, barley malt, kombu (seaweed), unrefined corn oil. Carob: Same but carob listed after barley malt. Vanilla: Water, soybeans, barley malt, vanilla flavor, kombu, unrefined corn oil.

Wt/Vol., Packaging, Price: Tetra Brik Aseptic cartons. 250 ml (8.45 fluid oz) retails for \$0.59, or 1 liter (33.8 oz, 1.06 quart) retails for \$1.99.

How Stored: Shelf stable.

Nutrition: Per 250 ml Original: Calories 170, protein 10 gm, carbohydrate 14 gm, fat 9 gm, sodium 120 mg.

New Product-Documentation: Labels (the packages). 1986, dated. 2.5 by 4 inches by 1.5 wide. Paper package.

Original: Light blue and pastels on beige. Vanilla: Blue and pastels on light blue. Carob: Blue and pastels on pink.

Country scene illustration. On back: "Edensoy Refreshes. Edensoy Cooks. Edensoy Starts Your Day."

Ad (full page, color) in *Natural Foods Merchandiser*. 1986. Nov. p. 37. "Our research shows you expect big things from Edensoy." Product distributed by Eden Foods, Inc. of Clinton, Michigan 49236. "The competition has arrived!" (Shows a cow with football helmet standing behind cartons of Edensoy). This ad also appeared in *Whole Foods* (Jan. 1989, p. 18).

Ad in *Natural Foods Merchandiser*. 1989. Feb. 14. "Edensoy Original and Vanilla flavors have been reformulated to contain no oil." New 1989 label for liter carton. The top of the front panel states: "Organically grown. Double certified (Eden/OCIA). Organic soybeans and barley." The OCIA (Organic Crop Improvement Association) "Certified Organic" logo is shown. Product with Label (liter carton) purchased from Berkeley Natural Grocery Co., California. 1990. Dec. 28. Price: \$1.69/liter.

Talk with Ron Roller of Eden Foods. 1991. Nov. 26. The first year that Edensoy was made in America there were not enough organic soybeans available to call any of the products "organic," so the company just mixed the organically grown soybeans with the non-organic. In about Aug. 1990 Edensoy Original flavor started to be made with only organically grown soybeans. In about April 1991 Eden Foods was finally able to get enough certified organically grown soybeans to supply the entire plant, so vanilla and carob started to be labeled as made with organically grown soybeans. Today the two best-selling flavors are vanilla and original.

1665. Eden Foods, Inc. 1986. Edensoy recipes (Ad). *East West*. Nov. p. 53-56. Also published in 1986 as a 12-page booklet (15 x 9 cm) titled "Original Edensoy Natural Soy

Recipes."

• **Summary:** One of these four pages of color ads bears the headline: "Edensoy—America's first soymilk!" Another states "Delicious, nutritious & versatile: Low sodium, high protein, cholesterol free, lactose free, non-dairy." The recipes include: Creamy Edensoy "cheese" topping for pizza. Lasagne. Edensoy salad dressings: Thousand island, poppy seed. Mocha mousse. Edensoy hollandaise sauce—No eggs! Corn chowder. Vegetable pot pie. Edensoy yogurt. Custard filled applesauce cake (with amasake). Creamy white sauce. Edensoy Italian style fettucini. Seafood Newburg. Banana bread or muffins. Eden easy pie crust. Edensoy coconut creme pie. Address: Clinton, Michigan 49236.

• **Summary:** "Erewhon Inc., located in Wilmington, Massachusetts, will change its corporate name to U.S. Mills Inc. Erewhon acquired U.S. Mills in April of 1986.

"We are completely merging the operations of the two companies, and this created the need for a single corporate identity," said Charles T. Verde, president of the new U.S. Mills Inc. The company will continue to use Erewhon as a brand name."

1673. Swientek, Robert J. 1986. Merging of two technologies produces aseptic soy milk: East meets West. *Food Processing (Chicago)* 47(12):128-29. Nov.

• **Summary:** In July 1983, Eden Foods introduced Edensoy soymilk into the U.S. market. Made by Marusan Co., Ltd. in Japan, the product is packed in retortable pouches. Today the product is distributed nationwide and sold in about 20 supermarket chains, including Kroger in the Detroit area and Tops in Buffalo. "According to Michael Potter, President of Eden Foods and C.E.O. of American Soy Products, Edensoy holds a 38-40% market share of the \$20 million/year soy milk retail consumer market."

Construction of the Edensoy plant began in October 1985 and was completed in August 1986. It was officially dedicated on September 9. Address: Associate Editorial Director.

1674. Potter, Michael. 1986. Re: History of Eden Foods. Letter to William Shurtleff at Soyfoods Center, Dec. 2—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** In July 1967 the name "Eden Organic Foods, Inc." started to be used as the name of this company. This was changed to "Eden Foods, Inc." in November of 1969.

In Feb. 1972 Eden Foods began to import foods from Japan, and in June 1972 Muso Shokuhin in Japan became their supplier.

"In Oct. 1971, after providing effective services to Eden Foods, Inc., 13.5% of the common stock of Eden Foods, Inc. was given to Michael Potter by the corporation. At this point the common stock ownership of Eden was: Between William and Judith Bolduc 43.25%, Timothy Redmond 43.25% and Michael Potter 13.5%.

In Feb. 1972 Eden began to import foods from Japan, and in June 1972 Eden began to import foods from Muso Shokuhin.

"In August of 1973 the Bolducs offered to sell their stock in Eden to Michael Potter. Michael Potter accepted this offer and purchased their stock. Because of Tim Redmond's dedication to Eden, Mr. Potter gave enough of this common stock to Mr. Redmond so that the common stock ownership of Eden Foods, Inc. became 50% M. Potter and 50% T. Redmond.

"This situation remained the same until January 1980 when, after a fire destroyed our offices and warehouse, Mr. Redmond sold his stock back to the corporation and resigned, the corporation awarded common stock to its management and Mr. Clifford Adler purchased a significant block of this common stock."

In Jan. 1984 Eden Foods became Muso Shokuhin's exclusive American import agent. In June 1985 American Soy Products was founded. Presently the suggested retail price of Edensoy is \$0.59 per 250 ml pack and \$1.99 per liter pack. They are selling for less in some places, i.e. \$0.49 and \$1.65, respectively.

11,000,000 individual units (6 fl. oz. = 180 ml retort pouches) of Edensoy were sold in 1984 (Jan.–Dec.) and 10,250,000 were sold in 1985 (Jan.–Dec.). This is equivalent to 515,633 gallons or 1,980,190 liters in 1984, and 480,476 gallons or 1,845,018 liters in 1985. Address: President, Eden Foods Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: (517) 456-7424 or (313) 973-9400.

1675. Potter, Michael. 1986. History of Eden Foods: Building a soymilk plant in America (Interview). *SoyaScan Notes*. Dec. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** On 1 August 1986 it was announced that a major new joint stock company, named American Soy Products, had been established to produce Edensoy soymilk in Saline, Michigan, 30 miles west of Detroit, at a new state-of-the-art manufacturing and packaging facility. Michael Potter played a major role in conceiving and pulling together this innovative, exciting, and promising new venture. In July 1983 Eden Foods launched their first Edensoy soymilk, made by Marusan Ai in Okazaki, Japan. It soon proved to be a great success. When Potter began to talk with Marusan Ai about building a soymilk plant in the USA, he found that they were wary. In 1982-83 Marusan had had extensive discussions with Hinode Tofu Co. in Los Angeles, California, about a soymilk joint venture, but the talks eventually broke down over small points; Marusan felt they had wasted a lot of time and money to no avail. So Potter focused on Muso. With competition eating into their domestic Japanese health food market, a venture in America looked promising. Yet neither Eden nor Muso had the capital to build a soymilk plant in America. Enter Kawatetsu Shoji, better known as

Kawasho International. A big New York based firm with money, influence, power, and experience in international business and joint ventures, they were looking to diversify out of coal, steel, and other commodities, into branded foods. They already knew Eden Foods (they had been financing their growing Edensoy imports and inventories from Japan) and they liked the fact that Eden knew Japan and seemed to have a solid, growing product. Kawasho's endorsement of the project was enough to overcome Marusan's reluctance. And with Marusan came Seikensha, the Tokyo based company that had built Marusan's state-of-the-art soymilk equipment. The historic joint venture package, called American Soy Products, was officially founded in June 1985.

Gross investment in the new company was \$10 million. Percentage ownership was Marusan Ai 25%, Kawatetsu Shoji (Kawasho Intl.) 25%, Muso 15%, Seikensha 10%, and Eden Foods Inc. 25%. The chairman of the board was Michael Potter of Eden Foods and the president was Mr. Hiroyasu Iwatsuki, Marusan's soymilk manager, who soon moved to Michigan to go to work.

Each partner had a unique and valuable set of skills to offer. As before, Eden Foods would continue to be responsible for marketing, selling, and distributing all soymilk made by the new company. Kawasho would oversee administration and financing. Marusan would take care of soymilk production. And Muso would coordinate international sales. Seikensha, which has patents on key pieces of soymilk manufacturing equipment, would supply the plant equipment.

Open houses in mid-September were attended by the media and a host of state dignitaries, including the Director of Michigan's Department of Agriculture, who called the new plant "a perfect marriage of high technology and the area's farming." These events, and additional promotion done by a newly-hired, local marketing and advertising firm named Group 243, gave the project extensive, very positive publicity. Widespread color print media advertising, focusing on Edensoy's new larger size package, was also started.

In late October 1986 the sparkling new 22,000 square foot stainless steel plant at Saline (12 miles northeast of Clinton and just south of Ann Arbor, in the southeast corner of Michigan) started test runs, which were carefully monitored by the FDA for 6 weeks. Both the Japanese soymilk equipment and the Swedish low-acid Tetra Brik packaging lines were said to be the most modern of their kind in the world. The company had spared no expense to "do it right." Japanese technicians now living in Saline were training American counterparts.

The factory and land had cost \$2.3 million and equipment cost \$4.3 million. The company committed \$700,000 for startup costs, \$1.8 million for marketing funds, and \$700,000 for working capital. By November 1986 most of this money had been spent.

The new Edensoy was packaged in both regular (250

ml or 8.45 fl. oz. for \$0.59) and large (1 liter for \$1.99) Tetra Brik cartons, in plain, carob, and vanilla flavors. The new prices were significantly lower than before. For example, in 1984 (when it was historically least expensive) Edensoy in a 6-ounce retort pouch had retailed for \$0.69 to \$0.79, or an average of 12.3 cents per ounce. The new 250 ml (8.45 fl. oz.) pack retailed for only 7.0 cents per ounce (down 43%), while the liter size (33.8 fl. oz.) retailed for only 5.9 cents per ounce (less than half the retort pouch, and 16% less than the 250 ml pack). Yet compared with cow's milk at 54 cents per quart (32 fl. oz.) or 1.7 cents per ounce, the Edensoy products are still 3.5 to 4.1 times as expensive per ounce; a much lower ratio than in 1984 but still quite high.

A cornerstone of Eden's food procurement policy since 1973 was the support of local farmers. And Saline was in the heart of Michigan's soybean country. The estimated 85,000 bushels a year of soybeans used to make Edensoy will all be grown on contract with individual Michigan farmers located within a 10-mile radius of the plant. Beeson variety soybeans will be used; though low yielding for farmers, they have a low-oil, high-solids composition and give excellent soymilk. Numerous standard grade parameters will also be specified. Growers will typically receive premiums of 15-30% over conventional markets. By mid-1987 American Soy Products (ASP) hopes to start using organically grown soybeans.

One nice by-product of the new ASP plant was the fact that it was the only plant and Tetra Brik line located in that part of the USA especially designed to package low-acid foods; there were only two others in the entire country, both on the West Coast, and used mostly to pack milk. Thus a host of other companies, wishing to have their own low-acid products packed on Tetra Brik machines, started to line up to use ASP's equipment. This sort of contract packing would serve as an important source of income and keep the packaging operation running 24 hours a day.

ASP's initial run is scheduled to produce 100,000 packages of 250 ml equivalent. The company's first year sales goal is \$5,000,000 produced on 2 shifts. But the first problem is to fill the 20 truckloads that were back ordered.

In November Eden Foods decided that on 1 Jan. 1987 they will stop serving as a wholesale distributor to retail stores in the Midwest (10% of their total business), drop 150 products, and serve as a master distributor, selling only through other distributors. This will allow additional attention to be paid to American Soy Products. Still big marketing and distribution questions remain: Will ASP use brokers? Go direct? Go through grocery distributors? Who does ASP see as their stiffest soymilk competition? Vitasoy and Sunsoy?

What about future plans? A French label for the Canadian market. Organic soybeans. The use of a grain (such as brown rice, barley, etc.) in the Edensoy formula. A cautious attempt to break into the mass market via super markets, but only after careful test marketing in specific

areas. Eventually other similar plants in other parts of the United States.

American Soy Products and the new Edensoy are the most exciting soymilk ventures of 1986, and ones that the industry will be watching closely. Address: President, Eden Foods Inc., Clinton, Michigan.

1676. *SoyaScan Notes*. 1986. Chronology of soybeans, soyfoods and natural foods in the United States 1986 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan.—The first major soy cheese to hit the market is Soya Kaas—a landmark product. It was developed and introduced by Richard McIntyre of Soya Kaas Inc., a subsidiary of Swan Gardens Inc. Marketed exclusively by American Natural Snacks of Florida, it long remain America’s most popular cheese alternative.

Jan. Ron Ishida, an attorney with no previous knowledge of tofu, working for Azumaya Inc. (South San Francisco, California), rewrites the Tofu Standards without authorization. They have already gone through 8 drafts. This creates a crisis.

Jan. *Soyfoods: The Journal of the European Soyfoods Association (ESFA)* begins publication from Paris. Philippe Vandemoortele of Alpro is president of the association and Guy Coudert is editor of the periodical. The association plans to organize a soyfoods conference every 2 years. But the journal is discontinued after 3 issues.

Jan. Tomsun Foods is reorganized, changing its name (for the fourth time) to Tomsun Foods International. The firm’s new chairman is Juan Metzger, founder of Dannon Yogurt. The company produces nearly 3 million lb. of tofu a year.

Jan. First Tofutti Shop opened in Japan by Daiei Co. Inc., Japan’s largest retailer. Shop sells non-dairy soy-based ice cream and related snacks.

Feb. 7. Fire destroys Island Spring tofu plant in Vashon, Washington, with an estimated \$1 million loss.

Feb. Soya Kaas, an imitation cheese containing soymilk and casein, launched by American Natural Snacks, a marketer. The manufacturer is Swan Gardens of Georgia.

Feb. Jofu, a tofu-based, non-dairy, nonfermented, yogurt-like product, sweetened with fruits, launched by Tomsun Foods International of Greenfield, Massachusetts. The product is a hit, grossing nearly \$400,000 in its first 32 weeks on the market.

Feb. Barricini Foods has its first public stock offering. Raises \$1.5 million, gross to use in marketing Tofulite and Ice Bean soy ice creams.

Feb. Central Soya purchases Staley’s protein line, including Mira-Tex, Procon [soy protein concentrate], and Textured Procon brands.

Feb. ASA hires Jim Guinn as technical director of soybean quality programs. Soybean quality is an area of

growing interest, with two parts: 1. The traditional area of soybean condition, concerning grades, damage, foreign material, etc. 2. The newly emerging area of soybean composition and its relation to grades. New measurement technologies make it likely that soybeans may soon be sold based on their composition of oil and protein. Both effect exports and price.

March 5. Pesticide control now tops the Environmental Protection Agency’s list of most pressing problems, announces *The New York Times* (and *Soybean Digest*, June/July). Stricter pesticide laws are enacted.

March 7. Richard E. Lyng of California becomes U.S. Secretary of Agriculture, replacing John R. Block. Policies remain unchanged.

April 18. Wm. Shurtleff, in charge of compiling the original tofu standards, submits a strong criticism of the illegitimate Ishida draft in the form of a detailed chronology of the development of the tofu standards.

April. Tofu cheesecake revolution in New York City profiled by *Whole Life*. Thirteen restaurants now offer them.

May. Tofutti Love Drops (chocolate covered graham cookie drops) launched by Tofutti Brands with much fanfare.

May. Nasoya’s new million-dollar automatic tofu-making system, imported from Sato Shoji in Japan, begins operation.

June. Increasing consumer deception by “soy cheese” manufacturers. *Whole Life* publishes “Whole Frauds in the News: Will the Real Soy Mozzarella Please Stand Up (That is, If There is One),” an exposé of mislabeling involving Soyarella, Tofu Mozzarella, and Soya Kaas (though the latter brand is not at fault). Argues that it is deceptive for health food stores to call a product “non-dairy” if it contains casein (milk protein), even though FDA rules allows such a designation. In Oct. *Whole Life* reports that “Independent lab tests prove Soyarella hoax; Large quantities of casein [19.6%] found in so-called soy cheese.” Soyarella had previously been marketed as casein free.

July. Ralston Purina Co. starts publication of *Nutrition Overview*, a newsletter focusing on soy protein and fiber.

July. Soyfoods win big in 7th Annual Natural Foods Merchandiser merchandising awards: Gold: San-J tamari and shoyu. Silver: Fantastic Foods’ Tofu Scrambler and Tofu Burger, Westbrae Natural miso soups. Honorable mention: Walker & Wilks frozen entrees, White Wave boxed tofu.

July. Vitasoy reintroduces its line of reformulated and repackaged soymilk products, originally launched in 1984. They contain more solids and nutrients, and are sweetened with barley malt instead of maple syrup.

July. A Roper poll in the U.S. finds that tofu is the “most hated” food. 35% of a sample of 2,000 adults checked it on a list of foods said to be disliked, ahead of liver (34%), yogurt (29%), Brussels sprouts (28%), and prunes (24%). Results do not vary significantly by age, but tofu dislike is somewhat less among those with higher incomes. The poll results

are very widely publicized, and are even the subject of a question on the TV program Jeopardy (in early 1988)—and its rerun! These findings suggest both a widespread awareness of tofu and a split image: Some like it and others don't.

Aug. Kikkoman's new shoyu plant starts operation in Chitose, Hokkaido, in northern Japan. The first product was shipped on 30 Jan. 1987.

Sept. 9. American Soy Products Inc. plant dedicated in Clinton, Michigan. A \$10 million joint venture between Eden Foods and four Japanese companies (Kawasho, Marusan, Muso, Seikensha), construction on the plant began in Oct. 1985. It will make Edensoy soymilk in Tetra Brik cartons. The first products are shipped in November.

Sept. 19. Tofu standards passed by Tofu Standards Committee in San Francisco, after all committee members except Shurtleff agree to start with a blank slate in drafting new standards—thus erasing years of work by hundreds of people. Shurtleff resigns in protest, arguing that this is a violation due process. Shortly thereafter Barricini and Ralston Purina also refuse to give final approval. Tofu standards are stalled indefinitely after many years of hard work.

Sept. 24. First International Tofu Products Expo, Seminar, and Soyfoods Buffet, held in Munich, West Germany. Sponsored by Bernd Lehmann International Consultants. 100 people attend.

Oct. Supersoy brand soymilk introduced to America by Mitoku USA. It is made by Kibun Health Foods Co. in Japan.

Oct. Ralston Purina sells its domestic agricultural products business, Purina Mills. Total sales for 1986 were \$5.5 billion.

Nov. Island Spring announces \$6.5 million investment from Edward Lynch Co. to finance an expansion plan. Construction of a new 30,000 square foot factory is now underway on Vashon Island.

Dec. 1. White Wave of Boulder, Colorado, acquires Soyfoods Unlimited, a tempeh manufacturer of San Leandro, California. This makes White Wave America's largest tempeh manufacturer.

Dec. 8. Central Soya purchases 7 of 9 Bunge's soybean crushing plants. ADM is now estimated to control 30% of U.S. crushing capacity followed by Cargill (25%), Central Soya (20%), and other (25%).

Dec. Tomsun Foods International nets about \$3.45 million in its first public stock offering (IPO). Most of the funds will be used for sales and marketing of Jofu, and to repay \$800,000 in debts. Total Tomsun sales in 1986 were about \$3.1 million.

Dec. Haagen-Dazs will drop Tofutti and start distributing Barricini Tofulite, a non-dairy frozen dessert.

Dec. Brightsong Foods is named as one of the top ten food innovators for 1986 by Food & Beverage Marketing magazine. In fact, Brightsong is listed first!

Dec. Tofruzen Inc., a soy ice cream marketer from Englewood, Colorado, raises \$1.6 million in a public stock offering. Sales of Tofruzen in fiscal 1986 were \$91,000, rising to \$158,000 in 1987, and \$213,000 in the first quarter of 1988.

Dec. Edible Soy Products in Hudson Iowa is sold to Solnuts of Tilburg, The Netherlands, and renamed Solnuts, Inc. The Hudson and Tilburg plants are the only ones in the world that dry roast soybeans to make soynuts.

Dec. More than 60,000 Italian farmers harvested nearly 25,000 hectares (61,700 acres) of soybeans this year. Italy is now Europe's largest soybean producing country, followed by France. Five years ago, Italy produced virtually no soybeans. The Ferruzzi Group is the leading promoter, helped by hefty subsidies from the EEC.

1986 New Trends:

So Called Tofu Cheeses. Eight new soy cheeses were launched during 1986, many with the term "Tofu" in the product name. Many have been shrouded in mystery, with the names of the manufacturer and ingredients often not disclosed. There has been much consumer deception, mislabeling, and several attempts to conceal the fact that they usually contain casein, the protein in cow's milk.

Soy Yogurts and Yogurt-Style Products. The leader in this exciting new category is Jofu from Tomsun Foods. The two basic types are fermented soymilk products (e.g. Cream of the Bean, Soy-O), and non-fermented tofu-fruit blends (e.g. Jofu).

Move to Manufacturing Soymilk in America. The rising cost of soymilk imports is making them unprofitable. Domestic production, which obviates shipping U.S. soybeans to Japan, then shipping the beans and water back, will have major, beneficial long-term effects on Edensoy, Ah Soy, and Westbrae Malted. Still imported are Vitasoy (from Hong Kong, whose exchange rate is tied to the dollar) and Sunsoy (from Belgium).

The declining value of the dollar against the yen starting in late 1985 led to a steady rise in soymilk prices. But the combination of domestic production and larger size packages (see below) has led to a drop in soymilk prices during 1986. For example, Edensoy, selling for 6 times the price of dairy milk per unit volume in early 1984, was selling for only 3.5 to 4.1 times as much in late 1986, a drop of about 37%.

Soymilk Switches to Tetra Brik Cartons and Liters or Quarts. Edensoy, Westsoy, and Ah Soy have all switched to Tetra Brik cartons this year. Lower total manufacturing and shipping cost is the main reason. The liter/quart size was pioneered in the U.S. by Alpro/Vamo Foods/Sunsoy, and followed by Edensoy, Ah Soy, and Vitasoy. These counterparts of dairy milk in quarts suit the needs of regular soymilk users by offering a more economical price per unit volume plus greater convenience. Soymilk may be the first liter-size Tetra Brik product to succeed in America.

INTSOY is doing outstanding, pioneering work with

soyfoods and soybean utilization in the Third World and America. Research is focusing on extrusion cooking, extruder-exPELLER processing for small-scale oil expression, and fresh green soybeans. Since April 1987 the INTSOY Newsletter has become one of the best soy-related publications available.

Morinaga Long-life Silken Tofu becomes a major force in the U.S. tofu market. Traditional manufacturers consider the product a major threat to their markets. Azumaya has hired an attorney who spends considerable time causing troubles for Morinaga.

1677. Frost & Sullivan, Inc. 1986. The health foods market in the EEC [European Economic Community]. 106 Fulton St., New York, NY 10038. Or Sullivan House, 4 Grosvenor Gardens, London SW1W 0DH. 303 p. Dec. Price: \$2,300. *
• Summary: While food consumption is growing generally in Europe at about 2% to 3% a year, the health food sectors are growing at 6% to 7%. The total market value for health foods is forecast to rise from \$36.1 billion in 1984 to \$43.5 billion in 1991 (in constant 1985 U.S. dollars). The report covers in depth trends in France, West Germany, the United Kingdom, the Netherlands, Belgium-Luxembourg and Denmark, with summaries for Italy, Spain, Greece, Ireland and Portugal. West Germany has the largest and most structured market for health foods. The last five years have seen the following major changes throughout the EEC: Increased public awareness of nutrition and health; greater health food sales through normal retail outlets; a wide variety of health food products available to consumers.

Soyfoods are apparently not specifically discussed. European countries have the following number of specialist health food stores and general food stores, ranked in descending by descending number of health food stores: Netherlands (53/1,860), West Germany (43/1,400), Belgium/Luxembourg (39/2,000), Denmark (38/1,190), France (32/1,550), United Kingdom (25/760), Italy (3.5/3,020), Spain (3.5/3,090), Portugal (na/4,310). Address: New York, New York. Phone: 212-233-1080 (USA); 01-730-3438 (UK).

1678. *Natural Foods Merchandiser*. 1986. A soymilk first: Made in the U.S.A. Dec. p. 4.

• Summary: A new soymilk plant in Saline, Michigan is a joint venture of 4 companies in Japan plus Eden Foods. It will make Edensoy soymilk.

1679. *Tetra Pak Age*. 1986. Soya beverage is natural addition to health food stores, especially with aseptic packaging. 4(4/4):10-11. Fall/Winter.

• Summary: Discusses Vitasoy and Soy Moo (Health Valley).

1680. *Tetra Pak Age*. 1986. Edensoy: Born of American and Japanese ideas. 4(4/4):12-13. Fall/Winter.

• Summary: Six color photos show Edensoy packages. Describes how the new plant in Michigan was built.

1681. **Product Name:** Westbrae Natural Shoyu. Traditional Soy Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Water, whole soybeans, whole wheat, salt.

Wt/Vol., Packaging, Price: 16 fluid oz (437 ml), 32 fluid oz (.95 L).

How Stored: Store in a cool, dark place.

New Product–Documentation: Label. 1986, undated. 8 by 3.5 inches. 10 by 4.5 inches (32 fl oz). Paper. Orange, blue, brown, yellow, green, white. "Formerly Known as 'Tamari.' The words 'tamari,' 'shoyu' (sho-yu), and 'soy sauce' are often used to describe the same product." Gives a brief history of tamari, shoyu, and modern soy sauce.

1682. **Product Name:** Westbrae Natural Organic Shoyu. Naturally Brewed Soy Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Well water, organically grown whole soybeans, organically grown whole-wheat, sea salt.

Wt/Vol., Packaging, Price: 16 fluid oz (1 pint), 473 ml.

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 8 by 3.5 inches. Paper. Black, gold, orange, green, yellow, white. Japanese village, Mt. Fuji in background. "Westbrae Natural Organic Shoyu is produced exclusively by a religious community in Japan, who apply the strictest standards of quality to every aspect of its manufacture. Aged for 2 summers in cedar wood barrels, it literally is hand-made in very limited quantities, according to the most traditional methods, using pure well water and sun-evaporated sea salt..."

1683. **Product Name:** Westbrae Natural Tofu Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Johsen Shoyu (water, soybeans, wheat, salt), malt syrup (corn, sprouted barley, water), cider vinegar, honey, sesame oil, natural gum stabilizers (tragacanth, xanthan), ginger, cayenne.

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 5 by 3.5 inches. Paper. Brown, tan, blue, green, black and white. Mt. Fuji logo illustration. Meant to be used as a seasoning for tofu.

1684. **Product Name:** Westbrae Natural Traditional Tamari Soy Sauce.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Whole soybeans (57%), water (28%), sea salt (12%), mirin (2%), koji (cultured barley flour) less than one percent.

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml), 16 fluid oz (1 pint, 437 ml), or 32 fluid oz (1 quart, 946 ml). Glass bottles.

How Stored: Shelf stable.

Nutrition: Per 1 tbs.: Calories 18, protein 2 gm, carbohydrate 2 gm, fat 0 gm.

New Product–Documentation: Label. 1986, undated. 6.75 by 3.75 inches (5 fl oz). 8 by 3.5 inches (16 fl oz). 10 by 4.5 inches (32 fl oz). Paper. Blue, green, red, tan, white. Mt. Fuji logo illustration. “Wheat Free. Deep, Rich Flavor.” Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

1685. **Product Name:** Westbrae Natural Organic Tamari (Wheat Free Soy Sauce with Mirin).

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Organic tamari (organically grown whole soybeans, water, sea salt), mirin (cultured rice, water).

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 6.5 by 3.5 inches. Paper. Gold, yellow, blue, green, orange, white. Mt. Fuji logo illustration. “For Sushi. Deeper... darker... richer taste than regular soy sauce. Perfect for dipping sushi... bring it to your favorite sushi bar. Wheat free... aged in cedar kegs for over 1 year.”

1686. Lima. 1986. Natural gourmet recipes from Europe (Leaflet). Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 4 panels each side. Each panel: 22 x 9 cm. [Eng]

• **Summary:** On the front panel is Lima’s logo: “Lima: Trade in the service of life.” A color photo (panels 3-4) shows all of Lima’s products, and below the photo is a brief description of each. “General Agents for Lima in North America, Eden

Foods, Clinton, Michigan 49236. (800-248-0361).” This leaflet is dated: 1986.

On the back 4 panels are recipes. Address: Sint-Martens-Latem, Belgium.

1687. Black Hills Health and Educational Center. 1986?

Cooking with natural foods as you search for abundant health. Hermosa, South Dakota: BHHEC. *

Address: Box 1, Hermosa, South Dakota 57744.

1688. **Product Name:** Westbrae Natural Brown Rice Syrup [Organic, or Traditional “Yin” Sweetener].

Manufacturer’s Name: Westbrae Natural Foods (Marketer/Distributor).

Manufacturer’s Address: 4240 Hollis St. (P.O. Box 8711), Emeryville, CA 94608. Phone: 415-658-7521.

Date of Introduction: 1986?

Ingredients: Incl. brown rice.

Wt/Vol., Packaging, Price: Traditional: 21 oz. glass jar. Organic: 16 oz glass jar.

How Stored: Shelf stable.

New Product–Documentation: Ad in unknown magazine. About 1986. “Rice syrup made complicated.” “Westbrae’s Brown Rice Syrups are sweeteners totally different from corn syrup, sugar, fructose, or honey. Why? Because they contain complex sugars, rather than simple sugars... Westbrae’s Brown Rice Syrups are made in the traditional way without the hydrochloric acid and sulphur dioxide used in commercial corn syrup production. Brown rice is cracked and steamed to allow natural barley enzymes to penetrate the hull. The mixture is kept warm for several hours until the barley enzymes break down the starches of the rice. The syrup is then filtered and cooked down to reach a thick consistency.” A list of 16 Westbrae grain-sweetened products is given. Illustrations (line drawings) show both jars and labels.

1689. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Jan. 1, 1987. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1690. Burros, Marion. 1987. Not-so-natural foods: The tofu alternative. *New York Times*. Jan. 24. p. 10.

• **Summary:** “Natural foods have gone big time.”

“Tofu was supposed to be a nutritious alternative to ice cream, but some tofu-based desserts, like yogurt before them, have more calories than ice cream. What is more,

despite tofu in the name, there are frozen tofu desserts with very little tofu.”

1691. *Guide To Healthy Eating*. 1987. Serial/periodical. Washington, DC: Physicians Committee for Responsible Medicine. Virginia Messina, editor. Neal Barnard, M.D., founder and publisher. Vol. 1, No. 1. Jan. 1987. Frequency: Bimonthly.

• **Summary:** Advocates a low-fat vegan diet and discusses the health and nutritional problems inherent in the standard American diet. Though written for the non-professional lay reader, it has a strong nutritional, dietetic, and medical foundation.

In Sept. 1992 this periodical was discontinued, but became part of a new periodical published by PCRM titled *Good Medicine*, which will contain a nutrition section similar to that in *Guide to Healthy Eating* but which will also include articles on general health and on research issues. Address: P.O. Box 6322, Washington, DC 20015. Phone: 202-686-2210.

1692. *Natural Foods Merchandiser*. 1987. Let's all give a warm round of applause for: Legume, Westbrae, Vitasoy (Ad). Jan. p. 35.

• **Summary:** “For sponsoring a great evening of entertainment and a delicious ‘soyabration’ at the Halloween Rock ‘n Roll Masquerade Party.”

1693. **Product Name:** Vegetarian Nature's Patties Burger with Tofu [Original, or BBQ].

Manufacturer's Name: Nature's Path.

Manufacturer's Address: 9451 Van Horne Way, Richmond, BC, V6X 1W2 Canada. Phone: 604-278-4584.

Date of Introduction: 1987 January.

Ingredients: Tofu (organic soybeans, nigari, water), soya protein, sunflower seeds, brown rice, potato, rolled oats, sesame seeds, walnuts, gluten, tomato, onion, pimento, carrots, peppers, celery, sunflower oil, Engevita nutritional yeast, herbs and spices, tamari soy sauce, psyllium seed, molasses, dijon mustard.

Wt/Vol., Packaging, Price: Family size 10 x 3.3 oz patties, or 4 x 3 oz patties. Each is a plastic bag.

How Stored: Frozen.

Nutrition: Per 100 gm: Calories 236, protein 17.4 gm, carbohydrate 22.9 gm, fat 12.0 gm, sodium 185 mg, potassium 185 mg, fiber 1.5 gm.

New Product–Documentation: Leaflet. 1987, undated. 8½ by 11 inches, color. “Nature's Path Vegetarian Nature's Patties with Tofu. Contains no animal fats, eggs, dairy products, nitrates, or cholesterol. Succulent non-meat patties. 17% protein.”

Spot in *Soya Newsletter*. 1987. 1(4):6. “Made with tofu (17%) and a wide selection of grains and vegetables. Contains no egg or dairy products.”

Label. 1988. 10 by 5.5 inches. Plastic bag. Red, black, and blue on white with color photo of burger and vegetables.

Letter from Rick Furdal, manager. 1988. April 4. They have moved to #170-2540 Simpson Rd., Richmond, BC V6X 2P9. Their restaurant, Woodlands Natural Foods, 2582 West Broadway, Vancouver, BC V6K 2G1 (Phone: 604-733-5411) makes over 100 fresh soyfoods recipes on a rotational basis.

1694. **Product Name:** Westbrae Natural Malted [Carob Malted, Vanilla Malted, Cocoa-Mint Malted, Almond Malted, or Caffeine-free Java Malted].

Manufacturer's Name: Westbrae Natural Foods (Marketer). Made in Los Angeles by House Foods & Yamauchi, Inc.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1987 January.

New Product–Documentation: Ad in *Vegetarian Times*. 1987. April. p. 1. “Malted... thicker and richer than ever—half the fat of a shake! A non-dairy delight. Five delicious flavors. Organic soybeans. Grain sweetened [rice syrup].” No gums or carrageenan are used to enhance thickness. Spot in *Soya Newsletter*. 1987. 1(3):6. Note: Introduced in 1984 and imported from Japan. In Jan. 1987 the product started being made, packaged, and retorted for Westbrae by House Foods & Yamauchi Inc. in Los Angeles.

1695. Appropriate Foods, Inc. 1987. Eat Appropriately! [Catalog and price list]. 292 Liberty Ave., Brooklyn, NY 11207.

• **Summary:** The following lines are carried and distributed: Appropriate Foods, New York Soy Deli, The Soy Source, Emperor's Best, Cedar's Mediterranean Foods, Grainaissance (amazake and mochi), Infinity Foods (amazake puddings), Integrity Baking Co., Jofu, Maine Coast Sea Vegetables, Malka's Foods (Blueberry Tofu Pie), Miso Master, Nasoya Foods, New England Country Dairy, Ray's Seitan Wheat Meat, Soya Kaas, Stonyfield Farms (Yogurt), Sunshine Burgers. Address: Brooklyn, New York.

1696. *Natural Foods Merchandiser*. 1987. Tree of Life acquisition. Feb. p. 4.

• **Summary:** “Tree of Life Inc. recently acquired all the capital stock of Balanced Foods Inc. that relates to all seven natural foods distribution companies for an undisclosed amount.” Tree of Life is a wholly owned subsidiary of Royal Wessanen, NV, The Netherlands.

1697. *Whole Foods*. 1987. Tree of Life buys Balanced Foods: Gains nationwide territory & becomes largest wholesaler. Feb. p. 14.

• **Summary:** Tree of Life, Inc. in St. Augustine, Florida, is now a subsidiary of the Netherlands-based Royal Wessanen NV Co. [Koninklijke Wessanen nv, founded in 1765]; Tree

was purchased by Wessanen in December 1985 for \$15 million. Balanced Foods, formerly America's largest natural foods distributor, was founded in 1939 by Sam Reiser, who is known by many as the father of the natural foods industry.

Note: Tree bought Balanced Foods in late 1986 for an undisclosed amount.

1698. Eden Foods, Inc. 1987. Traditional Japanese foods. 701 Tecumseh Rd., Clinton, MI 49236. Manufacturer's catalog.

• **Summary:** Contains information on the production and use of tamari, shoyu, and miso. The company still uses the terms Hacho [sic, Hatcho] miso, kome miso and mugi miso, and still confuse consumers by calling their shoyu "Tamari-Natural Shoyu." Address: Clinton, Michigan.

1699. **Product Name:** The Great Tofu Cookie.

Manufacturer's Name: Health Valley Natural Foods.

Manufacturer's Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1987 March.

Ingredients: Barley flour, natural fruit & fruit juices of peaches, pineapple, apples and pears, tofu, oats, soybean oil, soy lecithin, pure vanilla, baking soda.

Wt/Vol., Packaging, Price: 6¼ oz (117 gm), paperboard box.

How Stored: Shelf stable.

New Product–Documentation: Leaflet. 1987. 8½ by 11 inches, color. "These moist, chewy cookies are the first ones made with protein-rich tofu..." Label reads: "High energy cookies with mixed fruit. Fruit juice sweetened. No added sugar or salt. Wheat free."

1700. Imuda, Ikuyo. 1987. Jidai o sakidori suru tenpe ryōri. Machi no chiisana resutoran kara [Tempeh recipes that are ahead of their time, from Healthy Kan, a small natural foods restaurant in Tokyo]. *Daizu Geppo (Soybean Monthly News)*. March. p. 39-41. [Jap]

• **Summary:** The restaurant is two blocks (3 minutes) from the Ichigaya Station on the Sobu Line in Tokyo. Phone: 263-4023. Tempeh recipes include "Tempeh jiru teishoku" (¥800). Tempeh is a tasty, nutritious soybean food from Indonesia. The menu includes "Brown rice, soup with fried tempeh, side dishes." The restaurant also serves a tofu cheesecake for ¥300. Address: Restaurant owner and nutritionist.

1701. Jacobs, Leonard. 1987. All-American soymilk. This popular Oriental import is now being made in the U.S. *East West*. March. p. 22-23.

• **Summary:** Discusses U.S. ventures of American Soy Products (Edensoy), Great Eastern Sun (Ah Soy), Health Valley, and Westbrae. Great Eastern Sun found a manufacturer of soymilk in Minnesota that uses a patented

process to eliminate the beany flavor. They aseptically package in quart containers. Health Valley purports to make their soymilk in California.

1702. Le Seuil. 1987. Catalogue [Catalog]. Zone Industrielle, 34190 Ganges, France. 34 p. 21 x 10 cm. [Fre]

• **Summary:** In French "Seuil" means "Threshold, sill, or shelf (of the ocean bed)." Contents: Oriental specialties (tamari, shoyu, and miso imported from Japan, p. 6-8). Soya pasta (spaghetti & macaroni, p. 15). Yellow soybean (p. 17). Virgin soy oil (p. 20).

Letter from Maurice Marchand. 1989. June 1. The company, which was founded in 1979, moved to this new address on 1 Jan. 1986. They are very interested in soyfoods, both imported (they import from Mitoku and Yamato), and made in France (they work with Athanor and Sojadoc). Address: Ganges, France. Phone: 67.73.99.80.

1703. **Product Name:** Westbrae Natural Tofu Imitation Mayonnaise.

Manufacturer's Name: Westbrae Natural Foods.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1987 March.

Ingredients: Pressed safflower oil, tofu, brown rice syrup, lemon juice, cider vinegar, sea salt, natural spices.

Wt/Vol., Packaging, Price: 1 pint glass jar.

How Stored: Shelf stable.

Nutrition: Has 1/3 fewer calories and fat than mayo made with eggs, less sodium, and none of the cholesterol.

New Product–Documentation: Spot in *Natural Foods Merchandiser*. 1987. Dec. p. 49. Spot with label photo in *Vegetarian Times*. 1988. Feb. Label reads: "25% less fat & calories, No egg. No cholesterol. Low sodium." Spot says: "Its smooth, nongrainy texture makes it great on sandwiches, and just right for deli items like potato salad." Spot with photo in *Health Foods Business*. Feb. Interview with Westbrae. 1988. March 4. The product was initially launched in March 1987, then pulled because of production problems. It was re-launched in November 1987.

1704. Golbitz, Peter. 1987. Aseptic and retort soymilk enters new era. Sales flat in '86. Forecast up for '87. *Soya Newsletter (Bar Harbor, Maine)*. March/April. p. 1, 8-9.

• **Summary:** An important update on the U.S. soymilk industry and market. Estimated U.S. aseptic and retort soymilk sales for 1983-87 (in gallons) are 1983 250,000; 1984 600,000; 1985 750,000; 1986 650,000; 1987 1,800,000 (projected). Average retail prices per gallon rose steadily from \$12.50 in 1983 to \$18.00 in 1986, but are projected to have dropped to \$8.00 in 1987. The jump in production combined with the drop in prices may lead to little or no increase in income. Companies and brands discussed are Eden Foods' Edensoy, Vitasoy, Great Eastern Sun's

Ah-Soy, Westbrae Natural Foods' Malted and West Soy, Health Valley's Soy Moo, Mitoku's Supersoy. No sales or production figures are given for individual companies. Address: Soyatech, Bar Harbor, Maine.

1705. *Soya Newsletter (Bar Harbor, Maine)*. 1987. 10,000 attend Natural Foods Expo '87 West. March/April. p. 3.

• **Summary:** The Soyfoods Pavilion, sponsored by the Soyfoods Assoc. of America, occupied 10 booths and was one of the busier areas of the show. At least 50 new soyfoods products were introduced. SAA has tentative reservations for at least 22 booths at the NFE '87 East show in Philadelphia in October.

1706. *Soyfoods (ESFA)*. 1987. News from the world: Spain. *Dietetique et Sante in Spain*. 1(2):26. April. [Eng]

• **Summary:** "Diététique et Santé SA (Gerblé, Milical, Nergisport, Bisson) leader of the Health foods for adults in France has taken a majority share in the Spanish Dietisa SA, leader of the Health food market in Spain. At Dietisa Headquarters in Barcelona, the company has a modern plant and laboratory. Dietisa has subsidiaries in the UK, Switzerland and Venezuela."

1707. *Daily Item (The) (Sunbury, Pennsylvania)*. 1987. Obituaries: Mrs. Enid Betty Keene, 74, co-founder of Walnut Acres. May 30. p. 8.

• **Summary:** Mrs. Betty Keene, wife of Paul Keene and co-founder of Walnut Acres, died on May 28, early Thursday evening, in Evangelical Community Hospital, Lewisburg, Pennsylvania. She was age 74. She will be buried in Penns Creek Union Cemetery. There will be no viewing or visitation.

A combined funeral and memorial service will be held on Sunday, May 31, at 2:30 p.m. at the Emmanuel Church of Christ, Penns Creek, with the Rev. Steven Hoffman and Rev. J. Odell Zechman officiating.

Betty was born on 23 Aug. 1912 in New Delhi, India, the daughter of the late Rev. and Mrs. David Thomas Morgan, who were British missionaries in India for 45 years.

"She was educated in several boarding schools in India and received her college degree from Women's Christian College in Madras, South India. She spent a number of years teaching at the Woodstock School in Landour, Mussoorie, India. Woodstock was a boarding school started many years ago to educate children of all races whose parents were missionaries, business people and government officials. It was begun and run primarily by American and British citizens, and it prepared pupils for entrance to colleges in the United States, Great Britain and Canada."

In 1938 Mrs. Keene met Paul Keene, her husband-to-be, when he was sent by the Methodist Board of Foreign Missions to spend two years teaching at Woodstock. They were married in 1940 in Bangalore, South India, in the

Ebenezer Baptist Church, where her father was pastor.

She is survived by her husband; by three daughters, Marjorie Ann Hartley of Pittsburgh (Pennsylvania), Ruth Anderson of Middleburg RD2 (Pennsylvania), and Dr. Jocelyn Keene Phillips of Pasadena, Calif; and by five grandchildren. A member of Emmanuel United Church of Christ in Penns Creek Betty was active in church, school, and community affairs.

Founded in 1946, Walnut Acres is an organic, natural foods farm, processing plant and distribution center that sends its products all over the world.

A portrait photo shows E. Betty Keene.

1708. F.L. 1987. How nice, brown rice. *Vegetarian Times*. May. p. 12.

• **Summary:** American per-capita rice consumption has grown from 9.8 lb in 1975-76 to 17.4 lb in 1984-85, in part because of the influx of Asian and Hispanic immigrants. Brown rice accounts for only 1% of this total; white rice is 77%, followed by parboiled rice at 17% and precooked or "minute" rice at 4%. Heinz recently bought out Chico-San's rice cake business, and Quaker Oats bought out Arden's.

1709. **Product Name:** Soy Moo (Soymilk) [Fat Free].

Manufacturer's Name: Health Valley Natural Foods.

Manufacturer's Address: 700 Union St., Montebello, CA 90640.

Date of Introduction: 1987 May.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Talk with Pat Carey, marketing manager for Pacific Foods of Oregon. 1997. May 5. To the best of Pat's knowledge, the first fat-free or nonfat soymilk in America was Health Valley's Soy Moo. It was introduced about 5 years ago, at about the time that Health Valley was converting their entire line to non-fat.

1710. Kushi Institute. 1987. Take a summer adventure in macrobiotics: 1987 summer intensive (Leaflet). Boston, Massachusetts. 4 panels. Front and back. Each panel 8.5 x 22 cm. [8 ref]

• **Summary:** To be held from July 13 to Aug. 28.

The Institute is located in both Brookline and Becket.

"The Kushi Institute: Founded in 1978 to provide education in the principles and techniques of macrobiotics—a dynamic, transformational approach to life—the Institute has educated thousands of people from around the world. It continues to provide programs that enrich the experience of life. Its goal—a healthy and peaceful world.

The Institute Faculty: Senior teachers and counselors, leading authors, popular lecturers—the international faculty includes founding members Michio and Aveline Kushi, Shizuko Yamamoto; along with Ed Esko, Richard France, Marc Van Cauwenberghe, M.D., Ron Kotsch, Ph.D., Evelyne Harboun, Diane Avoli, Charles Millman, Annirene

Yanni, David Serge, John Kozinski, Joe Avoli, and Mary Kett. Invited teachers also include—Steve Gagne, Bill Tara, Murray Snyder, Denny Waxman, and others.

“The complete program is an integrated curriculum offered in three progressive levels:

Level I: Personal Transformation. Level II

Level II: Social Transformation.

Level III: Planetary Transformation. Address: P.O. Box 1100, Brookline Village, Massachusetts 02147. Phone: (617) 739-0045.

1711. **Product Name:** Tree of Life Soy Oil.

Manufacturer’s Name: Tree of Life, Inc. (Distributor).

Manufacturer’s Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1987 May.

New Product–Documentation: Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in May 1985.

1712. *Whole Foods*. 1987. Manufacturers, importers, growers [of natural/health foods: Directory]. May. p. 178-190.

• **Summary:** A rich source of inaccurate information about soyfoods manufacturers in the USA.

1713. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: June 1, 1987. Spring / summer. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1714. Moore, Sally. 1987. A small farm grows to a big business: Paul Keene, owner of 41-year-old Walnut Acres farm in the Pennsylvania Dutch country, thinks of himself as a simple farmer, not the health guru he has become. *New York Times*. June 10. Living desk.

• **Summary:** In 1940, when Paul and his bride returned to the United States, he was a different person. Although mathematics no longer interested him, he taught math at Drew Univ. for a year. Then the couple went to live at economist Ralph Borsodi’s School of Living near Suffern, New York; there he ran a cooperative store and taught homesteading—which prepared him for their next move, to Kimberton Farms School, near Philadelphia.

Paul and Betty stayed at the Kimberton organic [sic, biodynamic] farm school for two years. “Then after a stint as tenant farmers, they decided to buy their own place. In 1945

[sic, 1946] they paid \$5,000 for 108 rocky acres and some dilapidated buildings near Penn’s Creek. ‘The barn roof was rusty and the buildings were falling down,’ Mr. Keene said, ‘but oh, it was so beautiful!’”

At Penns Creek, the Keens had no plan to become entrepreneurs. They planned to work as subsistence farmers, growing crops organically, and using the milk from their single cow to make cheese. Money from that cheese could be used to buy necessities they could not cultivate or barter. But as time passed, this plan proved impractical, so they began selling surplus farm products like apple butter made from organic apples cooked in kettles over an open fire.

They called this product Apple Essence. Fortunately a jar found its way to Clementine Paddleford, food editor at the *New York Herald-Tribune*. She sang its praises in her column and, before long, cards and letters began to pour in. The subsistence farm was on its way to becoming a business.

In their catalog, symbols are used to designate three types of organic products: (1) Those made from ingredients grown organically at Walnut Acres or at farms visited by Mr. Keene; (2) Those certified as organic by the grower but not inspected by Mr. Keene. (3) Those guaranteed by Mr. Keene to be free of poisonous chemical sprays during the process of cultivation, but not necessarily grown on soil fertilized organically.

In addition to their direct mail order business, Walnut Acres also sells some of their foods via health-food stores or through a drop-off service to customers who live within 250 miles of the farm. Such deliveries are made once a month, and drop-off points are usually at the homes of businesses of customers who have volunteered to accept deliveries for other customers in their area.

The most frugal customers visit the farm and stock up at the retail store, where a lunch bar also offers a selection of soup and sandwich, herb teas and natural sodas. Nearby is a small library of materials on natural foods and organic farming. If they tour the kitchens, they might see (and smell) freshly baked granola, cookies and bread, plus soups and stews simmering in the cannery.

The farm is open daily from 8-5 except Sundays and holidays. Tours are conducted from 8:30 to 3. For more information, write Walnut Acres, Penns Creek, Pa. [Pennsylvania] 17862, or call 717-837-0601.

A photo (by Fred S. Prouser) shows Paul Keene.

1715. Muir, A.; Kalnins, D. 1987. False advertising resulting in infant malnutrition. *Canadian Medical Association Journal* 136:1274. June 15. [5 ref]

• **Summary:** Documents the case of an infant who, at 6 weeks of age, was put on a soybean-based product called Eden-soy. “The health food retailer had supplied the parents with a ‘professional looking’, colorful monograph that advertised the drink as ‘good for babies’ and a ‘quality substitute’ for breast milk. Their family physician had

endorsed the product after a cursory inspection of the brochure, and the infant was exclusively fed Eden-Soy, without vitamin supplementation.” Four months later he had become wasted because the formula did not contain enough calories. He also had developed night blindness and rickets because the supplement did not contain sufficient quantities of vitamins A and D. Address: Div. of General Pediatrics, Dep. of Pediatrics, and Dep. of Food Services, Hospital for Sick Children, Toronto, ONT, Canada.

1716. Associate Director, Import Operations Unit, (HFC-131). 1987. Revision to Import Alert #40-01–”Soy drinks, milk substitute drinks and other drinks that may serve as infant formulas.” *Import Alert*. June 30.

• **Summary:** Discusses: Eden Foods’ Edensoy, Soy Moo, Sun Soy, Ah Soy, Westsoy, Vitasoy, Westbrae Malted. Summarized in Soya Newsletter. 1987. 1(4):7. Recommends continued surveillance. Address: Washington, DC.

1717. Bennett, Gordon. 1987. What people drink [Westbrae Malted]. *East West*. June. p. 8-9.

• **Summary:** Starting in January 1987, Malted were made from the first time in America, in California. Malted’s prices dropped about 20%, calories dropped 15%, and they now contain organic soybeans and brown rice syrup. “We have an exclusive manufacturing agreement with a U.S. soymilk producer that has access to the most sophisticated equipment and know-how available in Japan today.” Address: President, Westbrae Natural Foods, Emeryville, California.

1718. Hoffman, Steven M. 1987. The vine ripens: Organic agriculture comes of age. *Natural Foods Merchandiser*. June. p. 10-11, 13, 16, 19-20, 22.

• **Summary:** “As farmers seek low cost alternatives and consumers demand high-quality, healthful foods, the organic industry is seeing renewed interest. Eight states have already enacted statutes governing foods: California, Oregon, Maine, Massachusetts, Washington, Minnesota, Nebraska, and Montana. The California Act, enacted in 1979 and upgraded in 1982, defines the term ‘organic’ and sets legal standards of production for growers.” Also discusses OCIA, and CCOF (California Certified Organic Farmers).

1719. Johnson, Kirk. 1987. Hidden fats in whole foods diets. *East West*. June. p. 62-68.

• **Summary:** A full-page table (p. 65) titled “How the substitutes stack up” shows total fat and serving size for the following categories: Dairy products. Substitute dairy products. Meat. Substitute meat products. Frozen dinners. Miscellaneous. The substitute dairy products include: Tofu Cream Chie (21st Century). Soya Kaas (soy cheese from American Natural Snacks). Tofutti (Tofu Time). Le Tofu (Brightsong Foods). Ice Bean (Farm Foods). Tofu, silken (Nasoya). Tofu, soft (Nasoya). Tofu, firm (Nasoya). Soybean

margarine (Willow Run). Soymilk (Edensoy). Soymilk (Health Valley). Soymilk (Vitasoy).

Substitute meat products include: Fakin’ Bacon (Tempehworks). Tofu Wieners (Yves). Tofu Pups (Tempehworks). Vegie Burger (Bud, Inc.). Tofu Burger (Bud, Inc.). Gardenburger (Wholesome & Hearty). Tofu Sausage (Vegetable Protein Co.). Tempeh, 3-grain (Tempehworks). Seitan (“wheat meat”).

Meatless frozen dinners include: Tofu Lasagna (Legume). Meatless Pepper Steak with Kofu & Noodles (Legume). Sweet and Sour Tofu (Legume).

Miscellaneous products include: Nasoyannaise (Nasoya Foods). Salad dressing, Creamy Tofu (Nasoya). Miso.

1720. Torii, Yasuko. 1987. New developments with tempeh in Japan (Interview). Conducted by William Shurtleff of Soyfoods Center, July 1. 2 p. transcript.

• **Summary:** Torigoe-Seifun stopped making tempeh in mid-1987. They had a hard time popularizing it. Marusan’s tempeh is not selling well. They, too, are thinking of stopping. Mr. Kanasugi and the Natto Assoc. are trying to cooperate with Marusan. They suggest selling “tempeh miso,” made as follows: Mix 10 kg tempeh, 10 kg barley koji or rice koji, and 1 kg salt. Grind in a meat grinder and let stand at room temperature in the summer for 1 month. The result is a sort of Finger Lickin’ Miso. Barley koji works best, and the resulting tamari is delicious. Mr. Kanasugi hopes some miso maker will make this. Only Mr. Kanasugi is doing tempeh research. He makes this miso in his restaurant daily. He also makes a spread like peanut butter. Mr. Ose is still making tempeh but his business, Udai, is not doing well. No one is left at the Ministry of Agriculture with an interest in tempeh: Mr. Katoh went to work with FAO in Rome and Ohta went to Showa Seiyu.

Why did tempeh fail to catch on in Japan? 1. It was poorly marketed. 2. The ads and Torigoe aimed at the older generation who still know how to deep fry foods. 3. It is not clear whether the attempted tie-in with natto was helpful or harmful. Natto is a convenient fast food. Now tempeh is not even sold at Natural House, the natural foods supermarket. Organic soybeans from Living Farms are now widely used in Japanese miso and natto.

Note: This is the earliest document seen (March 2020) that mentions a “natural foods supermarket” in Japan. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

1721. *Natural Foods Merchandiser*. 1987. 8th Annual Natural Foods Merchandiser merchandising awards [Gold: Eden Foods’ Edensoy, and Fantastic Foods’ Fantastic Noodles (Miso Vegetable)]. July. p. 28-29.

• **Summary:** The Edensoy package design was developed by Group 243 in Ann Arbor. “The look is inviting yet sophisticated, with both sizes of Tetra-pak boxes bearing

loosely impressionistic illustrations of landscapes in tranquil colors. Design criteria included warm, energetic food that was natural, refreshing, and healthful.”

1722. Robeznieks, Andis. 1987. One-liners [Statistics on vegetarians and natural foods in America]. *Vegetarian Times*. July. p. 73.

• **Summary:** Percentage of U.S. population who considered themselves vegetarian in 1978: 0.55%. In 1986: 3.7%. Percentage of American women aged 19-50 who are vegetarian: 4%. American men aged 19-50: 1%. American children: 2%.

1723. Rottenberg, David. 1987. Innocence lost: How Tom Timmins, a son of the sixties, is turning tofu into the keystone of an empire. *Boston Magazine*. July. p. 51-57.

• **Summary:** One of the best articles written on developments during the 1980s for Tomsun Foods, Timmins (with two large photos), Juan Metzger, and David Kirsch. Last year Timmins sold \$3.1 million of tofu. Jofu grossed nearly \$400,000 in its first 32 weeks on the market. Jofu is now sold in 11 flavors, 5 honey sweetened. With the help of Evans & Company, a New York City underwriting firm, Timmins took Tomsun Foods public with a \$4.25 million stock offering. And he is pouring \$1 million of new capital into a new product, Jofu, a tofu-based “spoonable snack” resembling yogurt. Timmins’ goal is a 7% share of the \$1,000 million a year U.S. yogurt market.

The company headquarters is now located at 247 Wells St. in Greenfield, Massachusetts. Seven employees (including Timmins, who has 4 kids) work here, and another 68 work down the road at the factory—which uses more than a million pounds of soybeans a year. Timmins notes: Our product philosophy is completely vegetarian. Not because we’re vegetarians—I’m not anymore—but that’s our niche, that’s who we are.”

“One day in 1979 Juan Metzger, founder of Dannon Yogurt, called Tom Timmins. Metzger, it seems, had been intrigued by a *Wall Street Journal* article on tofu that mentioned Timmins. Might be something in tofu for Dannon, Metzger thought. Metzger had just achieved his goal of national distribution of Dannon Yogurt. Now he was thinking about expanding his product line. Would Timmins be interested in selling soy dairy to Dannon? Metzger wondered. Meetings were held and preliminary studies made. The plan was to have Timmins package tofu under both his label and that of Dannon. Dannon would provide Timmins with national distribution and, according to Metzger, ‘in 6 to 12 months, if we were still on friendly speaking terms and the product showed promise, I would get Beatrice Foods [Dannon’s parent company] to buy that company for Dannon and make it a Dannon subsidiary and keep [Timmins] as head man.’ In the end, however, Beatrice Foods nixed the deal. It didn’t want its most profitable subsidiary sinking

money into a new and potentially risky venture. But during the negotiations Metzger and Timmins discovered that, although they were nearly 30 years apart in age, their goals and thinking were similar.

“Two years later Beatrice sold Dannon for \$84 million to a French company, BSN-Gervais-Danone. Metzger quit and joined forces with another food executive, his friend David Kirsch, whose family had just sold its No-Cal soft-drink business to Canada Dry for over \$75 million. They formed a food consulting company they called Metzger, Kirsch Associates.

“So when Timmins started thinking about taking his company national, he called in Metzger, Kirsch, which had just the kind of big-time expertise he needed. And in 1983 they struck a deal: Juan Metzger and David Kirsch became Timmins’s partners. Instead of salaries, Metzger and Kirsch each received approximately 13 percent of the company’s stock, with Timmins retaining 22 percent. The rest of the stock was distributed among other employees and investors. Metzger became chairman of the board; Timmins president and chief executive officer; and Kirsch, senior vice president.”

“One of the first big changes was in the name: New England Soy Dairy, established by Timmins in 1978, became Tomsun Foods in 1983.” They then set out to develop a “spoonable snack” which, like yogurt, “permitted value-added pricing... And so the Dannon success story became the paradigm for Tomsun.” They named the product Jofu, in part since both Timmins and Metzger have young sons named Joe. Now Tomsun Foods is making 11 flavors of Jofu, 5 of them sweetened with honey.

“The partners allocated a third of the \$4.5 million raised in their public stock offering last December to advertising. Half a dozen radio commercials created by the New York City advertising firm Calet, Hirsch and Spector are already touting Jofu as a snack ‘beyond yogurt.’ Tomsun is targeting college students, who are thought to be more open to new foods, and spoonable snacks suit the collegiate lifestyle.

“Jofu is now sold in about 80 supermarket chains in the Northeast...” It is sold right next to the dairy yogurt. Now Jofu is spawning imitators. Six other soyfoods companies, including Brown Cow West, Bud, and Cream of the Bean, already have yogurt-like tofu products in supermarkets, and more are planning their own entries. “To date, Jofu is the only yogurtlike food that is not cultured.”

The Massachusetts Community Development Finance Corporation, a state agency that assists small businesses, was one of the first investors in Tomsun Foods; they sunk in \$200,000, which has since been paid back. Charles Grigsby, the president of this finance corporation, says: “Tomsun Foods has been a remarkable little example of how to grow a company. He adds that Timmins “is one of those people who remarkably has gone from a promoter/entrepreneur to a sound manager. Often people can’t make that transition.”

Timmins' story is the story of those who came of age in the 1960s. While he was at Notre Dame (class of 1967), the movement against the Vietnam war was in full swing. When his local draft board rejected his pleas for conscientious objector status, he fled to Montreal [Quebec], Canada. But he returned, his girlfriend became pregnant, so he worked for the post office for a year, then back to the farm in Iowa for a year and briefly to jail. "By then Timmins was a vegetarian, but that didn't stop him from going to work for a chicken-canning factory; he had two children to support." The first real job he liked was a \$100-a-week position as manager of the Yellow Sun natural foods co-op in Amherst. In 1975 his marriage broke up. He left the co-op and got married again. He and his second wife soon moved to Brattleboro, Vermont, where he was one of America's largest independent distributors of natural foods, now called Stow Mills [but in 1975 named Llama Toucan & Crow]. Within a year Timmins was longing to go into business for himself. In the fall of 1976 he returned to the Amherst, Massachusetts, area where he started the Laughing Grasshopper Tofu shop with two friends, Richard Leviton and Kathy Whelan. "The first year we were working seven days a week, 10 hours a day—around the clock eventually."

"But after two years Leviton and Whelan got fed up with the grind and sold their shares to Timmins for \$10,000. Once again Timmins picked up stakes. He moved himself and his family to Greenfield, incorporating his business there under the name of New England Soy Dairy. Though Timmins was a genuine marijuana-smoking, draft-dodging, long-haired member of the Woodstock generation, his beard went in 1977. His long hair went in 1979. His communal management style backfired in 1983, when his employees started unionizing. But today Tomsun is third largest tofu manufacturer, after House Foods and Yamauchi, Inc., and Azumaya, Inc., two California-based companies whose primary market is Asian American. But Timmins, now age 41, has no intention of staying in third place. His number one goal is national distribution—which he thinks will take 4 to 5 years to accomplish—even though it took Juan Metzger 17 years to achieve that at Dannon. His second goal is \$100 million in annual sales.

1724. Wood, Rebecca Theurer. 1987. Rice syrup's sweet taste of success: This versatile product may be the best natural sweetener. *East West*. June. p. 14, 16-19.

• **Summary:** Japan's traditional sweetener is rice *malt* syrup; it is made by adding malt (dried sprouted barley) to cooked rice. The malt's enzymes convert the starches in rice into maltose and easily digestible (soluble) complex carbohydrates. This mash is then strained and cooked to the desired consistency.

Robert Kennedy, former president of Chico-San, is responsible for introducing rice syrup to the USA. In the early 1970s, Chico-San began making a traditional rice syrup

using malt (dried sprouted barley) and sweet rice. But the company experienced many production problems. In 1984 Kennedy sought help from California Natural Products (CNP), a research and development company in Manteca, California, headed by Pat and Cheryl Mitchell—a husband and wife team. The Mitchells realized that the product had great potential; they took it over, turned it around, and developed it into a viable product—in fact a big success.

That same year, Robert Nissenbaum of Imagine Foods began marketing Rice Dream, his frozen amasake dessert. Like Kennedy, he experienced problems and ended up taking the product to CNP, which designed a new product to his specifications. Today more than 30 companies are either marketing or using in their products a rice sweetener that has been specifically formulated for their needs by CNP. Note: The new product in each case was made from commercial enzymes rather than from koji.

Contains recipes.

1725. Yamazaki, Junsei. 1987. The Junsei Yamazaki miso and umeboshi story (Brochure). Route 1, Box 1333, Orland, CA 95963. 6 p.

• **Summary:** Junsei arrived at Chico-San in May 1963. His wife, Kazuko, came in 1968. Later that year he went to New York to help Michio Kushi with his restaurant. He returned to Chico-San the following spring (1963?) where he started to make traditional miso and soy sauce. He had learned how while growing up on his family's farm in Chiba prefecture. He had attended Tokyo Agricultural University and majored in organic chemistry. Also at Chico-San he made rice syrup, called Yinnies. Now he and Kazuko live on their 5-acre farm in Orland, California. He makes organic miso (brown rice, rice, and barley) and she umeboshi salt plums with shiso. Both farm. Address: Orland, California. Phone: 916-865-5979.

1726. **Product Name:** Ah Soy (Soy milk) [Original, Chocolate, or Vanilla].

Manufacturer's Name: Great Eastern Sun (Marketer-Distributor). Made in Minnesota by St. Peter Creamery.

Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1987 August.

Ingredients: Incl. Soybeans, water, cold-pressed safflower oil, carrageenan, pure Bourbon vanilla, dried cane juice.

Wt/Vol., Packaging, Price: Quart Tetra Brik Aseptic carton. Packed 12 to a case. Wholesales for \$12/case.

How Stored: Shelf stable; refrigerate after opening.

New Product—Documentation: Ad (full page, color) in *East West Journal*. 1985. Sept. p. 28. "Ah soy: Finally a really soft drink." Note: The flavors were later elaborated to American Original, Dutch Chocolate, and French Vanilla.

Leaflet. 1987, undated. "Ah Soy. New Improved Flavor. Quart Size. Made in America. Popularly Priced. Sweetened

with Organic Unrefined Cane Juice. The Ah Soy Story—Totally New Formula!!!” Tetra Pak Age. 1987. Summer. p. 12-13. Color photo of three quart Tetra Brik cartons. Red, blue, and yellow on white background.

1727. Hawken, Paul. 1987. Truth or consequences: The best way to differentiate your company from competitors, says the author, is to tell customers the simple truth about your products or services. *Inc.* Aug. p. 48-50, 52.

• **Summary:** Twenty years ago Hawken, suffering from asthma, was trying to restore his health. He began to experiment with diet and discovered that when he stopped eating the normal American diet of sugar, fats, alcohol, chemicals, and additives, he felt better and could breathe freely. So he “started the first natural food store in Boston, one of the first in the country. In the beginning it was a modest operation, grossing \$300 a day. When I finally sold the business after about seven years, Erewhon Trading Co. was grossing more than \$25,000 a day. That was in 1973. I went abroad to write a book about a community in Scotland [Findhorn].” With Erewhon, Hawken had helped to launch a new industry.

“A couple years later, I returned [to America] and discovered another reason to go into business for myself: I was unemployable. I had not held a salaried job in my adult life. I had no college degree... I spent the next 3 years consulting for various companies, doing three turn-arounds for companies in deep trouble, and writing another book. Then, in 1979 my friend Dave Smith and I founded Smith & Hawken, an importer and direct marketer of high-quality garden tools.” Today Smith & Hawken has gross sales of \$20 million.

“With a truly original product, you must, in effect, create a new market, as opposed to establishing a new niche in an existing market. You’re competing not against other products, but against the inertia of the marketplace.

“At Erewhon, we started out as absolute food geeks: our foods were so far outside the mainstream that people couldn’t pronounce half the names. We were treated with suspicion or derision. A trucker unloading some millet asked us if we ate this bird food. By about 1970, however, we knew we had located the center of the stream. Natural food stores were opening as quickly as they could line up vendors. We had already added a wholesale operation to our retail business, and we were landing a hundred new accounts a month, on top of expanded resales to existing customers. We were gliding.” Address: Mill Valley, California.

1728. *Natural Foods Merchandiser*. 1987. The Guide. Facts and contacts for the natural foods industry. The supply side: An ABC directory. Manufacturers. Aug. p. 34-72.

• **Summary:** Lists about 50 soyfoods manufacturers, and some that say they are but actually are not. Address: New Hope, Pennsylvania.

1729. **Product Name:** [Soyastern Shoyu].

Foreign Name: Soyastern Shoyu.

Manufacturer’s Name: Soyastern Naturkost GmbH (Importer/Distributor). Made in Japan.

Manufacturer’s Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.

Date of Introduction: 1987 August.

Ingredients: Pure spring water (Reines Brunnenwasser), soybeans (Soyabohnen), wheat, sea salt (Meersalz).

Wt/Vol., Packaging, Price: 700 ml glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Label. 1987, undated.

Black, grey, and yellow on beige. “Traditional Soyasauce, aged 2 years in oak vats. The universal seasoning. In daily cooking and at the table; it rounds off the aroma of your foods and enhances their indwelling flavors—making salt superfluous.” Letter from Thomas Karas. 1989. April 21. “Soyastern Shoyu is a Japanese product. We import it from Muso in bulk and fill it in bottles at our company. We started with it in August 1987.”

1730. *Tetra Pak Age*. 1987. Edensoy in a class by itself. 5(2):14. Summer.

• **Summary:** “From an international line for the 1986 Tetra Pak Design Competition, Edensoy Natural Soy Beverage by the U.S.-based Eden Foods, Inc. took the top prize in its class. According to the judge—Mr. Carlos Rolando, a Spanish designer—Edensoy’s design makes good use of typography and color. It creates a mood. ‘To be healthy is to be happy. Jogging or lying under a tree along a stream of pure water creates a feeling of happiness. This design conveys all this and more. The illustration conveys a feeling of tranquility. A highly suggestive, blurred landscape. Nobody knows where it is but everybody would like to be there.’ Indeed the package speaks for the product,” which contains no added fat.

1731. *Vitasoy Vitabrations*. 1987. How does Vitasoy compare to other soymilks? Vitasoy ranks Number 1 in calcium and vitamins B-1 and B-2. Vitasoy scores as one of the highest in protein content. 1(2):7. Summer.

• **Summary:** Nutritional comparison with Edensoy, Ah Soy, and Supersoy, per 6 ounce serving: 7 gm protein, 5 gm fat, 115 mg sodium. Address: 99 Park Lane, Brisbane, California 94005.

1732. Roller, Ron. 1987. Job’s tears, San-J plant, Edensoy (Interview). *SoyaScan Notes*. Sept. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Edensoy contains Job’s tears, the hard, pearly-white to tan seeds of an Asian grass (*Coix lacryma-jobi*), also known as “pearl barley” (easily confused with pearled barley), and called *hatomugi* in Japanese. Note: The large

Kenkyusha dictionary (1954) translates *hatomugi* as “pearl barley.” A Muso Shokuhin soy milk label gives the scientific name of *hatomugi* as *Semen coicis*. The grains are about the size of a mung bean but slightly oblong, and with a very prominent sunken tan line running from end to end, as with barley. Eden Foods has tested the growing of Job’s tears in the southern USA, and now sells the grain in a 1-lb bag. San-J will be the first company to make natural shoyu in the USA. Eden has been negotiating with them for 4-5 years. Startup costs were \$10-15 million. They will make both tamari and shoyu from both defatted soybean meal and whole soybeans. It is an institutional factory, no wooden vats, all stainless steel. Offices will move to the plant site. Edensoy sales are on target. Estimates are that 25-30% of people who go into health food stores have never tasted soy milk. Address: Eden Foods, Clinton, Michigan.

1733. Belleme, Jan. 1987. Whole fu cuisine: This versatile wheat product adds a high-protein punch to meals. *East West*. Sept. p. 26, 28-31.

• **Summary:** Dried *fu* (wheat gluten) contains 29% protein and less than 1% fat. Describes how *fu* is made in Japan, the different types and shapes, and how to use it in cooking (as is, or deep-fried). The most common shapes are *kuruma* (“wheel”) *fu*, which is shaped like a large flat doughnut; *zeni* (“coin”) *fu*, shaped like a small flat doughnut, *zenryu fu* (an intermediate, doughnut shaped variety made from whole wheat flour and created for the natural foods market); and *shonai fu* (also called *ita* [“board”] *fu*), which is a thin, flat variety.

Contains 6 recipes. Acknowledges the help of Robbie Swinnerton (who has spent 8 years working for Mitoku Co., Japan) for his help in researching this article.

1734. Keene, Paul. 1987. A long farewell to Betty Keene: Co-founder of Walnut Acres. *Walnut Acres Catalog*. Sept. Page 2 (inside front cover). p. 45.

• **Summary:** A long and eloquent obituary by Paul Keene for his wife, who died on 28 May 1987.

“Almost fifty years ago, more than a mile high in the foothills of the Himalayas, a young teacher, fresh from a journey of halfway around the earth, opened the door of the dining room. Around the tables were gathered thirty or more persons of various nationalities. A hum of typical lunchroom teacher-talk carried on, interrupted only by brief welcoming smiles. The new chap from America found himself truly in another world. Suddenly the name Woodstock School, in northern India, had come alive for him. ‘The Lord works in a mysterious way, his wonders to perform,’ thought he to himself

“I had been shown to a seat quite close to the entrance door, which I faced while lunching. There was considerable coming and going. Just as the dessert was brought, the door swept open. In sprinted three spirited, jolly young women,

speaking with a delightful British accent. Their arrival is as clear to me today, eighteen thousand days later, as if it took place yesterday. The last of the three was the one on whom my eyes lingered a split-second longer during the brief introductions. Betty Morgan was her name. Petite and pretty, her smile rivaled that of Helen of Troy. My heart was won with incredible ease.

“Betty was born in New Delhi. Her father was Welsh, her mother English. They had spent over forty years in mission work in India, which had become their real home. India’s tongues were Betty’s own. She was at home in the villages and in the bazaars. When a huge hyena tried to snatch her from her crib as she slept outside, only her mother’s screams frightened it away. As a youth she walked in the hills inhabited by the man eating tigers of Kumaon. It was second nature to her to be wary of the karait and the cobra, some of the deadliest of snakes.

“For long periods she was away from her family while attending boarding schools in the cool hills. Mount Herman School in Darjeeling and Woodstock School in Mussoorie were two of these. Upon completion of her high school work she received her college degree from the University of Madras in South India. With her teacher’s certificate she then returned to Woodstock as a staff member. This was known as one of the best preparatory schools in the Orient.

“In school Betty was quite athletic. She was one of the better players of women’s basketball, volleyball and tennis. Nothing seemed too strenuous. At six to eight thousand feet she could hike and run up and down the steep mountainsides with the best of them. She was accomplished and fearless. Each year she traveled all alone by train the fifteen hundred miles or so to her parents’ home in South India.

“We were married in Bangalore, South India, in January. Every pew of the Baptist church of which Betty’s father was pastor had tied to it a lovely bouquet of local, richly scented lilies. The service, conducted by her father with her mother in attendance, was a simple, lovely happening. The church was filled with people and the scent of lilies. The deep-rooted affection between pastor and parishioners was so beautiful to see.”

“Within a few days everything was packed and we were ready to sail for America via the Pacific ocean.”

“After one more year of teaching back in my home area we decided to change professions completely, and put our whole trust in God and the universe for our care and well-being. We felt we had to return to earth’s roots. For two years we studied and practiced homesteading at the School of Living [run by economist Ralph Borsodi] in Suffern, New York. There we learned organic gardening, flour grinding, bread baking, butter and cheese making, food preserving, weaving, homestead arts and crafts. With a marvelous library we had hundreds of thinkers and doers by our sides as we both theorized and practiced. Here we were paid five dollars a week, plus room and board. Here our first daughter was

born.

“For two more years, to learn full-time farming, we attended Kimberton Farms organic farm school near Philadelphia. Here we learned the use of both horses and tractors as power sources for field-scale growing of crops. Studying under Dr. Pfeiffer from Europe, these were days of revelation in which love of the soil grew into a deep, rewarding, abiding part of our lives. We learned by doing the work on this farm of over one thousand acres, where milk cows, beef cattle and grain and vegetable production were paramount. Of course no chemicals or poisons were ever used. We were paid fifty dollars a month for our labor, and lived rent free in the top story of an ancient, freezing farmhouse. Nothing seemed really to matter, in our exuberance and sturdiness, as long as we continued to learn who we were!

“Finally, penniless except for two hundred dollars, a team of horses, an old rusting horse plow and harrow, second-hand furniture, an ancient car, and two small daughters, we were able to get a long term loan [\$5,000] from government sources to purchase our very, very own farm of one hundred acres. Here our feet trod a portion of the earth leased for our lifetimes from the universe, to have and to hold precious and beloved until death do us part.

“There was no furnace for central heating, no water heater except the kitchen range, no bathroom, no clothes-or-dish washers, no telephone, no refrigerator no freezer, no air conditioner, no T.V. For years we used a cast-iron kitchen range for heating both house and water. We used our own wood, supplemented with coal, for heating purposes. Later came a new wood stove for heating the living room, with its penchant for chimney fires. We learned how to scamper up to the attic roof in a hurry to drop potato peels down the chimney to cool down the raging fire! The bedrooms managed to get a slight bit of heat through the downstairs ceilings. Even with shutters closed these rooms were like ice in winter. Those bedrooms through which passed a stovepipe would get above freezing, generally, by ten o'clock of a frosty morning.”

“But then out of our struggle, totally unanticipated by us, a marvelous growth began to take place, both in our soil and in the hearts and minds of many people who could be reached by mail. What joy it was for Betty to see cards and letters come from afar, inquiring about our organic, synthetic-free farm produce. We were vindicated! Not only had we learned to produce wholesome poison-free foods, not only had natural farming methods begun to confirm themselves by both improving the soil and lessening disease and insect problems, but we had discovered a market as wide as the world itself. By much stinting and saving we could now hope to be able to help our three delightful growing girls to go on for college work.

“Things had eased up a bit. Tractors replaced horses. We had a furnace and hot water, a bathroom and a telephone,

along with some modern labor-saving devices. Mechanical harvesters replaced hand corn huskers, and the hand picking of peas, beans, carrots, beets. Our old used combine replaced the toil-intensive reaper-and-binder grain harvesting. Gone for Betty were the threshing dinners when droves of workers had to be fed. For her the work in the fields and the tending of babies gave way to working with those people who had joined with us in producing and shipping our foods. It was less strenuous, as was proper, and yet challenging and rewarding. She and all of us came to have friends not only where we lived. Our horizons expanded as we became a part of a great fellowship of seekers for the roots of life who lived everywhere. The marvelous venture, the dream in the heart, seemed never-ending.

“Betty’s influence was great. She was greatly loved and highly respected by all who knew her. She in turn was loving and concerned in the extreme. The problems and difficulties of anyone she knew automatically became hers as well. She was deeply religious. Her prayers never ceased to ascend to heaven’s gates. Her warmth and generosity knew no ends. As a cofounder of Walnut Acres she had its concerns deeply at heart. We all looked to her for her opinions, her thoughts her directions. She set the tone that is the backbone of Walnut Acres. You might say that she was its soul. Everything had to be done right, in the best way. There was no such thing as corner-cutting. Honorableness was as important as life itself.” Address: Walnut Acres, Penns Creek, Pennsylvania.

1735. Product Name: San-J Tamari-Lite (Low Sodium).
Manufacturer’s Name: San-J International, Inc. (Importer). Made in Japan by San-Jirushi Corp.
Manufacturer’s Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-446-5500.
Date of Introduction: 1987 September.
Ingredients: Soybean meal, water, salt, alcohol.
Wt/Vol., Packaging, Price: 5 oz dispenser, 10 oz bottle, and 20 oz bottle.
How Stored: Shelf stable.
New Product–Documentation: Interview with John Perelman. 1987. Sept. 15. He notes that Erewhon (made by Kagisa), Arrowhead Mills, and Eden Foods still misuse the term “tamari.” Now Westbrae does too. Ad in East West. 1988. June. p. 23. “Pretty amazing stuff. 25% less sodium. Rich taste. Wheat free.” Also run as a full-page color ad in Vegetarian Times. 1988. Sept. Inside front cover. And Oct. p. 30. Interview with John Perelman. 1990. Jan. 25. This product is still imported from Japan in drums and bottled in Richmond; the company has not yet installed its desalination equipment in America, and probably won’t until at least 1991.

Two labels sent by Misako Binford of San-J International. 2012. May 14. The white label now reads: “Tamari: Gluten Free Soy Sauce. Reduced sodium. 10 fl. oz. Made with 100% soy.” Two logos on the front panel: (1) Non

GMO Project verified. (2) Certified Gluten Free. “Contains 28% less sodium than regular tamari.” She notes: Product introduced 1987 or before. Imported.

1736. Lindner, Anders. 1987. The world soymilk market and Soya Technology Systems (STS) (Interview). Conducted by William Shurtleff of Soyfoods Center, Oct. 21. 7 p. transcript.

• **Summary:** “On 21 Oct. 1987 Anders Lindner, on a trip of the USA, visited the Soyfoods Center (SC). The following interview was conducted by William Shurtleff.

“SC: STS started five years ago, and in that time you have traveled the world, visiting every potential customer, and sold four soymilk plants. What major changes or trends have you seen in the world soymilk market during that time?”

“STS: You must look at one region at a time. In the United States there is definitely an increased interest in and awareness of soymilk. Soyfoods are relatively well known. In Europe there has been a big increase in the number of enquiries about soymilk from all countries. The number of larger companies that have contacted us has also increased.

“Africa is still a dark continent as far as soymilk goes, with the possible exception of Nigeria, where we have a number of quotations pending, awaiting approval for foreign currency. This could take time.

“Looking at Asia, in India there was almost a frenzy of interest several years ago and we still get enquiries every week. The government gave permission to build many new soybean crushing plants. Soybean production is now over a million tons, and it is still not enough. So the price of soybeans is rising, which raises soymilk prices. But I’m not as optimistic about the future of soymilk in India today as I was 6 months ago. India’s first major soymilk plant, established by the Noble Soya House group in Bhopal, has not been as successful as everyone had hoped it would be. Two of India’s best known companies, the Great Eastern Shipping Company (also called the Bhiwandiwalla Group) and Godrej, backed the new company, which greatly bolstered public confidence in the project. Each owned 24% of the private limited company and the rest was publicly owned. Great Eastern provided financing and put a number of their very best people in the top management positions. Godrej, which is *the* marketing company in India par excellence, provided distribution and marketing. They specialize in soaps. Alfa-Laval supplied the plant and Kibun sold their technology know how. Production began in January 1987 and it had all the signs of being a very, very good project. Their soymilk, named Noble House Great Shake, comes in four flavors (chocolate, strawberry, mango, and American ice cream flavor, basically a vanilla) in 200 ml Tetra Brik cartons. I have heard it said that the products were not well formulated, the timing was poor, the prices were too high, and the products were marketed as a clearly Western-style or foreign product. The project got lots of big media

publicity, but much of it was not favorable, we are sorry to say. Today the plant runs only about 2 hours a day.

“We have sold a plant to Amrit Soya and Protein Foods Ltd., owned by the Amrit Company, an old company. They are in Ghaziabad, Uttar Pradesh, on the outskirts of New Delhi and are expected to start production in mid-1988. This will be India’s largest soymilk plant with a capacity of 6,000 liters/hour.

“Back to Asia, when we established STS we located ourselves in Southeast Asia, thinking that with the large consumption of soybean drinks there it would be quite simple to sell plants to make soybean milk as well. But that has not been the case. I find the food processing companies there extremely conservative. Our strategy now is to show the companies in East Asia that our concept works in the USA and Europe.

“China has been a disappointment. They seemed to be more interested in soymilk plants a few years ago.

“So generally speaking, the climate has gotten better, especially in Europe and the United States.

“SC: Has your strategy or basic approach for selling STS soymilk plants changed during this period?”

“STS: Yes, it is changing now. We are expanding our product range by offering processes for other soymilk-based foods. Formerly we thought of ourselves as selling primarily liquid soymilk. Now we are offering process lines for tofu, ice cream, dressings, dips, spreads and other dairy analogs, plus what we call ‘semi-products.’ These are non-consumer, industrial food type products such as concentrated soymilk or curds for use as ingredients by food processors. We are investing in R&D on these. I think we will find new uses for our soymilk base, including new ways of making traditional products, dairy analogs, powdered products, and truly new products.

“SC: Have you made any major technological developments?”

“STS: Yes. we are now offering an ultrafiltration system as part of our soymilk system. This is an important technological innovation. It allows you to concentrate soymilk by removing water without adding heat (thus preserving the good flavor of the product) or to remove certain components from the soymilk, such as oligosaccharides or perhaps trypsin inhibitors or lipoxigenase enzymes, using membranes. More important, it can help in automating tofu production. The soymilk base goes into the ultrafiltration plant, where it is concentrated. Coagulant is injected into the line and mixed. Rectangular cakes of tofu are chopped off as they come out the exit end. Luke Lukoskie at Island Spring has been a pioneer in developing these processes using a pilot plant, with an ultrafiltration unit, that we loaned him. This technology seems to have a very promising future for processing soymilk in the West, and for making soya panir (fresh curds) in India. There is not enough cow’s milk in India to go

around, and most of it is sold in the cities. I think soya panir will undersell dairy panir in India.

“SC: Which company do you feel is your strongest competitor?”

“STS: Our main competitor everywhere is Alfa-Laval. After that, but much less, some of the Japanese companies such as Marusan-Seikensha and Mitsubishi. Given that we had just installed the largest soymilk plant in the Western world for De-Vau-Ge in Germany, I was surprised to note that Eden Foods in America chose Marusan-Seikensha without ever contacting us at all. Marusan seems to have only one English speaking person in the entire company, Mr. Tominaga. Mitsubishi competed with us selling systems in India and Nepal. Takai never seems to be in competition with us. Vandemoortele is no longer supplying systems, though the huge plant they built in Ambatolampy, Madagascar (35 million liters/year capacity) is still in operation. The company, Lalasoa SA (Societe Anonym) is run by a woman named Regina.

“SC: Could you tell us a little about the four plants that you have sold?”

“STS: Our biggest and most successful plant was sold to De-Vau-Ge, a Seventh-day Adventist food company in Lueneburg (near Hamburg), Germany. They started production in August 1985 and make Granose and Granovita brands soymilk, sold mainly in the UK and West Germany, but also in Scandinavia and France. The plant is running at full capacity, which is 3,000 liters per hour of soymilk base (4.7% protein). This is 4,000 liters per hour of finished soymilk (3.5% protein), or 50,000 liters a day. They currently only make two products. Labels for the UK market read Granose Soya Milk (4 flavors) and Granose Soya Dessert (3 flavors of custard puddings gelled with natural carrageenan, a seaweed extract). Both products are packed in half liter or liter aseptic Tetra Brik cartons. The plant is doing very well, selling all it can make. This is the only one of the four that has started operation. we have also sold a plant to Island Spring (Vashon, Washington), which may be the next to start production. The capacity is also 3,000 liters/hour of soymilk base. Amrit in India should be in production by mid-1988. Their plant has the same basic capacity as the plant in Germany, but since their soymilk will contain only 2.25% protein, the actual output will be 6,000 liters per hour which is larger than Germany. They will make both beverages and foods, mainly a panir type cheese. The beverages will contain Indian flavorings.” (Continued). Address: STS, Singapore.

1737. *SoyaScan Notes*. 1987. Soymilk and dairy milk prices in California, October 1987 (Overview). Oct. 23. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In Lafayette, California, whole milk sells for \$0.55/quart. Soymilk sells for \$1.99/liter, which is the equivalent of \$1.88/quart. Thus soymilk in a liter pack is

3.42 times as expensive as dairy milk per unit volume. In Dec. 1983 a comparison with pint quantities was made. Cow’s milk cost \$0.39. The least expensive fluid soymilk was Vitasoy, sold to the Asian market in 8.4 oz pack for \$0.35; it was 1.72 times as expensive as cow’s milk per pint. The average price of all 6 brands surveyed was 3.53 times as expensive as cow’s milk per unit volume. Thus, soymilk prices have dropped only 3.2% in relation to cow’s milk prices since Dec. 1983. The main reason that the drop has not been larger lies in the decline in the value of the U.S. dollar from late 1985 on; this led to a steady rise in the price of imported soymilks.

During 1986 two major changes took place in soymilk packaging in the USA. Both helped to reduce costs. (1) Edensoy, Westsoy, and Ah Soy switched to Tetra Brik cartons; Vitasoy had always been in Tetra Brik. (2) Liter and quart Tetra Brik cartons were introduced. This larger size was pioneered by the Alpro/Vamo Foods Sunsoy brand, followed by Edensoy, Ah Soy, Westsoy, and Vitasoy. Soymilk became the first liter-sized Tetra Brik product to succeed in the USA.

1738. *East West Journal*. comp. 1987. *Shopper’s guide to natural foods*. Garden City Park, New York: Avery Publishing Group. x + 204 p. Illust. Index. 28 cm. [66* ref]

• **Summary:** The book from the editors of the *East West Journal* is mainly a series of articles published in *East West Journal* or special articles by individual authors. Contents: 1. Introduction to natural foods. 2. Grains. 3. Breads, pastas & seitan. 4. Vegetables. 5. Sea vegetables. 6. Labeling and standards. 7. Fruits. 8. Seeds & nuts. 9. Beans (incl. tofu, tempeh, miso, azuki). 10. Beverages. 11. Condiments (incl. tamari, shoyu, vinegar, salt, umeboshi). 12. Cooking ingredients. 13. Pressure cookers. Address: New York; Massachusetts.

1739. *East West*. 1987. Natural Foods: The best and worst. 2nd annual awards. Oct. p. 32-36.

• **Summary:** Only packaged natural foods with nationwide distribution are judged. Best soymilk: Edensoy, but the Tetra Brik package doesn’t biodegrade, burn, or recycle. Best sandwich spread: Nasoyanaise by Nasoya Foods. Worst shoyu: Natural shoyu from Erewhon. So heavy it is best dispensed with an eye dropper. Best Tamari: San-J. Worst line of fake meat products: Worthington Foods. Worst beans: Honey Baked Style Vegetarian Beans with Miso from Health Valley. Best Miso: Miso Master Mellow White Miso by American Miso Co. for Great Eastern Sun.

1740. Eden Foods, Inc. 1987. Looking for a new food? The solution is amazingly delicious Edensoy (Ad). *East West*. Oct. Back cover.

• **Summary:** This ad emphasizes the product as a food rather than a beverage and stresses ingredient quality. A hand descends from heaven and angels fill the sky around a huge

carton of Edensoy. “Job’s tears, known as *Hato Mugi* in Japan, are the seed kernels of an annual grass long prized in the Orient for its health giving and nutritional properties.” Note: The scientific name of Job’s tears is (*Coix lachrym-jobi*). Address: Clinton, Michigan.

1741. Golbitz, Peter. 1987. Soya interview: Gordon Bennett, Westbrae Natural Foods: Soyfoods past, present and future. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Oct. p. 3, 10-11.
• Summary: Founded in 1970, Westbrae was built on the premise that healthy food makes a healthy planet. Bennett has been president since 1975. The company now has over 200 products. Soyfoods account for about 35% of sales, down from 50% 1-2 years ago. The company is reducing imports, focusing on American-made foods, and importing Westsoy soymilk from Southeast Asia [actually Vitasoy in Hong Kong] rather than Japan, including a new liter size. Address: Bar Harbor, Maine.

1742. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Minnesota passes organic rules. Sept/Oct. p. 4.
• Summary: “Minnesota is one of only a few states in the country with organic rules, and ours are the most comprehensive to date. The process of establishing organic standards was initiated by the Minnesota Organic Growers and Buyers Assoc. and took 2 years to complete.”

1743. *Vegetarian Times*. 1987. Natural and gourmet foods merging in the marketplace. Oct. p. 8.
• Summary: Some experts predict the natural foods market will evolve into a segment of the ever-diversifying specialty foods market.

1744. **Product Name:** WestSoy Natural (Soymilk).
Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in East or Southeast Asia.
Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.
Date of Introduction: 1987 October.
Ingredients: Incl. soybeans, rice, and barley malt (made from sprouted barley), oil, salt.
Wt/Vol., Packaging, Price: Tetra Brik Aseptic cartons. 250 ml retails for \$0.69; 1 liter retails for \$1.99.
How Stored: Shelf stable.
New Product–Documentation: Ad in *Natural Foods Merchandiser*. 1987. Oct. p. 62. “A Great Tasting Source of Nourishment. Made from Organic Soybeans and Rice.” This product has a new package (yellow, white, blue, and brown), new ingredient (rice), new size (liter), and new maker (somewhere in Southeast Asia; Bob Gerner 1/88 says Hong Kong).

Talk with Gordon Bennett of Westbrae. 1986. Nov. 15. Even after the end of the year, he will not disclose where and by which company his soymilk is made.

Bennett. 1987. *Soya Newsletter*. Sept/Oct. p. 10. Ad in *Vegetarian Times*. 1987. Nov. Back cover. Leaflet. 1987. WestSoy. What is the shelf life of WestSoy? How can WestSoy be used? Why don’t local soydrinks taste as good as WestSoy? Ad in *Vegetarian Times*. 1988. April. p. 14. “A Great Tasting Source of Nourishment.” Price change. Effective Nov. 14. Case of 27 x 8.45 oz is \$8.60 FOB West Coast.

1745. **Product Name:** Westbrae Natural Organic Unpasteurized Miso [Mellow White, Mellow Red, and Mellow Brown Rice].
Manufacturer’s Name: Westbrae Natural Foods (Importer/Distributor). Made in Canada by Amano Miso Co.
Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7521.

Date of Introduction: 1987 October.

Ingredients: Mellow White: Cultured white rice, organically grown* whole soybeans, water, sea salt. * Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 13 oz (396 gm) plastic tub.

How Stored: Refrigerated.

Nutrition: Per tbsp (18 gm)/per 100 gm: Calories 40/239, protein 2/9 gm, carbohydrate 8/45 gm, fat 0/1 gm, cholesterol 0 mg, sodium 740/4080 mg, potassium 50/290 mg.

New Product–Documentation: Talk with Gordon Bennett. 1988. April 2. About 6 months ago they switched from Cold Mountain Miso (made by Miyako Oriental Foods in Los Angeles) to that made by Amano in Canada. Gordon felt that Amano had a better, rounder flavor. Amano uses organic soybeans (which Miyako did not), and gave Westbrae exclusive distribution rights for the USA. Labels. 1988. Plastic tubs. Blue, red, or brown (respectively) and black on white. “Mellow Miso is not pasteurized so slight swelling of the tub may occur. Unpasteurized miso is a source of beneficial enzymes and organisms. No preservatives or coloring added. Fermented in cedar kegs by the Amano family, master miso makers for 3 generations. Keep refrigerated.” The lid contains a recipe for one-pot miso soup, and the tub one for sweet ‘n tangy miso spread (miso, tahini, and brown rice syrup).

Talk with Graham Amano of Amano Foods Ltd. 1997. June 16. They still make miso for Westbrae. They also make shoyu. The market in British Columbia is too small, so they would like to expand.

Product with Label purchased at Open Sesame in Lafayette, California. 1998. Jan. \$4.39 for 13 oz plastic tub of Mellow Brown Rice Miso (made with organic soybeans, unpasteurized).

1746. LeBailly, Cecile. 1987. *Lait: Attention, voila l’ersatz. L’invasion des matières grasses végétales menace les*

produits laitiers européens [Milk: Watch out for substitutes. The invasion of vegetable oils threatens European dairy products]. *Nouvel Economiste (Le)* No. 616. p. 100. Nov. 6. [Fre]

• **Summary:** There are 3 major soymilk producers in Europe: (1) In Belgium, Alpro, an affiliate of the Vandemoortele Group, has a plant that produces 10,000 tonnes/year of “soy juice” (*jus de soja*). Alpro’s head, Philippe Vandemoortele, is head of the European Soyfoods Association. (2) In France, Cacoja, affiliate of the agricultural cooperative of Colmar, has recently had an ultramodern plant constructed at Issenheim in Bas-Rhin. A good photo shows the soymilk production system. (3) In West Germany, DE-VAU-GE is expected to soon produce as much soymilk as Alpro.

Also discusses the Edensoy venture in the USA. Most of these companies are run by young men, average age 35. Address: France.

1747. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Nov. 15, 1987. Fall. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

1748. Farm Foods. 1987. Dear natural foods friend (News release). 49 Old Bloomfield Ave., Mountain Lakes, NJ 07046. 1 p. Nov. 16.

• **Summary:** “Happy Holidays! As the seasons change again, so do things for Farm Foods and for me. As you know, Dan Pratt has been promoted to Brand Manager / National Sales Manager for the Ice Bean line. By now, most all responsibilities and interactions between our companies are handled by Dan.

“On November 30th, I will be leaving Farm Foods. I will be assuming the responsibilities of Vice President / Sales, Eastern Division for the Natural Nectar Corporation, Culver City, California, a company I know you are familiar with.

“I would like to personally thank you for the help and co-operation you have given me through the years of building the Ice Bean line. I know you will find Dan most capable of continuing the success of this line and the sales growth we all anticipate between our companies.

“If you have any questions or unresolved activities, or if there is anything you feel we need to discuss before the change, please call me at 1/800/431-5030 before November 30.

“Thank you again. Respectfully, Robert Tepper.”

Address: Mountain Lakes, New Jersey. Phone: (800) 431-5030.

1749. Eden Foods, Inc. 1987. Product description: Eden Foods quality natural foods. 701 Tecumseh Rd., Clinton, MI 49236. 21 p. Plus 6 pages of inserts. Catalog.

• **Summary:** The catalog lists the following soyfoods: Edensoy (Original, Vanilla, Carob; shown on page 1. “Edensoy is the best tasting, best selling, best made natural soymilk on the market”), black soybeans (they “have a hearty yet sweet taste. In Japan, black soybeans are always prepared for the New Year’s celebration as they are a symbol of health.”), organically grown soybeans (usually Corsoy or Amsoy), Eden tekka (“a hearty, nutritious condiment made from hacho miso, carrots, burdock, ginger root, and unrefined sesame oil; 2.8 oz), dried tofu (actually dried-frozen; 5.8 oz), barley (mugi) miso, brown rice (genmai) miso, buckwheat (soba) miso, light (shiro) miso, rice (kome) miso, hacho (100% soybean) miso, natto miso “Kinzanji,” shoyu, organic shoyu, low-sodium shoyu, wheat-free tamari, tamari-roasted nuts and seeds wheat free (pumpkin seeds, sunnies [sunflower seeds], almonds, cashews, mixed nuts), and Lima Tempeh.

Some interesting non-soy foods listed in the catalog include quinoa (16.2% protein), kudzu-kiri, kudzu root starch, adzuki beans, mochi (100% brown rice, with mugwort, or with millet), sea vegetables, organic amazake, barley malt syrup, and Lima seitan.

In the spring of 1986, Eden Foods became General Agent for North America for the Lima Company of Belgium. Lima soyfood products include Lima Tempeh. Note: This catalog was still in use in Jan. 1989. Address: Clinton, Michigan. Phone: 517/456-7424 or 800/248-0301.

1750. *Whole Foods*. 1987. Great Eastern Sun, Westbrae trade lines. Nov. p. 18.

• **Summary:** Effective immediately Great Eastern Sun of Enka, North Carolina, is the exclusive distributor of Westbrae label seaweeds (sea vegetables) and Asian condiments, while Westbrae is exclusive distributor of Soba Shop ramen and noodles. Bruce Sturgeon is sales and marketing director for GES.

1751. *Toyo Shinpo (Soyfoods News)*. 1987. Ooshû demo tôfu buumu. Pari no kenkô shokuhin ten o mite [After a health foods exposition in Paris, will there be a tofu boom in Europe?]. Dec. 1. p. 5. [Jap; eng+]

• **Summary:** The expo was held in Paris from Nov. 7-9. Tofu and second generation tofu products were creating a lot of interest among people who came to the expo. Two French companies producing soymilk are Cacoja and Lima Foods. Their products are labelled Soja and Soya, respectively. Both companies plan to start marketing soymilk ice creams before summer, 1988. Lima Foods is making an effort to

produce other soyfoods besides their soymilk such as soy hamburgers, desserts, salads, paté, and terine.

1752. *Toyo Shinpo (Soyfoods News)*. 1987. Seidai ni Pari de kenkô shokuhin ten. Oshu de nobiru tōnyū [Successful health food exposition in Paris helps to introduce Europe to soymilk]. Dec. 1. p. 1. [Jap; eng+]

• **Summary:** Soymilk, tempeh, and tofu are becoming more popular in Europe thanks to a recent soyfoods exposition in Paris. There were soymilk desserts, vanilla and chocolate, and Cacoja's soymilk, Soja, received a lot of attention at the event.

1753. *SoyaScan Notes*. 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. Westbrae moves the production of Malted to California from Japan.

Jan. The Soy Plant, a tofu cooperative in Ann Arbor, Michigan, files for Chapter 7 bankruptcy. It is soon purchased by Bruce Rose of Rosewood Products, Inc.

Jan. Soymage, the first casein-free soy cheese, is introduced by Soyco Foods, a Division of Galaxy Cheese Co.

Feb. *Soya Newsletter*, a 12-page, bimonthly publication costing \$96/year, is launched by Soyatech of Bar Harbor, Maine. Publishers are Peter Golbitz and Sharyn Kingma, former owners of Island Tofu Works. The publication quickly proves itself to be the world's best English-language publication on soyfoods. By October, paid circulation tops 900 in 20 countries.

Feb. American Soybean Association petitions the U.S. Food and Drug Administration to require food manufacturers to be more specific in labeling food products that contain highly saturated imported tropical fats (palm, palm kernel, and coconut oils). The petition includes results of a supermarket survey of 1,555 foods containing vegetable oils. 43% of the labels list multiple choice or generic vegetable oil ingredients which hides from the consumer the fact that the products contain highly saturated tropical fats. Imported tropical fats displace the equivalent of oil derived from 171 million bushels of soybeans. Herewith begin the great "Fat Wars" of 1987-88.

Feb. Lite Lite Tofutti introduced by Tofutti Brands, Inc. This non-dairy frozen dessert contains only 90 calories per 4-ounce serving. It soon becomes a big hit.

Feb. Ah Soy in Tetra Brik cartons launched by Great Eastern Sun.

Feb. Options trading on futures for soybean oil and meal opened on Chicago Board of Trade.

March 4. The USDA's Federal Grain Inspection Service rules that soybean oil may be used to control grain dust in elevators. This voids the Barnham patent and opens up a

large potential new market for soy oil, which is in surplus.

March. Great Shake soymilk launched by Noble Soya in India. Sold in Tetra Brik cartons in mango, strawberry, and chocolate flavors, it is the country's most heavily promoted soymilk to date, but gets off to a slow start.

March 16-18. First International Congress on Vegetarian Nutrition held in Washington, D.C., sponsored by eight Seventh-day Adventist universities and health care organizations, and three SDA food companies, plus S.E. Rykoff/Sexton.

March. *Vitasoy Vitabrations*, a newsletter, starts being published by Vitasoy USA.

March 31. Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy, move into a large new plant (370,000 square feet costing \$20 million) in the New Territories. Sales of Vitasoy in 1987 is projected to be 126 million packs.

April 1. Tempehworks, Inc., America's first major tempeh producer from Greenfield, Massachusetts, changes its name to Lightlife Foods, Inc. In recent years, Tofu Pups have become the company's bestselling product.

April. Stir Fruity, a non-dairy, nonfermented, soy-based yogurt, is introduced by Azumaya Inc. of San Francisco. Shelf life problems cause the product to be withdrawn, causing Azumaya to set aside plans for an \$800,000 radio ad campaign in northern California. The product is soon back on the market, but in limited distribution and with little promotion. Yet during this year, Azumaya probably passed House Foods & Yamauchi to become America's largest tofu producer.

April. *Healthy Times*, a bimonthly newsletter, starts being published by Morinaga Nutritional Foods of Los Angeles, makers of Mori-Nu long-life silken tofu, for members of the Mori-Nu Health for Life Club. By Aug. 1988 circulation is up to 10,000; A subscription costs \$3 a year.

May 26. Tofutti Brands Inc. and Coca-Cola launch Cheater's Delite, a major joint promotion featuring a 90-calorie scoop of Lite Lite Tofutti and a 1-calorie glass of Diet Coke, special labeling and couponing on 3 million bottles of Diet Coke, 5 weeks of heavy advertising in New York, New Jersey and Connecticut, and a Caribbean cruise sweepstakes.

June. Dr. Jane Gleason of the University of Illinois goes to Sri Lanka to spend a year studying its soybean and soyfoods industries.

July 1. Ralston Purina Co. of St. Louis, Missouri, establishes Protein Technologies International as a wholly-owned subsidiary to focus on sales of soy protein for food uses. The company's sales of soy protein products were \$139.8 million in 1986.

July. Victor Food Products in Toronto, Canada's largest tofu manufacturer, declares bankruptcy. The main cause: Overexpansion, trying to grow too fast.

Aug. The Barat Bar, an upscale chocolate bar containing spray-dried tofu instead of dairy products, is launched by

Legume Inc. and extensively promoted. It soon becomes a big hit.

Aug. Brightsong Foods of Petaluma, California, ceases operations. Richard and Sharon Rose resign to found a new company, Rose International, which will be a tofu development, marketing, and consulting company, rather than a manufacturer.

Sept. 24. San-J International of Richmond, Virginia, dedicates the first tamari brewery ever built outside of Japan. The 40,000 square foot facility with a capacity of 1 million gallons a year is located in Varina, Virginia. San-J tamari was first imported to America in 1979.

Sept. 28. Plenty Soya Centre, run by Plenty Canada, opens in Kandy, Sri Lanka. They will sell as many soyfood products as possible at a reasonable cost.

Oct. 6. Anti-cholesterol campaign starts. The U.S. Federal Government and more than 20 health organizations issue the nation's first detailed guidelines for identifying and treating people whose blood cholesterol levels are more than 200 mg per deciliter. The guidelines signal the beginning of a nationwide health promotion campaign designed to reduce blood cholesterol to safer levels. This signals exciting new opportunities to market cholesterol-free soy-based alternatives to meat.

Nov. *Kikkoman Taste*, a stylish full-color "quarterly intercultural forum for the exchange of ideas on food," published by Kikkoman Corp. in Tokyo. Its focus is on shoyu in international cuisine.

* During this year of the great vegetable oil wars, the ASA launched an all-out no-holds-barred campaign to educate Americans of the health dangers of tropical fats (palm and coconut oil; which succeeded) and to require such products to be clearly labeled (which failed).

* This year the world's population passed 5 billion. It is increasing by a record 80 million people a year, so that every 3 years the equivalent of one United States' full of people is added to the population of planet Earth. Continued.

1754. *SoyaScan Notes*. 1987. Chronology of soybeans, soyfoods and natural foods in the United States 1987 (Continued) (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Continued. 1987 New Trends:

Rapid Rise in the Number of New Products in America. During 1987 more than 735 new soyfood products were launched worldwide, including at least 380 in the USA. Many of the most successful products are all-American and fun to eat: Ice creams, meatless burgers, vegetarian hot dogs, salad dressings, chocolate bars. This is part of the larger trend of the Americanization of soyfoods. Most of the growth has been in the traditional low-tech sector, including tofu, tempeh, soymilk, miso, soy sauce, soynuts, plus modern dairylike products such as soy ice creams, soy yogurts, and soy cheeses, all developed by the soyfoods movement. A

growing percentage of these products are second generation products, which could also be called convenience prepared products or value added products.

Growth of Consumer Awareness of Soyfoods in America. Ten years ago, perhaps 1% of Americans had heard of tofu, soymilk, tempeh, or miso. Today, probably 50% of Americans are aware of these foods. In 1987, for example, the Soyfoods Assoc. clipping service received a total of 1,587 clips on soyfoods. That is 132 articles a month, way up from 5 years ago.

Increasingly Positive Image of Soyfoods in the Western World. Generally speaking, from about 1945 through the 1960s, soy had a negative image in foods. The image became neutral during the early 1970s. During the late 1970s and early 1980s, with the rise of the soyfoods movement and the growing sophistication of modern soy protein products (isolates, concentrates) soyfoods gradually developed a positive image. The Gallup Poll of 1977 was an early indicator of this. By the mid-1980s tofu had become a "hot ingredient." Companies deliberately added it to a product (or at least to the label) to help sell the product. Yet the Roper poll of late 1986, which found tofu to be America's most hated food, may indicate a tarnishing of this image.

Growing Interest of Larger Food Companies in Soyfoods. One indication of this trend is that *Soya Newsletter*, targeted at these companies and selling for \$96/year, has over 900 paid subscribers.

Continued Decline of Red Meat. This year consumption of poultry in America passed that of beef for the first time in history. Beef had been king for 3 decades. Before that, pork was king. A pound of chicken has one-fourth as much saturated fat as beef and takes much less grain, water, and energy to produce.

INTSOY Becomes a Major Force Worldwide Developing and Promoting Soyfoods. Working with other international (IITA, AVRDC) and national soybean programs, and doing pioneering research on fresh green soybeans, extrusion cooking, and use of expellers for small-scale oil expression etc., INTSOY has become as effective in its new role (since 1985) of focusing on soybean utilization as it was before that when its major emphasis was on variety development and production.

The Competitive Position of the U.S. Soybean Industry is Slipping. Farmers in Brazil and Argentina can now produce soybeans at much lower cost than their American counterparts. This plus extensive subsidies have led to a dramatic drop in U.S. exports of soybeans and products since their peak in 1981. A major part of the problem is linked to the Latin American debt crisis, which surfaced in the early 1980s and forced debtor nations to export at all costs. This debt crisis (especially by Brazil, Argentina, Mexico, and Venezuela) is now being called the most serious problem facing U.S. agriculture.

Soybean Research Increasingly Shifts from Production

to Utilization. Traditionally research focused on increasing production and yields. New efforts are designed to develop new markets instead of larger surpluses.

Big Increase in Breeding Soybeans for Food Uses. This is part of a larger trend toward value added products and toward finding new market niches for American soybeans, especially for foods in Japan.

Revival of Interest in Industrial Uses of Soybeans. The main interest is in new ways to use soy oil, of which there is a large surplus that depresses soybean prices. Promising applications include soy oil for printing inks, dust suppressants, and diesel fuels. The largest interest in industrial uses occurred during 1932-42, when the Chemurgic movement and Henry Ford sought to find industrial uses for all farm crops. Hence, there is a rebirth of interest in Henry Ford's work with soy.

Major Growth of Interest in Soybeans and Soyfoods in Africa. Excellent work by IITA in Nigeria and various national soybean programs (as in Egypt, Zimbabwe, and Zambia) have allowed this relatively new crop to reach the takeoff stage. Decreasing per capita food supplies and growing understanding of the nutritional benefits of soyfoods are sparking new interest.

Continued Rise of Soybean Production in Europe. The largest producer, Italy, which produced almost no soybeans as recently as 1983, harvested a record 1.3 million tons in 1987. France is the second largest soybean producer. All production is heavily subsidized.

Omega-3 Fatty Acids Hit the Headlines. Soy oil is a rich vegetable source of these fatty acids which are thought to have a beneficial effect on the cardiovascular system.

Nutritional Spotlight Increasingly Shifted onto Fats, Away from Proteins. During the past few years fats (and especially cholesterol and saturated fats) have come to be seen as the leading problem nutrient, the bad guy, in the American diet. There is a new respect for complex carbohydrates (especially whole grains), which used to be called "starches" and were considered fattening.

New, More Complex View of Oils and Fats Becomes Popular. High cholesterol levels are considered more dangerous than ever, but equally important are the various cholesterol-carrying proteins in the blood. Two kinds (low and very low density lipoproteins) promote cholesterol deposits in the blood, while high density lipoproteins (HDLs) cleanse the blood vessels of fatty deposits. Moreover, saturated fats are considered at least as much of a problem as cholesterol.

So-Called Antinutritional Factors in Soybeans are Increasingly Seen as Having Benefits as Well. Trypsin has been shown to help prevent cancer. Saponins help reduce serum cholesterol. Isoflavones have antioxidant activity that may suppress breast cancer. This indicates that we may need a new term to categorize these substances that offer both benefits and disadvantages.

The Link Between Diet and Health Continues to Grow Stronger, among both scientists and the general public.

Interest in Exercise and Health Still Strong. Several years ago some experts saw this trend waning, but it now seems to be rebounding. For example, there were 21,244 finishers in the New York Marathon (including 3,689 women). Compare this with 12,512 finishers (1,621 women) in 1980 and 55 finishers (no women) in 1970.

Books on Tofu. Since 1974, at least 60 books on tofu (having the term "tofu" in the title) have been published in North America and Europe. Peak publication years were 1981 and 1982. By language, 46 of the books were in English, 7 in French, 4 in German, and 1 each in Italian, Portuguese, and Swedish.

Inactivity of the Soyfoods Association of America now becoming a major constraint on growth of soyfoods in the USA, at a time when interest is at an all-time high. Leadership is needed.

Rise of Canola (Rapeseed) Oil. It looks as if soy oil may have another serious competitor (in addition to palm oil) in future years. Canola contains less saturated fat than any other popular vegetable oil. Only 6%, versus 9% for safflower oil and 15% for soy oil. Lard has 41%, palm oil 51%, and butterfat 66%.

1755. American Miso Co. 1987. A miso primer: The American Miso story (Ad). *Vegetarian Times*. Dec. p. 18.

• **Summary:** This one-third page vertical black-and-white ad explains: "Generally, there are three types of miso: Sweet, Mellow, and the darker, Traditional misos. They differ in color, salt content, fermentation time, and the soybean/grain (koji) ratio." The company describes each of the misos it makes as one of these three types. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below "Miso Master is produced by the American Miso Co. for Great Eastern Sun."

This ad also appeared in the April 1989 issue (p. 6) of this magazine. Address: Rutherfordton, North Carolina.

1756. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Joint promotional programs planned for April '88 Soyfoods Month. Nov/Dec. p. 10.

• **Summary:** The Soyfoods Association of America has declared April 1988 as Soyfoods Month, and is coordinating an 8-page "advertorial" on soyfoods to be run in the April issue of *East West*, *The Journal of Natural Health and Living*, and *Vegetarian Times*. There will also be a press release announcing Soyfoods Month to major newspapers and trade publications. All will be coordinated with the Natural Foods Expo '88 West in Anaheim, California, in April.

Note: In 1983, Tree of Life, Florida's \$35 million

distributor and manufacturer of natural foods, designated August 1983 as the first Soyfoods Month and ran promotions in their 60-page monthly newsletter sent to their 2,000 accounts. Soyfoods were presented as that month's 'Super Specials' with 'deep pocket discount' for retailers. Morris Shriftman, vice president of Tree of Life, took the lead in organizing the promotional event.

1757. *Soya Newsletter (Bar Harbor, Maine)*. 1987. Tofulite now available to health and natural foods stores. Nov/Dec. p. 11.

• **Summary:** Tofulite non-dairy frozen desserts, made with tofu by Barricini Foods Inc., have been marketed to the grocery industry exclusively for three years. They are now available to the natural and health foods industry. Tofulite pints and bars are distributed by The Haagen-Dazs Ice Cream Company in Southern California, Florida, Georgia, New York, New Jersey, and throughout New England.

1758. Aveline Kushi in about 1987 (Photograph). 1987. Undated.

• **Summary:** Aveline Kushi (Tomoko Yokoyama; 1923-2001) was born in Yokota, Japan on February 27, 1923. She worked as a school teacher until becoming disillusioned at the end of World War II and joining George Ohsawa's group in 1950, selling magazine on street corners. Aveline moved to the United States in 1951. She met Michio Kushi and they married in 1954. Together, they moved to Boston in 1965 and opened Erewhon, one of the first health food stores in the U.S., in 1966. Aveline and Michio founded several organizations dedicated to the promotion of macrobiotics culminating in the Kushi Institute in 1978. She is the author of Aveline Kushi's Complete Guide to Macrobiotic Cooking for Health, Harmony and Peace in 1985 and many other titles with Michio or Wendy Esko.

For a good autobiography read *Aveline: The Life and Dream of the Woman behind Macrobiotics Today* (1988).

Note: Photo and text from Carl Ferré, editor and publisher of *Macrobiotics Today*, Chico, California.

1759. **Product Name:** Western Isles Soy Milk.
Manufacturer's Name: Community Foods Ltd. (Importer). Made in Japan.
Manufacturer's Address: Micross, Brent Terrace, London NW2 1LT, England. Phone: 01-450-9411.
Date of Introduction: 1987.
Wt/Vol., Packaging, Price: 500 ml aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Simon Bailey. 1988. Natural Choice. Aug. 15. "Soya-Based Products." A photo shows the Label. Front panel contains a stylized illustration of a soybean plant. CSP form filled out by Simon Bailey. 1988. Sept. 28. Present label 20.11.87. Formerly sold under the Edensoy label.

1760. **Product Name:** [Soy Drink].

Foreign Name: Soja-Getraenk.

Manufacturer's Name: Schwartzbrot (Importer). Made in Japan. Exported by Muso.

Manufacturer's Address: Klaus Griesbach, 2000 Hamburg 50, West Germany. Phone: 040-39 31 34.

Date of Introduction: 1987.

Ingredients: Water, soybeans*, dehulled job's tears or pearl barley (hatomugi, Semen coicis), kombu (*Laminaria* sp., a sea vegetable), barley malt extract. Organically grown.

Wt/Vol., Packaging, Price: 1 liter.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. Send by Anthony Marrese. 1989. Jan. Black, green, and red on white. "Natural foods from Japan (Naturkost aus Japan). Pasteurized. Can be stored without refrigeration. A refreshing, nutritious drink of mild sweetness. Purely of plant origin. Easily digestible. Also well suited for use in soups, sauces, and desserts of all types. Write the importer or Muso for a free booklet containing recipes and a description of all our products." Marrese adds: This is Bonsoy imported to Germany.

Talk with Yuko Okada of Muso. 1992. July 16. Muso started exporting Bonsoy soymilk to this company in about 1987.

1761. Diamond, Harvey; Diamond, Marilyn. 1987. *Fit for life II: Living health*. New York, NY: Warner Books. 490 p. [423* ref]

• **Summary:** The authors of the best-selling *Fit for Life* "America's #1 Diet Book," write more about their program based on the traditional Natural Hygiene philosophy. They encourage people to eat more raw foods and to cut down on animal products, especially on meat and dairy products. Chapter 18 is titled "Questions frequently asked." One of these (p. 323) is "What about tofu? This ancient food which originated in China over one thousand years ago has recently attracted our attention. It is an easily digestible protein which can play an important role in your diet as you begin to decrease your intake of animal protein. Tofu is made from soy milk, the liquid resulting when soaked and ground soy beans have been gently boiled for a short time. In high quality tofu preparation, the milk is then solidified with nigari (concentrate remaining when sea salt is extracted from sea water) or calcium sulfate (from gypsum). Tofu is rich in amino acids and calcium, containing more calcium by weight than dairy milk. It is also rich in iron, magnesium, phosphorous, potassium and sodium, essential B vitamins, choline and vitamin E. Unlike other proteins, it is alkaline, rather than acid. Because of this alkalinity and because it contains no crude soybean fiber, tofu combines well with starches, especially brown rice and other grains and whole grain breads. Watch for lots of new tofu recipes in the upcoming cookbook, *The Fit for Life Kitchen*.

The last major section of the book, titled “The Living Health Cookbook,” contains recipes. Under “Soups, Sandwiches, and Rolled-Up Yummies,” is a recipe for “Miso and Vegetables” (p. 405-06), a thick soup. The introduction to the recipe reads: “Miso is a soybean paste that is used in Japanese and macrobiotic cooking as a base for soups. It is also made from brown rice or barley, but these are not as common. I used to buy miso only in health food stores, but now I find it in the Asian food section of my supermarkets. In soup it has a mellow flavor and does not require the addition of any other flavorings, especially since it already has a slightly salty quality.”

These are the only two references to soyfoods in the book.

1762. Hawken, Paul. 1987. *Growing a business*. New York, NY: Simon & Schuster. 251 p.

• **Summary:** This is the companion volume to the 17-part PBS series. In this book the author claims that he started and sold Erewhon. In fact he did neither. The book begins: “When I started my first company in Boston twenty years ago, I had little interest in business. I was just trying to restore my health... Tired of spending so much time shopping, I started the first natural foods store in Boston [Massachusetts] and one of the first in the country. In the first year of operation on Newbury Street, it grossed about \$300 a day and I had fun doing it... When I sold the business after seven years, Erewhon Trading Co. was grossing \$25,000 a day. That was in 1973.”

Erewhon Trading Co. was started by Aveline Kushi. Paul Hawken was the second person to manage the small retail store, but he did not own the company. He never sold it because he never owned it.

1763. Kushi, Michio; Jack, Alex. 1987. *One peaceful world*. New York, NY: St. Martin’s Press. xv + 369 p. Illust. Index. 23 cm.

• **Summary:** Contents: Preface. Part I: Journey to Health and Peace. 1. Memories of Hiroshima and Nagasaki. 2. The Secret Melody of Peace. 3. Medicine for Humanity. 4. Erewhon Revisited. 5. We Are Eternally One. Note: Part I is an autobiography of Michio Kushi.

Part II: Understanding Our Origin and Destiny. 6. The Order of the Universe. 7. Lost Paradise. 8. The Origin and Causes of War. 9. Seeds and Civilization. 10. The Modern Age.

Part III: Transforming Ourselves and Society. 11. Preventing Violence and Mechanical Thinking. 12. Politics: “Medicine Writ Large” 13. The Spiral of Lasting Peace. 14. World Peace through World Health. 15. The Government of the Future.

Part IV: Practical Steps. 16. Qualifications of a Peace Promoter. 17. Swords into Plowshares. 18. Nourishing a World View. 19. Menu and Recipes for World Peace Day.

20. Visions of a New Era. Epilogue: Realizing Our Endless Dream.

Appendix 1. Principles and Laws of the Infinite Universe. Appendix 2. Impact on Society of U.S. Dietary Goats. Appendix 3. A New World Constitution. Appendix 4. Guidelines for a Nuclear Emergency. Appendix 5. Biological Transmutation—A Natural Solution to the Energy Crisis. Notes. Recommended Reading. One World Resources.

Between pages 172 and 175 are the following photos on unnumbered pages: (1) Michio Kushi’s parents, Keizo (father) and Teru (mother) with their sons Toshio and Michio (3 years younger than Toshio), on a skiing trip. (2) Michio and Aveline Kushi with daughter Lily in New York in the early 1950s. (3) Michio lecturing and writing on a blackboard at Boston’s Arlington Street Church in the mid-1960s. (3) Lima and George Ohsawa, both seated on the ground, as they relax on a visit to New York’s Central Park. (4) Singer John Denver shaking hands with Michio Kushi in Boston. During his visit he performed a benefit concert for macrobiotic education and global harmony. (5) Alex Jack, in 1957 at age 12, visiting Hiroshima Hospital and playing with children still suffering from the effects of the atomic bombing. (6) Alex Jack with his father and friends on a recent visit to Hiroshima Peace Park. (7) Peace Promoters, Susan Sarue, Lebanon and Colombia (left) and Hildegard Lilienthal, Germany (right). (8a) Masanobu Fukuoka, farmer from Japan and author of the *One Straw Revolution*. (8b) Antonio “To Zé” Aréal [Areal]. Portugal. (9) Michio and Aveline, standing together, looking out a window.

On the rear dust jacket is a large photo of Michio Kushi, seated, dressed formally and wearing glasses.

Miso soup is mentioned on pages 33, 35, 280, 294, 295. Tamari-ginger dressing, p. 301. Tempeh, p. 302-03. Address: Massachusetts.

1764. *Organic wholesalers directory & yearbook*. 1987. Davis, California: California Agrarian Action Project. *

• **Summary:** Includes a listing for “Cornucopia Natural Foods.” In 1991 this annual publication was renamed “National Directory of Organic Wholesalers” but continued to be published by the same organization in Davis, California.

1765. Selawry, Alla; Pfeiffer, Ehrenfried. 1987. *Ehrenfried Pfeiffer: Pionier spiritueller Forschung und Praxis. Begegnung und Briefwechsel: ein Beitrag zu seiner Biographie [Ehrenfried Pfeiffer: Pioneer in spiritual investigation and practice. Meeting and exchange of letters: a contribution to his biography]*. Dornach, Switzerland: Philosophisch-Anthroposophischer Verlag am Goetheanum. 158 p. Illust. 21 cm. [Ger]*

• **Summary:** For a good English-language summary see Koepf 1991.

1766. Shurtleff, William; Aoyagi, Akiko. 1987. *Soy milk industry and market: Updates from 1984 to 1987*. Lafayette, California: Soyfoods Center. 17 + 59 p. Index. 28 cm. [165 ref]

• **Summary:** This 1987 update to the Soyfoods Center's two-volume 1984 *Soy Milk Industry and Market* has two parts: (1) Year in Review, describing key events and trends each year from 1984 to 1986. (2) A bibliography of soy milk from January 1987 to late 1987, based on records in the SoyaScan database; at the end is a 10-page index. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

1767. Rose, Richard. 1988. *The U.S. soyfoods industry and market today and tomorrow (Interview)*. Conducted by William Shurtleff of Soyfoods Center, Jan. 6. 4 p.

• **Summary:** "President of Rose International in Petaluma, California (and formerly of Brightsong Light Foods), Richard Rose began making tofu and soy milk products in 1978. His forte is product development and marketing, which is the focus of his present company. He has been responsible for the development of over 75 commercial soy food products.

"Shurtleff: What do you see as the most important events and trends in the soyfoods market during 1987?"

"Rose: First, the growth and marketing of Jofu, then the subsequent apparent leveling off or decline of sales or profits, although I am not sure of that. One source says that they have more demand for the product than they can handle. My understanding is that they were going to do a natural food Jofu and introduce it at the Natural Foods Expo at Philadelphia in October. Apparently it never happened; Tomsun didn't even have a booth at the Expo.

"That ties into the inability that I see of soy yogurts to take hold in both the mass market and the natural foods market. I think there are good reasons for that. The difference between ice creams and non-dairy frozen desserts is substantial. There's a large benefit for the consumer of non-dairy products. But that same range of difference does not exist between dairy and non-dairy yogurts. In fact, dairy yogurt is seen as a healthful food, low in cholesterol, fat, and often calories. So there is not as much benefit from eating the non-dairy product.

"Second, the continued domestication of production of aseptic soymilks by Westbrae, Great Eastern Sun, and Vitasoy.

"Third, the decline of sales and fortunes of Tofutti, linked to the decline in sales of non-dairy soy frozen desserts in general. I think Bob Tepper leaving Farm Foods was important. He'd been with them for a long time and has had a lot to do with the great progress they have made over the past eight years. That is quite a story. Farm Foods did things right and they had good luck as well. I'm really happy for them.

"Fourth, the increase and proliferation of soy cheeses.

Last year Cemac and Galaxy got into the market in a big way. Soy-mage was the first truly non-dairy soy-based cheese containing no casein. I think what is more significant is large companies that have no other interest in soyfoods or natural foods are entering the industry. Galaxy went public in about August of 1987. I think their stock started at 5 and last I saw it was 10.25. They are very good at hype. They are to cheeses what Tofutti is to ice cream. I was watching some late night show on TV and their spokesperson Don King came out and began hyping Galaxy products (he had samples with him) against the insistence of the host! These larger companies see a new market and they go after it. But they really have no interest in or history with natural food or soyfoods. It's a problem for the industry and a potentially dangerous trend. If people are going to make money in this industry we need to make sure they do it fairly, without consumer deception, etc.

"Fifth, the increased legitimization of soyfoods in the mass market and in general. There is definitely growing interest. A few years ago tofu was snickered upon whereas now it's more likely to stimulate enquiry and interest. That probably has a lot to do with Tofutti and tofu being recognized for special diets. Likewise, a similar growth of interest in soyfoods internationally, especially in Europe and Australia.

"Shurtleff: What do you think when you read that in a poll of the most hated foods in the USA, tofu was at the top of the list.

"Rose: I suspect they are right. I think that 95% of the Caucasian population does not buy tofu even occasionally.

"Shurtleff: Which products launched during 1987 did you feel were the best quality?"

"Rose: The Barat Bar is very good. In fact, I buy those, even though they are so darned expensive. You don't get a sugar rush, there is no dairy, and they taste good.

"The ToChip, those corn chips, were good but I don't think much has happened with it.

"There are more salad dressings out and they are getting better, and have better shelf life and packaging. Golden Soy and Nasoya come to mind first.

"Of the soy cheeses, I think they are all about the same in quality. I frankly consider them all a wash. I think the Soyco and the Cemac product are slightly better than the Soya Kaas. They all have casein. Our product FREE has no casein.

"Shurtleff: What major changes have taken place in our industry and market during the past ten years?"

"Rose: I think we have begun to develop our own individual identity, separate from the earlier Asian influence. That includes American equipment, American products, supplies, and suppliers. Instead of silken tofu, doufu-gan, and age, we have developed non-dairy frozen desserts, puddings, and salads. There is a great breadth of uniquely American products. In fact, an Americanization of all aspects of the

industry.

“Development of domestic processing equipment, such as Bean Machines has done, is an important trend.

“Shurtleff: What predictions would you make for the future.

“Rose: Growth in the use of aseptic tofu by consumers. Morinaga has a U.S. patent on the process of making tofu aseptically.

“More and better U.S. equipment, and the development of better processing methods.

“The use and recommendation of soyfoods in special diets by traditional groups like the AMA, dietitians, and perhaps even the government. I think eventually soyfoods (other than TVP) will be able to be used in government programs, such as school lunch programs. But that may take a while.

“I still see a breadth and depth of new products. In breadth, I think we’ll see it in baked goods (brownies, cookies, muffins, breads) and confections (candies). Also refinement of current products. Many of the products that have been out for a while aren’t that great; they still need more improvement. But because they have been around for a while, people are less likely to improve them. But I think we will see, because of competition, improvement in current products. New products will tend to be more fully developed.

“Big Food will be getting into soyfoods more, probably to use tofu’s functionality. For example, replacing ricotta with tofu for nutrition and cost reasons. But up until now, I think its been too weird for them, and they are not sure how it relates to them and their mission. They are conservative and slow by nature. The market for tofu (not including second generation products) in 1987 is probably only \$70-90 million, which is still pretty small. They would probably want to see it 4-6 times that size before they make a big move. They are reluctant to do ‘missionary marketing.’ Then there is the perishability aspect of the product. I think Big Food will enter the industry with a product where perishability is less of a problem.

“At some point I think it will make a lot of sense to give tofu a national marketing identity, with regional manufacturers getting together and marketing the same brand and jointly funding national marketing efforts. The dairy companies do that with co-ops and with regional licensing, such as for making Popsicles or bottling soft drinks.

“I also think we’ll see an influx of new types of people into the industry, bringing with them sharp new ideas. Technical people and marketing people. Perhaps some great new processes or patents. Marketing ideas and product development.

“I think we’ll see a lot more use of soyfoods, such as tofu, in foodservice applications. That is really a great, untapped, fertile ground for soyfoods. The problem is, most of the people just don’t know what to do with it.

“Shurtleff: Imagine that you have just been hired by

a major American food company and given a \$50 million budget and a research staff. They ask you to develop and market a line of at least three products. What would you do?

“Rose; I would probably do a line of salad dressings, a line of creamy soups, and a line of frozen entrees (such as lasagna), each using tofu and having no cholesterol. The tofu curds would replace ricotta or cheese. I might also do a line of baked goods (such as brownies and muffins), using tofu to replace eggs and milk. I’d also look seriously at a line of cholesterol-free foodservice items, something they could pop into a steam table or microwave and serve without any other preparations. Perhaps some nouvelle cuisine, or an Italian or Mexican dish, or a tofu-based imitation cheese or tofu sour cream or cream cheese. Anything that could replace a product that is currently high in fats and cholesterol so that the tofu product provided a clear alternative.” Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

1768. Henry Ford Estate: Fair Lane. 1988. Invitation to Henry Ford Soy Buffet (News release). 4901 Evergreen Rod., Dearborn, MI 48128. 2 p. Jan.

• **Summary:** “In celebration of the 125th anniversary of Henry Ford’s birth, you are invited to a very special soybean buffet. Soybean research captured Mr. Ford’s imagination. He felt that development of the soybean would help the farmer to become more independent. In fact, Mr. Ford considered his activities in soybean development to be one of his most significant contributions to the world.

“The buffet will recreate the meal that was served to the press at the Century of Progress Exhibition in Chicago in 1934. Mr. Jan Willemse, creator of the original menu, will cater this event and be available for press interviews. Also present will be Mr. Clem Glotzhober, Mr. Bob Smith, and Mr. Austin Curtis, soybean scientists and researchers for Mr. Ford at the Nutritional Laboratory in Dearborn, and Mrs. Peggy Campbell, grandniece of the Fords and chairman of the Henry Ford Estate Development Committee.

The buffet will be served at the Henry Ford Estate in Dearborn on February 29, 1988 at 10 a.m. to 12 p.m. Shuttle busses will be on hand to take you to the Waterworks Restaurant—formerly Ford’s Nutritional Laboratory dedicated to Ford’s friend George Washington Carver. This event will kick off the many activities planned for the anniversary year. Note: From Eden Foods, Tim Redmond will go and help with the food and questions; Ron Roller may go.

Talk with Alice Cerniglia (Research and Publicity) of Ford Fair Lane Estate (313-593-5590). Dr. Ruddiman was Ford’s friend from school days. Jan Willemse was brought from Massachusetts, where he was a chef, to be a baker at the Ford Motor Co. cafeterias. Mr. Ford was very impressed by him. When they closed down the cafeterias, in the 1920s or 1930s, Jan became Mr. Ford’s personal baker. He didn’t know anything about soybeans before he met Mr. Ford, but

he experimented, developed a lot of recipes, then gave them to Robert Boyer to test in the lab and analyze their nutritional composition. Jan is still very interested in soybeans and their food uses. The purpose of this event is to introduce the estate and Henry Ford to the public. He was very pivotal in many of his enterprises. They are located in Dearborn; the Henry Ford museum and Greenfield Village are located right across the street. There will be an exhibit on Ford's work with soy.

Talk with Alice Cerniglia. 1988. April 11. "About 50 media people attended the event. The food was wonderful. It was received very well and a number of articles resulted. It was a delight for Jan. He was just thrilled. He's such a delightful man. Bob Smith talked to some reporters about his non-dairy whipped cream [Delsoy] and dispenser, and his work on America's first soy ice cream."

Talk with Robert Boyer. 1988. April 11. He does not know Jan Willemse and did know about the event. He has written 40-50 pages on his autobiography but has not yet gotten to the part about his work with soy. He recently fell and broke his hip. Address: Dearborn, Michigan.

1769. Johnson, Kirk. 1988. The hidden food lobby [USDA]. *East West*. Jan. p. 62-68.

• **Summary:** "At the request of Congress, the U.S. Department of Agriculture (USDA) is helping the dairy industry sell its products through industry-financed promotional campaigns. The USDA is also overseeing the promotional work of the beef industry, the egg industry, and the pork industry."

"There are two key issues here: USDA-sanctioned promotion of food that's not particularly good for us, and its failure to promote food that is. These problems raise troubling questions about whether the government should be involved in the food promotion business at all."

"It was the Agriculture Marketing Agreement Act of 1937, a law designed to ensure the orderly movement of farm products from soil to kitchen table. This and a number of subsequent laws gave the USDA the authority to write *marketing orders*, regulations that detail how and when products are to be sold. A marketing order might specify, for example, that no more than 50,000 crates of Nebraska corn may enter the market during any single week."

"Whereas the 1930s and 1940s versions were designed primarily to regulate supply, the marketing orders of the 1970s and 1980s seek to stimulate demand."

"The beef industry began 1987 with a \$29 million advertising blitz designed to coax cholesterol-wary consumers back to steak. The ads used the theme 'Real Beef for Real People...' Beef is the largest source of saturated fat in the average American's diet... Pork is the second largest contributor of fat and saturated fat in the American diet. Two-thirds of the pork in the U.S. is sold as high-fat hot dogs, luncheon meats, and sausages."

"The closest the USDA has come to institutionalizing

its interest in organic farming generally was in 1980, when the Carter Administration established a USDA office to coordinate the Department's research on organic farming methods. The office was staffed by exactly one scientist and one secretary—from a payroll of 8,000 employees—and it lasted only until a personnel cutback under the Reagan Administration eliminated it."

1770. Belleme, John. 1988. San-J's natural tamari-shoyu (Interview). *SoyaScan Notes*. Feb. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** San-J uses the same ingredients to make tamari and tamari-shoyu (15% wheat) here and in Japan, but here they use temperature controlled fermentation. They do not make a regular shoyu with equal parts wheat and soybeans. The closest thing to it is their "tamari-shoyu" containing 15% wheat. This product is made like tamari, using koji-dama (koji balls). Their tamari sells for \$6/gallon versus \$3/gallon for Kikkoman shoyu. Yet many big food processors prefer tamari. [Probably because the higher amino acid content gives a higher flavor profile. Less flavor is lost from evaporation of alcohol during heating. And the salt content is lower]. Eden will be selling all of San-J's U.S.-made tamari-shoyu under their label. Off the subject: The first crop of U.S.-grown nori is now ready in Washington state. Joel Dee of Edward & Sons Trading just moved to California. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1771. Sturgeon, Bruce. 1988. Great Eastern Sun and the U.S. soymilk industry (Interview). *SoyaScan Notes*. Feb. 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** "Both Great Eastern Sun and Mitoku still import soymilk from Japan. Barry Evans (president) okayed my releasing our sales in terms of gallons of soymilk. Each of the following is our fiscal year from September 1 to August 31 the next year."

Year Gallons sold Percent Increase

1985-86 100,000 -

1986-87 106,000 6% New quart introduced

1987-88 148,000 40% Based on 5 months, annualized

The big increase in the current year is due almost entirely to the American soymilk. In the first 5 months of this year we've sold as much American-made soymilk as we sold in all of last year. We only make quarts in America. In New England, the low-price area, it retails for \$1.59/quart average. A lot is sold in truckload quantities. During some sales, it goes for as little as \$1.29/qt. On the West Coast it is typically \$1.99 to \$2.19. By comparison, the imported 6 oz product retails for \$1.09 to \$1.19, which is 3.8 times as much per fluid ounce, and this is not even a full margin. The product is made in Minnesota at St. Peter Creamery (which also makes spray-dried soymilk) then shipped in a stainless steel dairy tanker to Borden's in Pennsylvania. If that freight

could be eliminated, it would allow significant reduction of the retail price. They are actively talking with St. Peter about getting a Tetra Pak machine there and sharing it. Edensoy's price is also high because of depreciation, and Sunsoy's because of exchange rate. There is considerable pressure on Vitasoy to float their currency. It will be interesting to see what happens to Vitasoy prices if that happens. Vitasoy has low overhead and plenty of excess capacity. Tetra Pak's sales of all products are way below their expectations; the main activity is in juices. Soymilk is doing well for them. Milk has not gotten off the ground, but it could with *Lysteria* scares and deaths. GES holds 1% of their product run for quality control. There are three routes of possible bacterial contamination in Tetra Pak cartons. 1. The spores that are not killed by the temperature/time combination. 2. Bacteria entering through a poorly sealed seam. 3. Bacteria entering through a failed steam seal in the 40-foot pipe from the UHT unit and the packaging machine. The packages explode. Address: Director of Marketing, Great Eastern Sun, 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730.

1772. Bernardini, Lorenzo (Bern). 1988. Tasty treats at Wildwood Natural Foods Deli. *News (San Rafael, California)*. Feb. 17-23.

• **Summary:** This article is in the section titled "Dining Out in Marin." A dietary genius named Bill Bramblett along with partners Paul Orbuch and Frank Rosenmayr have created a huge success story at Wildwood (A fourth partner, Jeremiah Ridenour, operates a tofu factory in Santa Cruz). Wildwood makes or distributes 90 different products. In addition to Wildwood Natural Foods Deli in Fairfax, the company conducts a thriving wholesale business in nine Bay Area counties, with additional outlets from Eureka to Los Angeles. For the past eight years Wildwood has experienced a 30 to 50% annual growth. The company distributes fifty thousand products weekly. Wildwood has nine delivery vehicles on the road.

A photo shows Chef Narayana, owner Bill Bramblett and maitre d' Daniel Spear; they not only serve vegetarian fare on the premises but also operate a brisk take-out business. The following products are mentioned: Tempeh Fiesta, Tabouli, Japanese Noodles, Tofu Dill Salad, Spinach Seitan Salad (Wildwood makes the seitan), Cream of Potato-Dill Soup (dairyless), Enchilada con Salsa. Address: Restaurant features.

1773. Schiering, Bob. 1988. New amazake products in Tetra Pak cartons (Interview). *SoyaScan Notes*. Feb. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob has just talked with California Natural Products in Manteca, the makers of Imagine Foods' amazake. They say that two multi-million dollar companies will shortly have amazake drinks in Tetra Pak cartons on the

market. Other parties suggest that Great Eastern Sun might possibly be involved.

Note: In Dec. 1989 Grainaissance of Emeryville, California, launched Grainaissance Amazake Naturally Sweet Rice Drink (in a Tetra Brik Aseptic Carton) [Original Flavor, Almond Shake]. In June 1990 Imagine Foods of Palo Alto, California, launched Rice Dream Low Fat Non-Dairy Beverage (in a Tetra Brik Aseptic Carton).

1774. Belleme, John. 1988. Update on miso in America. How about amazake as a soymilk sweetener? (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mitoku (Mr. Kazama and Chris Dawson) is considering a joint venture with Sendai Miso Shoyu of a miso plant on the West Coast of the USA. This is still very tentative. They are also considering making amazake. But about 2 years ago Miyako Oriental Foods increased their miso production capacity. They can probably make over 1 million pounds a year now. It was about 600,000 lb/year. Fujiwara Brewing Co. in Okayama, which makes equipment for miso and soy sauce companies, supplied the equipment to Miyako. The company San-J finally used to build their tamari plant and supply the equipment was Fujiwara's competitor, Nagata. Steve Earle said this was the same company that had just helped expand the Miyako plant. According to the people at Ohsawa-America, Mr. Kitani, the Japanese man who makes Yamaki Shoyu, and Bob Kennedy, formerly of Chico-San are planning a miso plant in the USA, probably with automatic koji equipment.

John feels that sales of miso in America have slowed down and that if new companies enter the market, it will be oversupplied. At American Miso Co. his maximum capacity was about 400,000 lb/year. The volume hasn't changed much in the past few years. Christian Elwell at South River Miso Co. has a capacity for about 60,000 lb/year, which he hasn't reached. Both these are more expensive than Miyako (\$4.49 for American Miso white miso, Christian's is more, and Miyako's is about \$2.85/lb, or only 63% as much). He suggests: How about amazake as a sweetener for soymilk? It would replace barley malt and give the soymilk more body, kind of like a shake. Then you can put rice on the label. Great idea! Address: Route 5, Box 258, Rutherfordton, North Carolina 28139. Phone: 704-749-9537.

1775. Milbury, Peter. 1988. Chico-San, amazake, and rice syrup (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Peter believes that the earliest recipe for amazake in a U.S. cookbook was in Cornelia Aihara's *The Chico-San Cookbook*. This was later reprinted as *The Macrobiotic Kitchen* by Japan Publications. The original book was a labor of love by Cornelia for Chico-San, edited by Peter Milbury and Dave Schleiger. Cornelia has always

taught using amazake as a sweetener, and she prefers it to rice syrup. She has a wonderful cake, sweetened with amazake and with an amazake frosting. She was a pioneer in introducing amazake to America.

Junsei Yamazaki is now selling his own miso. He is at Route 1, Box 1333, Orland, CA 95963. Phone: 916-865-5979. The product name is Junsei Amazake Miso.

Concerning the future of amazake: "I think it's hot. It's just got nowhere to go but explode. It's such a wonderful product, with so many variations. All the beverages are now dessert drinks. Someone should make an amazake counterpart to soymilk, sold in larger quantities, with a smoother consistency, less solids, and less sweetness. Chico-San is now working on an amazake powder with California Natural Products (CNP); mix with warm water and serve as a drink. Rice syrup also has great potential as a sweetener. Chico San's Yinnies, a malted sweetener, were the first product of their type in America. Sjon Welters of Nasoya is at least thinking about using amazake as a sweetener for soymilk. Sjon spent a week in the Chico-San rice syrup operation before it was shut down and moved to CNP. The amazake used for Rice Dream is much sweeter than a typical amazake. "I think Rice Dream is one of the most fantastic products I've ever tasted. Originally Chico-San was going to make the product for him. Then we shifted down to CNP. One company that might have interest in amazake is JGR Resources, Inc. Dr. Adam Lambert is Technical Director. P.O. Box 97, Haskell, New Jersey 07420. Phone: 201-835-7644. Their product is Koji-Converted Rice-O-Sweet Brown Rice Syrup. They are a wholly owned minority corporation, that took over a brewery.

The first attempt Peter ever heard of to package amazake in Tetra Pak was in Jan. 1985, just after Heinz took over Chico-San. Bob Kennedy and he set up a run with Real Fresh in Visalia. Real Fresh botched the homogenization. By this time Chico-San had a lock-tight exclusive contract with CNP to make rice syrup and amazake just for them, using their rice. Chico-San set up CNP in the rice syrup and amazake business and spent enormous amounts of time showing them how to do it. Before that, starting in 1972, Chico-San made its own rice syrup in Chico using not koji but a combination of malted brewer's barley and commercial enzymes from Miles Laboratories. At that time CNP would make the amazake for Robert Nissenbaum, but Chico-San would do the billing. This changed after Heinz took over and couldn't meet their commitment to the contract with CNP. So CNP got out of the contract and dealt directly with Nissenbaum.

Milbury and Belleme say Macromuse (Peggy Rossoff; 301-656-4313, Bethesda, Maryland Circ. 12,000) is much better for long in-depth articles than East West. Address: Lundberg Farm, Box 369, Richvale, California 95974. Phone: 916-882-4551.

1776. Roller, Ron. 1988. Edensoy and the U.S. soymilk

market (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron estimates the size of the U.S. soymilk market to be about 2.1 million gallons a year (not including infant formulas, or small fresh local manufacturers). The largest companies, in descending order of size, are: American Soy Products (Eden Foods; 55-65% market share), Vitasoy, Sunsoy, Westbrae, and Great Eastern Sun. The trend is definitely up. Vitasoy's aggressiveness in the marketplace from early 1987 slowed down Edensoy's progress. Then Vitasoy had big programs and in the last 4 months they seem to have cooled out quite a bit. A Dun & Bradstreet report shows that they lost \$700,000 last year selling soymilk.

All is going very well in the joint venture with the various Japanese companies. The relationships are generally harmonious, and they are on target in terms of their volume goals and expectations. They hope to increase volume to cut down overhead expenses. The plant can make 65-70,000 cases/month. During the last 2 months there have been 15 enquiries for export, some of which will soon be signed agreements with France, New Zealand, Australia, etc. They have approval for 190 Kroger stores and are cautiously optimistic on this. Mr. Iwazuki from Marusan runs the ASP plant. They now have 6 soymilk products which are Eden Foods' top six best-sellers: three flavors (carob, vanilla, original) in two sizes (liter and 250 ml). By volume, the liter outsells the 250 ml by more than 3 to 1. Next: an organic soymilk (They now use non-organic Beeson soybeans. The organic market now seems to be growing rapidly), some new flavors, and some totally new soy products, such as tofu. Eden no longer imports soymilk. Soymilk is pretty price sensitive; whenever they put it on sale, it moves. They just started a case-stack program that Sunsoy has had for years. When they started the plant they stopped wholesaling, and dropped over \$1 million of wholesale business. But they made that up this past year, plus some.

Concerning oil in soymilk: The label on their Japanese imported product was not correct. Oil was added in Japan but Eden was not told. It was not listed on the label. When their U.S. product was launched, it contained less than 1% added oil. Eden got so many complaints about this small amount that they now no longer add oil, except to the carob, and that will be discontinued as soon as their present labels are reprinted.

Concerning other grains, they are importing Job's tears, which is now recommended by macro teachers for cancer patients. They brought the price from \$8.50 down to \$2.00/lb and sell lots. Also involved with quinoa, they used to be the master distributor for Quinoa Corp. but are now importing lots from Andean countries; expect to reduce the retail price by 40%. They are thinking of using quinoa in soymilk. Their present sweetener is "malted cereal sweetener" which is made by mixing sprouted barley with corn grits, the adjunct. Rice is too expensive. You can get a higher sugar

content with corn than with barley. Rice is still higher in sugar. Corn converts the fastest; rice is slow. It is specially made by a malting house, and they use almost a tanker load every 10 days. They helped develop the product and intend to come out with a line of malted grain sweeteners using malted barley plus different grains. "There is a lot of funny business in the malting arena." They did not like the use of commercial enzymes by California Natural Products. He thinks most people do not realize how their rice syrup is made. Address: Director of Purchasing, Eden Foods, Clinton, Michigan.

1777. Roller, Ron. 1988. Eden Foods, San-J, and tamari shoyu (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Eden has negotiated with San-J for San-J to make a private label soy sauce with less wheat than regular shoyu. This is an exclusive agreement, but the details have not been completely finalized. They make their koji from balls rather than loose koji. Now they are making soybean meal tamari for their industrial customers. Eden's product will be made from whole soybeans, not meal. Everything they bottle is made from whole soybeans. They want to get their tamari production going before they think about making shoyu. Tamari will be the primary product. But to cover their overhead, they will have to cut into the shoyu market. They have managed to capture a large percentage of the bulk soy sauce market with their tamari. Japan Foods (which is owned by Kikkoman) is going to distribute their tamari. Apparently the more wheat a soy sauce has, the longer it takes to ferment. They use temperature control with all their soy sauce. They say it's the most modern fermented soy sauce factory in the world. He has visited the plant. Eden still imports a real shoyu from Marushima, and plans to continue it. But down the road they may ask San-J to make it for them. Now is much too early. A big question is what to call the new product that contains about 20% wheat. San-J plans to call it "shoyu," not "tamari shoyu." It's kind of an in-between product. They get their wheat and soybeans from Virginia. Address: Director of Purchasing, Eden Foods, Clinton, Michigan.

1778. Golbitz, Peter. 1988. Soy cheese market: From nonexistence to boom in three years. Popular new products offer health benefits over traditional counterparts. *Soya Newsletter (Bar Harbor, Maine)*. Jan/Feb. p. 1, 6-7, 10, 12. [1 ref]

• **Summary:** Born under a bad sign: The category was created in early 1985 when the first supposedly "non-dairy" cheese appeared. Marketed as Soyarella, and distributed by Neshaminy Valley Natural Foods of Huntingdon Valley, Pennsylvania, the product label read; soy milk, water, soy oil, vegetable gum, vegetable renin, and salt. The label also stated that the product was "non-dairy". However, there was

immediate suspicion from different parts of the industry as to what Soyarella really contained. Even with all the controversy surrounding the product, Soyarella was a big hit, but it disappeared from the market early in 1986.

The hard cheeses: The first product to hit the stores after Soyarella was Soya Kaas–Mozzarella Style, marketed by American Natural Snacks, St. Augustine, Florida, a subsidiary of Tree of Life. It was first released during the spring of 1986 in seven pound blocks. Casey Van Rysdam, president of American Natural Snacks admits that his company is certainly the market leader now. Galaxy Cheese had already been marketing a line of reduced cholesterol, substitute cheese products under the Formagg name since 1977. A Galaxy subsidiary, Soyco Foods, came out with Soyco, a soy/casein blend cheese and Soymage, a casein-free product. NuTofu, made by Cemac Foods, came out in late 1986. American Chef released their soy/casein blend cheese under the Soy Joy label in 1987.

The soft ones: Soyalite is a soft tofu cheese made by Simply Natural of Norma, New Jersey. Better Than Cream Cheese is produced by Tofutti Brands, Rahway, NJ. Tofutti Brands will have this cheese available by mid-March, in plain, salmon, onion, and vegetable flavors. Better Than Cream Cheese is now being used as an ingredient in Tofutti Brands' Better Than Cheesecake and rugalach pastries. The product will also be used as a stuffing in a line of pasta products scheduled for release later this year. As an ingredient, Pizsoy and Old Chicago are soy-based mozzarella products which fit nicely as ingredients for frozen pizzas. Light Foods of St. Louis, Missouri, released New Tofu Links Special—with "natural imitation" cheddar soy cheese stuffed inside.

Health benefits of soy-based cheese products include the lack of cholesterol and lactose. Soy-based cheeses are just one part of a larger category of products—substitute and imitation cheese products—and between 1982 and 1985, shipments of these products grew by one third in dollar value to \$325 million, according to the U.S. Commerce Department. Frost & Sullivan, in a recent study, stated that both substitute and imitation cheeses held a 5% market share in 1982, and projected that the category would grow to 15% of the cheese market by 1987. According to New York-based Selling Areas Marketing, Inc. (SAMI) and Frost & Sullivan, retail sales of natural and process cheese totalled over \$4,500 million during 1985 and is one of the stars of the dairy industry with sales increases of over 5% a year projected for the future. Address: P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

1779. *Natural Foods Merchandiser*. 1988. Soyfoods import costs rise as dollar declines. Feb. p. 32.

• **Summary:** Discusses techniques used by Westbrae, Edward and Sons Trading Co., Eden Foods, and San-J International to try to deal with the falling value of the dollar against the

yen. The dollar began its fall in September 1985. In the past 18 months, the dollar has been devalued almost 40% against the yen, making Japanese imports about 40% more expensive. To try to keep consumer prices as low as possible, some companies try to absorb the cost increases themselves, some ask Japanese manufacturers to help, and some (such as Eden Foods, Westbrae, and San-J) start to make products in the USA.

1780. *Natural Foods Merchandiser*. 1988. Grainaissance Inc. Feb. p. 58.

• **Summary:** Grainaissance of Emeryville, California, recently moved into a new manufacturing plant to accommodate the growing demand for its products. The company is expanding its amazake into the Northeast, the Northwest, and the South with distributors including Tree of Life, Stow Mills, Balanced Foods, Collegedale, Midwest, Texas Health, Ozark Cooperative, Akin, NutraSource, and Applegate.

1781. Westbrae Natural Foods. 1988. Westbrae Soy-O, Vestro Foods (new owner), and Eastern Gates Native Soy Products in Hong Kong (Interview). *SoyaScan Notes*. March 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soy-O was a soymilk with “no oils added” that was sort of debuted in Nov. 1986 in 20 white unprinted Tetra Brik cartons in 3 flavors, with a flyer, but was never really launched. That was just when they decided to switch their manufacturing out of Japan and wanted to focus on WestSoy and malted. Also things did not go well with the manufacturer. Lehmann wrote in Nov. 1986: “Westbrae O-Soy. The Honorable Soy Drink. Pliable foil packs. 6 oz. Organic soybeans, no oil added. Plain, carob, and vanilla flavors.”

In February 1988 Westbrae merged with Vestro Foods, a company in southern California which is not in the natural foods industry. A publicly held company traded over the counter (NASDAQ symbol: VEST), Vestro is bigger than Westbrae; though they do not have a lot of employees they do have a lot of money and marketing experience. The company that never sold out just sold out. Gordon is still president. They have specialized in finding niche food companies and helping them develop in their marketing. Westbrae will be looking for more growth by acquiring other natural foods companies or products that meet their quality standards, and by launching some new products of their own. Everyone is very pleased.

Their WestSoy soymilk in Tetra Brik cartons is made in Hong Kong [by Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy] and selling very well. Sales of liters especially are up. Westbrae gets their soymilk through Eastern Gates Native Soy Products; Westbrae is not sure if they are the manufacturer or distributor. The Maltededs are made domestically. The source is a secret. Sales are picking

up after a recent price drop. Address: Emeryville, California.

1782. Ballard, Bob. 1988. History of Great Eastern Sun (Interview). *SoyaScan Notes*. March 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company was founded in March 1982 by Barry Evans (who is now the sole owner and lives in Los Angeles). He may have been joined by Martin Roth and John Belleme. The original purpose was to be a distributor for the miso made by American Miso Company. But it soon decided to import Japanese macrobiotic products from Mitoku (the first order was placed in Jan. 1982) and later became a manufacturer. Address: 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

1783. DeBona, Don. 1988. Re: History of The American Miso Co. Letter to Bob Carr at Cleveland East West Center, March 13. 6 p. Handwritten.

• **Summary:** “The American Miso Co. was begun in 1979 by Barry Evans, Sandy Pukel, Joe Carpenter, John Belleme, Michio Kushi, James Kenney, and several other partners. It was arranged for John Belleme and his wife to travel to Japan and study for 7-8 months with the Onozaki family of traditional miso makers. John Belleme returned and began making traditional miso for the then named Oak Feed Miso, Inc., previously called the Erewhon Miso Co., and presently the American Miso Co.

“Meanwhile, Barry Evans began a new company in order to distribute our miso. This company was, and still is, called The Great Eastern Sun Trading Co., located in nearby Asheville, North Carolina. Barry Evans eventually became the sole owner of the American Miso Co. I came to work for Great Eastern Sun in 1983. Prior to this I had worked for several years for Laurelbrook Foods, a large natural foods distributor in Maryland, and then on a Permaculture farm along the Maryland/Virginia border for two years growing organic winter wheat, barley, soybeans and summer produce according to the principles set forth in Masanobu Fukuoka’s classic, *The One Straw Revolution...* We still do some farming and quite a bit of gardening on our 100 acres here at American Miso Co., in the foothills of the Blue Ridge Escarpment. I met my wife at a macrobiotic study house in 1980.

“We arrived at American Miso Co. in February 1985 and I took over the position of miso maker after John Belleme’s departure in December 1985 [Note: Belleme was fired by Barry Evans.] I was trained to make miso by Akinori Takei, my Japanese teacher and friend, who had also studied with the Onozaki family in Japan. Takei-san remained with me for approximately another year; since then I have been on my own. We are a small enterprise and make approx. 250,000 lb of miso a year with only 3 employees and myself. We make all of our own koji (both barley and rice) by hand in a centuries-old fashion.” Address: Route 3, Box 541,

Rutherfordton, North Carolina 28139.

1784. Tsui, Hilton. 1988. Soymilk in Hong Kong. New developments with Vitasoy (Interview). *SoyaScan Notes*. March 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soymilk manufacturers in Hong Kong include: 1. Hong Kong Soya Bean Products Co. Ltd., makers of Vitasoy; they had 92% of the soymilk market in 1987, down from 94% in 1986. 2. Coca Cola Co., makers of Hi-C; 8% of the market, up from 5.5% in 1986. When Hi-C was first launched in 1981 it was a total flop. But the new Hi-C is much improved, with very good taste. The five flavors include Honey-Dew Melon and Peanut. This is now Vitasoy's biggest competitor. 3. President Enterprises Corp. of Taiwan has a branch in Hong Kong. 4. Winner, which was purchased by Beatrice in about 1985. They used to make Doll brand soymilk, which was also sold in 1987 New York and San Francisco Chinatowns. But Doll is no longer found in the U.S. or Hong Kong. 5. Dairy Lane, Hong Kong's biggest producer of cow's milk, launched Delite soy ice cream in 1987, in 3 flavors (wildberry, rocky road, mocha chip). The packaging and flavor are almost identical to Tofutti; it could be licensed. They could be making soymilk. Hilton has never heard of Eastern Gates Native Soy Products in Hong Kong.

Vitasoy USA did NOT (as a competitor alleged) lose \$700,000 on soymilk in 1987. They do cooperate with Dun & Bradstreet but do not break out financial information by product line. Last year Vitasoy USA was profitable as a company.

The company's goal for 1987 is to pass Westbrae to become number 2 in the U.S. soymilk market, by penetrating the areas where distribution is now nonexistent or weak: Texas, the Pacific Northwest, the Sun Belt, and the Midwest. But they may be number 1 in northern California, and number 2 in California as a whole, the northeast and perhaps the southeast. Nationwide he thinks they are now number three. Address: Vitasoy USA, Brisbane, California.

1785. *Oakland Press (Pontiac, Michigan)*. 1988. Soybeans bring variety and good health to the table: Bean pops up in everything from soup to nuts. March 16. p. D-3.

• **Summary:** Contains 5 recipes from INARI and 2 from Eden Foods (using Edensoy soymilk): Pea and soynut salad. Dandy soynut salad. Super Soy energy bar. Soynut butter. Soynut butter soup. Banana bread. Basic creamy white sauce.

1786. DeBona, Don. 1988. Developments at American Miso Co. since 1985 (Interview). *SoyaScan Notes*. March 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don left his job as general manager at Great Eastern Sun and began to work at American Miso Co. (AMC) in February 1985. He took over management of the

company in December 1985 after John Belleme left. It was a difficult transition, as Belleme and Barry Evans (an absentee owner) did not get along well. Since then, production of miso has roughly doubled, from 9 to 20 large miso vats. His miso teacher, Akinori Takei, stayed until October 1986. Since then Don has run the company. Not much of their miso is used any more in second generation products; they used to sell some mellow white and red miso to Nasoya and Simply Natural. Now 95-98% is sold for kitchen use in plastic tubs. The tubs replaced plastic bags 2 years ago. He also sells in bulk: 35 or 50 lb. He has always used all natural, organic ingredients, which makes his miso about twice as expensive as Cold Mountain. So they lost all their sales to food processors. But total volume has increased due to good sales work. His best-sellers are mellow white miso and traditional country (long-term) barley miso, followed by mellow barley, traditional red rice miso, and sweet white miso. He has ordered his koji starter through Mitoku for the last few years. Now he hopes to buy direct from Kojiya Sansanaemon in Aichi-ken. Don has studied macrobiotics for 12 years. AMC originally had 6 owners; Barry Evans now owns about 95%. Barry originally paid for John Belleme to study miso in Japan. Address: Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

1787. Mio, Art. 1988. Update on Morinaga (Interview). *SoyaScan Notes*. March 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Morinaga not only has a patent on their aseptic tofu process, they also have proprietary rights to the film. This special film was developed jointly by Morinaga (Japan) and Tetra Pak, and the latter cannot sell it to any other company. This may not be mentioned in the patent.

Concerning promotion in the USA, for the first few years Morinaga targeted their sales to Asian-American consumers. They got little results. Then Art Mio heard that supermarkets were having problems with spoilage, so he changed his focus to supers. Stage 3 has been the recent targeting of the natural and health foods industries. The new package design and absence of monoglycerides on the label have helped sales in this market. Sales could increase 50-100% this year. Headquarters may have decided to build a plant in America. The Japan plant may only be running one shift. Susan Bucher's company (Bucher & Russell, 3801 Wilshire Blvd., Suite 1403, Los Angeles, California 90010. Phone: 213-738-5300; Susan is Japanese-American) has done the recent set of ads.

Tree of life private label tofu sold 5,000 units a week in 1986. Art does not know who makes it. Address: Morinaga Nutritional Foods, Inc., 5800 South Eastern Ave., Suite 270, Los Angeles, California 90040. Phone: 213-728-4325.

1788. *Organic Gardening*. 1988-- . Serial/periodical. Emmaus, Pennsylvania: Rodale Press. Robert Rodale, editor.

Vol. 35, No. 5. April 1988.

• **Summary:** Previous title *Rodale's Organic Gardening*. Subsequent title *OG*. Continued until Vol. 48, No. 5, July/Aug. 2001. Robert Rodale died on 20 Sept. 1990. Address: Emmaus, Pennsylvania.

1789. **Product Name:** Mt. Fuji Mustard with Tamari & Wasabi.

Manufacturer's Name: Westbrae Natural Foods (Product Developer/Distributor).

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1988 March.

Ingredients: Mustard seeds, vinegar, tamari (soybeans, water, salt), wasabi (horseradish), cinnamon, allspice.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Westbrae Newsletter. 1988. Talk with Megan Eoyang. Released in March. A hot mustard. Label. 1988. Front and back panels. 2.5 by 2.5 inches. with bottom slightly wider than top and rounded corners. Glossy paper. Blue, green, and yellow on white with illustration of Mt. Fuji above a landscape. "A traditional 'hot' mustard with a hint of the Orient. Appropriate for every dish!" Talk with Gordon Bennett. 1988. Aug. 26. This product is made (mixed) in America, but the real Japanese wasabi powder (expensive!) and soy sauce used in it are imported from Japan. It also contains horseradish.

1790. Rose, Richard. 1988. Re: Personal observations on soyfoods at Natural Foods Expo West in Anaheim. Letter to William Shurtleff at Soyfoods Center, April 12. 1 p. Typed, with signature on letterhead.

• **Summary:** "Enclosed is all the information on soyfoods and amazake I could find at the 1988 Expo West natural foods show.

"Notable trends:

"(1) Only 1 soy frozen dessert present, Ice Bean.

"(2) Rice Dream has expanded into frozen, coated bananas.

"(3) The Soyfoods Pavilion was not delineated in any way. The banner was not present, nor were signs. No sufficient answer as to why this was so was available.

"(4) Only 2 tempehs present, Tempehworks and White Wave.

"(5) Only 1 tofu present, White Wave.

"(6) Kawanishi and Airtight had a double-wide booth to show tofu making equipment and supplies.

"(7) Only 2 soymilks present, Vitasoy and Westbrae.

"(8) Soya Kaas was not displayed in the Tree of Life booth.

"(9) As many soyfoods companies were out of the Pavilion as in it. It looks like they did not sell out all the space in the Pavilion.

"(11) Gary Barat has gone off the deep end. Ask me how on the phone.

"(12) Mori-Nu had a disorganized booth that was obviously conceived by someone who thought this would be what natural fooders would want to see. It was dumb... a walking Mori-Nu Tofu box?

"Depending on who you talk to, the S.A. [Soyfoods Association] meetings were either incredibly wonderful or absolutely disgusting. I was not present at them.

"Notable events: Gary Barat is only a board member, Gordon Bennett is Pres., Yvonne is Treasurer, and Peter Golbitz is VP. Danielle [of Morinaga] and Jack Mizono [of Azumaya] were elected to the board. The single big program for the S.A. is Soyfoods Month in April 1989. Budget is \$200/month to keep the lights on. Gary was talking about stiffing Smith Bucklin and Steve McNamara. There was no discussion with me or at the meetings about my proposal. Danielle threw a snit to get on the board, as did Yvonne.–Richard."

The Rose International letterhead states: EasyLink Mailbox 62978515. Telex 990027 (Rose Intl UQ). Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

1791. Kushi, Aveline; Jack, Alex. 1988. Aveline: The life and dream of the woman behind macrobiotics today. New York, NY: Japan Publications. 331 p. Foreword by Michio Kushi. April. No index. 22 cm.

• **Summary:** In this autobiography, Aveline Kushi tells her life story as the first lady of macrobiotics in America. She also adds much interesting detail to the history of macrobiotics and the natural foods movement in America, including the history of Erewhon Trading Co. (p. 192-204).

Aveline was born Tomoko Yokoyama in about 1923 to devout Christian parents in the remote Japanese village of Yokota. After surviving a life-threatening illness, she quit teaching schoolchildren and went to Tokyo to enroll in the Maison Ignoramus, "The School of Ignorance," founded by macrobiotic educator George Ohsawa. There she became inspired by his teachings and dream of realizing One Peaceful World by elevating the physical, mental, and spiritual health of human beings. Recognizing her leadership ability, Ohsawa sent her to America, without a penny in her pocket, to spread his teachings. At the Greyhound bus station in New York she met Michio Kushi, and they were married in 1953. Over the next 4 decades they played the leading role in introducing macrobiotics to the western world—while Aveline also raised a family of 5 children!

The book could be improved by the inclusion of more dates (for example, we are not told when Aveline was born, when Erewhon was founded in Boston or Los Angeles, etc.) and by an Index.

On the front dust jacket cover is a large color photo of Aveline, holding a fan, in a Japanese kimono. On the

back cover is a smaller photo (black and white) of Aveline standing with Michio. Other photos show (p. 65-74; none on glossy paper): (1) Banjiro and Katsuo Yokoyama, Aveline's parents, in traditional Japanese clothing. (2) The Yokoyama family in Yokota, Japan, mid-1940s. (3) The Salvation Army Church in Yokota. (4) Aveline, at age 15, with roommates at Teachers' College, 1938, Japan. (5) Aveline with members of the Tennis Club. (6) Participating in a ladies' sword demonstration at college. (7) Aveline and two graduate students, 1941. (8) Mr. Tanaka, class adviser, with students, including Aveline. (9) During World War II, Aveline with her students at an elementary school where she taught in the village of Maki. (10) Aveline's mother and brother, Makoto, who served in the Japanese Navy. (11) Aveline in Yokota after her illness and before going to George Ohsawa's school. (12) George Ohsawa, seated on the grass out of doors, smoking his pipe, with his students. (13) Aveline's farewell party at the Maison Ignoramus before going to America. George Ohsawa, with pipe, is at top right; Lima Ohsawa is to the left and Aveline is next to her. (14) Michio, Aveline, and Mr. Shinohara (a former Maison Ignoramus student) on the Chicago, Illinois, waterfront, 1951. (15) Aveline and a friend from Nagasaki relax on the Columbia University campus.

Pages 153-60: (16) Aveline and daughter Lilly in New York, 1953. (17) Michio Kushi presides over wedding of Herman and Cornelia Aihara. (18) Aveline and her children in Queens, New York (Haruo, Norio, Lilly, and Phiya [a boy]), 1962. (19) George Ohsawa on a visit to New York, early 1960s. (20) Michio teaching at Musubi, the first macrobiotic restaurant in America. (21) Erewhon employees during a snowstorm, early 1970s. Aveline Kushi is in second row. (22) Lima Ohsawa and Aveline at a macrobiotic party in Boston, early 1970s. (23) International travels and teachings: Learning to wear an Indian sari. (37) In front of the main house at the Kushi Institute in Becket with

Kazuhiro Irie, a Japanese friend. (38) Demonstrating daikon at a cooking class. (39) With Anthony Muto, Dr. Martha C. Cottrell, and other macrobiotic teachers in New York after the AIDS seminar. (40) On a visit to Africa in 1987, the Kushis started a macrobiotic educational campaign to prevent AIDS. This photo shows them discussing organic farming with Sister Theresa in the Congo. (41) The Kushis and their son Phiya at the grave of Aveline's parents on a mountainside overlooking Yokota. (42) Full-page photo of Aveline and Michio Kushi.

Note: On page 198, it is suggested (but not clearly stated) that Aveline might have coined the term "natural foods" in this sense or context. A search of Google Books shows that the term was used in 5,450 books from 1954 to 1964, and many of them are in this sense and context. The term "natural foods store" was also used in 1955 by J.I. Rodale in *Organic Gardening and Farming* (a periodical; see Vol. 2, p. 106) and in books by D.C. Jarvis (1960) and William Peacey Shepard (1961).

From the publisher (dust jacket inside covers): "Descended from rural samurai, Aveline Kushi grew up in the deep mountains of central Japan. From time immemorial, her village was renowned as the home of Princess Kushi Inada-Hime, the Wondrous Princess of the Rice Fields, and her husband, the Wind God, who introduced rice, soybeans, and other foods and bequeathed to humankind the Sacred Sword, one of the Three Treasures of Japan.

"From her devout Christian parents, Aveline inherited qualities of faith, patience, and perseverance that would see her through the years of war and hardship ahead. After a life-and-death illness that she survived by writing poems about the natural world around her, she quit teaching schoolchildren and went to Tokyo to enroll in the Maison Ignoramus, "The School of Ignorance" founded by macrobiotic educator George Ohsawa. There she became inspired by the dream of realizing One Peaceful World by elevating humankind's physical, mental, and spiritual health. Recognizing her leadership ability, Ohsawa sent her to America without a penny in her pocket to spread his teachings. In the Greyhound bus station in New York, she met Michio Kushi for the first time. Over the next four decades they together introduced macrobiotics to modern society.

"In the 1950s the young couple laid the foundation of their future educational activities with a succession of small businesses, restaurants, and seminars in New York. In the 1960s Erewhon Trading Company was founded in Aveline's kitchen, and the modern organic/natural foods movement was born. In the 1970s public education linking diet and disease began with the East West Journal, the East West Foundation, the Kushi Institute, and international seminars and cooking classes. In the 1980s, the Kushis' basic dietary approach to cancer and other degenerative diseases was adopted by the major medical and scientific associations, and

they were invited to lecture at the United Nations, the World Health Organization, and other global bodies.

“In the first half of her remarkable autobiography, Mrs. Kushi introduces us to her background in Japan: to Mr. Tanaka, her college mentor, and Sontoku Ninomiya, the legendary peasant sage, whose teachings influenced her early development; to Miss Mitsuko Yodono, the high-spirited tennis star who introduced her to macrobiotics; to Lima, George Ohsawa’s gracious wife who delivered “the thunderbolts” from her husband’s quarters in “the Seventh Heaven”; and to Mr. Shimizu, the kindly silk merchant who lost everything in Allied bombings but who borrowed money from poor rice farmers to pay for her ticket to America.

“In the second half of her memoirs, the author describes the early years in New York, struggling with her husband to make ends meet and raise a family of five children. She recounts the move to New England, chronicles the rise and fall of Erewhon, and offers her insights into the many cultures she has visited. She also presents her views on family matters and the central role of women in creating a peaceful society and reflects on Noh drama, the Tea Ceremony, futon-making, haiku composition, chanting and meditation, and other traditional arts and spiritual practices which she has perfected and taught over the years. A charming selection of photographs, letters, and poems complements the text.” Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6876.

1792. *Soya Newsletter (Bar Harbor, Maine)*. 1988. Soyfoods Association of America holds annual meeting. March/April. p. 14.

• **Summary:** SAA holds annual meeting. Elected to serve one year terms as officers were Gordon Bennett, president; Peter Golbitz, vice president; and Yvonne Lo, treasurer. Also appointed to serve on the board to fill three vacancies were Steve Myers, Farm Foods; Jack Mizono, Azumaya; and Danielle Lin, Morinaga Nutritional Foods. At the recent SAA meeting it was decided to expand this activity [getting more soyfoods companies involved in the SAA]. In fact, it was decided that besides the Soyfoods Pavilions at the Natural Foods Expos, this would be all the SAA would do for this year—plan and coordinate next year’s joint promotional activities.

1793. *Soya Newsletter (Bar Harbor, Maine)*. 1988. Soyfoods Pavilion major attraction at NFE ‘88 West. March/April. p. 10.

• **Summary:** At the recent Natural Foods Expo ‘88 West, sponsored by Natural Foods Merchandiser, and held at the Anaheim Convention Center, Anaheim, California, April 8-10, the major food attractions were all in one place—the Soyfoods Pavilion.

This year’s participants were Galaxy Cheese/Soyco, Golden Soy Foods, Book Publishing, Farm Foods, Legume,

Morinaga Nutritional Foods, Tempehworks, Vitasoy USA, and Westbrae Natural Foods. Steve Meyers of Farm Foods remarked, “this is the major eating area of the show.” Steve Meyers, Farm Foods/Barricini at 800/431-5030.

1794. *Soya Newsletter (Bar Harbor, Maine)*. 1988. Westbrae Natural becomes wholly-owned subsidiary of Vestro Foods. March/April. p. 10. Also in *Whole Foods*. May. p. 19.

• **Summary:** Vestro is a publicly held company traded over-the-counter (NASDAQ symbol: VEST). Westbrae will be looking for more growth through acquisition of other lines that meet their quality standards.

Note: As of Nov. 1990, Vestro Foods is located at 5701 S. Eastern Ave., Suite 330 (P.O. Box 91-1181), Commerce, California 90091. Phone: 213-772-1692.

1795. Soyfoods Association of America. 1988. May is Soyfoods Month (Ad). *Vegetarian Times*. April. p. 60.

• **Summary:** “Discover the convenience and value of soyfoods. Watch for the special soyfoods insert in the May issue of *Vegetarian Times* and *East West Journal*.” Sponsored by Farm Foods, Legume, Mori-Nu, Nasoya, Simply Natural, Vitasoy, and Westbrae Natural, and the Soyfoods Association.

1796. Wollner, Joel. 1988. Soy-based cheeses—Concerns for the consumer. Can a traditional product be patented. *Soya Newsletter (Bar Harbor, Maine)*. March/April. p. 2.

• **Summary:** In this letter to the editor, the writer is concerned about two issues raised in the article titled “Soy Cheese Market” (*Soya Newsletter*, Jan/Feb. 1988). He wonders to what extent the present success of soy cheese in the natural foods marketplace is based on consumers’ lack of awareness that casein is a dairy product. His own informal survey, conducted shortly after *Soya Kaas* was first introduced and already finding widespread acceptance, found very few consumers who knew that casein is derived from milk. “In fact, over 90% thought *Soya Kaas* was strictly vegetarian, containing no milk-derived ingredients.”

He is also shocked that Simply Natural has patented a product (named *Soyalite*) made by fermenting fresh tofu in miso and discovered by accident. This process “is well known and practiced by thousands of people all over the United States, and has been since the late 1970’s. I first learned of ‘miso-pickled tofu’ (as we called it) in 1978, while manager at Erewhon Natural Foods retail store in Boston [Massachusetts]. One of our employees had learned the process while studying with Noburo Muramoto, a teacher of Oriental food-crafting in Escondido, California. Her miso-pickled tofu was a big hit among the Erewhon staff, and we began selling it ready-to-eat in the store and published the recipe in our weekly consumer newsletter. Soon after, miso-pickled tofu became a favorite dish among Boston’s diverse natural foods community, and found a place in the menus of

local natural foods restaurants.” Address: Director, Mitoku USA Inc., New York.

1797. Eden Foods, Inc. 1988. Eden Foods reformulates two flavors of Edensoy (News release). 701 Tecumseh Rd., Clinton, MI 49236. 2 p. May 5.

• **Summary:** Edensoy Original and Vanilla flavors now contain no added oil. Thus an 8.45 fluid ounce serving of Edensoy Original now contains 5 gm of fat compared with 2 gm in the vanilla. Carob still has 4.5 gm of fat. The new formulation makes the products compatible with the Diabetic Food Exchanges suggested by the American Diabetic Association. An 8.45 fl. oz serving of Original Edensoy equals 1 milk exchange plus 1.5 fat exchanges.

In May the Edensoy package design won first place in the offset printing category in an international package design competition sponsored by Tetra Pak, Inc. American Soy Products is located only 30 miles from Dearborn, Michigan, where Henry Ford started his soybean research in 1932. Address: Clinton, Michigan.

1798. Paino, John. 1988. Recent developments at Nasoya: Simply Natural and Tomsun (Interview). *SoyaScan Notes*. May 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Soyfoods Month advertorial was published by *East West* and *Vegetarian Times*. Lenny Jacobs helped a great deal in coordinating it. It was also sent by VT to about 100 major media in hopes that they would do a story. Tree of Life private label tofu is made by Swan Gardens in Georgia.

The Simply Natural company is going to be merged with Nasoya. Nasoya will take charge of the management, will go 50-50 on marketing, and will make all of their tofu and do the billing. Previously Simply Natural has purchased their tofu from a small manufacturer in New Jersey.

Tomsun Foods has actually filed for a Chapter 11 under the bankruptcy laws. They want to sell off their tofu manufacturing business and keep the Jofu. They once offered Nasoya the right to co-pack the tofu. John said no, because he would then be producing a tofu line that competed with his own. Above all, Tomsun wants Nasoya to buy their brand and accounts. But this is difficult for Nasoya because he has no guarantee that the accounts will not switch to, for example, Azumaya. He is torn every day between making an offer and doing nothing except continuing to compete with them.

Nasoya will reintroduce their Veggie Dips in about 3 weeks. They will have a foil seal top and a 3 month shelf life. Note: By September 1988 Nasoya is said to be producing 100,000 lb/week of tofu with a 6-8 week shelf life. They are expanding into the Midwest and have taken over many Tomsun accounts. Business is booming.

Nasoya was first incorporated in Dec. 1984, then in Dec. 1987 the company changed from a corporation to a limited

partnership, i.e. from Nasoya Foods, Inc. to Nasoya Foods, Ltd. Address: Nasoya Foods, Leominster, Massachusetts.

1799. Palermo, Anthony A. 1988. Modern Products purchases Fearn Natural Foods, moves to Milwaukee (Interview). *SoyaScan Notes*. May 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Modern Products bought out Fearn in Oct. 1986, closed the plant in Melrose Park, Illinois, and moved to Milwaukee. The CEO is presently Anthony A. Palermo and the president and chief operating officer is his son, Gayelord G. Palermo. Lou Richard is somewhere in Illinois. Modern Products was founded by Gayelord Hauser in 1925. His products include Vege-Sal, Spike, Vegit, Naturally Salt Free, Santay, Onion Magic, Lemon Pepper, Naturally Cajun, and Spice Garden Herbs and Spices. His most famous book was *Look Younger, Live Longer* (1950). Address: P.O. Box 9398 (3015 W. Vera Ave.), Milwaukee, Wisconsin 53209-0398. Phone: 414-352-3209.

1800. Belleme, John. 1988. The great Japanese foods face-off: Are natural brands a better buy? *East West*. May. p. 26, 28-35.

• **Summary:** Contents: Introduction. Shiitake mushrooms. Wakame (sea vegetable). Udon. Toasted sesame oil. Complex fermented foods: Rice miso, rice vinegar. Sea salt. The Oriental foods industry in the USA dwarfs the Japanese natural foods industry. Annual sales of JFC International Inc. [affiliate of Kikkoman] alone, about \$180 million, is about ten times that of the entire Japanese natural foods industry in the United States. Oriental foods sell for about half the price of natural foods. Mitoku’s special quality miso is made by Takamichi Onozaki of Yaita, Japan. Eden Foods’ miso is made by Toshi Shiroozu of Fukuoka, Japan. Also discusses rice vinegar quality.

Note: This article is a thinly disguised advertorial for Mitoku products.

1801. Kotsch, Ronald E. 1988. Soyfoods; A growing industry is revolutionizing the way Americans eat (Special Advertising Supplement). *East West*. May. p. 1A-11A. Also in *Vegetarian Times*. May. p. 49-59.

• **Summary:** A well-done “advertorial” as part of America’s first Soyfoods Month. Sponsored by Nasoya, Morinaga, Legume, Simply Natural, Vitasoy USA, Westbrae Natural, and Farm Foods. Each company also ran an ad in this section. Henry Ford played a key role in introducing Americans to soyfoods as with his 16-course meal at the 1934 World’s Fair. Interest remained strong through World War II, then dissipated quickly. By the time Ford died in 1947, soyfoods were all but forgotten. Interest was revived and advanced from the mid-1970s on by Shurtleff and Aoyagi of the Soyfoods Center in California. Today through the efforts of many growing companies, the industry is

booming.

1802. *Natural Foods Merchandiser*. 1988. 7th annual market overview & independent operator profile: 1987. May. p. 1, 41, 43-44, 46, 49, 51, 53-54, 56-57.

• **Summary:** Total retail sales for the natural foods industry are estimated at \$3,290 million for the year 1987. Of this total, \$2,170 million was generated by independent natural foods stores (5,700 stores). Natural foods chains (having 40 or more stores; 1,400 stores total) added \$508 million and mass marketers (supers; 2,900 stores) \$618 million. Thus a total of 10,000 stores in America sell natural foods. General Nutrition Centers (Pittsburgh, Pennsylvania, a leading chain with 1,200 stores at year end) has retail sales of \$313 million, up 7.9% for the year. The number of natural foods sections in supermarkets decreased from 3,200 in 1986 to 2,900 in 1987. “The biggest thing that has increased traffic for the average store was the government’s lowering of cholesterol limits.” And organic has become legitimate in the eyes of many more consumers. There are now about 6 natural foods stores in the country with 20,000 square feet or more. Bill Frazier was the first man to open such a store, Frazier Farms, in 1978, in southern California (16,000 sq. feet).

Update on Frazier Farms: Talk with Doug Fiske. 1992. Dec. 2. Frazier Farms went out of business about 5 years ago. They had a gigantic natural foods store in Escondido, and maybe some others in a chain elsewhere in southern California. Doug often shopped there. The location has now been taken over by Bonie’s, a semi-natural food store.

1803. **Product Name:** Westbrae Soy Sauce. Tamari Shoyu. **Manufacturer’s Name:** Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu. **Manufacturer’s Address:** 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521. **Date of Introduction:** 1988 May. **Ingredients:** Water, whole soybeans, whole wheat, sea salt (including natural nigari). **Wt/Vol., Packaging, Price:** 32 fluid oz (1 quart) 950 ml bottle retails for \$4.99. **How Stored:** Shelf stable. **Nutrition:** Contains 170 mg sodium per 3 gm (½ teaspoon) serving.

New Product–Documentation: Label. 1988. May. 10 by 4.5 inches. White, blue, and yellow on red, with oval full color illustration of a Japanese landscape featuring Mt. Fuji. Westbrae Shoyu is manufactured by the Sasaki family, “Gold-Medal” winners of Japan’s Soy Sauce Contest. The Sasaki family attains this quality by carefully sorting their soybeans so that only beans of higher than #1 quality are used. Broken beans are removed because they contribute to off-flavors. No other shoyu brewer takes this care in sorting their soybeans.

The Sasaki family ages their shoyu for 2 years in

Japanese cedar kegs. Cedar kegs contribute historic culture strains into each batch—culture developed by generations of use in brewing “whole-bean shoyu.” As it does with fine wine, aging in wood enriches, mellows, and provides a distinctive character to the shoyu.

Other soy sauces are quick-brewed for one to four “seasons” (less than half the time of Westbrae Shoyu). This shortened aging time saves extra expense but loses all the complex flavor heritage that is brewed into the Sasaki’s shoyu. The Sasaki family has been brewing soy sauce for 9 generations in an unbroken tradition of fine craftsmanship. We invite you to compare the darker color and richer taste of our shoyu with any other!

Note: We are surprised to see term “tamari shoyu” on this product which is actually shoyu, especially since Westbrae has been a leader for many years in the effort to stop misuse of the term “tamari.” Talk with Gordon Bennett. 1988. Aug. 26. All of their former shoyu bottles have had the term “tamari” somewhere on the label, as in the statement “Formerly known as tamari,” or “Tamari style.” They wanted to move to a new label that would portray more of a high-class, gourmet image. After much discussion with all sales people, they decided that the word tamari must be kept on the label, but not in the “Formerly known as...” format, lest many consumers not be aware of what kind of soy sauce they were really selling. So they decided to focus on the American name soy sauce in big letters and put tamari in small letters at the bottom. “It was a reluctant capitulation to the realities of the marketplace. But that term tamari has a certain amount of magic to it. You can minimize it, but you can’t get away from it. The word has to appear some place on the bottle, otherwise people don’t know what’s really in it.”

1804. Fiering, Steve. 1988. Early history of The Soy Plant and The Soy Deli in Ann Arbor, Michigan (Interview). *SoyaScan Notes*. June 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** “I was a coordinator at the 4th Avenue Food Co-op in Ann Arbor. Three of us from the Co-op began making tofu next door in the Wildflour Community Bakery (which is still there), starting in about April or May of 1977, but perhaps as early as January. Sue Kalen, Christopher Coon, and myself (plus a few others from time to time) would get up very early on Sunday mornings and make our tofu. Soon we also started making soymilk. Whatever we could make was sold immediately in the 4th Avenue Co-op next door. We had no real business name at that time. They called us “The Tofu Co-op.” There was a guy named Al Dynak who worked as a baker at a deli and restaurant called Eden’s in Ann Arbor. Eden’s was owned by or associated with Eden Foods, the natural foods/macrobiotic distributing company. He was also interested in developing a tofu company. We had a meeting. He was much more experienced than we were, especially in baking, food processing, and the restaurant business. He

pretty well pushed us for the first 6 months.

“He got us a little room in the basement of Eden’s at 330 Maynard St.; in August 1977 we turned it into a tofu shop. At that point we registered our business as The Soy Plant. We were there for about 4 months. When he saw that we were interested in running the business as a co-op rather than to make money, he bailed out. He was interested in making money. Yet without Al, we might never have made the jump out of the original co-op location. No new products were introduced while we were at Eden’s.

“Then, in about January 1978, we moved to 211 East Ann St., Ann Arbor. At that time, Tim Huang of Yellow Bean began to distribute our products. Our deli opened on 1 May 1978.

“In July of 1978 we hosted the first national Soycrafters Conference, at which the Soycrafters Association of North America was founded. Seventy people from across America attended. Sue Kalen, Christopher Coon and myself generated the idea for the conference together. We were co-ops and, as such, we were interested in conferences, networking as they say. We knew there were other people out there doing what we were doing and we felt that everyone would benefit if we could all get together and share experience. We knew about New England Soy Dairy (in Greenfield, Massachusetts), The Farm (Summertown, Tennessee), and maybe Northern Soy (Rochester, New York) and Pat Aylward’s Joy of Soy (Minneapolis, Minnesota). We compiled a list [Shurtleff sent in many names from Japan] and sent out letters to see how much interest there was. People were interested, so we decided to host it and set a date.

“In 1980, the production part of the business moved to 771 Airport Blvd., Suite 1 in Ann Arbor. They had lots of problems with waste water disposal and may not have started production until 1981. That was when I left, feeling completely frustrated with the co-op structure.

“Most of the workers still liked the co-op. My own personal analysis of the situation is that co-ops work well when there are about 6 people or less and everyone can make decisions, or when there are more than 25-30 people so that you set up a management structure to make decisions. We got caught in the middle with 12-15 people and everyone trying to make decisions. It didn’t work. For years I was working to put a manager in the Soy Plant.” Address: 30 Newell Rd., Apt. 19, Palo Alto, California 94303. Phone: 415-326-7123.

1805. Madwin, Bari F. 1988. Re: Tomsun Foods’ future plans. Letter to and talks with William Shurtleff at Soyfoods Center, June 29, July 5, and Aug. 2. 1 p. Typed, with signature.

• **Summary:** Tomsun will auction off all its office and plant equipment except the actual tofu-making equipment on June 30. Tom Timmins is planning to have Panda Foods (Henry

Creces) in New York manufacture about 20,000 lb/week of tofu for Tomsun. He still owns the recipes for Jofu and Tofu Pups and will continue to promote and organize their production. He is also involved with another company (Stow Mills) that produces Chesoya. His interests clearly remain in this industry and he seems optimistic about promoting other second generation products.

He has sold the old tofu plant building to a car renovation company, and plans to run the company out of an office nearby. Note: The letter is dated July 5. Address: RD3, Box 212, Putney, Vermont 05346. Phone: 802-387-5788.

1806. Belleme, John. 1988. Tamari: Reborn in the U.S.A. [San-J International begins production in America]. *East West*. June. p. 14, 16-18.

• **Summary:** In 1804, almost half a century before Commodore Perry’s ships forced open Japan’s ports to American trade, the Sato family’s fleet of small boats began ferrying their homemade tamari and other goods up the Kiso, Ibi, and Nagara Rivers. From the port city of Kuwana in the Bay of Ise on the Pacific Coast, the Satos received goods from larger ships and delivered them to communities upriver. Takayoshi Sato is currently the president of San-J International, the remnant company, almost eighty years since the Satos closed their maritime business. Faced with the loss of livelihood, the Satos turned to making tamari and soybean miso on a large scale in 1909.

With the dollar at an all-time low against the Japanese yen, and 100% of all natural shoyu and tamari sold in the U.S. being imported from Japan, the opening of the San-J International tamari plant could not be more timely. American importers of Japanese foods have seen a 50% increase in the price of shoyu and tamari in the past eighteen months. There are just a few companies in Japan still making genuine tamari. San-Jirushi at Kuwana is the largest, producing roughly half of the country’s annual production of 6,000 kiloliters (1,500,000 gallons).

William Shurtleff first proposed exporting San-J tamari to the U.S. in 1977. Shurtleff gave a sample of San-J tamari to the president of Mitoku, which supplied Erewhon with Japanese foods. Shortly thereafter, Erewhon began importing San-J tamari in five gallon tins. Next John McLaughlin, a Richmond businessman, tasted San-J tamari and was impressed enough to go to Japan and talk to the Sato brothers. The meeting led to the founding of San-J International in December 1978, a Japanese-American joint venture to market San-J tamari and eventually build the Richmond plant.

Today, industrial giants such as Stouffer’s and Campbell’s use San-J tamari exclusively in all their frozen food lines. San-J makes the point in their ads: “One teaspoon of tamari—which contains just a pinch of salt—is the seasoning equivalent of a full tablespoon of salt. Tamari seasons with protein, not sodium.” In the manufacture of tamari, the

mixture of koji and brine, called moromi, is left to ferment for about six months. Tamari is pasteurized (2% ethyl alcohol is added to prevent the growth of yeasts and molds). The Richmond plant can make about 1 million gallons of tamari and tamari shoyu (tamari with 20% wheat added) a year, about two times the current annual sales of the imported product.

The Richmond process will differ from that used to make tamari in Kuwana. First, in Japan, San-J tamari is aged for at least 12 months at room temperature. In Richmond, fermentation is accelerated to approximately 6 months by heating the fermentation vats with electric coils. Second, the San-J tamari from Japan is aged in old cedar vats while the Richmond plant is using fiberglass vats lined with epoxy resin. Every major importer of natural Japanese foods has expressed interest in bottling San-J tamari in their private label. However, only Eden Foods Clinton, Michigan, has negotiated a contract with San-J.

1807. *Natural Foods Merchandiser*. 1988. Natural foods world wide. June. p. 4-5.

• **Summary:** Helfex '88, the United Kingdom's biennial International Health Food Trade Show sponsored by the British Health Food Manufacturers Association and the British Health Food Trade Association was held in Birmingham, England, March 6 and 7. The Foreign Agricultural Service (FAS) of the USDA had a pavilion featuring 23 booths representing about 35 U.S. manufacturers. Each U.S. exhibitor paid \$2,000 to be a part of the show. At least 8,000 visitors came from 25 countries. About 600 exhibitors were there and the U.S. Pavilion was the biggest booth at the entire show.

The U.K. saw \$100 million in retail sales in 1979. In 1983 that figure was up to \$500 million, and in 1987 sales had climbed to \$1,000 million. In 1990 the expectation is for over \$1,500 million—more than half of the entire U.S. industry. In 1983 there were 1,300 retail stores averaging \$3,000/week retail (in the U.K.); in 1990 there will be at least 2,000 stores averaging \$10,000/week. About 88% of the natural foods products at Helfex '88 came from the U.K.

1808. *Natural Foods Merchandiser*. 1988. In memoriam: Eden Foods VP killed in auto accident. June. p. 4.

• **Summary:** Clifford Adler, vice president of Eden Foods in Clinton, Michigan, died from injuries suffered in an automobile accident on April 13. He is survived by his wife Fran and two children, ages 3 and 5. Adler, age 33, became a shareholder of Eden Foods in the late 1970s. He developed and managed the sales department and later became vice president and a member of the board of directors. The Adler family has established a memorial in his name at the community library in Manchester, Michigan, that his children frequent.

Note: The cause of the fatal accident is not discussed.

1809. **Product Name:** CheSoya (Soy Cheese with Sodium Caseinate) [Cheddar, Mozzarella, or Jalapeño].

Manufacturer's Name: Stow Mills (Distributor).

Manufacturer's Address: P.O. Box 816, Brattleboro, VT 05301.

Date of Introduction: 1988 June.

Ingredients: Incl. organic tofu, soy oil, calcium caseinate, natural flavor, sea salt, citric acid, lecithin, guar gum, natural coloring.

Wt/Vol., Packaging, Price: 10 oz.

New Product—Documentation: Soya Newsletter. 1988.

May/June. p. 8. These cheese alternatives are free of cholesterol and lactose, and are 100% natural.

1810. Stepanek, Marcia. 1988. Agency charges soy baby formula maker. *Detroit Free Press*. July 15. p. 4B. Business section.

• **Summary:** "The U.S. Department of Justice Thursday charged a Clinton company and its president with 32 counts of falsely claiming that its soy-milk infant formula was of comparable nutritional value to mother's milk." The FDA charged Eden Foods with misbranding at least 53,682 cartons of Edensoy between July 1953 and 1985. Address: Free Press Washington DC staff.

1811. Wiernik, Julie. 1988. Firm faces criminal charges [Eden Foods]. *Ann Arbor News (Michigan)*. July 15. p. A3, A7.

• **Summary:** "The federal government has brought criminal charges against Clinton-based Eden Foods Inc., alleging that the company misrepresented its soy milk [Edensoy] when it described the product as a substitute for mother's milk.

"Eden and its president face possible fines of \$1,000 for each incident occurring prior to 1985. Due to a change in the federal statute, the maximum fine would increase to \$100,000 for incidents occurring during 1985."

"Between 1983 and 1985, the Justice Department said, Eden's literature described the product as a preferred milk substitute for children 'who cannot tolerate dairy milk or liquid or powdered formulas.' The pamphlet also said it was a 'quality substitute' for mothers' milk... Company president Michael Potter said the charges amount to a technical violation in labeling, and said the company never tried to market its soy milk as an infant formula." Jeffrey Gibbs, a Washington, DC, attorney, represented Eden Foods in the Case. "Gibbs said the advertising pamphlet in question was pulled from distribution in late 1983, and that only 'extremely small quantities' of the pamphlet were distributed after that." A large photo shows Tetra Brik packages of Edensoy.

1812. Bubny, Paul. 1988. Venerable soybean sprouts new uses. *Health Foods Business* 34(7):72, 74, 76, 108. July.

• **Summary:** Lonnie Stromnes, national sales manager of White Wave Soyfoods in Boulder, Colorado, reports that White Wave recently “upscaled” the packaging on its tempeh products; the new graphics depict tempeh in use, so that customers do not have to bring a thorough knowledge of the food into the store with them. Mitoku-USA, based in Albany, New York, imports some 20 varieties of miso. At least one manufacturer, the Asheville, North Carolina-based Great Eastern Sun, saw its miso sales increase by 20% last year. Bruce Sturgeon, the company’s vice president, said Great Eastern Sun’s volume on miso alone was \$400,000 in 1987. Shoyu and tamari are frequently aimed at the gourmet market as well as the natural foods / specialty foods market. Owner Dale Kamibayshi of Alfalfa’s Market in Boulder, Colorado said, “I think many people are still intimidated by (soyfood’s) preparation.” To help overcome the intimidation factor, Alfalfa’s has scheduled a soyfood tasting fair for July 16; the first such fair which the store has devoted to soy.

Gary Barat, chairman of Legume, Inc. said, “I see the natural foods and gourmet markets coming together,” said Barat. “And the smart marketers are realizing that.” People who shop specialty stores have both eyes turned toward quality. Soy companies are increasingly making use of organically grown soybeans. There is also a trend toward using specific soybeans for specific products, a sign of a maturing industry. The trend is more prevalent in the U.S. than in Far East Asia. Westbrae, for example, uses Vinton beans for its Westsoy soy beverage. As the currency in Japan remains strong against the dollar, you’re going to see more and more (soy) products produced in America. Also there will be greater growth in so-called “second-generation” soy products—dairy analogs with soymilk, soy cheese, soy ice cream and soy yogurt. Address: Associate Editor.

1813. **Product Name:** Emperor’s Kitchen brand Johsen Shoyu, and Sakae Organic Shoyu.

Manufacturer’s Name: Great Eastern Sun (Importer). Made in Japan.

Manufacturer’s Address: 92 Macintosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1988 July.

Ingredients: Sakae: Well water, organic* whole soybeans, organic* whole wheat, seasalt, koji (natural culture). * Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: Both in 5 and 10 oz bottles. Johsen Shoyu also in 32 oz bottles.

How Stored: Shelf stable.

New Product–Documentation: Ad in Macromuse. 1988. June/July. p. 3. “The finest Japanese liquid seasonings. Identical to Mitoku & Mitoku Macrobiotic.” No address or specific products are given. Talk with Barbara Holiday of Great Eastern Sun. 1989. Feb. 28. These products are imported in drums from Japan via Mitoku. GES started

bottling the drums in North Carolina in Oct. 1987 and the products were in the stores by late 1987 or Jan. 1988. The Johsen Shoyu and Wheat Free Mansan Tamari are not organic. There are also non-soy products in the line. Sakae Shoyu is made by Mr. Kiyoji Fukaya, Ogasawara-Gun, Shizuoka-ken, Japan. Mansan Shoten is run by Enichiro Oguri (President), Handa-shi, Aichi-ken, Japan.

Labels. 1989. 5.5 by 3 inches, and 6.25 by 3.5 inches. Pink and black on silver. Illustration of a symbolic tree with leaves. “In the Emperor’s Kitchen you find only the finest seasonings. Johsen Shoyu is one of the world’s best soy sauces. Traditionally brewed in cedar kegs for early 2 years, Johsen Shoyu is made using only whole soybeans and whole grain wheat. Split or defatted beans or wheat flour are never used... Use it for all your wok cooking or as a dipping sauce for sushi or sashimi.”

1814. **Product Name:** Emperor’s Kitchen brand Mansan Tamari [Organic, or Wheat Free].

Manufacturer’s Name: Great Eastern Sun (Importer). Made in Japan.

Manufacturer’s Address: 92 Macintosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1988 July.

Ingredients: Wheat free: Water, whole soybeans, Mikawa mirin (water, sweet rice, koji), seasalt, koji (natural culture).

Wt/Vol., Packaging, Price: 5 and 10 oz bottles. Mansan Wheat Free Tamari also in 32 oz bottles.

How Stored: Shelf stable.

New Product–Documentation: Ad in Macromuse. 1988.

June/July. p. 3. “The finest Japanese liquid seasonings. Identical to Mitoku & Mitoku Macrobiotic.” No address or specific products are given. Talk with Barbara Holiday of Great Eastern Sun. 1989. Feb. 28. These products are imported in drums from Japan via Mitoku. GES started bottling the drums in North Carolina in Oct. 1987 and the products were in the stores by late 1987 or Jan. 1988. The Johsen Shoyu and Wheat Free Mansan Tamari are not organic. There are also non-soy products in the line. Sakae Shoyu is made by Mr. Kiyoji Fukaya, Ogasawara-Gun, Shizuoka-ken, Japan. Mansan Shoten is run by Enichiro Oguri (President), Handa-shi, Aichi-ken, Japan. Labels. 1989. 5.5 by 3 inches, and 6.25 by 3.5 inches. Pink and black on silver. “Mansan Tamari is an authentic tamari soy sauce that is traditionally brewed in cedar kegs for over a year. Real tamari was originally the liquid drawn from soybean miso... Mansan tamari is blended with 40% Mikawa Mirin which gives it a unique and subtly sweet savoriness. Use it as a glaze for baked foods, a basting sauce for broiled fish, or a dipping sauce for sushi.”

1815. *Health Foods Business*. 1988. Soymilk makes inroads into the cow pasture. 34(7):79, 109-10. July.

• **Summary:** “Westbrae President Gordon Bennett

guesstimated the current soymilk market at \$25 million.”

1816. Macrobiotic Wholesale Co. (The). 1988. Wholesale natural foods price list [Mail order catalog]. 799 Old Leicestershire Hwy., Asheville, NC 28806. 23 p. 28 cm. Spiral bound.

• **Summary:** The catalog, effective July 1, 1988. The first two sections are: (1) Miso (Miso Master Miso, Onozaki Miso, Mitoku Miso, Mansan Miso, Miso Soup). (2) Soy sauce (Tamari soy sauce, other soy sauce). Address: Asheville, North Carolina. Phone: 800/438-4730 or 704/655-1056.

1817. Mitoku. 1988. Spotlight on Johsen Shoyu: The world's leading natural soy sauce (Ad). *East West*. July. p. 1-3.

• **Summary:** Johsen Shoyu is certified to meet the uncompromising standards of Macrobiotic Quality by Michio and Aveline Kushi. It is bottled under the labels of more than a dozen leading natural food companies on four continents. In February of this year, premium quality Johsen Shoyu was awarded the Japan Ministry of Agriculture's prestigious first place award, "The highest quality soy sauce in Japan." It was selected from over 200 entries by a panel of the world's foremost soy sauce experts. Johsen Shoyu is kept in large cedar aging casks. Johsen Shoyu is aged slowly for more than one and one-half years, protected only from the outside weather by the wood frame building. Over five seasons, including two full summers, the fermentation continues. Johsen is aged over 5 seasons, including 2 summers, for a total of 18-24 months at natural seasonal temperatures. It is aged in well-seasoned cedar casks, and it is packed without additives or preservatives. Address: Tokyo, Japan.

1818. *Natural Foods Merchandiser*. 1988. 9th Annual Natural Foods Merchandiser new products awards [Silver: Farm Foods' Ice Bean pints, sandwiches, and bars]. July. p. 26-27.

• **Summary:** "The introduction of Ice Bean's designer look signaled the beginning of a new and aggressive marketing campaign for Farm Foods," says national sales manager Dan Pratt. "A black background with gold trim creates a gourmet appeal for the package."

1819. Bencivenga, Dan. 1988. Mail order food au naturel. *Target Marketing (Philadelphia, Pennsylvania)* 11(8):20+. Aug. *

• **Summary:** Walnut Acres Natural Foods, a direct marketer of organically grown food products, has combined a traditional farming philosophy with modern day marketing techniques to create an unbeatable recipe for direct mail success. Bob Anderson, CEO, says that in the 1950s, when the company first started selling direct, they discovered that direct marketing enabled them to have more control over how their food was sold. Walnut Acres' basic philosophy is

that agriculture should be based on purity. In 1987 Walnut Acres had sales of almost \$5 million.

1820. Golbitz, Peter. 1988. U.S. soymilk sales reach new heights: Larger package sizes and domestic production spur on demand. Market update. *Soya Newsletter (Bar Harbor, Maine)*. July/Aug. p. 1, 14-15. [1 ref]

• **Summary:** Estimates that in 1988 some 4.6 million gallons of soymilk will be sold in the USA, with a retail value of \$36.1 million. This is up 40% over 1987 (3.3 million gallons worth \$25.6 million). The U.S. market is composed of several distinct segments: the health food segment (whose products are formulated to resemble cow's milk) and the Asian-American market (whose products contain slightly more water and sugar). In 1988 for the first time in recent years, the health food segment (2.7 million gallons) passed the Asian-American segment (1.7 million gallons), and now appears to be growing at a much more rapid rate.

Another way of classifying market segments is by fresh soymilk (less than 8% by volume in 1988) and aseptically packaged soymilks. "The move to larger liter and quart packages has helped sales tremendously by bringing the per ounce cost of soymilk down. These larger sized packages will account for 76% of the volume in the health food market this year, as compared with 73% in 1987. Smaller sized packages make up the majority of sales in the Asian-American market." Address: Soyatech, Bar Harbor, Maine.

1821. Sturgeon, Bruce. 1988. Early history of Great Eastern Sun, Oak Feed Miso, Inc., and American Miso Co. (Interview). *SoyaScan Notes*. Sept. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce is looking at documents from the company archives. Great Eastern Sun was founded in March 1982 by Barry Evans. He was the only principal/owner at the time. American Miso Co. was founded in March 1979 as the Oak Feed Miso, Inc. The principals were Sandy Pukel, John Belleme, and Barry Evans, but it is not clear who owned how much stock. It started doing business in 1981 as the American Miso Co. and officially became The American Miso Co. by law in May 1982. The principals of the American Miso Co. were John Belleme and Barry Evans. Sandy Pukel was somehow bought out and left and joined Oak Feed Co.; It seems to have become his. Barry Evans may have been the original president of Oak Feed Co. It was a store, probably a restaurant, and an import and distribution company. Barry and John went on to do the miso company. Great Eastern Sun was founded as a way to market and distribute the miso. They also became an importer and distributor of Mitoku products at about that same time. Don DeBona was the first or second company president, after Marty Roth. Today Barry owns all the stock of both American Miso and GES. Barry treasures his privacy. Bob Ballard and Bruce run GES. Even they do not know Barry's

address or phone number. He checks in about once a quarter to see how things are going.

Ah Soy now has about 5% of the U.S. soymilk market, and is trying desperately to hang onto that. The competition is fierce, but they have many loyal consumers. Their 6 oz size is still their best seller, even after introduction of the quart, and even with a price increase last Feb. to above \$1.00. Sales are up compared with last year.

In 1984 Bruce was in Boulder, Colorado as a buyer for Pearl Street Market. They had been buying from GES at that time for about a year. Oak Feed came to Pearl Street Market with imports to sell. Address: 92 Macintosh Rd., Asheville, North Carolina 28806. Phone: 808-438-4730 or 704 252-3090.

1822. Fass, Bill. 1988. Brief history of Macrobiotic Wholesale Co. of Asheville, North Carolina (Interview). *SoyaScan Notes*. Sept. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was originally founded by Great Eastern Sun. In 1986 GES sold it to Kurt Schmitz [or Schmidt]; it was then located at 503 Haywood Rd. in Asheville. Schmitz in turn sold it to Bill Fass in August 1986. The company does not import. They distribute only macrobiotic products. Some 90% of the products they sell are imported from Japan, and 90% of these they buy from Great Eastern Sun, the importer. They also buy a few imported products from Eden Foods. Soyfood products they distribute include miso, shoyu, tamari, and koji. Address: 799 Old Leicester Hwy., Asheville, North Carolina 28806. Phone: 800-438-4730 or 704-252-1221.

1823. Cross, Kevin. 1988. Brief history of Soy Power Company, Inc. of Santa Monica (Interview). *SoyaScan Notes*. Sept. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company started business in Santa Monica, California, in April 1981, with Tom Binder and Kevin Cross as partners. They distributed tofu and soymilk made by Wy Ky in Los Angeles. They first started distributing other people's products in about July 1982, starting with Vegetable Jerky from Maple Meadows. When Edensoy was launched in 1983, it started to hurt their sales so they decided to get in on the action. They soon became America's leading seller of Edensoy. In April 1986 they moved the company to Marina del Rey, then in September 1988 back to Santa Monica. Today they market and distribute about 11 soyfoods products under their own brand (all made by other companies), and they distribute another 350 products from other companies. Address: 1602 Stanford St., Santa Monica, California 90404. Phone: 213-829-2331.

1824. *Jewish Press (Brooklyn, New York)*. 1988. New foods products for the health conscious [Edensoy from Eden

Foods, Inc.]. Sept. 22.

• **Summary:** Edensoy Original and Vanilla flavors now contain no added oil. The American Soy Products facility opened in October, 1986. It is the first U.S. facility to introduce an enzyme inactivation process in the commercial manufacture of soy-milk. In May, 1987, the Edensoy package design won first place in the offset printing category in an international package design competition sponsored by Tetra Pak, Inc. American Soy Products is only 30 miles from the Dearborn, Michigan site where Henry Ford set up research facilities in 1932 to develop products from soybeans. Note: this soy product has a tan color and does not attempt to be a dairy/milk.

1825. Boff, Vic. 1988. University of Texas Library's Todd & McLean collection on health and fitness. Health food pioneers (Interview). *VegeScan Notes*. Sept. 26. Conducted by William Shurtleff of Soyfoods Center. [5 ref]

• **Summary:** The University of Texas at Austin has one of the largest collections of periodicals, books, papers, and memorabilia on the health foods movement and industry in America. It is in the Todd & McLean Collection, occupying 8,000 square feet. Contact Dr. Terry Todd in Austin (Phone: 512-471-4890. Gregory Gym 33, Univ. of Texas, Austin, TX 78712). The library is on the third floor of the gym. Prof. McLean is no longer living. They have an especially good collection of Bernarr Macfadden's publications.

Vic is an old timer in the health food industry. He worked closely with Dr. Benedict Lust (he wrote for him starting in 1936) and knew Bernarr Macfadden. Lust was an M.D. (licensed in Florida), ND, and DC. Coming to America from Germany, he was the founder of Naturopathy in America, located on Lexington Ave. in New York. He died in 1942. Lust published *Nature's Path* (a popular periodical that started in the early 1900s and was continued by his nephew or son, John Lust, who passed away recently), and *Naturopath*, a professional publication for naturopathic physicians, starting in the 1930s until he died. Lust had two sanitariums in Florida and New Jersey, doing hydropathy and chiropractic. He was a major figure, a great man, but had constant opposition for the local medical associations and societies. Macfadden was tremendous in the advancement of natural foods and natural healing in this country. Boff has all Physical Culture magazines from 1898 to the 1940s. Macfadden and Lust were on good terms with each other. Macfadden was more involved with physical fitness; his slogan was "Weakness is a crime." He promoted sunshine and fresh air, physical therapy and hydrotherapy; he was put in jail for trying to do away with bathing suits that covered the whole body. He had a huge publishing operation. Otto Carque was a great natural foods pioneer in California, probably in Los Angeles. He was interested in soyfoods. Even in the early days, many of the health foods pioneers advocated the soybean because many of them were

vegetarians and the soybean is a great substitute for meat. Loma Linda and Kellogg were also a major forces. Address: Brooklyn, New York. Phone: 718-648-5254.

1826. Murray, Frank. 1988. History of the health foods movement in America (Interview). *SoyaScan Notes*. Sept. 26. Conducted by William Shurtleff of Soyfoods Center. [5 ref]
 • **Summary:** Frank entered the health foods industry in 1963, when he went to work for Jack Schwartz at Syndicate Publications, publisher of *Health Foods Retailing* magazine. His book, "More than One Slingshot" (1984) was a history of the NNFA, written for them and not released commercially. But it was also a history of the health foods movement in America. Important health foods publications included *Health Foods Retailing* (founded in April 1936 by Lelord Kordel and sold several years later to Jack T. Schwartz, who remained publisher until Feb. 1982), *Better Nutrition* (now in its 50th year), *Let's Live*, and *Prevention*.

The University of Texas has a large collection of periodicals, books, and memorabilia on health and physical fitness, including figures such as Bernarr Macfadden. For details contact Vic Boff in Brooklyn, an old timer in the industry. Back issues of *Health Foods Retailing* (in a small, digest format) can be found at Communication Channels Co. in Atlanta, Georgia (Phone: 800-241-9834).

Joe Weider has always been in California, and is still alive. He publishes many weight lifting magazines.

In the 1960s the main soyfoods products he remembers were from Loma Linda Foods, Worthington, and Fearn Soya Foods. Address: New York. Phone: 212-613-9700.

1827. Eden Foods, Inc. 1988. Edensoy... A lot of pluses (Ad). *Vegetarian Times*. Sept. p. 29.

• **Summary:** This full-page, black-and-white ad contains 8 black-and-white photos showing Edensoy ads. "Only one bean in 20,000 makes it into Edensoy." "Next time you draw straws, choose Edensoy." "What most soymilks forget as a main ingredient... Flavor." "One more thing you can do for your family." "Draw on our experience." "The closer you look... the better we look." "Edensoy pours it on." "The competition has arrived!" (Shows a cow with football helmet standing behind cartons of Edensoy). The other text reads: "Nutritious. Delicious. Dairy free. Quality. Satisfying. Convenient. Fresh. Versatile."

This ad also appeared in *Vegetarian Times* (Nov. 1988, p. 13; May 1989, p. 45), *Whole Foods* (Jan. 1989, p. 18), *Natural Foods Merchandiser* (Feb. 1989, p. 14), and *Solstice* (March/April 1989, p. 3). Address: 701 Tecumseh Rd. Clinton, Michigan 49236.

1828. Krizmanic, Judy. 1988. Creaming the crop [comparison of U.S. soymilk varieties]. *Vegetarian Times*. Sept. p. 68.

• **Summary:** Compares the following brands: Ah Soy (Great

Eastern Sun), Edensoy (Eden Foods), Sno-E Tofu (Abersold Foods), Solait (Miller Farms), Sunsoy (Vamo Foods), Supersoy (Mitoku), Vitasoy (Vitasoy U.S.A.), Westsoy and Maltededs (Westbrae). Lists the available flavors for each, what type of oil is added (if any; Edensoy, Sunsoy, and Supersoy have none added), percentage of calories from fat (15-60%), and comments. Sno-E Tofu is the only product fortified with vitamins and calcium. Sunsoy strawberry gets its pink color from cochineal, the red dye made from a dried insect.

1829. *Natural Foods Merchandiser*. 1988. Frank Ford receives 1988 Rachel Carson Award from NNFA. Sept. p. 4.

• **Summary:** Frank Ford, chairman of the board of Arrowhead Mills, is a longtime organic farmer. A photo shows Ford on his John Deere tractor.

1830. Bolduc, Bill. 1988. The founding of Eden Food Co. (Interview). *SoyaScan Notes*. Oct. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bill founded Eden Foods Inc. as a macrobiotic/natural foods retail store in Ann Arbor, Michigan, in Nov. 1969. He was the original incorporator. About 8 months later, a proposal was made to Bolduc by a woman to expand Eden in a new location at 211 South State Street. After that, Bolduc invited Tim Redmond to join him, which he did. Redmond became a 50% owner in 1970, about 9 months after the company was founded. Tim was in Boston at the time, studying with Michio Kushi and working at Sanae. He was interested in the restaurant business. Bill and Tim had been in college together at the Univ. of Michigan. Both later became interested in macrobiotics. Bill wishes now he had not sold his stock.

About 18 months ago, Tim and his wife, Patty, and Bill sat down and talked through the history for the first 2-3 years month by month. They should have tape recorded it. They will try to do it again. His older cousin is David Bolduc.

Tim Redmond is thinking of doing a consumer study on soymilk. He uses Dialog a lot, doing mostly food research now. Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 751-9090.

1831. Bolduc, Bill. 1988. The Eden Food Co. fire and illicit trading (Interview). *SoyaScan Notes*. Oct. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bill wishes now he had not sold his stock. There was some dirt prior to the fire, and that, the dealings of some people, other than selling food, caused the fire. That prompted him to want to leave. Bill is "convinced" that the fire was arson. He knows what the fire inspectors found and where it started. He does not know why the insurance company paid off Eden. Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 751-9090.

1832. Carasso, Irwin. 1988. Brief history of Tree of Life, Inc. natural food distribution company from St. Augustine, Florida (Interview). *SoyaScan Notes*. Oct. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Irwin Carasso (born on 2 June 1951) got interested in natural foods and vitamins through his brother. He went to school in Boston, and though he never got involved with the macrobiotic movement, he used to shop at Erewhon. At one point he decided to move back to Florida and start a natural food retail store. He opened Tree of Life in St. Augustine in May 1971. He drove a truck up to Boston, met Paul Hawken, and started carrying some of the Erewhon products, as well as those from Arrowhead Mills, and some New York importers. In Feb. 1972 Carasso founded a natural foods distribution company, which he also called Tree of Life, in the same building as his natural food store. He was age 20 at the time. In about November 1973 the company moved to Industrial Drive in St. Augustine.

The key policies that allowed this company to grow into the largest natural foods distributor in America (and one of the few pioneers to survive) were a strong focus on service, clear communication at every level (to suppliers, customer, etc.), and a high level of integrity and honesty about the products that were carried. Tree carried a much broader line of products than the “purist” natural foods distributors, and they were sometimes criticized harshly by competitors for carrying turbinado sugar, all vitamins, unbleached white flour, etc. Yet if people wanted an item and it was reasonably good, Carasso would carry it and explain clearly what it was. The vitamins were a key to profitability and growth. “The real health food fanatic was always a closet junkie.” Carasso didn’t mind if the company carried raw sugar as long as they called it raw sugar. The top quality service was accompanied by higher prices than most competitors charged. Tree offered a whole range of products that were not available at the time, dairy products (from California) and bulk foods, more packaged foods than most early competitors. But they started without the major health food and vitamin lines, since none of the “old line” distributors or major vitamin companies would sell to them.

Tree’s first and only acquisition was in 1978, when Irwin bought the Marty Bellman Co., a small (less than \$2 million a year sales) health food distributor in Sun Valley, California, in order to get their vitamin lines. The old line distributors put pressure on the vitamin manufacturers (such as Schiff and Plus) not to sell to small, new competitors.

Irwin sold Tree of Life in April 1982 to a group of financial people called Wilson Financial, but he kept Marty Bellman Co., renaming it Hi-Profit Distributors. Sales at the time were about \$31.5 million a year. Irwin felt that he had done what he wanted to do and he wanted to do something different with his life. In Dec. 1985, Wilson Financial sold Tree of Life for \$15 million to a Dutch firm named Wessanen

of North America, which was owned by a \$1,000 million company from the Netherlands named Royal Wessanen NV Co. Then last year, Wasannen bought the Balanced Foods chain (Balanced, Midwest, Collegedale, Midwest Dietetics) and SunRay. Then in Sept. 1987 Irwin sold High-Profit Distributors back to Tree of Life. At that time he got out of the industry. He has never seen a history of Tree published previously. “The funny thing about this whole industry is that, except for some of the old line distributors, Tree was probably the only ‘new-age’ natural foods company that made any money. Most of them did not survive. I think it was for two reasons. First, their product ranges were too narrow. And second they had a philosophy (too purist) that inhibited their business, and prevented them from doing what they wanted to do. None of them ever had a goal to make more than 1 or 2% profit. Tree looked to make 10% profit. Tree carried 10,000 items. Erewhon at its peak had several hundred, maybe 500. Tree financed its growth entirely internally, starting with \$125,000 total in the early years. The business was run very tight, with C.O.D. terms.”

Note: This is the earliest (and only) English-language document seen (April 2003) that uses the term “health food fanatic.” Address: St. Augustine, Florida and Malibu, California. Phone: 904-471-0470.

1833. Westbrae Natural Foods. 1988. Westbrae and Vestro Foods (Interview). *SoyaScan Notes*. Oct. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Westbrae will move to City of Commerce at the end of October. None of Westbrae’s employees are going, not even Gordon Bennett, the president, for two reasons: They don’t want to live in Los Angeles, and many are not interested in the new direction that Vestro plans to take Westbrae. Paul Repetto (formerly with Sunfield, which had the Lite-Chef tofu dry mixes) is the president of Vestro, and many of the vice presidents are from Hain. Vestro plans to “grow the company.” Address: Emeryville, California.

1834. *East West*. 1988. East West presents: Best & worst awards. 3rd annual. 100% natural. Oct. p. 65-72.

• **Summary:** Best Natural Soy Sauce: Lima Nama Shoyu from Ohsawa-Japan, imported by Ohsawa America of Chico, California. Twice brewed, lower in salt, and aged four years. “It is unique among shoyus, with exceptional smoothness and flavor.”

Better Than It Sounds Award:” Tofu chocolate? Yes, Barat Bars by Legume Inc. of Montville, New Jersey, use tofu instead of dairy and no hydrogenated or fractionated palm kernel oil. Carob candies move over!”

Best Tasting Flavored Soy Drinks: “The Westbrae Malted won this contest going away. Creamy, thick, and delicious, they are more of a dessert than a drink. Some devotees eat them frozen.”

Least Healthful Line of Soy Drinks: “The Westbrae

Malted. The flip side of their great taste is their almost 400 calories and 15 grams of fat per 8 ounces.”

Most Healthful Line of Soy Drinks: Edensoy. They are the only producers making a totally oil-free drink.

Worst Tasting Flavored Soy Drinks: “Vitasoys from San Francisco, Calif., seem to have few fans and finished last in our blind taste test.”

Most Questionable Beverage Label Claim: “3 grams of fat per 6 ounces of Carob and Chocolate Ah Soy, by Great Eastern Sun of Enka, North Carolina. These soymilks are rich and creamy, yet 3 grams is a lower fat content than even Edensoys, made without oil. How is that possible guys?”

That’s Progress? Award: “Mori-Nu Tofu by Morinaga Nutritional Foods of Los Angeles. Aseptic Tetrapacked tofu that has indefinite shelf life and can be shipped anywhere. Good for backpackers maybe but can’t compare to fresh and local.”

Best Fake Hot Dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, N.Y. “Nice smoky flavor and smooth texture, almost as good as the real thing.”

Worst Fake Hot Dog: Tofu Pups of Lightlife Foods of Greenfield, Massachusetts. “Dry and crumbly on the inside, with a lack of distinctive flavor. Won’t fool anybody at the neighborhood cookout.”

Best Tamari: San-J Traditionally Brewed Tamari from San-J International of Colonial Heights, Virginia. “No one else even came close. Question: Will they be able to retain their appeal when the first U.S.-brewed batch hits the shelves?”

1835. Smith, Patti. 1988. Whole earth farming: Biodynamic practices surpass even organic in their respect for the soil and the soul-nourishing food they produce. *East West*. Oct. p. 80-85.

• **Summary:** Rudolf Steiner (born in Austria in 1861) laid the conceptual foundations of biodynamic farming starting in 1924. Describes the methods used by the Moore Ranch in Carpinteria, California, and the Junipero Farm in Woodland, California, run by Howard Beeman and family. Ben Moore had studied with Alan Chadwick, director of the Garden Project at the University of California at Santa Cruz during the 1970s. A biodynamic certification program is run by the Demeter Association of Burbank, California. A sidebar showing other organizations is included.

1836. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part I. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Typed, with signature on letterhead (photocopy).

• **Summary:** The following account is based on hours of discussion between Bill Bolduc, the Redmonds, and the Silvers between 1988 and 1991. Bill is not familiar with the details of the history of the food co-op in Ann Arbor prior to 1969. But Ronnie Teeguarden says that in about July 1967

he and Gloria Dunn started a loosely-organized food buying co-op—which had no name—in Ann Arbor, Michigan. Within a few weeks, a number of their friends and acquaintances (a group of eclectic pathfinders, students, graduates, macrobiotics, dropouts, musicians) informally joined the group. These included Tim Redmond, Mark and Nancy Retzliff, Linda Succop, Iona Teeguarden, and Bob Thorson. From time to time, they collectively ordered macrobiotic staples from Erewhon in Boston using the Erewhon catalog. When the foods arrived, the food co-op members got together and divided them up at the Teeguarden-Leabu General Store, located a half flight below street level at 209 South State Street, below the Herb David Guitar Studio in Ann Arbor. Run by Ronnie Teeguarden, with help from Gloria, this store’s main business was selling local art, second hand clothes and records, etc.

Bill Bolduc and Judy Succop [Linda Succop’s sister], were married in June 1969 in Ann Arbor. They were not yet members of the co-op at that time. A few days later, they went to Berkeley for the summer. When they returned to Ann Arbor at the end of that summer, they lived in Saline, Michigan, 12 miles outside of town with Mark & Nancy Retzliff, Linda Succop, and Tim Redmond. Bill, who wasn’t working or going to college, was trying to figure out what to do next. By September 1969, Bill and Judy Bolduc joined the food co-op. They also joined the Zen Macrobiotic Supper Club; all of its members were also members of the food co-op.

In the fall of 1969 the Teeguarden-Leabu second-hand store looked like it was about to close, which would leave the food co-op without a home. The group (especially Ronnie) convinced Bill Bolduc to take charge of the food co-op and find it a permanent home, which he did.

On 4 Nov. 1969 Bill Bolduc incorporated Eden Organic Foods, Inc. as a non-profit corporation in the state of Michigan. The name “Eden,” which stood for Environmental Defense Energy Network, was coined at this time by Bob Thorson during a discussion between, Bill Bolduc, and Gloria Dunn at a coffee shop. Thus, the term “Eden” was first used in connection with this co-op or business in Nov. 1969.

Eden was born under a good star. The date Nov. 4 was carefully chosen to be astrologically propitious. At the time, Bill was an intense student of astrology with Michael Erlewine—who is now world famous in the field, and the owner of Circle Books, an astrological publishing company. In 1970 Michael also designed the Eden logo of the 4 sprouts in a circle. Eventually Michael became one of Bill Bolduc’s students in macrobiotics.

Bill was president of Eden Organic Foods and his wife Judy (who was working as a secretary at the University of Michigan School of Music) was secretary. Bolduc used \$200 of his own money to rent a converted apartment above the bicycle store at 514 East William St. in Ann Arbor, near

campus. People from the community loaned \$1,500 to help stock the co-op store and buy an 8-inch Meadows stone mill to grind flour.

The question arises: When was Eden Foods established? Bill Bolduc and Tim Redmond believe that the founding should be dated from Nov. 1969, when the company was first named; before Nov. 1969 the food co-op was not even a business. It was dead and had disappeared for about a month until Bill resurrected it by placing an order to Erewhon using his own money.

Eden Organic Foods first began selling soyfoods commercially in November 1969, starting with their first order from Erewhon in Boston. They would buy “tamari” (actually shoyu) and miso (kome = rice, mugi = barley, and Hacho varieties) in bulk from Erewhon (which imported them from Japan). At their store, Linda Succop (Bill’s wife’s sister) would repackage the products, putting the shoyu into bottles and the miso into plastic bags. They were labeled using plain white pressure-sensitive gummed labels with a rubber stamp. One stamp contained the name and ingredients for each product, and another, that was stamped below it, gave the company name and address. They wrote in the weight or volume by hand. Also at William St. a tiny Meadows Mill was used to grind grains and seeds into flour. Continued. Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

1837. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part II. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Revised 4 Dec. 1991 by Bill Bolduc, Ron Teeguarden, and James Silver.

• **Summary:** In Sept. 1970 the fledgling company had an offer to move into a newly-redecorated mini-mall [at 211 South State St.] on the main street of campus. New personnel and financing would be needed. Bolduc called Tim Redmond, who had been studying and working at the Sanae macrobiotic restaurant in Boston, to ask for help. Tim returned to Ann Arbor and joined Bolduc in the expansion effort. To raise money for the move, the two approached Tim Redmond’s father, who said he would help finance the expansion only if the business was reorganized as a for-profit corporation with Tim having equal ownership. They agreed and in about Oct. 1970 Eden was reorganized as a for-profit corporation with Bolduc and Redmond each owning 50%. At that time the partners shortened the company name to Eden Foods Inc. Bolduc and Redmond then borrowed a 4-figure sum from Tim’s dad, had the new store remodeled, and entered the big time. After the new store was opened and running, Redmond returned to Boston and the Sanae restaurant, where he completed his studies. But with this move they fell from the graces of the political co-ops. In November 1970 they did a “Brown rice, seaweed, and dirty hot dog” Bob Dylan commercial on a local radio station; it

was a big hit. They bought a 15-inch Meadows Mill and a rotary-drum roaster, then milled flour and baked granola in the back of the store.

In 1970 Bill had located Tom Vreeland, an organic farmer in Ypsilanti, Michigan. An Eden Foods Wholesale Pricelist dated 26 July 1971 shows that the Eden store at 211 South State St. was wholesaling soybeans, soft wheat, corn, and rye, all grown organically in Michigan. Eden was also selling organic flours that they ground from these grains.

In the spring of 1971, after realizing they were the only “natural food” store in the area, and having some other “health food” store owners in Detroit express an interest in carrying more food, they decided to wholesale foods out of the back of their retail store at 211 South State Street. Bill flew to Boston to meet Tim Redmond. They visited Erewhon (they wanted to convince Erewhon to let Eden be their distributor at lower prices), then Bill flew to Arrowhead Mills in Deaf Smith County, Texas, to make arrangements buying in bulk at wholesale prices. In the summer of 1971 they ordered their first 20-foot trailer load of organic foods from Arrowhead Mills, and ran an ad in *East West Journal*. Soon they started to distribute their foods to 4-5 accounts in Detroit. They bought a 1964 16-foot green Dodge van and a dry weight weigher/dumper machine. Their two main brands were Arrowhead Mills and Erewhon, but soon they developed the Eden brand with printed labels, onto which they would rubber-stamp the product name (such as bottled tamari and packaged miso). Soon they added other brands: Celestial Seasonings, After the Fall, Timbercrest, etc.

The wholesale operation quickly outgrew the back of the retail store, so they borrowed more money and rented a 5,000 square foot Quonset hut (resembling an airplane hanger) down on Main Street by the Huron River. Tim Redmond, Mark Retzloff, and Bill Bolduc ran the wholesale operation. Retzloff later co-founded Alfalfa’s, a natural foods supermarket chain based in Boulder, Colorado.

In October 1971 Bolduc hired Michael Potter, who was living in Detroit, to run the store. Just before this, Potter had managed a natural foods store named Joyous Revival in nearby Birmingham, Michigan. Prior to this time, the company had been owned by Bill and Judy Bolduc (50%) and by Timothy Redmond (50%). Potter was given 13.5% of the stock and the other principals’ share reduced proportionally.

In the late summer or fall of 1973 the Bolducs sold their shares back to the corporation, which then gave a portion of these to Tim Redmond and Michael Potter so that these two men now owned 51% and 49% respectively.

The Bolducs then left Ann Arbor, moving to Cincinnati, then to Illinois, then back to Ann Arbor. Bill is certain that when he left Eden Foods, the company was not importing any products from Japan. He would guess that it was not until about 1975 that Eden started to import a line of foods from Japan. Their first supplier in Japan was Muso Shokuhin,

a leading macrobiotic and natural foods exporter in Osaka. Initially, all of their imported products were required to bear the Erewhon brand. Imported soyfoods included miso and shoyu. Sales hit \$175,000 in 1973.

Note: Eden was the first of the many macrobiotic distributors based on the Erewhon model to open in America. Others that soon followed included Food for Life in Chicago (1970), Janus in Seattle, Washington (1972 Jan.), Essene in Philadelphia (by 1971 Feb.), Laurelbrook in Maryland (1971 Aug. 23), Ceres in Colorado Springs (by 1973), and The Well in San Jose, California (1973). Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

1838. Harris, Ron. 1988. A history of Grain Dance, one of America's earliest seitan manufacturers (Interview). *SoyaScan Notes*. Nov. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron arrived in San Francisco in about 1975, having studied macrobiotics previously in Ohio from 1974. As far as he knows, he was the first person to make seitan commercially as a real business in America. Before he started, a woman in Marin made seitan at home and sold it at 1-2 stores for a few months. She had no business name. She had learned how to make seitan from Roy Steevensz, a macrobiotic teacher in Los Angeles who also made and sold tempeh. Lima Foods in Belgium started to import a small bottled seitan product long after Ron started. He never had any competition from other seitan makers on the West Coast. When he began, no one had ever heard of seitan. The Kushis and the Aiharas both made and taught others how to make seitan on a home scale.

Ron first learned about and tasted seitan in Key West, Florida, in 1975. A woman named Martha, who was a macrobiotic (originally from Los Gatos, California) was giving a cooking class. His ex-wife Shiwa took the class, then Ron tasted the seitan from the bottom of the pot. He loved it. Shiwa then taught Ron the basic process for making seitan, then he ended up developing some variations on that process and recipe. Shiwa had a small business making pastries (such as date bars) out of her home in San Francisco and selling them at Rising Sun, a macrobiotic food store on Judah St. in San Francisco, owned by Mr. Noboru Muramoto. She suggested that Ron start making seitan to expand the family's line of foods. Ron first began to make seitan out of their home at 187 Downey St. (in the upper Haight-Ashbury district), San Francisco. He sold the first product in bulk at Rising Sun. It was in small dark brown chunks (about 6 pieces/chunks per pound), stored refrigerated in a 5-gallon plastic bucket or earthenware crock. On the bulk container was written the word "seitan" followed by the ingredients. After about a year he started to sell it in individual packages. To the label he added the pronunciation "SAY-tahn" and the phrase "A high-protein

food made from wheat." He always sold only one product in one flavor. The ingredients were organic hard red winter whole wheat (always freshly ground), spring water, tamari (actually shoyu), ginger, and onions. He was one of the few seitan makers to use whole wheat; most others used unbleached white flour, which gave a higher seitan yield. Initially he ground the wheat by hand using a French Samap mill that he bought from Jacques DeLangre's son, Tom. Later he bought his wheat from Joe Schwinn of Deaf Smith-Vital Vittles, who milled his own wheat fresh each day.

Originally Ron's seitan company had no name. He coined the company name "Grain Dance" at about the time he began packaging in individual containers—round plastic deli containers with a snap-on lid. First he sold it by the pound, then in 8 oz packs. Later the name was expanded to Grain Dance Natural Foods. The company was never incorporated. From his first address, Ron moved to another home-based kitchen, then in about 1980 he subletted his first legal commercial space mornings in the kitchen of the Real Good Karma Cafe on Dolores St. in the Mission district. Finally in about 1982 he moved into a commercial space at 422 Haight St. between Fillmore and Webster in the lower Haight Ashbury. By 1987 he was selling seitan to about 100 stores in the greater San Francisco Bay Area. They made seitan 3 or 4 days a week, making 80 pounds of finished seitan each day. Grain Dance introduced seitan to thousands of Californians who were looking for an alternative to meat. At fairs he served deep-fried seitan; it was dipped in a spiced wheat-flour batter and breaded with cornmeal. People loved its meaty texture and savory flavor. Ron's personal favorite was freshly cooked seitan, right out of the pot in his unique broth.

Initially Ron distributed the product himself, then Paul Duchesne distributed it after he was pushed out of Wildwood and started his own distribution company, then when he went out of business, Wildwood distributed it; Wildwood also used seitan in some of their sandwiches. Later David "Devo" Knepler came in as a partner (Devo now works with Wildwood Natural Foods). They had one employee.

For ten years Ron made seitan by hand. He really enjoyed the hand kneading, putting handmade energy into the food, and focusing on quality. By 1987 the business was growing, rents in San Francisco were skyrocketing, and he would have to mechanize the shop in order to expand. The business never made much money. "It was a labor of love, and it really enjoyed making seitan and turning people on to good food and helping them in any way I could." So in 1987 Ron began to phase out the business. He started doing attorney service work (which he is still doing) several days a week, then made seitan on several other days. Initially Wildwood wanted to continue it, so Ron went there and taught a few people how to make seitan. They did it for a while, but found it too labor intensive, and gave it up. There has never been another seitan maker on the West Coast.

Address: San Mateo, California. Phone: 415-347-1378.

1839. Roller, Ron. 1988. Justice Department lawsuit against Eden Foods (Interview). *SoyaScan Notes*. Nov. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The FDA filed the original charges then (since they do not prosecute cases), they turned the case over to the Justice Department, which in May 1988 filed 32 counts of criminal charges against Eden Foods. The problem relates to two things: (1) The original pamphlet which claimed that Edensoy is good for babies. The FDA case is that the product was promoted as an infant formula, in violation of the Infant Formula Act. An infant formula may be promoted only as a sole source of nutrition for infants. It is not a dual use product. Eden did a voluntary recall at a cost of about \$45,000. (2) After the FDA told Edensoy to stop distributing the pamphlet, Eden Foods subsequently, probably accidentally, sent out (sold) some 20-50 more. That apparent willful flaunting of authority was what made the FDA pursue the case vigorously. They only prosecute 5-7 cases a year. The original counts were worth over \$1 million in fines. The prosecutor is the same person who did the Gerber case. It is serious. Eden's attorneys advised that they plead to lesser charges and try for a plea bargain. Ten counts are worth \$100,000 and about 22 are worth \$1,000 each. Now it looks like the charge may be \$150,000. Also Mike Potter is being charged personally, and faces potential but unlikely jail time.

There is only one known case where an infant was adversely affected by Edensoy. This infant lived in Toronto, Canada, and its physician said the child has completely recovered. There was no permanent damage. Address: Eden Foods, Clinton, Michigan.

1840. Johnson, Gil. 1988. Natural foods in supermarkets (Interview). *SoyaScan Notes*. Nov. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Gil is now doing market research for Natural Foods Merchandiser. During the early 1980s supermarkets such as Safeway, Raley's, and Fred Meyer tried to develop their equivalent of a GNC (General Nutrition Corp.) health food section in their stores. They began to phase that concept out by the mid-1980s and now they just cherry pick the best natural food products and try to introduce them to the mass market. Address: 1029 N.W. 23rd Ave., Portland, Oregon 97210. Phone: 503-226-0588.

1841. **Product Name:** Eden Naturally Brewed Shoyu, and Eden Wheat Free Tamari.

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor). Made in Virginia by San-J International, Inc.

Manufacturer's Address: 701 Tecumseh Rd., Clinton, MI 49236. Phone: 800-248-0301 or 313-973-9400.

Date of Introduction: 1988 November.

Wt/Vol., Packaging, Price: 5, 10 and 20 oz bottles, 5 gallon

cubes, and 55 gallon drums.

How Stored: Shelf stable.

New Product–Documentation: Press Release. 1988. Nov. These two new products are “the first soy sauces made in America using traditional Japanese processing techniques and all-natural ingredients. Whole, Virginia-grown ingredients are fermented in temperature controlled vats which accelerate the brewing process while simulating the fluctuating temperatures of the seasons.”

1842. Krizmanic, Judy. 1988. Natural foods forecast. *Vegetarian Times*. Nov. p. 32-33, 36-39.

• **Summary:** Organics: Organic products will soon become the fastest growing category in natural foods. Even progressive mainstream supermarkets will add organic produce to their inventory or, if they can afford it, will test for pesticide levels on produce that may not be organic. The California and Nevada-based Raley's Superstore chain already has done both.

Legume's Gary Barat has plans to expand his selection of tofu chocolate with a chocolate-covered rice cake (made with Lundberg Farms rice cakes). “Plans are brewing for tofu chocolate chips, fudge sauce, and just about any chocolate product imaginable... Dairy-Free Replacements of Dairy Classics... Expect egg replacers, tofu cheesecake and tofu cream cheese,” and, hopefully, tofu sour cream.

“Soymilk. Within this next year, look for soymilk in your supermarket's dairy case... Imagine a soymilk creation: a creamy, malty drink—made from a mixture of soymilk and amasake.”

1843. *Natural Foods Merchandiser*. 1988. The time is ripe for organic foods. Nov. p. 57-58, 61, 63, 65-66.

• **Summary:** Organic may well become a new standard for the natural foods industry as demand for safe food grows. Oregon was the first state to enact an organic labeling law, in 1973. California's influential law was enacted in 1979. Today 17 states have laws on the books or pending.

1844. Organic Foods Production Assoc. of North America. 1988. Organic Foods (Ad). *Natural Foods Merchandiser*. Nov. 19-page insert.

• **Summary:** An assortment of short articles by various authors. OFPANA was founded in 1985 when a group of 18 people met at Michigan State Univ. to discuss the certification and marketing of organically grown products, and to set standards of excellence for the organic foods industry. Convened with encouragement from the International Federation of Organic Agriculture Movements (IFOAM), the group represented organic foods distributors, processors, growers, consultants and certifying agencies from throughout North America. OFPANA was incorporated as a trade association in 1985. Currently, there are at least 11 state laws covering organic foods.

1845. Golbitz, Peter. 1988. Soyfoods Association: New developments (Interview). *SoyaScan Notes*. Dec. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Natural Foods Expo in Anaheim, 14-17 April 1989, will have a panel on marketing soyfoods aimed at retailers; 75 minutes for 4 speakers.

Concerning the tofu standards, the standards committee approved them unanimously, but when the board of directors voted on them, Barricini and Ralston Purina refused to approve.

The Association is planning to petition the USDA to allow tofu to be used as a meat alternative in school lunches and have it qualify for reimbursement.

Gordon Bennett will be president of SAA until April 1989. The Board has paid all past debts to Steve McNamara and has budgeted \$5,000 for a part time administrator to work in the Soyatech office. The person will do 5-10 hours/week of SAA work such as news releases, soliciting dues, etc.

SAA voted to drop the Clip Service on 31 Dec. 1988. Golbitz gets about 50 magazines, which he clips and there was not enough in the clip service for him to make it worth \$400 a year. Plus there was a big filing problem.

Golbitz is very happy that he bought the *Soya Bluebook*. In Jan. 1989 Soyatech will hire its second employee. So with Peter and Sharyn that makes 4 workers. During the Bluebook crunch in summer they will hire an extra person. Address: Bar Harbor, Maine. Phone: 207-288-4969.

1846. *SoyaScan Notes*. 1988. Soymilk and dairy milk prices in California, December 1988 (Overview). Dec. 10. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** At Living Foods, a large natural food store at 1581 University Ave. in Berkeley, California, unflavored (plain or original) soymilk retails for the following prices: Vitasoy liter \$1.69 (which is the equivalent of \$1.60/qt), Westsoy quart \$1.79, Edensoy liter \$1.89 (\$1.79/qt), Soy Moo quart \$1.89. The average of these 4 quart equivalent prices is \$1.77 a quart. This is 6% lower than in October of 1987.

Whole cow's milk sells for \$0.58 a quart at Safeway supermarkets. Thus soymilk in a liter pack is 3.05 times as expensive as dairy milk per unit volume. In Dec. 1983 soymilk was 3.53 times as expensive as cow's milk, and Oct. 1987 soymilk was 3.42 times as expensive as cow's milk. Thus the price of soymilk relative to cow's milk has dropped 11% since Oct. 1987 and 13.6% since Dec. 1983.

Most small soymilk packs are now sold 3 together wrapped in plastic. Vitasoy 3 x 8.4 fl. oz. retails for \$1.55 or \$0.517 each. This is the equivalent of \$1.97 a quart (which contains 32 fl. oz). Three Edensoy 8.4 fl. oz. packs retail for \$1.65.

1847. American Miso Co. 1988. Our two new misos!: The American Miso story (Ad). *Vegetarian Times*. Dec. p. 40.
• **Summary:** This one-third page vertical black-and-white ad begins: "Miso Master is proud to announce two new misos: Brown Rice Miso and Sweet Barley." Near the top of the ad is a logo of bound sheaves of grain. Near the bottom of the ad is the Miso Master logo, an illustration showing the head and shoulders of a Japanese miso master, with a knotted headband, in front of a large wooden vat of miso. Below "Miso Master is produced by the American Miso Co. for Great Eastern Sun." Address: Rutherfordton, North Carolina.

1848. Brown, Judy. 1988. The joy of soy: Nutrition for the '80s. *Body, Mind & Spirit*. Nov/Dec. p. 30-32.

• **Summary:** Contents (Soyfoods, nutrition, and a healthy diet). Tofu. Tempeh. Miso. Natto. Okara. Soy cheese & soy yogurt. Soy flour & grits. Soymilk. Soy sauce. Resources: Eden Foods, Fantastic Foods, Inc., Lumen Foods Corp., San-J International. Vitasoy (U.S.A.) Inc., Westbrae Natural Foods (Downey, California). Address: President, In Good Taste, 5923 John Adams Dr., Camp Springs, Maryland 20748.

1849. **Product Name:** Adzuki Beans (Cooked, in a Glass Jar, then in a Can).

Manufacturer's Name: Eden Foods, Inc.

Manufacturer's Address: 701 Tecumseh Rd., Clinton, MI 49236. Phone: 1-800-248-0301.

Date of Introduction: 1988.

Wt/Vol., Packaging, Price: 24 oz glass jar, then 15 oz (425 gm) can.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Ad in *Vegetarian Times*.

1992. Jan. p. 31. "Bean Cuisine" Shows a color photo of canned organic adzuki, black, garbanzo, pinto, navy, and kidney beans.

Talk with Tim Redmond and Ron Roller. 1992. Feb. 10. Adzuki beans were introduced in glass jars in 1988, then in cans in 1991.

1850. Jonathan P.V.B.A. 1988. [Catalog of natural food products]. Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. 9 p. 30 cm. [Fre; Ger]

• **Summary:** "Jonathan was founded 10 years ago by J. Van de Ponsele." Each page is divided vertically into two. On the left is the text in French, on the right in German. There are many full-page color photos of the company's various product lines.

1. Prepared entrees (15 products). 2. Spreads and purees (30). 3. Concentrated soups, seitan products, soya products (14, all in jars). 4. Dressings (6, in bottles or jars). 5. Biscuits (14). Fresh products from seitan, soya, or rice (mochi), unpackaged (15). Address: Kapellen, Belgium. Phone: 03/664 58 48.

1851. Jonathan P.V.B.A. 1988. Jonathan, pioneer and trendsetter in the field of natural foods (Catalog). Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. 6 p. [Eng]

• **Summary:** The company started ten years ago. Contents: Seitan and tofu. I. Fresh products (vacuum packed). II. Preserved products in cups: Lunches, Golden Cup spreads. III. Preserved products in jars. Recipes. Address: Kapellen, Belgium.

1852. Prevention magazine. 1988. The Prevention Index: A report card on the nation's health. Prevention in America 5: Steps people take—or fail to take—for better health, survey summary. Emmaus, Pennsylvania: Rodale Press. 11 p.

• **Summary:** The results are based on a consumers' survey of 1250 adults (age 18 and over) nationwide conducted for *Prevention* magazine by Louis Harris & Associates, Inc. Fieldwork: Nov. 1987. "Aside from a small increase in calcium consumption and a slight decline in vitamin and mineral consumption, almost no change has taken place in the last five years in the structure of the American diet as it relates to preventing illness."

The following results are for the 1983 and 1987 surveys in the form 1983/1987. NA = Data Not Available. "General diet: Try to avoid eating too much salt or sodium 53/54%. Try to avoid eating too much fat 55/54%. Try to avoid eating too many high cholesterol foods 42/42%. Try to avoid eating too much sugar and sweet food 51/49%. Try to get enough calcium 50/54%. Try to avoid caffeine in beverages such as coffee, tea, and certain soda pop NA/34%. Try to avoid foods that contain additives such as preservatives, colorings, and artificial flavorings NA/36%. Specific foods: Try to eat enough fiber 59/60%. Try to eat fish twice a week NA/33%. Try to eat vegetables in the cabbage family NA/65%. Food supplements: Percent who use food supplements NA/53%. Try to get enough vitamins and minerals 63/59%." Address: Rodale Press, Inc., Emmaus, Pennsylvania.

1853. **Product Name:** [Bonsoy (Soymilk)].

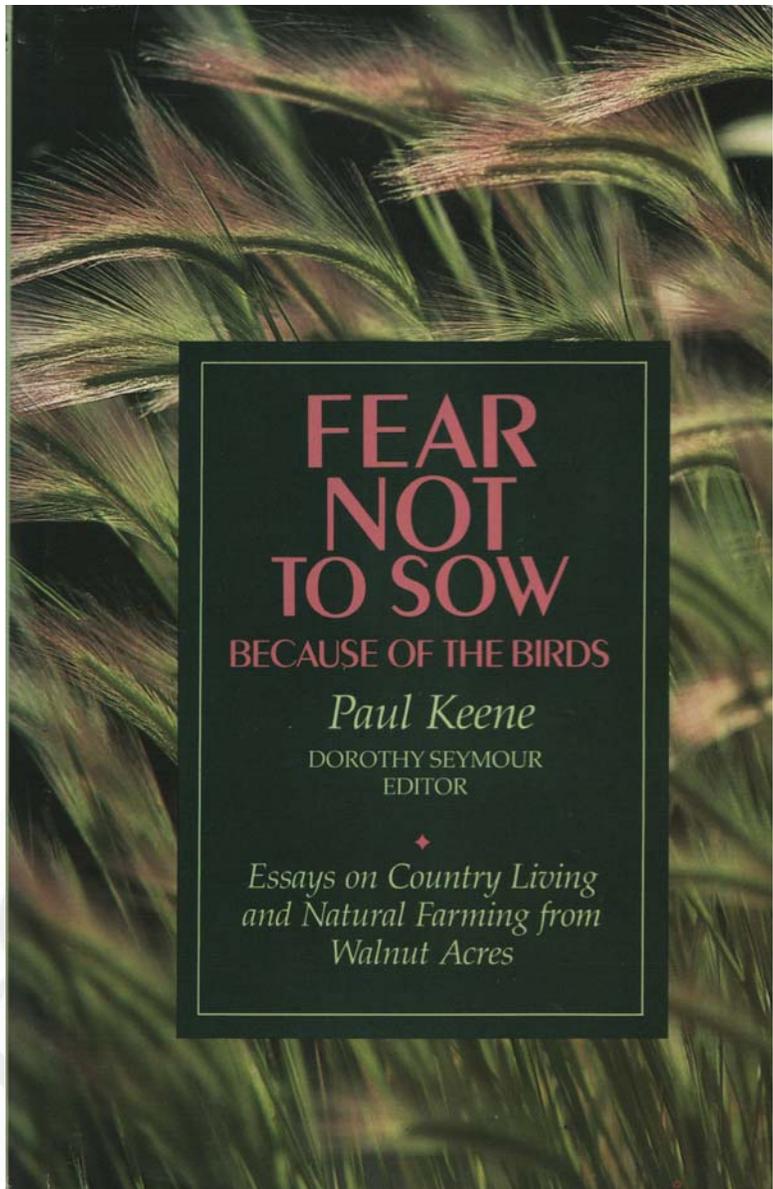

Manufacturer's Name: Urtekram (Importer). Made in Japan by Marusan. Imported via Muso Shokuhin.

Manufacturer's Address: Denmark.

Date of Introduction: 1988.

Ingredients: Water, soybeans, pearl barley, kombu (sea vegetable), barley malt.

New Product–Documentation: Talk with Yuko Okada. 1992. July 16. Muso first exported Bonsoy soymilk to

Urtekram in about 1988. This soymilk was packaged in a foil retort pouch.

1854. Keene, Paul; Seymour, Dorothy Z. 1988. Fear not to sow because of the birds: essays on country living and natural farming from Walnut Acres. Chester, Connecticut: Globe Pequot Press. viii + 151 p. + [16] p. of plates. Illust. 23 cm.

• **Summary:** A superb collection of essays written by Paul Keene from 1949 through 1986. They are organized by the four seasons, starting with winter and ending with fall. Within each season they are *not* in chronological order.

The title comes from an "inscription found on an old tombstone in a country churchyard. We have adopted it as our farm motto. We have tried to sow enough for birds and people, and then to move through our days trustingly."

Edited by Dorothy Z. Seymour. Signed by the author. Dedication: "In loving memory of Betty, who for so many years shared the radiant journey."

Contents: Foreword. by Dorothy Z. Seymour. Preface, by Paul Keene. Prelude, "Inspiration by Gandhi," by Paul Keene. The four seasons at Walnut Acres: Essays from winter, from spring, from summer, from fall.

The photo section, on unnumbered glossy pages, appears between pages 88 and 89. Prelude: (1) Paul standing at a blackboard. "Dissatisfied with a conventional life as a college math instructor, I traveled to India seeking inspiration and to discover my desire to live close to nature." (2) Paul and Betty standing together in Indian attire; "Not long after our marriage, Betty and I both teach at Woodstock School near Mussoorie, India, in the foothills of the Himalayas. It is the custom to wear Indian attire for special occasions." (3) Three generations of Keenes. "In 1946, eager to begin a new life, we buy the farm called Walnut Acres. Daddy Morgan, Betty's father, comes to us after forty-five years of mission work in India. (Left to right: Marjorie Ann, Paul, Daddy Morgan, Ruth Carol, Betty, and Lassie).

Winter: (4) A road running between trees in snow. On one tree is a sign: "Walnut Acres." "The black walnut trees that abound on our farm were thought by the early settlers to be signs of a good limestone soil." (5) A stack of cut wood, Paul and a tractor. "At first we heat and cook with wood only. I saw fallen tree branches by hand, then use the circular saw on the back of the tractor to cut the wood into usable pieces."

(6) A small arched bridge over a creek in deep snow. "In the winter we can look out of our house at the one-hundred-year-old farm lane, too narrow for modern traffic, and the snow-covered stream that meanders by its side." (7) A horse and carriage by a building. "Curbside service: Pull right up to the entrance of our very first store, next to this Amish buggy. Only natural foods are produced and sold here." (8) Two Keene daughters standing on thick chunks of ice. "After a hard winter ice piles up on the banks of Penns Creek. (Left to right: Jocelyn and Ruth Carol). (8) A white duck and dark dog by a tree. "Ralph the duck falls in love with Tinker the dog, but Tinker holds only disdain for this untoward development." (9) A white, two-story farmhouse surrounded by snow. "In winter the snow cover is deceiving. Multitudes of living things quietly prepare to rise again."

Spring: (10) "Sharing beats shearing: Some lambs are rejected by ewes and must be bottle-fed. The little shepherd here is Ruth Carol, our second daughter." (11) Paul shearing a lamb. "The shepherd shears his woolly friend in spring. We send the fleeces to a blanket mill, where they are woven into soft, beautiful blankets." (12) "With our first tractor I prepare to work the fields for our first spring crops." (13) "A horse appreciates a whole ear of dried corn, especially when offered by a tiny child (Ruth Carol)." (14) "For years we do all our farm work with two teams of horses. Here the big,

gentle Belgians, Mollie and Prince, are directed by our first daughter, Marjorie Ann, at age four or five." (15) In early spring a flowering fruit tree stands in a field of grain that was planted during the preceding fall. (16) Many buildings on the farm: "On a fine spring day during the early years, I gaze with a strong feeling of kinship over the rich, rolling fields. Penns Creek lies in the background."

Summer: (17) "Helpers George Richard and Richard Nellis haul early crops of peas to the viner by wagon. Pitchforking vines, pods, and all is an arduous job." (18) "Peas and vines are fed into the machine hopper and drawn into the viner. Revolving paddles inside a large drum beat the pods until they open. Peas fall into containers; spent vines fall off the far end and will become compost. We try to return to the soil everything usable that springs from the soil." (19) "Our helper Bill Newby prepares to cultivate rows of corn with Mollie and Prince and the old cultivator." (20) "Cultivating carrots and beets in stony soil is difficult. Here Ab Bojarsky leads a horse between the narrow rows while I manipulate the cultivator." (21) A little girl standing outdoors. "Our third daughter, Jocelyn, ponders life's glories." (22) "Our bees, whose attention I divert here with a bellows-type bee-smoker, are never fed sugar. Enough honey is left in the comb to sustain the hive through the winter. (23) A log cabin. "The old log springhouse, once home for an early settler's family, serves as the family refrigerator for many a year and finally becomes my hideaway." (24) "At times the road leading to Walnut Acres disappears beneath swollen waters. Because of too little advance warning, the foodstuffs stored on the lower floor of one of our barns are ruined this day under four feet of surging water." (25) "Horses return from the field and take in huge draughts from the old wooden water trough; sheep huddle in the hog-pen shade; chickens peck endlessly, living a natural life close to the soil—all happens under the observing eye of Lenore Keene, our niece.

Fall: (26) For many years we make our own apple butter outdoors in a great cauldron, boiling down the cider and apples in the midst of exquisite scents. (Left to right: Paul, Ruth Carol, Marjorie Ann, and our friend Kit Haines). (27) "In fall the field corn is ready for harvesting. At first we do it all by hand, one ear at a time. Then we get our first corn picker. Tractor drawn, the picker pulls each ear from the stalk and husks it. The elevator carries the husked ears above, then drops them into the truck bed." (28) "I maneuver our McCormick-Deering reaper-binder as it cuts and ties the sheaves of ripened grain." (29) "Fodder for the cattle is hauled from the field along with Marjorie Ann (left) and Ruth Carol, who like to hitch a ride." (30) "In our early days we harvest all vegetables either by hand or with the aid of a simple potato-digging device." (31) The family enjoys a Sunday afternoon wagon ride around the farm with the cousins. (Left to right: Daddy Morgan, niece Winnie Keene, sister-in-law Elsa Keene, Betty, Ruth Carol, Marjorie Ann,

Paul, nephew Jim Keene, and niece Lenore Keene).

Published first in the popular Walnut Acres catalog sent to mail-order customers throughout North America, Keene's homey columns trace the history, philosophy and evolution of Walnut Acres and the organic farming movement over the last half century.

Note: Everything about Walnut Acres—except its sad end—and Paul & Betty Keene is inspiring. Address: Penns Creek, Pennsylvania.

1855. Yogi Bhanjan [Yogiji, Harbhajan Singh Khalsa]; Pawha Kaur Khalsa, Shakti. 1988. *The Golden Temple vegetarian cookbook*. 2nd ed. New York, NY: Arcline Publications. 224 p. Index. 21 cm.

• **Summary:** The recipes are divided into chapters such as Salads, Salad dressings, Dips, spreads and sandwiches, Soups, Vegetable main dishes, Legume main dishes, etc.

On the rear cover—from the Publisher:

“About the book: During the eighteen years that Yogi Bhanjan has been in North America, he has acquired a following of more than 250,000 people, many of whom have opened a number of successful business enterprises, including a national chain of vegetarian restaurants known as the Golden Temple Natural Food Restaurants. In an attempt to prove to Americans that vegetarian cuisine was much more than a leaf of lettuce and a slice of tomato, the owners of the first Golden Temple restaurant in Washington, D.C., introduced an extensive menu of soups, salads, main dishes, desserts, baked goods, and beverages from a variety of cuisines—particularly Indian, Mexican, and Italian, but also Chinese, Middle Eastern, and American. With specialties as varied as Applesauce Cake, Eggplant Curry, and Strawberry Sunrise, the first Golden Temple restaurant soon acquired a word-of-mouth reputation for an excellent, tasty, nutritious cuisine and became an instant success.

“The Golden Temple Vegetarian Cookbook consists of recipes for the favorite dishes served at many of the Golden Temple restaurants and bakeries, a mouth-watering assortment of natural food specialties that will inspire creative, nutritious, and economical meals.

Yogi Bhanjan, the leader of Sikhdom in the Western Hemisphere, is also the author of *The Teachings of Yogi Bhanjan*.”

This lacto-vegetarian cookbook contains only two soy recipes, both calling for cooked whole soybeans: Soybean salad (p. 32) and Soy bean loaf (p. 106).

1856. *Health Food Business (England)*. 1988-- . Serial/periodical. Surrey, England.
Address: Premier House, Madeira Road, West Byfleet, Surrey, KT14 6NF, England.

1857. Tofu Shop Deli and Specialty Foods Co. (The). 1988? Its like having a natural foods deli right in your own store

(Leaflet). Arcata, California. 1 p. Front and back. 28 cm. Undated.

• **Summary:** This marketing flyer, printed with greenish-blue ink on off-white, was created primarily for customers of “Wholefood Express,” a natural foods distributor owned by North Coast Co-op (Arcata and Eureka; since 1973), servicing northern California and Oregon.

Side 1: An illustration of the Tofu Shop Specialty Grocery and Deli at top of sheet. Contents: Fresh, refrigerated deli salads, delicious desserts, cold cuts, and handcrafted tofu and soymilk. All cholesterol and lactose free and made with ingredients you can trust. Deli news. Ordering tips. Selling guide: Refrigerate, reduce (price of items whose sell-by date is about to expire), rotate, display (“Use our shelf talkers to create a colorful deli corner in your own cooler...”).

Side 2: “Product ingredients.” A list of all products with the ingredients in each. “Makers of freshly-prepared natural foods since 1977.” Address: 768 18th St., Arcata, California 95521. Phone: (707) 822 7409.

1858. Dunn, Marcia. 1989. Pioneer in natural foods: organic farm founder had a 50-year head start. *Los Angeles Times*. Jan. 15.

• **Summary:** “Penns Creek, Pa.—The seed of an idea was planted in 1939, when Paul Keene, a young missionary to India, met Mohandas Gandhi.

“Out of it grew Walnut Acres, one of the first organic farms in the United States...” Address: Associated Press.

1859. Belleme, John. 1989. The imperial sauce: Rich, dark, and subtle, Japan's traditionally made shoyu is an outstanding and versatile seasoning. *East West*. Jan. p. 72-77. [2 ref]

• **Summary:** Westerners indiscriminately sprinkle soy sauce on everything from beef to popcorn. Almost half of the 60 million dollars spent annually by Americans on soy sauce goes for a product that is not even fermented. Kame, La Choy, and Chun King brands for example, are the result of a 1-day chemical process. The ingredients are soy extract, alcohol, sugar, salt, food coloring, and preservatives. Nearly all other soy sauce sold in the U.S.—such as Kikkoman, Yamasa, Marukin, Higashi-Maru, and Maruten—is made from chemically processed soy meal by a high-tech, accelerated method and temperature-controlled fermentation, and it usually contains sodium benzoate as a preservative.

Traditional shoyu products reach U.S. consumers in a roundabout way. For example, Muso buys traditional shoyu from the Marushima Brewing Co. of Shoda Shima, Japan, and exports it to Eden Foods, which sells it to American consumers under the Eden label. Ohsawa Japan buys from the Yamaki Brewing Co. of Tokyo, and sells to Ohsawa America, which bottles and sells it under the Lima label. The largest producer of traditional shoyu is the Sendai

Shoyu and Miso Co. of Sendai, Japan. Sendai makes Johsen Shoyu, which is exported by Mitoku and is bottled in the U.S. under different brand names, including Westbrae, Tree of Life, Emperor's Kitchen, Mitoku-Johsen, and Mitoku Macrobiotic.

The author notes that, "My 8 years of miso-making in Japan and at American Miso Co. have taught me that miso aged in wood is superior to that aged in plastic... although Sendai shoyu and Miso Company started making high tech shoyu in 1950, Sasaki insisted that his company also continue to make traditional shoyu." Although at times Sasaki's pet project seemed a financial disaster, in 1970 he received a phone call from a Tokyo businessman, Akiyoshi Kazama. Kazama, a friend of macrobiotic teacher Michio Kushi, was looking for a supply of traditional shoyu for Kushi's students. When Sasaki showed Kazama his 12 2,000 gallon cedar casks of naturally aging whole soybean shoyu a few days later, Kazama knew his search was over. Kazama shipped Johsen Shoyu to the U.S. in 5 gallon wooden buckets at first.

Jubei Sasaki has passed away, but his 12 casks of traditional shoyu have grown to 100 and his son continues the whole soybean shoyu tradition.

4 recipes are given. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1860. Dornblaser, Lynn. 1989. Out of the dairy case, onto the shelf: Aseptic processing may not appeal to the masses, but it can be marketed to the niches. *Dairy Foods* 90(1):47-48, 50, 52. Jan.

• **Summary:** Dairy foods and refrigeration go hand in hand in the minds of most Americans. Only 34% of Americans are familiar with shelf-stable milk and only 29% are interested in purchasing it. But shelf-stable soymilk is being well received. Health-food firms such as Great Eastern Sun, Vamo Foods, and Eden Foods are successfully marketing soymilk to a specific, health-conscious audience. "All are promoting the product not only as being healthful and nutritious (and offering an alternative to their dairy counterparts), but also as being convenient to use and store." Address: General Mgr., Gorman Publishing Company's New Product News, Chicago, Illinois.

1861. **Product Name:** Shoyu (Made from 70-80 parts whole soybeans and 20-30 parts wheat).

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-595-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1989 January.

New Product–Documentation: Interview with John Perelman, VP Sales and Marketing, San-J. 1990. Jan. 25. The shoyu made in America by San-J first became available in Jan. 1990. It is not organic. It is sold exclusively by Eden Foods.

1862. Collins, R. 1989. Re: Request for information on traditionally brewed low-salt varieties of shoyu. *East West*. Feb. p. 24. Letter.

• **Summary:** Most shoyu contains 16-18% salt. "Since salt is a natural preservative, however, any reduction must be compensated for by the addition of preservatives such as sodium benzoate or ethyl alcohol, as in high-tech varieties, or special handling, as in traditionally-made varieties.

"Traditionally-made lower salt shoyus, such as Ohsawa America Lima Nama Shoyu and Mitoku Macrobiotic Johsen Double Brew Dipping Sauce, are made by a complex process involving two fermentation periods, each lasting eighteen months to two years! First, the usual whole soybean moromi is prepared by mixing koji and a brine solution. After the traditional aging period, the moromi is pressed and the raw shoyu extracted. Next, additional koji and, in some cases, additional brine, is added to the mature raw shoyu and fermented again. The thick, double-brewed moromi is then pressed and the shoyu extracted. The addition of extra koji dilutes the final salt content to 13-14%.

"A few double-brewed shoyu varieties, such as Eden Low Sodium Shoyu and Westbrae Mild Shoyu, have been further diluted with water, reducing the salt content to 8-9% (80-90 mg sodium per half-teaspoon). These lowest salt varieties must be pasteurized, since they have no added preservatives. All low-salt shoyus should be refrigerated after opening."

1863. Eden Foods, Inc. 1989. A soy sauce for all seasoning... (Ad). *Natural Foods Merchandiser*. Feb. p. 14; April. p. 34.

• **Summary:** This 5 inch square ad with a color photo shows 5 bottled Eden soy sauces. Four bottles bear the Japanese character for "Hon" or genuine. These four are labeled shoyu soy sauce (including low sodium, and organic) and one is labeled tamari soy sauce (wheat free). "Our Low Sodium Shoyu is double-brewed, requiring three years to mature. Eden certified organically grown crops, aged to perfection, create our Organic Shoyu. Each soy sauce is a masterpiece."

An explanation on page 14 notes that two of these sauces are domestically made [by San-J in Virginia] (naturally brewed shoyu and wheat free tamari). Eden's popular soy sauce line has also been introduced: Traditional Japanese, low-sodium, and organic. "All five items are available in new, convenient sizes—5, 10- and 20 oz glass jars and bulk 4.75- and 55-gallon containers."

Also published in Let's Live. 1989. March. p. 45. And in East West. 1989. April. p. 9. Address: Clinton, Michigan.

1864. Erewhon. 1989. Erewhon... Macrobiotic foods you can recommend with confidence (Ad). *Natural Foods Merchandiser*. Feb. p. 25.

• **Summary:** This color ad (7.5 by 13 inches) shows colorful packages of five types of Erewhon products: Misos,

seaweeds, ramen, rice crackers, and sweets. In the center is a gold plaque that reads: "Recommended by Michio Kushi. Macrobiotic quality." This same endorsement is in the upper left corner of each package. Erewhon now has four 4 varieties of miso under its brand: Hacho (note new correct spelling), genmai, kome, and mugi. Note that all still use the esoteric Japanese names. Plastic bag packages are colorful and attractive. Slogan at the bottom of the ad: "Our great taste comes naturally." Address: [Massachusetts].

1865. **Product Name:** Miso Master Miso [Brown Rice, or Sweet Barley].

Manufacturer's Name: Great Eastern Sun (Marketer).

Made in North Carolina by American Miso Co.

Manufacturer's Address: 92 McIntosh Rd., Asheville, NC 28806.

Date of Introduction: 1989 February.

New Product–Documentation: Natural Foods Merchandiser. 1989. Feb. p. 14.

1866. Health Foods Retailing. 1989. Geographical breakdown of circulation (Leaflet). Atlanta, Georgia. 1 p. 28 cm.

• **Summary:** This magazine reaches over 13,500 health food retailers. The top 10 states, each with more than 300 retailers, are as follows: California 2,297, Florida 864, New York 732, Illinois 620, Pennsylvania 508, Ohio 502, Michigan 439, New Jersey 432, Washington 422, Colorado 311. Note that this closely parallels interest in soyfoods. Address: Communication Channels Inc., 6255 Barfield Rd., Atlanta, Georgia 30328. Phone: 404-256-9800.

1867. Johnson, Gil. 1989. What a decade! NFM celebrates 10th anniversary. *Natural Foods Merchandiser*. Feb. p. 1, 60, 63-64, 66, 68-69, 71-72.

• **Summary:** A nice overview and history of the growth of the natural foods industry in America from 1979 to 1989. The explosive growth began in the mid-1970s. Includes photos of and talks with industry leaders in the following categories: Retail (incl. Sandy Gooch, Danny Wells), Distribution (Nature's Best, Tree of Life), Manufacturing (Jim Rosen of Fantastic Foods, Ken Murdock of Nature's Way), Associations (Patricia Heydlauff of NNFA), Brokers, Co-ops, Consumers (Gauger & Silva, Tom Chappell, Jeffrey Bland, Bill Shurtleff of Soyfoods Center, Rebecca Wood).

Bland notes: "The last ten years has witnessed the general population's acceptance that diet and lifestyle play a role in the disease patterns we now have... the aging baby boomer generation has invested more time and energy into the development of self than any generation our society has ever known."

Of Shurtleff, the article notes: "... but as effective a promoter as he is, his real contribution has been in providing the soyfoods industry with market research."

1868. **Product Name:** Ah Soy (Soy milk) [American Original, Dutch Cocoa, and French Vanilla in 32 oz sizes; Original, Chocolate, Vanilla, and Carob in 6 oz sizes].

Manufacturer's Name: Westbrae Natural Foods.

Manufacturer's Address: P.O. Box 91-1181, Commerce, CA 90091. Phone: 213-722-1692.

Date of Introduction: 1989 February.

Wt/Vol., Packaging, Price: 6 oz or 32 oz sizes.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: News release from Westbrae. 1989. Feb. 2. "Westbrae acquires Ah Soy. Effective Jan. 31, 1989 Westbrae acquired the Ah Soy line of soy milks from Great Eastern Sun. All Ah Soy products will be available Feb. 1 for pickups and shipping from Westbrae warehouses in Commerce, California, and No. Brunswick, New Jersey."

Soya Newsletter. 1989. Jan/April. p. 12. "Ah Soy is available in quarts, in three flavors, and in six ounce retort packs in four flavors."

1869. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten, Januari-Februari-Maart [Catalog and price list: Natural food products, January-March]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** For details, see entry for the April-June 1989 catalog. Products made by many companies (including Manna) are listed in this catalog. Address: Almere, Netherlands. Phone: 03240-20800.

1870. Colbin, Annemarie. 1989. The natural gourmet: Delicious recipes for healthy, balanced eating. New York, NY: Ballantine Books. x + 325 p. March. Illust. by Laura Hartman Maestro. Index. 24 cm. [16 ref]

• **Summary:** Pat McNees of *The Washington Post* has called Annemarie "The Julia Child of natural foods cooking." Her photo, in color, graces the cover. The book incorporates "The Five Phases of Food" theory from China, based on a book by John W. (Jack) Garvey (1983), as an aid to meal balancing. Below each recipe name is given the major phase and minor phase that it represents. Soybeans, tofu, tempeh (as well as brown or white rice and mochi) are metal (declining state), while black soybeans are water (maximum rest before growth).

Page 27 notes: "You will not find any recipes in this book with whole soybeans; I find their taste too unpleasant, and tend to believe some research that indicates they may contain oxalates and other elements that prevent nutrient absorption. Soybean products such as miso, shoyu (the natural soy sauce made with wheat), tamari (a wheat-free natural soy sauce), tofu, and tempeh, on the other hand, are delicious; tofu and tempeh are good protein sources when combined with the grains. You will also find the condiments miso and shoyu or tamari used in many of the recipes."

Soy-related recipes include: Black and white aioli dip (with tofu, p. 49; Note: "Aioli" is derived from the French words for "garlic" + "oil." Aioli sauce is made from crushed garlic, egg yolks, olive oil, and lemon juice). Tofu and spinach turnovers (Spanakopitas, p. 66-67). Bean-of-the-Orient miso soup (p. 74-75). Shoyu consommé with enoki mushrooms (p. 77). Collard miso soup (p. 78-79). Carrot-beet soup with tofu sour cream (p. 83-84). Tofu sour cream (p. 84-85). Baked [kidney] beans with miso and apple butter (p. 136). Vegetable-tofu sauté (p. 154-55). Tofu mushroom stroganoff with bulgur (p. 155). Tofu sour cream (p. 156). Broccoli-tofu quiche with wild mushrooms (p. 157-58). Open herbed tofu sandwiches (p. 158-59). Tempeh with shallots and white wine (p. 160-61). Tempeh in sweet and sour sauce (p. 161-62). Tempeh with creamy horseradish sauce (p. 163). Stir-fried bak choy with marinated tofu (p. 169-71). Green peppers with miso (p. 182-83). Spinach-nori rolls with tofu and wild mushrooms (p. 186-87). Green salad with miso-coriander dressing (p. 203). Red and white cabbage salad with miso-onion dressing (p. 208). Radish-watercress salad with soy-sesame dressing (p. 209; with ½ tablespoon black sesame seeds and ¼ cup toasted sesame oil). Salad of wilted collard greens with yellow peppers and white miso dressing (p. 210). Spiced glazed pears with tofu cream (p. 271-72). White miso and orange dressing (p. 285).

Note: This is not a vegetarian cookbook. There is a chapter of fish recipes, and other recipes for the use of alcoholic beverages/seasonings (wine, mirin). Address: Founder and director, Natural Gourmet Cookery School / Inst. for Food and Health, 365 West End Ave., New York City, NY 10024.

1871. *Whole Foods*. 1989. Europeans ban growth hormone in beef. U.S. retaliates, import prices expected to increase. March.

• **Summary:** The ban was announced on 1 Jan. 1989. Five growth hormones (steroids) are permitted for use by American cattle farmers: testosterone, estradiol, progesterone, and two synthetic compounds (zeranone and trenbolone acetate). Bread & Circus, a natural foods supermarket chain in Massachusetts ran an ad saying: "We are advising people to say no to drugs, starting with the meat they eat."

1872. *Whole Foods*. 1989. Bios: U.S. Mills. March. p. 110.

• **Summary:** U.S. Mills, established in 1908, specializes in 100% natural products. Our Erewhon cereals, granolas and nut butters are produced in our facility in Omaha, Nebraska. We also import a complete line of macrobiotic products from Japan, including shoyu tamari. In addition, we are the exclusive importer of Kentaur cereals from Switzerland. When the name Erewhon or U.S. Mills appears on the package, be assured your customers are getting the very best. U.S. Mills Inc., 395 Elliot St., Newton Upper Falls,

Massachusetts 02164; (617) 969-5400.

1873. Rose, Richard. 1989. Re: Personal observations on soyfoods at Natural Foods Expo in Anaheim, California. Letter to William Shurtleff at Soyfoods Center, April 19. 1 p. Typed, with signature on letterhead.

• **Summary:** "Nothing was especially noteworthy this year. Mandarin Soyfoods and Turtle Island had booths for the first time and were moderately well-received. Luke Lukoskie of Island Spring shared a booth with Kathryn Bennett and her Mexican food. White Wave had 2 booths and an expanded product line, including dressings, hot dogs, and cheese.

"Did you know that Yves tofu hot dogs are being served this year at Candlestick Park! Health Valley is the U.S. distributor of the hot dogs.

"Golden Soy Foods, Nasoya, Quong Hop and Sonoma Specialty Foods had no booth this year. Tomsun Foods shared a booth with their Los Angeles distributor. Jofu is back, but still needs improvement.

"Soyimage sour cream was shown. It has no casein but does have soy protein isolates along with tofu. It was mediocre. However, Soya Kaas cream cheese with casein was absolutely awful, with poor flavor and mouthfeel. Cholesterol and organic was very big at the show. The Soyfoods Pavilion was indistinguishable, with only a banner up high at one end. Within the 'pavilion' was The Book Publishing Co. and Kashi (no soy), and about 1 or 2 other non-soy exhibitors.

"Gordon Bennett said the SAA board hired a part-time secretary to handle its affairs. She has an office next door to Golbitz. SAA will have more money this year and more programs. Ask the new secretary for a copy of the minutes." Address: President, Rose International, P.O. Box 2687, Petaluma, California 94953-2687. Phone: 707-778-7721.

1874. DeSilver, Drew. 1989. Eden Foods pleads guilty to infant formula violations: Paradise lost. *Vegetarian Times*. April. p. 9-10. [1 ref]

• **Summary:** "Eden Foods was fined \$110,000 in January after pleading guilty to 11 counts of violating the federal Infant Formula Act, which sets nutritional standards for products sold as infant formula. Company president Michael J. Potter, who pleaded guilty to one charge of violating the act, was sentenced to 30 days in jail, two years' probation and a \$25,000 fine. Both Eden's and Potter's penalties were the maximum allowable.

"The 12 misdemeanor charges, filed last year in the U.S. District Court in Detroit, involved a promotional pamphlet that Potter wrote in 1983 for Edensoy brand soymilk. The Food and Drug Administration and the Justice Department charged that a pamphlet paragraph headed 'Good for Babies' said Edensoy was a 'quality substitute' for mother's milk, when in fact it lacks adequate amounts of several nutrients, including vitamins A, B-12, C, D and E, thiamin, pantothenic

acid, calcium and iodine...

“The pamphlet attracted the attention of the FDA, which in October 19893 notified Eden that it was in violation of the Infant Formula Act. Eden immediately agreed to stop distributing the pamphlets and told a few of its large distributors to stop using them.

“There the matter stood until 1985, when a child suffering from malnutrition and failure to thrive was admitted to a Toronto hospital. The mother said she had seen a copy of the pamphlet at a natural food store and had been feeding the infant nothing but Edensoy. When the FDA learned about the infant (who eventually recovered with no ill effects), it ordered Eden to recall all the pamphlets. The FDA also called in the Justice Department, which filed charges against Eden and Potter in July 1988... Potter doesn't deny that he and Eden broke the law, but he says it was unintentional...

“In 1978, the Syntex Corp. promoted a product called Neosoy as an infant formula. Neosoy was deficient in chloride and was blamed for causing neurological damage to at least 80 children. The FDA wanted to prosecute Syntex, Gibbs said, but in 1984 the Justice Department decided not to. In another case, which occurred in 1985, the department filed 12 misdemeanor counts against Wyeth Laboratories for marketing a formula that lacked vitamin B-6. Wyeth pleaded guilty and received what was then the maximum fine, \$1,000 per count. The total fine was only \$12,000...

“Last year Eden made a \$142,000 profit—slightly more than Eden's and Potter's combined fines.”

1875. Gibbs, Jeff. 1989. The Edensoy case: Lessons for the industry. *Soya Newsletter (Bar Harbor, Maine)*. Jan/April. p. 4-5, 19.

• **Summary:** On 20 Jan. 1989, nearly 6 years after Eden Foods had published its ill-fated Edensoy pamphlet, the company was fined \$110,000 and its president, Michael Potter, was fined \$25,000 and sentenced to 30 days imprisonment. Jeff Gibbs represented Eden Foods of Michigan in its case against the Justice Dept. and the FDA. He is a specialist in federal regulatory law, especially Food and Drug Administration issues, such as product liability, labeling, clinical research, and compliance matters. “Long time court observers were shocked by the severity of the penalties. The fines were about ten times greater than the average for the court; jail time is unusual for people who plead guilty to one non-violent misdemeanor, especially when the government does not recommend prison.” The judge was a woman. Neither the court nor the government articulated the lessons it wished to teach. But the following were implicit: 1. Companies must be careful what they say when promoting products. The FDA, which administers the Federal Food, Drug, and Cosmetic Act (FDCA) prohibits making false and misleading statements about food. 2. Ignorance is no defense. The burden is on companies

to understand a complex and ever changing law. The government charged CEO Michael Potter with 32 separate violations. 3. Do not expect to be treated similarly to other companies. “For example, in the late 1970s, Syntex of Palo Alto, California sold an infant formula that lacked sodium chloride. The product permanently injured some children. Yet, the government decided not to prosecute Syntex. Wyeth Laboratories of Philadelphia, Pennsylvania, another large pharmaceutical company, sold infant formula that was deficient in a critical nutrient. Wyeth was fined \$12,000; no individual was prosecuted.” 4. Cooperation has its limits. Eden Foods and Michael Potter were models of cooperation. It is not clear whether or not this helped them. Address: Attorney, Mackler, Cooper and Gibbs, P.C., Washington, DC.

1876. Golbitz, Peter. 1989. Eden Foods' CEO gets thirty days in jail: Edensoy pamphlet wording in violation of law. *Soya Newsletter (Bar Harbor, Maine)*. Jan/April. p. 1, 6-7. [1 ref]

• **Summary:** The story of Eden Foods' encounter with the FDA and the U.S. Justice Department. On 20 Jan. 1989 a federal judge in Detroit, Michigan, levied fines and a sentence on Eden Foods and Michael Potter. Potter, who pleaded guilty of one misdemeanor count of adulteration, was personally fined \$25,000 and sentenced to 30 days in the county jail in Bay City, Michigan. He began to serve out his jail sentence on Feb. 24. Eden Foods, which pleaded guilty of an additional 12 counts of misbranding and adulteration, was fined \$111,000. Address: Soyatech, Bar Harbor, Maine.

1877. Mitoku Co. Ltd. 1989. Food is medicine: Mitoku macrobiotic (Ad). *East West*. April. p. 33.

• **Summary:** The top half of this full-page ad contains a large square red seal with four Chinese characters, read “*Ishoku Dogen*, which literally means ‘medicine and food (have the) same source.’ It is an old traditional saying in Japan, and its not only Oriental philosophy. In the 4th and 5th centuries BC, a Greek physician spoke of letting food be our medicine. Hippocrates taught that the effects of occupation, climate and food, were where much of the cause of illness lay. Today, modern science and medicine have begun to agree with this ancient wisdom.”

“Mitoku Macrobiotic products are a selection of some of the highest quality foods in the world; Miso, Tamari and Shoyu, premium seaweeds,... mochi.”

USA wholesale distribution: Granum, Seattle, Washington 98105 (206) 525-0051. Spiral Foods Inc., Asheville, North Carolina 28814 (800) 633-2156.

Note:

Note: A similar ad appeared in the Sept. 1989 issue of *East West* (p. 18).

Note 2. A similar ad appeared in *Macromuse* as early as summer 1985, back cover. Address: CPO Box 780, Tokyo, Japan 100-91.

1878. **Product Name:** Westbrae Oriental Style Dressings [Lemon & Spice, Oriental Orange, Sesame, Sesame (No salt added)].

Manufacturer's Name: Westbrae Natural Foods.

Manufacturer's Address: P.O. Box 91-1181, Commerce, CA 90091. Phone: (213) 722-1692.

Date of Introduction: 1989 May.

Ingredients: Lemon & Spice: Water, honey, expeller pressed canola oil, grain vinegar, sea salt, egg yolk, miso (soy bean paste), xanthan gum (vegetable gum), garlic*, onion*, lemon peel*, lemon juice concentrate, lemon oil, spices, celery seeds, poppy seeds, natural flavors. * = Dried.

Wt/Vol., Packaging, Price: 8 fl. oz. in tall-neck glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Westbrae sell sheet and new product announcement. 1989. May. “Available May 1.” The “Oriental Style Lemon & Spice” uses miso as the 7th ingredient. All oils are expeller canola oil.

1879. *FDA Consumer*. 1989. Not like mother made. 23(4):30-31. May.

• **Summary:** “A health food it may have been, but a ‘quality substitute’ for mother’s milk? FDA said no, and a Michigan company’s president has become the first person to be found guilty and sentenced to prison for violating the Infant Formula Act of 1980.

Michael J. Potter, president of Eden Foods, a Clinton, Michigan, health food producer, was sentenced in January 1989 to a year in jail and fined \$25,000 after pleading guilty to one count of violating the Infant Formula Act by misrepresenting the nutritional value of a soy milk health food product. All but 30 days of his jail term was suspended, but Potter will remain on probation for two years. Eden Foods, after pleading guilty on 12 counts, was fined the full \$111,000 permissible under the law. In 1983, Eden Foods introduced a soybean product it named ‘Edensoy.’ The soy drink was described in promotional literature as free of cholesterol, rich in iron, and—under the heading of ‘Good for Babies’—as a ‘quality,’ ‘easily digested,’ and ‘preferred’ substitute for mother’s milk, suitable for children who could not tolerate dairy milk or other liquid or powdered formulas. By 1985, the new soy drink accounted for one-third of Eden Foods’ \$5.5 million annual sales, and 35 percent of sales of all similar products in the nation’s health food market, according to industry reports.

“In the fall of 1983, an inquiry from the state of Maine first brought Edensoy’s use as a food for infants to the attention of FDA. The Maine Department of Human Services was being asked to authorize payment for Edensoy as an infant formula, based on the sales claims. Maine authorities asked FDA’s Detroit district office if Edensoy was approved as a food for infants.

“FDA investigators went to the plant in October 1983

and told Potter that his company’s promotional claims made Edensoy an infant formula under the Food, Drug, and Cosmetic Act. As such, the product was adulterated because laboratory analysis of samples showed the soy drink did not contain the minimum levels of vitamins, minerals and protein specified for infant formula under the Infant Formula Act of 1980. If used as the only food fed to infants, the soy drink posed a risk of severe malnutrition, even death. Potter said he would stop promoting Edensoy as an infant formula. It appeared the matter was resolved.

“But as late as 1985, the claim that Eden-soy could be substituted for milk for children was still receiving credence. Based on the information in the original promotional literature, a Canadian pediatrician approved the product as the sole milk substitute for a 6-month-old patient. The baby had to be hospitalized and treated for undernourishment, rickets (vitamin D deficiency), xerophthalmia (eye problems resulting from vitamin A deficiency), and mild iron deficiency. And FDA investigators continued to find the promotional literature in health food stores, where they discovered that clerks were advising customers that Edensoy and similar soy drinks were suitable as food for infants.

“Because of the illness in Canada—the sole report of injury from Edensoy—Eden Foods voluntarily issued a nationwide Class I recall (meaning the product was potentially life threatening) of the promotional pamphlet. The company also agreed to place a warning notice at retail sales outlets, destroy remaining pamphlets, and change the product labeling to emphasize that it was not suitable as an infant formula or as a sole source of nutrition.

“The company was charged with selling at least 53,482 cartons of the soy drink illegally as an infant formula between July 1983 and June 1985. The cases against both the firm and Potter were heard in the U.S. Court for the Eastern District of Michigan, in Detroit.”

Note: “*FDA Consumer* is the official magazine of the U.S. Food and Drug Administration” (FDA).

1880. Westbrae Natural Foods. 1989. Distributor catalog: FOB West pricing. Spring 1989. P.O. Box 91-1181, Commerce, CA 90091. [6] + 19 p. 22 x 28 cm.

• **Summary:** Has a black on yellow cover. Address: Commerce, California. Phone: (213) 722-1692.

1881. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten [Catalog and price list. April-June]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** Akwarius is a larger importer and distributor of natural food products. They have worked in this field since 1971, and have a strong interest in macrobiotic and anthroposophical foods. Contents (p. 2). Philosophy and function (p. 3). Beverages (p. 7): Sojamelk naturel and Bonsoy, Provamel Sojadrink (4 flavors in 500 ml and 4

flavors in 1 liter sizes), Provamel Soja dessert (puddings; 5 flavors in 525 gm and 1 flavor in 1050 gm).

Manna sweeteners (p. 12): Amasake drink in 350 and 700 gm sizes, and rice koji. Note that Akwarius imports and distributes large line of Manna-brand macrobiotic products from Muso in Japan. Manna vegetable protein products (p. 21): Dried tofu (non-organic). Bonsoy soymilk, Seitan, and three types of dried wheat gluten (fu). Manna Soy Sauces (Sojasausen, p. 21): shoyu (B = biological or organically grown, and NB = not biological, i.e. non-organic), and tamari (non-organic).

Witte Wonder (p. 22): Seitan, Tofu Spread (in paprika, garlic, celery, dill, mushroom, and pepper flavors, 220 gm sizes, all organic), Tofu in Sauces (peanut, curry-pineapple, and tomato flavors, 340 gm, organic), Tofunaise (plain and lemon flavors), Tofu Dressing (Italian, garden herbs, Mexican, and plain flavors).

Yakso (p. 23): Seitan, Tempeh Spreads (in Indonesian poesta and doeloe flavors), Temmo (round tempeh burger, deep fried then marinated, ¼ inch thick, sold 5 in a glass jar), Soyaroma (tempeh spread like butter), Sweet Indonesian-style soy sauce (Ketjap manis), Tofu Spreads (cream cheese consistency, in salsa, dill, green, shallot, and pommodore [apple?] flavors), Tofu Mayonnaise (Sojanaise), Smoked tofu (paprika, mushroom, and celery flavors in 170 gm wide mouth glass jars).

Akwarius soybeans and soybean meal/flour (p. 27-28, 35, organic). Manna Pasta (p. 28): Soya macaroni. Manna black soybeans from Hokkaido (p. 35; 350 gm, non-organic). Manna Tekka Condiment (p. 44), Manna soynuts (*Sojanootjes*, p. 45, 3 flavors). Lima soydrink (p. 47).

Manna Miso (Sojapasta; p. 48): Brown rice miso (organic and non-organic), young rice miso (non-organic), barley miso (organic and non-organic), natto miso (non-organic), soybean miso (non-organic), instant miso soup (with and without fish, non-organic), instant miso soup with tofu. Manna sea vegetables (p. 49).

Note 1. This is the earliest Dutch-language document seen that mentions soynuts, which it calls *Sojanootjes*.

Note 2. This is the earliest Dutch-language document seen (Sept. 2013) that mentions soy cream cheese. Address: Almere, Netherlands. Phone: 03240-20800.

1882. Belleme, John. 1989. The soymilk face-off: Top brands differ widely in ingredients, nutrients, fat, and sugar. *East West*. June. p. 53-55, 58-59.

• **Summary:** Four brands of soymilk are now available in the USA: Edensoy (3 flavors), Vitasoy (4 flavors), Westsoy (6 flavors), and Sunsoy (2 flavors). Contains a nutritional analysis, ingredients, and other basic information about each product. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1883. Welters, Sjon. 1989. Re: Brief history of Manna

Natural Foods. Letter to William Shurtleff at Soyfoods Center, July 24. 1 p. With follow-up talk on 2 Dec. 1989.

• **Summary:** This company was founded in about 1973 by Adelbert Nelissen and his wife Wieke Nelissen, plus Hugo van Seenus, among others. Adelbert is Sjon's brother in law (his wife's brother). Manna got started in the Rozenstraat in Amsterdam, in an abandoned house that was taken over by so-called "krakers" (counter-culture or hippie squatters). The store called "de Rozemaryn" (Rosemarin) was the first of a chain of stores which, at its peak, contained ten stores total. Hugo now owns and operates Hugo's Market in Washington, DC.

Manna was originally a foundation named Stichting Natuurvoeding Amsterdam. It kept this name until 1982. Manna started the first tofu shop in Europe that was owned and operated by non-Oriental. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu.

In 1975 Manna started importing miso and shoyu from Japan, initially via Muso Foods, and later also via Mitoku. But Muso was always their main supplier.

Manna filed for Chapter 11 bankruptcy or reorganization 2 or 3 times. The first time was a bankruptcy in March 1982. All their property was sold at an auction, but was bought back by a new foundation owned by basically the same people and the same foundation at one-third the value. It was probably at this time that Manna's name was changed from Stichting Natuurvoeding Amsterdam to Manna Natuurvoeding B.V. The company was back on its feet by 1983 but then things didn't work out again. At the last moment before declaring bankruptcy, they got financing. But this time the bank took the Foundation out of the picture, so that the foundation was not giving the collateral for loans. The person behind the foundation, Adelbert Nelissen, became the director/president of the holding company. He probably did not have majority ownership. But at this time (May 1983) Sjon and most of the management left.

In about late 1983 or early 1984 Manna moved all operations from Meeuwenlaan in Amsterdam to Zwanenburg. The former section of Amsterdam was torn down by the city. The third time was in 1987, when the company was disbanded. At that time Adelbert became inactive. The government-appointed curator tried to get as much as possible for the assets. The macrobiotic Manna brand name and the inventory of imported Japanese foods was purchased by Akwarius, which was located in Almere in a building constructed along anthroposophic guidelines (before about 1986 they had been located in the province of Utrecht). The production facility at Zwanenburg and its equipment was purchased (mainly for the bakery) by a conglomerate of 3 natural food companies, including

Akwarius and Loverendale (the largest baker of natural yeasted breads in the Netherlands). They made Manna tofu for a year or two, then facing stiff competition, sold off the tofu equipment piecemeal. They ran the Manna sourdough bakery there until 1988, then moved it to Loverendale headquarters, and closed down the Zwanenburg production facility.

Akwarius is a company based on the anthroposophical philosophy of Rudolf Steiner. They were founded in about 1974. In Holland there were 4 types or philosophies of natural foods distributors: (1) Anthroposophical (Akwarius); (2) Macrobiotic and natural foods (Manna); (3) Ecological (Kleine Aarde [Small Earth; inspired by E.F. Schumacher's book *Small is Beautiful*] and De Nieuwe Lelie [The New Lily]); and (4) Reform movement/vegetarian (VNR: Vereniging van Nederlandse Reformhuizen = Union of Dutch Reform Houses, and Scholten [which was also the exclusive importer of Lima products from Belgium]).

Talk with Sjon Welters. 1994. April 4. Manna and Lima sold only vegetarian foods; they did not sell any fish, poultry, or meat. All these early Dutch natural foods companies were this way because no natural food store would sell fish or other flesh products; they were just not acceptable. Some years after they started they used eggs in a few products but they were always vegetarian. The only people who ever got involved in flesh foods in the early stages were the Anthroposophic / Biodynamic people because its part of their philosophy, but even in the beginning they didn't sell meat to the stores because customers didn't want it. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

1884. Belleme, John. 1989. Soy milk's bum rap? The FDA comes down hard on Eden Foods. *East West*. July. p. 42, 44-45.

• **Summary:** The story from 1983 to the present of serious problems caused by a pamphlet stating that Edensoy is "Good for babies." Edensoy is expected to have 1989 retail sales of \$12,000,000. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1885. Business Trend Analysts, Inc. 1989. The health and natural food market: A product-by-product marketing analysis and competitor profile. 2171 Jericho Turnpike #342, Commack, NY 11725. 280 p. Price \$950.00. *

• **Summary:** Section 6 of this report is titled "The Market for Soyfoods" (24 pages). It projects 6.2% growth for the soyfoods industry, and contains the following (much of it provided by Soyatech, Inc. and Soyfoods Center): Analysis and summary. Manufacturers' sales of soyfoods. Manufacturers' sales of soyfoods to major outlets. Manufacturers' sales of soyfoods, by type of outlet. The top six soy milk producers in the U.S. U.S. per capita consumption of soy milk. Retail sales of soyfoods. Retail

sales of soyfoods at major outlets. Retail sales of soyfoods, by type of outlet. Graph: Product mix of U.S. soyfood sales. Estimated mix of distribution channels used to market various soyfoods. U.S. soybean production. Characteristics of women's use of soy sauce. Quick Tamari tips. Selected 1988/89 new product introductions: Soyfoods.

Under "Report Highlights and Special Features" we read: "Soyfoods continue to gain popularity with mainstream consumers, as sales are expected to top the \$380 million mark, at the wholesale level, by year-end. At the retail level, sales of tofu alone are currently pegged at \$77 million, with supermarkets capturing close to 60% of dollar volume."

Overall report Contents: 1. Executive summary. 2. The overall market for health and natural foods (including Soyfoods 1979-1988, with forecast to 1998). 3. The market for health and natural dairy foods. 4. The market for health and natural grocery products. 5. The market for health and natural snack food products. 6. The market for soyfoods. 7. The market for health and natural grains and cereals. 8. The market for health and natural frozen foods. 9. The market for herbal products. 10. Distribution channels. 11. Factors affecting demand. 12. Trends in organic farming. 13. Competitor profiles: Alta-Dena Certified Dairy, Arrowhead Mills, Barbara's Bakery, Celestial Seasonings, Golden Temple, San-J International, Thompson Kitchens. Tivall U.S.A./Garden Gourmet, U.S. Mills (partial list). 14. Directory of more than 200 health and natural food producers. Address: Commack, New York. Phone: 516-462-2410.

1886. Timmins, Thomas P. 1989. Timmins Group. 105 Beacon St., Greenfield, MA 01301. 10 p.

• **Summary:** Timmins, founder and president of Tomsun Foods International, has started a new company, a consulting firm named Timmins Group. He has 17 years management experience in the food industry and 12 years with Tomsun. This packet of information consists of a cover letter, a description of five areas in which the Timmins Group will offer consultation, and a resume of Timmins past experience.

He graduated in 1967 from the University of Notre Dame in Indiana with a BA degree, magna cum laude. 1972-73 he worked for Wadco Foods, Inc. in Estherville, Iowa, as supervisor of shipping and receiving. 1973-75 he was manager of Yellow Sun Natural Foods Cooperative in Amherst, Massachusetts. This food co-op had 500 member families and was a pioneer in the organic farming movement in New England. 1975-77 he was sales manager at Llama, Toucan, and Crow, a natural foods distributor in Brattleboro, Vermont. In 1977 he was a co-founder of Tomsun Foods International, Inc., an early tofu manufacturer in Greenfield, Massachusetts. In 1982 Tomsun was named to the INC., Magazine 500, a group of the fastest growing small companies in the country. In Dec. 1986 the company conducted an initial public stock offering to support the

launch of Jofu, a refrigerated tofu and fruit snack.

Note: Timmins is no longer involved with Tomsun Foods or Jofu. By Oct. 1991 he had developed a vegetarian ham (using soy protein isolates made by Protein Technologies International) and shipped 60,000 lb to Taiwan. Address: Greenfield, Massachusetts. Phone: 413-772-0035.

1887. Welters, Sjon. 1989. Early involvement with soyfoods and Manna in the Netherlands (Interview). *SoyaScan Notes*. Aug. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sjon was born in 1955. He completed high school plus one year at the National Academy of Fine Arts. Then he dropped out to pursue his interest in the natural foods movement. He got involved with soyfoods when he became a vegetarian in 1973. In Sept. 1975 he started to work for Manna. During 1975-76 he did a lot of experimentation with soyfoods production while working at Manna, and he was involved in selling the shoyu and miso that Manna had been importing from Muso in Japan since 1975. In Sept. 1977 Sjon left Manna and started his non-profit natural foods foundation (Stichting Natuurvoeding Alkmaar) and his own natural foods store, both at Alkmaar (pronounced AL-ek-mayr), the Netherlands, based on the model established by Manna. During 1980-81 Sjon's foundation merged with Manna's foundation and Sjon started to work as director of operations at Manna, and he first became involved with the production of tofu and seitan. During the early 1980s Sjon was an editor of the *Manna Bulletin*. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

1888. Roth, Martin. 1989. Early history of Great Eastern Sun and subsequent work with soyfoods (Interview). *SoyaScan Notes*. Aug. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Other records describe in detail Martin's pioneering work with commercial production of Brown Rice & Tofu Sandwiches, Sweet White Miso, Amasake, Amasake Shakes, and America's first Amasake Ice Cream. In 1982 he and his very close friend Barbara Svenning Garvey (they were never officially married) moved from Boulder, Colorado, to Miami, Florida, then to North Carolina. Martin met Barry Evens in Florida and Barry commissioned Martin to go to North Carolina and set up a macrobiotic distribution and import company near the American Miso Co., of which Barry was then the principal owner. "The beginning of that company was a wonderful experience. Everybody was thrilled. We were the first ones to actually take a full line of Japanese foods and present it to the health food stores in a big way. At that time Erewhon still had a much more limited selection of Japanese imports, such as miso, tamari, soba, etc. We had only imports, 200 to 300 esoteric items

that many people never heard. We put together a nationwide sales force and went store to store, introducing the concept of a macrobiotic section. We put that on the map. We had great success, opening hundreds of accounts. I left in about 1984 because I got an opportunity to work for Westbrae as sales and marketing manager, and North Carolina was not my favorite place to live." Martin developed the concept, the name, and the graphics for the Westbrae Malted and for Mitoku's Supersoy. Address: Berkeley, California. Phone: 415-527-7066.

1889. Belleme, John. 1989. Natural soy sauce: A brewing controversy. *Solstice* No. 37. Summer. p. 10-12. [1 ref]

• **Summary:** "A San-J placard [shelf talker] sent to thousands of retail stores [about 6 months before this article] says: 'You will notice that all San-J soy sauce has alcohol as an ingredient. As a result of fermentation, there is a small amount of naturally occurring alcohol in all soy sauces. We add a little more alcohol in order to inhibit the growth of naturally occurring aerobic yeast. While the addition of alcohol as a natural preservative is common practice for traditional soy sauce, often it is not listed on the label.'" The author contacted the three major suppliers of traditional imported soy sauce, they were unanimous in denying San-J's accusations. Likewise, the brewmasters of these products denied that any alcohol was added. (Note: Johsen shoyu is bottled under the Tree of Life, Koyo, Mitoku Macrobiotic, Emperor's Kitchen, and Westbrae labels. Marushima Shoyu supplies Eden Traditional Shoyu and Organic Shoyu). However Mansan Brewing Co. of Handa, Japan, adds 4% Mikawa Mirin (rice brandy) to its Mansan Tamari, which is marketed under the Mitoku Macrobiotic label. When Belleme asked San-J vice president Steve Zoller which brands of soy sauce have unlisted alcohol, Zoller could not give any specifics. "The soy sauce San-J imported until their domestic product became available last fall was labeled 'no artificial additives or preservatives.' When we asked Steve Zoller if this shoyu and tamari contained added alcohol and tamari, he replied, 'No comment.'"

Belleme was also concerned that San-J tamari made with hexane-extracted soybean meal using a modern temperature-controlled process would be called "traditionally brewed." Note: Belleme later admitted that the statement in this article about benzene being used by ADM to make food grade ethanol was incorrect. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1890. Schneider, Keith. 1989. Science Academy says chemicals do not necessarily increase crops: Policy shift on aid urged to discourage pesticides. *New York Times*. Sept. 8. p. 1, A12. [1 ref]

• **Summary:** "The National Academy of Sciences has found that farmers who apply little or no chemicals to crops are usually as productive as those who use pesticides

and synthetic fertilizers, and today recommend changing Federal subsidy programs that encourage use of agricultural chemicals. In a long study, the Academy's Board on Agriculture said it was seeking to reverse Federal policies that for more than 4 decades have been focused on increasing the productivity of crop and livestock farms principally through heavy use of pesticides, drugs and synthetic fertilizers. The report's authors said Congress and the [U.S.] Department of Agriculture should change farm policies that have discouraged farmers, particularly those who grow crops subsidized by the Government, from trying natural techniques.

"In the Federal corn program, for instance, farmers are paid a subsidy of roughly \$1 for every bushel they can produce. The incentive is to produce the most bushels. Since the end of World War II, farmers have been taught by agricultural universities and the Department of Agriculture that the best way to increase output is to use ample amounts of chemical fertilizer and then protect the harvest with generous applications of pesticides. If farm subsidies were reduced, researchers say, it is likely that farmers would no longer produce surpluses marketable only to the Government, and might encourage farmers to try natural farming techniques. That would bring supply in line with demand, raising prices and making up for the subsidies. The effect on consumer food prices is not expected to be dramatic because the cost of grain is a fraction of overall food costs. This year, farm subsidies cost the Government \$13,900 million.

"The study by the nation's pre-eminent body of scientists is perhaps the most important confirmation of the success of agricultural practices that use biological interactions instead of chemicals."

"Well-managed alternative farms use less synthetic chemical fertilizers, pesticides and antibiotics without necessarily decreasing, and, in some cases, increasing per-acre crop yields and the productivity of livestock systems," said the committee in the report, 'Alternative Agriculture.'"

"The Department of Agriculture, which was suspicious of natural farm practices during the 1980's, greeted the study enthusiastically, saying the 'time was right' to consider changes in the direction of American agriculture."

"In its study, which was begun in 1984, the Board on Agriculture closely examines 14 farms in Ohio, Iowa, Virginia, Pennsylvania, California, Florida and Colorado which have developed successful natural production methods. It is not known how many American farmers practice natural techniques, but it is thought that at least 5% of the nation's 2.1 million farmers have adopted such techniques; the numbers may be much greater."

"In addition to the problems of over-production, the environmental costs of using large amounts of chemicals have become more apparent in the 1980's, the study said. Weeds and insects develop genetic resistance to farm

chemicals, often forcing farmers to use ever greater amounts to achieve the same effect."

1891. Diringer, Elliot. 1989. Grocers sign no-pesticide agreements. *San Francisco Chronicle*. Sept. 12. p. 1, 4. Also in *Contra Costa Times*, same date.

• **Summary:** "Five supermarket chains hoping to inspire a nationwide trend set off a nationwide furor instead yesterday when they pledged to rid their produce of dangerous pesticides by 1995. Petrini's, Raley's and 3 other chains signed pacts with a private environmental group, the Boston-based National Toxics Campaign, promising to phase out sales of fruits and vegetables sprayed with pesticides linked to cancer and other toxic effects. The move was promptly denounced by food industry leaders, who accused the firms of stirring consumer fear to gain a market edge, and by federal regulators, who objected to supermarkets taking over their role as guardians of food safety."

In addition to Raley's, with 57 stores in Northern California and 3 in Nevada, and Petrini's with 23 stores in the [San Francisco] Bay Area, companies signing yesterday were Provigo Inc., Petrini's parent company and Canada's second-largest grocery outlet; ABCO Supermarkets, with 87 stores in Arizona; and Bread & Circus, a chain of 5 natural foods supermarkets in the Boston area. Address: Staff writer.

1892. Soyfoods Association of America. 1989. Complimentary buyers guide to Soyfoods Pavilion: Natural Foods Expo '89 East, Philadelphia, Pennsylvania, September 22-24, 1989 (Portfolio). Bar Harbor, Maine. 10 p. 28 cm.

• **Summary:** The Soyfoods Pavilion was organized by Gary Barat. The 1st page of this stapled portfolio is a leaflet (8½ by 11 inches, single sided, printed blue and red on white) announces the Pavilion. It states: Expo '89 East Pavilion Members: Book Publishing Co., Farm Foods, Great Eastern Sun, Lee Seed Company, Inc. [soynuts], Legume / Richter Bros., Lightlife Foods, Inc., Morinaga Nutritional Foods, Nasoya Foods, Ltd., Vitasoy (U.S.A.) Inc. Leaflets from most of these companies are stapled to the top Pavilion leaflet. Address: 318 Maine St., Bar Harbor, Maine 04609. Phone: 207-288-9419.

1893. Treml, William B. 1989. Eden Foods president gets prison term for fatal crash. *Ann Arbor News (Michigan)*. Oct. 13.

• **Summary:** "A Manchester [Michigan] man convicted of manslaughter in the 1988 traffic death of his business partner was sentenced to prison Thursday despite pleas that he be given probation.

"Michael Potter, 39, president of Eden Foods, a national health food firm with a plant in Clinton, was sentenced by Washtenaw County Circuit Judge Edward D. Deake to an 8- to 15-year term.

"When I woke up in the hospital, I found out my friend

and business partner had died,' Potter told Deake. 'At that time I discovered I had the disease of alcoholism. My friend had died and alcoholism was the cause of his death. I don't know how many generations alcoholism goes back in my family. I don't know how much heredity is involved but I'm concerned that it will affect my four sons. I'm now in a vigorous program of treatment. I ask for consideration in my efforts and my family's efforts to intercede in this disease.' Defense attorney Michael Moran urged Deake to take into consideration that Potter's father was an alcoholic...

"But Deputy Chief Assistant Prosecutor Lynwood Noah, arguing for a heavy prison term, told the court Potter has a history of 20 years of 'totally disregarding' sanctions by various courts on his driving after drinking.

"He said Potter was responsible for the death of a man in an alcohol-related accident 21 years ago but continued to drink and drive after that. In that accident, Potter drove through a stop sign in Troy and collided with another vehicle. Gerald Mitton, a passenger in Potter's car, was killed... Potter's four sons and his wife embraced him and wept as he was led away to the courtroom lockup...

"State police from the Adrian post said the defendant was driving his Lincoln at a high speed on the Clinton-Manchester Road south of Clinton on the night of April 13, 1988, when the vehicle went out of control and flipped over. Potter and Adler were thrown from the vehicle and Adler was pronounced dead on arrival at Herrick Memorial Hospital in Tecumseh. Potter was hospitalized for an extended period." Address: News Staff reporter.

1894. Friedman, Martin. 1989. In *City of Brotherly Love, marketers love that oat bran. Adweek (Western Edition)* 39(43):32. Oct. 23. *

• **Summary:** Food Expo 89 East, sponsored each year by *Natural Foods Merchandiser* magazine, was held last month in Philadelphia, Pennsylvania.

"Hain Pure Food, a unit of Whitman Corp.," is selling three Hain Bran Muffin Mixes: apple cinnamon, raspberry spice, and banana nut. Health Valley Foods also markets two Oat Bran Bakes.

1895. **Product Name:** Nature's Patties [Original, or B.B.Q.].

Manufacturer's Name: Nature's Path Foods Inc.

Manufacturer's Address: 170-2540 Simpson Rd., Richmond, BC, V6X 2P9, Canada. Phone: 604-278-2923.

Date of Introduction: 1989 October.

New Product-Documentation: Soya Bluebook. 1989. p. 103. Contact: Arran Stephens, President [formerly founder and president of Lifestream, a natural foods distributor in Canada].

1896. New Hope Communications. 1989. *The natural products market: A wellspring of consumer trends.* Boulder,

Colorado: New Hope Communications. 164 p. Price: \$975.00.

• **Summary:** Contents: Acknowledgements. 1. Introduction: The roots [history] of the natural products industry. 2. Coming to terms: Definitions of basic concepts. 3. The industry matures: From rebellion to leadership. 4. The impact of legislation and regulation by Peter J. Semper. 5. The role of science: Research, development, and credibility. 6. Product category sales trends (Soyfoods is not listed as a category). 7. Retailing: The interface with the consumer (Health food chains: General Nutrition Centers, Great Earth Vitamins, Nature Food Centres, Fred Meyer Nutrition, Nutrition World). 8. Manufacturing: A multitude of market shares. 9. Distribution: Consolidation, stability, and efficiency. 10. Regions. 11. Factors for the future. Appendix 1. Organic farming labeling legislation. Appendix 2. Examples of advertising.

Gross retail sales for this industry exceeded \$3.5 billion in 1988. This study gives a good look at the structure of the market, and contains a brief historical overview of the industry. It contains many tables, graphs, and maps. None of these relate to soyfoods. A graph of "Natural Products Industry Sales" shows total retail sales to have grown from about \$250 million in 1970 to \$3,550 million in 1988, a 14-fold increase in 18 years. Of the 1988 total, \$2,390 million (67%) is sold by independents (natural and health food stores), \$679 million (19%) by the mass market (supermarkets), and \$477 million (13%) by non-supermarket chains (such as General Nutrition Centers). The major natural products in the mass market (with sales in 1988) are yogurt \$1,200 million, bottled water \$800 million, granola bars \$200 million, and herbal teas \$70 million. "These 4 product categories add up to more than \$2,200 million, which is more than double the sales we tracked for all grocery products sold through the natural products industry."

History: The notion of natural or health food products has been around for almost as long as the United States. Two of the early pioneers were Sylvester Graham and John Harvey Kellogg. Graham, who admonished Americans to stop eating meat, "gained both fame and notoriety in the early 1800s in claiming that 'a single pound of rice absolutely contains more nutritious matter than 2½ pounds of the best butcher's meat.' Graham died in 1851, at the ripe old age of 57. A year later, John Harvey Kellogg was born. He lived to be 91, and attributed much of his longevity to his [vegetarian] diet based on fruits, nuts and whole grains. From his Battle Creek Sanitarium, Kellogg concocted whole wheat meals, which found their way into the mass market. And subsequently, became more refined and less healthy."

The natural foods industry is based on two basic beliefs, both expressed by Graham and Kellogg. "The first is that certain foods or nutrients can be used medicinally. That is, the right foods can be used to help cure disease or to enhance vitality or performance... The second maxim

dear to the natural foods industry is that food is better and intrinsically healthier when eaten most closely to its original state in nature. The ideal food is that which is unprocessed, unrefined, and even uncooked in some instances.”

“The industry matures: From rebellion to leadership. Since World War II, food production in America can be explained by the concept of the Hegelian dialectic. One concept or practice (a thesis) inevitably evokes its opposite (an antithesis), and the two interact to form a new concept (synthesis), which in turn becomes a new thesis. “Throughout the 1950s and 1960s, food became ever more mass produced, processed, homogenized and inexpensive... as the power of the food conglomerates reached their peak some 20 years ago, the antithesis was being articulated by such visionaries as Adelle Davis, Gayelord Hauser, and Linus Pauling. “It’s probably no accident that this antithesis caught on and became a movement in the late 1960s and early 1970s, when a significant segment of the Baby Boom generation was protesting everything else.

“Through the 1980s, a synthesis has been evolving. The food giants have become more aware of health issues and the natural foods industry has adopted and adapted technologies to allow greater production of food, while retaining its intrinsic values.”

During the 1960s and 1970s this industry was divided into two camps, often at odds with each other. One sold “health foods” and the other “natural foods.” The health food industry, which had started in the 1930s and focused on the first maximum that food can be used as medicine, focused most of its attention on vitamins, herbs, and some traditional health foods such as wheat germ and brewer’s yeast. “In the late 1960s the natural foods faction emerged. Its followers were primarily concerned about food [rather than vitamins or supplements] and its purity... Products were defined essentially by what they did not contain: chemical pesticides, preservatives, food colorings, refined sugars and flours and, frequently, any animal products. Vegetarianism was an important part of the natural foods movement.”

During the 1970s the industry was nurtured more by idealism than business acumen. When Natural Foods Merchandiser began surveying industry retailers in 1979, “nearly a quarter of them could not tell us their gross profit margin and a significant number did not even accurately know their gross sales. A high percentage didn’t care...

“A decade later, the only thing that remains constant is the idealism, but today it is frequently blended with sound management and creative marketing...

“How did the industry accomplish this transformation? It happened in several evolutionary stages. First and foremost, the impetus for growth came from consumers. Economists use the term *demand pull* when describing conditions in which consumption dictates sales growth and pricing. In this case, the entire natural products industry was virtually dragged kicking and screaming into the mainstream

by consumers. They demanded the natural products, and then they began demanding that these products be marketed properly.

“Then between 1975 and 1982 a new wave of retailers entered the scene. They ran better, cleaner businesses and broadened the market. “Health” and “natural” principles were integrated. Industry sales grew remarkably during the 1970s, from about \$250 million in 1970 to \$1,850 in 1980, averaging about 20% a year for the decade. The number of outlets quadrupled. “At the same time, the supermarkets started setting up health food sections. On the west coast, two regional chains—Raley’s in northern California and Fred Meyer in Oregon—had successfully introduced health foods as early as 1971. Their continued success, along with heightened media attention, prompted Safeway to begin a program in 1980 (another motivation was that Raley’s was generally leading Safeway in market share wherever the two chains competed). Since Safeway at that time was the nation’s largest grocery chain, its leadership encouraged other supermarkets to follow suit. Drug stores and discount stores, such as K-Mart, also entered the field.

“Meanwhile, there was strong expansion from the existing health food retail organizations, primarily the major chains such as General Nutrition Centers (GNC), Great Earth International and Nature Food Centres.”

By the end of 1982, this expansion had peaked. There was a 4-year shakeout which lasted from early 1983 until late 1986. The industry lost a net of 1,500 health and natural food stores, and the vast majority of these were small health food stores. “The number of segregated natural foods sections declined from a high of 2,700 in 1985 to approximately 1,400 today.”

Surviving retailers emerged stronger. A resurgence began in 1987. In the fall of that year Surgeon General C. Everett Koop issued a report stating that cholesterol levels exceeding 200 were associated with a high risk of heart disease. This was considerably lower than the previous acceptable cholesterol limits and immediately plunged a quarter of the American people into a risk group. Consumers began visiting natural foods stores to buy low-fat, low-cholesterol foods, some based on tofu and other soyfoods. Also, foods such as oat bran, canola oil, and niacin were shown to actually lower serum cholesterol levels.

“Probably the biggest boost the industry has ever received... came in March of this year, when CBS ‘60 Minutes’ ran a segment on the potential dangers of apples treated with Alar (daminozide) to young children. Retailers reported being overwhelmed by consumers clamoring for organically-grown foods of all types.

“In many ways, the industry is 20 years old. Many of the leading companies in the industry were formed within the past 20 years, including Tree of Life, Nature’s Way, Twin Lab, Celestial Seasonings, R.W. Knudsen & Sons, Mrs. Gooch’s, Bread & Circus and Whole Foods Markets.”

1897. Demos, Steve. 1989. White Wave's strategy for marketing soyfoods in America as cholesterol-free protein foods (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** "White Wave welcomes the movement of tofu, a potentially hazardous food, out of the produce case. I think we are positioned and prepared as well as we possibly could be for this kind of change. This is what we've been waiting for! Years ago, White Wave designed its boxed, vacuum-packed tofu with a 60 day shelf life to sell in the dairy case. The disruption of an existing habit pattern opens up to opportunities for innovative companies." Demos does not see, even in the short term, any major loss of sales. At least 2/3 of White Wave's tofu is already out of the produce case and into either the dairy case or temperature controlled cases. He feels the best place to sell tofu is next to yogurt, ideally between yogurt and the deli meats in the dairy/deli case. White Wave conceives of itself as selling a new category of foods, "cholesterol free protein foods." This category should be well defined unto itself. Eventually Demos would like to see this heart/smart concept evolve into the "soyfoods section." Since signs identifying sections are generally not allowed in supermarket cases, the section/category might be partitioned off with plastic dividers at each end, like the Pillsbury Doughboy category. King Soopers has already pioneered this idea, starting in about 1983, putting tofu between the yogurt and the milk (with no plastic dividers), on the basis of the demographics, then building the concept by adding other soyfoods and soymilk. But tempeh, a slow mover, is now in the frozen foods case, and the meatlike products (such as hot dogs) are next to Armour in the deli meats.

Safeway seems to have made a top level decision to aggressively promote soyfoods. This year they called White Wave and said, "We don't know what you make, but give us everything. Then in August, in their two largest new classy "Safeway Marketplaces" in Boulder (and maybe in a few newer or college-oriented stores in Denver), entirely on their own initiative, they installed temperature controlled end-aisle cases at the end of the produce section facing the cash registers. The location is very prominent—an impulse location. Each case has the word "Tofu" in large letters on it. Many different types of soyfoods (and nothing but soyfoods) are sold in these cases—tofu, tofu dressings, tofu hot dogs, soy cheeses, Stir Fruity (soy-based yogurt), etc. All White Wave soyfood products in these 2 stores are sold in the Tofu case. Demos feels that "Tofu" this is the best title for the case. Also the "Approved by Healthmark" with the Healthmark logo on each display case identifies these as healthy foods. Only foods that are low in cholesterol, fat, and sodium get the Healthmark. Each case, constructed like an open dairy case, 5 feet wide by 6 feet high, has a temperature

range of about 35-40°. Demos would definitely prefer to have his products sold in these cases rather than any other location in the store. White Wave's main strategy is to "identify a category," and to group foods in that category together. Again, the current category definition is cholesterol-free protein foods, but the long term goal is to have the category defined as "soyfoods." It is too early to say how the new isolated cases are affecting sales, but preliminary signs all look very positive.

White Wave started pasteurizing its tofu in Dec. 1988. Since then they have not had a single complaint of spoilage or sourness. Pasteurization does effect the tofu texture, making it firmer, but it also makes tofu much more profitable. White Wave makes both a 16 ounce vacuum packed and a 10-ounce single serve water-pack tofu. He prefers the vacuum pack and has worked the bugs out of his Tiromat so that it is no longer a significant source of problems. Tree of Life on the East Coast sells un-boxed vacuum-packed White Wave tofu very successfully, but Demos strongly prefers to box it. He has a whole new tofu plant at his new facility with automatic cooking and curdling, conveyerized press tables and pasteurization.

Concerning the competition: Demos compliments Morinaga on a brilliant strategy. The net result is to help in the Americanization of tofu by identifying it clearly as a protein food and therefore forcing it out of the produce case. The irony is that when the dust settles, Mori-Nu Tofu may be the only brand left in what becomes an outdated, foreign location—with the oriental vegetables instead of with the protein foods. Azumaya and Hinode are rooted in the produce distribution network. Getting kicked out of the produce section will be very hard on them and their reaction will probably be to fight it rather than use it to their advantage. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3485.

1898. Ames, Lynne. 1989. Organic turkey and berries: A mainstream Thanksgiving? The view from: Way of Life Natural Foods Co-op. *New York Times*. Nov. 19. p. WC2.

• **Summary:** The Way of Life in Pleasantville, Westchester County, New York, was founded in 1971 when a woman named Lani Jackson stood up at a meeting of the Natural Food Associates of Westchester "and said she wanted to start a food co-op using only organically raised foods. The nucleus was formed and the group was on its way."

1899. **Product Name:** WestSoy Unsweetened (Soymilk). **Manufacturer's Name:** Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1989 November.

Ingredients: Water, organic soybeans*. * = Organically grown and processed in accordance with Section 26569.11 of

the California Health and Safety Code.

Wt/Vol., Packaging, Price: 33.8 fluid oz (1.06 quart; 1 liter) Tetra Brik Aseptic carton. Retail for \$2.04 (12/90, California).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 8 fl. oz.: Calories 100, protein 7 gm, carbohydrate 5 gm, fat 5 gm (percent calories from fat 45, polyunsaturated fat 3 gm, saturated fat 1 gm), cholesterol 0 mg, sodium 40 mg, potassium 330 mg.

New Product–Documentation: Product with Label purchased from Berkeley Natural Grocery Co., California. 1990. Dec. 28. 4 by 2.5 by 6.5 inches. Red, blue, and white on tan. Pale white illustration of a glass of white soymilk with a straw in it. The front panel states: “All natural. New. 100% organic ingredients. Great tasting non dairy beverage. No oil added. No cholesterol.” Side panel: “Not for use as an infant formula.” Back panel: “Lactose free. Very low sodium. Serve chilled. Pour over cereal. Cooking and baking.”

Talk with Julie Heiman, purchasing agent, Vestro Foods. 1991. Jan. 23. This product was introduced in Nov. 1990. It is made in America, not imported but the source is confidential. It comes in one flavor and size only (unsweetened liter).

1900. *SoyaScan Notes*. 1989. Influence of Japanese and Japan on soyfoods in America (Overview). Dec. 7. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The Soyfoods Center’s SoyaScan database presently contains 30,790 publications and commercial products related to soya. Of these, 876 (2.9%) concern the influence of Asian-Americans (Japanese, Chinese, Koreans, or Indonesians) or their home countries on soyfoods. Of these 876 records, 638 (73%) concern Japanese influence, compared with 178 (20%) that concern Chinese influence—including Chinese from Taiwan, Hong Kong, Singapore, etc. Thus Japanese influence on soyfoods in America is much greater than that of any other Asian cultural group. We can identify at least seven major areas of influence:

1. Soyfoods Terminology. It is interesting to note that many of the most popular soyfoods in America are most widely known by their Japanese names. We say tofu (not doufu or bean curd), miso (not jiang or soybean paste), natto, okara (not soy pulp), yuba (not doufu-p’i or soybean skin). Even “soy” (as in soy sauce) is derived from the Japanese word “shoyu.” Increasingly Americans interested in natural foods also use the terms shoyu and tamari to distinguish them from HVP soy sauce.

2. Kikkoman. By far the most influential Japanese soyfoods company in America today is Kikkoman, just as soy sauce is by far the most important soyfood product. Kikkoman was also the first Japanese company to introduce soyfoods to America. In 1868 the first Japanese immigrants to Hawaii took kegs of Kikkoman brand shoyu with them. In 1879 Kikkoman brand shoyu was registered in California,

where it was exported to Japanese immigrants. Exports rose steadily, until between 1949 and 1954 exports of Kikkoman shoyu to the U.S. ranged from 213,000 to 305,000 gallons a year. Kikkoman’s first real attempt to reach any foreign market dates from 1956 when, during the U.S. presidential elections, Kikkoman ran television ads to promote its product to mainstream American audiences as a seasoning for meat, fish, and poultry. In 1957 Kikkoman International Inc., a new sales company was established in San Francisco. Sales skyrocketed. In 1973 Kikkoman opened a huge modern shoyu plant at Walworth, Wisconsin. In 1976 Kikkoman passed La Choy to become America’s best-selling soy sauce.

3. Introducing Soyfoods to Hawaii. The first Japanese who arrived in Hawaii in 1868 brought shoyu and miso with them. The earliest known soyfoods company there was a shoyu brewery started in 1891 in Honolulu by Jihachi Shimada. This was also the earliest known soyfoods company started by a Japanese anywhere in the Western world. Hawaii became part of the USA in 1898 by annexation. Hawaii and California were the first two areas in the U.S. where soyfoods became widely available. During the 20th century, Japanese started roughly 183 companies in Hawaii making shoyu, miso, and tofu—far more than Chinese (6) or Koreans (2). They developed innovative new products—such as sweet Hawaiian-style shoyu and miso. These products profoundly influenced the food life of Hawaii.

4. Soyfood Manufacturers in the USA. The earliest known soyfoods manufacturer in the Continental USA was a company (the name is unknown) run by the wife of Chieko Hirata that started making tofu in Sacramento in about 1895. The second earliest was Yamamori Jozo-sho, which started making shoyu in San Jose, California, in 1897. Many of the earliest soyfoods companies in America were run by Japanese Americans. By 1942 at least 158 soyfoods manufacturing companies had been started in America by Asian Americans; of these, 143 (91%) were run by Japanese Americans. When *The Book of Tofu* was published in 1975, it listed 55 tofu companies in America, all run by Asian-Americans; 39 were Japanese- and 16 were Chinese-run. Today America’s two largest tofu companies are both run by Japanese Americans: Azumaya Co. in San Francisco, and House Foods & Yamauchi Inc. in Los Angeles. Hawaii’s three largest tofu companies are also run by Japanese Americans: Aloha Tofu Co., Kanai Tofu Factory, and Hawaii Tofu. Morinaga Nutritional Foods in Los Angeles and Kikkoman Foods in San Francisco both import large amounts of aseptically packaged long-life silken tofu from Japan.

Another major manufacturer is San-Jirushi Corp. of Kuwana, Mie-ken. In the late 1970s San Jirushi started exporting tamari and soybean miso to America. They set up an office in the early 1980s and began to promote their product as “real” tamari to industrial food processors and

the natural foods market. In Sept. 1987 the company opened a state-of-the art tamari plant in Richmond, Virginia, with a capacity of 1 million gallons a year. The company now has 75% of the industrial soy sauce market in America.

In Oct. 1986 a major new joint stock company named American Soy Products began producing Edensoy soymilk in Clinton, Michigan. It was a joint venture between Eden Foods and 4 Japanese companies: Marusan Ai, Kawatetsu Shoji, Muso Shokuhin, and Seikensha. Edensoy has since become America's best-selling soymilk. Prior to 1986 much of the soymilk sold in America was made in Japan.

Finally, three of America's 4 largest miso manufacturers are run by Japanese-Americans. The largest is Miyako Oriental Foods in Los Angeles. The other two are located in Hawaii.

5. Soyfoods Imports from Japan. The first importers of shoyu and miso were Japanese distributors such as Japan Foods Corp., Mutual Trading Co. and Nishimoto. But starting in 1962 American macrobiotic and natural foods companies started to import large amounts of shoyu and miso. Pioneers were Chico-San, Erewhon, Eden Foods, Westbrae, Edward & Sons, Tree of Life, and Great Eastern Sun. U.S. imports of soy sauce from Japan jumped from 1.7 million lb (174,400 gallons, worth \$317,000) in 1949, to 18.6 million lb (1,897,000 gallons, worth \$3,116,000) in 1972, an 11-fold increase in quantity during only 23 years.

6. Teachers and Information. Many Americans first learned about soyfoods from Japanese teachers, especially macrobiotic teachers, such as George and Lima Ohsawa, Michio and Aveline Kushi, Herman and Cornelia Aihara, and Noboru Muramoto. All have written many influential books and lectured and taught extensively since the 1960s. In addition, many young Americans learned how to *make* soyfoods from these macrobiotic teachers. Moreover, Japan is Asia's best source of information about soyfoods. For example, the Soyfoods Center's SoyaScan database contains 5,095 publications and products about soya and Japan, compared with 1,867 on soya and China or Taiwan.

7. Tofu Equipment Manufacturers. Hundreds of tofu companies have started in America since the mid-1970s. The majority of these are run by Caucasian Americans and most use specialized tofu equipment made in Japan by Takai Tofu & Soymilk Equipment Co., or by Sato Shoji.

1901. Ridenour, Jeremiah. 1989. Re: New tofu company in Santa Cruz, California: Wildwood Natural Foods. Letter to William Shurtleff at Soyfoods Center, Dec. 30. 1 p. Handwritten.

• **Summary:** "I have recently come into a relationship with the principals of Wildwood Natural Foods [of Fairfax, California]. Our new company is Wildwood Natural Foods of Santa Cruz, Inc. I am building a small scale cauldron type plant to produce fresh tofu for Wildwood's needs and for secondary product development work.

"Wildwood Santa Cruz is located at 405 Pennsylvania Ave., Santa Cruz, California 95062.

"I hope you both have a prosperous year and that we can visit face to face soon.

"Warm regards, Jeremiah, Virginia, Laura & Timothy."
Address: Santa Cruz, California.

1902. *SoyaScan Notes*. 1989. Major soy-related company acquisitions and mergers worldwide 1970-1989 (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1970 March—Miles Laboratories of Elkhart, Indiana (most famous as the maker of Alka-Seltzer) acquires Worthington Foods of Worthington, Ohio (most famous for its Morningstar Farms line of meat alternatives), making it a wholly owned subsidiary.

1973 Jan. 15—ADM acquires 50% of British Arkady Holdings Ltd. and its subsidiary British Arkady Co. Ltd. of Old Trafford, Manchester, England.

1977 (late)—Bayer A.G. of Germany (makers of Aspirin) acquires Miles Laboratories of Elkhart, Indiana; as part of the deal they Worthington Foods, a subsidiary of Miles.

1979—Bunge Corp. acquires Lauhoff Grain Co. of Danville, Illinois.

1982 Oct. 15—Worthington Foods is repurchased from Miles Laboratories by a group of three Seventh-day Adventist investors in a leveraged buyout. During the 12 years under Miles, sales increased five-fold. Sales volume in 1983 was an all-time high. The company employed 250 people.

1983 April 21—Hybritech Seed International, Inc., a wholly-owned subsidiary of Monsanto Company, purchases the Jacob Hartz Seed Co. of Stuttgart, Arkansas.

1983—House Food Industrial Co., Ltd. of Japan purchases 50% ownership in Yamauchi Enterprises (formerly Hinode Tofu Co., owned by Mr. Shoan Yamauchi) in Los Angeles. The company is renamed House Foods & Yamauchi, Inc.

1985 May 31—Barricini Foods Inc. acquires Farm Foods (makers of Ice Bean soy ice cream) of Summertown, Tennessee.

1985 March—British Arkady acquires Direct Foods Ltd.

1986 Feb.—British Arkady acquires Vegetarian Feasts Ltd.

1986 Dec. 1—White Wave acquires Soyfoods Unlimited, Inc. of San Leandro, California. It is White Wave's first acquisition.

1987 Aug.—British Arkady acquires Haldane Foods Ltd. and Regular Tofu Co. Ltd. It also acquires Vegetarian Cuisine Ltd. in 1987.

1987 Oct.—The Ferruzzi Group in Ravenna, Italy, acquires Central Soya Co. in Ft. Wayne, Indiana.

1987 Dec. 31—ADM acquires the rest of British Arkady Holdings Ltd. so that it now owned 100%.

1988 Jan.—The British Arkady Group acquires Haldane

Foods.

1988 Feb.—Westbrae Natural Foods (of Berkeley, California, maker of soymilk) is merged with and becomes a wholly-owned subsidiary of Vestro Foods, a publicly traded company in City of Commerce, Southern California. Most of Westbrae's top management decides not to stay with the company.

1988 Sept.—Haldane Foods Group acquires Realeat Foods Ltd.

1989 Feb.—Haldane Foods Group acquires Saucemasters Ltd. It also acquires Genice Foods Ltd. in March 1989.

1989 Feb. 16—Edward Lowe of Michigan, the inventor of Kitty Litter, purchases the majority of shares in INARI Ltd. from Len and Irene Stuttmann; but they kept a minority ownership in the company.

1989 April—Huegli Naehrmittel A.G. acquires Yamato Tofuhaus Sojaprodukte of Tuebingen, Hirschau, West Germany. Note: This is the earliest record seen (Feb. 2013) that mentions Huegli in connection with soy.

1989 April 22—Lima Foods of Belgium acquires Jonathan P.V.B.A. of Belgium.

1989 Sept.—Lima Foods of Belgium is purchased from Vibec by Euronature (pronounced as in French, YU-ro nA-TYUR), a large international food company headquartered in Paris, France.

1903. Belasco, Warren J. 1989. *Appetite for change: How the counterculture took on the food industry, 1966-1988*. New York, NY: Pantheon Books. [vii] + 311 p. Index. 25 cm. [602+* ref]

• **Summary:** A colorful and carefully documented overview of how the American counterculture has affected mainstream food patterns and of the post-1966 natural foods movement. Part I describes the making of a countercuisine that was politicized by the Movement, the work of early pioneers of eating lower on the food chain (such as Frances Moore Lappe), and the early organic food movement. Part II discusses the antithesis, the rage of the Big Food industry and the counterculture criticism of Big Food. In 1955, about 400 million pounds of additives went into U.S. food; by 1970 it was 1.06 billion, or about 5 pounds per capita. In Part III we face the persistent fact of American culture: its inability to adjust. And the co-opting of natural foods by Big Food.

Reviewed by Charles Bowden in the *Los Angeles Times Book Review*, 25 Feb. 1990. p. 2, 11.

Also reviewed in *Vegetarian Times*. Aug. 1990. p. 67, 82.

The sub-chapter titled “Hip Enterprise” discusses: Crescent Dragonwagon and her *The Commune Cookbook*, Mollie Katzen, the Moosewood Restaurant (founded 1972 in Ithaca, New York) and *Moosewood Cookbook* (1977), Common Ground Restaurant (Brattleboro, Vermont), Common Ground Restaurant (founded 1973 in San Francisco, California; all you can eat for 60 cents—but no

talking), Far-Fetched Foods (a health food store opened by Jerry Sealund in 1966 in the Haight-Ashbury district of San Francisco; the employees were organized as a commune, sold only nutritious food, avoided expensive vitamins and dietetic items found in older health food stores, and sought new sources of supply, such as organic truck gardens.

“Charles Perry reports that after being robbed 12 times in the Haight, Sealund closed the store, worked for an All Saints bread-baking operation and the Black Panthers' free breakfast program, and then organized another organic grocery in the more tranquil Santa Rosa.”

Fred Rohe opened his first store in the Haight district of San Francisco in 1965. A former chemicals salesman and part-time producer of rock concerts, Rohe characterized himself as a devout Buddhist. “As his clientele shifted from older people to flower children, Rohe repositioned accordingly. In addition to organic foods, Rohe's first store sold Rodale Press books and rock albums, and offered a meditation area complete with altar. By being so overtly countercultural, Rohe's well-stocked store filled the gap between the older drugstore-type health food store and the limited-inventory new wave conspiracies, and his sales increased tenfold in four years. From his original Haight-Ashbury store, Rohe established outlets [of New Age Foods] in Santa Cruz, San Anselmo, and Palo Alto. To foster bulk purchases and to maintain organic standards, Rohe joined with other Bay Area merchants in establishing a wholesale cooperative. What looked suspiciously like a cartel to some was defended as a ‘tribal council’ [Organic Merchants (OM)] whose aim was to establish a viable ‘alternative to poisoned, processed and synthetic foods of the not-so-super markets.’”

There is a poor history and discussion of Erewhon and its ties to *East West Journal*, then on to Mo Siegel, who started Celestial Seasonings in 1970 at age 21, and sold it in 1984 to Dart & Kraft Inc. for a reported \$8 million to \$10 million. Address: Author; Prof. of American Studies, Univ. of Maryland, Baltimore County.

1904. Blackman, Jackson F. 1989. *Working chef's cookbook for natural whole foods*. Morrisville, Vermont: Central Vermont Publishers. vi + 344 p. Illust. Recipe index by category. Alphabetical recipe index. 28 cm. [20 ref]

• **Summary:** This large-format book fills a gap in the world of natural foods. Contents: Foreword. Introduction. Part I: Information, philosophy, technique. 1. Healthy and unhealthy foods. 2. Getting started. 3. Meal design. 4. Directed diets for special occasions. 5. Philosophy, practice and tradition. 6. Charts and lists. 7. Ingredients description. At the end of Part I (p. 95) is a “Suggested reading” list of 20 references.

Part II: Recipes (each on 4x6 inch cards, with 2 cards per page).

The section on “Miscellaneous food description” includes brief descriptions of barley malt, Chinese white cheese (fermented tofu), daikon, gomashio, kuzu, mirin,

miso, rice syrup, seitan, shoyu, soy milk (American style vs. Oriental style), soy cheese (American), tahini or tahinah (sesame butter), tamari, tempeh, and tofu. This section, and the book itself, shows the influence of macrobiotics.

Page 74: “Chinese white cheese: (Chin.) Tofu marinated and fermented in rice wine; taste and texture of Camembert cheese. Used as flavoring for noodles or vegetables, or served as a condiment.”

The word “tamari” appears on 100 pages in this book, tofu on 92 pages, miso on 57 pages, brown rice on 48 pages, “sea vegetables” on 16 pages, nori on 13 pages, tempeh on 7 pages, kombu on 6 pages, shoyu and soybean on 5 pages each, adzuki beans and wakame on 4 pages each, and soybeans, soy cheese, and soy milk on 2 pages each.

About the author: “Jackson F. Blackman has lived and traveled extensively in Mexico, Belize, Guatemala, Europe, China, Egypt, Saudi Arabia, Libya, Lebanon, Jordan, and Syria. During his travels he studied local eating habits and their relationship to social customs, and the methodology of preparing natural whole foods. He was a sous-chef in a Houston [Texas] restaurant, and operated his own coffee shop in Houston. He then moved to Vermont, where he made and sold health food products to health food stores and co-ops. He is now a food service consultant and lecturer” (Back cover).

He favors plant foods over animal foods, but does include fish in his recipes. Address: Vermont.

1905. Bragg, Paul C. 1989. The shocking truth about water. Santa Barbara, California: Health Science. xviii + 121 p. Illust. Forms. 21 cm.

• **Summary:** Explains that fluoride is a poison. Contents: Introduction. The universal drink of death. Inorganic vs. organic minerals. Dangerous inorganic minerals in drinking water. Fluorine is a deadly poison. The grim story behind fluoridation. Don't drink water contaminated by sodium fluoride. We live in a sick, sick world. Few people know the meaning of health. The marvelous mechanism of the body. Hardening of the arteries. Brains turned to stone. My early experiences with hard water. T.B. in my teens. The secret of rain water and snow water. The answer to healthful living. My two first cases. Nature's way. The stones within us. Gall stones—Silent and noisy. Kidney stones. Don't drink inorganic mineralized water. Dolomite tablets are inorganic. What is gout? Arthritis and rheumatism. Health hints for relief and benefits. Don't let your brain turn to stone. Doomed to the human scrap pile. How the brain functions. The brain needs extra fine nutrition. Organic minerals essential to life. Minerals make the man. The alkaline or base-forming minerals. Iron, the oxygen carrier of the blood. Every mineral matters. Sodium, a powerful chemical solvent. Salt—A slow but sure killer. Overweight and dropsy. Misinformation about salt. Inorganic water turns people to stone. Bone spurs and movable joint calcification.

Calcification test. Calcified toe and finger nails. Bad posture from inorganic deposits. The curse of an aching back. The parade of the living dead. The “fad” of drinking sea water. Sea kelp—Rich minerals from the sea. Disfiguring broken capillaries. Cold feet and cold hands. Head noises, ringing in ears. Effect on the eyes. The world's greatest health secret. Let natural food be your medicine. Drink only distilled water. About rain water. How to fight hardening of the arteries. The great watermelon flush. Life expectancy—Life span. Keep young biologically. Prevention better than cure. Update on drinking water and how it affects your health. TDS [Total Dissolved Solids] and chronic disease. High blood pressure and drinking water. Water softeners and sodium equals trouble. The sad truth about chlorination. Cancers and chlorination. Miscarriages, birth defects, ? in tap water. Dangerous chemicals in our drinking water. Fluoride and cancer. Drinking safe water. Home water distilling & filtration systems. Pure water: The great life saver.

Concerning his early years: Paul Bragg says he was born on a farm in Virginia, along the Potomac River. His family got all their drinking water from a well—pure and fresh. But it was very hard water, containing calcium carbonate and other inorganic minerals from limestone. When they boiled this water, incrustations of these inorganic minerals formed inside the kettles—which eventually had to be thrown away. His grandfather, who drank this water, died after 3 strokes, while Paul was just a little boy. His body was sent to Johns Hopkins Hospital; the autopsy found that his arteries were like stone. Paul's uncle, William, was their family doctor (p. 18-20).

At age 12, Paul was put into a large military school in Virginia. His parents wanted to prepare him for West Point and a career in the military. He went to the school against his wishes and at age 16 he developed tuberculosis. He spent time in several T.B. sanitariums, where the doctors admitted they could not cure him. So his little Swiss exchange nurse took him to her hospital in Switzerland, where the great physician, Dr. Auguste Rollier (1874-1954) cured Paul, in two years, using only natural methods. Note: A pioneer in the treatment of tuberculosis by heliotherapy, Dr. Rollier's main clinic was in Leysin, Switzerland. When Paul left the Sanitarium, Dr. Rollier cautioned him to drink only rain water, snow water, distilled water, and vegetable and fruit juices.

Paul decided to live in London, England, and study biochemistry. He found a small apartment near Regent Park. But the Wilson's, his landlords were sick. So he had them go on a fast and before long they were healthy. They were his first two cases (p. 24-29).

Note: Also reprinted, with some new editions, in 1977, etc. 1989 is the date of the 25th reprint. Address: 1. N.D., PhD, life extension specialist; 2. N.D., PhD, life extension nutritionist. Both: Box 7, Santa Barbara, California 93102.

Value of exports, p. 29. Yields, p. 34, 52, 200-01, 216, 255, 262, 271, 277.

Chapter 11 (p. 398-419) is an interesting case study of "Rice production in California: The Lundberg Family Farms." The farm is located in northern California in Richvale, Butte County, about 30 miles southeast of Chico. A family partnership owned by four brothers, the farm consists of 3,100 acres. The Lundbergs produce about 1,900 acres of rice each year using largely conventional methods that include the use of chemical fertilizers and pesticides, but in somewhat less than the recommended amounts. On this land they dispose of rice straw by decomposition in the soil rather than burning. In addition, they produce about 100 acres of rice without pesticides or chemical fertilizers. They call this their organic rice because the methods they use

comply with the California organic farming laws. They have been experimenting with the production of organic rice for 18 years. The organic rice enterprise first became profitable in 1985 with a yield of 4,400 lb/acre. Rice is grown only every other year in a rotation with legume-fallow-legume, so the yield is only one-half the measured yield in a given year. Includes a bibliography of 8 references. Address: Washington, DC.

1909. Nature Farming International Research Foundation. 1989. *Entering the twenty-first century: Nature farming. Toward the establishment of sound agriculture and the promotion of healthy dietary habits*. Japan. 34 p. 30 cm. [Eng]

• **Summary:** A very interesting report about the Japanese natural and organic foods movement.

Contents: Act I: What is Nature Farming? Mokichi Okada—A Synopsis of His Life. The History of Nature Farming in Japan (with a chronology of key events from 1882—the birth of the founder, Mokichi Okada—to 1989). The Philosophy of Nature Farming and the Ideology of Mokichi Okada.

Act II: Fundamental Practices of Nature Farming. 1. Learning of the Soil. 2. Use of Mulching. 3. Utilizing Compost. 4. Key Points in Composting. 5. Development of Soil Through Crop Rotation. 6. Use of Green Manure. 7. Concepts Regarding the Control of Insect Pests and Weeds. 8. Methods to Control Insect Pests. 9. Weed Control. 10. Seeds, Seedlings and Their Varieties. 11. Animal Husbandry. Conversion to Nature Farming.

Act III, Scene i: Description of Nature Farming International Research Foundation. Description of the Three Experimental Farms. 1. The Ohito Farm. 2. The Nayoro Farm. 3. The Ishigaki Farm. Standards for Nature Farming Methods.

Act III, Scene ii: Dissemination of Nature Farming in Japan. 1. Dissemination Activities Advanced by the Foundation 2. Dissemination of Nature Farming Abroad. 3. Activities of Prefectural Branches. 4. Volunteer Activities of Consumers' Groups Local Development of Nature Farming All Over the Country. Distribution of Nature Farming Products. Diffusion of Nature Farming throughout the World.

1910. Pennington, Jean A.T.; Bowes, Anna dePlanter; Church, Charles Frederick. eds. 1989. *Bowes and Church's food values of portions commonly used*. 15th ed. Philadelphia, Pennsylvania: J.B. Lippincott Co. xiii + 328 p. 1st ed. was 1937. 2nd ed. was 1939. 10th ed. was 1966. [62 ref]*

• **Summary:** A highly valued source of reliable nutritional information. Widely used for planning nutritious institutional menus. Address: PhD, RD, Formerly Instructor of Nutrition, City College of San Francisco, San Francisco, California [Now with U.S. Food and Drug Administration, Washington,

DC].

1911. *SoyaScan Notes*. 1989. Terms related to soyfoods, soybeans, and the soybean industry: Library of Congress subject headings and call numbers (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Two different types of call numbers are used by American libraries for cataloging their books. Most larger libraries use the Library of Congress call numbers (LC numbers, which start with two letters) and many smaller libraries use the Dewey Decimal System (Dewey numbers, which contain only numbers).

The following are from the Library of Congress Subject Headings (12th ed. 1989) and the Library of Congress Classification Schedules. The first edition of Class S (Agriculture), for example, was published in 1911, and the 4th edition in 1982. BT = Broader terms. NT = Narrower terms. UF = Use for. May Subd Geog = May subdivide geographically, e.g., Soy sauce industry-Japan.

Class H is Social sciences and economics. Class Q is science. Class S is agriculture (SB is plant culture. SB205 is field crops, legumes). Class T is technology (TX includes nutrition). Class Z is bibliography and library science.

HD9000-HD9019 Natural foods industry
 Shortenings—Use oils and fats, edible.
 HD9235.S6-.S62 Soybean industry
 HD9235.S6-.S62 Soyfoods industry

The following soy-related terms have a subject heading but no LC call number: Miso industry, Natto industry, Soy sauce, Soybean flour, Soybean glue, Soybean meal, Soybean milk, Soybean products.

1912. Perelman, John. 1990. San Jirushi shoyu and tamari (Interview). *SoyaScan Notes*. Jan. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The shoyu made at the Richmond, Virginia, plant (which contains only 20-30% wheat) became available for sale in Jan. 1990. San-J does not promote this product; the company sees its identity as a tamari brewer, where they are the world's biggest company. The gold label and the black label first became available during the 4th week of February 1990. The Szechuan Sauce and Teriyaki Sauce, reformulated using American-made tamari, became available in April 1989. Tamari Lite is still imported from Japan in drums and bottled in Richmond; the company has not yet installed its desalinization equipment in America, and probably won't until at least 1991.

The tamari now brewed in America is much different in character and taste than the one particular tamari that they imported previously from Japan. They make numerous varieties of tamari in Japan, and the one imported to America had a very high solids content and is thus thicker and darker (closer to black than red), and has a much stronger flavor. After the moromi has finished aging, it has to be shoveled out of the vats; it is too thick to be sucked out. When the milder U.S.-made tamari was introduced, some of the many consumers who had been using the thicker imported product were upset. Therefore San-J is re-introducing the imported product under the name "Imported Whole Soybean Tamari: Wheat-free Soy Sauce." It will only be sold in a 20-ounce bottle. It will be a really strange looking bottle and label. The big red dot is not on the label. It will be available the third week of March 1990.

San-J is vigilant about keeping their Gold Label out of supermarkets. A little of the Black Label (made with hexane defatted soybean meal) is sold in natural food stores to any store that wants to carry it. Concerning the waste oil from making tamari from whole soybeans, San-J needs a special license to dispose of it.

San-J has gotten three types of feedback on their U.S. made products, though much less feedback than they had expected (maybe one letter every 2 weeks): (1) Some people liked the imported, thicker better than the Gold Label. (2) Some were upset that San-J would make tamari with hexane-defatted soybean meal. (3) Tree of Life now sells a real wheat-free tamari that they are probably buying from Mansan or Marusan. They are promoting it as the "real" thing, rather than a new American-made product. (4) Some are upset that grain alcohol (from corn) is being added to all San-J products as a preservative. Tamari Lite has the most since it contains less salt. The brewmaster, Mr. Yamamoto,

has worked in shoyu breweries as well.

The major brands of imported traditional shoyu are Tree of Life, then Westbrae or Eden (Marushima). Address: San Francisco, California. Phone: 415-821-4040.

1913. Belleme, John. 1990. Starting a new miso company in North Carolina (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is in the process of starting a new miso manufacturing company named Smoky Mountain Miso Shop. It will be owned by a company named Traditional Foods Inc., which he and a partner started in about June 1989. Over the shop will be a non-profit organization named Institute of Traditional Foods, where people can come to live and study food preparation (tofu, tempeh, miso, seitan, tamari) both on a home and commercial scale, for short or long seminars. He will break ground for the plant in about 3 weeks. It will be attached to his home, 2,000 square feet, Japanese style and very compact, with a capacity of about 50,000 lb/year of miso. He hopes to find 2 distributors, one on each coast: Maybe Blake Rankin of Granum on the West Coast and Macrobiotic Wholesale Co. on the East Coast. Great Eastern Sun will be a competitor. His non-compete agreements with them have expired.

John's wife, Jan Belleme, (who works for Mitoku) is doing a story for *East West* about amazake. The new editor of *Solstice*, John Mann, has decided to focus on macrobiotics, and away from the environmental focus. He would like a story on amazake (\$200). *Solstice* reaches 60,000 people. John spent the summer at an organic winery.

Note: As of June 1993, this company was never started. Instead, John started a company making traditional seitan. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

1914. Davis, Cynthia. 1990. U.S. Mills and Erewhon (Interview). *SoyaScan Notes*. Feb. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cynthia arrived at Erewhon in 1983. In April 1986 Erewhon acquired U.S. Mills, which had been founded in 1908 under the same name, U.S. Mills. They were and are a cereal manufacturing company. Their two main cereal brands were Uncle Sam's Cereal (the product that the company was founded on), and Skinner's Raisin Bran (America's first raisin bran, introduced in 1926). In effect U.S. Mills and Erewhon were merged, and U.S. Mills was chosen as the corporate name, largely since it had been around longer. Ronald L. Rossetti had acquired Erewhon after it filed for Chapter 11 bankruptcy. He was and still is head of Nature Food Centres, a chain of health food stores. Erewhon was purchased by Rossetti as an individual, not by Nature Food Centres. Contrary to what the media often said, Erewhon was never, in any way, owned by, or part of, or a subsidiary of Nature Food Centres. The misconception

(created by the media) that Nature Food Centres owned Erewhon caused real problems for Erewhon at one point. Then in Nov. 1986 Erewhon Inc. bought U.S. Mills. Ron Rossetti is presently no longer involved with U.S. Mills or Erewhon. In May 1988 Chuck Verde (who was the president of Erewhon) and Cynthia Davis acquired the U.S. Mills/Erewhon business. They are now the main joint shareholders. At that time they brought in another company as an investor. Erewhon is their brand name for the natural food industry; the product charter has not changed and they are selling to the same market. Surprisingly U.S. Mills has nothing written about their long, interesting, pioneering, and complex history. However Cynthia feels that the history of Erewhon written in Ron Kotzsch in *East West* in Feb. 1984 was an good, accurate history up to that time. Address: U.S. Mills Inc., 395 Eliot St., Newton, Upper Falls, Massachusetts 02164-1131. Phone: 617-969-5400.

1915. Klaper, Michael. 1990. Diet and the environment (Interview). *VegeScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Large-scale animal agriculture is among the main eco-destructive forces at work on the planet today. It is destroying virtually every ecosystem on which all lifeforms depend: topsoil, forests, water, atmosphere including the ozone layer, flora, fauna. It also unleashes toxic and radioactive wastes. Rebalancing our biosphere depends upon reforestation and stabilization of these other ecosystems. To do this we must change our national diet, away from a meat-centered diet, toward a more vegetarian diet. The general lack of awareness of the diet-environment link, especially among the environmental, scientific, and governmental organizations, is surprising and must now be remedied if major eco-catastrophe is to be avoided. Diet must now become a major plank in the environmental platform.

Since time immemorial, cutting the forests and replacing them with cattle grazing or fodder growing land has been the standard practice for food production. Previously, when people were few and forests seemed vast, it didn't make much difference. But today most of American agriculture is devoted to growing animal flesh, either through the animals themselves or their feed. Due to the inherent inefficiency of cycling plant foods through animals, massive amounts of feed grains must be grown to support a meat-centered diet, thus consuming the majority of fossil fuels, water, land, and energy used by American agriculture. Today, after 5,000 years of deforestation and 5,000 million people on the planet, we have now cut half the world's trees and are suffering the inevitable consequences:

1. Global warming: Cutting and burning forests, as well as the huge amounts of methane from animal manure and belching, adds carbon dioxide to the air, contributing to global warming.
2. Erosion: Exposing the topsoil to sun, wind, and water

while growing row crops leads to massive erosion.

3. Water usage: More than half the total amount of water consumed in the USA goes to irrigate land growing feed and fodder for livestock—more than is used by all the cities and industries in America. The falling water levels in rivers leads to silting, killing of wildlife, and decreased hydroelectric power generation. Falling groundwater levels lead to dry wells, encroachment of salt water into coastal water supplies, and depletion of aquifers.

4. Water pollution. Every 24 hours, the animals destined for America's dinner tables produce 20,000 million lb of waste. That is 250,000 pounds of excrement a second and twenty times as much as all humans in this country. The pesticides used in growing feedcrops and the eroded soil from those fields also adds organic pollutants to our water supplies.

5. Energy. Every day the USA imports 8,300,000 barrels of petroleum. About 12% of this, or 1,000,000 barrels goes into production of meat, poultry, and dairy products, including running irrigation pumps, farm machinery, heating and cooling factory farm buildings, running slaughterhouses and refrigeration units, and transporting animals and their products.

6. Ozone layer depletion. Chlorofluorocarbons from refrigerants and Styrofoam containers (widely used by fast food chains) are major causes of this problem. Address: 8843 Pennfield Ave., Northridge, California 91324. Phone: 818-341-0652.

1916. Fishman, Stuart. 1990. Major revision of California organic law proposed: National organic products industry to feel effects of new state legislation. *Natural Foods Merchandiser*. Feb. Inserted magazine titled Organic Times. p. 1, 16, 19.

• **Summary:** “Following the Alar scare [on apples] in February 1989 and growing supermarket demand for organic produce, lawmakers undertook a major revision of the state's 1979 Organic Food Act with input from California Certified Organic Farmers (CCOF) in Santa Cruz. The organization operates the largest certification program in California, lobbied for the 1979 act and is writing the new bill, AB 2012, in cooperation with sponsor Sam Farr, a democratic assemblyman from Santa Cruz...”

“Certification at Issue. 3AB 2012 requires certification programs to register with the state and meet strict organizational and procedural requirements. They also must provide the state with a quarterly membership list, copies of farm and processor inspection reports and an overall plan of certification procedures.”

AB 2012 At a Glance. “At 30 pages long, AB 2012 is 10 times longer than its 1979 predecessor. As proposed, the bill would: * Expand regulation of organic food certification programs. * Retain requirements that certain farming and sales information be publicly disclosed. * Triple the period

of transition from conventional to organic farming from one to three years. * Introduce a new method for approving the use of organic pesticides and fertilizers.” Address: President, Merchandising Organic Foods, Portland, Oregon.

1917. *Natural Foods Merchandiser*. 1990. 1989: The year in organics. Feb. Inserted magazine titled Organic Times. p. 1. • **Summary:** “February: National Resources Defense Council releases report titled *Intolerable Risk: Pesticides in our Children's Food*. [This focuses on the danger of Alar on apples.] Mothers and Others for Pesticide Limits launches major media campaign.

“March: Chilean grape scare—food safety becomes a major issue.

“April: Rodale Press and Louis Harris release survey showing that 84% of consumers would buy organic if it was available.

“August: Organically Grown Week gains national prominence.

“September: National Research Council releases report titled *Alternative Agriculture*, in support of sustainable agriculture.

“November: Senator Patrick Leahy (Democrat-Vermont) introduces S-1896, The Organic Foods Act, proposing a national definition of organically grown food.

“December: National organic growers association formed (Organic Farming Associations Council); Industry coalition, the Organic Foods Alliance, formed to create a voice for organic in Washington, DC.”

1918. **Product Name:** [Tofu, and Tempeh].

Foreign Name: Tofu, Tempeh.

Manufacturer's Name: Soy & Rice.

Manufacturer's Address: Via A. Canale 8/c, 10078 Venaria Reale (TO), Italy. Phone: 011-402-0380.

Date of Introduction: 1990 February.

Ingredients: Tempeh: Soya, water, *Rhizopus oligosporus*.

How Stored: Refrigerated.

New Product—Documentation: Letter and Label for Tempeh sent by Bosco Franca and Garafola Carmelo of Soy & Rice. 1992. Feb. 2.75 by 4 inches. Black on white. Self adhesive. The logo is that developed by Mitoku which states in Japanese characters “*I Shoku Dô Gen*” (Medicine and food come from the same source, or Your food is your best medicine). Store at 4°C [39.2°F]. The company began to make these products in about Feb. 1990. They now make 40 kg/week of tempeh.

1919. *Whole Foods*. 1990. Expo to celebrate tenth anniversary. Feb. p. 19.

• **Summary:** “The upcoming Natural Foods Expo West show, scheduled for March 9-12 at the Anaheim Convention Center in Anaheim, California, will mark the tenth anniversary of the annual industry trade show. It is sponsored by New Hope

Communications, Boulder, Colorado.” More than 12,000 industry members are expected to attend the 4-day trade show with some 800 exhibitor booths. There will be more than 65 educational seminars, field trips, and special events.

Note: The first NFM Natural Foods Expo was held on 29-31 March 1981 at Anaheim, California. 234 booths were sold and 3,000 people attended.

1920. Welters, Sjon. 1990. Origina, Terra Foods, FVO, OCIF, and Mercantile Development (Interview). *SoyaScan Notes*. March 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1983 Rob Jansen, a friend of Sjon’s, left Manna and founded Terra Foods in Castricum, Netherlands, as an import / export company in Holland. Terra Foods, formerly a commodity company and owned by a holding company named Centaur, created a new entity/dba/company named Origina (pronounced or-uh-GEE-nuh) through which it could enter the retail food consumer market, exporting foods (from companies such as Witte Wonder) to West Germany, the USA, etc., and importing foods from the USA (as from Mercantile Development). Origina is also sometimes used as a brand name. Note that the name Witte Wonder does not appear on exported products. One brand is Luna.

Mercantile Development, an American company in Bridgeport, Connecticut, founded by Michael Marcolla (an American) and Robert Shapiro. Mercantile started the FVO (Farm Verified Organic) program in Europe about 10 years ago when he found that he was exporting a lot of American commodities to Europe. Because a certifying agency cannot be connected to a commodities trader, FVO was made separate from Mercantile. FVO now has a very extensive program in America, as well as a newsletter. The owner of Mercantile went to school at a Waldorf school and is very interested in the anthroposophic and biodynamic methods of farming. FVO and OCIF are certification programs used mostly for commodities that are accepted in Europe as being really organic. European standards used to be tighter than those of the USA but the U.S. is now catching up. All U.S. products in Europe must have a seal of certification. Many European soyfoods (especially tofu) manufacturers use certified organic soybeans grown in the USA. In fact, soybeans were one of the first certified organic commodities to be imported to Europe from the USA on a large scale. FVO started its program in large part because of soybeans. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

1921. Fehlberg, Eric C. 1990. Seventh-day Adventist health food companies in Europe (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter dated 24 May 1990 clarifying details.

• **Summary:** There are three major Seventh-day Adventist (SDA) food factories in Europe, each owned by the church: DE-VAU-GE in West Germany, Nutana in Denmark, and Granose in England. There are smaller factories in Spain, and Switzerland. All these companies are owned by the SDA church. The leading Adventist food companies, ranked in descending order of annual sales, are: 1. DE-VAU-GE, established 1899 in West Germany. They are by far the biggest in Europe. They manufacture a total of 257 products. DE-VAU-GE began making its own tofu in Jan. 1986; before that it purchased tofu from a Belgian soymilk company [Note: actually from Heuschen-Schrouff in the Netherlands]. When Michael Makowski took over as managing director in about 1972-73, company sales were about US\$3-4 million. By 1983 sales were about \$18 million. Since then growth has been fantastic. 1989 turnover was DM 84 million (US\$49 million). This is due to both excellent management and the German interest in natural, health, and vegetarian foods. 2. Nutana, est. 1898 in Denmark. They are about half the size of DE-VAU-GE. Under the management of Bent Nielsen, who was there until 3 years ago, the company grew rapidly. Since 1987 growth has flattened, but there is great potential for future growth. 3. Nutana in Norway (Nutana Norge), formerly Dagens Kost, est. 1970. They were established as a marketing company for Nutana, Denmark, and they sell all the soyfoods made by Nutana, Denmark. They also manufacture 55 products, but they import and wholesale 321 products. All of the imports come from European Adventist companies. 4. Granose Foods, est. 1899 in England. They manufacture 39 products and distribute 98 more (mostly from Nutana or DE-VAU-GE). They have been a manufacturer since 1899, and they built a new food plant in 1989. Their business is now growing rapidly. 5. Nutana in Sweden (AB Svenska Nutana) was renamed in 1987. It was formerly named Edakost Food Company, Sweden, est. 1970. 6. Nutana in Finland, formerly Finn-Nutana, est. 1979. 7. Pur-Aliment, est. 1928 in France. They are not a food manufacturer; purely marketing. 8. PHAG Food Factory (Fabrique de Produits Dietetiques), est. 1895 in Switzerland. The small factory produces 40-50 tons of food a month. 9. Granovita Spain, was founded and began manufacturing in about Aug. 1985 in Valencia, Spain. They do not produce any soyfoods at all, but they market soy products made by DE-VAU-GE in West Germany and by Nutana in Denmark. 10. Nutana in the Netherlands, founded in 1986. They are presently selling all the products produced by Nutana of Denmark as well as 5 other products: Vitanex (Sandwich cream), Rondolettes (Chickenlike or beeflike flavor), Snackers (Soy sausages), Boulettes (Dinner balls).

The Austrian Food Company, founded in 1976, was a restaurant rather than a food manufacturer; it was closed in 1987.

Granose and DE-VAU-GE were both importing foods from Loma Linda in the USA. But now that Loma Linda

has been sold to Worthington Foods, it is not clear what will happen to these imports. Today, the various Nutana companies are independent, but there is much talk of bringing Nutana in Norway and Holland together with Denmark. Nutana has always been behind the expansion of SDA food work in the Scandinavian countries. Using the common name Nutana greatly facilitates marketing.

The European food companies have grown at different rates, largely dependent on the effectiveness of each company's management. The trend has been generally up. The highest growth rates in the past 5 years have been shown by Granose in England (though it started from a smaller base), followed by DE-VAU-GE in West Germany. Pur-Aliment and Nutana have had a bit of a struggle.

All of these companies pay a portion of their profits back to the church. They are encouraged to pay about 20% of profits back to the church, but some pay almost 50%. This is similar to the dividends paid by secular companies. Fehlberg believes that tofu will be the growth food of the future; it has great growth potential that has not yet begun to be realized. Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

1922. Fehlberg, Eric C. 1990. Thoughts on Loma Linda Foods, its acquisition by Worthington Foods, and the health foods industry in America (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Worthington Foods purchased Loma Linda Foods (LLF) from the Seventh-day Adventist Church in Jan. 1990. Loma Linda Foods, unlike most other Seventh-day Adventist companies worldwide, tended historically to target its products to Seventh-day Adventists. Within North America there are very, very few respectable SDA businessmen. That is the problem. "Loma Linda has been working since 1906 with their eyes blindfolded. Too often, instead of using a businessman to head the program, the men in their wisdom have elected to install a broken down minister, and expected him to make a roaring success of it."

A very good businessman, George T. Chapman from Australia, ran LLF from 1938 to 1963. The company did very well financially under his leadership. Since 1963 the company has had a series of managers who lacked business experience; the result was ongoing financial problems. In June 1984 Mr. Fehlberg went from his position at the General Conference to Loma Linda where he turned the company around. Fehlberg ran LLF for about 2 years, during which time it went from a substantial loss to a very profitable company. Mr. Pizzaro was brought in Nov. 1984 and has kept it profitable. He is a very conservative man with a background in banking. He was able to hold LLF together but was not inclined to take the risks to make it really take

off.

The church first wanted to sell off the infant formula part of the company because of the high cost of liability insurance. The FDA are really down on infant formula foods. If anything goes wrong, there is no end to the strife. LLF had one small recall due to a small shortage of vitamin A—from dissipation. It was very expensive. Fehlberg understands that but does not understand at all and strongly disagreed with the sale of LLF. "I talked myself hoarse on the committee opposing the sale but I didn't win. I am not happy that it ended up in the hands of Worthington Foods. Their financial report over the past 5 years is not that strong. The last year has not been a healthy year. I hope they can survive. Loma Linda will definitely help them survive by giving them a lot of extra new sales with no extra administration or marketing costs. Now that they have a monopoly, they may relax their standards. I believe that once the 5-year non-compete term expires, you'll get an influx of products into the United States from Adventist companies overseas that will make it very difficult for Worthington to operate—unless they can improve things. Fehlberg prefers the flavor the Australian meat analogs, which are less highly flavored and easier to digest.

Fehlberg feels that the USA is 20 years behind many other countries (Australia, West Germany, Japan) in food processing and storage techniques, largely because of Food and Drug Administration (FDA) restrictions. One area where the USA lags behind is in retorting of food products in plastic film containers. We tend to retort foods too long, and do not have foods retorted in sausage-type pouches (e.g., tofu sausages), which require no refrigeration. The FDA is afraid of botulism in such protein foods, so they require that the foods be frozen. In Australia, West Germany, and Japan these foods are refrigerated, but Adventist tests show they can be stored at room temperature for 6-12 months, or more. If Worthington's frozen meatlike products could put in plastic containers made of this special film (which is available in America) there would be major cost savings in factory storage, transportation, and retail storage. Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

1923. Storup, Bernard. 1990. Huegli gets involved with tofu and natural foods in West Germany (Interview). *SoyaScan Notes*. March 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** About 2 months ago Huegli (actually Bernard incorrectly said Nestlé instead of Huegli) purchased Yamato, the second largest German tofu manufacturer, owned by Klaus Gaiser. Huegli also purchased the largest health foods distributor in West Germany. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.23.66.

1924. Karas, Thomas. 1990. The Reform House market and the natural foods market in West Germany. The German Soyfoods Association (Interview). *SoyaScan Notes*. March 14. Conducted by William Shurtleff of Soyfoods Center.

- **Summary:** There is a clear distinction and a big difference between these two segments of the natural/health foods market in West Germany. The Reform House movement is much older and the stores are like U.S. health food stores. There are about 2,000 to 3,000 Reform Houses (Reformhaeuser) that have annual sales of DM 1,000 million. There are 1,500 to 2,000 natural foods stores (Naturkostlaeden) with annual sales of about DM 700 million, or about 41% of the total natural foods market. Before a product can be sold at the Reform Houses, it must have the “Neuform” Reform House logo. It is difficult to get this because Mr. Heirler and others keep out products that will compete with theirs. On the other hand, the natural foods stores have much higher quality standards. Most important, all raw materials must be organic if possible. The Reform Houses have not traditionally been interested in organic ingredients. But now they are moving toward organic.

Another problem is labeling. To sell in natural food stores, a company’s products need to meet a higher standard, and they need to be inspected. When a company has the Neuform (Reform House) logo on their products, they must make another label for each product without the Neuform label before they can sell those products in the natural food stores. So to sell in both of these 2 markets requires two sets of labels, which is expensive. Thomas is working to bring these two segments closer together. Now, when a food company starts, they must basically decide whether they want to sell in the Reform House or the natural foods market. Very few companies try to sell in both.

In about 1984 in West Germany a natural foods association named Bundesverband Naturkost (BN) was started. Its members included natural food manufacturers, distributors, and retailers. This structure did not work well, since large companies tended to dominate it and the different segments had different interests. So from 1987 to 1989 a new natural foods association named BNN (Bundesverband der Naturkost und Naturwaren) was established. BNN has its own new logo, and only 3 members, each of which is an association. The first is a food manufacturer association (BNNH, Hersteller; about 35 members. Karas is on the board of directors), the second is a food wholesaler association (BNNG, Grosshaendler; about 35 members), and the third is a food retailer association (BNNE, Einzelhaendler; 700-800 members). Within the manufacturers’ association (BNNH), an association only for manufacturers of organic soyfoods, named BAG Soya (Bundesarbeitsgemeinschaft biologische Sojaprodukte) was founded in early 1989. The soyfoods association also develops marketing materials for its own use. The headquarters of BAG Soya are at Huetlin Str.,

Konstanz, West Germany. Kurt Miller, a small tofu maker at Bodensee is Director.

BNN certifies many certification associations (MDI, OCAA, which must be members of IFOM) or farmers and food producers to a very high quality standard. Manufacturers are inspected once a year by an inspector from BNNH.

The Reform Houses are in some ways similar to America’s health food stores but there are basic differences. Reform Houses are less oriented to food supplements/pills (vitamins, minerals, protein powders) and more oriented to natural food medicine and medicinal herbs. But nowadays in Germany the two sides are coming closer together, and modern Reform Houses have a good selection of natural foods. Address: Bochumerstr. 92-104, D-4270 Dorsten, West Germany. Phone: 2362-26801.

1925. *SoyaScan Notes*. 1990. Low-acid Tetra Brik aseptic packagers in the USA (Overview). March 14. Compiled by William Shurtleff of Soyfoods Center.

- **Summary:** There are three such packagers west of the Rocky Mountains: (1) Real Fresh in Visalia, California (near Fresno) is the oldest. The Graves family started the company and its pioneering work with UHT and aseptic packaging in the 1950s. A talk with Real Fresh reveals that: In June 1988, Real Fresh was bought by a French company named Bongrain, which basically threw out the whole Graves family. In recent years the family had been losing money. (2) Pacific Foods in Tualatin, Oregon, which started in 1989 to package soymilk. (3) Gossner in Utah.

In the eastern USA, American Soy Products in Saline, Michigan, makes and packs Edensoy.

1926. Weigel, Linda. 1990. Recent developments at Solnuts, Inc. in Hudson, Iowa (Interview). *SoyaScan Notes*. March 19. Conducted by William Shurtleff of Soyfoods Center.

- **Summary:** Solnuts B.V. in Tilburg, the Netherlands, purchased this plant and Edible Soy Products, Inc. (makers of Pro-Nuts) in Dec. 1986. The “Sol” in Solnuts is pronounced like the “sol” in “solvent” or “soluble.” Solnuts B.V., having the exact same process and product, wanted to expand to the USA. So they found out who Pro-Nuts’ customers were, cut prices to take away most of Pro-Nuts’ business, and then bought Edible Soy Products from Miller Rowe (controller), renaming it Solnuts, Inc., a fully owned subsidiary of Solnuts B.V. The president of Solnuts, Inc. is Wout Coster who resides in Washington, DC.

Linda began work at the end of October 1987, hired by Jim Becker, who originally designed this plant in Hudson, Iowa. The full force sales effort began in early 1988. When she arrived, the company had been stagnant, with few projects underway. Now Solnuts are actively being tested as an ingredient in about 5,000 R&D projects, some of them by America’s largest food companies such as Kellogg, Nabisco,

and Continental Baking. All are very interested. Typically, it takes about 3 years to get a product through R&D at major corporations. She set up a nationwide broker-sales network. Sales grew 18% in 1988, and 20% in 1989. The future looks extremely bright. The present capacity of the plant is 1 million lb/month and production is near capacity. The only other company making a dry roasted soynut is Sa Bean in Nebraska (formerly Hawaii), which has a patented process. All of this company's products are sold in bulk under the Solnuts name to food processors in 25 or 50 lb multiwall paper bags; 90% of the products are in 50 lb bags. They have no small consumer packs. You will never see the Solnuts name on a finished product. The main applications are confections (25% of the total; candy bars and turtles; a turtle is a piece of chocolate-coated candy the size of a half dollar filled with caramel, chocolate, and nuts), dry salad toppings (25%; such as McCormick/Schilling), breads (20%), cookies (20%), and trail mixes (10%). The main sales point is health (low fat, low calories, high protein) not price. Solnuts, which have roughly half the fat and twice the fat of other nuts, sell for about the same price as peanuts but for about one-third the cost of tree nuts, such as almonds, pecans, or walnuts, etc. Also, Solnuts are very expanded in texture so you get 20-30% more volume per unit weight than peanuts. Concerning flavoring, 75% of the products made are plain (halves and diced; diced in cookies, candies, and bread) and 25% are seasoned (incl. 20% salted, 3% sour cream and onion [used in a trail mix], plus a tiny amount of barbecue, etc.). The remaining 2% are "krunch products." These are diced soynuts that are coated with sugar or honey and flavored, such as Honey Nut Krunch and Butter Caramel Krunch, used as toppings for pastries and cakes. All of the products made in Tilburg are also made in Hudson, Iowa. But 50% of the European products are plain (mostly diced rather than halves) and the other 50% is the krunch products.

Concerning oil roasted soynuts, Lee Seeds has a little plant in their garage in Inwood, Iowa; Linda has been there. GNC also makes their own soynuts.

Update. 1993. March 26. Solnuts was acquired by Specialty Food Ingredients in Dec. 1991. This has made no significant change in operations in Iowa. Many of the big potential food processors who were testing Solnuts several years ago are now using them in significant quantities. They are typically listed on the label as "toasted soy," "soya," or "soynuts." Address: Sales Manager, Solnuts Inc., 711 Seventh St., Hudson, IA 50643. Phone: 319-988-3221.

1927. *SoyaScan Notes*. 1990. Great need for a soyfoods newsletter or magazine published in Europe (Overview). March 30. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** With the soyfoods industry and market expanding rapidly in Europe, there is a great need for a European-based publication to cover the subject in depth. It

should be written only in English and cover all of Europe, including Eastern Europe. One person who is interested in this project is Bernard Faber (pronounced FAH-bur, rhymes with "clobber"). A close friend of Sjon Welters, he started the tofu shop at Manna, and is presently in charge of importing the Muso products for Akwarius Almere in the Netherlands. He wants to start his own business, in the information and publishing field, and is considering doing a soyfoods publication. He speaks good English, plus French. He also has the advantage of being Dutch and therefore flexible and not wanting to insist on using his own language.

Contact: Bernard Faber, Craft International Consultants, Zeepezierstraat 7, 1835 GK Alkmaar, Netherlands. Phone: +31 (072) 622.281. Fax: (072) 622.281

Letter (fax) from Sjon Welters. 1990. April 29. "I discussed the possibility of the 'European Soyfoods Newsletter' further with Bernard Faber. He too feels the time is right to start an international publication in this format and committed himself as publisher and editor of a soyfoods quarterly. Until enough funds are available to buy a computer, I will be responsible for the production part of it, except for the actual printing and mailing which will occur in Holland. This publication will be a joint venture between Bernard and me. The most likely first date of publication will be somewhere in June 1990.

"Would you be willing to support this new undertaking by supplying a list of potential subscribers? We could pay you back by making our mailing list available to you for instance."

Note: In May 1990, less than 2 months after the above was written, *SoyaFoods*, edited in England by Heather Paine, started to be published again after 4 years of inactivity, with the support of the American Soybean Assoc. in Belgium.

1928. Ontario Soybean Growers' Marketing Board. 1990. A profile of the Canadian soyfoods market—Characteristics and potential. Box 1199, Chatham, ONT N7M 5L8, Canada. vi + 40 p. March. 28 cm. Spiral bound.

• **Summary:** Contents: 1. Introduction: Background, study objectives. 2. Research procedures: Data limitations, data collection (data sources). 3. The soyfood market: Soyfood production and utilization, domestic production, imports and exports (introduction, whole soybeans, soy flours and meals, soy oil, soy sauce, protein substances, cream and other substances, bran & soy hulls, soy meal oil cake), balance, conclusions regarding opportunities.

4. Soybeans for food purposes: Natto beans (background, market characteristics, market potential), whole bean soyfoods (introduction, soynuts, full fatted soy flours, soymilk, tofu, soy sprouts, tempeh, miso, natto, soy sauce), foods from soy ingredients (introduction, defatted soy flakes, soy protein concentrate, soy protein isolates, textured soy protein, consumption and imports). 5. Organic soyfoods: Introduction, organizations (major players, labelling

requirements, certification), organic soybeans, organic soyfoods, market opportunities, recommendations.

6. Market estimates: Introduction, conversion rates, market characteristics (introduction, ethnic characteristics, immigration trends, implications), soyfood consumption (production). 7. Soyfood products: Introduction, new products (whole bean products, products from soy components), existing products (products with potential for growth). 8. Marketing strategy: Introduction, respondent requests (background), market opportunities (traditional soyfoods, new products), systems development (system information needs, human resources, production research), institutional needs.

This study was commissioned by the Ontario Soybean Growers' Marketing Board to provide a description of the Ontario soyfood industry. "Production and utilization: In the 1988 crop year, approximately 1.12 million tonnes of soybeans were produced on 1.28 million acres in Ontario. Approximately 86% of the soybeans were sold through the Board, with the remainder being fed or retained on the farms where they were grown. In 1988, 860 thousand tonnes of soybeans were crushed in Canada to produce soybean meal and soy oil, and 272 thousand tonnes were exported.

"Imports and Exports: Canada had a negative balance, a deficit, of almost \$190 million in the value of soybeans and soy products traded. This is just over half a million dollars per day. Our largest single area of exports is whole soybeans for human foods. The percentage of these beans going to the major markets in 1988 were: USA, 37%; Pacific Rim Countries, 34%; and Europe and other 29%. Our greatest imbalance in exports and imports is in soybean meal or oil cake. Canadian crushers are unable to maximize their sales of oil cake because of difficulties in selling surplus soybean oil in the US. Soy oil being sold into the US presently faces a tariff of 18% which is decreasing at the rate of 2.25% per year as per the Canada United States Trade Agreement...

"Institutional development: We suggest the Board initiate the establishment of a Soyfood Development Association similar in structure and function to the Canola Council of Canada... There is a need to begin to bring all industry stakeholders together to systematically identify problems, information and research needs; develop data bases; and cooperatively promote the soyfood industry."

Soybeans for food purposes: The total volume of soybeans consumed as soyfoods in Vancouver (BC), Toronto (Ontario), and Montreal (Quebec) was estimated at about 6,000 tonnes, and imports were estimated to be equivalent to 8,000 tonnes of soyfoods.

Miso: One large Vancouver producer and one Toronto producer estimated that the volume of soybeans used to make miso in Canada is only about 35 tonnes/year.

Modern Soy Protein Products: Soy flour, concentrates, isolates, and textured soy protein products. Roughly 2,400 tonnes of soybeans are used in Canada for the production

of these products, and 5,600 tonnes of soybeans are used to make the imported products (only bakery flour and extruded flour are made in Canada). Almost 1,000 tonnes of soy protein concentrates and isolates, and 400 texture soy proteins were imported, 83% from the USA. Total exports were 800 tonnes, of which 578 tonnes went to the USA. Soy flour (full-fat): The term "flour" generally signifies that the material has been ground finely enough to pass through a 100-mesh screen. Only relatively small volumes of full-fat soy flours are used directly as human foods. Some are used in bread, crackers, and pastry products. 5 companies in Canada make 1,538 tonnes of soy flour worth \$495,000.

Natto: Canadians sell roughly 8 to 10 thousand tonnes of natto beans in Japan each year. Natto-type beans are "created by screening out the small beans from among regular food grade soybeans which have white hilums" (p. 15). In Japan about 100,000 tons/year of soybeans are used to make natto. Recently, Canada (via 3 companies—First Line Seeds, W.G. Thompson, and King Grain) has supplied about 10% of this market. Ontario produces about 8,000 to 10,000 tonnes of natto beans. Competition is expected to increase from U.S. seed breeders.

Soymilk: There are presently no large Canadian soymilk manufacturers. A plant is being built by an international trading company near Vancouver (YHS Pacific Fruit Concentrates Ltd., owned by Yeo Hiap Seng). It will supply both the local market and the Western U.S. market when it goes on stream later this year. A high proportion of imported soymilk is organic. Two brands account for 3/4 of all imports: Edensoy and Vitasoy. A high proportion of all soymilk imports are certified organic. This emphasis makes it difficult for Canadian producers to compete because of the shortage of organic soybeans in Canada. Consumption of soymilk is increasing at about 10% a year. Prices range from \$1.50 to \$2.75 per liter, with the organic product commanding the higher prices. Just under 100 tonnes of soybeans are used to produce soymilk in Canada: Vancouver 42 tonnes, Toronto 30 tonnes, Montreal 25 tonnes, plus imports 240 tonnes. 1 kg of soybeans produces 16.5 kg of soymilk.

Soynuts: The volume of soynuts made in Canada is quite small. One Toronto company [Grove Country Foods Canada, Inc.; they were in business 1-2 years, but were out of business by Jan. 1991], which began operation in Nov. 1988, sells a line of roasted nuts, which are roasted in the USA and chocolate-dipped in Ontario. Production was only a few tonnes in 1989 and is estimated to be about 10 tonnes in 1990.

Soy sauce: In 1986, according to Statistics Canada data, 2,503 tonnes of soy sauce were produced by 6 firms. The value was \$2,161 per tonne for a total of \$5,411,000. In 1988 Canada imported 5,680 tonnes of soy sauce valued at \$4 million, primarily from China, the United States, Hong Kong, and Japan. Exports were 58 tonnes valued at \$65,000.

The major Canadian producers are China Lily and Sun Fresh in Toronto, Wong Wing and VH in Montreal, and Golden Dragon in Vancouver. The value of Toronto production is currently estimated to be about \$5 million.

Soy sprouts: One Toronto manufacturer uses 20-25 tonnes of soybeans per year.

Tofu: About 3,300 tonnes of soybeans are used to produce tofu in Canada, more than any other soyfood. The volume of soybeans used is estimated at 1,400 tonnes in Toronto, 1,200 tonnes in Quebec (when a relatively large operation in Hull [La Soyarie, Inc.], near Ottawa, which exports to Ontario is included), 625-700 tonnes in Vancouver, and 125 tonnes for imported tofu. 1 kg of soybeans produces 2.4 kg of tofu.

Tempeh: Only about 33 tonnes of soybeans are used to make tempeh in Canada, and an estimated 15-20 tonnes in Ontario. Imports are relatively small. 1 kg of soybeans produces 1.6 kg of tempeh. Very few firms produce tempeh in Canada. One producer claims to have over half the Ontario market. A major distributor suggested they sold 4-5 times as much tofu as tempeh.

Soybean crushing: Since 1986 the number of firms crushing soybeans and producing soy oil has decreased from 3 to 2 [Central Soya owns two plants; in 1990 they bought the Canadian Vegetable Oil Processing (CVOP) plant in Hamilton, Ontario, formerly owned by Canada Packers Inc. They purchased Victory Soya Mills in Toronto in early 1985. So now 2 firms own 3 plants]. In 1986 the three plants made 95,108 tonnes of crude soy oil worth \$57,271,000. Two firms made deodorized soy oil, but the volume and value were confidential. Less than \$2 million of any type of soy oil is imported.

Consumption of soyfoods in Canada is strongly linked to Asian-Canadians. A table (p. 32) shows that according to the 1986 census, there were about 444,000 people of East- and Southeast Asian origin living in three major Canadian cities: Vancouver (155,105 people comprised 11.2% of the city's population), Toronto (234,325 people comprised 6.8%), and Montreal (55,585 people comprised 2.4%). Thus Toronto was by far the largest market, but Vancouver had the highest density of Asian-Canadians. A similar table (p. 33) updates the previous table to 1988. Immigration has increased sharply since then.

Note: This is the earliest document seen (Feb. 2002) that uses the term "food grade" (or "food-grade") in connection with Canadian soybeans (see p. 15). Address: Chatham, ONT, Canada.

1929. Price, Caroline. 1990. Food for thought: Natural food is more than nuts and berries. It also makes dollars and cents for state firms. *Michigan Business* 7(3):24. March. Section 1.
• Summary: Apple Valley Market, a natural foods and vegetarian supermarket in Berrien Springs, Michigan, is operated by Andrews University and employs about 100

people. They sell no meat or meat products in the store and offer more than 500 bulk food items. The store makes its own bread, which it distributes widely.

Wysong Medical Corp., a 10-year-old company based in Midland, Michigan, makes foods and supplements for animals and people.

The last section is about Eden Foods and American Soy Products. Soymilk is Eden's best-selling product. Ron Roller, vice president and general manager of Eden Foods, says the company sells about 100 truckloads of soymilk each month, has 83 employees, and does over \$20 million in sales annually—from all products.

1930. **Product Name:** WestSoy Lite: Non Dairy Soy Beverage [Plain, Vanilla, or Cocoa].

Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor). Subsidiary of Vestro Natural Foods.

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990 March.

Ingredients: Vanilla: Water, whole organic soybeans*, brown rice syrup (brown rice, water), natural vanilla flavor with other natural flavors, xanthan gum (vegetable gum), sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 33.8 fluid oz (1.06 quart) 1 liter. Combibloc Aseptic carton. Use by 25 Oct. 1991.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Three products with Labels purchased in Lafayette, California. 1990. Vanilla and Plain. "Only 1% fat."

Note: This is the earliest commercial soymilk product seen (July 2013) with the word "Lite" on the front panel (one of two products). It is also the earliest low-fat soymilk seen. Such products are typically made by mixing 1 part regular soymilk with about 1 part water—a practice known as "watering" that might be illegal with most other beverages. So far as we know, no one has ever found a way of removing the fat from soymilk.

1931. Marshall, Philip. 1990. Publications in English that cover the natural/health foods trade in Europe (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• Summary: The two main English-language publications, both based in England, are Natural Food Trader (West Byfleet, Surrey) and Health Food Business. Both are quite good. Natural Food Trader is more broad based with its focus on foods. They have just started to look beyond the UK to the Continent. Every other month they plan to take a look at the market and new developments in one other European country. So they want to become more of a European magazine.

Health Food Business tends to be more centered around the food supplements. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

1932. Shimizu, Teruo. 1990. Recent developments at Miyako Oriental Foods (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Miyako is presently making about 900 metric tons/year of miso, making them the largest miso manufacturer in America. This is up 30% compared with three years ago (when the dollar/yen exchange rate changed dramatically), but there has not been much increase during the past 2 years. About 80% of sales are to the Asian-American market (including small exports to Japanese in Mexico), and 20% to the natural foods market. Westbrae, a former customer, is now buying their miso from Canada. They are now trying to increase their sales to the Korean-American market. The younger generation of Korean-Americans finds the flavor of Korean miso to be too strong. They (and some Korean restaurants) like to mix equal parts of Miyako rice miso with Korean miso. Some Korean restaurants have switched to using only Japanese miso. One reason is that the quality of Korean miso is inconsistent.

They are selling quite a bit of dry koji to Grainaissance and to Cedarlane, both of whom use it to make amazake. Two years ago Miyako purchased an expensive, automatic, computer-controlled rotary koji fermenter from Nagata Brewery Machinery Co. (the biggest company; they also sold such a machine to Takara USA, the sake maker). It is working very well for them. The only other manufacturer of such fermenters is Fujiwara in Okayama. Address: Vice President, Miyako Oriental Foods Inc., 4287 Puente Ave., Baldwin Park, California 91706. Phone: 818-962-9633.

1933. Muso Co. Ltd. 1990. Muso product manual: Foods from Japan. Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. 62 p. Catalog. April. 30 cm. [Eng]

• **Summary:** This English-language catalog describes Muso's natural-food macrobiotic products that are exported to the West. There are 8 pages of color photos at the front, and many flowcharts and recipes in the body of the catalog. Interesting color photos include: Shoyu fermentation room. Spreading moromi before pressing to make shoyu. Hatcho miso aging room. Drying kombu and cultivating nori on nets. Umeboshi and brown-rice vinegar. Shiitake mushrooms growing on logs and huge kudzu roots.

Contents: Shoyu (organic, low salt), tamari (wheat-free soy sauce), miso (Hatcho, barley, rice, white miso, brown-rice miso, awase miso [mixed miso], buckwheat miso, unpasteurized miso [nama miso]), seaweeds, Japanese pasta, wheat free pasta (incl. kudzu noodles), Japanese tea, other beverages, soymilk, amazake, ume/plum products (incl.

umeboshi), Japanese pickles, dried foods (incl. kudzu root starch, shiitake mushrooms, koya tofu, fu [gluten cake]), condiments (incl. tekka miso, *nori no tsukudani*, natto miso [miso condiment]), seasonings, instant foods (incl. brown rice mochi, yomogi mochi, kibi mochi, yaki mochi, abekawa mochi with kinako, cooked brown rice, ramen [Chinese style noodles], instant miso soup), crackers and chips, barley malt syrup and rice malt syrup, food supplements (plum balls, kombu balls), adzuki beans, black soybeans, nigari. Address: Osaka, Japan. Phone: 06-942-0343.

1934. *Ann Arbor News (Michigan)*. 1990. State sues businessman [Michael Potter of Eden Foods] for cost of imprisonment. May 15.

• **Summary:** The state of Michigan is suing Manchester businessman Michael Potter and his corporation, Eden Foods, for approximately \$125,000 to cover the expected costs of his imprisonment. Attorney General Frank J. Kelley and State Treasurer Robert Bowman said they are filing the suit in Washtenaw County Circuit Court. Michigan's Correctional Facilities Act calls for convicted felons to pay for their food, board, and medical costs whenever possible. Potter, age 40, was found guilty in 1989 of committing manslaughter in the death of his business partner, Clifford Adler, age 33. Adler was killed near Clinton, Michigan, on 13 April 1988, while he was a passenger in a car Potter was driving after drinking. Potter is at Chippewa Regional Correctional Facility in Kincheloe. Ann Arbor attorney Michael Moran represented Potter at the trial.

1935. Nordquist, Ted. 1990. The tofu market in Scandinavia (Interview). *SoyaScan Notes*. May 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** There are three tofu manufacturers in Sweden. Aros in Sweden is the biggest. Aros started making commercial tofu in Feb. 1981. By 1983 production had grown to 500 kg/week and they began vacuum packaging. By 1984 they were making 800 kg/week, and by Jan. 1985 tofu production had grown to 1,750 kg/week. In early 1987 they introduced the Tofu Line brand for all of their soy products, and they emphasize this brand in their marketing. Now they use about 900 kg/week of soybeans (with a yield of 2.2 or 2.3) to make about 2,000 kg/week of tofu. Much of this tofu is used in second generation products. Sales are growing in the regular chain stores, but sales to health food stores have been dropping over the past few years. Many health food stores are going out of business. There was a lot of negative publicity about their high markups on some products, some questionable products (such as shark's liver oil touted as a cure for cancer), and the fact that the largest chains were owned by pharmaceutical companies that were making big profits. Aros produces 90-95% of all tofu sold in Sweden, Norway, and Finland. The rest consists of imports: a little bottled tofu from Lima in Belgium and canned tofu

from Nutana in Denmark. Growth of the tofu market over the past few years has been slow. The main growth has been in second generation products. Over the past 6 years, 99% of Ted's energy has gone into the soy-base project and this has prevented him from working on tofu.

But now many exciting things are starting to happen with tofu in Sweden that make its future look bright. Hans Klimming is the chief cook for the largest conference center in Gothenburg (Göteborg), which serves 1,500-2,000 lunches or dinners at a time, is now serving lots of tofu—and promoting it strongly. He employs a Thai cook who is developing the dishes using Aros' tofu. Klimming has gone to Dagab, Sweden's largest wholesaler for restaurants and hospitals, and urged them to sell tofu throughout Sweden. Ted is now working with Klimming to develop a cookbook containing bulk tofu recipes. Klimming has also gone to Sweden's strongest supermarket chain, ICA (each store is a franchise, 99% owned by the owner), and asked them to publish and carry this cookbook in 1½ to 2 years. Presently Aros' regular tofu is sold only in a few ICA and Konsum stores in Aros' own distribution area—where they deliver themselves.

The second tofu maker in Scandinavia, Urten's Tofu in Soeborg, Denmark, is a fairly small company that supplies Nutana in Denmark with their tofu. Nutana in Denmark is a huge industrial plant that makes mainly frozen foods but sells them primarily in Scandinavia, especially Sweden. They have 2 canned tofu products and last year they introduced a frozen dish containing tofu cubes. Urten's Tofu also sells tofu as such on a fairly small scale. Nutana does not sell any tofu as such. Urtekraemmeren in Copenhagen, which owns Urten's Tofu, is mainly an importer of biodynamic products. Making tofu is a small side business for them.

Aros sales are continuing to grow, even though Ted is spending most of his time away from the business with Trensums. Address: Aros Sojaprodukter, Bergsvägen 1, S-19063 Orsundsbro, Sweden. Phone: 0171-604 56.

1936. Fehlberg, Eric C. 1990. Re: List and activities of Seventh-day Adventist health food companies worldwide. Letter to William Shurtleff at Soyfoods Center, May 24. 6 p. Typed, with signature on letterhead.

• **Summary:** For each of the following companies is given the date of founding, date manufacturing started, and the soy products presently manufactured: Granovita, Spain. Nutana, Holland. Nutana, Norway. Nutana name changes. Austrian Food Company, DE-VAU-GE, West Germany. Sahm Yook Foods, Korea. Sanitarium Health Food Company, Australia (3 pages).

Lists (with addresses) the following companies: Sanitarium Health Food Company in Wahroonga, NSW, Australia; DE-VAU-GE Gesundheitswerk GmbH in Lueneburg, West Germany; San-iku Foods in Sodegaura-machi, Kimitsu-gun, Chiba-ken, Japan; Korean Food

Factory (Sahm Yook Foods) in Choongchungnam-do, South Korea; Alimentos Integronaturales y Panificadora la Carlota in Montemorelos, N.L., Mexico; Produtos Alimenticios Superbom Industria e Comercio Ltda. in Sao Paulo, Brazil; Alimentos Granix in Florida, Buenos Aires, Argentina; Nutana Health Food Company in Bjaeverskov, Denmark; AB Svenska Nutana in Rimbo, Sweden; Granose Foods Ltd. in Newport Pagnell, Bucks, England; Pur-Aliment Food Factory in Clichy-Cedex, France; PHAG Food Factory in Gland, Switzerland (Note: PHAG is an acronym for Produits Hygiéniques Alimentaires Gland); Egypt Food Factory in Heliopolis, Cairo, Egypt; Glaxo India Limited in Bombay, India; Westico Foods Ltd. in Mandeville, Jamaica; Industrias Covac S.A. in Alajuela, Costa Rica; South China Island Union Mission in Hong Kong (3 pages). Address: Director, International Health Food Assoc., Seventh-day Adventist General Conference, 12501 Old Columbia Pike, Silver Spring, Maryland 20904. Phone: 301-680-6674.

1937. Daenzer, Walter. 1990. Reform Houses, and the Biona and Neuform labels (Interview). *SoyaScan Notes*. May 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Biona is a trade association of Reform stores that is quite old—probably 50-100 years old. It was conceived of by the Reform House movement. There are about 400 stores that are in the association. There are no “Biona stores.” Biona is a label guaranteeing a strict, high standard of quality. Products bearing the Biona label are sold at all Reform Houses. The only other place that Biona products are sold is in drug stores (*Droggerie*). Two-thirds of the stores that sell products bearing the Biona label are Reform Houses and one-third are drug stores. These drug stores have a food department and they also belong to the Biona association, so they have the right to sell products with the Biona label. There are also “alternative food stores” in Switzerland called *Biolaeden* (singular: *Bioladen* in Swiss-German), but none of them sell the Biona label because they are not in the association. Address: Soyana, Postfach 8039, Zurich, Switzerland. Phone: 01/202 89 97.

1938. Sakaguchi, Noboru. 1990. Early history of making tofu at Le Bol en Bois (Interview). *SoyaScan Notes*. June 14. Conducted by David de Korsak in France.

• **Summary:** In 1969 Mr. Sakaguchi made his first trip to Paris from his homeland, Japan. He returned to Paris in March 1974, and became aware of the possibility of buying a macrobiotic restaurant from a friend who at the time was a cook in that restaurant. From April-Aug. 1974 he returned to Japan to finalize a deal with Japanese investors and to study tofu making. While he was in Paris touring vegetarian restaurants, Mr. Sakaguchi had been struck by the lack of protein in the foods he saw. Tofu naturally came to his mind as the food that would ideally supplement (and complement) that vegetarian cuisine. “Tofu was missing... I thought of this

as my mission.”

On 2 Sept. 1974 Mr. Sakaguchi opened Le Bol en Bois. He had expanded it to include a natural foods retail store located directly across the street. In the last quarter of 1975 he began trials making tofu using calcium sulfate as a coagulant. In about Nov. or Dec. 1975 he began commercial production of tofu, using real nigari as a coagulant. He sold this tofu only at Le Bol en Bois natural foods store and served it in his restaurant. An invoice dated 26 Dec. 1975 from Mitoku Company Ltd. in Japan shows that he imported 40 kg of nigari (\$17.34), 50 x 150 gm packets of nigari (\$33.27), a grinder for making tofu (\$562), other pieces of tofu making equipment (\$450.35), as well as 1,800 liters of Sakae Tamari-Shoyu, 900 liters of Johsen Tamari-Shoyu, and 200 kg of brown rice miso. Production remained limited (two days a week, 40 cakes per day) until the end of 1976. Mr. Sakaguchi made the tofu himself, helped by some Japanese students. One evening in the winter of 1976 an unusually large number of people came to the store to buy tofu. This corresponded to the end of a conference held by Michio Kushi in Paris. The store became the focus of a lot of interest and activity. Production jumped to roughly 240 cakes per day, two days a week. By the end of 1976 Mr. Sakaguchi had hired his first employee to help him make tofu.

In 1985 the tofu production activity was set up as a separate company named Daizou, located outside of Paris at Champigny sur Marne. At that time production was about 300 cakes per day, two days a week. Mr. Sakaguchi now began to make tofu more than twice a week and to sell this tofu at other retail outlets in addition to his own. Address: 883 Rue de Bernau-Z.I., 94500 Champigny Sur Marne, France. Phone: 48 82 39 90 or 47.06.33.71.

1939. Menzies, John. 1990. Re: Harry Miller’s work with soymilk in East Asia. Plans by the South China Island Union Mission of Seventh-day Adventists to set up a health food company in Hong Kong and Taiwan. Letter to William Shurtleff at Soyfoods Center, June 20. 2 p. Typed, with signature on letterhead.

• **Summary:** After his soyfoods plant in China was destroyed, Dr. “Harry Miller retreated to Taiwan along with the Nationalists and later set up a soya milk plant associated with the Taiwan Adventist Hospital which has long since gone. I am not even sure when the soya milk operation was discontinued. Unfortunately the only industries set up in Hong Kong were hospitals.

“Recently I was asked by the South China Island Union Mission of SDA’s to set up a health food industry in Hong Kong and Taiwan... My background is food technology and I have worked for Sanitarium in Australia and New Zealand for a number of years.

“Initially we will import various products from our sister institutions around the world and where possible re-pack under our own label. This will allow us to get a feel for

the market so in the near future we will know what sort of a manufacturing plant to set-up (i.e. soymilk, vegetarian, or cereal). It looks like we might even have an opportunity to set up a manufacturing base in one of the specially administered regions in communist China.” Address: General Manager, Food Div., South China Island Union Mission of Seventh-day Adventists, 40 Stubbs Rd., 2nd floor, Hong Kong. Phone: 838-3991.

1940. Wollner, Joel. 1990. Re: History of early work with amazake, koji, and Rice Dream in America. Letter to Jan Belleme, Saluda, North Carolina, June 23. 3 p. Typed, with signature on letterhead (photocopy).

• **Summary:** “Starting in the early 1970s, Erewhon imported scant supplies of a highly perishable, fresh rice koji along with its regular line of Japanese products. Most often, this koji was spoiled or worm-infested by the time it arrived in Boston, Massachusetts. But on those few occasions when a usable amount arrived intact, we had the rare pleasure of attempting to make amazaké at home.” One attempt was made on Thanksgiving of 1973. In spring 1977 the Erewhon flagship store on Newbury Street in Boston began to sell Cold Mountain Misos, then Cold Mountain Koji. The misos sold well but not the koji, so Joel and his wife, Wendy, developed a simple method for making amazake at home.

Mona Schwartz in Florida began to order koji from Joel and developed a good recipe for making it into amazake. Joel learned and perfected the process, then described it in detail in the 10-16 April 1978 edition of his newsletter *Erewhon News (Newbury Street)* under the title “Overnight Amazake.” “You can imagine my surprise—no, shock—when, later that spring Charles Kendall, macrobiotic aficionado, keeper of the Erewhon Company store, and supplier to our store of ‘homemade’ organic sauerkraut (his own), approached me one day in the store and asked if I would consider selling the refrigerated amazaké drink he had developed.” The rest is history.

In about the spring of 1985, Joel and Sjon Welters drove to Moniteau Farm where Robert Nissenbaum and Dave Carlson, calling themselves Imagine Foods, were making a frozen confection from amazaké. “This new incarnation of an old Boston study-house favorite, was actually made from a mixture of amazaké, which they first made from Cold Mountain koji and Chico-San brown rice, combined with Chico-San rice syrup and various natural flavorings, and run through a soft-serve ice cream machine. (A frozen dessert made in several flavors from rice kayu sweetened with rice syrup and/or barley malt syrup was sold at Erewhon Newbury Street in 1977-78.)”

But Imagine Foods was having technical and flavor problems with its product. In Fayetteville, Arkansas, Joel and Sjon had developed a “series of amazaké-like beverages and desserts made by enzyme conversion from whole grains, including brown rice... Of course, our work was top secret,

since, at the time, enzyme processing was virtually unknown in the natural food industry, and used for little more than processing corn syrup in the conventional food industry. Robert and Dave had no knowledge of it at all.

“Sjon and I confirmed (to ourselves) the rightness of our enzyme process for use in Rice Dream to make a single brown rice base ingredient for the mix. This development alone would solve the technical and flavor problems to make a commercially feasible product with a broadly appealing taste and texture. We decided to invite Robert and Dave to relocate to Fayetteville and purchase the base ingredient, which would be made in our plant, from us. Months of negotiations would pass before the enzyme process solution was finally revealed to Imagine Foods [by whom?] at the next NNFA show. But then, through a series of twists and turns, Sjon and I lost control, and the enzyme process project was ‘diverted’ to California Natural Products. More than this, I am not prepared to discuss at this time.” Address: 19 Pepper Hollow Drive, Clifton Park, New York 12065. Phone: 518-383-0299.

1941. Golbitz, Peter. 1990. Lite soyfoods making their way to market: Shape of things to come? *Soya International (Bar Harbor, Maine)*. April/June. p. 16-17.

• **Summary:** New low-fat soyfood products include Westsoy Lite (made by Westbrae Natural Foods, and containing only 1% fat and 18% of calories from fat), fat-free versions of Soyco cheese (made by Galaxy Cheese Co. in Cheddar Chunk and Mozzarella Chunk styles), Lean Links (made by Lightlife Foods and containing only 12% of calories from fat). Address: Soyatech, Bar Harbor, Maine.

1942. Golbitz, Peter. 1990. FDA asks for warning on soymilk packages. *Soya International (Bar Harbor, Maine)*. April/June. p. 7.

• **Summary:** “In March, the U.S. Food and Drug Administration (FDA) sent letters to all known manufacturers of soymilk asking that they put warning notices on their labels advising consumers not to use the beverage as an infant formula.

“According to Fred Shank, Director of FDA’s Center for Food Safety and Applied Nutrition, the agency had recently been informed of the hospitalization of a five month old infant who was admitted in critical condition with severe metabolic acidosis. The Arkansas Children’s Hospital in Little Rock, where the little girl was admitted, reported that the infant had complications from malnutrition, including heart failure, thiamine and other B vitamin deficiencies, calcium deficiency, rickets, vasculitis, and likely neurological damage. According to information obtained by the hospital from the infant’s parents, the patient was fed a soy beverage obtained from a health food store shortly after birth, as the sole source of nutrition. As of mid-March, the infant remained in intensive care with her condition described as

critical.

“FDA, in a prepared statement, said that ‘soy-based drinks, sometimes improperly called “soy milks”, may be consumed by children and adults as part of a balanced diet, but they are not the same as soy-based infant formulas, mothers’ milk or cows’ milk.’

“According to FDA, soy beverages analyzed by the Arkansas Children’s Hospital are lacking in the nutrients needed for infants, being insufficient in calcium, niacin and vitamins D, E and C.

“The agency is seeking information from consumers and health professionals about any other injury resulting from the use of soy drinks as a substitute for infant formula, as well as any information on the promotion of any soy-based beverage as a replacement for infant formula.

“In the letter sent to soymilk manufacturers, FDA stated: ‘Our review of the label for the recently implicated soy beverage and literature about the product do not indicate that the responsible firm intended that it be used as a substitute for infant formula, nor is there evidence that the parents of the infant were explicitly told that the product was adequate as a replacement for infant formula. Nevertheless,’ the letter went on, ‘we are informed that the distributor of the product has voluntarily stopped production until new labels can be obtained. The new labels will state in bold print prominently on the information panel of the label, “Do Not Use As Infant Formula”. In addition, the firm plans to eliminate statements that could be interpreted by consumers that its soy beverage is nutritionally equivalent to milk.’

“The letter ended with a strong recommendation that all soymilk manufacturers and marketers utilize a prominent label statement, either on the principal display panel or the information panel, warning that soy beverages should not be used as a substitute for infant formula. FDA also strongly advised companies to remove any label statements that suggest or imply that their ‘soy beverage is a substitute for milk, or is equivalent to milk, unless such equivalence has been achieved through formulation of appropriate nutrients.’

“This is not the first time that the FDA has taken action in respect to soymilk and its use as an infant formula replacement. In 1985, the agency investigated, and was later able to fine, a company for promoting its soymilk as a suitable replacement for infant formula. That action resulted from a similar incident in which an infant became seriously ill after consuming soymilk as a sole source of nutrition.

“The manufacturers of the four leading brands being sold in the U.S., Edensoy, Vitasoy, Westsoy and Ah Soy, have all acknowledged that they are going to comply to FDA’s request for some kind of warning on their next set of packages.” Address: Soyatech, Bar Harbor, Maine.

1943. *Human Health, Animal Rights, and Ecology*. 1990-- . Serial/periodical. Honolulu, Hawaii: Vegetarian Society of Honolulu. Vol. 1, No. 1. June 1990. *

Address: P.O. Box 25233, Honolulu, Hawaii 96825.

1944. Muso Shokuhin. 1990. [Pure heart: Muso general catalogue]. Otedori 2-2-7, Chuo-ku, Osaka 540, Japan. 88 p. Printed 1 July 1990. 30 cm. [Jap]

• **Summary:** This strikingly beautiful, full-color catalog, pictures and describes Muso's natural-food macrobiotic products in Japanese for the Japanese market—although the title is written only in English. Includes many kinds of miso, shoyu (incl. Marushima Shoyu), black soybeans, yellow soybeans, kinako [roasted soy flour], seitan (in a jar from Marushima, p. 41; the product name is written as “Seitan” in large roman letters, then in smaller letters in katakana), San-Iku Foods canned products (Gluten Burger, Gluten Meat, Linketts, Soyees, Snack Joe; p. 41), yuba, gomoku nimame (cooked whole soybeans), many kinds of sea vegetables and related products, San-Iku Soyalac (8 different products), Marusan soymilk (5 different products; 3 are named mineral tou-ryan; the latter is the Chinese term for soymilk), macrobiotic books. Address: Osaka, Japan. Phone: 06-942-0343.

1945. Nissenbaum, Robert. 1990. The early work of Imagine Foods with Chico-San, California Natural Products, and enzymes in making Rice Dream (Interview). *SoyaScan Notes*. July 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The term “Rice Dream” was first used to refer to a nondairy frozen dessert. Chico-San had been making rice syrup in Chico, California, by an enzyme process since the early 1970s; they called it Yinnies syrup and (a thicker version) Yinnies candy. WestSoy Light, which was introduced at the Natural Products Expo West last spring, is a unique product. It comes in Plain, Vanilla, and Chocolate; Robert likes the plain best. Robert likes it precisely because it is lighter than regular soymilk. However Westbrae kind of beat him to the punch, because that is the kind of product he was trying to develop.

Robert is now working with California Natural Products (CNP) in Manteca, California. He had learned how to make koji in the traditional way, using *Aspergillus oryzae* mold, but he suspected there was a better and more modern way of doing this—to convert the starches in rice to sugars. He did not know the term “enzymes” at the time. California Naturals is hydrolyzing rice with enzymes and Robert has talked with them and even done a few test runs, but they are still learning.

Robert disagrees with parts of a letter written by Joel Wollner on 23 June 1990 to John and Jan Belleme. Robert thinks that Joel overstates his role at various points in making things happen. Joel had worked with Chico-San and he knew they were using enzymes to make rice syrup. The starch-to-sugar conversion happens more readily when there is an acid pH. So the big companies making corn syrup

add different kinds of acids to lower the pH—sometimes called “acid hydrolysis.” After the reaction is finished, they neutralize the acids with sodium compounds. The smaller the amount of acid added, the slower the reaction—but in any case it is far from “natural.” Bob Kennedy learned about the use of enzymes from the big corn syrup companies, whom he had approached to see if they were interested in making Yinnies for him. Kennedy had a small plant in Chico for making Yinnies, it never worked very well, and Chico-San was losing money on it. So he was looking for a larger plant with a better design. Joel Wollner was trying to talk Bob Kennedy into moving his plant to Fayetteville, Arkansas—also with Robert Nissenbaum and Dave Carlson. Several months passed. Then Robert told Joel he (Robert) had to make a move. Most of the work that Robert was doing with Chico-San was through Peter Milbury—from whom he bought rice. Robert first learned about enzymes when he started reading food processing magazines.

In the meantime, Bob Kennedy got an offer from Heinz USA. Kennedy lost his interest in expanding his Yinnies plant. Robert told Peter Milbury that he was going to go on his own; he couldn't wait any longer. By this time Robert was looking at small dairy plants in Missouri and Arkansas; he was either going to have a small dairy plant produce product for him or he was going to buy a small dairy plant. This was after the trade show at which he had met California Naturals. About a week later, Peter Milbury called Robert and said he thought he had found a company named California Natural Products with whom they could work together to make both Yinnies and a rice beverage resembling amazake. Robert said he would be happy to talk with CNP. Within a week, Robert flew to California and met with Pat and Cheryl of CNP; they hit it off from the start. Robert realized that they had a lot of capability and professional knowledge in the food business, but in the service of natural foods. Cheryl had been a food technologist, and her father had been one of the real pioneers in the American food industry. He had worked for General Foods for 50 years. He was the partial holder, with General Foods, about roughly 40 different food patents. As they talked, Robert explained to Cheryl & Pat all his ideas and what he wanted to do. Robert had made all his own koji; he never bought it from anyone else. He was thinking of growing koji and selling it. But he realized that making koji in the traditional way on a large scale was going to be difficult. The more they talked, the more they wanted to work together.

So Robert started working with California Natural Products. The next year, Heinz bought Chico-San for their rice cakes. After a year, rights to the products that Heinz didn't want reverted back to Bob Kennedy. CNP somehow ended up making rice syrup (using a much more advanced process, and as an ingredient for manufacturers, not a retail product) and selling it independent of Heinz or Chico-San. Robert is not sure what ever happened to Yinnies. Kennedy

and Joel Wollner started Ohsawa America, with the belief that their line was the only true line of macrobiotic products. Ohsawa America didn't last long. Joel left and went to work for Mitoku.

CNP does not use acid hydrolysis or neutralization; they use only enzymes and only natural ingredients. Address: President Imagine Foods, 299 California Ave., #305, Palo Alto, California 94306. Phone: 415-327-1444.

1946. Gerner, Bob. 1990. Best-selling soyfoods at Berkeley Natural Grocery Co. in Berkeley, California (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** By far the best selling soyfood product type at Bob's store is soymilk, accounting for 50-65% of total soyfoods sales. The best selling brands, in descending order of sales volume, are Vitasoy (about 40% of soymilk sales, and rising; his store promotes it more in part because he sees sales reps longer and in part because the Vanilla Vitasoy is his favorite soymilk product), Edensoy (30-35% and falling; it used to be the best seller), Westsoy and Westbrae Malted (20% and rising), Pacific Soy (from Tree of Life), and Other (Wildwood Yosoy, Quong Hop, Soy Moo, AhSoy, 5%).

The next best selling soyfood type is tofu (accounting for about 20% of total soyfoods sales, and rising), followed by soy sauce & tamari (10%, stable), soy cheeses (4%, rising), tempeh (2%, falling), soy ice cream (1%, stable or falling), and miso (1%, falling).

Total per capita purchases of soyfoods have risen steadily since the mid-1970s. There have been no plateaus or declines.

Bob dislikes (but understands) the way soymilk manufacturers discount their products, basically forcing him to buy very large quantities—typically 60 cases at a time. This policy favors large retailers, ties up a lot of his capital upfront, and takes up a lot of space in his warehouse. So 95% of the time he buys Vitasoy and Edensoy soymilk when they are on sale at discount prices, then he sells these at discount/sale prices—a practice that he does not like since it seems to contradict the idea of a “sale.” Customers won't buy soymilk any more at “regular” prices. Bob would rather buy what he needs from week to week, then sell all products at a regular price most of the time, then have promotions once in a while. Vitasoy has played a lot of games with distributors to try to get them to buy more at one time, and Bob has heard that this is hurting the distributors and that they don't like it. They can't make money selling at an 8% margin, which they often must do. Edensoy's discount is constant whereas Vitasoy has on and off discounts—which makes buying harder for Bob. Westbrae/Vestro has a more typical discount policy and Bob sells Westbrae products at a regular price most of the time. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

1947. Jordan, Lowell S.; Abernathy, J.R.; Aldrich, S.R.; et al. 1990. *Alternative Agriculture: Scientists' review. Council for Agricultural Science and Technology, Special Publication No. 16.* x + 182 p. July. (Ames, Iowa).

• **Summary:** This is a review by many scientists of varying professions of the methodology and findings of the report *Alternative Agriculture*, published in 1989 by the National Academy of Sciences–National Research Council. The latter report “addresses systems for environmentally sound and economically viable agriculture production emphasizing minimal external inputs and diversification. The report indicates that there are two primary sets of agricultural systems, conventional and alternative...”

“The report uses case studies as examples to support its proposition that alternative agriculture is more profitable and desirable.”

1948. **Product Name:** Health Valley Tofu Fast Menu: Honey Baked Organic Beans with Tofu Wieners, Organic Black Beans with Tofu Wieners, or Organic Lentils with Tofu Wieners.

Manufacturer's Name: Health Valley Foods, Inc. (Product Developer-Distributor).

Manufacturer's Address: 16100 Foothill Blvd., Irwindale, CA 91706-7811.

Date of Introduction: 1990 August.

Ingredients: Organic small white beans, water, tofu wieners (tofu [organic soybeans, nigari, water], canola oil, wheat gluten, wheat germ, nutritional yeast, natural spices, tamari soy sauce [water, soybeans, wheat salt], natural hickory smoked flavor, paprika, beet powder, sea salt, guar gum), honey, tomatoes, onions, tomato paste, organic potato flakes, unsulfured molasses, concentrated organic apple juice, carrot powder, olive oil, apple cider vinegar, sea salt, paprika, natural herbs and spices, onion powder, garlic powder, organic oregano, organic sage, organic thyme.

Wt/Vol., Packaging, Price: 15 oz (425 gm) can. Retail for \$1.89 (1/91, California).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 7½ oz.: Calories 140, protein 11 gm, carbohydrate 15 gm, fat 3 gm, cholesterol 0 mg, sodium 14 mg, potassium 260 mg.

New Product–Documentation: Label (Honey Baked) obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white on yellow. Full color photo of crock of beans with tofu wieners and a spoon

dipping in. “3-minute main dish.” Date of 8/90 written encoded on label.

Products with Labels (all 3) purchased at Open Sesame in Lafayette, California. 1991. Jan. 31. \$1.89 each. “Lead free can from Health Valley. This can is enamel coated for your protection.”

1949. Knaster, Mirka. 1990. The first lady of natural food stores—Mrs. Gooch: Her upscale chain in southern California is an industry model. *East West*. Aug. p. 43-45, 64-65.

• **Summary:** In the mid-1960s radical baby boomers launched the first natural food retail stores. Sandy Gooch almost died from eating food additives. She decided to start selling foods without additives. So she approached Don Volland, an experienced natural foods retailer. “She invested her retirement fund and savings, \$35,000, to which Volland added \$5,000. In Jan. 1977 they opened their first store in West Los Angeles.

A large color photo shows Sandy Gooch.

1950. Mayell, Mark. 1990. The new natural foods stores: natural foods retailing celebrates its twenty-fifth birthday in the U.S. with the advent of state-of-the art supermarket-sized stores. *East West*. Aug. p. 39-42.

• **Summary:** The new natural foods stores are bigger—in fact supermarket chains. Discusses Anthony Harnett, Ricycle, Bread & Circus, Unicorn Village Natural Foods, Mrs. Gooch’s, Whole Foods Market, food co-ops, Fred Rohe [Rohé], Michio Kushi, Erewhon, Trader Joe’s, quality standards, ecological connections between food and society, organic foods, , recycling, innovative customer education programs. An large color photo shows Anthony and Susan Harnett.

1951. McSweeney, Daniel. 1990. The making of Bread & Circus wholefoods supermarkets. *Whole Foods*. Aug. p. 36-38, 40-42.

• **Summary:** Anthony Harnett is president of the six-store Bread and Circus Whole Food Supermarket chain and winner of *Whole Foods* magazine’s 1990 “Retailer of the Year” award.

Two moments stand out in Harnett’s mind as events that led him to start what is today the Northeast’s highest volume retailer of natural foods.

“The first catalyst, Harnett recalls with a slight brogue, came in 1963 when he was forced to leave his native Ireland due to a depressed economy. The 19-year-old sought employment in England, and landed a job at Littlewoods—‘the best job I could get,’ he explained. The department store, which also featured an in-house cafe / restaurant plus a full supermarket, was Harnett’s introduction to the business of retailing—a business he would grow to love, and one that he would eventually master.

“A second major impetus in Harnett’s career

development came some seven years later. After reading an article in a London newspaper about macrobiotics, Harnett became interested enough in the subject to contact the author for additional information. He soon began eating macrobiotic food—not due to any health problems, but rather because ‘I just wanted to have high energy and maximize my abilities.’ Not content to just read about the macrobiotic way of life, however, Harnett came to Massachusetts to study at the Kushi Foundation, staying for a year.

“While in America, the 26-year-old spent his time well: not only did he save money which enabled him to eventually open his own store, but he also met a woman, Susan, and got married. He and his wife (now an executive vice president of Bread & Circus) then left America and went to Dublin, where the couple opened Ireland’s first natural foods store in late 1972.

“I saved about \$5,000 working in the states in an organic food business, and with some additional money that I borrowed opened the Dublin store for an investment of about \$7,000,’ Harnett explains. ‘It was a natural marriage for me to open a natural foods store,’ he notes. ‘It allowed me to combine my retailing experience with my growing interest in healthy foods.’

“Thus, Harnett took the first necessary-yet-risky step that all hopeful retail entrepreneurs must face: plucking down hard cash to become a store owner. It would not be his last move by any means, however.

“Coming back to America. After running the Dublin store for some two and one-half years, the Harnetts came back to the states in 1974 and settled in Massachusetts.

“Anthony Harnett took a one year hiatus from retailing, but he stayed involved in the natural foods industry by working for Erewhon, the supplier and wholesaler that specialized at that time in macrobiotic food. There, he worked in a variety of capacities, eventually managing the warehouse shipping and receiving department. But all the while, Harnett knew that he would some day return to retailing.

That day came in 1975 when Susan Harnett came upon

a classified ad in a copy of *East West Journal* magazine. The ad was for a store called Bread & Circus, located in Brookline, that was for sale. The couple quickly seized the opportunity. ‘We had been looking for something, and although that store was only doing \$100,000 a year in sales at the time, I felt it had potential,’ Harnett recounts. ‘It appeared to be a good opportunity and didn’t really seem risky, although I did have to carry the debt.’ Harnett put \$5,000 down, financed an additional \$25,000 over five years, and went to work. The 1,500-square-foot store was a unique enterprise (even for a natural foods store), Harnett explained, in that half of it was devoted to food (hence, the ‘bread’) and half to hand-made wooden toys and other wood items (the ‘circus’). ‘We decided to keep the name,’ he notes.

“Harnett remarks that he had no real financial sales expectation for the store in the beginning. ‘I just wanted to take care of business and let the numbers take care of themselves,’ he says. And that’s just what happened, as the store more than doubled in sales in its first year alone.

“How was such a meteoric sales expansion accomplished? Although Harnett says that the store’s development ‘wasn’t really a struggle—it was fun,’ it’s clear that some hard work was involved along the way.

“‘We broadened the product mix after buying the store, re-arranged some departments and added some signage,’ Harnett says. ‘Then a lot of time was spent talking to customers about health and my own philosophy of proper eating.’

“Still in operation, today’s Brookline-based Bread & Circus is hardly like the store Anthony and Susan Harnett originally bought, however. He explains that the store has been expanded two and one-half times through the years to reach its present size of 3,700 square feet. Alas, the hand-made wooden toys are no longer offered, but the store does now sell some \$100,000 worth of natural foods and related industry products—each week!

“Branching Out: By natural foods industry standards, building a store to an annual sales volume in excess of \$5 million is quite an accomplishment. The Brookline store, however, was only the first outpost in Harnett’s developing empire of retail operations: today [and by July 1978], the company consists of six stores, and Harnett projects total 1990 sales to reach \$64 million.

“While Harnett notes that the growth and expansion of Bread & Circus consisted of ‘a million pieces,’ he gave a capsule summary of the company’s evolution -which, despite his magic touch, actually included one ‘stumble’ along the way.

“‘I had been thinking about a second store, and in 1978 we opened it in West Roxbury,’ he recalls. ‘It did all right, but it was not the best type of store in that it was a basement store. We closed that store in 1982.’ Although Harnett notes that the West Roxbury store ‘didn’t work out,’ he does not think back on the experience with any regret. ‘It was just one

part of the learning process,’ he says, ‘and we did learn a lot from it.’

“By the time the West Roxbury store closed, however, two additional Bread & Circus outlets had already been opened—in the Massachusetts towns of Cambridge and Wellesley, respectively. The Cambridge store, opened in 1979, was originally an 8,000-square-foot operation (now 12,000 sq. ft.), which Harnett described as ‘our first semi-serious whole food supermarket.’ That store, he added, ‘did well from day one.’ The Wellesley store, opened in 1980, was a smaller operation (originally 5,800 square feet and now 6,800), but its sales success was enough to draw customers away from the West Roxbury store, contributing to that store’s closing.”

A sidebar reads: “‘Its important to have high-quality standards that people can come to trust.’”

By 1983, Harnett was ready for big time supermarketing: he opened a 27,000-square-foot natural food store in Hadley, complete with a natural meat and seafood department. At present, the Hadley store does \$200,000 per week in gross sales. Some five years later, another big supermarket (19,000 square feet) was opened in Newton. By the end of 1989, the five stores had combined to ring up sale in excess of \$50 million, Harnett notes.

“With the greater Boston area largely covered, Harnett recently took Bread & Circus across the state line to nearby Providence, Rhode Island. There, earlier this year, he opened the sixth Bread & Circus—a 23,000-square-foot supermarket. ‘It’s really not that far away—only 43 miles—and it’s a good market with an educated community,’ Harnett says of Providence. ‘In fact, it’s one of the best markets around here.’ So far, the store’s sales have climbed to about \$175,000 per week, making Harnett’s latest move (as usual) a resounding success.”

A sidebar poster, titled “Our Food Philosophy” states:

“It is our goal to make quality whole foods available to as many people as possible. To achieve this objective, we observe the following standards.

“1. The food we sell shall contain:

“* No preservatives.

“* No artificial colors.

“* No artificial flavors.

“* No refined or synthetic sugars or sweeteners (including white or brown sugar, fructose, dextrose, aspartame, saccharin or sorbitol).

“* No cottonseed, coconut, or palm kernel oils.

“* No hydrogenated oils (we will sell stick margarine, which we offer for those with kosher or vegetarian dietary needs).

“2. The meats and meat products we sell will be raised without growth hormones.

“3. We will sell no 100% white flour products. In products containing flour, the majority of flour must be composed of whole grain flour.

“4. We will provide organically grown products which represent value and quality, whenever possible. We will constantly search out new sources in order to increase the selection of quality organic foods available to you.

“5. We will respond to agricultural chemical issues and food-related health issues as they arise. If we discover that there is a harmful agent or food ingredient present in our foods, we will do our best to eradicate that agent from our product selection.

“6. The food we sell will not be irradiated.

“Bread & Circus

“Wholefood Supermarkets

“The Food, The Whole Food, and Nothing But The Food

“Brookline. Cambridge. Hadley. Newton. Wellesley, Providence, RI” (Continued).

1952. McSweeney, Daniel. 1990. The making of Bread & Circus wholefoods supermarkets (Continued—Document part II). *Whole Foods*. Aug. p. 36-38, 40-42.

• **Summary:** (Continued): “People Person: When asked to explain the success of Bread & Circus, Anthony Harnett is quick to credit the stores’ employees—or, as he prefers to call them, ‘associates.’ Some 800 associates make up the Bread & Circus team.

“‘This company is not me—it’s 800 people,’ Harnett exclaims.

“While Harnett could at one time hand-pick his associates, that function is today handled by an in-house recruiter. Still, the Bread & Circus president has strong, basic feelings about the kind of person he wants to have representing his stores. ‘We look for somebody who is interested in who we are, and who also hopefully has relevant experience working in retail,’ he notes. ‘Retail is very different from other types of work, so someone new to it might have false expectations. We also like people who are into natural foods and have a knowledge of whole foods, although if someone doesn’t have that knowledge, they’ll learn it.’

“Retailing, as Harnett notes, is ‘a people business.’ And, in addition to the people he hires as associates, Harnett’s other primary concern are the people who make up his customer base, some 65,000 of whom shop at the Bread & Circus stores each week. ‘My feeling has always been that if you take care of the customers, you will do well,’ he explains. ‘Part of this means having a clean, well-presented store. And in this industry, it’s also important to have high-quality product standards that customers can come to trust. At Bread & Circus, there is a vision of the retailing mix that incorporates high quality standards, freshness and appropriateness. We have a reason why items are carried.’

“The Bread & Circus product policy—a printed statement of purpose available to the general public—leaves no question about what the stores will and won’t carry.

“As someone who unabashedly proclaims his love for

retailing and customer interaction, Harnett’s success has created one drawback: he must now tend to business in the office for the most part, while only managing to get out to one of the stores once a week on average. ‘The best part of retailing is just being in the store, which I can’t do as often as I like and I really miss,’ he says. ‘But there are a lot of office tasks to be done that are also important.’

“Still Hungry: While he has come a long way in 15 years of running Bread & Circus—and even further since leaving an impoverished country some 27 years ago—Anthony Harnett is hardly finished growing his company and expanding his goals. ‘We’re just a baby company,’ he says of Bread & Circus. ‘The company is only getting started—it’s in the beginning stages. How many stages are there? Maybe a hundred. I would like to add more stores, for sure, and also have some vertical integration—maybe some farming and manufacturing interests.’

“As the company continues to grow, two of Anthony and Susan’s children have already gotten their feet wet in retailing and may some day contribute to its expansion: daughter Anne-Marie (age 17) and 15-year-old son Ivan have worked at Bread & Circus stores during the summer months. The couple also has a 12-year-old son, Fergus.

“While much still awaits for the Harnetts and Bread & Circus to accomplish, Anthony Harnett says he is proud of what has already been attained—both at the Bread & Circus stores and within the industry as a whole—during his 15 years of retailing in the United States.

“‘The growth in the availability of organic foods gives me great pleasure,’ Harnett notes. ‘We and other committed retailers are helping this trend by demanding safe food that people can trust.’

“In general, Harnett says that the food alternatives offered by Bread & Circus is something that has a real impact on people’s lives, for which he is also proud. ‘We’re a clear alternative to the mass market supermarkets,’ he states. ‘And even when some supermarkets offer natural food, we remain an alternative by selling organic food. Natural food stores have to sell more than just natural food today,’ he advises.

“Harnett has other advice to offer his retail colleagues. ‘You have to take care of your customers and the people who work for you,’ he stresses. ‘Have high standards, and when you attain them, increase them. And be excited about your business.’

“The final key to being a successful retailer, according to Harnett, is something that a person either has or doesn’t: ‘You have to love retail,’ he says.

“Anthony Harnett loves retail, and judging by the success of his stores, Harnett’s customers love him for it.”

1954. Sand, Avraham. 1990. Pioneering soyfoods and natural foods in Israel (Interview). *SoyaScan Notes*. Sept. 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Avraham first went to Israel in 1975 and stayed for about a year. During this time he and Avraham Leider and one other person founded Israel's first natural foods company, named Amud Ha Shachar (Pillar of Dawn) and located in Jerusalem. The first product they made was granola, followed by whole wheat flour, bulgur wheat, brown rice (which they packaged), and date bars. With this company established, a number of Americans and other westerners who had recently immigrated to Israel and were connected with the company approached the Sachnut, the Jewish government agency which helps finance Jewish cooperative settlements. They asked to be given a moshav. A moshav is like a kibbutz (a cooperative agrarian, rural settlement) except that the families have their own homes and land, and the children live at home. In 1976 the Sachnut gave the group a piece of land, infested with scorpions, upon which nine other groups had tried and failed since 1948 to establish a successful community. The Sachnut also financed a small natural foods factory and bakery on the moshav, complete with an oven and a packaging machine. The moshav was named Moshav Me'or Modi'im, located at Doar Na Hamercaz, in the Judean Hills between Jerusalem and Tel Aviv, Israel.

Avraham returned to North America for several years. While living in a community of 5-6 people in Nova Scotia, Canada, he was introduced to tofu by people who made tofu for the community, but he did not make tofu there himself.

Between 1975 and 1990 Avraham has spent a total of 8 years in Israel. The rest of the time he was in the USA or Canada or travelling. Avraham returned to the moshav in 1978 and that year he established Israel's earliest known tofu shop as part of Pillar of Dawn. The tofu was made in the same bakery room as the granola, especially in the evenings when the granola wasn't being made. Originally the community scale shop was established solely to make tofu for the 25 or so families living on the Moshav. Tofu production was small, averaging 50 lb/day of tofu one day a week, using a Corona mill grinder powered by a washing machine motor. The tofu was curdled using bitter melon (nigari) from a salt factory on the Dead Sea. The Moshav owned the tofu company collectively and financed it. Avraham was the motivating force that got the operation started with temporary help initially from Yaacov Sack and Moshe Reuben. About 3-6 months after tofu production began, they started to make tempeh. Then Ben Zion Solomon

joined Avraham 6-12 months after the company started and they worked together like equal partners for several years as the tofu and tempeh makers. Solomon was also making quite a bit of miso on the moshav (with a little help from Sand). They also introduced soymilk. At some point, they began to sell their tofu and miso at a few health food stores in Jerusalem. As far as Avraham knows, his was the first company to make tofu, tempeh, miso, or soymilk in Israel. They developed a 1-page informational pamphlet, written in Hebrew on one side and English on the other, explaining what tofu was and how it was made, plus some recipes. At that time Israelis, other than recent immigrants from America, didn't know what tofu was.

They reached the point where they decided to buy large scale equipment (from Takai) and set up a real commercial shop on the moshav that could produce 500 to 1,000 lb/day of tofu. The Sachnut indicated that they would be willing to help set up this new business. So in about 1979 or 1980 Avraham traveled to the USA and did a lot of study to learn about tofu equipment, products, and processes in small to medium sized shops. He visited about 20 tofu shops nationwide (most were very open and helpful) and collected information in a notebook. He worked at the Soy Plant in Ann Arbor, Michigan, for approximately a year in about 1980. From time to time he shared information with his father, Ralph Sand, who was doing research on non-dairy cheese and tofu at Anderson Clayton at the time. At the last minute the Sachnut pulled out and decided not to finance the project, so the expansion never took place. They continued to make tofu on a small scale. But the moshav was suffering economically so in about 1981 Avraham and his wife, unable to make a living there, left and returned to the USA. The little soyfoods plant dissolved but shortly thereafter a commercial operation (probably Golden Jerusalem Tofu) started in Jerusalem and the people on the moshav bought their tofu from Jerusalem.

During the time that Avraham made soyfoods in Israel (1978-81) there was a lot happening with soya. There was a man called the "Soya King" ("Hamelech Soya," probably Eliahu Navot) who was famous in Israel as the country's soybean pioneer. Avraham thinks he lived in Herzlia/Herzliyya, just north of Tel Aviv, but he died in about 1979 or 1980 several months before Avraham was able to meet him. Avraham went to his home town and met his widow, who told him a little about her husband's work with soya.

The most popular food use of soybeans in the late 1970s was in textured soy flour (like TVP). These products were made in Israel by 1 or 2 big companies and sold in supermarkets in very stylish packages indicating that the manufacturers were well established. There were several flavors and large amounts were sold. He does not know the name or address of the manufacturer, but he got the feeling that Eliahu Navot had at least helped inspire these products; he may have helped to develop them.

In America, Avraham set up a soy deli named Sand-Munches in Madison, Wisconsin. They bought tofu from Bountiful Bean in Madison and made and sold tofu sandwiches, nori rolls, tofu salad, tempeh salad, various tofu spreads. They sold to health food stores and had a sandwich cart on the campus.

Avraham was in on the soyfoods wave at the very beginning, but after it became more established and mainstream he felt that his work had been done in that area, so he moved into the field of aroma therapy, inhaling aromatic essential oils from herbs, where he has been working for the last 8-9 years. It is a very powerful form of herbal medicine. He has developed several product lines under the Tiferet brand (a term taken from the Tree of Life in the Cabala) which he markets in health food stores in the USA and overseas. Address: 210 Crest Dr., Eugene, Oregon 97405. Phone: 503-344-7019.

1955. Hamilton, Ross; Manser, Mike. 1990. Re: History of Nectar Soy Products in Australia. Letter (fax) to William Shurtleff at Soyfoods Center, Sept. 13. 2 p.

• **Summary:** Nectar Soy Products is located at 57 Vincent Street, Daylesford, Victoria 3460, Australia. Phone: 053-48-2051. The present owner and founder, Mike Manser, provided this information. The company was founded in March 1981 to provide a full meat equivalent vegetarian food source. The company began commercial production of soyfoods in June 1981 at 4/13 Glamis St. (P.O. Box 969), Geelong, VIC, 3220, Australia. The company's first two products were Tempeh-"Nectar" (March 1981) and Garlic Tempeh (March 1985). In May 1985 the company moved from Geelong to its present address in Daylesford. Main reasons for the move were to get pure water (no chlorine or fluoride) and a cleaner environment, to reduce overhead on product transportation, and to have room for a walk-in cooler. It then introduced Curry Tempeh Pies (June 1986) and Lupin Tempeh (Sept. 1990). Manser has always been the sole owner, and is one of the two production workers. Manser believes "I was the first in Australia to manufacture and market tempeh." According to Soyfoods Center records, this is the oldest existing tempeh manufacturer in Australia, but it was the third commercial tempeh company in Australia, after Dharma (c/o Earth Foods, Waverley, NSW; started 1980) and Bodhi Farm Tempeh Co. (Channon, NSW; 1980). It was the first Australian company to produce lupin tempeh commercially and to assist the Food Research Lab at Melbourne University (Weribee, Victoria). The owner feels that the main reason for the company's success is high product quality and painstaking customer contact. Indonesian-Australians confirm this.

Today the company makes about 1,500 lb/week of tempeh. The three best-selling products, in descending order of sales, are soy tempeh, curry tempeh pies, and garlic tempeh. The company employs 2 people in a 1,500

square foot building. The company growth rate has been about 30% a year over the past 2-3 years. Last year's sales were \$160,000. The net worth of the business is not known. Address: R.W. Hamilton & Associates Pty. Ltd., Marketing Consultants, 36 Castlemain Rd., Maldon, VIC, 3463, Australia. Phone: 054 75 2884.

1956. Fowler, Glenn. 1990. Robert Rodale, 60, dies in crash; headed family publishing empire. *New York Times*. Sept. 21. Obituaries page.

• **Summary:** This excellent obituary concludes: "Although the Rodale family became wealthy from its publishing ventures, Mr. Rodale, who was born in New York and attended Lehigh University before joining his father in publishing, continued to live in a modest brick house surrounded by gardens. At the Rodale Institute, a 305-acre experimental farm in Maxatawny, Pa., a staff of agronomists develops farming techniques that have attained worldwide use.

"Mr. Rodale is survived by his wife, the former Ardath Harter; his mother, Anna; three daughters, Heidi and Maria Rodale and Heather Stoneback; a son, Anthony, and seven grandchildren, all residents of Emmaus; and two sisters, Nina Houghton of Wye, Md., and Ruth Spira of Coopersburg, Pa."

A fine portrait photo shows Robert Rodale.

1957. Wlazelek, Ann. 1990. Robert Rodale dead at 60 in Moscow van-bus crash: accident ends life of activism. *Morning Call (The) (Allentown, Pennsylvania)*. Sept. 21. p. A1, A4.

• **Summary:** Robert Rodale was killed in a head-on crash in Moscow. He "was also an Olympic skeet shooter [at the 1968 Olympic Games in Mexico City], philanthropist, community activist, environmentalist and proponent of physical fitness. In recent years he relinquished many day-to-day duties at the company in favor of The Rodale Institute, spreading his doctrine of regenerative agriculture aimed at saving and rebuilding soils work out by conventional farming."

"His mission was to make the world a better place"—Ardath Rodale, Robert's wife.

Page A4 is a full page about the man titled "Robert Rodale was more than a publisher" with three photos and additional important details.

1958. Stieg, Bill. 1990. Rodale legacy. *Associated Press*. Sept. 22.

• **Summary:** Robert Rodale died on Thursday, at age 60, in an automobile accident in Moscow. "But the Rodale legacy, a \$214 million-a-year publishing empire, lives on."

Robert Rodale added to his father's publishing empire with magazines such as *Bicycling* and *Runner's World* which built on the fitness boom in the 1970s and 1980s.

In recent years he has traveled the world with a mission, spreading the doctrine of organic and regenerative

agriculture, good food and good health, composting, organic gardening at home, fewer chemicals, soil-enriching crops [such as legumes], to Asia, Africa, and the Americas.
Address: Associated Press writer.

1959. KJK; ELI. 1990. Robert Rodale, 60, dies in Moscow auto accident. *Magazine Week*. Sept. 24. p. 3.

• **Summary:** “Sixty-year-old Robert Rodale, chairman and CEO of Rodale Press, was killed in a car crash in Moscow, Sept. 20 while en route to that city’s airport. He was in the Soviet Union to set up a Russian-language edition of *New Farmer* magazine... Robert Rodale was given the Presidential ‘World Without Hunger Award’ in 1984 by Ronald Reagan...

“Craig Neal,... who for a time served as advertising director at *Organic Gardening*,... said ‘Bob Rodale, in my mind, is a genuine article. He’s living in his father’s footsteps, and I think that drives him. He really is a well intentioned man, though very shy, painfully shy. I think he really spends his time thinking about how the planet will be saved.’

“Donald Kummerfeld, president of the Magazine Publishers of America said... ‘He was an idealistic person who lived his ideals giving time and effort to environmental and health causes. He will be sorely missed by all of us.’

“Rodale Press is one of the country’s largest consumer publishers. In addition to *Organic Gardening* and *New Farmer*, Rodale Press publishes *Prevention*, *Backpacker*, *Bicycling*, *Men’s Health*, *Runner’s World*, *Mountain Bike* and *American Woodworker*.”

Note: Talk with Rodale Press Library. 1990. Oct. 17. Robert’s place has been taken by John Havern, who was chosen by Robert to head the Rodale Institute before Robert died. “Ardie” (Ardath) Rodale, his wife/widow, is chairman of the board of Rodale Press. In Nov. 1989 the National Agricultural Library did a 70-minute videotape “Oral History Interview of Mr. Robert Rodale” (videocassette no. 731) on his life and work. Both NAL and Rodale Press have copies. *Organic Gardening* will have the first obituary in the December issue. The family still owns Rodale Press, and Robert’s policies will be continued. His main work was traveling worldwide, getting his ideas heard, and implementing them. The Rodale legacy, a \$214 million-a-year publishing empire, lives on. The circulation of *Organic Gardening* is now 1,037,214 copies.

Note: An obituary for Robert Rodale also appeared in *Time* magazine (1 Oct. 1990, p. 83). They called him a “publishing mogul and health guru who championed organic farming in worldwide travels.” For other obituaries and biographies see: *Organic Gardening* (1990, Dec. p. 27-33.), *New Farm* (1990, Nov/Dec. p. 2-3, 8-11), *Prevention* (1990, Nov. p. 7; Dec. p. 27-30, 33-36), *New York Times* (Sept. 21), *Advertising Age* (Oct. 1), and *East Penn Press* (Sept. 26–Oct. 2, 32:25:3, 5, 11, 13).

1960. McReynolds, Thomas. 1990. Morinaga decides to introduce private labeling and a Fresh Fruit Shakemate (Interview). *SoyaScan Notes*. Sept. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Morinaga will aggressively offer to provide their aseptic tofu, on a private label basis, to other companies in the soy and natural foods industries. To print the package directly, the buyer must commit to ordering at least 500,000 cartons/year, but with affixed pressure-sensitive labels, they can get the minimum down to 25,000 to 50,000 pieces. They will make all three textures available (red = soft, blue = firm, yellow = extra firm). Projected price is about \$10/case. Some potential clients are Vitasoy/Nasoya, Frieda’s, Eden Foods, Tree of Life.

Next summer, Morinaga will be introducing their first second generation product, called (and trademarked) Fresh Fruit Shakemate. It will be like their soft tofu but with a lower bean profile and perhaps with vanilla added. They will sell/position it in the fruit section of food stores. It will be packaged in a 3-pack, with no printing on individual packages in order to (1) get a bigger face, (2) Put brochures in the back. The theme: Shake up your day 8 days a week. Tom wants to do more second generation products.

There are rumors that Nasoya has secured aseptic packaging equipment from Tetra-Pak (an AB-3 machine for the purpose of manufacturing a 250 ml aseptic tofu) and that Vitasoy in Hong Kong is, or in the near future will be producing an aseptic pack tofu. They may be using a 3-layer laminate to get around the Morinaga 5-layer process with the polyurethane lining. Tom held some kind of an aseptic tofu package in Hong Kong about 18 months ago, but he is not sure who made it. When he talked with Yvonne Lo recently, she hinted that they were developing such a product. But Morinaga has no solid evidence.

Update: Nov. 5. Morinaga will initially offer the private label to only 1 company in each of 3 market categories: Eden in the natural foods market, Vitasoy in the ethnic market, and Frieda’s Finest in the national produce market. Address: Marketing Consultant, Morinaga Nutritional Foods, Los Angeles, California 90040. Phone: 213-728-4325.

1961. *Catalog Age*. 1990. There’s nothing artificial about Walnut Acres. 7(9):105. Sept. *

1962. Stehlin, Dori. 1990. Soy beverages not complete formulas. *FDA Consumer* 24:29. Sept.

• **Summary:** “A severely malnourished 5-month-old infant was admitted to Arkansas Children’s Hospital, Little Rock, Arkansas, last February with symptoms including heart failure, rickets, vasculitis (blood vessel inflammation), and possible neurological damage. According to the hospital, the baby girl had been fed nothing but Soy Moo since she was 3 days old. Soy Moo is a soy beverage sold in health food

stores.

“This kind of soy beverage, sometimes improperly called ‘soy milk,’ should not be confused with soy-based infant formulas. Unlike true infant formulas, which are nutritionally complete and appropriate for infants, soy beverages are lacking some of the nutrients infants need. Analysis of Soy Moo by the Arkansas Children’s Hospital revealed deficiencies in calcium, niacin, and vitamins D, E and C.

“Labels on Soy Moo cartons and literature about the drink do not suggest that Soy Moo be used as an infant formula. In addition, an FDA investigation found no evidence that the infant’s parents were explicitly told that Soy Moo could be used as a baby’s sole nourishment. Nevertheless, Soy Moo’s distributor, Health Valley Foods, Irwindale, California, has voluntarily stopped distribution until new labels stating ‘Do Not Use As Infant Formula’ can be printed.

“FDA learned of a similar incident that occurred last April when a California couple questioned a physician about their 2-month-old daughter’s failure to gain weight. The physician discovered that the baby had been exclusively fed Edensoy, another brand of soy beverage. A midwife had recommended Edensoy to the parents, according to the FDA investigator assigned to the case.”

Photos show cartons of Sunsoy Original, and Edensoy Original, and cans of Loma Linda Soyolac, Isomil, Nursoy, and ProSobee.

1963. Donaton, Robert. 1990. Rodale carries on: few changes seen after leader’s death. *Advertising Age*. Oct. 1.
 • **Summary:** “Ardeth ‘Ardie’ Rodale, Mr. Rodale’s wife of 39 years and an employee of Rodale Press for more than 30 years, last week assumed the post of chairman-ceo. She had been director of environmental resources, overseeing the management of Rodale’s 12-building, college campus-like headquarters.

“All the company’s stock is owned by the Rodale family, which includes the late Mr. Rodale’s four children.”

Small portrait photos show R. Rodale and R. Teufel (president of Rodale Press since 1979).

1964. *Time*. 1990. Milestones: Died, Robert Rodale, 60. Oct. 1. p. 83.

• **Summary:** A brief obituary of Robert Rodale, 60, “publishing mogul and health guru who championed organic farming in worldwide travels.” He was the chief executive of Rodale Press, Inc. in Emmaus, Pennsylvania. He published such popular magazines as *Runner’s World*, *Prevention*, and *Backpacker*. Address: Associated Press writer.

1965. DeVault, Melanie. 1990. Remembering Bob Rodale. *East Penn Press (Pennsylvania)*. Sept. 26–Oct. 2. p. 1-3, 5, 11, 13.

• **Summary:** An excellent obituary for a pioneer who died in a car crash in Moscow while pursuing his dream of working on a joint venture with Russian publisher Vneshtorgizdat to begin a farm magazine patterned after the Rodale Institute’s *New Farm*.

This issue is filled with articles remembering Robert Rodale (p. 1-2). “Lunch with Bob Rodale” (p. 3). “Rodale helped the world but Emmaus was his home” (p. 3-4). “Robert Rodale, community leader, killed in Soviet Union [Area reacts to loss] (p. 5). “Robert Rodale: His legacy will be far-reaching” [A friend remembers] (p. 11). “Rodale torch will continue to burn” (p. 11). “Robert Rodale touched many area lives” (p. 12). “Sports-related dreams will live on” (p. 13; he loved bicycling).

Contain many excellent photos of Bob Rodale.

1966. *Mountain Democrat (Placerville, California)*. 1990. Specialty crops in spotlight at UC Davis conference. Oct. 12. p. A-7.

• **Summary:** The annual “Farmer-to-Consumer” conference will take place at Cal Davis on Oct. 20

“Michael Funk, general manager of Mountain Peoples Warehouse, a natural food and organic product distributor in Grass Valley [California], will discuss markets for grain crops, quality standards, new crops, and premiums for organic grains.”

Note. This is the earliest document seen (March 2020) that mentions “Mountain Peoples Warehouse” (or “Mountain People’s Warehouse”—the correct spelling of the company’s name).

Note: According to www.unfi.com company history (Nov. 2012): In 1976 Michael Funk founded Mountain People’s Warehouse, which “began by selling only organic produce. It rapidly grew to become the largest natural foods distributor in the Western United States. The company is famous for its slogan, ‘To Boldly Go Where No Distributor Has Gone Before.’”

“Blooming Prairie was founded in 1974 in Iowa City. At first, orders were coordinated by volunteers and phoned into another natural products distributor, People’s Warehouse, in Minneapolis [Minnesota]. When the order was ready, a volunteer would hitchhike north to Minneapolis, rent a truck, pick up the order and deliver the goods.”

1967. Eden Foods, Inc. 1990. Eden pours it on: taste, quality, nutrition (Ad). *Eating Well*. Sept/Oct. p. 106.

• **Summary:** This full-page color ad shows Edensoy soymilk being poured onto breakfast cereal topped with berries and sliced apples.

1968. Hoke, Henry R. 1990. Homegrown success. *Direct Marketing*. Oct. p. 39-40+. *

• **Summary:** Walnut Acres has its own cannery and on-site grocery store—which generates 20% of the company’s sales

and serves as a test site for potential mail-order products.

1969. *SoyaScan Notes*. 1990. How many bushels of soybeans per month are used by various American West Coast tofu and soymilk manufacturers (Overview). Nov. 28. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The following are ranked in descending order of bushels of soybeans used per month: House Foods & Yamauchi Inc. 12,000 (Los Angeles. This includes soybeans used to make soymilk for Westbrae's Ah Soy in 225 ml foil pouches), Azumaya 3,567 (San Francisco; buys from Minnesota in 60 lb bags. Uses 300 tons/month), Pacific Foods 2,250 (Tualatin, Oregon. This includes soymilk used to make Westbrae Aseptic WestSoy Lite), Quong Hop & Co. 2,000 (South San Francisco), Wy Ky 1,563 (Los Angeles), Wo Chong Co. 1,167 (San Francisco), Mighty Soy 1,117 (Los Angeles), American Foods 733 (Alhambra, California), San Diego Soy Dairy 467 (El Cajon, CA), Clearway Soy Foods 67 (Corralitos, CA), Fuji Fresh Tofu 50 (San Jose, CA), San Jose Tofu 50, Fresno Tofu 33 (Fresno, CA).

1970. Aseptic Packaging Council. 1990. "I've said bad things about aseptic packaging. Now I'm taking it back" (Ad). *Natural Foods Merchandiser*. Nov. p. 59.

• **Summary:** This full-page color ad shows handsome Tony Harnett is sitting on a large green box (about 3 feet high), which has "The Box Bank" plus a recycling symbol written on one side. The ad text begins:

"I used to believe that as a responsible natural foods retailer, I should lead the charge against aseptic packaging and take it out of our stores. And that's exactly what I was planning to do.

"Despite all their retail convenience and consumer appeal, I was convinced that these 'juice boxes' represented a big solid waste problem. Sure, they're easy to carry and store. they're easy and clean for customers to use, and they maintain excellent product quality by preserving all the nutritional value without adding preservatives. But as far as I knew, they were also non-recyclable. Contributing to the degradation of the environment. And that, to me, far outweighed their obvious benefits."

But he has changed his mind, now that a system has been put in place to recycle aseptic packages, and they are being recycled.

"I know because we have a program underway right now in every Bread & Circus store.

"And that's what I really want to talk about. "The materials used in aseptic packages—when mixed with—produce a building material that makes an excellent substitute for pressure-treated lumber. This hybrid recycled lumber is used for marine piers, roadside markers, and fence posts. Also, a number of facilities in this country and abroad are pulping the recycled cartons to create paper and cardboard. "Right now, through an Aseptic Packaging

Council program, we have Recycle Aseptic bins in every Bread & Circus store..."

The ad is signed: Anthony Harnett, C.E.O., Bread and Circus. For more information Circle Reply #166. Address: P.O. Box 25565, Washington, DC 20007-8088. Phone: 1-800-277-8088.

1972. Fuller, Catherine. 1990. Success: A tale of eight local business successes. *Shared Vision (Vancouver, British Columbia, Canada)*. Nov. No. 27. p. 8-9.

• **Summary:** The first success story discussed is Nature's Path, founded by Arran Stephens. Arran was one of thousands of young people who had gone to India during the late 1960s searching for spiritual answers. He wanted to go to the source. He spent 7 months with Sant Kirpal Singh "... who was considered to be, and still is, one of the great masters of this century."

Shortly after returning home, he decided to provide good wholesome food "in a city that had no eating establishment for those who wanted either macro foods or vegetarian foods. I felt that opening a restaurant would be a good service and a good way of earning a living."

In 1967, the Golden Lotus Restaurant opened at 4th Avenue and Bayswater in Vancouver. Though it was slow going at the start, he persevered. A year later he returned to India (the restaurant was run by close friends), had a marriage arranged by Kirpal Singh, and fell in love with the bride (Ratana)—in that order. He gives a lot of credit to his wife and children to whatever he has achieved.

On 1 Jan. 1970 Lifestream opened at 4th and Burrard. The company grew rapidly until by 1981 it had about 100 employees and operations in Ontario and throughout Canada. But partnership disagreements resulted in the sale of Lifestream in 1981.

In 1985, he began Nature's Path, which sold Manna Bread. Again he had a hit on his hands and the company expanded into the production of Manna Breakfast Cereals. This spring they opened the first all-natural breakfast cereal plant in North America.

Over the years Arran has encountered "the inevitable rocky sections of the path, but they became times of learning and growing, of introspection and reflection. 'I would like to believe that the success of a business is due to a faithful commitment to my spiritual practice of meditation... that there is an element of grace, or whatever you want to call it, working in our lives.

"I would like to think that the measure of spirituality is only the extent that we live it. It is what we practice, not so much what we profess, that counts.

“I believe that you cannot sacrifice your spiritual focus for any reason—money or otherwise. No matter what anyone else does, the experience that I’ve had in my relationship to both my spiritual practice and my teacher has been so transcendent that to forget them would make me a hypocrite of the greatest order. It is very, very essential to be true, as far as is humanly possible, to your vision, and not to be deflected from your goal. Our goal is not only a material one. We should, as my father put it, leave this world a better place than when we found it.”

“One other thing is that I feel it’s important that every business, as it become successful, must return something to the community.”

“Nature’s Path Foods Inc., 7453 Progress Way, Delta, BC V4G 1E8.”

The second success story in Woodlands, founded by Ratana Stephens. “Arran and Ratana Stephens’ Woodlands, a spacious 100-seat natural foods restaurant, is a long way from the Golden Lotus restaurant days of the late ‘60s.

“Ratana, in 1969 the new bride of Golden Lotus owner Arran, arrived in Vancouver from India and started to work at the restaurant almost immediately. Born in the Punjab [India], she had been well educated, having received a Masters in English literature, Bachelor of Psychology, and a degree in Sanskrit from Agra University.

“In 1971, Golden Lotus became Lifestream health food store at 4th & Burrard. In the back was a small health food restaurant called Mother Nature’s Inn. Lifestream eventually expanded to two stores, the second one on Broadway at Trafalgar. In its heyday, the company grew to include a wholesale natural foods distribution business with a warehouse and bakery in North Vancouver.”

“Arran and Ratana sold Lifestream, the distribution company, and eventually closed the Fourth Avenue store. The Broadway Lifestream store was sold just last year and became Kitsilano Natural Foods. Ownership of Woodlands, the restaurant upstairs of the Broadway location, stayed with the couple, and Ratana continued to run it today.”

The cash register at this vegetarian restaurant rings 400 to 500 times a day. She believes that a vegetarian diet is better nutritionally and better for the environment. He has to juggle things to balance her commitment to her family, her children, and her work. Where is their family’s favorite place to eat out? At Woodlands!

“As part of their four-year tradition, Woodlands again this year is opening their doors on Christmas Day for the lonely and needy. Free vegetarian Christmas dinner will be available 4-6 p.m. 2582 Broadway, Vancouver.

Two photos (one in color) show Arran Stephens. One shows Ratana Stephens standing in front of a carved wooden sign for the Woodlands natural foods, vegetarian restaurant.

1973. *Natural Foods Merchandiser*. 1990. Natural Foods Expo East. Nov. p. 29.

• **Summary:** The section on “Educational Seminars 10:30 a.m. to 11:45 a.m.” states: “Room #121. Soyfoods: More Than An Alternative.

“Conducted in cooperation with the Soyfoods Association of America, this informative and stimulating seminar features the environmentalist and vegetarian author/speaker John Robbins with cancer researcher Mark Messina, M.D.”

1974. *Natural Foods Merchandiser*. 1990. Robert Rodale dies in Moscow auto accident. Nov. p. 9.

• **Summary:** He was killed on Sept. 20 in a car crash in Moscow. A portrait photo shows Robert Rodale.

1975. Roberts, Peter. 1990. Early activities with whole foods in England (Interview). *SoyaScan Notes*. Dec. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Whole Earth ran a big warehouse where people could buy whole foods on a cash-and-carry basis. He thinks it may have been located on Portobello Road, and Gregory Sams may have been in charge. Greg started with macrobiotic foods. He is a very nice man, who is restricted to a wheelchair. A similar company was named Community Supplies. Starting in about 1980 he would buy whole food supplies at these two companies in London for his health food shop named his Bran Tub. As he recalls, at the beginning neither of these companies carried any soy products since they were rather opposed to the idea of imitating meat. One segment of the vegetarian movement felt strongly that it was wrong to imitate meat, and they therefore opposed the products sold by Direct Foods Ltd. But another segment supported any method or product which (without slaughter or cruelty) would help other people to give up eating meat. Peter believes firmly that human beings were vegetarians as a species until the ice age came along. Address: Compassion in World Farming, 20 Lavant St., Petersfield, Haunts (Hampshire) GU32 3EW, England. Phone: 0730 64208.

1976. *SoyaScan Notes*. 1990. Soymilk and dairy milk prices in California, December 1990 (Overview). Dec. 28. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** At Berkeley Natural Grocery Co., a large natural food store at 1336 Gilman St. in Berkeley, California, unflavored (plain or original) soymilk made from organically grown soybeans retails for the following prices: Edensoy liter \$1.69 (which is the equivalent of \$1.60/quart), Vitasoy liter \$1.79 (\$1.69/qt), Pacific Soy Beverage quart \$1.77, Westsoy liter \$2.04 (\$1.93/qt), Westsoy Lite liter \$2.09 (\$1.98/qt). Bob Gerner, the owner of Berkeley Natural Grocery Co., says that the last two products are more expensive because he buys them in small quantities. The average price of the quart equivalents of the first 3 products is \$1.69 a quart. This is 4.6% lower than in Dec. 1988.

A quart of cow's milk (fortified with vitamins A and D) sells for the following prices at Safeway supermarkets: whole \$0.67, low-fat (2% fat; protein fortified) \$0.66, extra light (1% fat; protein fortified) \$0.65, nonfat \$0.62. The best-seller among these is extra light, which was introduced this year; low-fat was the best-seller last year. Thus soymilk in a liter or quart pack is 2.6 times as expensive as extra light dairy milk per unit volume. In Oct. 1987, after most soymilk brands were available in liter or quart sizes, soymilk was 3.42 times as expensive as dairy milk. This is a 24% drop in the price of soymilk relative to that of cow's milk over a period of about 3 years.

1977. Cramer, Craig. 1990. An 'organic' farm bill: The goals are uniform national organic standards, new markets and consumer confidence. *New Farm (The)* 12(7):12, 40-41. Nov/Dec. [1 ref]

• **Summary:** Discusses the organic farming provisions of the 1990 Farm Bill. This magazine is subtitled "The magazine of regenerative agriculture." Address: Emmaus, Pennsylvania.

1978. DeVault, George. 1990. The vision lives on [tribute to Bob Rodale]. *New Farm (The)* 12(7):2-3. Nov/Dec.

• **Summary:** "Moscow (Sept. 20)—A Soviet military truck cut off a Moscow city bus on Leningrad Street at 11:05 a.m. today. The bus swerved, struck an oncoming van head-on and Bob Rodale was dead, thrown from the van's front passenger seat. There were no seat belts in the van. Also killed were Bob's Soviet publishing partner Yevgeni Gringaut, an interpreter named Helen and the driver of the van. The bus driver was fatally injured.

"Bob was on his way to the Moscow airport for a flight home to Emmaus, Pa. He had been in the Soviet Union to finalize publishing details for the launch this winter of *The New Farm's* sister magazine, *Novii Fermer* (New Farmer). See his article 'A Warming Time,' *The New Farm*, March/April '90).

"'Finally, things were beginning to make sense,' was how Bob felt about the Soviet joint venture, according to Chuck McCullagh, a Rodale Press vice president who was working closely with Bob and Paul Wessel, chief financial officer at Rodale Press, on the project. McCullagh and Wessel had left the Soviet Union before the crash." Address: Emmaus, Pennsylvania.

1979. *Natural Foods Merchandiser*. 1990. Organic Bill becomes law. Dec. p. 3.

• **Summary:** "Members of the national and organic products industry have reason to celebrate recent legislative victories—but only for a moment." That is the view of industry leaders. The law is under the control of USDA, which must establish national organic standards.

It is hoped that this will make organically grown foods more mainstream in the USA.

Note: The League of Conservation Voters (1990, p. 9) comments on this new law: "Every five years, Congress reauthorizes a 'farm bill' as the foundation of U.S. agricultural policy. Beginning in 1985, environmentalists sought to broaden the farm bill debate beyond matters of agricultural subsidies to include soil conservation, wetlands protection, and enhancement of water quality. Among the many reforms sought by environmental interests in 1990 was the establishment of national standards to govern the production and processing of food that is to be labeled as 'organically produced'—that is, food that is produced without the use of industrially synthesized pesticides, fertilizers, and hormones. National standards are required to ensure that consumers get what they pay for when they buy organic foods, currently a market of \$1.2 billion annually. The environmental pay-off will come through an expanded market for farmers who opt to produce crops and livestock without agricultural chemicals.

"Congressman Peter DeFazio (D-OR) offered an amendment to the Food and Agricultural Resources Act to establish national standards for organic food. The DeFazio amendment passed by a vote of 234-187 on August 1. Yes is the pro-environment vote."

1980. *Organic Gardening*. 1990. Robert Rodale: A retrospective 1930-1990. Dec. p. 27-31.

• **Summary:** An excellent, brief biography of Robert Rodale following his tragic death in Moscow in an automobile accident. He became editor of *Organic Gardening* in 1960, carrying on what his father began in 1942. His main efforts were for low-input, sustainable agriculture (LISA). Address: Emmaus, Pennsylvania.

1981. **Product Name:** Tree of Life Canola Soy Margarine [Regular, or No Salt].

Manufacturer's Name: Tree of Life, Inc. (Distributor).

Manufacturer's Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1990 December.

Ingredients: Non-fat milk, real butter essence, canola oil, soy oil.

New Product—Documentation: Soya International. 1990. July/Sept. p. 5.

1982. **Product Name:** [Bonsoy (Soymilk)].

Manufacturer's Name: Mimasa (Importer). Made in Japan by Marusan. Imported via Muso Shokuhin.

Manufacturer's Address: Mimasa, Spain.

Date of Introduction: 1990.

Ingredients: Water, soybeans, pearl barley, kombu (sea vegetable), barley malt.

New Product—Documentation: Talk with Yuko Okada. 1992. July 16. Muso first exported Bonsoy soymilk to Mimasa in Spain in about 1990.

1983. **Product Name:** Westbrae Natural Ramen Express (Instant Steamed Ramen Noodles in a Cup) [Oriental Vegetable, Golden Chinese Style, Savory Szechuan Style].
Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Oriental Vegetable: Noodle pasta: Whole wheat flour, sifted wheat flour (sufficient for processing), sea salt. Seasoning packet: Natural flavors, miso* (soybeans, rice, salt), soy sauce powder (soybeans, wheat, salt), corn*, green beans*, peas*, onions*, carrots*, garlic*, spices, xanthan gum (vegetable gum), parsley*. * = Dried.

Wt/Vol., Packaging, Price: 1.1 oz (31 gm) paper cup with peel-off paper lid. Retail for \$1.29 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 1.1 oz (10 fl. oz as prepared): Calories 120, protein 4 gm, carbohydrate 22 gm, fat 1 gm, % calories from fat 7, cholesterol 0 mg, sodium 745 mg, potassium 165 mg, dietary fiber 1.5 gm.

New Product-Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Red, black, green, and gold on white. On lid: "Westbrae Natural meals in minutes." On side: "Low fat. No cholesterol. Recyclable. No hydrolyzed vegetable protein. Directions: 1. Fold lid back halfway. Empty seasoning packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Savory broth with real ramen noodles, gently steamed, not fried, so there's only 1 gram of fat. Enjoy a delicious satisfying meal in minutes!" Soyfoods Center product evaluation. Taste: very nice. The miso enriches the flavor of the broth. We like the environmentally friendly paper cup much better than the typical Styrofoam cup, and the paper seasoning packet better than its common foil counterpart. The package design is so-so. A counterpart product sold in supermarkets retails for about \$0.89 for 2.5 oz (with \$0.25 discount coupon) or \$0.356/oz. The Westbrae product sells for \$1.17/oz. or 3.3 times as much.

1984. **Product Name:** Westbrae Natural Fresh Miso (Instant Soup) [Mushroom, Snow Pea & Ginger, Green Bean & Sesame].

Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Mushroom: Noodle pasta: Whole wheat flour.

Miso packet: Miso (soybeans, brown rice, water, sea salt), mushroom soup stock (shoyu, mirin, shiitake mushrooms, kombu), barley malt, spices, onion*, xanthan gum (vegetable gum). Spice packet: Honey powder, soy sauce powder (soybeans, wheat, salt), garlic*, natural flavor, onion*, mushrooms*, green onion*, spice. * = Dried.

Wt/Vol., Packaging, Price: 0.9 oz (25 gm) paper cup with peel-off paper lid. Retail for \$2.39 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 0.9 oz (10 fl. oz as prepared): Calories 80, protein 3 gm, carbohydrate 14 gm, fat 1 gm, % calories from fat 11, cholesterol 0 mg, sodium 730 mg, potassium 125 mg, dietary fiber 2 gm.

New Product-Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Mushroom: Reddish brown, orange, blue, and yellow on white. On lid: "Westbrae Natural meals in minutes." On side: "Low fat. No cholesterol. Recyclable. Directions: 1. Fold lid back halfway. Empty fresh miso packet and spice packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Delicious fresh miso soup, ready in minutes. Made with brown rice miso, fresh not dehydrated, for a deep, rich flavor. Delicately seasoned, with a sprinkling of tender noodles. A light, nutritious on-the-go soup."

1985. **Product Name:** Westbrae Natural Noodles Anytime! (Instant Soup) [French Onion, Country Style, Garden Tomato].

Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: French Onion: Noodle pasta: Whole wheat flour. Seasoning packet: Onion*, honey powder, natural flavors, salt, Parmesan cheese (part-skim milk, cheese culture, salt, enzymes), garlic*, whey*, miso (soybeans, rice, salt), buttermilk*, spices, parsley*, xanthan gum (vegetable gum). * = Dried.

Wt/Vol., Packaging, Price: 1.4 oz (39 gm) paper cup with peel-off paper lid. Retail for \$1.29 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 1.4 oz (10 fl. oz as prepared): Calories 140, protein 5 gm, carbohydrate 26 gm, fat 1 gm, % calories from fat 8, cholesterol 0 mg, sodium 800 mg, potassium 240 mg, dietary fiber 3.5 gm.

New Product-Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper

cup. French onion: Blue, red, green, and yellow on white. On lid: "Westbrae Natural meals in minutes." On side: "Low fat. Whole grain noodles. No cholesterol. Recyclable. Directions: 1. Fold lid back halfway. Empty seasoning packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Tender, satisfying whole grain noodles in a tasty all natural broth. Just 1 gram of fat. No cholesterol. A quick nutritious meal... anytime!"

1986. Coates, Margy. 1990. Roger Mahlon Coates (Rod). March 23, 1915–March 4, 1990. Fallston, Maryland. 5 p. Undated. Unpublished manuscript.

• **Summary:** Margy Coates is the wife of Rod Coates, founder of Laurelbrook Foods. He died of Alzheimer's on 4 March 1990. This is a tribute to the man she loved. A large head-and-shoulders photo (p. 1) shows Rod, dressed in a motorcycle jacket and helmet, smiling, on his motorcycle. Below that is a family tree for Rod and Margy (born Margery Kelly, 1919, in Catonsville, Maryland). They had six children between 1942 and 1950, as follows: Sarah "Sally" Elmslie Coates (born 1942), Judith Horner Deming (born 1943; Her first marriage was to John Winton Deming in Aug. 1972. Their children were Lhiana Shee Deming, born 1973, and Emily Deming, born 1977; Her second marriage was to Arnold Knepper), Daniel Gardner Deming (born 1945), Marion Atwood Coates (born 1946), Dora Mahlon Coates (born 1948; Her first marriage was to Paul Gerard Hawken in June 1971. Their children were Palo Cheyenne Hawken, born 1972, and Iona Fairlight Hawken, born 1974. They are now divorced), and Nancy Turnbull Coates (born 1950).

Page 2, titled "The Greatest Happiness Comes from the Greatest Activity," describes the major activities in Rod's life. His first love was motorcycles. As a youth, he was an Eagle Scout. From 1950 to 1970 he was with Triumph Motorcycle Corp. in Towson, Maryland, as Service Manager for the Eastern USA. From 1970 to 1980 he was owner and manager of Laurelbrook Foods in Bel Air, Maryland. Page 3 shows the amateur racing awards he won between 1940 and 1957. Rod's leisure activities centered around the workshop. Page 4 shows the many cars he restored from 1920 to 1958. Page 5 shows a floor diagram of the buildings occupied by Laurelbrook Foods. Also included are some of Laurelbrook's Christmas Cards from the 1970s and a photo showing Rod and Margy sitting on the back of a Laurelbrook delivery truck. Address: 2516 Laurelbrook Rd., Fallston, Maryland 21047. Phone: 301-877-1695.

• **Summary:** The company is a "distributor of natural foods." The following makers, distributors, and brands of soyfood products are listed: I. Bulk Products: Miso (American Miso, 8 products), Soy foods (Turtle Island tempeh and Soy Deli tofu burger). Soy Sauce & tamari (San-J domestic shoyu and tamari, Westbrae Johsen shoyu), Tofu (Quong Hop, 6 products).

II. Packaged products: Ah Soy (Westbrae, 7 soy drinks), Eden Foods (Edensoy, 6 soy drinks), Pacific Soyfoods (6 types of soysage), Pacific Tempeh (4 products), Quong Hop (11 soymilk and 4 tofu products), San-J (tamari crackers, 14 soy sauce & tamari products), Soy Deli (Quong Hop, 5 soy foods, 8 vacuum pack tofu), Sweet Earth (3 vegeburgers), Turtle Island (10 tempeh products), Vitasoy (7 soy drinks), Westbrae (2 instant miso soups, 14 soy drinks, 14 types of soy sauce and tamari). Address: San Rafael, California. Phone: 415-459-3406.

1989. **Product Name:** Special Delivery Organic Pizza (With Soya Kaas).

Manufacturer's Name: Tree of Life (Distributor).

Manufacturer's Address: 1750 Tree Blvd., St. Augustine, FL 32086. Phone: 904-829-3483.

Date of Introduction: 1991 January.

Ingredients: Crust: Organic high protein whole wheat flour, water, organic rice syrup, yeast, sea salt. Pizza sauce: Organic tomato puree, organic rice syrup, organic extra virgin olive oil, organic unbleached wheat flour, organic dates, sea salt, organic spices. Topping: Mozzarella style Soya Kaas (Organic soy beans, filtered water, soy oil, calcium caseinate, tofu, salt, lecithin, citric acid, guar), organic spices.

Wt/Vol., Packaging, Price: 16 oz paperboard box. Retails for \$4.99 (2/99 at Open Sesame, California).

How Stored: Frozen.

Nutrition: 1/6 pizza (2.67 oz): Calories 175, protein 9 gm, carbohydrates 26 gm, fat 4 gm (monounsaturates 2.5, polyunsaturates 0.5, saturates 1.0) cholesterol 0 mg, sodium 333 mg.

New Product–Documentation: Spot in Health Foods Business. 1991. Jan. p. 71. Shows a black and white photo of the box. Also available in organic cheese flavor. Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 11.75 by 11.75 by 1 inch. Paperboard box. Red, yellow, blue, and white. Color photo of pizza with 1 slice cut out. "Organic pizza delivered right to your table. Crispy crust made from organic high protein whole wheat flour. Thick, rich sauce made from organically grown tomatoes and organic extra virgin olive oil. Topped with pure Soya Kaas, the delicious, nutritious alternative to cheese. The first frozen pizza that tastes as good as fresh. Soya Kaas.

SPECIAL DELIVERY ORGANIC PIZZA • SPECIAL DELIVERY ORGANIC PIZZA

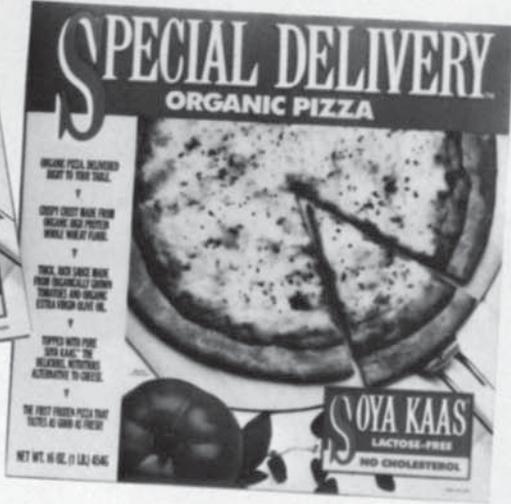

SPECIAL DELIVERY™

THE FIRST AND STILL THE ONLY ORGANIC PIZZA

We know Americans have a passion for pizza. So we wanted to take an American favorite and make it even better. To us that meant making it from organic ingredients. ■ Why organic? Because organic is better—it's just that simple. Better tasting. Better for you. And better for our ecology. ■ The crispy crust is made with organic whole wheat flour and organic rice

CHEESE

SOYA KAAS
LACTOSE-FREE
NO CHOLESTEROL

syrup. The savory sauce is made with organic tomatoes, organic extra virgin olive oil and organic spices. ■ Special Delivery Cheese Pizza is generously topped with organic Mozzarella and organic Provolone cheeses. Our Soya Kaas™ Pizza is topped with lactose free, cholesterol free Soya Kaas made from organic soy beans.

SPECIAL DELIVERY BETTER...NO MATTER HOW YOU SLICE IT

Lactose-free. No cholesterol... And Soya Kaas is the perfect all-natural cheese alternative for those who prefer a dairy substitute. It contains no cholesterol, is lactose-free and yet has the taste and texture of real cheese.”

Soyfoods Center product evaluation: The label text is deceptive, since Soya Kaas contains calcium caseinate, which is derived from cow’s milk and which allows Soya Kaas to melt. If you follow the “tip” of thawing before cooking, the product is very complicated and messy to prepare. Upon thawing, the product and box become soggy. We could find no frozen pizza sold in a supermarket that suggested thawing before heating. The instructions advise: “Bake directly on oven rack until Soya Kaas melts,” but when it melts it drips onto the oven and is hard to clean off. The crust is very thin; our first try it turned out hard and crunchy, almost like a whole wheat cracker. The pizza is quite dry; Nothing special but not bad. It retails for about 69% more than a typical supermarket frozen cheese pizza (\$0.31/oz vs. \$0.18/oz).

Ad in *Natural Foods Merchandiser*. 1991. Dec. p. 22. “The first and still the only organic pizza.”

1990. Wilson, Roberta. 1991. Organic farming wins in a big way. *Health Foods Business*. Jan. p. 8-9.

• **Summary:** “The 1990 Farm Bill, signed into law Nov. 28, is seen as one of the most important developments in the history of natural foods. The organic industry now has the potential to impact the nation and the world in a big way...”

“A giant step forward for the organic movement, the bill recognizes organic farming as more than just a philosophy or set of values. The bill validates it as a scientific method of farming that encompasses environmental and societal issues. The law will go into effect Oct. 1, 1993...”

“The organic industry, with limited political and financial resources, battled with the American Farm Bureau and major chemical companies which lobbied vigorously against its passage.” Address: Correspondent.

1991. Lesser, Peter; Elkin, Ed. 1991. History of Pacific Soyfoods in Olympia, Washington (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Pacific Soyfoods was started by Peter Lesser in 1981. Initially it was run out of the kitchen a collective restaurant named Café a la Mode, located on 4th Avenue in Olympia, Washington. They made tofu from scratch, and used the okara from the tofu to make soysage, using a version of the recipe published in *The Farm Vegetarian Cookbook*. Initially these products were served in the restaurant (the okara was used in sandwiches), but by about June 1981, they had started delivering the Soysage to the local food co-op and to 1 or 2 local grocery stores in Olympia. When the restaurant was closed after a year of operation, the wholesale accounts still wanted Soysage, so

Peter decided to keep the soy operation going and at that time, in Feb. 1982, he coined the term “Pacific Soyfoods.”

Peter stopped making tofu and bought his okara from a Korean-American tofu manufacturer named Boo Han in Lakewood, Washington. In the spring of 1982, Pacific Soyfoods’ landed its first wholesale account, Pacific Rim (formerly known as something like C.C. Grain), a collective wholesaler in Seattle, that delivered to the Puget Consumers Co-op (PCC) in Seattle. Soon thereafter he started selling to natural foods wholesalers, the first one based in Seattle and the second one based in Portland, Oregon. Then in 1983 he expanded his product line by adding to the Original Soysage, Italian and Mexican flavor, and changed from a fresh Saran wrap packaging to vacuum packaging. He expanded his distribution into the San Francisco Bay Area, first through Pacific Trading Co. (Mark Brawerman), then after he folded [sic, relocated], Ben Lee at Quong Hop & Co. took over the distribution. At one point, Quong Hop offered to set up a plant in the state of Washington with Peter overseeing it, in order to reduce freight to Washington. Island Spring also distributed Peter’s products, and he would sometimes get okara from them.

In about Nov. 1985 he introduced his first tofu burger, the Earthling Tofu Vegetable Burger. He bought the tofu for this burger from Boo Han.

On 1 April 1988 Peter sold Pacific Soyfoods to Ed Elin. At that time the company made four soyfood products: three flavors of Soysage, and Earthling Tofu Vegetable Burgers. Peter left and started Northwest Natural Foods, which makes Medallions, salmon or halibut patties/burgers with wild rice. He tried many times to make a salmon & tofu burger but was unable to get the right texture. (His phone number is now 206-866-9681.) Elin purchased his tofu and okara from Boo Han’s, just up the road in Tacoma, Washington. About 12-15 months ago Boo Han changed hands; it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English—although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new system.

Ed continued to make the same four products, and will be getting new labels (with some color changes) next week for two new flavors of burgers. To the Original Earthling, they will add a Barbecued Earthling and a Teriyaki Earthling. The Barbecued flavor should be on the market in late Feb. and the Teriyaki in March. His business is “growing so fast I can’t believe it.” His bestselling product is the tofu burger. He has also become distributor for other companies outside the region; he brings up and distributes Quong Hop’s entire Soy Deli line. He plans to take on some tofu wieners and the JSL line of egg roll wraps and won-ton skins. By mid-summer he plans to have three of his own styles of tofu (soft, medium, and firm) private labeled by Han Yang.

He fully services his own products in about 175 supermarkets on a weekly or bi-weekly basis. His big

accounts are Q.F.C. [Quality Food Centers, the big market in Seattle], and Safeway. He sells only in supers, no natural/health food stores. But he does sell his products to companies that distribute to natural/health food stores, such as NutriSource and the Mountain People's Warehouse down south. The business in natural food stores is too small. Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

1992. Miyazawa, Mitsuo. 1991. [Re: Early shipments of miso and shoyu from Sendai Miso Shoyu Co. Ltd. to Mitoku]. Letter to Chris Dawson of Mitoku, Feb. 22. Based on a request from William Shurtleff at Soyfoods Center. 1 p. Handwritten, with signature. [Jap]

• **Summary:** "In Oct. 1970 Jōsen Shōyu was shipped in 18 liter cans, and red (rice) miso was shipped in 20 kg cans.

"In March 1976 brown rice miso was shipped in 20 kg cans. According to our research, these were the earliest dates that each of these products was shipped."

Chris Dawson adds: "I understand that Johsen was the first with brown rice miso, so this must be the first shipment ever of brown rice miso... I am trying to pull together information about the first shipments of miso and shoyu by Mitoku. It is a little difficult since we do not have the records on hand and some of our early customers are no longer in operation."

Note: Chris Dawson was still working for Mitoku in Tokyo on 27 Dec. 1991. Address: Sendai Miso Shoyu Co. Ltd., Furujiro 1-5-1, Sendai 982, Miyagi prefecture, Japan.

1993. Eden Foods, Inc. 1991. Eden Foods product overview (Leaflet). Clinton, Michigan. 6 panels each side. Each panel: 23 x 10 cm. Feb.

• **Summary:** Two panels of this color leaflet contain a brief history of Eden Foods, plus a chronology of key events in the history of Eden Foods: 1967–The first checking account was opened for Eden Foods, a source of macrobiotic and organic foods in Ann Arbor, Michigan. 1968–Eden Foods, Incorporated became a registered business, with food service, retailing and food processing operations. 1970–Eden Organic Certification Standards were implemented. Eden products were distributed in Michigan and Ohio. 1972–Trade relationship began with Muso Company, Ltd. of Osaka, Japan. 1979–Fire at warehouse reduced records, equipment and inventory to rubble. Two weeks later Eden Foods reopened. 1982–Schmidt Noodle Company, maker of Eden organic pasta since 1976, was acquired by Eden Foods. 1983–Edensoy soy beverage introduced; historic new item in natural foods market. 1985–San Francisco, California sales office and warehouse opened to service the West Coast. 1986–American Soy Products opened to produce Edensoy in Michigan; first aseptic soy beverage plant in the United States. 1988–Eden Foods joined OCIA, Organic Crop Improvement Association, for independent certification of

crops. 1989–Eden and OCIA established standards for food processing as well as growing crops.

Six panels inside the leaflet describe the company's main product lines and give color photos of leading products from each line: Edensoy soy beverage. Organic durum pasta. Organic tomatoes. Organic grain sweetener (100% barley malt). Oils & vinegars. Beans & grains. Fruit products. Seasonings (Sesame Shake = gomashio). Traditional Japanese pasta. Traditional Japanese miso. Japanese soy sauces. Japanese sea vegetables. Japanese oils & vinegars. Japanese chips & crackers. Japanese pickles. Japanese concentrated foods (plum, garlic, kombu). Japanese teas. Japanese specialty foods (macrobiotic).

The company's trademark is now "Making a tradition of good health." Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

1994. Poncavage, Joanna. 1991. Walnut Acres: The farm that Gandhi grew. One of America's pioneering producers of organic food, Paul Keene shows that you can profit by showing respect for the soil. *Organic Gardening* 38(2):58+. Feb. *

• **Summary:** Walnut Acres, in Penns Creek, Pennsylvania, was founded by Paul and Betty Keene. Discusses organic farming, organic foods, natural pesticides, organic fertilizers, biological pest control agents.

1995. Dawson, Chris. 1991. Re: Chronology of early shipments of shoyu and miso from Mitoku to Europe and the USA. Letter (fax) to William Shurtleff at Soyfoods Center, March 8. 1 p.

• **Summary:** 1969–First shipment of organic shoyu (Sakae Shoyu brand) from Fukaya Shoten in Shizuoka prefecture, Japan, to Mr. Sakaguchi of Le Bol en Bois in Paris, in 16 liter tins. This shoyu was made with MOA* ingredients.

1970, Oct.–First shipment of Jōhsen Shoyu and red rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture.

1971–First shipment of Hacho miso from Hacho Miso Ltd. in Aichi prefecture to USA.

1976, March–First shipment of brown rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture. In 20 kg tins.

1980, May–First shipment of Onozaki rice miso from Onozaki Koji-ten in Tochigi prefecture to Oak Feed in Miami, Florida. 84 cartons and 4 kegs.

1980–First shipment of buckwheat miso from Kamegen Jyozo in Nagano prefecture, to Europe. 100 packs of 500 gm each.

1984, Sept.–First shipment of organic tamari from Mansan Shoten in Aichi prefecture to Blake Rankin of Granum in Seattle, Washington. Four x 18 liters.

1984–First shipment of organic soybean miso from Mansan Shoten in Aichi prefecture to Jon Judson of Soy

Source, Christchurch, New Zealand.

1987—First shipment of organic young (*waka*) Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture to USA.

1989—First shipment of organic Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture.

* Note: MOA refers to Mokichi Okada International Association, which is a commercial association related to the Japanese religion *Sekai Kyusei Kyo* which means “helping the world religion.” Its basic tenet is to “Make heaven on earth,” to bring peace on earth and health to all people. There are approximately 700,000 members in Japan. Mokichi Okada lived 1882-1955. The commercial company was formed in 1920 and is now known as MOA Trading Company. Its purpose is to promote natural and organic farming and provide natural products for people. Address: International Sales Manager, Mitoku Co. Ltd., C.P.O. Box 780, Tokyo 100, Japan. Phone: 3-3201-6701.

1996. Caton, Greg. 1991. Tom Futch, Royal American Foods, Global Foods, Manna International, Global Harvest, and Lifeline Sciences International (Interview). *SoyaScan Notes*. April 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tom Futch earned a PhD in food science from Louisiana State University. He worked with A.E. Staley Mfg. Co. in helping to set up their extrusion plant. He has done some milestone projects in the soyfoods industry. He also worked for McCay Bakery. He set up a \$52 million plant, some of which was producing meat analogs, for General Nutrition Corp. (GNC) in Fargo, North Dakota. In 1982 Tom and Carl Hastings set up Royal American (with manufacturing facilities in Decatur, Illinois) and Spectrum Foods (its multi-level marketing [MLM] wing in Blue Springs, Missouri). Greg feels that the products were good (though deceptively labeled) but the management wasn't. There was an exposé in the *Wall Street Journal* about it. There were a lot of bad financial dealings by insiders. Eventually the whole operation was owned by Lawrence Albert; it recently went out of business. In the interim, Global Foods was founded; they sold soy dinners. One person who is quite knowledgeable on the history of these developments is Clyde Womack in Los Angeles (phone 213-395-1949).

Shortly after Royal American was founded, Tom left, went to New Orleans, and in about 1983 set up a new company named Manna International. Greg knows that company well since he did their business plan and worked with their investment bankers. He also has a graphics studio. Soon Manna was making 12 dinners (based on textured soy protein concentrates made by A.E. Staley), plus mixes, malts, and products made from soy isolates. They sold mostly to institutions rather to consumers.

On the board of Manna was a man named Bob Williams, a factory hand with little knowledge of food manufacturing

who was a power seeker; by playing games with investors he managed to get enough proxies to get Tom Futch fired. Greg is not sure why he would want to fire such a talented and dedicated individual. Neil Pfeiffer, who was Lawrence Albert's partner at Royal American, was very effective in setting up institutional accounts. He started his own company in Rockville, Illinois, selling soy entrees to institutions such as prison systems and hospitals. Soon he was purchasing 80-85% of the products sold by Manna International—with \$200,000 to \$250,000 a month.

After Tom Futch was fired by the board of Manna International, he set up his own company named Global Harvest, located in Jefferson (a suburb of New Orleans), Louisiana. Neil Pfeiffer soon began buying from Global Harvest instead of Manna, causing Bob Williams to threaten lawsuits against Tom Futch for “stealing his customers.” Bob seems to have a very weak case. Manna International is now in bankruptcy proceedings. Before Tom Futch left they had a terrible looking balance sheet, with more than \$600,000 in debt, much of it short term and much of it acquired in the early years. The company had a positive cash flow during its last few years. It was actually a blessing for Tom that he got fired when he did.

Greg Caton is now starting a new MLM company named Lifeline Sciences International, that is totally dedicated to vegetarian products. Virtually all MLM companies stand for nothing more than “Make Lots of Money.” Lifeline will be based on “unifying principles.” Greg will continue to manufacture his Heartline products (his is the only company that makes an intermediate moisture meat analog) but he will buy some of his Lifeline products from Lumen Foods, but most from another company. Lumen Foods now has sales of about \$30,000/month. Last year's sales were \$300,000 with a loss of \$2,000 to \$3,000. A major expense was depreciation on machinery.

As far as Greg knows, no company has ever been successful selling dry soy dinners to consumers. He is going to try to be the first. But he will also sell to institutions by offering a Quantity Discount Schedule (QDS) up front. One could argue that Royal American was successful since their gross sales to consumers at one point topped \$1 million a month. They made money but they squandered it. They yielded to the temptation to kite—to spend money, about 50% of which they knew was due in commissions and that should have been put in an escrow account. It takes great internal fiscal discipline to run an MLM company.

After Central Soya purchased A.E. Staley's soy protein concentrate (ProCon 8500) business, it went steadily down hill. Greg thinks that Central Soya is a very inept company; Wall Street people come in and try to throw money at a company; it doesn't work. Extrusion work with soy proteins is very difficult; it is as much an art as it is a science. There are very few extrusion technicians.

Note: Greg wrote a book on MLM frauds, but it was

so controversial that he decided to withdraw it. Address: President, Lumen Food Corp., 409 Scott St., Lake Charles, Louisiana 70602-0350. Phone: 318-436-6748.

1997. Eden Foods, Inc. 1991. Edensoy organic soy beverage: Delicious, dairy-free, nutritious (Leaflet). Clinton, Michigan. 4 panels each side. Each panel: 23 x 10 cm. April.

• **Summary:** A color leaflet. Contents: Edensoy, a wholesome new food. Recipes (3). What goes into Edensoy (ingredients)? What can you do with Edensoy? The right choice for health-conscious consumers. What does certified organic mean? Produced in the U.S.A. with pride, skill, and care. Environmentally responsible, inside and out.

The company's trademark is now "Making a tradition of good health." Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

1998. Coolman, Skip. 1991. 1991 Michigan annual report—profit corporations: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and Securities Bureau. 2 p. May 15. 26 cm.

• **Summary:** Corporate name: Eden Foods, Inc.—corporation No. 187-885. 701 Clinton-Tecumseh Road, Clinton, Michigan 48236. Resident agent: Michael Potter. Incorporation date: 4 Nov. 1969. Name of the successor resident agent: Ron E. Roller. The corporation has 50,000 shares of common stock and 500 shares of preferred stock. Signed by Skip Coolman, Vice-President, 15 May 1991.

On side 2 is a corporate balance sheet. Total assets are \$3,556,000. Corporate officers and directors: Ron Roller, president. William Swaney, secretary. Mark Shirkey, treasurer. 1999. Hoffman, Steven M. 1991. Natural foods in Europe: Old world, new opportunities. *Natural Foods Merchandiser*. May. p. 20, 22-23.

• **Summary:** "Today's market for natural and organic products in the European Community (EC) is estimated by industry sources at roughly \$4 billion at the retail level, with 25 percent of those sales in organic products. These figures are similar to U.S. sales estimates. However, in Europe the business has a much more regional focus in terms of marketing, sales and distribution. This is in part due to differences in language, culture, tradition, policies and politics... The EC is moving ahead to unite its 12 member countries in 1992. The economic unification will bring together 320 million people into a single common market..."

"In the organic sector, industry leaders hope for a single organic standard for the EC, to be voted on this month by the European Parliament. This will hopefully end the confusion caused by a multitude of laws and certification seals, says Tom Harding, industry consultant and vice president of the

International Federation of Organic Agriculture Movements (IFOAM), headquartered in Tholey-Theley, Germany..."

"The German natural products market is a strong one, with retail sales estimated at well over \$1.5 billion... However, it remains divided along philosophical and distribution lines between Neufarm Reformhouses and the organic and environmentally-based 'Green' stores.

"France... has one of the most developed organic agriculture systems in the world. Distriborg, one of the largest natural foods distributors in Europe, services the French retail market, including its own chain of stores, Dame Nature (Lady Nature).

"In Belgium, one major supermarket chain, Delhaize, has incorporated organic produce, snacks and bread into its product mix... The European macrobiotic movement began in Belgium in the 1950s... Watch for industry growth in southern Europe, Italy, Portugal and Spain.

"According to Carl Haest, who was also the sales and development manager for Belgium-based Lima S.A., one of the first macrobiotic food companies in Europe, a vegetarian community called Eden was established outside of Berlin in 1893. 'These people reacted to the ill health they believed was due to the industrialization of the food supply,' he says. 'They embraced three concepts: life reform, earth reform and nutritional reform, and founded the first of the Neufarm Reformhouse stores to supply the products they needed...'

"The Neufarm stores continued to prosper well into the 20th century, and now number more than 2,000 outlets. These stores are organized into a retailer-owned cooperative of approximately 1,300 member owners, and are supplied products bearing the Neufarm label by more than 70 companies under contract... Of the 5,000 total items carried in the Neufarm stores, approximately 70 are certified organic, he says... 'To educate the retailer, Neufarm has established its own state-recognized academy near Frankfurt, Germany, where a person needs to pass four courses—approximately 18 months of study—in order to open a shop.'

"Over the course of time, reformhouses became the German 'health food store,' with an emphasis on dietary products and supplements. In the early 1970s, small 'Green' stores, called 'Naturkostladen,' or natural foods stores, began to appear. These stores offer organic and environmentally sound products, and now number close to 1,400 throughout Germany. They are the main competition of the reformhouses..."

"Supplements are not emphasized in the green stores. 'These retail shops take the nutritional approach,' says Hubert Rottner, one of the organizers of BioFach, a trade show for the green stores held annually in Mannheim. 'The reformhouses were like the natural foods stores of today, but they lost their roots and became "pill" shops. The green stores are more political, more environmentally aware...'

"Today, there is a movement in the Neufarm reformhouses for more certified organic products... The

old world and the new world is not Europe and the United States,' Haest concludes. 'The old world is consumerism and conformism. The new world is sustainability.'" Address: Editorial director.

2000. Eden Foods, Inc. 1991. Eden Foods: Healthy recipes (Brochure). Clinton, Michigan. 28 p. Each page: 23 x 10 cm. June.

• **Summary:** Reprinted with permission from five macrobiotic cookbooks, which are acknowledged on the last page. Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

2001. **Product Name:** Traditional Foods Hickory Smoked Seitan, Seitan Curry, Seitan with Ginger, Seitan with Garlic & Herbs.

Manufacturer's Name: Santa Fe Organics.

Manufacturer's Address: 906 Locust St., Columbus, NC 28722. Phone: (704) 894-3132.

Date of Introduction: 1991 June.

Ingredients: Hickory smoked: Organic wheat flour* & vegetable broth seasoned with whole bean soy sauce, onion, garlic, and natural hickory smoke. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: Retorted in a 1 pint (16 oz) glass jar with a 2-piece canning lid. Retail for \$3.99 on the East Coast.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Lenny Jacobs. 1991. Nov. 15. The Bellemes' new seitan products are now on the market. They are expensive but good. The Bellemes were going to spell seitan as "saytan" but they got a lot of flack from the idea and decided to drop it.

Talk with Jan Belleme. 1991. Nov. 14. Santa Fe Organics (run by John Belleme) started making four seitan products in June 1991. They are made from high-protein wheat flour. The plant is located near Rutherfordton, but not on their property. The principal owner of the business, who lives in Santa Fe, New Mexico, chose the business name. Starting the business took much longer and was much more complicated than expected. They do not yet have a brochure describing the products, but every distributor who has seen them immediately wants to carry them.

Small leaflet (3 panels each side. Each panel: 6.2 x 5 cm. Black, brown, and silver on white. Front and back) sent by John Belleme. 1991 June. "All about seitan." One panel is: "Cooking with Seitan—Traditional Foods Seitan." Another: "Try all Traditional Foods Heat & Serve Seitan Classics: Chili Beans with Seitan. Seitan Sloppy Joe. Smokey Mt. Seitan & Beans. Pasta Sauce with Seitan & Miso. Zesty Pasta & Grain Topping."

Talk with John Belleme. 1992. March 7. He makes his seitan using a seitan machine that he ordered from Muso in Japan.

Talk with a reporter. 1992. March 12. John Belleme believes that it is not good to make seitan starting from vital wheat gluten, since the latter is made from white flour and the finished raw gluten does not absorb flavors nearly as well as raw gluten made from whole wheat. This reporter found that the Bellemes' products had a flavor and texture that was remarkably similar to that of meat.

Labels for all 4 products sent by Santa Fe Organics. 1992. April. 8 by 2.5 inches. Two pastel colors plus white. Illustration of ears of wheat. Hang tag (neckhanger: 2.5 x 2-inch, 6-panel leaflet) attached to neck of jar with a rubber band. "Seasoned Wheatmeal. All natural vegetarian entree. Please recycle this container. Printed on recycled paper. Copyright 1991 Santa Fe Organics."

2002. Walsh, Ami. 1991. Tofu entrepreneur plans tasty Asian joint venture. *Detroit News*. July 22. p. F-14.

• **Summary:** Bruce Rose, president of Rosewood Products Inc., plans to soon start a joint venture with the Zhen Jiang Bean Factory, a tofu manufacturer with 500 employees located several hundred miles northeast of Shanghai. The Chinese company will provide the technology, recipes, technicians, and equipment to make a new line of tofu products—quite unlike anything most Americans have ever tasted. For example "Buddhist Chicken" made of a pressed tofu called *dofu gan*.

Contains a nice biography and photo of Bruce Rose, who has worked in the natural food industry for 20 years. After earning a degree in philosophy at Central Michigan and Wayne State universities, he founded a small co-op in Royal Oak—while holding paying down a job at Michigan Bell. He worked at Eden Foods (Clinton, Michigan) for two years, then in 1980 founded Rosewood Products as a natural foods distributor.

Five years ago when The Soy Plant, his tofu supplier, went out of business, Rose bought the used equipment, invested \$100,000 in new equipment, and began making his own brand of tofu, now named China Rose. Today his company makes about 4,000 lb/week of fresh tofu. Address: Freelance writer, Ann Arbor, Michigan.

2003. Tara, Bill. 1991. Pioneering macrobiotics and soyfoods in London (Interview). *SoyaScan Notes*. Aug. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Starting in the late 1960s, the pioneering work with soyfoods in London was done by Craig and Gregory Sams. They and their parents were Americans, and they had gone to college in America. Their father was employed by the U.S. armed forces as an historian; they spent a lot of their time growing up between America and England. Greg fell out of a tree while going to college in Berkeley in the late 1960s and was paralyzed from the waist down, so he was confined to a wheelchair, but was still very active and innovative. In the late 1960s they set up a macrobiotic

natural foods cafe / restaurant on Portobello Road in London, then changed it into Ceres Grain Shop, a natural foods retail store. As volume increased, they began to distribute their products out of the back of their shop, and in about 1971 founded Harmony Foods Ltd. as a distribution company located in a warehouse on Ladbroke [sic, Latimer] Road. The model and evolution was similar to that of Erewhon in Boston. Harmony Foods was the first natural foods distributor in England, and probably the second in Europe after Lima Foods of Belgium. Soon they were importing macrobiotic foods from Japan, and distributing organically grown grains from England and from The Camargue (a marshy island in the delta of the Rhone River in the south of France), etc.

Among their early Japanese imports were bulk miso and “tamari” (actually shoyu), imported from Muso in wooden kegs. They repackaged the miso and shoyu in glass bottles under the Harmony Foods label in London. This was the first Japanese miso and shoyu sold in England. In about 1972, as soon as Erewhon started having miso and shoyu packed in Japan, the Sams had the same thing done with theirs, then they applied their own labels in London. But they continued to import in bulk as well. A Chinese company in London made tofu and [mung] bean sprouts, then sold the tofu to the Sams brothers; they sold it unpackaged in open trays in water. At that time, tofu was not emphasized much in macrobiotic circles so not much was sold; it was considered too yin. The Sams also sold deep-fried Rissoles filled with TVP instead of meat; as early as 1970 the Rissoles were being made by an Israeli guy (name?) who owned a shop (name?) by the Hempstead Heath. Marigold Foods also used TVP in the mid-1970s.

In 1970 Bill Tara, then a vice president at Erewhon in Boston, passed through London on his way to India. One purpose of his trip was to scout out the possibility of Erewhon setting up a distribution point or center in England. Paul Hawken was president of Erewhon at the time, and Erewhon was importing miso and tamari from both Muso and Mitoku in Japan. Bill and Paul had been roommates in a warehouse in San Francisco, then they took over the Erewhon food store from Evan Root, Paul starting 2-3 months before Bill. In London, the Sams brothers were just opening a new natural foods restaurant in the Notting Hill area so Bill and Paul Petrofsky spent 2 weeks fixing it up. Paul later started Baldwin Hill Bakery with Hy Lerner. Bill stayed in London 2-3 months during this first visit.

In about 1972 Bill returned to London with Russel Demerais, on the Erewhon payroll, again to start an Erewhon distribution center. But Erewhon went through a cash crisis and Harmony foods had grown dramatically. So Bill and Peter Bradford (an Englishman who had come to American in about 1970 and worked for Erewhon doing organic agriculture at Erewhon Farms near Keene, New Hampshire) began to work for the Sams brothers both at Ceres

Grain Shop (the retail store) and Harmony Foods (in the warehouse). Bradford, who now has a very successful natural food store in England named Clearwater Natural Grocer, has been one of the most important promoters of soyfoods in the UK. At this time, Craig Sams set up a bakery. By now, miso and tamari sales had increased; Harmony was still affixing its own label to unlabeled packs.

In 1974 Bill and Peter established Sunwheel as a natural food/macrobiotic distributor. They picked up exotic Japanese imports that Harmony found unprofitable and wanted to drop—so there was little or no competitive feeling with the Sams. By late 1974 Sunwheel Hacho Miso, Mugi Miso, and Tamari were on the market, imported from Muso (Yuko Okada) in Japan. Sunwheel also made granola and peanut butter. Sunwheel never sold any other soyfood products; they had very limited warehouse space and no refrigeration.

Note: On 17 Aug. 1975 Renée Tara wrote William Shurtleff in California. She was living at 30 B Market St., Bradford-on-Avon, Wilts., England. She is writing a European Macrobiotic Cookbook. She requests information on miso and invites Shurtleff to visit.

In about 1977 Sunwheel acquired a retail store that had been started in and by the Community Health Foundation. By 1979 Sunwheel was very successful, but it needed to be recapitalized or sold. So the partners decided to sell it to a larger health food company; Peter kept the retail store.

In Nov. 1975 Bill established the Self Health Center which by 1976 grew into the Community Health Foundation (CHF). By 1976 CHF was offering classes in soyfoods. Paul Jones was the key man with tofu; he taught classes and started making tofu out of his home in the Highgate area. Paul Jones was definitely the first Caucasian to pioneer tofu in England. Simon Bailey, a baker who was originally with one of the first natural foods stores in England, located in Bath, taught about tempeh. These people were experimenting in the kitchen with soyfoods and taught in a sort of an apprenticeship program. Jon Sandifer, who is still with CHF, learned tempeh from Simon Bailey. CHF sold some tofu and tempeh through its own sit-down restaurant named The Seven Sheaves, then renamed The Natural Snack and changed to a cafeteria. A few people did experiments with miso but it never got to a commercial scale in part because of persistent rumors that Lima Foods was going to start making it.

By the late 1970s soyfoods were growing in popularity in the UK. Two separate groups promoted them; the vegetarians and animal rights people (who liked TVP), and the natural foods and macrobiotic people. Marigold Foods also used TVP in the mid-1970s.

Much of important pioneering commercial work with soyfoods in Europe was done by macrobiotic groups in the Netherlands and Belgium. Bill often went there to teach in 1974-79. Tofu, and later tempeh, were emphasized by groups such as Manna in Amsterdam and De Brandnetel in Antwerp.

Macrobiotics was much more active in the Lowlands than in England.

The Sams brothers later started Whole Earth as a marketing company for their jams. They sold it fairly soon. Gregory Sams (disabled) is no longer in the food business; he runs The Chaos Shop in London which sells photographic reproductions of computer-generated chaos patterns. Greg started Realeat Co. and now may be with the Haldane Foods Group. Address: Director, Nova Inst., P.O. Box 4648, Estes Park, Colorado 80517. Phone: 303-586-6265.

2004. Sams, Craig. 1991. Pioneering macrobiotics and soyfoods in England, 1967-1979 (Interview). *SoyaScan Notes*. Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Craig and Gregory Sams were both born in America. Their mother is from Nebraska and their father from Pittsburgh, Pennsylvania. Greg is 4 years younger than Craig. During the 1950s and 1960s the family went to England periodically, largely because Craig's father worked in England as a historian for the U.S. Air Force. In 1965 Craig took a year off from college, traveled around the Indian subcontinent, and got hepatitis. Upon returning to the Univ. of Pennsylvania in Philadelphia for his final year, he fell in with 3 followers of macrobiotics and got interested in macrobiotics. In about Feb. or March of 1966 he went to the Paradox, a macrobiotic restaurant in New York and decided that he wanted to start a similar restaurant in London. In late 1966 [on New Year's Eve] Craig's brother, Greg, fell out of a tree in Berkeley, was paralyzed from the waist down and was confined to a wheel chair—as he still is.

In Feb. 1967 Craig started a restaurant named the Macro at 10-A Airlie Gardens, Holland Park, London. Yoko Ono, John Lennon's wife, was one of the first regulars. She was the first person Craig met in London who was aware of macrobiotics; she had learned about it in Japan. But Craig had to close Macro after 2 months because of zoning problems. In mid-1967 Greg joined Craig in London and in Dec. 1967 they opened a new macrobiotic / natural foods restaurant named Seed at 136a Westbourne Terrace, W.2, London—a few minutes walk from Paddington Station. Soyfoods were a part of the menu. They got Kikkoman shoyu, shiro-miso, and Hatcho miso from a Japanese import company named Mikado-ya, which was run by Japanese in southeast London out of the basement of a house and supplied Japanese embassies in Europe and Africa. At that time Craig thinks there were no Japanese restaurants or retail stores in London. Seed soon started to import Hatcho and barley (mugi) miso from Muso in Japan. Seed never used any of Lima's soyfood products. Seed also used fermented tofu; they mixed it with tahini, spread it on bread, and called it a Rarebit—an alternative Welsh Rarebit, which is cheese on toast. Seed purchased fresh tofu and [mung] bean sprouts from a Chinese company named Lung Kee on Fermoy

Road, Paddington, London, right on the banks of the canal. It was run by one Chinese man who employed about 15 West Indian / Jamaican women who made the foods. Bean sprouts accounted for most of Lung Kee's business. Craig has no idea when Lung Kee started making tofu. In addition to its mainstay, brown rice, Seed served the tofu diced in miso soups, or sauteed with vegetables such as nitsuke carrots, etc., or as a dessert with tofu and apple concentrate whipped with fruit to a thick creamy consistency and chilled. The restaurant did well. It was soon famous for its "groovy vibes" and its free meal of brown rice, veggies, and green tea for those who could not afford to pay. Although the Sams brothers were not "proponents of the brown rice and marijuana regimen" (as Kotzsch had implied in 1985, p. 221), Seed was a favorite hangout for a host of '60s counterculture celebrities such as The Beatles, The Rolling Stones, Yoko Ono, and others. Americans such as Bill Tara, Peggy Taylor, Eric Utne, and Paul Petrofsky also worked there. Then people began to ask the Sams if they could buy staple foods from the restaurant. So food was soon packaged and sold over the restaurant counter.

In about March 1969, to meet the growing consumer demand, the Sams brothers opened Ceres, a natural foods / macrobiotic retail store, at 8-A All Saints Road, 2 blocks from and parallel to Portobello Road. Ceres also did extremely well, with Greg and various managers having the main responsibility while Craig focused on the restaurant. Soyfoods retailed by Ceres included Hatcho and mugi miso, tamari, fermented tofu, and fresh tofu sold in trays immersed in water. Eventually Bill Tara and Peter Bradford took over management of Ceres. Soon other people began to open restaurants and natural foods / macrobiotic stores like Ceres in college towns in England: Infinity Foods in Brighton (at Sussex University; Peter Deadman, Robin Bines, Simon Bailey were involved), Arjuna in Cambridge, Harvest in Bath, and On the Eighth Day in Manchester. In 1970 the Sams developed a large mobile tent macrobiotic restaurant and made a lot of money by taking it to various big rock festivals.

In Aug. 1970 Harmony Foods was established as a natural foods / macrobiotic import, product development, and distribution company. The money from the mobile restaurant was used to rent a building at No. 10 St. Luke's Road in London (only about 300 yards from the Ceres shop), and to import enough products to start a line / range of products under the Harmony Brand (the logo was a yin / yang sign). They stored and packed these in the basement at Harmony Foods. Starting in 1969, the first imports for the restaurant and for Ceres had come from Muso in Japan, and from a macrobiotic society in Vietnam came red rice and green tea. In 1970 they started to import 4-5 tons of organically-grown brown rice from The Camargue in the south of France. Grown by the same man who grew brown rice for Lima Foods, it became the company's main product.

Harmony Foods started out with about 20 customers—16 conventional health food shops and 4 of the new wave of natural foods stores (which the natural foods stores called “grain shops”). Wholefood of 112 Baker Street was the pioneer “organic shop” that started in the 1950s. They were part of the Soil Association, so organic growers used it as an outlet for the first organically grown produce retailed in England. They soon became an important outlet for Harmony Foods as well. In addition a man named Ivan Seruya would collect food (mostly produce) from the organic growers and deliver it to restaurants like Seed and Manna in London. One other product that was grown organically was Pimhill Flour. Harmony Foods was a pioneer in developing new organic growers (such as Stewart Patterson who farmed wheat with horses) and in putting organically grown foods into retail outlets.

By Aug. 1970 Harmony Foods was distributing soyfoods, including Hatcho miso, mugi (barley) miso, and tamari from Muso in Japan—imported in wooden kegs and packed in glass jars. These were the first miso and shoyu products available at retail outlets in England.

In Jan. 1971 Harmony Foods outgrew its building on St. Luke’s Rd. and moved into a larger warehouse at 191 Latimer Road (Maidenhead), a former cosmetics factory. Just before the move, Bill Tara informed the Sams that he was in London to set up Erewhon Europe to compete with Harmony. The restaurant, Seed, was sold in the spring of 1971 and reopened as The Magic Carpet. In 1971 Ceres was renamed Ceres Grain Shop and relocated at 269 A Portobello Rd.

In mid-1972 the shop next to Ceres closed. The Sams took it over and made it into Ceres Bakery. It transformed large amounts of wheat, organically grown in England, into unique and delicious naturally leavened breads. The enzymes in the freshly-milled flour helped to leaven the bread.

When they closed down Seed, the restaurant on All Saints Road, there was still a demand for simple macrobiotic food, so in about Feb/March 1971 they opened Green Genes, a sort of macrobiotic workingman’s café on a much smaller scale. Each person picked up his or her food from a counter; there was no table service. It was open for lunch only whereas Seed had been open only in the evenings.

In 1972 they began to publish a magazine titled *Seed: The Journal of Organic Living*. Bill Tara and Peter Bradford helped with it occasionally. It continued for 6 years. That same year, above Ceres Bakery, they started Ceres Bookstore, which only last for 1½ years.

Meanwhile Bill Tara and Peter Bradford had expanded and transformed Ceres Grain Shop, but in a way that led to extensive shoplifting, so it was scaled back to near its original size and finally sold in 1979 to Jack Weller. By that year all efforts and resources were focused on Harmony Foods, the wholesale business. Peanut butter (non-organic), the first product manufactured by Harmony, was now in two

of the leading supermarket chains, Safeway and Waitrose. Continued. Address: 269 Portobello Road, Notting Hill, London W11 1LR, England. Phone: 071-229 7545.

2005. Sams, Craig. 1991. Pioneering macrobiotics and soyfoods in England, 1967-1979 (Interview) (Continued—Document part II). *SoyaScan Notes*. Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** (Continued): Harmony imported all of its miso from Muso in Japan. The packaging was initially a problem, because the miso was live (unpasteurized) and would cause some containers to burst. In the summer of 1971 many kegs of mugi miso blew their lids off and splattered miso—which has an unappetizing look. In about 1972 Miso started offering flat, rectangular pre-packs of miso in plastic bags. The labels were put on in Britain. In about 1975-76 Harmony started importing genmai [brown-rice] miso. Muso was always Harmony’s only source of soyfoods from Japan.

At that stage, Greg was managing Harmony Foods and Craig was running the bakery and responsible for the store (which they had under management). At the bakery Craig developed the jams with no sugar added; apple juice was used as the natural sweetener. Craig was just about ready to start producing the jams in the bakery. They had another partner in the business, Jerry Sakura (Japanese-American), who bought in in 1974. Even though there was Ceres and Seed and Harmony Foods, they were all part of the holding company which was Yin-Yang Ltd., which was incorporated on 24 May 1967—very near the beginning of these many creative businesses. Somewhere is the plan for Brown Rice Puffies, a breakfast cereal based on brown rice. Its hard to describe now—Craig is sort of cynical today as he sees the rampant spread of hamburgers and Coke. But in 1967 Craig really believed that everybody was at least as clever, if not more clever, than he was, and that by 1971 or 1972 the whole world would be eating natural, whole foods.

Then a problem began to emerge. People would come to Harmony and buy 200 lb of brown rice, a bag of aduki beans, and smaller amounts of this and that. They would go off to their part of the country, bag it up in 1-lb bags, sell it to local stores and undercut the Harmony brand. By the late 1970s it had become a serious problem. Also, when we developed the flakes—wheat flakes, oat flakes, rye flakes, barley flakes—we did it exclusively with organic grain. Then one of Harmony’s competitors came out with non-organic flakes. Suddenly all the contracts we had with farmers for organic raw material—it was very hard for us to honor them because we weren’t selling as much because somebody had scooped out the bottom third of the market, if you like.

Then they went to the same supermarkets who stocked their peanut butter and said, “What about brown rice?” And they said, yes, your right, brown rice does look like a good idea, but we’ll just get it from our white rice suppliers. Its all the same. There’s no point in having two suppliers. As far as

the supers were concerned, it was just a range extension on white rice. They didn't see that there's a difference.

"We began to see that we could never compete with branded, packaged products of the basic staples. We didn't have the capital or the management expertise. We were good at innovating and capitalizing on that, but once the going got tough, we got going, really. So we decided to move into added value foods, but of the same quality. The peanut butter was the first such product. Next came the sugar-free jams—like the "spreadable fruit" in the States. We launched them in the States and Sorrell Ridge picked up on the idea from us and called it "spreadable fruit." Polaner and Smuckers now dominate the market. We are still the leaders in Europe in that category. The jams were our first products under the Whole Earth brand. We are still Yin-Yang Ltd. The company names have changed over the years, to Harmony Foods Ltd. and then we changed the company name to Whole Earth Foods Ltd. but its still the same entity. Only Seed Publications was actually a separate business, not part of the parent company, Yin-Yang Foods.

"In 1977 the Whole Earth brand began. The peanut butter was sold under the Harmony brand. The sugar-free jams took off like a rocket. But we only got them into supermarkets about 2 or 3 years ago (1987-1988). The jams were sold in natural and health food shops in the UK. But export was very big. They really opened up our whole export business because it was a unique product. You could only get it from one place—from us. We appointed one importer in each European country and they've all done very well, because their customers could only get that jam from them. In the early 1980s we used to sell a lot to the States, but that died down through the '80s.

"On May 26, 1982 we decided to put the whole business into liquidation; we filed for bankruptcy—Yin-Yang, Harmony, everything. We were in financial difficulties. The jams were doing well. We had also started importing Health Valley; in 1980 we became the Health Valley distributors in Europe. Also in 1980 we had let in our outside investment, because of the cash flow problems of being a business with all this stock of rice and beans, etc. You can't make a profit on it. Our business skills were not quite as sharp as our awareness of what the market wanted. The bank manager who had the debenture on the company's assets wasn't available until Tuesday of the following week. Over that weekend I learned what working capital and cash flow meant. I had to learn how to read a balance sheet, work out what the working capital of a smaller company would be. And I then worked out a scheme whereby, if the bank stuck it out with us, we could in fact get solvent. We never went into liquidation. We licensed, on a royalty basis, that part of the business to a man named John Guyon. He could use the Harmony trademark, because we were moving over to Whole Earth, which kept peanut butter, jam, and ginseng roots from the 300 product lines we had. And we made

severe cutbacks in staff. In late 1981 the staff size had peaked at 45 employees. I forgot to mention that we opened a cash and carry business on July 4, 1978. This encouraged local retailers to come to our store. You have your warehouse set up like a supermarket, but they buy cases of everything. The peak days were Tuesday and Wednesday. Anybody who could buy by the case was allowed in. It was a walled-off section of the warehouse—in the same building but with a separate entrance. Harmony used other distributors, even in London. Harmony never owned more than two trucks so we were not a distributor. We imported, developed and packaged products."

Now, Craig runs Whole Earth Foods. "We control about 15% of the peanut butter market in the UK, and about 25% of the branded peanut butter market. We're the No. 2 peanut butter manufacturer in Britain. Our sugar-free jams have been in Safeway for two years. We're that dominant players now in that market; Robertson's has withdrawn. Finally, we are getting our jams into supermarkets. We also do organic canned baked beans, organic spaghetti sauce and ketchup, a range of nut butters and salad dressings. All of our products are made with organic ingredients, no added sugar, no artificial ingredients. We've got what I think are the highest standards of any food processor around. I own 99% of the company, Whole Earth Foods Ltd., so I can be as uncompromising as I want. On 14 Aug. 1981 the name of the parent company name was changed from Yin-Yang Ltd. to Harmony Foods Ltd. In Feb. 1984 the name of the parent company was changed from Harmony Foods Ltd. to Whole Earth Foods, Ltd.

In May 1982 my brother, Greg, was a little bit skeptical about the scheme. We (Harmony Foods) had just launched the VegeBurger in April of 1982 as part of our strategy to move into value added products. Greg left the business, doing everything properly financially, then in June 1982 started his own business called The Realeat Company.

Note: Three comments by Gregory Sams: 13 March 2017: (1) In about 1976 at 1 Earl Cottages, Earl Rd., London SE1, England, we moved Harmony Foods there, from west London and expanded it rapidly, going from 5000 to 15,000 sq ft. Our next move was to 55,000. (2) Craig holds dual passports for the USA and UK. (3) Greg has never become a citizen of the UK; he remains a citizen of the USA. Address: 269 Portobello Road, Notting Hill, London W11 1LR, England. Phone: 071-229 7545.

2006. Product Name: [Amasake].

Foreign Name: Amasake.

Manufacturer's Name: Soy & Rice.

Manufacturer's Address: Via A. Canale 8/c, 10078 Venaria Reale (TO), Italy. Phone: 011-402-0380.

Date of Introduction: 1991 August.

Ingredients: Water, dehulled/polished rice, koji (*Aspergillus oryzae* and rice).

New Product–Documentation: Letter and Label sent by Bosco Franca and Garafola Carmelo of Soy & Rice. 1992. Feb. 4 by 2.75 inches. Black on white. Self adhesive. The logo is that developed by Mitoku which states in Japanese characters “*I Shoku Dô Gen*” (Medicine and food come from the same source, or Your food is your best medicine). Store at 4°C [39.2°F]. The company began to make this product in about Aug. 1991. They now make about 10 kg/week.

Note: This is the earliest Italian-language document seen that mentions amazake, which it calls *Amasake*.

2007. *SoyaScan Notes*. 1991. The need for a low-fat, low-calorie tofu (Overview). Sept. 11. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Fat and calorie content of this tofu should be at least 30% lower than that made from whole soybeans. Perhaps the easiest way to make this product would be to run soymilk made from whole soybeans through a dairy separator (such as a plate separator or decanting centrifuge, as is used by the dairy industry to make cream or non-fat milk) to remove the desired amount of fat, just like the dairy industry does to make low-fat or non-fat milk. There is a big potential market for such a product since 1% fat milk has now passed low-fat milk (2%) as the best-seller in American supermarkets.

Talk with Ron Roller of American Soy Products.

1992. Feb. 7. In late 1991 American Soy Products began to work with several separator companies (Westphalia and Alfa-Laval) and the dairy department of Michigan State University to try to use dairy separators to reduce the fat content of soymilk. In short, the traditional equipment and processes don't work, apparently because the fat molecules in soymilk are much smaller than those in dairy milk. The separators, which consist of a series of plates to separate heavy from light molecules, end up separating the solids from the liquids, rather than the fat from the non-fat constituents. Alfa-Laval is still trying to solve the problem, at no charge to American Soy Products.

2008. Cohen, Michael. 1991. Early work with soyfoods, The Farm, Laughing Grasshopper, New England Soy Dairy, and The Tempeh Works (Interview). *SoyaScan Notes*. Sept. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael's interest in soyfoods began in about 1971-72 when he became a vegetarian, while living communally with friends in Boston. He was interested in Eastern religions and philosophies, Ram Dass, Be Here Now, Hatha Yoga, etc. He probably tasted a little tofu at this time.

In early 1972, Michael took a trip to California, first met Stephen Gaskin, and got introduced to Stephen's Monday Night Class—a week before Stephen's community left (on 10 Feb. 1971) for Tennessee to buy the land that in Sept. 1971 would become The Farm. Michael returned to Boston and worked for the next 9 months to save money. In 1973 he

left the USA for a year to travel on an undirected personal spiritual adventure to India, Israel, and the Middle East. While he was in India, various people in Boston with whom he was living communally got more closely involved with The Farm in Tennessee.

In the summer of 1974 Michael moved from Boston to Amherst, Massachusetts, where he got involved in a vegetarian, natural foods restaurant named Equinox. It was a 4-person partnership founded by Judy Roberts (who later married Tom Timmins); Michael was their first employee. Eventually he became a partner. The main dishes in this small natural foods luncheonette were soups, sandwiches, and salads. They occasionally prepared a soy burger from soybeans or a stir-fry tofu dinner entree. Michael worked there for about a year until there were 6-7 partners, then he and his girlfriend (Shelley Moore, who was also working there and was to become his first wife) decided (as did Judy Roberts) to leave. The restaurant soon moved into very large quarters, took on large debts, and eventually went bankrupt.

Michael and Shelley (who was from Memphis, Tennessee) left for a short tour of the southeastern United States. For most of the next 2 years he lived on The Farm in three different locations. Starting in late 1974 he and Shelley lived for 7 months on the 40-acre Virginia Farm, a satellite of the Tennessee Farm in Louisa, Virginia. During that time Michael and Shelley were married. Soybeans were grown along with vegetables and corn on this farm, and the women made soymilk in the kitchen at least twice a week and (as a treat) tofu and/or soyburgers (from mashed soybeans) every week or two. All meals were strictly vegetarian, with no dairy products or eggs. Soymilk was a staple in the diet.

Then they moved to Brattleboro, Vermont, and lived for 1-2 months with Tom and Judy Timmins in their home. Tom was working for Llama, Toucan & Crow, a worker-owned natural foods distributor. Michael then got a job working for Llama. About 6 months later, Llama (which was not making it financially) sold out to their current owner, Barclay McFadden of Stow Mills. At the time of the sale, Tom left Llama and went into partnership with Ira Leviton and Kathy Whelan in the Laughing Grasshopper Tofu Shop.

By this time Michael and Shelley had become much more interested in tofu; they were eating it frequently, had gotten a copy of *The Book of Tofu* by Shurtleff and Aoyagi, and were thinking / dreaming about starting their own small tofu plant in Brattleboro—40 miles from Laughing Grasshopper in Millers Falls. Tom Timmins convinced Michael to become a partner in Laughing Grasshopper rather than becoming a nearby competitor. So Tom left Llama, made a couple of runs into Boston driving the Laughing Grasshopper van to distribute the tofu and feel out the company, and in Feb. 1977 paid \$2,000 to \$2,500 to become a partner in Laughing Grasshopper. He did mostly production, but also delivered tofu to Boston and went to stores to try to pick up new accounts. Tom was more the

“numbers person” and Ira fancied himself to be “the tofu master.” It all worked pretty well. The company had only one product—nigari tofu. Michael does not recall them making or distributing any tofu pies or cheesecakes.

During this period, from early spring until June, Michael and his family lived on a local satellite of The Farm in Montague, Massachusetts, next to Millers Falls.

In Nov. 1977 Laughing Grasshopper moved to Greenfield and changed its name to New England Soy Dairy. At that time Steve Hassell was brought in as a controlling partner; he invested \$40,000 in the company—money which the company needed and did not feel it could obtain from a bank. On 20 November 1976 Michael and Shelley had their first child. Ira told Michael, “I just hope you have your child on a Saturday so that it doesn’t interfere with work.”

Shortly after the move to Greenfield, before the company got back into tofu production, Michael decided to take a temporary leave of absence from the company, in part because he and Shelley decided they wanted to have their second child (soon to be born) on The Farm in Summertown, Tennessee. Michael left in June 1978 and Joshua was born in September. They stayed on The Farm until Nov. 1978. After living in Summertown for several weeks Michael and Shelley (as was the custom) donated all of their savings (about \$5,000) to The Farm—permanently.

On The Farm, because of his experience at Laughing Grasshopper, Michael was considered to be a fairly knowledgeable soy person, so he went to work in the soy dairy, where the main product was soymilk (fortified with vitamin B-12 and usually sweetened with sugar); a little tofu was made occasionally. After Michael arrived, the soy dairy started making much more tofu for the 1,850 Farm residents. Typically they now made tofu twice a week, and 500 pounds each time. The people loved it. No single person in the Soy Dairy was particularly knowledgeable in making soyfoods; it was run by a rotating crew. Tempeh was made in a separate building, the Lab, by Cynthia Bates and Alexander Lyon. Michael had first learned of tempeh when he, Ira, and Tom had visited Dr. Keith Steinkraus at Cornell Univ. But at The Farm he first had a chance to taste it (“It knocked my socks off”); unfortunately, he never had a chance to make tempeh on The Farm. Michael found the experience at The Farm, with its many equipment breakdowns, extreme poverty, and wasted time to be very frustrating; he was used to running a business efficiently.

After 5-6 months, in Nov. 1978, Michael and his family left The Farm—penniless. Returning to live briefly at the Montague Farm and work at New England Soy Dairy, he found that there was no solid position for him, so he was put in a temporary R&D position. But after a month or two, the Soy Dairy no longer felt like the place he wanted to live and work. Fortunately in Jan. 1979, Michael’s father offered to lend him \$30,000 to start his own business. A year earlier, Bernie Cohen at the Montague Farm had invited

Michael to join in starting a tempeh business, but Michael declined saying, “It will never fly.” But this time, within a few weeks, Michael decided to establish The Tempeh Works. The Soy Dairy partners were supportive of Michael’s leaving, especially since they planned to focus on dairylike products and no longer planned to make tempeh. In March of 1979 Michael rented a space for the business in Greenfield and he made his first batch of tempeh there in July. It was served at the annual Soycrafters Convention in Amherst. The company began regular production in September 1979. The Tempeh Works was America’s first Caucasian-run company to make only tempeh in a commercial building. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

2009. Gerner, Bob. 1991. The origins and early history of Westbrae Natural Foods in California, through December 1971 (Interview). *SoyaScan Notes*. Sept. 29 and Oct. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Westbrae started as a natural foods distribution company in July 1970 before it opened a retail store. Bob Gerner worked as the manager of the coffee house at the University of California at Davis. They had their own baker (a woman), and they baked everything from scratch. She was interested in natural foods, and Bob was starting to get interested. Occasionally he would visit the Sacramento Real Food Company (1500 Q St., Sacramento). Bob’s girlfriend, Kristin Brun, who lived in the Santa Cruz mountains, taught Bob how to make granola and bread. So the people at the coffee house at Davis started make and serve granola there. At one point, Bob got so interested in natural foods that he decided he wanted to go into the new field. The baker was also interested, so they decided to open a store, even though they had no money. Bob quit his job as manager of the coffee house but stayed on as a cook. He met four other couples who planned to open natural foods retail stores, so they joined together.

In May 1970 the ten partners (none of whom had any money) opened the Natural Food Works on Olive Drive in Sacramento. (It still exists, though on G Street.) The store opened during final exams of Bob’s senior year, so he skipped his last 3 finals and never graduated. Bob was chosen to be manager, since he was the only partner with any business experience. One of the store’s main products was granola, which Bob made at night on the stove in the coffee house at Cal Davis (on the sly, from midnight until 6 o’clock in the morning).

Buying the ingredients for granola in bulk and merchandise for the store from suppliers involved a lengthy truck route. Since Bob was manager of the store and no one else wanted to do the route, Bob was elected. He drove a truck weekly to the San Francisco area and bought rolled oats from The Food Mill in Oakland, cashew nuts from Hirschfelder in San Francisco, 2 barrels of honey from Les

Garabaldi (a bee-keeper in Canyon), miso and soy sauce from Chico-San in Chico, apple juice from Heinke's in Paradise. Then he stored all the ingredients in his room that he rented in a farmhouse in Dixon, a farm community near Davis. He weighed and bagged the ingredients in his room.

One of the partners suggested that they start a small farm or garden. So on a 1/2-1-acre plot behind a church he planted an organic garden and grew vegetables for the store. But the store couldn't sell them all, so Bob decided to try to distribute them and granola to other young natural food stores in Berkeley.

In late June 1970 Bob attended the founding meeting of Organic Merchants (OM), held outdoors on the side of Mt. Shasta. OM was the first trade association for natural food retailers on the West Coast and the first organic trade association.

In July 1970 Bob started distributing granola, fresh vegetables, and Heinke's apple juice in the company truck. He delivered these foods to various natural food retail stores in Berkeley: Wholly Foods (2999 Shattuck Ave. at Ashby), Good Natured Foods (on Solano), the Granary (and a macrobiotic retail food store on Shattuck near Vine), and Ma Revolution (on Telegraph).

Soon his granola ingredients and other items were added to his line (these were his sole worldly possessions): 2,000 lb dried organic pears (dried on a farmer's lot while camping out in the Santa Cruz mountains), fresh apples, fresh tomatoes, etc. Later, when Bob got too busy, Heinke's delivered their juice to his sister Margaret's house in El Sobrante, and he used her house as a juice warehouse.

Originally the distribution company had no name; it was Bob Gerner doing business as Bob Gerner with no business license. It was strictly cash and carry.

Some of the training in how to run the store was provided by Fred Rohé of New Age Natural Foods in San Francisco in early 1970. One of the partners went to work at Rohe's store, where he learned many of the basics, such as how to stock shelves, mark-up prices, etc. Fred ran this free training program, which took several days, for anyone who wanted to open a natural food store.

After a few hectic weeks as manager of this unwieldy, undercapitalized 10-person partnership, Bob decided to quit. He could see it wouldn't work. But he still kept working for them until someone else volunteered to do the truck run free of charge.

Being out of a job, Bob decided to start a new natural foods company with a smaller number of closer friends—though he still had no money. Bob's sister (Margaret), and his brother-in-law (Bob Ortiz) got together and founded the new company. Kristin was not interested in becoming a partner at that time. Bob found a truck. Ortiz, who was a teacher and a mechanic, retired as a teacher getting \$500 from his pension fund, bought the truck for \$100, and became the truck driver. Originally the company was run

out of Margaret and Bob Ortiz's home. While looking for a warehouse and granola factory, the 3 partners found a vacant market (originally a small Safeway supermarket, more recently a market with a Chinese tenant, but it had had no tenant for 18 months) at 1336 Gilman St. in Berkeley. They signed the lease on 10 Aug. 1970. But the building was zoned for a retail store, so they opened a retail store in the first 12 feet of the building, and used the other 80% for a kitchen and warehouse for their wholesale business. The company still had no name, and in fact it did not have enough money to take down the sign on the building that said "Westbrae." So, what the heck, they decided to call the company "Westbrae Natural Foods." On 2 Feb. 1971 the store opened for business and got a business license.

Companies that began distributing natural foods in northern California before or at about the same time as Bob Gerner were Landstrom and K&L (Kahan & Lessin; both big, old-line distributors of health foods and supplements, from Los Angeles, started in the 1930s), The Food Mill in Oakland (1930s), Chico-San in Chico (about 1965; Bob bought their Spiral Foods soy sauce and miso in bulk wooden tubs from the Osoba Noodle Nook Restaurant [2505 Hearst in Berkeley] and from a garage in San Francisco), and New-Age Natural Foods in San Francisco (Fred Rohé; he started retailing in 1965-67, then began distributing in the early 1970s). Bob recalls that he would go to New-Age Natural Foods, buy many bulk staples such as 50-pound sacks of whole grains (wheat or rye berries) and beans from Arrowhead Mills. Rohé sold these to Bob and others like him from his retail store at wholesale prices. Westbrae had a flour mill to grind its own fresh flour. By about early 1971 Fred opened a separate natural foods wholesale facility (named New Age Distributing) in San Jose. At first they wholesaled only produce. Then they branched out into dry goods, working with Dennis Morgan. The company changed its name to The Well in about 1972-73, then later it was renamed Pure and Simple. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

2010. Gerner, Bob. 1991. More early history of Westbrae Natural Foods in California, 1972 to 1980 (Interview). *SoyaScan Notes*. Sept. 29 and Oct. 1. And 11 May 1992. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Gordon Bennett arrived in 1972. He started as a customer, then began work as a janitor, then became a partner. At that time Bob Ortiz was asked to leave. The first year in business, Westbrae made only \$7,000 profit before any wages were paid to the three partners. Profits were plowed back into the business. Bob lived in the store to save money.

In 1972-73 Westbrae rented a small separate warehouse several blocks away at 1340 San Pablo Ave. They also rented a rat-infested bakery on East 14th St. in Oakland. There

they baked granola and bread; Ganesh (Ganesha) was their bread baker and delivery man. In the late fall of 1973, after less than a year on San Pablo Ave., they moved into a much larger warehouse nearby at 1224 10th Street and incorporated the company. At that time Westbrae began importing traditional, natural foods from Japan. They imported soy sauce in bulk and bottled it at their 10th street facility. Also at that time, Bob transferred all his past company records to the corporation. Bob Gerner owned 28% of the stock, Margaret and Kristin (who had now joined) owned 24% each. Three employees owned stock: Gordon Bennett owned 18%, and Jerry Heverly and Rick Lewis each owned 3% each. The company formed an AESOP (accelerated employee stock ownership plan); the goal was for everyone who had worked for the company for a given time to own shares. As soon as Westbrae formed the corporation and the AESOP, there was constant fighting. They spent more time fighting about ownership than running the business. Prior to incorporation, Bob had made most of the decisions himself; afterwards, though president, he ran the company by committee, and felt that the board should make all the major decisions. This was crazy and rendered Bob ineffective, but he felt he no longer owned the company. Also, he didn't realize that Gordon's main goal was to become the head of the company.

From Feb. 28 to March 2, 1974, Bob traveled throughout Japan, with William Shurtleff as his guide, looking at potential suppliers.

At that time Westbrae had financial problems. They hired Stewart Emery to conduct a self-realization seminar for all the employees in the mountains to give more focus. Before the seminar, the owners had a meeting in which they shared frank feelings about one another—who was effective and who wasn't, how the company was going, etc. Rick Lewis got voted off the board of directors and Gordon Bennett became general manager, replacing Bob Gerner, who was demoted to chairman and president. Stewart Emery later said that the seminar was his only failure. Rick Lewis was asked to work in the retail store as a clerk; he used that as a base to organize a union. On 22 Dec. 1975 the production employees formed a union, named the Alternative Food Workers Alliance. Westbrae was stuck with a union until Gordon Bennett sold the company to Vestro. At one point they may have joined the teamsters union.

Bob and Gordon had an ongoing struggle. In July 1976 Bob left Westbrae (although he was still president) and bought the retail store (Westbrae Natural Foods) back from the company at a very good price. It had been losing money, the company couldn't sell it (in part because it was unionized), and Gordon wanted to just shut it down. Bob closed it for 3 months, remodeled it, then opened it again in late November as Gilman Street Gourmet: Natural Foods & Delicatessen. Shortly thereafter, Westbrae moved its warehouse from 10th Street in Berkeley to Emeryville because the company needed more space and the rent was

much better. Bob was disappointed with the move because the 10th Street warehouse had been just a few blocks from his Gilman Street Gourmet.

In about 1977 Bob, Gordon, Margaret Ortiz and Kristin Brun got together for two sessions at Kristin's house, to discuss and have recorded the early history of Westbrae; a woman whom Kristin found apparently wrote down that history. Kristin now lives in Richmond Annex with Marty Roth, and probably has lots of early Westbrae documents and photos. In July 1977 the Oakland Tribune, then the San Francisco Chronicle each did nice articles about Westbrae. In September 1977, Westbrae Natural Foods moved its warehouse and offices from Berkeley into a much larger building at 4240 Hollis St., Emeryville, California 94608.

Gordon was a good manager, but in 1976, at the time Bob Gerner left, he and Bob were each earning only \$800/month. Gordon began to push for higher salaries, so he called in Lloyd Dubroff and Bruce Handler who ran a seminar called POEM (Plan, Organize, Execute, and Manage). Bob hired them as consultants at the retail store, then they served as mediators on a conflict between Gordon and Bob over pay levels. They tripled Gordon's salary to \$52,000 a year and he liked them instantly. Gordon hired them as consultants on a continuing basis, then he decided they should be on the board. Kristin Brun got voted off the board and they got voted on. In March or April 1979 Gordon announced at a board meeting that he was going to take a sabbatical starting in 6 months and that he didn't want to run the company any more. The board members said "We think you should leave now," so they voted him off the board—much to Gordon's surprise. The board made Lloyd Dubroff the general manager and chief operating officer, and Bruce Handler became CEO. At that point Bob ceased to be president of Westbrae, but he still owned the controlling share of stock—which he continued to own until 1985.

Dubroff and Handler's first move was to draft a budget and get the financial statements up to date. The financials showed that the company was doing very well. Westbrae had just opened a warehouse in the City of Bell (4841 Eastern Ave.) near Los Angeles (named Westbrae South), so Dubroff and Handler bought Celestial Natural Foods, a wholesale company run by Carter Allen on the docks in Oahu, Hawaii that Gordon had been pursuing and that had been a major customer of Westbrae's. Soon they began to increase inventories to 98% in stock, but they suddenly found that they were unable to pay the bills. The comptroller had made serious errors in the financial records, and Westbrae was almost bankrupt. The companies in Hawaii and Los Angeles were both losing large amounts of money, Bob Gerner returned to the company and began fending off angry suppliers and getting permission to string put payments. It was a very stressful time for Bob as he struggled to keep the company he had founded out of bankruptcy.

In Dec. 1979 or 1 Jan. 1980 the board invited Gordon

Bennett back in as general manager. Gordon saved Westbrae. He transformed the company from an importer-distributor to an importer-manufacturer. He closed down the operations in Hawaii and Los Angeles, and sold off Westbrae's distribution rights in northern California—at a pretty good price. He also reduced the number of employees. Westbrae's top money-making products were now imported soy sauce (they imported it in drums and bottled it in Berkeley), and tamari-roasted nuts. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

2011. *Whole Foods*. 1991. El Molino Foods purchased by holding company. Sept. p. 19.

• **Summary:** “El Molino, founded in 1929, is described as the oldest food company in the natural foods industry.” It was sold by American Health Plus Corp. of Pearl River, New York, to a new holding company, El Molino Ltd.

2012. Kennedy, J. Robert. 1991. History of Chico-San's distribution and import operations (Interview). *SoyaScan Notes*. Oct. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Chico-San never really developed its own distribution company. It used other established distributors, such as Balanced Foods in New Jersey, K&L (Kahan & Lessin) in Los Angeles, Landstrom in San Francisco, and Health Foods Incorporated in Chicago. “We had a tough time getting started in selling macrobiotic foods. Chico-San also sold a lot of macrobiotic foods through its mail-order service because most of the large distributors only wanted the best-selling items such as rice cakes, soy sauce, and sesame salt; they wouldn't take the complete macrobiotic line.” In late 1962, shortly after the company was established, Chico-San got a few vans and began a few small routes down to the San Francisco Bay Area and as far north as Redding, distributing 2 types of whole-grain bread (a rice loaf and an unleavened whole-wheat bread) and gluten-nut crackers to the Berkeley Co-op and established (old-line) health food stores. The Berkeley Co-op was one of the first to carry the full line of macrobiotic products. These routes continued until about 1964-65.

Chico-San's first really successful product was rice cakes. They were introduced in 1963 but initially the big distributors showed no interest. That changed starting in about 1964 when a new generation of rice cake machines began to make a better product and a few of the big distributors started to carry them. By 1965 Chico-San's rice cakes and other popular products were being sold at more than 150 California outlets. It was the national popularity of the rice cakes that kept Chico-San from developing its own distribution company, and relying instead on large established distributors—and later brokers.

By about 1966-1967 rice cakes and rice chips (*senbei*)

were beginning to cut a wedge into the mass market nationwide, so Chico-San created the Spiral Foods brand for these mainstream products, keeping the Chico-San brand for the health food market.

Concerning imports of miso and soy sauce from Japan, Chico-San first imported directly from George Ohsawa; he located the manufacturer, put the order together, and shipped it himself. Then came Nippon C.I., which was started by George and some of his disciples in Tokyo, but it didn't last very long. In 1966 Chico-San started importing from Muso Shokuhin in Osaka. But after Muso started selling a lot to Erewhon (which became a major competitor for Chico-San), Bob felt that product quality began to decline, so he began to do all his importing from Ohsawa Japan, a company that was developed by George's sister-in-law (Lima Ohsawa's sister), Flora Tanaka, at George's request. Bob felt the quality of products from Ohsawa Japan was better than from Muso, but the prices were higher and the company was not quite as professional in its business dealings.

Concerning the sale of Chico-San to Heinz, Bob is overall not very happy with the outcome. Granted, rice cakes are now much more widely known and sold in supermarkets, but the loss of Chico-San “put a big hole in the process of selling macrobiotic foods.” Bob and Herman Aihara bought back the macrobiotic line from Heinz and created Ohsawa America in Chico to try to sell it. Early general managers were Marty Roth, then Lane Seiger (who had previously worked for Bob at Chico-San). But the volume was not there on relatively few products to sustain a company profitably and eventually the company ran up debts of \$300,000. At that point Bob basically gave the company to Sierra Natural Foods in Brisbane, California. Sierra had several thousand products; they only paid for the inventory. Bob is now working to develop new products from rice—such as a rice-crust pizza and crackers. Address: Chico, California. Phone: 916-891-0970.

2013. Greenhut, Martin. 1991. Making tofu in 1977-78 for a Rudolf Steiner community in New York. Wanting now to make a commercial tofu kit (Interview). *SoyaScan Notes*. Oct. 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1977 Alan Wilkinson, who lived in New Mexico and who later had a tofu shop in Madison, Wisconsin, sent Marty a tofu kit. Marty and his wife (who lived in Harlemville, New York) used it to make tofu, which they sold to the Rudolf Steiner community in the tiny hamlet of Harlemville, New York—where the community also had a school and a huge biodynamic organic farm. Alan's main work was as a carpenter, working at the community. Now he would like to start making a tofu kit at his woodworking shop and selling it commercially. He is a student of the *Urantia* book, revealed in 1929. Address: P.O. Box 692, Monterey, Massachusetts 01245. Phone: 413-528-1452.

2014. Gilbert, Linda C.; Starr, Sara M. 1991. Natural foods companies broaden their horizons: Organic, vegetarian, convenience dominate industry. *Food Business* 4(20):44. Oct. 21.

• **Summary:** Discusses these three industry trends, plus San-J International, White Wave, and Lightlife Foods.

San-J will be introducing its OCIA organic certified tamari gold label in November. The 10-ounce product will sell for the same price as its non-organic counterpart. “While the majority of White Wave’s \$3 million sales still come from tofu, tempeh products reportedly are not far behind. The company says it is growing at about 30 percent annually, and its first and second generation tempeh products are achieving more than 100 percent growth. White Wave’s latest offering is a soy yogurt product called Dairyless that is made with live active yogurt cultures, including acidophilus and bifidus. Lightlife Foods, another major soy foods company, has redesigned its logo and added two new products, a vegetarian chili and a sloppy joe mix, both made with tempeh.” Address: 1. President; 2. Vice president. Both: HealthFocus Inc., Emmaus, Pennsylvania. Phone: (215) 967-2233.

2015. *Health Foods Business*. 1991. Celestial Seasonings acquires Earth Wise Inc. Oct. p. 10.

• **Summary:** Celestial Seasonings, based in Boulder, Colorado, “is the largest herb and specialty tea company in the United States. Mo Siegel virtually created the herb tea category by blending herbs into flavorful, naturally caffeine-free teas with such whimsical names as Sleepytime and Red Zinger.

“Siegel left Celestial in December 1985, after the company was acquired by Kraft General Foods in 1984.”

A portrait photo shows Mo Siegel.

2016. Smoky Mountain Natural Foods. 1991. Fall/Winter 1991. Natural foods price list [Mail order catalog]. 15 Aspen Court, Asheville, North Carolina 28806. 23 p. 28 cm.

• **Summary:** This is a “Catalogue of natural foods, body care and home products for a healthier, more natural way of life.” This mail-order company, which began operation in Jan. 1991, sells products made by other companies; it does not do any manufacturing and does not have its own brand on any products. Their specialty is macrobiotics products, and they buy their Japanese imports from Macrobiotic Wholesale Co. They sell miso (Miso Master American Miso, Mitoku Japanese miso, Traditional Foods domestic miso, and instant miso soups from Edward & Sons), black soybeans and azuki beans (organic are grown in the USA, non-organic from Hokkaido), sea vegetables, soy sauce (San-J shoyu and tamari, Mansan tamari, Sakae shoyu, Johsen shoyu), San-J teriyaki sauce and Szechuan sauce, Nasoya dressings and Nayo-naise, Natto miso chutney, Sesame miso sprinkle, Tekka condiment (jar or bag), jinenjo tekka, MMB [Mitoku

Macrobiotic, a premium brand] organic farmhouse tekka, seitan, MMB traditional dried tofu, Tofu burger, scrambler, and stroganoff, Sweet Cloud sesame miso munchie, Sweet life miso candy.

John Troy is not connected to this company, nor is John Belleme; John is the wizard, and now he makes sauces from the Wizard’s Cauldron. He also works with John Belleme at Traditional Foods making seitan. Address: North Carolina. Phone: 1-800-926-0974.

2017. Jacobs, Lenny. 1991. The early history of seitan (Interview). *SoyaScan Notes*. Nov. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lenny is not sure who coined and popularized the term “seitan” or when, but he thinks it was George Ohsawa. People who might know for sure include Aveline or Michio Kushi, Yuko Okada, Alcan Yamaguchi, or other macrobiotic old-timers. Lenny first heard the term seitan in about 1969. Erewhon was importing a little package of dried, salty seitan from a macrobiotic exporter in Japan. Yuko Okada of Muso Shokuhin, or his assistant Julia Yamaguchi (daughter of Alcan Yamaguchi) might know details on this product.

Yumié Kono Johns came from one of the macrobiotic centers in Japan and was cooking at the Seventh Inn in Boston. Lenny first learned how to make seitan from her. Before that time neither Aveline Kushi nor Cornelia Aihara knew how to make seitan; they said it was too difficult. Lenny heard from both Yumié and Aveline that seitan was Ohsawa’s recommendation for a high-protein, non-meat food, that was especially good as a snack with beer. It was unbelievably salty and dry, so you almost had to drink something cold (like beer) with it. You could hardly eat it alone. Some people used to cook it with beans instead of pork. For details see Tan-Pops (1972).

In the early 1970s a deep-fried seitan product on a stick, called Tan-Pops was sold at some Boston natural food stores. Whoever made it may well have been the first commercial manufacturer of seitan in America. There were a lot of people making seitan in Boston in the early 1970s. In about 1972-75 Mat Chait of the Ricycle, a really bright and entrepreneurial guy, used to use a commissary at Erewhon’s warehouse to prepare a number of wholesome natural foods, then he had a gas-powered portable steam table that he would put on the back of 5 trucks, each with an umbrella over the top, to sell food at key spots in Boston. Each truck always had a seitan dish.

Lenny and Barbara are revising their book *Cooking with Seitan* to introduce a new generation of “seitaners” (seitan makers), including a lot of people who are making new and innovative types of meat analogs.

Concerning new gluten products, Arrowhead Mills has a “Brother Ron Pickarski formulation” to which you just add water and mix, with no kneading or washing. It comes

in a box and contains some other ingredients in addition to the gluten flour. Farm Foods in Summertown, Tennessee has a similar product. They say it is not vital wheat gluten, and they call it something like “Instant Gluten.”

Concerning early publications on seitan, *East West Journal* ran one early article, and also used seitan in cooking columns before the 1985 article on seitan that he and Barbara wrote. Sandy Chianfoni (Lenox, Massachusetts), who bought Upcountry Seitan from the Donovans, used to distribute the booklet titled “Cooking with Seitan” by Winston Donovan. It was just a small pamphlet to help sell the product. Winston cured himself of his heart disease but succumbed to a brain tumor. He and Ken Burns were consuming quite a bit of wild ginseng. Mark Mayell at *East West Journal* has another seitan cookbook, which is small and about 80 pages long; it was used to promote a company product. Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

2018. Product Name: Seitan Quick Mix.

Manufacturer’s Name: Arrowhead Mills (Importer-Marketer-Distributor). Made in Australia.

Manufacturer’s Address: P.O. Box 2059, 110 S. Lawton, Hereford, TX 79045. Phone: 806-364-0730.

Date of Introduction: 1991 November.

Ingredients: Vital wheat gluten, organic stone ground whole wheat flour, teff flour.

Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard box. Retail for \$2.43 (11/91).

How Stored: Shelf stable.

Nutrition: 75% protein. Per ¼ cup (makes about 2.5 oz seitan): Calories 160, protein 22 gm, carbohydrate 14 gm, fat 1 gm, cholesterol 0 mg, sodium 20 mg, potassium 70 mg.

New Product–Documentation: Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Arrowhead Mills has a new seitan product on the market. Its a dry powder. Just add water, knead for 5 minutes, and its all ready to cook. Who needs it? Its ridiculous.

Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 5 by 7 by 1.75 inch paperboard box. Black, dark orange, light orange, white, tan, and light green. Color photo of two pieces of grilled seitan (with prominent crisscross grill marks) on a white plate with asparagus and russet potatoes, and ears of wheat in the background. “Easy to prepare. Great source of protein. Packaged in recycled paperboard. Satisfaction guaranteed: If not completely satisfied, return box top and brief explanation.” On the back is an illustration (line drawing) of vegan chef Brother Ron Pickarski, with his words of praise for the product. Instructions are given for how to make the seitan (knead with water for 5 minutes), and broth. Cook for 45 minutes in a microwave or simmer for 2 hours. 2 recipes for the finished seitan from Brother Ron’s book *Friendly Foods* are given: Quick fry/grill seitan. San Francisco stir-fry. “Look for additional recipes in enclosed recipe booklet.”

2019. Bolduc, Bill. 1991. Current work with organic foods and soyfoods (Interview). *SoyaScan Notes*. Dec. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** His company is in the process of developing an organic TVP. It is presently produced in Illinois under contract (on a test basis) and he hopes to have the product ready for sale by early 1992. He is in serious discussion with a major player in the grain industry, who he hopes will become his partner. Bill’s company will do the R&D and marketing, not the manufacturing. No name for the product has yet been determined, but he generally refers to it as “Organic TSP” or “Organic Textured Soya Protein.” He doesn’t like the letters “TSP,” which remind many people in the food industry of trisodium phosphate (a crystalline compound used especially in cleaning compositions). (Shurtleff suggests that Bolduc consider licensing the rights to call it “Organic TVP” from ADM via Richard Burket.) He is talking with Health Valley about the product and has a major player in England that will be ready by early 1992. The texture is similar to ADM’s mince (granules).

His company is limiting itself to basic processing of the four major grain commodities grown organically in Ohio and neighboring states: soybeans, soft wheat, corn, and oats. OPC which was just incorporated on 19 Sept. 1991, is already active and has products on the market. Before that, Bill was a broker. In Dec. 1990 OPC shipped its first truckload of organic wheat flour to Barbara’s bakery—under the Organic Marketing label. He is now supplying Health Valley with all of the flour that is going into their fat-free products. He does not yet have any soy products on the market. But he is also looking at doing something with soy milk in Ohio.

Update: 1992 March 14. The development of organic TVP is coming along nicely. Bill has visited ADM in Decatur, and talked by phone with Roger Kilburn (who is head of Protein Specialties at ADM; a very nice man with a background similar to Bill’s). He hopes to license TVP under the name “Organic TVP.” They invited him to introduce the Midland Harvest line to the natural foods industry. Bill declined because of problems with ingredients but offered to help ADM improve their ingredients for the natural food market. Address: President, Organic Processing Corp., 3307 Clifton Ave., Cincinnati, Ohio 45220. Phone: 800-647-2326.

2020. Silver, Jimmy. 1991. History of work with natural foods, Erewhon, Pure & Simple, and Pure Sales. Part I (Interview). *SoyaScan Notes*. Dec. 9 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jimmy was born on 21 March 1942 in Philadelphia, Pennsylvania. His father was an officer in the Army Medical Corps. After a brief stay in Baltimore, when Jimmy was in 4th grade, the family moved to Manhasset, Long Island, New York. He grew up there and graduated

from high school. He graduated from Oberlin College in Ohio, then did graduate work at the University of Illinois in the Inst. of Labor and Industrial Relations. He finished his course work after 18 months, but did not write his thesis, then went to New York as a labor organizer. After receiving a draft notice during the Vietnam War, he enrolled in the University of Michigan at Ann Arbor studying Medical Care Organization. Again he completed his course work for the doctoral program, but facing the doctoral thesis, he dropped out in 1967 or 1968.

He was briefly introduced to natural foods and macrobiotics in 1967 in Ann Arbor by a friend named Earl Rosner. One day, in the midst of the psychedelic counterculture he had a deep inner realization that Americans were destroying their ecosystem, both within and without. He quit using psychedelics and began to eat only natural foods. He read *You are All Sanpaku* and *The Book of Judgment*, early macrobiotic works. He bought the books and “health foods” at an old-line health food store named Zerbo’s, run by Harry Zerbo in nearby Livonia, Michigan. At the Kuwahara trading post in downtown Detroit he bought real Japanese food—such as various sea vegetables, soba, and noodles—and Koda Brothers Kokuho Rose brown rice.

At about this time (1967-68) Jimmy got into the music business, and was sort of in business with a poet named John Sinclair, who was a great bear of a man, who the media regarded as the Pharaoh of the Hippies, and who managed a band named the MC-5. Jimmy and John were partners in a production company named Trans-Love Productions—Gets You There on Time. Jimmy managed a rock group named Iggy Pop and the Stooges. After a few months John introduced Jimmy and Susan (his girlfriend of several years and wife to be) to Jim Semark, another poet who was into macrobiotics, Baha’i, and meditation. In mid-1968 Semark invited Jimmy and Susan to a macrobiotic cooking class taught by Michio Kushi at Semark’s home in Detroit; then they soon met Michel Abehsera—who they thought was wonderful and very down to earth.

Jimmy and his wife, Susan, were married on 23 Oct. 1968 in Ann Arbor. He and Susan were in Ann Arbor at the time the food co-op changed into Eden Foods but they were never members of the co-op or the Zen Macrobiotic Supper Club—for reasons that he cannot now recall. He and Susan were loners and membership in such groups wasn’t their style. Jimmy’s parents still lived on Long Island in New York so when he and Susan visited them, they used to go into the city and buy foods from Arnie Greenberg (who owned Greenberg’s, a Jewish deli-grocery store at 125 1st Ave., near Ratner’s vegetarian delicatessen, in New York City). Arnie carried foods in bulk and packaged natural foods from suppliers such as Infinity. Infinity Foods was a small food warehouse on the 2nd or 3rd floor run by a bunch of Scientologists (including Howard Rower and Jason Hammond [son of John Hammond Sr. of Columbia Records

and brother of the white blues guitarist John Hammond Jr. of John Hammond and the Nighthawks]) who were into macrobiotics and natural foods. Jimmy had their catalog and visited their warehouse. Located in downtown New York at 171 Duane St. on the west side near the commercial produce and meat area, Infinity started in the mid-1960s and was the first company to import macrobiotic foods from Japan—before Erewhon. The Erewhon retail store used to carry Infinity’s products. Then Infinity fell on hard times and disappeared. Arnie would also ship him macrobiotic staples by Greyhound bus. He recalls Gloria Dunn, who looked like a gypsy, and he recalls Eden Organic Foods which was on the second floor of a building near downtown Ann Arbor. Shortly after Bill Bolduc started Eden, Jimmy and his wife left for Los Angeles with Iggy Pop.

Their first daughter, Rachel was born on 23 Jan. 1969 in Ann Arbor. He went to Los Angeles with his band in the spring of 1970. He played music at night then during the day would hang out at the Erewhon retail store on Beverly Blvd. in Los Angeles with Bruce Macdonald and Paul Hawken. He thinks that Michio Kushi had sent either Bill Tara, Bruce Macdonald, or Paul Hawken from Boston to open a branch of Erewhon in Los Angeles in about the summer of 1969. Years later when the store became a wholesale company, it was given the name Erewhon West, since it had different ownership from Erewhon in Boston. At the end of the summer of 1970, he and his wife moved to Los Angeles to live with Aveline Kushi, who had a house on Franklin Ave. in Hollywood. He wanted to work with Erewhon, not in the retail store on Beverly Blvd., but in the little warehouse that they were just acquiring kitty-corner to across the street from the retail store. In about 1970 it began wholesaling and distribution business. But when Jimmy returned in the fall, Hawken was gone; he had moved to San Francisco and gone to work with Fred Rohe. Hawken had apparently had a falling out with Michio and Aveline Kushi. So Jimmy worked with Bruce Macdonald (“a wild man then, as ever”).

Jimmy and his family then moved to Boston, where they lived and worked from Dec. 1970 to 1976. Jimmy had been asked by Michio Kushi to take over the failing restaurants (Sanae and The Seventh Inn) in Boston. Both were owned by Sanae Corporation. Richard Sandler and Warren Durbin had grandiose plans to expand Sanae, so they opened The Seventh Inn on Boylston St. in Boston. It was an immediate failure and they struggled with it for years afterwards—then they just up and left. Paul Hawken at Erewhon had promised to help Jimmy with Sanae.

Then Jimmy worked in Los Angeles with Erewhon West (owned by John Fountain—John Deming was the financial backer) from 1976 to 1980. John Deming’s family controls the Murphy Oil Co. in Louisiana and they are extremely wealthy. Erewhon West had financial troubles trying to compete with Nature’s Best and K&L—big, established distributors. In 1980 Deming fired Fountain and was going

to liquidate the company—just shut it down. So Jimmy and Jeff Hilgert bought the assets from Deming and in June 1980 they transformed Erewhon West into Pure Sales. The company has done various things over the years. Initially it sold natural food consumer products. John Fogg developed the excellent marketing concept for So Tamari in about 1981. When Erewhon went bankrupt in 1981, they voided their contract with Pure Sales to permit the use of their name for a royalty—so within 90 days Pure Sales eliminated the Erewhon name from all of their products; all of the Japanese products became “So” products (So’ Tamari, So’ Ramen, etc.), a name Jimmy coined, which meant nothing but sounded Japanese. (Continued). Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2021. Silver, Jimmy. 1991. History of work with natural foods, Erewhon, Pure & Simple, and Pure Sales. Part II (Interview). *SoyaScan Notes*. Dec. 9 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** (Continued): In 1982 Jimmy and Jeff Hilgert sold their business (which was growing very fast), except for the name (Pure Sales), to Fillmore Foods, a supplement company that wanted to expand into natural foods. Fillmore Foods named the new company Pure & Simple—its rebirth. Bruce Macdonald, always one to see an opportunity, started Pure & Simple making natural tortilla chips in San Diego. The chips were reasonably successful. “It’s not clear to me whether Bruce coined the name Pure & Simple or whether he found it on the back of a Corn Nuts package.”

When Phil Parente / Parenti got involved in raising money to take over New-Age Natural Foods (Fred Rohe’s company), somehow Pure & Simple became part of the package. Bruce Macdonald took the name Pure & Simple, which he controlled, to Parente, offered to trade the name for shares in the company if Parente would continue producing his chips. He also suggested many other product ideas to expand the line. Parente agreed. Then in the early 1970s Parente was sued by the company that makes Corn Nuts because they wanted to use the Pure & Simple name. The two companies fought a legal battle over this name for several years. Parente won. Then Parente began to expand Pure & Simple. An ex-disc jockey named A.J. Celeri got Parente involved in some carrot packing operation that his family had been involved in. Then they got into organic chickens and eggs, and finally opened a big New Age natural foods supermarket in Palo Alto. A good idea that had arrived too early, it was not successful. Soon the whole thing was completely out of hand. In the end, Phil Parente ran the original Pure & Simple into the ground. He had the mafioso from the produce market chasing him, and all the people who had invested money in the company were also after him. Pure & Simple never filed formal bankruptcy papers; it just went down the drain. During this period Pure & Simple and

The Well were both located in the same warehouse [at 795 West Hedding St.] in San Jose. Jimmy thinks that Pure & Simple was the name of the whole company, which owned the line of Pure & Simple branded grocery products, such as jams and juices. The Well was simply the fresh produce distribution arm of Pure & Simple.

The Lundberg brothers, producers of organically grown rice in Richvale, California, had a brother-in-law or a cousin named Dick who worked as a salesman for Shade Foods, a maker of yogurt toppings in Belmont, California. Dick went to Bill Shade and recommended that Shade acquire the Pure & Simple name and run the company. So Shade Foods bought Pure & Simple, which at that time was only producing a line of jams and a few other minor products. They were grossing about \$4,000 a month and they had about \$9,000 a month in expenses. Shade Foods ran Pure & Simple for about a year—into the ground. Roger Hillyard knows this whole story. Roger had a brokerage named Omega and he took Jeffrey Hilgert (who was employed by John Deming at Erewhon—Los Angeles) to Shade Foods in hopes that Jeffrey would take over the marketing of the Pure & Simple products. Jeffrey convinced Shade Foods to sell the company to Deming. Shade agreed to sell. Jimmy later bought Pure & Simple (along with Erewhon—Los Angeles) from Deming. When Jimmy sold his business (Pure Sales) to Fillmore, most of his 100 products or SKUs [SKU = stock keeping unit] were under the Pure & Simple brand. These products went off the market in about 1985-86 when the whole thing, with \$5 million in sales, fell apart. Pure Sales is now primarily a supplier of organically grown ingredients to natural food manufacturers.

Of all the original natural food companies based on the Erewhon format, Eden Foods is the only one that has survived and thrived in its original format. But Eden might not be in existence if it hadn’t been for soymilk.

Note: Jimmy Silver and his wife and family have long lived in Irvine, California. The physical office of Pure Sales has been in Costa Mesa since 1985. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2022. Teeguarden, Ron. 1991. Founding and early history of the food co-op (in Ann Arbor, Michigan) that later became Eden Foods (Interview). *SoyaScan Notes*. Dec. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron ran a business named the Teeguarden-Leabu General Store located in the basement of Marshall’s Bookstore (that sold radical and anarchist literature), which was below the Herb David Guitar Studio at 209 South State Street a few blocks off Main Street in Ann Arbor. The store was financed by his partner and best friend Vic Leabu (pronounced luh-BOE then but luh-BUU now; it’s Romanian not French), and Gloria Dunn worked there a lot. A very kind black lady named Rose from Marshall’s Bookstore

rented Ron and Vic the space for \$50.00 a month because she liked the creative work they were doing and Marshall's was using the basement. The store sold antique clothing from the 1920s, art from local artists, and records; it was not a thrift store.

In about the summer of 1969 Ron and Gloria Dunn started a small food-buying co-op. The co-op was an eccentric, inventive, creative expression—and food was part of it. Co-ops were very new in those days. Within a few weeks some friends, who were also involved in macrobiotic cooking, joined the circle of people that were buying food together. These included Vic Leabu, Tim Redmond, Mark and Nancy Retzloff, and Bob Thorson. The informal group ordered food from Erewhon roughly 3-5 times; Gloria and Ron put together the orders which were probably pre-paid. When the food arrived, those who had participated in the order divided it up at the Teeguarden-Leabu General Store. Ron Teeguarden brought whole grains and miso into the co-op. Vic Leabu's influence gradually increased, while Gloria's declined. At the maximum, no more than 12 people were ever involved with the food co-op to which Ron belonged. It was never thought of as a business, it had no assets nor board of directors, and it never paid any money for the space that it used occasionally. It was just a bunch of people buying together.

When the co-op first started, there was only one little old-line health food store in Ann Arbor; the room was about 10 feet square and it did not sell natural or macrobiotic foods except very expensive brown rice in little bags.

To go back a bit: In early 1968 Ron felt he was becoming severely debilitated—from smoking pot (as was the fashion in those days) and the incessant pressure of being a varsity tennis player at Michigan on a full athletic scholarship and a pre-med student with a heavy academic load. In retrospect, he felt like he almost had chronic fatigue syndrome from burning the candle at every end. So he wrote a letter to George Ohsawa (not knowing that Ohsawa had died) asking for advice. He got a great letter back from Herman Aihara saying, in effect: “Eat miso soup and tekka every day, use them to help you give up coffee, and if you ever come to California, please come and stay with me.” Ron was deeply impressed with Herman's kind and generous offer to a person he didn't even know. So Ron sold his dope to buy an airplane ticket to California, and appeared at Herman's door in long hair and a beard. They took him in and within a week his life changed and has never gone back. “It was a revelation.” He became thoroughly macrobiotic, quit drugs, and returned to Ann Arbor; thereafter his memory became clearer and he dropped everything to start what has become a lifelong interest in Oriental medicine and healing. Ron notes: “I am eternally grateful to Herman as a great man.” Shortly thereafter Ron and Iona, who had known each other for years but never gotten along well, were married; she then quit drugs, started a macrobiotic diet, joined the co-

op, and soon became a fantastic cook. In 1971 she wrote a cookbook titled *Freedom through cooking: The macrobiotic way*.

Jimmy Silver was not a member of the co-op but he was a key influence because he had been macrobiotic for about 2 years, he had an advanced understanding of the philosophy and practice, he had long hair and was very hip, but he did not use drugs—which was very rare at that time. He was so healthy, his wife was very beautiful, and they were both very pure. He managed a rock group named the MC-5 whose motto was “Sex, drugs, and rock and roll.” People looked up to him as the leader of the macrobiotic movement in Ann Arbor. Ron doesn't know where Jimmy got his food—he never came into the co-op. Nor does he recall that the co-op ever had a bank account and he does not see why they would have needed one.

But after 2-6 months the local health department wouldn't let them keep grains in the basement of Marshall's Bookstore, so they moved it to an upstairs location at 514 East William Street; that was when Bill Bolduc and Tim Redmond (with important guidance from Jimmy Silver and help from Mark Retzloff) began to organize the co-op and transform it into a company, which was first given a name—Eden Organic Foods. At that same time, Ron greatly decreased his involvement in the food co-op. He shopped at the co-op quite a bit but he does not recall ever working there. He was busy with his own store and he became motivated to try to finish school (he was in school but carrying a light load), then he wanted to move to California, so he and Iona sold their second-hand general store for \$300.

The question arises: When was Eden Foods established? Ron Teeguarden believes that the idea for Eden Foods was born in mid-1969 with the establishment of the original unnamed food co-op that ordered macrobiotic foods. “That was when the seed was planted, though it didn't bloom until later that year when the name Eden was coined and a real macrobiotic food company came into existence.” Ron is happy to have been connected with this group and to have helped to plant the seed that has become one of America's most successful natural food and macrobiotic food companies—Eden Foods—but he feels that he deserves very little credit for what he did and he certainly does not want to be called “the founder.” “Most of the credit for establishing the company goes to Bill Bolduc.” He is now deeply involved with Chinese herbs, has just raised close to \$1 million, and plans to build an upscale store in Hollywood by late 1992, and eventually take his concept nationwide.

Follow-up talk with Ron. 1993. March 6. The time from 1967 to 1969 is quite hazy in his mind. It seems like another life and another world. “It's a funny, fuzzy feeling to know that I was part of Eden and part of Erewhon when it first started.” Ron also started the Acupressure Center in Berkeley. Ron did not follow developments at Eden Organic Foods after he left Ann Arbor in 1970. He does not recall

having ever met Michael Potter, and he still does not recall that the food co-op ever had a bank account or that he ever signed a signature card for that account (yet “We probably did have a bank account; Maybe Vic got it and I might have signed it. Maybe that’s where the money went every day.”) And he has never been aware that the name “Eden” may have been derived from letters in his last name—but he is not sure that his recollections are correct. His new Herbal Emporium in Hollywood is coming along very nicely. Address: The Tea Garden, 1334 Abbott Kinney Blvd., Venice, California 90291. Phone: 310-450-0188.

2023. Redmond, Tim. 1991. Early work with Eden Foods and macrobiotics. Part I. 1967-1971 (Interview). *SoyaScan Notes*. Dec. 11 and 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** During 1967-68 Tim was going to school at the University of Michigan in Ann Arbor. He was discovering new ways of relating to the world and getting involved in many new things. He was looking for more meaning and direction, and a philosophy of life. The youthful counterculture was full of options. A buddy named Rocky Driver (who was a friend of Jimmy Silver) introduced Tim to natural foods (such as brown rice and wholewheat flour) and to new foods and ideas about food. Tim met Bill Bolduc in class at the U of M in the fall of 1968. Tim had dated the woman Bill later married; they became friends through that woman. Mark Retzliff, who was a mutual friend, became one of the principals (with Haas Hassan) at Alfalfa’s in Boulder, Colorado. In the fall of 1968, the three of them became close friends and all discovered natural foods at about the same time. Jimmy Silver, who was the first to get involved with macrobiotics, was a leader and had a lot to do with introducing it to the others. “Jimmy was 3-5 years older than most of the others interested in natural foods. He was like a sage hipster in Ann Arbor at the time. He had real long, black hair down to the middle of his back. He kind of bridged the beatnik and hip gap. He knew philosophy and had been involved with a lot of things—including managing bands. He was the guy who turned us all on to macrobiotics.” Jimmy, who grew up in New York in Manhasset, would come back from New York City after the holidays with several 100-lb bags of brown rice and some bags of seaweed that he had bought at Infinity Foods or Greenberg’s. Jimmy taught Bill Bolduc about macrobiotics (and shared some of his food with Bill), and Bill taught Tim, Mark, and others. By the summer of 1969 a loose-knit food buying group had been formed and met occasionally to divide up the food they had ordered in the back room the Teeguarden-Leabu General Store, a used clothing store at 211 South State Street in Ann Arbor, one half flight below street level. It was run by Ronnie Teeguarden and Victor Leabu.

In the fall of 1969 Bill and Judy Bolduc, Mark and Nancy Retzliff, Tim Redmond, and Linda Succop rented

a farmhouse together in Saline, Michigan, about 12 miles outside of town. There they read books by George Ohsawa, deep-fried rice balls, ate sesame butter, etc.

In the summer of 1969 a group called the Macrobiotic Supper Club began in Ann Arbor. Bill Bolduc was a key man in getting it going. Its activities increased in the fall after the move to the farmhouse. They met once a month, on Saturday nights, for dinner. As many as 15-20 people would attend. It was about half singles and half couples.

After Bill Bolduc incorporated Eden Organic Foods in Nov. 1969 it was still a non-profit co-op. Jimmy Silver was kind of the senior advisor, but he wasn’t a member. If Eden had had a board, Jimmy would have probably been the Chairman and Bill the CEO. Bill operated the business. He had had a full football scholarship at the Univ. of Michigan in Ann Arbor (he played defensive cornerback), then he had been hurt, so he wasn’t in school at the time. He had free time. They bought a small electric stone mill and put it in the bathroom of the small apartment in which the company was located. They put up some shelves and Bill would bag the grains and foods. Tim (who was in school), Mark, and others would come in to donate their time, give him a hand bagging or taking money at the cash register in exchange for some free food, and talk. Bill was in charge and he put the most energy into the business. He may have paid himself \$20 a week or he may have just worked for free.

In 1970 Tim and Mark left Ann Arbor for the summer. After Tim returned from a month in Europe he found that Bill had converted the co-op to a private business, which he now owned. There were no hard feelings about this since no-one else was actively involved with the business. Bill was very excited because he had discovered Tom Vreeland, a local farmer who was growing organic wheat and soybeans. Bill now started to mill and sell this locally-grown organic wheat. Macrobiotics was growing. In about August, Tim moved to Boston to study the macrobiotic restaurant business. He lived at a study house run by Bill Tara in Cambridge. He studied with Michio Kushi and immediately began to work as a dish washer at “Little Sanae.” In about Aug/Sept. 1970, Bill called Tim in Boston and explained that a new opportunity had arisen. A lady named Cynthia Shevel, who had a store named the Bead Bag at 211 South State St. (where she sold beads, etc.). She wanted to subdivide the space and she offered Bill some space. Bill wanted to expand and develop something like the Erewhon store that he and Tim had seen in Boston. Tim returned to Ann Arbor in Sept/Oct. 1970, borrowed about \$10,000 from his father, and invested it in the corporation in exchange for 50% ownership. Now he and Bill Bolduc each owned half. Tim and Bill worked for 1-2 months in this hip mini-mall building the new location for Eden Organic Foods, Inc., which was one of the first natural food stores in the Midwest—there may have been an earlier one in Chicago. People would soon come from as far away as West Virginia,

Kentucky, and Tennessee to buy bulk foods at Eden. Then Tim returned to Boston to finish his restaurant training; he and Bill wanted to open a macrobiotic restaurant in Ann Arbor when he was done. Tim returned to Ann Arbor in April or May of 1971, looked for a restaurant location, and worked with Bill as the business expanded.

Eden first became a natural foods distributor in about June of 1971, operating out of the back of their retail store at 211 State Street. Eden bought more and more bulk foods from original sources (such as elevators) instead of wholesalers. In about the fall of 1971 they began to bring in small trailer loads of staples from Arrowhead Mills in Deaf Smith County, Texas. In this way they increasingly became the place where buying clubs and co-ops would come to buy their natural foods—just as Eden had done from Erewhon. As Eden's wholesale business grew rapidly, by late 1971 Eden began to distribute its bulk products, especially in the Detroit area, first using a Dodge van, then a couple of refrigerated 20-foot trucks.

After about 5 months of wholesaling out of the back of the retail store, in the fall of 1971, Eden began to rent an inexpensive 4,000-square-foot Quonset hut on North Main Street, nestled by the Huron River in an industrial area just outside of Ann Arbor, to the north. The rudimentary building had electricity, but no plumbing or heating—so Eden paid only \$400 to \$500 a month in rent, and had difficulty keeping fruit juices from freezing in the winter. Bill Bolduc left the retail store to set up the Quonset hut. Tim could not find a place for a restaurant, so he dropped that idea and began to manage the store. Continued. Address: Vice President of Marketing and Sales, American Soy Products, Inc., 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2024. Redmond, Tim. 1991. Early work with Eden Foods and macrobiotics. Part II. 1971 to 1979 (Interview). *SoyaScan Notes*. Dec. 11 and 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the summer of 1971 Tim and Bill Bolduc first met Mike Potter, who had been managing a macrobiotic natural foods store named Joyous Revival in Birmingham, Michigan. Mike was born in about December 1949. There used to be free concerts on Sundays in the park in Ann Arbor. Mike would buy a 50-lb bag of rice from Eden plus a few odds and ends, take it out to the park, cook the rice, and sell it by the bowl to people in the audience.

The growing wholesale business made such large demands on Tim's time that he and Bill began to look for someone to manage the retail store. In the fall of 1971, they hired Mike Potter as manager. For a while Mike worked for little or no wages. In 1972 Bill and Tim offered Mike an ownership position, and gave him about 13% of the total stock in lieu of his service. Bill and Tim now each owned 43.5% of the company's stock. This ownership structure

lasted for about one year. In about Nov. 1972 the retail store was moved from 211 State Street into a much larger location at 330 Maynard St. Potter continued to manage the retail store until about 1974.

When Bill Bolduc left the company in the late summer or fall of 1973, he and his wife Judy sold their shares back to the company. Bill left for a variety of reasons, in part because of a little friction that existed at the time. Tim now ended up owning 51% of the company stock and Michael Potter owned 49%. Tim was the president. This arrangement continued for about a year until about the winter of 1974, when Potter convinced Redmond to give up 1% of his stock for a certain amount of money he knew the company needed at the time. Tim and Mike Potter were now 50-50 partners. Potter became the president shortly thereafter.

In 1974 Tim Redmond made initial contacts with Muso, a leading macrobiotic supplier. Mike Potter now traveled to Japan and developed Eden's contacts with Muso. Eden began importing directly from Japan, but Erewhon had an arrangement with Muso which stated that Muso could only sell products to American natural foods companies under the Erewhon brand. Eventually the growing number of natural foods importers, including Eden, protested this policy. There were meetings in Florida and California. Yuko Okada of Muso and Mr. Kazama of Mitoku came to a meeting that was held in Florida, and in about 1975 or 1976 Eden began to do business with Mr. Kazama of Mitoku, importing under the Eden brand. This move by Mitoku broke the Erewhon-Muso monopoly. Today Eden again imports all of its Japanese products from Muso.

In 1973, after about 1½ years of operating out of the rudimentary Quonset hut, Eden was ready for a bigger warehouse. So they found an old building near the middle of Ann Arbor, several streets west of Main Street, down by the railroad tracks. They shared this building and their trucking with Midwest Natural Foods which was run by Hank Bednarz and David Rock. During this period of 1½ to 2, Eden and Midwest became competitors. Eden sold only dry bulk and packaged natural foods; Midwest sold packaged health food lines, vitamins, and frozen or refrigerated goods. Though the two companies proved to be philosophically incompatible, they were the first to act as a full-line "super distributor."

Still growing, Eden moved to larger location on Platt Road in the spring of 1974. The previous 50/50 ownership structure continued until the summer 1979, when they took in Cliff Adler as a junior partner. Cliff purchased 10% of the company stock at a favorable price, leaving Mike and Tim with 45% each. Shortly after the disastrous fire occurred in Nov. 1979 at the warehouse on Platt Road, several key employees were encouraged to stay with the company by awarding them shares of stock. Also one outside person purchased some stock from the company; this provided money that the company greatly needed. The retail store and

restaurant were made into an independent company (named The Maynard Street Connection, Inc.) from the Eden Foods wholesale operation.

In May 1980 Tim resigned his position with the company, sold most of his stock back to the corporation (he kept only a few shares), and took over management of the retail store and restaurant, which had been the beginning of the company. There were many personal reasons that Tim left. Since the company's future looked uncertain, he received a relatively low price for his stock. He still owns the stock he did not sell at that time. Tim and a friend operated the retail store and restaurant for about 3 years, then they sold it at the end of 1983. In mid-1984 Tim and Mike Potter had lunch and Mike invited Tim to come into the new soymilk venture, American Soy Products (ASP). Tim worked as a consultant for the first 9 months until mid-1985, at which time he became an employee of ASP. Tim is still one of a few people who own shares of stock in Eden Foods; others include Mike Potter and three other people.

Tim is interested in the question: When was Eden Foods founded? He once asked Michael Potter where Michael got that July 1967 date. He recalls that Michael said he had asked the National Bank of Detroit (NBD) in Ann Arbor, which carried Eden's first bank account. It is Tim's guess that the July 1967 date was when Ronnie Teeguarden opened the account for his used clothing store (Teeguarden-Leabu General Store). Tim feels that "Eden Foods did not start in July 1967 by any stretch of the imagination. To say [as a 1991 Eden publication does] that in 1967 'The first checking account was opened for Eden Foods' seems blatantly incorrect." The concept may have started as early as 1967 but the entity and the name did not start until Nov. 1969.

Some people have stated their opinion that the 1979 fire was caused by arson in order to collect insurance money. Tim is sure that these opinions are incorrect. During 1977 and 1978 Eden had been expanding rapidly and had gotten into a tight financial position. Cliff Adler helped the company in this situation. In 1979 they were having the most profitable months they ever had. The business was not in bad financial shape. Moreover the fire cost Eden hundreds of thousands dollars more than they ever recovered from the insurance company. Address: Vice President of Marketing and Sales, American Soy Products, Inc., 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2025. Silver, Jimmy. 1991. Midwest Natural Foods (Interview). *SoyaScan Notes*. Dec. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Midwest Natural Foods was located in Ann Arbor, Michigan, along with Eden Foods but they were not really competitors. Initially Eden was just a retail store. Midwest started from two little companies that were run to do totally different things from Eden and from each other. Hank Bednarz, who is a very sharp businessman from

Detroit, decided to start a little ice cream and yogurt (frozen-food) distributorship. David Rock was trying to wholesale textbooks and other types of books in competition with the student union bookstore. Both got into snack distribution and at some point the two businesses began to overlap and compete a little. Hank, being the smart character that he was, went to David and suggested that they join forces. They did that in about 1970 or 1971 [actually 1974], shortly after Jimmy left Ann Arbor—but Jimmy does not remember the original business name. They would sell anything (including foods) that people wanted to buy. Later the company was named Midwest Natural Foods. They quickly built that into a flourishing business that far outstripped Eden—whose focus was natural foods. Midwest wanted to develop a big business that made lots of money and that they could eventually sell at a large profit. They serviced old-line health food stores, new natural food stores, college stores, etc. There was only a little competition between Midwest and Eden—they were on vastly different tracks. In 1978, Midwest was purchased by Balanced Foods of New York and now is part of the Tree of Life chain. Hank and David made a lot of money when they sold the company—just as they had hoped to. Hank now has a bicycle store in Ann Arbor named Great Lakes Cyclery. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2026. Silver, Jimmy. 1991. Early macrobiotic natural food distributors in America (Interview). *SoyaScan Notes*. Dec. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon: Paul Hawken was a very charismatic, very intelligent person with an exceptional ability to envision potential and then organize people so as to make things happen. He was a real innovator. He has presented many people with a lot of opportunities and challenges to grow and learn. Roger Hillyard, Bruce Macdonald, and Bill Tara also played key roles in building Erewhon in the early days. Bruce and Paul are alike in many ways. Paul's Smith & Hawken is still a major customer of Muso and Yuko Okada, but now they buy Japanese gardening tools by the container.

Essene was owned by Denny and Howard Waxman. They were in Philadelphia (Pennsylvania) and definitely modeled after Erewhon. By 1969 or 1970 they had a very successful little retail store at 320 South Street in Philadelphia. Then they expanded into a wholesale distribution company. Denny is still in Philadelphia lecturing on macrobiotics.

Laurelbrook was near Baltimore, Maryland, owned by Rod Coates, the father of Judy and Dora Coates. Dora Coates was Paul Hawken's first wife. Judy Coates was John Deming's first wife. Jimmy thinks that Laurelbrook started as a wholesale distributor, not as a retail store. Rod died of Alzheimer's disease. Judy Coates lives in Ross, California, and Dora lives in Marin, living over one of Paul Hawken's buildings.

Ceres in Colorado Springs was started by Frank Calpeno. Frank's sister, Wendy, was known as the "Natural Foods Lady." Ceres was an existing account of Erewhon in 1976. Jimmy handled their account. They went out of business causing Erewhon to lose a lot of money.

The Well was located in San Jose, California. Paul Hawken may have stimulated Fred Rohe to start it. It was Fred's first distribution business; he had a very non-exclusive view. Jimmy thinks that "If Fred had never met Paul, Fred would be a rich man today. Paul gave Fred a much bigger vision of what he ought to be doing; he overexpanded and ended up with nothing. Phil Parenti / Parente came along later when a financial opportunity arose. Roger Hillyard and Bruce Macdonald know a lot about The Well. Roger Hillyard runs a coffee shop named Farley's on Potrero Hill in San Francisco. Bruce Macdonald lives in Vermont. Bruce had started a company named Pure and Simple in San Diego or Encinitas. They made corn ships. Bruce folded Pure & Simple into the Well in exchange for stock. Bruce had to fight a lawsuit for several years against a company named Corn Nuts which had the phrase "Pure and Simple" on the back of their little Corn Nuts package. Phil won, so The Well used the trademark Pure and Simple for all their branded products.

Mountain Rose was in Colorado. Bruce Macdonald took it over for a while, then Arrowhead Mills took it over for a while and finally closed it down.

Janus had a little retail store in Seattle, Washington, which started after the distribution company started.

There was a long and bitter history between Erewhon and Chico-San, but they tried to keep things nice on the surface. Part was a difference in personality between Michio Kushi and Herman Aihara. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2027. Silver, Jimmy. 1991. Early non-macrobiotic natural food distributors in America (Interview). *SoyaScan Notes*. Dec. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Arrowhead Mills was started by Frank Ford in Hereford, Texas. Paul Hawken had a strong impact on the company's development. Paul and Frank became good friends—they have much in common. Frank is a big bear of a guy, very charismatic, intelligent, and sweet, who became a born-again Christian. He is a very interesting, wholesome man, a farmer who had unsuccessfully run for political office. Frank has become a sort of figurehead for Arrowhead—whose eminence grise was named Homer. At one point Erewhon cooperated and later they became competitors.

Shadowfax was more like Midwest Natural Foods. Founded by Charlie Smail and located in upstate New York (perhaps Binghamton), they didn't like the macros. Michel

Abehsera was one of their advisors. Michel is now the mentor of a Jewish community in either Montreal or Toronto, Canada.

Llama, Toucan & Crow in Brattleboro, Vermont, was started by Bob Sanders [sic, Swanson], Barclay McFadden, and one other person. Both a natural foods distributor and retail store, the latter opened in 1976. The distribution part was bought by a company that later became Stow Mills. Barclay McFadden became CEO of Stow Mills, and Bob Swanson started Sandpoint Distributing after that.

Lifestream was just across the border in Vancouver, BC, Canada. Arran Stephens started it, and he now owns a company named Manna Milling that is a very big purveyor of natural cereals in Canada and the USA; their brand name is Nature's Path. Lifestream had an eastern branch in Toronto, named Lifestream East, which then became LifeSource, which is now run by an Indian man named Parshan Sahota, who now owns a remnant of what used to be Landstrom.

Tree of Life was founded by Irwin Carasso. Jimmy thinks his family was in the food distribution business in Florida, and he heard they helped to bankroll the company in the early days with \$250,000. Tree of Life was an early customer of Erewhon.

Food for Life in Illinois was another one of these early companies. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2028. Silver, Jimmy. 1991. Re: Key contacts concerning the early history of macrobiotics and natural foods in the United States. Letter (fax) to William Shurtleff at Soyfoods Center, Dec. 17. 2 p. Typed, with signature.

• **Summary:** Contact information is given for: Roger Hillyard (San Francisco, California). Bruce Macdonald (Vermont). Wendy Calpeno VanGemert (Denver, Colorado). Judy Coates Deming Knepper (Ross, California). Dora Coates Hawken (Marin, California). Michel Abehsera (Montreal, Canada).

Some notes: "Hy Lerner, a physician who ran the warehouse at Erewhon [Boston] in the early days subsequently started [with Paul Petrofsky] and owns Baldwin Hill Bakery, bakers of the most wonderful whole wheat breads from the Belgian / French sourdough recipe taught to him by Omer Gevaert, one of the members of the family that owns Lima / Belgium. Omer's nephews are Lark and Kerry Lindsey, who started Arden Rice Cakes in North Carolina (with Lima's technical assistance) and subsequently sold the company to Quaker Oats shortly before Bob Kennedy sold Chico-San to H.J. Heinz."

"Eric Utne, presently publisher of *The Utne Reader* (bankrolled by his wife's Rothschild inheritance, according to an interview with Eric) once was manager of the Erewhon retail store on Newbury Street in Boston. As I recall, Michio Kushi put him there for ideological reasons after Roger [Hillyard] put organically grown potatoes on sale in

the store and everybody freaked out!” Note: Potatoes, as well as tomatoes and eggplant, are “forbidden foods” in a macrobiotic diet because they are members of the nightshade family.

“Eric was married to Peggy Taylor before that [after working at *East West Journal*] and together they started the *New Age* magazine. When they split up, she kept the magazine, which she later sold. Peggy Taylor was Evan Root’s girlfriend when I moved to Boston... Evan later married Barbara Reardon... Barbara was at that time one of the principal students of T.T. Liang, my first t’ai chi teacher, who subsequently moved to Los Angeles and who I see every Saturday morning. He’s 91.” Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

2029. Britt, Jenny. 1991. Breaking new ground: First a restaurant and now a booming wholesale business, Ploughshares is a vegan, organic food company aiming to feed the world. *Here’s Health (England)*. Dec. p. 56-57. • **Summary:** Ploughshares is a highly successful vegan, organic food company based in Glastonbury, Somerset-Britain’s “New Age capital.” A photo shows Michael O’Connell, the company founder, holding up a large tray of cakes. He and his vegan co-workers are deeply committed to an animal-free and more environmentally sensible way of eating. Since 1986 they have established a restaurant (recommended by the Egon Ronay rating service), followed by a wholesaling business, and then last year a cookery school. Michael is both a vegan and a “formidable environmental activist, who runs his own mobile information service called “Spirit of Conservation on the Move”... Formerly a professional musician and record producer with his own band, Michael has been one of the main driving forces behind Ploughshares. Until recently he owned it outright, having put in most of the finance, but in recognition of the equally valuable contribution of others in the business, he has converted it into a co-operative... The core group, who are the main shareholders, are Michael, sisters Fiona and Miranda Bruce, mother and daughter Sophie and Sally Pullinger and Lalita Gordon. Several of this group are musicians who had worked with Michael in the music business. A few years ago, feeling no longer fulfilled by professional music, they set up as an extended family on a smallholding in the Essex countryside and, to help make a living, acquired a mobile catering truck... an eight-tonne kitchen-on-wheels which had previously done service on location feeding hordes of extras in the film *Gandhi*. They renamed it The Emperor Liu An’s Tofu Palace, in honour of the Chinese feudal lord attributed with the invention of tofu, and took to open air shows and festivals, serving vegan food and demonstrating tofu-making.”

The key people then moved to Glastonbury to start a restaurant (on High Street) as a permanent base for their

vegan cuisine. The restaurant was sold in 1991 as more of the company’s energy went into developing and marketing its range of nutritious, often organic cakes. The company has found a building in Glastonbury, which it hopes to convert into an innovative factory—if the money can be raised. The Ploughshares cookery school now teaches 3 students a week on average. They study for a City and Guilds qualification in dairy-free and special diet cuisine. “A Ploughshares Diploma includes tofu and tempeh making on both a domestic and cottage industry scale...” Another feature of the course is the production and use of a leaf protein concentrate (nettles are now used as the raw material) in the form of a nutritious curd named Leafu. Michael became interested in it as a “substitute in British vegan diets for soya beans, whose transportation from abroad uses precious energy. [A company brochure titled “Leaves for Life: Leafu, a high protein food made from leaves” notes that “Leaf fractionation is a way of producing more protein from indigenous plants than any other process. It is highly efficient in terms of energy use and in quantity of protein produced per acre.” Leaf curd contains “proportionally more protein, vitamins A and E, iron, and calcium than is found in meat, eggs, or beans.”]

Michael, a man with big dreams, can be contacted at Ploughshares Organic, Vegan Food Company, 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England.

Note: This is the earliest document seen (Aug. 2013) that mentions “Leafu” (a word probably derived by merging the words “leaf” and “tofu”) or that discusses a commercial food use of leaf protein.

2030. *Catalog Age*. 1991. Walnut Acres. 8(12):71. Dec. *

2031. *SoyaScan Notes*. 1991. The dark side of Michael Potter and Eden Foods (Overview). Dec. 1991 to March 1992. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In interviewing current and former employees of Eden Foods, there were a number of controversial or sensitive areas in which they were willing to share information as long as they were not quoted as the source. Moreover, sensitive information was found in public records.

On 18 Aug. 1968, Gerald Mitton had been killed in an automobile accident collision in Troy, Michigan, while Michael Potter was driving. Michael was convicted of negligent homicide, involving driving under the influence of alcohol. He was sentenced to a fine of \$100, 30 days license suspension, and 1 year probation—a light sentence by any measure. Source: Court records in Potter’s 1989 trial.

Michael Potter never went to college. The story goes that he was about to enroll at the University of Michigan. He got in line to register, decided the line was too long, and thus decided not to go to college.

On Potter’s methods of getting control of Eden Foods. Bill Bolduc hired Potter, but a lot of Potter’s groupies also came along from Detroit. They all worked at the retail store

and the company tried to run itself democratically. Potter took the position that Bolduc was the only one who was in control of the company and began to organize his people. They asked Bolduc to leave. Bolduc left shortly thereafter, from a combination of this peer pressure and from being burned out after working 7 days a week for 4 years straight; he had a family with 2 kids and just got really sick of the whole thing. Moreover there was a strong philosophical conflict; Bolduc wanted to develop local sources of seasonal foods, whereas Potter wanted to import large quantities of foods from China and Japan. Not long after Bolduc left, Potter and his group did the same thing to Tim Redmond.

“The fact that Michael Potter is now in jail (in Coldwater, Michigan) doesn’t surprise me in the least. There is a dark karmic cloud following him around.” First he had to go to jail for 30 days in early 1989 because of charges related to promotion and use of Edensoy as a baby food. An Edensoy pamphlet had stated that Edensoy was “Good for babies.” Then, on 13 April 1988, while he was driving in a car with his partner, Cliff Adler, they were in a serious accident in which Cliff was killed and Michael was seriously injured.

Before Cliff Adler died, he and Michael Potter each owned 36% of the shares of Eden Foods. They had an agreement that if either partner died, the other had the right to buy him out. After Cliff died, Michael exercised his contractual right to buy all of Cliff’s shares from his wife, Fran Adler. We do not know how much Michael paid for this stock.

Michael Potter was sentenced on 12 Oct. 1989 at the circuit court in Ann Arbor; the *Ann Arbor News* ran a major story on the sentencing the next day. The jury convicted Michael of manslaughter [negligent homicide] due, in part, to high alcohol levels in his blood, and disregard of sanctions by various courts on his drinking after driving. It was a near repeat of the tragic fatal accident 21 years earlier, in 1968. Michael had confessed to being an alcoholic—perhaps in hopes of getting the mercy of the court, which he did not get. He was sentenced to 8-15 years in jail—a sentence that he began to serve on 12 Oct. 1989. Fran Adler (actually the Adler estate) received a final settlement after the accident of \$2.25 million, paid by Potter’s personal insurance company and Eden Foods’ insurance company (the latter because the accident took place in a company car). Ron Roller took over as president of Eden Foods—the top man.

After Michael went to jail, Carolyn Roller Potter, his wife and mother of their four children, decided she’d had enough and on 7 Nov. 1990 she filed for a divorce. Court files show that this was the second time she had filed for a divorce—the first being on 1 May 1985—alleging abuse and harassment, particularly when Michael was drinking. She described one incident where he beat her up when he was drunk. However on May 21 (about 3 weeks later) she withdrew the filing; apparently they had had a reconciliation.

But with a divorce in 1990, she would become owner of half of the stock in Eden Foods. Ron Roller, who was president of Eden Foods while Michael was in jail, was Carol Roller Potter’s brother—and thus Michael Potter’s brother-in-law. Some speculate that Michael may have reasoned as follows: If Ron sided with Carol, their combined stock might be enough to let them gain control of Eden Foods and override Michael. Whatever his motives (and Michael would probably deny that had the above motives), Michael fired Ron from Eden Foods in mid-June 1991 and asked him to work for American Soy Products. A clause required Ron, upon leaving Eden Foods, to sell all stock he owned in Eden Foods back to the company. Then in the summer of 1991 Michael installed his younger sister, Nancy Potter, to run Eden Foods.

Records at the circuit court in Ann Arbor show that during the divorce proceedings, Michael tried to do a reverse stock split to give him more control of Eden Foods. In July 1991 Carol got an injunction and stopped the split. Court records show that at that time, stock ownership in Eden Foods was as follows: Michael and Carol Potter (called “the marital estate”) 21,500, Frank Dietrich 3,000, Ron Roller 1,500, Mark Cooke 1,200, Tim Redmond 1,000, and Bill Swaney 900. The final settlement refers to some of Michael’s shares that may possibly be claimed by Ron Roller [nothing ever came of this]. The divorce was finalized in Oct. 1991. As part of the final settlement, Michael agreed to buy from his wife that 50% of their joint shares that would have been hers. He is paying her \$1.5 million for her 36% over a period of 10 years. Thus Michael still owns 72% of the shares of Eden Foods.

In the 1990 divorce proceedings, both partners were asked: “When did the marriage end?” Carolyn gave the date that he went to jail. But Michael, in his response, said “1985.”

Mike is appealing his sentence; his first appeal was unsuccessful, and he is now appealing to the Michigan supreme court. He can telephone out of jail, and he is actively involved in running the company, with the position of CEO.

Before Potter went to jail, he wrote on a form that he had no assets. When the attorney general of the state of Michigan found that Potter in fact did have substantial assets, he sued Potter (in May 1990) and required him to pay rent of \$1,500 a month to be in jail—retroactively from day one.

Concerning the fire that burned the Eden warehouse on 26 Nov. 1979, many of the people interviewed hold the strong belief that the fire was caused by arson. Richard Leviton, who wrote the first major published history of Eden Foods (in *East West Journal*, April 1984), stated: “Most old-timers at Eden agree that the fire was highly beneficial.” One person noted: “There was some dirt prior to the fire, and that (the dealings of some people selling things other than food) caused the fire. I am convinced that the fire was arson. I

know what the fire inspectors found and where it started. I do not know why the insurance company paid off Eden.”

“Michael Potter was a drug dealer. He did this is part to try to raise enough money to pay off Eden Foods’ debts.” The issue, widely discussed, was “Is it okay to take money gained through sale of drugs to support businesses that are for the betterment of society.” A related issue/battle had to do with employees smoking dope at work. Several managers strongly opposed it—but Potter refused to side firmly with the managers. He never got high during the day.

All agree that Michael Potter is an aggressive, very smart (some said “shrewd”) entrepreneurial businessman who deserves a great deal of credit for the success of both American Soy Products and Eden Foods.

Update: Talk with an old-time drug-related close acquaintance of Potter’s. 1992. Nov. 1. Michael is now out of jail on parole; he was released early and has been out for 2-3 weeks. He has to live with his sister but he is back running Eden Foods. While Michael was waiting for the trial after Cliff Adler’s death, he was arrested 2-3 more times for drunk driving. Concerning the fire that burned down the Eden warehouse on 26 Nov. 1979, he is certain that it was caused by arson “aimed as a payback to Michael for non-food activities. It was arson over drug deals. Tim Redmond has never understood what happened. Michael feels no remorse for any of this. The saga goes on.”

2032. Product Name: WestSoy Plus (Non Dairy Beverage with Calcium and Vitamins A & D Added) [Plain, Vanilla, or Carob].

Manufacturer’s Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer’s Address: 1065 East Walnut St., Carson, CA 90746. Phone: 310-886-8200.

Date of Introduction: 1991 December.

Ingredients: Filtered water, whole organic soybeans*, brown rice syrup (brown rice, water), tricalcium phosphate, expeller pressed organic canola oil*, sea salt, vitamin A palmitate, vitamin D-2, riboflavin (vitamin B-2). * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 1 liter (1.06 quart) Tetra Brik Aseptic carton. Retails for \$1.89 (7/92, Maryland).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 8 fl. oz.: Calories 150, protein 6 gm, carbohydrate 18 gm, fat 5 gm (percent calories from fat 33, polyunsaturated fat 3 gm, saturated fat 1 gm), cholesterol 0 mg, sodium 140 mg, potassium 265 mg.

New Product–Documentation: Leaflet (glossy color, front and back, 28 cm) inserted into Natural Foods Merchandiser. 1991. Dec. After p. 42. “Westsoy Plus: Calcium rich with vitamins A, D & riboflavin added.” “The first soy drink to bring your customers a balance of the important nutrients found in dairy milk!” Main benefits and a list of key

nutrients is given.

Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. 3.75 by 6.5 by 2.5 inches. Orange, black, and yellow on white. Color photo of soymilk being poured from a pitcher into a glass. “Lactose free. Great tasting. Only 2% fat. No cholesterol.” Each glass of Westsoy Plus provides the following percentages of the U.S. Recommended Daily Allowances: Calcium 30%*, vitamin D 25%*, riboflavin (vitamin B-2) 25%*, vitamin A 10%*, protein 10%. * = As much as whole cow’s milk.

Ad in Natural Foods Merchandiser. 1993. Sept. p. 23. “Another important first for Westbrae was WestSoy Plus, with calcium, vitamins A, D and riboflavin added. WestSoy Plus was the first soy drink to bring your customers a balance of the important nutrients found in dairy milk. Calcium is added in the form of tricalcium phosphate, naturally occurring in phosphate rock and lime. This is the same calcium that is found in dairy milk... Vitamin A palmitate is used as a vegetarian source of vitamin A.” Vitamin D is derived from torula yeast. Riboflavin is formed through a biofermentation process of ribose, which is a simple sugar. WestSoy Plus has only 2% fat.

Westsoy Plus in ½ gallon Combibloc Aseptic carton purchased on 30 April 1999 at Trader Joe’s in Concord, California. Retails for \$2.19. The front panel states: “Delicious non dairy soy beverage. 7 times more calcium, 10 times more vitamin A, 25 times more vitamin D, 4 times more riboflavin, than Original WestSoy. Contains 33 mg of isoflavones. Made with Organic soy beverage. Lactose free. Plain. A cholesterol-free food.” A table on the back compares the amount of the following nutrients in WestSoy Plus, Original WestSoy, and Whole Milk: Calcium, Vitamin A, Vitamin D, and riboflavin (B-2). The levels for WestSoy Plus and Whole Milk are identical for each.

Half gallon vanilla purchased in April 2000 at Trader Joe’s in Lafayette, California, for \$2.19. Carton copy 1988. Each serving (1 cup) contains 31 mg of isoflavones. By Aug. 2002 the price has increased to \$2.39 per half gallon organic vanilla.

2033. Product Name: Wonder-Vite Biodynamic Loaf.

Manufacturer’s Name: Blissquik Food Products.

Manufacturer’s Address: 37 Hammett St., Townsville, QLD 4812, Australia.

Date of Introduction: 1991.

Ingredients: Organically grown whole grain stoneground wheatflour, soyflour, yeast sea salt, water added.

Wt/Vol., Packaging, Price: 680 gm packed in plastic bag.

New Product–Documentation: Letter and Label sent by C.H. Lee of Blissquik Food Products. 1992. Feb. 17. Plastic bag. 7 by 9 inches. Blue and yellow on white. “Absolutely no chemical additives, colour, or flavour... This loaf with its natural organic minerals, protein, vitamins, and dietary fibre will help give your body vitally needed nutrients. Once

tasted... always loved.” The date this product was launched is unknown.

2034. Eden Foods, Inc. 1991. Eden Foods: Organic quality (Leaflet). Clinton, Michigan. 3 panels each side. Each panel: 21.5 x 9.3 cm. Undated.

• **Summary:** Contents: Organic pioneers. Organic integrity from soil to shelf. CropExcel, growers helping each other. What is organic farming? Why is organic farming important to you? (“Organic growers are the ultimate environmentalists”). What does organic certification mean? Eden organic quality. Quotations from Eden’s organic growers. Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

2035. **Product Name:** Mitoku Goma-Muso Sesame-Miso Sprinkle.

Manufacturer’s Name: Mitoku Co. Ltd. (Distributor). Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Barley miso (whole soybeans, barley, sea salt), toasted whole sesame seeds.

Wt/Vol., Packaging, Price: 2.8 oz (80 gm) plastic bag. Retail for \$2.39 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3 by 3.5 inches. Self adhesive, on a 4.5 by 6.5 inch plastic bag. Reddish orange, yellow, and white. “A traditional Japanese condiment... Sprinkle freely on brown rice, vegetables and other favorite dishes to impart extra goodness, flavor and nutritiousness.”

2036. **Product Name:** Sweet Life Candies: Miso Drops–Natural Brown Rice Malt Candy.

Manufacturer’s Name: Mitoku Co. Ltd. (Distributor). Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Traditional rice malt (selected whole brown rice, organic sprouted barley, pure spring water), natural brown rice miso (whole soybeans, whole brown rice, water, sea salt).

Wt/Vol., Packaging, Price: 1.76 oz (50 gm) plastic bag. Retail for \$1.19 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 4.5 by 6 inches. Plastic bag. Gold and white on brown with see-through window. “The original sugar-free sweets from Japan... Sweet Life Candies

contain no sugar or any artificial sweetening whatsoever; just the rich goodness of rice malt, with exciting natural flavors. The perfect taste treat for all the family.” There are 12 other flavors in this natural candy line. The miso flavor is hard, not chewy.

2037. **Product Name:** Jinenjo Tekka: Tekka Condiment.

Manufacturer’s Name: Mitoku Co. Ltd. (Distributor). Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Hatcho miso (whole soybeans, water, salt), jinenjo (wild mountain yam), lotus root, carrot, burdock, ginger, toasted sesame oil.

Wt/Vol., Packaging, Price: 3.5 oz (100 gm) plastic bag. Retail for \$5.99 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3.5 by 2.75 inches. Self adhesive, on a 6 by 4.5 inch plastic bag. Blue on white.

2038. **Product Name:** Mitoku Natto Miso Chutney: Barley/Soybean/Vegetable Relish.

Manufacturer’s Name: Mitoku Co. Ltd. (Distributor). Made in Japan.

Manufacturer’s Address: C.P.O. Box 780, Tokyo 100-91, Japan. Phone: 33-201-6701.

Date of Introduction: 1991.

Ingredients: Barley, whole soybeans, barley malt, kombu, ginger, water, sea salt.

Wt/Vol., Packaging, Price: 10.5 oz (300 gm) plastic crock. Retail for \$3.99 (11/91, USA).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased from Smoky Mountain Natural Foods, Asheville, North Carolina. 1991. Nov. 15. 3 inch diameter. Self adhesive. Red and yellow on metallic gold.

Soyfoods Center product evaluation. 1991. Dec. 3. Good name! This condiment, which resembles Indian chutney in its chunky consistency, but is a little more salty and less sweet, is actually a type of Finger Lickin’ Miso (namé miso). Flavor: Very nice. Label design: Terrible–too hard to read.

2039. **Product Name:** Mitoku Macrobiotic Mansan Organic Tamari: Traditional Wheat Free Soy Sauce.

Manufacturer’s Name: Mitoku USA (Importer). Made in Japan.

Manufacturer’s Address: Tokyo, Japan.

Date of Introduction: 1991.

Wt/Vol., Packaging, Price: 10 fluid oz bottle.

How Stored: Shelf stable.

New Product–Documentation: Label seen at Open Sesame

in Lafayette, California. 1991. Feb. 16.

Mitoku Company Ltd. 1992. "Mansan Organic Tamari: Incomparable Quality and Flavor." *Natural Health*. Feb. p. 126. This 1/2-page ad has an illustration by Akiko Aoyagi Shurtleff of a man standing on the rim of a huge vat ladling liquid tamari into floating keg. A bold symbol of the character for "tamari" appears in a box to the upper right. "Mansan Organic Tamari is available in North America under the Mitoku Macrobiotic and Emperor's Kitchen label. Exported exclusively by Mitoku Co., Ltd., Tokyo, Japan."

2040. Clearspring Ltd. 1991. Traditional Japanese soya sauces (Leaflet). London: Clearspring. 2 panels each side. Each panel: 22 x 15 cm. Illust. *

2041. Clearspring Ltd. 1991. Macrobiotic quality wholefoods (Leaflet). London: Clearspring. 1 p. 1 sheet. 21 cm. *

• **Summary:** This leaflet advertises Clearspring's line of largely Japanese malt syrups, Japanese teas, sea vegetables, miso, soya sauces, amazake, umeboshi, pasta, sauces and crackers.

2042. Crane, Milton G. 1991. What can be done for osteoporosis. Weimar, California. 8 p. Undated. Unpublished manuscript.

• **Summary:** An excellent introduction to the subject. Things to avoid: Alcoholic beverages, coffee, tobacco, tea, and all soft drinks. Refined foods, such as gluten & soy meat substitute, soy products made from soy protein isolate and concentrate. Be sure to get: Calcium (calcium citrate, gluconate, or lactate is better than calcium carbonate), 6-8 glasses of pure fluoridated water daily, etc. Address: M.D., Preventive Endocrinologist, Weimar Inst., Box 486, Weimar, California 95736. Phone: 916-637-4111.

2043. Koepf, Herbert H. 1991. Ehrenfried Pfeiffer: Pioneer in agriculture and natural sciences. Kimberton, Pennsylvania: Bio-Dynamic Farming and Gardening Assoc., Inc. ii + 31 p. Illust. No index. 23 cm. [21 ref]

• **Summary:** Contents: Introduction, by Heinz Grotzke. Introductory remarks. 1899-1920, the early years. 1920-1925, training and spiritual schooling (with Rudolf Steiner in Dornach, Switzerland). Pfeiffer as scientist and practitioner. The method of sensitive crystallization. Ehrenfried Pfeiffer in the United States (1940+). Ehrenfried Pfeiffer, researcher and teacher.

Ehrenfried Pfeiffer was born on 19 Feb. 1899 in Munich, Germany. His "maternal grandfather, who was a renowned apothecary, introduced him to medicinal herbs, taking the boy to his laboratory to show him chemical reactions and thus awakening the love for natural phenomena which became so important for Pfeiffer throughout his life. As a schoolboy, Ehrenfried liked to be by himself in woods and fields, as both then and later, he was familiar with the

elementary beings." Shortly after World War I, in Stuttgart, Germany, "Pfeiffer met Rudolf Steiner, who was then lecturing on social renewal to a large assembly of workmen. This meeting determined the further course of Pfeiffer's life" (p. 6).

From 1920 to 1925 Pfeiffer worked and studied with Rudolf Steiner during construction of the Goetheanum in Dornach, Switzerland. Steiner was "a scientist of the spirit" (p. 8). Pfeiffer lived in the United States from 1940 until his death on 30 Nov. 1961; his main interest was biodynamic farming and gardening, in both its spiritual and physical aspects.

Page 17: "During 1938-39 Pfeiffer and Sabarth accepted an invitation to the Hahnemann Medical College in Philadelphia, Pennsylvania, U.S.A. to install a laboratory and to evaluate tests on blood samples taken from patients who suffer from cancer. On June 7, 1939 Pfeiffer wrote:

"Our work here went quite well. We limited ourselves to a statistical evaluation of clinically well-established pathological symptoms. Over one thousand such cases were studied in a little over a year, all verified histologically-pathologically. Definite indication for cancer positive 83%, for cancer negative 93%. Now scientific objections are no longer possible. In the future all will depend on how intelligently and faultlessly the work is performed."

"This work earned Pfeiffer an honorary M.D. from the University of Pennsylvania [sic, from Hahnemann in 1939]. Today, laboratories in a number of countries make the crystallization method available for medical diagnosis."

"Ehrenfried Pfeiffer in the United States (p. 19-21): In 1926, Charlotte Parker and her friends acquired the land of the Threefold Farm in Spring Valley, New York about 60 minutes by car northwest of New York City. In the course of time an Anthroposophical residential and conference center emerged, with a guest house, school, and a number of cultural pursuits. This is the place where from the mid-1940s onwards the work of Pfeiffer and his coworkers found a home."

"From 1932 to 1939 Pfeiffer made four or five visits to the United States, primarily attending summer conferences at Threefold Farm and also Sunrise Farm in Maine, where for some time there was a laboratory staffed by one of Pfeiffer's coworkers. From 1948 until 1980 the summer conference of Threefold Farm was a regular annual event.

"In 1930 biodynamic activities in the U.S. were in progress in a dozen states: the Bio-Dynamic Farming and Gardening Association was founded and incorporated in New York in 1938, and by 1939 between thirty and forty farms and a like number of gardens followed the biodynamic method. *Short Practical Instructions in the Use of the Biodynamic Method of Agriculture* (1935) by Pfeiffer and the translation of his textbook *Soil Fertility, Renewal and Preservation* (1938) provided the urgently needed literature. During the fourth biodynamic conference in 1939 Pfeiffer

spoke about the need for a school of biodynamic agriculture.

“H.A.W. Myrin and his wife Mabel Pew Myrin of the Sun Oil Company, owned 335 hectares (838 acres) of Agricultural Land in Kimberton, Pennsylvania, about 40 miles west of Philadelphia. I met Mr. Pfeiffer and because both shared an interest in biodynamic farming, in 1940 he invited Pfeiffer and his family to move to Kimberton. On the two dairy farms, which also served for development and demonstration, a farm school was established for several years. Thirty to forty students assembled for a theoretical and practical one-year course. In addition to this, winter courses of two to six weeks’ duration took place from 1941-1943, with lectures, laboratory practice, and field instructions. About this Pfeiffer said.

“The intention is to educate the practical farm manager rather than the textbook scientist, However, basic sciences are necessary to enable the farmer to work with full consciousness. But all fields of knowledge will be treated with a view to the daily practical problems. The goal is not to educate the scientist, but to enable a young farmer to become an independent and skilled agriculturalist and to learn how to combine soil conserving methods with extensive economic farming.”

“Cropping, dairy farming, soil conservation, composting, crop rotations, greenhouse cultivation, beekeeping were all important components of the program. Hundreds of students, teachers, lecturers, local farmers and other visitors—among them J.I. Rodale and Paul Keene—frequently came to Kimberton.”

“However, as often happens between strong personalities, beginning in 1944 a small matter made further cooperation between Myrin and Pfeiffer impossible: Pfeiffer had to look for another place for his work.”

“At the beginning of March 1944 after two months of exploring, actively supported by Peter Escher, Pfeiffer found in Chester, New York a 114 hectare (285 acre) dairy farm with 40 hectares (100 acres) of tillable land. Students could not be accommodated there, but the farm was suited for development and research.” Pfeiffer worked hard. “Indeed, he overworked himself, and as a result fell seriously ill: Pfeiffer had to spend two years in the hospital in Pomona [New York], followed by an extended time of convalescence. Mrs. Pfeiffer had to shoulder the burden of carrying on with the farm and bringing up the children” (p. 19-21).

An insert in this book states: “Please consider supporting the oldest non-chemical agricultural movement in the world—Biodynamics! (We predate ‘organic’ agriculture by some two decades).”

2044. *SoyaScan Notes*. 1992. Vitasoy soymilk is now sold on a special display stand at Safeway supermarket in Lafayette, California (Overview). Jan. 25. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Four flavors of Vitasoy soymilk (Vanilla

Delite, Rich Cocoa, Carob Supreme, and Creamy Original) in two sizes (liter or 250 ml) are now sold at the Safeway supermarket in Lafayette. They are sold on a surprisingly large stand, located about 6 feet from the tofu section of the produce case. The stand, constructed of 4 white plastic shelves (with “Vitasoy” written on the second and top shelves) and 4 vertical red plastic tubes as posts (2-inch diameter), is about 32 inches on a side, and 5 feet high. The Vitasoy Tetra Brik cartons occupy the bottom two shelves on the stand. On the top two shelves is Michelle’s Natural Pasta (dry). The price of the liters is \$2.29 each, regardless of the flavor. The packs of 3 x 250 ml each retail for \$2.19.

A quart of cow’s milk (fortified with vitamins A and D) sells for the following prices at Safeway supermarkets: whole \$0.67, low-fat (2% fat; protein fortified) \$0.66, extra light (1% fat; protein fortified) \$0.65, nonfat \$0.62.

Note that the price of Vitasoy soymilk at Safeway is about 21% more expensive than it is at a typical large natural food store.

2045. In Jan. 1992 *East West Journal* was sold and renamed *Natural Health: The Guide to Well-Being*. 1992.

• **Summary:** The first few issues were titled *East West Natural Health*. This was one key event in marking the decline of East Coast macrobiotics. Another was the bankruptcy of Erewhon.

2046. **Product Name:** Mori-Nu Silken Tofu (Chinese Label) [Firm, or Soft].

Manufacturer’s Name: Morinaga Nutritional Foods, Inc. (Importer). Made in Japan by Morinaga Milk Co. Ltd.

Manufacturer’s Address: 5800 South Eastern Ave., Suite 270, Los Angeles, CA 90040. Phone: 310-787-0200.

Date of Introduction: 1992 January.

Wt/Vol., Packaging, Price: 10.5 oz (297 gm) Tetra Brik Aseptic carton.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Almost all of the writing on these products is in Chinese; they are sold to Chinese Americans. Letter (fax) from Art Mio. 1996. May 14. “We first began to sell Chinese Label Mori-Nu Tofu in January 1992... This past fiscal year, which ended in March, saw a surge in sales which approached a 50% increase.”

Poster (color, 8 by 11 inches, undated) sent by Art Mio. 1996. May. Shows one carton each of Chinese Label Mori-Nu Tofu firm and soft on a cutting board behind a knife and six small cubes of tofu. In the upper left is written in Chinese characters (with English text below them): “Smooth silken texture. Long shelf life. No preservatives.”

2047. *Natural Foods Merchandiser*. 1992. An NFM call to action: New regulations to bring changes to industry. Industry must work with lawmakers to protect its right to promote and sell key products. Jan. p. 14-15, 18. [4 ref]

• **Summary:** Four federal regulatory proposals could have serious effects on the dietary supplement and herbs industries. The main proposal is the FDA's Nutrition, Labeling and Education Act of 1990. The NLEA was approved by Congress in an attempt to revise outdated provisions of the 54-year-old federal Food, Drug, and Cosmetic Act. FDA released this 2,000-page document in Nov. 1991. The NLEA proposal would allow health claims in only four areas: calcium and osteoporosis; fats and heart disease; fats and cancer; and sodium and hypertension. Thus, for example, health claims would not be able to be made for fiber despite the fact that its use is widely recommended by professional health, nutrition, and medical groups. The new labeling rules are likely to ban nearly all health claims (including those based on sound scientific studies) for supplements, herbs, and many foods; the health-promoting effects of herbs are rarely due to nutrients.

FDA also proposes to switch from the U.S. Recommended Daily Allowances (U.S. RDAs) to the Reference Daily Intakes (RDIs). RDAs are generally based on the highest recommended allowances set by the Food and Nutrition Board of the National Academy of Sciences. RDIs are calculated as a population-based mean, and are 10 to 80 percent lower than the RDAs.

Furthermore, the FDA Dietary Supplement Task Force is planning to reclassify nearly all supplements, except perhaps simple vitamins and minerals such as A, B, C, D, E, etc. in a new way that will virtually force them off the market except by prescription.

These provisions are set forth in H.R. 3642/S.2135. In 1976 Congress overwhelmingly passed the Proxmire Law which protects and ensures the rights of consumers to purchase dietary supplements in the potencies, combinations, and categories that the consumer feels are appropriate.

2048. Hillyard, Roger. 1992. Work with Nihon CI, Muso, Mitoku, and Erewhon (Interview). *SoyaScan Notes*. Feb. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Nihon CI in Tokyo exported a lot of foods to Chico-San under the Lima label, and a small amount to Infinity Foods under the Infinity label.

Muso's first U.S. customer was Erewhon—via Michio Kushi's connections. Mitoku's first customer was also Erewhon. Erewhon soon began importing from both in order to get the best price and quality. Mr. Kazama (founder of Mitoku) was much more resourceful. The import duties varied wildly depending on how the customs officials classified the foods.

The meetings of natural food distributors were initially intended only for macrobiotic distributors. The first one was at Pajaro Dunes in California.

New Age Distributing (founded by Fred Rohe) became part of The Well, which became part of Pure & Simple. Charlie Smail started Shadowfax. Address: Farley's Coffee

Shop, #1315 18th St., Potrero Hill, San Francisco, California 94107. Phone: 415-648-1545.

2049. Leabu, Vic. 1992. History of Eden Foods (Interview). *SoyaScan Notes*. Feb. 14. Conducted by William Shurtleff of Soyfoods Center. Updated 2 Nov. 1993.

• **Summary:** Vic's last name is now pronounced luh-BUU; it is Romanian not French. Vic and Ronnie Teeguarden were partners in a company named the Teeguarden-Leabu General Store. It was located in the basement of a building at 209 South State Street, a few blocks off Main Street in Ann Arbor. Vic recalls that Marshall's Bookstore was on the main (ground) floor of the building and the Herb David Guitar Studio was on the floor above that—all in the same building. The person who owned Marshall's book liked Ron and him, and that person wasn't using the basement, so they let Ron and him use it; it was a very casual arrangement. They sold used clothes, used books, used records, etc. Those were pretty foggy days for Vic, who was "still back in the ozone of exploring other stuff." Vic recalls that Michael Erlewine coined the name Teeguarden-Leabu while he, Ron, and Vic were sitting in a coffee shop one day. Michael also designed the Eden Foods' logo of 4 sprouts in a circle.

Vic had little to do with the food-buying co-op, but he does remember that food was ordered and then divided up among the people who ordered it at the Teeguarden-Leabu General Store. Vic never ordered any food for or through the food buying co-op, nor does he know who did place the orders. Gloria Dunn, who had red hair, and Ron did much of the work with the food-buying co-op. Ron Teeguarden got interested in food and macrobiotics before Vic, and in about 1970 Ron got Vic interested in these things, so much so that Vic bought a natural foods bakery and ran it until he got tired of getting up at 3 o'clock A.M. The informal food-buying co-op that met at the Teeguarden-Leabu General Store preceded the Eden Organic Foods co-op. Vic feels that the founding of Eden Foods should be dated from Nov. 1969, when the company was actually founded, and not from any earlier date connected with the General Store.

Vic first started to work for Eden Foods in sales for 2-3 years, starting after Tim Redmond (his very close friend) got involved and after Bill Bolduc sold out to Michael Potter. Ironically, Potter wanted to hire Vic more than Tim did, even though Tim was Vic's friend. At the time Eden Foods shared a warehouse with Midwest Natural Foods (run by Hank Bednarz; the two companies complemented each other initially and did not compete) and was already distributing foods. "Back in those days Eden made little or no profit; we were working, I thought, for the good of mankind, or whatever. Sort of naive." Vic shared an office with Ronnie Roller and hired his present wife before they were married. He also worked for Eden when they owned the warehouse off Platt Rd. in Ann Arbor that ended up burning down.

At one point there was a clash of personalities,

philosophies, and viewpoints between Tim Redmond and Michael Potter. Vic might still be working for Eden Foods if Tim's viewpoint had prevailed. Vic feels that Tim deserves a major share of the credit for building Eden in the early days. Michael had a stronger macrobiotic orientation than Tim.

At the time they shared a warehouse with Midwest Natural Foods (which distributed some frozen products and Mountain High), Midwest decided to compete with Eden by distributing many of the same foods that Eden did, plus dairy products and frozen foods. Vic suggested to Michael Potter that Eden should start selling yogurt and other dairy products plus some frozen foods to the natural food stores so they could become a full-service natural foods distributor; they were delivering other foods to them anyway, and the stores would buy these products from somebody else anyway. Vic's position was based on economics and building a large company quickly. Michael's position was based on his principles and a firm belief that dairy products were for cows, not for humans. "Michael was fanatically anti-dairy." So Eden did not distribute dairy products or frozen foods. Vic saw this as a major decision, which would lead to Eden becoming a manufacturer rather than a distributor. However, to his credit, Michael Potter, developed an alternative to dairy products in Edensoy, created a joint venture company named American Soy Products to manufacture Edensoy in Saline, Michigan, and thus remained true to his principles while developing the most successful single product in the history of the company. Not only that, he did it all in Saline, Michigan, a town with strong historical ties to Henry Ford's work with soybeans.

"Michael's single-minded quest for macrobiotics and soyfood products has probably saved Eden Foods—in spite of himself." Address: 6023 Winans Dr., Brighton, Michigan 48116. Phone: 313-231-2711.

2050. Leabu, Vic. 1992. Rudolf Steiner, soybeans and other legumes, dairy products, and vegetarianism (Interview). *SoyaScan Notes*. Feb. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Vic is very interested in Rudolf Steiner, his Waldorf Schools, and biodynamic farming (which relies on cows—and other domesticated animals- to provide manure for crops). Steiner encouraged vegetarianism and was aware of the soybean and Rudolf Hauschka (one of his main disciples) wrote about soybeans in his book titled *Nutrition* (English-language edition published in 1967 in London; First German edition, 1951).

Steiner related to soybeans in terms of a theory. There is only one family of plants in the plant kingdom that can fix nitrogen—legumes. Animals are the only other creatures that can use nitrogen directly from the air; they take in nitrogen when they breathe. Thus Steiner felt that legumes were the plants most closely related to animals. Steiner advocated vegetarianism and felt that all human beings were moving

toward vegetarianism. And since legumes are closely related to animals, he also recommended that people not eat legumes, including soybeans. Other plants that fix nitrogen (such as deadly nightshade) are poisonous. Steiner also referred to Pythagoras, a very enlightened man, who also opposed the consumption of legumes.

Steiner was not opposed to people eating dairy products in moderation. Vic's question is: "How do you justify having animals and their manure on a farm as part of a biodynamic farming system if you don't eat the animals? Or do we just take care of the animals?"

Dr. Gerard Smith, an American doctor and follower of Steiner, wrote an interesting book titled *The Dynamics of Nutrition* (1980). He discusses Steiner and his vegetarianism. Address: 6023 Winans Dr., Brighton, Michigan 48116. Phone: 313-231-2711.

2051. Roller, Ron. 1992. Work with and history of Eden Foods in Michigan. Part I. To 1980 (Interview). *SoyaScan Notes*. Feb. 25-26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron was born in 1953 and he first met Mike Potter in 1961. The Potter and Roller families both lived in a northern suburb of Detroit. Ron had some friends who were friends of the people who ran the macrobiotic natural food store named Joyous Revival. That store was started by Carl Weinstein, Scott Halizon, and Howard Tannenbaum. Mike Potter worked in the store and soon became its manager. Through that connection, Mike started to travel to Ann Arbor to sell food at the free rock and roll concerts. Ron started to go with him (for fun), and they would cook rice and vegetables. At this time, Ron met Tim Redmond and Bill Bolduc. At age 15, through Mike's influence and interest in macrobiotics, Ron began to eat rice and vegetables as part of his daily diet.

Ron's sister and Mike had taken a trip to visit Muramoto-sensei at Miramichi, near Fort Bragg, California. At age 16, Ron attended a macrobiotic summer camp for a few weeks there. That was his first educational contact with macrobiotics.

In early 1971, while Mike was working at Joyous Revival, he was married. A little later that year he moved to Ann Arbor and began working at the Eden Foods retail store. Several years later Ron moved to Ann Arbor. In the fall of 1972 Ron began to work part-time for Eden Foods while he was going to school at Eastern Michigan University at Ypsilanti, studying biology and chemistry. His first job was to get the store at 330 Maynard Street ready to move into—painting, building grain bins and shelves, etc. Ron worked part time at Maynard St. in the deli, stocking shelves, etc. Many of the other employees also worked part-time.

Ron dropped out of the University and began to work full-time for Eden Foods when the company moved out of the Quonset hut and into the warehouse (shared with

Midwest Natural) on Ann Street. He now began to work in the wholesale operation. After a 10-month leave of absence doing woodworking in the suburbs of Detroit, Ron returned before the warehouse moved to Platt Road; he helped with that move in the spring of 1974. When Mike Gordon, Eden's buyer at Platt Rd., decided to go back to school, Ron stepped into his job. It seemed like a very big responsibility since the company now had annual sales of about \$1.5 million.

In 1976 Ron (age 23) took his first trip to China and Japan; he traveled with Mike Potter, who had taken his first trip there in 1973 or 1974. They also visited Muso in Japan. Later Ron made several trips to China and Japan by himself. From 1976 until the fire in 1979, Eden was doing more business with China than with Japan. The main Chinese imports were ginseng (the most important), nigari, azuki beans, Chinese medicinal herbs, tea, bamboo cookware, arrowroot flour, etc. Ben Zarcot of Fmali Herbs in California was also a big importer of ginseng from China.

After the move to Platt Rd., Eden's wholesale business (selling to natural/health food stores) continued to expand very rapidly. At that time, the full-line "super-distributors" came into being: Midwest Natural Foods, Health Food Inc. in Chicago, Tree of Life, etc. These companies, which tried to carry almost every product the industry offers, increased the number of products they carried to more than 2,000 from only several hundred, in order to provide natural/health food retail stores with "one-stop shopping" Many of these products were ones that Eden refused, on principle, to carry. Erewhon later tried to become a super-distributor and it was a major cause of Erewhon's downfall.

Eden now started to sell a few products Eden brand to other distributors—especially their herbs imported from China, but also commodities such as nigari, bulk soybeans, etc. Their first customer was Gene Newman of Manna Foods, Inc., in Scarborough, Ontario, Canada. For a while Eden sold truckloads of Michigan-grown soybeans to tofu makers such as Nasoya. That business gradually fell off as tofu makers cultivated local sources for their soybeans.

Ron introduced Cliff Adler into Eden Foods. In the summer of 1976 Cliff started to work at Eden and invested some money in the company by buying shares. He had a lot talent in the area of sales—he was a real go-getter in marketing—and he soon made many close friends in the company.

At some point, probably shortly after the fire, a number of employees got stock in Eden Foods, including Ron Roller, Bill Swaney, Mark Cook, and several others who left the company before the move to Clinton.

In Nov. 1979, just before the fire, 55 people worked for Eden Foods, which had annual sales of about \$4 million. Sales were growing and the company was distributing about 2,300 items as they tried to compete with the "super-distributors." Eden sold no refrigerated or frozen foods, and no dairy products. The company had two warehouses. The

big one, about 12,000 square feet, held almost all the food, plus the mill, the main office, the roaster, and the packaging machines. The smaller one, 4,000 square feet located not far away, was a truck repair garage and storage place for mostly non-food items plus a bottling line and a little overflow food. The night of the fire, the big warehouse was as full as it had ever been. The fire burned for a week while Eden's employees watched. It totally destroyed the big warehouse and the offices, and everything in them, sparing only the smaller warehouse. The next day, all but 7 people had been laid off. There was nothing for them to do.

The remaining employees were Mike Potter, Tim Redmond, Cliff Adler, Ron Roller, Bill Swaney (warehouse manager), Chris Burnham (warehouse), and Bena Burda (sales). They cleared out the small warehouse, and trimmed their product line to about 300 items.

Within 2 weeks after the fire, operating out of the smaller warehouse that they were leasing, Eden was sending out food to customers. They contracted with People's Warehouse in Ann Arbor to mill the large amounts of flours (including soy flour) that Eden sold; a little later Quincy Milling in Quincy, Michigan, took over Eden's milling. Cash was very tight for along time, so there was little marketing or promotion. All 180 vendors to whom Eden owed money were put on a payment plan, and they were gradually paid off. The insurance company paid Eden only \$100,000 quickly. The space was also so tight that inventory had to be moved out of the warehouse each day and moved back in each night. Then they rented some additional warehouse space on Phoenix Drive in Ann Arbor, 6-7 miles away. About a year after the fire, Eden bought an existing warehouse in Clinton, Michigan and moved in during 1980 to get more space. They set the mill back up. By now sales were increasing slowly, but they were still feeling the pressure of the "super-distributors," as products proliferated in the natural foods market. Continued. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2052. Roller, Ron. 1992. Work with and history of Eden Foods and American Soy Products in Michigan. Part II. After 1980 (Interview). *SoyaScan Notes*. Feb. 25-26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Feb. 1982 (27 months after the fire) the settlement from the insurance company was paid. Shortly after that, in 1982, Eden bought Schmidt Noodle Co., a supplier to Eden.

In Sept. 1982 Ron went to Japan, where he picked up 25 new items for the Eden import line from the Muso Co. One of these was Edensoy soymilk. He visited the Marusan soymilk plant. Ron recalls how they took him into the room overlooking the aseptic packaging room, where 16 huge machines were busily filling and sealing Tetra Brik Aseptic cartons (most of which were sold in Japan): "It just blew me

away. It was like a personal revelation. Here was a unique, non-dairy product, being made on a huge scale, and there was a big need for it in the American market.” When he visited the Muso office, Ron noticed very large shipments of this same soymilk being shipped to Spiral Foods (run by James Wilson) a macrobiotic distributor in Melbourne, Australia. This also impressed and surprised him.

Back in America, Eden coined the name Edensoy and developed the artwork for a stand-up foil retort pouch—since the Tetra Brik Aseptic packages had not yet become legal in this country. The product was introduced to America in 1983 at a natural foods trade show in Denver, Colorado. The response was “phenomenal.” No previous Eden product had ever attracted as much attention. At the show, they picked up 30 distributors for the soymilk. Edensoy soon became by far the company’s most successful product to date. Eventually imported Edensoy accounted for about 40% of Eden Foods’ total sales! “It turned into a bigger thing than any of us had anticipated.”

Also starting in about 1982 there was a big growth of interest in macrobiotic foods. Because of its large line of macrobiotic foods, Eden was now uniquely well positioned to take advantage of this growth.

Edensoy soymilk opened a lot of doors to new distributors. Inevitably these distributors came to Eden for the soymilk and then almost always ended up carrying the rest of the Eden line. The combined sales growth of Edensoy and the macrobiotic foods led to a big increase in Eden’s sales to other distributors. Shortly after that, Eden began to import Edensoy to a public warehouse in Los Angeles to service the West Coast market. Eventually that led to Eden sharing a warehouse with Sierra Natural Foods in San Francisco, and soon the rest of Eden’s products were stocked there too.

During the mid-1980s, in large part because of Edensoy, Eden’s sales to distributors began to overtake wholesale sales to natural/health food stores. The latter were beginning to drop because of competition from full-line super-distributors. Eventually the latter comprised only 10% of Eden’s total sales. At that point, in about 1986 or 1987, Eden stopped wholesaling directly to retail stores and started to sell only to distributors. Eden delivered its products on its own trucks to these distributors, and this extra service also gave them a competitive edge. Discontinuing wholesale distribution to retail stores had a very positive effect on Eden’s growth. All the energy that was formerly required to attend to that 10% of the business was now free to be focused on developing new products and the Eden brand.

The period from March 1984 to June 1985 was a difficult one for Edensoy. The problems with the FDA, the Edensoy promotional pamphlet, and the Edensoy recall were described in detail in the *East West Journal* (Dec. 1985).

On 13 April 1988 Cliff Adler and Michael Potter were in a serious car accident. Cliff was killed and Michael was

seriously injured. Cliff was a very outgoing person with lots of charisma, and his death had a profound emotional impact on the company; his many close friends felt deep loss. Ron, who was purchasing director and a director of the company, took charge of running the company in this time of confusion. He organized a management team, started daily management meetings, put budgets in place, and severely curtailed spending to start accumulating money for the FDA fine. Within a month, Ron became vice president; Mike was president and CEO.

In about Nov. 1989 Ron became president of Eden Foods and president of Schmidt Noodle Co. Mike remained CEO. Yet despite these problems, in the two years from 1989 to 1991 sales at Eden Foods almost doubled—making them two of the most profitable years in the company’s history.

Right after Cliff died, Ron took his place as a director of American Soy Products, Inc. (ASP). In Feb. 1991 he became CEO of ASP. Ron was president of Eden Foods. In mid-June 1991 he was asked to resign from his position at Eden Foods. He chose to leave and go to ASP to work full time. Michael is now chairman of Eden Foods and his sister is president. Ron is now president of ASP, a joint venture company. Ron works for ASP above all because he believes in the company and its products. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2053. Roller, Ron. 1992. The U.S. soymilk market (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** During the past 3-4 years, the U.S. soymilk market seems to be growing at about 10% a year. Sales slowed during and after the Gulf War, but overall the current recession has had little effect on Edensoy, soymilk and on the natural foods industry as a whole. There has been a proliferation of new products and package sizes. Most of Edensoy’s volume is sold in liters. The ASP plant is now nearing capacity. Many people who used to have no interest in soymilk are now showing a strong interest. Concerning the size of the market, American Soy Products does not try to keep statistics, but he doubts that it is any larger than Soyatech says it is.

In terms of market share by volume of soymilk sold, Ron thinks that Edensoy has the largest share, Vitasoy is second (including their sales to the Asian-American market), Westbrae is third, and Pacific Soy is a distant fourth. No other companies have significant sales.

One interesting product is a soy & azuki milk, which Marusan launched in about 1982; Ron is not sure if it is still on the market.

Ron has heard from a fairly reliable source that a company has purchased soymilk equipment (he does not know from whom) to build a soymilk plant somewhere in the United States. It might be Vitasoy. Someone from

Dr. Chung's in Korea (makers of Vegemil and Woorean) is planning to come to the USA to look for companies to market their Korean soymilk or for potential co-packers. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2054. Roller, Ron. 1992. The U.S. miso market (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** During the past 3-4 years, the U.S. miso market seems to be growing, but only slowly. Ron has been away from direct contact with sales of Eden Foods' miso for the last 8 months (when he ceased to be president of Eden Foods, Inc.), but he still has a good sense of what is happening. He sees miso as a macrobiotic product—macrobiotics are the main user base other than Asian-Americans. It is also a very Japanese food. There are now so many natural foods products on the market that miso must compete with, that convenience has become a big factor for consumers. Miso is not very well understood by many American consumers. The sodium level in miso may hurt the growth of miso sales in America—especially for new consumers; it will probably not have much of an effect on those who use miso and know what it is.

Ron's estimates of the U.S. Caucasian market share of the main miso types is as follows: Barley miso 35%, salty rice miso 25%, sweet rice miso 25%, Hatcho and other soybean misos 12%, specialty misos (natto miso, buckwheat miso, etc.) 3%.

More barley miso is sold in bulk than other types. Ron sees sweet rice miso (sweet white miso; shiro miso) as having the most future potential for Americans—especially for those who are not macrobiotics. Eden imports sweet white miso from Japan; it is pasteurized to prevent spoilage, but it does turn brown over time. Ron thinks miso is a great food that is not adequately appreciated. It may have great potential as an ingredient sold to the food industry for use in processed foods.

Ron, personally, has a deep interest in Japanese natural foods, in food production, and in how the raw materials (such as soybeans and grains) are produced, i.e. in organic crop production. "The word 'macrobiotic' is a word that I personally rarely use, though the exposure to that philosophy has taught me a great deal. The interest in macrobiotic foods is increasing. The old dreams about locally-produced, organically-grown foods have come true. They are widely available and nicely packaged and marketed." Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2055. O'Connell, Michael. 1992. History of Ploughshares Foods Ltd. in Glastonbury, England (Interview). *SoyaScan Notes*. Feb. 27. Conducted by Anthony Marrese in England.

• **Summary:** This company was founded in 1984 in the Essex countryside by Michael O'Connell and Fiona Bruce under the name "The Emperor Liu An's Tofu Palace." Liu An was the legendary inventor of tofu in China. The business was an 8-tonne mobile catering truck and kitchen on wheels which went to open-air shows and festivals; its purpose was to serve vegan organic food (including tofu), demonstrate tofu-making, and promote veganism. They started operating the truck in Aug. 1984. Recipes prepared in the mobile restaurant in 1984/85 included tofu blueberry mock cheesecake, tofu mayo, tofu sweet cream, tofu lasagna, tofu pudding, tofu ice cream, tofu burgers, tofu gulash, and tofu pizza. In 1985/86 they launched okara steam pudding with dates, okara shepherd's pie, and okara burgers.

In Aug. 1986 the company moved to Glastonbury, started a non-mobile restaurant, and changed the company name to Ploughshares Foods Ltd. (after the Old Testament Biblical expression from The Book of the Prophet Isaiah 2:4 "They shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword against nation, neither shall they learn/study war any more").

In 1988 the restaurant introduced tofu quiche (onion and mushroom), okara veggie roll, okara tempeh, okara tempeh Bolognese/moussaka, and braised tofu in miso sauce. In 1989 they launched soya cream cheese with chives, and in 1991 okara tempeh with leaf protein added.

In 1991 the company structure changed from a partnership to a cooperative. Other current members of the co-op are Miranda Bruce, Sophie Pullinger, and Lalita Gordon Milverton.

The company was a pioneer in introducing tofu and new ways of using it to vegan restaurants. Uses included burgers, pies, dressings, creams, main dishes, salads, soups, etc. They introduced foods that were free of dairy products, wheat/gluten, and/or sugar, and developed a leaf protein product named Leafu (i.e. tofu from leaves). Their vegan cooking school was the first such school to receive the "City and Guild" qualification to those who graduate from their residential diploma course teaching vegetarian, organic, and special diet foods. The company provides a friendly working environment, as for single working parents, and is involved in the wider issues of improving society.

The main reasons for the company success are a commitment to delicious, aesthetic, nutritious food, customer loyalty, and a commitment to research, development, and innovation.

Anthony Marrese adds: "All of their products are good, and their people are especially nice. I spent about 18 months helping with the tofu production and restaurant in 1987/88."

Followup letter from Anthony Marrese in reply to Shurtleff's questions. 1992, March 17. "Ploughshares has only one restaurant but did associate with many others sensitive to vegetarian and mainly vegan consciousness. They were chosen as the sole caterer for the local RSPLA

(non-cruelty to animals) open houses and also set up a stand (vegan foods). At the annual Glastonbury / Pilton and CND (Committee on Nuclear Disarmament) Festival with 40,000 to 80,000 participants, plus other smaller events.

“Sally Pulliner, Sophie’s mother, is in the partnership also.

“As for the tofu, we were making about 20 kg per day. I was keeping the focus on tofu, making sure that all ingredients were available & equipment in good order. I was making half or more of the tofu (half of the days). It was made generally outdoors under a plastic roofing canopy; it was great to have none of the stuffy, steamy problems. The caldrons were used that fit into half 55-gallon steel drums, with a portable gas burner under. Anthony’s line drawing shows all the tofu-making equipment, including a small apple press, grinder, cylindrical tofu forms, and perforated tray. The grinder was converted meat grinder (with especially small holes). The tofu forms were cylindrical so that burgers could be made easily by slicing the roll of tofu. Plastic drain pipe was used and I sent for some Italian Provolone cheese forms (stainless steel) from my father’s cheese factory.

“When ‘The Emperor Liu An’s Tofu Palace’ was going, the tofu was made in a similar fashion just outside the truck as a living demonstration! For the restaurant, the tofu making moved around from back porches to an old bakery since everything was portable.

“So, most of the tofu was used by the restaurant; they never bought any and in classes where much more was needed, 2 or 3 double batches (about 40-60 kg per day) were made and saved to build up a stock.

“The tofu was, and is (along with other Ploughshares foods) sold fresh at the immediately adjacent whole food store and some of the other products—wheat-free, dairy-free tofu cheesecake sold to other restaurants & health food stores. No commercial labels were made since all was and is sold fresh. Also tofu & okara burgers, and tempeh, are sold outside. The Bolognese is good also. It’s like vegan hamburger tomato spaghetti sauce.

“I also made rice malt & Essene sprouted wheat bread on the same equipment as the tofu was made.

“So, things here are still very active. There are at least 7 or 8 tofu makers in the group now and they have taught many more. Their tofu is set with malt vinegar & they set it quite violently compared to traditional ways (not a lot of slow setting). But I do like the tofu better than the traditional tofu, although I’m sure Ploughshares’ yields are lower. Tempeh is made in a converted refrigerator.

“I’m still deciding where to go next. Michael has offered me the possibility of doing more information gathering for him similar to what I’m doing for you and there is a possibility of getting government money for it, £20,000 a year. But the money would come at the end and Michael doesn’t have money up front or as we go along.” It’s hard trying to persuade all these companies to give me

information when they don’t want to. “I have been invited to work at a Steiner biodynamic farm all this year in the north of Germany. Anyway, I’ll keep you posted. Wish me luck. In light, love & strength. Anthony Marrese, c/o Aura-Soma, Tetford, Lincs, England LN9 6QL.”

Note: See “Glastonbury Festival” on the web. It started in about 1970. Address: 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England. Phone: 0458-831182 or 835233.

2056. DeBona, Don. 1992. The miso market in America and The American Miso Co. (Interview). *SoyaScan Notes*. Feb. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The miso market in America is growing nicely. There are two distinct U.S. miso markets, the Asian-American (Oriental) market and the natural foods (macrobiotic) market. Don can only speak for the latter, and is best able to discuss his company’s experience in that market. In the last 3-4 years, his production has grown on average 10-12% a year. He thinks that the causes of this growth are the wider availability of miso, and its greater accessibility to mainstream consumers who increasingly shop at natural food stores and chains such as Whole Foods Market and Bread & Circus. Neither the current recession nor the greater consumer awareness of dietary sodium affect miso sales. Most miso buyers are macrobiotics or vegetarians who are not very concerned about consuming too much sodium. People who buy his lower-sodium misos (sweet white [rice], sweet barley, mellow barley, or chickpea miso), do so not because of their lower sodium content but because they have different applications and flavors. He does not market his low-salt products as “low salt” nor does he see any great potential in making and marketing low-salt misos. Miso buyers generally know a lot about miso and about nutrition. He makes no nutritional claims on his miso products. His main concerns are with the taste and quality of his misos.

From the late 1960s until the very early 1980s, the non-Oriental U.S. miso market was largely a macrobiotic market. But the growth he has seen in the last 3-4 years is mainly to non-macrobiotic customers. He estimates that more than half the people who buy his miso do not think of them selves as macrobiotic, and perhaps a third of them have never even heard the word “macrobiotic.” They buy it as a vegetarian natural food product; they like the taste, and see it a new and versatile seasoning. The dark misos provide a meatlike flavor but the sweet and mellow misos do not. People use mellow white miso in soups, salad dressings, or stir fries. Dark misos are used more in soups, whereas sweet misos are not very widely used in soups.

He would categorize the different varieties of miso (both from a production and sales viewpoint) as percentages of his total production as follows: 1. Long-term, traditional darker, 40% (23% barley and 17% rice). 2. Mellow miso (white or

barley), 30%. 3. Sweet miso (white or barley), 20%. 4. Other (including non-soy): Chickpea, 10%.

Looking at the same categories for the American natural foods/macrobiotic market as a whole: 1. Long-term, traditional darker, 57% (35% barley, 15% rice, 7% soybean or Hatcho). 2. Mellow miso (rice or barley), 25% (American Miso Co. and Miyako Oriental Foods/Cold Mountain dominate this category). 3. Sweet miso (rice or barley; only American Miso makes or sells a true shiro miso), 10%. 4. Other (including non-soy): Chickpea, finger lickin' miso (a topping), natto miso, buckwheat miso, etc. 8%.

Two Japanese men now live and work at American Miso Co.; one was brought by John Belleme about 8 years ago, and one came about 3 years ago. They are in production. Don also has 2 American workers. They are like part of the family. He has never had soybean or Hatcho miso in his house and has never seen these Japanese eat it. Don does not particularly like the taste; it is dark, lacks sweetness and a complex bouquet due to its lack of grain, and is over-aged. Moreover, he feels it is more difficult to make because soybean koji is hard to make.

Westbrae sells a lot of miso on the West Coast but not much on the East Coast. Miso is said to be Westbrae's third best-selling product category. Don used to sell Westbrae's miso in the 1970s, when he worked for Laurelbrook Foods in 1980-81, shortly after Rod and Margy Coates were bought out.

Companies that make the miso in the USA using organically grown soybeans and grain include American Miso Co. (50% of natural foods market), and South River Miso Co. (10%); Westbrae and Miyako/Cold Mountain only use organic soybeans, but they call their miso "organic." New labeling regulations will soon make that illegal, and will probably cause most of the miso made in America to be made from organically grown soybeans and grains. Many consumers want organic miso.

The three largest makers of miso in America (for both markets), in descending order of production, are Miyako Oriental Foods, American Miso Co., South River, Junsei Yamazaki, and Traditional Foods. The major miso importers, again in approximate descending order, are Eden Foods, Great Eastern Sun (Mitoku Brand), Westbrae, Granum (Mitoku brand), and Tree of Life (Mitoku Brand).

In the U.S. natural foods market, American Miso Co. is the market leader. Don estimates the size of this market to be about 750,000 lb/year, but he would guess that Asian-American market is about twice this large (1,500,000 lb/year). His various misos retail for about \$5.95 in 1 pound sizes or \$3.95 in 8 oz sizes. When Don travels in America, he studies the shelves, and has been in almost every major natural foods store in the USA. He also regularly visits distributors and food brokers. But he does not try to keep systematic statistics on the market size.

American Miso Co. is growing rapidly, and it is hard

to finance this growth from earnings. Don's plant is now too small relative to demand; it is bursting at the seams. He has added more vats and plans to add another building this summer, financing it with a bank loan. The company is owned by only two people: Don and his partner, Barry Evans. Barry used to have a lot of money, but he got out of the marijuana business—where he made the money. He is now in jail in Santa Barbara for selling marijuana. In went to jail in Jan. 1992 and expected to be there for about 2½ years. Much of the \$500,000 startup capital for America Miso Co. came from Barry, but since then the company has largely had to finance itself. Financially the company is doing very well; they have made a profit every year for the past 3-4 years. Don is wary of bringing in more partners because of bad experiences in the past. Don has had a very good relationship with Barry Evans, and it has greatly benefited both of them and American Miso Co.

Don, whose ancestry is mostly Italian plus a little Irish, greatly enjoys running the company. His role has changed a lot. Up until last year, he made miso every week. How he does that much less, and focuses more on marketing. For the past 2-3 years he has also been president of Great Eastern Sun—a position he held before he came to replace John Belleme at American Miso Co. Most customers identify the company as "Miso Master" rather than "American Miso Co." Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

2057. DeBona, Don. 1992. Miso in Europe (Interview). *SoyaScan Notes*. Feb. 29 and April 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don has had 2-3 offers (though not serious enough) to go to Europe to build and run a miso factories. When a really serious offer for a major joint venture is made, backed by sufficient capital, he would like to do it. He would provide the production (and maybe the marketing) expertise. In about 1985 Don trained Jan Kerremans, a Belgian, from Lima Foods in the south of France, in how to make miso—after they had started and weren't doing very well. After that, Lima got their miso production under control, but then Jan left at about the same time that Lima Foods was sold—Don is not sure which came first. Jan was a minor partner in Lima Foods. The Gevaert family sold Lima in about 1987-88 to Vibec, a consortium in Canada. At that time Lima had a lot of financial problems. Then in about 1989 Lima was purchased from the Canadian company by Euronature, a large France-based international food company. Lima is presently doing well, and their traditional high standards of food quality are completely supported by Euronature. Mark Callebert is the manager of Lima; Pierre Gevaert no longer owns any part of Lima and is no longer active with the company. Lima is no longer making miso at their old mill on a river in the south of France. Lima also made rice

cakes and ground their sea salt at that old mill. This mill was the Gevaert's personal getaway and farmhouse, and he thinks they kept it when they first sold Lima, and no longer process food there. The Lima rice cakes may now be made in Belgium. Don thinks Lima Foods is now stronger than they were 5 years ago. Great Eastern Sun was the first company to import Lima's miso into America, starting in about 1984, and they were the sole importer for about 18 months until Lima appointed Eden as their exclusive U.S. agent. Don's current contact at Lima Foods is Mark Callebert. Don buys a lot of their salt in containers, directly from Europe, but he has to run the money and paperwork through Eden Foods. Don has exported several containers of miso to Europe through Sjon Welters' wife's brother, Adelbert, who used to work with Manna Foods in the Netherlands. He has also exported some to Erika Lemberger of EuroHealth. Bernard Faber also wants import Don's miso. After the Chernobyl nuclear disaster, Mitoku's sales of miso to Europe reached a new high, from which they have since dropped.

There is currently no major miso manufacturer in Europe. There is a small miso plant in Bristol, England named Source Foods, founded and run by Paul Chaplin, who Don trained at American Miso Co. for about 2 months. Chris at Mitoku recently told Don that Italy has recently become Mitoku's biggest market for natural food products in Europe.

In short, there is great potential for miso in Europe, including Eastern Europe, although the political instability of Eastern Europe makes for a very risky financial environment there. It's a high risk, high gain situation. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

2058. Kushi, Michio. 1992. Introduction to *Culinary Treasures of Japan*, by John and Jan Belleme. 16 p. Jan. Unpublished manuscript.

• **Summary:** This manuscript, which was published in a condensed form in the actual book, tells the story of Mitoku and their work to export traditional Japanese natural foods to the Western world. Michio Kushi was instrumental in getting Mr. Akiyoshi Kazama involved in this work. Mr. Kushi, who became a World Federalist after World War II, came to the U.S. in Nov. 1949 to study at Columbia University. He continuously sought ways of establishing world peace, and increasingly came to believe that a proper diet is the basis for health, happiness, and peace.

In April 1966 the author's wife, Aveline, opened a small store named Erewhon in Boston. Michio began to search for a Japanese source for foods that Erewhon would sell. He was introduced to Mr. Kazama (who lived in Tokyo) through a Japanese friend, Mr. Obayashi, who resided at that time in New York City. Michio felt that Mr. Kazama understood his desire for foods of high quality. So Mr. Kazama "began his search for food producers and manufacturers who were sincere and willing to supply the kind of quality we

requested. I know that for him, at that time, it was a great gamble. It was also a painstaking and slow step-by-step process."

Mr. Kazama was born on 1 Feb. 1930 in Yamanashi prefecture. He graduated from Waseda University in Tokyo, then was selected to study business in the United States. After arriving in Chicago, Illinois, he was drafted by the U.S. government to serve in the American Army in Korea and in Japan from 1956 to 1958. Upon his return to Japan, he settled in Tokyo where he became an import agent for a German company dealing in optics and electronics. After the Kushis contacted him, he became involved in the emerging natural food business. [He founded a company named Mitoku. Mi = Michio. To = Tomoko (Aveline's given name in Japanese). Ku = Kushi].

In 1968 Mr. Kazama made his first shipment of Japanese natural foods to Erewhon; the order was worth \$3,000. The Kushis first met Mr. Kazama in Boston in 1970. Over the years, the volume of Mitoku's exports steadily grew, and expanded to Europe, Australia, and the Middle East. Today Mitoku ships its products to about 35 countries. Approximately 40% of Mitoku's exports go to America, 40% to Europe, and 20% to Australia and other regions. Annual sales are about \$10 million. Among the major suppliers are Sendai Miso Shoyu Co. Ltd., Hatcho Miso Co. Ltd., Hagoromo Miso, Ltd., Hanamaruki Miso Co. Ltd, San Iku Foods Co. Ltd.

Distributors of Mitoku's products include the following: In the USA: Westbrae Natural Foods Inc., Great Eastern Sun Inc., U.S. Mills Inc., Tree of Life Inc., and Shojin Natural Foods (Hawaii). In Canada: Koyo Foods Inc., Flora Distributors Ltd., and Timbaktu. In Costa Rica: Distribuidora de Productos Macrobioticos S.A. In England: Sunwheel Foods Ltd, Clearspring Natural Grocer, Meridian Foods Ltd. In France: Celnat, Tama. In Belgium: Lima N.V. In the United Arab Emirates: Emirates Trading & Marketing Est. In South Africa: Key Health. In Austria: Naturkostladen, Lebenszeichen. In Switzerland: S'lotusbluemli, Terrasana, Futonhaus. In Sweden: Kung Markatta. In Norway: Alternative Import. In Finland: Makro Bios. In Portugal: Armazens Da Matinha. In Spain: Kunga. In Italy: La Finestra Sul Cielo, Probios S.R.L., Dalla Terra al Cielo, Solo Natura. In Israel: Tivoli Ltd. In Australia: Pureharvest. In New Zealand: Enso. In Singapore: Nature's Best. In Yugoslavia: General Export. In Japan: Seibu Department Stores Ltd., Tokyu Department Stores Ltd. Among the countries reached indirectly through trans-shipment are Hungary, reached through Austria, various South American countries reached through the United States, and other countries such as Poland, Czechoslovakia, Iceland, Andorra, Ireland and the Caribbean Islands.

As Mitoku developed its international operations, Mr. Kazama hired many students from Western countries, including Blake Rankin (USA), Ferro Ledvinka (Italy),

Christopher Geoffrey Dawson (New Zealand, starting 1979), Robbie Swinnerton (England), Terrie Adams (USA), and Michelle Harbroun (France).

“For the past 10 years, Mitoku has echoed and supported the macrobiotic perspective with its motto ‘Isshoku-Dogen.’ These words, though they have been forgotten in the last few centuries by the very people in the health care field who should remember them well, mean literally ‘medicine and food have the same source,’ and can be translated as ‘food is medicine.’ This saying has been used and known as part of the ancestral heritage of wisdom transmitted from generation to generation for several thousand years in Oriental countries such as China, Korea and Japan.

“In an attempt to preserve Japanese traditions, Japan has instituted a ‘Living Treasures’ program granting official recognition and support to [living masters in] various cultural areas such as theater, music, dance, sculpture, carpentry, weaving... and arts and crafts. Ironically, though, Japan has not granted the same official recognition to its traditional methods of food processing and production in spite of the fact that increasingly large numbers of people throughout the world are now appreciating traditionally processed Japanese food products and have become aware of their important health benefits. The Japanese traditional arts of producing miso, soy sauce, tofu, natto, amazake, rice vinegar, sake, mirin, condiments and pickles as well as cooking methods and preparation are unique among the culinary practices of the world... These foods are also works of art... It is my hope and recommendation that official recognition and support be granted by the ‘Living Treasures of Japan’ to those who have dedicated their life to the traditional art of food production and processing in spite of the hardships and commercial disadvantages they are compelled to face in business competition and present-day economical conditions.”
Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

2059. Potter, Michael. 1992. Re: The origin of Eden Foods. Letter to William Shurtleff at Soyfoods Center, March 1—in reply to inquiry. 2 p.

• **Summary:** When was Eden Foods founded? Michael has been keenly interested in this question for 23 years. In the summer of 1974 he was sitting at the National Bank & Trust’s campus branch, in the office of the branch manager, in the process of having Eden Foods’ checking account signature cards updated due to his pending trip to China and management changes at the store. He visited this bank on a daily basis and was known by its staff. The manager produced the original signature card, saying “Here’s the card from when the account was opened!” Then she gave the date as some specific day in July 1967. Michael perked up and told her that he would really like to get a photocopy of that card. Drawing back slightly, she said. “It should be okay. I’ll see about getting one.” That date in July 1967 was soundly

and distinctly etched in Michael’s memory. He verbally shared this discovery, which he thought was significant, with many people around Eden at the time, including Tim Redmond, who didn’t react as if this were odd—Nor did anyone else. Bill Bolduc had already left the company.

Though Michael subsequently contacted this woman manager numerous times in hopes of obtaining a photocopy of the signature card, she was never able to find the card again. Ron did not see the names on the card, but he believes Ron Teeguarden’s name was on it. He believes that the name Teeguarden, which contains the letters “eden” within it, “may well have been a source, or a powerful catalyst, in choosing the name Eden.

“A natural foods group called Eden existed. It was incorporated as a non profit Eden Foods, Inc., then reincorporated as Eden Organic Foods, Inc., whose name was later changed to Eden Foods, Inc. The use of ‘Organic’ in the name reflects the foresight and faith in organically grown foods that the originators had.”

What is the origin of the name “Eden”? As noted above, it may have come from letters in the surname of Ron Teeguarden. Bill Bolduc told Michael in several occasions that he (Bill) came to the idea of a natural foods company called Eden Foods while on a trip in Eden Park, Cincinnati. Bill also told Michael that Bob Thurston [sic, Thorson] had come up with the “Environmental Defense Energy Network” as a more socially palatable origin of the term “Eden,” and that that is what was adopted as the standing verbal explanation of the often-asked question “Where did the name Eden come from?” Michael finds the latter explanation hard to believe, and he is not sure what the origin of the name was.

Note: Michael began to work at Eden Foods in Jan. 1971. Address: Chairman, Eden Foods, Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: 517-456-7424.

2060. Deck, Cecelia. 1992. ‘60s roots bear fruit: Ann Arbor’s Eden Foods takes checkered path to become an industry leader. *Detroit Free Press*. March 2. p. 10F-11F. Cover story.

• **Summary:** One of the few food cooperatives and natural food stores that has survived from the 1960s, Eden Foods “has made it through the wacky ‘70s and the excessive ‘80s to the health-conscious ‘90s when, in a surge of reborn interest in natural foods, it has emerged as a for-profit, \$20-million-a-year leader among organic food processors.

“Founded by idealists who cared more about getting their message of healthy eating to the public than about bottom lines... the company has never strayed from its mission: to bring organically grown food to the public.” Tim Redmond recalls the early days when Eden operated out of an apartment on East William Street upstairs from Campus Bike and Toy. “During the summer, when all of the co-op members had left town or taken jobs elsewhere, former U-M [University of Michigan] football player Bill Bolduc bought

out the company. ‘No one really seemed to mind,’ Redmond says... By 1970 Eden was running the biggest natural food store in the Midwest.”

A competitor for 20 years has been the Cooperative People’s Warehouse, which has been losing money for the past few years. After the retail store moved to Maynard Street, the company “opened a restaurant which gained fame for its chapati vegetarian sandwiches on Indian flat bread. A colorful mural painted on the alley wall near the store’s entrance is still vibrant, though the store and restaurant had closed by the mid-1980s.”

Soon the company “started licensing outside manufacturers to pack Eden-brand products such as canned beans, and began importing packaged food from China and Japan. Eden also started doing its own manufacturing—bottling oils, roasting and grinding sesame seeds.”

After a fire in 1979 that caused about \$800,000 in damage, Eden regrouped and opened its warehouse and manufacturing in an old factory in Clinton. “In 1982, Eden bought Schmidt Noodle Co., a vintage 1923 noodle maker in Detroit, that had been making Eden’s organic pasta for about six years under license.

“The next year Eden began exporting organic soybeans to Japan and then importing Japanese-made Edensoy, a milk-like soy beverage that found an immediate market.” Tim Redmond recalls that “Eden had never had a success like this in one product.” According to Peter Golbitz, soymilk industry sales “zoomed through the 1980s to reach \$52 million at retail last year. Edensoy had about a 40 percent share of the market.”

“But importing Japanese soy milk and living at the mercy of the yen wasn’t good enough, and Potter believed that the burgeoning soy milk market could justify a U.S. plant. So in 1987, Eden opened a soy milk processing plant in Saline in a joint venture with four Japanese companies. With redesigned aseptic packaging, Edensoy sales grew to 4,500 supermarkets nationwide as well as hundreds of natural food stores.”

“Eden has had certification programs for its organically grown products since the early 1970s, but in 1988 the company joined the Organic Crop Improvement Association [OCIA], which strictly monitors crops to show that they are grown in soil that is pesticide free for three years and grown to organic standards. An audit trail can trace a can of beans to the field where the beans were grown.”

Color photos show: Timothy Redmond, vice president of marketing at Eden’s soy milk processing plant in Saline, standing on the plant floor surrounded by stainless steel equipment. Nancy Potter, on the cover of the tabloid, beside a painting of a huge Eden Foods delivery truck. Address: Free Press business writer.

2061. Deck, Cecelia. 1992. Eden chief calls the shots from his cell. *Detroit Free Press*. March 2. p. 11F.

• **Summary:** The chairman of Eden Foods, Inc., Michael Potter, is serving an 8 to 15 year sentence for manslaughter at the Lakeland Correctional Facility in Coldwater, Michigan. “Potter cannot receive incoming calls, but can call out—collect only. He can receive up to five visitors at a time, but the hours are limited.

“The 1988 car accident that led to Potter’s incarceration changed many people’s lives at Eden Foods and almost tore the company apart. Potter and his partner Clifford Adler were driving on Manchester Road near Clinton after drinking. They missed a curve. Both were thrown from the car; Adler was killed and Potter injured.

“In 1989, Potter was convicted of manslaughter and sentenced, based on a history of drinking-and-driving offenses. Potter declined to be interviewed by telephone or in person for this story. Before Adler’s death, Potter owned 38 percent of Eden’s stock. After Adler’s death, Potter bought Adler’s stock from his widow, Fran Adler, under a buy-sell agreement, increasing his share to 73.8 percent.

“A year after Potter was incarcerated, Eden’s board named Ron Roller—his wife Carolyn’s brother—president, and Potter became chairman. But last year, after Carolyn Potter filed for divorce, the board removed Roller and replaced him with Potter’s sister, Nancy Potter. Roller is now president of American Soy Products Inc. in Saline...

“In the divorce settlement, Michael Potter agreed to pay Carolyn Potter \$1.6 million for her share of the Eden stock over the next 10 years. That’s not the only bill Michael Potter’s paying. He writes a monthly check to the State of Michigan for \$1,315 in incarceration fees. It’s a seldom-invoked right of the Attorney General to recover such fees from prisoners who are able to pay.”

Color photos show Potter and Adler. Address: Free Press business writer.

2062. Jacobs, Lenny. 1992. Update on Muso Shokuhin in Japan (Interview). *SoyaScan Notes*. March 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Muso Shokuhin is now Japan’s biggest exporter of natural and macrobiotic foods, with sales of about \$40 million a year. Muso now exports what used to be the Ohsawa Japan line of macrobiotic products. Yuko and Muso meet one a year with all of the company’s food manufacturers. They have just gotten OCIA certification for 12 of their products. OCIA has spent a lot of money to develop a higher standard that former “organically grown.” Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

2063. Bolduc, Bill. 1992. Pioneering organically grown crops in Michigan. More on the early history of Eden Foods, Inc. (Interview). *SoyaScan Notes*. March 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the early years, Bill was strongly in favor

of developing local sources of foods, and especially in developing organically grown sources. He was philosophically opposed to importing foods. In 1970 he first hit the road in his car in search of organic growers like Tom Vreeland (who Erewhon ended up stealing from Eden), and Amish farmers in Ohio and Indiana that supplied buckwheat and molasses to Eden. Then he found the Schmidt Noodle Co. and got them started as a supplier, plus all the original juices.

Within Eden, Bill was the person who initiated the idea of finding local organic farmers. The first organic farmer that Eden contracted with was Tom Vreeland near Ypsilanti, Michigan, and the first organic crops they bought were soybeans, wheat, corn, and rye. These crops, organically grown in Michigan, are shown in the Eden Foods Wholesale Pricelist of 26 July 1971, so they must have been grown during 1970. In July 1971 Eden was at 211 S. State Street. Bill found Tom Vreeland through a chiropractor named Dr. Blossom, who was a close friend, who supported Eden, who was a member of the Church of God (a nationwide Christian church), as was Tom Vreeland, and who attended the opening of the store at 211 S. State St. Tom was already growing crops organically before Bill met him; he had never switched over to chemical farming. Bill was looking for farmers such as Tom who were already growing crops organically; he was not trying to convert chemical farmers to organic methods, but if they wanted to convert, Bill would help them and give them a market for their crops.

The inspiration for finding local organic farmers came from 3 sources: Paul Hawken of Erewhon, Robert Rodale, and Frank Ford of Arrowhead Mills. He talked with all of them at about the same time. Hawken had crisscrossed America in his BMW looking for organic farmers. Bill happened to be in Boston, Massachusetts, when Hawken returned from that expedition. Talking with Hawken encouraged Bill to look for more growers over a wider area. Bill also went to Emmaus, Pennsylvania and met with Robert Rodale Jr. to get the names of names of organic farmers and specifications for organic crops. And he talked with Frank Ford.

Then Bill found other organic farmers like Ernie Fordos (he grew beans from the thumb area of Michigan, and still grows for Bill), and Dale Kunkel (carrots, cabbage, sold in the Erewhon retail store). When Bill couldn't find local organic growers for a desired crop, he would buy from a non-organic source—as he did with sunflower seeds from Ontario, Canada. Both he and Tim Redmond spent a great deal of time finding organic sources. By 1973 when Bill left the company, roughly 15-20 farmers were growing crops organically for Eden.

Bill does not have any early Erewhon catalogs or Eden Catalogs. Tim Redmond is the only person he knows who has early Eden materials.

During at least one trip to China, another person went

along with Mike Potter. They bought all kinds of antiques and “made a fortune” when they sold them back in the USA. Address: Organic Processing Corp., 1430 Clifton Rd., Xenia, Ohio 45385. Phone: 513-767-9266 or 1-800-647-2326.

2064. Macdonald, Bruce. 1992. How Erewhon got involved in wholesaling and distributing natural foods (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon went through three phases of selling: (1) Retail. (2) Wholesale, direct to natural food retail stores and restaurants. (3) Wholesale, to natural food distributors (such as Eden Foods). Bruce started phase 2, selling direct to natural food stores and restaurants, primarily in New York.

In the spring of 1969, during Bruce's tenure as general manager, Erewhon got into the wholesale business, running it initially out of their retail store at 342 Newbury Street. Paul Hawken was not involved in the wholesaling to other companies before he left for Japan. Their store was divided into 4 parts: The front half was the retail store, the back half contained the mill (a little 5-inch Meadows Mill later used for grinding whole-grain flours), a walk-in refrigerator, and packing tables (where Bruce recalls working with Jim Docker, packing little 1-5 lb paper bags of grains), an office, and the basement (connected to the ground floor by a dumb waiter), which was the warehouse for storage of commodities.

The wholesale business began in the basement. It started because Erewhon got a good deal on some sesame oil. A company named Sesame Products in Texas had developed the Egyptian salt method of naturally removing the hulls / husks of the sesame seeds. The company apparently went bankrupt, but actually they were a front for some illicit import dealings, such as electronic parts from Mexico. They got caught, and had to sell their high-quality oil. Bruce got the opportunity to buy (for Erewhon) all of their existing sesame oil for 10 cents on the dollar (90% discount). So he bought all the oil, most of which was in amber pint bottles, but the rest of which was in about 5-8 large drums. He trucked it to Erewhon's retail store at 342 Newbury St., and helped to unload it. He and co-workers put Erewhon labels on the amber bottles (Bruce does not remember who designed these labels; Paul Hawken had them designed), bottled the bulk oil manually, labeled that as well, and moved it all to the basement. Erewhon was now ready to jump into the wholesale business, and natural sesame oil was their first wholesale product. Somehow Bruce / Erewhon had to sell 250-300 cases of natural sesame oil. But since he had bought it at a 90% discount, he was able to sell it at a profit below the price of other sesame oils on the market. In the spring of 1969, Bruce put the oil on a truck and drove it to Greenberg's (125 First Ave.) in New York City, Paradox Restaurant, Georgie Abehsera's restaurant, etc. He also took Erewhon's whole line of products, including their new

imports from Japan. “Greenberg’s took on the entire line of Erewhon products. Suddenly, it just took off. A month or two later Erewhon was sending a van down to New York City ever week.”

Next Erewhon expanded its line of mechanically pressed, unrefined oils. Bruce had seen some expeller-pressed corn oil at Paul Keene’s Walnut Acres, so he ordered it from Shawnee Milling Co. in Shawnee, Oklahoma. Erewhon considered hexane solvent extraction to be the “big bad method” of removing oils, expeller pressing to be so-so (because the temperature in the worm-screw reached 140-160°F), and hydraulic pressing to be the best since it kept the product coolest. This golden corn oil foamed upon being heated and tasted like butter in baked goods. Erewhon’s third natural oil was a safflower oil. (In 1970 Paul Hawken wrote a pamphlet titled “The New Oil Story”).

Next Erewhon added a line of grains. They got non-organic brown rice from Koda Brothers in Dos Palos, California. The company was owned by Japanese-Americans, who were the first to break out of the cooperative marketing scheme, in which all growers mixed their rice together. They had rubber rollers, which did not scratch the grain during dehulling. Their Kokuho-Rose white rice has been the rice of choice for 30 years among Japanese-Americans. Bruce thinks they may have first sold brown rice (in 100 lb peat bags) to Infinity in New York, then to Erewhon.

Then Erewhon added a line of products imported from Japan. These first arrived in about Nov. 1968, just as the Erewhon retail store at 342 Newbury St. was opening. All the Japanese imports came in bulk from Muso Shokuhin in Osaka, rather than individually packaged. Tamari (from Marushima) and miso (including bulk mugi [barley] and Hatcho miso), moromi, etc. came in wooden kegs, loose, rather than in containers, so there was lots of breakage. Most of these imported products were stored in the basement. Erewhon bought some noodles (soba and udon in 5 kg boxes) from Japan Foods, then from Nishimoto Trading Co. and also from Muso. The product line was very simple, consisting of no more than 400 different items. The best-selling wholesale items were the oils, tamari, miso, rice, and imported kuzu, umeboshi (salt plums) and azuki beans. In the retail store there was no produce case or freezer, no vitamins or supplements, no potatoes or dairy products.

Initially, Erewhon’s largest customer was the combined 4-5 macrobiotic study houses in Boston, Massachusetts, accounting for roughly 50% of sales. Erewhon had an old van that delivered the food to the study houses, initially at retail prices; this business kept the retail store afloat. By the late spring of 1969 the wholesale business began to take off, and the macrobiotic study houses were now allowed to buy at wholesale prices. Some additional delivery trucks were acquired.

The macrobiotic products, other than what Erewhon

imported, were only available in health food stores, through Chico-San. Because of the high mark-ups at several stages in the process, these products were tremendously expensive for consumers. So Erewhon decided to sell direct to East Coast stores, cutting out the distributors, to keep prices down. Now things started to move very fast, and Erewhon soon achieved national distribution. “It was like introducing products into a vacuum. The whole natural foods industry was starting up, all these little places like Eden Foods in Ann Arbor [Michigan], Tom Swan in Chicago [Illinois], etc.

Bruce traveled to New York and lined up new wholesale customers among macrobiotic restaurants and food stores. Samsara, a macro restaurant in the lower east side run by George (“Georgie”) Abehsera, was Erewhon’s first customer and its biggest restaurant customer. (Michel Abehsera’s younger brother, George later became the baron of the clay and soap business, Three Sheaves, Pierre Cattier, then Nature de France). Right around the corner was Arnie Greenberg, who had a deli on the lower east side, and was one of the first to merchandise macrobiotic foods; he rapidly became Erewhon’s best customer. He was very busy selling a mish-mash of foods though he had no particular personal commitment to macrobiotics. Before him, Irma Paule in New York City had run “The Little Cupboard” but had gotten in trouble and was no longer in business at this time. Other good restaurant customers were the Paradox, and the Caldron (Gloria Bremmer at 308 E. 6th St.). The Good Earth, a retail store run by Townley, soon began to order; he was one of the original honest organic produce retailers. The restaurants and the food stores accounted for about equal sales volume for Erewhon. Erewhon shipped all its goods to New York (its sole market) via common carrier; Erewhon owned no delivery trucks of its own. There were no other natural food stores in Boston. One other unique customer was Jimmy Silver, who was macrobiotic, the manager of a rock band named Iggy Pop and the Stooges, and had hair down to his waist. He would drive down from New York with his cute little wife, Susie, and buy \$300.00 of food at a time for the whole band. It was the biggest single order that Erewhon ever got in those days. Not long after that, Jimmy dropped out of the music scene and came to Boston.

Then Roger took over from Bruce as general manager in about Oct. 1969, right after Bruce married Maureen, his first wife, and left for Los Angeles to help start the branch of Erewhon there. The Erewhon store in Boston (at 342 Newbury St.) started with sales of about \$400 a day. The day of Bruce’s wedding, on a Saturday in about Oct. 1969 was the first day that the Erewhon store’s sales topped \$1,000 a day. It was a milestone day and in those days it seemed like big money. But two years later, Erewhon’s sales were \$20,000 a day.

In Los Angeles, Bill Tara had opened the doors, and put the bricks and boards up for a new Erewhon store. But Bill was never comfortable doing business; he preferred to teach

macrobiotics. So Aveline Kushi encouraged Bruce to come to Los Angeles (where she was living at the time) and to get the West Coast branch of Erewhon started. So Bruce and Maureen moved to Los Angeles.

How did Erewhon finance this growth? At the beginning Erewhon, the trailblazer, was extremely profitable, since they had essentially no competition, and had thriving retail stores in Boston and Los Angeles. The dollar was very strong (from 1967 to 1971 one dollar was worth 355 yen), so Erewhon could buy an item for \$1, sell it for \$3.50 and still be \$2 under any competition (mainly Chico-San). Erewhon invented the concept of a natural food store. Fred Rohe in San Francisco had developed a related idea, perhaps a little before and in parallel with Erewhon. His Sunset Health Foods, later named New Age Foods, was a modified health-food store that sold vitamins, whereas Erewhon was a pure natural foods store, that didn't sell vitamins. In addition, Erewhon had quality standards and a philosophy of foods that no one in the industry had.

After Bruce left, Erewhon moved into its first real warehouse on Farnsworth St. This represented the first real commitment to the wholesale business. A fleet of trucks was acquired. Eventually semis [semitrailers] were delivering all over New England. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2065. Macdonald, Bruce. 1992. Brief history of Green Mountain Commodities, Cliffrose, and Mountain Rose in Colorado (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mountain Rose was a short-lived natural foods distributor in Colorado. Before it existed, Bruce had a distribution company named Green Mountain Commodities. One year Bruce sold 1 million lb of Early Bird Granola—which still is existence. Mountain Rose was created in about 1976-77 by a merger of Cliffrose (a distributing company) and Green Mountain Grainery. According to Marcea Newman (1974), in 1974 Cliffrose was located at 129 Coffman St., Longmont, Colorado 80501. Cliffrose had opened up a competing store right down the street from Bruce in Boulder when Bruce owned three Green Mountain Grainery stores in Boulder. In the end they merged, but Cliffrose had debts that were much greater than Bruce had imagined—the biggest creditor was Arrowhead Mills—being owned almost \$200,000. Arrowhead Mills took over the company for a while, renaming it Arrowhead Distributing, then shut it down. Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2066. Macdonald, Bruce. 1992. The origin and development of Erewhon's operations in Los Angeles. Part I. 1969 to 1971 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon started a retail store in Los Angeles

because Aveline's youngest son, Hisao, had some form of leg disorder, congenital or from infancy, probably in his knee. Aveline found a Japanese doctor in Los Angeles who she believed (and it turned out that she was right) could cure it. But the doctor had to see Hisao almost daily. So in about August 1969 Aveline moved to California. Bill Tara went with her, while Michio stayed in Boston, Massachusetts. Aveline got a very nice house at 7511 Franklin Ave. in Hollywood. Later she moved into the former Japanese embassy, which was a mansion in a very nice neighborhood, several blocks away on [7357] Franklin Ave. Bruce also lived in this mansion. In Los Angeles, Bill Tara started Erewhon's second retail store, called Erewhon West, in large part because Aveline needed good macrobiotic food. Tara rented a very small space at 8003 Beverly Blvd. and called the new store "Erewhon West." Later the name changed several times, but it ended up being just "Erewhon." He got some cinder blocks and boards, ordered a shipment of food worth about \$500 from Erewhon-Boston, then he opened the door for business.

Bruce was married on 13 Sept. 1969 to Maureen Traill in Boston. The marriage ceremony took place in the Old South Church, and some 200 people (including Michio Kushi) attended. It was the biggest wedding in the Boston macrobiotic community to date. Maureen had lived in a macrobiotic study house run by Susan Hillyard, and had studied cooking with Aveline Kushi and Susan Hillyard.

About 2 weeks after the wedding, in early October 1969, Bruce and his new wife left Boston. At that time, Roger Hillyard took over as general manager of Erewhon-Boston from Bruce. They drove to Los Angeles, arriving in late Oct. 1969. The first thing Bruce did was to build a walk-in cooler. Bill Tara, who was always more interested in the teaching, philosophical, and scholarly side of macrobiotics, left shortly after Bruce arrived. Bruce was more oriented toward the business side. Bruce became the head of the store, and Jimmy Silver soon came out from Boston to work with him at the store. Initially, sales were very slow: During the first two weeks that Bruce was there, there were *no* sales on eight of the days. Natural food stores were just beginning to open in the U.S. "That was Aveline's store. Wherever Aveline went, she had to have a store—to feed the study house. And it was unbearably hot. But eventually it did work."

Soon shipments of foods began to arrive directly from Japan, sent by Paul Hawken with whom Bruce talked frequently by phone. So in the summer of 1970 Bruce put out a wholesale price list and rented a warehouse (about 2,000 square feet) catty-corner across the street (something like 7990 Beverly Blvd.). One of their first wholesale accounts was Fred Rohe in San Francisco. Soon the first Erewhon products packaged in Japan began to arrive, and because of these retail packs the wholesale business took off. The first seitan came in shrink packs; it later came in jars. Tamari was the best-selling import, followed by miso, then

umeboshi. The foods still arrived in small boxes or single kegs; containers did not begin until later. At about this same time Tom DeSilva, a lawyer who became a yoga instructor, applied for a job as a janitor; he just wanted to be around.

Erewhon West soon outgrew its first warehouse, in part due to a deal made with the Lundberg Brothers. Bob Kennedy of Chico-San was the pioneer in contracting with the Lundbergs to grow short-grain brown rice in California. The Lundbergs allotted a certain amount of acreage to organic brown rice and Chico-San agreed (in a contract) to buy all of the organic brown sold on that acreage. Chico-San had exclusive rights to all the organic brown rice produced by the Lundbergs. But Chico-San sold this rice for a high price (much of it in rice cakes or 1-lb bags), which prevented Kennedy from selling the amount he had contracted to buy. Chico-San was always in danger of breaking the agreement and losing his exclusivity. So [in early 1970] a side deal (contract) was made, between Erewhon and the Lundbergs, in which the Lundbergs packaged the unsold rice exclusively for Erewhon and labeled it “unsprayed.” Chico-San would not allow it to be labeled “organic.” Erewhon never talked with Kennedy or Chico-San about this side deal. “He hated our guts! But we did him a real favor; we sold the rice and we didn’t really hurt him, since we were selling into an entirely new market—on the East Coast and in bulk and in boxcars.”

With this arrangement, Erewhon got into the rice business in a big way, selling their rice for \$11.00 a bag versus about \$30.00 for the same product from Chico-San labeled “organic.” Brown rice soon became Erewhon’s biggest product; they sold it to Eden Foods, Laurelbrook, Tom Swan in Chicago [Illinois; he didn’t last long], Tree of Life in Florida, Food for Health in Tucson (Arizona), some distributors in Northern California, Green Mountain Grainery in Boulder (Colorado), etc. It was rice that gave Erewhon nationwide distribution, putting their products in every natural food store in the USA. Bob Kennedy was furious but he was stuck with his 5-year contract. Note: The fire in early Aug. 1972 that burned Chico-San to the ground essentially rendered the contract null and void.

Now Erewhon-West began to catch up with Erewhon-Boston in sales because of two factors: They could get a shipment from Japan 3 weeks faster than Boston, and they were near the source of brown rice.

When Paul Hawken returned from Japan in Dec. 1969 he went direct to Los Angeles, but stayed only several weeks. He then went to San Francisco and worked for several months with Fred Rohe (they had become close friends) on writing educational pamphlets and trying to organize Organic Merchants. After returning briefly to Erewhon West in Los Angeles, he returned to Boston. Paul’s direct contribution to starting Erewhon West was insignificant; he wasn’t there long enough to do much. Bruce turned it into a real business. “Paul’s real contribution was finding new suppliers

and products in Japan (he toured Japan with Yuko Okada’s father), getting the products labeled in Japan, then arranging for them to be shipped to Los Angeles in containers. Mr. Kazama and Mitoku came later. Erewhon had tried to order Hacho miso from Muso, but Muso couldn’t get it. But Mr. Kazama got it; he is a supreme negotiator! I’ve never met anyone quite like him.

“One of the secrets to Erewhon’s success was always having, as a base, a successful retail store, that had a big mark-up and was generating cash. That was our “calling card.” Then the warehouse could grow off of that. The store was also a wonderful place to test and develop new products. “A store is a cash business. With distribution, sooner or later, you have to give terms—such as net 30 days. Thus the adage: ‘If you’re going to grow a business, you need \$2 in capital for ever dollar that you grow.’”

In late 1970, to keep up with the explosive growth, Erewhon rented a second warehouse at 8454 Steller Drive (10,000 square feet). In his “spare time,” entrepreneurial Bruce founded two other businesses of his own: Pure & Simple, and The Natural Living Company. Pure & Simple, located in the Steller Drive warehouse, was the first of America’s new wave of natural food snack companies. Bruce had talked over the idea with Paul Hawken, who felt that snack foods were not appropriate for Erewhon at that time. The company’s first product was Corn Munchies, which was the first natural corn chip. They would make corn tortillas, cut them into wedges, fry them in sesame oil, and season them with tamari. The Corn Munchies soon became very successful. The Natural Living Co. made bodycare products and cosmetics, starting with Sesame Shampoo and Sesame Lotion. Bruce had met a brilliant chemist named Carlos de Villalvilla, a Cuban aristocrat who was head of research for Max Factor. He was a concert pianist with 2-3 PhDs. Bruce asked him to develop a line of cosmetics without preservatives or mineral oil (a vegetable oil should be used instead of a petroleum derivative). Carlos used sesame oil (which is very stable) as the vegetable oil in these first two products.

By early 1971 Erewhon had outgrown the 10,000 foot warehouse and another 20,000 square feet in an old bakery, from which they did all transshipments to distributors. The store expanded twice, taking over the corner fish store (live fish in aquariums), to 8001 Beverly Blvd. Jim Gronemeyer did the remodeling. Tommy DeSilva worked there, and ended up owning the business. Continued. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2067. Macdonald, Bruce. 1992. The origin and development of Erewhon’s operations in Los Angeles. Part II. 1971 to 1991 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In one of its first issues (the very first was published in Jan. 1971), *East West Journal* published an

interview with Bruce while Erewhon—Los Angeles was at the peak of its activity. They arranged for imports of natural foods from Japan to come into Los Angeles. They developed labels for the products with nice stories about each product; Burton Block did the graphics and helped with the text. He later became famous with the Nutragen designs.

In early 1971 Bruce found out that Paul Hawken had somehow obtained some stock and thus ownership in Erewhon and had not mentioned it to Bruce.

So Bruce went back to Boston and discussed the matter with Paul. Paul said, essentially, “That’s the way it is.” Ultimately Bruce felt that Michio was to blame for the problem, but “when I found out that Paul had some stock, I felt he had broken a blood bond with me and had deliberately deceived me. I felt more disgust than anger towards Paul because I had considered him a very close friend.

“I was not upset at Michio. Basically I have always felt that he was just stupid. He had the greatest opportunity—like the founding of the computer industry and he was Bill Gates—and he couldn’t comprehend the American entrepreneurial spirit. Michio’s approach was the traditional Japanese one. You come to work for a company, we pat you on top of the head, you have lifetime employment, but don’t ever ask to own any of it. But he was in a country that was entrepreneurial to its core. Hey, we don’t mind working for nothing—at the beginning. He should have offered the people who conceived and built Erewhon partial ownership in the company to motivate them and to keep them around. Failing to do that was Michio’s biggest mistake.”

On 21 Jan. 1971 *The Wall Street Journal* ran a front-page feature story on the emerging new natural foods industry. A person from Merrill-Lynch came in and said, “We could package this business and raise millions for you.”

Bruce had always thought that Aveline had always owned all the Erewhon stock—from day one to the bitter end. The Kushi’s attorney, Morris Kirsner, had put it in her name because they were worried about something happening like had happened to Irma Paule who ran the Ohsawa Foundation in New York. After Beth Ann Simon (a former heroin addict) died in Nov. 1965, the FDA raided the Ohsawa Foundation late one night and found its Nature’s Cupboard to be selling food, as well as books, recommending the food as a cure for illness. Charged with “false advertising,” the center was closed down, and the focus of macrobiotic teaching shifted to Boston. Michio was always concerned about teaching and being a purveyor of the foods about which he was teaching.

Seeing no future for himself in Erewhon, Bruce left Erewhon forever in May 1971 to attend to his two other thriving businesses. Bruce, who had been president of Erewhon on the West Coast, had been willing to work hard to build the company for a small salary (\$150/week), reinvesting all earnings, on the understanding that he would become a part owner later—the entrepreneurial way. That had been his basic approach, and he assumed Paul and Michio

were thinking the same way. But it never happened.

Erewhon had more than 99% of the market share on all of the Japanese imports. Bob Kennedy was buying from Tokyo C.I., which was very tiny. They had excellent sources for oils and grains, had built “Erewhon” into the top brand name, and had developed an aura of almost invincibility and quality. In short, they owned the market they had created.

Who got Muso (in Osaka) exporting Japanese natural foods? Probably Michio talking to Mr. Okada. Lima Ohsawa was more closely associated with Tokyo C.I. than with either Muso or Mitoku. Bob Kennedy had a certain allegiance to Lima Ohsawa. Herman and Cornelia Aihara had a little conflict with Michio and Aveline Kushi; “it was never on the surface but it sure was underneath.” The split began in 1961 when Herman and Cornelia, following Ohsawa’s advice, moved to Chico, California, with the group (including Bob Kennedy) that started Chico-San, Inc. in early 1972; Michio and Aveline decided to stay on the East Coast. All four (Michio and Herman, Aveline and Cornelia) were best buddies up until 1961. After that, there was a certain coolness. Bruce remembers, for examples, that when he and others were out in California, they never invited Herman (a sensei) down to lectures or other events. That was unusual. Bruce thinks (but is not sure) that Bob Kennedy (Chico-San) never bought (or never bought much) from Muso.

What happened to Erewhon—Los Angeles? One of the people who financed the early growth of Erewhon was John Deming, whose family were wealthy rice [sic, oil] barons. He married Judy Coates, lived on a trust fund, and invested something like \$150,000 to \$200,000 in Erewhon. Paul Hawken was close friends with him, in part because Paul gone out with Judy Coates, then later married Judy’s sister, Dora. Then (according to hearsay) something happened and John asked for his money back. Erewhon said they couldn’t pay him, but offered him Erewhon—Los Angeles instead. “So Deming ended up owning the West Coast” [Erewhon—LA]. [Note: For John Deming’s version of this, see Dec. 1994 interview with him].

When Bruce was in Los Angeles, Tom DeSilva had been his “right hand man.” In a major policy goof, they put Jim Gronemeyer in charge of the warehouse—which was sort of running the company. That blew up rather quickly. Bruce was long gone, so he does not know the details. Then Tom DeSilva took over, before Deming came in (in 1973-74) and took over Erewhon L.A. Deming owned the company and John Fountain was the manager who ran it. He bought much more than he needed. Someone stole a lot of money; it was a sick scene. They moved the warehouse from Steller Driver down to Vernon; it just declined, although the retail store, run by Tom, did well. Then Tom bought the retail store from John Deming in 1980. It was named Erewhon Natural Foods, and it quickly expanded into neighboring storefronts as they became available, adding a vitamin section, a deli, and then a restaurant named Nowhere Cafe. In 1990 Tom heard a rumor

that their landlord would not renew their lease and would, in fact, use the space to open similar businesses. Acting quickly on this news, Tom located a 12,000 square foot space at 7660 Beverly Blvd. next to CBS Television Studios in the street level of a five-story apartment building. The new Erewhon store had to be designed, built, and permitted from an empty shell; this was accomplished within a year. The new store opened in 1991 with annual sales exceeding \$9 million.

During much of the early history of Erewhon, Paul Hawken was in Japan. Paul's main reason for going to Japan was so that Erewhon could develop consumer packages and have the products (tamari, miso, noodles, seaweeds, kuzu) packaged in Japan. Hawken didn't return from Japan until the Erewhon store and 2 warehouses in Los Angeles (8554 Steller Drive, plus part of an old gigantic bakery) were up and running at full speed. They could get imports from Japan 2-3 weeks sooner in Long Beach than in Boston. From the West Coast, they shipped the goods as far east as Chicago, Illinois.

Warren Clough of Shiloh Farms was involved with organic farming before Erewhon; Warren was a very early pioneer.

Very little documentation remains on the early history of Erewhon. In about mid-1971 *East West Journal* published an interview with Bruce about Erewhon, conducted by his first wife, Maureen. It contained a photo of Bruce, and a good chronology of developments at Erewhon-Los Angeles. That was the real active time for the West Coast. In Aug. 1973 Paul Hawken wrote a self-serving article in *East West Journal* titled "Erewhon: A biography. The view within," which is full of inaccuracies. Bruce thinks that Patricia Smith (Patti, in Monrovia, California) might have early Erewhon catalogues. She was working for Trader Joe's until several months ago. She now has a new job elsewhere. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2068. Macdonald, Bruce. 1992. The origins and early history of Pure & Simple, The Well, and New Age Distributing (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In late 1970, Bruce was managing the Erewhon store and distribution company in Los Angeles. To keep up with Erewhon's explosive growth, he rented a second warehouse at 8454 Steller Drive (10,000 square feet). In his "spare time," entrepreneurial Bruce founded two other businesses of his own: Pure & Simple, and The Natural Living Company. Pure & Simple, located in the Steller Drive warehouse, was the first of America's new wave of natural food snack companies. Bruce had talked over the idea with Paul Hawken, who felt that snack foods were not appropriate for Erewhon at that time. Pure & Simple's first product was Corn Munchies, which was the first natural corn chip. They would make corn tortillas, cut them into wedges, fry them in

sesame oil, and season them with tamari. The Corn Munchies soon became very successful.

Bruce left Erewhon in May 1971 over an ownership dispute. His first move was to merge Pure & Simple with The Well, a natural food distributor in San Jose. Originally the Well had been named New Age Distributing, but Fred Rohe had started to get into financial troubles, so he had split off the distributing company as a separate business, which Phil Parenti / Parente was running.

Note: A letterhead shows that in Sept. 1979 Pure & Simple Natural Foods Inc. was located at 1045 Pepitone St., San Jose, California 95110. Phone: 408 / 295-7479. Jon Hoeffler ordered books on miso and tempeh. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2069. Coates, Margy. 1992. History of Laurelbrook Foods in Maryland (Interview). *SoyaScan Notes*. March 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Margy and her husband, Rod, started Laurelbrook Foods, opening for business on 23 Aug. 1971. She was about 52 at the time and Rod was about 56. Eventually they got in "over their heads." The company was always located in the same place: 505 Granary Rd., Forest Hill, Maryland 21050. They had a P.O. Box 47, in nearby Bel Air, Maryland. The inspiration and impetus that led to founding the company came from their daughters (especially Judy, Dora, and Marion [Ronnie]), although she and Rod had always been pretty interested in natural foods. Judy went to Boston to study macrobiotics first, followed by Dora, then Marion. Their daughters had been living and studying macrobiotics in Boston, Massachusetts. Dora married Paul Hawken after they started Laurelbrook.

Rod had been interested in motorcycles from the time he was a kid. After World War II, he became very interested in British motorcycles made by Triumph. For years he was on the American Motorcycle Association Competition Committee. He raced some himself (he won the 100 mile amateur race at Daytona Beach, Florida), then began to repair and sell Triumph motorcycles out of their home garage. They lived in New Jersey, but when Triumph Corp. set up a company in Towson, then Timonium, Maryland, Rod went to work for them as a service manager from 1950 to 1969. The company changed hands, went down hill, and in 1970 Rod and many others were laid off.

Rod wanted to start his own business selling motorcycle accessories. He planned to call the company CPA Inc. (for Cycle Parts and Accessories). Rod had his severance pay plus some retirement funds, so they bought 2.63 acres of land at 505 Granary Rd., built a small warehouse to start with, and rented the front to a local girl named Mary Page and her natural foods company named Springbottom Natural Foods. But as the building was going up, their kids then convinced them to start a natural foods business instead of a motorcycle

shop. They had been eating natural foods for the past 2 years, influenced by their daughters, especially Judy and Dora who were living in Boston and studying macrobiotics. So their natural foods wholesale distribution company, Laurelbrook, was in the back of the building. The earliest letterhead seen reads "Laurelbrook Foods, Div. of CPA Inc." CPA never got off the ground.

Initially Laurelbrook bought its products mainly from Arrowhead Mills (Judy brought Frank Ford for a visit), and Erewhon. Later they also bought from Timbercrest (dried fruits), Lundberg, and John Baker and Carl Garrich (both rice farmers). Beautiful Day in College Park, Maryland, was their first customer. Laurelbrook was a family business. Sally and Dan worked there almost from the start, and many nieces and nephews worked there. Margy and Rod did all sorts of work, packaging, grinding, making deliveries, and the like. Early competitors were Essene in Philadelphia (the biggest competitor), Erewhon in Boston, and Shiloh Farms in Pennsylvania.

Then the problems began. Some employees were using drugs and stealing merchandise from the warehouse. One person tried (unsuccessfully) to start a labor union. In about 1978, by the time Rod was age 65, he wanted to retire; the company had gotten too big for them and was growing too fast. Margy thinks this rapid growth was the main cause for Laurelbrook's downfall. "We were not big business people and we didn't quite know how to handle it—the complex finances, dealing with the banks, etc. We thought we needed a manager. So we brought in Richard Curry." At its largest, shortly before Richard Curry came in, Laurelbrook had 50 employees. Richard started replacing our people with his people. Richard wanted to add a lot of new products to the company's line. At that time, Tree of Life was probably Laurelbrook's biggest competitor. "We didn't really like the way things were going, but it was so complicated that we couldn't do much, hope for the best, and go along. Sally had a lot of faith in Richard." After long, unpleasant negotiations, Richard bought Laurelbrook from the Coates in August 1981, then about 6 months later he put it into bankruptcy (on 15 Feb. 1982). He had gotten in over his own head (which the Coates hadn't realized). So he ordered lots of goods from their suppliers (who were by now the Coates' close friends), sold them, then never paid the suppliers. Rod and Margy had to deal with lawyers and were deeply saddened and stressed by the way things ended.

They traveled to England (where Rod had motorcycle friends) and tried to enjoy retirement, but Rod didn't seem like his old self. Margy knew that something was wrong, but she thought it might be stress and would go away. Rod died of Alzheimer's disease on 4 March 1990.

Dora married Paul Hawken when Paul was head of Erewhon. Although Laurelbrook got a lot of supplies from Erewhon, this marriage did not have much effect on the relationship between Laurelbrook and Erewhon. Dora went

to Findhorn with Paul, and right after that they separated. John Deming (who Judy married) also worked at Erewhon and also went to Findhorn. Address: 2516 Laurelbrook Rd., Fallston, Maryland 21047. Phone: 301-877-1695.

2070. Coates, Margy. 1992. Re: History of Laurelbrook Foods. Part I. Origin and early years. Letter to William Shurtleff at Soyfoods Center, March 19. 6 p. Typed, with signature.

• **Summary:** This excellent, in-depth and detailed history of Laurelbrook Foods is written by one of the owners and founders on the original Laurelbrook stationery.

"In 1967 our next to oldest daughter, Judy, who had been with Erewhon and Michio Kushi, persuaded us to try a macrobiotic diet. While we were not really into natural foods, we always did cook from scratch, read labels, drank fruit juices instead of sodas, etc. She would come and cook for us for two weeks and let us try it out.

"Well, that was a rough two weeks, but we did it and felt great, even though we had thought we felt fine before. Also, although I've never been heavy, all of a sudden I found I looked good in slacks. So we stuck with it. Not forever, but for quite a while.

"When Rod [Margy's husband] had the traumatic experience in 1970 of having his beloved Triumph Corp. fold up, under new and poor management, and partly because of the Japanese influx, we decided to set up a warehouse and sell cycle parts and accessories. On August 7, 1970 we bought 2.63 acres of land in Harford County at 505 Granary Road, which connected business Route 1 with the north end of the Route 1 Belair bypass. We built a warehouse on it with money from Rod's severance pay.

"Three of our daughters had lived in Boston [Massachusetts] and worked with Michio Kushi. Ronnie (Marion) married Marty Russell in June 1970. He had also worked with Michio and became a natural foods baker. Dora married Paul Hawken in June, 1971, and Judy married John Deming in Aug. 1972. John and Paul had worked at Erewhon. The Hawkens and the Demings both went to Findhorn, and it was at the end of their stay there that Dora and Paul split up.

"Since we already had the warehouse building, it didn't take much to persuade us to distribute natural foods. A visit from Frank Ford of Arrowhead Mills helped cinch the deal. We had already established a business on paper named 'Cycle Parts and Accessories' (CPA), so Laurelbrook Foods (named after the road we lived on) started by renting from CPA. We actually opened for business Aug. 23, 1971. The CPA business never got off the ground.

"The warehouse was 50 by 150 feet, with a basement under it 50 by 100 feet. We rented the front end of the building to a natural food store, Springbottom Natural Foods. This was entirely separate from us, run by Mary Page, a neighbor. Mary had been selling natural foods from her home

for some time, and I had been a customer of hers. She was there a year, then got her own place. And by then we needed the space.

“That’s how we got in the business of distributing natural foods. And it kept us stepping from the start. Rod and I really loved that whole business. He used to say it reminded him of the motorcycle business as most of the people involved were real enthusiasts, and so many of the stores were Mom and Pop family type shops, as was so often the case with motorcycles.

It was a very personal business for us; we really felt so warmly toward our customers and suppliers. Our son, Dan, came in with us, I think, in 1972, just after he got back from Vietnam. And our oldest daughter, Sally (now Sally Morris) came in 1973, both of them backbones of the business. Sally did the buying, and everything else that needed to be done. Dan, like Rod and me, did everything.

“My niece, Elise, worked in packaging almost from the beginning, and right through with Richard until the end. My sis-in-law worked with us for a while, as did a son-in-law, two nephews, and the older grandchildren when the need arose. Our youngest daughter, Nancy, who is a potter, made honey pots for us to sell.

Our first price list [1 page, dated Aug. 23, 1971] is the only one I have left. Later it was 5 or 6 legal size pages, double columns on both sides. All the borders were typed up by hand. We didn’t get our first computer until about 1976. A local woman worked very closely with us, printing up our price lists and flyers, until about 1975, when we got our own photocopy machine.

“Arrowhead Mills and Erewhon were our first suppliers. Then Timbercrest for dried fruit, and Westbrae and Eden Foods. Our macrobiotic items came from Erewhon. We worked very closely with Erewhon but I don’t believe we got any special dispensation more than other distributors. We got our rice from Lundberg Brothers (California), Carl Garrich at Lone Pine Farm [Lone Pine, Arkansas], and John Baker (Louisiana). Wheat came from Ted Whitmer and soap came from Tom’s Soap in Maine.

“Very soon we started finding our own sources and suppliers, and dealt locally as much as possible. Apple juice and from Murray’s Orchard and Golden Acres in Virginia, Dunkelberger’s Tap ‘n Apple from Pennsylvania, Bauman’s apple butter from Pennsylvania. Various beans, seeds and soft wheat from nearby farms, and potatoes from Pennsylvania. Donna’s cookies were made in New Jersey using our ingredients. Enos confections was a sesame seed candy made by an old woman in Pennsylvania, with antiquated machinery. Honey Pure sodas were made locally. And when we got into refrigeration we had Erivan yogurt, with the cream on top, made by a woman in Pennsylvania in the rented side of a bank building. Goat milk ice cream came right here from Harford County, and so on.

“We milled flour right from the start with a small

Meadows Mill, and started packing almost right away. The only product we actually made ourselves was a candy, Chattanooga Chew Chews, made with sunflower seeds, pecans, sesame seeds, barley malt, honey and safflower oil.

“When we made deliveries, we would often pick up supplies on the trip home. Carob from Famarco on the Virginia Beach run; Crocks from Williamsburg on the same trip. Grains and seeds from Wm. Hill in Richmond, Virginia.

“I think our biggest competitors in the early days were Essene in Philadelphia, Charlie Smail at Shadowfax in Binghamton, New York, and Shiloh Farms who delivered from their Pennsylvania headquarters. Later on, Neshaminy Valley in Pennsylvania, and Tree of Life in Florida.”

2071. Coates, Margy. 1992. Re: History of Laurelbrook Foods. Part II. Growth of the company. Letter to William Shurtleff at Soyfoods Center, March 19. 6 p. Typed, with signature.

• **Summary:** Continued: “When we first decided on this venture, Denny Waxman from Essene wanted to work with us and transfer his knowledge down here. He came and we had a long conference and seemed quite agreeable on all points as to policies, and what we would carry. At the end, it developed that he wanted us to let him run the whole show, and Rod and I would just put up the money and not work with the business. Of course we weren’t interested in that. So he went back to Philadelphia and we were close rivals for several years.

“Our first staff was Rod, me, Carl Sauter, and Phil Levy. Carl and Phil were both from Boston [Massachusetts], and Phil was the author of the “Talking Food” stories. They really helped to get us going. In the beginning, the four of us did all the milling, packaging, taking orders, typing up orders, pulling orders, and delivering. We very quickly had to get a bookkeeper and someone to help with the paper work. Rod was a very ingenious person, as is Carl and also Dan, who came later. They were usually able to keep things running and improvise when necessary. We had a small stove and kitchen, but for the first year we didn’t have much time for more than peanut butter sandwiches. We were one of Celestial Seasonings’ first distributors, when Mo [Siegel] was packaging herbs by hand in little cloth bags.

“Our first customer came to the warehouse from Beautiful Day in College Park, Maryland. They were one of our best customers for a long time. We had a used Datsun pick-up truck, and started delivering right away, both in the truck and in our personal vehicles. When deliveries picked up, we rented trucks to deliver with, until we finally bought our own Ford Step Van. As time went on, we added more trucks, Olsen step vans, and Dodge Carryvans.

“After a few years gave up its distribution and just kept their very active natural foods store, so they became

customers of ours. Bob Blythe and his wife, Stephanie, had worked for Essene in the distribution business, so they came to work with us which was very helpful.

“We were soon delivering in Maryland, Pennsylvania, Delaware, New Jersey, West Virginia, Virginia, and North Carolina, and making frequent pick-ups in New York City. Business in the south picked up so much that we opened a warehouse in Raleigh, North Carolina [in Dec. 1973], run by Frank Mabry, who had been in charge of a store or co-op there—I forget which. We would often take truckloads of supplies to Raleigh, but they also ordered things on their own direct from our suppliers. They worked with local southern suppliers too Their price list was similar to ours but not exactly the same. We carried more products than they did, and they carried some things different from ours, especially from local suppliers.

“Rod and I never hired sales people, we didn’t need to. We tried to be strict about selling to individuals, and making sure the co-ops had a sales tax, so as not to antagonize the natural food stores.

“We built on to the warehouse several times, put in bigger flour mills and better packaging equipment. We eventually had about 12 trucks, and a full-time mechanic to keep them going. We had about 50 employees.

“We added on a bigger kitchen and encouraged our people to use it. I usually cooked lunch for anybody who wanted it if I wasn’t off on a delivery or something. We also made the ‘Chattanooga Chew Chews’ in the kitchen.

“I believe we were somewhat harassed on occasions. I am enclosing (among other things) a letter about rice that the health inspectors made us throw out [because rats had gotten into some bags]. Also, at one time when we listed Kukicha Tea, we were told we couldn’t sell it because it didn’t taste like tea. When we said we’d call it a beverage, we were informed that we couldn’t call it a beverage because it came from the tea plant. So we had to call it tea, but we weren’t allowed to call it tea. The upshot of that was that we had to pay the authorities \$60 to dispose of it.

“At first Rod and I went on deliveries together, but soon we had too many orders and had to take separate trucks. Mostly we slept in the back of the truck on overnight runs. Dan delivered a lot, and so did Bob Blythe, and then we had to hire drivers just for that job. We had 3 or 4 runs going off in different directions almost every day.

“We put in a freezer room and delivered ice cream and other frozen goods. We carried these in the truck in big thick Styrofoam type boxes that were designed for carrying frozen blood, and we packed them with dry ice.”

In about 1977 Laurelbrook outgrew its first warehouse at 330 W. Davie St. in Raleigh, North Carolina. So it moved into a larger one at 2319 Laurelbrook St. in Raleigh.

“But Laurelbrook got too big for us. We had dealt with banks and borrowing to be sure, but we needed a manager who could deal with heavier financing. We really loved that

business, every day was a new challenge, and our house and everything else were completely neglected for 10 years. And still we couldn’t wait to get up in the morning to see what would happen next. But it had outgrown us.

“Rod hired Richard Curry in May 1979, as accountant and general manager. Dan never liked or trusted Richard; I wish we had listened to him. I think Dan also felt rather ousted by Richard, and perhaps that he should have had that position, though I’m sure that wouldn’t have worked either. We were glad enough to put the matter of financing in someone else’s hands.

“On March 17, 1980, we had a meeting. Rod announced that he would resign as president on March 23, when he became age 65, and Richard would take over. We would still work at the warehouse as before.” Continued. Address: 2516 Laurelbrook Rd., Fallston, Maryland 21047. Phone: 410-877-1695.

2072. Coates, Margy. 1992. Re: History of Laurelbrook Foods. Part III. Decline and fall. Letter to William Shurtleff at Soyfoods Center, March 19. 6 p. Typed, with signature.

• **Summary:** “Already we didn’t like what was going on, but we felt it was out of our control. Richard didn’t let us know what was going on, or what he was borrowing, and we felt that the only thing to do was to let him handle things completely as he appeared to have a lot of confidence, although we were not easy about it. Sally [Rod and Margy’s oldest daughter] continued to trust his judgment and believe he’d make a go of it; she stayed with him until the very end.

“When Richard wanted to buy us out, that sounded good to us. So after a lot of dealing and discussion, and meetings with lawyers, we sold him the business in August 1981, ten years from after we started it. Rod and I still owned the property, and Richard was to pay us rent for using it.

“These were not good times. Dan was very upset and suspected Richard far more than we did. I think Dan came very close to having a complete breakdown at that point. We were supposed to be allowed access to the books, but never were. Rod continued to try to work with Richard until the very last. It is pathetic to read some of the notes and letters Rod wrote to Richard, trying to help, trying to repair things, trying to clean things up and take care of small details, and being constantly rebuffed. Rod was completely frustrated, as he has always been one to act, and his hands were completely tied. He tried so hard for cooperation.

“Early in March 1981, Dora had come back to live with us for a while. We needed an order taker urgently as the main order taker had been injured and had left suddenly. Dora agreed to help out until we found a replacement. After several weeks, Richard fired her quite abruptly and unexpectedly. He told her that her job was to take orders, not to try to educate the customer. Here was Dora with all her knowledge and not allowed to use it. Of course he did it to hurt her, and us. He just wanted us all out of there.

“Several months prior to that, Richard had actually tried to fire Dan for ‘stepping on his toes.’ I wonder now why we put up with all that, and I wish we had just thrown him out at that time, but we knew we couldn’t handle it.

“When we signed over to Richard, we were no longer allowed access to the building. Everything had to go through lawyers. The banks were supposed to keep an eye on the books and stock of goods, but of course never did.

“Richard decided he had to have a more sophisticated letterhead [see p. 5]. I have noticed many times during the years that when a company changes its letterhead or emblem, it usually turns out that the company is in trouble and is trying to change its image.

“After Richard went bankrupt in Jan. 1992 (Feb?) Rod and I found we were liable for \$35,577.34 that he owed to Hain Pure Foods (even though the business was no longer ours). We also had to pay off a big loan to the SBA [Small Business Administration], and we had to pay off the mortgage on our home that Richard had persuaded Rod to take out (much against my wishes).

“It wasn’t until Dec. 1983 that all the equipment in the warehouse was auctioned off. Many things had been sold beforehand illegally by Richard. Also things were taken from the warehouse at the auction that specifically were supposed to have been left. For example, sets of steel racks in the ‘cage’ that were the sole support of the floor above were taken, and the floor was left propped up by a couple of 2 x 4’s. The building was left in a mess. We couldn’t get anyone to give us the keys so we could have access. When we finally got the keys after much phoning and hassle, we were handed a ring with about 50 keys on it, all unmarked and most of them belonging to nothing in the warehouse.

“We didn’t find out until months later that Richard owed our suppliers very close to a million dollars. That includes money owed for services, office equipment and so forth. I am sure some of the small suppliers were put out of business because of it. We had never notified any of them of the changeover because the lawyers advised against it; they thought notification might make it more difficult for Richard to maintain his credit.

“The biggest debt was to Celestial Seasonings—\$38,200. Next was Hain, then Dr. Bronner \$20,000, Lone Pine Rice \$17,312, Arrowhead Mills \$11,500, Premier Malt \$15,800. The list goes on and on, between 200 and 300 suppliers were owed money.

“I won’t go on to tell you of all of the problems that arose when we tried to sell the warehouse and property. That is another long story in itself, and Rod was in no shape by then to handle any of it. It was eventually auctioned off for a song, enough for paying off the banks, but Hain, the SBA and the mortgage were left to us. That is behind me now. I just paid off the last mortgage payment this month.

“In all fairness, I think Richard went into this with good intentions and thought he could really make a good thing

of it. I don’t think he had a bankruptcy plan in mind, but he surely made the most of it when the time came. He expanded the line with too many doubtful products, he endorsed policies without telling us that we never would have agreed to, and when he first came, without our quite realizing it, he got rid of a lot of our employees and put in people of his own choosing.”

Concerning writing this letter, Margy concludes that “maybe it’s just as well I got it off my chest for the last time.” Address: 2516 Laurelbrook Rd., Fallston, Maryland 21047. Phone: 410-877-1695.

2073. Halizon, Scott. 1992. Early work with natural foods and miso in Colorado. Joyous Revival and Eden Foods (Interview). *SoyaScan Notes*. March 25. Conducted by William Shurtleff of Soyfoods Center. Address: Salt of the Earth, P.O. Box 1614, Rifle, Colorado 81650. Phone: 303-625-4444.

2074. Rose, Richard. 1992. Re: Tree of Life purchases Soya Kaas, Inc. Letter to William Shurtleff at Soyfoods Center, March 27. 1 p. Typed, with signature on letterhead.

• **Summary:** The company was purchased from Richard McIntyre. Rose does not know what Richard McIntyre is doing now or will do in the future. American Natural Snacks (ANS, a wholly owned subsidiary of Tree of Life) was McIntyre’s only customer; they had an exclusive arrangement. Address: President, Rose Enterprises, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

2075. Young, Rich. 1992. Early history of macrobiotics and natural foods in America (Interview). *SoyaScan Notes*. March 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** First the names of some good sources: For Infinity Foods and Shadowfax: David Simon, 201-209-1646 (now doing business as Wholesome Brokers, still into scientology, formerly with Erewhon and a macrobiotic). For early Erewhon: Evan Root, 617-566-4783, in Brookline; he is very down to earth and sensible, like Jimmy Silver. For Erewhon—Los Angeles: Tom DeSilva, 213-655-3537. For Essene: Howard and Denny Waxman (brothers who founded Essene, which is still in business in Philadelphia, Pennsylvania). For Laurelbrook: Margy Coates, 301-877-1695, is one of the angels on this planet.

Rich worked for the Kushis for over 13 years. He studied with them at Arlington Street Church before Erewhon existed. Evan and Peggy Taylor, Ronnie Coates and Marty Russell started Sanae; Rich worked there for 18 months, washing dishes and buying. Then he worked at *East West Journal* for 18 months when Robert Hargrove was editor, in advertising and sales. Then for the Seventh Inn for 18 months, shortly after it started and the two guys who

founded it quit. It never got off the ground. Evan Root was followed by Ty Smith who was followed by Richard Sandler. Then in 1972 Rich went to work for Tom Chappel of Tom's of Maine (natural toothpaste).

Bruce Macdonald married Maureen Traill, his first wife, in the first "official" macrobiotic wedding in Boston, Massachusetts, at the Old South Church on Copley Square. Then Bruce and Maureen moved to Los Angeles where Bruce played a major role starting Erewhon-Los Angeles. Bruce has had 6 children by four women. Now Bruce runs home-based Right Hand Press which publishes the teachings of Linda Green, an Avatar, dowser, and pendulum-using spiritual teacher from Oklahoma.

Rich thinks that one of the first people to develop a process for putting soy sauce on nuts was Nik Amartseff, who created Nik's Snacks that were sold by Erewhon. Nik started out working with Fred Rohe's New Age Foods in San Francisco. Ask Rich about Erewhon's Hopi Seeds and Nik's Snacks.

Rich began to work at Erewhon in 1974 when Bill Garrison was the president; he continued until the company went bankrupt. When Paul Hawken left Erewhon, Bill Garrison took over. In 1975, under Bill, the company was losing money. Michio brought in Ty Smith on the condition that if Ty could make the company profitable, Michio would give Ty shares in the company. At 33 Farnsworth St., as president Ty (who Rich has great respect for) made the company profitable, but Michio reneged on the deal. So Ty left—he is now in Hawaii running a combination convenience store, deli and gas station. Tom DeSilva knows how to reach him. Then Michio brought in as president Jeff Flasher, who was very close to Ty and thus knew that Michio could not be trusted. One day Jeff went to Michio and said that Erewhon could stay at 33 Farnsworth Street and probably stay profitable, but it wouldn't grow as fast due to the limited space. Or Erewhon could move into a much larger warehouse and potentially sell a lot more food, but they would incur significant debt in the process. Jeff left the decision up to Michio and Michio decided to go for the larger warehouse, with the promise that he (Michio) would come through with a certain amount of money by a specified date. Michio was not able to do this.

Jeff Flasher is a wonderful person and his wife, Linda, at the time was extremely intelligent and helpful to Erewhon. Another reason for the downfall was the pressure of the full-line distributors, which led Erewhon to greatly expand its product line and to include many products of marginal quality. It was a choice between being a manufacturer (they made nut butters and granolas) and a brand name (from imports), versus competing with the full-line distributors. Michio chose the latter approach. That was a major reason for Erewhon's downfall. Address: Right Hand Press, Cambridgeport, Vermont.

2076. Weissman, John. 1992. Pioneering work with seitan, Wheatmeat, and Tan Pops in America, 1974 to mid-1976 (Interview). *SoyaScan Notes*. March 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John was probably the second person to make seitan commercially in the USA. He was working in a health food store named Panacea in the middle of Manhattan in New York City. He and his girlfriend baked homemade buckwheat-crust pies, and they could see that homemade foods sold very quickly at the store. He saw freshly made, unique foods as a potential market. On 13 June 1974 John turned 26 years old. That fall he moved to Boston and began to live with a macrobiotic couple who were his friends, Sakee (or Ronald) Israel and his wife, Fern Ross-Israel. John recalls that Fern was pregnant. [Note: Fern and Sakee had been married on 19 Oct. 1974 in West Roxbury, Massachusetts. Their first child, Kate, was born at home on 3 May 1975.] Sakee was a musician, who drove a taxi cab to make money. John was a dabbler with macrobiotics—and still is. Several months after John arrived in Boston, Fern told him that several people from the Erewhon retail store had told her that if someone were to make seitan, they thought it would sell well at the store. Fern had learned to make seitan either in a macrobiotic cooking class or from another woman in a study house. She knew seitan was hard to make, so she taught John and her husband how to make it in the form of little salty, gingery meatball-like chunks.

At the time, John had never heard of seitan before, but he does recall that an early seitan product named Tan Pups (seitan skewered on a bamboo stick and deep-fried in a breaded tempura batter) had been on the market in Boston, but was no longer; they were probably America's first commercial seitan product. John does not know who made Tan Pups nor when they were introduced. [Note: Tan Pups were introduced in March 1972 by Nik and Joanne Amartseff in Brookline, Massachusetts.] They had been sold at the Erewhon retail store on Newbury St., but had been on the market for only about 6 months. John recalls hearing that the maker moved to Maine or New Hampshire after discontinuing Tan Pups in Boston.

John was a blues musician at the time, painting houses as a source of income. John had just been let go from a house painting job and he was desperate for money. Soon in late 1974 he and Sakee, as business partners, began making seitan in their apartment at 17 Dent Street in West Roxbury, and selling it in bulk (5-10 lb of chunks) to one macrobiotic study house where Pat Murray lived. She bought 5-10 pounds at a time. (She later owned a health food store in Newburyport, Massachusetts.) For fun, as a sort of joke, they named their fledgling business Gimme Some Food Co. but after a month or two, when their products began to sell, they changed the name to the Wheatmeat Company—since in late 1974 John coined the term "Wheatmeat" to refer to their seitan. His trademark registration says he first made seitan in

May 1976, but he was making it commercially before that. Within a few weeks, in late 1974, he and Sakee began selling Wheatmeat in bulk to the Erewhon retail store and then to other health food stores (such as Organic Food Cellar). It was sold refrigerated, in the form of rather salty little gingery meatball-like chunks in a large glass jar. A customer or the store clerk would lift out the chunks with tongs. By early 1975 the Wheatmeat Co. introduced “Wheatmeat Sandwiches,” stuffed in pita bread in two flavors—one with homemade cole slaw (but no mayonnaise, using grapefruit juice instead of vinegar; Fern showed them how), another with tomatoes and lettuce; each had a sauce and was Saran-wrapped with a little paper label. John felt the sandwiches would have a broader appeal than plain macrobiotic Wheatmeat (seitan), but their main drawback was a short shelf life—only several days. Fairly soon they also began to sell Wheatmeat Cutlets in about 8-ounce polyethylene bags. Each piece was rolled flat. Later (about 1979) he introduced an unflavored, unsalted slab of wheat gluten, also labeled Wheatmeat, but with a different label and appearance (it was light tan instead of dark brown). It wasn’t on the market for long because the shelf life was too short.

Next, in the spring of 1975, came Solar Burgers (although the name was not introduced until 1976). Based on information about protein combining in *Diet for a Small Planet* by Frances Moore Lappé, John began grinding cooked soybeans into the wheat gluten and selling the burger-like patties.

Then came Tan Pops, pieces of seitan that were skewered, breaded and deep-fried. In the spring of 1975, several months after they introduced the Wheatmeat Sandwiches to Erewhon, Fern recalls John and Sakee began to make Tan Pops in their home kitchen at 17 Dent Street and sell them in Boston. John only vaguely recalls making Tan Pops at Dent Street. Concerning the name of this product, John Weissman recalls (he is more than 50% sure) that he coined the name Tan Pops (based on Tan Pups, a similar earlier product, of which John had tasted one or two) after he separated from Sakee Israel, had met the owners of Baby Watson Cheesecake Co., and was working with Robert Allen. The “Tan” came from sei-tan (*tan* means “protein” in Japanese), and the “Pop” referred to something on a stick, like a Popsicle. He also recalls that many people did not like the name Tan Pops, which they said reminded them of Tampons (the female hygiene product). But he does not recall what this deep-fried skewered seitan product was named while it was made at 17 Dent St. before he named it Tan Pops. [Fern Israel is not sure when this product was first named Tan Pops, but she thinks it may have been so named from the day it was introduced; this is the only name she can recall that it had.]

In the spring of 1975, at about the time of the birth of Fern’s first child, John moved out of Fern and Sakee’s home, and he and Sakee went their separate ways in terms of their

business; it was a very amicable separation. John had moved in with his girlfriend at 51 Oak Ave. in West Newton. At that time there was a company named Baby Watson Cheesecake Co., owned by two men named Peter and Kenny. One of the owners of Baby Watson had tasted a Tan Pup formerly sold at Erewhon (but no longer available) and liked it very much. He talked to John and suggested that, since he was already making seitan, he start deep-frying it to make a product like the Tan Pup. Baby Watson was already carrying the Wheatmeat Sandwiches, but they thought a product like the Tan Pup would sell even better. At this point, John either developed or renamed the Tan Pop. He recalls that the Tan Pup was breaded with a typical (soggy and thin) tempura batter based on wheat flour. John developed a thick batter using coarse corn meal and sesame seeds; it became delightfully crunchy after deep frying. John and a friend, Rob Allen, were soon making the seitan and deep-frying the rectangular Tan Pops out of John’s home. The Tan Pops were sold first at Erewhon and then at Baby Watson; They were incredibly successful, in part because of the innovation of dipping the seitan in the corn batter before it was fried. To make the Tan Pops, slab or steaks of seitan were cut to size (approximately 3 inches wide, 4 inches long, and 3/4 inch thick) and placed on a tray. Each was dusted with a dry mixture of wheat and coarse corn flour, then an 8-inch long stick was pushed into one end so that it looked like the famous old New England Corn Dog. Then he dipped the skewered cylinder into a seasoned batter (with cinnamon, basil, powdered garlic and onion, plus sesame seeds) and deep-fried it. He put each store’s order of Tan Pops in a brown paper bag. At the store he would line one or more wooden bowls with paper towels, arrange the hot Tan Pops in the bowl like spokes on a wheel, then place them near the cash register. He was soon selling to 3 Erewhon stores, Baby Watson, and 1-2 organic food sellers, plus a few others totaling 10-12 outlets for the Tan Pops.

In the spring of 1976 John moved the kitchen to a location behind a bar in Waltham, Massachusetts. With friend Robert Allen, they introduced a new line of smaller seitan sandwiches, in hamburger-sized pita pockets. They were named after people he knew, like the “Billy Biggins,” a Wheatmeat sandwich with grated carrots and tahini sauce, etc. Billy Biggins owned the bar. Then they rented space in a basement “mall” in Central Square, Cambridge, to begin a restaurant featuring Wheatmeat, Tan Pops and waffles. The developers ran away after somehow failing. John named another pee-wee sandwich the “Weymouth Whitney,” after the construction manager. It contained Wheatmeat, sauerkraut, caraway seeds, and Russian dressing made with Hain eggless mayo. These little sandwiches didn’t sell very well.

He also named the burger “Solar Burger” and reformulated it with TVP. Robert Allen suggested that their company might sell the Solar Burger to other, competing

sandwich makers—which they did. Shortly thereafter they stopped making their own sandwiches. John also sold wheatmeat in bulk to other sandwich-makers. While at Waltham, John conceived a new company name—Vegetable Protein Company. Continued... Address: VegPro Co., 133 Nottinghill Rd., Brighton, Massachusetts 02135.

2077. *Whole Foods*. 1992. Retzlöff, Repetto form company to market organic dairy products. March. p. 14.

• **Summary:** “Boulder, CO—Natural Horizons Inc. is the name of a new certified organic dairy products company formed recently by well-known industry members Mark Retzlöff and Paul Repetto. The company’s first product line, Horizon organic yogurt, is set for an introduction at next month’s Natural Foods Expo in Anaheim, CA, and will be available through selected distributors.

“Retzlöff was the co-founder of Alfalfa’s, the natural foods supermarket chain based in Boulder, while Repetto is the former president of Sunfield Foods and Westbrae Natural Foods.”

2078. Amartseff, Nik. 1992. The invention and commercialization of roasting soybeans, seeds, and nuts with shoyu or tamari: Hopi Seeds and Nik’s Snaks at Erewhon (Interview). *SoyaScan Notes*. April 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1969-1970, Nik met Paul Hawken at New Age Natural Foods in Palo Alto, California, where Nik had been hired by Fred Rohe to create the natural deli department. Nik knew David Mastrandrea. Paul offered Nik a job at Erewhon. When Nik saw the coming demise of New Age, he accepted Paul’s offer, and arrived in Boston in about May of 1971.

At about the same time, Paul met a guy named Jerry (his last name started with “S,” perhaps “Sh,” and sounded like a German Jewish name). Jerry was roasting very small batches of sunflower and pumpkin seeds in iron skillet in his home kitchen in Berkeley, California; while they were still hot, in the skillet with the fire off, he would season them by rapidly mixing in undiluted tamari and continuing stirring until the liquid was evaporated and the flavor absorbed by the seeds. He bagged them and peddled them on the streets. Nik thinks that Jerry launched the first such commercial product, probably in about 1968. He had become reasonably successful when Paul met him in about 1969-1970, so Paul invited him to come to Boston, where Paul set him up in a corner of the recently acquired warehouse at 33 Farnsworth St. Jerry started production using his former simple skillets, then Paul helped him to buy a used cast-metal tumbler-style coffee roaster, converted to a peanut roaster, that could process 50 lb at a time. After being roasted, the seeds were poured into a large rectangular sieve, custom fabricated for this purpose. Jerry was making and packaging this line of Hopi Seeds as a one-man operation. Each seed was roasted

and seasoned separately. They were on the market sometime between late 1969 and early 1970. His production soon exceeded his ability to handle it; he was selling through Erewhon wholesale. When Nik arrived in May 1971, Hawken asked Nik to assist Jerry. But after 1 month, Jerry suddenly disappeared—it was apparently related to his selling marijuana on the streets. Soon thereafter, by the summer of 1971, Nik increased the line from 2 products (sunflower, and pumpkin seeds) to 5 (almonds, cashews, and soybeans). They were sold in 1 oz polyethylene-cellophane bags. Erewhon had received a shipment of specially processed, split soybeans, and a new easy-to-clean, easy-to-empty roaster made of sheet steel was developed (it’s construction resembled a cement mixer). While the roasted seeds were still inside, Nik would spray in the tamari using a sprayer with a long nozzle, then finish cooking them on low heat.

When Nik arrived in May 1971, the main soy products that Erewhon sold were traditional tamari and miso, imported from Japan, plus soybeans and soy flour (toasted from Arrowhead).

By the fall of 1971 Nik was no longer directly involved with manufacturing the tamari-roasted seeds and nuts; he had been promoted to installing Erewhon’s first semi-automatic equipment to make the Hopi Seeds, granolas, etc. The main management people at Erewhon in those days were Paul Hawken (the alleged head), Bill Tara, Hy Lerner, and Yuko Okada (of Muso Shokuhin). Wally Gorell (who was designing packages for a while). Erewhon was setting up its West Coast operations at this time and there seemed to be an ongoing power struggle between Hawken versus Tom DeSilva and Roger Hillyard. At one point, Roger went to Arrowhead Mills. Nik continued to work for Erewhon until about May 1972. Later he returned in Sept. 1973 and stayed until about 1977.

At one point, Wally left Erewhon and Paul Hawken got a small graphic design firm to design a more sophisticated label for the Hopi Seeds and to change the name. The name they came up with was Sol Seeds, with a stylized logo of the sun. But the name had not been researched and the owner of that registered trademark threatened to sue. By now Paul Hawken was gone and Ty Smith was president. When Nik returned to Erewhon in Sept. 1973, he renewed his involvement in this line, which still contained only 5 items. By about 1974 he had built the line into one that contained up to 12 products, including trail mixes and mixed nuts and seeds. So at that time Ty honored Nik by renaming the line “Nik’s Snaks.” The name “Sol Seeds” never appeared on a commercial Erewhon product. By the time Nik left Erewhon in about 1977, there were about 18 items in the Nik’s Snak line, a total of about 30 products including the various sizes of one product. Nik had taken a home operation, that never got sophisticated but was based on a good idea, and made it sophisticated in terms of the manufacturing process, product development, the package design, and the marketing. Nik’s

Snaks were a good-selling product for Erewhon for as long as the company existed. Many other natural foods companies developed their own competing lines of “tamari-roasted seeds and nuts.” Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2079. Macdonald, Bruce. 1992. Introduction to macrobiotics and early work at Erewhon (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.
 • **Summary:** Bruce was born on 5 Feb. 1946 in New London, Connecticut. In 1964 he entered the University of Connecticut, and essentially majored in LSD. He was an early buyer (for personal use only) of LSD from the Boohoo Church in Florida. This “Church” was the original importer of LSD from Sandoz Labs in Switzerland. Arthur Klets was head; Timothy Leary and Richard Alpert were involved.

At Christmas, 1965, Bruce dropped out of the university because he had a kidney disease that just wouldn’t go away. He went to a doctor who gave him, sequentially, 4-6 varieties of antibiotics. Each one worked for several weeks until the microorganisms became resistant. Seeing that he was on a dead-end road at age 18, he freaked. He took a bus to New York and, to his surprise, sitting next to him was Kathy Bellicchi (who is now living in Brookline, Massachusetts). She was from Bruce’s home town and he had known her in passing when they were younger, but he hadn’t seen her in a while. She said to him, “Just eat brown rice and salt and it will go away. I know somebody that I’d like to introduce you to. He’s got a little teeny restaurant in New York City called L’Epicerie [at Second Ave. and 57th St.]. He is Michel Abehsera.” Bruce recalls: “Michel is a rather spell-binding personality; also really smart and well-spoken. In 15 minutes he had me absolutely convinced that this was what I needed to do. And he was right. So I rented this apartment for \$69 a month on Stanton, down on the Lower East Side” [of Manhattan, New York City]. For the next year, Bruce worked at a boring job for Bennett Brothers (an old, established mail order company in Manhattan selling trinkets—not natural foods) to pay the bills, and he began to study macrobiotics, and yin/yang. Finding a chart which showed buckwheat to be the most yang grain, he decided to start eating buckwheat as his main food. After receiving a call from an old friend, Bort Carleton, in Vershire, Vermont (a good, clean, quiet place for healing) he moved there and began living in a cabin with Bort (a shoe and boot tycoon in Boston), who was also involved with macrobiotics. Later, Bort also sponsored a macrobiotic study house. Soon Bruce was cured—permanently—of his kidney disease. He became a true believer in macrobiotics. He and Bort would drive to Boston to listen to Michio Kushi’s lectures in the old church.

In June 1967 Bruce moved to Boston, and began to live in the University Road study house. After four quick affairs with lovely young women (“I was really yang”), Michio called him over to 216 Gardner Road and asked him

to “chill out” (calm down) with these girls, since Michio was “involved” with the same young ladies. Michio and Aveline had initially gotten together in a marriage arranged by George Ohsawa, who sent Aveline to America to marry his best student. Michio and Aveline had an “open marriage,” and both of them had affairs with younger people of the opposite sex the whole time that Bruce was in Boston. This was well known in the upper echelons of the still small macrobiotic community.

By late 1967 Bruce was working as a carpenter for Michio’s landlord (Mr. Fogelman), redoing his house at 216 Gardner Rd. Paul Hawken hired Bruce to be the contractor and carpenter to remodel the new Erewhon retail store at 342 Newbury St. Bruce did most of the design and contract work, then he assisted Jim Docker (a master carpenter) in the remodeling, getting thick planks from Boston piers for the floors, and constructing the shelves with dowels rather than nails. Erewhon had a little store below street level at 303-B Newbury Street, that later became Tao Books. While the business was at 303-B Newbury, in Aug. 1968 the first imports from Japan started to arrive from Muso Shokuhin. These included tamari (soy sauce) and miso. But Erewhon was unable to get Hatcho miso (“the Emperor’s miso”) in foil packs, and that was Erewhon’s first contact with Mr. Kazama; he was able to get that product for Erewhon in less than boat-load quantities. From then on, Erewhon started to import from both Muso and Kazama / Mitoku. The Erewhon store at 342 Newbury St. opened in November 1968, on Thanksgiving day, and several months later, in March 1969, Paul Hawken went to Japan. Paul asked Bruce to take over as general manager of Erewhon. Roger Hillyard ran the retail store in the front of the building.

What finally happened to Erewhon? Michio always said that Erewhon was a school; he should have said it was a business. Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2080. Macdonald, Bruce. 1992. The development of Erewhon: Early financing and suppliers (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** How did Erewhon finance its rapid early growth? Initially there was a deal with the State Street Bank in Boston to borrow about \$25,000. Bruce was on the West Coast so he didn’t really know the details. But State Street said “no,” so they switched to New England Merchants bank. Bruce believes that Paul Hawken flew back from Japan to negotiate that loan—in about 1970 or early 1971. They got a slug from New England Merchants—probably in the neighborhood of \$100,000. Also, the Japanese companies were giving Erewhon some time to pay; it was Mitoku at the beginning, then Muso later on. Bruce saw some of Erewhon’s filings for the bankruptcy. As he recalls, Erewhon owed Muso about \$200,000 and Mitoku (Mr. Kazama) about

\$200,000 to \$250,000. That was quite surprising to Bruce. Apparently, right up to the end, Erewhon had been buying in roughly equal quantities from Muso and Mitoku. “Money was always extremely tight. Let’s say you double your sales. As you increase your inventory, you also increase your accounts receivable—the money that people owe you. Bruce used to buy commodities from Cornucopia. “I used to order about \$8,000 worth a week and he gave me three weeks to pay. So essentially he invested \$24,000 in commodities—money that he never saw again. When the 4th week came I paid the 1st week, on the 5th week I paid the 2nd week—but I always owed him \$24,000. We did that with all our suppliers, but at the same time we were extending credit to all the people we were selling to. There is a rule of thumb; as your sales explode, you need \$3 in capital for every dollar increase in sales. You need a dollar for the extra inventory, a dollar for the extra receivables, and you need a dollar for the extra equipment you need to buy to service it. That could be moving into a new warehouse, buying a new flour mill or new trucks or pallet jacks. But we didn’t have those three dollars. So we had to squeeze ‘em and it was always very tight.”

Who were the early, important organic farmers who grew crops organically for Erewhon. Arrowhead Mills (from Hereford, Deaf Smith County, Texas) was a major supplier of winter wheat, rye, corn, soybeans, pinto beans, etc. for about the first 3 years, before Erewhon had developed any of its own sources; that came later, after Paul Hawken returned from Japan. Paul probably visited Arrowhead Mills in Texas about 50 times; Bruce visited maybe 3 times, but he remembers the long windrows of composted cow manure that were eventually put on the fields. Frank Ford was a real farmer, who believed in working with nature. There was an older fellow, whose name now escapes Bruce, who was the brains behind Arrowhead’s farming. He had studied Ehrenfried Pfeiffer’s biodynamic method and had developed this method of keeping the soil fertile. “It was the most amazing thing. They were able to grow such good quality wheat and other crops in part because they were enriching their soil like nobody else in that area.”

Ted Whitmer, the spring wheat farmer in Montana, was another early supplier. He did not have a contract with Erewhon; he just grew the wheat and sold it (in his bags) to anyone who would buy it. Spring wheat is a high-gluten wheat that is used for bread. Winter wheat, which grew in Texas, is higher in minerals because it is in the ground longer (you plant it in the fall), but it doesn’t have much gluten. Lewis B. Cox, an organic farmer from Washington state, grew gorgeous pastry wheat, sold in his bags. Paul Keene at Walnut Acres was a retail mail order operation; Erewhon didn’t buy much from him. Shiloh Farms, in those days, was Arrowhead Mills’ big distributor. Erewhon didn’t buy much from them because they bought from Arrowhead direct.

The contract farming came later. There was a 5-year

contract between Bob Kennedy and the Lundbergs. The Lundbergs had been growing rice for decades. When they contracted to grow brown rice for Chico-San, they decided to leave the local rice co-operative (which mingled together all the rice grown by its members); they had to keep their organic rice separate. Leaving the co-op was a big risk for them, in part because they now had to sell all their non-organic rice by themselves—with no help from the co-op. Paul Hawken did all the rice negotiations with the Lundbergs. Even after Erewhon sold all this “unsprayed” rice, they could not buy rice labeled “organic” from Lundberg for a number of years. That was when Paul Hawken went out to contract for organic rice farmers in the South—Carl Garrich in Lone Pine, Arkansas, and Willow Farms in Louisiana. That rice was sold in Erewhon’s bags and those were some of the first contract farming deals. At that point, Erewhon really began to have an impact on the expansion of organic farming in the United States.

But the person who should be given the credit for contracting organically grown crops, from farmers who had not previously grown organically, is Bob Kennedy of Chico-San. He was the innovator! Paul Keene was another innovator—a decade before Arrowhead Mills [1946-47 vs. 1960]. As far as someone from outside, specifying an organic product and agreeing to buy and market it—that was Bob Kennedy. The Lundbergs had a big family farm when Kennedy first approached them. They were concerned about all the chemicals they were using. But they had to make a rather major investment; they had to install a rubber roller rice mill which they bought from Japan. They also had to break away from the rice co-operative for their organic rice. So for them, it was a huge commitment, and they deserve plenty of credit as well.

Bruce knows nothing about Erewhon’s early operations in Canada; that was strictly from the East Coast and must have come later. “The Erewhon branches in Toronto and Milliken, Canada, were related to a guy named something like Fredericks, who was extremely wealthy. He had had been a vegetarian for many years and one day woke up paralyzed. Someone involved with macrobiotics got him on a macrobiotic diet and he had a remission. He set up something but it never amounted to a hill of beans.”

Bruce was not involved in Erewhon’s exports to places like Sunwheel in the UK. Erewhon never exported much of anything, except to Canada. The Japanese foods were sent directly to Europe. Eden Foods was by far the leader in exporting macrobiotic and natural food products to Europe.

The first soy sauce that Erewhon *sold* was probably purchased from Infinity Foods, a small company in New York. “A \$1,000 order would be the largest that they ever got.” Infinity was importing soy sauce from Japan before Erewhon. For a short time, Erewhon was by far Infinity’s largest customer—before Erewhon began importing from Japan. When Erewhon stopped importing from Infinity, that

was one of two reasons for Infinity's decline; the other was that Howard Rower began moving up in the Scientology hierarchy. The first soy sauce that Erewhon *distributed* was probably imported from Japan through Muso and made by Marushima. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2081. Macdonald, Bruce. 1992. Work after leaving Erewhon (Boston) in May 1971 (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce took a warehouse in Los Angeles and ran his businesses, Pure & Simple Corporation—which had a line Pure & Simple brand of fruit butters (naturally sweetened, peach butter, raspberry, blackberry, etc.). They were very successful. Sorrell Ridge (in the USA) copied that idea from Bruce and built it into a very big business. Gregory Sams came out with the same line of products years later in the UK. Smuckers Simply Fruit is basically the same product.

After about 3 months in this warehouse, Bruce started talking with Phil Parenti about merging. So Pure & Simple (Bruce) and The Well (Phil) merged with no cash transaction; the new company was named The Well. About 6 months later (at Bruce's suggestion), Parenti changed the company's name to "Pure & Simple." There were about 20 shareholders—all arranged by Phil—and Bruce had an option to buy a large number of those shares, which he never exercised. Now age 20, he got a large salary and a car. Bruce stayed involved with the new company; in the fall of 1971 he moved to Santa Cruz near San Jose. Roger Hillyard was still with Arrowhead Mills in Texas; he became chief of product development for Arrowhead. He put together there whole oil line and many other important products for Arrowhead.

New Age Distributing was started by Fred Rohe. First he had two natural food retail stores, the first in San Francisco, then a supermarket in Palo Alto. Then he started the distributing company in order to be like an Erewhon on the West Coast. Fred Rohe wasn't a businessman. By the time the Palo Alto store opened, they were already in deep financial trouble. Then the lady landowner of the San Francisco store refused to renew the lease, which resulted in Fred losing that store; the whole thing just came unglued. Phil Parenti was a stockbroker who had gotten into natural foods, and he owned part of Fred Rohe's company. Somehow, Phil ended up owning New Age Distributing—and its debt. He raised some money and brought in some additional shareholders; the company was already in San Jose. Phil had a friend named Mel Laroussa ("Sweet Melvin") who was a lady's man extraordinaire; he used to drive a little 280 Mercedes. Mel and his father were the proprietors of Standard Produce, which was the largest independent produce distributor in northern California. They had this huge warehouse in San Jose where Bruce and Phil occupied the back one-quarter. Bruce thinks that New Age Distributors was situated in this same warehouse. Eventually

they ended up taking over the whole thing. The Well was just a new name for New Age Distributors—they wanted to get away from the "New Age" name. At the point that Bruce contacted Phil, New Age Distributors no longer existed. Bruce worked in San Jose for about 6 months, incorporating the Pure & Simple line into the merged catalog, handled distributor sales, and got everything set up.

Then Bruce took a vacation to Colorado to visit one of their largest customers, Green Mountain Granary. As he came over the hill into Boulder he said, "Oh my God. This is where I want to live. I just fell in love with that whole area." As it turned out, the two owners of Green Mountain (George Slavin and Joe Rosenberg) were having a conflict over ownership. So Bruce bought the company via a 3-way trade; he traded all his interest in the Natural Living Company. Right before Bruce left San Jose, he called Roger Hillyard (who was still in Texas) and asked him if he would like to take over Bruce's job of handling distributor sales and product development at The Well. Roger was tired of Texas and he wanted to return to his native California, so he said "yes." Moreover, Phil was a good man, a visionary, and an excellent entrepreneur. But he and Bruce made the mistake of expanding much too fast. When Bruce met Phil, The Well was a distributor of organic produce, with a few dry goods. Soon they were a full-fledged distributor of all natural foods (but no vitamins or other supplements) including Japanese imports from Mitoku—with most items sold under the Pure & Simple brand. The main competitor at the time was Westbrae.

How did Pure & Simple go out of business and why? Phil Parenti was in the produce business and he always had cast a covetous eye to the Los Angeles market—which was where all the produce was happening. In Los Angeles was a wildly successful organic produce company, run out of no more than 2,000 square feet, called Max Kozek. Max was an old produce guy located right in the produce market. He had a dock where the trucks came in and out. "It was just the sweetest little operation you ever saw." He was doing big business—30-40 LB3 (5 by 5 by 6 feet, rounded so it fits into the side of an airplane, holds 2,500 lb) containers a day, flying it all over the country. The airlines loved this constant business, so they gave the produce companies low prices (about 10 cents a pound at the time) which made flying produce financially viable. "Max was just raking in the dough. He owned Arabian horses, lived in Beverly Hills, but he was getting older. And he was "a little shady around the edges," in part because the demand for organic produce was always greater than the supply. They caught him putting non-organic carrots in bags labeled "organic" and everything went downhill from there. "Back in those days, carrots comprised about 50% of all organic produce—for the carrot juice. So the organic produce business was basically a carrot business. There was one year when he shipped more LB3 containers on United Airlines than anyone else. He was that

big—like 1,200 a month. There was no other way for the East Coast stores to get fresh organic produce.”

The produce business is a bit of a grind. Its starts around 11:00 at night and its over at 8:00 in the morning—so your daily schedule is all goofy. Max had done this for years and years.

In about 1972-73 the first big merger of the natural foods industry took place. Some big money guys came in and they assembled this conglomerate which involved El Molino Mills, Hain Pure Food, Inc., Max Kozek, Radiant Vitamins, plus some manufacturer of capsules. But there was a big falling out with Max, so he ended up buying back his company from the conglomerate, and made a lot of money in the deal.

Note: This deal (in the early 1970s) was apparently never finalized; a complex Internet search shows that no article about it ever appeared in the *Los Angeles Times*.

So Philip Parenti befriended Max Kozek and they worked out a deal. Bruce never knew the details, but Phil ended up buying Max Kozek. The Achilles heal of the deal was this—incredible story. Max had been selling to a company (The Village Market) in Pennsylvania—in Amish / Pennsylvania Dutch territory. Village Market had an idea that the next great market would be frozen organic vegetables. Somehow Village Market ended up owing Max \$300,000. They had an Amish stone warehouse that Bruce has been told was “the most beautiful warehouse that has ever existed.” So after he bought Max Kozek, Phil Parenti went to visit Village Market—because the guy owed \$300,000. The guy at Village Market threw up his hands and said, “Just take over my business. I can’t pay.” So all of a sudden, Phil had to swallow two large businesses. Phil put “Sweet Melvin” in charge of the Pennsylvania warehouse. But Melvin was basically a trucker; his father ran the produce while he ran Standard Truck Lines, which was a contract trucker. Mel was an ace at that but he was not an ace at running a natural food distributing business—and much too much of a bon vivant. All this happened throughout the late 1970s while Bruce was a Green Mountain Granary. Phil had to declare bankruptcy. Jimmy Silver ended up with the brand name “Pure & Simple.” Max and Phil were pioneers of organic produce in the United States. Continued. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2082. Macdonald, Bruce. 1992. Cliffrose, and Eden Foods (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cliffrose was started by Lyman “Rusty” White in about 1972 in Taos, New Mexico. Then he moved it up to Longmont, Colorado, which is just north of Boulder. Green Mountain Commodities was the wholesale division Green Mountain Granary (basically like Erewhon’s distributing company), which Bruce founded, that was in essence in competition with Cliffrose. In fact, Cliffrose was the

only real competitor in that area. Cliffrose ran semis that distributed to 12 states; Bruce never ran semis; he was strong locally, in Denver, Colorado, and the mountain states.

Rusty had built a business basically around having the Arrowhead Mills distributorship; and he was Arrowhead’s largest customer. Arrowhead had about 20 regional distributorships that they assigned.

One of these was Eden Foods. But Eden dropped Arrowhead very early and developed their own farming program involving local farmers—for philosophical and financial reasons. After Erewhon declared bankruptcy, Eden Foods became the North American distributor for Muso Shokuhin of Japan. Bruce has long been very close with all the top management at Eden. “Michael Potter had the attribute of tenacity like nobody I’ve ever met. After Eden Foods’ warehouse burned to the ground, Potter had to sue the insurance company and didn’t get an insurance settlement for 3 years. In the meantime, Michael had to rebuild the business, which he was running out of the backs of semis, etc. But Michael was brilliant enough, in about 1982, to hire a Clifford Adler. Clifford was a premier businessman, Jewish, very clean and astute, very well organized. Clifford brought stability to Eden Foods in a time of crisis. He was in charge of accounts receivable, and he made sure that the money worked.” After Bruce opened Green Mountain Commodities, he became very close to Clifford; they used to see one another every two weeks or so. So Bruce attributes a fair amount of Eden’s comeback and recovery to Cliff Adler, and to Michael Potter and to the overall spirit of everyone involved. Basically, everyone worked for no money for years. Michael also continued to cultivate good relationships with all of Eden’s local organic farmers. Bruce introduced Michael to Kawasho, a billion dollar company which makes Kawasaki motorcycles; they put up a big part of the financing for the soy plant. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2083. Macdonald, Bruce. 1992. Ceres, Shadowfax, and Erewhon (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Frank Calpeno, who was heavily into macrobiotics, started Ceres as a natural food distributor in Colorado Springs, Colorado. “He was a sweetheart of a guy.” He was going to be a Green Mountain Granary retail store in Colorado Springs; George Slavin made a deal with him. Whatever the deal was, that ruined the basic idea of the retail store. By the time Bruce arrived (ca. 1972) Frank ran his own natural foods retail store in Colorado Springs; not until years later did he become a distributor. He may have been doing a little distributing before 1980, which is when Bruce left Colorado, but not much. He was not a major player.

Shadowfax was a little natural foods distributor that was established in about 1970-71 by Charlie Smail in Binghamton, in upstate New York. Bruce thinks they were

not macrobiotic, but they were strictly natural foods. They started at about the same time as Laurelbrook. They were going great guns for a while and then they petered out. Bruce was on the West Coast so he does not know what happened to them.

Mottell was another small natural foods distributor in New York; he was also going great guns for a while (roughly 1970-1980), but didn't last for long. New York was a tough market for distributors; they came and went.

Essene started as a strict macrobiotic retail store that was one of the original distributors of Erewhon products. "When we first set up all of these distributors down-line from Erewhon, they were one of the first—along with Food for Life in Chicago (Chicago, Illinois), Eden Foods in Michigan, Green Mountain Granary in Colorado, Westbrae in Emeryville, etc. Most of these people had natural foods stores and Erewhon helped them to expand into being distributors—based on the model of Erewhon. They modeled themselves after Erewhon and bought a large percentage of the products they distributed from Erewhon." Their catalogs were often identical or almost identical to that of Erewhon. This all happened shortly after Bruce left for the West Coast, so in about 1970-71. Essene was run by Denny and Howard Waxman; they still exist. Within the last year or so they moved out of the tiny store they had into a larger, nicer space. The only one Bruce can think of that did not start as a retail store was Laurelbrook.

What does Bruce think was responsible, above all, for creating that Erewhon model? "Paul Hawken and myself. We established the quality standards, the retail store look and environment, the packaging design, the price list and catalog content and design, etc."

Was Bruce ever aware of a power struggle within Erewhon in Boston? No. The chain of authority was always clearly established and respected. In later years things got a little weird with Bill Garrison (who ran the company into the ground), Ty Smith (who rebuilt it). Erewhon made a comeback under Ty, who was the last real live wire to run the place, before it went into its long, slow erosion and decline.

A decisive even was the lawsuit, which had to do with Erewhon's refusal to sell to co-ops. The co-ops sued Erewhon. That was the straw that broke the camel's back. Even though Erewhon won the lawsuit, but they lost because the legal fees cost them something like \$250,000. There was not enough money to pay these fees and Erewhon never recovered. And Erewhon made other mistakes after that. Trying to become a full-line super-distributor. Doubling the number of items in the catalog. Moving into a huge and expensive warehouse. The labor union strike, etc.

Bruce hired Jeff Flasher out of jail in Los Angeles—where he first worked for Erewhon, L.A. In about 1970 Bruce got a letter from a guy named John Beverage, who was in jail. He said that he could get out if he could prove he had a job. Bruce wrote him back, "You've got a job."

John Beverage came to Erewhon West Coast, worked for 3-4 months and was a wonderful, sweet guy. He developed a very successful company making alfalfa sprouts in Boulder, Colorado throughout the 1970s and into the 1980s. Unfortunately he died of a liver disease several years ago.

Anyway his roommate and best friend in jail was Jeff Flasher—who had been caught dealing pot [marijuana]. When John Beverage was working at Erewhon he told Bruce that he had a friend, Jeff Flasher, who was coming up for parole, and he asked Bruce if he would do the same thing for Jeff. Bruce said, "sure." Jeff Flasher became the miller for Erewhon West Coast. Several years later Bruce heard that Jeff was president of the company. "I was astonished."

Bruce believes that by focusing more on one product, Erewhon could have become a dominant force. San-J has built up and now owns the real tamari market, which means the market for natural soy sauce. They have nearly 70% of the market. While Bruce was at Green Mountain Commodities, San-J became the dominant player. They do all the bottling for Eden now. It happened when the dollar collapsed relative to the yen. Remember, in 1987 a dollar would buy 255 yen; it now buys about 130 yen. So, basically, all Japanese imports doubled in price, which enabled San-J—an American manufacturer of tamari and shoyu—to take such a large share of the market; they were \$2 a bottle less expensive. Eden Food was a major importer of tamari [natural shoyu] from Japan, as was Westbrae with their Johsen. Tree of Life was a major importer and Arrowhead Mills used to sell quite a bit.

Some big questions: Why didn't Erewhon West Coast move to San Francisco, since 95% their wholesale business was in northern California? It made no sense for Erewhon West Coast to be in Los Angeles—which had a tropical climate. Erewhon West Coast was a major factor in Erewhon's early growth, largely because they could bring containers imported from Japan into the USA through the West Coast. "We began to rival the East Coast in sales for a while." One month, the East Coast did \$390,000 a month in sales while the West Coast did \$330,000 a month. Why did Michio Kushi fail to grasp America's entrepreneurial spirit? Why was he not honest and straightforward in his offers of stock ownership in Erewhon with Paul Hawken, Ty Smith, and Bruce Hawken? Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2084. Macdonald, Bruce. 1992. Work after leaving Erewhon in May 1971. Part II (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: During the time when Jimmy Carter was president and interest rates were at 18% (these were hard economic times), Bruce's flagship retail store, Green Mountain Granary in Boulder (which had been a grocery store for 130 years) was condemned by the City of Boulder. They said the building was in a 100-year floodplain, and they

condemned every building from 4th Street at the tip of the mountains all the way to Broadway—but actually they wanted to build their own Justice Center and Library in this area. So instead of invoking “eminent domain,” they used this back-handed method. In about 1980 Bruce sold what was left of the company to his manager Seth Feldman.

Bruce then moved from Boulder to Boston. Tony Harnett, of the natural foods retail chain Bread & Circus, called Bruce and asked Bruce to come and work with him. After Erewhon went bankrupt, Tony was in big trouble; he had been getting most of his supplies from Erewhon. There was a little distributor in Connecticut named Earthbound. After Erewhon’s demise, all five of Tony’s retail stores tried successfully to order from Earthbound. But the next week when they tried to order again, Earthbound said, “Sorry, but we don’t have enough capital.” So Earthbound promptly went out of business. Consequently, Tony asked Bruce to start him a warehouse so he could supply his five stores. Bruce set it up in Watertown, and before long they had sales of \$120,000 a week with three people—a very efficient operation. Then Bruce asked Tony for a share of the company, and Tony said “no.”

Then Michelle Abehsera’s younger brother, Georgie [George], called Bruce to say that he had just sold Nature de France (clay soaps) and he wanted to start a natural food store. Bruce left Boston in Dec. 1982, went down to New York City, and that was the beginning of Commodities, which they opened in March 1983. It was soon the biggest natural food store in New York City. At the beginning, Bruce and Georgie were equal partners in the company. But he was becoming a very, very orthodox Jew. So every Friday at 3:00 he would sell Bruce his 50% of the company, then he would buy it back Sunday morning. But Friday night and Saturday were the two times the company had its biggest income—about 50% of the weekly total. This was great for Bruce personally. Then a rabbi in Israel told Georgie that this way of doing business was not “Kosher” enough, so Georgie he asked Bruce to buy him out—which Bruce did—but it was hard.

Commodities had signed a 10-year lease in 1982, starting at about \$3,000 a month and gradually increasing each year to \$7,000 a month. But in the meantime, Robert De Niro and George Lucas had started Tribeca as a state of the art film editing facility in New York; in 1989 De Niro bought the old Martinson Coffee factory on Franklin and Greenwich in Tribeca—a 300,000 square foot building a block from the Commodities natural food retail store. They invested millions of dollars in equipment, and before long every celebrity known to man started coming to Tribeca in limos. So, with 3 years to go on the lease, when Bruce eventually went to his landlord to renegotiate his 10-year lease, the landlord said the first year’s lease would be \$30,000. “You can’t run a grocery store paying that kind of rent.” So Bruce sold Commodities to his ex-girlfriend and moved up to

Vermont and basically retired.

That next summer (1990) he met Linda Green, “a walk-in angel,” at an annual dowser’s conference in [Danville?] Vermont. In the early 1990s, Bruce studied with Linda from Oklahoma. He actually lived in her monastery in Guthrie, Oklahoma—where she lived. He lived there 3-4 months and practiced spiritual dowsing, but he went there on and off for a year while she was there with the whole group. “We were dowsing these evil ratios and putting them in Solomon’s seals (a star inside of a circle) and then in a black box—many tens of thousands of them. For high-level dowsing, we used an Aurameter, a very, very sophisticated and super-sensitive device (no electricity is involved) for sensing energy fields. Its a long story. She had a amazing personal charisma—such a pure spirit. I’d never met anyone like that before—not even remotely close. She just turned my life in a completely new direction. It was a wonderful, wonderful experience. She asked me to start a publishing company. So I went to Vermont and published five of her books (several thousand copies were sold or given away) and organized four different conferences (one in Toronto, Canada; one in Burlington, Vermont) to introduce her and her work to people.”

Bruce (and Richard Young) published books at Right Hand Press (which Bruce started) in Cambridgeport, Vermont, about the work and teaching of this angel.

“She died three years later and the group basically disbanded; she predicted her death because she had too many “dreaming bodies”—many more than her body could withstand. Bruce has healed a number of people of chronic illnesses using spiritual dowsing. “You should go to this annual dowsing conference, where the dowsers all meet at this little town in Vermont. Old water dowsers, who come out of the hills, can tell you how deep a source of water is, how many gallons per minute you’ll get. They use different dowsing devices. I became proficient using that Aurameter; I can find anything—such as energy blockages in other people—if they are the right soul-type. It’s real. You can laugh or not, but I’ve seen it work again and again.” She was an “uneducated nurse.” She said there were two people born in the last century who came from a more evolved planet: Rudolf Steiner and Nikola Tesla (1856-1943). Tesla figured out a way to get free electricity.

In 1992, his daughter Crystal’s senior year, Bruce was in Boulder, Colorado. He moved to North Carolina in 1993 where he remains in 2011. Bruce has moved 55 times in 40 years.

In 1993 Bruce bought the Macrobiotic Wholesale Company, which had been a division of Great Eastern Sun. Barry Evans, owner of Great Eastern Sun, had sold it to a German guy named Kurt Schmidt, who ran it (with his wife) for about five years, then sold it to Bruce and Yuko Okada, who renamed it Macrobiotic Company of America (MCOA). Since MCOA had been part of Great Eastern Sun, they imported from Mitoku in Japan—not from Muso. In Feb.

of 2000 there was a hostile takeover of MCOA by Bruce's partner Yuko Okada of Muso. There were lawsuits back and forth, they settled, and Bruce had to sign a non-compete agreement for a year. In Feb. 2002 Bruce started his present company, Natural Import Company, also in Asheville, North Carolina. Norio Kushi ran MCOA for Yuko. As soon as Bruce left, Mitoku stopped selling to MCOA—but Mitoku had accounts receivable from MCOA. MCOA went bankrupt before Bruce's new company opened. Norio sold down the \$400,000 inventory and did not replace it; he was selling his seed corn. Norio started spending money lavishly, and 14 months later he went bankrupt. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

2085. *SoyaScan Notes*. 1992. People who might have early documents on Erewhon Trading Co. (Overview). April 6. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce Macdonald says try Patricia "Patti" Smith (via Jimmy Silver) in the Los Angeles Area. She saves things like this. Mark Mayell of *East West Journal* says: Try Alex Jack in Becket, 125 miles west of Boston (Alex says he has nothing on Erewhon). He collects documents; Try Michio and Aveline Kushi in Brookline or Becket; Try Ron Kotsch, who wrote his PhD thesis on Ohsawa. He lives in Amherst, Mass, 100 miles west of Boston. The offices of Natural Living (formerly East West) have copies of all back issues of *East West Journal* at the offices. They are available for perusal by researchers who obtain permission. The main articles are indexed in a computer from 1981 to the present.

Alex Jack says try Evan Root in the Brookline-Boston-Jamaica Plain area; he was the first employee. Also try Aveline Kushi; she has extensive archives from the early days at her home in Brookline. Aveline is working on her archives now. Carol Heidenry says they are in 75 boxes that were organized and labeled in March 1992. Aveline is excellent at saving things, and Erewhon was her thing.

Note: In 1997 the Kushi / Erewhon archives ended up in the National Museum of American History (NMAH), at the Smithsonian Institution (Washington, DC).

2086. Kushi, Aveline. 1992. The origin of seitan and how it came to America (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline thinks George Ohsawa coined the term "seitan," but Aveline is not sure when he coined it. Since he died on 23 April 1966, he probably coined it in the early- to mid-1960s. She first heard the term from George Ohsawa, she thinks in the early 1960s while she and Michio were still living in New York; they moved to Massachusetts in 1963. Shortly after hearing about seitan, she bought some canned gluten-based meatlike products made by Seventh-day Adventist food companies, probably in New York. She does not remember how, where, or when she first learned to make seitan. Beginning shortly after her last son was born in 1964

in Boston, she taught many of her macrobiotic students how to make seitan starting with high-protein wheat flour. She taught seitan-making in almost all of her cooking classes, and she taught how to use the starch like kuzu as a thickener to make creamy soups. Starting in about 1984-85 she started to use the starch, together with rice syrup, to make sweet dumplings for desserts.

The first seitan imported to America was made by Marushima Shoyu Co. on Shodoshima in Japan. George Ohsawa went to visit the company, talked with Mr. Mokutani (who is still the chairman, and a close friend of the Kushis, and a great admirer of Ohsawa), and showed him how to make it. Marushima began to make seitan commercially in the late 1960s. It was imported to America by Muso Shokuhin at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. She is not sure which Japanese company (Muso or Mitoku) exported this seitan to America, or which American company imported it, but it probably started to be imported in about 1969.

Concerning wheat gluten, about 15 years ago, the Kushis, through Mr. Kazama, convinced a Japanese manufacturer of dried wheat gluten (*fu*) to make the product from whole wheat flour. Since that time it has been imported to America by various importers of macrobiotic foods.

Follow-up talk with Aveline. 1992. July 8. She has just talked with Lima Ohsawa (age 93) by phone in Japan. Lima has no recollection of ever making seitan in a cooking class in America, or of ever teaching anyone in America how to make it. Initially Aveline thought she might have learned to make seitan from Lima, but after talking with Lima she thinks she may have learned to make it herself by trial and error, after she moved to Boston. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

2087. Kushi, Aveline. 1992. The founding of Erewhon and its ownership (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline selected the name Erewhon because George Ohsawa's favorite book was *Erewhon*, a utopian novel published in 1872 by English author Samuel Butler. It is a beautiful story. Erewhon is Aveline's goal for the beautiful peace of the country. She named the company in April 1966, shortly after the first retail store was started downstairs at 303-B Newbury Street in Boston.

The company started with \$3,000 capitalization. Aveline owned all of the stock. The Kushi's attorney, Morris Kirsner, suggested that Aveline should own all of the stock. In 1969 Paul Hawken and Evan Root went to Japan together. Aveline thinks that before they went, she and Michio offered Paul stock in Erewhon and Evan stock in Sanae, a restaurant he had started. Evan preferred to be paid in cash instead of

stock, so they sent him money every month while he was in Japan. Aveline is not sure whether or not Paul accepted the stock he was offered, but she thinks he may have accepted it. Morris Kirsner's files would probably show exactly what happened. (Note: Later she and Morris Kirsner says that Aveline offered Paul 50% ownership in Erewhon and he did not accept it. To this day (Feb. 1999) Aveline has no idea why Paul did not accept such a generous offer.) But after Paul returned from Japan the situation at Erewhon was completely different. So many other people had worked so hard to build the company that it did not seem fair that Paul should be the only shareholder besides herself.

After Beth Ann Simon died in 1965, the media tried and tried to talk with Michio. He did not want to talk with them so he told them to talk with his lawyer first. Then the FDA (or maybe the FBI) raided the Erewhon store at 303-B Newbury St. At the time Evan Root was in charge of the store but he was out buying food. Michio's father, Keizo Kushi, who spoke almost no English and was slightly deaf, was minding the store. He called Aveline, who was cooking at her home. She rushed over to Erewhon. The FDA were looking for books such as the little yellow paperback book *Zen Macrobiotics* (not the red book *Zen Cookery*) by George Ohsawa. At the time it was illegal to sell books that prescribed or recommended the use of foods as medicine. Aveline had told Evan to always keep that book hidden, and to sell it only to people who he was sure he could trust. The FDA could not find the book, so they asked if they could search the back room, which was dark. They asked if Aveline had a flashlight. She didn't. They went to their car to get one. During the few minutes while they were gone, she ran into the back room, found a big box of the forbidden books, dumped them in the trash can, and covered them with newspapers. When they returned, she escorted them into the back room and sat casually atop the trash can while they searched. Fortunately their flashlight was dim; even though they eventually looked in the trash can they did not find the books. Still suspicious, then they asked if they could talk with Mr. Kushi. Aveline said, "I'm sorry, but I am the sole owner of Erewhon. He has no connection with it." The Kushi's attorney had advised that all shares of stock be in Aveline's name, since Michio was teaching and lecturing about food.

At one point in the late 1960s they calculated the average age of the workers and managers at Erewhon; it was 22 years. When Erewhon eventually filed for Chapter 11 bankruptcy protection, Aveline cried as she signed the final papers. It was as if her own child had died. She adds of herself and Michio: "We were teachers, not businesspeople. When you see these Erewhon pioneers, please tell them that we are sorry." Aveline hopes someday to have a reunion of all the people who worked at Erewhon. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

2088. Kushi, Aveline. 1992. The founding of Erewhon—Los Angeles (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline went to Los Angeles with her youngest son, Hisao, so that a Japanese doctor could care for her son, who had slipped and damaged his knee. The doctor, an elderly gentleman, was a traditional Japanese chiropractor who specialized in bone massage (*honetsugi*) therapy. Bill Tara accompanied her to Los Angeles. Initially she stayed at Jacques Delangre's house. Every day Bill Tara drove Aveline and Hisao to Japantown to see the chiropractor. Aveline felt sorry for Bill Tara who had very little to do. She ordered all her personal food from Erewhon, so it occurred to her that she should start a macrobiotic natural foods store, which Bill Tara could manage. Without telling anyone, she opened Erewhon-L.A., renting a space near the farmers' market. Soon an accountant from Erewhon-Boston called her and got very upset with the idea of her opening this store. She apologized, but said it had already been done.

The new store attracted students, and she soon needed a place for them to live. So she rented a big house on Franklin Avenue in Hollywood, and Bill Tara started giving lectures. The house, which had a gazebo in the back yard, could accommodate 5 or 6 friends besides her 4 other children who had come from Boston to stay with her. After the Franklin Avenue house filled up, she moved the group out of that house and leased another larger place several blocks away on Franklin Ave. (probably at 7357 Franklin Ave.) in Hollywood, with a big living room and library. Thirty people could stay there, and she started making 30-60 futons for the students to sleep on instead of mattresses. Later in Boston she taught some students how to make futons.

Aveline and her children stayed in Los Angeles for 2 years, then they returned to Boston. After she left, Aveline asked Carolyn Heidenry to come to Los Angeles from Boston and take over management of the Franklin Street house and of Aveline's activities. Carolyn did that and also started a restaurant named Sanae West. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

2089. Kushi, Michio. 1992. Recollections of the early history of seitan (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The word seitan was created by George Ohsawa about 20-25 years ago, a few years before Michio left New York for Boston. Michio first heard the word "seitan" from Ohsawa, when Ohsawa came to American with samples. He gave some samples to Michio, who thinks they were made by Marushima Shoyu at Shodoshima in Japan. Michio thinks the original concept came from China, but the style of product was very different.

Soon the seitan was made commercially and exported

from Japan, probably by both Muso and Mitoku, and sent to Michio in New York. Michio thinks the commercial product was first imported by Erewhon. Initially only a small amount was imported; Michio gave out many samples. At about the same time, Aveline started to use and make seitan in her cooking classes, and to teach others how to make seitan. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

2090. Kushi, Michio. 1992. The main reasons for Erewhon's decline and bankruptcy, and current work with macrobiotics worldwide (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michio has thousands of files in his basement, and some of them probably contain early catalogs and other information about Erewhon. Erewhon definitely started to import from Mitoku first, and then Muso—but they were about the same time. Michio set up all these connections before Paul Hawken went to Japan. Mr. Kazama came to America and they talked about the items Michio wanted to import. Then Muso was approached. Michio thinks Erewhon started importing foods from Japan 1-2 months before Hawken went to Japan. Hawken and Evan Root went to Japan at the same time. The main purpose of Hawken's trip was to study Japanese language and culture, and to set up more good connections for Erewhon and to arrange for products to be packaged individually; previously all were shipped in bulk. Paul didn't find out any new sources, Mr. Kazama did that.

Michio believes that there were two main reasons for Erewhon's decline and bankruptcy: (1) The company tried to expand too much too fast. At the end it was selling 4,000 products; (2) This rapid expansion led to Erewhon having many poor quality products. The company should have concentrated on high quality macrobiotic foods. Management wanted to have a wider selection of products, in part because competitors were offering a wide selection. Also, Erewhon gave up its virtual monopoly on macrobiotic-quality products imported from Japan and revealed many secrets about the Japanese manufacturers and suppliers of those foods and how those foods were made. If he had to do it over again, Michio would concentrate on only the best quality foods, and let the company grow slowly and naturally. For example, the quality of tamari soy sauce began to decline at a very early date. Likewise with the umeboshi plum and sea vegetables. "The quality of every product was declining because of too rapid growth in the company's sales. Moreover the educational activities didn't keep up with the company's growth. Muso and Mitoku have been keeping good quality as best they can but the so-called other natural food buyers, who were not concerned with macrobiotics, also started to go to Japan and buy those products, not only from Muso and Mitoku, but from other suppliers too—especially suppliers of soy sauce and miso with lower quality. These inferior

quality products were retailed for a cheaper price at stores in America. The public did not know about the difference in quality, so Erewhon began to face big competition.

Even though Aveline owned Erewhon, neither she nor Michio ever received any salaries or money from the company. They wanted to let the management of Erewhon have a free hand, so they didn't tell them how to run it—to slow growth and concentrate on keeping quality high. "Erewhon was more like an educational place." There were debates over whether or not Erewhon should carry organic cheese and vitamins. Michio and Aveline opposed carrying these products, but let management do as it wished.

At the time Erewhon was growing most rapidly, the company needed money to finance the expansion, but bank interest rates were extremely high—about 15-18%. Inventory control for 4,000 items is very difficult and expensive; it requires a large warehouse and shallow inventories. During the last few years, Erewhon was able to fill only 40-50% of its orders because so many items were out of stock. Also as the company grew, many non-macrobiotic employees had to be hired to drive the delivery trucks, and they created a labor union. Erewhon had to battle with this union for 1½ to 2 years, and that cost a great deal of money. Truck drivers cut prices to stores in order to try to meet the prices of competitors. Financial difficulties piled up starting at the time when interest rates jumped and the union was formed.

Bill asks why Aveline and Michio didn't give talented managers a share of the ownership in Erewhon to motivate them to stay with the company. Michio says that Paul Hawken owned one-third of the Erewhon shares. Evan Root owned shares in Sanae. The Kushis paid all or part of Evan and Paul's travel and living expenses in Japan. Paul got his one-third shares after he returned from Japan and became president. When he resigned, he was definitely paid for the value of his shares. Paul wrote from California that he needed the money and offered to sell back his shares. So Michio and Aveline sent him the money and Paul sent his shares back to them. Only later did Michio learn that Paul needed the money because of his divorce from Dora Coates. Other people (whose names Michio also remembers) also owned some shares. Michio does not feel that giving managers ownership would have helped Erewhon. Michio thinks that the people who managed Erewhon during its last 5 years had the necessary business skills necessary to manage a company of that size that was growing rapidly.

Another reason for Erewhon's fall was that Michio did not pay serious enough attention to what was happening at Erewhon. He was too involved in teaching in America and Europe. At the time he noticed what was happening and stepped in, the situation had already become too serious. There was much sloppiness allowed by management, even though their intentions were good. He should have noticed a year before. It was a very sad situation. "Yet Erewhon had meaning as a pioneer company. That spirit still remains. My

purpose at present is to continue education all over the world. Macrobiotics is now spreading all over the world, even to the Soviet Union, Thailand, and Japan. In Leningrad some 300 medical doctors are now studying macrobiotics as a group to help find a solution to the health problems of their country. His books are being translated into many Eastern European languages. Also it is very important to reach the scientific, medical, and nutrition professions—as well as governments. Their attitudes are now rapidly changing. Macrobiotics is now growing tremendously. My main concern with natural foods is that the quality be kept very good. My current effort is to elevate the quality of each product. For example, miso should definitely be fermented for 2-3 years. Soybeans and grains should all be organically grown, and only very good sea salt should be used—such as that made by S.I. Salt, an American company in New Mexico, and Lima salt in Europe [from Lima Foods in Belgium]. Michio now goes to Japan twice a year, and there he gives many lectures all over the country, helps to set up chapters of One Peaceful World, and works with food makers on product quality. He also formed the Japan Organic Natural Food Association (*Yûki Nosui Sanbutsu Kyôkai*) in Japan, of which he is president. About 200 companies are members.

On the one hand, Michio is happy with the way his work is going now. “But of course, I am always dissatisfied too. My time and my ability are limited. I can’t help as many people as I would like. The demand is so great. So I always feel sad on that point. Whenever you talk with people from Erewhon, please extend my best wishes. And say always that Michio is thinking of them and their happiness. I hope sometime in the future we can get together. Then we can talk more about how to build one peaceful world—and not only food, but more about health, families, government, economics, and spiritual matters, and how to make the many countries more united and harmonious in one world. Let’s work together.” Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

2091. Deming, Judy Coates. 1992. Recollections of Laurelbrook and Erewhon (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Judy’s former husband, John Deming, lives in Palo Alto (Phone: 415-853-1231). He is an author [unpublished] and investor, but is no longer involved with food. Judy moved to Boston from Baltimore in April 1967. Before Judy met John, she was living with the Kushis, cooking at the house, and working a little at the first little Erewhon retail store at 303-B Newbury St. While Evan Root was in charge of the store, she recalls bagging and boxing foods at night and shipping them to individuals via the U.S. mail—probably at retail prices. Then she worked at Sanae. Later she cooked lunches for employees at the Erewhon warehouse at 33 Farnsworth Street. John Deming moved

into the Kushi’s house on Boylston St., where Judy was now living, and he went to work at the warehouse. She and John were married in Aug. 1972, very shortly after they met. She recalls Bruce Macdonald’s wedding to Maureen Trill, because she made Maureen’s wedding gown. Maureen now lives in Lexington, Massachusetts, near Boston (Phone: 617-862-4687). She and Richard Young were later married.

It was Paul Hawken who had really gotten Judy’s parents (Rod and Margy Coates) interested in founding Laurelbrook and distributing natural foods. Paul, who at the time was married to Judy’s sister, Dora Coates, would come down from Boston with Dora to visit the Coates family. Dora had met Paul when she went to stay with Judy at one of the macrobiotic houses in Boston.

John Deming gave some money [sic, some land in Mendocino County] to Herman Aihara before he and Judy met. After John and Judy moved to Los Angeles, John Deming ended up owning Erewhon Los Angeles—in about 1975. He worked closely with John Fountain, who had the initial interest and convinced John Deming to invest in it. Judy did not know much about John’s financial dealings. John Deming and Jimmy Silver did not part under good terms; there were problems related to Erewhon—Los Angeles; she thinks Jimmy sued John. She and Jimmy are very close friends but John is scrupulously honest.

Dora now lives in Oakland and works for a company named Environs in Oakland. Address: P.O. Box 1411, Ross, California 94957. Phone: 415-457-2155.

2092. Kotsch, Ronald. 1992. Recollections of the early days of Erewhon and Japan (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron does not have any early Erewhon catalogs because he does not collect things. He gave all the research materials he gathered while writing his PhD thesis on George Ohsawa and the history of macrobiotics to Marc van Cauwenberghe’s library; much of the material was in Japanese (photocopies of Ohsawa’s books) and the rest was the English-language notes Ron took while reading these many books and other Japanese-language writings. However he will check to see if his sister has any early Erewhon catalogues.

Ronald was the manager and only employee of Erewhon in the summer of 1967, from early June to August, while the retail store was still downstairs at 303-B Newbury St., shortly before Paul Hawken arrived. Ron thinks he took over from Eizo Ninomiya, a Japanese fellow who barely spoke English and who replaced Evan Root in the spring. Eizo had come to teach a rather obscure form of jujitsu. Ron quickly learned that he was not cut out to be a businessman. The main products he sold (from rough wood shelves) were Kokuho-Rose brown rice, whole wheat flour and beans (which he bagged), Sahadi sesame butter, sea vegetables, and miso. He remembers bagging foods endlessly. Erewhon

was probably ordering a lot of products from Infinity Foods, so the miso may well have come from them. He lived at the Gardner Road house and he would give Aveline the day-end receipts, which averaged about \$50-60 a day that summer. One day he couldn't account for \$5 and it was a big thing. In the evenings he and 8-10 other people would gather for Michio Kushi's talks in a back room at the Arlington Street Church. Ronald thinks he was replaced by Paul Hawken and Bill Tara. Ron does not know who owned Erewhon.

Ron went to Japan in the fall of 1967 with a vague plan to study Japanese culture and macrobiotics. He had studied Japanese at Harvard for a year the previous year, before he discovered macrobiotics. He was the first person from the Boston community to go to Japan for this purpose. Cecil and David Levin came in the spring of 1968. Ron studied with Japanese people, including an acupuncturist named Take Nouchi. He took flower arrangement classes at Nippon C.I., which had a cubbyhole in a huge commercial building. He lived with Michio Kushi's parents for the first 4-5 months (early Dec. 1967 to early April 1968), in Japan, at Hoya near Tokyo, then he moved to Kyoto and enrolled in Kyoto University as a research student. After 4 months, in Aug. 1968, he returned to America.

In 1976 Ron resolved to finish his graduate studies. To receive a doctoral degree in History of Religions from Harvard he needed only to write a dissertation. So he brushed up his Japanese and flew to Japan in Feb. 1977. He enrolled immediately in Kyoto University, got some jobs teaching English in colleges there, and spent the next 18 months collecting books and papers about Ohsawa, 95% in Japanese, and conducting 15-20 interviews. In July 1978 he returned to Boston and for the next 18 months he read and took notes on the documents he had collected. In the 2-3 years after he finished the thesis, he received 200-300 requests for copies of it, indicating that there was an interest in the history of macrobiotics. This led him to write a book on that subject at the request of Japan Publications. It has sold about 7,500 copies. In 1987 his book *Macrobiotics: Beyond Food* was published.

Ron continues to write: he is now interested in Rudolf Steiner, anthroposophy, and Waldorf Schools, plus the Alexander Technique related to body awareness. He is the editor of a magazine that deals with Waldorf education. He writes a little for *Natural Living* and *New Age* magazines. Address: 4 Hulst Rd., Amherst, Massachusetts 01002. Phone: 413-256-6478.

2093. Root, Evan. 1992. Recollections of early work with Erewhon and Sanae. Trip to Japan with Paul Hawken (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of April 29.

• **Summary:** Evan (his first name rhymes with "heaven") does not have any early Erewhon catalogs, but he thinks

Marc van Cauwenberghe might have some in his library on macrobiotics. He does have a letter to the general public announcing the opening of the first Erewhon retail store on 9 April 1966. It was at 303-B Newbury St., below street level. Initially Evan owned (titularly) 100% of the stock in Erewhon, but soon he passed it to Aveline Kushi after legal documents were drawn up. While he was at Erewhon the little retail store sold the following soy products: whole soybeans and probably soy flour (probably from Walnut Acres or a Mennonite community, both in Pennsylvania), soy sauce and miso (probably both obtained from Infinity Foods in New York; Infinity imported these products from Japan). Hamanatto was also sold. No tofu was sold at the store, but firm tofu was available from nearby Chinatown.

The Kushis imported miso, shoyu, condiments, etc. from Japan about twice while Evan was managing the Erewhon retail store. This direct importing was infrequent and the quantities were small due to the lack of cash. It was much easier to buy from Infinity or Chico-San and not tie up the money. In fact it was the norm to stretch out those friendly distributors as long as possible for payment.

Before he left Erewhon, in Oct. 1967, Evan personally hired Paul Hawken, with Aveline's permission, to take his place. Then Evan opened the first macrobiotic restaurant in Boston, named Sanae (meaning "young rice plant" in Japanese); it opened in early 1968 on Newbury St. In late March 1969, Evan and Paul Hawken left Boston and traveled to Japan together. Several months before they left, Evan had been given 50% of the shares of stock in Sanae by the Kushis for the work he had done at Sanae. The Kushi's lawyer, Morris Kirsner, had drafted the agreement to read that if Evan did not return to management of the company within 18 months, he would agree to sell this stock back to the Kushis at an agreed-upon price. Evan thinks that Paul had a similar type of stock arrangement in Erewhon, but he is not sure what it was (Note: See interview with Aveline Kushi, March 1993). Evan went to Japan mainly to study the language and culture. He ended up staying there 3 years and 7 months, largely in Tokyo (Setagaya-ku, Shoin-jinja-mae). He studied Japanese at the Tokyo School of Japanese Language. After 18 months, there was a lad name Hiro Fujieda living with the Kushis in Boston. Rather than Hiro pay rent to the Kushis, Hiro's family would pay Evan monthly in Japan on a monthly basis—until the value of the stock was paid off. Evan used this money to support his studies.

After about a year, in late 1971 or early 1972, Evan went to work for Muso Shokuhin in Osaka. He translated letters that arrived from Europe and America into spoken Japanese, and then answered the correspondence. By the end of his stay in Japan, Muso was exporting quite a volume of natural foods and exports were a big part of the company focus. Evan thinks that Ty Smith took his place when Evan left.

Returning to Boston in early Oct. 1972 (along with Mr.

Masuda and Michelle Matsuda), Evan became an employee of Sanae after several months, working as maître d'. In 1971, while Evan was in Japan, Sanae had expanded to open another larger branch restaurant in Boston, originally called "Sanae" but informally called "Big Sanae," then later formally named The Seventh Inn (at 269 Boylston St.). When Evan was in Japan, he heard that the restaurants were not doing well, so Yuko Okada (originally of Muso Shokuhin, who was working at Erewhon) took over management of Sanae. Hiroshi Hayashi, a top cook in a lineage, traveled to Boston from Japan, bringing with him his disciple, Chika Abe, to take charge of cooking at Sanae. His disciple, Mr. Yozo Masuda, later joined them. Hayashi is now at a restaurant named Latacarta in Peterborough, New Hampshire (Phone: 603-924-6878).

Evan's recollection is that Paul Hawken's trip to Japan was more to study the language and culture, but he did work on Erewhon business while he was there. Moreover, he returned from Japan after about 9 months to work at Erewhon. Evan feels that few of the people involved in early macrobiotic businesses saw themselves strictly or even mainly as businessmen. "None of us were in it, as I saw it, for the money. For us, the whole thing was a Cultural Revolution with respect to Japan." Evan also identified strongly with the phrase "Biological Revolution."

When Paul Hawken returned from Japan, he built Erewhon into a big natural foods company. Address: 541 Washington St., Brookline, Massachusetts 02146. Phone: 617-566-4783.

2094. Root, Evan. 1992. Recollection of his first encounter with seitan (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Evan first tasted seitan in Boston before he went to Japan in late March, 1969. "The seitan was in a glass jar, and it was this very hard, tough, gnarly, salty stuff. In Japan, I remember getting Kofu Cutlets at a macrobiotic restaurant in Tokyo." He thinks that the product in America originally bore a Chico-San label, or maybe an Infinity Foods label, but not an Erewhon label. Eventually there may have been an Erewhon label. Later he saw seitan in vacuum-packed poly bags. In Japan, he does not recall Muso exporting seitan. Nippon C.I. probably exported seitan to Chico-San, since Chico-San was their first major customer in America. Address: 8 Ayleston St., Jamaica Plain, Massachusetts 02130. Phone: 617-566-4783.

2095. Hawken, Dora Coates. 1992. Recollections of Laurelbrook and Erewhon (Interview). *SoyaScan Notes*. April 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Formerly married to Paul Hawken who was one of the early presidents of Erewhon, Dora now works for Environs in Oakland. In her recollection, the reason

her parents decided to switch from a motorcycle business into starting a natural foods distribution company was that, first, they had been eating macrobiotic and natural foods for several years before starting Laurelbrook. Judy played the leading role in providing and teaching about the foods. Dora got involved with macrobiotics because of Judy. Rod and Margy knew how good it felt to eat such foods, and they both lost weight, even though neither was overweight. They also read quite a bit about macrobiotics and natural foods. Then, her father talked to Paul Hawken. When Paul found out Rod Coates had lost his job, wanted to start a new business, and already had a warehouse which he planned to use for motorcycle parts, Paul told him that this was perfect opportunity to get in on the ground floor of a growing new industry. At the time, Rod even had a motorcycle parts letterhead drawn up. So Paul played a major role in Rod's decision. This happened at just about the time that Paul and Dora were married.

Paul is now writing a book on how businesses are affecting the environment. He left Smith & Hawken about 1 month ago because there was nothing more creative to do there. He prefers to be an entrepreneur rather than a manager. She is surprised he stayed there as long as he did. Address: Oakland, California. Phone: 510-658-7633.

2096. Hawken, Paul. 1992. The ecology of commerce. *Inc*. April. p. 93-94, 96, 98, 100; July. p. 33-34, 36, 38, 41, 44.

• **Summary:** Businesses, capitalism, and the free market are destroying the world (and thus themselves), yet they alone may have the power, capital, and organization to save it from ecological and social catastrophe. Because businesses have become the most powerful institution on the planet, they must begin to take responsibility for the whole and switch from the "economics of degradation" to the "economics of restoration."

"Paul Hawken started Smith & Hawken, the garden-and-horticulture-catalog company in 1979. Paul was the founder, in 1966, of Erewhon, one of the first natural foods companies in the country. He is the author of *The Magic of Findhorn*, *The Next Economy*, and *Growing a Business*. This article was adapted from a speech he recently gave to the Commonwealth Club of San Francisco."

For a host of responses to this article and Hawken's answers to them, see the July issue of *Inc*. Address: Mill Valley, California.

2097. *Natural Foods Merchandiser*. 1992. Bay Area stores are bustling. Retail news: California roundup. April. p. 20-21, 23.

• **Summary:** The many nice profiles of retailers include: Rainbow Grocery in San Francisco (opened in 1976), Real Foods in San Francisco opened in 1969 (and now has 6 stores), and Whole Foods Market in Mill Valley—about to open soon in affluent Mill Valley in an 11,000 square foot

[funky-looking] refurbished Quonset hut. This will be the company's third Bay Area location—and the 14th for the chain. The Austin, Texas-based company, which went public in January will finance the new store with money from the sale of company stocks, according to Peter Roy, president of Whole Foods' California division. "The stock looks very strong," he says. "It opened at \$17 and closed one week later at \$24."

The Mill Valley store "will be less than half the size of the 25,000-square-foot Berkeley store, which currently grosses \$13 million a year, and the 22,000-square-foot store in Palo Alto, which does \$14 million a year."

Organic foods are sold at all stores discussed.

2098. Israel, Fern. 1992. Early recollections of seitan in America (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Fern first learned how to make seitan prior to the summer of 1974, probably from either Aveline Kushi or Tamara Uprichard, the wife of Stephen Uprichard. In the summer of 1974 Fern went to visit the Wiscoy Valley Community Farm in southern Minnesota. The farm was run communally by a group of macrobiotics who lived by farming the land, grew all their crops (they may have been the first macrobiotic group to grow aduki beans) organically, ground all their own flour, cooked on wood stoves, refused to buy imported food products from Japan, etc. They wanted to Americanize macrobiotics. She may have also learned to make seitan there, but probably not.

She knew about seitan by 19 October 1974, for on that date she was married to Ron Israel in West Roxbury, Boston, and for the wedding she personally made sweet & sour seitan balls—starting with seitan she had made herself.

Fern clearly recalls the first commercial seitan product that she ever tasted, which was named the Tan Pup—and which she loved. It was deep fried in a breaded batter (with corn, sesame seeds, and spices), had a skewer through one end, and measured about 4 inches long, 3 inches wide, and 3/4 inch thick. It was sold at the Erewhon retail store at 342 Newbury St. in Boston, in a special non-refrigerated bakery case, behind glass doors, 5-10 feet from the cash register, together with baked products. Fern thinks the product may have been made by Cathy Creighton. She probably first tasted Tan Pups at about the time her first child, Kate, was born at home on 3 May 1975. It may have been at about that time that Johnny moved out to live with his girlfriend Annie, and that he and Sakee split up as partners. She is quite sure the product was not on the market before 1974.

Before Fern's first child was born, she taught her husband and John Weissman (who was living with them) how to make seitan. The two men formed a partnership (their business may have been named the Wheatmeat Company) and began to make seitan commercially. Soon they were selling it commercially in the Erewhon retail store in Boston

under the brand name Wheatmeat. She does not remember Pat Murray ordering seitan, nor recall that the macro study houses ever ordered seitan. Then they began to make Tan Pops (a close relative of the former Tan Pups that Fern loved so much) in their home in West Roxbury and to sell them at Erewhon. (Sakee does not recall making Tan Pops). Fern has no recollection of the business named Baby Watson Cheesecake Co. Fern's second child, a boy, was born at home in December 1976.

Fern thinks (but she is not sure) that after she and Sakee stopped making seitan, Chris Lorensen Bailey started to make bulk seitan at her home in Boston, and to sell it in the Erewhon retail store.

Fern talked about this with her good friend Enid Strauss, and Enid's husband Andy; they made felafel balls at about the same time as Fern's husband and John Weissman were making Tan Pops. Enid thought that Fern and her husband made the first Tan Pups. For more information she suggested contacting Helen and Matthew Sandler, who founded Matthew's Bakery in Boston. They now live in Aspen, Colorado.

She also talked with Tamara Uprichard (in Heath, Massachusetts), who recalls that Hiroshi Hayashi at the Seventh Inn was the first to teach the fast way of making seitan from ground whole wheat. Hiroshi now has a natural foods restaurant named Latacarta in Peterborough, New Hampshire (Phone: 603-924-6878). Address: 82 Buckingham Rd., Milton, Massachusetts 02186. Phone: 617-696-1665.

2099. Gerner, Bob. 1992. The OM (Organic Merchants) meeting on Mount Shasta in California organized by Fred Rohe (Interview). *SoyaScan Notes*. May 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The OM (Organic Merchants) meeting held on Mt. Shasta at the end of June 1970 was organized by Fred Rohe of New Age Natural Foods. Before the OM meeting on Mt. Shasta, there had already been 1 or 2 meetings. The purpose of this meeting was to start a trade association of natural food retailers on the West Coast and to encourage the establishment of new stores of this type. The 1-2 day meeting took place outdoors on the side of Mt. Shasta and everyone slept outdoors in sleeping bags up near the top near a ski cabin. In the morning, they got up early and all chanted "Om." Ezra Hendon (an attorney, who still lives in Berkeley and who was the public defender for all of California up until a few years ago) was selected to be the executive director of OM. He ran the group for about three years. Fred Rohe continued to be the guiding light. The association provided members with literature (pamphlets such as "The Sugar Story", "The Oil Story"), checked out suppliers to see if they were bogus or not (Talbot and Hendon checked out Dr. Bronner, who locked them in his laboratory with him and ranted and raved at them until they were terrified), etc. OM decals were created and member stores affixed them to the

front door or windows.

OM ceased to exist because they couldn't afford to pay the executive director, Ezra Hendon, adequately; he ended up having to bake bread in Bob's store to make ends meet.

Bob first met Paul Hawken at this OM meeting; he thinks Paul was either working with Fred Rohe, or was representing Erewhon. Bob thinks that New Age Natural Foods in Palo Alto did not open until after Westbrae opened on 2 Feb. 1971. Other people who were at the meeting were Allen Talbot (now an attorney who lives in Berkeley) and Joel of Wholly Foods, stores from Chico and Redding were represented, someone from Good Natured Grocery, etc. Bob does not recall Chico-San being represented.

Talk with Tom DeSilva of Erewhon—Los Angeles. 1992. July 10. Organic Merchants, representatives of the natural foods industry, met once a year for 4-5 years. Tom kept the minutes from all those meetings, but he does not know if he still has any of them.

Talk with Bruce Macdonald. 2011. March 2. Organic Merchants, a trade association for the natural foods industry, was the idea and dream of Fred Rohe and Paul Hawken. One of its purposes was to establish standards for natural and organic foods. As far as Bruce knows, no industry-wide standards were ever developed. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

2100. Chait, Mat. 1992. Early recollections and work with the Ricycle and soyfoods in Boston, 1970-1972 (Interview). *SoyaScan Notes*. May 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the late 1960s Mat had started graduate school in counseling psychology at Hunter College in Manhattan, New York. But under the influence of yoga, Swami Satchitananda, Hinduism, vegetarianism, and macrobiotics, he decided to drop out and to study macrobiotics in Boston with Michio Kushi. He arrived in Boston in about December 1969. Nine months later, Mat started operating the Ricycle at Boston University in September 1970 at Boston University. He recalls: "The design of the Ricycle was absurd. It consisted of a steam table (which without its food weighed 600-700 pounds) welded onto the back of a girls bicycle. To move the Ricycle, he pedaled it (rain or shine; or pushed it up even gradual hills), but it was so heavy and clumsy as to be almost immobile." At night it was kept in the garage of the macrobiotic study house at 6 Ellery Street.

During the first 6 months, Barbara Grace prepared most of the desserts and whole grain breads at the kitchen of a big study house across from the Brookline High School. Marion (who had an Italian last name) prepared the vegetable and grain dishes in another study house. (Note: Marion married Frank Calpeno, who owned Ceres Natural Foods, a fairly big macrobiotic food distribution business in Colorado Springs,

Colorado; they moved to Colorado in the early 1970s). Dora Coates (whose parents started Laurelbrook Foods) also cooked for Mat for a while. The business took off quickly, with the help of many magazine and newspaper articles. Mat got a loan, so in early 1971, in the dead of winter when it was too cold to be out on the street, Mat built a kitchen inside the Erewhon warehouse, and it began operation at the end of March 1971. Since Paul Hawken was in California at the time, Mat got permission from the acting president of Erewhon.

Every day the Ricycles would offer a grain dish, whole grain bread, a vegetable dish, a dessert, and often a soup—but there was a different menu every day. A number of popular dishes contained soy as an ingredient. A miso-tahini spread was usually available with the bread. Miso soup and Miso Rice were often served. For Miso Rice, miso was mixed with a little water then stirred into a pressure cooker of hot rice that had just been cooked, and allowed to stand for a few minutes. Mat vividly recalls that on days when he had to stand in front of Boston University in the freezing cold for 6 hours without moving, the miso soup would keep him warm. After Mat opened the kitchen at Erewhon, he contracted with David Kailin of Crane's Call Bakery, a macrobiotic bakery, to make most of the desserts and other baked goods for the Ricycle. Sometimes the vegetable dish of the day had tofu in it, or the grain dish had miso in it.

While building the kitchen inside Erewhon, Mat constructed two more Ricycle carts. Mat launched these in the spring of 1971; one served its macrobiotic lunches on weekdays at MIT in Cambridge, and the other in downtown Boston at government center. He was unable to get permit to operate at Harvard Square. The other 2 Ricycles were operated by people that Mat employed; they were paid a percentage of their sales.

One year at the Christmas reunion, Mat did an elaborate impersonation of Michio Kushi (complete with makeup and a built-up nose construction), wrote, sang, and led the audience in a song about miso to the tune of "Get me to the church on time." The words went: "I'm drinking miso in the morning. Hatcho or mugi is sublime. Aveline or my daughter, go heat up the water, and get my miso soup on time. If you use onion, sautee it first, if you use daikon, it satisfies your thirst. For I'm drinking miso in the morning..."

Mat left Boston in about December 1972 to take an acting job in New York. At the time he sold and shipped all 3 Ricycles to an eccentric millionaire's son in Texas. He does not have any recollection of Tan Pups being on the market but he does remember seitan imported by Erewhon from Japan, perhaps by Japan Foods, in the form of little dark salty chunks. Perhaps Robert Hargrove might know more about this. Perhaps Erewhon made the Tan Pups.

Concerning Paul Hawken's departure from Erewhon in late 1973, it has always been Mat's understanding that Aveline Kushi owned the company but that the Kushi's

negotiated to pay him \$30,000 when he left.

Mat once visited Erewhon's little farm in Keene, New Hampshire. They made sauerkraut there on the top floor of a building; one would jump up and down on the cabbage in a barrel to press it. Address: 8-23rd Ave., Apt. 302, Venice, California 90291. Phone: 213-465-0383 or 213-469-5408.

2101. *SoyaScan Notes*. 1992. Dates that people were actively involved in making, selling, or teaching about food in and around Boston, Massachusetts (1963-1992) (Overview). May 19. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1963 Sept. to present—Michio and Aveline Kushi, teachers of macrobiotics.

1965—Richard Sandler.

1966 April? to 1969 March, ? ? present—Evan Root, first manager of the first Erewhon retail store at 303-B Newbury St.

1967 April to ?.—Judy Coates.

1967 June to 1969 Oct.—Bruce Macdonald, Erewhon president.

1967—Martin Russell moved into Kushi House on Gardner Rd., Evan Root, Beverly Stiskin. Martin stayed until 1968 then went to California. Moved back to Boston, married a Laurelbrook daughter, stayed 1969-74. Martin is now a baker.

1967 June—People living at the Kushi's home on Gardner Road and studying macrobiotics with them (according to memory of Bev Stiskin Sky, Jan. 1999): Jim Ledbetter, Evan Root, Peggy Taylor, Connie Frank (Richard Sandler's first wife—Bev introduced Richard to Connie), Paul Hawken, Ty Smith, Peggy Winter (who is no longer living), Peggy Winter, and Rebecca Dubawsky.

1967 Aug. to summer 1968 Wally Gorell, Erewhon. Then moved back to San Francisco for the summer. Aug. 1968 to Aug. 1969 back to Boston. Then left for Japan

1967 Oct.—1969 March, 1971 Sept.—1973 Dec?—Paul Hawken, president of Erewhon.

1967 Nov. to 1968 Nov.—Bill and Renee Tara, Erewhon.

1967?—1972? Jim Ledbetter, wrote a book in 1969 titled *Cooking Good Food*.

1968 Oct. 1971 Aug.—Roger Hillyard, Erewhon.

1968 Nov.? Jim Docker, Erewhon.

1968 Nov.? Jean Allison, Erewhon.

1969? Hy and Laura Lerner, Erewhon.

1969 March, 1970, 1976-1980—Hannah Bond.

1969 July—Lenny Jacobs, East West Journal.

1969 Dec. to 1972 Dec.—Mat Chait, the Ricycle.

1970 Jan. to 1982 May—Bill Tims, Erewhon wholesale and East West Foundation.

1970 Feb. to present—Kathy Bellicchi.

1970 April to 1974—Yuko Okada (Erewhon retail store, Erewhon warehouse as production manager then import manager, Seventh Inn),

1970 April?—?—David Kailin, Crane's Call Bakery.

1970—Nick Doherty, Erewhon warehouse and retail store.

1970 Dec. to 1976—Jimmy Silver, Sanae, The Seventh Inn.

1970—1973—Howard Grundland, who later started Sprucetree Baking Co.

1971 Feb.—1972 Oct. Murray Snyder lived in an apartment with Marcea Newman and baked at a kitchen in the Erewhon warehouse.

1971 July—1974. Marcea Newman. Murray Snyder "brought" her to Boston. They lived together for about a year, then she met Dan Weber, and they lived in Boston for a while before they moved to Australia.

1971?—Michael Rossoff, who later ran the East West Center in Washington, DC. He has a good library.

1971? Eric Utne (and his brother, Tom?). Eric founded East West Journal, New Age, New Age Journal, and the Utne Reader.

1971?—Phil Levy, published Talking Foods pamphlets.

1971, May to 1973—Nik and Joanne Amartseff, Erewhon, and made Tan Pups and Piroshki from seitan.

1971 Yumie Kono—The Seventh Inn.

1971 July to 1981 Dec.—Charles Kendall, Erewhon.

1971?—Bill Garrison, manager of Erewhon.

1971 Oct. 1—John W. Deming, Jr., Erewhon warehouse.

1971? Jack Garvey, East West Journal, Erewhon.

1972 summer to 1974 spring, then 1977 April to 1982 May—Joel Wollner, Erewhon retail and ran a study house in Boston.

1972 Sept.—Ed Esko, East West Journal.

1973-1984—Matt and Helen Sandler, ran a bakery.

1973, early?—Stephen Uprichard, worked at the East West Institute.

1973 June—Tamara Uprichard, worked at the 7th Inn.

1973? to Aug. 1975—Barry and Cathy Creighton, Cable Springs Bakery.

1973 Sept.—Wendy Esko, cooking.

1974 June?—Fern and Sakee Israel.

1974 Oct.—John Weissman, Wheatmeat Co., seitan and Tan Pops.

1974 Nov. to 1976 Jan.—Tyler Smith, Erewhon president.

1976 March to Dec.—Jos van de Ponsel from Belgium, studied at Kushi Institute and made seitan.

1978 Sept. to 1979 May—Paul Duchesne, Rice House (lived in the Garvey House).

Others include: Rich Young, Jeff Flasher, Dan Seamens, Andy Strauss, Fearn and Ron/Sakee Israel, Ron Kotsch, Tony Harnett (Erewhon, Bread & Circus), Ann Burns (widow of Ken Burns), Victor Marin, Robert Hargrove.

Best sources of current names and addresses: Evan Root, Lenny Jacobs, Jimmy Silver, Rich Young, Kushi Institute (Becket, Massachusetts).

2102. *SoyaScan Notes*. 1992. What happened to major

macrobiotic institutions in America? (1963-1992) (Overview). May 19. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Two of America's main macrobiotic institutions were Erewhon, a pioneering natural foods company, and the *East West Journal*, a major counter-culture magazine. Both were founded and owned by Michio and/or Aveline Kushi. They hired a succession of young amateur macrobiotic men to run these two companies but they never allowed these people to own any part of the company and they paid them low wages. Some of these young managers were exceptionally qualified (e.g., Paul Hawken and Bruce Macdonald at Erewhon, or Eric Utne at East West), but they were not willing to work year after year for low wages and with no ownership in the companies they were building. Michio should have known that one cannot run a growing company using a succession of inexperienced managers. Moreover, Michio gave the responsibility to the managers and some of the staff but he always kept ultimate authority. He often discouraged entrepreneurship among his managers, and he often "pulled the rug out from under their good ideas" or reintroduced the same ideas as his ideas.

2103. Wollner, Joel. 1992. Re: Brief history of his work with macrobiotics. Letter (fax) to William Shurtleff at Soyfoods Center, May 19. 2 p.

• **Summary:** In 1969 Joel, while a student at Cornell University in Ithaca, New York, first made contact with Boston macrobiotic activities. In Ithaca, he often visited the Ithaca Seed Company, a counter-culture bookstore with strong macrobiotic and Zen leanings and, what attracted him, the best local inventory of books on traditional Oriental arts, literature, culture, and philosophy. In about 1970, Ithaca Seed opened a small restaurant in the back of the bookstore, serving standard macrobiotic fare. "The first whiff of hijiki sent me scurrying back to Basho [the famous Japanese haiku poet].

Joel first moved to Boston in the summer of 1972 and lived there until the summer of 1974, when he and his wife moved to Cape Cod, Massachusetts, only 90 miles away. They moved back to Boston in 1977, stayed until the summer of 1982 (during this period they ran a macrobiotic study house), then moved to Arkansas.

Joel first worked at the Erewhon retail store (at 342 Newbury Street) in the summer of 1972, but only for 1 month. Paul Hawken was president. After several years experience in the "real world," he returned to the Erewhon in the spring of 1977, as manager in training at the Newbury St. store. He was assistant manager at Newbury St. in late 1977, store manager in early 1978, store manager at Brookline in 1980, and retail CEO in 1981. He stayed at Erewhon until the new owner [Ronald Rossetti] took over command, then he moved to Arkansas, where he and friends started Mountain Ark Trading Co. in Fayetteville.

He lived in various Boston area macrobiotic "study houses" from summer 1972 through spring 1974, when he married and moved to an apartment. Throughout this period his roommates and closest friends worked at or managed various macrobiotic community enterprises: Erewhon, The Seventh Inn, East West Journal, Tao Books, East West Foundation, etc.

In the summer of 1974, Joel and his wife moved to Cape Cod where they lived until spring 1977. Throughout this time they maintained close ties with the Boston macrobiotic community. In 1975 they started the Macrobiotic Center of Cape Cod. In Nov. 1976 they hosted William Shurtleff and Akiko Aoyagi's tofu and miso tour visit to Cape Cod, with activities that included a well-attended lecture-demonstration, an interview on local radio, and lunch (Nov. 19) with Claude Alan Stark, who presented Shurtleff with an inscribed copy of his book *The God of All: Sri Ramakrishna's Approach to Religious Plurality* (1974, published by the author). Address: Joel Wollner Associates, P.O. Box 1343, Clifton Park, New York 12065. Phone: 518-371-7014. Fax: 518-373-8337.

2104. Wollner, Joel. 1992. Re: Ode to Tan Pops. Letter (fax) to William Shurtleff at Soyfoods Center, May 19. 2 p.

• **Summary:** "Did you ever eat a 'Tan Pup?' [sic, Tan Pop]. Hot? If not, you can't imagine the ecstasy (and agony) you missed. A Tan Pop's crusty exterior belied a succulent interior, redolent of soy sauce, garlic, and herbs. The vegetarian's version of the famous 'Corn Dog,' from which their name was played, the Tan Pop was a crispy-crust, batter-fried chunk of Wheatmeal, ¼ pound, stuck on a skewer. More exotic than any blanketed hot dog, freshly cooked, steamy hot Tan Pops were so incredibly irresistible, they made many a glutton of gluten. No one, outside their maker, Johnny Weissman, of the Vegetable Protein Company, Cambridge, MA, knew the exact recipe. In the years I worked at Erewhon's Newbury Street store, from 1977 to 1980, Tan Pops were a big hit, with a loyal following. Two mornings each week, 'Johnny Wheatmeal,' as we called him, brought in a batch of 50 or more steamy hot, freshly made Pops. I can still smell them today, mouth watering. We displayed them still hot in a large wood bowl at the checkout counter. I believe the store paid around 50¢ to 60¢ each, and they retailed for 75¢ or 85¢. As soon as they arrived, the store staff started in eating them, and eating too much of them. One Tan Pop was great, but rich as they were, two or more was courting belly aches. Still, there were never enough to go around, but Johnny would only complain about how difficult they were to make. I don't know how long Tan Pops were sold at Erewhon before I started working there, nor do I know what became of Tan Pops or Johnny Wheatmeal in recent years. I remember learning that Johnny held a federal registration of the name 'Wheatmeal.' He also marketed Wheatmeal cutlets of several ounces each,

refrigerated or frozen, plain (unseasoned) or cooked in soy sauce broth, which he sold to Erewhon and other Boston area natural food stores. As I recall, the Wheatmeal ingredients included wheat gluten and soy protein. Johnny Wheatmeal was something of a vegetable protein visionary, who experimented with many wheat and soy protein products, such as sausages. I also remember that Andrew Levine, formerly a clerk at Erewhon Newbury, used to spend a fair amount of time chatting with Johnny Weissman. You can reach Andy at Yellow Emperor in Eugene, Oregon (503) 485-6664.”

Note: To find out who developed the forerunner of Tan Pops, Joel suggests contacting Matt and Helen Sandler in Aspen, Colorado, or Hannah Bond (also known as Anne Harris) in Athens, Vermont. Both, in fact knew, that the forerunner was Tan Pops, developed by Nik Amartseff of Brookline, Massachusetts, in about March 1972. Address: Joel Wollner Associates, P.O. Box 1343, Clifton Park, New York 12065. Phone: 518-371-7014. Fax: 518-373-8337.

2105. Kendall, Charles. 1992. People involved with food and macrobiotics in Boston from 1971 to 1981. Memories of Tan Pops, Tan Pops, and seitan (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Charles lived in Boston as part of the macrobiotic community for about 10-12 years, from about July 1971 to December 1981. In 1970-71 Charles started to work for Erewhon packaging products. Then he became their roaster, roasting grains and seeds for the Erewhon cereals. At one point he left for a year and studied Sanskrit. From about 1974 to 1978, Charles worked at the Erewhon warehouse running “The Company Store,” which sold products to Erewhon employees and “friends of the community.” They could buy small quantities of Erewhon products at wholesale prices + 10%. George Crane helped to start this store. After leaving The Company Store, Charles then he went back into roasting for Erewhon.

Charles remembers Tan Pops (skewered deep-fried seitan in a breaded batter) as an excellent product, and thinks they may have been made by a woman out of her home as a small operation—but he is not at all sure. He tasted Tan Pops but he is not sure if he ever bought Tan Pops for The Company Store. He also remembers Tan Pops which his store brought from Johnny Weissman; he recalls that their quality gradually declined after he began to use gluten flour. Charlie liked Tan Pops better than Tan Pops.

People who were living in Boston during this period, who were involved with food, and who might know who created and made Tan Pops include, in order of importance: (1) Andy Strauss, who made peanut butter cookies, and who was out delivering to all the stores. He is now studying kendo in Japan. Andy was a good friend of Sakee Israel. Try contacting him at: 4 Bentley St., Brighton, Massachusetts 02135. Phone: 617-254-7977. (2) Tyler Smith, who came

back to Boston from Japan in 1973 or 1974. He worked for a while at Tao books, then took over Erewhon, was there for 12-18 months, then left. Ask Ty who ran the Erewhon retail stores on Newbury St. or in Cambridge during this time. (3) Richard Young keeps in touch with many people interested in macrobiotics and has their addresses and phone numbers in his notebooks. He now lives in his home town of Quincy, Massachusetts. Phone: 617-328-4197. (4) Hannah Bond lives in Cambridgeport, Vermont. Bruce Macdonald lives there too. (5) Matthew and Helen Sandler were in Boston from about 1969-1982. Helen was very discerning about quality and knew a lot about what foods people were making. (6) Tony Harnett who now owns Bread & Circus, but who started as a small store and purchased seitan from Johnny Weissman. (7) Ann Burns, Ken Burns’ widow, still lives at 16 Warren St, Brookline, MA 02146. Phone: 617-734-4115. (8) Victor Marin used to distribute foods in Boston. He now runs a little seaweed company (Ocean Harvest Sea Vegetables) on the coast of northern California (in Ukiah or Comptche), and harvests sea palm (Postelsia). (9) Chris Erickson, who worked at the Erewhon warehouse for many years with the roasting and nut butter line. He lived in Cambridge and is now in Kentfield, California. He arrived in Boston about 1970-71. His phone: 415-721-7249. Note: In Oct. 2004 Chris was murdered by his own son, with whom he was living in San Francisco. (10) Wendy Esko now lives on Lower Main St., Becket, MA. She is part of the macrobiotic community there. Her phone: 413-623-5645. (11) Nik Amartseff. (12) Ron Kotzsch. (13) Kazuko Awamura was a cook at the Erewhon warehouse. Address: Owner, Kendall Food Co., 46A Route 112, Worthington, Massachusetts 01098. Phone: 413-238-5928.

2106. Okada, Yuko. 1992. Re: Muso’s soymilk factory in the USA. Importing organic soybeans to Japan. Letter (fax) to William Shurtleff at Soyfoods Center, May 21. 1 p. [Eng] • **Summary:** “Did you know that I have a soymilk factory in the U.S.? It has been operating for almost 7 years. It was the first soymilk company in the United States and is growing every year. The company is located in Michigan, where most of the organic soybeans are grown.” Note: The author is probably referring to Muso’s 15% ownership in American Soy Products, Inc., whose plant at Saline, Michigan, began commercial operation in Nov. 1986.

Muso is also importing organic soybeans into Japan, and has already imported about 300 metric tons this year. The use of organic soybeans in Japan is growing on the part of companies making shoyu, miso, tamari, tofu, etc. for Muso. Address: Muso Co., Ltd., Kosei Bldg. 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0341.

2107. Tims, William. 1992. Studying macrobiotics in Boston and tofu making in Otake, Japan (Interview). *SoyaScan Notes*. May 21. Conducted by William Shurtleff of Soyfoods

Center.

• **Summary:** Bill grew up in Oklahoma. In 1969 while attending the University of Oklahoma he developed an interest in Oriental culture, philosophy and religion. He started studying Buddhism and Taoism. One day he came across a little spiral-bound book titled *Zen Macrobiotics* by George Ohsawa. Within several months he quit school and hitch-hiked to Boston, arriving in Jan. 1970.

He lived in a study house with Tom and Mary Hatch, then lived with Michio and Aveline Kushi on Boylston Street, before they moved to 62 Buckminster Rd. First he worked as a carpenter, then starting in early 1972 he worked at the Erewhon warehouse. Paul Hawken was president of Erewhon, but he left Boston, then came back and left again.

In about the spring of 1975, at one of Michio Kushi's "Way of Life" talks, which he gave every Tuesday and Thursday night, Michio said that he had made arrangements for 3 Americans to go to Japan to study traditional food processing. Bill never saw a written announcement of this. Bill signed up for the program along with about 20 other people. Bill had to return to Oklahoma in the summer of 1975, but he returned to Boston in Dec. 1975. He expected that he, Charles Kendall, and one other person would be leaving for Japan in Jan. 1976. He was surprised to find that he was the only one going. Everyone else, for reasons unknown to him, had backed out. He was a bit curious and suspicious as to why no one else wanted to go.

In Jan. 1976 Bill flew to Japan. He spoke no Japanese and had almost no money. It was his understanding that if he paid his flight to Japan, in exchange for the work he would do in Japan, he would be provided with a room and board, a small salary, and a flight back to America. Michio and Aveline had never suggested to Bill that he start a tofu shop in America after he returned, and Bill never had an interest in making tofu. He was going to Japan mainly to learn about the country and its culture; the tofu was accidental. In Osaka, Bill met Lima Ohsawa. An older man who was a friend of Lima's became Bill's guide. After several days in Osaka they took a train together to the little village of Otake, about 15 miles south of Hiroshima. They were greeted with great fanfare and met by a man who was the tofu master—who spoke no English. Bill never understood the relationship between the tofu master and Michio Kushi. The tofu master set Bill up in small apartment with a bike, 5 minutes bike ride from the tofu shop. Bill's guide spent 2 days with Bill at the village translating (since no one else in the village spoke English), then he left. Many villagers asked Bill if he was a soldier from a nearby U.S. military base.

Bill worked hard at the tofu shop with 7-8 other employees (mostly older women), not including delivery boys, for the next 7-8 months, until August. The master was very much a traditionalist; he was the only person Bill met in Japan who ate brown rice, but he never mentioned macrobiotics. The master was a hard worker, very stern and

yang, but a good, strong, often loving man who treated Bill specially and kindly. Bill has very good memories of him. He made nigari tofu and 13-14 different products (incl. egg tofu, burdock tofu, various deep-fried types), and his dream was to have his style of tofu shop all over the world.

For Bill, the best times were when the master allowed him, twice a week, to take the company truck alone, all day, to deliver okara to dairy farmers in the countryside. Bill was able to do a bit of exploring of temples, shrines, and gardens on these trips. Sometimes the master would be gone for 1-2 days and Bill was responsible for the tofu shop from start to finish. Most of the tofu was delivered to huge supermarkets in Hiroshima. The villagers were amazingly kind to Bill.

But there were difficulties. The master belonged to several different Buddhist sects; Bill was required to go with the master to every religious meeting he attended. Bill hated this because he couldn't speak any Japanese, he had to sit on his knees in seiza for hours at a time, and he was tired from 6 days of hard work at the tofu shop. He desperately wanted some time off from the long hours, both to rest and see more of Japan. At times Bill felt like he was being "used" to work long hours for meager pay, and at other times he realized that this was what a traditional Japanese apprenticeship required. Moreover he was delighted to have this opportunity, difficult though it was.

Returning to America, Bill attended Herman and Cornelia Aihara's annual summer camp in California, then he returned to Boston on about 1 Sept. 1976. Ed Esko and Stephen Uprichard immediately offered him a job at the East West Foundation. He worked there until 1982, eventually becoming vice-president.

Bill was the second American (after William Shurtleff) to study tofu-making in Japan with a traditional Japanese master. Tims and William Shurtleff met in November 1976 at Ken and Ann Burns' house at 16 Warren Street in Boston—shortly after Tims had returned from Japan. Tims was happy to see that Shurtleff and Akiko Aoyagi were doing a nationwide tour to introduce Americans to tofu. Before Bill Tims went to Japan in Jan. 1976 it was difficult to get tofu in Boston; it was considered a luxury. But after he came back, a number of tofu products were being sold commercially—including a tofu cheesecake made by a Boston woman. He also remembers big slabs of seitan (Wheatmeal) sold at Erewhon.

In 1982 Bill moved to Arkansas to start Mountain Ark, along with Frank Head, Joel Wollner, and Tom Monte. Frank was the only one who ever had any financial involvement in Mountain Ark, and he is the only one of the original four left at the company, which is currently for sale and will be liquidated if it is not sold by June 30. Bill never worked at Mountain Ark.

Four or five years ago a news flash came on CNN that there had been a terrible earthquake in Otake, Japan, the little village where he had lived. He watched the destruction on

TV with sadness. Several years ago he heard that the old tofu master had died.

Bill now runs his own business, Natural Health Center, which he and his wife Carol started in 1983. He does macrobiotic consultations and sells macrobiotic foods by mail order. Address: Natural Health Center, 45 North Hartman, Fayetteville, Arkansas 72701. Phone: 501-521-9105 (or 9195).

2108. Sandler, Matthew; Sandler, Helen. 1992. Early work with natural foods in Boston. Plans to launch a soymilk product named Luppy (Interview). *SoyaScan Notes*. May 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Matthew's brother, Richard Sandler, arrived in the Boston area on 1 Jan. 1968. Matt drove him to 29 University Ave. knowing nothing about macrobiotics except that he ate with Richard once at the Paradox restaurant in New York City. Those were the early days. Nahum Stiskin and Richard Sandler, were already in Boston when Matt arrived in about late 1968. Matt moved to Japan in about 1969; Nahum Stiskin was living in Kyoto, Japan (where he arrived in May 1969), when Matt arrived. Steve Helfer (a student of macrobiotics) had arrived in Japan before Matt. After a while, Matt brought Helen to Japan so they could get married—which they did in about 1971, at the Jewish Community Center. Matt had known Helen when they were in Boston; they lived together a macrobiotic study house.

Helen and a lot of other Americans studying macrobiotics in Japan took cooking classes, taught in Japanese, from Lima Ohsawa in Tokyo at Tokyo C.I. (Centre Ignoramus). Matt and Helen left Japan in about 1971-72, returning first to New York, and then to Boston in about 1973. He finally left Boston in 1984.

While in Boston, Matt started a bakery named Matthew's All Natural, located in Woburn, just outside of Boston. It's first products were sweets such as carrot cakes. The discovery of barley malt, a complex carbohydrate sweetener, was a major breakthrough for the company. Helen Sandler developed a line of English Muffins sweetened with barley malt, and then a line of whole-grain breads which were introduced in 1979. The company soon became quite large and successful, and it is still in operation. The bakery did not use soy in any form in its products.

Evan Root started the original Sanae. Matt's brother, Richard Sandler, who arrived in Boston before Matt, started The Seventh Inn (also called Big Sanae). He rented the space and made it into a restaurant with his own hands; his partner was Warren Durbin (originally a film editor from California who came to Boston to study macrobiotics and who now lives in Vermont). Richard is now a photographer living in Greenwich Village (Phone: 212-777-7138).

Barry Creighton invested a lot of money in his Cable Springs Bakery; it was a good idea, but ahead of its time, so it wasn't that successful. When it went bankrupt, Kathy

Bellicchi took it over. Helen Sandler (who had her own company) then shared the bakery with Kathy, and baked cakes there starting in about 1975. Helen does not remember any commercial soy products in Boston, except the Tofu Cheesecake sold at Sanae (it was a Sanae special) and 1 or 2 other restaurants in the late 1970s. Matt liked the Tofu Cheesecake; Helen didn't. Matt recalls that the Tofu Cheesecake was sold, pre-sliced, at a number of retail stores, including Erewhon. He thinks it was sold in the first tier of products that Erewhon sold out of the cooler. He thinks it was made by an underground business that made only this product. Helen experimented with "Tofu Cream," made by mixing tofu, vanilla, and maple syrup—but it was never commercialized since it had such a short shelf life and the retail stores had no refrigeration.

Another excellent product in Boston was Tan Pups, made by Nik Amartseff and his wife. It was a natural meatless hot dog made of seitan, deep-fried on a stick. Nik was one of the most creative food product developers in Boston at the time. He also developed the formulations for most or all of the Erewhon cereals, granolas, and snacks, as well as their labels and packaging. "He was a real fertile mind."

Matt is planning to launch a soy dessert named Luppy (in 2 flavors), within the next 6 months. The product will be aseptically packaged in tubs. His company is named Luppy Foods. He remembers Luppy soymilk from Japan as a soymilk sweetened with brown sugar and sold in little bottles.

When Yuko Okada first brought soymilk to the USA, he started by trying to make a deal with Knudsen. That didn't work out and for some reason he had a problem with Eden Foods in Michigan at the beginning. So Yuko called Matt, who at that time was still owner of Matthew's All Natural bakery, and asked Matt if he wanted to distribute the soymilk product over his route which extended from Maine to Philadelphia. Matt also distributed foods frozen and refrigerated as far west as Denver. The product Yuko was offering was quite similar to the Luppy soymilk Matt had enjoyed in Japan. Before Matt could say yes, Yuko had made a deal with Eden Foods to import.

Update on Matt's soymilk dessert. 1992. July 15. It will be a pudding-type product, the soymilk will be supplied by American Soy Products in Michigan, and it should be on the market by about Nov. 1992. Address: P.O. Box 10277, Aspen, Colorado 81612. Phone: 802-869-2010.

2109. Jacobs, Lenny. 1992. Macrobiotic pioneers—where are they now? (Interview). *SoyaScan Notes*. May 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Nahum Stiskin is now in New York City in the field of investments. His former wife, Beverly Stiskin, lives in Brookline, and is an Alexander therapist. Nahum has a black cloud and a real bitter feeling regarding his

past life. He doesn't like to talk with people. Lenny ran into him 8 years ago at an ABA show and he said to Lenny, "Don't bother me." Mr. Ehud Spurling, the owner of Inner Traditions Press in Rochester, Vermont also knows how to reach Nahum.

Bill Garrison is on the West Coast somewhere. He applied for the job of financial manager of the Kushi Foundation. Anthony "Tony" Harnett is owner of Bread and Circus in Newton, Massachusetts. Jim Ledbetter is in Southern California; the Kushis keep in touch with him. Jim started *Order of the Universe* magazine. Robert Hargrove is in the Brookline area where he owns Robert Hargrove and Associates.

Nik Amartseff got involved with cocaine at some point in about the late 1970s and his life fell apart. But now its back together.

Marcea Newman now lives in Australia; Lenny saw her at Anaheim not long ago and spent a lot of time with her and her husband (who has designed a very interesting Chinese herbal database on a Macintosh computer); its a very expensive diagnostic tool. You can enter your symptoms and it will suggest which herbs to take, or you can key in the name of an herb, and it will tell you all about it.

Eric Utne was the manager of Erewhon in about 1970 or 1971. He came to Boston in the late spring of 1969, at the same time as Lenny's wife to be. Lenny arrived in Boston in the summer of 1969 from Chicago, Illinois. He left Boston for Minneapolis in 1971; then Eric Utne, Lenny, and Peggy Taylor (who is now the editor at *New Age Journal*) started a restaurant at the University of Minnesota named Whole Foods. They ran it for 2 years. Then Eric and Peggy returned to Boston, and Eric went to work at the *East West Journal*. Lenny left for Boston in the fall of 1973; he wanted to start a bakery, then he and Bob Phelps (who now runs Redwing Books) planned to start a seaweed harvesting business. The Robert Hargrove, Eric Utne, and several other people (the majority of the staff of East West Journal) asked Michio Kushi to either give them the magazine (free of charge) or they would quit. They did quit and started New Age Journal. Michio Kushi asked Lenny if he would please work for East West for a few months, which he did—though he ended up staying for years until he finally left to work at East West Journal.

The Seventh Inn was a really successful restaurant, but Michio refused to share any of the ownership with the people who ran it and he tried to control it too much. Originally called Sanae, it was started by Richard Sandler (who selected the location and designed the kitchen, but never really worked there after it was in business), Evan Root, and others. Lenny was a cook there. Richard and another guy named Warren Durban quit before the restaurant was finished, and they gave it over to Lenny and Bill Anton (who is still in Japan). Then Yuko Okada and Hiroshi Hayashi started to run it; they changed the name to The Seventh Inn. There were

two Sanae Restaurants, one on Newbury St. and the other on Boylston St. Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

2110. *SoyaScan Notes*. 1992. Joe D. Nichols—Social Security Death Index (Overview). May 27. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** According to the Social Security Death Index for Joe D. Nichols (M.D.). His Social Security number (SSN) is 455-76-2879. Issued by state of Texas. Date of birth: 30 Jan. 1909 (Sat.). Date of death: 27 May 1992 (Wed). Estimated age at death: 83 years, 3 months, 27 days. Last known residence: Atlanta, Galloway, Ofarell, or Smyrna, Cass County, Texas. ZIP Code 75551.

Note 1. Joe's remains were buried in Pine Crest Cemetery, Atlanta, Texas.

Note 2. Joe's wife was Mildred Nichols. born 13 Dec. 1908. Died 31 March 1998, at age 89 years, 3 months—about 6 years after Joe.

2111. *Natural Foods Merchandiser*. 1992. Nature Food Centres goes public. May. p. 3.

• **Summary:** "Wilmington, Massachusetts.—Nature Food Centres, a 94-store health food chain based in Wilmington, Mass., became the second major natural product retailer this year to become a publicly traded company. On March 11, Nature Food Centres merged with the Revere Fund, a publicly owned company, enabling the chain to offer 2.5 million shares of its stocks. The deal raised more than \$15 million and left a new entity called Nature Food Centres Inc. as the surviving company. 'It was one of those win-win situations where everybody came out doing quite well,' says Ronald Rossetti, president of Nature Food Centres... Rossetti says, 'in accounting terms, it's called a reverse acquisition.' Stocks are listed in NASDAQ under Nature Food Centres name, with the trading code of NAFD."

Note: This news release also appeared in *Health Foods Business* (May 1992, p. 14).

2112. *Natural Foods Merchandiser*. 1992. Twelfth Expo West in high-caliber success. May. p. 3.

• **Summary:** "Anaheim, California—This year's 12th annual Natural Products Expo West [at Anaheim], April 10 to 13 was bigger and better than ever, featuring expanded hours, a new hall, and record-breaking attendance." To accommodate the 950 booths, the expo was held in Hall D of the Anaheim Convention Center. Well over 12,000 people attended "the world's largest trade exposition and conference for the natural and organic products industry." A total of 47 seminars were offered.

2113. Potter, Nancy. 1992. 1992 Michigan annual report—Profit corporations: Eden Foods, Inc. Lansing, Michigan: Michigan Department of Commerce—Corporation and

Securities Bureau. 2 p. May 7. 26 cm.

• **Summary:** Corporate name: Eden Foods, Inc.—corporation No. 187-885. 701 Clinton-Tecumseh Road, Clinton, Michigan 48236. Resident agent: Ron E. Roller and Nancy Potter. Nature of business: Wholesaler of organic foods. The corporation has 50,000 shares of common stock. Amount paid-in: \$27,600. No shares of preferred stock. Signed by Nancy Potter, President, 7 May 1992.

On side 2 is a corporate balance sheet. Total assets are \$4,796,810. Corporate officers and directors: President: Nancy Potter. Secretary: William Swaney. Treasurer: Mark Shirkey. Vice-president: Skip Coolman. Directors: Michael Potter, Coolman, Swaney, and Nancy Potter. Address: President, Ann Arbor, Michigan.

2114. *Supermarket Business (New York)*. 1992. Aseptic tofu joins other natural foods enroute to Russia. May.

• **Summary:** “Morinaga Nutritional Foods, makers of Mori-Nu Tofu, donated over 100 cases of its aseptic tofu—close to a ton—as part of a hunger-busting effort targeted at the former Soviet Union. In all, some 20 tons of natural food products were sent to St. Petersburg in early April.

“The Hunger relief effort was coordinated by Marlene Wolford, a Corpus Christi, Texas-based organic food promoter, and Dr. Mikhail Zykov, a macrobiotic food advocate. Along with the aseptic tofu, which has a 10-month shelf life without refrigeration, natural foods companies sent brown rice, sea vegetables and other health food products.

“Participating companies included Eden Foods of Clinton, Michigan, which gave away more than 14 tons of products, and Arrowhead Mills, Country Grown Foods, Goldmine Natural Foods, Lifetree Products, Ocean Harvest, Traditional Foods and Pacific Bakery, among others.

“Separately, Morinaga Nutritional Foods’ parent company, Morinaga Milk Industry, recently sent thousands of pounds of its infant formula to the former Soviet Union from its headquarters in Japan.”

A photo shows Mr. Kumoda, head of Morinaga Nutritional Foods, standing with a co-worker and many cases of tofu in front of a large white banner on which is written: “Mori-Nu Tofu: To Russia with Love”

2115. **Product Name:** WestSoy Lite Non Dairy Creamer. **Manufacturer’s Name:** Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer’s Address: 1065 East Walnut St., Carson, CA 90746. Phone: 310-886-8200.

Date of Introduction: 1992 May.

Ingredients: Filtered water, whole organic soybeans*, brown rice syrup (brown rice, water), expeller pressed corn oil, natural flavor, tricalcium phosphate, sea salt. * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 6 fl. oz. foil retort pouch.

Retails for \$0.98 in California.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per tablespoon: Calories 10, protein less than 1 gm, carbohydrate 2 gm, fat less than 1 gm, cholesterol 0 mg, sodium 10 mg, potassium 20 mg.

New Product—Documentation: Talk with Lynne Minsky, Marketing Manager of Westbrae. 1992. April 28. This innovative product, Westbrae’s most recent soy product, was introduced at the Anaheim trade show in April 1992, will be shipped in late April, and should be in stores by May 1992. The product is sold as a liquid, packaged like the Maltededs in a foil retort pouch. They would have preferred to put it in a Tetra Pak but the process would not allow them to do it. Vestro is a holding company, and they consider Westbrae to be an independent company. Westbrae moved to this address in Jan. 1992 from Commerce, California. Little Bear (which makes natural food tortilla chips, Bearitos, etc.), also owned by Vestro, moved into the same offices and warehouse with Westbrae. Westbrae’s soy beverage line is a major growth category and the company is putting a lot of energy into developing and promoting it.

Product with Label, plus 2 new product leaflets, sent by Lynne Minsky. 1992. April 28. 3.5 by 6 inches. Foil pouch. Red, yellow, white, black, and brown on blue. Illustration of a pitcher pouring the non-dairy creamer into a cup of coffee. “All natural. Half the calories—Half the fat (of half & half). Lactose free. Great taste. No cholesterol. No tropical oils. Made with organic soybeans. For coffee, fruits, cereal, and baking.” UPC indicia.

One leaflet claims that the product won’t separate in coffee or tea. Soyfoods Center product evaluation. Label design: Excellent. Product quality: Excellent flavor (tastes like cream or condensed soymilk) and consistency. Does not separate in hot coffee.

Note: This is the earliest known commercial nondairy coffee creamer based on soymilk.

2116. *Whole Foods*. 1992. Source book 1992. 15(5):33-294. May. Illust. Index. 28 cm.

• **Summary:** Contents: How to use this book (p. 8). Wholesalers/distributors alphabetical listing. Wholesalers/distributors geographical listing. Brokers. Publishers. Associations. Consultants/service companies.

Product directories: A listing of manufacturers/importers/growers by products: Foods (p. 77-111—soy-related categories include: Beans/bean products, cheese substitutes, coffee substitutes, cultures, miso, soy products, soy sauce, soymilk, tamari, tempeh, tofu, tofu entrees), vitamins and supplements, herbs, cosmetics/personal care, miscellaneous products. Brand names. Product index. Manufacturers/importers/growers alphabetical listing.

Note: The listings related to soy products are full of errors. Address: South Plainfield, New Jersey.

2117. Gerner, Bob. 1992. Recollections of Mithra Grossman, Intermountain Trading, and Family Orchards (Interview). *SoyaScan Notes*. June 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company, started in about 1975 by Mithra Grossman, began as Intermountain Trading Co. at 2546 Tenth St., Berkeley, California 94710. Located very near Westbrae, Mithra was a consolidator—and had a beautiful blond Swedish wife. He would collect a variety of natural foods made on the West Coast of the U.S. by companies such as Heinke, Westbrae, etc., then put them on rail cars and ship them to the East Coast. Also starting in about 1975 he began buying miso from Westbrae that the latter was importing from Japan. At one point Westbrae was selling 25-50% of their imported miso to Mithra Grossman, who shipped it all over the USA to other wholesalers. Westbrae did not have enough business to import that much. Gradually he became a distributor, then he started developing and marketing a line of mixed packaged nuts, etc. to which he gave the name Family Orchards. The fruit and nut mixes in the Family Orchards snack line contained two types of soyfoods: Soynuts, and tamari-roasted peanuts. (For details see the company's Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 60-61). Grossman bought most of the raw materials for his Family Orchards line from Westbrae. In about 1979-1980 his company went out of business; he blamed Westbrae for its failure and bore strong resentment toward them. The price structure under which Westbrae had sold its products to Grossman was no longer profitable for Westbrae, who decided to raise prices. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

2118. Arnold, Monica. 1992. NFM's 11th annual market overview: 1991. *Natural Foods Merchandiser*. June. p. 1, 32-34, 38, 40-43.

• **Summary:** Total retail sales for the natural foods industry are estimated at \$4,460 million for the year 1991. Of this total, \$3,150 million was generated by independent natural foods stores (5,540 stores subdivided into 6 types). Natural foods chains (having 40 or more stores; 1,460 stores total) added \$571 million and mass marketers (supermarkets, discount stores, drugstores; 3,100 stores) \$922 million. In total 10,100 stores had \$4,643 million in sales, with 10% sales growth rate in 1991. Sales of the independents grew 15%, chains grew 11%, and mass market grew 5% in 1991.

The six independent store formats are: (1) SMH = small to medium health food stores (1,717 stores, 31% of total stores, \$341 million in sales). (2) LMC = large or mini-chain health food stores (1,163 stores, 21% of total stores, \$534 million in sales). (3) HFS = health food / food service stores (665 stores, 12% of total stores, \$531 million in sales). (4) SNF = small natural food stores (471 stores, 8.5% of total

stores, \$141 million in sales). (5) MLN = medium to large natural food stores (1,329 stores, 24% of total stores, \$800 million in sales). (6) SMF = supermarket natural food stores (195 stores, 3.5% of total stores, \$771 million in sales).

Also discusses (often by store type): Trends to boost sales, improving operations, expansion, sources of financing, employee benefits, wages/payroll by job type, fattening margins, departmental gross margins, operations, ownership structure, type of location, and market area.

The table titled "Departmental Gross Margins" shows what percent of the total store sales come from soyfoods. Ranked in descending order of importance they are: SMH (small to medium health food stores) 2%, MLN 1.9%, HFS 1.4%, LMC 1.2%, SMF 1.0%, SNF 0.4%. Thus, soyfoods are the most important for small to medium health food stores (45.7% of whose income comes from vitamins, with a gross profit margin of 43%) and the least important for small natural food stores (only 8% of whose income comes from vitamins, with a gross profit margin of 40%).

2119. *Natural Foods Merchandiser*. 1992. Accredited nutrition program for physicians announced. June. p. 22.

• **Summary:** A newly accredited program called the Institute for the Advancement of Nutrition Education and Research, which aims to further physicians' knowledge about nutrition and health, was unveiled at Natural Products Expo West in April.

"The Institute's founder, Michael Klaper, M.D., made the announcement during his seminar called Soyfoods and Vegetarianism. Klaper is a nationally known author and lecturer on the nutritional advantages of a plant-based diet."

"The Institute's flagship course, a three-day intensive seminar entitled Let Food Be Your Medicine, has been accredited by the American Academy of Family Practice and the College of Family Physicians of Canada. The courses will be offered at various locations throughout North America.

"Staff members of the Institute include Klaper; Neal Barnard, M.D., assistant clinical professor at George Washington University School of Medicine; John McDougall, M.D., medical director of the McDougall Program at St. Helena Hospital... and Paulette Eisen, associate director, educator, author and co-founder of the Institute for the Advancement of Nutrition Education and Research. For more information contact the Institute for the Advancement of Nutrition Education and Research, 2611 Vanderbilt #2, Redondo Beach, California 90278. Phone: 310-318-8092. Fax: 310-318-8092."

2120. *Natural Foods Merchandiser*. 1992. Expo unites industry: Anaheim show draws record crowds of 13,500, while focusing on legislative issues and industry solidarity. June. p. 28-30.

• **Summary:** The crowd of more than 13,500 people

navigated the 170,000-square-foot show floor at Natural Products Expo West. Discusses: Legislative leanings. Organic happenings. Seminars and more. Special events. At one special event: “Carolyn Johnson, food projects director at Mrs. Gooch’s Natural Foods Markets in Sherman Oaks, California, and seven other Gooch’s staff members cooked up a feast for more than 40 enthusiastic students. The menu included Coconut Shrimp, Tempeh Nuggets and Smoked Shiitake Mushrooms,....”

2121. *Organic Gardening*. 1992. J.I. Rodale–Robert Rodale. The heart and soul of organic gardening: No 50th anniversary issue would be complete without a taste of the writing talents of this magazine’s most influential editors. 39(5):46-47. May/June. [1 ref]

• **Summary:** More on the 50th anniversary history of the early days of *Organic Gardening and Farming*. “The organic idea got its start when Sir Albert Howard, the English soil scientist, developed and popularized his method for making compost heaps with 3 layers (first layer green plant matter, second manure and third soil)... In 1942, J.I. Rodale pinned the label ‘organic’ to Sir Albert’s method and set upon the task of popularizing it in the United States.” Address: Pennsylvania.

2122. Rodale, Ardie. 1992. A love story. *Organic Gardening* 39(5):44-45. May/June. [1 ref]

• **Summary:** A warm, brief 50th anniversary history of the early days of *Organic Gardening and Farming*, whose first issue was published in May 1942 by J.I. Rodale. Ardie is the wife of J.I.’s son, Bob Rodale. Address: Pennsylvania.

2123. Seamens, Dan. 1992. Al Jacobson: Whole foods pioneer. Producer profile. *Natural Health*. May/June. p. 34-36.

• **Summary:** Blue corn chips were one of Jacobson’s innovations and are now his best-selling product, followed by whole-wheat pita.

“His pioneering ways began when he entered the health food business in the mid-fifties. ‘I was out of work at the time and I always wanted to get into the health field,’ Jacobson says. ‘I went to the offices of the Hain Pure Foods company in Hollywood, which, although it was the largest health food company at the time, wasn’t doing so well. I convinced them that they needed someone to help promote their products.’”

He offered to travel around the country and to demonstrate their products at local health food stores. Hain liked the idea so he gave himself the title “Hain Wizard of Foods” and hit the road.

He has also invented whole-wheat pita bread,

A color photo shows Al Jacobson, the self-styled “Wizard of Foods,” age 78, wearing a tall chef’s hat (toque) in front of many of his present products. Address: Senior

editor of *Natural Health*.

2124. Starr, Sara M. 1992. Don’t have a cow! Milking other alternatives. *Health Foods Business* 38(6):37-38, 69. June.

• **Summary:** “Soy milk is the biggest seller in the non-dairy beverage category within the health food industry. About 95% of all soy milk is sold through natural food stores. Several supermarkets are beginning to carry this beverage.” In 1983 when Eden Foods introduced its Edensoy, about 283,000 gallons of aseptically packaged soy milk were sold in the natural foods industry [in the USA]. According to Peter Golbitz of Soyatech Inc. in Bar Harbor, Maine, by 1991 that figure had jumped to 6.5 million gallons. Golbitz estimates the market for aseptic soymilk in the USA to be \$52 million in retail sales (in natural food stores only) and growing at 15-20% annually. The top 3 soymilk manufacturers in America are American Soy Products [Edensoy], Westbrae, and Vitasoy; together they produce over 95% of the aseptically-packaged soymilk in the U.S. according to Golbitz.

New soymilk products: WestSoy Plus is fortified with vitamins A and D, and calcium to make it nutritionally equivalent to dairy milk. Westbrae also has a new non-dairy creamer. Westbrae uses only rice syrup to sweeten its soymilks and is looking closely at producing a fresh (non-aseptically packaged) soymilk. Vitasoy has teamed up with The Yogi Tea Company to produce a cappuccino alternative. This delicious blend of soymilk and herb tea can be made in an espresso machine. Protein Technologies International in St. Louis, Missouri, has developed a new technology–stabilized calcium phosphate and soy protein isolates. When added to soymilk it gives a product comparable in protein and calcium content to dairy milk.

Also discusses amazake and White Almond Beverage. A photo shows Sara Starr. Address: President of Starr Track, a business consulting firm for the natural foods and products industries.

2125. *Whole Foods*. 1992. GNC reports 10.4% growth in 1991. June. p. 12.

• **Summary:** “Pittsburgh, PA–General Nutrition Corp. reports that its chain-wide sales increased to about \$394 million in 1991 from \$347 million the previous year, representing a 10.4% increase for same-store sales. According to the retail chain, it also added 112 franchises last year, with the company’s franchise network increasing by 700% over the last two years. At present, GNC says that it operates some 1,100-plus stores in all 50 states, plus Puerto Rico and near U.S. military bases in Guam.”

2126. Belleme, John. 1992. Santa Fe Organics and seitan (Interview). *SoyaScan Notes*. July 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Santa Fe Organics is owned by 3 people: James

MacCreight (of Santa Fe, New Mexico) and John each own 45%, and Sandy Pukel (owner of Oak Feed Store in Florida) owns 10%. James got involved because he knew of John's work at American Miso Co., and he was a friend of Barry Evans. Barry was the majority owner of that company but he was sent to jail in early 1992 in California with a 7-year sentence, of which he must serve at least one-third. John got bought out of American Miso Co. in 1986 for two reasons: He had conflicts with Barry, and there were indications that Barry was making his money illegally. He wanted to get out "before the whole thing came down on our heads. My equity in the company might have been confiscated by the federal government." Before Barry went to jail, he made a deal such that his two companies (American Miso Co. and Great Eastern Sun) were not affected. After John left American Miso, he and Sandy Pukel formed a partnership with Blake Rankin and established Granum East. They ran that for 2½ years then sold it to Great Eastern Sun in 1988. From that time until 1990 he and his wife, Jan Belleme, did a lot of writing.

James MacCreight, a former Hippie, had made money investing in real estate in Philadelphia, Pennsylvania, where he also founded and owned George's Restaurant (a lovely place named after George Ohsawa). One day in late 1990 he called John and said "I'd like to do something with you. What would you like to do?" They spent a lot of money starting a miso shop adjoining John's home in Saluda, North Carolina, but then John decided it would not be grand enough to meet James' expectations. So they dropped the miso project after 6 months before the equipment even went in. James heard about Seitan Mama's, and they decided to make seitan instead. John had been interested in seitan since 1974, and in Feb. 1978 his wife, Jan, had started an early and very successful seitan company in Coconut Grove, Florida named Seitan Mama's, which see. In early 1991 a huge building became available at an excellent price 10 miles from John's home in Saluda at 906 Locust St. in Columbus, North Carolina. Their first line of 4 retorted seitan products in glass jars was introduced in June 1991. Originally they had planned to be a wholesale company, selling pallets via commercial trucking lines or UPS directly to larger stores (mostly on the East Coast) with a broker; it was hoped that this approach would keep the retail price down. Now they sell only through distributors.

Santa Fe Organics produces its seitan using a huge Japanese-made gluten-making machine (ordered through Mitoku) and an automatic cutter. The company has 3 production workers. To the machine they add flour, water, and salt (or nigari). The salt helps develop a little more gluten, and gives a tighter product with a higher yield. John's machine will process 150 kg (330 lb) of flour per run (which takes 2½ hours). Paddles in the machine knead the flour with water for about 30 minutes to develop the gluten, then the loaf sits undisturbed under water for about an hour, then the

dough is rinsed by kneading it under water for about 1 hour; 100 kg of flour yield about 45 kg of fresh gluten. John orders his wheat flour freshly milled once a week from a mill 50 miles away. Fresh milling is very important for good yield and taste. He uses organically grown hard winter wheat. John uses a mixture of whole wheat and unbleached white flours. The key to getting flavors to penetrate to the core of the seitan lies in retorting at 250°F under pressure (which causes the seitan to expand and become porous allowing flavor penetration) plus the proper mixture of flours. The more whole wheat flour used, the greater the flavor penetration and concentration—but the product is somewhat bready and less dense. The more unbleached white flour used, the greater the density, chewiness, and meatlike texture of the final product. The proportion of flours varies with each product.

John has no problem with starch disposal. The local government looked at the starch and its effects on the local sewage system carefully, and actually encourages Santa Fe Organics to dump it into the sewage system. Eventually John would like to find ways to use the starch, as in stews.

Sales of Santa Fe Organics seitan are large and growing—although the company is still not profitable. A new conflict has arisen in that one owner wants to own a larger percentage of the total shares.

Plans for the future: (1) A new line of 3 Seitan Sloppy Joe products, due out in August; (2) They may have a ravioli maker in Atlanta, Georgia, make Seitan Ravioli using they would ship to Atlanta. They will be sold frozen, 18-22 units in a 13 oz bag, like the Soyboy Ravioli from Northern Soy in Rochester, New York; (3) Sell frozen 6-8 oz chunks or slabs of seitan in bulk (12 lb in a plastic bucket) to restaurants and foodservice institutions, then help them to work out recipes. They hope to have Tree of Life or Cornucopia distribute the product; (4) John's wife, Jan, is now finishing writing a vegetarian cookbook for the Avery Publishing Group. It will contain a whole chapter on seitan. (5) John would like to write a book on miso.

Mitoku has sold two Japanese-made gluten-making machines to the Western world; one was sold to Lima Foods in Belgium. The retort process that both Jonathan and Santa Fe Organics use is a very technical process; one must be set up with a license and follow federal regulations. According to Chris Dawson, Lima imported this machine for Jonathan—which made the seitan that Lima sold. The other machine went to the Erewhon warehouse, where it sat for years, until it was sold to the people who started Upcountry. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

2127. Belleme, John. 1992. The seitan industry and market in America (Interview). *SoyaScan Notes*. July 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is quite sure that his company, Santa Fe Organics, is now the largest seitan manufacturer in the USA

in terms of both pounds of seitan produced and sales volume. They now make 1,500 lb/week and by this fall, they should be making about 3,000 lb/week. Upcountry in Massachusetts is a close second. John visited Upcountry about 18 months ago to interview the former owner for a story on seitan his wife wrote for *East West*. At that time Upcountry was producing about 1,800 lb/week of seitan, but John thinks they may now be doing more like 1,200 lb because Santa Fe Organics has taken away part of their market. The Bridge, in Middletown, Connecticut, is probably third. They were producing 500 lb/week about 18 months ago. Sprout Delights in North Miami, Florida, is also making about 500 lb/week.

Distributors and retailers see seitan as a macrobiotic product. John thinks that in the northeastern U.S. (New England), most seitan consumers have (at one time or another) been involved with macrobiotics; the percentage is lower in the southeast and the west. For example, Tree of Life Southeast, which distributes from Key West, Florida, to Washington, DC, is the largest natural foods company in the world. They do \$80 million to \$120 million a year. They sell very little of John's seitan in that region because macrobiotics is not a big thing there. However Neshaminy, which is a rather small distributor (\$5 million/year), distributes to the Boston, Manhattan (New York), Philadelphia, and Baltimore areas—all macrobiotic strongholds. They sell 3-4 times as much of John's seitan as Tree of Life. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

2128. *SoyaScan Notes*. 1992. Fresh Fields, a new natural foods supermarket chain on the East Coast (Overview). Sept. 1. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Fresh Fields, a relatively new chain of natural foods supermarkets with headquarters in Rockville, Maryland, appears to be very successful in appealing to the upscale consumer. The president is Mark Ordan. Unlike most traditional natural foods stores, they carry a large selection of natural meats and poultry from “animals raised without hormones, antibiotic feed additives, or other growth-promoting drugs.” They also sell freshly baked breads plus hundreds of soyfood products. They publish a 6-panel leaflet titled “Soy Foods: Soy good for you,” which introduces consumers to tofu, tempeh, soy ‘milk,’ shoyu/tamari, and miso. A 12-page color brochure describes the chain, its philosophy and its products. Fresh Fields’ prices are high but their service is excellent and their stores quite attractive and well managed. On the side of each shopping bag is printed: “Fresh Fields. Land of the Free. Free of artificial colors and flavors. Free of artificial preservatives. Free of steroids. Free of nitrates. Free of hormones. Free of growth stimulants. Free of antibiotics. Free of irradiation. Free of tropical oils. Free of refined sugars. Free of beached flours. Free of hydrogenated oils. Free of worry. Free of confusion. Free of hassle. Free of guilt.

“Fresh Fields. Good for you foods.”

2129. Okada, Yuko. 1992. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter (fax) to William Shurtleff at Soyfoods Center, July 2. 2 p. [Eng]

• **Summary:** Muso was formed as an establishment in February 1966, and Yuko has worked for the company since that time. His current title is president of Muso Co., Ltd. for Export and Import division, a position he has held for the last 6 years. Yuko first went to the USA in April 1970. First he worked at the Erewhon retail store and at the Erewhon warehouse as production manager and import manager. After 2 years he began to manage a macrobiotic restaurant [the Seventh Inn] for 2½ years as executive vice president. After the restaurant had paid off all its debts, he returned to Erewhon as import manager, and was also in charge of determining the cost of all production.

Yuko thinks that Muso began to ship foods to Erewhon in 1968. [Note: Kotsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] The main food items shipped during the first year were shoyu (made by Marushima Shoyu Co.), several types of miso (made by Kanemitsu Miso Co. and Ohta Hacho Miso Co.), black soybeans, azuki beans, many types of sea vegetables and teas, buckwheat noodles, umeboshi pickles, and takuan (daikon pickles).

The following Westerners have worked for Muso over the years: Paul Hawken (March-Oct. 1969), James Docker (several months), Jim Ledbetter (several months), Evan Root (several months), Tyler Smith (6 months), Steve Earle (4 years). Only Americans have worked at Muso.

Muso moved to their present address in the Kosei Building on 1 Dec. 1986. The company still maintains a domestic distribution company at its former address at Otedori 2-5-1, Higashi-ku, Osaka. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0343.

2130. Uprichard, Tamara. 1992. Work with seitan in America (Interview). *SoyaScan Notes*. July 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tamara Hall first learned about macrobiotics in late 1972 from Lenny Jacobs and Tom Hatch who were lecturing in Minneapolis, Minnesota. She vaguely remembers first learning how to make seitan in Minneapolis in late 1972 or early 1973 from Barbara Jacobs at a cooking class. Lenny Jacobs and Tom Hatch had a restaurant named Whole Foods Cafeteria at the University of Minnesota in 1972-73, and Tamara was a staff member of the restaurant for a short time. Early in 1973 Tamara moved into a study house run by Tom and Mary Lou Hatch. There she again learned how to make seitan during a cooking class taught by Mary Lou. Michio Kushi came to Minneapolis and lectured in the spring of 1973.

In June 1973 Tamara moved in Boston to study macrobiotics. She was soon working as a waitress at The Seventh Inn, where Hiroshi Hayashi was the chef and Yuko Okada was manager. Later that month she began to attend cooking classes given by Aveline Kushi at the Boylston Street house. There she received in-depth instruction in making seitan on a home scale using the traditional method. Aveline would make a bread dough, kneading it for 20-30 minutes, let it stand for 45 minutes in the air, then rinse it under cold water. In about August 1973, Hiroshi gave cooking classes, mostly to the staff of The Seventh Inn. He taught a quick method for making seitan that Tamara thinks he created himself; he may well have learned the slower traditional method during his training as a chef in Japan. He mixed the flour with warm water to make a rather wet dough, kneaded it for only 10-15 minutes, broke the dough up into softball-sized pieces, then let these stand under warm water. Hiroshi's gluten was ready after about 1 hour, whereas Aveline's took about 2 hours. At one period while Tamara worked there, The Seventh Inn did make and serve a breaded deep-fried seitan entree.

Tamara met Stephen Uprichard in Boston and they were married in Dec. 1973. Stephen was active at the East West Foundation before there was a Kushi Foundation. Tamara taught a number of other people how to make seitan. Two of these are worth mentioning: She taught Fern Israel, who taught John Weissman, who established America's first real seitan company and invented Wheatmeat, Tan Pops, and many other creative seitan products. And she taught Jos van de Ponsele, who started Jonathan, Europe's first commercial seitan company (located in Belgium), and likewise produced many creative seitan products. Both these companies still make seitan. Address: R.R. 2, Box 163, Colrain, Massachusetts 01340. Phone: 413-337-8570.

2131. Richardson, Jean. 1992. Sierra Natural Foods is out of business. Ohsawa-Japan has stopped exporting (Interview). *SoyaScan Notes*. July 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** When Ohsawa America was having problems surviving, Lane Seiger offered their mail order business to Gold Mine Natural Food Co., then offered their import business to Sierra Natural Foods. Gold Mine purchased their Japanese imports from Sierra.

In July 1991, Sierra Natural Foods declared bankruptcy and went out of business. At the time they owed Ohsawa Japan a lot of money, which they never paid. Following this unfortunate experience, Ohsawa Japan stopped exporting products to America. Prior to this, Nama Shoyu (Unpasteurized Shoyu, made by Yamaki Co., run by Mr. Kitani) was the best seller of all the products Sierra imported from Ohsawa Japan. After Sierra's bankruptcy, in March 1992, Gold Mine began importing macrobiotic foods from Muso in Japan. Address: Co-owner, Gold Mine Natural Food

Co., 1947 30th St., San Diego, California 92102. Phone: 619-234-9711.

2132. Delangre, Yvette; Delangre, Jacques. 1992. Early recollections of seitan (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In 1966 in Tokyo, Japan, on the last day of their trip during the First International Spiritual Olympics, Yvette remembers tasting a meatlike product, which came in little pieces was cooked a long time, was served with a curry sauce and tasted remarkably like meat—so much so, in fact, that she didn't want to eat it. Years later, after she learned to make seitan in America, she realized that what she had tasted in Japan was probably seitan; however no one in Japan at that time said that it was seitan, or even mentioned the word seitan.

Yvette first heard the word "seitan" from Cornelia Aihara, and she first learned how to make seitan from Cornelia in about 1968, perhaps in the Los Angeles area. She first saw the word seitan in print in several of Cornelia's books, such as one of the 4 *The Dô of Cooking* seasonal cookbooks and the *Chico-San Cookbook* (both published in 1972). Chico-San never imported seitan from Japan.

Jacques thinks he first heard the word seitan in America, after 1963 and before they returned to Europe in 1968. He thinks (and is 90% sure) that he first heard of seitan and first tasted it at the Zen Restaurant on Hollywood Boulevard in Los Angeles. He recalls the word "seitan" being on the menu, but Yvette does not recall ever having eaten seitan at the Zen Restaurant. Jacques has a large collection of macrobiotic literature from the early days, especially early publications issued by Lima N.V. in Belgium. In May 1957 Pierre Gevaert's family met George Ohsawa. Address: East West Center, 160 Wycliff Way, Magalia, California 95954. Phone: 916-873-0294.

2133. DeSilva, Tom. 1992. Brief history of Erewhon—Los Angeles. Part I (Interview). *SoyaScan Notes*. July 10. And Jan. 1995. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** When Tom arrived in Los Angeles (he never did live or study macrobiotics in Boston), Bruce Macdonald was in charge of Erewhon's West Coast operations and Jimmy Silver was in charge of the Erewhon retail Store. In Sept. 1969 he moved into the Kushi House at 7511 Franklin Ave. in Hollywood. He shopped at the Erewhon retail store before he began to work there and he recalls it as being "very primitive." Then in Oct. 1969 he went to work for the Erewhon retail store at 8003 Beverly Boulevard (one store down from the corner) just as Erewhon got their first warehouse, which was about 1,200 square feet, catty corner across the street.

Tom has kept the early leases for the Erewhon retail store. It has always been his understanding that he had all

the leases, including the very first one. However during the first year that the store was in business (from the fall of 1969 until Sept. 1970) the rent may have been paid on a month-to-month basis. He has heard that Jacques Delangre and John Fountain paid the deposit and the first month's rent. The first formal lease may have been necessary when Erewhon to make improvements—such as putting in a wooden floor and building nice shelves. The earliest lease he has was signed and executed on 8 October 1970 by and between Murray LaBell and Benjamin Izakowitz (lessors, owners of the building), and Erewhon Trading Company Inc., for a retail and wholesale grocery at 8003 Beverly Boulevard, Los Angeles. The 2-year lease commences on 1 July 1971 and ends on 30 June 1973. The amount of the lease is \$225/month. The lease is signed by Murray and Benjamin (lessors), and Roger Hillyard (lessee), Executive vice president for Erewhon Trading Co. Inc. The second lease was signed and executed on 1 July 1971. Erewhon's address is now given as 8001 and 8003 Beverly Boulevard. The lease is now for \$800/month, reflecting the fact that store has now roughly doubled in size by moving into the adjacent building at 8001 Beverly Blvd. So the store has expanded. For details see LaBell 1970, 1971, and 1973. Tom was managing the store when it expanded. Roger Hillyard sent a fellow named Jim (who is now a doctor) to Los Angeles to start the expansion. Jim burned out 2-3 months before the expansion was finished, so Tom finished the job and opened the expanded store.

In 1975 Tyler Smith became president of Erewhon in Boston, Massachusetts. In about July 1975 Smith told Tom that he planned to sell Erewhon—Los Angeles to John Fountain, and Smith asked Tom to stay on. At the time, John Fountain and John Deming were both in Boston negotiating this deal. In Aug. 1975 Smith sold off the West Coast operation, including the right to use the Erewhon name, to John Fountain, who was financed by John Deming. Fountain formed a new corporation named Mondo Trading Company (a name known to relatively few people) to acquire Erewhon—Los Angeles. Tom's understanding has always been that John Deming loaned John Fountain the money (\$200,000) he needed to buy Erewhon—Los Angeles. It was a 5-year loan. Erewhon folded after 5 years because Fountain couldn't pay off his loan to Deming. Shortly after Fountain acquired Erewhon—Los Angeles, Tom went to work for him as president of the company—Mondo. Fountain wanted to stay behind the scenes. In essence, he didn't want anyone to know him. Fountain worked at the warehouse. When he took over, the warehouse was in Culver City (about 15 miles west of downtown Los Angeles). Shortly thereafter Fountain purchased a warehouse in the City of Commerce and moved Erewhon's warehouse operations there. It was larger and closer to Fountain's home. Fountain bought a home in Huntington Park (about 10 miles south of Los Angeles), so the new warehouse was only 5-10 minutes drive from his

home, instead of the former 45 minute drive. For Fountain the new warehouse was also a real estate investment; he leased it to the corporation (Mondo / Erewhon—Los Angeles). Continued. Address: Owner, Erewhon Natural Foods Market, 7660 Beverly Blvd. (at Stanley), Los Angeles, California 90046. Phone: 213-655-3537.

2134. DeSilva, Tom. 1992. Brief history of Erewhon—Los Angeles. Part II (Interview). *SoyaScan Notes*. July 10. And Jan. 1995. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John Deming apparently had nothing to do with John Fountain's operation of Mondo / Erewhon—Los Angeles. Deming had his own Erewhon store in Orange County. Fountain agreed to allow Deming to own and operate this store using the Erewhon name but with no connection to Mondo. Tom signed virtually every check paid by the Mondo and he does not recall any payments made to Deming during the 5-year duration of the loan. He is quite sure that Mondo had to make royalty payments (about 2 tenths of one percent of gross sales for use of the Erewhon name) out of operating income to Erewhon—Boston. Mondo had gross sales of about \$10 million a year. It is Tom's understanding that John Fountain retained the right to use the Erewhon name for the five years that he was involved with the corporation.

Both Fountain and Deming were heavily involved in and strongly influenced by the Free Enterprise Institute run by Andrew Galambos. Erewhon managers were encouraged to be involved with this institute. Tom felt that Fountain and Deming were trying to introduce to Erewhon a philosophy that was “impossible to implement under the circumstances.” It was a philosophy of free enterprise that was Libertarian to the extreme. Tom thinks that interfered with the growth of the company. Before Fountain bought the company, the employees were encouraged to be involved with Werner Erhard's Est. “I did them both and survived.”

Erewhon, in both Los Angeles and Boston, was undercapitalized from day one. This created tremendous problems, because the company's sales grew so fast. Tom was constantly aware that Erewhon—Los Angeles was struggling financially. He does not know why John Deming wasn't aware of this also. He wasn't around much and part of the time he was busy with his store in Orange County—which never really got off the ground. “My main job was dealing with past-due creditors. Fountain had to factor his accounts receivable.” Tom used to like to get out of the warehouse one week, so he would drive down to San Diego, Riverside, and Orange counties and pick up produce in the farmers' fields. He knew each of these men personally, and he had to tell them that he was unable to pay them amounts of \$10,000 to \$20,000.

In late 1979, John Fountain was obligated to come up with something like \$200,000 that he owed John Deming.

Being unable to, he had to relinquish the company to Deming. Deming was livid. Deming proceeded to sell off the assets piecemeal. John Deming was very conscientious and fair by eventually paying in full all monies owed to Erewhon's creditors. He could have just filed bankruptcy (which he never did) and left them hanging. There was an Erewhon Natural Foods retail store in Northridge that had been opened after Fountain purchased the company. Tom remembers walking the property with both Fountain and Deming before Erewhon began renting it. Fountain sold that store to Deming for \$50,000—presumably in cancellation of \$50,000 of his debt. Deming had hired a man named Robert Jenkins as a consultant. In one day, Jenkins sold the store to Tree of Life for \$100,000 (but not all cash; Tree would pay part of it in products), making an instant profit (on paper) of something like \$50,000.

The corporation found difficulty selling the Erewhon store at 8001 Beverly Blvd. in Los Angeles. Tree of Life looked at it. Nobody saw the potential, partly because the store was somewhat run down. Erewhon needed to meet a payroll payment, so they offered to sell the store to Tom DeSilva if he could make the down payment they were asking. Tom got Tyler Smith and Jeffrey Flasher to go in as partners with him and they bought the store. On 13 Jan. 1980, the new owners took over. A year later the partnership fell apart. Tom made an offer and bought out both partners, becoming the sole owner in early 1981.

Tom does not think that the collapse of Erewhon- Los Angeles in late 1979 was in any way directly related to the bankruptcy of Erewhon-Boston two years later. On 10 Nov. 1981 Erewhon in Boston filed for bankruptcy protection under Chapter 11 of the Federal Bankruptcy Act because of debts totaling \$4.3 million. In May 1982 Ronald Rossetti purchased Erewhon. Tom flew back to the East Coast and met with Rossetti because he was using the Erewhon name for his store under an old oral agreement with Michio Kushi. Rossetti said he would honor that agreement; it was not committed to writing until several years ago in an exchange of letters.

Tom moved his Erewhon Natural Foods Market to its present location from 8001-8003 Beverly Blvd. and began business on 15 May 1991. As of January 1995, Tom's store is profitable.

Jimmy Silver, who worked at Erewhon, Los Angeles, in the early days and knew Tom DeSilva well, adds (Jan. 2011): Tom was really good at running the business. And having been a lawyer he was particularly good at negotiating contracts and agreements. He understood the implications, which are often buried or hidden, and could reach understandings with the other guys that were fair to both. Not usually what the other guys wanted, of course—they would prefer something fair only to them. Libby [his wife] said he was great with leases.

“Libby said Hugo van Seenus had been in touch with

her, and liked to send newly hired people from his store (he's now got a location in Colorado, I believe) to Erewhon [Los Angeles] for a week or two to observe and train, which Libby said they were always willing to do for him.”

One of Tom's boys died of cancer a few years ago. Tom went down hill after that and now basically has no memory—some form of dementia. Yet he seems happy and placid; he lives in a care facility in Torrance. Libby is running the store without Tom.

An undated photo sent by Patricia Smith shows Tom DeSilva seated in the full lotus posture of meditation, listening to the sound of one bell ringing. Address: Owner, Erewhon Natural Foods Market, 7660 Beverly Blvd. (at Stanley), Los Angeles, California 90046. Phone: 213-655-3537.

2135. Mokutani, Kiyoshi. 1992. The invention and development of seitan in Japan (Interview). *SoyaScan Notes*. July 12. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of July 1992.

• **Summary:** In 1959 Mr. Mokutani met Sakurazawa Nyoichi (George Ohsawa) and his wife Lima, and started to study macrobiotics with them, and to eat a macrobiotic diet—after he had undergone two surgical operations for a gastric ulcer and a duodenal ulcer in 1959 and 1960.

In the spring or summer of 1961 he first developed a sample of what is now called *seitan* using only wheat gluten and shoyu as ingredients (no ginger or kombu). He extracted the gluten from wheat flour in his own company. His first goal was to develop a wheat gluten product made from organically grown wheat. He also wanted to make a type of low-fat *tsukudani* made without animal products. Note: *Tsukudani* is a dark and salty Japanese condiment typically prepared from small cubes of shellfish, fish, beef, kombu, or vegetables (gobo [burdock], fuki [butterbur, coltsfoot]) that have been simmered for a long time in soy sauce.

In the fall of 1961 he took a sample of the new product he had invented to George Ohsawa. He took great interest in it and at that point Ohsawa coined the term “seitan” to refer to this product. The term “seitan” had never existed previously in Japan. Ohsawa usually wrote the term “seitan” using the katakana syllabary and characters, however when he occasionally wrote it in Chinese characters, he used the character *sei* (also pronounced “nama” in Japanese) meaning “fresh” or “raw” (since it is made from fresh wheat gluten), plus the character *tan* which is the first character in the Japanese word *tanpaku*, meaning “protein.” Ohsawa also gave him instructions for improving the product by mincing the wheat gluten and simmering it in soy sauce. Today on the front of each bottle of seitan is written “*Sakurazawa Nyoichi shido*” (Made with guidance from George Ohsawa).

Initially, in 1961 and early 1962, he had no intention to sell seitan; he sent samples free of charge to macrobiotic people throughout Japan.

In 1962 Mr. Mokutani started to manufacture seitan for commercial production. Marushima Shoyu K.K. (Marushima Shoyu Co., Inc.), of which he was director and head of the technical department, was the first to make seitan in Japan. After production began, most of the seitan made by Marushima Shoyu K.K. was sold (in small glass jars) to the macrobiotic food wholesalers in Japan (such as Muso Shokuhin, Ohsawa Japan, and Tsurushima [located in Yamaguchi-ken]) and to the macrobiotic community. The first company to export Marushima's seitan was Ohsawa Japan, Inc. (where Lima Ohsawa's sister was president). It was imported to the USA by Bob Kennedy of Chico-San, located in Chico, California.

A friend of Mr. Mokutani's named Mr. Tsurushima owned a company in Yamaguchi prefecture; it made soba and noodles, and sold many macrobiotic foods. Mr. Mokutani asked Mr. Tsurushima to sell his seitan, which Mr. Tsurushima did.

Mr. Mokutani is currently president of two companies: Marushima Shoyu Co., Inc., and Junsei Shokuhin Marushima Co., Inc. (located at Higashi Onomichi 9-2, Onomichi cit, Hiroshima prefecture). The latter company sells soy sauce as well as more than 800 kinds of natural foods. They also sell freeze-dried gluten product which can be marinated in seasoning then grilled as a fat-free meat substitute, or mixed with meat as a seasoning to reduce the meat's total fat content. Address: Chairman, Junsei Shokuhin Marushima Co., Inc., Higashi-Onomichi 9-2, Onomichi-shi, Hiroshima-ken 722, Japan. Home address: Niihama 1-3-57, Onomichi city, Hiroshima prefecture. Phone: 848-20-2506.

2136. *SoyaScan Notes*. 1992. The remarkable food-related creativity that took place in Boston from the late 1960s until the late 1970s, especially within the macrobiotic community (Overview). July 13. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** A flowering of original food product development took place in Boston during this period. There were a number of reasons for this (1) The meeting of two food cultures, Japanese and American, together with new ideas related to diet and health, as embodied in the macrobiotic teachings of Michio and Aveline Kushi. Just as the meeting of two ocean currents leads to a region at the boundary of great biological activity and development, so does the meeting of two cultures. Young Americans were introduced to a host of new basic foods which they quickly began to use and process in new ways. These included miso, tofu, seitan, amazake, umeboshi salt plums, sea vegetables, rice syrup, rice cakes, azuki beans, mochi, and many more.

To cite but four examples: (A) Seitan: Japanese had used seitan as a salty condiment or seasoning. By late 1972 Americans had transformed it into a succulent meat substitute. (B) Tofu: It had never occurred to Japanese to put tofu in a blender. By the mid-1970s Americans in Boston

were combining it with a sweetener to make delectable dairyless tofu cheesecakes and cream pies, or to make low-fat, cholesterol-free salad dressings, dips, and spreads. (C) Amazake: Japanese serve this as a hot beverage like tea, most in teahouses; The only flavoring used is gingerroot. Americans transformed it into delectable ice creams (free of dairy products and sugar), or thick, sweet drinks resembling milk shakes sold refrigerated in plastic bottles. Americans also used amazake as an all-purpose natural sweetener in place of sugar, honey, or maple syrup. They also learned to make a rice milk resembling amazake using commercial purified enzymes instead of koji; at this point, the line separating amazake and rice syrup became somewhat blurred. (D) Rice Syrup: Japanese use *amé* or *mizumamé*, made from koji, as the basis for taffy-like candies or, in very limited ways, as a sweetener. Americans soon began to make rice syrup using commercial enzymes instead of koji and to use it as an all-purpose natural sweetener in place of sugar, honey, or maple syrup.

(2) The closely-knit, almost communal nature of the macrobiotic community in Boston, was one in which many people, mostly young people (including many women), were working closely together with a common vision. New ideas were shared more than guarded or patented. Joel Wollner notes that it was almost like the art community in Paris during the impressionist era of the late 1800s.

(3) The Erewhon retail store (opened in April 1966) provided a ready testing ground for new local products. Many got their start in one or more of these stores. The Erewhon Trading Co. (which started importing Japanese natural and macrobiotic foods in Aug. 1968), and which began wholesaling and distributing in the spring of 1969, greatly helped to expand the market for good products.

(4) The community was fortunate to have a number of exceptionally talented entrepreneurs in the food business, including Paul Hawken, Bruce Macdonald, Roger Hillyard, Bill Tara, and many others. Many of these individuals later left the area to start their own food companies.

(5) It was during this period that the natural foods, macrobiotic foods, organic foods, and vegetarian movements (all closely related, and often based on similar philosophical, ethical, and spiritual values) began to grow in the United States, in part in reaction to the overly-processed, overly chemicalized, unhealthful foods produced by big food companies, and the highly-chemicalized food growing techniques used by American farmers—and in part because of the leadership and inspiration of the community in Boston.

2137. Okada, Yuko; Sandler, Matthew. 1992. Memories of macrobiotics in Boston and Erewhon (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Concerning creativity with foods in Boston from the mid-1960s to the late 1970s. Americans first really

met Japanese foods in Boston via macrobiotics. There were very few Japanese restaurants in the USA before World War II. In Boston there was a sense that everyone was working with food in order to heal the world. Any person who had an idea for a food and made that food, even on a home scale, had access to the shelves of the Erewhon retail store. The early students of macrobiotics in Boston had a mission and felt inspired by Michio Kushi's dream of One Peaceful World. "Michio was able to inspire every person, one by one. Each person felt like they were chosen and privileged. You could feel the winds of change all around you. Anything was possible. The answer to America's problems was macrobiotics." Many people had come to Boston after being heavily involved with psychedelic drugs. They found that the macrobiotic diet could heal the problems that they had developed from using drugs.

Matt Sandler's first best-selling products were carrot cake, banana cake, maple-spice cake. Helen Sandler was known as the cake lady.

Both Yuko and Matthew stress that Paul Hawken was by far the most important person in building Erewhon into a major, pioneering company with a totally new vision. It was Roger Hillyard, rather than Bruce Macdonald who was the first to distribute Erewhon products, which he did out of the back of the Erewhon retail store. Roger cleared a space at the back of the store, bought a mill, and ground then wholesaled whole wheat flour. Bruce's role was to showcase the Newbury Street store by making it into a work of art through creative carpentry and natural interior design. Paul Hawken was very interested in both Japanese language and culture. He learned the language in Kyoto at the Nihongo Gakko (Japanese language school). Paul lived in the Okada's big manor home in Sakai city near Osaka for about 8 months. Then he moved to Kyoto, where he lived on a hill in Sakyō-ku; Alcan Yamaguchi lived right above him in a separate house on the same hill.

Matt thinks that Jeff Flasher played a major role in the fall of Erewhon because he (Jeff) made the decision to greatly expand Erewhon's product line and move into a huge new warehouse. Matt feels that was the fatal decision; he believes Erewhon should have stayed with their good name and limited themselves to selling only high quality products. Flasher was in jail on a drug count and in order to get out he contacted (Matt thinks) Bruce Macdonald. Bruce said he would employ Flasher in his company. So the authorities let Flasher out and he went back to work for Erewhon and basically ruined the company. Address: 1. Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan; 2. P.O. Box 10277, Aspen, Colorado 81612. Phone: 1. 06-942-0341.

2138. Okada, Yuko. 1992. How Muso Shokuhin brought soymilk to America (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Muso wanted to introduce Marusan's soymilk in the foil retort pouch to the USA. They began looking for a major American distributor. First they offered the product to Mike Potter of Eden Foods when Mike was in Japan, but he was not interested because he did not think the product would sell in America. Then they offered the product to Jimmy Silver of Pure Sales; he thought it was a weird product. Then they offered it to Knudson, but Knudson was not interested. Then they offered it to Matt Sandler, who also turned it down.

The first place this soymilk really sold outside Japan was in Australia; Jim Wilson, owner of Spiral Foods in Australia started importing this soymilk (which was named Bonsoy) from Muso in about 1979, packaged in a foil retort pouch. Mike Potter met Jim Wilson at a natural foods convention in Anaheim, California; Muso brought Jim Wilson to the convention and arranged this meeting. Wilson told Potter that Bonsoy sold very well in Australia. Potter told Ron Roller to go to Japan to check out this product—which Ron did. Finally the product was launched at the NNFA show in Denver, Colorado, under the name Edensoy by Eden Foods.

The product named Bonsoy was first sold (exported) by Muso to Spiral Foods in Australia in about 1979. Then it was sold to Bean Supreme in New Zealand in about 1981; Bean Supreme had also promoted the Spiral Foods label. Then it was exported by Muso to Urtekram in Denmark in about 1988, and then it was exported to Mimasa in Spain in about 1990. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 06-942-0341.

2139. Okada, Yuko. 1992. Macrobiotic food companies in England: Greg Sams and Harmony Foods, Peter Bradford and Sunwheel (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Muso Shokuhin's first account in England was Harmony Foods, which had been started by Gregory Sams. Teizo Okada lectured in England. Either Greg or Craig Sams attended one of the lectures and had a consultation with Teizo about his personal medical problems. Greg later invented the idea of spreadable fruit, which later became a famous product worldwide. Harmony now has the lion's share of the spreadable fruit market in the UK.

Peter Bradford founded Sunwheel Foods in England. Peter was in Boston, Massachusetts, working at Erewhon in about 1972-73. He returned to England and several years later he started Sunwheel in competition with Harmony Foods, which had been founded earlier. Muso Shokuhin was Sunwheel's first source of Japanese natural and macrobiotic foods. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 06-942-0341.

2140. Okada, Yuko. 1992. How American Soy Products in

Michigan came into being (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yuko says that he, not Michael Potter, brought together the five companies that formed American Soy Products (ASP), the maker of Edensoy in Michigan. Potter did not speak Japanese and he did not have the connections to pull together this sort of complex joint venture. The idea for the joint was developed jointly from Mike Potter and Yuko Okada as Muso found itself shipping more and more soymilk from Japan to the USA. This soymilk was made from American soybeans and it contained mostly water. After the concept was firm but before the final papers were signed by the five partners, Bruce Macdonald played a role in the process. An employee at a company with which Bruce was involved was a Filipino, who worked for Kawasho in New York. Through this person, Bruce helped bring Kawasho into the deal, and without Kawasho, who was the source of financing, the deal probably would not have happened.

Kawasho was the last of the five partners to enter into the agreement. Marusan and Kawasho would only enter the agreement if Muso did. Kawasho knew nothing about soyfoods or the soyfoods market. They were the company that was least connected with the soyfoods industry and market, but they were also by far the biggest company involved in the venture, with roughly \$2,000 million in annual revenues. In short, Muso became the key link in putting the ASP deal together. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 06-942-0341.

2141. Okada, Yuko; Sandler, Matthew. 1992. Memories of macrobiotics in Japan (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tokyo C.I. (Center Ignoramus) was established before Ohsawa Japan. Tokyo C.I. was basically an educational organization for macrobiotics; they gradually grew into Ohsawa Japan, which was a food company.

Concerning the early history of Muso Shokuhin, Teizo Okada (the father of Yuko Okada) started a macrobiotic foundation in Osaka. It couldn't survive solely from income from teaching, so in 1957 Teizo had to start a food department, which he named P.U. Senta (Principal Unique Center); it sold foods mostly to macrobiotic customers. This food department gradually grew and in about 1967-68 it was restructured. It was still in the same place with the same employees, but its name was changed to Muso Shokuhin. In the early 1960s Teizo also started the macrobiotic periodical titled *Kompas* (Compas), which is still being published; he was the editor for many years. Teizo Okada died on 12 Jan. 1982 of kidney problems.

In 1992 Muso took over all the manufacturers that used to supply Ohsawa Japan. That is, Yuko was able to order from them so that Muso could supply the American customers that Ohsawa Japan was no longer willing to

supply after Sierra Natural Foods in California declared bankruptcy. Ohsawa Japan stopped exporting to the USA but may still be exporting to other countries. Address: 1. Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan; 2. P.O. Box 10277, Aspen, Colorado 81612. Phone: 1. 06-942-0341.

2142. Shurtleff, Akiko Aoyagi; Sandler, Matthew; Okada, Yuko. 1992. Memories of the delectable gluten cutlets served at Tenmi, near Shibuya station in Tokyo, Japan (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yuko Okada thinks that Tenmi first started in about 1968. By the early 1970s, a 10-minute walk from Shibuya station, it was a combination macrobiotic restaurant and food store. The restaurant was named *Tenmi* (Heaven + Flavor) and the store was named *Shizen Shokuhin Senta* (Natural Foods Center). Both were located at Sakuragaoka 4-3, Shibuya-ku 150, Tokyo. Phone: 03-496-7100. Both were still there in 1983.

The head of the restaurant (and a longtime friend of George Ohsawa), Mrs. Michi Ogawa, made one of the most delicious meatless entrees that we have ever tasted—called *Kôfu Katsu* (Gluten Cutlets). *Kofu* (raw wheat gluten) was simmered in a seasoned broth, then dipped in batter, dusted with Japanese-style bread crumbs (*panko*), and deep-fried. Crisp on the outside, succulent and juicy on the inside, it had a flavor and texture remarkably like that of a pork cutlet. It was served on a bed for thinly-sliced strands of cabbage and topped with one's choice of a natural *tonkatsu* (pork cutlet) sauce (based on soy sauce), or a wedge of lemon.

Such a tasty cholesterol-free menu item could be a hit at almost any restaurant in the Western world—served with either of the above sauces, or with tartar sauce.

From an historical point of view, these Gluten Cutlets, made with seitan, were completely different from the typical Japanese macrobiotic seitan, which was a dark brown salty seasoning or hors d'oeuvre to eat while a person was drinking, as a yang balance for the yin of the alcohol. Address: 1. Soyfoods Center, Lafayette, California 94549; 2. P.O. Box 10277, Aspen, Colorado 81612; 3. Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 510-283-2991.

2143. Eden Foods, Inc. 1992. A few trade secrets about light soy drinks (Ad). *Whole Foods*. Aug. p. 80.

• **Summary:** This full-page, color ad explains that any consumer can make a "light" soy drink by just diluting Edensoy with 33% water. Edensoy prefers not to sell such a product since that would involve shipping 33% more water, using extra packaging, energy, etc.

The ad claims that Edensoy tastes better because it is made from a special soybean variety that has a lower yield than other varieties.

This ad contains one completely incorrect statement: “In 1986, Eden Foods became the first American company to manufacture soy beverages in the U.S.” According to the SoyaScan database, at least 184 commercial soymilk products were made in the USA before Edensoy; several of these are still on the market (Soyagen, Soyamel) and are sold nationwide.

Another surprise: By 2002 Eden was making and selling “Edensoy Light.”

This ad also appeared in *Health Foods Business* (Aug. p. 12), *Whole Foods* (Sept. 1992, p. 22), and *Natural Foods Merchandiser* (Sept. 1992, p. 63). Address: 701 Tecumseh Rd. Clinton, Michigan 49236.

2144. Krizmanic, Judy. 1992. Savvy new soyfoods. *Vegetarian Times*. Aug. p. 82-83.

• **Summary:** Highlights, with color photos, Living Lightly non-dairy soy ice cream from Turtle Mountain, Toffle (eggless tofu waffle) from Dae Han, Tofutti Better than Cream Cheese, Westsoy Lite Non Dairy Creamer, Pita Melts from Health in Wealth, Meatless Tofu Steaks from White Wave, Ken & Robert’s Veggie Pockets.

“Soy much to learn. Want to learn more about soy? Send a self-addressed, stamped, business envelope to the Soyfoods Center...”

2145. Roller, Ron. 1992. Why is the price of soymilk higher than that of cow’s milk (Interview). *SoyaScan Notes*. Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The main factor for the higher cost of soymilk is that vastly larger amount of dairy milk produced; soymilk is not yet able to benefit from these economies of scale.

Second is the distribution network. Cow’s milk is a local or regional product. Many dairies deliver milk in their own trucks direct to supermarkets and other retail stores. This means both that distribution costs are relatively low and that there are few if any middleman distributors. By contrast, soymilk is often shipped several thousand miles at the cost of about \$0.10 per liter. As the soymilk market grows and soymilk comes to be produced on a more regional basis, distribution costs will drop, making soymilk more competitive with cow’s milk.

The third factor is the aseptic carton used for soymilk, which is much more expensive than the typical Pure Pak carton or plastic jug used for cow’s milk. Yet because soymilk must be shipped nationwide, this carton is the least expensive available form of packaging—all things considered. Included in the price of the carton is the cost of the film (the per package price decreases as the number of packs ordered increases, with breaks at 250,000 to 500,000 to 1 million), the cost of the outer case carton, waste cartons, rental on the packaging machines, and the investment in the building in which the filling and packaging takes place. Address: President, American Soy Products, 1474 N. Woodland Dr.,

Saline, Michigan 48176. Phone: 313-429-2310.

2146. Waxman, Howard. 1992. History of Essene, natural foods retailer and distributor (Interview). *SoyaScan Notes*. Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Essene began in March 1969 as a macrobiotic natural foods retail store named Essene Macrobiotic Supply at 2031 Samson St. in Philadelphia, Pennsylvania. Primarily a juice and snack bar, it was founded by Denny Waxman, Charles Smith (Smitty), and Stanley Petrowski; Stanley left after several months. Howard was not involved with the company at that time. After about a year, the growing retail store moved to 320 South St. (at 3rd) in Philadelphia and changed its name to Essene Traditional Foods.

By Feb. 1971 a distribution company, also named Essene Traditional Foods, was started in the retail store—following the Erewhon model. An ad in *East West Journal* (Feb. 1971, p. 10) shows that “Essene,” at 320 South St., was a distributor and wholesaler of natural and traditional foods, including miso, tamari, sea vegetables, and organic grains, vegetables, and beans. They made stone-ground wheat flour on the premises. The distribution company soon outgrew the store and by May 1972 had moved into a small warehouse at 58th & Grays Ave., Philadelphia PA 19143. Then it moved to a larger warehouse in Boyertown, about 1 hour drive outside Philadelphia. The distribution company went out of business in about 1976-78; it had been in business for about 5 years.

In 1981, when Bill Tara returned to the United States to become director of the Kushi Institute of Boston, Massachusetts, Denny Waxman, head of the Philadelphia East West Center, went to London to run the Community Health Foundation and the Kushi Institute. He stayed two years. Denny now lives in Portugal.

The retail store is still in business, owned by Howard. He moved to his present address about 3½ years ago, from 320 South Street, Philadelphia, PA 19147. Address: Owner, Essene Natural Foods, 719 S. 4th St., Philadelphia, Pennsylvania 19147. Phone: 215-922-1146.

2147. Wainer, Howard. 1992. Leading trade publications in the natural and health food industry (Interview). *SoyaScan Notes*. Sept. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In 1984 the leading trade magazines in the natural/health foods industry (in terms of circulation and total ad space) were *Health Foods Business*, followed by *Health Foods Retailing* (which had been #1 for years prior to about 1982-83), and *Natural Foods Merchandiser*; with *Whole Foods* way down in fourth place.

Today, in 1992, *Natural Foods Merchandiser* is in first place (they first moved into first place in 1984), followed closely by *Whole Foods*, with *Health Foods Business* way down in third place. These are the only three publications

in the market, since *Health Foods Retailing* went out of business in 1987. This ranking is based on total ad pages, but since NFM is tabloid size, Wainer counts each tabloid page as two-thirds of a page to reduce it to an 8.5 by 11-inch equivalent. Thus Wainer counts 10 pages of ad space in NFM as equal to 6.67 pages in *Whole Foods*. In 1989 and 1990 *Whole Foods* was number 1 based on this method of comparison.

Whole Foods currently has a larger circulation (11,000) than NFM (9,500). Whole Foods tries to appeal to stores of all sizes, whereas NFM focuses more on larger stores in terms of editorial. Whole Foods aggressively seeks to find and mail to small stores; NFM does not. Both magazines are equally oriented to the natural foods and the health foods trade.

A magazine cannot exist primarily for ad revenue, with a message and editorials that are self-serving. The readers catch on very quickly that the magazine has nothing important to say, so they stop reading the magazine, and once they stop, the advertiser's message is not seen. A magazine must have integrity and independence. The key is a good balance between quality articles and steady ad revenues. The reader is the key to the magazine.

To find out how readers like a magazine, publishers send out feedback cards, do surveys, read letters, etc. Readership studies done by Whole Foods indicates to them that they are the leader. To the question: "If you could only receive one magazine, which would it be?" the most readers answer *Whole Foods*. Note: According to the Nov. 1992 issue of *Whole Foods* (p. 72), the average number of copies of the magazine printed per month over the past year was 10,195.

Nowadays, supplements seem to be more important than foods in the natural/health foods industry. Consumers want beta-carotene (found to be good for the heart for preventing cancer); niacin is also very popular. Organic produce has always been popular and is getting more and more popular, but now supermarkets carry it.

Concerning the NLEA: "For the next two years I think we have it beat. During that period the industry will be funding more solid studies on the benefits of supplements; the research has already begun." Address: President, Whole Foods Communications Inc. and publisher of *Whole Foods* magazine, South Plainfield, New Jersey 07080. Phone: 908-769-1160.

2148. **Product Name:** Edensoy Extra: Dairy-Free Soy Beverage [Original, Vanilla].

Manufacturer's Name: American Soy Products, Inc.

Manufacturer's Address: 1474 N. Woodland Dr., Saline, MI 48176. Phone: 800-248-0301.

Date of Introduction: 1992 September.

Ingredients: Original: Purified water, organic soybeans, malted cereal extract, calcium [calcium carbonate], kombu (seaweed), job's tears, organic barley, sea salt, vitamin E,

beta carotene, vitamin D-2. Vanilla: Same but vanilla extract listed before calcium.

Wt/Vol., Packaging, Price: Tetra Brik Aseptic cartons. 250 ml (8.45 fluid oz), or 1 liter (33.8 oz, 1.06 quart).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: This product is marketed by Eden Foods, Inc., 701 Tecumseh Rd., Clinton, Michigan 49236.

Ad in *Whole Foods*. 1992. Oct. p. 11. "Edensoy Extra. Read all about it." "New. Fortified with beta carotene, vitamins E & D and calcium. A significant source of vitamins, minerals and protein. Ideal for people who are lactose intolerant. Made with OCIA certified organically grown whole soybeans. Low in saturated fats and sodium; no cholesterol... Sea vegetables provide a natural source of beta carotene (for vitamin A) and soybeans provide the base for vitamin E. Both are powerful antioxidants that protect the body from free radical damage. We've also added calcium carbonate from limestone..." A color photo shows the product package. Yellow sunlight drifts down through a forest.

2149. Arnold, Monica; Whiteman-Jones, Michael. 1992. Natural products manufacturers, distributors eye mass market: as consumer demand for healthful foods grows, the mass market sales potential is becoming too large to ignore. *Natural Foods Merchandiser*. Sept. p. 48, 50, 52.

• **Summary:** A pie chart shows the three main segments of the natural products market. Total sales are \$4.64 billion. Independent natural products stores: \$3.15 billion. Mass market: \$922 million. Health food chains: \$571 million.

A bar chart shows that natural product sales have grown from \$601 million in 1985 to \$922 million in 1991.

Tree of Life (a large distributor) is working to tap the mass market.

2150. Dominick, Anne Westbrook. 1992. Llama Toucan & Crow: A country store for the health aware. *Health Foods Business*. Sept. p. 78-81.

• **Summary:** The Llama store opened in 1976 and moved to its present location in 1977. They are centered in the busiest section of downtown Brattleboro, a small town of 25,000 people. The owner is Jane McFadden, wife of Barclay McFadden. "Earning \$502,000 annually, Llama Toucan & Crow was originally the site of a [natural foods] distributor and a retailer called Llama Trade Market. The distribution part was bought by a company that became Stow Mills, a major health food wholesaler. But according to [Jane] McFadden, whose husband, Barclay McFadden is Stow Mills CEO, it didn't buy the name. Then owned by McFadden and two other people, each chose a favorite name and Llama Trade Market became Llama Toucan & Crow."

2151. *Natural Foods Merchandiser*. 1992. Whole Foods, Fresh Fields expand territories. Sept. p. 26.

• **Summary:** Two of the industry's natural foods chains are Whole Foods Market (of Austin, Texas) and Fresh Fields (of Rockville, Maryland; President: Mark Ordan). Each is adding new stores to its chain. After the new additions, there will be a total of 16 Whole Foods Markets across the United States, and 6 Fresh Fields stores mostly on the East Coast.

2152. *Natural Foods Merchandiser*. 1992. NOSB meets in Colorado. Sept. p. 18.

• **Summary:** "Ft. Collins, Colorado—The 15-member National Organic Standards Board (NOSB) met as a body for the second time July 7 to 10 on Fort Collins, CO. The board spent one day on a tour of organic production facilities and three days in intensive meetings."

One point of heated discussion "was a possible interpretation of language in the Organic Foods Production Act of 1990 that would cast the role of private certifiers into doubt."

A photo shows the members of NOSB and lists their names.
